Re:         ADVISORY: Verify ambulance registration status

It has come to the attention of the Office that multiple services throughout the state have ambulances that
are in-service and responding that are unregistered with the DMV. It is critical that each service
immediately check the status of their vehicle registrations.

Registration status should be verified on the DMV Online Service Center website. Enter the plate number
then choose the appropriate plate class from the drop down menu in the next box. Click ‘continue’. If the
vehicle is registered, the vehicle information will populate, including the status “ACTIVE” under the
“Registration disposition” column. Please refer to the table at the end of this communications statement
for the DMV “registration status” definitions.

As a reminder, the new online registration requires:

- Emissions information on vehicles with a GVWR of 10,000 lbs or less AND;
- Vehicle weight information to be provided.

Upon verifying your registration status, if your vehicle registration status displays any result other than
“ACTIVE”, or if a “no results found” window pops up, please immediately notify Liz Johnston OEMS
via email or phone 860-509-7976, and take your vehicles out of service until you have rectified the
situation.

Thank you for your cooperation.
