ENGINEERING DIRECTIVE

Engineering Administrator

Review and Approval of Bridge Inspection Reports

The [Bridge Inspection Manual](#) outlines the Procedures for Review of Inspection Reports and Data for Transportation Engineer 3 and Transportation Supervising Engineer.

This Directive requires the reviewer of certain bridge inspection reports to consult with the Bridge Safety Principal Engineer before the report approval. This will include, but not limited to:

- Major bridges (listed below)
- Newly constructed bridges with less than “Good” condition ratings
- Bridges where a condition rating is raised from “Poor” to “Fair” or better without any remedial work performed.

For unexpected bridge condition rating, the Bridge Safety Principal Engineer will appraise the Division Chief of Bridges to discuss any need for corrective action.
