CONSTRUCTION DIRECTIVE

Construction Administrator

Construction Manual Update/Version 3.2 January 2021

This Construction Directive officially releases the Construction Manual update, Version 3.2/ January 2021 (CM - 3.2), and supersedes Construction Directive [CD-2019-2](#), Construction Manual Update/Version 3.1 January 2019. CM - 3.2 includes updates to the chapters shown in the Tables of Contents for both Volume 1 and 2 and incorporates any applicable Engineering/Construction and Construction Directives and Bulletins, along with some miscellaneous enhancements and revisions. CM - 3.2 is categorized as a minor update in accordance with the current FHWA/DOT Stewardship & Oversight Implementation Manual.

CM - 3.2 will be effective for all projects awarded after January 1, 2021. Projects awarded before this date may continue to use the previous version of the Construction Manual (CM - 3.1).

Refer to the Table of Contents in Volume 2 for the Sections within each Chapter that have been revised.

As part of the revisions and eConstruction initiatives of the Construction Division, all current manuals, guides, and approved forms formerly maintained in the Construction Manuals folder have been moved from the DOT-Share Drive to the ProjectWise Construction Libraries subfolders 4.100 (Manuals Guides and Training Videos) and the 4.200 (Approved Forms and Inspection Checklists). The Construction Manual folder on the DOT-Share Drive will be archived and taken out of service in the near future so all staff should use ProjectWise as the official location for all content formerly found in the DOT-Share Drive, Construction Manual folder. If any content is identified as missing from the ProjectWise Construction Libraries, the user should immediately contact Douglas Harz (douglas.harz@ct.gov) or Nelio Rodrigues (nelio.rodrigues@ct.gov) in the Office of Construction.

CM - 3.2 is available at the following link: [Construction Manual version 3.2 January 2021](#)
It is also available by navigating in ProjectWise to: CTDOT\Documents \4.1 - Construction Libraries\04.100 - Manuals, Guides and Training\Construction Manual VER 3.2 January 2021.pdf
