## Games for good: Reaching adolescents where they are for better health outcomes

### Guest Speaker: Lynn E. Fiellin, MD

Lynn E. Fiellin, M.D. is a Professor of Medicine at the Yale School of Medicine, at the Yale Child Study Center, and at the Yale School of Public Health. Her work focuses on developing and testing novel videogame interventions to promote health and reduce risk in youth and young adults. She has received funding from the National Institutes of Health including NICHD, NIDA, and NIAAA, the CVS Health Foundation, the Robert Wood Johnson Foundation, the NIH/FDA, and the BEST Foundation/Conrad N. Hilton Foundation. . She and her team of researchers, game developers, and community partners have created and evaluated interactive evidence-based games addressing a number of health-related and medical issues in adolescents ranging from mental health, opioid misuse, smoking/vaping, and sexual health and HIV/STI prevention. Her digital health game interventions are designed and built with input from adolescents at every step of development.

**March 30, 2023**  
**1:00 pm - 2:00 pm**  
**Via Zoom**

#### LEARNING OBJECTIVES:

- Describe how to use videogames as interventions targeting health outcomes in adolescents.
- Describe how to translate formative work and collaborations with community partners to effective interventions.
- Describe how the in-game data produced by videogame software is a rich source of valuable information on adolescent learning.
