

## DROUGHT RESPONSE AND WATER LOSS WORKSHOP FOR WATER UTILITIES

U.S. Environmental Protection Agency

**Attention:  
SMALL  
WATER UTILITIES**

### FREE DROUGHT WORKSHOP for Connecticut's Small Water Utilities

**3-Hour Webinar • Wednesday, September 22, 2021**

Connecticut suffered a brutal 46-week drought, spanning 2016 and 2017. At its worst, almost 70 percent of the state's drought condition was listed as extreme or severe, with the balance in a moderate drought. This workshop will provide small water utilities with guidance, information, and free tools to enhance their ability to respond to future droughts affecting the state.

**0.30 CEUs will  
be available for  
participation**

#### Workshop Overview

This workshop is an opportunity for Connecticut's small water utilities to share challenges, solutions and lessons learned in drought response and water loss control. The workshop provides tools and resources that utilities can use to assess and control water loss and mitigate against drought impacts on water supply. Participants will have the opportunity to identify practical actions that drinking water utilities can take to advance effective drought response and water loss control in their communities. This workshop will specifically include:

- An overview of the current drought monitoring and response resources for small water utilities
- An introduction to EPA's [Drought Response and Recovery: A Basic Guide for Water Utilities](#)
- An introduction for creating a drought response plan
- An introduction to water loss control resources

#### Who Should Attend?

- Small drinking water utility operators, managers, and owners
- Technical assistance providers
- Water sector associations
- Local, state, and federal government agencies

**Credit hours** for water treatment and distribution may be available for participation (application pending)

#### AGENDA

Sign in to GoToWebinar	8:45 a.m. – 9:00 a.m.
Workshop	9:00 a.m. – 12:00 p.m.

*Sponsored by Connecticut Department of Public Health (DPH), Connecticut Department of Energy and Environmental Protection (DEEP), Connecticut Office of Policy and Management (OPM), Connecticut Water Planning Council, Atlantic States Rural Water & Wastewater Association (ASRWAA) and the U.S. Environmental Protection Agency (EPA).*
