#### **Section 1 - Executive Summary**

The Office of Health Strategy ("OHS") was created in 2017 as a bipartisan effort of the Connecticut General Assembly to advance high-quality, affordable, and accessible healthcare for all residents. Connecticut General Statutes Section ("C.G.S §") 19a-754a. The legislation re-organized existing state resources into one body, uniting health policymaking and advancing healthcare reform initiatives that will drive down healthcare costs, close Connecticut's racial, economic, and gender health disparities, and undertake technology-driven modernization efforts throughout the system.

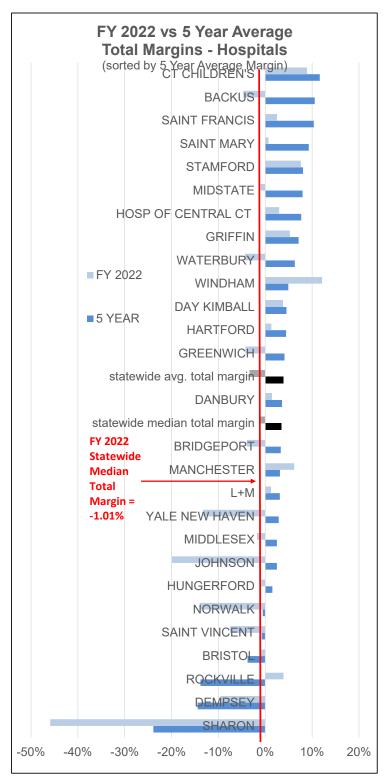

The mission of the Office of Health Strategy is to implement comprehensive, data driven strategies that promote equal access to high-quality health care, control costs, and ensure better health outcomes for all Connecticut residents. OHS is responsible for the collection, analysis, and dissemination of acute care hospital financial information. This report provides information related to the financial stability of Connecticut's acute care hospitals, as mandated by C.G.S. § 19a-670. The report highlights Connecticut's statewide hospital trends and includes individual hospital profiles of financial performance. It is intended to provide information that will enhance knowledge of the financial status of Connecticut's hospitals.

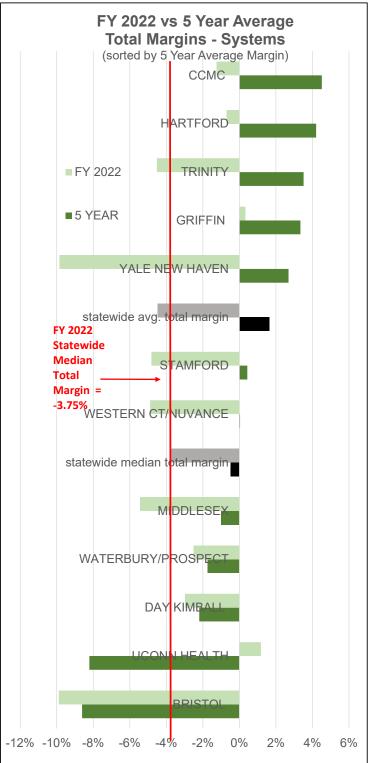

The report identifies the following key findings and trends:

- In Federal Fiscal Year ("FY") 2022 (October 1, 2021 September 30, 2022), statewide losses from patient care and related sources (i.e., operating revenue) for Connecticut ("CT") hospitals was \$206.6 million, compared with a gain of \$333 million in the previous year.
- Hospitals statewide had losses of \$309 million from sources unrelated to patient care, (or non-operating revenue) such as revenue from investments, unrealized gains on investment holdings, and gains from affiliates or joint ventures The losses were due mostly to declines in the financial markets. In FY 2021, hospitals had \$1.14 billion in non-operating revenues.
- Although net patient revenue has increased by over \$2 billion from FY 2019 FY 2022, expenses increased from \$12.5 billion in FY 2019 to \$15.8 billion in FY 2022 leading to an overall operating loss of \$206 million in FY 2022.
- Forty-eight (48%) of hospitals (13 of 27) achieved a positive total margin which includes gains from patient care and non-operating revenues.
- The statewide total margin was -3.36% in FY 2022, a decrease from the statewide total margin of 9.17% in the previous year. The five-year average total margin was 3.87%.
- Six hospitals had negative five-year average total margins in the FY 2018 to FY 2022 period;
   two more hospitals than in the FY 2017 to FY 2021 period.
- Total hospital net assets decreased by \$109 million to \$9.88 billion, or 1% in FY 2022, while stockholder equity increased by \$7.3 million to \$131 million, a rise of 6%.
- Statewide hospital uncompensated care charges totaled \$907 million in FY 2022, a \$73 million or 8.8% increase from the prior fiscal year.
- Bad debts accounted for 52% of uncompensated care charges in FY 2022 while charity care accounted for 48%; a change from FY 2021 when bad debt was 55% and charity care was 45%.
- Notwithstanding the performance of individual hospitals and health systems in the state, hospital services were the most significant contributors to an 18.8% increase in commercial spending per person; specifically, in 2021, per person spending for hospital outpatient and inpatient services grew 33.1% and 20.1%, respectively.

#### **Executive Summary**

Noted below is a chart depicting both the FY 2022 total margin and five-year average total margin for the 27 acute care hospitals in CT. The chart is also provided in the Financial Analysis section of this report on page 11. The second chart demonstrates the FY 2022 total margin and five-year total margins for the 12 health systems that were active in FY 2022.

#### Section 2 - Financial Analysis

#### Introduction

Connecticut state statutes and regulations¹ require each short-term acute care general or children's hospital, whether structured as for-profit, not-for-profit, or state-owned, to submit financial and statistical information to OHS annually based on the previous federal fiscal year (October 1st through September 30th). Hospital audited financial statements, which include balance sheet and statement of operations information, are a primary verifying source of information in this report. OHS also uses data and information filed each year by hospitals in their Annual Report and Twelve-Month Actual submissions, such as utilization statistics, uncompensated care data, and legal charts of corporate structure. Many of the filings noted here are available in the Hospital-Reporting-System Portal which can be accessed from the OHS website.

This report highlights Connecticut's statewide hospital trends, includes individual hospital profiles and hospital system profiles of financial performance, and is intended to provide information that will enhance knowledge of the financial status of Connecticut's hospitals. While there are numerous financial and operating indicators that provide a means to measure hospital performance, this report focuses primarily on measures involving profitability, cost data, liquidity, solvency, net assets, discharges by payer, and uncompensated care, which are considered strong indicators of the hospitals' financial and operating strength.<sup>2</sup>

Readers should note that when filing the FY 2022 data,<sup>3</sup> some FY 2021 financial and statistical data elements reported in the previous filing year may have been revised or restated by the hospitals during the FY 2022 filing process.<sup>4</sup> This updated information is included in this publication to improve reporting accuracy and comparability between FY 2021 and FY 2022 data.

OHS presents key findings related to the hospital and hospital system financial performance for FY 2022 by the following categories:

- Individual Hospital Financial Performance
- Five-Year Financial Performance
- Uncompensated Care
- Health System Financial Performance

<sup>1</sup> C.G.S, Sections 19a-644 and 19a-676, and Section 19a-643-206 of the Regulations of Connecticut State Agencies.

<sup>&</sup>lt;sup>2</sup> OHS used OPTUM's *Almanac of Hospital Financial & Operating Indicators, A Comprehensive Benchmark of the Nation's Hospitals 2016*, as a source for calculating most financial ratios. OPTUM is a multi-faceted national healthcare organization.

<sup>&</sup>lt;sup>3</sup> For the purpose of filing fiscal year end results with OHS, Connecticut's acute care hospitals operate on the federal fiscal year. FY 2022 began on October 1, 2021, and ended on September 30, 2022.

<sup>&</sup>lt;sup>4</sup> John Dempsey Hospital & UCONN Health Center utilize government accounting in their audited financial statements.

#### **Individual Hospital Financial Performance**

**Table 1** shows a summary of statewide hospital revenue and expenses over the last four fiscal years. Details by hospital can be found in Appendix H. Key findings are listed below.

#### Revenue & Expenses

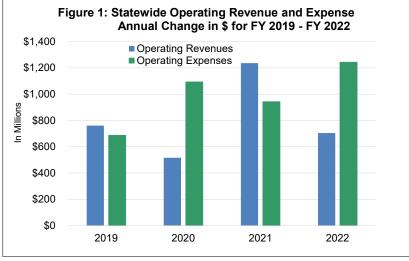

- Statewide Net Patient Revenue ("NPR") was approximately \$14.3 billion and accounted for 91% of operating revenues.
- NPR increased by 5.4% (\$728 million) over the previous fiscal year due to more patients continuing to go to hospitals for medical care after staying away during the COVID-19 pandemic.
- Operating expenses rose 8.5% (\$1.24 billion) to \$15.8 billion from the previous fiscal year due to increases in contract labor (34%), supplies and drugs (8%) and salaries and wages (7%).
- Half (50%) of statewide hospital net revenue continued to be generated from the government payers: Medicare, Medicaid, CHAMPUS/TRICARE, and other medical assistance though the percentage of government payments vary by institution.
- Other operating revenue (grants, parking fees, cafeteria) decreased by 2% (\$24 million).
- There were non-operating losses of \$309 million compared with gains of \$1.1 billion in FY 2021, due to losses in the financial markets.

Table 1

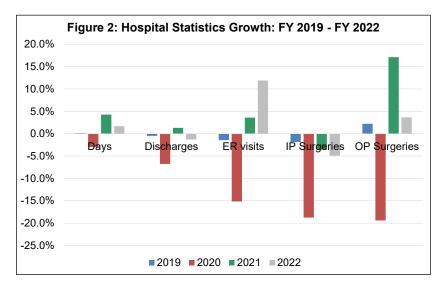

STATEWIDE HOSPITALS STATEMENT OF OPERATIONS DATA	FY 2019	FY 2020	FY 2021	FY 2022
Net Patient Revenue	\$12,427,166,410	\$11,952,887,384	\$13,558,469,297	\$14,286,644,636
Other Operating Revenue	\$746,676,374	\$1,737,522,612	\$1,367,798,531	\$1,343,780,477
Total Operating Revenue	\$13,173,842,784	\$13,690,409,996	\$14,926,267,828	\$15,630,425,113
Total Operating Expenses	\$12,555,673,515	\$13,649,522,500	\$14,593,139,966	\$15,837,070,007
Income/(Loss) from Operations	\$618,169,269	\$40,887,496	\$333,127,862	(\$206,644,894)
				(4)
Non-Operating Revenue	\$65,780,309	\$324,609,990	\$1,140,823,377	(\$308,592,251)
Excess/(Deficiency) of Revenue over Expenses	\$683,949,578	\$365,497,487	\$1,473,951,239	(\$515,237,145)

Source: Hospital Audited Financial Statements

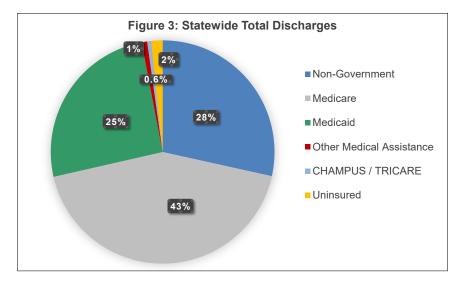

**Figure 1** shows the growth in statewide hospital total operating revenues and expenses from FY 2019 to FY 2022. Unlike in FY 2021, the growth in operating expenses far exceeded the growth in operating revenues. Since FY 2019, total operating revenues have increased by \$2.5 billion (19%) while operating expenses have climbed by \$3.3 billion (26%).

**Figure 2** shows the growth trends for CT hospital patient days, inpatient discharges, emergency room (ER) visits, and surgeries in the hospital setting, (excluding hospital-owned outpatient surgical facilities) for FY 2019 to FY 2022. Statewide amounts for inpatient discharges and surgeries dropped in FY 2022, while patient days, outpatient surgeries, and emergency room visits all rose.

A summary of statewide inpatient discharges by payer type is presented in **Figure 3**. The majority of inpatient discharges (70%) were covered by government sponsored health plans (Medicare, Medicaid, other medical assistance, and CHAMPUS/TRICARE). Non-government payers include commercial payers and self-funded employer health plans.

Appendix Q of this report provides further hospital utilization statistics for FY 2022. For more detailed utilization data, refer to the publication entitled <u>Facilities and Services Plan 2020 Supplement</u> released by OHS in September 2020, which contains a comprehensive look at the utilization of services in Connecticut's acute care hospitals. An updated version of the full report is expected to be finalized during the summer of 2024.

Figure 4 shows the change in statewide hospital revenue, by payer source, from FY 2021 to FY 2022.

- In FY 2022, non-government payments increased by almost \$400 million followed by Medicare payments which increased by over \$200 million and Medicaid payments which increased about \$100 million.
- The revenue increases are due to the mix of patients and longer stays at many hospitals (see Appendices S, Q, and U for more details) and increased ER visits and outpatient surgeries (Figure 4).

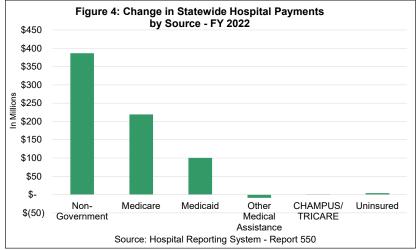

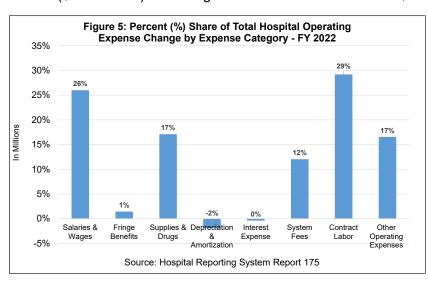

Figure 5 shows the sources of changes in hospital operating expenses from FY 2021 to FY 2022.

- Total expenses increased by \$1.24 billion to \$15.8 billion from \$14.6 billion in 2021.
- The largest contributors of the \$1.24 billion increase, in percentage terms, came from the categories contract labor (29%), salaries and wages (26%)<sup>5</sup>, and supplies and drugs (17%), as noted in the chart below. These categories also increased the most in dollar terms.
- Other miscellaneous operating expenses, not indicated in **Figure 5**, totaled \$2.85 billion.
- There are about 35 categories of other miscellaneous operating expenses. The largest categories are purchased services (\$791 million), and general miscellaneous expense (\$601 million) which together account for 49% of the \$2.85 billion. Other categories with

high expenses are repairs and maintenance (\$201 million and physician fees (\$198 million). An in-depth analysis of hospital operating expenses will be provided as a separate brief in the coming months.

<sup>&</sup>lt;sup>5</sup> Salary data on hospital and health systems presidents & CEOs can be found in Appendix AA for FY 2022.

Detailed hospital statements of operations, margin data, and various liquidity and solvency ratios are provided in Appendices H, I, N, and O.

#### **Operating Gains/Losses**

- Statewide operating margin, or the gains or losses from patient care and related sources, fell to -1.3% from 2.2% in FY 2021.
- Statewide, hospitals had operating losses in FY 2022 of \$206.6 million compared with gains of \$333.1 million in FY 2021, due to operating expenses rising faster than revenues (**Figure 1**).
- Seventeen hospitals reported positive operating margins; while there were 19 in FY 2021.
- Operating margins ranged from a high of 9.4% at Stamford Hospital to a low of -45.8% at Sharon Hospital.
- Stamford Hospital earned the most (\$70 million) followed by Hartford Hospital (\$38.8 million), while the biggest losses were experienced by Yale New Haven Hospital (-\$223.7 million) and John Dempsey Hospital (-\$133.9 million).
- Hospitals that improved the most financially from FY 2021 were Rockville General Hospital (-52.8% to -1.5%) and John Dempsey Hospital (-35.8% to -21.7%), while margins dropped the most at Johnson Memorial Hospital (-2.0% to -20.2%) and Waterbury Hospital (8.0% to -3.7%).

#### Non-Operating Gains/Losses

- Non-operating revenue, or revenue from sources unrelated to patient care such as investments and gains from affiliates or joint ventures, resulted in a \$308.6 million loss, compared with a \$1.1 billion gain in FY 2021, due in large part to losses in the financial markets.
- John Dempsey Hospital reported the largest amount (\$68.3 million) of non-operating revenue followed by CT Childrens Medical Center (\$7.4 million) in FY 2022.
- There were eighteen hospitals that had negative non-operating revenue ranging from -\$241 million (Yale New Haven Hospital) to just -\$35,000 (Sharon Hospital) in FY 2022. For comparison, four hospitals had negative non-operating revenue in FY 2021.
- Non-operating revenue for John Dempsey Hospital in FY 2022 primarily represents transfers from the University of Connecticut Health Center for personnel costs, operational support, and COVID relief funds.<sup>6</sup>

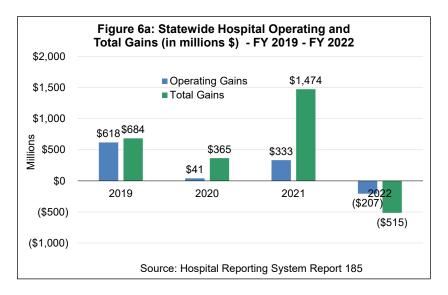

#### Total Gains/Losses

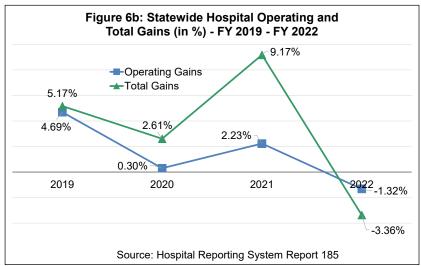

- Statewide total margin, that is operating gains/losses plus non-operating gains/losses, decreased to -3.4% from 9.2% in the previous fiscal year, due primarily to losses in non-operating revenues, and expenses that rose at a higher rate than operating revenues (**Figure 1**).
- Hospitals had combined losses from providing care and from non-operating activity of \$515 million in FY 2022, compared with gains of \$1.47 billion in FY 2021.
- Thirteen hospitals reported positive total margins; there were 20 in the previous fiscal year.
- Total margins ranged from a high of 12.1% at Windham Community Memorial Hospital, to a low of -45.9% at Sharon Hospital.
- Stamford Hospital had the highest gain (\$55.5 million) followed by CT Children's Medical Center (\$43.6 million), while Yale New Haven Hospital (-\$464.3 million) and John Dempsey Hospital (-\$65.6 million) had the most significant losses.
- Hospitals that were the most financially improved in total margin were Rockville General Hospital (-74.9% to 3.9%) and John Dempsey Hospital (-27.3% to -9.6%), while margins dropped the most at William W. Backus Hospital (26.0% to -4.7%) and Yale New Haven Hospital (11.9% to -13.2%).

<sup>&</sup>lt;sup>6</sup> As a government entity, UCONN Health Center reports COVID relief funds in the non-operating section of their AFS.

**Figures 6a** and **6b** show trends in dollars (\$) and percentages (%) for statewide hospital operating and total gains for FY 2019 to FY 2022. After rising in FY 2021, operating gains reversed course in FY 2022 due to operating expenses that rose faster than operating revenues.

Total statewide gains (or losses), which includes non-operating revenue, and which had been steadily increasing over the last several years, decreased in FY 2022 due to significant losses in non-operating revenues earned by many of the hospitals. (For information on hospital/health system performance, please see "Hospital System Performance" beginning on page 13.)

#### **Five Year Financial Performance**

**Table 2** and **Figure 7** provide FY 2022 and five-year average total margins for Connecticut's acute care hospitals. Key findings are listed below.

#### **Positive Margins**

- Most (21 of 27) hospitals achieved positive five-year average total margins.
- Nine hospitals sustained positive total margins in each of the five years, while seven additional hospitals had positive total margins in four of the five years. For the nine:
  - The majority (8 out of 9) had a five-year average margin that exceeded the statewide average of 3.87%.
  - All were medium to large hospitals with most having over 180 licensed beds, over 35,000 patient days, over 6,000 discharges, and over 53,000 ED visits.

#### **Negative Margins**

- Six hospitals (Bristol Hospital, John Dempsey Hospital, Norwalk Hospital, Rockville General Hospital, Saint Vincent Medical Center, and Sharon Hospital) had negative five-year average total margins over the period FY 2018 to FY 2022. Bristol Hospital, John Dempsey Hospital, Rockville General Hospital, and Sharon Hospital (4 of 6) all had a negative five-year average total margin last year too.
- Sharon Hospital had negative total margins in all five years while Bristol Hospital, John
  Dempsey Hospital and Rockville General Hospital had a negative margin in four of the five
  years, Saint Vincent's Medical Center had a negative margin in three of the five years, and
  Norwalk had a negative margin two of the five years.
- Fourteen hospitals had a negative total margin in FY 2022, an increase compared to seven hospitals having a negative margin in FY 2021.

With the exception of St. Vincent's Medical Center, the other five hospitals were small/medium sized, with less than 366 licensed beds, patient days of less than 50,000, discharges of less than 10,000, and emergency department visits of less than 44,000.

#### Margin Changes

- Two hospitals (John Dempsey Hospital and Rockville General Hospital) improved their total margins by more than 10% in FY 2022.
- Thirteen hospitals reported decreases in other operating revenue, while six reported increases in non-operating revenue.
- There were four hospitals (John Dempsey Hospital, Manchester Memorial Hospital, Rockville General Hospital, and Windham Community Memorial Hospital) with higher total margins in FY 2022 than in FY 2021.

STATEWIDE (Note 3)	3.87%	5.92%	5.17%	2.61%	9.17%	-3.36%			
Median (Note 4)	3.43%	4.74%	5.59%	2.56%	8.36%	-1.01%			

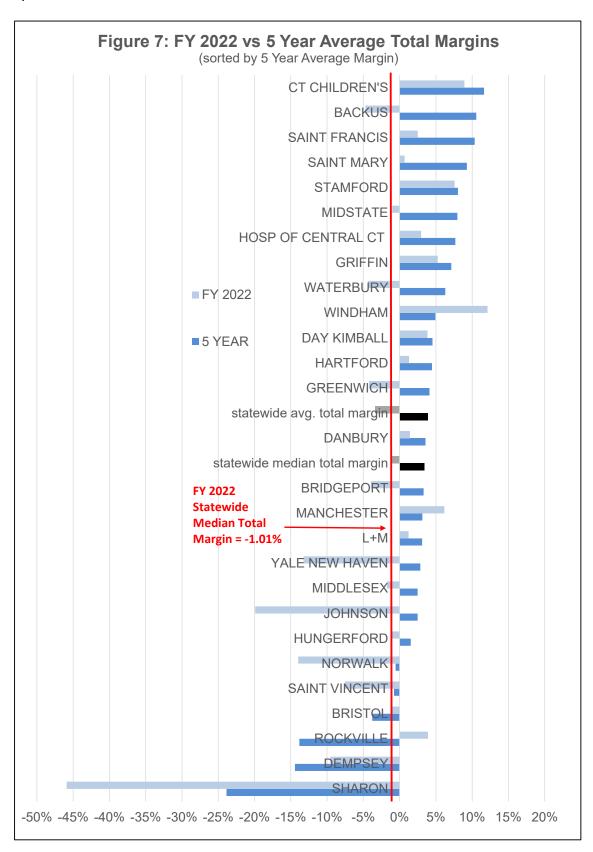

Note 1: Bristol Hospital's FY 2019 and FY 2020 total margin was the result of adjustments for the settlement of pensions.

Note 2: Middlesex Hospital's FY 2018 total margin was the result of a one time adjustment for the settlement of pensions.

Note 3: Weighted average by dollar amounts. Revenue in excess of expenses/(revenue from operations+(revenue in excess of expenses - gain/loss from operations)).

Note 4: Middle margin in numerical order.

**Figure 7** shows the five-year average total margins for hospitals along with the FY 2022 total margin for each hospital.

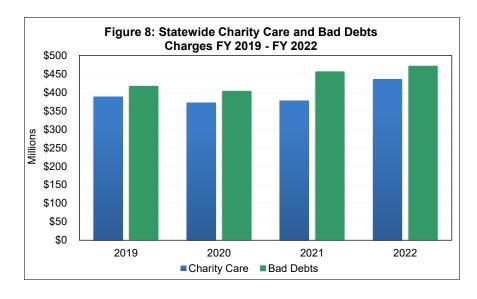

#### **Uncompensated Care**

Uncompensated Care ("UC") is the sum of charity care (free care) and bad debt (unpaid charges). **Figure 8** shows the statewide trend for total charity care and bad debt charges over the last four years. Key findings are listed below.

- The majority of hospitals (18 out of 27) experienced increases in UC, while 9 hospitals experienced decreases.
- Statewide hospital UC rose by \$73.2 million (or 8.8%) to \$907.4 million in FY 2022. More than half (63%) of hospitals experienced increases in FY 2022.
- Total statewide bad debt increased by \$15.1 million (or 3.3%) to \$471.5 million.
- Total statewide charity care increased by \$58 million (or 15%) to \$435.9 million<sup>7</sup>.
- Bad debt as a percentage of total hospital UC charges decreased slightly from 54.7% last year to 52% in FY 2022.
- Conversely, charity care as a percentage of total UC charges increased slightly from 45.3% in the prior year to 48% in FY 2022.
- More than half of the hospitals (17) experienced an increase in the amount of charity care provided to patients.
- Bad debts increased at 19 hospitals (70%) in FY 2022. Sharon (130%) and Danbury (72%) experienced the largest increases, while Waterbury (-61%) and Yale (-38%) experienced the biggest decreases.
- Statewide UC costs totaled \$285.4 million, an increase of \$24.9 million (or 9.6%), from FY 2021.
   UC costs are the actual expense of providing the uncompensated care while the charge amounts is the amount billed to a patient.
- Statewide UC cost continued to account for about 2.0% of total statewide hospital expenses in FY 2022.

Appendix P of this report provides the trends for hospitals' uncompensated care for FY 2019 to FY 2022.

<sup>&</sup>lt;sup>7</sup> Based on documents filed by hospitals as part of their Twelve-Month Filings.

\_

#### **Health Systems Financial Performance**

Hospital corporate systems include hospital parent corporations and all subsidiaries. Appendix Z provides information on the composition of all health systems in Connecticut. **Table 3** shows a summary of statewide health system revenue and expenses over the last four years. Details by health system can be found in Appendix A. Key findings are listed below.

#### Revenue & Expenses

- Statewide net patient revenue ("NPR") was approximately \$16.6 billion and accounted for 88% of operating revenue in FY 2022.
- NPR increased by 6% (\$953 million) from FY 2021.
- Other operating revenue rose 9.6% (\$194 million).
- Operating expenses rose 8.8% (\$1.6 billion) to \$19.6 billion from the previous year.
- There were non-operating losses of \$120 million compared with gains of \$1.5 billion in FY 2021, due mostly to weakness in financial markets.
- Since FY 2019, total operating revenues have increased by \$3.5 billion (23%) while operating expenses have climbed by \$4.3 billion (28%).

#### Operating Gains/Losses

 Statewide operating margins were negative in FY 2022 and decreased to -3.82% from -1.63% in FY 2021.

- Statewide operating losses totaled \$719.4 million, which is greater than the \$289 million loss in the previous year due to higher operating expenses in FY 2022.
- Four of twelve systems (33%) reported positive operating margins; there were eight that reported positive operating margins in FY 2021.
- Total operating margins ranged from a high of 3.6% at CCMC Corporation Inc. to a low of -42.3% at UCONN Health Center.
- Hartford HealthCare had the largest operating gain (\$60.7 million), followed by CCMC Corporation Inc. (\$21.3 million); while the biggest losses were at UCONN Health Center (-\$443.7 million<sup>8</sup>) and Yale New Haven Health Services (-\$234 million).
- Systems that improved the most financially from FY 2021 to FY 2022 were UCONN Health Center (-64.7% to -42.3%) and Middlesex Health System, Inc. (-2% to -0.2%), while margins dropped the most at Trinity Health of New England, Inc. (2.1% to -2.6%) and Yale New Haven Health Services (0.7% to -3.9%).

<sup>&</sup>lt;sup>8</sup> Loss is due to the reported high costs associated with teaching and patient services.

#### Non-Operating Gains / Losses

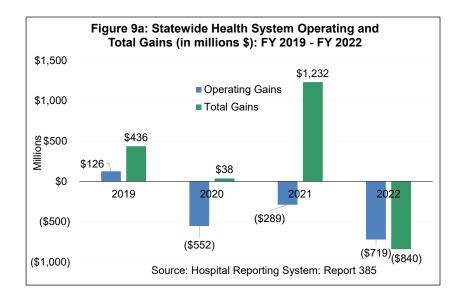

- Systems had \$120.2 million in losses resulting from non-operating revenues, compared to a \$1.5 billion gain in FY 2021.
- Two systems had positive non-operating revenue amounts in FY 2022; compared to eleven in the previous year. Yale New Haven Health Services had the largest losses in non-operating revenue (-\$331.8 million) followed by Hartford Healthcare (\$97.6 million).
- UCONN Health Center (\$461.6 million) and Prospect CT (\$4.9 million), had the largest non-operating revenue amounts.
- Notably, one system, UCONN Health Center, received over \$444 million in state and capital
  appropriations and COVID revenues which affected the statewide totals.

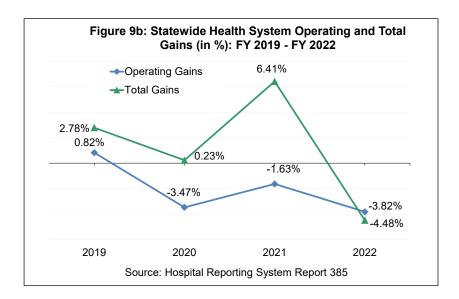

#### **Total Gains/Losses**

- Total margin statewide fell to -4.48% from 6.41% in FY 2021.
- Systems had combined losses from providing care and from non-operating activity of \$839.6 million in FY 2022, compared with gains of \$1.23 billion in FY 2021.
- Two systems reported positive total margins compared to nine systems in the previous year.
- Total margins ranged from a high of 1.2% at UCONN Health Center to a low of -9.9% at Bristol Hospital and Healthcare Group.
- UCONN Health Center had the highest gains (\$17.8 million) followed by Griffin Health Services Corporation (\$964,000). The biggest system losses were at Yale New Haven Health Services (-\$565.9 million) and Trinity Health of New England, Inc. (-\$78.7 million).
- Systems that improved the most financially were UCONN Health Center (-19% to 1.2%) and Prospect CT (-4.2% to -2.5%), while margins dropped the most at Yale New Haven Health Services (10.1% to -9.9%) and CCMC Corporation Inc (13% to -1.3%).

Detailed health system statement of operations, margin data, and various liquidity and solvency ratios are provided in Appendices A, B, F, and G.

**Figures 9a and 9b** show the trends for statewide health systems operating and total gains and margins for FY 2019 to FY 2022. Health Systems' operating gains and total gains, which includes gains from hospitals, fell significantly in FY 2022 due to both operating losses and losses in non-operating revenues. See **Figure 11** for the sources of gains and losses.

#### **Hospitals and Healthcare Cost Growth**

OHS is implementing the Cost Growth Benchmark Initiative with the goal to slowing the growth of healthcare spending and making healthcare more affordable for Connecticut residents and employers. Between 2020 and 2021, at 6.0%, the year-to-year growth in per person healthcare spending in CT exceeded the benchmark of 3.4%, driven primarily by an 18.8% increase in the per person spending for the commercially insured. Notwithstanding the performance of individual hospitals and health systems in the state, hospital services were the most significant contributors to the commercial trend, specifically, per person spending for hospital outpatient and inpatient services grew 33.1% and 20.1%, respectively. The other significant contributor to the commercial trend was professional physician services which saw a 22.0% growth in per-person spending (See **Figure 10** below).

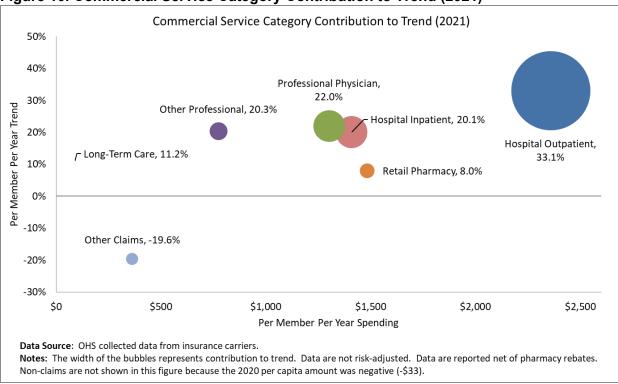

Figure 10. Commercial Service Category Contribution to Trend (2021)

\_

<sup>&</sup>lt;sup>9</sup> Governor Lamont's Executive Order No. 5, codified in C.G.S.19a-754h, requires OHS to implement healthcare cost benchmark for annual increases in per person health care spending. OHS is also required to prepare and report spending and trends on total health care expenditure and major service category spending by state, market, payer and subpopulations.

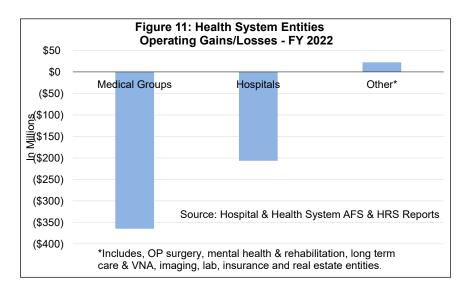

<sup>10</sup> Office of Health Strategy (March 2023). Healthcare cost growth benchmark and primary care spending target initiatives - 2020 and 2021 performance. <a href="https://portal.ct.gov/-/media/OHS/Cost-Growth-Benchmark/2020-2021-Benchmark-Report/OHS-Cost-Growth-Benchmark-Final-Report-PY2020-and-PY2021-3-30-2023.pdf">https://portal.ct.gov/-/media/OHS/Cost-Growth-Benchmark-Final-Report-PY2020-and-PY2021-3-30-2023.pdf</a>.

#### **Health System Affiliates and Subsidiaries**

A health system is comprised of entities that include hospitals, hospital subsidiaries, and other related affiliates. Subsidiaries and other related entities such as medical groups, imaging and surgical centers, and visiting nurse associations (VNA's) are entities that are under a health system parent organization. Some examples of health systems in CT are Hartford Healthcare, Trinity Health of New England, and Yale New Haven Health Services which all have many entities under their corporate umbrella.

**Figure 11** summarizes operating gains and losses for health system entities. Additional revenue and expense data related to health systems, hospitals, and other related affiliates can be found in Appendix W. Key findings are listed below.

- Hospital operating revenues accounted for the majority (83%) of total health system operating revenues.
- System affiliates such as medical groups and physician practices, insurance companies, imaging and rehabilitation centers, visiting nurse associations, and real estate companies account for the remaining 17% of operating revenues.
- Medical groups and physician practice affiliates account for significant health system losses.
- Affiliates that had a minimal direct impact on operating gains and losses include those that specialize in providing insurance, imaging, outpatient surgeries, mental health and rehabilitation, long term care and visiting nurse associations, real estate, and lab services.

### **New Hospital Affiliation Activity**

Since the last publication of this report in September 2022, no affiliations have been completed in Connecticut.

A complete list of the Connecticut acute care hospitals that operate within larger systems and unaffiliated hospitals is provided in Appendix Y.

#### Section 3 - Hospital and Health System Data

The following sections provide an aggregate statewide profile of hospital parent corporations and hospital summary totals for financial and statistical indicators. In addition, profiles are presented for individual Connecticut acute care hospitals. The final section of this report contains detailed appendices by hospital and parent corporations as identified in the Table of Contents. Unless otherwise indicated, the sources of data used in these sections are the OHS Hospital Reporting System ("HRS") and the hospitals' annual filings to OHS.

In the following pages, financial measures noted in green are favorable compared to the statewide average while financial measures noted in red are unfavorable compared to the statewide average. In some cases, the FY 2022 amount and the statewide average show the same amount. The red and green formatting is based on additional decimal spaces that are not shown.

#### **Statewide Health System Summary**

Reported below is the total Statewide Health System statement of operations summary for FY 2019 - FY 2022, a summary of profitability margins, net assets, and selected liquidity and solvency measures. 11

STATEWIDE HEALTH SYSTEM STATEMENT OF OPERATIONS DATA	FY 2019	FY 2020	FY 2021	FY 2022

#### William W. Backus Hospital

The William W. Backus Hospital is located in Norwich. In FY 2022, the Hospital generated \$3.1 million in income from operations and experienced a non-operating loss of \$22.4 million, resulting in a deficiency of revenues over expenses of \$19.3 million. Reported below is a list of various financial indicators and selected utilization measures for the Hospital. A chart indicating all of the affiliates of the Hospital's parent, Hartford HealthCare Corporation, based on OHS filings, can be found in Appendix Z.

#### **Lawrence + Memorial Hospital**

YALE-NEW HAVEN HEALTH SERVICES CORP.

Lawrence + Memorial Hospital is located in New London. In FY 2022, the Hospital generated \$8.4 million in income from operations and experienced a non-operating loss of \$2.7 million, resulting in an excess of revenues over expenses of \$5.7 million. Reported below is a list of various financial indicators and selected utilization measures for the Hospital. A chart indicating all of the affiliates of the Hospital's parent, Yale New Haven Health Services, based on OHS filings, can be found in Appendix Z.

STATEMENT OF OPERATIONS DATA	FY 2019	FY 2020	FY 2021	FY 2022	
Net Patient Revenue	\$4,554,323,000	\$4,464,187,000	\$5,068,948,000	\$5,389,907,000

#### **MidState Medical Center**

HARTFORD HEALTHCARE CORPORATION

MidState Medical Center is located in Meriden. In FY 2022, the Hospital generated \$500,000 in income from operations and experienced a non-operating loss of \$4.1 million, resulting in a deficiency of revenues over expenses of \$3.6 million. Reported below is a list of various financial indicators and selected utilization measures for the Hospital. A chart indicating all of the affiliates of the Hospital's parent, Hartford HealthCare Corporation, based on OHS filings, can be found in Appendix Z.

Source: IRS 990 Schedule J filed with OHS in August 2023.

Positions indicated are for any President or CEO of the hospital or health system. If a health system President or CEO was identified, the position was indicated with the hospital with

the largest revenues.

Data presented is for active positions in the IRS 990. Positions listed as former Directors, President, or CEO were not provided unless there was no replacement for the person that left.

\*\*Neither Day Kimball Hospital's IRS 990 or HRS Reports 19A or 19B provide a name for the President or CEO position.

\*\*John Dempsey Hospital doesn't have an IRS 990 as a government entity. No President or CEO was listed on HRS Report 19A or 19B.

\*\*\*The Trinity Hospitals IRS 990's lists all three of the names above as CEO. OHS internal records were used to determine President and CEO.

\*\*\*Prospect Hospitals are for-profit and don't have an IRS 990 so HRS Report 19A and 19B was used. The CEO Business Unit position is paid by both Manchester Memorial and Rockville General Hospital with a 70/30 split.

## Appendix AB - Glossary of Terms

**Average Payment Period:** the average number of days that are required to meet current liabilities. A lower number of days is favorable, since it indicates a more favorable liquidity position.

**Bad Debts:** the income lost to the hospital because patients who were billed and from whom payment was expected did not pay amounts owed to the hospital for services provided. Bad debts net of recoveries will result in bad debt expense, if after reasonable collection efforts are made, the hospital determines that the accounts are uncollectible.

**Case Mix Index:** the arithmetic mean of the Medicare diagnosis related group case weights assigned to each inpatient discharge for a hospital during the fiscal year. The case mix index is calculated by dividing the hospital's total case mix adjusted discharges by the hospital's actual number of discharges for the fiscal year.

**Cash Flow to Total Debt Ratio:** an indicator of potential future debt repayment difficulty or insolvency. It is calculated by dividing excess of revenues over expenses plus depreciation by current liabilities plus long-term debt. A decrease in the value of the ratio may indicate a future debt repayment problem.

**Charity Care:** the difference between the hospital's published charges and the amount of reimbursement received for services provided to patients from whom reimbursement was not expected. Charity care does not include bad debts, courtesy discounts, contractual allowances, self-pay discounts, and charges for health care services provided to employees.

**Current Ratio:** the measure of the number of dollars held in current assets per dollar of current liabilities. High values imply a good ability to pay short-term obligations and low values imply a lesser ability.

**Days Cash on Hand:** the average number of days of cash available to pay for expenses that is maintained in cash accounts. A higher number is favorable, since it indicates a greater ability to meet outstanding obligations.

**Days in Patients Accounts Receivable:** the average number of days in collection that patient accounts receivables remain outstanding. A lower number is favorable, since it indicates good collection practices that result in sufficient cash flow and infrequent short-term financing.

**Equity Financing Ratio:** the ratio related to capital structure that indicates the percentage of net assets to total assets. A higher ratio is more favorable, since it indicates utilization of a higher level of equity and a lower level of debt financing in acquiring plant and equipment assets.

**Excess** / (**Deficiency**) of **Revenue over Expenses**: the difference between the sum of total operating revenue and non-operating revenue less total operating expenses that results in an excess or deficiency of total revenue.

**Gross Patient Revenue** – total gross patient charges for all patient services before deductions for allowances, charity care and other deductions.

**Hospital Parent Corporation:** the hospital's corporate holding company that controls through its governing body a hospital and the hospital's affiliates, as presented on the legal chart of corporate structure.

**Income / (Loss) from Operations:** the difference between total operating revenue and total operating expenses that results in a financial gain or loss from operating activities.

**Long-Term Debt to Capitalization Ratio:** the measure of the proportion of Long-Term Debt in a capital structure. A lower proportion or percentage is desirable because it allows for obtaining of more favorable terms (i.e., lower interest rates) when borrowing.

**Medicaid:** the federal and state health insurance program established under Title 19 of the Social Security Act to provide medical assistance on behalf of families with dependent children and for aged, blind or disabled whose income and resources are insufficient to meet the costs of necessary medical services, and which is administered by the Department of Social Services.

**Medical Assistance:** the programs for medical assistance provided under the Medicaid program, including the HUSKY Plan A, or (B) any other state funded medical assistance program, including the Husky Plan, Part B.

Medicare: the federal health insurance program for the aged and disabled.

## Appendix AB - Glossary of Terms

**Net Assets:** the residual amount of total assets after all current and long-term liabilities (including long-term debt) are deducted. Also referred to as ownership equity.

**Net Patient Revenue:** the total gross revenue from patient charges less contractual allowances, less the difference between government charges and government payments, less charity care and less any other allowances.

**Non-Governmental:** any commercial or private payer and includes but isn't limited to managed care organizations, health maintenance organizations, and preferred provider organizations.

**Non-Operating Revenue:** the unrestricted revenue not directly derived from providing patient services but obtained from either investment revenues or philanthropic and non-philanthropic sources.

**Operating Expenses:** the expenses necessary to maintain regular operating functions and to carry out ongoing activities.

Operating Gains / Losses – see Income / Loss from Operations

**Operating Margin:** the ratio related to profitability indicating the percentage of gain or loss from operations to total revenue. A higher positive ratio indicates more favorable operating results.

**Operating Revenue:** the total net patient revenue from reimbursement of patient services by government and non-government payers plus other operating revenue.

Other Medical Assistance: the difference between Medical Assistance and Medicaid.

**Other Operating Revenue:** the non-patient service operating revenue that is obtained from operating activities but is accounted for separately from patient service revenues. Other operating revenue includes revenues restricted by a donor or grantor for operating purposes, and also net assets released from restrictions.

**Payer Mix:** the proportion of each government or non-government payer's reimbursement to the hospital's total reimbursement for patient services. Payer mix is derived by determining the amount of total gross patient revenue or total net patient revenue that the hospital receives from each government and non-government payer.

**Payment to Cost Ratio:** the ratio that indicates the percentage above or below cost that a hospital is reimbursed by a government or non-government payer. A ratio that is higher than 1.00 is favorable, since it indicates reimbursement by a payer that is greater than the cost of providing patient services. A ratio that is less than 1.00 is unfavorable, since it indicates reimbursement by a payer that is less than the cost of providing patient services.

**Ratio of Cost to Charges:** the ratio that indicates the percentage of total operating expense to the total of gross patient charges plus other operating revenue. A lower ratio is more favorable, since it indicates a greater difference between the cost and charges billed for providing patient services.

Total Gains / Losses - see Excess / (Deficiency) of Revenue over Expenses definition above.

**Total Margin:** the ratio related to profitability indicating the percentage of gain or loss from operations and non-operating revenue to total revenue. A higher positive ratio indicates more favorable results.

**Uncompensated Care:** the total amount of the hospital's charity care and bad debts resulting from unreimbursed patient services that are determined by using the hospital's published charges and consistent with the hospital's policies regarding charity care and bad debts.

**Uncompensated Care Cost:** the total amount of the hospital's charity care and bad debts at charges multiplied by the hospital's ratio of cost to charges.

Uninsured: individuals with no health insurance for the hospital services provided.

**Unrestricted Net Assets:** the amount of net assets that is not restricted by donors or by a board of directors as to their use.
