OCC FACT SHEET: ELECTRIC SUPPLIER MARKET, SEPTEMBER 2020 THROUGH AUGUST 2021

The following is an update to the Office of Consumer Counsel's (OCC's) Electric Supplier Market Fact Sheet, originally created in [2014](#). The numbers provided herein are based on data submitted as compliance filings in the Public Utilities Regulatory Authority's Docket Number 06-10-22.

- Retail suppliers serve 16.5% of Eversource Energy (Eversource) residential customers and 20.3 % of United Illuminating (UI) residential customers, in August 2021.
- In the month of August 2021, **nine out of ten** residential supplier customers paid more than the Standard Offer in Eversource territory, and **seven out of ten** residential supplier customers paid more than the Standard Offer in UI territory.¹

- In the month August 2021, residential Eversource customers who chose suppliers paid in aggregate **\$3,270,949 more** than the Standard Offer for their electric generation, and residential UI customers who chose suppliers paid in aggregate **\$889,013 more** than the Standard Offer.²
- For the rolling year of September 2020 through August 2021, residential consumers who chose a retail supplier paid, in aggregate, **\$36,406,222 more** than the Standard Offer.

¹ This Fact Sheet only examines available data regarding pricing by electric suppliers. While some suppliers may offer products or services to customers such as airline miles or a product with additional renewable energy content, there is no data available to quantify the value of such offers. OCC recommends that customers look carefully at the fine print for offers for additional products or services that come with higher prices, to ensure they are getting sufficient value to justify the higher price tag.

² These calculations are based on an assumption of 750/month kWh usage. \

- Since January 2015, when OCC started tracking supplier data, customers with a supplier have overpaid a total of **\$295,196,345** more than standard service.
- For July 1, 2020 through December 31, 2020 the Standard Offer was 7.375 cents/kWh. The Standard Offer for January 1, 2021 through June 30, 2021 was 8.391 cents/kWh. For July 1, 2021 through December 31, 2021 the Standard Offer is 7.003 cents/kWh.
- For July 1, 2020 through December 31, 2020 the Standard Offer was 8.6672 cents/kWh. The Standard Offer for January 1, 2021 through June 30, 2021 was 9.3694 cents/kWh. For July 1, 2021 through December 31, 2021 the Standard Offer is 8.0103 cents/kWh.
- As of July 1, 2020 customers coded as hardship were returned to standard service. Suppliers are no longer able to serve hardship coded customers going forward in Connecticut as a result of PURA ruling in Docket No. 18-06-02.
