Executive Summary

The Department of Public Health, Office of Health Care Access (OHCA) is responsible for the collection, analysis and dissemination of acute care hospital financial information. This report provides information related to the financial stability of Connecticut's acute care hospitals, as mandated in Section 19a-670 of the Connecticut General Statutes (C.G.S.). The report highlights Connecticut's statewide hospital trends and includes individual hospital profiles of financial performance. The report is intended to provide information that will enhance knowledge of the financial status of Connecticut's hospitals.

The report identifies a number of key findings and trends:

- In Fiscal Year (FY) 2014, Connecticut hospitals had a total gain from operations of \$485.8 million, a sizable increase (46%) from the previous year's gain from operations.
- In FY 2014, Connecticut hospitals earned \$179.2 million in income from non-operating sources of revenue, a substantial decrease (32%) from the previous year's results.
- In FY 2014, 83% of hospitals (24 of 29) achieved a positive total margin.
- The average statewide total margin was 6.22% in FY 2014, an increase from the 5.68% average statewide total margin in FY 2013.
- Three hospitals had negative five-year average total margins in FY 2014.
- Total hospital net assets increased by \$24 million, totaling \$5.6 billion in FY 2014.
- Bad debts accounted for 66% of uncompensated care charges in FY 2014 while charity care accounted for nearly 34%, a change from FY 2013 when bad debt accounted for 64% of charges and charity care 36% of charges.
- Statewide uncompensated care charges totaled \$765 million in FY 2014, increasing \$92 million or 14% over FY 2013 results.
- Medicaid discharges accounted for greater than two out of every ten discharges.
- Connecticut continues to have an increasing number of hospitals that operate within corporate systems directly related to other Connecticut hospitals or, in several cases, to out-of-state hospitals.

Introduction

The Department of Public Health, Office of Health Care Access (OHCA) is responsible for the collection, analysis, and dissemination of acute care hospital financial information. This report provides information related to the financial stability of Connecticut's 28¹ acute care hospitals, as mandated in Section 19a-670 of the C.G.S.. The following narrative provides a summary of the financial performance of Connecticut's hospitals during Fiscal Year (FY) 2014² and presents some key statewide hospital financial indicators.³

Connecticut state statutes and regulations⁴ require each short-term acute care general or children's hospital, whether structured as for-profit or not-for-profit, to annually submit financial and statistical information to OHCA. Hospital audited financial statements, which include balance sheet and statement of operations information are the primary source of information in this report. This report also uses the annual hospital filings submitted to OHCA, which include utilization statistics, uncompensated care data, free bed funds and legal charts of corporate structure.

The report highlights Connecticut's statewide hospital trends, includes individual hospital profiles of financial performance, and is intended to provide information that will enhance knowledge of the financial status of Connecticut's hospitals. While there are numerous financial and operating indicators that provide a means to measure hospital performance, this report focuses primarily on measures involving profitability, cost data, liquidity, solvency, net assets, discharges by payer and uncompensated care, which are considered strong indicators of the hospitals' financial and operating strength.

In reading this report, the reader should note that some FY 2013 financial and statistical data elements previously reported have been updated by the hospitals in the FY 2014 filing process. This updated information has been included in this publication to improve reporting accuracy and comparability between FY 2013 and FY 2014 data reported.

¹There are 28 acute care hospitals at the time of release of this report. New Milford Hospital became a campus of Danbury Hospital on October 1, 2014 and Danbury Hospital now operates as one hospital with two campuses.

²For the purpose of filing fiscal year end results with OHCA, Connecticut's acute care hospitals' Fiscal Year 2014 began on October 1, 2013 and ended on September 30, 2014.

³OHCA used OPTUMInsight (formerly INGENIX) 2014, *Almanac of Hospital Financial & Operating Indicators, A Comprehensive Benchmark of the Nation's Hospitals*, as the source for calculating financial ratios.

 $^{^4}$ Sections 19a-644 and 19a-676, C.G.S. and Section 19a-643-206 of the Regulations of Connecticut State Agencies.

Hospital Income and Financial Performance

Hospitals must be able to generate sufficient cash flow to pay for operations and debt service, to provide a source of capital for facility needs and strategic initiatives and to increase cash reserves. In FY 2014, Net Patient Revenue (NPR) increased by 2.5% over FY 2013. Statewide NPR was approximately \$10.0 billion and accounted for 95% of operating revenues. In FY 2014, nearly half (48%) of hospital net revenue continued to be generated from governmental payers (Medicare, Medicaid, CHAMPUS/TRICARE and Medical Assistance), which also accounted for the majority of discharges (67%).

In FY 2014, Connecticut hospitals had a total gain from operations of \$485.8 million, a sizable increase (46%) from the previous year when operating profits were \$333.9 million. Twenty-four hospitals posted positive operating margins in FY 2014, an increase from 22 hospitals in FY 2013. Some hospitals did particularly well on a margin basis, such as Backus and Greenwich, but some hospitals did poorly, such as Milford and Dempsey, both of which have had negative operating margins for multiple years.

In FY 2014, non-operating revenue, which is derived primarily from investments in stocks and bonds, the value of held securities, endowments and charitable contributions, decreased \$84 million (32%) from the previous year. All but four hospitals experienced gains in non-operating revenue. Combined, these factors resulted in excess revenue over expenses of approximately \$665 million (see **Table 1**), an 11% increase from \$597 million in FY 2013.

A robust financial picture should rely more on patient and other operating revenues and not on less than reliable income sources, such as investment performance. On the whole, hospitals' operational financial performance strengthened in FY 2014, despite non-operating income weakening slightly.

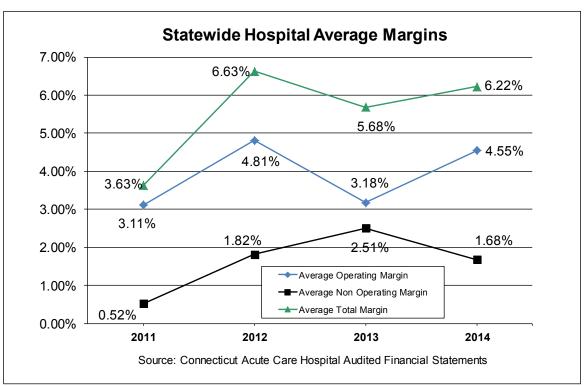

Table 1

2011	2042	2012	2014

Source: Hospital Audited Financial Statements

Figure 1 below shows the trends for statewide hospital average operating, non-operating and total margins for the last four years, which illustrate changes in statewide hospital financial performance, on average, over this time period.

Figure 1

As indicated previously, in FY 2014, hospitals had total revenue in excess of expenses of \$665 million, an increase of almost \$68 million or 11.4% from the previous fiscal year, while the statewide average total margin rose slightly from 5.68% in FY 2013 to 6.22%. During FY 2014, 18 hospitals reported an improved total margin, including all five of the Hartford Healthcare system hospitals (Backus, Hartford, HOCC, Midstate and Windham).

Individual results ranged from a high of +18.6% (Backus) to a low of -11.1% (Milford). While, twenty-four hospitals posted positive total margins in FY 2014, the same number as in FY 2013, five hospitals reported negative total margins (CT Children's, Dempsey, Milford, New Milford, and Windham). Of particular concern, Milford has reported a negative total margin for the past seven fiscal years. More detailed hospital statement of operations and margin data are provided in Appendices I and J, which provide results by individual hospital.

Five Year Financial Performance

Table 2 on the following page provides five-year weighted average total margins for Connecticut's acute care hospitals. Hospitals need to generate revenue in excess of expenses to remain profitable. Expenses exceeding revenues over a period of several years may be indicative of financial distress. Those hospitals with a negative total margin are not achieving sufficient revenue to pay all of their expenses and must use other sources of funds, such as cash reserves or the liquidation of assets, to pay their expenses. To make improvements to facilities and equipment, hospitals must have operating gains or access to sources of capital.

Listed below are key findings from **Table 2** on the following page:

- Three hospitals (Milford, New Milford, and Windham) had negative five-year average total margins over the period FY 2010 FY 2014.
- New Milford had a negative margin for four out of the five years reported. Milford and Windham had negative total margins for all five fiscal years and Milford reported a negative total margin for the past seven fiscal years.
- Windham's negative financial performance continued despite its affiliation with a large Connecticut hospital system that occurred in 2009. Windham had positive total margins for the years preceding that affiliation (FYs 2005, 2006, 2007 and 2008).
- There were 26 hospitals with positive five-year average total margins.
- Eighteen hospitals consistently sustained positive total margins in each of the five years and five hospitals (CT Children's, Dempsey, Manchester, Rockville and Waterbury), had a positive total margin in four of the five years.
- Overall, the statewide five-year weighted average total margin for FY 2010 FY 2014 was 5.34%.
- Fourteen hospitals reported a five-year total margin greater than the statewide average of 5.34%.

STATEWIDE (Note A)	5.34%	4.27%	3.63%	6.63%	5.68%	6.22%	
Median (Note B)	4.9%	3.7%	2.8%	5.5%	4.1%	4.9%	

Note A: Weighted average by dollar amounts. Revenue in excess of expenses/(revenue from operations+(revenue in excess of expenses - gain/loss from operations))

Note B: Middle margin in numerical order

Note C: The former Hospital of St. Raphael is presented for historical information only.

Note D: Johnson's FY 2010 total margin is due to the discharge of \$34.6 million of debt as a result of their bankruptcy filing.

Balance Sheet Strength and Liquidity

The strength and liquidity of a hospital or any organization may be measured by using various financial ratios. Liquidity ratios measure the amount of or how well a hospital utilizes its current or short-term assets to pay off its short-term obligations. Liquidity is an indication of how easily an asset can be converted into other types of assets or used to buy services or satisfy obligations. In FY 2014, some of the hospitals that reported strong operating profits tended to have liquidity ratios that were better than the statewide median and five hospitals had liquidity ratios that were better than the statewide median for all liquidity ratios calculated by OHCA (Backus, HOCC, Midstate, L+M, and Saint Francis). Some hospitals, while profitable, still experienced liquidity ratios that compared unfavorably to the statewide median. These included Bristol, Day Kimball, and Manchester.

On a statewide basis, hospital liquidity indicators provided mixed results. The median Current Ratio, a liquidity indicator that measures a hospital's ability to pay its short-term debts with its short-term assets, increased from 1.4 in FY 2013 to 1.6 in FY 2014 and the Days Revenue in Patient Accounts Receivable, which measures how quickly a hospital collects account balances, declined from 41 days in FY 2013 to 38 days in FY 2014; positive movements for both indicators. The median Days Cash on Hand, which measures how much cash a hospital has to pay for expenses, decreased from 38 days in FY 2013 to 37 days in FY 2014; while the median Average Payment Period, which measures the average time taken to pay creditors, increased from 67 days in FY 2013 to 69 days in FY 2014; both negative trends.

Solvency ratios measure the ability of a hospital to pay off its long term debt. Solvency measures can indicate whether or not a hospital can continue to pay all of its short-term and long-term liabilities as they become due from creditors. Similar to liquidity ratios, hospitals which have strong solvency measures also tended to report strong operating profits. In FY 2014, six hospitals had solvency ratios greater than the statewide median for all solvency ratios calculated by OHCA (Backus, HOCC, Greenwich, Middlesex, Saint Vincent's and Sharon). Similar to liquidity measures, some hospitals, while profitable, still experienced solvency ratios that compared unfavorably to the statewide median. Of note, the three hospitals that compared unfavorably to the statewide median for liquidity ratios (Bristol, Day Kimball and Manchester), also compared unfavorably to the statewide median for all three solvency measures.

On a statewide basis, similar to liquidity measures, median statewide solvency ratios also provided mixed results. The median Equity Financing Ratio, a solvency measure related to capital structure that indicates the percentage of a hospital's total assets financed with its own funds as compared to debt, had a negative change, declining from 41.7% in FY 2013 to 38.8% in FY 2014. The median Cash Flow to Total Debt Ratio, which provides an indication of potential future debt repayment difficulty or insolvency, rose from 21.9 in FY 2013 to 23.1 in FY 2014 and the median Long-Term Debt to Capitalization Ratio, which measures the proportion of long-term debt in a hospital's capital structure, declined from 28.6 to 27.7; both favorable trends. More detailed hospital liquidity and solvency measures are provided in Appendices P and Q, which provide results by individual hospital.

Another balance sheet item that indicates financial strength of an organization is the amount of net assets the organization maintains. Total statewide hospital net assets were \$5.6 billion in FY 2014, only a \$24 million increase from FY 2013. Net assets are also referred to as a hospital's ownership equity. Primary factors affecting total net assets include changes in unrealized gains and losses, a hospital's excess or deficiency of revenue over expenses, monetary transfers to or from a hospital affiliate, pension and post retirement-related changes, and net assets released from restrictions and used for operating purposes. In FY 2014, only 12 hospitals experienced net asset increases compared to almost all hospitals in FY 2013. It should be noted that three hospitals, Griffin, Milford and Windham, all had negative net assets for FY 2014, indicating that hospital assets less their liabilities was a negative amount. Griffin and Windham also had negative net assets in FY 2013. More detailed data on specific hospital net asset totals is provided in Appendix N.

Financial Status of Hospital Health Systems

In FY 2014, the hospital corporate systems, which include hospital parent corporations and all subsidiaries, had somewhat mixed results. Hospital health systems in Connecticut had an overall loss from operations of \$44.7 million, a sizable decrease from the \$91.6 million loss the previous year. There were 12 health systems that reported positive operating margins in FY 2014, with eight systems reporting operating losses, including some health systems with hospitals that reported positive operating margins such as Day Kimball, L+M and Sharon. Some health systems posted large operating gains, such as Yale with a gain of \$170 million. UCONN however, had a large impact on statewide amounts with its \$286 million operating loss.

Health systems reported total non-operating revenues of \$961.2 million. A large portion of these non-operating gains (\$756 million) were the result of \$459 million in State and Capital appropriations for UCONN and a \$297 million contribution to non-operating revenue received by Western Connecticut Health Network due to the affiliation of Norwalk Health Services Corporation. Excluding these amounts would have significantly diminished total health system non-operating revenues thereby reducing overall health system profits.

Health systems had total revenue in excess of expenses of \$916.4 million in FY 2014, an increase of \$188.3 million or 26% from the previous fiscal year. This resulted in a statewide average total margin of 7.0% for the hospital corporate systems, an increase from the 5.8% earned in FY 2013. Total margins in FY 2014 ranged from a high of 26.7% (Western Connecticut) to a low of -13.5% (Milford). There were 12 health systems that reported an improvement in total margin over the year. Seven health systems reported a negative total margin (CCMC, Day Kimball, Greater Waterbury, Johnson, L+M, Milford and Sharon). More detailed health system statement of operations and margin data are provided in Appendix A and B.

_

⁵See Appendices A-H for listings of the 20 hospital parent corporations reporting to OHCA in FY 2014. See Appendices A-H for listings of the 20 hospital parent corporations reporting to OHCA in FY 2014. Fewer systems provided data due to Backus Corporation amounts being merged into Hartford Healthcare Corporation, Norwalk Health Services Corporation amounts being merged into the Western Connecticut Health Network and OHCA using Yale New Haven Health Services as the parent corporation for Bridgeport Hospital, Greenwich Hospital and Yale-New Haven Hospital. ⁶These amounts are from the individual health system's Statement of Operations for FY 2014. Some parent corporations include data from out-of-state affiliates such as L+M which includes data from Westerly Hospital in Rhode Island.

In FY 2014, there were no large variations in the hospital corporate systems' various liquidity measures on a statewide median basis. Statewide median Days Cash on Hand displayed weaker results for the hospital corporate systems, decreasing from 45 days in FY 2013 to 39 days in FY 2014. The statewide median Current Ratio also decreased slightly from 1.73 in FY 2013 to 1.70 in FY 2014. The performance of the other liquidity measures stayed consistent between the two years. Days Revenue in Accounts Receivable remained at 40, while the Average Payment Period, at 69 days, also had no change.

In FY 2014, the hospital corporate systems' median solvency measures all moved in a negative direction from the previous year. The median statewide Equity Financing Ratio declined from 44% in FY 2013 to 42% in FY 2014, the median Cash Flow to Total Debt Ratio dropped from 17.8 in FY 2013 to 13.4 in FY 2014 and the Long-Term Debt to Capitalization Ratio rose from 26.4 in FY 2013 to 30.3 in FY 2014, none of these being improvements.

The total net assets of hospital corporate systems⁷ increased to \$7.24 billion in FY 2014, an increase of almost \$381 million, or 5.6%, from the previous year. In FY 2014, most health systems reported a decrease in net assets with the exception of Bristol, Middlesex, St. Vincent's, Stamford, UCONN, Western Connecticut and Yale. Two health systems with the largest changes were UCONN (\$179 million) due to capital appropriations and Yale (\$257 million) due to reporting Yale-New Haven Health Services Corporation as the parent corporation as opposed to the separate parent corporations of its affiliated hospitals (Bridgeport, Greenwich and Yale). If not for these two systems, statewide net assets would have actually declined marginally in FY 2014. Detailed data on specific health system liquidity and solvency measures, in addition to net asset data, are provided in Appendices F, G and H.

Utilization Indicators

Utilization measures provide additional information essential to understanding hospital performance. Significant fluctuations of patient volume or length of stay, for example, can enhance or detract from a hospital's financial performance. Appendix S of this report provides hospital utilization statistics for FY 2014.

For more detailed utilization data, refer to OHCA's publication entitled "Statewide Health Care Facilities and Service Plan" released in February 2015, which contains a comprehensive look at the utilization of services in Connecticut's acute care hospitals. The report may be accessed in the Publications section of the OHCA website at the following address: http://www.ct.gov/dph/lib/dph/ohca/hc_facilities_advisory_body/facilities/2014/ ohca_2014_supplemental_statewide_facilities_chapter_2-acute_care_facilities_utilization_and_trends.pdf

⁷The financial results of a hospital system include each hospital's parent corporation, the hospital itself and any other subsidiaries under the hospital parent organization. Therefore, the statewide hospital systems' net assets of \$6.8 billion in FY 2014 includes the statewide hospitals' nets assets for FY 2014.

Uncompensated Care

By law, all emergent, non-elective patients at Connecticut's hospitals must be treated, regardless of their ability to pay. Uncompensated care (UC) represents health care provided to patients by hospitals that will not be reimbursed. There are two components of uncompensated care: charity care and bad debt. Charity care occurs when a hospital knows in advance that the care provided will not be reimbursed. Bad debt is incurred after a service has been provided, with no forewarning of non-payment. Appendix R of this report provides an overview of the hospitals' uncompensated care data for FY 2014.

In FY 2014, statewide uncompensated care charges (UC charges) totaled \$764.9 million, an increase of \$91.8 million or 13.6% from the previous year. Total statewide bad debt of \$506.1 million, rose \$76.5 million, an increase of 17.8% and total statewide charity care of \$258.8 million, rose by \$15.3 million, an increase of 6.3%. A summary of FY 2014 changes to hospital bad debt and charity care is provided in the **Table 3** below.

Table 3

	# of Hospitals with decreases	# of Hospitals with decreases > 25%	# of Hospitals with increases	# of Hospitals with increases > 25%
Bad Debt	15	5	14	8
Charity Care	18	5	11	4

Overall, bad debt as a percentage of total hospital UC charges increased to 66.2% in FY 2014, up from 63.8% in FY 2013. In FY 2014, four hospitals had bad debt as a percentage of total hospital UC charges which exceeded 90%: Dempsey (91.0%), Johnson (91.4%), Milford (90.6%) and Saint Mary's (91.8%). Conversely, charity care as a percentage of total hospital UC charges decreased from 36.2% in FY 2013 to 33.8% in FY 2014. The hospitals with the highest percentage of charity care to total hospital UC charges were Griffin (78.2%), Hartford (55.4%), HOCC (76.0%), MidState (56.0%) and Waterbury (60.4%).

Uncompensated care costs (UC costs) are the costs hospitals incur providing care for which no payment was received from the patient or insurer. Hospital charges include the actual cost of care plus a mark-up to generate additional income. This additional income is used by hospitals to recoup fixed costs, generate funds for future investment and to maintain profitability. Uncompensated care costs are calculated from hospital charges using a cost-to-charge ratio (See Appendix R) and attempt to remove the additional mark-up to determine the "true cost" of care.

In FY 2014, statewide UC costs totaled \$236.9 million, an increase of \$20.7 million or 9.6%, from the previous year. The statewide UC costs accounted for 2.4% of total expenses, up just slightly from a figure of 2.2% in FY 2013. Eighteen hospitals experienced a decrease in UC costs and 4 of the 18 (Griffin, New Milford, Rockville and Waterbury) decreased by more than 25%. The remaining 11 hospitals experienced an increase in UC costs in FY 2014 and 5 of the 11 (Dempsey, Greenwich, Hartford, MidState and Yale) increased by more than 25%.

OHCA has stated for the past several years that, as the Affordable Care Act (ACA) expands health care coverage, uncompensated care costs should decrease, but that a significant reduction in the overall costs may take some time and may not decrease uniformly at individual hospitals. Coverage through the State's AccessHealth CT exchange began during FY 2014. As the exchange was enrolling new insurance subscribers beginning January 1, 2014 or for the last three quarters of FY 2014, it remains too early to make any definitive statements regarding this increased insurance coverage related to the uncompensated care results for Connecticut's hospitals.

A Discussion of Hospitals within Affiliated Systems

Connecticut continues to have an increasing number of hospitals that operate within corporate systems directly related to other Connecticut hospitals or, in several cases, to out-of-state hospitals. The Connecticut acute care hospitals that operated within such systems during this past year are listed in Appendix AA.

Within the Western Connecticut Health Network, Inc. ("WCHN") system, a number of significant events have recently taken place. Norwalk Hospital became a member of the WCHN system on January 1, 2014 as a result of the acquisition of the Hospital's parent, Norwalk Health Services Corporation ("NHSC") by WCHN, whereby NHSC became wholly owned by WCHN. On September 29, 2014, NHSC then fully merged into WCHN, and Norwalk Hospital is now whollyowned by WCHN, without a middle parent entity. In addition, effective October 1, 2014, New Milford Hospital's operations were consolidated with those of Danbury Hospital and New Milford Hospital is now a satellite location on Danbury Hospital's general hospital license.

Within the Yale-New Haven Health Services Corporation system, two events took place related to the immediate parent corporations of Bridgeport Hospital and Yale-New Haven Hospital, both on May 15, 2014. Bridgeport Hospital's immediate parent, Bridgeport Hospital & Healthcare Services, Inc., merged into Bridgeport Hospital and Yale-New Haven Hospital's immediate parent, YNH Network Corporation merged into Yale-New Haven Hospital. With these changes, both of these two hospitals are now wholly-owned by Yale-New Haven Health Services Corporation, without middle parent entities.

Within the Hartford Healthcare Corporation system, on April 28, 2015, Central Connecticut Health Alliance, Inc., the immediate parent corporation of Hospital of Central Connecticut, merged into Hartford Healthcare Corporation. Hospital of Central Connecticut is now whollyowned by Hartford Healthcare Corporation, without a middle parent entity. On July 17, 2015, OHCA issued a Certificate of Need ("CON") Determination indicating that a CON was not required for The William W. Backus Hospital's immediate parent, Backus Corporation, to merge into Hartford Healthcare Corporation, whereby the hospital will be wholly-owned by Hartford Healthcare Corporation, without a middle parent entity. This change may not have occurred as of the date of this publication.

EXECUTIVE SUMMARY

The planned affiliation of non-profit health systems with other non-profit health systems or with national hospital chains remains an active trend within Connecticut's hospital industry. The activity may indicate a growing interest in and/or necessity for hospitals and their corporations to enter into conversations or negotiations with other hospital systems. This may be the result of many factors including, but not limited to, the status of current national and state economies, reimbursement issues, strengthening of position in payer contract negotiations and access to capital. The changes that have occurred at the Federal and State level with the full implementation of the Affordable Care Act have clearly played a significant role in the ongoing reshaping of Connecticut's hospital systems and the formation of more affiliations, both non-profit and for-profit affiliations.

Statewide Health System Data Statewide Hospital Data & Individual Hospital Data

The following sections provide an aggregate statewide profile of hospital parent corporations and aggregate statewide profile of hospital summary totals for both financial and statistical indicators. In addition, individual hospital profiles are presented for each of Connecticut's acute care hospitals. The final section of this report contains detailed appendices by hospital parent corporation and by hospital as identified in the table of contents. Unless otherwise indicated, the sources of data used in these sections are the OHCA Hospital Reporting System (HRS) and the hospitals' annual filings to OHCA.

STATEWIDE HOSPITAL HEALTH SYSTEM PROFILE

Reported below is the total Statewide Health System statement of operations summary for Fiscal Year 2011 - Fiscal Year 2014, a summary of profitability margins, net assets and selected liquidity and solvency measures.

STATEWIDE HEALTH SYSTEM STATEMENT OF OPERATIONS SUMMARY	2011	2012	2013	2014
Net Patient Revenue	\$10,123,431,993	\$10,964,152,921	\$10,920,191,160	\$11,347,784,022

WILLIAM W. BACKUS HOSPITAL

The William W. Backus Hospital is located in Norwich. In FY 2014, the Hospital generated \$48.6 million in income from operations and had \$9.1 million in non-operating revenue, resulting in an excess of revenues over expenses of \$57.7 million. Reported below is a list of various financial indicators and selected utilization measures for the Hospital. A chart indicating all of the affiliates of the Hospital's parent, Hartford Healthcare Corporation, based on OHCA filings, can be found in Appendix AA.

KEY RESULTS - YALE-NEW HAVEN HOSPITAL

YALE-NEW HAVEN HEALTH SERVICES CORP.

STATEMENT OF OPERATIONS DATA

Net Patient Revenue

Other Operating Revenue

Yale-New Haven Hospital is located in New Haven. In FY 2014, the Hospital generated \$134.5 million in income from operations and had \$30.2 million in non-operating revenue, resulting in an excess of revenues over expenses of \$164.7 million. Reported below is a list of various financial indicators and selected utilization measures for the Hospital. A chart indicating all of the affiliates of the Hospital's parent, Yale-New Health Services Corporation, based on OHCA filings, can be found in Appendix AA.

* RCC is rounded to two digits for presentation purposes.
Note: There are different ways hospitals report DSH taxes and payments in their audited financial statements. As a result, the total expense amount above, which agrees to the audited financial statements, will have different components depending on the hospital.

		FY 2014	HOSPITAL RAT	FY 2014 HOSPITAL RATIO OF COST TO CHARGE DATA	CHARGE DATA			
Ratio:	MEDICAID	MEDICAID PAYMENTS	MEDICAID PAYMENT TO COST DATA	TOTAL NON GOVT CHARGES	TOTAL NON GOVT PAYMENTS	TOTAL UNINSURED CHARGES	TOTAL UNINSURED PAYMENTS	PRIVATE PAYMENT TO COST DATA
Calculation:			Medicaid Payments/ (Medicaid Chrges * RCC)					Non-Govt Pymts - Uninsrd Pymts/((Non- Govt Chrgs-Uninsrd Chrgs)*RCC)

APPENDIX AA: HEALTH SYSTEM CHARTS OF ORGANIZATION

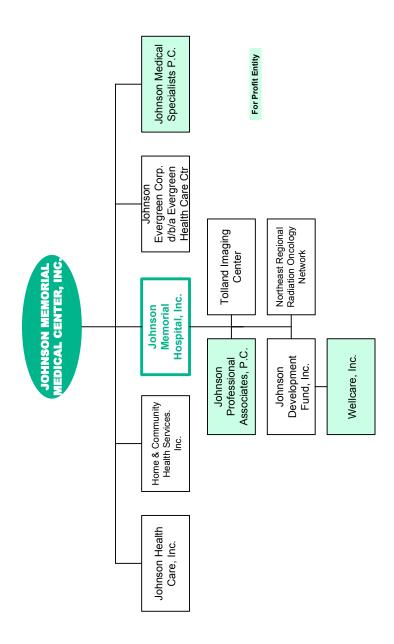

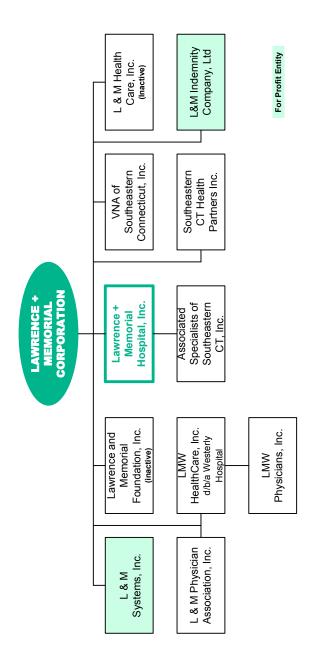

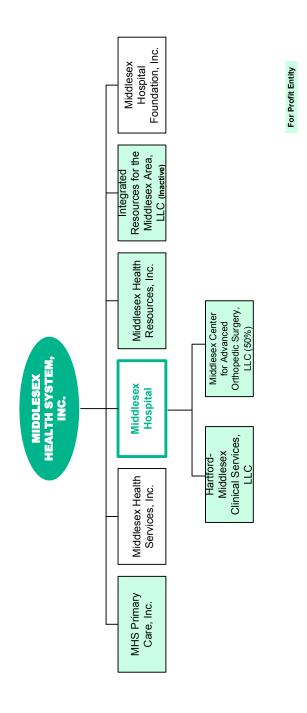

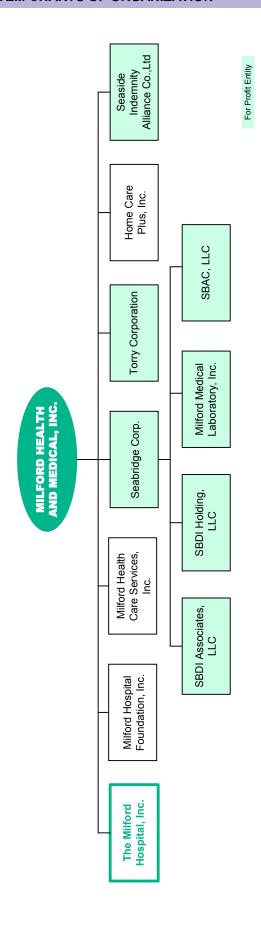

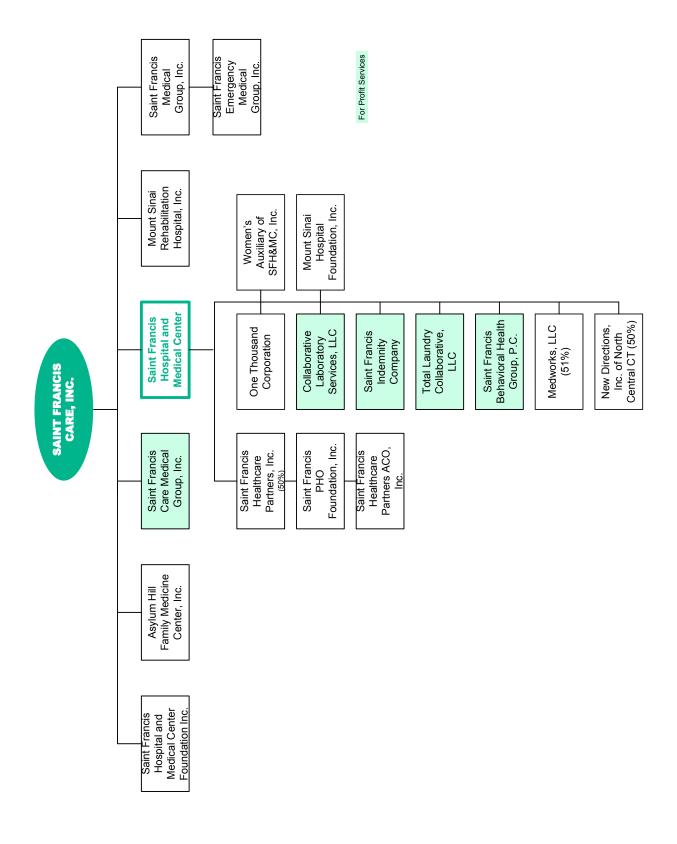

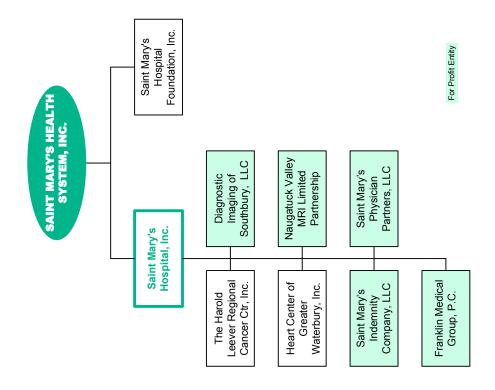

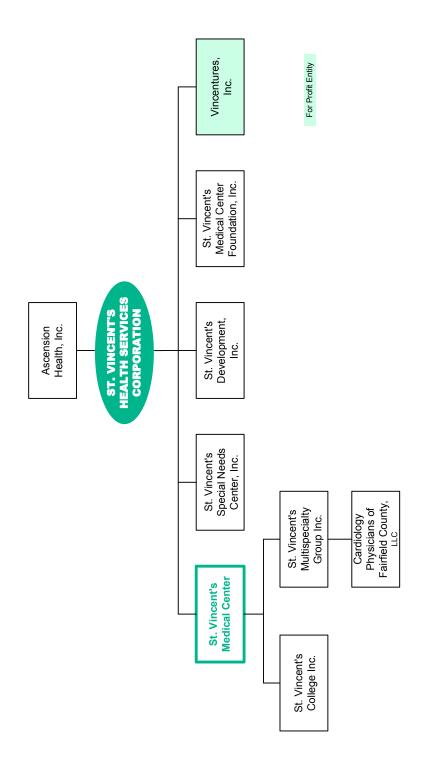

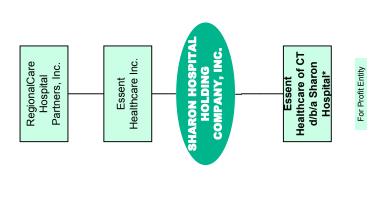

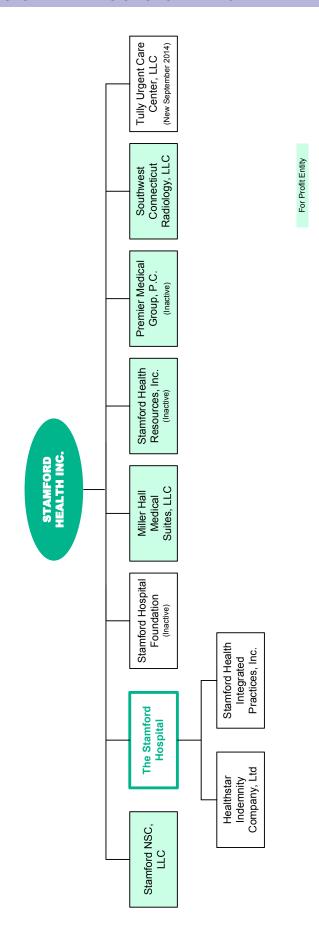

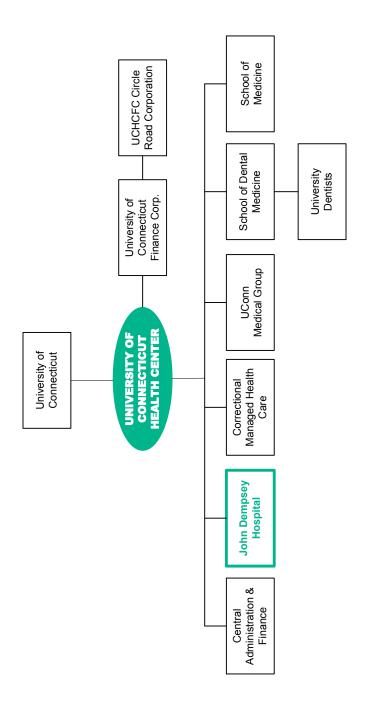

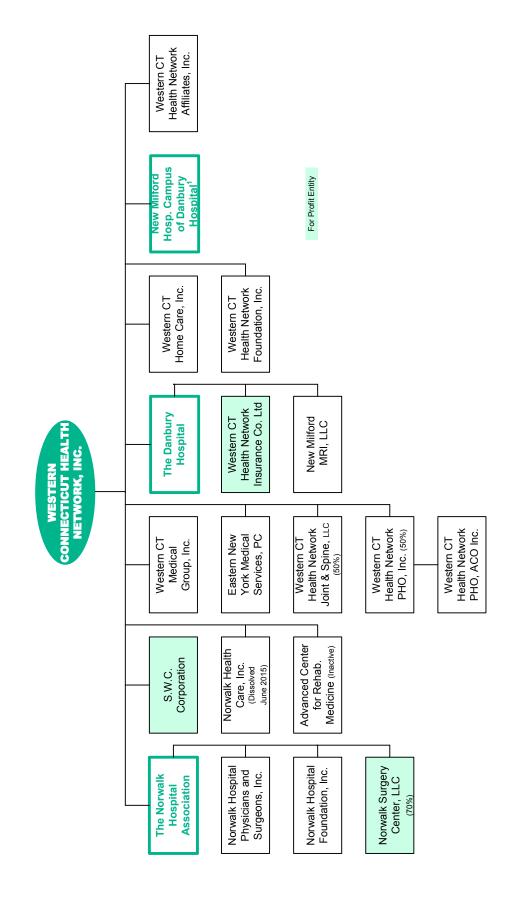

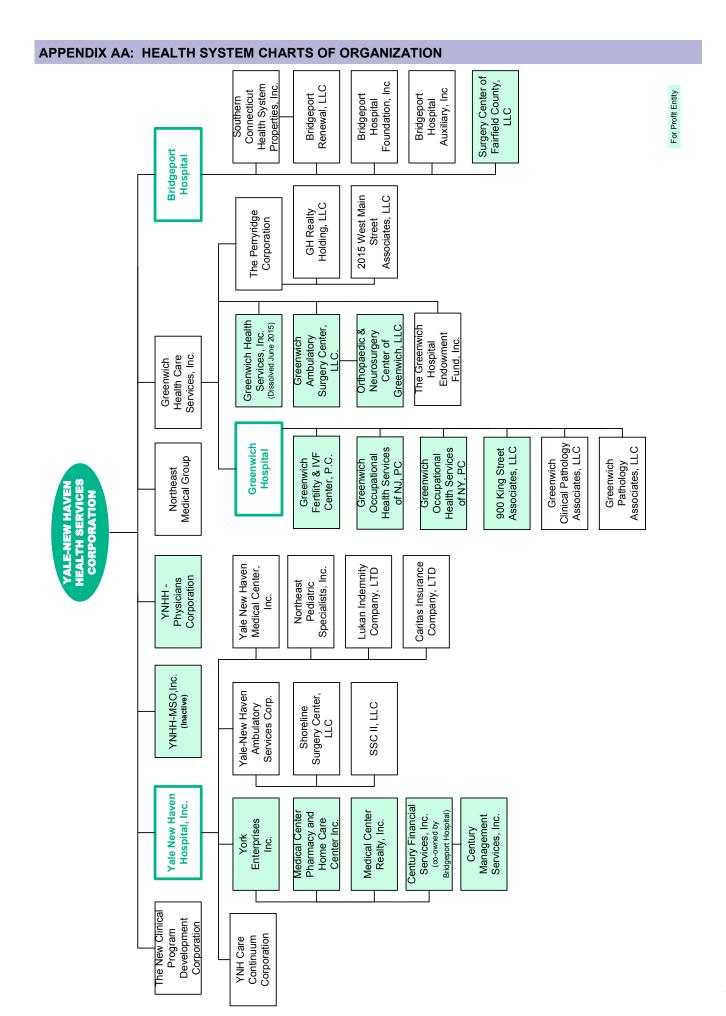

*The Foundation for Community Health, Inc. owns 5% of Sharon Hospital.

¹On October 1, 2014, Danbury Hospital and New Milford Hospital began to operate under a single license.

APPENDIX AB: GLOSSARY OF TERMS

Average Payment Period: the average number of days that are required to meet current liabilities. A lower number of days is favorable, since it indicates a more favorable liquidity position.

Bad Debts: the income lost to the hospital because patients who were billed and from whom payment was expected did not pay amounts owed to the hospital for services provided. Bad debts net of recoveries will result in bad debt expense, if after reasonable collection efforts are made, the hospital determines that the accounts are uncollectible.

Case Mix Index: the arithmetic mean of the Medicare diagnosis related group case weights assigned to each inpatient discharge for a hospital during the fiscal year. The case mix index is calculated by dividing the hospital's total case mix adjusted discharges by the hospital's actual number of discharges for the fiscal year.

Cash Flow to Total Debt Ratio: an indicator of potential future debt repayment difficulty or insolvency. It is calculated by dividing excess of revenues over expenses plus depreciation by current liabilities plus long term debt. A decrease in the value of the ratio may indicate a future debt repayment problem.

Charity Care: the difference between the hospital's published charges and the amount of reimbursement received for services provided to patients from whom reimbursement was not expected. Charity care does not include bad debts, courtesy discounts, contractual allowances, self pay discounts, and charges for health care services provided to employees.

Current Ratio: the measure of the number of dollars held in current assets per dollar of current liabilities. High values imply a good ability to pay short term obligations and low values imply a lesser ability.

Days Cash on Hand: the average number of days of cash available to pay for expenses that is maintained in cash accounts. A higher number is favorable, since it indicates a greater ability to meet outstanding obligations.

Days in Patients Accounts Receivable: the average number of days in collection that patient accounts receivables remain outstanding. A lower number is favorable, since it indicates good

collection practices that result in sufficient cash flow and infrequent short-term financing.

Disproportionate Share Hospital (DSH) Program Payments: payments that provide financial assistance to hospitals that serve a large number of low-income patients, such as the uninsured or people on Medicaid.

Equity Financing Ratio: the ratio related to capital structure that indicates the percentage of net assets to total assets. A higher ratio is more favorable, since it indicates utilization of a higher level of equity and a lower level of debt financing in acquiring plant and equipment assets.

Excess / (Deficiency) of Revenue over Expenses: the difference between the sum of total operating revenue and non-operating revenue less total operating expenses that results in an excess or deficiency of total revenue.

Gross Patient Revenue – total gross patient charges for all patient services before deductions for allowances, charity care and other deductions.

Hospital Parent Corporation: the hospital's corporate holding company that controls through its governing body a hospital and the hospital's affiliates, as presented on the legal chart of corporate structure.

Income / (Loss) from Operations: the difference between total operating revenue and total operating expenses that results in a financial gain or loss from operating activities.

Long-Term Debt to Capitalization Ratio: the measure of the proportion of Long-Term Debt in a capital structure. A lower proportion or percentage is desirable because it allows for obtaining of more favorable terms (i.e., lower interest rates) when borrowing.

Medicaid: the federal and state health insurance program established under Title 19 of the Social Security Act to provide medical assistance on behalf of families with dependent children and for aged, blind or disabled whose income and resources are insufficient to meet the costs of necessary medical services and which is administered by the Department of Social Services.

Medical Assistance: the programs for medical assistance provided under the Medicaid program, including the HUSKY Plan, Part A, or (B) any

APPENDIX AB: GLOSSARY OF TERMS

other state-funded medical assistance program, including the HUSKY Plan, Part B.

Medicare: the federal health insurance program for the aged and disabled.

Net Assets: the residual amount of total assets after all current and long-term liabilities (including long-term debt) are deducted. Also referred to as ownership equity.

Net Patient Revenue: the total gross revenue from patient charges less contractual allowances, less the difference between government charges and government payments, less charity care and less any other allowances.

Non Governmental: any commercial or private payer and includes but isn't limited to managed care organizations, health maintenance organizations, and preferred provider organizations.

Non-Operating Margin: the ratio related to profitability indicating the percentage of non-operating revenue to total revenue. A higher positive ratio indicates more favorable results.

Non-Operating Revenue: the unrestricted revenue not directly derived from providing patient services but obtained from either investment income or philanthropic and non-philanthropic sources.

Operating Expenses: the expenses necessary to maintain regular operating functions and to carry out ongoing activities.

Operating Margin: the ratio related to profitability indicating the percentage of income or loss from operations to total revenue. A higher positive ratio indicates more favorable operating results.

Operating Revenue: the total of net patient revenue from reimbursement of patient services by government and non-government payers plus other operating revenue.

Other Medical Assistance: the difference between Medical Assistance and Medicaid.

Other Operating Revenue: the non-patient service operating revenue that is obtained from operating activities but is accounted for separately from patient service revenues. Other operating revenue includes revenues restricted by a donor or

grantor for operating purposes, and also net assets released from restrictions.

Payer Mix: the proportion of each government or non-government payer's reimbursement to the hospital's total reimbursement for patient services. Payer mix is derived by determining the amount of total gross patient revenue or total net patient revenue that the hospital receives from each government and non-government payer.

Payment to Cost Ratio: the ratio that indicates the percentage above or below cost that a hospital is reimbursed by a government or non-government payer. A ratio that is higher than 1.00 is favorable, since it indicates reimbursement by a payer that is greater than the cost of providing patient services. A ratio that is less than 1.00 is unfavorable, since it indicates reimbursement by a payer that is less than the cost of providing patient services.

Ratio of Cost to Charges: the ratio that indicates the percentage of total operating expense to the total of gross patient charges plus other operating revenue. A lower ratio is more favorable, since it indicates a greater difference between the cost and charges billed for providing patient services.

Total Margin: the ratio related to profitability indicating the percentage of income or loss from operations and non-operating revenue to total revenue. A higher positive ratio indicates more favorable results.

Uncompensated Care: the total amount of the hospital's charity care and bad debts resulting from unreimbursed patient services that are determined by using the hospital's published charges and consistent with the hospital's policies regarding charity care and bad debts.

Uncompensated Care Cost: the total amount of the hospital's charity care and bad debts at charges multiplied by the hospital's ratio of cost to charges.

Uninsured: individuals with no health insurance for the hospital services provided.

Unrestricted Net Assets: the amount of net assets that is not restricted by donors or by a board of directors as to their use.
