Connecticut School Districts That Have Implemented EPA's Tools For Schools Indoor Air Quality Program as of September 17, 2014

Special Note:
To receive this designation, all schools must have 5-member building teams that have reviewed the 2-part, 5-hour training program conducted by the CT School Indoor Environment Resource Team (CSERT), and are expected to follow the implementation procedures and maintain their program. If you have questions about the status of your district’s Tool for Schools program, contact your school administration. Participating school districts are encouraged to contact the CT Department of Public Health (860-509-7740) for periodic refreshment training.

For additional information contact the Resource Team
