Connecticut Department of Social Services
Hartford, Connecticut

Independent Accountant's Report

We have examined the state of Connecticut's compliance with Disproportionate Share Hospitals (DSH) payment requirements listed in the Report on DSH Verifications as required by 42 CFR §455.301 and §455.304(d) for the year ended September 30, 2017. The state of Connecticut is responsible for compliance with federal Medicaid DSH program requirements. Our responsibility is to express an opinion on the state of Connecticut's compliance with federal Medicaid DSH program requirements based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants, and General DSH Audit and Reporting Protocol as required by 42 CFR §455.301 and §455.304(d). Those standards require that we plan and perform the examination to obtain reasonable assurance about whether the state of Connecticut complied, in all material respects, with the specified requirements referenced above. An examination involves performing procedures to obtain evidence about whether the state of Connecticut complied with the specified requirements. The nature, timing and extent of the procedures selected depend on our judgment, including an assessment of the risks of material noncompliance, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

Our examination was conducted for the purpose of forming an opinion on the state of Connecticut's compliance with federal Medicaid DSH program requirements included in the Report on DSH Verifications. The Schedule of Annual Reporting Requirements provided in accordance with 42 CFR §447.299 is presented for purposes of additional analysis and is not a required part of the Report on DSH Verifications. Such information has not been subjected to the procedures applied in the examination of the Report on DSH Verifications, and, accordingly, we express no opinion on it.

Our examination does not provide a legal determination on the state of Connecticut's compliance with federal Medicaid DSH requirements.

Title 42 of the Code of Federal Regulations, section 447.299, requires that Medicaid uncompensated care cost be reported net of third-party payments, including those received from Medicare and private insurance. However, on December 31, 2018, the Centers for Medicare and Medicaid Services (CMS) issued additional guidance indicating that the regulation and additional guidance related to including Medicare and private insurance payments does not apply to hospital services prior to June 2, 2017. As such, Medicare and private insurance payments for services prior to June 2, 2017 are not included in the calculation of total uncompensated care costs presented in the Report on DSH Verifications.

In our opinion, except for the effect of the items addressed in the Schedule of Data Caveats Relating to the DSH Verifications, the Report on DSH Verifications presents fairly, in all material respects, the state of Connecticut's compliance with federal Medicaid DSH program requirements addressed by the DSH verifications for the year ending September 30, 2017.

This report is intended solely for the information and use of the Connecticut Department of Social Services, hospitals participating in the State DSH program, and CMS as required under 42 CFR §455.304 and is not intended to be, and should not be, used by anyone other than these specified parties and for the specified purpose contained in 42 CFR §455.304.

Owings Mills, Maryland

State of Connecticut Disproportionate Share Hospital (DSH)
Report on DSH Verifications
For the Year Ended September 30, 2017

As required by 42 CFR §455.304(d) the state of Connecticut must provide an annual independent certified examination report verifying the following items with respect to its disproportionate share hospital (DSH) program.

Verification 1: Each hospital that qualifies for a DSH payment in the State was allowed to retain that payment so that the payment is available to offset its uncompensated care costs for furnishing inpatient hospital and outpatient hospital services during the Medicaid State plan rate year to Medicaid eligible individuals and individuals with no source of third party coverage for the services in order to reflect the total amount of claimed DSH expenditures.

Findings: The results of testing performed related to this verification are summarized in the Report on DSH Verifications (table) included with this report.

Verification 2: DSH payments made to each qualifying hospital comply with the hospital-specific DSH payment limit. The DSH payments made in the Medicaid State plan rate year must be measured against the actual uncompensated care cost in that same Medicaid State plan rate year. The actual uncompensated care costs for the Medicaid State plan rate year have been calculated and compared to the DSH payments made. Uncompensated care costs for the Medicaid State plan rate year were calculated in accordance with Federal Register/Vol. 73, No. 245, December 19, 2008, Federal Register/Vol. 79, No. 232, December 3, 2014, and Federal Register/Vol. 82, No. 62, April 3, 2017.

Findings: The results of testing performed related to this verification are summarized in the Report on DSH Verifications (table) included with this report.

Verification 3: Only uncompensated care costs of furnishing inpatient and outpatient hospital services to Medicaid eligible individuals and individuals with no third party coverage for the inpatient and outpatient hospital services they received as described in Section 1923(g)(1)(A) of the Act are eligible for inclusion in the calculation of the hospital-specific disproportionate share limit payment limit, as described in Section 1923 (g)(1)(A) of the Act.

Findings: The total uncompensated care costs reflected in the Report on DSH Verifications (table) reflects the uncompensated care costs of furnishing inpatient and outpatient hospital services to Medicaid eligible individuals and individuals with no third party coverage for the inpatient and outpatient hospital services received.

State of Connecticut Disproportionate Share Hospital (DSH)
Report on DSH Verifications
For the Year Ended September 30, 2017

Verification 4: For purposes of this hospital-specific limit calculation, any Medicaid payments (including regular Medicaid fee-for-service rate payments, supplemental/enhanced Medicaid payments, and Medicaid managed care organization payments) made to a disproportionate share hospital for furnishing inpatient hospital and outpatient hospital services to Medicaid eligible individuals, which are in excess of the Medicaid incurred costs of such services, are applied against the uncompensated care costs of furnishing inpatient hospital and outpatient hospital services to individuals with no source of third party coverage for such services.

Findings: In calculating the hospital-specific DSH limit represented in the Report on DSH Verifications (table), if a hospital had total Medicaid payments in excess of the calculated Medicaid cost, the excess was used to reduce the total uncompensated care costs.

Verification 5: Any information and records of all of its inpatient and outpatient hospital service costs under the Medicaid program; claimed expenditures under the Medicaid program; uninsured inpatient and outpatient hospital service costs in determining payment adjustments under this Section; and any payments made on behalf of the uninsured from payment adjustments under this Section have been separately documented and retained by the State.

Findings: The state of Connecticut has retained documentation of costs and payments associated with calculating the hospital-specific DSH limits contained in this report. The state retains cost data through the collection of cost reports; Medicaid expenditure data through the MMIS and other documentation; and uninsured data through the DSH payment calculations and DSH examination.

Verification 6: The information specified in verification 5 above includes a description of the methodology for calculating each hospital's payment limit under Section 1923(g)(1) of the Act. Included in the description of the methodology, the audit report must specify how the State defines incurred inpatient hospital and outpatient hospital costs for furnishing inpatient hospital and outpatient hospital services to Medicaid eligible individuals and individuals with no source of third party coverage for the inpatient hospital and outpatient services they received.

Findings: The documentation retained related to the calculation of the hospital-specific DSH limits contained in this report includes a description of the methodology used to calculate each hospital's DSH limit under Section 1923(g)(1) of the Act. For DSH payment purposes, the state defines the hospitals' payment limits in accordance with its state plan. For purposes of this examination, the state defines the hospitals' payment limits in accordance with 42 CFR §455.304.

This report is intended solely for the information and use of the Connecticut Department of Social Services, hospitals participating in the State DSH program, and the Centers for Medicare and Medicaid Services (CMS) as required under 42 CFR §455.304 and is not intended to be, and should not be, used by anyone other than these specified parties and for the specified purpose contained in 42 CFR §455.304.

State of Connecticut Disproportionate Share Hospital (DSH)
Schedule of Data Caveats Relating to the DSH Verifications
For the Year Ended September 30, 2017

During the course of the engagement, the following data issues or other caveats were identified and are being reported in accordance with the requirements of 42 CFR §455.301.

(1) State Crossover Data

For two hospitals, state supplied Medicare cross over data was used in the calculation of the hospital specific DSH limits. The state cross over data may not be complete in that it does not typically include data that was not billed to the Medicaid program. This could occur in situations where Medicare or the private insurer paid the entire bill. As such, Medicaid uncompensated care cost may not reflect all Medicare cross over payments and cost.

(2) Uninsured Self Pay Payments

Four hospitals submitted uninsured self-pay payments based on the accrual basis (i.e., all payments received for dates of service falling in the cost reporting year as of the date the uninsured report was prepared) instead of the cash basis (i.e., payments received during the cost reporting period regardless of the date of service) as required by the DSH rule.

(3) Court Ordered Patients

One state-owned psychiatric hospital included court ordered patients in the uncompensated care cost calculation. Federal guidance with respect to a patient's insurance status is unclear when patients have been involuntarily hospitalized under a 72-hour hold, found not-guilty by reason of insanity, admitted to determine their mental competency to stand trial, or previously served a court-ordered sentence but have not been discharged. The State's position is that based on available CMS guidance, the categories of patients in this hospital are not inmates of a public institution nor are they involuntarily in secure custody as a result of criminal charges. These individuals were left in the uncompensated care cost calculations presented in this report.

(4) Treatment of Third Party Payers (TPP) in Calculating Uncompensated Care Costs (UCC)

On April 3, 2017, CMS published a final rule clarifying that the total cost of uncompensated care is the cost remaining for all uninsured and Medicaid eligible individuals after accounting for payments made to hospitals by or on behalf of uninsured and Medicaid eligible individuals, including Medicare and other third party payments. This rule became effective June 2, 2017.

State of Connecticut Disproportionate Share Hospital (DSH)
Schedule of Data Caveats Relating to the DSH Verifications
For the Year Ended September 30, 2017

Per the CMS bulletin released on August 18, 2020, the DSH examination has been completed based on recommended Method #2 in combination with the CMS "Additional Information of the DSH Reporting and Audit Requirements – Part 2", #21 methodology for pro-rating cost report periods to the state fiscal year. Each hospital's applicable TPP payments have been determined by pro-rating the TPP payments for the entire cost report period overlapping the state plan rate year (SPRY) to reflect the partial cost report period on or after June 2, 2017. This percentage of the cost report period occurring on or after June 2, 2017 was computed based on the number of days within the cost report period that occur on or after June 2, 2017, divided by the total number of days within the entire cost report year. The resulting fraction was then applied to the total cost report period TPP payments. The cost report period UCC was then prorated to the SPRY. The hospital's Medicaid and uninsured costs for the entire SPRY have only been offset by the portion of the TPP payments attributed to the percentage of the overlapping cost report period on or after June 2, 2017.

Schedule of Annual Reporting Requirements

State of Connecticut
 Schedule of Annual Reporting Requirements (table)
 For the Medicaid State Plan Rate Year Ended September 30, 2017

Definition of Uncompensated Care: The definition of uncompensated care was based on guidance published by CMS in the 73 Fed. Reg. 77904 dated December 19, 2008, the 79 Fed. Reg. 71679 dated December 3, 2014, the 82 Fed. Reg. 16114 dated April 3, 2017, and the withdrawal of FAQs 33 and 34 by CMS on December 31, 2018. The calculated uncompensated care costs (UCC) represent the net uncompensated costs of providing inpatient and outpatient hospital services to Medicaid eligible individuals and individuals with no source of third party coverage for the inpatient and outpatient hospital services received. The UCC for these patient groups was calculated using Medicare cost reporting methods, and utilized the most recent CMS 2552 cost report, Medicaid paid claims summaries, and hospital-provided data. Total UCC represents the net uncompensated care costs of providing inpatient and outpatient hospital services to patients that fall into one of the following Medicaid in-state and out-of-state payment categories: Fee-for-Service Medicaid primary, Fee-for-Service cross-overs, Managed Care Medicaid primary, Managed Care Medicaid cross-overs, and uninsured individuals with no source of third party coverage for the inpatient and outpatient hospital services received. The cost of services for each of these payment categories was calculated using the appropriate per diem or cost-to-charge ratios from each hospital's most recent CMS 2552 cost report. These costs were then reduced by the total payments received for the services provided, except for Medicare and private insurance payments for services prior to June 2, 2017, including any supplemental Medicaid payments and Section 1011 payments where applicable.
