Re: Top 10 Outpatient Prescription Drug list

Consistent with Conn. Gen. Stat. § 19a-754b(d), the Office of Health Strategy, in consultation with the Office of the State Comptroller, and Departments of Social Services and Public Health, is tasked with preparing a list of up to ten (10) outpatient prescription drugs that are critical to public health or impose substantial costs to the state.

This list is expected to be posted by March 1st each year, however, due to unforeseen delays, the Office of Health Strategy will be finalizing and posting this list no later than May 1, 2021.

Please do not hesitate to contact our office with any questions at ohs@ct.gov and the subject line as **Prescription Drug Reports**.
