SUBJECT: Update on Vaccination Guidance During Covid-19

The Centers for Disease Control & Prevention (CDC) has updated its interim guidance for immunizations during the ongoing pandemic. Covid-19 continues to present many challenges to healthcare providers but ensuring that all children are fully vaccinated and communities are free from vaccine preventable diseases remains a top public health priority. The CVP appreciates all the hard work providers are making in bringing patients back in for their vaccinations. The updated guidance can be accessed at:
