Your firm has been prequalified by the Connecticut Department of Transportation (Department) in the category listed above for the 2022 calendar year. Refer to the following website for Volume Adjustment Factors: https://portal.ct.gov/DOT/Consultant-Selection/Consultant-Selection-Information

The Department is seeking to engage three (3) consultant engineering firms to provide Task Order Consultant Engineering services for various highway improvement projects. The selected consultants will act as the Department’s “Designer” responsible for the engineering and preparation of contract plans, specifications, estimates and other documents for selected projects.

These contracts will be administered by the Division of Highway Design. Anticipated tasks include, but are not limited to:

- Engineering services for the preparation of highway design plans, specifications and cost estimates. The design development shall be consistent with federal and state regulations, policies, procedures and best practices including the principles of Context Sensitive Solutions.
- Preparation of documents in support of highway designs such as environmental permitting, environmental documentation, drainage and hydraulic engineering, geotechnical engineering, traffic engineering, bridge and structure design, illumination design, landscape design, noise analysis, rights of way coordination and utility coordination.
- Assist with the public involvement activities for projects
- Development and monitoring of project schedules utilizing Microsoft Project
- Coordination with Department staff, state and federal agencies, municipalities and the public
- Support services for projects during construction

The contracts will be limited to five (5) years to assign new work, with the stipulation that assignments initiated during the term of the contract will continue to completion of work. No new work, which is unrelated to prior negotiated tasks, will be negotiated after five (5) years from the start of the contract. The value of each contract is estimated to be $5 million; however, the actual contract fee will depend on the work assigned. It is anticipated to utilize either a lump sum or cost-plus fixed fee payment method. The total number of assignments for each firm may vary depending on the Department’s needs. Each individual task will be assigned to a firm in accordance with 23 CFR Part 172.
Please be advised that the selected firms will not be eligible to provide professional services, either as a prime consultant or sub-consultant, on the next phase of any project for which they provided design services under this assignment. No firms will be allowed to subcontract with a Highway CLE firm and have a contract, or sub-contract with a firm, that the CLE will be overseeing. This shall also include any breakout projects that occur from the projects managed under this assignment.

The selected firms must provide all electronic design data (i.e., Ground files, Design files, Digital Terrain Models [surfaces], Alignments, Contract Plans, and/or all other Electronic Engineering Data) in conformance with the Department’s CONNECT Digital Design Environment. Submissions will also be required to comply with the Department’s Digital Design Environment and the Digital Project Development Manual (https://portal.ct.gov/DOT/Engineering-Applications/CTDOT---CONNECT-DDE).

Firms responding to this request should be of adequate size and sufficiently staffed and experienced to perform this assignment and will be required to provide the necessary staffing upon execution of the contract. The selected firm will also be required to establish and/or maintain a Connecticut office for the duration of assignment. The Project Manager may be required to work in the Connecticut office and be available on a daily basis for supervision of the staff performing the assignment.

If your firm would like to be considered for this assignment, your submittal should consist of a letter-of-interest limited to one (1) page, a Department Form CSO 255 (Rev.
