<b>Total</b>	219	22	10.0	53	24.2	69	31.5	59	26.9	16	7.3

<sup>a</sup> Stage of disease at time of HIV diagnosis is based on the first CD4 test performed or documentation of an AIDS-defining condition ≤ 3 months (≤ 91 days) after a diagnosis of HIV infection.

<sup>b</sup> Transmission category data presented based on sex at birth. <sup>c</sup> Heterosexual contact with a person known to have, or be at high risk for, HIV infection.

<sup>d</sup> Other transmission category includes persons whose infection was attributed to hemophilia, blood transfusion, perinatal exposure or whose risk factor was not reported or not identified. Data not displayed because the numbers were too small to be meaningful.
