Connecticut Overall
4.44
160 visits

Data source is the Connecticut Department of Public Health EpiCenter Syndromic Surveillance System. ˣ Rates were not calculated for counties with fewer than 20 total visits over the 3-month period due to the instability of rates. Please note, these data are preliminary; caution should be used when interpreting these results. All of the 38 ED facilities participating in EpiCenter were sending data for 75% to 100% of the days in the specified three-month time frame. Rates were calculated using 2020 population data.
