| White                       | 12 | 42.9       |
| <b>Mode of Transmission</b> |    |            |
| MSM                         | 22 | 78.6       |
| PWID                        | 2  | 7.1        |
| MSM and IDU                 | 1  | 3.6        |
| Heterosexual contact        | 3  | 10.7       |
| <b>Age at diagnosis</b>     |    |            |
| 20-29                       | 12 | 42.9       |
| 30-39                       | 7  | 25.0       |
| 40-49                       | 3  | 10.7       |
| 50-59                       | 4  | 14.3       |
| 60+                         | 2  | 7.1        |

**This table presents HIV Infection cases using the year the person was first diagnosed  
The term HIV Infection is used to refer to three categories of diagnoses collectively:  
1 - persons with a diagnosis of HIV infection (not AIDS)  
2 - a diagnosis of HIV infection and a later diagnosis of AIDS  
3 - concurrent diagnoses of HIV and AIDS
