1. PURPOSE

The purpose of this document is to explain how to validate and generate the necessary reports that must be sent to the Connecticut Department of Public Health Immunization Program in order to demonstrate that the EHR System complies with the requirements of HL7 Version 2.5.1 for immunization messaging, release 1.5 for electronic data exchange with CT WiZ.

2. RESPONSIBILITIES

TITLE/ROLE	ACTIVITY/TASK NAME
Vendor / HL7 submitter	<ul style="list-style-type: none">▪ Create the test message with the EHR technology using the test data provided in the "Message Content" in the NIST tool.▪ Validates messages associated in the Context-based testing page with a given test script that includes a specific Immunization test scenario. Testing will include the technical requirements and content-specific requirements specified in the Test Case.▪ Pass the test scenarios and generate the report to be emailed to DPH.

3. REFERENCES

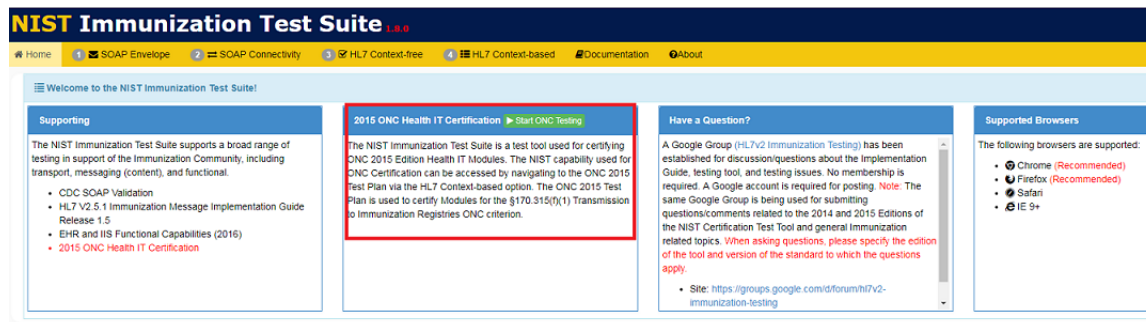

CT follows the National Institute of Standards and Technology (NIST).
