Other information:

Exceptions where OSTA approval is not required:

- Revision to signal timings within the previously approved min/max range
- Replacement of traffic signal components for maintenance reasons (provided that the location matches the approved plan)
- Flashing Beacons

This application is submitted in accordance with the provisions of Section 14-299 of the General Statutes of the State of Connecticut, as revised, and meets the warrants and design criteria of the Regulations of the Office of the State Traffic Administration. As the Local Traffic Authority, I do hereby request approval to install, operate, and maintain the traffic signal as described above, and in conformance with the attached traffic signal plan(s). A reproducible copy of the approved plan shall be maintained by the municipality. The municipality should maintain a record of the operation, malfunctions, and maintenance of the signal.
