PLAN - PORTABLE VMS AND FOUNDATION

1. WHERE UNSUITABLE CONDITIONS EXIST UPON WHICH TO FOUND THE VMS SUPPORT FOUNDATION, THE ENGINEER WILL DETERMINE HOW TO PROCEED. A LEVEL SURFACE IS REQUIRED AND WILL GENERALLY BE CREATED BY PLACING SPECIAL RIPRAP IN ACCORDANCE WITH STANDARD FORM 816, SECTION 7.03.

2. THE REINFORCING HAS BEEN LOCATED TO CLEAR THE THREADED RODS. SHOULD THE ANCHORAGE LOCATION NEED TO BE REVISED, THE CONTRACTOR SHALL COORDINATE THE PLACEMENT OF REINFORCING WITH THE REVISED THREADED RODS LOCATION.

NOTES:

1. MAINLY UNSUITABLE CONDITIONS: FILL UPON WHICH TO FOUND THE VMS SUPPORT FOUNDATION. THIS PAVING WILL, DETERMINING HOW TO PROCEED, A FILL SURFACE IS REQUIRED AND WILL GENERALLY BE CREATED BY PLACING SPECIAL RIPRAP IN ACCORDANCE WITH STANDARD FORM 816, SECTION 7.03.

2. THE REINFORCING HAS BEEN LOCATED TO CLEAR THE THREADED RODS. SHOULD THE ANCHORAGE LOCATION NEED TO BE REVISED, THE CONTRACTOR SHALL COORDINATE THE PLACEMENT OF REINFORCING WITH THE REVISED THREADED RODS LOCATION.

LEVEL SURFACE (SEE NOTE 1)
NOTES:

1. POWER PANEL TO BE LOCATED ON CONDUIT ENTRY SIDE OF ENCLOSURE

2. BENDS NOT TO EXCEED 360° FOR CONDUIT RUN AS PER NEC
