## OCC FACT SHEET: ELECTRIC SUPPLIER MARKET, MAY 2016 THROUGH APRIL 2017

The following is an update to the Office of Consumer Counsel's (OCC's) Electric Supplier Market Fact Sheet, originally created in [2014](#). The numbers provided herein are based on data submitted as compliance filings in the Public Utilities Regulatory Authority's Docket Number 06-10-22.

- Retail suppliers serve 28% of Eversource Energy (Eversource) residential customers and 35.7% of United Illuminating (UI) residential customers, in April 2017.
- In the month of April 2017, over **six out of ten** residential supplier customers paid more than the Standard Offer in Eversource territory, and over **four out of ten** residential supplier customers paid more than the Standard Offer in UI territory.<sup>1</sup>

- In the month April 2017, residential Eversource customers who chose suppliers paid in aggregate **\$2,924,409.93 more** than the Standard Offer for their electric generation, and residential UI customers who chose suppliers paid in aggregate **\$224,679.08 more** than the Standard Offer.<sup>2</sup>

---

<sup>1</sup> This Fact Sheet only examines available data regarding pricing by electric suppliers. While some suppliers may offer products or services to customers such as airline miles or a product with additional renewable energy content, there is no data available to quantify the value of such offers. OCC recommends that customers look carefully at the fine print for offers for additional products or services that come with higher prices, to ensure they are getting sufficient value to justify the higher price tag.

<sup>2</sup> These calculations are based on an assumption of 750/month kWh usage.

- For the rolling year of May 2016 through April 2017, residential consumers who chose a retail supplier paid, in aggregate, **\$63,781,319.23 more** than the Standard Offer.
- The Standard Offer for Eversource customers was 6.61 cent/kWh from July 1, 2016 through December 31, 2016. From January 1, 2017 through June 30, 2017, the Standard Offer for Eversource customers is 7.87 cents/kWh.
- The Standard Offer for UI customers was 8.02 cents/ kWh from July 1, 2016 through December 31, 2016. From January 1, 2017 through June 30, 2017, the Standard Offer for UI customers is 9.26 cents/kWh.
- The following table lists all electric suppliers who charged at least 20% of their residential customers 11.811 cents/kWh (50% higher than Eversource standard service) or 13.896 cents/kWh (50% higher than UI standard service) or more in the month of April. The phone numbers for each supplier are taken from those listed at energizect.com or the website for that supplier.
