<tr>
<td>Municipalities and Councils of Government in New Haven and Fairfield Counties</td>
<td>Municipalities and Councils of Government in New Haven and Fairfield Counties</td>
<td>webinar</td>
<td>Provided Phase 1 vulnerability assessment to impacts of climate change and criteria for pilot geography for HUD Phase 2 application for Letter of Interest submission.</td>
</tr>
<tr>
<td>Bridgeport, Fairfield, GBRC, Meriden, Milford, New Haven, Norwalk, SCRCOG, Stamford, West Haven, WestCOG, Woodbridge</td>
<td>Municipalities and Councils of Government in New Haven and Fairfield Counties</td>
<td>Receipt of Letters of Interest from municipal and council of government in MID-URN</td>
<td>Municipalities and Councils of Government in the MID-URN counties submitted letters of interest in participating in the Phase 2 application. The letters of interest included capacity, need, approach/vision for resiliency, and long-term commitment for each municipality or Council of Government. Each letter was at least 5 pages single spaced and included municipality details or regional vulnerabilities and needs or prioritized future projects to address those needs. The most common vulnerability sited was flooding due to storm surge and precipitation, as was shown in our Phase 1 assessment. Flooding of critical infrastructure, including roads, wastewater treatment plants, substations, and emergency response facilities were listed as major concerns. Housing located in low-lying areas was also a concern for both owner-occupied and public housing for low income and elderly populations. The resiliency efforts in municipalities were focused on shoreline</td>
</tr>
<tr>
<td>SAFR</td>
<td>Academic institutions, state government agencies, regional planning agencies, planning decision makers and resources</td>
<td>Walking tour of Connecticut's coastal geology and impacts of sea level rise and storms on the coast</td>
<td>A Professor and former state geologist led a tour of coastal sites in Connecticut that exemplify the high ridgelines with former deltas that are being drowned in a rising sea. He showed how marshes and beaches change during storms and where erosion happens on the coast. This educated the state agency representatives on the...</td>
</tr>
