

Historical Trends (1975-2013)

Incidence, Connecticut Breast, White (incl Hisp) Female, All Ages

Notes:
Created by statecancerprofiles.cancer.gov on 09/22/2016 1:47 pm.
Regression lines calculated using the Joinpoint Regression Program (Version 4.3.0.0).

Source: Incidence data provided by the SEER Program. Rates calculated by the National Cancer Institute using SEER*Stat. Rates are age-adjusted to the 2000 US standard population (19 age groups: <1, 1-4, 5-9, ..., 80-84, 85+). Rates are for invasive cancer only (except for bladder cancer which is invasive and in situ) or unless otherwise specified. Population counts for denominators are based on Census populations as modified by NCI. The US populations included with the data release have been adjusted for the population shifts due to hurricanes Katrina and Rita for 62 counties and parishes in Alabama, Mississippi, Louisiana, and Texas. The 1969-2014 US Population Data File is used with SEER November 2015 data.
