Total	11,700	10,400-13,700	8.3%	384.0	340.5-446.8	1,300	0-3,300	10,414	88.7%	76.2-100.0%

1. Estimates of HIV incidence, prevalence, and undiagnosed infection with relative standard errors (RSE) $\geq 30\%$ should be interpreted with caution in alignment with reliability standards from the National Center for Health Statistics. CDC cautions against presenting/publishing estimates with RSEs $>50\%$.

2. Reported (not estimated) cases.

3. Subgroups may not add to the column total due to rounding.

4. Race and transmission categories not shown had RSE $>50\%$

5. HIV Surveillance data for cases reported through December 2017
