**Re: GreenLeach Filter Proprietary Leaching Systems Approval Without Filter Fabric (NF)**

Dear Mr. Burrirt:

This program has received your request to allow for the installation of all GreenLeach Filter proprietary leaching system products without the filter fabric that covers the products cardboard. These products would be identical to all currently approved GreenLeach filter products except that fabric will not cover the cardboard surfaces. You have indicated that you intend to continue to sell and install GreenLeach Filter products as originally approved (with filter fabric covering the cardboard).

You have provided this program with installation instructions for GreenLeach Filter products without filter fabric (GLF-NF). Acknowledgement of this new optional installation arrangement for all GreenLeach filter proprietary leaching products will be incorporated into the next revision of the Technical Standards for Subsurface Sewage Disposal Systems.

This letter may be reproduced in its entirety as a means of notifying local health departments, engineers and installers of the new optional installation arrangement of all GreenLeach filter products to allow for product installations without filter fabric. This approval should not be construed to be an endorsement of this product, nor does it convey intellectual property rights.

If you have any questions, please contact me at (860) 509-7296.

Sincerely,

A handwritten signature in blue ink that reads "Matt A Pawlik".
