PWS	Public Water System(s)
PWSID	Public Water System Identification Number
PWSS	Public Water System Supervision grant
RCSA	Regulations of Connecticut State Agencies
SBC	State Bond Commission
SDWA	Safe Drinking Water Act
SERP	State Environmental Review Process
SFY	State Fiscal Year
TNC	Transient Non-Community (Public Water System)
ULO	Unliquidated Obligations
USC	United States Code

## I. INTRODUCTION

### A. State of Connecticut's Drinking Water State Revolving Fund

In 1996, Congress passed amendments to the Safe Drinking Water Act (SDWA) establishing the Drinking Water State Revolving Fund (DWSRF). Section 1452 of the SDWA authorizes the Administrator of the United States Environmental Protection Agency (EPA) to award capitalization grants to states. Each state annually receives a minimum of 1% of the funds available for the total allotment. From the inception of Connecticut's DWSRF program to Federal Fiscal Year (FFY) 2013, Connecticut's annual allocation has been 1% of the national allotment. Our participation in the 2011 Drinking Water Infrastructure Needs Survey and Assessment (DWINSA) identified increased need from the state's public water systems (PWS) for infrastructure improvement projects, which resulted in an increase in the annual allocation. Starting with the FFY 2014 DWSRF Capitalization Grant and ending with FFY 2017 grant, Connecticut's allocation increased from 1% to 1.01%. The 2015 DWINSA will determine the allocation after FFY 2017. Connecticut is eligible to receive \$8,351,000 from the \$848,255,000 appropriated by Congress for FFY 2017.

The Department of Public Health (DPH) is the primacy agency for Connecticut's drinking water program and the designated agency that is authorized to enter into capitalization grant agreements with the EPA, accept capitalization grant awards, and otherwise manage the DWSRF. This Intended Use Plan (IUP) is part of our application for the FFY 2017 Capitalization Grant. The SDWA requires that each State annually prepare an IUP to describe how the State intends to use DWSRF program funds to support the overall goals of the DWSRF program and meet the SDWA objectives. This IUP highlights the State of Connecticut's ongoing improvement of the DWSRF program and seeks to further maximize the program's resources. The DWSRF program is an essential component of Connecticut's efforts to protect public health and improve the quality and availability of water to all its citizens. The IUP communicates our plans to stakeholders who include: public water systems, the public, EPA and other state agencies.

The IUP discusses how DPH intends to utilize its allotment of FFY 2017 funds, state legislative funding authorizations, and unobligated project funds carried forward from previous IUPs during the State Fiscal Year (SFY) 2018 time period (July 1, 2017 – June 30, 2018). The available funding includes unliquidated obligations (ULO) from previous federal capitalization grants. The IUP details the short-term and long-term goals that the DPH has developed to support the overall objectives of the DWSRF program of ensuring public health protections, complying with the SDWA, ensuring affordable drinking water, and maintaining the long-term financial health of the DWSRF. The IUP also provides the financial status of the DWSRF. Finally, the IUP describes the criteria and methods that DPH will use to distribute the funds, including the ranking criteria under which the eligible projects were ranked and placed on the fundable Project Priority List and Comprehensive Project List and the procedures that allow DPH to bypass projects on the fundable Project Priority List.

During SFY 2018, the DPH will continue to focus on implementing the public health aspects of the SDWA and will work to ensure that funds move expeditiously and responsibly from the time the State of Connecticut is awarded the capitalization grant to the time the funds are awarded to projects. These efforts are instrumental in achieving the requirements of the SDWA. The DPH works closely together with other state and federal agencies to identify opportunities for funding specific projects and to coordinate funding efforts.

Connecticut has legislation enabling it to establish and operate a DWSRF program and to apply for and receive federal funds, which is contained in Connecticut General Statutes (CGS) Sections 22a-475 through 22a-483, inclusive. As the administrator of the DWSRF program for the State of Connecticut, the DPH coordinates the activities of two different state agencies, which are the Office of the State Treasurer (OTT), the Department of Energy and Environmental Protection (DEEP), and within DEEP, the Public Utilities Regulatory Authority (PURA), with the charge of implementing certain aspects of and overseeing the DWSRF program. The DPH, DEEP, OTT, and PURA entered into a DWSRF Interagency Memorandum of Understanding (DWSRF Interagency MOU), which details the roles and responsibilities of each agency. The DWSRF Interagency MOU is an attachment to the Operating Agreement (OA) between the State of Connecticut and the EPA. The OA was filed with the EPA as part of the DPH's 1997 Capitalization Grant application and established the basic framework and procedures of the DWSRF program that are not expected to change annually.

The DPH is responsible for programmatic and fiscal administration of DWSRF projects and capitalization grant set-aside funds. The DPH processes General Obligation Bond allocation requests directly through the State Bond Commission (SBC) for any state funds used to subsidize DWSRF projects. The DPH provides the bi-annual capital budget request and the SBC Revenue Bond allocation requests for DWSRF projects to the DEEP for processing under the Clean Water Fund (CWF). The DEEP is responsible for administration of the CWF, of which the DWSRF is a sub-account. The PURA is responsible for programmatic and fiscal input for those water companies that it regulates who are requesting DWSRF funding. The OTT is responsible for the fiscal administration of all DWSRF project accounts, oversight of loans, oversight of the leveraging process through bond sales, administration of a DWSRF financial plan, and assessing the financial viability of borrowers.

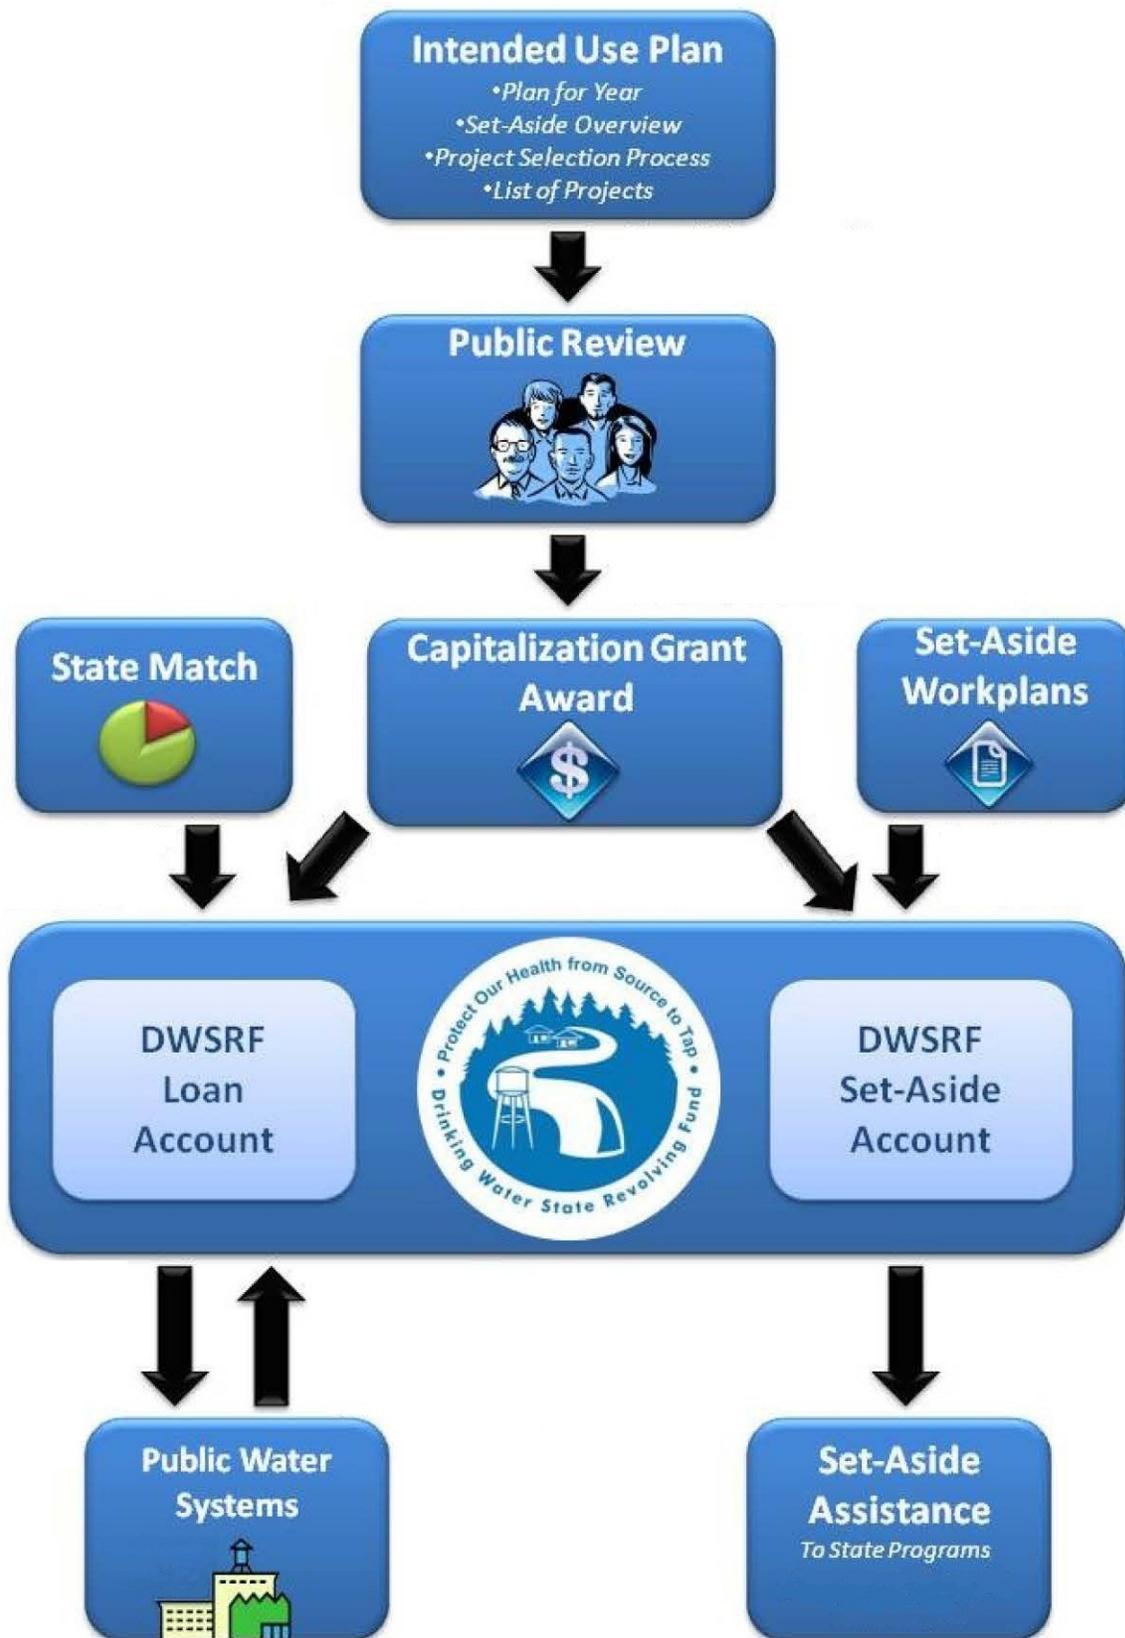

Figure 1 on page 3 displays the role the IUP plays in the DWSRF funding process.

## **B. What's New for SFY 2018?**

The Priority Ranking System (PRS) was significantly updated and revised. The criteria had not undergone any major revisions since it was first developed. These revisions address the current drinking water infrastructure challenges and priorities facing the State of Connecticut and our Public Water System clients, including sustainability, resiliency, water conservation, lead in drinking water, and unregulated and emerging contaminants. Circular Letter 2017-03 (Attachment I) was sent to all Community and Non-Profit Non-Community PWSs, as well as other interested parties, to announce and explain the changes. More information on the PRS is included in Section IV. A of this document.

The window of time to submit a project Eligibility Application has changed and they are now being accepted at any time during the year, beginning with this annual IUP and funding for SFY 2018. Circular Letter 2017-04 (Attachment J) was sent to all Community and Non-Profit Non-Community PWSs, as well as other interested parties, to announce and explain this change. More information can be found in Section IV. E.

Figure 1 - The DWSRF Funding Process

## II. STRUCTURE OF THE DWSRF

### A. Eligibility for Projects for Planning, Design, and Construction

The DWSRF provides funding assistance for the planning, design, and construction of water infrastructure improvement projects to eligible PWSs, which include all community PWSs and non-profit, non-community PWSs. Projects must meet federal DWSRF eligibility requirements. Eligible projects include:

- Installation or upgrade of facilities to improve the quality of drinking water to comply with the SDWA and State drinking water regulations;
- Rehabilitation of wells or development of eligible sources to replace contaminated sources;
- Installation, rehabilitation or replacement of transmission and distribution pipes to improve water pressure to safe levels or to prevent contamination caused by leaks or breaks in the pipes;
- Installation or upgrade of eligible water storage facilities to prevent microbiological contaminants from entering a PWS;
- Interconnecting two or more public water systems;
- Creation of a new community water system to serve homes with contaminated individual drinking water sources or to consolidate existing systems into a new regional system.
- Routine capital improvement projects for drinking water infrastructure that has exceeded or is nearing the end of its useful service life.

Federal DWSRF regulations specify that funding may not be used for projects that are primarily intended to serve growth. The focus of DWSRF assistance is to ensure safe drinking water for the current PWSs population. Eligible projects may be sized to accommodate for reasonable growth during the expected life of the infrastructure. However, the State of Connecticut will not fund projects intended to serve future growth outside of reasonable expectations and remains vigilant to ensure the limited DWSRF funds available are directed to serve the existing population.

Additionally, the DWSRF may not provide assistance to any system that has an Enforcement Targeting Tool (ETT) score of 11 or greater unless DPH determines that the system will return to compliance and has an adequate level of technical, managerial and financial capability to maintain compliance.

Assistance provided to a PWS from the DWSRF program may be used only for expenditures that will facilitate compliance with national primary drinking water regulations or otherwise significantly further the public health protection objectives of the SDWA.

### B. Set-Asides

The State of Connecticut will use its capitalization grant set-aside funds to provide additional support to promote and implement the State's safe drinking water efforts and for activities to assist water systems in developing enhanced capabilities for the future. Each of the set-asides is briefly explained below and additional information may be found in Section VII.

**Administration** - to support administrative and fiscal management of the DWSRF accounts and provide assistance to borrowers in preparing their loan applications and satisfying program requirements

**Small system technical assistance** - for assistance to small systems serving less than 10,000 people through state personnel or agreements with third party assistance providers

**State program management** – for Public Water System Supervision program support and implementation of the Operator Certification program

**Local assistance and other state programs** – for assistance for Capacity Development and for source water protection activities

### III. DWSRF GOALS

The DPH has developed short-term and long-term goals to support the overall goals for the DWSRF program of ensuring public health protection, complying with the SDWA, ensuring affordable drinking water, and maintaining the long-term financial health of the DWSRF. The DPH is committed to continuous program improvement by assuring that program measures are tracked and achieved, fiscal oversight and coordination continues to improve, Connecticut's public water systems are continuously aware of DWSRF opportunities, the DPH's DWSRF program is adequately staffed, and the public drinking water infrastructure needs for the State of Connecticut are adequately addressed, documented and shared with the public to the greatest extent possible.

Maintaining an adequate staffing level has been identified as a critical factor in the success of the DWSRF program, and overall in the assistance and oversight provided to all public water systems by the entire DWS.

The DWSRF short-term goals are focused on continued development and implementation of all facets of the DWSRF program, including moving eligible fundable projects through the loan process to ensure that all monies are committed in a timely manner. The short-term goals as indicated below are benchmarks for measuring overall success and effectiveness of the program.

#### A. Short-Term Goals

1. Apply for the capitalization grant as soon as possible following notification from EPA Region 1 that applications are being accepted. Upon award, comply with the capitalization grant's terms and conditions.
2. Enter into financial assistance agreements with PWSs for projects identified in this IUP with an overall goal of committing all available project funds during the IUP period and increasing the pace of the DWSRF program.
3. Continue to implement existing DWSRF elements, including re-evaluation and improvement of the following when necessary:
  - a. Effective and efficient fiscal management of DWSRF funds;
  - b. Routine procedures for entering into project funding agreements with recipients;
  - c. Effective and efficient communications between State agencies for all components of the DWSRF program;
  - d. Improve the efficiency of review of project submittals and execution of funding agreements, where possible.
  - e. Review of the PRS, maintaining an emphasis on ready-to-proceed projects;
  - f. Responsibilities delineated in the DWSRF Interagency MOU;

- g. Routine procedures for monitoring oversight and contract compliance of DWSRF set-aside projects;
  - h. Procedures for evaluating technical and managerial capacity of DWSRF applicants and sustainability aspects of proposed projects.
4. Input project information into the DWSRF Project Benefits Reporting (PBR) and the Drinking Water National Information Management System (DWNIMS) on-line databases and continue to monitor program pace to meet or exceed national goals and measures for awarding funds in a timely manner.
5. Maintain a financing plan that secures the perpetuity of the DWSRF and meets loan demand.
6. Provide oversight, tracking, and continued implementation of the DPH's January 2013 Cash Management Plan, revision of January 2016.
7. Continue to reduce the DPH's ULOs associated with capitalization grant awards (project funds and set-asides) received from EPA and work towards achieving EPA's ULO Objectives.
8. Maintain a robust pipeline of projects through frequent interaction with public water systems.
9. Continue to work closely with DWSRF loan applicants to ensure well-coordinated regulatory reviews and loan preparation activities.
10. Continue using a 2-year loan demand planning period to help ensure sufficient DWSRF funds are appropriated in the biennial State of Connecticut capital budget.
11. Allow for new project eligibility applications to be submitted at any time during the year and update the Comprehensive Project List with these new projects in a timely manner.
12. Continue to implement improvements identified during the 2014 DWSRF LEAN process, including:
  - a. Revise the DWSRF Interagency MOU to reflect modifications made with respect to each agency's responsibilities to the DWSRF program to reflect the statutory changes approved in 2010.
  - b. Revise the OA to reflect revisions that have been made to the DWSRF program.
13. Continue to utilize the EPGP as a model for streamlining DWSRF requirements for small systems that undertake other projects with a total project cost of less than \$100,000.
14. Continue to encourage small water systems to apply for funding for all phases of a project, such as: planning, including preparation of asset management plans, preliminary engineering reports, etc.; and design and construction, especially when the project is to correct a compliance concern, consolidate with a larger CWS, or replace older hydropneumatic tanks.
15. Provide education and technical assistance to PWSs to improve the sustainable infrastructure and asset management programs of PWSs.

16. Continue transitioning into the Loans and Grants Tracking System (LGTS) database that will improve communication between State agencies and information sharing with the EPA for projects funded through the DWSRF program.
17. Utilize the information gathered as part of the 2015 DWINSA to work with the selected PWSs to submit projects for future DWSRF funding cycles.

## B. Long-Term Goals

The DWSRF long-term goals express strategic principals for guiding the DWSRF program into the future. These long-term goals are:

1. Commit to monitor, track, and continue to maintain and improve the pace of the DWSRF program.
2. Meet or exceed EPA's ULO objectives for ULOs associated with capitalization grant awards received from the EPA.
3. Continue to reach out to State of Connecticut PWSs in an effort to educate and better promote the DWSRF Program, in order to maintain a pipeline of projects that are eligible to receive DWSRF funding.
4. Coordinate within the DPH, and continue to collaborate with other State agencies where possible and advantageous, to maximize the effectiveness of the program and meet the State of Connecticut's public health, water quality and water adequacy goals.
5. Use set-aside funds to effectively improve the State of Connecticut's aging drinking water infrastructure, drinking water regulatory compliance, the technical, managerial and financial capacity of PWSs and drinking water service to Connecticut's residents. Areas of concern include PWSs sustainable infrastructure programs, long-term water supply planning, source water protection and small water systems.
6. Continue to improve on documenting the PWS infrastructure needs for Connecticut through on-going participation and support for the EPAs Drinking Water Infrastructure Needs Survey and Assessment.
7. Offer a long-term low-interest financing program to eligible PWSs to undertake infrastructure improvement projects.
8. Commit to maintaining cash management policies, procedures and records for DWSRF funding.

## IV. CRITERIA AND METHOD FOR DISTRIBUTION OF PROJECT FUNDS

### A. Priority Ranking System

A state's Priority Ranking System (PRS) is required to provide, to the extent practicable, priority to projects that: address the most serious risk to human health; are necessary to ensure compliance with the requirements of the SDWA; and assist systems most in need, on a per household basis, according to State affordability criteria. The DPH has statutory and regulatory jurisdiction over all

statewide matters related to the purity and adequacy of drinking water. The DPH considers quantity as important as quality in the protection of public health. The PRS developed by the DPH for its DWSRF program specifies the criteria that the DPH uses to determine the distribution of funds and is found in Attachment B of this IUP. The primary objective of the ranking system is to award the highest points to projects that protect public health through improvements designed to address PWS performance in the areas of water quality and water quantity. The DPH is also responsible for the timely distribution of available DWSRF funds and must take into consideration each project's "readiness to proceed" when preparing the Project Priority List (PPL).

The PRS was significantly revised for SFY 2018. Circular Letter 2017-03 (Attachment I) was sent to all Community and Non-Profit Non-Community public water systems, as well as other interested parties, to announce and explain the changes. The PRS was made available to all applicants for their reference in completing and submitting project eligibility applications. While the entire PRS was reevaluated, changes were made to key areas, including:

- Infrastructure sustainability: The revised PRS better recognizes the critical role that asset management planning has in achieving a PWSs long-term sustainability;
- Infrastructure resiliency: This new category provides points for projects that will increase a PWSs ability to withstand and recover from natural or man-made disasters, including drought;
- Water Conservation: The revised PRS recognizes the importance of water conservation, including projects for significant "unaccounted for" or "non-revenue" water loss reductions, and increased the points for water main rehabilitation and replacement to recognize the role these projects play in reducing water main breaks and leaks;
- Lead in Drinking Water: Points have been increased for projects which are necessary to resolve lead action level exceedences, and new activities have been added to award point for projects the proactively reduce lead levels at schools and child care facilities, and for complete lead service line replacement.;
- Unregulated and Emerging Contaminants: This new category provides points for projects which address unregulated contaminants or contaminants of emerging concern. There was previously no mechanism to provide points for these types of projects.

The PRS continues to put higher emphasis on projects that will achieve compliance with applicable drinking water quality requirements, while recognizing the importance of projects that will maintain compliance. As part of maintaining compliance, the PRS emphasizes sustainability and acknowledges the inherent value of asset management planning. A PWS's compliance with both state and federal drinking water quality requirements is closely monitored throughout the project review process. If a PWS has any outstanding significant violations or deficiencies or has received an ETT score of 11 or higher, a PWS must demonstrate a path to return to compliance before any formal commitment of funding is made by the State.

Within the parameters set by the PRS, the DPH intends to exercise considerable flexibility in the types of projects the DWSRF will fund with protection of public health and compliance with Federal and State drinking water mandates as the predominate concerns. Exclusions for growth and other non-eligible elements as described in PRS stand as limitations on project funding.

## B. Capacity Assessments

The SDWA requires that a PWS applying for a DWSRF loan must show that it has the technical, financial and managerial capacity to ensure compliance. If a system does not have adequate capacity, assistance may only be provided if it will help the system to achieve capacity. The goal of

this requirement is to ensure that DWSRF assistance is not used to create or support non-viable systems. DPH has developed and utilizes a capacity assessment tool to analyze the system capacity for small public water systems statewide. Known as the CAT, this tool is used to assess the capacity of small community water systems. Three-hundred and thirty small community PWS were initially evaluated using the CAT. These evaluations were provided to the individual PWSs and have been used in a variety of water planning activities. DPH is working on creating a mechanism to update the CAT to incorporate changes in the PWS technical, managerial and financial capacity as issues are addressed. PWSs serving 1,000 or more are required to develop and maintain a Water Supply Plan, which are reviewed and approved by the DPH.

Incentives for PWS to improve their capacity have been built into the distribution of the required subsidy, as described in Section IV. Small PWSs must have or develop an asset management plan in order to be eligible for additional subsidy. Beginning in SFY 2015, qualified applicants of all sizes that wish to qualify to receive state subsidy must have asset and fiscal management plans. The criteria for these plans were developed by referencing EPA guidance. Checklists of required information for each plan were developed and are included as Attachments G and H. The criteria were chosen so that these plans would address all three areas of capacity.

While the DPH intends to fund a wide range of drinking water projects, it will do so only after careful consideration of an applicant's technical, managerial and financial capabilities and readiness to proceed with their project. An assessment of an applicant's overall capacity, including the long-term capacity to operate and maintain the water system and the infrastructure to be funded by the DWSRF, will be conducted before any funding commitment is made.

### **Technical Capacity**

To demonstrate technical capacity, DWSRF applicants must show that drinking water sources, treatment, distribution, pumping, and storage infrastructure are adequate. Personnel must have the technical knowledge to effectively operate and maintain the system, as well as any additional infrastructure funded by the DWSRF. All community and non-transient non-community (NTNC) PWS are required to have a Certified Operator responsible for the operation of the water system, in accordance with the DPH's operator certification program. As part of reviewing an applicant's technical capacity, the DPH will review the PWS's regulatory compliance records and most recent sanitary survey report to assure that the system is being properly operated and maintained. The PWS must not have outstanding regulatory compliance problems unless the PWS is actively working to correct or resolve those problems. The engineering reports, plans, and specifications for the proposed DWSRF-funded project will be evaluated during the loan application process.

### **Financial Capacity**

To demonstrate financial capacity, the applicant must show that the PWS has sufficient revenues to cover necessary costs to operate and maintain their water system and repay their DWSRF loan. Applicants must also demonstrate credit worthiness and adequate fiscal controls. The OTT is responsible for reviewing the financial viability of borrowers, including a review of the project budget, annual financial reports, and other pertinent financial information.

### **Managerial Capacity**

To demonstrate managerial capacity, the PWS must have personnel with expertise to manage the entire water system operation. Managerial capacity of a PWS is evaluated during routinely

conducted sanitary surveys and when they apply for a DWSRF loan. As part of reviewing an applicant's managerial capacity, the DPH will review the PWS's regulatory compliance records and the most recent sanitary survey report to assure that the PWS is being properly operated and maintained.

### C. Projects Expected to be Funded

Projects on the SFY 2018 Fundable PPL are expected to receive funding under this IUP. Funds will also be made available to projects carried forward from a prior IUP, but for which binding commitments (i.e. financial assistance agreements) with the DPH have not yet been executed. These projects are being carried over, in accordance with the procedure described in Section V, and are listed on the Carryover List (Attachment E). These carryover projects went through public comment and ranking during the year in which they appeared on a PPL and are not being re-ranked.

It is the goal of the DPH to fund as many eligible projects as it can with the available DWSRF funding. The projects that are ultimately funded may differ from those outlined on the SFY 2018 Fundable PPL for various reasons, which include:

- A project on the Fundable PPL receives full or partial funding from another source;
- A project on the Fundable PPL is bypassed, as described in the PRS and Section IV of this document;
- An applicant is unable to comply with all applicable state and federal program requirements for DWSRF funding;
- An applicant withdraws its DWSRF funding application; or
- A project, or a portion of a project, is determined to be ineligible for DWSRF funds.

The DPH utilized the PRS and readiness criteria to determine if a project can reasonably be expected to proceed during SFY 2018. The SFY 2018 Fundable PPL identifies projects, or portions of projects, that can reasonably be expected to proceed during SFY 2018 based on project readiness information provided by the applicants and the criteria explained in Section IV.G of this IUP.

Funding for new projects is limited to eligible PWSs that submitted DWSRF Eligibility Applications by the April 28, 2017 due date announced in the DPH's SFY 2018 Call for Projects. As of the due date, the DPH received 48 applications totaling approximately \$75.4 million, of which 47 projects were eligible totaling approximately \$75.2 million. All project eligibility applications were reviewed and evaluated to ensure that the proposed projects meet the eligibility criteria and that the applicant is prioritizing projects based on their identified needs and addressing any applicable regulatory compliance concerns. All projects were awarded appropriate points based on the PRS. As in the past, the DPH put a significant emphasis on project readiness in development of the SFY 2018 Fundable PPL.

The Comprehensive Project List includes all eligible projects submitted in response to SFY 2018 Call For Projects, or those phases of projects from the Carryover List which have been determined to not be sufficiently ready to proceed. Due to the changes to the PRS, any PWS that had submitted and Eligibility Application under a prior Call For Projects was requested to submit a new Eligibility Application in order to accurately rank their project using the new PRS. PWSs that failed to submit a new Eligibility Application are no longer being considered for funding. This Comprehensive Project List includes 47 projects for a total of approximately \$75.2 million.

Some applicants have requested funding for planning, design, and construction phases of a project; however all phases may not necessarily receive funding. Projects which requested funding for multiple phases may appear on the Carryover List or Fundable PPL only for certain phases that have been determined to be ready to proceed. These phases are identified in parenthesis next to the project's name with the corresponding estimated DWSRF funding amounts to complete these phases. The Comprehensive Project List shows the full amount of DWSRF funding requested to complete all phases of each project.

The Comprehensive Project List shows projects in alphabetical order by the town of the PWS (Attachment C). This list of projects is also shown in order of ranking points assigned (Attachment D). From this comprehensive list, the SFY 2018 Fundable PPL (Attachment F) was developed based on the total amount of funding made available for SFY 2018 and the expected readiness of a project to proceed. Projects that are determined by the DPH as not ready to proceed during SFY 2018 were not considered in preparing the SFY 2018 PPL regardless of the priority points that the project received or the amount of funding expected to be available. These projects will be maintained on the comprehensive list and will be considered for funding during SFY 2018, if they subsequently become ready to proceed, according to the bypass procedure explained in Section IV.H. or if sufficient funding is available for them.

The SFY 2018 Fundable PPL includes those projects, or phases of a project, expected to move forward during the SFY ranked by priority points awarded, and for which sufficient funds are expected to be available. The SFY 2018 Fundable PPL includes 39 projects totaling approximately \$43.7 million.

The DPH reserves the right to make changes to the Fundable PPL, using by-pass procedures explained in Section IV.H., to ensure that the available funds are committed in executed funding agreements to the maximum extent possible. Projects on the Comprehensive Project List may also be added to the Fundable PPL if there is a sufficient surplus of funding is available for them and they become ready to proceed during SFY 2018 following the finalization of the annual IUP. Priority in adding a project from the Comprehensive Project List to the Fundable PPL shall be given to the most ready to proceed project regardless of the project's ranking score. Where two or more projects on the Comprehensive Project List become equally ready to proceed, priority for funding shall be given to the project with the highest ranking score.

Eligibility Applications received after the April 28, 2017 due date will be accepted and reviewed for eligibility. Following publication of the finalized annual IUP, the Comprehensive Project List may be amended periodically to include new projects for which Eligibility Applications were received after the due date. Any amendments to the Comprehensive Project List will be posted on the DPH DWS website for a 30-day comment period before being finalized and incorporated as an amendment into the annual IUP.

#### **D. Small System Funding**

The SDWA Amendments of 1996 require that, to the extent that there are sufficient number of eligible project applications, not less than 15% of the available funding shall be dedicated to small PWSs, which are PWSs that regularly serve less than or equal to a population of 10,000. In cases where an applicant owns more than one community PWS, the applicant's population will be determined on the combined population of all of its individually owned PWSs.

The SFY 2018 Fundable PPL does not achieve the EPA goal of dedicating at least 15% of the available DWSRF funding, or approximately \$12.8 million, to small PWSs. This was due to a lack of sufficient funding requests for projects ready to proceed during SFY 2018. In response to the Call for Projects, the DPH received applications for 23 eligible small system projects, including 10 EPGP projects, totaling approximately \$9.2 million in eligible project costs. Of these 23 projects, only 22 projects totaling \$7.8 million were determined to be ready to proceed in SFY 2018 and appear on the Fundable PPL.

The DPH continues to try to streamline and improve the funding process for small systems to make it easier for them to obtain DWSRF funding.

### **E. Emergency Power Generator Program**

The EPGP was established in SFY 2012 in response to two extreme weather events that occurred in the late summer and fall of 2011. These events left many customers, in particular customers of small PWSs, throughout Connecticut without water service for extended periods of time due to power outages. During 2012 and 2013 two additional severe weather events occurred furthering the need to ensure that all PWSs have back-up power systems capable of providing continued water service to customers during prolonged power outages. The EPGP allows eligible PWSs with projects costing less than \$100,000 to obtain low-interest loans and subsidies to purchase and install generators to be used in the event of power outages.

The EPGP includes streamlined procurement procedures for projects costing less than \$100,000 in an effort to make it easier for small PWSs to proceed through the DWSRF process. PWSs that currently do not have back-up power for a drinking water facility are eligible to receive up to 45% of the total cost of their generator system as subsidization with a maximum amount of \$45,000 for each facility. PWSs that already have back-up power systems installed in their facilities are eligible to receive up to 25% of the total cost of their generator system as subsidization with a maximum amount of \$25,000 per project for replacement generators. These generator projects are ranked along with all other projects in accordance with the PRS.

### **F. Additional Subsidization**

#### **Federal Subsidy Funds**

The DPH has the statutory authority to provide subsidization in the form of grants, principal forgiveness, negative interest rates, or any combination thereof under CGS Section 22a-477(s)(2)(F). The federal DWSRF appropriation for FFY 2017 requires that 20% of the capitalization grant amount be used by the State to provide additional subsidization to eligible recipients in the form of grants, principal forgiveness, or negative interest loans, or any combination thereof. The DPH is therefore required to provide \$1,670,200 in subsidization. All subsidization will be provided in the form of loan principal forgiveness.

The DPH will use 20% of the capitalization grant to subsidize certain qualifying drinking water projects contained on the SFY 2018 Fundable PPL as outlined below.

- a) Projects funded under the EPGP are eligible to receive up to 25% or 45% of the fixed contract cost of their generator system in subsidization, as described in Section IV.E.

- b) Small PWSs (those serving a population of 10,000 or under) and PWSs with more than one system, but whose largest system serves 10,000 or under, will be eligible to receive a subsidy of up to 25% of each fixed contract cost associated with the project, not to exceed a total of \$300,000 per project. This subsidization will be available to small systems on the SFY 2018 Fundable PPL that have an Asset Management Plan in place, or agree to prepare and implement such a plan as part of their DWSRF financial assistance agreement. Small PWSs that receive subsidy will also be required to prepare and implement Fiscal Management Plans in the future. To assist small PWS with preparing an Asset Management Plan or Fiscal Management Plan, or both, the DPH will continue to provide onsite technical assistance via a Technical Assistance Provider, as needed, using funding from the Small Systems Technical Assistance set-aside at no cost to the DWSRF applicant.
- c) Large PWSs (those not meeting the criteria of a small PWS detailed in Section IV.D.) with a project located in a town which is identified as a “distressed community” will be eligible to receive a subsidy of up to 20% of each fixed contract cost associated with the project, not to exceed \$300,000 per project. The DPH shall use the distressed community list published by the Connecticut Department of Economic and Community Development, at the time the Call for Projects was issued for this annual IUP, for the purposes of determining eligibility.
- d) Projects undertaken by large PWSs (those not meeting the criteria of a small PWS detailed in Section IV.D.) where the exclusive purpose is to consolidate one or more small community or non-profit non-community PWSs (those serving a population of 10,000 or under) with a large PWS. Large PWSs will be eligible to receive a subsidy of up to 25% of each fixed contract cost associated with the project, not to exceed a total of \$300,000 per project. All subsidy funding received by the large PWS shall be used by the large PWS to reduce any costs incurred, whether directly or indirectly, by others, including, but not limited to, costs incurred by the large PWS's rate payers, private well owners that will be receiving water service from the large PWS or the municipality in which such Project is located, as applicable.
- e) Projects undertaken by large PWSs (those not meeting the criteria of a small PWS detailed in Section IV.D.) where the exclusive purpose is to extend water service to existing private well owners that have impaired water quality as a result of manmade or natural groundwater pollution and remediation cannot be addressed more cost effectively through the installation of on-site treatment systems or other means. Large PWSs will be eligible to receive a subsidy of up to 25% of each fixed contract cost associated with the project, not to exceed a total of \$300,000 per project. All subsidy funding received by the large PWS shall be used by the large PWS to reduce any costs incurred, whether directly or indirectly, by others, including, but not limited to, costs incurred by the large PWS's rate payers, private well owners that will be receiving water service from the large PWS or the municipality in which such Project is located, as applicable.

The subsidization amount that any project receives shall be calculated as a percentage of the contract costs that are eligible to receive DWSRF funding, for each contract identified in a contract award authorization letter issued by the DPH. With the exception of EPGP projects, federal subsidy is expected to be reserved for contracts on a first-come, first-served basis for projects on the SFY 2018 Fundable PPL until all the available subsidy funding is accounted for. The DPH will reserve subsidy for EPGP projects for 120 days following finalization of this IUP to allow applicants to obtain the necessary contract authorization from DPH after which the subsidy will no longer be reserved. Due to the limited availability of federal subsidy funds there is no guarantee every contract that is eligible for subsidy will actually receive subsidy. In cases where two or more

eligible projects are ready to proceed on or about the same time, and there is insufficient remaining subsidy to provide to all of those projects, the DPH reserves the right to take affordability factors into consideration when determining which projects will receive the limited subsidy funding.

The EPA's expectation is that the required federal subsidy funding that is available for SFY 2018 will be committed in an executed financial assistance agreement no later than September 30, 2018. Applicants that are eligible for subsidy and have projects that involve multiple contracts should plan accordingly. If an insufficient number of subsidy eligible contracts (as described in a, b, c, d, and e above) are authorized by the DPH to meet the minimum federal subsidy requirement by September 30, 2018, then the DPH will expand the eligibility to any applicant with a project on the SFY 2018 Fundable PPL. These projects will be eligible to receive a subsidy of up to 10% of each fixed contract cost associated with the project, not to exceed \$200,000 per project.

The actual amount of subsidization a project receives will be determined at the time the financial assistance agreement for each qualifying individual project is drafted and may differ from the percentages and amounts outlined above. The DWS may reevaluate subsidization levels based on the available project cost and readiness information, if necessary. Projects which are eligible to receive federal subsidization are identified on the Comprehensive Project List.

### **State Subsidy Funds – Public Water System Improvement Program**

On May 22, 2014, [Public Act 14-98](#) (PA 14-98) was signed into law, which under Section 46 provides the SBC the power to authorize bonds up to an aggregate of \$50 million to be used by the DPH to implement a public water system improvement program. On June 4, 2016, [Special Session PA 16-4](#) was signed into law, which reduced the amount to \$20 million. This PWS Improvement Program, pursuant to CGS 22a-483f, provides grants-in-aid, in the form of loan principal forgiveness, to certain eligible PWSs for DWSRF projects. A project which is eligible for any subsidy from the DWSRF must execute a loan for the remaining amount of principal in order to receive the grants-in-aid.

Eligibility criteria for the supplemental grants-in-aid contained within CGS 22a-483f includes the same eligibility criteria for DWSRF loans with the following exceptions, which are explicitly contained within CGS 22a-483f:

- Public service companies, as defined in Section 16-1 of the CGS, **are not** eligible for grants-in-aid.
- For-profit companies **are not** eligible for grants-in-aid.
- Grants-in-aid may only be provided to eligible PWSs for eligible drinking water projects for which a DWSRF project funding agreement is executed after July 1, 2014.

CGS 22a-483f also requires eligible PWSs to submit an Asset and Fiscal Management Plan with their DWSRF application. The DWS will review these plans and determine if they are satisfactory before a PWS may receive any grants-in-aid funding. The DPH has prepared Asset and Fiscal Management Plan Checklists (Attachments G and H respectively) to assist borrowers in preparing these plans if they need to.

These limited state subsidy funds will be used to further the public health goals for the State of Connecticut through the regionalization of public drinking water. DPH intends to use these grant-in-aid funds to subsidize community water system consolidation projects or interconnection projects that meet these regionalization concepts as outlined below:

**Consolidation Projects**

- Project will result in the consolidation of one or more community water systems, or one or more public schools that are public water systems, by another community water system that has the technical, financial and managerial capacity to serve them
- A legally binding consolidation agreement must be in place between the affected public water systems prior to the commitment of grant-in-aid funding in a DWSRF financial assistance agreement
- The project is consistent with a Water Utility Coordinating Committee Plan (pursuant to CGS 25-33h) and Individual Water Supply Plan (pursuant to CGS 25-32d), both approved by the DPH
- The project is consistent with the State or local Plan of Conservation and Development
- The project is not intended primarily for future growth consistent with existing DWSRF EPA requirements
- The absorbed public water system(s) and the community water system which absorbed it are eligible to receive grants-in-aid for each system's respective portion of the project as outlined below:
  - A public water system that will be absorbed will be eligible for:
    - the water main extension
    - improvements to their existing drinking water infrastructure that the water main extension will connect to, if those improvements are necessary to achieve long-term drinking water infrastructure sustainability, and that are identified in a Preliminary Engineering Report that has been approved by the DPH, including but not limited to:
      - improvement or replacement of water distribution system components (water mains, pumping facilities, storage tanks)
      - the decommissioning or demolition of infrastructure that will be obsolete after the project is completed (must be part of the DWSRF-funded project)
      - improvement or replacement of drinking water sources (well)
  - The community water system that will absorb the other system(s) will be eligible for:
    - any infrastructure upgrades directly related to providing the capacity to consolidate that are identified in a Preliminary Engineering Report that has been approved by the DPH, including but not limited to:
      - the water main extension
      - increased storage capacity
      - increased distribution system capacity
      - increased water treatment plant capacity and/or optimized water treatment plant performance
      - new or upgraded drinking water sources of supply

**Interconnection Projects**

- Project will result in the interconnection of two (or more) community water systems all of whom will remain regulated by the DPH upon completion of the project and one or more of the following criteria are met:
  - One or more of the interconnected systems does not have a sufficient margin of safety in water supply to support their existing customer demands over a 20 year planning period, the other system(s) has an adequate margin of safety over the same 20 year planning period to supply the deficit demands and the project is identified as the recommended alternative in a Preliminary Engineering Report that has been approved by the DPH; or

- One or more of the interconnected systems does not have the ability to maintain customer service with the loss of their largest drinking water source out of service for a prolonged period and the project is identified as the recommended alternative in a Preliminary Engineering Report that has been approved by the DPH; or
  - The project is consistent with, or specifically identified within, a statewide drinking water resiliency plan recognized and accepted by the DPH; or
  - The project is consistent with a Water Utility Coordinating Committee Plan (pursuant to CGS 25-33h) and Individual Water Supply Plan (pursuant to CGS 25-32d), both approved by the DPH
  - The project is consistent with the State or local Plan of Conservation and Development
  - The project is not intended primarily for future growth consistent with existing DWSRF EPA requirements
- A legally binding interconnection agreement must be in place between the affected community water systems prior to the commitment of grant-in-aid funding in a DWSRF financial assistance agreement. The following forms of agreement are eligible:
- Sale of excess water agreement, pursuant to CGS 22a-358
  - Emergency interconnection agreement

Eligible PWSs that serve 10,000 or fewer persons may receive up to 50% grant-in-aid for project costs that qualify for funding through the DWSRF. Eligible PWSs that serve more than 10,000 persons may receive up to 30% grant-in aid for project costs that qualify for funding through the DWSRF. If a project includes one PWS serving 10,000 or fewer and one PWS which serves greater than 10,000 persons, the determination of maximum subsidy percentage will be based upon the specific benefits of the project to each PWS and reviewed on a case-by-case basis. The benefits and necessity of all aspects of the project for each PWS must be clearly explained and included in any PER or similar engineering report.

Certain PWSs may be eligible to receive both Federal and State subsidies for a particular project. In these cases, the project may not receive more than the maximum amount of subsidy noted for the State Subsidy, with the exception of projects for PWSs serving more than 10,000 persons funded through the EPGP. Projects that are eligible to receive federal subsidization based on available funding are identified on the SFY 2018 Fundable PPL.

Currently the entire \$20 million available funding under this program has been allocated by the SBC for two specific projects on the Carryover List (Attachment E) for Groton Utilities and Norwich Public Utilities that have been determined to satisfy the eligibility criteria.

Should any additional funding be made available, or if the above projects do not utilize all of the allocated funding, any additional or remaining funds are expected to be distributed on a first come, first served basis to other eligible projects.

### **Prior Years' Federal Subsidization**

EPA Region 1 requested that the status of prior years' federal subsidization be addressed by the DPH in the IUP for the FFY 2017 capitalization grant. Connecticut has met the requirements for FFY 2010, 2011, and 2012. The status of the commitment and disbursement for the FFY 2013 through FFY 2016 grants are individually identified below, along with a table summarizing the amounts. The actual projects and individual subsidy amounts as of June 30, 2017, will be identified in the 2017 Annual Report, along with the status of meeting the disbursement requirement.

**FFY 2013**

The minimum required subsidization has not yet been committed for FFY 2013. As of June 30, 2017, \$1,587,343 has been committed under executed funding agreements and \$984,451 has been disbursed. The funding agreements that will commit the required funds are pending, with the goal for them to be executed by 6/30/2018, and complete the minimum required disbursements by 12/31/2018. Several factors have contributed towards the delay in committing subsidy funds for this year. These include project scheduling delays and uncertainty of the state subsidy.

**FFY 2014**

The minimum required subsidization has not yet been committed for FFY 2014. As of June 30, 2017, \$421,951 has been committed and disbursed under executed funding agreements. The funding agreements that will commit the required funds are pending, with the goal for them to be executed by 6/30/2018, and complete the minimum required disbursements by 12/31/2018. Several factors have contributed towards the delay in committing subsidy funds for this year. These include project scheduling delays and uncertainty of the state subsidy.

**FFY 2015**

The minimum required subsidization has been committed for FFY 2015. As of June 30, 2017, \$1,968,293 has been committed under executed funding agreements and \$428,774 disbursed. It is expected that we will meet the minimum required disbursements by 12/31/2017. The funding agreements that will commit the remaining expected subsidy funds are pending, with the goal for them to be executed by 9/30/2017, and complete the all disbursements by 12/31/2018.

**FFY 2016**

The required subsidization has not yet been committed for FFY 2016. As of June 30, 2017, none of the federal subsidy has been committed under executed funding agreements. The funding agreements that will commit the required funds are pending, with the goal for them to be executed by 6/30/2018, and complete all disbursements by 9/30/2019.

The table below summarizes the federal subsidies from previous years' capitalization grants:

Cap Grant FFY	Minimum Amount of Federal Subsidy to Disburse	Maximum Amount of Federal Subsidy to Disburse	Total Federal Subsidy Amount Committed as of June 30, 2017	Additional Federal Subsidy Expected to be Committed	Federal Subsidy Amount Disbursed as of June 30, 2017	Remaining Federal Subsidy Amount Expected to be Disbursed	Estimated Month for Full Disbursement of Federal Subsidy	Estimated Month for Disbursement of Minimum Federal Subsidy
2010	\$4,071,900	N/A	\$4,723,405	\$0	\$4,723,405	\$0	May 2016	Achieved
2011	\$2,825,400	N/A	\$2,990,646	\$0	\$2,990,646	\$0	September 2016	Achieved
2012	\$1,795,000	\$2,692,500	\$2,203,031	\$0	\$2,203,031	\$0	February 2017	Achieved
2013	\$1,684,200	\$2,526,300	\$1,587,343	\$500,403	\$984,451	\$1,103,295	December 2019	December 2018
2014	\$1,792,400	\$2,688,600	\$421,951	\$1,912,150	\$421,951	\$1,912,150	December 2019	December 2018
2015	\$1,778,600	\$2,667,900	\$1,968,293	\$198,828	\$428,774	\$1,738,347	December 2018	December 2017
2016	\$1,684,600	\$1,684,600	\$0	\$1,684,600	\$0	\$1,684,600	December 2019	December 2019

**G. Readiness-To-Proceed**

Only those elements (planning, design, construction) of eligible projects that are expected to result in executed contracts and DWSRF funding agreements within SFY 2018 are considered for inclusion

on the SFY 2018 Fundable PPL. Elements of eligible projects that are not expected to result in executed contracts and DWSRF funding agreements may be eligible to receive funding in a future SFY as explained in the rollover procedure in Section V.B. The Fundable PPL for SFY 2018 was generated based on the readiness of one or more elements of a project to proceed to a loan agreement during SFY 2018, and its number of priority points.

The DPH has developed objective readiness criteria that are used to determine those elements of projects for which a funding agreement can reasonably be expected to be executed during SFY 2018. This readiness determination process is necessary to ensure that available DWSRF funds will be obligated in a timely fashion. The factors in these criteria are:

- Local funding resolutions and any other necessary approvals have been identified and will be secured;
- Required local permits or approvals have been identified and will be secured;
- Required State permits or approvals have been identified and will be secured;
- Project is generally consistent with the State of Connecticut Plan of Conservation and Development
- (For Planning/Design Projects) professional services qualification-based selection process followed and will be completed, with the exception of actual award of the contract, pending DPH authorization to award the contract;
- (For Planning/Design Projects) Consultant is scheduled to be under contract during the current SFY;
- (For Construction Projects) Status of final design;
- (For Construction Projects) Status of bid specifications;
- (For Construction Projects) All necessary sites, easements and rights-of-way have been identified and will be secured;
- (For Construction Projects) Construction is scheduled to begin during the current SFY.

The information that the DPH used to make a determination on project readiness is based on updated project schedules received from applicants in response to requests from the DWS. If for some reason a project is not ready to proceed in a timely fashion, the DPH may bypass that project and select the next highest-ranked and eligible project that is ready-to-proceed for funding based on that PWS's ability to initiate the project during the current SFY.

## H. Project Bypass Procedures

### **Bypass for Readiness-to-Proceed, etc.**

The DPH utilizes procedures to bypass projects that are not progressing at a rate that will ensure the timely execution of a funding agreement and distribution of available DWSRF funds. Funds previously designated for a bypassed project will be made available to another project or may be used for cost increases on other projects previously approved.

If for some reason a project on the SFY 2018 Fundable PPL is not progressing in a timely fashion, the DPH may bypass that project and replace it with the next-highest-ranked eligible project from the Comprehensive Project List that is ready-to-proceed. A project will also be bypassed if the applicant has withdrawn its DWSRF application. This bypass process is necessary to help ensure that available DWSRF funds will be disbursed in a timely fashion.

## Emergency Bypass

The DPH Commissioner may make a project loan or loans with respect to an eligible drinking water project without regard to the priority list of eligible drinking water projects if a public drinking water supply emergency exists, pursuant to CGS Sec 25-32b, which requires that the eligible drinking water project be undertaken to protect the public's health and safety. In such cases there may be a need to by-pass projects on the SFY 2018 Fundable PPL.

## I. Other DWSRF Provisions

### Davis-Bacon Prevailing Wage Requirements

The FFY 2013 DWSRF appropriation made the application of Section 1450(e) of the Safe Drinking Water Act (42 U.S.C. 300j-9(e)) a permanent provision for all future federal DWSRF appropriations. Congress mandated that the requirements of this section apply to any construction project carried out in whole or in part with assistance made available by the DWSRF. Section 1450(e) of the SDWA requires compliance with federal labor laws regarding prevailing wages, hours of work, and rates of pay. These requirements are collectively known as the Davis-Bacon Act.

### Federal Cross-Cutting Authorities, Equivalency Projects, and Environmental Reviews

A number of Federal laws, executive orders, and government-wide policies apply by their own terms to projects and activities receiving federal financial assistance, regardless of whether the statute authorizing the assistance makes them applicable (cross-cutters). All projects for which the DPH provides DWSRF assistance in amounts up to the amounts of the capitalization grant deposited into the DWSRF (i.e. equivalency) are required to comply with these requirements. The DPH is responsible for ensuring that DWSRF assistance recipients comply with the requirements of cross-cutters, including initiating any required consultations with state or federal agencies responsible for individual cross-cutters.

The DPH is required to identify projects that will be used to satisfy federal equivalency requirements, including the project signage requirement that began with the FFY 2015 capitalization grant award. The DPH has elected to also impose federal equivalency requirements to all projects and activities for which the DPH provides DWSRF assistance. The only exception to this is for federal Disadvantage Business Enterprise (DBE) requirements which the DPH will only apply to PWS infrastructure projects costing \$100,000 or more and DPH will only report to EPA on DBE compliance in an amount equivalent to the federal capitalization grant. All PWS infrastructure projects funded by the DWSRF are reviewed under a State Environmental Review Process (SERP) administered by the DPH and considered by the EPA to be equivalent to a National Environmental Policy Act (NEPA) review.

For the purposes of satisfying capitalization grant reporting requirements under the Federal Financial Accountability and Transparency Act (FFATA), the DPH will only report on DWSRF projects in an equivalent amount of each capitalization grant as requested by EPA. A list of projects that may be used to satisfy the FFATA reporting requirements is shown below. The actual projects reported under FFATA will be stated in the DWSRF annual report. Any contracts over \$25,000 utilizing set-aside funds will also be reported under FFATA.

**SFY 2018 Potential Projects to be Used for FFATA Reporting**

Project #	PWSID	PWS	Town of PWS	Project Name	Amount Requested
SFY18-15	CT0090011	Bethel Water Dept	Bethel	New East Swamp Well Field	\$2,600,000
SFY18-11	CT0090011	Bethel Water Dept	Bethel	Chestnut Ridge Zone Water Storage Tank	\$1,300,000
SFY18-10	CT0090011	Bethel Water Dept	Bethel	Briar Cliff Pump Station	\$585,000
SFY18-14	CT0090011	Bethel Water Dept	Bethel	Water Main Replacement	\$1,400,000
SFY18-24	CT0450011	East Lyme Water Dept	East Lyme	AMI	\$3,413,575
SFY18-27	CT0640011	Metropolitan District Commission	Hartford	Madison Ave. Water Main Replacement - Hartford	\$4,000,000
SFY18-26	CT0640011	Metropolitan District Commission	Hartford	Church St. Water Main Replacement Phase 1 - Hartford	\$4,700,000
SFY18-28	CT0640011	Metropolitan District Commission	Hartford	Orchard St. Pump Station Rehabilitation - Glastonbury	\$2,680,000
SFY18-25	CT0640011	Metropolitan District Commission	Hartford	Buckingham St. Area Water Main Replacement - Hartford	\$7,150,000
SFY18-32	CT0770021	Manchester Water Dept	Manchester	Stove Pipe Replacements - Misc. Areas	\$1,200,000
SFY18-31	CT0770021	Manchester Water Dept	Manchester	Infrastructure Replacement Valley St. Area	\$1,000,000
SFY18-38	CT0930011	Regional Water Authority	New Haven	Lake Saltonstall Water Storage Tank Improvements	\$1,172,900
SFY18-40	CT1030011	Norwalk First Taxing District Water Dept	Norwalk	West Rocks High Service Area Water Service Reliability Project	\$6,800,000
SFY18-39	CT1030011	Norwalk First Taxing District Water Dept	Norwalk	AMI - Phase 1	\$2,000,000

**Use of American Iron and Steel**

On January 17, 2014, federal Public Law 113-76 was enacted, which added a new federal Use of American Iron and Steel (AIS) requirement in Section 436. Subsequent annual appropriations have continued this requirement. The FFY 2017 appropriation requires that DWSRF assistance recipients use iron and steel products produced in the United States for the construction, alteration, maintenance or repair of a public water system or treatment works if the project is funded through an assistance agreement executed through the end of FFY 2017 (September 30, 2017). The EPA has issued guidance on the implementation of this provision and created a [State Revolving Fund American Iron and Steel Requirement website](#). The DPH has also created a [Use of American Iron and Steel](#) webpage to assist DWSRF applicants in understanding and complying with AIS requirements.

**Federal Single Audit**

Any sub-recipient which receives a total amount of \$750,000 or more from any federal source, including the DWSRF, in a single federal fiscal year is required to conduct a federal single audit according to the Single Audit Act Amendments of 1996. This requirement is included as a term in all project funding agreements.

**J. Connecticut Plan of Conservation and Development**

CGS Section 16a-31(e) requires that whenever a state agency is required by state or federal law to prepare a plan, it shall consider the Plan of Conservation and Development (C&D Plan) in the

preparation of such plan. The DPH has considered the C&D Plan in the preparation of this IUP and submitted the IUP to the Secretary of the Office of Policy and Management (OPM) for an advisory report commenting on the extent to which the proposed plan conforms to the C&D Plan.

The advisory report on the IUP's conformance with the C&D Plan is important because CGS Section 16a-31(c) also requires the OPM to advise the SBC prior to the allocation of funding to the DPH for these DWSRF projects. Finally, CGS Section 16a-31(a)(3) requires the DPH to determine the consistency with the C&D Plan of individual actions regarding the acquisition, development, or improvement of real property, it undertakes using state or federal funds, such as the drinking water infrastructure improvement projects contained in the SFY 2018 IUP, when those costs are in excess of two hundred thousand dollars.

## **V. DWSRF POLICIES and REQUIREMENTS**

### **A. Letter of Authorization to Award for Eligible Projects**

The DPH may issue a letter authorizing the PWS to award a contract for a project if sufficient information has been submitted. Typically, this letter indicates to the applicant that the materials that they have submitted to the DPH satisfy the rules and regulations for the DWSRF program. Pursuant to the regulations, the applicant must submit a request for authorization to award a contract to the DPH and receive such authorization prior to any contract execution in order to keep a project eligible. The applicant may award the contract(s) subject to conditions set forth in the letter. The authorization letter does not constitute a commitment by the DPH to make a project loan under the DWSRF program.

### **B. Project Application Carryovers and Rollovers**

#### **Project Progressing Towards a Loan Agreement (Carryover)**

Funding for a project that has been identified on the Fundable PPL in a previous annual IUP may be carried over to the subsequent IUP period if the applicant is actively progressing toward a DWSRF financial assistance agreement. Projects in this category are considered to have already gone through the public hearing process and will not be re-ranked in the subsequent IUP period. Projects meeting this criteria are identified on the SFY 2018 Carryover List. Any federal subsidy that may be provided to a project on the Carryover List is subject to the federal subsidy provisions contained in the IUP where the project originally appeared on the Fundable PPL.

The DPH reserves the right to move a project from the Carryover List to the Comprehensive Project List, if that project is not progressing due to unforeseen circumstances that occurred after the project was originally placed on the Carryover List. A project so moved is no longer reserved any DWSRF funding, including any subsidy.

#### **Project on the PPL, but not Progressing Towards a Loan Agreement (Rollover)**

A project that has not been withdrawn, but which is not progressing towards a loan agreement during the IUP period/funding cycle, can be rolled over for consideration in the subsequent IUP period/funding cycle upon written request to the DPH by the applicant. Any PWS seeking to rollover a project is required to update its DWSRF application upon request by the DPH. These projects will be ranked with all new applications received for the fiscal year into which the project

is being rolled over and in accordance the then-current PRS. Any project that is rolled over must continue to comply with all requirements of the DWSRF program.

### **C. Multi-Year Projects on the Fundable Portion of the Priority List**

The construction of some drinking water projects may take place over multiple years. For such multi-year projects, the DPH reserves the right to require the applicant to break the project into phases and to limit the amount of funding reserved for the project on the Fundable PPL to the amount of funds the PWS reasonably expects it will need for the phase to be designed and/or constructed during the SFY of the PPL. This allows the timely access to DWSRF funds by other DWSRF applicants that are ready to use them. Subsequent phases of these multi-year projects will automatically be rolled over to the PPL for the next IUP and will retain its assigned ranking points, subject to changes in the "Affordability" criteria. These subsequent phases will not automatically receive DWSRF funding in the next annual IUP period and will be ranked with all new and rolled-over applications received during the IUP period when each subsequent phase is ready-to-proceed.

### **D. Tie-Breaking Procedures**

The total numeric score for a project is determined by summing the points awarded based on the PRS and detailed in the DWSRF Eligibility Application. In circumstances where more than one project has an equivalent ranking score, the following tiered approach will be implemented to break the tie:

1. The size of the population served by the project; the project with the larger population served will be given preference.
2. The percentage of total system population served by the project; the project serving a higher percentage of the overall system population will be given preference.
3. The size of the total population served by the system applicant; the system with the larger population will be given preference.

If two or more projects remained tied after implementation of tie-breaker #1, then #2 will be applied. If two or more projects remain tied after implementation of tie-breakers #1 & #2, then #3 will be applied.

### **E. Pre-Review Policy (Construction Only)**

The DWSRF Program operates on a SFY basis from July 1 to June 30, and cannot provide funding prior to the start of a specific SFY for that year's Fundable PPL. The DPH recognizes that the construction season in Connecticut generally begins in the spring and lasts through the end of the calendar year. The DPH has determined that it is not in the best interest of the Program to delay project schedules to begin construction after the start of the SFY for which a project has submitted an Eligibility Application and requested funding, which is several months into the construction season. As a result, certain projects may begin construction before the start of the SFY and remain eligible for DWSRF funding after the start of the SFY. The DWS may include these projects on a Fundable PPL provided that all of the following conditions are met:

- The PWS has submitted a DWSRF Eligibility Application to the DPH during the Call for Projects for the SFY
- The funding agreement will be drafted during the SFY under which the project is listed on the Comprehensive Project List
- The project cannot begin and be completed prior to the start of the SFY

- The project is consistent with the Connecticut Conservation and Development Policies Plan
- The project is considered an action that does not require an environmental review under the Connecticut Environmental Policies Act and qualifies for a categorical exclusion from the National Environmental Policies Act
- The project has satisfied all other state and federal DWSRF requirements prior to placing the construction contract out to bid
- The project has received written authorization from the DPH to award a construction contract prior to the execution of the contract
- The project continues to adhere to all state and federal DWSRF requirements during construction

If the DWS includes such a project, it will be included on the Comprehensive Project List and ranked as outlined in this IUP. Any project that meets the above conditions and elects to start construction prior to the SFY shall understand that:

- The DPH provides no guarantee of DWSRF funding for their project
- The PWS shall be responsible for paying all costs associated with their project and will only be eligible for reimbursement from the DWSRF if their project makes it onto the Fundable PPL
- A project may be able to bypass a higher-ranked project, if that higher-ranked project is not sufficiently ready to proceed, per the procedures outlined in this IUP
- A DWSRF funding agreement cannot be executed until after Fundable PPL for the SFY is finalized

#### **F. Reimbursement**

The DPH implements the EPA policy on eligibility of reimbursement of incurred costs for approved projects (Eligibility of Reimbursement of Incurred Cost for Approved Projects 64 F.R. 1802 (Jan. 12, 1999)). Consistent with this policy, an eligible PWS must receive written authorization from the DPH prior to commencement of construction in order to be eligible to receive reimbursement at the financial assistance agreement closing for any construction costs incurred prior to the loan closing.

#### **G. Refinance Existing Loans**

The DWSRF may be used to buy or refinance debt obligations for DWSRF projects, if the DPH determines the refinance is in the best interest of public health. The SDWA and DWSRF regulations only permits use of the DWSRF for refinancing for municipal projects incurring debt and initiating construction after June 30, 1993. Projects will still have to be eligible for DWSRF funding and meet project review requirements, including an environmental review, and must receive written authorization from the DPH prior to commencement of construction. Private systems are not eligible for refinancing. The project must adhere to all state and federal DWSRF requirements during construction. Consideration for refinance applications will be entertained only after projects addressing public health protection and compliance have been funded.

Such projects will be ranked below any projects that are not for refinance according to the PRS. If it is determined after the initial eligibility review that a project is seeking DWSRF funds solely for refinance, the DPH reserves the right to adjust the ranking accordingly. A refinance project may be able to bypass a higher-ranked project, if that higher-ranked project is not sufficiently ready to proceed, per the procedures outlined in this IUP.

## H. Withdrawal of Project from Funding Consideration

If a PWS chooses not to pursue funding of a project through the DWSRF, or chooses to not go forward with the implementation of a project, the PWS shall be requested to submit a letter to the DPH indicating the withdrawal of the project. The letter should include a statement as to why the project was withdrawn. Upon receipt, the project will be removed from the Fundable PPL and Comprehensive Project List, or the Carryover List, as appropriate, and no longer considered for funding. Withdrawal of a project will not preclude a PWS from continuing to pursue funding for other projects or from submitting the same project for consideration during a subsequent DWSRF funding cycle. If a PWS does not submit a letter as requested, the DPH may withdraw the project based on the initial notification. A PWS will be notified if their application is withdrawn by the DPH.

Projects for which an Eligibility Application was received and the project is placed on the SFY 2018 Fundable PPL, but for which the DPH does not receive a Financial Assistance Application by the established deadline may be bypassed or withdrawn. A PWS will be notified if their application is withdrawn by the DPH.

The DPH reserves the right to withdraw and remove any project from the Fundable PPL and Comprehensive Project List, or the Carryover List, if the applicant becomes nonresponsive to the DPH. Any applicant whose project is withdrawn by the DPH will be notified in writing and required to resubmit a new DWSRF Eligibility Application if they desire to further pursue DWSRF funding.

## I. Use of Excess Project Funds

The amount of funding in a Loan Agreement is generally based upon known fixed costs, and may also include a reasonable or adequately justified amount of contingency for unexpected costs that may occur during the project. If a recipient does not utilize all available funds upon completion of the original project, they may submit a request to the DPH to utilize those excess funds for additional work related to the scope and use of the original project. The additional work must enhance or provide additional public health value to the original project. This additional work will be reviewed and required to follow all applicable requirements in the same manner as all projects.

## J. Replacement of Lead Service Lines when Replacing Water Main

During the replacement or rehabilitation of a distribution system water main as part of a DWSRF eligible project, any lead service lines or partial lead service lines that are known to exist or that are encountered during such replacement or rehabilitation must be replaced in order for the water main project to remain eligible for DWSRF funds. This requirement is conditioned on the DWSRF applicant obtaining the consent of the individual property owner to replace the full lead service line. If such consent is obtained, the full lead service line replacement may be undertaken by the DWSRF applicant or individual property owner. If undertaken by the individual property owner, the DWSRF applicant shall verify all lead materials have been removed and that no new lead replacement materials have been installed. When lead service lines are encountered, the DWSRF applicant shall, at a minimum:

1. Provide the individual property owner with information about the risks of lead exposure and information about the applicant's Lead Service Line Replacement Program.
2. Engage in meaningful discussion with the individual property owner about sharing appropriately in fully removing their lead service line.

3. Offer to collect a tap water sample from the individual property owner's residence or building for lead analysis at a DPH approved laboratory. If such offer is accepted, the applicant shall promptly collect the sample(s) and provide and explain the test results to the individual property owner promptly after they have been obtained from the laboratory.

If the property owner does not consent to replacing their lead service line the following additional actions shall be undertaken by the DWSRF applicant:

4. Notify the DPH of the property address of the lead service line and the refusal of the property owner to allow or undertake its replacement.
5. Evaluate the applicant's Lead and Copper Rule sampling site plan, if the lead service line was not previously known to exist, to determine if appropriate changes need to be made based on this information.
6. Maintain records of items 1-5 above.

The replacement of the service line must result in the complete removal of all lead components from the water main to the water meter or other connection point to the premise plumbing. The replacement of the lead service line is eligible for DWSRF funding if such costs are not covered by the individual property owner; however, DWSRF funding shall be subject to the availability of DWSRF funds to cover these additional costs.

## **VI. FINANCIAL MANAGEMENT**

### **A. Rationale for Determining Amounts of Capitalization Grant Intended for Project and Set-Aside Funds**

Section 1452 of the SDWA authorizes states to use a portion of the capitalization grant to support various drinking water programs through set-aside funds. The DPH has chosen to take the maximum amount allowable and uses these set-aside funds to promote and implement safe drinking water efforts integral to Connecticut's multiple barrier approach to protection of public drinking water supplies and public health. Additionally, the DPH uses these funds to foster greater appreciation of drinking water among the general public and the regulated community. Both of these intended uses address proactive and preventive measures endorsed by Congress in its authorization of the SDWA.

Section VII provides an overview of how the DPH will use the funds allocated for each set-aside.

### **B. Sources and Uses of DWSRF Funds**

#### **Sources**

The total DWSRF funding available for direct loans and subsidization to PWSs during SFY 2018 is expected to be approximately \$236,592,093, including the funds under PA 14-98. This amount is contingent upon legislative approval of DPH's requested revenue bond authorization for SFY 2018 in the amount of \$55.2 million. Attachment A provides a breakdown of the sources of these funds. These sources include carry-over revenue bond authorizations from previous IUPs that were not allocated to projects. The total amount that may be used to fund drinking water projects is limited to the total bond authorization by the state legislature as part of the state capital budget and state matching contributions.

Attachment A also identifies the amount of set-asides from DWSRF capitalization grants and state match amounts. The Federal capitalization grant, principal repayments, interest repayments, and funds earned through leveraging are used to support our overall bond authorization and as such are not individually identified.

The breakdown of sources and uses reflects the total amounts projected for the DWSRF project fund and set-aside accounts that will be made available to the DPH upon EPA approval of the DPH's FFY 2017 capitalization grant application.

### Uses

Projects that are currently anticipated to be funded during SFY 2018 include all projects that are being carried forward from the previous IUP and projects appearing on the SFY 2018 Fundable PPL. The Carryover Project List identifies 35 projects for a total of \$130,799,722. It is expected that several projects will be executing funding agreements over the next few months which will significantly reduce this amount. The SFY 2018 Fundable PPL identifies 39 projects for a total of \$43,740,341. The Comprehensive Project List identifies all eligible projects which are seeking funding, including those on the PPL, as described in Section V.

As shown on Attachment A, The total amount of funding available for new projects during SFY 2018 is anticipated to be approximately \$85.8 million. This is approximately \$42 million more in available funding than project costs shown on the SFY 2018 Fundable PPL. These additional funds will be used for unanticipated increases in the cost of projects expected to receive funding, or for additional projects from the Comprehensive Project List that may become ready to proceed in SFY 2018 after the finalization of this IUP. The anticipated \$85.8 million in available funds is contingent upon legislative approval of the DPH's \$55.2 million capital budget request for new revenue bond authorization in SFY 2018.

The ULO balance of capitalization grant funds designated for DWSRF projects is \$6,478,338 as of July 1, 2017. Due to program requirements, all monies provided as federal subsidy must come directly from the federal capitalization grant. As a result, a balance of project ULOs must be maintained in an amount sufficient to make federal subsidy payments for qualifying projects currently under funding agreements and those for which funds are being carried over. The ULO set-aside balance is \$3,465,626. In April 2014, EPA established national objectives for states to fully expend their capitalization grants within two years of their award date.

The set-aside portion of the capitalization grants are described in Section VII. These set-asides are primarily used to support adequate levels of DWS staffing to implement the DWSRF, Source Water Protection, Capacity Development and Public Water System Supervision Programs with limited outside contractual support. The State of Connecticut provides in-kind matching funds to obtain our federal EPA grants; however, non-matching state contributions for these activities have diminished in recent years and are not expected to increase in the foreseeable future due to current State budget deficit projections. The DPH has been carrying over unspent set-asides from prior years' capitalization grants to sustain these programs. For several years the DPH has proposed legislation to enact fees to provide long term support for these programs and reduce our dependence on the capitalization grant carryovers. DPH continues to work to move this legislation forward and produced a [report](#) to the joint standing committee of the General Assembly required, under Section 17 of [May 2016 Special Session Public Act 16-2](#), which reviewed financial needs and proposed methods to address those needs. The DPH has accelerated the rate of spending these carryover funds to reduce ULOs, but is obligated to manage those funds in a manner that minimizes the risk of diminishing the important services provided by the programs until alternative sources of new

funding are obtained. As part of this management effort, the DPH requested and received a 12-month extension from the EPA to fully draw down the FFY 2014 set-aside portions of the capitalization grant.

### C. The DWSRF Financing Plan and Issuance of Bonds for Leveraging

The DWSRF financing plan is similar to the plan for the State's CWF program. This plan includes leveraging, when appropriate, where project funding comes from the proceeds of revenue bonds supported by the capitalization grants. A more detail financial analysis of the DWSRF program can be found in the [DWSRF Annual Reports](#), which are available on the OTT's website.

States may issue bonds through the DWSRF program using the federal capitalization grant as security to provide for higher funding levels in the current year of the program. Leveraging of federal funds is a useful financial option available to states with a high demand of shovel ready projects for immediate DWSRF funding. Consistent with Connecticut's financing strategy for the CWF, the DWSRF includes leveraged financing. Since 2001, with the EPAs approval, bonds have been issued on an as-needed basis to fund DWSRF projects. Leveraged financing allows the DWSRF to maximize the available project funding because the revenue bond proceeds can be two to three times the amount of the available capitalization grants and state match contributions. This strategy also allows the State to provide more loans with a lower interest rate at favorable terms to more of the PWS applicants.

Connecticut's program is a leveraged program and has established itself as a highly rated (AAA) borrower in the bond market. We have used capitalization grants to leverage multiple series of bonds, aggregating over \$68.4 million in outstanding principal for the DWSRF program as of March 31, 2017 to fund loans.

The leveraging process has been successful because it has allowed the State of Connecticut to fund projects that would not be normally funded using capitalization grant funds alone. Examples include: The \$55 million New Britain Water Treatment project, which was built using \$36.6 million in DWSRF funds. This project, which replaced an antiquated system, provides excellent quality water to its over 90,000 customers, and keeps the water rates relatively low. The \$29 million water treatment plant upgrade for the South Norwalk Electric and Water utility was built using \$24.7 million in DWSRF funds to replace an antiquated water treatment plant that was badly in need of upgrades. Meriden Water Division has secured over \$21 million in DWSRF funds for the design and construction of major improvements to Broad Brook Water Treatment Plant and Pumping Station to maintain purity and adequacy of water to its 60,000 customers. Over \$8.0 million in DWSRF funds was used to cover the cost for design and construction of the East Lyme Sewer and Water Regional Interconnection project. This project is critical for East Lyme to meet its summertime peak demands, address other public health and water system operational needs, and provide fire protection for enhanced public safety. A major project that is expected to receive DWSRF funding during SFY 2018 is the Water Treatment Plant upgrade of Groton Utilities. Groton will make significant improvements to its plant to address water quality issues. The majority of the existing components are antiquated (originally constructed in 1938), and improvements to the facility are crucial for infrastructure sustainability. Approximately \$54.0 million in DWSRF funding is expected to be used to cover the construction and project oversight. Without leveraging, the DPH would not be able to fund larger projects like these.

In June 2017 bonds were issued for the CWSRF and the DWSRF in anticipation of several significant projects moving forward over the next two years, including the Groton Utilities Water Treatment Plant upgrade project.

#### **D. State Matching Requirement**

The required 20% state match for the FFY 2017 capitalization grant is \$1,670,200. These funds are required to be in place prior to drawing down the award. The State of Connecticut expects to have the required state match amount deposited prior to the expenditure of any federal FFY 2017 capitalization grant dollars. The state match is provided through the proceeds of state General Obligation Bonds issued prior to 2001 and cash contributions from the state. Since 2007, additional state match has been provided by the contribution of principal and interest payments collected from the State of Connecticut on General Obligation Bonds issued to provide interest subsidy for the CWF and held outside the CWF until payments are received by Connecticut. These funds are no longer needed by the CWF for debt service because of the issuance of lower cost refunding bonds and additional contributions by Connecticut. These payments are held and deposited as cash contributions for the DWSRF state match. As of April 30, 2017, the DWSRF has received and deposited \$40.4 for the required match, including those for the FFY 2017 capitalization grant.

#### **E. Federal Cash Draw Proportionality**

The DPH must draw down project funds from the federal capitalization grant award at a proportional rate not to exceed the rate of use for the state matching funds that will be used to secure the grant. The DPH intends to use all of the state match funds prior to drawing down the federal capitalization grant funds. This approach will ensure compliance with the proportionality requirement.

#### **F. Financial Terms of Loans**

Connecticut has instituted a tiered schedule of interest rates for DWSRF loans derived from the market costs of debt financing for the DWSRF program. The tier applicable to a specific project will be based on the financial and legal status of the recipient as well as on the type of project. CGS Sections 22a-475 through 22a-483, inclusive, allows for amortization to begin one year from the project's scheduled completion date and provides a formula, based on Connecticut's prevailing taxable or tax-exempt bond market rates, for setting interest rates. Connecticut may adjust these terms based on the financial viability of the borrower.

CGS Sections 22a-475 through 22a-483, inclusive, also allows Connecticut to offer project loans with reduced interest rates or an extended term, if permitted by Federal law, to eligible PWSs that qualify as disadvantaged communities. Attachment 10 to the OA contains an explanation of what a disadvantaged community is. Connecticut does not currently offer a disadvantaged community assistance program for the DWSRF.

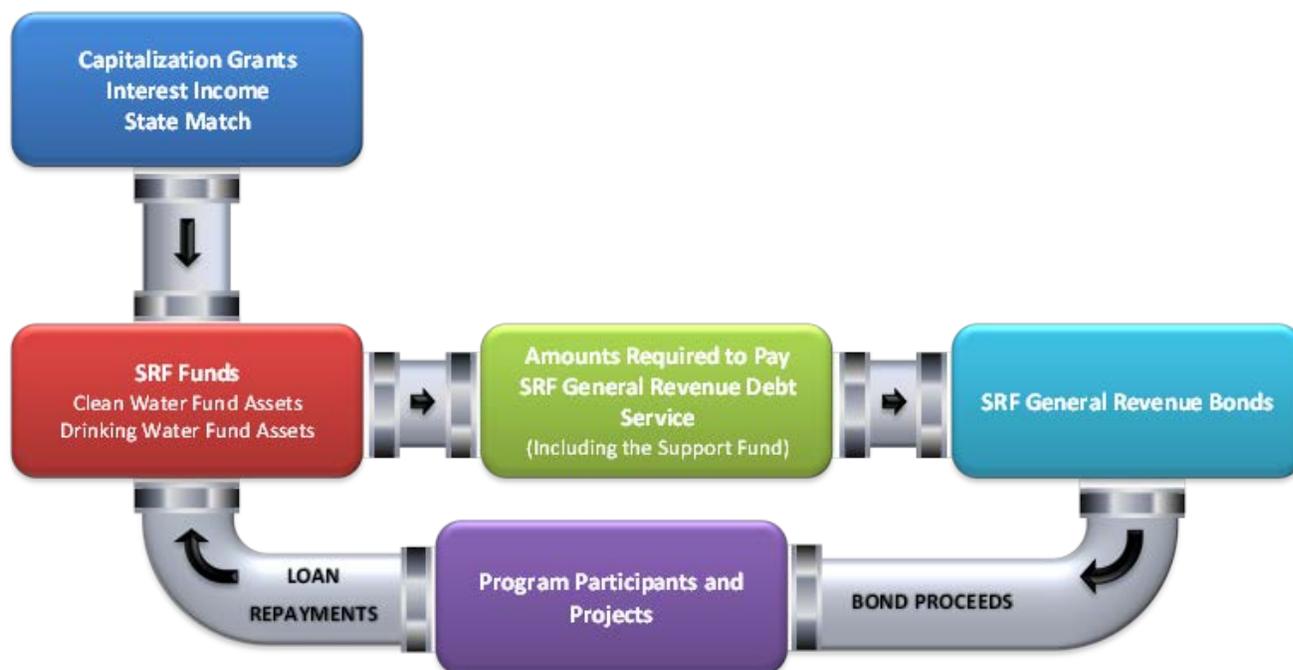

Within the provisions of CGS Sections 22a-475 through 22a-483, inclusive, Connecticut will consider appropriate financial terms for refinancing and the acquisition of land and sanitary easements on a case-by-case basis. The DPH policy for refinancing is discussed in Section V. Additional lending policies pertaining to the DWSRF program are found in Attachment 6 (last revised April 1999) to the OA.

The term of a loan (in years) may not exceed the useful service life of the primary infrastructure component(s) that are being financed through the DWSRF. Maximum loan terms may also be restricted based on the dollar amount of the loan (not including any subsidy) as outlined in the table below.

Loan amount	Maximum loan repayment term
up to \$10,000	3 years
\$10,000 - \$25,000	5 years
\$25,000 - \$100,000	10 years
More than \$100,000	20 years

Projects with loans of \$100,000 or less may be treated as reimbursement only. The borrower may be expected to pay their contractors with their own funds as necessary to complete the project. The financing agreement with DPH will allow PWSs to be reimbursed for those eligible expenses once the DPH receives a reimbursement payment request from the PWS along with all of the contractor’s invoicing.

Figure 2 – The Revolving Flow of Funds

## G. Transfer of Capitalization Grant Funds between the DWSRF and CWSRF

The DPH has not transferred funds between the DWSRF and the CWSRF programs. While such a transfer is permitted under the SDWA, the DPH does not anticipate making such a transfer under the current IUP, but reserves the right to do so if necessary.

## H. Expected Loan Demand

Connecticut's participation in the EPA-sponsored Drinking Water Infrastructure Needs Survey and Assessments (DWINSAs) for 1999, 2003, 2007, and 2011 evidenced that a significant need continues to exist throughout the state for funding capital improvements. The results of these surveys are used by the EPA to determine the percentage of the DWSRF appropriation that each state will receive each year for the 4-year period interval following release of each survey's report.

The 2011 DWINSA assessed the cost and types of drinking water needs throughout the nation for the period January 1, 2011 to December 31, 2030. The results of the survey were used to determine the DWSRF allocation for FFYs 2014 through 2017. The results of the 2011 survey, which were released in June 2013, showed that the State of Connecticut's estimated need had grown from \$1.394 billion in 2007 to \$3.587 billion in 2011. Starting with the FFY 2014 capitalization grant, the state's allotment has increased from 1% to 1.01%. The breakdown was as follows:

Transmission and Distribution	\$2.584 billion
Treatment	\$545.1 million
Storage	\$267.3 million
Source	\$146.6 million
Other	\$35.0 million

As the cost and need for infrastructure projects continue to increase, the demand for low-cost loans will most likely also increase. The availability of federal subsidization since 2009 for DWSRF projects has also increased the demand for loans. For SFY 2018, the DPH received requests for loans for 47 infrastructure projects totaling approximately \$75.2 million in eligible costs. This eligible amount includes 22 applications from small systems, of which 10 applications are EPGP projects.

Data collection for the 2015 DWINSA was completed in February 2016. Based on this information, the DPH expects the overall need to have increased since 2011. The official report from EPA is expected to be released during 2017.

In addition, in December 2015, regulations became effective requiring emergency power provisions for all community water systems. The DPH expects an increase in funding requests through the Emergency Generator Power Program over the next few years.

## I. Impact of Program on Long-Term Financial Status of the DWSRF

The main features of the DWSRF program – the PRS, the leveraging plan, and the maximization of set-aside monies – will be implemented and managed in a prudent and responsible manner. This will allow the DPH to meet the public health and compliance goals of the DWSRF, while simultaneously preserving the integrity and perpetuity of the fund itself. Loan terms will be attractive, while lending procedures will include safeguards structured to minimize unforeseen losses to the fund. The use of federally allowed subsidization from the capitalization grants will be

managed to ensure that these non-repayment funds enhance the program rather than result in detrimental long term consequences.

The DWSRF also produces numerous opportunities for strengthening water supply mechanisms (i.e., source protection, PWSS program) that will ultimately result in improvements to safe and adequate supplies of drinking water for Connecticut residents. Additionally, the placement of the DWSRF within the financial structure of Connecticut’s CWF guarantees that the DWSRF will benefit in the long term from the same management and financial planning mechanisms that have marked the success of Connecticut’s CWF Program.

**VII. SET-ASIDE ACTIVITIES**

Taken together, 31 percent of a Connecticut’s DWSRF capitalization grant is used for set aside activities. The DPH DWS receives funds under four set-asides to support various drinking water and DWSRF program activities. They include the Administration, State Program Management, Small Systems Technical Assistance, and Local Assistance set-aside funds. The following pages provide anticipated set-aside activities during the time period covered in this IUP. Prior to requesting disbursement of these funds, the DPH submits work plans to EPA Region 1 as part of the FFY 2017 capitalization grant application, which provides specific details for each set-aside fund request. At any time in which a modification is necessary, the DPH contacts EPA Region 1 to discuss, submit an amendment if deemed necessary, and seek approval. The DPH DWS expects to meet all set-aside reporting requirements as detailed in the capitalization grant award conditions.

**A. DWSRF Administrative Funds**

**Maximum Allowed:** \$400,000 of the Capitalization Grant  
**Taking from FFY 2017 Grant:** \$400,000

The DPH intends to use funds in the Administrative set-aside to support existing staff at DPH and OTT dedicated to administrative and fiscal management of the DWSRF accounts, oversight and tracking of the DPH’s January 2013 Cash Management Plan, as well as providing assistance to borrowers in preparing their loan applications and satisfying program requirements. In addition, the DPH intends to utilize funds from this set-aside for the development and use of a state specific project financing, loan and accounting management system for the DWSRF program. Pursuant to the WIIN Act of 2017, §2103, the DPH has chosen to take the maximum option of \$400,000 for this set-aside.

**B. State Program Management**

**Maximum Percentage Allowed:** 10% of the Capitalization Grant  
**Taking from FFY 2017 Grant:** 10% (\$835,100)

Funding under this set-aside will be used primarily to support and administer the Public Water System Supervision (PWSS) program, which includes administering and providing technical assistance to PWSs in Connecticut. Staff supported by this fund also perform the following in support of both the PWSS and DWSRF programs:

- Coordinate DWS grant administration/lead interaction with EPA for grant administration, applications and reporting
- Prepare guidance documents, work plans and long-term strategies for DWSRF program management and EPA required program management reports (i.e. QAPP, PPA),
- Prepare contracts related to technical assistance to PWSs to assist the DWS in capacity development efforts

- Provide direct technical assistance to PWSs regarding the required reporting of water quality and inventory/facility data utilized in Safe Drinking Water Information System and electronic data interchange; provide information and educational opportunities to PWSs via internet postings.
- Provide legal assistance to the DWS regarding the DWSRF program
- Coordinate activities with the Environmental Health Section's Laboratory Certification Program in assisting PWSs regarding water quality testing issues
- Identify water systems that would most benefit from collaboration or regionalization and assisting in developing and evaluating processes to aid in the success of DWS capacity development efforts
- Assist in coordinating long-range water supply planning by addressing water quality and quantity issues from area-wide perspectives in regional coordinated plans
- Performance of general office functions, such as reception, typing, filing, and bookkeeping in support of the PWSS and DWSRF Programs.
- Continuously update and maintain DWS's Geographic Information System(GIS) data layers in the DWS GIS system
- Review and approval of proposed sources of supply, including verification that the water system has ownership or control of the sanitary radius for proposed groundwater sources.
- Provide support for DWSRF Program Management activities by performing a wide variety of general clerical functions including basic processing, reception, filing, record keeping, bookkeeping and typing
- Review DWSRF project funding applications and perform subsequent engineering tasks as required
- Attend workshops and trainings to improve the efficiency of the DWSRF program
- Continue Memorandum of Agreements between DPH and UCONN that allows UCONN students to intern with the DPH DWS
- Coordinate the preparation of DWSRF loan agreements with the DPH Fiscal Office, Office of Grants and Contracts and the Office of the State Treasurer

### C. Small Systems Technical Assistance

**Maximum Percentage Allowed:** 2% of the Capitalization Grant  
**Taking from FFY 2017 Grant:** 2% (\$167,020)

Activities performed under this set-aside including providing technical assistance to small PWSs serving up to 10,000 consumers and contracting with a service provider to offer technical assistance to the state's small PWSs. Technical assistance efforts include:

- Conducting sanitary surveys of community, NTNC and transient non-community (TNC) PWS serving fewer than 10,000 persons (small systems)
- Assessing existing small PWS's technical, financial and managerial capacity during sanitary surveys
- Educating and assisting small systems in applying for DWSRF loans for infrastructure projects
- Contracting with Technical Assistance Provider to provide training and direct one-on-one assistance to teach small system trustees, operators, and municipal officials the value and method of asset management to improve technical, financial and managerial capacity of those involved in managing the utility.

#### D. Local Assistance

<b>Maximum Percentage Allowed:</b>	15% of the Capitalization Grant
<b>Taking from FFY 2017 Grant:</b>	5% (\$417,550) – Wellhead Protection
	10% (\$835,100) – Capacity Development

The DPH uses this set-aside for wellhead protection and capacity development activities. The Wellhead Protection Program will use 5% of the set-aside funds and the Capacity Development Program will use the remaining 10%. Each program is described below.

##### a) Wellhead Protection

Program elements include coordination, management, and regulation of source protection through the proactive enhancement and oversight of existing source protection laws and regulations, integration with water supply planning, education of local land use officials, and involvement with stakeholders on a continuous basis. Efforts under this set-aside include:

- Implementing continually revised statutes and regulations for source water protection, including the provisions of the federal Groundwater Rule
- Reviewing and approving/denying all proposed sources of public water supply
- Permitting of proposed sales or changes to water company owned land (i.e. land owned by PWSs that are within source water protection areas)
- Permitting of monitored recreational activities on water company land
- Coordinating of the process of conducting annual watershed inspection; and annual submission of Watershed Survey Reports
- Active and committed involvement with the improvement of the GIS application and database which is critical for adequate source assessment and protection
- Linking the protection of public water supplies with subsurface sewage disposal system approval, maintenance, training, and repair
- Linking the Clean Water Act to the SDWA through working with EPA, DEEP, and other stakeholders
- Continually working with local, regional and state partnerships on Environmental Reviews for projects that could potentially impact drinking water quality
- Collaborating with stakeholders at the community and state level to implement source water protection concepts and best management practices to enhance drinking water source protection
- Working with many diverse groups to enhance drinking water source protection and provide useful educational materials
- Working to develop and utilize consistent policies for the use of pesticides and herbicides in public drinking water sources of supply

##### b) Capacity Development

The DPH will use 10% of the Local Assistance set-aside allocation for capacity development initiatives that are consistent with the DWS's EPA-approved Capacity Development Strategy and help to improve the technical, financial and managerial capacity of PWSs. The DPHs strategies account for both immediate and long-term sustainability initiatives, including education, technical assistance, enforcement, consolidation, DWSRF assistance, and water system restructuring. These funds will be used primarily to support staff within the DWS that:

- Conduct sanitary surveys of community, NTNC and TNC PWSs
- Provide technical assistance to PWSs on violations and deficiencies noted during sanitary surveys

- Perform technical, financial and managerial capacity assessments of PWSs during sanitary surveys
- Provide technical assistance and enforcement referral to local health departments for maximum contaminant level violations, source water construction violations and cross-connections identified at NTNC and TNC food service establishments
- Conduct reviews of water quality and quantity of newly-developed drinking water sources and review engineering plans and specifications for new water system designs in accordance with CGS Section 16-262m, and regulations adopted thereunder, and under the authority of RCSA Section 19-13-B102
- Support the DWSRF program by soliciting for DWSRF projects; providing technical assistance to DWSRF applicants and their consultants on program requirements; determining project eligibility and reviewing and ranking project applications; reviewing project plans and specifications; tracking projects through completion including site visits; reviewing and approving DWSRF payment requests from loan recipients; entering and maintaining data in the federal DWSRF Project Benefits Reporting (PBR) system and Drinking Water National Information Management System (DWNIMS) on-line databases; preparing state and federal DWSRF reports; coordinating, conducting and attending the Public Hearing on the IUP and PPLs; meeting with stakeholders and applicants as needed; and attending workshops and trainings to improve the efficiency of the DWSRF Program.
- A consultant will be hired to complete the Water Utility Coordination Committee (WUCC) planning process. The process will include stakeholder involvement, system partnerships, public outreach, regionalization, consolidation, and identification of major facilities in need of replacement or construction.
- Provide technical assistance to PWSs that have received a significant violation as a result of a site visit or as noted in a sanitary survey report
- Participate as necessary in training programs related to the technical, managerial and financial capacity of PWSs for PWS operators and public health officials
- Work with the Connecticut drinking water industry, the Association of State Drinking Water Administrators, and the EPA with a goal of achieving optimization of existing surface water treatment plants

### VIII. AUDITS and REPORTING

Ensuring transparency and accountability, all program materials are posted on our website ([www.ct.gov/dph/dwsrf](http://www.ct.gov/dph/dwsrf)). DWSRF Annual Reports are posted on the OTT website ([http://www.ott.ct.gov/debt\\_drinkingwaterfund.html](http://www.ott.ct.gov/debt_drinkingwaterfund.html)). Financial audits are conducted annually by the OTT and included with the Annual Report. We commit to entering project and benefits data into the DWNIMS and PBR System to evaluate the benefits of Connecticut's DWSRF program. Among other parameters, the reporting systems will evaluate the number of DWSRF projects that provide public health benefits, including those that achieve compliance with the SDWA, those that maintain compliance with the SDWA, and those that are intended to meet future requirements of the SDWA.

Project benefits information is entered into PBR as soon as possible following execution of a funding agreement, preferably within two weeks. Updates to PBR following completion of the project and closing of the permanent loan are also made as soon as possible. If a project contains "green" components, we will report on the "green" projects and/or "green" portion of projects in PBR.

**IX. PUBLIC OUTREACH and COMMENT**

The DPH has engaged in a determined effort to prepare and provide accurate and understandable information on the DWSRF to potential loan applicants and other interested persons. The DWSRF loan applicant pool in Connecticut consists of approximately 900 PWSs. This pool consists of all community PWSs and all NTNC public schools. Outreach to these systems, as well as to other interested persons, has and will continue to occur simultaneously with the implementation of the DWSRF program. Outreach is accomplished through posting information on the DWS website, meeting with applicants, targeted electronic mailings, distributing program information, and participating in various water-related forums. In addition, engineering staff from the DPH reach out to PWSs during on-site sanitary surveys and encourage them to consider the DWSRF program for their infrastructure financing needs.

In conformance with 40 CFR 35.3555(b), the DPH sought meaningful public review and comment on the Draft SFY 2018 IUP, which includes the Fundable PPL. In addition, RCSA Section 22a-482-1(c)(4) requires that a public hearing be held to allow for the opportunity to comment on the draft Fundable PPL. A Notice of Hearing was formally advertised in the Hartford Courant, New Haven Register and Waterbury Republican-American on September 25, 2017, the La Voz Hispana on September 28, 2017 and Northeast Minority News on October 5, 2017. The Draft IUP and Notice of Hearing were also sent to all DWSRF applicants with projects appearing on the Comprehensive Project List on September 21, 2017. Interested persons were invited to provide oral or written testimony at the public hearing and to submit written comments.

The public hearing was held on October 25, 2017 in Conference Room A/B at 470 Capitol Avenue in Hartford, CT. The hearing was followed by an Open Forum where attendees had an opportunity to meet directly with DWSRF program staff to answer questions and learn more about the loan program. All testimony provided during the public comment period and during the hearing was reviewed and considered by the DPH Commissioner prior to finalizing this IUP.

**Footnotes:**

1 - The capitalization grant project funds and state match amounts are included in the amount of bond authorization. This amount also includes proceeds generated by leveraging, interest earnings, and principal repayments, but these do not increase the total authorization. Refer to the text of the IUP for an explanation. Funds have been committed to projects.

2 - Funds from previous bond authorization that have not been committed to projects

3 - Funds are subject to legislative approval as part of the Capital Budget process.

4 - These funds are available for projects with actual costs higher than original estimates and/or for projects appearing on the Comprehensive List, but not on the Fundable PPL.

## Attachment B

**Connecticut Department of Public Health - Drinking Water Section**  
**Drinking Water State Revolving Fund**  
**Priority Ranking System**  
(Revision 1/31/17)

### **A. Introduction:**

Connecticut General Statute (CGS) Section 22a-478(a) requires the Commissioner of the Department of Public Health (DPH) to establish and maintain a priority list of eligible drinking water projects and to establish a system setting the priority for making loans to eligible public water systems (PWS) under the Drinking Water State Revolving Fund (DWSRF). In establishing such priority list and ranking system the Commissioner shall consider all factors that are deemed relevant including, but not limited to, the following:

1. Public Health and Safety
2. Protection of environmental resources
3. Population affected
4. Risk to human health
5. PWSs most in need on a per household basis according to the applicable state affordability criteria
6. Compliance with the applicable requirements of the federal Safe Drinking Water Act (SDWA)
7. Applicable state and federal regulations
8. Consistency with the plan of conservation and development
9. Consistency with the coordinated water system plan in accordance with subsection (f) of CGS Section 25-33d

The DPH annually receives a federal capitalization grant from the United State Environmental Protection Agency (EPA). A minimum of 69% of these grant funds are used to make long term low interest loans available to PWSs for drinking water infrastructure projects through the DWSRF. A maximum of 31% of the capitalization grant is available to be used for eligible set-aside activities implemented by the DPH. The portion of the capitalization grant that is used for loans is leveraged through the Clean Water Fund Revenue Bond Program by the Office of the State Treasurer. The proceeds from the sale of revenue bonds along with other revolving funds from prior loan repayments are used to provide new loans to PWSs. This leveraging program increases the amount of funding available for loans each year beyond what is provided for in the capitalization grant alone. Each year, the DPH is limited in the amount of loans it can provide to PWSs through the Revenue Bond Program based on the legislative revenue bond authorization it receives in the State capital budget. Under the terms of the capitalization grant, the DPH is also required to contribute state matching funds equal to 20% of the capitalization grant to the loan program as additional funding.

Often, loan demand is higher than the amount of DWSRF funding that is available. The Priority Ranking System described in this document is used to prepare a Project Priority List (PPL), which is included in an annual Intended Use Plan (IUP). The PPL identifies the projects that are expected to receive the available funding during that year. Projects that are not listed on a PPL remain eligible to receive loans if additional funding becomes available or if a PPL project is by-passed by DPH or withdrawn by the applicant.

## Attachment B

### **B. Eligibility for DWSRF Loans**

The DWSRF is intended to provide PWSs with a long-term low-cost financing alternative to improve and maintain their existing drinking water infrastructure in perpetuity. In order to receive a loan, a borrower and their project must both be deemed eligible for the DWSRF.

Eligible borrowers include all community public water systems and non-profit non-community public water systems. In addition, these borrowers:

1. Must have adequate technical, financial and managerial capacity to ensure compliance with the requirements of the SDWA unless the use of the DWSRF will ensure compliance and the owner(s) and/or operator(s) of the systems agree to undertake feasible and appropriate changes in operations to ensure compliance over the long term
2. Must not be in significant non-compliance with any national primary drinking water regulation, state drinking water regulation or variance unless;
  - a. their eligible drinking water project will adequately address long-term compliance, or;
  - b. the purpose of the assistance is unrelated to the cause of the significant noncompliance and the systems are on enforcement schedules (for maximum contaminant level and treatment technique violations) or have compliance plans (for monitoring and reporting violations) to return to compliance.
3. Must not be federally owned

Six categories of projects are eligible to receive DWSRF assistance. These categories and examples of projects within them are:

1. **Treatment** - projects to install or upgrade facilities to improve drinking water quality to comply with SDWA regulations
2. **Transmission and distribution** - rehabilitation, replacement, or installation of pipes or pump stations to improve water pressure to safe levels or to prevent contamination caused by leaky or broken pipes
3. **Source** - rehabilitation of groundwater wells or development of new groundwater wells to replace contaminated sources
4. **Storage** - installation of new or upgrades to existing finished water storage tanks to prevent microbiological contamination from entering the distribution system
5. **Consolidation** - interconnecting two or more water systems
6. **Creation of new systems** - construct a new system to serve homes with contaminated individual wells (i.e. private wells) or to consolidate two or more existing PWSs into a new regional water system

The following projects and costs are **not eligible** for assistance:

1. Dams or rehabilitation of dams
2. Water rights, except if the water rights are owned by a system that is being purchased through consolidation as part of a capacity development strategy
3. Reservoirs or rehabilitation of reservoirs, except for finished water reservoirs and those reservoirs that are part of the treatment process and are located on the property where the treatment facility is located
4. Projects needed primarily for fire protection
5. Projects needed primarily to serve future growth

## Attachment B

6. Projects that have received assistance under the national set-aside for Indian Tribes and Alaska Native Villages pursuant to section 1452(i) of the SDWA
7. Laboratory fees for routine monitoring
8. Operation and maintenance expenses
9. Partial lead service line replacements (see Section F.7)

The DWSRF may be used to finance the planning, design or construction phase of an eligible drinking water project.

### **C. Call for Projects**

The Call for Projects is on-going and Eligibility Applications are accepted at any time. For a project to be considered for funding on the PPL in an annual IUP, an Eligibility Application must be received by the date announced by the DPH. It is expected that this date will be same each year. This announcement is issued via e-mail to all PWSs that are eligible to receive DWSRF loans, municipal Chief Elected Officials and local Directors of Health, as well as posted on the DPH Drinking Water Section's (DWS) website. This announcement will be made approximately 60-90 days prior to the due date.

Eligibility Applications received after the announced due date will be reviewed as they are received and the IUP updated as explained further in Section H of this document.

PWSs that desire DWSRF loans must submit a DWSRF Eligibility Application to the DPH in order for that project to be considered for a loan. The DPH reserves the right to issue new solicitations for additional infrastructure projects for DWSRF funding at any time.

### **D. Small System Reserve**

The SDWA requires that, to the extent that there are sufficient number of eligible project applications, not less than 15% of the available funding shall be dedicated to small systems serving less than or equal to a population of 10,000. The DPH shall use the population it currently has on record at the time a PWS applies for funding to determine if it meets the small system criteria. In cases where an applicant owns more than one community PWS, the applicant's population will be determined on the combined population of all of its individually owned community PWSs.

### **E. Green Project Reserve (GPR)**

Green projects include those that promote green infrastructure and energy or water efficiency, as well as projects that demonstrate new or innovative ways to manage water resources in a sustainable way. To the extent required by Federal law, which may change from year to year, priority may be given to eligible projects where sufficient documentation has demonstrated to the satisfaction of DPH that the project achieves identifiable and substantial benefits that qualify as green project benefits. Specific GPR amounts available each year will be identified in the DPH's IUP.

### **F. Priority Point Assignment**

Connecticut's DWSRF priority ranking system assigns points to each project deemed eligible for funding. In developing the ranking system, the point structure is weighted towards projects that will provide the greatest public health benefits and to PWSs that are most in need of low cost financing. This approach is consistent with the SDWA requirement for States to prioritize the use of funds for projects that:

1. Addresses the most serious risk to human health
2. Are necessary to ensure compliance with the requirements of the SDWA

## Attachment B

3. Assist systems most in need according to state affordability criteria

The nine major point categories are as follows:

1. **Water Quality:** Within this category points are awarded for projects that address water quality regulatory violations or impaired water quality. Supporting evidence of impaired water quality and the need for corrective action shall be provided to support the award of points. This category is divided into five subcategories:
  - a. **Immediate Action:** Water quality violations requiring immediate action include surface water treatment rule violations and acute microbiological and inorganic chemical Maximum Contaminant Level (MCL) violations as well as lead Action Level exceedances. These violations pose health risks which must be brought into compliance expeditiously. High levels of other contaminants in subcategories b. and c. that are determined by DPH to present immediate acute health risks may be elevated to subcategory a. and awarded additional priority points based on DPH's determination.
  - b. **Non-Acute MCL Violations:** MCL violations for contaminants which have health risk ramifications over extended periods of time include the following subcategories: non-acute inorganic chemical, pesticides, herbicides, PCB's, organic chemicals, disinfection by-products and radioactivity.
  - c. **Other Contaminants of Health Concern:** Includes drinking water contaminants for which DPH or EPA has determined a health risk exists even though the contaminant does not have an established MCL. These may include regulated or unregulated contaminants that DPH or EPA has set formal action levels or health advisory limits for prior to establishment of a federal or state MCL. This subcategory also awards points for projects which address proactive steps taken to reduce elevated levels of contaminants that exceed 50% of their established MCL or the State notification level for Sodium.
  - d. **Physical/EPA Secondary MCLs:** This subcategory allows points for parameters that are primarily deemed aesthetic rather than having significant health ramifications. These contaminants or physical properties of water may make the water unsuitable for drinking rather than posing any significant known health risk.
  - e. **Private Wells:** Properties that are currently not being served by a PWS yet are experiencing private well contamination which may cause the private well to exceed an MCL contained in RCSA Section 19-13-B101 or exceed a private well [Action Level](#) established by the DPH, can be assigned ranking points, if the project involves the extension of water service to the affected wells and the applicant is eligible to receive a DWSRF loan. Where water main extensions are not feasible, points may be awarded for creation of a new PWS to serve these properties.
2. **Advanced Surface Water Treatment:** Points are awarded for projects that involve changes in treatment technologies or unit processes at surface water treatment plants to address the treatment of emerging contaminants or comply with a known future SDWA regulatory requirement. The treatment of unregulated contaminants that would be considered under this category include:
  - Contaminants identified in EPA's latest Unregulated Contaminant Monitoring Rule
  - Contaminants identified in EPA's latest Contaminant Candidate List
  - Contaminants identified by EPA as contaminants of emerging concern
  - Contaminants discovered by the PWS during water testing that have been determined by DPH

## Attachment B

to present or have the strong possibility of presenting a public health risk

3. **Water Supply/Conservation:** Inadequate quantity of water supply has many public health implications. Supply shortages can translate to poor or inadequate pressure which can lead to back siphonage and potential contamination of the water distribution. Even with active cross connection programs, lack of pressure may result in accidental contamination events. Customers of public water systems also need adequate water service for basic sanitation needs within their homes and businesses. Within this category, points are awarded for projects that address inadequate water supply under normal operating conditions. Points are also awarded for proactive improvements that maintain the adequacy of source waters or contribute to the water conservation efforts of public water systems. This category includes:
  - a. **Source Water Deficits:** New groundwater well development projects or interconnection projects with other PWSs that are necessary to comply with RCSA Section 19-13-B102(o). This may include demonstration of diminishing safe yield that reveals an imminent threat to maintaining the minimum required margin of safety of 1.15. A recent water audit will be required to be evaluated in the Preliminary Engineering Report.
  - b. **System Capacity Deficits:** Projects that include capacity upgrades to water treatment plants, pump stations, storage facilities or transmission/distribution piping to comply with RCSA Section 19-13-B102(p). A recent water audit will be required to be evaluated in the Preliminary Engineering Report.
  - c. **Source Development:** Projects that include the development of new groundwater sources or the rehabilitation of existing groundwater sources necessary to maintain, augment or replace existing sources that do not qualify for points under sub-category a.
  - d. **Conservation/Water Loss Reduction:** This subcategory recognizes the important role that accurate metering, real-time water use monitoring, pipe replacement/rehabilitation programs and other water loss reduction projects play in a PWS's water conservation efforts. Additional points will be awarded to metering projects that incorporate Advanced Metering Infrastructure (AMI) technology to recognize the additional conservation benefits this technology provides. Also includes projects that involve the timely replacement or rehabilitation of water transmission or distribution system piping to reduce water loss due to leaks in existing piping and also increase flows and pressure to customers.
  - e. **Private Wells:** Projects that involve extending water service to existing residential properties served by private wells that have gone dry or have experienced yield reductions that render the well incapable of sustaining the water supply necessary for basic sanitary needs.
4. **Infrastructure Violations/Deficiencies/Safety Hazards/Failures:** Points are awarded to projects that address infrastructure regulatory violations that are not covered in Category 3. Points are also awarded to projects that correct significant deficiencies under the Ground Water Rule. Other infrastructure deficiencies, safety hazards or failures identified by DPH in a sanitary survey report or documented by the PWS with supporting evidence included in the DWSRF Eligibility Application would be eligible for points in this category. Hydropneumatic storage tanks that are greater than 30 years old may pose a safety risk as evidenced by a tank explosion in 2015 in North Stonington, CT that completely destroyed a pump station. Tank industry construction standards for these tanks improved in the early 1980's which has eliminated much of this risk with more modern tanks. For this reason, projects for the replacement or elimination of hydropneumatic storage tanks meeting one or more of the following criteria are also included in this category:

## Attachment B

- Tanks greater than 30 years old
- Tanks recommended for replacement by DWS in a sanitary survey report
- Tanks recommended for replacement in a professional independent tank inspection report

Replacement of hydropneumatic storage tanks may include replacement of the existing fixed rate booster pumps with variable frequency drive (VFD) pumps and/or control system including the power supply upgrade.

5. **Consolidation:** Points are awarded to projects that consolidate two or more public water systems through water main interconnection or consecutive system. Small systems can benefit from the economies of scale achieved by being absorbed into, or served by, a larger community water system and, in many cases, benefit through an increased level of technical, financial and managerial (TFM) capacity. Small system to small system consolidations also offer opportunities for these small systems to share resources, increase TFM capacity by restructuring water system management and achieve greater economies of scale.
6. **Resiliency/Security:** Points within this category are awarded to projects that will increase a PWS's ability to withstand and recover from natural or man-made disasters and includes climate change adaptation and drought. This category provides points for climate change or asset management planning projects. Points are also awarded to projects that already have, or incorporate, appropriate security elements relative to that project or for stand-alone security projects appropriate for an existing facility such as security fencing, alarms and surveillance cameras. To qualify for climate change or resiliency points, projects will need to be supported by appropriate studies. To receive points, projects must not be inconsistent with State or Federal climate change studies or statewide resiliency planning documents recognized and supported by DPH. Points will also be awarded to projects for stand-by emergency power generator systems (new, replacement, or upgrade to existing) for existing critical facilities that need to be powered during a loss of normal electrical grid power. Additionally, this category provides points to encourage PWS's to invest in asset management and climate change planning if they have not already done so. Planning points will only be awarded for the creation of an initial plan. The DPH anticipates that these plans may result in future infrastructure projects that would qualify for DWSRF funding. Although these planning projects will be ranked independently, they may be combined with another eligible drinking water project into a single DWSRF loan agreement if both projects are included on the PPL and are undertaken simultaneously.
7. **Other Capital Improvements:** Points within this category are awarded for general proactive infrastructure projects that may not qualify for points within categories 1, 2, 3 or 4. These projects help achieve long term infrastructure sustainability so that health risks from infrastructure failure are averted. This category includes the replacement of lead service lines to individual customers including any portion located on a customer's private property. A lead service line would include any service line that has **any** lead piping. In order to receive DWSRF funding for lead service line replacements, the **entire** portion of the service line (starting at the water main on the street and terminating where the premise plumbing begins) that contains lead must be replaced. Partial lead service line replacements will not be funded due to health concerns associated with the possibility of increasing a customer's lead exposure by disturbing the remaining lead-containing piping. To receive priority points for complete lead service line replacements, all lead service lines associated with the project must be identified in advance of submitting a DWSRF Eligibility Application and all

## Attachment B

lead service lines for which customer's consent (if applicable) has been obtained must be replaced as part of the project. This category also includes the replacement of internal building piping of buildings owned and served by an eligible PWS that is part of a remediation strategy to address lead or copper levels that exceed the Action Level.

8. **Sustainability/Statewide Planning Recognition:** Points within this category are awarded to eligible projects undertaken by a PWS directly related to an acquisition or transfer of a PWS with inadequate financial, managerial or technical capacity to another PWS as reviewed and ordered pursuant to CGS Section 16-262n & 16-262o. Points are also awarded to eligible projects undertaken by a PWS that actively implements an asset management program and their project is supported by that plan. Additionally, points are awarded for projects that are identified within a statewide or regional water supply planning document under the oversight of DPH including, but not limited to, the Coordinated Water System Plan of a Water Utility Coordinating Committee under CGS Section 25-33h or statewide or regional public drinking water resiliency plans. This category is intended to recognize and support the planning efforts of PWSs to achieve long term sustainability, assist other PWSs in need and support the State's long term planning efforts for public water supply.
9. **Affordability:** This category awards additional points to projects undertaken by a PWS in a town that has been identified by the Connecticut Department of Economic and Community Development as a "distressed municipality".

The activities which qualify for points under each category along with the numerical value of points assigned to each activity are detailed in Appendix A.

The DPH reserves the right to determine if project identified in a DWSRF Eligibility Application contains more than one independent project. In such cases, the DPH may split the application into multiple independent applications, request that the applicant resubmit independent Eligibility Applications for each independent activity or request the applicant to submit additional information to support the interrelationship between those activities identified in the original Eligibility Application prior to assignment of a ranking score. This right is exercised to prevent manipulation of the point ranking system by blending independent projects to gain an overall point ranking advantage.

### **G. Readiness to Proceed**

It is the DPH's intention, as well as the expectation of EPA, that the DPH will commit the available DWSRF funding each year to projects listed on the PPL. Similarly, it is expected that the committed funds will be disbursed in a timely manner. Accordingly, these commitments (in the form of executed DWSRF loan agreements) are not made until a project is ready to proceed and start spending money on their project.

Regardless of the priority ranking score a project receives, only those phases (planning, design, construction) of eligible projects that can reasonably be expected to result in executed contracts (professional service and/or construction contracts) and DWSRF loan agreements within a specific SFY will be considered for inclusion on that year's PPL. Any phases not included on a PPL will be included on the Comprehensive Project List (CPL) and remain eligible for future funding. The criteria that DPH uses to assess readiness is included in the DWSRF Eligibility Application and explained in the annual IUP. The DPH may request updated readiness information for a project during development of the PPL if necessary.

## Attachment B

### **H. Project Priority List and Comprehensive Project List**

The State of Connecticut's capital budget is prepared on a biennial basis and State Fiscal Years run from July 1 through June 30. Annually the DPH will prepare an Intended Use Plan (IUP) that identifies how the State intends to use available DWSRF funds. The IUP will be submitted to the U.S. Environmental Protection Agency (EPA) as part of the DPH's annual capitalization grant application for federal DWSRF funds. The IUP will include a CPL of drinking water projects which have applied for DWSRF loans. The IUP will also identify which projects are expected to receive funding during that SFY on a Project Priority List (PPL).

Following publication of the finalized annual IUP, the CPL may be updated periodically to include new eligibility applications that were received after the initial drafting of the annual IUP. If any changes were made to the CPL, an amended IUP will be posted on the DPH DWS website for a 30-day comment period. Once an amended IUP has been finalized, any project on the CPL will be considered for funding according to the bypass procedures in the IUP.

Projects on the CPL that are not included on a PPL will remain eligible for DWSRF funding in the future. Projects on the CPL may be subsequently added to a PPL if additional funding becomes available, other PPL projects are withdrawn by the applicant or a PPL project is by-passed by DPH.

There will be 4 factors taken into consideration when drafting a PPL . Those factors are:

1. The total numerical points assigned to a project which is arrived at by tallying points from each of the 9 priority point categories.
2. A PWS's readiness to proceed with the activities they have requested funding for.
3. To the extent that there are sufficient eligible small systems projects that are ready to proceed, not less than 15% of the available funding shall be dedicated to them.
4. To the extent required by federal law, a portion of DPH's capitalization grant shall be dedicated to projects that address green infrastructure, water or energy efficiency improvements, or other environmentally innovative activities.

The DPH will publish the draft PPLs for a 30 day public comment period followed by a public hearing. Written comments and oral testimony provided on the PPLs during this public participation process will be considered before the PPLs are finalized.

### **I. Tie-Breaking Procedure**

Following the implementation of factors 1-4 in Section H, in circumstances where more than one project has an equivalent ranking score, the following tiered approach will be implemented to break the tie:

1. The size of the population served by the project; the project with the larger population served will be given preference.
2. The percentage of total system population served by the project; the project serving a higher percentage of the overall system population will be given preference.
3. The size of the total population served by the system applicant; the system with the larger population will be given preference.

## Attachment B

If two or more projects remained tied after implementation of tie-breaker #1, then #2 will be applied. If two or more projects remain tied after implementation of tie-breakers #1 & #2, then #3 will be applied. This tie-breaking method shall apply to projects listed on both the PPL and CPL.

### **J. Project Priority List By-Pass Procedures**

If for some reason an applicant listed on a PPL encounters significant delays in their project schedule, the DPH reserves the right to by-pass that project and offer those funds to the next highest ranked project on the CPL that is ready to proceed. In these cases, the by-passed project will remain on the CPL and remain eligible for future funding. This by-pass process is necessary to help ensure that the available DWSRF funds will be committed and disbursed in a timely fashion.

The DPH Commissioner may make a project loan or loans with respect to an eligible drinking water project without regard to the priority list of eligible drinking water projects if a public drinking water supply emergency exists, pursuant to CGS Section 25-32b, which requires that the eligible drinking water project be undertaken to protect the public health and safety. In such cases of unexpected public drinking water supply emergencies there may be a need to by-pass projects on the PPL.

## Attachment B

### APPENDIX A – PRIORITY POINT ACTIVITIES AND VALUES

#### Category 1: Water Quality

Activity #	a. Immediate Action	Points	Exclusions <sup>1</sup>
1	Surface Water Treatment Rule Violation	50	None
2	Microbiological MCL Violation (E. Coli)	50	1
3	Nitrate MCL Violation	50	None
4	Nitrite MCL Violation	50	None
5	Lead Action Level Exceedance <sup>2</sup>	50	None
6	DPH Determination of Acute Health Risk for Other Contaminants	50	None
7	Arsenic	40	None
Activity #	b. Non-Acute MCL Violations	Points	Exclusions <sup>1</sup>
8	Radioactivity MCL Violations	30	None
9	Inorganic Chemical MCL Violations	30	3-7
10	Organic Chemical MCL Violations (excluding total trihalomethanes)	30	None
11	Pesticides, Herbicides and PCBs MCL Violations	30	None
12	Disinfection By-Product MCL Violations	30	None
Activity #	c. Other Contaminants of Health Concern	Points	Exclusions <sup>1</sup>
13	DPH Action Level Exceedance (excluding lead and copper)	25	5
14	Contaminant Exceeds 50% of MCL	20	1-12
15	Copper Action Level Exceedance	20	5,13
16	Sodium Notification Level Exceedance	5	9
Activity #	d. Physical/EPA Secondary MCL Exceedances	Points	Exclusions <sup>1</sup>
17	Turbidity Limit Exceedance	10	1
18	Odor Limit Exceedance	10	None
19	Color Limit Exceedance	10	None
20	pH Outside Range of 6.4 - 10	10	None
21	EPA Secondary MCL Exceedance	10	9,13,14,18-20
Activity #	e. Private Wells	Points	Exclusions <sup>1</sup>
22	Water Main Extension to Serve Private Wells with MCL Violations or Action Level Exceedances	30	1-21, 23
23	Creation of New PWS to Serve Private Wells with MCL Violations	30	1-22

<sup>1</sup> Exclusion column indicates activity #'s that would be ineligible for additional points if the activities associated with those points are the same. Where 2 or more activities conflict the higher point activity shall be assigned to the project. These potential exclusions are typically displayed with the lower point value activity.

<sup>2</sup> Eligible schools and child care facilities with lead levels at or above 75% of the lead action level would qualify for this activity.

## Attachment B

### Category 2: Advanced Surface Water Treatment (Maximum 15 pts from this category)

Activity #	Elements	Points	Exclusions <sup>1</sup>
24	Treatment Plant Upgrades to Address Future Known SDWA Rule or Requirement	15	None
25	Treatment Plant Upgrades to Address Emerging Contaminants	10	None

### Category 3: Water Supply /Conservation

Activity #	a. Source Water Deficits (Maximum 40 pts from this subcategory)	Points	Exclusions <sup>1</sup>
26	New Groundwater Well Development	40	None
27	Rehabilitation of Existing Groundwater Wells	40	None
28	Interconnection to Purchase Water from Another Community PWS	40	None
Activity #	b. System Capacity Deficits	Points	Exclusions <sup>1</sup>
29	System Capacity Deficit	20	None
Activity #	c. Source Development (Maximum 10 pts from this subcategory)	Points	Exclusions <sup>1</sup>
30	New Groundwater Well Development	10	26
31	Rehabilitation of Existing Groundwater Wells	10	27
Activity #	d. Conservation/Water Loss Reduction	Points	Exclusions <sup>1</sup>
32	Installation of Source Water Meters (previously unmetered) <sup>3</sup>	25	26-28, 30,31
33	Installation of Distribution Meters (previously unmetered) <sup>3</sup>	25	None
34	Replacement of Source or Distribution Meters <sup>3</sup>	15	None
35	Incorporation of Advanced Metering Infrastructure (AMI) technology (real-time metering)	10	None
36	Water Transmission Main Rehabilitation or Replacement	15	None
37	Water Distribution Main Rehabilitation or Replacement	10	None
38	Project Will Significantly Reduce Water Loss (i.e. Unaccounted-for or Non-Revenue Losses)	10	32-35
Activity #	e. Water Main Extension to Replace Private Wells with Inadequate Supply	Points	Exclusions <sup>1</sup>
39	Water Main Extension	30	1-21, 23

<sup>3</sup> The primary purpose of the project must be for the installation or replacement of meters to qualify for these points.

## Attachment B

### Category 4: Infrastructure Violations/Deficiencies/Safety Hazards/Failures

Activity #	Elements	Points	Exclusions <sup>1</sup>
40	Infrastructure Violation/Deficiency/Safety Hazard/Failure (Source to Curb Stop)	10	32
41	Hydropneumatic Storage Tank Replacement/Elimination	50	None

### Category 5: Consolidation (Maximum 20 pts from Activities 43 and 44 combined)

Activity #	Elements	Points	Exclusions <sup>1</sup>
42	Consolidation of a Community PWS	15 each	None
43	Consolidation of a Non-Transient Non-Community PWS	10 each	None
44	Consolidation of a Transient Non-Community PWS	5 each	None

### Category 6: Resiliency/Security

Activity #	a. Resiliency	Points	Exclusions <sup>1</sup>
45	Regional Interconnection with Another Community PWS	15	28
46	Relocation of Critical Facilities <sup>4</sup>	10	None
47	Redundancy of Critical Facilities <sup>4</sup>	10	None
Activity #	b. Planning (Maximum 50 pts from this subcategory) <sup>5</sup>	Points	Exclusions <sup>1</sup>
48	Climate Change/Drought Planning	50	1-47, 49-64
49	Asset Management Planning	50	1-48, 50-64
Activity #	c. Security <sup>6</sup>	Points	Exclusions <sup>1</sup>
50	Security Fencing, Alarms, Surveillance Systems or Other Security Measures	5	None
Activity #	d. Emergency Power Provisions for Existing Critical Facilities	Points	Exclusions <sup>1</sup>
51	New (does not currently exist) <sup>7</sup>	50	1-50, 52-64
52	Replacement or Upgrades <sup>7</sup>	20	1-51, 53-64
53	Included as Part of a Larger Project	5	None

<sup>4</sup> Project must be supported by a formal resiliency or climate change plan to qualify for these points.

<sup>5</sup> Points are only awarded for the creation of an initial plan.

<sup>6</sup> Security points may awarded to projects with existing security provisions or for the installation of new security provisions.

<sup>7</sup> Project must be only an emergency power project to qualify for these points.

## Attachment B

### Category 7: Other Capital Improvements

Activity #	Elements	Points	Exclusions <sup>1</sup>
54	Treatment Facilities	10	None
55	Pumping Facilities	5	None
56	Storage Facilities	5	41
57	Transmission or Distribution System	5	36-37
58	Facility Automation (SCADA)	5	None
59	Complete Lead Service Line Replacement	10	None
60	Internal Building Piping Replacement (as part of Lead or Copper remediation)	10	None

### Category 8: Sustainability/Statewide Planning Recognition

Activity #	Elements	Points	Exclusions <sup>1</sup>
61	Acquisition/Transfer of a Community PWS	10	None
62	Project is supported by an on-going Asset Management Program	10	63
63	Project is supported in a PWS's Water Supply Plan pursuant to RCSA Section 25-32d-3	5	62
64	Project Identified in a Statewide or Regional Water Planning Document under DPH oversight	10	None

### Category 9: Affordability

Activity #	Elements	Points	Exclusions <sup>1</sup>
65	Distressed Community	10	None

DATE: February 14, 2017

RE: Changes to the Priority Ranking System for the Drinking Water State Revolving Fund

The Drinking Water Section has made changes to the [Priority Ranking System](#) (PRS) which provides the basis for the Department of Public Health (DPH) to prioritize drinking water projects funded under the Drinking Water State Revolving Fund (DWSRF). The PRS was originally developed in 1997 and has had only minor updates incorporated since that time. Twenty years later, this document needed a thorough reevaluation to determine if it meets the current drinking water infrastructure challenges and priorities facing the State of Connecticut and our Public Water System clients. While the entire PRS was reevaluated, several key areas were focused on:

- Infrastructure Sustainability
- Infrastructure Resiliency
- Water Conservation
- Lead in Drinking Water
- Proactively addressing Unregulated and Emerging Contaminants

These key areas have recently become focal points faced by the drinking water industry. The revisions to the PRS remain consistent with the DPH's existing statutory priorities while recognizing the additional value of well-coordinated infrastructure sustainability and resiliency planning, the importance of water conservation and the additional risks that elevated lead levels place on our youngest population. Each of these areas and the related changes that were incorporated into the PRS are further explained below.

**Infrastructure Sustainability**

The intent of the DWSRF is to provide a low-cost financing alternative for improving the nation's existing drinking water infrastructure. It is expected that this infrastructure will be well managed and maintained to provide long-term high quality drinking water to Connecticut's residents and commercial customers. The PRS recognizes the critical role that asset management (AM) planning has in achieving a public water system's (PWS) long term sustainability. AM plans provide the foundation for preparing capital improvement plans, prioritizing capital improvement projects and establishing water rates that ensure revenues are sufficient to support undertaking these projects at the appropriate time. For several

Page 2

years, this recognition was provided in the form of adding an additional 10 priority points to projects prioritized through AM planning or if a project was identified within a DPH required Water Supply Plan. The DPH believes that AM planning provides information that is essential in prioritizing capital improvement projects included in Water Supply Plans. The revised PRS continues to provide 10 priority points for projects prioritized through AM planning but only provides 5 points for projects identified only in Water Supply Plans.

The revised PRS also provides significant priority points to planning projects including AM and climate change planning due to their significance towards long term infrastructure sustainability.

### **Infrastructure Resiliency**

The revised PRS includes a new category, Infrastructure Resiliency, which provides priority points for projects that increase a PWSs ability to withstand and recover from natural or man-made disasters including drought. This category includes regional interconnections which provides for the rapid transfer of water between PWSs during emergencies. It also includes priority points for projects involving the relocation or redundancy of critical and vulnerable infrastructure that are supported by climate change studies. As previously mentioned, the revised PRS also prioritizes climate change and asset management planning for their importance in helping water systems identify and prioritize future projects that address vulnerable and critical infrastructure. Points are also provided for security enhancements to infrastructure facilities.

### **Water Conservation**

The revised PRS recognizes the importance of water conservation by providing additional priority points to projects that will result in significant “unaccounted for” or “non-revenue” water loss reductions. It also increases the point values for water metering projects which are critical to providing accurate monitoring of water supply and consumer water use. Priority points were also increased for water main rehabilitation or replacement projects to recognize the important role of these projects to reduce water main breaks and leaks. In addition, the revisions require that water audits be performed prior to receiving priority points for projects that are needed to increase the available supply of water due to consumer demands.

### **Lead in Drinking Water**

The revised PRS increases the priority points awarded to projects that are necessary to resolve lead action level exceedances. It also provides priority points for projects that proactively reduce lead levels at public schools and other child care facilities when lead levels are approaching the action level. In 2016, the federal Environmental Protection Agency clarified that PWS customer service line replacements located on private property are eligible for DWSRF funding. With this clarification, priority points were added for projects that include complete lead service line replacements. Points were also added to projects that replace the internal piping of buildings owned by a PWS when such projects are part of a lead remediation strategy.

### **Proactively Addressing Unregulated and Emerging Contaminants**

The old PRS did not provide any incentive, via priority points, for PWSs to undertake proactive projects that address unregulated contaminants or contaminants of emerging concern. These contaminants currently do not have Maximum Contaminant Levels established at the federal or state level and many of them are not currently mandated in Connecticut for water quality testing. The DPH believes that proactively reducing the public’s exposure to these contaminants should be encouraged through the DWSRF and will reduce public health risk. The revised PRS added a category for “Advanced Surface

February 14, 2017

Page 3

Water Treatment”. This category provides additional priority points to projects that incorporate changes in treatment technologies to proactively address the treatment of these contaminants in advance of anticipated future regulatory requirements.

### **Other Changes**

- An “Exclusion” column was added to Appendix A of the PRS to clarify the process of DPH assigning priority points to a project. Where two or more activities in Appendix A have the potential to conflict, the conflicting activity will be shown for the lower point value activity in the Exclusion column. Where conflicts occur, points will be assigned for the higher point value activity.
- Under the old PRS, projects that received priority points under the Water Quality category did not receive an additional points for the project undertaken to correct the water quality impairment (such as points for treatment system upgrades). Under the revised PRS, projects receiving priority points under the Water Quality category will not be excluded from receiving additional priority points under other categories.

The revised PRS is available for viewing or download on our DWSRF webpage. It will be used to rank new DWSRF Eligibility Applications beginning in SFY2018. If you have any questions on these changes or the DWSRF Program please do not hesitate to contact Cameron Walden from our DWSRF Program at (860) 509-7333.

RE: Changes to the Drinking Water State Revolving Fund (DWSRF) – Eligibility Applications for Funding May be Submitted at Any Time

A handwritten signature in black ink that reads "Lori Mathieu".

The Drinking Water Section (DWS) has made changes to the DWSRF Program that will allow eligible public water systems (PWS) to submit Eligibility Applications for DWSRF funding at any time. The "Call for Projects" that has traditionally given PWS a 2-3 month window of opportunity every 2 years to submit Eligibility Applications will now be on-going. The DPH will continue to issue a Call for Projects notice but it will be issued annually rather than every two years. The notice will provide a deadline for submitting DWSRF Eligibility Applications for projects that a PWS wishes DPH to consider for the upcoming State Fiscal Year's (SFY) Project Priority List (PPL). The PPL details the projects that DPH is expecting to commit the available DWSRF funds to for the year. Applications received after that deadline will be assigned appropriate priority points according to the recently revised [Priority Ranking System](#) and periodically (expected to be done quarterly) added to the DPH's Comprehensive Project List (CPL). The CPL is essentially a "waiting list" for funding. Occasionally, projects on the PPL get delayed or withdrawn from funding which opens those funds up to projects on the CPL. The highest ranking project(s) on the CPL that are ready to proceed are then moved to the PPL to replace the delayed or withdrawn project(s). This change will allow PWSs with important drinking water projects that are not included on the PPL to apply for funding at any time and get on a waiting list. In the event that funding does not open up for a CPL project during the course of the year, all CPL projects will be considered for inclusion on the following year's PPL if they are ready to proceed.

The Call for Projects notice for SFY 2018 is available on the [DPH website](#) with a deadline of **April 28, 2017** to submit Eligibility Applications for consideration for the SFY 2018 PPL. If you have any questions on these changes or wish to learn more about the DWSRF Program please do not hesitate to contact Cameron Walden from our DWSRF Program at (860) 509-7333.
