Calling all farmers and agricultural cooperatives – interested in applying for a Farm Transition Grant? A virtual workshop to assist interested applicants will occur on **Wednesday, February 9, 2022**, at 10:00 a.m. Please click here to register for the webinar. The presentation will be recorded.
CT Grown Campaign Surpasses 100 Million Impressions

Producers Encouraged to Fill Out Survey for Feedback

In March 2021, Connecticut Department of Agriculture (DoAg) revealed the refreshed CT Grown logo and tagline, “A Way of Life”, with the launch of a multifaceted initiative to highlight agriculture and aquaculture products grown and raised in Connecticut.

The goal: connect with audiences to highlight the value of buying local agriculture and aquaculture products and to highlight the importance of supporting agriculture and aquaculture, while also providing Connecticut farmers with the tools to engage in the campaign and promote the CT Grown brand as well.

The promise: 100 million impressions by the end of 2021 gained through a comprehensive marketing campaign surrounding the CT Grown program to grow brand awareness.

The delivery: Connecticut Department of Agriculture worked with Miranda Creative, Inc. to not only update the CT Grown logo, but also create a consumer-facing website, CTGrown.org. The website assists visitors in finding a farm, farm stand, or farmers’ market near them through the interactive map done in collaboration with CT NOFA. An upcoming events section helps direct consumers to happenings near them – from special events at farm wineries to on-farm festivals, farmers’ markets and more. The blog section highlights not only where and how to find CT Grown products, but how to incorporate them into daily life, by including recipes and gift ideas.
broadcast television, email marketing, search advertising, digital streaming, event promotion, and social media. The CT Grown Facebook and Instagram accounts gained thousands of followers, and there were more than 44,000 posts using the hashtag #ctgrown. Billboards throughout the state utilized images taken at Connecticut farms showcasing the diversity of CT Grown products, including fruits, vegetables, dairy, seafood, wine, meats, and maple syrup.

Additionally, throughout the campaign, materials were developed with producers in mind. These included a branding kit with applicable logos to feature on their CT Grown products, updated CT Grown tents for vending at farmers’ markets and events, and workshops to assist them with the technical aspects of making their own social media and marketing efforts more successful.

As of mid-December 2021, the Connecticut Grown campaign has surpassed the goal with 112,185,857+ impressions.

Next Steps: Just like farming, our work is not yet done. As we start the new year, we want to hear from you, our producers. At the beginning of this campaign we asked for your input, and we are asking again in order to meet the needs of the agriculture industry.

We would appreciate three minutes of your time to share your feedback by completing the survey below. We value and appreciate your input as we work together to strengthen CT Grown.

Take the survey.

If you are looking for more information on adding events, downloading the new CT Grown logo, adding your farm to the interactive map please visit www.CTGrown.org.

As always, the mission of CT Grown is to sustain and grow Connecticut agriculture and aquaculture. By increasing our marketing efforts and strategies, we strive to increase consumer awareness and exposure of CT Grown products and showcase the diversity of Connecticut’s 5,500 farms.
HIGHLY PATHOGENIC AVIAN INFLUENZA CONFIRMED IN WILD BIRDS

USDA APHIS has confirmed highly pathogenic avian influenza (HPAI) in wild birds located in NC and SC. Anyone involved with poultry – commercial or backyard flocks alike – should review their biosecurity plan and enhance their biosecurity practices to assure the health of their birds.

Avian influenza (AI) is caused by an influenza type A virus which can infect poultry (such as chickens, turkeys, pheasants, quail, domestic ducks, geese, and guinea fowl) and is carried by free flying waterfowl.

As part of our efforts to prevent the introduction of Avian Influenza into Connecticut poultry, the department conducts surveillance testing of birds throughout the state. Commercial and non-commercial flock owners are encouraged to maintain high levels of biosecurity and to report any unexplained bird illness or death immediately.

to do low or no cost testing of birds for the Avian Influenza virus. We also have strict importation restrictions to prevent the spread of the virus in our state.

Bird owners need to be aware and report anything out of the ordinary. Anyone who may suspect a poultry on their farm may have died from unknown causes should call the State Veterinarian at 860-713-2505 or email ctstate.vet@ct.gov. Signs of Avian Influenza include depression, decreased feed and water consumption, decreased egg production, soft or misshapen eggs, and respiratory signs (coughing and sneezing). You can also find out more by visiting the Connecticut Department of Public Health's pandemic flu webpage or visit the USDA's Bird Flu website.

COVID-19 RESOURCES

- **CT COVID-19 Knowledge-Base**: COVID-19 resource to answer your questions on self-tests, testing sites, and more.
- **Self-Test Page**: Information about self-tests.
- **CT COVID-19 Response**: Current information including data tracker, testing and vaccine sites, reopening guidance and more.

Agriculture businesses, non-profits, and other organizations should follow the sector rules that apply to them. Private business owners can implement or continue to require social distancing and other measures as deemed necessary.

The Department of Agriculture has archived information from various sources related to COVID-19, which can be found here: [https://portal.ct.gov/DOAG/Commissioner/Commissioner/COVID-19-Resources-for-Farmers](https://portal.ct.gov/DOAG/Commissioner/Commissioner/COVID-19-Resources-for-Farmers).

**REGISTER FOR ON-FARM MOBILE VACCINATION SITE**

Farms interested in hosting a mobile vaccination clinic for farm employees are encouraged to fill out the DPH vans intake form.

2022 FARM TRANSITION GRANT AVAILABLE

The 2022 Farm Transition Grant (FTG) is now available at www.CTGrown.gov/grants. Applications will be accepted until March 8, 2022, at 4:00 p.m.

The 2022 program will again provide matching funds to Connecticut farmers and agricultural cooperatives for the diversification of existing farm operations, transitioning to value-added agricultural production and sales, and other venues in which a majority of products sold are grown in the state.

Four grant categories, for which eligible applicants can apply, are available. Applicants will choose one of the four categories of the Farm Transition Grant and submit an application to demonstrate how their project proposal will advance farming and agriculture.

Grant guidelines and forms can be found at www.CTGrown.gov/grants. Additional detail on match requirements and eligible expenses can be found in the guidance. All applications will be submitted electronically via the new DoAg Grants Portal.

A virtual workshop to assist interested applicants in learning about the structure of the grant and application process will occur on Wednesday, February 9, 2022, at 10:00 a.m. via a Webex call. Please click here to register for the webinar. The presentation will be recorded and posted to the agency website if you are unable to attend the live event.

Questions regarding the Farm Transition Grant can be directed to Alison Grabarz at Alison.Grabarz@ct.gov. More information on the grant categories, application requirements, and submission process can be found online at www.CTGrown.gov/grants.

The FTG is a competitive matching reimbursement grant for Connecticut agricultural producers and agricultural cooperatives. The Farm Transition Grant is provided through the State of Connecticut Farm Transition Grant Program, established in 2005 through Public Act 05-228, An Act Concerning Farmland Preservation, Land Protection, Affordable Housing, and Historic Preservation.

NORTHEAST DAIRY BUSINESS INNOVATION CENTER INVESTS IN
The Northeast Dairy Business Innovation Center (NE-DBIC) invests in projects that advance the regional dairy industry. A range of NE-DBIC funding opportunities totaling approximately $3 million will be available for farmers, processors, and industry partners in 2022:

- **January** – Dairy Product Packaging Innovation Grant: Funding for modernized packaging initiatives that prioritize sustainability, scalability, and marketability.
- **February** – Multi-Business Dairy Agritourism Grant: Funding for projects that elevate multiple dairy businesses through activities that engage consumers and promote regionally produced dairy products.
- **February** – Grazing, Forage, & Alternative Management Cohort Technical Assistance Contract: Contracts for service providers to offer technical assistance to cohorts of farmers in grazing, forage production, or alternative farm management strategies.
- **April** – Dairy Marketing & Branding Services Grant: Funding for value-added dairy processors to access professional services to implement marketing tactics, brand improvements, and overall strategy.
- **June** – Dairy Processor Innovation Grant: Funding for dairy processors to make key developments in operations, products, marketing, and other strategies to position their businesses for long-term success.
- **October** – Dairy Farm Innovation Grant: Funding for dairy farms to take a holistic approach to implementing community- and climate-forward dairy production and business strategies.

For more information about the projects follow the link below.

**NRCS ANNOUNCES URBAN AGRICULTURE INITIATIVE IN CONNECTICUT**

Thomas L. Morgart, State Conservationist for the USDA-Natural Resources Conservation Service, has announced the agency is rolling out its Urban Agriculture Initiative in Connecticut and will be accepting applications for FY2022 funding through March 18, 2022.

Urban agriculture pioneers are taking action in their communities growing not only fresh, healthy produce, but increasing opportunity and knowledge and improving the beauty of their neighborhoods. Through this initiative, NRCS will help urban farmers care for the natural resources on their land – soil, water, air, plants, and animals by addressing soil health, irrigation and water conservation, weeds and pests, and high tunnels.

For more information visit the link below.
NEW & EXPANDED OPPORTUNITIES FOR CLIMATE-SMART AGRICULTURE

The U.S. Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) is announcing several new and expanded opportunities for climate-smart agriculture in 2022. Updates include nationwide availability of the Environmental Quality Incentives Program (EQIP) Conservation Incentive Contracts option, a new and streamlined EQIP Cover Crop Initiative, and added flexibilities for producers to easily re-enroll in the Conservation Stewardship Program (CSP). These improvements to NRCS’ working lands conservation programs, combined with continued program opportunities in all states, are part of the Biden-Harris Administration’s broader effort to support climate-smart agriculture.

For more information follow the link below.

CT HEMP PRODUCER WEBINAR

The Connecticut Department of Agriculture (CT DoAg) will host a hemp producer webinar on January 25 from 5:30-6:30 p.m. to review the changes contained within the newly approved state plan for hemp production. The approved plan supports the Connecticut hemp law and governs registration, production, and compliance for hemp cultivation beginning in 2022.

For more information on the webinar or hemp regulation in Connecticut, please visit the Connecticut Hemp Program webpage.

SIX COUNTIES APPROVED FOR FEDERAL AGRICULTURE DISASTER DECLARATION DUE TO HURRICANE IDA

On Dec. 21, Governor Ned Lamont announced that he has received notice from U.S. Department of Agriculture Secretary Tom Vilsack that an agriculture disaster declaration has been approved for portions of Connecticut due to the impact of the remnants of Hurricane Ida on the state in early September.
eligible to be considered for certain disaster assistance from the Farm Service Agency to cover production losses from the storm, such as emergency loans, provided that eligibility requirements are met. While Middlesex and New London are named as primary counties in the declaration, the other four are named as contiguous disaster counties, making farmers in all six of those named counties eligible for assistance.

Farmers will have eight months from the date of the secretarial disaster declaration to apply for emergency loans. The Farm Service Agency considers each emergency loan application on its own merits, taking into account the extent of production losses on the farm and the security and repayment ability of the operator. Farmers interested in applying for the assistance must contact their local Farm Service Agency office.

In August, a similar federal agriculture disaster declaration was approved for Connecticut as a result of the damages caused by Tropical Storm Elsa, which impacted the state in early July. That particular declaration applies to all eight of the state’s counties, and farmers statewide are still eligible to apply for assistance under it.

EDA GOOD JOBS CHALLENGE DEADLINE EXTENDED

The Good Jobs Challenge is designed to support the needs of an applicant’s identified regional workforce system through a single integrated award. EDA will make awards to either the System Lead Entity of a regional workforce system or the Backbone Organization of a sectoral partnership as the lead applicant. These organizations may make sub-awards to other eligible recipients as necessary to the proposed project and as approved by EDA. The deadline to apply has been extended to February 10, 2022.

Eligible applicants for EDA's Good Jobs Challenge include a(n):

- District Organization;
- Indian Tribe or a consortium of Indian Tribes;
- State, county, city, or other political subdivision of a State, including a special purpose unit of a State or local government engaged in economic or infrastructure development activities, or a consortium of political subdivisions;
- Institution of higher education or a consortium of institutions of higher education; or
- Public or private non-profit organization or association, including labor unions, acting in cooperation with officials of a political subdivision of a
Individuals or for-profit entities, including for-profit institutions of higher education, are not eligible. For more information follow the link below.
