Introduction to CEC

Correctional Enterprises of Connecticut (CEC) is a unit within the Administration Division of the State of Connecticut Department of Correction. CEC's Programs offer inmates opportunities to be productive, learn new skills, be accomplished and responsible, thus aiding in the overall safety and security of the agency. This is accomplished through inmate participation in CEC's production shops, which reduce prison idleness, instill a work ethic, and promote skill development in a vocational education and business environment within institutional walls, which replicates private industry.

Correctional Enterprises Mission Statement

Correctional Enterprises of Connecticut supports the Department of Correction mission to protect the public and its staff while providing safe, secure and humane supervision of offenders. This is accomplished through providing structured employment and training programs for offenders, therefore reducing prison idleness, supporting the department's goal of successful community reintegration and at the same time producing quality saleable goods and services for all state agencies, municipalities, and nonprofits, while remaining financially self-supporting.

Statutory Authority / Who Can Order?

Volume 6, Section 18 of the Statutes of Connecticut (State Use Law) 18-88 – G states that "Each state department, agency, commission, or board shall purchase its necessary products and services from the institution industries if such products and services are produced or manufactured and made available by such industries, provided such products and services are of comparable price and quality and in sufficient quantity as may be available for sale or offered for sale outside the institutions."

Correctional Enterprises of CT is permitted to offer goods and services only to state agencies, federal government, municipalities, and qualified not-for-profit entities.

DataCon

Our DataCon operation provides several types of services. The inmate program participants benefit because they are introduced to and trained in marketable skills which they can use upon their release. Our customers benefit by using Datacon for labor intensive, mundane work services, because they can reallocate their workforce to other higher priority projects and needs, while saving their agency money. Although the CEC staff and inmate program participants receive ongoing HIPAA training to ensure confidentiality, CEC opts not to take on projects which include personally identifiable information, such as social security numbers, bank account numbers, etc. As the work is performed within the walls of a correctional facility, and security is audited on a continuing basis, your materials are secure to the highest levels within our control.

Some of the services offered include:

Data Entry

Our system allows us to process information to your specifications in a timely manner and ensures optimum customer confidentiality.

Optical Imaging

Conversion of paper documents into an electronic format. Output can be indexed to ease in retrieval of information.

Microfilm / Microfiche Conversion

Conversion of microfilm or microfiche into an electronic format. Output can be indexed to ease in retrieval of information.

Map Scanning

Labor Intensive Tasks

Mail preparation / Stuffing Envelopes

In many cases, CEC can also print the documents and/or envelopes needing to be prepared.
