WORKPLACE WELLNESS PROGRAMS

Programs and policies that promote healthy behaviors can make a life-saving difference for employees’ health and wellness. Studies have shown that every dollar invested by employers in workplace health promotion results in a minimum 3:1 cost savings return on investment. There is no doubt that a comprehensive wellness program targeted specifically to meet a company’s needs can reduce injuries, workers’ compensation/disability claims, healthcare costs, absenteeism, employee turnover, and increase productivity, and morale.

FAST FACTS

- Workplace physical activity programs can
  - reduce short-term sick leave by 6 to 32 percent,
  - reduce health care costs by 20 to 55 percent, and
  - increase productivity by as much as 52 percent.
- 60% of American adults do not exercise regularly.
- In Connecticut 634,000 adults are obese, which is an increase of 188,000 individuals over the last 10 years.
- Obesity-related health care costs total an estimated $147 billion per year.
- The average person can burn 178 calories by walking 3.5 mph or stretching/doing Yoga for 30 minutes.
- Three-fourths of employees believe today’s workers have more on-the-job stress than a generation ago.

There is a need for intervention at national, state, and community levels, and across multiple settings (e.g., worksites, community venues, and restaurants) to improve access to and availability of health and wellness programs.
