Jeff and Amanda, here are some suggestions about tech standards changes from Dianne at Farmington Valley. Some good things to consider which we can bring up on the 24th.

Thanks

Ryan McCammon, RS/REHS

**Subject: suggestions for tech standard update**

Hi Ryan,

FVHD offers these suggestions for the revised tech standards:

- page 30 Figure 2 - Add weep hole size on pipe inside pump chamber on drawing or in paragraph above
- section II page 13 - There should be a minimum height/size required for abandonment of "any hollow structure" ( maybe >24" height)
- define "Non-permanent structures" (vs permanent as used on page 11 in definition A)
- discuss floor drains somewhere in tech standards
- provide an outdoor shower section

Sorry for the delay in getting these to you , hopefully they can still be considered.

On another topic – I have clean pieces of orangeberg pipe that you can have for the October training- if you don't already have some and would find it educational.

Let me know.

Dianne
