An overall risk score is determined by the highest rating assigned to any of the seven (7) factors outlined in section 8(A) of this Directive, with the exception of the sex offender treatment need score in Section 8(B) of this Directive. No inmate with a sex offender treatment need score of 2 or greater shall be assigned an overall score below level 3 without authorization from the Commissioner or designee. The overall score shall be assigned taking into account the inmate's risk assessments and behavior during confinement.
  - D. Overrides. An overall risk score may be increased or decreased through an override. An override of the inmate's overall risk score shall be documented in writing and approved by the Unit Administrator in consultation with the Director of Offender Classification and Population Management or designee. Reductions of risk level shall be considered after a sentenced inmate has completed a prescribed amount of time in confinement as noted below. Any inmate serving a life sentence with no possibility of parole or release is not eligible for a risk level decrease without the review and approval of the Director of Offender Classification and Population Management. The percentage of time served for determinate sentences shall be computed on the estimated release date for offenses committed prior to October 1, 1994, and on the maximum release date for offenses committed on or after October 1, 1994. The percentage of time served for indeterminate sentences shall be computed based on the projected discharge date. Parole status shall only be considered when a firm Voted to Parole (VTP) Date has been granted by the Board of Pardons and Paroles, at which time the VTP Date may be considered the release date for percentage of time calculations. Any inmate serving a sentence for a sex related offense or having a history of sex related offenses shall be approved by the Commissioner or designee prior to being classified below risk level 3. The Director of Security shall review the designation in accordance with Administrative Directive 6.14, Security Risk Groups.
13. Risk Level Reclassification from Community Placement. Risk level increases from overall risk level 1 for inmates remanded to custody and whose community transfer has been revoked, requires a risk reclassification hearing. Also, the parole supervisor shall provide the inmate with the following:
- A. Within 72 hours of the re-incarceration, a statement of reasons for the proposed increase from risk level 1 status except those that may cause a security problem or undue harm to the public;
  - B. A copy of any documents pertaining to such statement of reasons unless the security of the facility and public warrants otherwise.
  - C. A notification of the date, time, and location of a hearing on such proposed revocation. This notice shall state that the inmate may appear at such hearing with a correctional advocate as a representative and present documents at such hearing on the inmate's behalf.

Any inmate in community placement status and returned to a level 2 or higher security facility shall have a classification hearing within 14 days of return to the facility. This time limit may be extended for cause. A disciplinary hearing shall not substitute for a classification hearing. A classification hearing shall not consider disciplinary matters unless the inmate has been found guilty of an offense under Administrative Directive 9.5, Code of Penal Discipline. A classification hearing may consider reclassification for a non-chargeable matter and return the inmate to a higher security facility prior to a disciplinary hearing on a chargeable offense. Classification shall not be used to avoid a disciplinary hearing for an inmate. Records of the disciplinary hearing, including information provided by the inmate, shall be forwarded to the counselor supervisor or higher authority as appropriate. If the inmate's assignment to risk level 1 is revoked, the counselor supervisor or higher authority shall state the reasons in writing and change the risk level. The risk score will be increased to overall risk level 2, except in the case where new information would result in a level increase due to a change in one of the risk factors.

- D. Notwithstanding the above provisions, this criterion shall not interfere with the use of discretion invoking incremental sanctions by a parole officer or higher authority for technical, non-criminal violations to include, but not be limited to intervention, increased programming, detoxification and electronic monitoring through the Community Release Intervention Program as enumerated below:
1. When necessary, inmates shall be temporarily remanded to custody by the Parole and Community Services Unit. All remands to custody shall be documented on CN 9202, Offender Classification History Form and placed in the inmate's master file;
  2. No classification transaction shall be required, unless it has been determined that the inmate will not be placed back into the community;
  3. Classification staff shall notify Addiction Services when an inmate is returned for a positive urinalysis so as to provide necessary intervention;
  4. The Parole and Community Services Unit shall review and track each case and make necessary modifications to the inmate's conditions of release for reinstatement into the community; and,
  5. If it is determined by the Unit Administrator, in consultation with the Director of Parole and Community Services, that the inmate is not appropriate for re-release, the inmate shall then be scheduled for a reclassification hearing and reviewed for an overall level increase as appropriate and considered for a transfer to a sentenced facility if the inmate has greater than 15 days to discharge.
14. Risk Level Reclassification Resulting from New Information. Whenever new information is received that is relevant to an inmate's risk or needs classification, a reclassification review shall occur.
15. Inmate Involvement. An inmate should be involved in program decisions to the extent feasible. The inmate shall be seen by classification staff for every objective classification action except Percentage-of-Time Reviews unless the inmate is denied. The inmate may appear before the classification staff as required by this Directive, as long as the appearance does not jeopardize the safety and security of the facility, staff, or other inmates. If an appearance of the inmate is required, the inmate shall receive notice 48 hours prior to classification review. An inmate may waive, in writing, the notice requirement or any appearance. Within five (5) days of a classification decision, the decision, including the overall risk score and need ratings assigned the inmate as well as any changes of these ratings shall be shared with the inmate in writing. A classification decision may be appealed to the Unit Administrator or designee within 15 days of the decision.
16. Level of Review Required for Classification Reviews. The Unit Administrator shall designate staff within the unit responsible for classification reviews and assignments. With the exception of classification assignments made by the Director of Offender Classification and Population Management, classification decisions may

be appealed to the Unit Administrator. The Unit Administrator shall respond in writing within 15 business days of receipt of the appeal.

17. Inmate Supervision Requirements. Supervision requirements during transport shall be in accordance with Administrative Directive 6.4, Transportation and Community Supervision of Inmates. All other inmate supervision outside the facility's perimeter with the exception of Administrative Directive 9.8, Furloughs, shall be governed by an inmate's risk level in accordance with the following:
- A. An inmate classified as level 3, 4 or 5 shall be excluded from a job or program assignment that is outside the facility's security perimeter. Any security classification level 3, 4 or 5 inmate, who is to be moved beyond the facility's security perimeter, shall be managed in accordance with Administrative Directive 6.4, Transportation and Community Supervision of Inmates.
  - B. Any inmate who is placed on facility-based outside clearance, shall be intermittently observed by a Department of Correction employee at a minimum of once every hour or continuous if deemed appropriate by the Unit Administrator or designee.
  - C. An inmate placed on a community service work detail shall be intermittently observed by an approved trained agent of the municipality or other state agency at a minimum of every 15 minutes, or continuously if deemed appropriate by the Unit Administrator or designee. Additional stipulations and supervision requirements shall be pursuant to the provisions of Administrative Directive 10.5, Public Service Work, and enumerated in a Memorandum of Understanding between the Department of Correction and the requesting town, municipality or state agency.
18. Other Classification Actions.
- A. Outside Work Assignments. The Unit Administrator shall be the approving authority for any inmate placed on facility-based outside clearance, community service work detail, or work or education release. Prior to authorization to participate in the above listed programs, a review of the inmate's special management information and any discretionary release denial or return within the past 30 days (if any), shall be conducted to determine the inmate's suitability for such programming. Authorization to participate shall be based on the following minimum eligibility criteria utilizing CN 9201, Outside Work Assignment Application:
    - 1. Risk level 1 or 2;
    - 2. No sex offender treatment score greater than a 1;
    - 3. No level 4 convictions, past or current offense;
    - 4. Mental Health and Medical need scores less than 3 unless cleared by Health Services;
    - 5. Within 36 months of end of sentence or voted to parole date;
    - 6. No return from escape within 1 year;
    - 7. No Class A disciplinary reports within 120 days and no Class B disciplinary reports within 60 days;
    - 8. No detainer score greater than a 1; and,
    - 9. No history of classification as an overall risk level 5.

Any inmate already approved or being considered for outside clearance who has been denied or has returned from any discretionary release program such as community release or parole within the last 30 days, shall be evaluated by the Unit Administrator to assess the appropriateness of an outside work assignment.

Any inmate already approved for outside clearance that has received a disciplinary report or has been involved in any incident shall also be evaluated by the Unit Administrator for continued placement on outside clearance.

- B. Indeterminate Sentences. The Commissioner may release any inmate sentenced to an indeterminate sentence pursuant to Sections 21a-277(d) or 21a-279(e) of the Connecticut General Statutes, at any point during that sentence. The Unit Administrator may recommend release at any time during the sentence. Only favorable recommendations shall be forwarded to the Commissioner's Office via the Director of Offender Classification and Population Management. The initial review shall be made after the completion of initial classification and a 30-day period of confinement. If denied, the Unit Administrator shall set another review date not more than six (6) months from the decision date. Each review and disposition shall be documented on CN 9202, Offender Classification History Form in Section 5 of the inmate's master file.
