

# What Is CT WiZ And What Can It Be Used To Do?

# What is CT WiZ?

CT WiZ is a comprehensive web-based immunization information system (IIS) for Connecticut.

It has replaced CIRTS and has many new features.

# What is new with CT WiZ?

- Integrates both patient immunization and vaccine information
- Intended to include information on CT children and adults
- Allows for two-way communication with clinic EHRs (using HL7 messaging)

# What Type of Information does CT WiZ Manage?

You can use CT WiZ to:

- Manage patient immunization records
- Run clinic reports
- Conduct vaccine inventory management

# What can Clinics Do with CT WiZ?

## *Manage patient records*

1. View doses administered for your patient (including doses administered at another clinic)
2. Record doses administered - historic and in-real-time
3. Use the “Recommender” to:
  - a. Forecast due/overdue vaccinations
  - b. Identify invalid vaccine doses
4. View / print official immunization certificates
5. Calculate the clinic immunization coverage rates

# What can Clinics Do with CT WiZ?

## *Manage Vaccine Inventory*

1. Order Connecticut Vaccine Program (CVP) vaccines online
2. Receive, transfer and return vaccines
3. Conduct inventory reconciliations

# What can Clinics Do with CT WiZ?

## *Run Clinic Level Reports including:*

- Calculate the clinic immunization coverage rates
- Patient reminder / recalls
- Patients with contraindications / Precautions
- Patients administered recalled vaccines

In the future, there will be a portal that will allow patients to obtain an official vaccination record.
