01 Monkeypox virus is related to the smallpox virus. Monkeypox symptoms are similar to smallpox, but milder and rarely fatal.

02 Monkeypox Symptoms Include:
- Fever
- Headache
- Muscle Aches
- Backache
- Swollen Lymph Nodes
- Chills
- Exhaustion
- and a Rash that can look like Pimples or Blisters

03 Monkeypox Rash
- The monkeypox rash can appear anywhere on the body including mouth, genitals and anus. The rash will blister, scab, and fall off over a two – four week period. The person is contagious until the rash has fully healed and a fresh layer of skin has formed.

04 Monkeypox Spreads Through Physical Contact With:
- Infectious rash, scabs, or body fluids
- Personal belongings (like clothing) that have made contact with sores
- Respiratory droplets
- Pregnant people can spread the virus to their fetus through the placenta.

05 Have Symptoms?
- Call a Healthcare provider immediately about getting tested!
- Isolate at home
- Avoid any close physical contact
- Wear a mask when around others
