

HIV Continuum of Care, Connecticut, 2020

Based on persons receiving HIV care in 2020 among persons ≥13 years old at diagnosis, resided in Connecticut (based on most recent residence) and diagnosed with HIV infection through 2019 and living with HIV on 12/31/2020. A visit is defined as a CD4, viral load, or genotype test result during the evaluation period. The overall HIV population may be overestimated because 2020 deaths are preliminary. Note: data for 2020 should be interpreted with caution due to the impact of the COVID-19 pandemic on access to HIV testing & care-related services. Source: HIV Surveillance Registry for cases reported through December 2021.

Based on the number of persons ≥13 years old, diagnosed with HIV in 2020, who resided in Connecticut (based on residence of HIV diagnosis) and were linked to care within 1,3,6,12 months after HIV diagnosis. Source: HIV Surveillance Registry for cases reported through December 2021.
