Subject: Notice of Scoping for Intersection Improvements on Route 74 and Route 195 near the Tolland Green

I have performed a cursory review of the proposed project. The area is served by both public sewer/water and private septic systems/wells. It is recommend that project details be submitted to the local health department (Eastern Highlands Health District) so they can determine if there are any conflicts with septic's and wells on any of the properties, and to ensure potential septic repair areas are protected (per CT PHC Sec 19-13-B100a). Any proposed drainage systems shall also meet minimum separation distances to existing septic systems and wells. It does appear that most of the proposed work is located on town or state property. Feel free to call me directly at 860-509-7383 if you have any questions.
