Agenda

Introductions 
Questions for Today’s Discussion 
Discussion 
Adjourn
Today’s Meeting

• Gather final thoughts and recommendations to incorporate into final version

• Walk through model

• Remaining Questions
Considerations from Our Discussions

• Pediatric BH integration along with entire PCM initiative must be applied to all if not most of population

• Work force development will be critical to availability of key functions, including but limited to:
  • Care coordinators
  • Marriage and Family Therapists
  • Psychologists
  • Psychiatrists
  • NPs
  • Social workers
  • Community Health Workers
Primary Care Modernization – DRAFT Concept Map for Pediatric Behavioral Health Integration

Option for Video/Telemedicine: Child to Behavioral Health Resource

Psychiatrist

Extended Therapy and Medication

Psychologist/Nurse Practitioner/Social Worker³

Extended therapy/counseling & extensive evaluation

Brief Intervention²

Screening & Assessments¹

Child/ Family & Pediatrician¹

Training for all Pediatric Practice Team Members

Capacity for Pediatrician to consult with Psychiatrist (eConsults)

¹Includes health promotion and prevention
²performed by pediatric provider or integrated BH provider
³includes licensed psychologists, LICSW, marriage and family therapists

Pediatric Practice manages all in the blue box

Behavioral Health Care Coordinator helping Child/Family make treatment and Community Connections
Focus on developmental and socioemotional health promotion prevention and early identification:

- Routine screening and assessments by pediatric providers and embedded BH practitioners
- Co-location of BH practitioners whenever possible or BH practitioners located in practice “neighborhood”

Screening Recommendations

Ad hoc committee of screening experts approved the required:

- Universal Screening recommendations for screening tools
- Second Stage/Indicated recommendations for screening tools
Topics to be Fully Developed During Implementation

• Team communications strategies
  • How different roles will work collaboratively
  • Capturing information in the EHR

• Outcomes measurement

• Monitoring follow up on referrals and school linkages

• Workforce development timeline
Questions for Discussion

Are we missing any elements of the model?

• Which elements should be implemented first?
• Which elements of the model have a longer lead time?
• Is there anything else that would enhance implementation which should be noted?
Next Steps

• Provide summary recommendations to Practice Transformation Task Force on September 25

• Task Force forwards information to Payment Reform Council
