## **Staff Screening Protocol for COVID-19**

- Staff answers “Yes” to one or more of the questions on the Infectious Disease Screen
- Isolate staff in private area/room and place surgical mask on staff
- Contact Infection Preventionist/designated medical personnel for advice
- Contact supervisor
- Ask staff to call primary care physician (PCP) or ED depending on severity of illness
- Send staff home
- Staff to self-quarantine for 14 days
- Staff may return earlier only if PCP diagnoses Influenza (with a positive test for Influenza virus). In that case, staff will submit a clearance note from PCP attesting to their full recovery
