

Incidence of Lyme Disease by Town Connecticut, 2017

This map was produced using annual Lyme disease surveillance data collected by the Connecticut Department of Public Health, Epidemiology and Emerging Infections Program.

Rate per 100,000 population

- 0
- 1-25
- 26-99
- 100-499
- 500-999
- 1000+

This map includes the incidence of all cases (confirmed and probable) by town. The rate is calculated per 100,000 population using 2010 decennial Census data. The darker the shade, the higher the incidence.
