This table presents HIV Infection cases using the year the person was first diagnosed. The term HIV Infection is used to refer to three categories of diagnoses collectively:

Note: other risk includes perinatal and presumed heterosexual contact Source: HIV Surveillance Registry for cases reported through December 22, 2021

^{1 -} persons with a diagnosis of HIV infection (not AIDS)

^{2 -} a diagnosis of HIV infection and a later diagnosis of AIDS

^{3 -} concurrent diagnoses of HIV and AIDS.
