Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on the consolidated financial statements based on our audits. We did not audit the financial statements of Visiting Nurse Association of Southeastern Connecticut, Inc., a wholly owned subsidiary, which statements reflect total assets of \$22,024,179 and \$20,659,633 as of September 30, 2015 and September 30, 2014, respectively, and total revenues of \$16,957,535 and \$16,156,841 for the years then ended. Those statements were audited by other auditors whose report thereon has been furnished to us, and our opinion expressed herein, insofar as it relates to the amounts included for Visiting Nurse Association of Southeastern Connecticut, Inc., is based solely on the report of the other auditors. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the Corporation's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Corporation's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, based on our audits and the report of the other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Lawrence + Memorial Corporation (the "Corporation") and its subsidiaries at September 30, 2015 and September 30, 2014, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matter

Our audits were conducted for the purpose of forming an opinion on the consolidated financial statements taken as a whole. The consolidating information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the consolidated financial statements. The consolidating information has been subjected to the auditing procedures applied in the audit of the consolidated financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the consolidated financial statements or to the consolidated financial statements themselves and other additional procedures, in accordance with auditing standards generally accepted in the United States of America. In our opinion, the consolidating information is fairly stated, in all material respects, in relation to the consolidated financial statements taken as a whole. The consolidating information is presented for purposes of additional analysis of the consolidated financial statements rather than to present the financial position, results of operations and cash flows of the individual organizations and is not a required part of the consolidated financial statements. Accordingly, we do not express an opinion on the financial position, results of operations, and changes in net assets of the individual organizations.

Lawrence + Memorial Corporation and Subsidiaries

Notes to Consolidated Financial Statements

September 30, 2015 and 2014

1. Significant Accounting Policies and Organization

Organization

Lawrence + Memorial Corporation (the "Corporation") is a not-for-profit organization incorporated under the Nonstock Corporation Act of the State of Connecticut. The Corporation is organized exclusively for public welfare, charitable, scientific, literary and education purposes, including the furtherance of the welfare, programs and activities of Lawrence + Memorial Hospital (the "Hospital"), a nonprofit organization incorporated under the General Statutes of the State of Connecticut.

Yale New Haven Health System Affiliation

On July 17, 2015, the Corporation and Yale New Haven Health System ("YNHHS") announced they have approved a definitive agreement to affiliate, pending regulatory approvals. The definitive agreement, approved by both Boards of Directors, is based on the mutual belief that an affiliation would enhance healthcare quality, access and efficiency. Under the agreement, the Corporation will become a corporate member of YNHHS, joining Bridgeport, Greenwich and Yale-New Haven Hospitals as a full member of YNHHS. The affiliation will require review and approval by Connecticut and Rhode Island state agencies. The process is expected to be completed by Summer 2016. The Corporation incurred approximately \$1.5 million in legal and other professional expenses in connection with due diligence as a result of this agreement which has been recorded as nonoperating expenses within the Consolidated Statement of Operations.

The following entities are subsidiaries of the Corporation: Lawrence + Memorial Hospital ("L+M"), L& M Physician Association Inc., L&M Systems, Inc., VNA of Southeastern Connecticut, L&M Healthcare, L&M Indemnity Ltd, VNA of Southeastern Connecticut Inc. and LMW Healthcare Inc. (Westerly Hospital).

Acquisition of Westerly Hospital

On June 1, 2013, the Corporation and its subsidiary, LMW Healthcare, Inc. ("LMW") completed the acquisition of certain assets and liabilities of Westerly Hospital, a 125-bed general acute care hospital located in Westerly, Rhode Island on a 10.6 acre campus. The acquisition was the culmination of a process that included the appointment of W. Mark Russo, Esq. as the special master (the "Special Master") for Westerly Hospital and its affiliates by the Rhode Island Superior Court for the County of Washington (the "RI Court") in December 2011, due to the deteriorating financial condition of Westerly Hospital. The Special Master was granted authority by the RI Court to negotiate the sale of the assets of Westerly Hospital and its affiliates.

The Corporation formed LMW as a Rhode Island nonprofit corporation, and in June 2012, LMW entered into an Asset Purchase Agreement (the "Purchase Agreement") with the Special Master for Westerly Hospital and its affiliates, which was approved by the RI Court in September 2012. The Corporation guaranteed LMW's commitments under the Purchase Agreement. Pursuant to the Purchase Agreement and upon the successful completion of regulatory review by various Rhode Island agencies, the Corporation acquired certain assets and liabilities of Westerly Hospital and its affiliates, in order to expand its care and operations to the Westerly, Rhode Island community. The acquisition of the Westerly Hospital furthers the Corporation and Lawrence + Memorial Hospital's strategy of improving the depth and breadth of services available to all residents in the eastern Connecticut and western Rhode Island regions, without regard to ability to pay. Lawrence + Memorial Hospital expects to reduce unnecessary duplication of effort and costs with Westerly Hospital, while maintaining community access to essential services in the Westerly service area.

Lawrence + Memorial Corporation and Subsidiaries

Notes to Consolidated Financial Statements

September 30, 2015 and 2014

The purchase price of \$16,098,758 was paid in cash. The transaction resulted in an inherent contribution of \$12,011,469 which has been appropriately allocated to the three net asset classes within the statement of changes in net assets in 2013. The inherent contribution is a result of the value of net assets being acquired exceeding the purchase price. The purchase price allocation was preliminary and has been adjusted as additional information was obtained in 2014. An additional \$5.3 million in inherent contribution was recorded in 2014, principally due to \$3.1 million better experience on accounts receivable collections and \$1.8 million in favorable final settlement of assumed accounts payable liabilities.

L&M Healthcare has an affiliation agreement effective January 31, 1999 (the "Agreement") with the Hospice of Southeastern Connecticut, Inc. (the "Hospice"). The Agreement gives L&M Healthcare a membership of the Hospice with one other not-for-profit healthcare organization. L&M Healthcare does not have an equity investment in the Hospice because the affiliation agreement does not require L&M Healthcare to provide capital to the Hospice and L&M Healthcare is not entitled to any of the net assets of the Hospice should the relationship terminate or the Hospice dissolve. The Corporation and its subsidiaries have never given capital to the Hospice and the Hospice has never made capital distributions to the Corporation or its subsidiaries.

L & M Physician Association, Inc. ("LMPA") was formed exclusively for the charitable purpose of benefiting, supporting, and furthering the charitable activities of Lawrence + Memorial Hospital by engaging physicians to provide physician services to the Hospital, organizations affiliated with the Hospital and communities they serve for purpose of practicing medicine and health care services.

Principles of Consolidation

The consolidated financial statements include the accounts of the Corporation and its wholly owned subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying footnotes. Actual results could differ from those estimates and there is at least a reasonable possibility that recorded estimates will change by a material amount in the near term. The Corporation's significant estimates include the collectability of patient accounts receivable, useful lives of fixed assets, settlements due to third party payors, estimated reserves for self-insurance liabilities, and benefit plan assumptions.

Temporarily and Permanently Restricted Net Assets

Temporarily restricted net assets are those whose use by the Corporation has been limited by donors to a specific time frame or purpose. Permanently restricted net assets have been restricted by donors to be maintained by the Corporation and its subsidiaries in perpetuity or in funds held in trust by others whose purpose is for the funds to be maintained in perpetuity.

Lawrence + Memorial Corporation and Subsidiaries

Notes to Consolidated Financial Statements

September 30, 2015 and 2014

Donor Restricted Gifts

Unconditional promises to give cash and other assets are reported at fair value at the date the promise is received. The gifts are reported as either temporarily or permanently restricted support if they are received with donor stipulations that limit the use of the donated assets. When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, temporarily restricted net assets are reclassified to unrestricted net assets and reported in the statements of operations as net assets released from restrictions. Donor restricted contributions whose restrictions are met within the same year as received are recorded as unrestricted contributions in the accompanying consolidated statements of operations.

Cash and Cash Equivalents

The Corporation and its subsidiaries consider all highly liquid investments with original maturities of three months or less at the date of purchase to be cash equivalents.

Investments

Investments in equity and debt securities are recorded at fair value in the balance sheet. Fair value is generally determined based on quoted market prices where available or net asset values provided by investment managers. Investment income or loss (including realized gains and losses on investments, interest and dividends) is included in the excess of revenues over expenses unless the income or loss is restricted by donor or law. Unrealized gains and losses on investments are included in the change in net assets. Under accounting principles generally accepted in the United States of America, an "other than temporary impairment" is recognized if the Corporation does not expect the fair value of a security to recover above cost or amortized cost. Once an "other than temporary impairment" charge has been recorded, a new cost basis is established.

The Corporation continues to review its securities for appropriate valuation on an ongoing basis. The Corporation determined that none of their investments were impaired as of September 30, 2015 or 2014.

Realized and unrealized gains and losses on donor restricted endowment funds are included in temporarily restricted net assets under State law which allows the Board to appropriate as much of the net appreciation of investments as is prudent considering the Corporation's long and short-term needs, present and anticipated financial requirements, expected total return on its investments, price level trends, and general economic conditions.

Investments in limited liability companies are accounted for using the equity method in instances where the limited partner's interest is more than minor (3-5%).

Fair Value Measurements

Fair value guidance establishes a hierarchy of valuation inputs based on the extent to which the inputs are observable in the marketplace. Observable inputs reflect market data obtained from sources independent of the reporting entity and unobservable inputs reflect the entities own assumptions about how market participants would value an asset or liability based on the best information available. Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs. The guidance describes a fair value hierarchy based on three levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value.

Lawrence + Memorial Corporation and Subsidiaries

Notes to Consolidated Financial Statements

September 30, 2015 and 2014

The following describes the hierarchy of inputs used to measure fair value and the primary valuation methodologies used by the Corporation for financial instruments measured at fair value on a recurring basis. The three levels of inputs are as follows:

- Level 1 Quoted prices in active markets for identical assets.
- Level 2 Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets in active markets, quoted prices in markets that are not active, or can be corroborated by observable market data for substantially the same term of the assets.
- Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets.

Assets Held in Trust by Others

The Hospital has been named sole or participating beneficiary in several perpetual and charitable remainder trusts. Under the terms of these trusts, the Hospital has the irrevocable right to receive the income earned on the trust assets in perpetuity from the perpetual trusts and to receive the remainder of the trust assets for the charitable remainder trusts. For perpetual trusts, the estimated present value of the future payments to the Hospital is recorded at the fair value of the assets held in the trust. The charitable remainder trusts are recorded at the present value of the estimated future distributions expected to be received over the expected term of the trust agreement. The Hospital uses appropriate credit adjusted rates to discount amounts. In 2015 a significant remainder trust payment of \$4 million was received from the estate of a donor in accordance with the terms of the trust documents. At the time of the trust termination, the trust was recorded at \$3.2 million and based on the value of the trust received; \$.8 million was recorded as a change in value of irrevocable trusts on the Hospital's change in temporarily restricted net assets. The release from restriction of the \$4 million for use on operations was recorded on the Corporation's Statement of Operations as all gifts and development activity is recorded at the Corporation.

Assets Limited as to Use

Assets limited as to use include assets set aside by the Board of Directors, contribution receivables and for the established purpose of providing for future improvement, expansion and replacement of plant and equipment. In addition, the Corporation's interest in externally managed trusts, unexpended bond proceeds for construction purposes, and assets held by trustees are also included therein.

Property, Plant and Equipment

Property, plant and equipment are recorded at cost, or if received as a donation, at the fair value on the date received. The Corporation provides for depreciation of property, plant and equipment using the straight-line method in amounts sufficient to amortize the cost of its assets over their estimated useful lives. American Hospital Association lives are generally used and provide for a 2-25 year life for land improvements, 5-50 year life for buildings and a 2-25 year life for equipment. Lease improvements are amortized over the life of the lease.

Nonoperating Gains and Losses

Activities other than in connection with providing health care services are considered to be nonoperating.

Lawrence + Memorial Corporation and Subsidiaries

Notes to Consolidated Financial Statements

September 30, 2015 and 2014

Excess of Revenues Over Expenses

The consolidated statements of operations include nonoperating expenses in connection with the affiliation with Yale New Haven Health Systems in excess of revenues over expenses. Changes in unrestricted net assets which are excluded from excess of revenues over expenses, consistent with industry practice, include unrealized gains and losses on investments, permanent transfers of assets to and from affiliates for other than goods and services, contributions of long-lived assets (including assets acquired using contributions which by donor restriction were to be used for the purposes of acquiring such assets), and pension-related charges other than periodic pension costs and other postretirement benefits liabilities.

Fair Value of Financial Instruments

Investments and other assets and liabilities are carried at amounts that approximate fair value based on current market conditions. The fair value of long term debt is estimated based on the quoted market prices for the same or similar issues or on current rates offered to the Corporation and its Subsidiaries for debt of the same remaining maturities.

Medical Malpractice Self-Insurance

The Corporation purchases claims made professional and general liability insurance to cover medical malpractice claims from L&M Indemnity Ltd, a wholly owned subsidiary of the Corporation. The Hospitals, LMPA and VNA have adopted the policy of self-insuring the tail portion of its malpractice insurance coverage. Management accrues its best estimate of losses as incidents which give rise to potential losses occur.

Income Taxes

The Corporation and its subsidiaries are not-for-profit organizations and are exempt from federal income taxes on related income under Section 501(c)(3) of the Internal Revenue Code, except for L&M Systems. L&M Systems provides for taxes based on current taxable income and the future tax consequences of temporary differences between financial and income tax reporting. Such amounts are not material to the consolidated financial statements.

Inventories

Inventory consists of supplies, both medical and general, pharmaceuticals and food products needed to sustain daily operation of patient care. Inventories are carried at the lower of cost or market under the first-in-first-out (FIFO) method.

Impairment of Long-Lived Assets

Long-lived assets to be held and used are reviewed for impairment whenever circumstances indicate that the carrying amount of an asset may not be recoverable. Long-lived assets to be disposed of are reported at the lower of carrying amount or fair value less cost to dispose.

Accrued Vacation and Sick Pay

Accrued vacation is recorded as a liability as time is earned. As the time is used, the time is relieved from the liability. Accrued sick time is recorded as a percent for employees who have a balance greater than or equal to 800 hours. The payout is only upon termination of employment.

Lawrence + Memorial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
September 30, 2015 and 2014

Labor Action Update

The Hospital's negotiations with two of its three unions, AFT Healthcare, AFT-CT, AFT, AFL-CIO, Local 5049 (registered nurses) and AFT Healthcare, AFT-CT, AFLCIO, Local 5051 (licensed practical nurses and technicians) for a new contract resulted in a 4-day strike that commenced on November 27, 2013. The Hospital brought in temporary replacement workers, and, in order to provide ongoing patient care given the threat of additional, intermittent strikes, had a lockout of employees through December 18, 2013. The lockout was lifted and employees returned to work without a contract being reached. A contract was reached and ratified and the workforce had a three year contract that was signed in February 2014. The Hospital monitored the negative impact of the strike and lockout on both revenues and expenses. This impact consisted of a reduction in net revenue of approximately \$1,900,000 (unaudited) and \$12,300,000 (unaudited) of replacement workers, security and reduced salary costs during 2014.

Subsequent Events

The Corporation has performed an evaluation of subsequent events through January 5, 2016, which is the date the financial statements were issued.

2. Revenues From Services to Patients and Charity Care

The following summarizes net revenues from services to patients:

	2015	2014
Gross charges from services to patients	\$ 1,138,320,863	\$ 1,078,626,933
Less: Charity care	<u>6,124,509</u>	<u>6,782,933</u>
Charges from services to patients, net of charity care	<u>1,132,196,354</u>	<u>1,071,844,000</u>
Deductions		
Allowances	663,929,578	615,856,880
State of Connecticut uncompensated care system	<u>12,801,007</u>	<u>2,458,020</u>
Total deductions	<u>676,730,585</u>	<u>618,314,900</u>
Net revenues from services to patients	<u>\$ 455,465,769</u>	<u>\$ 453,529,100</u>

Patient accounts receivable and revenues are recorded when patient services are performed. Amounts received from most payors are different from established billing rates of the Corporation, and these differences are accounted for as allowances. The State of Connecticut has reduced Uncompensated Care Payments to all hospitals beginning July 2013 for a three year period. In 2014 and 2015, the Corporation paid cash into the State of Connecticut Uncompensated Care Pool that exceeded the amount was received from the State.

Net patient service revenue is reported at the estimated net realizable amounts from patients, third party payors, and others for services rendered, including estimated retroactive adjustments under reimbursement agreements with third party payors. Retroactive adjustments are accrued on an estimated basis in the period the related services are rendered and adjusted in future periods as final settlements are determined. Adjustments related to prior year settlements increased the Hospital's revenues by approximately \$4,119,679 in 2015 and decreased the Hospital's revenue by approximately \$1,584,575 in 2014.

Lawrence + Memorial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
September 30, 2015 and 2014

During 2015 and 2014, approximately 36% and 35%, respectively, of net patient service revenue was received under the Medicare program, and 12% and 11%, respectively, under the state Medicaid program. Laws and regulations governing the Medicare and Medicaid programs are complex and subject to interpretation. The Hospital believes that it is in compliance with all applicable laws and regulations and is not aware of any pending or threatened investigations involving allegations of potential wrongdoing. While no regulatory inquiries have been made, compliance with such laws and regulations can be subject to future government review and interpretation. Non compliance could result in significant regulatory action including fines, penalties, and exclusion from the Medicare and Medicaid programs. Changes in the Medicare and Medicaid programs and reductions of funding levels could have an adverse impact on the Hospital.

The Hospital accepts all patients regardless of their ability to pay. A patient is classified as a charity patient by reference to the established policies of the Hospital. Essentially, these policies define charity services as those services for which no payment is anticipated. In assessing a patient's inability to pay, the Hospital utilizes the generally recognized federal poverty income guidelines.

3. Investments

Investments included in current assets consist of the following:

	2015	2014
Investments		
Cash and cash equivalents	\$ 4,347,663	\$ 6,293,794
Bonds	37,080,980	40,097,819
Mutual funds	39,711,437	72,596,528

Lawrence + Memorial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
September 30, 2015 and 2014

Fair value for Level 1 is based upon quoted prices in active markets that the Corporation has the ability to access at the measurement date. Market price data is generally obtained from exchange or dealer markets. The Corporation does not adjust the quoted price for such assets.

Fair value for Level 2 is based on quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market or can be corroborated by observable market data for substantially the full term of the assets. Inputs are obtained from various sources including market participants, dealers and brokers.

Fair value for Level 3 is based on valuation techniques that use significant inputs that are unobservable as they trade infrequently or not at all and reflect assumptions based on the best information available in the circumstances.

Investments included in Level 3 primarily consist of the Corporation's ownership in alternative investments (principally limited partnership interests in hedge funds). The value of these alternative investments represents the ownership interest in the net asset value ("NAV") of the respective partnership. The fair values of the securities held by limited partnerships that do not have readily determinable fair values are determined by the general partner and are based on appraisals, or other estimates that require varying degrees of judgment. If no public market exists for the investment securities, the fair value is determined by the general partner taking into consideration, among other things, the cost of the securities, prices of recent significant placements of securities of the same issuer, and subsequent developments concerning the companies to which the securities relate. Also included in Level 3 investments are charitable remainder trusts held by third parties which are recorded at the present value of the future distributions expected to be received over the term of the agreement and investments in for-profit companies.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Corporation believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

The following table is a roll forward of the amounts by investment type for financial instruments classified by the Corporation within Level 3 of the fair value hierarchy defined above:

	Beginning October 1, 2014	Investment Income	Realized Gains	Unrealized (Losses) Gains	Investment Fees	Purchases	Sales	Ending September 30, 2015
Investment pool								
Hedge funds	\$ 65,555,889	\$ 458,045	\$ 966,260	\$ (6,421,508)	\$ (295,818)	\$ 20,216,000	\$ (187,009)	\$ 80,291,859
Private equities	4,703,144	667	330,143	534,090	(116,790)	1,821,362	(509,753)	6,762,863
Funds held in trust	11,348,610	102,675	393,314	(22,441)	(51,916)	41,181	(4,178,282)	7,633,141

Lawrence + Memorial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
September 30, 2015 and 2014

There were no significant transfers of assets between levels for the year ended September 30, 2015.

A summary of the investment return is presented below:

	2015	2014
Investment income	\$ 3,232,345	\$ 3,138,334
Realized and unrealized (losses) gains	(12,237,230)	10,268,410
Management fees and other costs	<u>(671,327)</u>	<u>(754,021)</u>
Total return on investments	<u>\$ (9,676,212)</u>	<u>\$ 12,652,723</u>

Following is additional information related to funds whose fair value is not readily determinable as of September 30, 2015.

	Strategy	Fair Value	Number of Investments	Timing to Draw Down Commitments	Redemption Terms	Redemption Restrictions
Equity securities	Global developed and emerging market equity	\$ 32,433,821	2	No remaining commitments	Monthly with 10 day's notice	None
Absolute return	Long/short and long-biased equity and credit hedge funds	18,245,530	2	No remaining commitments	Annual with 90 day's notice	lock up provision of 12 months from the purchase date
Directional hedge	Long/short and long-biased equity and credit hedge funds	25,691,083	1	No remaining commitments	Quarterly with 60 day's notice	lock up provision of 25 months from the purchase date
Commodities	Commodity index	3,713,426	1	No remaining commitments	Monthly with 5 day's notice	None
Private equity	Private equity	6,970,862	9	Long term 5 years	Illiquid	Long Term 5-10 years
		<u>\$ 87,054,722</u>				

None of the funds invested in are finite lived. Unfunded commitments at September 30, 2015 total approximately \$5.5 million and relate to private equity funds. There are no liquidity restrictions in place at September 30, 2015.

4. Endowments

The Corporation's endowments consist of donor restricted endowment funds for a variety of purposes. The net assets associated with endowment funds including funds designated by the Board of Directors to function as endowments are classified and reported based on the existence or absence of donor imposed restrictions.

Lawrence + Memorial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
September 30, 2015 and 2014

The Corporation understands net asset classification guidance to require that donor restricted endowment gifts be maintained in perpetuity. Consistent with net asset classification guidance, the Corporation classifies as permanently restricted net assets (a) the original value of gifts donated to the permanent endowment, (b) the original value of subsequent gifts to the permanent endowment and (c) accumulations to the permanent endowment made in accordance with the direction of the applicable donor gift instrument at the time the accumulation is added to the fund. The remaining portion of the donor-restricted endowment fund that is not classified in permanently restricted net assets is classified as temporarily restricted net assets until those amounts are appropriated for expenditure. The Corporation considers the following factors in making a determination to appropriate or accumulate endowment funds:

- The duration and preservation of the fund.
- The purposes of the Corporation and donor-restricted endowment fund.
- General economic conditions.
- The possible effect of inflation and deflation.
- The expected total return from income and the appreciation of investments.
- Other resources of the Corporation.
- The investment policies of the Corporation.

Changes in endowment net assets for the year ended September 30:

	2015			Total
	Unrestricted	Temporarily Restricted	Permanently Restricted	
Endowment net assets at beginning of year	\$ 10,480,208	\$ 17,497,079	\$ 7,382,529	\$ 35,359,816
Investment return				
Investment income	382,283	105,090	17,103	504,476
Net realized and unrealized gains (losses)	151,631	(1,268,480)	(66,441)	(1,183,290)
Contributions	87,352	-	77,827	165,179
Total investment return	621,266	(1,163,390)	28,489	(513,635)
Income distribution	-	(140,748)	-	(140,748)
Endowment net assets at end of year	\$ 11,101,474	\$ 16,192,941	\$ 7,411,018	\$ 34,705,433

Lawrence + Memorial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
September 30, 2015 and 2014

	2014			Total
	Unrestricted	Temporarily Restricted	Permanently Restricted	
Endowment net assets at beginning of year	\$ 9,257,584	\$ 16,178,222	\$ 7,249,055	\$ 32,684,861
Addition of Westerly Hospital Endowment Net Assets	18,975	-	-	18,975
Investment return				
Investment income	304,778	170,106	20,569	495,453
Net realized and unrealized gains	715,724	1,288,111	32,832	2,036,667
Contributions	183,147	-	80,073	263,220
Total investment return	1,203,649	1,458,217	133,474	2,795,340
Income distribution	-	(139,360)	-	(139,360)
Endowment net assets at end of year	\$ 10,480,208	\$ 17,497,079	\$ 7,382,529	\$ 35,359,816

Endowment funds classified as permanently and temporarily restricted net assets:

The portion of the endowment retained either by explicit donor stipulation or by net asset classification guidance is summarized as follows:

	2015	2014
Temporarily restricted net assets		
Unspent income and appreciation on permanently restricted endowments for purchase of equipment and healthcare services	\$ 16,192,941	\$ 17,497,079
Total endowment funds classified as temporarily restricted net assets	<u>\$ 16,192,941</u>	<u>\$ 17,497,079</u>
Permanently restricted net assets		
Corpus of permanently restricted contributions for which income is to be used for purchase of equipment and healthcare services	\$ 7,411,018	\$ 7,382,529
Total endowment funds classified as permanently restricted net assets	<u>\$ 7,411,018</u>	<u>\$ 7,382,529</u>

Endowment Funds With Deficits

From time to time, the fair value of assets associated with individual donor-restricted endowment funds may fall below the value of the initial and subsequent donor gift amounts (deficit). When donor endowment deficits exist they are classified as a reduction of unrestricted net assets. The Corporation analyzed the endowments and notes there are no deficits as of September 30, 2015 and 2014.

Endowment Investment Return Objectives and Risk Parameters

The Corporation has adopted endowment investment and spending policies that attempt to provide predictable stream of funding to programs supported by the endowment while seeking to maintain the permanent nature of endowment funds. Under this policy, the return objective for the endowment assets measured over a full market cycle shall be to maximize the return against a blended index, based on the endowment's target asset allocation applied to the appropriate individual benchmarks.

Lawrence + Memorial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
September 30, 2015 and 2014

Strategies Employed for Achieving Endowment Investment Objectives

To achieve its long-term rate of return objectives, the Corporation relies on a total return strategy in which investment returns are achieved through both capital appreciation (realized and unrealized gains) and current yield (interest and dividends). The Corporation targets a diversified asset allocation to achieve its long-term objectives within prudent Corporation risk constraints.

Endowment Spending Allocation and Relationship of Spending Policy to Investment Objectives

Spending is guided by several factors most important is the value of the portfolio. Generally, the Board will approve a spending policy limiting annual expenditures for grants and operating expenses up to 4.5% of the value of the Funds' assets based on a 12 quarter rolling average for the endowment, and operating funds.

Investment managers are given ample notice of the required withdrawal schedule. Appropriate liquidity is maintained to fund these withdrawals without impairing the investment process.

5. Temporary and Permanently Restricted Net Assets

Temporarily restricted net assets are available for the following purposes at September 30, 2015 and 2014:

	2015	2014
Temporarily restricted net assets		
Funds held in trust by others	\$ 482,010	\$ 3,799,127
Contributions receivable	20,366	20,366
Free beds and plant replacement and expansion	15,036,239	16,369,376
Specific purpose reserves	4,747,982	4,581,818
	<u>\$ 20,286,597</u>	<u>\$ 24,770,687</u>

Permanently restricted net assets at September 30, 2015 and 2014 are restricted to:

	2015	2014
Permanently restricted net assets		
Funds held in trust by others	\$ 7,172,936	\$ 7,571,288
Donor restricted endowment funds	8,161,020	8,132,530
	<u>\$ 15,333,956</u>	<u>\$ 15,703,818</u>

Lawrence + Memorial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
September 30, 2015 and 2014

6. Property, Plant and Equipment

Property, plant and equipment consists of the following:

	2015	2014
Land and land improvements	\$ 23,444,067	\$ 23,323,273
Buildings	173,682,838	171,045,151
Equipment	<u>293,448,847</u>	<u>284,414,885</u>
	490,575,752	478,783,309
Less: Accumulated depreciation	<u>(297,167,005)</u>	<u>(274,060,791)</u>
	193,408,747	204,722,518
Construction in progress	<u>2,879,995</u>	<u>2,127,781</u>
	<u>\$ 196,288,742</u>	<u>\$ 206,850,299</u>

7. Long-Term Debt

	2015	2014
CHEFA Series F Revenue Bonds		
Various rate bonds, due 2016 to 2026	\$ 28,065,000	\$ 30,900,000
5.0% Term Bonds, due 2027 to 2031	8,705,000	8,705,000
5.0% Term Bonds, due 2032 to 2036	11,100,000	11,100,000

Tax exempt lease	8,302,654	9,963,984
Capital lease obligation	<u>53,360</u>	<u>246,684</u>
Total debt outstanding	106,006,014	111,520,668
Less: Amounts classified as current	5,495,740	5,476,980
Add: Bond premium	<u>2,428,473</u>	<u>2,544,114</u>
Total long-term portion of long-term debt	<u>\$ 102,938,747</u>	<u>\$ 108,587,802</u>

On September 15, 2011 the Connecticut Health and Education Facilities Authority (“CHEFA”) issued \$58,940,000 of Series F Bonds (the “Series F Bonds”) on behalf of the Hospital and Lawrence + Memorial Corporation (collectively referred to as the “Obligated Group” under the Series F Bond agreements). The Series F Bonds are structured with a term bonds due at various dates through July 1, 2036, with annual sinking fund payments due each July 1st. Interest on the Series F Bonds is payable semiannually on the first business day of January 1 and July 1 which began on January 1, 2012.

The tax exempt lease was obtained on June 27, 2013 in the principal amount of \$12,000,000. This is a seven year equipment lease on specific capital purchases that is administered through CHEFA and Bank of America-Merrill Lynch. This lease obligation will be amortized monthly through June 27, 2020 at a nominal annual interest rate of 1.759%.

Lawrence + Memorial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
September 30, 2015 and 2014

On October 10, 2013 Series G was issued in a private placement offering with Bank of America-Merrill Lynch and CHEFA in the amount of \$29,200,000 with an interest rate of 3.20% until October 1, 2023 with an option to extend at a negotiated rate with a maturity date of July 1, 2038.

On November 5, 2013, Series H was issued by CHEFA to refinance Series E. Series H was issued in the amount of \$21,405,000 with a variable rate and a maturity date of July 1, 2034. This bond has a letter of credit guaranteed by T.D. Bank. Interest on the Series H Bonds accrues at the weekly rate and is payable on the first business day of each month commencing January 1, 2014.

Under the terms of the trust indenture for the Series F, G and H Bonds, the Obligated Group is required to meet certain financial covenants including a debt service coverage ratio and days cash on hand ratio. Members of the Obligated Group are jointly and severally obligated to provide amounts sufficient to enable the Authority to pay principal and interest on the Series F, G and H Bonds. The Bonds and bond proceeds have been allocated to the Hospital and as such, the Hospital will make future debt service payments as required under the terms of the bonds.

The bonds may be retired at an earlier date pursuant to terms of the master indenture. Payment of the bonds is collateralized by a pledge of the gross receipts, as defined and certain real property of the Hospital.

The Series H Bonds are considered variable rate demand bonds and are remarketed on a weekly basis. The Hospital maintains a letter of credit in the amount of \$21,405,000 which expires on November 5, 2016. If the bonds are unable to be remarketed, the letter of credit could be utilized to purchase the bonds. The Obligated Group would then be subject to the payment terms of the letter of credit, which are monthly installments. The Series H Bonds have been successfully remarketed in the past and there have been no draws on the letter of credit.

The Corporation had a line of credit with Bank of America-Merrill Lynch for \$13,802,758. This was taken as a bridge loan prior to issuance of Series G private Placement. The proceeds of Series G were used to pay off this line of credit on October 10, 2013. LMW Healthcare had a line of credit with Washington Trust for \$4,860,642. This line was reissued at time of closing but was paid off in November 2013.

The fair value of the outstanding bonds is \$101,550,368 and \$106,215,296 at September 30, 2015 and September 30, 2014, respectively.

Principal repayments on the outstanding long term debt are as follows:

Years	Annual Principal Repayment
2016	\$ 5,495,740
2017	5,730,772
2018	5,916,285
2019	6,142,340
2020 and thereafter	82,720,877
	<u>\$ 106,006,014</u>

Cash interest payments of \$3,495,549 and \$3,566,051 were made in fiscal year 2015 and 2014, respectively. No interest was capitalized during 2015 and 2014.

Lawrence + Memorial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
September 30, 2015 and 2014

8. Pension and Other Postretirement Benefits

The Hospital has a defined benefit plan covering all employees who elected to stay in the Plan. The Plan is frozen to new participants as of June 30, 1999. The benefits are based on years of service and the employee's compensation during the last five years of employment.

The Hospital provides health care and life insurance benefits to its retired employees who meet certain eligibility requirements. The Hospital's policy is to fund the cost of postretirement benefits other than pensions as incurred. This plan was frozen to include only those employees who retired prior to May 1, 1994.

The following table sets forth the Hospital's plans' funded status and amounts recognized in the consolidated balance sheet at September 30, 2015 and 2014 (measurement date of September 30):

	Pension Benefits		Other Postretirement Benefits	
	2015	2014	2015	2014
Change in benefit obligation				
Benefit obligation at beginning of year	\$ 156,674,809	\$ 145,789,789	\$ 837,437	\$ 1,000,744
Service cost	2,141,301	2,402,724	-	-
Interest cost	6,195,482	6,417,121	24,077	29,884
Employee contributions	41,451	69,839	-	-
Benefits paid	(7,608,334)	(7,015,362)	(91,218)	(95,403)
Actuarial (gain) loss	4,414,165	9,010,698	(15,972)	(97,788)
Benefit obligation at end of year	<u>161,858,874</u>	<u>156,674,809</u>	<u>754,324</u>	<u>837,437</u>
Change in plan assets				
Fair value of plan assets at beginning of year	115,176,724	105,860,348	-	-
Actual return on plan assets	(4,147,965)	9,861,899	-	-
Employee contributions	41,451	69,839	-	-
Employer contributions	7,400,000	6,400,000	91,218	95,403
Benefits paid	(7,608,334)	(7,015,362)	(91,218)	(95,403)
Fair value of plan assets at end of year	<u>110,861,876</u>	<u>115,176,724</u>	<u>-</u>	<u>-</u>
Funded status of the plan	<u>(50,996,998)</u>	<u>(41,498,085)</u>	<u>(754,324)</u>	<u>(837,437)</u>
Unrecognized net loss (gain) from past experience different from that assumed and effects of changes in assumptions	55,236,126	41,399,294	(443,280)	(488,085)
Unrecognized prior service cost	4,050	79,157	-	-
Accrued benefit costs recognized in the statements of operations	<u>\$ 4,243,178</u>	<u>\$ (19,634)</u>	<u>\$ (1,197,604)</u>	<u>\$ (1,325,522)</u>
Components of net periodic benefit costs				
Service cost	\$ 2,141,301	\$ 2,402,724	\$ -	\$ -
Interest cost	6,195,482	6,417,121	24,077	29,884
Expected return on plan assets	(8,603,526)	(7,920,200)	-	-
Amortization of net loss (gain)	3,328,824	2,676,330	(60,777)	(66,454)
Net amortization and deferral	75,107	111,153	-	-
Benefit cost	<u>\$ 3,137,188</u>	<u>\$ 3,687,128</u>	<u>\$ (36,700)</u>	<u>\$ (36,570)</u>

The net actuarial loss of approximately \$4.4 million is due to a loss of approximately \$7.5 million due to a change in mortality table offset by gains due to decrease in discount rate and other changes in assumptions.

Lawrence + Memorial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
September 30, 2015 and 2014

The weighted average assumptions used to determine the net benefit cost at the beginning of the year are as follows:

	2015	2014
Discount rate	4.05 %	4.51 %
Average rate of compensation increases	2.50 %	2.50 %
Expected return on assets	7.50 %	7.50 %

The weighted average assumptions used to determine the benefit obligation at the end of the year are as follows:

	2015	2014
Discount rate	4.10 %	4.05 %
Average rate of compensation increases	2.50 %	2.50 %

The Plan's asset allocations as of September 30 are as follows:

Asset Category	2015	2014
Cash	2 %	2 %
Bonds	32	24
Mutual funds	26	45
Hedge funds	40	29
	<u>100 %</u>	<u>100 %</u>

The expected rate of return on plan assets is calculated based on past experience.

Expected benefits to be paid under the Hospital's plans are as follows:

Fiscal Years Beginning October 1,	Expected Benefits
2015	\$ 7,940,500
2016	8,280,197
2017	8,395,891
2018	8,784,310
2019	9,069,440
Expected aggregate for 5 fiscal years beginning 2020	49,712,011

Annual employer contributions are determined by the Hospital based upon calculations prepared by the plan's actuary. Expected contributions to the plans for 2016 are approximately (unaudited):

Pension	\$ 7,940,000
Retiree health	89,642

Lawrence + Memorial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
September 30, 2015 and 2014

The weighted-average annual assumed rate of increase in the per capita cost of covered benefits (i.e., health care cost trend rate) for participants is assumed to be 8.0% in 2015 reducing to 5.0% by the year 2020 and remaining at that level thereafter. This health care cost trend rate assumption has a significant effect on the amounts reported. To illustrate, a one percentage point increase in the assumed health care cost trend rate would increase the accumulated postretirement benefit obligation and service cost plus interest cost by approximately \$49,000 and \$56,000, respectively, at September 30, 2015 and 2014. A one percentage point decrease in the assumed health care cost trend rate would decrease the accumulated postretirement benefit obligation and service cost plus interest cost by approximately \$45,000 and \$51,000, respectively, at September 30, 2015 and 2014.

Plan Assets

The defined benefit plan assets are valued utilizing the same fair value hierarchy as the Hospital's investments as described in Note 1.

The following table summarizes the fair values of investments by major type held by the pension plan at September 30, 2015:

	Level 1	Level 2	Level 3	2015
Investments, at fair value				
Cash	\$ 2,345,782	\$ -	\$ -	\$ 2,345,782
Bonds	35,027,573	-	-	35,027,573
Mutual funds	24,119,636	4,946,910	-	29,066,546
Hedge funds	-	-	44,421,975	44,421,975
Total investments, at fair value	<u>\$ 61,492,991</u>	<u>\$ 4,946,910</u>	<u>\$ 44,421,975</u>	<u>\$ 110,861,876</u>

The following table summarizes the fair values of investments by major type held by the staff pension health plan at September 30, 2014:

	Level 1	Level 2	Level 3	2014
Investments, at fair value				
Cash	\$ 2,417,830	\$ -	\$ -	\$ 2,417,830
Bonds	27,571,791	-	-	27,571,791
Mutual funds	46,557,396	5,171,869	-	51,729,265
Hedge funds	-	-	33,457,838	33,457,838
Total investments, at fair value	<u>\$ 76,547,017</u>	<u>\$ 5,171,869</u>	<u>\$ 33,457,838</u>	<u>\$ 115,176,724</u>

There were transfers between levels during 2015 but no transfers in 2014.

Lawrence + Memorial Corporation and Subsidiaries
Notes to Consolidated Financial Statements
September 30, 2015 and 2014

The table below represents the change in fair value measurements for Level 3 investments held by the plans for the years ended September 30.

	2015	2014
Beginning balances	\$ 33,457,838	\$ 31,893,958
Realized gains	554,617	4,588,368
Fees	(204,757)	(79,614)
Unrealized losses	(3,485,723)	(2,944,874)
Purchases	14,100,000	-
Ending balances	<u>\$ 44,421,975</u>	<u>\$ 33,457,838</u>

The investment objective for the pension and post retirement plans seeks a positive long-term total return after inflation to meet the Hospital's current and future plan obligations.

Asset allocations combine tested theory and informed market judgment to balance investment risks with the need for high returns.

The Hospital's 401(k) plan covers eligible employees who elected to participate. Eligible employees may contribute a percentage of their salary. The Hospital matches 100% of the first 4% of gross pay deferred by employees for those employees who do not participate in the defined benefit plan. Plan contributions charged to operations were approximately \$4,764,785 and \$4,584,389 for 2015 and 2014, respectively.

The VNA has a defined contribution pension plan which covers substantially all of its employees who have met specified age and length of service requirements. Contributions to the Plan are based on 5% of eligible salaries and totaled approximately \$504,943 and \$463,475 for the years ended September 30, 2015 and 2014, respectively.

9. Functional Expenses

The Corporation and its subsidiaries provide general health care services to residents within its geographic location including pediatric care, cardiac catheterization, and outpatient surgery. Expenses by function are as follows:

	2015	2014
Health care services	\$ 347,731,294	\$ 348,719,365
General and administrative	122,555,118	124,868,311
	<u>\$ 470,286,412</u>	<u>\$ 473,587,676</u>

10. Commitments and Contingencies

The Corporation and its subsidiaries are parties to various lawsuits incidental to their business. Management believes that the lawsuits will not have a material adverse effect on their financial position, results of operations, and changes in net assets or cash flows.

January 6, 2016

The Honorable George Jepsen
Attorney General, State of Connecticut
55 Elm St.
Hartford CT 06106

The Honorable Dr. Raul Pino
Acting Commissioner of Public Health
410 Capitol Ave., P.O. Box 340308
Hartford, CT 06134

Dear Attorney General Jepsen and Commissioner Pino:

I write to urge each of your agencies to analyze fully the potential pricing and cost implications of Yale-New Haven Health Services Corporation's proposed acquisition of Lawrence and Memorial Health's operations, including its two acute care hospitals, outpatient facilities and the acquisition of Lawrence and Memorial Physician Association by Yale-New Haven's Northeast Medical Group. The transactions as proposed offer a clear route to the achievement of market power by the applicants, but offer little in the way of protection for consumers.

The recent release of data by a coalition of consumer, health care advocacy and labor organizations deepens my concerns. The report, entitled *Hospital Consolidation in Connecticut: The Impact of Yale-New Haven Health System's Expansion*, describes patterns in hospital acute care inpatient discharge data that suggest that Connecticut's hospital markets are already highly concentrated and that the purchase of L+M by the Yale New Haven Health System will deepen that market concentration along the shoreline, where Yale-New Haven Health System is already a dominant actor.

The concerns raised in the report received powerful validation on December 15, when the National Bureau of Economic Research released the largest study of hospital pricing for privately insured patients in history. Based on 88 million individual records, the study shows definitively that "hospital prices are positively associated with indicators of hospital market power. Even after conditioning on many demand and cost factors, hospital prices in monopoly markets are 15.3% higher than those in markets with four or more hospitals."

I am concerned by the reported remarks of OHCA's spokesperson to the effect that the agency lacks the authority to conduct a cost and market analysis as part of the Certificates of Need for the proposed transaction. In my view, Public Act 14-168 provides more than ample statutory authority for OHCA to request and analyze price data from prior transactions. Although the even more detailed terms of Public Act 15-146 do not apply to the Yale-New Haven/L+M transactions, in 2014 the General Assembly added two new factors that OHCA must weigh in its analysis prior to approval, rejection or modification of a CON involving a change in ownership of a health care facility:

(11) Whether the applicant has satisfactorily demonstrated that the proposal will not negatively impact the diversity of health care providers and patient choice in the geographic region; and

(12) Whether the applicant has satisfactorily demonstrated that any consolidation resulting from the proposal will not adversely affect health care costs or accessibility to health care.

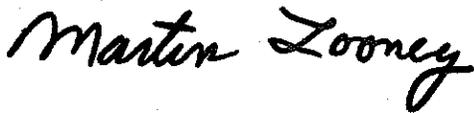

Any satisfactory demonstration that the proposed transactions will not adversely affect health care costs must rebut a presumption of market power, especially in light of heavy market concentration along the shoreline.

Therefore, I urge you to request and analyze data from the applicants on prices charged by the Hospital of St. Raphael before and after its acquisition by Yale-New Haven Hospital, and similar comparative data between current risk-adjusted prices at L+M and the Yale-New Haven Health System hospitals in Bridgeport, Greenwich and New Haven.

OHCA is already engaged in a process of dialogue with Yale-New Haven Hospital regarding the implementation of the plan for integrating St. Raphael's assets and operations into Yale-New Haven's operations. The agency has reviewed multiple CONs based on the asserted need to streamline operations and reduce duplicative services. Given that existing ongoing dialogue, it should be neither time consuming, nor difficult for the agency to request and receive before- and after- pricing information regarding the Hospital of St. Raphael.

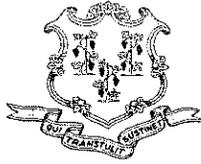

The Attorney General bears responsibility for enforcing the Connecticut Anti-Trust Act. I understand that all information gathered pursuant to enforcement of the act is strictly confidential. However, I urge the Attorney General to investigate these issues as well by requesting and analyzing before-and-after pricing data regarding the Hospital of St. Raphael, and comparative risk-adjusted pricing information from L+M and Yale-New Haven.

Sincerely,

Re: Yale-New Haven Health Services Corporation's Proposed Affiliation with Lawrence + Memorial Corporation

Dear Senator Looney:

On January 11, 2016, the Department of Public Health ("DPH") received your letter concerning the Certificate of Need ("CON") for Yale-New Haven Health Services Corporation's affiliation with Lawrence + Memorial Corporation.

The Office of Health Care Access ("OHCA") works diligently to ensure that all of the guidelines and principles included in Conn. Gen. Stat. § 19a-639, as modified by Public Acts 14-168 and 15-146, are thoroughly evaluated for each certificate of need ("CON") application it receives. With respect to your specific concerns regarding the impact of hospital acquisitions on market prices, please know that OHCA intends on requesting additional information from Yale-New Haven Health Services Corporation in order to analyze the historical impact on pricing as a result of its acquisitions or affiliations with other hospitals in the state.

If you have any further concerns or questions, please feel free to contact Kimberly Martone, Director of Operations for OHCA at (860) 418-7029.

Sincerely,

A handwritten signature in black ink that reads "Janet M. Brancifort".

Karen,

Can you please forward pages 855-860, electronic copy (Excel) of the financial worksheets. Some of the print is too small to read on the paper copy.

Thanks,
Steve

Good morning and Happy New Year Kim-

As per OHCA's completeness letter, I am sending responses to the completeness questions for the above referenced dockets via email. As requested, an Adobe Acrobat and MS Word File is included for each. A cover letter pertaining to each application is also included.

I would appreciate receiving an email confirmation that the documents have been received.

Thank you for your time and attention to this matter.

Sincerely, Karen

Subject: Completeness Letter (2nd) for Docket Number: 15-32033-CON
Attachments: 15-32033 2nd Completeness 2-4-2016.docx

Good afternoon Nancy,

Please see the attached completeness letter (2nd) in the matter of the proposed transfer of ownership of Lawrence+Memorial Corporation to Yale New Haven Health Services Corporation. In responding to the completeness letter questions, please follow the instructions included in the letter and provide the response document as an attachment only (no hard copies required). Please provide your written responses to OHCA no later than **April 4, 2016**.

Email to OHCA@ct.gov and cc: Brian.Carney@ct.gov, Ronald.Ciesones@ct.gov, Steven.Lazarus@ct.gov and Kaila.Riggott@ct.gov.

If you have any questions regarding the completeness letter, please contact Steve Lazarus at (860) 418-7012, Brian Carney at (860) 418-7014 or Ronald Ciesones at (860) 418-7030.

Sincerely,
Brian A. Carney

Ps. Please confirm receipt of this email and corresponding attachment.

RE: Certificate of Need Application: Docket Number: 15-32033-CON
Transfer of ownership of L+M Corporation to Yale New Haven Health Services Corporation
Certificate of Need Completeness Letter (2nd)

Dear Ms. Rosenthal:

On January 5, 2016, responses were received to OHCA's first completeness letter in the above referenced matter. OHCA requests additional information pursuant to Connecticut General Statutes §19a-639a(c). *Please electronically confirm receipt of this email as soon as you receive it.* Provide responses to the questions below in both a Word document and PDF format as an attachment to a responding email. *Please email your responses to each of the following email addresses:* OHCA@ct.gov; brian.carney@ct.gov; ronald.ciesones@ct.gov; steven.lazarus@ct.gov; and kaila.riggott@ct.gov.

Paginate and date your response (i.e., each page in its entirety). Repeat each OHCA question before providing your response. Information filed after the initial CON application submission (e.g., completeness response letter, prefiled testimony, late file submissions, etc.) must be numbered sequentially from the Applicant's preceding document. Begin your submission using **Page 866** and reference "**Docket Number: 15-32033-CON.**"

Pursuant to Section 19a-639a(c) of the Connecticut General Statutes, you must submit your response to this request for additional information no later than sixty days after the date this request was transmitted. Therefore, please provide your written responses to OHCA no later than **April 4, 2016**, otherwise your application will be automatically considered withdrawn.

Phone: (860) 509-8000 • Fax: (860) 509-7184 • VP: (860) 899-1611

Affirmative Action/Equal Opportunity Employer

1. Provide or address the following regarding prices, charges and cost savings as related to this proposal and past Yale New Haven Health Services Corporation (“YNHHSC”) hospital affiliations:
 - a. Explain the impact on prices charged to patients that received health care services at the Hospital of St. Raphael (“HSR”) main and satellite campuses both before and after the acquisition of HSR by YNHHS. Provide a detailed explanation for any increases or decreases in price structure, average pricing and pricing policies following the acquisition.
 - b. Provide a detailed comparison of risk-adjusted prices for health care services currently provided at L+M, Yale-New Haven, Greenwich and Bridgeport Hospitals and provide supporting evidence. Identify any assumptions made in this comparison. Discuss whether and how Greenwich and Bridgeport Hospital’s affiliation with the YNHHS system has provided identifiable benefits to payers and consumers as a result of any changed pricing structure, in the 3 years immediately after these affiliations and at present.
 - c. Describe in detail how the prices for health care services at L+M will be affected following the YNHHS ownership change.
 - d. Discuss in detail and provide the associated dollar amounts for any cost savings achieved at Greenwich Hospital, Bridgeport Hospital and HSR following their affiliation with YNHHS. Specify the timeframes related to any identified cost saving initiatives for the Greenwich and Bridgeport affiliations.
 - e. The response provided several examples where costs will increase (e.g., the fringe benefit package for NEMG employees and additional staff and supplies for an anticipated increase in volume). Complete the table below providing data on the incremental expenses for the first three years of the proposal for the combined health system.

Incremental Expenses of the Affiliation (\$ in millions)	FY 2016	FY 2017	FY 2018

2. Page 26 of the Application indicates YNHHS will commit \$300 million to the proposal, however the response indicated a commitment of \$316 million from the following sources:

\$163 million - L+M base operating cash flows
\$ 68 million - Incremental cash flows from synergies/efficiencies
\$ 85 million - YNHHS
\$316 million

Provide the following as it relates to the \$300 million commitment of YNHHS:

- a) verification of the exact dollar amount of the YNHHS commitment and its funding sources;
 - b) a detailed explanation of the sources of revenue that may be included as part of L+M's base operating cash flows;
 - c) a breakdown of the \$68 million in synergies/efficiencies.
3. It appears from the response on page 624 that YNHHS's \$300 million commitment includes significant contributions from the operations of L+M (approx. \$215 million), while only \$85 million is coming from YNHHS. Provide the following:
- a) Specific details of how L+M's contribution (\$215 million) will be funded, considering the L+M System had operating losses of more than \$36 million in fiscal years (FY) 2013-2015 and only \$35 million in incremental operating gains are projected cumulatively from FYs 2016-2019.
 - b) If L+M is unable to achieve its funding level contribution from operations, how will the balance of the commitment be funded?
4. Has the financial performance (e.g., operating margin) of Bridgeport and Greenwich Hospitals improved as a result of their affiliations with YNHHS? At what point in time after the affiliations in the 1990s did any financial impact (specific to the YNHHS affiliation) begin to occur for these two hospitals? What financial impact on these two hospitals and their patients continues to be experienced as a result of the ongoing affiliation with the YNHHS system? Provide details.

In addition, OHCA is requesting the Applicant provide, if available, the CON application material as filed with OHCA under Docket Number 96-513, related to YNHHS's affiliation with Connecticut Health System, Inc., the former parent corporation of Bridgeport Hospital and the CON application material as filed with OHCA under Docket Number 97-559, related to YNHHS's affiliation with Greenwich Health Care Services, Inc., the parent corporation of Greenwich Hospital. Include the complete application, including any post decision compliance filings and modification application material. (*Note: OHCA is requesting this information because it is unavailable due to State of*

Connecticut record retention laws that require OHCA to discard CON application material after 5 years).

If you have any questions concerning this letter, please feel free to contact Steve Lazarus (860) 418-7012, Ron Ciesones (860) 418-7030 or Brian Carney (860) 418-7014.

State of Connecticut
GENERAL ASSEMBLY
STATE CAPITOL
HARTFORD, CONNECTICUT 06106-1591

January 29, 2016

Honorable George Jepsen
Attorney General
55 Elm Street
Hartford, CT 06106

Honorable Dr. Paul Pino, M.D.
Acting Commissioner of Public Health
410 Capitol Avenue, P.O. Box 340308
Hartford, CT 06134

Dear Attorney General Jepsen and Acting Commissioner Pino,

In conjunction with a recent letter from State Senate President Pro Tempore Martin M. Looney, we are writing to respectfully request that your agency analyze fully the potential pricing and cost implications of Yale-New Haven Health Services Corporation's proposed acquisition of Lawrence and Memorial Health's operations, including its two acute care hospitals, outpatient facilities, and the acquisition of Lawrence and Memorial Physician Association by Yale-New Haven's Northeast Medical Group.

The proposed transactions offer a clear route to the achievement of market power by the applicants, but is less clear in terms of protection for consumers. The recent release of a report entitled, *Hospital Consolidation in Connecticut: The Impact of Yale-New Haven Health System's Expansion*, provide evidence that suggests Connecticut's hospital markets are already highly concentrated. We have great concerns that the purchase of L+M by the Yale-New Haven Health System will deepen that market concentration along the shoreline, where Yale-New Haven Health System is already a dominant actor.

The concerns raised in the report were validated on December 15, 2015, when the National Bureau of Economic Research released its largest study of hospital pricing for privately insured patients in history. The study found, among other things, that hospital prices in monopoly markets are **15.3% higher** than those in markets with four or more hospitals.

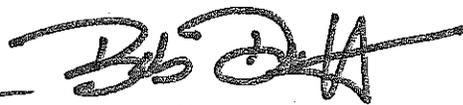

We urge your respective offices to request and analyze data from the applicants on prices charged by the Hospital of St. Raphael before and after its acquisition by Yale-New Haven Hospital, and similar comparative data between current risk-adjusted prices at L+M and the Yale-New Haven Health System hospitals in Bridgeport, Greenwich, and New Haven. We share a responsibility to protect hospital patients, our constituents, from inflated prices in monopoly markets.

Thank you for your attention to this urgent matter. We look forward to hearing from you.

Sincerely,

Catherine A. Osten

Re: Yale-New Haven Health Services Corporation's Proposed Affiliation with Lawrence + Memorial Corporation

Dear Senators Osten, Duff and Winfield:

On January 8, 2016, the Department of Public Health ("DPH") received your letter concerning the Certificate of Need ("CON") for Yale-New Haven Health Services Corporation's affiliation with Lawrence + Memorial Corporation.

The Office of Health Care Access ("OHCA") works diligently to ensure that all of the guidelines and principles included in Conn. Gen. Stat. § 19a-639, as modified by Public Acts 14-168 and 15-146, are thoroughly evaluated for each certificate of need ("CON") application it receives. With respect to your specific concerns regarding the impact of hospital acquisitions on market prices, please know that OHCA has requested additional information from Yale-New Haven Health Services Corporation in order to analyze the historical impact on pricing as a result of its acquisitions or affiliations with other hospitals in the state. Enclosed for your review is a copy of the letter requesting additional information from Yale-New Haven Health Services Corporation.

Re: Docket Number: 15-32033-CON (known as “Affiliation of Lawrence + Memorial Corporation with Yale New Haven Health Services Corporation”);
Docket Number: 15-32032-CON (known as “Proposal for Merger of L&M Physician Association, Inc. and Northeast Medical Group, Inc.”)

Dear Kim:

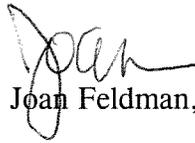

In light of Governor Malloy’s Executive Order No. 51, dated February 25, 2016, I am writing to inform you that the applicants in the above-referenced matters plan to proceed, within the applicable statutory and regulatory framework, to complete the Certificate of Need process as it relates to both applications. In particular, with respect to Docket Number: 15-32033, the applicants will timely submit their completeness questions and await a determination from OHCA that the subject application is complete. Once deemed complete, we expect that OHCA would conduct a hearing and render a decision within ninety (90) days of the date of the application being deemed complete. With respect to Docket Number: 15-32032-CON, it is our opinion that Executive Order No. 51 is inapplicable and thus, this application should proceed as it would have prior to the issuance of the Governor’s Executive Order No. 51.

Finally, with respect to Docket No-32033-CON, I am writing to confirm that OHCA, to the extent that Executive Order No. 51 remains in effect, will deny the application pursuant to Executive Order No. 51 should the application proceed to the point within the regulatory process wherein OHCA is required to render a final decision.

Re: Application for CON, Corporate Affiliation of Yale-New Haven Health Services Corporation and Greenwich Health Care Services, Inc.

Dear Commissioner Gorman:

Enclosed for review by the Office of Health Care Access are an original and five copies of a Certificate of Need application for the proposed affiliation between Yale-New Haven Health Services Corporation (YNHHSC) and Greenwich Health Care Services, Inc. (GHCS). The affiliation is designed to establish a strategic alliance between the two systems, whereby GHCS and its affiliates will become a local network within the health care system being developed by YNHHSC. As part of the affiliation, YNHHSC will become the parent corporation of GHCS.

This proposed affiliation is not a merger. No changes or reorganization of clinical services or beds among separate institutional providers within the YNHHSC system are proposed. In addition, there are no capital expenditures proposed as part of this affiliation.

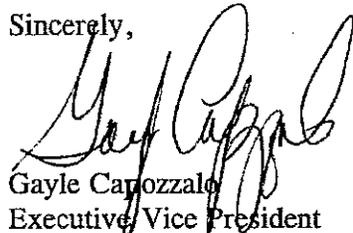

The applicants are submitting this CON Application at the request of OHCA. However, the Applicants have questioned the applicability of the CON requirements to a corporate affiliation among nonprofit health care institutions or affiliates and therefore reserve their rights to challenge any determination that CON approval is required in order to implement the affiliation of Yale-New Haven Health Services Corporation and Greenwich Health Care Services, Inc.

Commissioner Raymond Gorman
September 4, 1997
Page 2

The applicants request that the CON review and approval process be expedited to the greatest extent possible, without the requirement of a public hearing.

If you have any question or concerns, please contact Caroline Piselli at Yale-New Haven Health Services Corporation at 203-785-2609. We look forward to working with you and your staff on this CON.

Sincerely,

Gayle Capozzalo

RE: Affiliation of Yale New Haven Health Services Corporation and
Greenwich Health Care System Letter of Intent

Dear Commissioner Gorman:

We are writing to inform the Office of Health Care Access (OHCA) of a proposed affiliation between Yale New Haven Health Services Corporation (YNHHSC, doing business as Yale New Haven Health System), the parent corporation of Yale-New Haven Hospital and Southern Connecticut Health System, Inc. (SCHS, the parent corporation of Bridgeport Hospital), and Greenwich Health Care System (GHCS, the parent corporation of Greenwich Hospital). The affiliation is designed to establish a strategic alliance between the two systems, enabling these organizations to remain competitive in a changing marketplace by enhancing quality of and access to care while controlling costs. As part of the affiliation, YNHHSC will become the parent corporation of GHCS. The governing boards and financial structures of each system will remain separate as will medical staff appointments and licensure.

This proposed affiliation will not involve the introduction of any new functions or services nor the expansion or termination of any functions or services. There will be no capital expenditures associated with the affiliation.

This letter is submitted as a letter of intent pursuant to section 19a-638 of the Connecticut General Statutes. The CON applicants will be Yale-New Haven Health System and Greenwich Health Care System. The CON application will seek approval as required for the affiliation described above. The hospitals will continue to operate at their present locations in New Haven, Bridgeport and Greenwich, Connecticut.

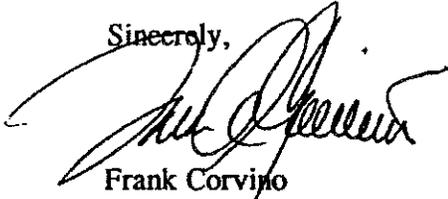

Honorable Raymond J. Gorman
June 5, 1997

000007

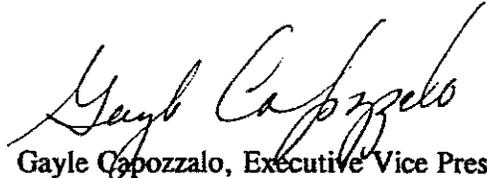

Please forward a copy of the appropriate CON application forms and requests for any additional information to Gayle Capozzalo at Yale-New Haven Health System. The applicants would greatly appreciate the assistance of OHCA in expediting this CON process.

Thank you for your consideration.

Sincerely,

Frank Corvino
President and Chief Executive Officer
Greenwich Health Care System

Gayle Capozzalo, Executive Vice President
Strategy & System Development
Yale-New Haven Health System

CERTIFICATE OF NEED APPLICATION

Affiliations/Mergers

**Office of Health Care Access
410 Capitol Avenue, MS#13HCA
P.O. Box 340308
Hartford, Connecticut 06134**

Names of Applicants: Yale-New Haven Health Services Corporation
Greenwich Health Care Services, Inc.

Name of Proposed Merged Entity Yale-New Haven Health Services Corporation will be the parent corporation in the affiliation, which is not a merger

Names of All Corporate Affiliates to be Merged Not Applicable

(General Instructions: Your response to the questions listed below should identify each Hospital and/or corporate entity where applicable. If the proposed affiliation/merger will not affect the Hospitals in any way, the relevant questions which follow may simply be answered as "Not Applicable".)

1. Each Applicant should complete the Affidavits General Information Sheet included as follows:

a. The corporate parent of each of the two Hospitals should complete the Affidavit entitled "Affidavit". (See Attachment 1)

Please see Attachments 1a and 1b.

b. Each Hospital should complete the Affidavit entitled "Acute Care Hospital Affidavit". (See Attachment 2)

Not applicable. This proposal involves the affiliation of two parent corporations and does not involve the merger of assets or clinical services. In addition, there are no capital expenditures associated with this proposal.

c. Each applicant should complete the General Information Sheet to identify primary and secondary contact people for this application. (See Attachment 3).

Please see Attachments 3a and 3b.

General Information

2. Please describe the proposed merger which should also include the principle reason why the application should be approved. Further, please indicate the effective date of the proposed merger.

Yale-New Haven Health Services Corporation (YNHHSC) and Greenwich Health Care Services, Inc. (GHCS) are pursuing a corporate affiliation whereby GHCS and its affiliates will become a local network within the regional health care system being developed by YNHHSC. This affiliation will enhance the ability of both the regional and local networks to continue their missions centered around serving the health care needs and promoting the health status of people in their communities, within a continually changing health care environment. Through this affiliation, YNHHSC seeks to add an additional local network and thus expand its fully integrated health care delivery system to better serve its

communities. YNHHS provides a complete continuum of care, incorporating a full range of health care services, through its local vertical health care networks in a cost-effective manner measured by service and clinical outcomes.

Under the proposed affiliation agreement, Yale-New Haven Health Services Corporation will become the parent corporation (sole member) of Greenwich Health Care Services, Inc. (GHCS). GHCS is and will remain the parent company (sole member) of The Greenwich Hospital Association ("Greenwich Hospital"). Greenwich Hospital will remain a locally operated full service hospital. In connection with the affiliation, GHCS and Greenwich Hospital will create a foundation to hold and manage its endowment. The endowment will, at all times, be dedicated to use for the benefit of Greenwich Hospital, its affiliates and the Greenwich community.

This corporate affiliation is **not a merger**. As described more fully in the response to question 3, YNHHS will have planning, coordinating and contracting functions and certain specified authority with respect to GHCS. This will support individual organizational flexibility, while providing each local vertical network with the benefits of a regional integrated system. The present organizational structures of YNHHS and its affiliates and of GHCS and its affiliates are presented in Exhibits 1 and 2, respectively. The organizational structure following the proposed affiliation is presented in Exhibit 3.

The proposed YNHHS-GHCS relationship continues the development by YNHHS of a coordinated and integrated regional health care delivery system composed of strong local vertically integrated networks providing high quality, cost-effective health services while successfully operating in a managed care market place.

The developing YNHHS system will assist affiliated providers and local systems to:

- Enhance the position of their local networks in accessing and accepting managed care contracts services for the enrolled population.

- Benefit from centralized managed care services.
- Share technology, services, management and programs to increase operating efficiencies.
- Positively affect the health status of the people and communities served by providing leadership in the promotion of community wellness, health education and accessible preventative health services.
- Collaborate to further develop a continuum of quality health care for the communities served
- Facilitate health care in Connecticut by working with local communities, employers and providers to maintain appropriate access to health education and care.

Each local vertical network within the YNHHS system shall continue its long history of community involvement and shall subscribe to a set of values that includes quality, excellence, education, research, integrity and community service. The YNHHS system will continue to serve patients as the number one priority, working closely with physicians and other health care providers to create an environment which is satisfying and rewarding to its employees.

The effective date of the affiliation will be immediately after CON approval.

- 3. Provide a description of the legal structure, management and governance of each health care facility, including all corporate affiliates. Provide a detailed description of the legal structure, management and governance of the proposed merged entity resulting from the merger. Include an explanation of the anticipated cost savings in your response.**

Both YNHHS and GHCS are non-stock corporations which are tax-exempt under section 501(c)(3) of the Internal Revenue Code. YNHHS and its affiliates are described below.

Yale-New Haven Health Services Corporation
(YNHHSC):

YNHHSC is a Connecticut non-stock, nonprofit, tax-exempt corporation with the primary purpose of supporting Yale-New Haven Hospital. In 1996, YNHHSC became the sole corporate member of SCHS, the parent of Bridgeport Hospital. YNHHSC has been charged with the development of a full service integrated healthcare delivery system.

Yale-New Haven Hospital, Inc.
(YNHH):

YNHH is a Connecticut non-stock, nonprofit, tax-exempt corporation that operates a 900-bed academic medical center that offers a full array of primary to quaternary patient services. YNHH is the primary teaching hospital for the Yale University School of Medicine. YNHHSC is the sole member of YNHH.

Yale-New Haven Ambulatory Services Corporation (YNHASC):

YNHASC is a Connecticut non-stock, nonprofit corporation that operates ambulatory services businesses. YNHHSC is the sole member of YNHASC.

YNHH-MSO, Inc.

YNHH-MSO, Inc. is a Connecticut for-profit corporation that provides administrative and other support services to physician practices. YNHHSC is the sole shareholder of YNHH-MSO, Inc.

York Enterprises, Inc.:

York Enterprises is a Connecticut for-profit company that serves as the parent company of certain for-profit affiliates of YNHHSC. York Enterprises also serves as the network administrator of a pharmacy network. YNHHSC is the sole shareholder of York Enterprises.

Medical Center Realty, Inc. (MCR):

MCR is a for-profit company which owns or holds leases on YNHH-affiliated real estate, such as physician office buildings, commercial space and parking garages. York Enterprises is the sole shareholder of MCR.

Medical Center Pharmacy & Home Care, Inc. (MCP):

MCP is a for-profit company which runs a retail pharmacy with multiple locations. York Enterprises is the sole shareholder of MCP.

Harbor Health Plan, Inc. (Harbor):

Harbor Health Plan is a Connecticut for-profit stock corporation established in 1995 to develop and operate a Medicaid managed care program in Connecticut. YNHHS is the sole shareholder of Harbor.

Century Collections Agency, Inc.

Century Collections Agency is a Connecticut for-profit corporation that provides hospitals and other healthcare providers with comprehensive and professional accounts receivable management services. YNHHS affiliates own a majority of the stock in Century Collections.

Following the affiliation in 1996, YNHHS is the parent corporation (sole member) of Southern Connecticut Health System (SCHS). SCHS and its affiliates are described below:

Southern Connecticut Health System, Inc. (SCHS)

SCHS is a Connecticut non-stock, nonprofit, tax-exempt corporation which promotes and carries out charitable, scientific and educational activities. YNHHS is the sole member of SCHS.

Bridgeport Hospital (BH):

Bridgeport Hospital is a Connecticut non-stock, nonprofit, tax-exempt corporation that operates a 425 bed medical center. SCHS is the sole member of BH.

Bridgeport Hospital Foundation (The Foundation):

The Foundation is a non-stock, nonprofit tax-exempt corporation providing fund-raising support for SCHS, BH and other non-profit healthcare organizations affiliated with SCHS. SCHS is the sole member of the Foundation.

NovaMed Corporation
(NovaMed):

NovaMed is a Connecticut for-profit, diversified health services company. SCHS is the sole shareholder of NovaMed

Ahlbin Centers for Rehabilitation
Medicine, Inc.
(ACRM):

ACRM is a Connecticut non-stock, nonprofit, tax-exempt corporation that provides comprehensive inpatient and outpatient rehabilitation services. SCHS is the sole member of ACRM.

United Home Care, Inc.
(UHC)

UHC is a Connecticut non-stock, nonprofit, tax-exempt corporation that provides home health care services to patients within the Fairfield and New Haven county areas. SCHS is the sole member of UHC.

SCHS Properties, Inc.:

SCHS Properties is a Connecticut non-stock, nonprofit, tax-exempt corporation that owns or holds real estate properties. SCHS is the sole member of SCHS Properties.

Greenwich Health Care Services, Inc. and its affiliates are described below:

Greenwich Health Care Services, Inc.
(GHCS)

GHCS is a Connecticut non-stock, nonprofit, tax-exempt corporation which promotes and carries out charitable, scientific and educational activities.

The Greenwich Hospital Association
(GH)

The Greenwich Hospital Association is a Connecticut non-stock, nonprofit, tax-exempt corporation that operates a 160 bed hospital. GHCS is the sole member of Greenwich Hospital Association.

The Perryridge Corporation
(PC)

The Perryridge Corporation is a non-stock, nonprofit, tax-exempt corporation that owns The Greenwich Hospital Pavilion. GHCS is the sole member of PC.

Greenwich Health Services, Inc.
(GHSI)

GHSI is a for-profit corporation whose primary purpose is to furnish facility and administrative support for physician practices. GHCS is the sole stockholder of GHSI.

Greenwich Nursing and Healthcare
Registry, Inc.
(Registry)

The Registry is a Connecticut non-stock, nonprofit corporation that previously operated as an agent in securing private nursing services for patients. The assets of the Registry have been sold. GHCS is the sole member of Greenwich Nursing and Healthcare Registry, Inc.

Future Care, Inc.

Future Care, Inc. is a for-profit corporation which previously operated a retail pharmacy located at 4 Deerfield Drive in Greenwich. The assets of this pharmacy have been sold. GHCS is the sole shareholder of Future Care.

As previously discussed, YNHHS will become the parent corporation (sole member) of GHCS, thus adding the Greenwich Health Care Services local network to the YNHHS system. The regional YNHHS system will continue to be overseen by the YNHHS parent board. Boards will remain at each of the corporate entities with specific responsibilities and functions.

There are no current plans to consolidate services; therefore no short-term cost savings are anticipated as a result of changes in legal structure, management or governance.

- 4. Provide a current and proposed corporate organizational chart for each corporate parent before and after completion of the proposed merger. Each parent corporation and all of its corporate affiliates should be identified on these charts.**

As stated above, YNHHS and GHCS are not merging; a corporate affiliation is proposed.

The current corporate organizational chart for Yale-New Haven Health Services Corporation and its affiliates is presented in Exhibit 1. The current corporate organizational chart for Greenwich Health Care Services, Inc. and its affiliates is presented in Exhibit 2. The proposed corporate organizational chart for YNHHSC and its affiliates after the affiliation with GHCS is presented in Exhibit 3.

- 5. If any changes in the current certificates of incorporation, bylaws and other relevant legal documents for each corporate parent and its affiliates have taken place since the last submission of required documents for annual reporting for FY 1996, please provide a revision of only those specific documents which have changed.**

Since the last annual reporting submission, certificates of incorporation and bylaws have changed for the following YNHHSC affiliates:

- YNHH-MSO, Inc.
- United Home Care, Inc.
- Ahlbin Centers for Rehabilitation Medicine, Inc.

Pre-affiliation certificates of incorporation and bylaws are presented in Exhibit 4.

With respect to GHCS and its affiliates, no changes have been made to the certificates of incorporation or bylaws since the most recent annual OHCA filing.

- 6. Provide the legal documents described in Question #5 above for the proposed merged entity as well.**

As noted above, the transaction is not a merger. Accordingly, YNHHSC and GHCS will each continue to have separate governing documents, although YNHHSC will become the sole member of GHCS. The certificates of incorporation and bylaws for YNHHSC and GHCS will be amended prior to the closing of the affiliation. The post-affiliation amended certificates of incorporation and bylaws of GHCS and its affiliates will reflect the terms of the affiliation agreement. However, these documents are not yet final.

- 7. Please provide a list of the names and representation of all proposed members of the Board of Directors of the proposed merger entity and explain how the Directors are to be appointed. Specify how officers and standing committees will be designated. Include the proposed dates that the Board and each standing committee will be created and will become active.**

As part of the proposed affiliation GHCS will appoint three members (one permanent, two temporary) to the Board of Directors of YNHHSC. Individuals to fill those directorships have not been named but will be identified prior to the closing of the affiliation. Election of the Directors of GHCS shall be provided for in the revised GHCS bylaws consistent with Article IV, Section 4.2 of the System Affiliation agreement (Exhibit 5). Officers and standing committees shall be designated as stated in each entity's Bylaws. The Boards and standing committees are presently existing and active.

- 8. Describe the role and oversight authority (financial and policy decision-making) of the merged Board of Directors for the proposed merged entity.**

Since this affiliation is not a merger, the Boards of YNHHSC and GHCS will not merge. Following the affiliation, as further defined in Article IV of the System Affiliation Agreement (Exhibit 5), YNHHSC will have the following responsibility with respect to GHCS:

- Approve GHCS strategic plans, operating budgets and capital budgets.
- Approve GHCS incurrence of debt over an agreed amount.
- Designate a member of GHCS Board and approve/consult with respect to other GHCS Board appointments as further described in Article IV, Section 4.2 of the System Affiliation Agreement (Exhibit 5).
- Approve material changes to GHCS' or its affiliates' bylaws or certificates of incorporation.
- Approve affiliations by GHCS or its affiliates with other healthcare providers.
- Approve change of name, sale of assets, merger, consolidation or reorganization of GHCS or its affiliates.

- Approve major programmatic change at GHCS or its affiliates, if so initiated by GHCS.

9. Please provide a copy of the agreement that will accomplish the proposed merger.

The System Affiliation Agreement between YNHHS and GHCS is attached as Exhibit 5.

10. Please provide copies, certified by the corporate secretary of each corporate parent, of the resolutions of the Board of Trustees of each corporate parent approving the proposed merger.

The Boards of YNHHS and GHCS have authorized the proposed affiliation. The board resolutions are attached as Exhibits 6 and 7.

Licensure and Complement Changes

11. Please provide a detailed description of the proposed licensure of beds and services due to the merger, the planning underway to obtain such licensure and the anticipated date of licensure by the Department of Public Health and Addiction Services.

Not applicable. This proposal is for an affiliation, not a merger. YNHHS and GHCS are parent corporations and as such are not licensed by the Department of Public Health (DPH).

The licensure of beds and services at Yale-New Haven Hospital, Inc. (YNHH), Bridgeport Hospital (BH), and Greenwich Hospital (GH) will not be altered as part of the proposed affiliation between the parent corporations. Currently, these affiliates are licensed by the DPH (Appendix A). Any proposed changes or reorganization of clinical services or beds among individual institutional providers within YNHHS following the affiliation will be reviewed as appropriate by OHCA through a separate CON process.

12. Provide a table identifying the existing and proposed licensed bed configuration for each of the two Hospitals before and after the merger.

Not applicable. This proposal is for an affiliation, not a merger. As noted, YNHHSC and GHCS are parent corporations and as such are not licensed by the Department of Public Health (DPH).

The licensed bed configuration at YNHHSC and GHCS are provided in Exhibit 8. No changes are proposed.

- 13. Provide a detailed description and status of the Applicants' efforts to obtain all other required federal, state and local approvals governing the proposed merger. Your response must include a legal opinion regarding continued not-for-profit status with the Internal Revenue Service and a discussion of any potential antitrust problems resulting from the merger.**

YNHHSC and GHCS have submitted a filing to the Federal Trade Commission and the Antitrust Division of the Department of Justice pursuant to the Hart-Scott-Rodino Antitrust Improvements Act of 1976. The parties made the Hart-Scott-Rodino filing on August 1, 1997. The parties were notified on August 12, 1997, that the transaction has received "early termination" of the waiting period which means that the federal agencies do not intend to further review or challenge the affiliation. Representatives of YNHHSC and GHCS have notified and provided information to the office of the Attorney General of the State of Connecticut.

Legal counsel have analyzed the antitrust aspects of the affiliation and do not believe that there are any significant antitrust problems resulting from the affiliation.

Because this affiliation is between two nonprofit, tax-exempt entities, the transaction should not present risks to the 501(c) (3) status of either entity. Letters from counsel for each of the applicants regarding the continuation of tax exempt status are provided in Exhibit 10.

- 14. Describe the involvement of the medical staff, employees and community in the planning process for the proposed merger.**

The leadership of the medical staffs of Yale-New Haven Hospital (YNHH), Bridgeport Hospital (BH) and Greenwich Hospital (GH) have participated in the planning of the proposed affiliation in many ways. Physician input was sought on a number of relevant issues. Prior to the announcement of the affiliation, special meetings were held to update the Chiefs of Services and letters were sent to all three hospitals' medical staffs. After the announcement, all three hospitals' medical staff publications ran a story describing the proposed affiliation. Over the last few months, the Chiefs of Staff of all three hospitals, as well as certain Chiefs of Service, have been meeting informally to discuss opportunities to coordinate medical education and research. Additional medical staff members will become involved in these discussions as appropriate. Finally, members of all three hospital medical staffs have been and will continue to be part of ongoing communications with those involved in planning for the affiliation.

Employees of YNHH, BH and GH participated in the planning for the proposed affiliation in several ways. Hospital managers were updated regularly on the status of discussions and were solicited for input. Prior to the announcement of the affiliation, special management meetings were held to update and answer questions from the managers. At that point, managers updated employees under their supervision and funneled questions/feedback to senior management to be addressed. In addition, a letter describing the affiliation was distributed to all employees. Moreover, after the announcement, the hospitals' newsletters ran a detailed story describing the proposed affiliation. In the future, employees will be solicited for input and assistance in helping management evaluate options for improving quality, access and cost effectiveness throughout the system.

The community has been involved through representatives on the parent companies' and hospitals' boards, as well as through news stories in local papers and a news conference and a press release announcing the affiliation. In addition, prior to the announcement, many community representatives, including political and community leaders, hospital auxiliaries, volunteers and donors, other local providers and payers, were informed about the proposed affiliation via letters, phone call or facsimile.

Clinical Services

15. Please provide a chart depicting all changes to services provided on each campus of the two Hospitals as of the date of affiliation, compared to the current status and location of these services. For each service, the Hospitals must indicate the following.
- a. Relocations
 - b. Terminations
 - c. Additions
 - d. Duplications
 - e. Anticipated scheduling for future changes.

No changes to services provided at YNHH, BH or GH are planned as part of the proposed affiliation. As part of the annual business planning process, clinical programs will be reviewed to determine whether any changes in service would be indicated. Any proposed changes or reorganization of clinical services or beds among separate institutional providers within the YNHHSC system will be reviewed, as appropriate, and submitted to OHCA through a separate CON process.

16. In the same format as Question #15 above, please list those programs and services of the two Hospitals and all affiliates which have yet to be integrated and include a projected timetable for their eventual integration.

There are no plans to integrate clinical programs and services at YNHH, BH or GH as part of this affiliation CON.

17. Please provide the same information requested in Question #16 above, for all non-health care related services, functions and programs of the Applicants and their corporate affiliates.

YNHHSC has recently received CON approval for the development and implementation of an integrated information system. The goal of this project is to enable all YNHHSC affiliates to communicate electronically and to standardize information and systems wherever possible. This new information system will have the flexibility and capacity to serve the needs of GHCS as well as future YNHHSC affiliates.

Except as described above regarding the information system, there are no plans in place to integrate non-health care related services. In the future, opportunities may be explored for potential cost savings in areas such as selected business services, purchasing and insurance.

Financial Information

- 18. Provide an itemized list of all capital expenditures associated with the proposed merger.**

Not applicable. There are no capital expenditures proposed as part of this proposed affiliation.

- 19. How will the proposed capital expenditures be financed? Identify the sources of funding of any equity contribution (fund raising, funded depreciation, etc.) and debt financing (tax-exempt bonds, conventional bank financing, etc.). Provide evidence of the financial feasibility of the proposed merger and the interest of any lenders for the debt financing specified above.**

Not applicable. There are no capital expenditures proposed as part of this proposed affiliation. Therefore, financing is not required.

- 20. Please describe the current financial condition of each corporate parent and the anticipated effect of the proposed merger. Specifically address the impact of the combined level of uncompensated care on the proposed merged entity.**

Not applicable. The current sound financial conditions of each corporate parent will continue following the affiliation. Likewise, the level of uncompensated care of YNHH, BH and GH will continue following the affiliation. Audited financial statements for YNHHSC and GHCS are presented in Appendix B.

- 21. Provide a summary of projections of revenue, expense and volume statistics for the current fiscal year, plus fiscal years 1998, 1999 and 2000 for each Hospital with the merger proposal, without the merger proposal, and incrementally due to the merger proposal (See Attachment 3.)**

This is an affiliation, not a merger. The financial projections for YNHHSC and GHCS are the same with or without the affiliation. The requested projections are provided in Appendix C.

Other Review Criteria

- 22. Discuss the impact of the proposed merger and the rates and financial condition of each Hospital including the continuing ability of each Hospital to operate effectively and efficiently, and to meet its financial obligations consistent with principles of sound financial management.**

This proposal involves an affiliation between two parent corporations: YNHHSC (the parent corporation of YNHH and SCHS, (the parent corporation of BH) and GHCS (the parent corporation of GH). This affiliation will maintain the current sound financial conditions of all three hospitals and their ability to operate effectively and efficiently. The proposed affiliation will not impact the published rates or financial condition of any of the three hospitals. All three hospitals have recently undergone redesign and reengineering initiatives to ensure cost effective delivery of care, and subsequently have implemented ongoing Continuous Quality Improvement (CQI) processes.

- 23. Discuss the proposed merger's contribution to the cost effectiveness of health care delivery in the region (including any reduction in FTE's, economies of scale, improvements in productivity and cost containment, reduction in licensed beds/excess capacity, and the integration of non-clinical services such as accounting, laundry, purchasing, etc.). This discussion should include the degree to which the proposed merger is likely to achieve appropriate health service area objectives at the most reasonable financial cost.**

The proposed affiliation will contribute to the cost effectiveness of health care delivery in the region as follows:

- Coordinate operations through senior management committees to address clinical and non-clinical issues and thereby increase efficiencies.
- Improve the quality and cost-effective care within the YNHHSC system by sharing clinical and non-clinical best practices among system hospitals.

- Continue to deliver health care services in a cost effective manner.

24. Please list and describe all cost savings expected due to the proposed merger.

Please refer to question # 23.

25. Please provide a copy of any consultant's report received by the Applicants' relating to an operational efficiency analysis of the proposed merger.

Not applicable. Operational efficiency analysis was not performed.

26. Please comment on the needs of the public that currently are not being met and describe how the proposed merger would help to meet such needs.

YNHHSC and GHCS are committed to identifying, targeting and serving their respective communities' health care needs. The proposed relationship between YNHHSC and GHCS is intended to respond to the needs of the public for improved access to cost effective/coordinated healthcare services. This need has been expressed through the public's move to managed care benefit plans and structures. Communications about the features and benefits of the proposed system will assist the community in making informed choices about hospital provider groups and payor plans. In addition, the integrated YNHHSC system and the high-quality continuum of care delivered by it will be available to a broader geographic area including people of all socioeconomic classes with a wide range of health care needs. The intent of the affiliation is to utilize the combined system's expertise in delivering primary through quaternary health care services to improve the health status of participating segments of the communities served.

27. Discuss how the proposed merger will serve the public interest.

The proposed affiliation will serve the public interest by:

- Providing access to a patient-focused continuum of integrated healthcare services and clinical centers of excellence through convenient local access points
- Continuing to build and strengthen community health resources dedicated to improving the health status of the population served

- Ensuring a stable base of qualified professionals through the initiation, development, maintenance and oversight of educational programs for health care professionals
- Initiating, developing and maintaining programs of scientific research related to the care of the sick and injured
- Enabling long-term partnerships that bring the critical resources of care under one umbrella to manage various aspects of health
- Providing high quality, cost effective, convenient services to patients and other beneficiaries

28. Discuss how the proposed merger will affect the quality of health care delivery in the combined Hospitals' service area. Please provide copies of each Hospital's most recent Department of Public Health and Addiction Services licensing survey.

Not applicable. This proposal involves an affiliation not a merger.

One of the key goals of the affiliation is to maintain and improve quality. This will occur through the sharing of system-wide clinical best practices.

Please refer to Appendix D for the Hospital Licensing Surveys for YNHH, BH and GH.

29. Discuss how the proposed merger will contribute to an improvement in access to health care services in the combined Hospitals' service area.

The proposed affiliation is designed to enable the GHCS local delivery system to remain competitive in a changing marketplace by improving access to care and enhancing quality of care. Acting as a collective of local vertical networks within a regional integrated health care system, the YNHHSC system will continue to provide comprehensive health care services to each local service area. As part of the YNHHSC system, each local network can improve access to care by expanding:

- the overall geographic area for care and referrals
- the array of services available for people in the communities served by the hospitals
- the level of shared resources and expertise among affiliates
- options for patients covered by managed care contracts.

30. Describe the relationship of the proposed merger to the most recent State Health Plan.

The proposed affiliation between YNHHS and GHCS supports the following policies contained in the Connecticut State Health Plan:

Policy AIC-II

Access to high quality patient care along with cost effectiveness should remain an important consideration.

As stated above, a primary goal of the proposed affiliation is to continue to improve community access to the system. The expanded geographic area will improve accessibility to YNHHS's services for a greater proportion of the population. Ongoing efforts to improve the quality, cost effectiveness and the array of needed health care services in each local service area represent primary goals for YNHHS and GHCS.

Policy AIC-IV

The SHCC supports the Certificate of Need Program in Connecticut in order to assure access to needed services while avoiding unnecessary capital expenditure.

The improved access to quality health care, described above, can be achieved through the proposed affiliation without any capital expenditure (Please refer to the responses to questions 18 and 19).

31. Describe the relationship of the proposed merger to each Hospital's long range plan.

Both YNHHS and GHCS have similar missions and share the primary mission of improving the health of the populations they serve.

The mission of YNHHS is to benefit, uphold and promote the welfare, programs and activities of YNHHS and other affiliates and to benefit the communities served by the system. The GHCS vision is to be a regional, economically viable, integrated healthcare delivery

system which excels on the basis of cost effectiveness, customer satisfaction, documentable quality and compassion.

The proposed YNHHS-C-GHCS affiliation expands the broad, geographic coverage of the combined YNHHS-C network while preserving a strong local GHCS network. This relationship is anticipated to strengthen the individual providers and enhance managed care contracting and patient preference.

Long range plans recognize that the organization and financing of healthcare has changed. In order to carry out the missions, institutions must become increasingly efficient and proactively enhance quality, improve access and control costs of care. The proposed affiliation will support these activities to further the institutions' missions and long range plans.

- 32. Please provide a copy of the long range plan for the proposed merged entity. If a long range plan for the proposed merged entity has not been completed, please indicate the date on which this plan is expected to be completed.**

Not applicable. This is not a merger.

- 33. Describe how the proposed merger affects the interests of consumers and payers of health care services based on the merger proposal's contribution to quality, accessibility and cost effectiveness.**

Please refer to the answers to questions #26 and #27.

- 34. Discuss whether the proposed merger will result in the elimination of any unnecessary duplication of services.**

Not applicable. Due to the distinct nature of the markets served independently by the local networks currently within YNHHS-C and the GHCS local network, we do not anticipate that substantial unnecessary duplication of services will exist. However, if and as such services are identified, YNHHS-C will act to create a more efficient organization.

35. Describe how the proposed merger affects the technical, financial and managerial efficiency and expertise of the staff at each Hospital?

Each local network, including affiliated organizations, will benefit from the voluntary sharing of expertise and non-clinical best practices. In addition, as discussed before, it is expected that there are certain areas in which efficiency and efficacy can be enhanced as a result of this shared knowledge.

36. Describe any applied research or educational programs that would be developed or affected as a result of the proposed merger.

Shared information between local networks, facilitated by the affiliation, will inevitably enhance both provider education and research endeavors. The combined impact of this information transfer will be to improve the quality of care delivered at each local network and their affiliates as noted in the answer to question #28.

37. Describe how the proposed merger would impact the patient-physician mix of each Hospital.

The proposed affiliation will not affect the current patient-physician mix at any of the hospitals.

38. Describe any improvements in productivity and cost containment each Hospital would make as a result of the proposed merger.

Please refer to the responses to questions #22 and #23.

39. Discuss how the proposed merger will affect or alter current physician referral patterns at each hospital.

This is an affiliation, not a merger. The proposed affiliation is not expected to affect or alter current physician referral patterns at any of the hospitals.

40. Discuss how the proposed merger will affect or alter current preferred provider network participation at each hospital.

This is an affiliation, not a merger. Article II System Goals and Objectives, Sections 2.1.2 and 2.1.3 of the System Affiliation Agreement (please refer to Exhibit 5) includes the following system goals with respect to preferred provider network and other managed care participation:

2.1.2 Provide centralized managed care services by the System and develop and administer the System's managed care arrangements to increase the number of managed care patients served by the System, and enhance each System Member's ability to seek and accept regional, statewide, and state/federal government managed care contracts for enrolled populations;

2.1.3 Assist each System Member to develop and work effectively with local and regional physician organizations, physician-hospital organizations, management service organizations and primary care organizations; including doing so with existing organizations of those types

41. Discuss how the proposed merger will effect or alter discount agreement contracts currently in effect at each hospital.

The proposed affiliation is not expected to affect or alter discount agreement contracts currently in effect at any affiliated hospital.

CERTIFICATE OF INCORPORATION

The undersigned incorporator hereby forms a corporation under the Stock Corporation Act of the State of Connecticut.

1. The name of the Corporation is YNHH-MSO, Inc.
2. The nature of the business to be transacted and the purposes to be promoted or carried out by the Corporation are to engage in any lawful act or activity for which corporations may be formed under the Stock Corporation Act of the State of Connecticut.

3. The designation of each class of shares, the authorized number of shares of each such class, and the par value of each share thereof are as follows:

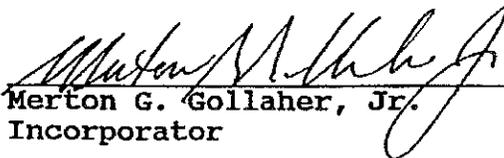

The capital stock of the Corporation consists of Twenty Thousand (20,000) shares of Common Stock, par value One One-hundredth of One Dollar (\$0.01) per share.

4. The minimum amount of capital with which the Corporation shall commence business is One Thousand Dollars (\$1,000.00).

5. The duration of the Corporation is perpetual.

I hereby declare, under the penalties of false statement, that the statements made in the foregoing Certificate are true.

Dated at New Haven, Connecticut, this 21st day of November, 1996.

Merton G. Gollaher, Jr.
Incorporator

BYLAWS

of

YNHH-MSO, INC.

ARTICLE I - OFFICES

Section 1. Principal Office. The principal office of the Corporation shall be at 789 Howard Avenue, New Haven, Connecticut or such other places as the Board of Directors may determine from time to time.

Section 2. Other Offices The Corporation may establish other offices in such other places, in the State of Connecticut or elsewhere, as the Board of Directors may from time to time appoint or the business of the Corporation may require.

ARTICLE II - MEETINGS OF SHAREHOLDERSSection 1. Annual Meeting.

(a) The annual meeting of the shareholders shall be held in the State of Connecticut at a time and place to be designated by the Board of Directors in a notice of the meeting.

(b) Notice in writing of the time and place of the annual meeting shall be served upon each stockholder of record not less than ten (10) nor more than sixty (60) days prior to the date set for such meeting. Such notice must be served personally or by mail; if by mail, it shall be directed to the stockholder at his last known post office address.

(c) Such other business as may be properly brought before any shareholders meeting may be transacted at the annual meeting of the shareholders.

Section 2. Special Meetings.

(a) Special meetings of the shareholders may be called at any time by the President, the Board of Directors, or the holders of not less than ten percent (10%) of all of the shares of stock outstanding and entitled to vote at such meeting.

(b) Notice of a special meeting of the shareholders shall be given in writing to all shareholders of record entitled to vote upon the subject of such meeting, not less than ten (10) nor more than sixty (60) days prior to the date set for such meeting, by serving notice personally upon each such stockholder or by mailing such notice to each stockholder at his last known address.

(c) Business transacted at all special meetings shall be confined to the purpose or purposes set forth in the notice.

Section 3. Quorum. The holders of a majority of the shares issued, outstanding, and entitled to vote present in person or by proxy shall be requisite and shall constitute a quorum

to do business at all meetings of the shareholders; provided, however, that the shareholders present at a duly organized meeting may continue to do business until adjournment notwithstanding the withdrawal of sufficient shareholders to leave less than a quorum present. In the event a quorum fails to attend, those present may adjourn the meeting to such time and place as they may determine, and further notice, except the announcement of such adjourned meeting prior to such adjournment, shall be unnecessary.

Section 4. Waiver. Notwithstanding any provisions of the foregoing sections, any meeting of the shareholders of this Corporation may be held at any time and at any place within or without the state of Connecticut and any action may be taken thereat if timely notice be waived in writing by every stockholder having the right to vote in person or by proxy at such meeting. Similarly, the annual meeting of the shareholders of this Corporation may be held at the principal office of the corporation if timely notice be waived in writing by every stockholder of record of the Corporation.

Section 5. Proxy. At each meeting of the shareholders, each stockholder having the right to vote shall be entitled to vote in person or by proxy appointed by an instrument duly executed in writing by the stockholder or his duly authorized attorney-in-fact and filed with the Secretary of the Corporation at or prior to such meeting; such proxy shall be invalid after the expiration of eleven (11) months from the date of its execution unless the stockholder executing it shall have otherwise therein specified its duration. The proxy shall be revocable at the will of the stockholder unless the appointment of a proxy form conspicuously states that it is irrevocable and the appointment is coupled with an interest. Appointments coupled with an interest include the appointment of : (1) a pledgee; (2) a person who purchased or agreed to purchase the shares; (3) a creditor of the Corporation who extended credit under the terms requiring the appointment; (4) an employee of the Corporation whose employment contract requires the appointment; or (5) a party to a voting agreement created under the Connecticut General Statutes. An appointment made irrevocable is revoked when the interest with which it is coupled is extinguished. No proxy shall be valid after three years from the date of its execution.

Section 6. Voting. Each stockholder shall have one vote for each share of voting stock standing in his name upon the records of the Corporation and entitled to vote at the meeting. All elections shall be had and all questions decided by a majority of votes cast constituting a quorum. Unless a secret ballot is demanded by the holders of at least ten percent (10%) of the shares outstanding and entitled to vote, voting may be by open ballot.

Section 7. Determination of Shareholders of Record. The Board of Directors may fix a time, not less than ten (10) nor more than sixty (60) days prior to the date of any meeting of the shareholders, or the date fixed for the payment of any dividend or distribution, or the date for the allotment of rights, or the date when any change or conversion or exchange of shares will be made or go into effect, or the date for any other circumstance requiring the determination of the shareholders of record, as a record date for the determination of the shareholders entitled to notice of and to vote at any such meeting, or entitled to receive payment of any such dividend or distribution, or to receive any such allotment of rights, or to exercise the rights in respect to any such change, conversion, or exchange of shares. In such

case, only such shareholders as shall be shareholders of record on the date so fixed shall be entitled to notice of and to vote at any such meeting, or to receive payment of such dividend, or to receive such allotment or rights, or to exercise such rights, as the case may be, notwithstanding any transfer of any shares on the books of the Corporation after any record date fixed as aforesaid. The Board of Directors may close the books of the Corporation against transfers of shares during the whole or any part of such period, and in such case, written or printed notice thereof shall be mailed, at least ten (10) days before the closing thereof, to each stockholder of record at the address appearing on the records of the Corporation or supplied by him to the Corporation for the purpose of notice. While the stock transfer books of the Corporation are closed, no transfer of shares shall be made thereon. Transferees of shares which are transferred on the books of the Corporation between the date fixed by the Board of Directors and the date of such meeting shall not be entitled to notice of or to vote at such meeting.

Section 8. Stockholder Action Without a Meeting. Any action which, under the Connecticut General Statutes, may be taken at a meeting of shareholders may be taken without a meeting pursuant to a written consent setting forth the action so taken or to be taken, signed by all of the persons who would be entitled to vote upon such action at a meeting or their duly authorized attorneys. Such unanimous written consent or consents shall have the same force and effect as a vote of shareholders at a meeting duly held. Such unanimous written consent or consents shall be filed by the Secretary of the Corporation with the minutes of the meetings of shareholders.

ARTICLE III - DIRECTORS

Section 1. Number.

(a) The Board of Directors of the Corporation shall consist of not less than three (3) nor more than ten (10) persons. The number of directors shall be established, and may be increased or decreased from time to time, within such range by a majority vote of the shareholders of the Corporation.

Section 2. Qualification. The members of the Board of Directors, each of whom shall be an individual who is active and diligent in meeting the obligations of a director and who is committed to promoting and supporting the welfare, success, and purposes of the Corporation, need not be a stockholder of the Corporation or a resident of the State of Connecticut.

Section 3. Duties of Directors.

(a) Management. The Board of Directors shall have the control and general management of the property, affairs, and business of the Corporation. Except as hereinafter provided, the Directors shall, in all cases, act as a board regularly convened by a majority, and they may adopt such rules and regulations for the conduct of their meetings and the

management of the Corporation as they may deem proper and as shall not be inconsistent with any of the Certificate of Incorporation, these By-Laws or the laws of the State of Connecticut.

(b) Committees. The Board of Directors may appoint from among its members an Executive Committee, a Finance Committee, and such other committees as the Board may from time to time determine desirable. All such committees shall consist of not less than two (2) Directors and shall possess and exercise all powers of the Board to the extent delegated by the Board during the intervals between Board of Directors meetings and to the extent permitted by law.

Section 4. Meetings.

(a) Annual Meeting. The annual meeting of the Board of Directors shall be held immediately following the annual meeting of the shareholders, within the state of Connecticut at the time and place to be designated in the notice thereof.

(b) Regular Meetings. Regular meetings of the Board of Directors shall be held at such times and places, within or without the State of Connecticut, as the Board of Directors may determine.

(c) Special Meetings. Special meetings of the Board of Directors may be held at any time and place within or without the State of Connecticut.

(d) Participation. The Board of Directors may participate in any meeting by, or conduct any meeting through the use of, any means of communication by which all directors participating may simultaneously hear each other during the meeting. A director participating in a meeting by these means is deemed to be present in person at the meeting.

Section 5. Notice of Meetings.

(a) How Given. Except for regular meetings of the Board of Directors which may be held without notice of the date, time, place or purpose of the meeting, notice in writing of all meetings of the Board of Directors shall be given to each Director at least two (2) days prior to the day designated for the meeting. Notice shall be given either personally or by mail. If by mail, it shall be mailed to the Director at his last known residence, unless the Director shall have filed with the Board of Directors a written request that notice intended for him be sent to some other address, in which event it shall be mailed to the address designated in such request.

(b) Waiver. Notwithstanding any of the foregoing provisions, meetings of the Board of Directors may be held at any time or place, within or without the state of Connecticut. Notice may be waived by a director provided such waiver shall be in writing, signed by such Director entitled to the notice and filed with the corporate records. A Director's attendance at or participation in a meeting waives any required notice to him/her unless the director at the beginning of the meeting, or promptly upon his arrival, objects to holding the meeting or transacting business at the meeting and does not thereafter vote for or assent to action taken at the meeting.

(c) Adjournment. Whenever any meeting of the Board of Directors shall have been duly organized and announced to be adjourned to a definite time and place, it shall not be necessary to give notice of said adjourned meeting other than such announcement of the time and place at which such adjourned meeting will be held.

Section 6. Quorum. A majority of the Directors prescribed, or if no number is prescribed, then the number in office immediately before the meeting begins, shall constitute a quorum for the transaction of business.

Section 7. Term and Removal. Each Director shall be elected by a majority vote of the Shareholders at the annual shareholders meeting or any other meeting called for such purpose to serve until the next annual meeting or until his successor shall be duly elected and qualified, and may be removed at any time from his position as Director by a vote of the holders of a majority of the shares of stock outstanding and entitled to vote. Such removal shall be voted, however, only at a special meeting of the shareholders called for such purpose.

Section 8. Vacancies. If the office of any Director shall become vacant by reason of death, resignation, retirement, disqualification, removal from office, or for any other cause, the Board of Directors may fill such vacancy by a person of its choosing until the next annual meeting of the shareholders. A majority of those directors present constituting a quorum shall be required to effect any election of Directors to fill vacancies or to decide any question.

Section 9. Action Without a Meeting. Action to be taken at a board of directors' meeting may be taken without a meeting if the action is taken by all the members of the board of directors. The action shall be evidenced by one or more written consents describing the action taken, signed by each director, and included in the minutes or filed with the corporate records reflecting the action taken. A consent has the effect of a meeting vote and may be described as such in any document.

ARTICLE IV - OFFICERS

Section 1. Name, Number, and Election.

(a) Officers of the Corporation shall be a President, a Secretary, and a Treasurer, and such other officers as the Board of Directors may from time to time appoint.

(b) The officers of the Corporation shall be elected by a majority vote of the Board of Directors at their annual meeting or any other special meeting called for such purpose.

Section 2. Powers and Duties. The respective officers of the Corporation shall perform such duties and possess such powers as are ordinarily performed and possessed by such officers of similar corporations, and shall perform such other duties and possess such other powers as may from time to time be conferred on or assigned to them by the Board of Directors.

Section 3. Qualifications and Election.

(a) The officers need not be members of the Board of Directors.

(b) The offices may be held by any one person, provided he is otherwise qualified.

(c) Each officer shall be elected for a term of one (1) year, or until his successor has been elected and qualified.

Section 4. Removal.

(a) Any officer may be removed from his office by a majority vote of the Board of Directors at the annual meeting or a special meeting of the Board of Directors called for that purpose.

(b) Any office held by a person who is also a Director of the Corporation shall be deemed vacant upon the removal of such Director by the shareholders of the Corporation, in the manner hereinbefore provided.

Section 5. Vacancies. In the event of the death, disability, or removal for any cause whatsoever of an officer of the Corporation, the vacancy so created shall be filled by a majority vote of the Board of Directors at the annual meeting or a special meeting called for that purpose.

Section 6. Compensation. Compensation to be paid officers of the Corporation shall be determined by the Board of Directors from time to time, but in no event shall the officers be entitled to any compensation except reasonable compensation for services actually rendered to the Corporation in effecting one or more of its objectives or purposes or as a direct or indirect beneficiary of the Corporation's stated purposes.

ARTICLE V - INDEMNITY OF DIRECTORS AND OFFICERS

Section 1. Indemnity. Each Director and officer of the Corporation shall be indemnified by the Corporation against fines, penalties, judgments, settlements, attorneys' fees, interest, penalties (including but not limited to those imposed by the Internal Revenue Service), and other expenses reasonably incurred by him on account of or in defense of any action, suit, or proceeding to which he should be made a party by reason of his being or having been a Director or an officer or acting in any other corporate capacity of the Corporation or employed by it in any other capacity (whether or not he continues to be a Director or an officer at the time of incurring or being subject to such expenses), except (a) actions, suits, or proceedings in which he shall be adjudged not to have acted in good faith and, in the cases of conduct in his official capacity, in the reasonable belief that his action was in the best interests of the Corporation, or, in all other cases that his conduct was at least not opposed to the best interests of the Corporation, and, in the case of any criminal proceeding, he had no reasonable cause to believe that his conduct was unlawful; (b) in connection with a proceeding by or in the right of the Corporation in which he was adjudged liable to the Corporation; or (c) in connection with any other proceeding charging improper personal benefit to him whether or not involving action in his official capacity, in which he was adjudged liable on the basis that personal benefit was improperly received by him. The foregoing right of indemnification shall not exclude other rights to which any Director or officer may be entitled as a matter of law and shall be deemed consistent with Connecticut General Statutes or other state or federal statutes as may be applicable. The Corporation may

procure insurance to cover such corporate indemnity to the extent permitted by the insurance carrier and may be paid in full by the Corporation.

Section 2. Authorization of Indemnification. The Corporation may not indemnify a director or officer unless the Board of Directors, by a majority vote of a quorum consisting of Directors not at the time parties to the proceeding, (a) have determined that indemnification is permissible in the circumstances because he met the standard of conduct set forth in the Connecticut General Statutes and (b) have authorized the indemnification. In the event that a quorum cannot be obtained or special legal counsel has been selected by the Board of Directors to make the determination then the authorization of indemnification shall be in accordance with the Connecticut General Statutes.

ARTICLE VI - CAPITAL STOCK

Section 1. Certificates of Stock. The certificates of each class of stock shall be numbered in the order issued and signed by the President and the Secretary.

Section 2. Transfers. Transfers of the stock shall be made on the books of the Corporation only by the person named in the certificate or his duly constituted attorney-in-fact, and only upon the surrender of the certificate therefor unless the certificate has been damaged, mutilated or destroyed.

Section 3. Cancellation of Certificates. All certificates of stock exchanged or returned to the Corporation for transfer or cancellation shall be marked "Cancelled" with the date of cancellation by the Secretary, and shall be immediately pasted in the certificate book to the stubs from which they were detached when issued.

Section 4. Lost certificates. Any person claiming a certificate of stock to be lost or destroyed shall make an affidavit or affirmation to that effect, and the Board of Directors may, in their discretion, require the owner of the lost or destroyed certificate or his legal representative to furnish to the Corporation a bond in such sum as they may see fit, not exceeding the total value of the shares, to indemnify the Corporation against any claim that may be made against it on account of the alleged loss of any such certificate. Upon complying with the foregoing requirements, a new certificate of the same tenor and for the same number of shares as the one alleged to be lost or destroyed shall be issued by the Board of Directors.

Section 5. Replacement of Damaged or Mutilated Certificates. A new certificate may be issued in lieu of a certificate previously issued that may be defaced, worn, damaged, or mutilated upon surrender or cancellation of a part of the old certificate sufficient in the opinion of the Secretary to duly identify the defaced, damaged, worn, or mutilated certificate and to protect the Corporation against loss or liability. Where sufficient identification is lacking, indemnity satisfactory to the Secretary may be required as in the case of a lost certificate.

ARTICLE VII - CHECKS, NOTES, AND BILLS OF EXCHANGE

Section 1. Execution. All checks and drafts on the Corporation's bank accounts, all bills of exchange and promissory notes, and all acceptances, obligations, and other instruments for the payment of money shall be signed by such officer or officers as shall be authorized or directed to do so from time to time by the Board of Directors.

ARTICLE VIII - DIVIDENDS

Section 1. Declaration and Payment. Dividends upon the outstanding stock of the Corporation, subject to the provisions of the Certificate of Incorporation, may be declared by the Board of Directors at any regular or special meeting pursuant to law. Dividends may be paid in property or in shares of capital stock.

ARTICLE IX - FISCAL YEAR

Section 1. Fiscal Year. The Corporation shall be on a fiscal year ending September 30th, unless otherwise determined by the Board of Directors and consistent with the Internal Revenue Code.

ARTICLE X - AMENDMENTS

Section 1. Amendments. These By-Laws may be amended, altered or repealed by the affirmative vote of a majority of the Directors at any regular meeting of the Directors or at any special meeting of the Directors called for that purpose, provided that any by-law that fixes a greater quorum or voting requirement for shareholders than is required by the Certificate of Incorporation, these By-Laws or by law of the State of Connecticut may only be adopted, amended, or repealed by an affirmative vote of a majority of the shares outstanding and entitled to vote therefor.

AMENDED AND RESTATED
ARTICLES OF ASSOCIATION
REHABILITATION CENTER OF FAIRFIELD COUNTY, INC.

1. The name of the corporation is REHABILITATION CENTER OF FAIRFIELD COUNTY, INC.

2. The nature of the activities to be conducted and the purposes to be promoted or carried out by the corporation shall be exclusively charitable, scientific and educational within the meaning of Section 501(c)(3) of the Internal Revenue Code of 1986, as the same may be amended from time to time (the "Code"), and shall include the following:

A. To assist disabled persons and their families in finding and making effective use of resources which will be helpful to them in developing their abilities and in living purposeful lives.

B. To assist communities in developing necessary and appropriate resources for disabled persons.

C. To establish and maintain rehabilitation programs and services which are appropriate and realistic.

D. To create a climate of acceptance of disabled persons which will enable them to contribute to the full extent of their competence and to the well-being of the community.

E. To engage in any lawful act or activity for which a corporation may be organized under the Nonstock Corporation Act of the State of Connecticut.

3. The Corporation is nonprofit and shall not have or issue shares of stock or pay dividends.

4. The classes, rights, privileges, qualifications, obligations, and the manner of election or appointment of members are as follows: There shall be but one member, Southern Connecticut Health System, Inc., which shall have the right to vote for the election of the Board of Directors in accordance with the bylaws, and shall have all of the other rights, privileges, and obligations usually or by law accorded to the members of a nonstock nonprofit corporation and not conferred thereby or by the Articles of Association or bylaws upon the Board of Directors of the corporation.

5. No part of the net earnings of the corporation shall inure to the benefit of or be distributable to the corporation's directors, officers or other private persons, except that the corporation shall be authorized and empowered to pay reasonable compensation for services rendered and to make payments and distributions in furtherance of the purposes set forth in Paragraph 2 hereof. No substantial part of the activities of the corporation shall be the carrying on of propaganda, or otherwise attempting to influence legislation, and the corporation shall not participate in, or intervene in (including the publishing or distribution of statements), any political campaign on behalf of any candidate for public office. Notwithstanding any other provision of these Articles of Association, the Corporation shall not carry on any other activities not permitted to be carried on (a) by a corporation exempt from Federal Income Tax under Section 501(c)(3) of the Code or (b) by a corporation, contributions to which are deductible under Section 170(c)(2) of the Code.

6. Upon any dissolution or termination of the existence of the corporation, all of its property and assets shall, after payment of the lawful debts of the corporation and the expenses of its dissolution or termination, be delivered, conveyed and paid over (subject to any restrictions imposed by any applicable will, deed, grant, conveyance, agreement, memorandum, writing or

other governing document) to Southern Connecticut Health System, Inc., so long as it is at that time an organization that qualifies as an exempt organization under Section 501(c)(3) of the Code, or, if at the time of the dissolution or termination of existence of the corporation, Southern Connecticut Health System, Inc. is not in existence or does not qualify as an exempt organization under Section 501(c)(3) of the Code, to Bridgeport Hospital, so long as it is at that time an organization that qualifies as an exempt organization under Section 501(c)(3) of the Code, or, if at the time of the dissolution or termination of existence of the corporation, neither Southern Connecticut Health System, Inc. nor Bridgeport Hospital is then in existence or qualifies as an exempt organization under Section 501(c)(3) of the Code, to one or more other charitable, scientific or educational organizations located in the service area of the Corporation and qualified as exempt organizations under Section 501(c)(3) of the Code, in such proportions and for such exclusively charitable, scientific or educational purposes as the board of directors may determine.

7. References to sections of the Code shall be deemed references to the Internal Revenue Code of 1986, as the same may be amended from time to time, and to the corresponding provisions of any future United States Internal Revenue Law.

CERTIFICATE AMENDING OR RESTATING CERTIFICATE OF INCORPORATION
61-38 Rev. 4/89
NonStock Corporation

STATE OF CONNECTICUT
SECRETARY OF THE STATE
30 TRINITY STREET
HARTFORD, CT 06106

1. Name of Corporation

Rehabilitation Center of Fairfield County, Inc.

2. The Certificate of Incorporation is: (Check One)

- A. Amended only, pursuant to Conn. Gen. Stat. §33 - 473.
- B. Amended and restated, pursuant to Conn. Gen. Stat. §33 - 474(c).
- C. Restated only, pursuant to Conn. Gen. Stat. §33 - 474(a).

(Set forth here the resolution of amendment and/or restatement. Use a 8 1/2 X 11 attached sheet if more space is needed).

RESOLVED, that the Certificate of Incorporation of the Rehabilitation Center of Fairfield County, Inc. shall be amended to reflect the change of the name of the corporation to the "Ahlbin Centers for Rehabilitation Medicine, Inc."

- D. Restated and superseded pursuant to Conn. Gen. Stat. §33 - 474(d).
(Set forth here the resolution of amendment and/or restatement. Use a 8 1/2 X 11 attached sheet if more space is needed).

(If 2A is checked, go to 5 to complete this certificate. If 2B or 2C is checked, complete 3A or 3B. If 2D is checked, complete 4)

3. (Check one)

- A. This certificate purports merely to restate but not to change the provisions of the original Certificate of Incorporation as supplemented and amended to date, and there is no discrepancy between the provisions of the original Certificate of Incorporation as supplemented and amended to date, and the provisions of this Restated Certificate of Incorporation. (If 3A is checked, go to 5 to complete this certificate).
- B. This Restated Certificate of Incorporation shall give effect to the amendment(s) and purports to restate all those provisions now in effect not being amended by such new amendment(s). (If 3B is checked, check 4, if true, and go to 5 to complete this Certificate).

4. (Check, if true)

- This restated Certificate of Incorporation was adopted by the greatest vote which would have been required to amend any provision of the Certificate of Incorporation as in effect before such vote and supersedes such Certificate of Incorporation.

5. The manner of adopting the resolution was as follows: (Check one A, or B, or C).

A. By the board of directors and members, pursuant to Conn. Gen. Stat. §33 - 473.
Vote of Members: (Check (i) or (ii)).

(i) No members are required to voted as a class; the member's vote was as follows:

Vote Required for Adoption 1 Vote Favoring Adoption 1

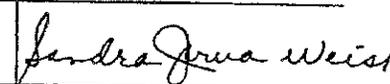

(ii) There are members of more than one class entitled to vote as a class. The designation of each class required for adoption of the resolution and the vote of each class in favor of adoption were as follows:
(Use an 8 1/2 x 11 attached sheet if more space is needed).

B. By the board of directors acting alone, pursuant to Conn. Gen. Stat. § 33 - 473(b)(2).

The number of affirmative votes required to adopt such resolution is: _____

The number of directors' votes in favor of the resolution was: _____

We hereby declare, under the penalties of false statement, that the statements made in the foregoing certificate are true:

(Print or Type)	Signature	(Print or Type)	Signature
Name of Pres. Asst. Pres. Sally Gammon		Name of Sec. Asst. Sec. Sandra Jarva Weiss	

C. The resolution was adopted by vote of at least two-thirds of the incorporators before the organization meeting of the corporation, and approved in writing by all applicants for membership entitled to vote.

We (at least two-thirds of the incorporators) hereby declare, under the penalties of false statement, that the statements made in the foregoing certificate are true.

BYLAWS
OF
AHLBIN CENTERS FOR REHABILITATION MEDICINE, INC.

(The "Center")

ARTICLE I

PURPOSES

Section 1.1 Objectives. The objectives and purposes for which the Center exists are as follows:

- A. To promote and carry out a program for the medical care, social education, vocational training and the rendering of other assistance to disabled and handicapped people regardless of age and regardless of the cause of the handicap.
- B. To provide for its regional citizens opportunities to achieve health, productivity and self esteem when they are challenged by injury or illness.
- C. To promote and carry on any educational activities relating to the medical care to, and rehabilitation of, the sick and injured and the promotion of health which, in the opinion of the Board of Directors, may be justified by the facilities, personnel or funds that are, or can be made, available
- D. To promote and carry on scientific research related to the care and rehabilitation of the sick and injured insofar as, in the opinion of the Board of Directors, such research can be carried on in, or in connection with, the Center.
- E. To participate, insofar as circumstances warrant, in any activity designed and carried on to promote the general health of the community.
- F. To do all such other things necessary, suitable and proper for the accomplishment of any of the purposes of the Center or attainment of any of the objectives of the Center herein mentioned either alone or in association with other individuals, corporations, partnerships or other entities, and in general, to do and perform such acts and transact such business in connection with the purposes and objectives of the Center not inconsistent with law, including but not limited to the following:
 - I. to acquire, lease, hold, manage, sell, mortgage and otherwise dispose of such real or personal property as may be convenient or necessary to carry out the purposes herein mentioned.

2. to borrow money and to issue bonds, debentures, notes and other evidences of indebtedness and obligations and to mortgage, pledge and otherwise charge any or all of its properties and assets to secure the payment thereof.
3. to solicit, receive and expend donations, bequests and/or legacies for any purposes or objectives of the Center.
4. to make gifts of real and personal property to corporations, trusts, funds, foundations, or other entities organized and operated exclusively for charitable, scientific or educational purposes, no part of the net earnings of which inures to the benefit of any private shareholders or individuals and no substantial part of the activities of which is carrying on propaganda or otherwise attempting to influence legislation.

Section 1.2 Limitations. The Center is organized exclusively for charitable, health care, educational, and scientific purposes as a non-profit organization.

ARTICLE II

OFFICES

Section 2.1 Principal Office. The principal office of the Center shall be at such place in the United States as the Board of Directors shall from time to time designate.

Section 2.2 Additional Offices. The Center may have such additional offices, either within or without the United States, as the Board of Directors may from time to time designate or the business of the Corporation may require.

ARTICLE III

MEMBERSHIP

Section 3.1 Sole Member. The Center shall have but one member, Southern Connecticut Health System, Inc., which shall have the right to elect the Board of Directors of the Center in accordance with these Bylaws, and shall have all of the other rights, powers and privileges usually or by law accorded to the members of a nonstock nonprofit corporation and not conferred thereby or by the Articles of Association or Bylaws upon the Board of Directors of the Center.

Section 3.2 Rights, Powers and Privileges. In addition to such other rights, powers and privileges as it may have by law, the Center's sole member shall have the following rights, powers and privileges:

- A. To approve the long range development plans, annual operating and capital budgets, programs and expenditures requiring Certificate of Need approval by appropriate governmental bodies, and plans that materially affect the growth, operations and development of the Center.
- B. To elect and remove members of the Board of Directors of the Center and non-voting directors in accordance with the provisions of these Bylaws.
- C. To elect and remove any officer of the Center in accordance with the provisions of these Bylaws.
- D. To vote upon all matters on which members are entitled to vote under the Nonstock Corporation Act of the State of Connecticut.
- E. To act on any other matters on which action by the member is provided for in these Bylaws.

Section 3.3 Meetings of the Member. The annual meeting of the member shall be held on such day and at such time and place as may be designated by the Board of Directors or the Chairman of the Board of Directors for the purposes set forth in Sections 3.1 and 3.2 herein and for the transaction of any other business as may properly come before such meeting. Regular meetings of the member shall be held at such times as the Board of Directors shall from time to time determine. Special meetings of the member may be called at any time by the Board of Directors, the Chairman of the Board of Directors, the Chief Executive Officer or the member. Each such request for a special meeting shall state the purposes for which the requested meeting is to be called. The member shall cast one vote on each matter submitted to a vote at each regular, annual and special meeting. Except as otherwise provided, any action required to be, or which may be, taken at any regular, annual or special meeting of the member may be taken without a meeting, without prior notice and without a vote, if a consent in writing, setting forth the action so taken, shall be signed by the member.

Section 3.4 Notice of Meeting. A notice of each meeting of the member shall be given in writing to the member not less than seven days or more than fifty days before the date of the meeting. Each notice shall state the place, day and hour of the meeting. The general purpose for which a special meeting is called shall be stated in the notice thereof, and no other business shall be transacted at the meeting.

Section 3.5 Waiver of Notice. Notice of any meeting of the member may be waived in writing by the member.

ARTICLE IV**BOARD OF DIRECTORS**

Section 4.1 General Powers. Subject to the rights, powers and privileges accorded to the member by law, the Articles of Association or these Bylaws, the activities, property and affairs of the Center shall be managed by the Board of Directors, which shall exercise all of the powers and responsibilities conferred upon the Board of Directors by the Connecticut Nonstock Corporation Act, the Articles of Association and these Bylaws as each may be amended from time to time.

Section 4.2 Number of Directors and Qualification. The Board of Directors shall consist of not less than ten and not more than sixteen persons, which number shall be fixed from time to time by the member. At each annual meeting of the member, the directors shall be elected by the member to take office immediately following such annual meeting. The member shall elect to the Board of Directors as directors or as non-voting directors all of the persons who are directors or non-voting directors of the member, respectively, and no other persons shall be so elected.

A person who is an ex-officio director with vote of the Board of Directors of the member and who is elected to the Board of Directors shall be an ex-officio director with vote of the Board of Directors and shall be considered a director for all purposes of these Bylaws except he shall not be subject to the age or term of office provisions.

The member also may elect non-voting directors. Non-voting directors shall receive notice of, and shall be entitled to attend and speak at, meetings of the Board of Directors and shall be eligible to serve as voting members of committees. Such non-voting directors shall be subject to the age and term of office provisions of these Bylaws, but shall not count toward quorum requirements, shall not have voting rights, shall not be considered in calculating the number of directorships and shall not be considered directors for any other purpose under these Bylaws.

Except as otherwise provided in this Section 4.2, a director who has attained age 72 shall be ineligible to continue to serve as a director after the annual meeting of the Board of Directors next following the date the director attains age 72.

Section 4.3 Terms of Directors. Directors shall hold office for a term of four years or until their successor has been elected and qualified, except that a director may be elected for a term of less than four years as provided in Section 4.12 or if the member deems it necessary to serve the objective that the terms of office of approximately one-fourth of all directors shall expire at each annual meeting. A director shall cease to be in office upon his death, resignation, removal or cessation of his term as a director of the member. At each annual meeting, the

member shall elect directors to succeed the directors whose terms are then expiring and to fill any new directorships fixed by the member. Such directors shall take office immediately following such annual meeting. No director shall serve more than two successive terms of three or more years. Not included in this limitation shall be a term of less than three years due to effectuating staggered terms or due to a director completing a term due to the death, removal or resignation of another director. Also not included in this limitation shall be any term served prior to March 30, 1995. A director who has served two successive terms of three or more years may again serve as a director following the expiration of a period of not less than one year during which time such individual does not serve as a director.

Directors ex-officio shall hold office for a term of one year or until their successors are elected and qualified or, if sooner, until they no longer are serving in the positions that entitle such persons to such ex-officio directorships.

Non-voting directors shall be elected for a term of four years or until their successors are elected and qualified and shall be subject to the terms of office provisions described in these Bylaws.

Section 4.4 Annual Meeting. The annual meeting of the Board of Directors shall be held each year on such date, at such time, and at such place as the Board of Directors may determine. At such meeting, the Board of Directors shall elect the subordinate officers of the Center and shall transact such other business relating to the affairs of the Center as may come before the meeting. No notice need be given of an annual meeting of the Board of Directors. There shall be no voting by proxy.

Section 4.5 Regular and Special Meetings. Regular meetings of the Board of Directors shall be held at such times as the Board of Directors shall from time to time determine. Special meetings of the Board of Directors may be called at any time by the Chairman, the Chief Executive Officer, or upon the written request of a majority of the directors then in office. Meetings of the Board of Directors may be held within or without the State of Connecticut and shall be held at such place as shall be designated in the notice of the meeting. Except as otherwise provided in these Bylaws, two days' written or oral notice shall be given of each special meeting of the Board of Directors. No notice need be given of a regular meeting of the Board of Directors. Neither the business to be transacted at, nor the purpose of, any regular or special meeting of the Board of Directors need be specified in any notice or waiver of notice of such meeting unless otherwise required by law or specified herein. There shall be no voting by proxy.

Section 4.6 Quorum. A majority of the directors shall constitute a quorum at all meetings of the Board of Directors.

Section 4.7 Vote Required for Action. The act of a majority of the directors present at a meeting at which a quorum is present shall be the act of the Board of Directors, unless the act of a greater number is required by these Bylaws or by law.

Section 4.8 Action Without Meeting. If all the directors severally or collectively consent in writing to any action taken or to be taken by the Center, the action shall be as valid as though it had been authorized at a meeting of the Board of Directors, and such written consent or consents shall be filed in the corporate minute book.

Section 4.9 Participation by Conference. A director may participate in a meeting of the Board of Directors by means of a conference telephone or similar communications equipment enabling all directors participating in the meeting to hear one another, and such participation in a meeting shall constitute presence in person at such meeting.

Section 4.10 Resignation of Directors. Any director and any non-voting director may resign at any time by giving written notice to the Board of Directors or to the Chairman, the Chief Executive Officer or the Secretary. The resignation shall take effect at the time specified in the notice and, unless otherwise specified in it, acceptance of the resignation shall not be necessary to make it effective.

Section 4.11 Removal of Directors. Any director and any non-voting director may be removed from office, with or without cause, at any time, regardless of the term for which such director may have been elected, by the member at any regular, annual or special meeting.

Section 4.12 Vacancies. In case of any vacancy in the Board of Directors by reason of the death, resignation, or removal of any director, the member may fill such vacancy for the remaining term of such directorship or, for any new or unoccupied directorships, may elect directors to serve until the next annual meeting.

ARTICLE V

COMMITTEES

Section 5.1 Establishment of Committees. The Board of Directors may, from time to time, establish such committees of the Board of Directors with such responsibilities as the Board of Directors shall determine. All committees shall act in an advisory capacity only and shall have no power or authority to bind the Center. Committees of the Board of Directors shall be standing and special. The standing committees shall include the Audit Committee, Development Committee, Director Affairs Committee, Finance Committee, Investment Committee, and Management Affairs Committee.

Section 5.2 Appointment of Members. Except as otherwise provided in these Bylaws, all committee chairmen and committee members shall be appointed from among the directors or others by the Chairman of the Board of Directors. The Chairman of the Board of Directors may

increase or decrease the number of members on a committee, may fill vacancies on a committee and may remove, with or without cause, any chairman or member of a committee.

Section 5.3 Quorum; Vote Required for Action. A majority of the members of any committee shall constitute a quorum for the transaction of business at all meetings of the committee. The act of a majority of the members of any committee present at a meeting at which a quorum is present shall be the act of such committee, unless the act of a greater number is required by these Bylaws, by resolution of the Board of Directors or by law.

Section 5.4 Meetings of Committees. Except as otherwise provided in these Bylaws, each committee shall establish its own rules and procedures and shall fix the time and place of its meetings. Each committee shall keep minutes of its meetings which shall be made available to the Board of Directors upon request.

Section 5.5 Audit Committee. The Audit Committee shall cause an annual audit to be made of the books, accounts and records of the Center by certified public accountants under the supervision of the Audit Committee. The Audit Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 5.6 Development Committee. The Development Committee shall recommend policies and procedures for the development, growth, and management of the endowment funds of the Center and shall consider funding requests from affiliates. The Development Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 5.7 Director Affairs Committee. The Director Affairs Committee shall develop criteria for membership on the Board of Directors and its committees and shall consider the eligibility requirements and qualification specified in these Bylaws, as well as the interest and participation in Center matters of the individuals under consideration. It shall nominate for election members of the Board of Directors and shall assist in the selection of individuals for committee assignments. The Director Affairs Committee also shall review the performance of directors and recommend amendments to the Center's and Auxiliary's Bylaws and shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 5.8 Finance Committee. The Finance Committee shall review and recommend to the Board of Directors annual operating and capital budgets for the Center and shall monitor and oversee the financial performance of the Center. The Finance Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 5.9 Investment Committee. The Investment Committee shall recommend policies and procedures for the investment of all funds of the Center and shall monitor and evaluate the performance of any investment managers charged with the investment of funds of the Center. The Investment Committee shall perform such other functions as a duly adopted

resolution of the Board of Directors may provide. The Chief Executive Officer and the Treasurer shall be members of the Investment Committee.

Section 5.10 Management Affairs Committee. The Management Affairs Committee shall establish performance goals for the Chief Executive Officer and President and shall conduct annual evaluations of their performance. It shall also review and recommend to the Board of Directors human resource, fringe benefit, and compensation policies and monitor compliance therewith and shall act in an advisory capacity to the Chief Executive Officer. The Management Affairs Committee also shall perform such other functions as a duly adopted resolution of the Board of Director may provide.

Section 5.11 Professional and Quality Review Committee. The Professional and Quality Review Committee shall compile and review information relating to the care and treatment of patients for the purposes of establishing mechanisms and policies for evaluating and improving quality of health care and reducing morbidity and mortality, performance improvement and risk management functions related to patient care and safety. The Professional and Quality Review Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

ARTICLE VI

OFFICERS

Section 6.1 Principal and Subordinate Officers. The principal officers of the Center shall be Chairman of the Board, Vice Chairmen of the Board, Chief Executive Officer, President, Secretary, and Treasurer. The subordinate officers shall consist of such other officers, assistant officers and agents as may be deemed necessary and as are elected or appointed by the Board of Directors, the Chief Executive Officer or as may be chosen in such other manner as may be prescribed or permitted by these Bylaws. Any two or more offices may be held by the same person provided that the same individual shall not simultaneously occupy the offices of (i) Chief Executive Officer or President and (ii) Secretary. The Chairman of the Board and Vice Chairmen shall be selected from among members of the Board of Directors.

Section 6.2 General Authority and Duties. All officers and agents of the Center shall have such authority and perform such duties in the management of the Center as may be provided in these bylaws or as may be determined by resolution of the Board of Directors not inconsistent with these Bylaws.

Section 6.3 Election, Term of Office, and Qualifications. The principal officers shall be chosen annually by the member at its annual meeting or as soon thereafter as conveniently possible. Subordinate officers may be elected or appointed by the Board of Directors or may be appointed by the Chief Executive Officer or any other principal officer to whom the Chairman of

the Board of Directors shall delegate the authority of appointment. Each officer shall hold office until his successor is chosen and qualified, or until his death, his resignation, or his removal, whichever event shall first occur. Election or appointment of an officer or agent shall not of itself create any contractual rights. An individual may not serve in the office of Chairman or Vice Chairman for more than four consecutive one year terms. Not included in this limitation shall be any term served prior to March 30, 1995 or any partial term served to fill a vacancy.

Section 6.4 Removal. Any officer or agent may be removed by the member whenever in its judgment the best interests of the Center will be served by so doing. Any subordinate officer or agent may also be removed by the Chief Executive Officer, or by any other principal officer having authority to designate or appoint the officer or agent to be removed, with or without cause. Any removal shall be without prejudice to the contract rights, if any, of the person so removed.

Section 6.5 Resignations. Any officer or agent may resign at any time by giving written notice to the Board of Directors or to the Chairman, the Chief Executive Officer or the Secretary. The resignation shall take effect at the time specified in the notice and, unless otherwise specified in it, acceptance of the resignation shall not be necessary to make it effective.

Section 6.6 Vacancies. Any vacancy in any office occurring by reason of death, resignation, removal, or any other cause shall be filled for the unexpired portion of the term in the manner prescribed in these Bylaws for election or appointment to the office.

Section 6.7 Chairman of the Board. The Chairman of the Board shall preside at the annual meeting of the Center and at all meetings of the Board of Directors, shall appoint members of all committees and the chairmen thereof, and shall perform such duties as the Board of Directors may from time to time assign to the Chairman of the Board and such other duties as are usual to this office.

Section 6.8 Vice Chairmen of the Board. The Vice Chairmen of the Board shall perform the duties of the Chairman of the Board in the event of the Chairman's absence or disability and shall assist the Chairman of the Board in such duties as the Chairman of the Board may from time to time assign to the Vice Chairmen of the Board.

Section 6.9 Chief Executive Officer. The Chief Executive Officer shall be responsible for seeing that the resolutions and actions of the Board of Directors are carried into effect, and for reporting to the Board of Directors on the conduct and management of the affairs of the Center.

Section 6.10 President. The President shall exercise general supervision of the business and affairs of the Center and over its officers and employees. The President shall have the authority to appoint and remove employees of the Center, including management level officers, and may delegate to such officers and employees such authority as he deems appropriate provided,

however, he shall be responsible for their actions. The President shall have such additional duties and responsibilities as are assigned to him by the Chief Executive Officer.

Section 6.11 Treasurer. The Treasurer shall have supervision over the receipt and custody of the Center's funds, and shall cause to be kept correct and complete books and records of account, including full and accurate accounts of receipts and disbursements in books belonging to the Center, and in general shall perform all the duties incident to the office of Treasurer and such other duties as may be assigned to him by the Board of Directors, the Chairman of the Board of Directors, or the Chief Executive Officer. The Treasurer shall render to the Chairman of the Board, the Chief Executive Officer and the Board of Directors promptly upon its completion an annual report of the financial condition and operation of the Center prepared and certified by the independent certified auditors appointed by the Board of Directors.

Section 6.12 Secretary. The Secretary shall keep minutes of the proceedings of the Board of Directors shall give or cause to be given all notices in accordance with the provisions of these Bylaws or as required by law; and shall be custodian of the corporate records and of the seal of the Center. The Secretary also shall perform all duties incident to the office of Secretary and such other duties as may be assigned to him by the Board of Directors, the Chairman of the Board of Directors, or the Chief Executive Officer.

ARTICLE VII

INDEMNIFICATION OF CENTER DIRECTORS, NON-VOTING DIRECTORS, CORPORATORS, OFFICERS, EMPLOYEES AND AGENTS

Section 7.1 Rights of Indemnification. Directors, non-voting directors, officers, employees, and agents shall have the rights of indemnification provided by Section 33-454a of the Connecticut General Statutes.

Section 7.2 Payment of Expenses in Advance. Expenses which may be indemnifiable under the provisions of Section 33-454a of the Connecticut General Statutes, incurred in defending a proceedings, may be paid by the Center in advance of the final disposition of such proceeding when authorized by the Board of Directors upon agreement, by or on behalf of the individual entitled to be indemnified, to repay such amount if he is later found not entitled to be indemnified by the Center as authorized under the Bylaws.

ARTICLE VIII

THE AUXILIARY OF AHLBIN CENTERS FOR REHABILITATION MEDICINE, INC.

Section 8.1 Purpose. The purposes of the Auxiliary shall be to promote the objectives of the Center and support its activities throughout the community. The Auxiliary shall not act contrary to the policies set forth by the Center's Board of Directors.

Section 8.2 Operation of Auxiliary. The Auxiliary shall have the right pursuant to its Constitution and Bylaws, to elect its officers, maintain its own bank accounts and collect membership dues.

Section 8.3 Adoption and Amendment of Constitution or Bylaws. The Auxiliary shall have the authority, subject to the review and approval of the Center's Board of Directors, to adopt and amend their Constitution and Bylaws.

ARTICLE IX

MISCELLANEOUS PROVISIONS

Section 9.1 Amendment. These Bylaws may be amended or repealed, and new Bylaws may be adopted, at any regular, annual or special meeting of the member. Any notice of a meeting of the member at which these Bylaws are to be amended or repealed, or new Bylaws are to be adopted, shall be given in writing not less than seven days or more than fifty days prior to such meeting and shall include notice of such proposed action..

Section 9.2 Fiscal Year. The fiscal year of the Center shall end on September 30 in each year unless the Board of Directors shall determine otherwise.

Section 9.3 Seal. The seal of the Center shall be circular in form and shall bear the name of the Corporation and shall be in such form as the Board of Directors may determine.

Section 9.4 Execution of Negotiable Instruments. All checks, drafts, notes, bonds, bills of exchange and orders for the payment of money shall be signed by the President, Chief Executive Officer, or such officer or officers of the Center as the Board of Directors shall specify from time to time. The Board of Directors may authorize the use of facsimile signatures of any officer or employee in lieu of manual signatures.

Section 9.5 Execution of Deeds and Contracts. Subject to the general directions of the Board of Directors, all deeds and mortgages made by the Center and all other written contracts, agreements and undertakings to which the Center shall be a party shall be executed in

its name by the Chief Executive Officer, President or such other officer as may be specified by the Board of Directors or authorized by the Chief Executive Officer or President and, when requested, the Secretary shall attest to such signatures and affix the corporate seal to such instruments.

Section 9.6 Conflict of Interest. If any director or member of a director's immediate family has an interest in any contract or transaction involving the Corporation, the provisions of Section 33-457 of the Connecticut General Statutes shall determine the obligation of a director to disclose such interest to the Board of Directors and the legal effect of such contract or transaction.

Section 9.7 Connecticut General Statutes. Any reference herein to a section of the Connecticut General Statutes shall include reference to any amendment of such section or any successor statute.

Section 9.8 Pronouns. References herein to the masculine shall include references to the feminine, references to the singular shall include references to the plural and references to the plural shall include references to the singular, where the context of the language involved so permits or requires.

AMENDED AND RESTATED
CERTIFICATE OF INCORPORATION

UNITED HOME CARE, INC.

(the "Corporation")

1. The name of the Corporation is United Home Care, Inc.
2. The nature of the business to be transacted, or the purposes to be promoted or carried out by the Corporation are as follows:
 - a. United Home Care, Inc. shall operate to provide home health care services in accordance with a plan of care established by the client's physician. Services provided by United Home Care, Inc. shall include skilled nursing, physical therapy, occupational therapy, medical social work and homemaker home health aide services. The goal in providing these services is to promote, maintain and restore health, prevent disease and disability, prevent inappropriate institutionalization, and to maintain terminally ill persons in comfort and dignity during the end stages of life. In addition, United Home Care, Inc. shall assist in the development of sound community health programs by coordinating its programs with those of other health, social and welfare agencies, both private and public, including governmental bodies.
 - b. The Corporation may engage in or pursue such other purposes as may lawfully be engaged in or pursued by corporations formed under The Connecticut Revised Nonstock Corporation Act of the Connecticut General Statutes.
3. The Corporation is nonprofit, and the Corporation shall not have or issue shares of stock or pay dividends. The Corporation shall have but one member, Southern Connecticut Health System, Inc., which shall have all of the rights, powers and privileges provided in the Bylaws and by the State of Connecticut. Subject to the rights, powers and privileges accorded to Southern Connecticut Health System, Inc., the Corporation shall be governed by its Board of Directors.
4. Notwithstanding any other provision of this Certificate of Incorporation, the Corporation shall not carry on any activities not permitted to be carried on (a) by a corporation exempt from federal income tax under Section 501(c)(3) of the Internal Revenue Code of 1986 or (b) by a corporation, contributions to which are deductible under Section 170(c)(2) of the Internal Revenue Code of 1986.

5. No part of the net earnings of the Corporation shall inure to the benefit of any private individual and no substantial part of the activities of the Corporation shall consist of carrying on propaganda or otherwise attempting to influence legislation, or in any way participating in, or intervening in (including the publishing or distributing of statements) any political campaign on behalf of any candidate for public office. No part of the Corporation's net earnings shall be distributable to its directors or officers, provided, that nothing herein shall restrict the right of the Corporation to reasonably compensate its officers and directors or any of them, for services rendered to the Corporation, or to reimburse any of them for expenses, disbursements or liabilities properly made or incurred for or on account of the Corporation.
6. Upon dissolution or termination of the existence of the Corporation, all of its property and assets shall, after payment of all liabilities of the Corporation and of all expenses of such dissolution or termination, be delivered, conveyed and paid over (subject to any restrictions imposed by any applicable will, deed, grant, conveyance, agreement, memorandum, writing or other governing document) to Southern Connecticut Health System, Inc. or to such affiliate of Southern Connecticut Health System, Inc. as Southern Connecticut Health System, Inc. shall designate at the time of such dissolution or termination, as long as Southern Connecticut Health System, Inc. or such designated affiliate, as the case may be, is, at the time of such dissolution or termination, an organization that qualifies as an exempt organization under Section 501(c)(3) of the Internal Revenue Code of 1986 or, if, at the time of such dissolution or termination, Southern Connecticut Health System, Inc. is not in existence or does not qualify, or does not designate any affiliate of Southern Connecticut Health System, Inc. that qualifies, as an exempt organization under Section 501(c)(3) of the Internal Revenue Code of 1986, to one or more other charitable, scientific or educational organizations located in the service area of the Corporation and qualified under Section 501(c)(3) of the Internal Revenue Code of 1986, in such proportions and for such exclusively charitable, scientific or educational purposes as the Board of Directors of the Corporation shall determine. No part of the Corporation's assets shall ever be distributed to its directors or officers, or inure to the benefit of any private individual.
7. Any reference herein to a section of the Internal Revenue Code of 1986 shall mean such section as it is constituted at the time of the execution of this Certificate of Incorporation and as it may hereafter be amended, added to or otherwise changed, and shall also include any other provisions of similar purpose which may hereafter become applicable to the Corporation.
8. Other provisions:

- a. This Certificate of Incorporation may be amended upon the occurrence of all of the following: (i) approval of the proposed amendment by a majority of all members of the Board of Directors, (ii) recommendation of the proposed amendment by the Board of Directors to the member and (iii) the approval of the proposed amendment by the member. For any meeting of the Board of Directors or of the member at which the Board of Directors or the member, as the case may be, is to consider a proposed amendment to this Certificate of Incorporation, notice of such meeting shall be given in the manner required by the Bylaws and shall state that the purpose, or one of the purposes, of the meeting is to consider the proposed amendment and shall contain or be accompanied by a copy or summary of the proposed amendment.
 - b. The Bylaws of the Corporation may be amended or repealed by the member upon the approval of, and recommendation of, the Board of Directors as provided in the Bylaws.
 - c. Directors may only be removed from the Board of Directors for cause as provided in the Bylaws.
9. The liability of a Director to the Corporation and the member shall be limited to the full extent provided in Section 33-1026(b)(4) of the Connecticut Revised Nonstock Corporation Act as it may be amended from time to time.

AMENDED AND RESTATED
BYLAWS OF
UNITED HOME CARE, INC.
(the "Corporation")

ARTICLE I

GENERAL

The Corporation shall operate to provide home health care services in accordance with a plan of care established by the client's physician. Services provided by the Corporation shall include skilled nursing, physical therapy, occupational therapy, medical social work, homemaker home health aide services, and such other services as shall be authorized by the Board of Directors. The goal in providing these services is to promote, maintain and restore health, prevent disease and disability, prevent inappropriate institutionalization, and to maintain terminally ill persons in comfort and dignity during the end stages of life. In addition, the Corporation shall assist in the development of community health programs by coordinating its program with those of other health, social and welfare agencies, both private and public, including appropriate governmental bodies.

ARTICLE II
MEMBERSHIP

2.1 Sole Member. The Corporation shall have but one member, Southern Connecticut Health System, Inc. (the "Member"), which shall have all of the rights, powers and privileges provided in these Bylaws and by the State of Connecticut. Subject to the rights, powers and privileges accorded to Southern Connecticut Health System, Inc., the Corporation shall be governed by its Board of Directors.

2.2 Rights, Powers and Privileges. The Member shall have the following rights, powers and privileges:

(i) To approve of (a) the annual strategic plan and operating and capital budgets for the operation of the business of the Corporation, (b) any certificate of need program of the Corporation or any other expenditure, plan or program of the Corporation that is reasonably likely to have a material effect on the growth, operation or development of the Corporation, (c) the incurrence by the Corporation of any indebtedness aggregating in excess of \$50,000 through any single transaction or series of related transactions and, if the total indebtedness of the Corporation is in excess of \$100,000 for any fiscal year of the Corporation, the incurrence of any indebtedness during such fiscal year and (d) any sale,

assignment, encumbrance, lease or other transfer of any material assets of the Corporation not in the ordinary course of the Corporation's business.

(ii) To approve of each fundraising plan submitted by the Corporation with respect to its fundraising activities and to manage centrally the charitable contributions, endowments and other cash or investment assets of the Corporation.

(iii) To vote upon all matters on which members are entitled to vote under The Connecticut Revised Nonstock Corporation Act (as amended from time to time), including, without limitation, (a) any sale, lease, exchange or other disposition of all or substantially all of the assets of the Corporation, (b) any merger or consolidation involving the Corporation and (c) the liquidation or dissolution of the Corporation; and to vote on (x) any contract to manage or administer the Corporation or a substantial part of the business of the Corporation, (y) the creation or acquisition of any new affiliate of the Corporation and (z) any direct or indirect participation by the Corporation in any affiliation, network, system or alliance of health care providers for the provision of health care services.

(iv) To elect and remove the Directors in accordance with the provisions of these Bylaws.

(v) To approve all amendments to the Certificate of Incorporation, Bylaws and other governance documents of the Corporation in accordance with the provisions of these Bylaws.

(vi) To approve any name change of the Corporation or the use of any trade name.

(vii) To act on any other matters on which action by members is required or permitted by these Bylaws.

2.3 Member Meetings. The annual meeting of the Member shall be held on such day and at such time and place as may be designated by the Board of Directors or the Chairman of the Board for the purposes set forth in Section 2.2 herein and for the transaction of any other business as may properly come before such meeting. Regular meetings of the Member shall be held at such times as the Board of Directors shall from time to time determine. Special meetings of the Member may be called at any time by the Board of Directors, the Chairman of the Board, the Chief Executive Officer, the President or the Member. Each such request for a special meeting shall state the purposes for which the requested meeting is to be called. The Member shall cast one vote on each matter submitted to a vote at each regular, annual or special meeting. Any action required to be, or which may be, taken at any regular, annual or special meeting of the Member may be taken without a meeting, without prior notice and without a vote, if a consent in writing, setting forth the action so taken, shall be signed by the Member and filed with the minutes of the meetings of the Member.

2.4 Notice of Meeting. A notice of each meeting of the Member shall be given in writing to the Member not less than ten (10) days nor more than fifty (50) days before the date of such meeting. Each notice shall state the place, day and hour of the meeting. The general purpose for which a special meeting is called shall be stated in the notice thereof, and no other business shall be transacted at the meeting.

2.5 Waiver of Notice. Notice of any meeting of the Member may be waived in writing by the Member.

ARTICLE III **BOARD OF DIRECTORS**

3.1 Powers and Duties. Subject to the rights, powers and privileges accorded to the Member, the activities, property and affairs of the Corporation shall be managed and conducted by the Board of Directors. Each Director is expected to attend at least fifty percent (50%) of the meetings of the Board of Directors and actively serve on all Committees to which he or she is appointed.

3.2 Number of Directors and Qualifications. The Board of Directors shall consist of not less than ten (10) nor more than twenty-two (22) Directors. At each annual meeting of the Member, the Directors shall be elected by the Member to take office immediately following such annual meeting. At each of the first, second and third annual meetings of the Member following April 15, 1997, the Member shall elect to the Board of Directors of the Corporation as Directors (i) each individual who was a Director on April 15, 1997, if the term of such individual has expired, such individual is eligible for reelection and such individual has not, as of the date of such annual meeting, either resigned or been removed from the Board of Directors and (ii) such other individuals as the Member shall then deem appropriate. On or before April 15, 2000, each of the Directors then in office shall submit their resignations as Directors effective April 15, 2000, or they otherwise may be removed by the Member. Upon such Directors' resignation or removal and at each annual meeting of the Member thereafter, the Member shall elect to the Board of Directors of the Corporation as Directors each individual who is then serving on the Board of Directors of the Member, and no others, such that the Board of Directors of the Corporation shall be identical in composition to the Board of Directors of the Member.

3.3 Terms of Directors. The Directors shall be elected at annual meetings of the Member and shall hold office until the annual meeting following expiration of their term of office or until the election of their successors. Directors shall be elected for a term of three (3) years, except that a Director may serve less than three (3) years if such Director is removed or resigns, or is appointed to fill a vacancy as provided in Section 3.10. An individual shall cease to be a Director upon his death, resignation, removal or, if such Director is also a member of the Board of Directors of the Member, the cessation of such Director's term as a director of the Member.

No Director may serve on the Board of Directors for more than two consecutive full terms. Following the second consecutive term of service, one year must elapse before an individual shall again be eligible to serve on the Board of Directors. Notwithstanding the foregoing, a Director may be eligible for service beyond two consecutive terms if necessary to complete an elected term of office.

3.4 Honorary Director. The privilege of Honorary Director shall be extended to a person as the Board of Directors may elect. The Honorary Director shall retain the privilege of attending meetings and participating in discussion but shall not serve as a voting Director. The term shall be lifetime.

3.5 Board Meetings. The Board of Directors may hold its meetings, annual, regular or special, at such place or places within or without the State of Connecticut as it may from time to time by resolution determine or as shall be specified or fixed in the notice thereof, if any. An annual meeting of the Board of Directors for the election of the Board Officers (as defined in Section 5.1) and for the transaction of such other business as shall come before the Board of Directors at such meeting shall be held on such date, and at such time, as shall be specified in a resolution adopted by the Board of Directors then in effect. Regular meetings of the Board of Directors shall be held at least ten (10) times annually on such dates, and at such times, as shall be specified in a resolution adopted by the Board of Directors then in effect, or, if there shall not be any such resolution then in effect, as shall be specified in the notices of such meetings. Special meetings of the Board of Directors shall be held whenever called by the Chairman of the Board or by at least two (2) of the Directors then in office.

3.6 Notice of Meeting. No notice need be given of an annual meeting of the Board of Directors, unless otherwise required by statute or these Bylaws. At least seven (7) days' written or oral notice of each special or regular meeting stating the time and place of the meeting shall be given to each Director. Neither the business to be transacted at, nor the purpose of, any regular or special meeting of the Board of Directors need be specified in the notice or waiver of notice of such meeting unless otherwise required by statute or these Bylaws.

3.7 Quorum, Adjournment and Manner of Acting. A majority of the Directors shall constitute a quorum for the transaction of business at all meetings of the Board of Directors. Any meeting of the Board of Directors may be adjourned from time to time by a majority vote of the Directors present at such meeting. In the absence of a quorum for any such meeting, a majority of the Directors present thereat may adjourn such meeting to another time and place until a quorum shall be present. Notice of any adjourned meeting need not be given unless the meeting shall have been adjourned for more than three days. The act of a majority of the Directors present at any meeting at which a quorum is present at the time of the act shall be the act of the Board of Directors, except as may be otherwise specifically provided by statute or these Bylaws. One or more Directors may participate in a meeting of the Board of Directors by use of a conference telephone or similar communications equipment which allows all persons participating in the meeting to communicate with one another. Any action required to be, or which may be, taken at any regular, annual or special meeting of the Board of Directors may be taken without a

meeting, without prior notice and without a vote, if a consent in writing, setting forth the action so taken, shall be signed by each member of the Board of Directors and filed with the minutes of the meetings of the Board of Directors or with the corporate records.

3.8 Resignation. Any Director may resign from the Board of Directors at any time by giving written notice to the Chairman of the Board. Such resignation shall take effect at the time specified therein. Unless otherwise specified therein, the acceptance of such resignation shall not be necessary to make it effective.

3.9 Removal. A Director may be removed from the Board of Directors only by the Member for cause; provided, however, that such action of the Member shall have been approved by the affirmative vote of three-quarters (3/4) of the directors then serving on the Board of Directors of the Member. Such action of the Member may be taken at any annual, regular or special meeting only if such meeting was called for the purpose of the proposed removal and due notice of the proposed removal shall have been given to the Member stating that the purpose, or one of the purposes, of such meeting is the proposed removal. The Director involved shall be given an opportunity to be present and to be heard at any meeting at which his removal is considered. No Director removed pursuant to this Section 3.9 shall subsequently hold or be nominated or proposed for any directorship or office at the Corporation. For purposes of this Section 3.9, "cause" with respect to any Director shall mean: (i) any act or omission of such Director that constitutes a breach of fiduciary duty by such Director under any applicable law, rule or regulation; or (ii) any vote by such Director in favor of a resolution approved by the Board of Directors if, as a consequence of the actions taken or not taken in connection with the implementation of such resolution, the Corporation or any affiliate of the Corporation (a) violates a law, rule or regulation to the material detriment of the Corporation or such affiliate or (b) takes an action specifically prohibited by, or fails to take any action required by, the Affiliation Agreement, dated as of April 2, 1997, between the Corporation and the Member.

3.10 Vacancies. Any vacancy on the Board of Directors may be filled only by the Member. The person elected to fill such vacancy is to hold office as a Director for the unexpired portion of the term of his or her predecessor. A Director elected to fill a vacancy shall complete the unexpired term of the Director he or she replaces and shall not then become ineligible for serving two consecutive terms of office as provided in Section 3.3 of these Bylaws.

ARTICLE IV **COMMITTEES**

4.1 The Chairman of the Board shall designate members to constitute a Committee unless otherwise stated in these Bylaws. The Chairman of the Board, the President and the Chief Executive Officer are members ex-officio of all Committees except the Nominating Committee. Committee members except the Committee chairman and members of the Executive and Finance Committees may be selected from sources other than the active Board of Directors. With the

exception of the Executive Committee, Committees shall act in an advisory capacity only and shall have no power or authority to bind the Corporation.

4.2 There shall be an Executive Committee, a Nominating Committee, a Finance Committee, a Planning and Development Committee, a Personnel Committee, a Community Relations and Fund Raising Committee, a Professional Advisory Committee, and such additional Committees of the Board of Directors with such duties and responsibilities as are provided in these Bylaws or as the Chairman of the Board may from time to time direct. Except as provided in these Bylaws, members of Committees shall be appointed at the annual meeting of the Board of Directors or at any regular or special meeting of the Board of Directors called for the purpose of appointing members of Committees and shall serve at the pleasure of the Board of Directors or until their successors are elected.

4.3 The Executive Committee shall consist of the Chairman of the Board, the Vice Chairmen, Secretary, Treasurer, Chairman of the Finance Committee, Chairman of the Planning and Development Committee and the Chief Executive Officer, all of whom shall be Directors. Except as otherwise expressly provided in these Bylaws or any amendment thereto, the Executive Committee shall exercise all the powers of the Board of Directors in the intervals between meetings of the Board of Directors and shall report its doings to the Board of Directors as requested.

4.4 The Nominating Committee shall consist of five (5) members. The Nominating Committee shall annually offer nominations for Board Officers to fill any vacancies caused by the expiration of a Board Officer's term at the end of that year. The chairman of the Nominating Committee shall be elected from its members by a majority vote of the Committee.

4.5 The Finance Committee shall consist of not less than five (5) and not more than nine (9) members of the Board of Directors including the Treasurer. Except as otherwise expressly provided in these Bylaws or any amendment thereto, the Finance Committee shall keep the Board of Directors advised on all business and financial matters, including, but not limited to, monthly and yearly financial reports and any changes in financial policy. In addition, it shall make recommendations relative to investment funds and report to the Board of Directors the status of all investment funds on at least a quarterly basis. It shall prepare and present in cooperation with the President and the Chief Executive Officer all budgets for the calendar and fiscal year and shall have responsibility for making recommendations with respect to maintaining or renovating the Corporation's headquarters, grounds, furnishings and equipment.

4.6 The Planning and Development Committee shall consist of not less than five (5) members. Except as otherwise expressly provided in these Bylaws or any amendment thereto, the Planning and Development Committee shall be responsible for making recommendations with respect to planning, evaluating and interpreting the strategic direction of the Corporation in cooperation with the President and the Chief Executive Officer. In addition, it shall plan and

present an orientation program for new members of the Board of Directors and assume responsibility for evaluation of the Corporation's programs.

4.7 The Personnel Committee shall consist of not less than five (5) members. Except as otherwise expressly provided in these Bylaws or any amendment thereto, the Personnel Committee shall: (a) Annually develop, review and recommend changes in the employment policies for all employees, (b) Consult with the President and the Chief Executive Officer on matters concerning staff, (c) Recruit and assist with the training and supervision of the Corporation's volunteers and (d) Hear and decide grievances from eligible employees.

4.8 The Community Relations and Fund Raising Committee shall consist of not less than three (3) members. Except as otherwise expressly provided in these Bylaws or any amendment thereto, the Community Relations and Fund Raising Committee shall evaluate public awareness of the services of the Corporation and make recommendations with respect to programs to improve the Corporation's relationships with the public. In addition, the Community Relations and Fund Raising Committee shall make recommendations for the development of programs for fundraising, provide liaisons with funding sources and prepare and supervise distribution of the annual report and general information pamphlets.

4.9 The Professional Advisory Committee shall consist of not less than six (6) members and shall have as members at least one physician, one public health nurse, one therapist (representing at least one of the skilled therapy services provided by the Corporation) and one medical social worker. Except as otherwise expressly provided in these Bylaws or any amendment thereto, the Professional Advisory Committee shall make recommendations with respect to the implementation, monitoring and integration of the various components of the Corporation's quality assurance program, including the annual review of applicable policies on scope of services, admission and discharge criteria, medical and dental supervision, plans of treatment, clinical records, personnel qualifications, standards of care and professional issues regarding patient care. In addition, the Professional Advisory Committee shall have such other functions and responsibilities as may be set forth in the State of Connecticut Department of Public Health Regulations.

4.10 Each Committee of the Board of Directors shall act in accordance with the following procedures: The Committee shall adopt a schedule of regular meetings and shall hold additional special meetings on the call of the chairman of the Committee or any two members of the Committee; notice of each such meeting shall be given in the manner provided for notice of regular meetings of the Board of Directors; a majority of voting members of the Committee shall constitute a quorum for all business; the act of a majority of voting members of the Committee present at any meeting duly held at which a quorum is present at the time of the act shall be the act of the Committee; and, if less than a quorum is present at any Committee meeting, a majority of the voting members of the Committee present may adjourn such meeting from time to time without notice.

4.11 The Chairman of the Board, except as otherwise expressly provided in these Bylaws or any amendment thereto: (a) Shall designate Committee officers; (b) Shall determine the term of office of Committee members and officers; and (c) May remove any member or officer of a Committee.

ARTICLE V OFFICERS

5.1 Officers and Qualifications. The Officers of the Corporation shall be the Chairman of the Board, the two Vice Chairmen of the Board, the Secretary, the Treasurer, the President, the Chief Executive Officer and such other Officers as shall be determined by the Board of Directors in accordance with Section 5.9 of these Bylaws. All Officers, other than those Officers that are employees of the Corporation (including, without limitation, the President), shall be members of the Board of Directors (such Officers being, the "Board Officers").

5.2 Term and Election of Officers. Each Board Officer (other than the Chief Executive Officer) shall be elected by the Board of Directors at the Board of Directors' annual meeting and shall hold office for a term of two years or until his successor shall have been duly elected and qualified, or until he or she shall have resigned or been removed; provided, however, that it shall be the policy of the Corporation that no such Board Officer shall hold office for more than two consecutive terms of two years except in the case of an emergency. The Chief Executive Officer shall be appointed by the Board of Directors and shall at all times be the same individual as is serving as the Chief Executive Officer of the Member. The President shall be appointed by the Chief Executive Officer after consultation with the Board of Directors. The Officers that are not Board Officers shall be appointed by the President after consultation with the Chief Executive Officer. The President and each Officer that is not a Board Officer shall hold office until a successor is chosen and qualified, or until the death, resignation or removal of such Officer, whichever event shall first occur.

5.3 The Chairman. The Chairman of the Board shall preside at each meeting of the Board of Directors and at each meeting of the Executive Committee. He or she shall see that all orders and resolutions of the Board of Directors and of Committees of the Board of Directors are carried into effect. In general, he or she shall perform all duties incident to the office of Chairman and such other duties as may from time to time be assigned to him or her by these Bylaws or by the Board of Directors. He or she shall be an ex-officio member with a vote on all Committees, except the Nominating Committee, and may call a meeting of any such Committee at any time.

5.4 Vice Chairmen of the Board. The Vice Chairmen of the Board shall have such general responsibility as may be assigned to him or her from time to time by the Board of Directors, and he or she shall perform all such other duties as from time to time may be assigned to him or her by the Board of Directors. At the request of the Chairman of the Board, or in case of his or her absence or inability to act, either Vice Chairman of the Board designated by the

Board of Directors shall perform the duties of the Chairman of the Board, and when so acting shall have all the powers of, and be subject to all the restrictions upon, the Chairman of the Board.

5.5 Treasurer. The Treasurer shall have overall responsibility for the funds, securities, financial record keeping, methods of disbursement and collection, and means of protection of corporate assets, and shall render to the Chairman of the Board and to the Directors at the meetings of the Board of Directors, or whenever they require it, a statement of transactions and financial condition of the Corporation. The Treasurer shall have oversight responsibility for the chief financial employee of the Corporation, and shall be a member of the Finance Committee.

5.6 Secretary. The Secretary shall keep the minutes of the meetings of the Board of Directors; be the custodian of the corporate records and of the seal of the Corporation; and, in general, perform all the duties incident to the office of Secretary and such other duties as from time to time may be assigned by the Board of Directors or the Chairman.

5.7 Chief Executive Officer: In addition to all other duties and responsibilities of the Chief Executive Officer specified in these Bylaws, the Chief Executive Officer shall be responsible for seeing that the resolutions and actions of the Board of Directors are carried into effect, and for reporting to the Board of Directors on the conduct and management of the affairs of the Corporation.

5.8 Additional Duties. All Officers shall perform such other duties as are usually incidental to their respective offices and such duties as are expressly prescribed for them elsewhere in these Bylaws and as may be assigned or delegated to them from time to time by the Board of Directors.

5.9 Other Officers. The Board of Directors may from time to time appoint such other Officers as the Board of Directors may deem necessary or advisable, each of whom shall hold office for such period and have such authority and perform such duties as the Board of Directors may from time to time determine.

5.10 Removal of Officers. Irrespective of term of office, but subject to any written contract rights: (i) the President may be removed at any time by the Chief Executive Officer after consultation with the Board of Directors; and (ii) each other Officer that is not a Board Officer may be removed at any time by the President after consultation with the Chief Executive Officer.

5.11 Vacancies. Except as otherwise provided in these Bylaws, if the office of: (i) any Board Officer becomes vacant due to death, resignation or removal, the vacancy may be filled for the unexpired term by the Board of Directors by the appointment of a current member of the Board of Directors to such office; (ii) the President becomes vacant due to death, resignation or removal, the vacancy may be filled for the unexpired term by the Chief Executive Officer after consultation with the Board of Directors; and (iii) any other Officer becomes vacant due to death,

resignation or removal, the vacancy may be filled for the unexpired term by the President after consultation with the Chief Executive Officer.

5.12 Rights of Indemnification. The Corporation shall indemnify each Director, officer, employee and agent to the extent provided under Part VII, Section (E) of Chapter 602 of the Connecticut Revised Nonstock Corporation Act as it may be amended from time to time.

ARTICLE VI **PRESIDENT**

6.1 President. The President shall be an employee of the Corporation and shall serve at the pleasure of the Chief Executive Officer, subject to consultation with the Board of Directors. Subject to the control of the Chief Executive Officer in consultation with the Board of Directors, the President shall, in general, supervise and control all the business and affairs of the Corporation and shall, except in any case in which the Chief Executive Officer, after consultation with the Board of Directors, shall otherwise direct, have the power to sign, acknowledge and deliver on behalf of the Corporation all deeds, agreements and other formal instruments. In addition to such other authority given to the President hereunder, the President shall have the authority to appoint, remove and supervise all non-officer employees of the Corporation and to delegate such authority, and to direct the services provided by the Corporation. The President also shall have such duties and responsibilities as are assigned to him or her by the Chief Executive Officer and shall report and be responsible to the Chief Executive Officer.

6.2 Resignation. The President may resign his or her office by giving written notice thereof to the Chairman of the Board.

ARTICLE VII **TYPES OF FUNDS**

7.1 The Current Unrestricted Fund. The current unrestricted funds will account for all resources over which the Board of Directors has discretionary control to use in carrying on the operations of the Corporation in accordance with its charter and these Bylaws. Subject to the rights, powers and privileges of the Member under these Bylaws, the Board of Directors may designate portions of the current unrestricted fund for specific purposes, projects, or investment as an aid in the planning of expenditures and the conservation of assets. The Corporation may wish to maintain separate accounts for such designations within the current unrestricted fund and to segregate the designated and undesignated portions of the fund within the fund-balance section of the unrestricted fund-balance sheet. It should be recognized that the Board of Directors has the authority to change or reverse its own action. Accordingly, amounts designated by the Board of Directors should not be included with donor-restricted funds and the term "restricted" should not be used in connection therewith.

7.2 Current Restricted Fund. Current restricted funds will be established to account for resources currently available for use but expendable only for operating purposes specified by

the donor or grantor. Such resources may originate from gifts, grants, income from endowment funds, or other similar sources where the donor has specified the operating purposes for which the funds are to be used.

7.3 Land, Building and Equipment Fund. Land, building and equipments funds will be used to accumulate the net investment in fixed assets and to account for the unexpended resources contributed specifically for the purpose of acquiring or replacing land, building, or equipment for use in the operations of the Corporation. Mortgages or other liabilities relating to these assets will also be included in this fund. When additions to land, buildings, or equipment used in carrying out the Corporation's program and supporting services are acquired with unrestricted fund resources, the amount expended for such assets should be transferred from the unrestricted fund to the plan fund balance. Gains or losses on the sale of fixed assets should be reflected as income items in the plan fund accounts. The proceeds from the sale of fixed assets that are not legally required to be reinvested in fixed assets should be transferred to the unrestricted fund; such transfers should be reflected as direct reductions and additions to the respective fund balances.

7.4 Endowment Funds. Endowment funds will represent the principal amount of gifts and bequests accepted with the donor-stipulation that the principal be maintained intact in perpetuity, until the occurrence of a specified event, or for a specified period, and only the income from investment thereof be expended either for general purposes or for purposes specified by the donor. Net gains or losses from the sale of the specific investments or other property donated to the organization will be accounted for in this fund. If endowment income is subject to donor-restriction as to use, it should be credited, as earned, to the appropriate restricted fund and thereafter treated accordingly. If endowment income is not subject to donor-imposed restrictions, it should be credited, as earned, to the appropriate revenue account of the unrestricted fund. When restrictions on endowment fund principal lapse, the resources released should be transferred to the unrestricted fund or to a specific restricted fund according to the terms of the original gift of bequest.

ARTICLE VIII **CONFLICT OF INTEREST POLICY**

8.1 Statement of Policy. Directors and employees shall be deemed fiduciaries in their relationships with the Corporation. In addition to and overriding the standards of conduct which are necessary to satisfy statutory requirements regarding such relationships, no Director or employee shall undertake or continue in any personal or business interest which is, has become, or gives the appearance of being in conflict with the interest of the Corporation. It shall be the duty of each Director or employee to disclose promptly and fully, in the case of an employee to the President and in the case of a Director to the Executive Committee, any facts which may give rise to a potential conflict of interest situation with respect to the interests of the Corporation. If either the President or the Executive Committee determines that the matter is one which should

be reviewed by the Board of Directors, the President or the Executive Committee shall submit the facts promptly to the Board of Directors for consideration.

ARTICLE IX
LOANS, CHECKS AND DEPOSITS

9.1 Loans. Subject to the rights, powers and privileges of the Member set forth in Section 2.2(i) of these Bylaws, no loans in excess of five thousand (\$5,000.00) dollars shall be contracted on behalf of the Corporation and no evidences of indebtedness in excess of ten thousand (\$10,000.00) dollars shall be issued in its name unless authorized by a resolution of the Board of Directors. Such authority may be general or confined to specific instances.

9.2 Checks, Drafts, etc. All checks, drafts or order for the payment of money, notes, bills of exchange and other evidences of indebtedness issued in the name of the Corporation shall be signed or endorsed with the signatures or facsimile signatures of such officers or agents of the Corporation as the Board of Directors shall from time to time designate by name or title, or, in lieu of any action by the Board of Directors, as the Chairman of the Board shall designate.

9.3 Deposits. All funds of the Corporation not otherwise employed shall be deposited from time to time to the credit of the Corporation in such banks, trust companies or other depositories as the Board of Directors may select or, in lieu of any action by the Board of Directors, as the Treasurer may select.

ARTICLE X
CORPORATE RECORDS AND FINANCIAL STATEMENTS

10.1 Corporate Records. The Corporation shall keep at its principal place of business an original or a copy of the minutes of the meetings of the Board of Directors and its Bylaws, including all amendments thereto, certified by the Secretary.

10.2 Financial Statements. At intervals of not more than twelve months the Corporation shall prepare a balance sheet showing its financial condition as of a date not more than four months prior thereto and a statement of receipts and disbursements respecting its operations for the twelve months preceding such date. The balance sheet and statement shall be audited by an independent public accountant and shall be deposited at the principal office of the Corporation and be kept for at least ten years from such date.

10.3 Annual Report and Fiscal Year. The Board of Directors shall cause to be prepared and shall present at the annual meeting an annual report. The annual report shall be filed with the minutes of the meetings of the Board of Directors. The fiscal year of the Corporation shall begin on July 1 and end on the following June 30, inclusive.

ARTICLE XI
MISCELLANEOUS PROVISIONS

11.1 Notice. Any notice required or permitted to be given under these Bylaws shall be deemed to have been delivered if delivered in person or if sent by United States mail or by telegraph, charges prepaid, telex, or facsimile to such person at the address shown on the records of the Corporation or supplied by him or her to the Corporation for the purpose of notice. If such notice is sent by mail, it shall be deemed to have been given to the person entitled thereto when deposited in the United States mail.

11.2 Amendments. These Bylaws may be amended or repealed, and new Bylaws may be adopted, upon the occurrence of all of the following: (i) approval of the proposed change by a majority vote of the members of the Board of Directors at any regular, annual or special meeting of the Board of Directors; (ii) recommendation of the proposed change by the Board of Directors to the Member; and (iii) the approval of the proposed change by the Member at any regular, annual or special meeting of the Member. For any meeting of the Board of Directors or of the Member at which the Board of Directors or the Member, as the case may be, is to consider amending or repealing these Bylaws, or adopting new Bylaws, notice of such meeting shall be given in the manner required by these Bylaws (or, if notice is not otherwise required by these Bylaws, no later than two (2) days prior to such meeting) and shall set forth the general nature of the proposed change.

ARTICLE XII
PARLIAMENTARY AUTHORITY

12.1 The parliamentary authority of the Board of Directors shall be Robert's Rules of Order Revised in all cases in which they are applicable and in which they are not inconsistent with the Bylaws.

SYSTEM AFFILIATION AGREEMENT

THIS SYSTEM AFFILIATION AGREEMENT is made and entered as of July 24, 1997, by and among **YALE-NEW HAVEN HEALTH SERVICES CORPORATION**, a Connecticut nonstock corporation having its principal office at 789 Howard Avenue, New Haven, Connecticut 06504, and **GREENWICH HEALTH CARE SERVICES, INC.**, a Connecticut nonstock corporation having its principal office at 5 Perryridge Road, Greenwich, Connecticut 06830 and **THE GREENWICH HOSPITAL ASSOCIATION**, a Connecticut nonstock corporation having its principal office at 5 Perryridge Road, Greenwich, Connecticut 06830.

W I T N E S S E T H:

WHEREAS, the parties deem it to be consistent with and in furtherance of their respective charitable purposes and in the best interests of their communities and constituencies to become permanently affiliated;

WHEREAS, a permanent affiliation between the parties will allow coordination of the provision of patient care services, which should reduce duplication of resources, increase efficiencies and decrease costs to health care consumers; provide additional patient access to specialized services; and enhance clinical, medical educational, clinical research, marketing, planning, finance, human resources, information systems and management services and expertise;

WHEREAS, the parties have determined that a permanent affiliation can best be developed and implemented through the planning and coordination efforts of Yale-New Haven Health Services Corporation, which shall become the sole member of Greenwich Health Care Services, Inc.;

WHEREAS, the parties intend Yale-New Haven Health Services Corporation to direct and implement the System's activities and to have various leadership responsibilities and powers with respect to Greenwich Health Care Services, Inc., as more fully set forth in this Agreement, while allowing the parties and their affiliates, to a significant and meaningful extent, to retain their unique traditions, constituencies, and philanthropic support; and

WHEREAS, each party considers it in its best interest to enter into a permanent affiliation on the terms and conditions set forth in this Agreement.

NOW, THEREFORE, in consideration of the foregoing and the mutual agreements and covenants hereinafter set forth and for other valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

ARTICLE I

DEFINITIONS

In addition to the words and terms defined elsewhere in this Agreement, the following words and terms shall have the following meanings:

1.1 "Act" shall mean The Connecticut Revised Nonstock Corporation Act, as amended, Chapter 602 of the Connecticut General Statutes, or successor provisions.

1.2 "Affiliate" shall mean, with respect to any Entity, any other Entity which at the time Affiliate status is being determined is directly or indirectly Controlling or Controlled by or under direct or indirect common Control with such Entity. "Control" shall mean the legal power to (a) elect or cause the election of a majority of the governing body of the subject Entity, or (b) direct or cause the direction of the subject Entity's day-to-day operations or management, whether the foregoing power(s) exist(s) through voting securities, other voting rights, reserved powers, contract rights, or other legally enforceable means.

1.3 "Agreement" shall mean this System Affiliation Agreement.

1.4 "CEO" shall mean the YNHHS President and Chief Executive Officer.

1.5 "Closing" shall mean the consummation of the transactions contemplated by this Agreement, which shall occur on the date five business days after the last of the conditions in Article XII has been satisfied to the reasonable satisfaction of the parties, or waived by the parties in writing, or on such other date upon which the parties mutually agree but not later than June 30, 1998 unless such date is extended by written agreement of the parties. "Closing Date" shall mean the date upon which the Closing actually occurs.

1.6 "Code" shall mean the Internal Revenue Code of 1986, as amended, and any corresponding provision of any future United States Internal Revenue law.

1.7 "Corporate Documents" shall mean, as the context requires, the Certificate of Incorporation or similar charter document, Bylaws and other agreements that address the powers and governance of a corporation.

1.8 "Effective Date" shall mean the date on which the last of the conditions specified in Article XII hereof shall have been satisfied.

1.9 "Entity" shall mean a corporation, association, partnership, trust, limited liability company, organization, business or any other entity.

1.10 "Fiscal Year" shall mean the twelve month period ending September 30.

1.11 "Foundation" shall mean a tax-exempt foundation to be established by GHCS and Greenwich Hospital as more fully described in Article VI.

1.12 "GHCS" shall mean Greenwich Health Care Services, Inc.

1.13 "GHCS Network" (sometimes referred to as the "member(s) of the GHCS Network") shall mean GHCS and all then existing GHCS Affiliates; provided that none of YNHHS or SCHS or any other Entity that is an Affiliate of GHCS solely by reason of common Control by YNHHS, nor the Foundation shall be included in the definition of the GHCS Network.

1.14 "Goals and Objectives" shall mean the goals and objectives for the System, as set forth in Section 2.1; it being understood that the Goals and Objectives will be adjusted by YNHHS based on market and other trends and changes affecting the System in a manner consistent with the authority retained by Greenwich Hospital and GHCS, respectively, under Section 4.5 and Article XIII hereof.

1.15 "Greenwich Hospital" shall mean The Greenwich Hospital Association.

1.16 "Local Network" shall mean, respectively, the GHCS Network or the YNHHS Network or the SCHS Network; and "Local Networks" shall mean the GHCS Network and the YNHHS Network and the SCHS Network collectively.

1.17 "Local Plans" shall have the meaning given to such term in Section 7.2.

1.18 "Managed Care Contract" shall mean any agreement between a provider and any payor, employer or any intermediary organization acting on behalf of itself, a payor, or an employer to provide covered health care services on any basis, including but not limited to a fee-for-service basis, a risk-sharing basis, a capitated basis or under any other arrangement in which there are incentives to utilize the contracting provider for covered services.

1.19 "Major Programmatic Changes" shall mean GHCS' or a GHCS Affiliate's creation of any major new health care service, establishment of any new location for the delivery of health care services, addition or deletion of a major clinical program, substantial alteration of a health care facility or clinic and any other major modification of services, programs or facilities.

1.20 "Primary Service Area" shall mean as to GHCS the cities and towns listed on Exhibit A.

1.21 "SCHS" shall mean Southern Connecticut Health System, Inc.

1.22 "SCHS Network" shall mean SCHS and all then existing Affiliates, provided that none of YNHHS or GHCS or their respective Affiliates shall be included in the definition of the SCHS Network.

1.23 "System" shall mean YNHHS and all the System Members insofar as they are acting or are required to act as a unified health care delivery system pursuant to this Agreement and such other agreements as may be entered into by YNHHS with any other

System Member, it being acknowledged that when acting as a part of the System YNHHS is acting in its capacity as the institution directed and empowered to manage the System as contemplated hereby and to exercise the rights and privileges granted to it in this Agreement.

1.24 "System Member" shall mean each Local Network and each Entity that hereafter (a) affiliates with YNHHS such that YNHHS exercises Control over such Entity, or (b) merges into or consolidates with YNHHS or any Entity that is part of either Local Network or any Entity that hereafter becomes an Affiliate of YNHHS; unless otherwise specified in this Agreement, an Entity of which YNHHS is sole member and as to which YNHHS possesses rights substantially similar to those granted to YNHHS herein is a System Member.

1.25 "YNHH" shall mean Yale-New Haven Hospital.

1.26 "YNHH Network" (sometimes referred to as "member(s) of the YNHH Network") shall mean YNHH and all then existing YNHH Affiliates, provided that YNHHS shall not be included in the definition of YNHH Network, and provided further that none of GHCS or SCHS or any of their respective Affiliates shall be included in the definition of the YNHH Network.

1.27 "YNHHS" shall mean Yale-New Haven Health Services Corporation.

1.28 "YSM" shall mean Yale University, a Connecticut specially chartered corporation, acting through its School of Medicine.

ARTICLE II

SYSTEM GOALS AND OBJECTIVES

Section 2.1 System Goals and Objectives. The Goals and Objectives for the System are as follows:

2.1.1 Create and coordinate an integrated, regional health care delivery system composed of local, vertically integrated networks that provides high quality, cost-effective health services and that successfully operates in a managed care marketplace;

2.1.2 Provide centralized managed care services by the System and develop and administer the System's managed care arrangements to increase the number of managed care patients served by the System, and enhance each System Member's ability to seek and accept regional, statewide, and state/federal government managed care contracts for enrolled populations;

2.1.3 Assist each System Member to develop and work effectively with local and regional physician organizations, physician-hospital organizations, management service

organizations and primary care organizations; including doing so with existing organizations of those types;

2.1.4 Provide leadership in the development of improved health care delivery, health professional education, and research programs;

2.1.5 Actively support healthcare in Connecticut by working with local communities and providers to maintain appropriate access to care;

2.1.6 Provide for the sharing of technology, services, management and programs to increase operating efficiencies in an effort to reduce capital costs of System Members.

2.1.7 Work to ensure the long-term financial viability of YNHHS and each System Member by assisting System Members in providing quality health care in Connecticut and throughout the Northeast;

2.1.8 Provide coordination for clinical services, medical, nursing, and other health professional education, research, fund raising, finance, strategic planning, marketing, human resources, information systems and such other administrative and management activities important to System Members as YNHHS and each System Member shall identify in an effort to enhance quality, reduce duplication of resources, increase efficiencies, maintain and improve the System Members' financial condition, and decrease costs to health care consumers;

2.1.9 Recognize the importance of physicians to the success of the System and assist System Members to maintain active and productive medical staffs; and

2.1.10 Achieve such other objectives as YNHHS, with Local Network input, shall establish as necessary or appropriate to the successful implementation and operation of the System and as shall be consistent with the authority retained by Greenwich Hospital and GHCS, respectively, under Section 4.5 and Article XIII hereof.

ARTICLE III

THE ROLES OF YNHHS AND OF THE GHCS NETWORK IN THE SYSTEM

Section 3.1 YNHHS' Role. YNHHS' role in the System is to lead a statewide healthcare delivery and healthcare financing system dedicated to providing high quality, cost-effective services to the communities it serves. The specific actions to be undertaken by YNHHS in fulfilling this role include:

- (a) Develop, manage, coordinate and lead the System in a manner consistent with this Agreement;

- (b) Develop strategies for the System by which the System shall pursue the Goals and Objectives, including developing System-wide strategic plans, System operating budgets and System capital budgets in a timely manner;
- (c) Subject to Section 4.5, organize and coordinate the provision of services of all System Members to ensure that the System provides high quality, cost-effective and coordinated health care services in a manner that balances each System Member's needs with System-wide strategies;
- (d) Provide leadership in the promotion of community wellness, health education and accessible preventive health services;
- (e) Enhance collaboration among the Local Networks, YSM and other health-care institutions, colleges and schools in the initiation, development, maintenance and oversight of (i) educational programs for health professionals and the public, and (ii) programs of scientific research related to the care of the sick and injured, in each case of consistently high quality;
- (f) Pursue System-wide Managed Care Contracts, within the specifications and conditions of the contracting authority granted by each Local Network and affiliated physician organization(s);
- (g) Provide information collection and management capabilities to improve the quality and cost-effectiveness of health care delivery and to foster medical research and education;
- (h) Establish and coordinate management objectives, incentives and performance measures for the System, and coordinate such for all System Members; and
- (i) Provide guidance and support for local strategic plans, local network operating and capital budgets, day-to-day management functions, the development and implementation of managed care strategies, and local and regional clinical management initiatives.

Section 3.2 Role of the GHCS Network. The role of the GHCS Network in the System includes accomplishing the following specific actions in a manner that is consistent with the Goals and Objectives and under the direction of the GHCS and Greenwich Hospital Boards or the senior managers to which such responsibilities are delegated:

- (a) Develop, manage and coordinate a local, vertically integrated network (including physicians, ambulatory and extended care services) in conjunction with Greenwich Hospital medical staff and YNHHS;
- (b) Provide high quality, cost-effective services to the local community and to patients referred to it for clinical services;

- (c) Develop, maintain and nurture key local community relationships, and to this end work with other local community organizations in the coordination and provision of health services;
- (d) Collaborate through YNHHS with YSM and other healthcare institutions, colleges and schools in the initiation, development and maintenance of (i) graduate physician medical education programs, (ii) educational programs for other health professionals and the public, and (iii) sites for scientific research related to the care of the sick and injured, in each case of consistently high quality;
- (e) Disseminate through YNHHS information developed by the GHCS Network as appropriate for System-wide functions and System oversight of Local Network operations; this may include information as to: financial, human resources, information systems, government relations, community and public relations, planning and marketing, managed care, purchasing, business and new product development and legal;
- (f) Develop and maintain medical staff relationships;
- (g) Coordinate clinical program development with YNHHS;
- (h) Maintain day-to-day management functions with consultation, oversight of senior management and, if necessary, assistance from YNHHS, subject to rights granted to YNHHS to approve certain actions as specified in this Agreement;
- (i) Develop and maintain relationships with local physician organizations and/or physician-hospital organizations; and
- (j) Undertake the foregoing actions and otherwise participate in the System, including without limitation the discharge of its other obligations pursuant to this Agreement, in a timely fashion and in a manner that contributes to YNHHS' development and operations of the System.

ARTICLE IV

GOVERNANCE OF GHCS

The following sets forth certain rights granted to YNHHS and the CEO in connection with the governance of GHCS and the GHCS Network. In accordance with Section 12.2.1, the substance of this Article IV shall be incorporated into the Corporate Documents of GHCS, Greenwich Hospital and their Affiliates. Any conflict between the terms of this Article IV and such Corporate Documents shall be determined by reference to such Corporate Documents.

Section 4.1 GHCS Network Governance. The following governance provisions shall apply to GHCS and the GHCS Network, and GHCS and YNHHS hereby covenant to maintain compliance with the following:

- (a) YNHHS shall become the sole member of GHCS, and GHCS shall remain the sole member of Greenwich Hospital and the sole member or sole shareholder, as applicable, of all other GHCS Affiliates of which Greenwich Hospital is not the sole member or sole shareholder;
- (b) GHCS shall cause the Boards of Directors of GHCS and each of the other GHCS Affiliates to be composed of the persons composing the Board of Greenwich Hospital, (except for (i) the Foundation, (ii) any Affiliates approved as provided in Section 7.10 hereof if at the time of approval a different Board structure is consented to by YNHHS and (iii) any Affiliates having a board of directors comprised exclusively of senior management personnel employed by YNHHS);
- (c) GHCS shall not without the written consent of YNHHS amend, modify, alter or rescind, or permit any member of the GHCS Network to amend, modify, alter or rescind, any of the Corporate Documents relating to GHCS or to that member;
- (d) GHCS shall not adopt, or permit any member of the GHCS Network to adopt, any resolution, rule, regulation or procedure that would in any way limit, reduce the rights of YNHHS pursuant to or otherwise affect the covenants set forth in this Section 4.1;
- (e) the Boards of Directors of GHCS and Greenwich Hospital and their Affiliates shall include a designee named by YNHHS, and the YNHHS designee on the GHCS Board and the Boards of Greenwich Hospital and any such Affiliates shall be a voting member of any executive or similar committee of GHCS, Greenwich Hospital and any such Affiliates, all as more particularly described in Section 4.4; and
- (f) the Boards of Directors of GHCS and Greenwich Hospital will be self-perpetuating as contemplated in Section 33-1055 and 33-1083(c) of the Act as such Act is in effect and interpreted as of the date hereof, except insofar as is necessary for the YNHHS designee to be at all times a member of such Boards, and subject to the powers reserved to YNHHS and described in Sections 4.2 and 4.3.

Section 4.2 Election of GHCS Directors.

4.2.1 The GHCS and Greenwich Hospital Boards of Directors shall elect directors as hereinafter specified. The Boards of Directors of GHCS, Greenwich Hospital and each other member of the GHCS Network, except the Foundation which shall have a board of

directors determined in accordance with Article VI of this Agreement and except other members of the GHCS Network permitted to have different board composition pursuant to Section 4.1(b), shall at all times be composed of the same persons, who shall initially be the Trustees of Greenwich Hospital immediately prior to the Closing and the YNHHS designee. YNHHS shall at all times have the right to designate one representative of YNHHS to serve as a director of GHCS at the pleasure of YNHHS, and the GHCS Board shall promptly elect and remove such designee as from time to time instructed by YNHHS. Subject to the foregoing, the GHCS Board shall nominate persons to serve as GHCS directors as vacancies occur on the GHCS Board in the ordinary course due to expiration of term, death, voluntary resignation or removal pursuant to Section 4.3 below or as otherwise provided in the GHCS Bylaws. All persons nominated by the GHCS Board shall have the background and experience appropriate to that position. No person shall be elected a director of GHCS unless such person's election is approved by the YNHHS Board of Directors, except as provided below. For each such vacancy, the GHCS Board shall nominate one (1) person. If the YNHHS Board fails to approve such nominee within thirty days of receipt in writing of the proposed nominee's name, then: (a) the GHCS Board will promptly nominate two other individuals to that Board position; (b) the YNHHS Board may approve either of such nominees in which case the nominee so approved shall be promptly elected by the GHCS Board as a GHCS director, or the YNHHS Board may reject both of such nominees, and the lack of approval within thirty days of receipt in writing of the proposed nominees' name shall be deemed rejection in which case the GHCS Board shall promptly nominate two other individuals to that Board position; (c) the YNHHS Board may approve either of such additional nominees in which case the nominee so approved shall be promptly elected by the GHCS Board as a director; and (d) the YNHHS Board may reject both of such additional nominees and the lack of approval within thirty days of receipt in writing of the proposed nominees' name shall be deemed rejection in which case the choice of which of any of the foregoing proposed persons to name as a GHCS director shall be made by the Chairman of the Board of GHCS (which Chairman shall be elected by a majority vote of the GHCS directors) after consultation with the CEO and the Chairman of the Board of YNHHS. Until a new director of GHCS is elected in accordance with this section, the director previously holding the seat as to which an election is occurring (unless such director shall have been removed) shall, if willing and able to do so, continue to hold that position.

4.2.2 Similar governance provisions shall be applicable for Greenwich Hospital and each other member of the GHCS Network.

Section 4.3 Removal of GHCS Directors.

4.3.1 The Board of Directors of YNHHS, upon the affirmative vote of two-thirds of the YNHHS directors then in office, may direct the GHCS Board to remove any GHCS director specifically identified in the vote of the YNHHS directors: (a) if such director is convicted of a crime or commits any act of moral turpitude such that his continued service as a director could prove embarrassing or otherwise detrimental to GHCS, any member of the GHCS Network or the System, or (b) for breaching such director's fiduciary obligations, or breaching or causing GHCS or Greenwich Hospital to breach any law, rule or regulation, in each case where such conduct is materially detrimental to GHCS, any member of the GHCS

Network or the System, or (c) for breaching or causing GHCS or Greenwich Hospital to breach this Agreement and failing to cease such breach or causing of breach immediately and permanently upon notice thereof from YNHHS. If so directed in accordance with the foregoing provisions the GHCS Board shall promptly remove the designated director, unless the removal is directed pursuant to clause (b) or (c) above and a majority of the GHCS Board determine (within ten days of notice from YNHHS directing removal of a director) that an Arbitral Tribunal be appointed as provided in the following paragraph; provided, however, that a request for an Arbitral Tribunal shall not be available, and such director or directors shall be immediately removed, if the removal is directed as the result of an act or omission similar to that which has previously been submitted to an Arbitral Tribunal and the Tribunal previously concluded that such act or omission met the standards for removal under the foregoing clause (b) or (c). The Arbitral Tribunal shall determine whether the conduct of such director is such as to meet the standards for removal under the foregoing clauses (b) or (c) and whether the director acted in good faith. Such removal shall be immediately carried out if the Arbitral Tribunal determines that such conduct meets such standards, unless (x) the Arbitral Tribunal determines that such director or directors acted in good faith (which determination shall be made taking into account whether such director or directors acted upon the advice of competent independent legal counsel) and (y) such director or directors stop(s) such conduct immediately and permanently or, if such is not possible, take(s) within a reasonable time all actions reasonably available to mitigate the detriment resulting from such conduct to the fullest extent possible. YNHHS will not act to remove a GHCS director other than pursuant to this Section 4.3. GHCS and its directors agree that the process described in this Section 4.3 is the exclusive process to be pursued in the event YNHHS directs removal of a director. The parties and the GHCS directors (present and future) accept and agree that a determination by the Arbitral Tribunal pursuant to this Section respecting removal of a GHCS director at the direction of YNHHS will be final and binding on the parties hereto. It is expressly agreed that the exercise by the directors of GHCS of any rights reserved to them under this Agreement will not by itself constitute grounds for YNHHS to direct the removal of any of such directors.

In the event the appointment of an Arbitral Tribunal shall be requested pursuant to the preceding paragraph, such Tribunal shall consist of three members, with each of GHCS and YNHHS to appoint one member within ten days of the request for an Arbitral Tribunal and the remaining member to be agreed upon by the first two. If GHCS and YNHHS do not so agree within seven days of the request for an Arbitral Tribunal, either party can request that the American Arbitration Association appoint a third party who shall be unaffiliated with the parties hereto and their Affiliates. A determination of a majority of the three members shall constitute a determination of the Tribunal, and such determination shall be final and binding upon the parties. The members of such tribunal will take into account such matters and such evidence as they shall deem appropriate, will not be bound by any formal rules of procedure or of evidence and will be requested to reach a determination with all reasonable dispatch, but in any event shall use all reasonable efforts to reach a determination within sixty days of the request for an Arbitral Tribunal.

4.3.2 Similar governance provisions shall be applicable for Greenwich Hospital and GHCS' other Affiliates.

Section 4.4 YNHHS Board Designee to GHCS. YNHHS shall have the right at all times to have one person designated by it serve as a director of GHCS, of Greenwich Hospital and of each of their Affiliates. Such person shall be designated by the CEO. GHCS shall promptly cause any such designee to be elected as a director of GHCS, Greenwich Hospital and each of their Affiliates to enjoy all rights and privileges enjoyed by the directors of GHCS/Greenwich Hospital and each of their Affiliates. Notwithstanding Section 4.3, YNHHS shall have the sole right to remove its designee from the GHCS Board, the Greenwich Hospital Board and the boards of their Affiliates. If GHCS, Greenwich Hospital or any of their Affiliates has an active executive committee, or any committee that has been delegated all or most of the Board's power to act, the YNHHS designee shall serve as a voting member of that committee.

Section 4.5 Reserved Powers. The Greenwich Hospital Board of Directors or Board of Trustees, as the case may be, will exercise authority over and be responsible for the matters listed in Schedule 4.5 hereto.

Section 4.6 Exercise of Authorities. Each of GHCS and Greenwich Hospital agrees that the authority granted to it and to its Board of Directors or Board of Trustees, as the case may be, will not be exercised in a manner inconsistent with the intent of the parties hereto that YNHHS shall perform the functions and exercise the rights allocated to it by this Agreement, and YNHHS agrees that the authority granted to it, to its Board of Directors and to the CEO will not be exercised in a manner inconsistent with the intent of the parties hereto that GHCS, Greenwich Hospital and their respective Boards shall perform the functions and exercise the rights allocated to them by this Agreement.

ARTICLE V

GOVERNANCE OF YNHHS

This Article V sets forth certain aspects of the governance structure for YNHHS. The substance of this Article V shall be, in accordance with Section 12.2.2, incorporated into the Corporate Documents of YNHHS and any conflict between the terms of this Agreement and the YNHHS Corporate Documents shall be determined by reference to such Corporate Documents.

Section 5.1 YNHHS Governance. YNHHS covenants that it shall from and after the Closing Date (a) not amend, modify, alter or rescind any of the Corporate Documents relating to YNHHS so as to deprive the GHCS Network of the benefits of this Agreement, and (b) not adopt any resolution, rule, regulation or procedure that would affect the covenants in clause (a) of this paragraph. If YNHHS should establish an executive committee, or any committee that has been delegated all or most of the YNHHS Board of Directors' power to act, a GHCS permanent member of the YNHHS Board shall be a voting member on such committee.

Section 5.2 Ex Officio Director. From and after the Closing Date, the chairperson of the GHCS Board shall, by virtue of holding that office, be a Director of YNHHS during that person's tenure in such office. Ex Officio Directors of YNHHS are counted in determining a quorum of the YNHHS Board, and the GHCS Chairperson shall have full voting rights on the YNHHS Board.

Section 5.3 Elected Directors. On or before the Closing Date, GHCS shall propose two persons acceptable to YNHHS as directors of YNHHS (the "GHCS Directors"). If not previously accomplished, at the first meeting of the YNHHS Board of Directors following the Closing Date, the YNHHS Board shall elect as Directors the GHCS Directors. The terms of the GHCS Directors shall expire as set forth in Section 5.4 below. The foregoing notwithstanding, GHCS shall always have the same number of permanently allocated directorships as any new System Member with respect to which YNHHS is the sole member or with respect to which YNHHS possesses substantially similar or lesser rights than those granted to YNHHS in this Agreement, if such new System Member has annual expenses for the fiscal year last completed at the time such new System Member affiliates with YNHHS less than the product of (x) the quotient determined by dividing the annual expenses of Bridgeport Hospital (for the 1997 Fiscal Year) by the annual expenses of Greenwich Hospital (for the 1997 Fiscal Year) times (y) the annual expenses of Greenwich Hospital for the fiscal year last completed at the time such new System Member affiliates with YNHHS, it being acknowledged that the ex officio position of the GHCS Chairperson is a permanently allocated directorship. The preceding sentence shall only apply as to relationships where YNHHS does not have the legal power to (a) elect or cause the election of one-third or more of the governing body of the new System Member or (b) direct or cause the direction of substantial aspects of the subject Entity's day-to-day operations. For purposes of this Section 5.3, a directorship that expires or ceases within five years of being established as a contractual right will not be considered a permanently allocated directorship. The GHCS Directors and any other individuals nominated for positions as YNHHS Directors in accordance with this Article V shall be, at the time of their nomination, directors of GHCS.

Section 5.4 Terms of GHCS Directors. As designated by GHCS in connection with the proposal for election as specified in Section 5.3, the term of one GHCS Director shall expire one year following his election and the term of a second GHCS Director shall expire two years following his election. Each of such two GHCS Directors is hereinafter referred to as a "Transition GHCS Director." Upon the expiration of the term of a Transition GHCS Director, such Transition GHCS Director's directorship shall be eliminated and the number of YNHHS directors shall be reduced accordingly. Prior to such expiration, GHCS and YNHHS may mutually agree to remove such Transition GHCS Director without cause, and in any event GHCS shall have the right to fill any vacancy arising in any directorship as to which it has the right to nominate a director.

Section 5.5 Geographic Diversity. YNHHS will use its best efforts to assure that the YNHHS Board of Directors reflects, to the extent reasonably possible, the geographic diversity of the service area of the System.

ARTICLE VI**STRUCTURE AND GOVERNANCE OF THE FOUNDATION**

Section 6.1 The Foundation. On or before the Closing Date, GHCS and Greenwich Hospital shall cause the Foundation to be incorporated as a Connecticut nonstock corporation, in accordance with the Act. The Foundation shall seek and obtain recognition of its exemption from federal taxation under the Code as a supporting organization of Greenwich Hospital. The Foundation's mission shall be to hold, manage and distribute the endowment of Greenwich Hospital (to the extent specified in Section 6.3) to, or for the benefit of, the GHCS Local Network, exclusively, so long as a member or members of the GHCS Local Network provide or arrange for the delivery of health care to the Greenwich community.

Section 6.2 Governance of the Foundation. The Foundation shall be governed by a self-perpetuating Board of Directors, which shall initially consist of the current directors of GHCS and the YNHHS-designated director referred to below. The current members of GHCS (and any replacement of any thereof by the Board of Directors of the Foundation upon the resignation or death of any such member) shall be the sole members of the Foundation, and such members shall not be entitled to vote for the election of directors but shall be entitled to vote with respect to those matters contemplated by Parts VIII through XI of the Act. YNHHS shall have the right at all times to have one person designated by it serve as a member of the Board of Directors of the Foundation. The Board of the Foundation shall promptly cause any such designee to be elected as a director of the Foundation. YNHHS shall have the sole right to remove and replace its designee. If the Foundation has an executive committee, or any committee that has been delegated all or most of the Foundation Board's power to act, the YNHHS designee shall serve as a voting member of that committee. The Corporate Documents of the Foundation will reflect the substance of this Article VI and will contain appropriate provisions preventing amendment, modification, alteration or rescission thereof without the written consent of Greenwich Hospital and YNHHS.

Section 6.3 Transfer of Funds. On the Closing Date, GHCS or Greenwich Hospital shall transfer the endowment fund, which currently has an approximate market value of \$43.5 million, (such amount, subject to appreciation, additions and reductions in accordance with this Article VI is hereinafter referred to as the "Principal") to the Foundation to be held, managed and distributed in accordance with the mission of the Foundation, as set forth in its Certificate of Incorporation, and with any and all restrictions placed on such funds by the donor thereof or by law.

Section 6.4 Use of Funds.

6.4.1 Income. Within ninety (90) days after the end of each Fiscal Year the Board of Directors of the Foundation shall cause cash interest and dividend income earned on the Principal during such Fiscal Year, net of costs and expenses of the Foundation during such Fiscal Year, to be distributed to GHCS or Greenwich Hospital to be used in accordance with the missions of GHCS or Greenwich Hospital, respectively; provided that in no event

shall the annual amount so distributed be less than the greater of (a) \$800,000 and (b) five percent (5%) of the aggregate value of the Principal and any other holdings of the Foundation determined using the average market value, calculated on a quarterly basis, for the three Fiscal Years prior to such Fiscal Year.

6.4.2 Principal. From time to time GHCS or Greenwich Hospital may request the distribution of all or a portion of the Principal to a member of the GHCS Network. Any such request shall describe the proposed use of such funds, shall include a statement as to how such use is consistent with the mission of the Foundation and shall contain such other information as the Foundation directors shall request. No such distribution shall be made except with the approval of the governing boards of each of the Foundation and GHCS, provided that the Board of the Foundation shall not approve any such request that is inconsistent with the mission of the Foundation and any restrictions placed on such funds by the donor(s). The Board of Directors of the Foundation shall base its decision with respect to any such request for a principal distribution solely on whether acceding to such request is in the best interests of the GHCS Network and consistent with the interests of the Greenwich community.

Section 6.5 Fund-Raising. From and after the Closing Date, the Foundation shall undertake fund-raising only for the benefit of the GHCS Network at the request of and in coordination with GHCS. The Foundation shall use reasonable efforts to cause donors to direct pledges and gifts made from and after the Closing to a member of the GHCS Network, provided, however, that the Foundation shall not be required to attempt to redirect a pledge or gift if such will significantly limit the amount of such pledge or gift.

Section 6.6 Staffing. The Foundation shall not directly employ any officers, senior management or other staff. The Foundation shall obtain all such staff and any services as shall be necessary to accomplish its mission from a member of the GHCS Network, which member of the GHCS Network shall provide such staff and services to the Foundation at the actual cost thereof.

Section 6.7 Offices. The Foundation shall maintain its offices on the campus of Greenwich Hospital or another member of the GHCS Network.

Section 6.8 Existing Indebtedness. The Foundation shall become and remain an Obligated Group Member under the Bond Indenture. GHCS and Greenwich Hospital agree that they will pay or cause to be paid, before the Foundation pays or is caused to pay, any amounts due with respect to such Bonds and any other existing indebtedness of Greenwich Hospital when and as due. YNHHS hereby approves and consents to all such payments by GHCS and Greenwich Hospital. (The capitalized terms used in this Section 6.8 and not defined in this Agreement are used herein as defined in the Master Trust Indenture, dated as of March 1, 1996, by and among Greenwich Hospital, GHCS and Fleet National Bank.)

Section 6.9 Third Party Beneficiary. The parties hereby agree that the Foundation is an intended third party beneficiary of the provisions of this Article VI and shall, upon its creation, have the right to enforce the terms of this Article VI.

ARTICLE VII

ALLOCATION OF RIGHTS AND RESPONSIBILITIES

Certain of the rights and responsibilities of GHCS and of YNHHS in connection with their affiliation are set forth in this Article VII. Each party agrees and covenants with the other that it will fulfill its responsibilities as set forth herein, and that in exercising its rights set forth herein it will do so using its reasonable judgment taking into account the Goals and Objectives and the authorities of the parties under this Agreement, including without limitation the rights of Greenwich Hospital under Section 4.5.

Section 7.1 System Planning and Implementation. YNHHS shall establish the System's mission and to that end shall plan and organize the System's provision of clinical services, clinical research, managed care contracting services and support systems on an integrated and cost-effective basis. The planning, organization and implementation of all such activities shall be consistent with the Goals and Objectives with the understanding that each Local Network must cooperate with and assist YNHHS to the full extent necessary to enable YNHHS to operate a successful, integrated System.

Section 7.2 Local Planning. GHCS shall prepare or cause to be prepared each year a strategic plan and related capital and operating budgets (collectively, the "Local Plans") for the GHCS Network as a whole and separately for each member of the GHCS Network. The Local Plans shall be consistent with the Goals and Objectives, and shall be prepared annually in a format acceptable to YNHHS and at the same time that YNHHS prepares its annual strategic plan and budgets. YNHHS shall review and approve the Local Plans, and neither GHCS nor any member of the GHCS Network shall implement any portion of the Local Plans unless and until such time as the Local Plan has been approved by YNHHS (provided that, pending approval of any new Local Plan, GHCS and members of the GHCS Network may continue operation in accordance with the most recently approved Local Network capital and operating budgets, with allowances for (a) non-significant variations from such budgets, (b) expenditures necessary to address insured casualty losses, and (c) expenditures required to comply with applicable laws and regulations or to comply with contractual obligations existing on the date hereof or incurred consistent with approved Local Plans.) YNHHS agrees to act promptly to review the Local Plans. Before or at the Closing, or as otherwise agreed by the parties, GHCS shall prepare and deliver to YNHHS transition Local Plans for the period from the Closing Date through the end of GHCS' 1998 Fiscal Year, and such transition Local Plans, including any provisions therein regarding transfers to the Foundation, shall be subject to review and approval by YNHHS as and to the extent provided in this Section 7.2.

As to each organization in which GHCS or any member of the GHCS Network participates through an equity interest or by Board representation, the annual capital and operating budgets for that organization, and its strategic plans, shall (to the extent such can be obtained by GHCS by reasonable, diligent effort) be reviewed by GHCS with YNHHS prior to the adoption or approval of such budgets and plans so that YNHHS has a reasonable opportunity to comment on such budgets and plans.

Section 7.3 Implementation of Local Plans. Once the Local Plans have been approved by YNHHS, GHCS shall use its best efforts to cause the Local Plans to be implemented in accordance with their terms, and shall not modify the Local Plans in any material respect, or deviate therefrom in any material respect, without the prior written approval of YNHHS.

Section 7.4 Incurrence of Debt. Neither GHCS nor any member of the GHCS Network shall incur any "debt" or enter into any line of credit except as specifically contemplated by the Local Plans or unless such debt or line of credit is otherwise approved by YNHHS. For purposes of this paragraph, "debt" shall include (a) the guaranty of a financial obligation of a third party (other than the guaranty on behalf of another GHCS Network member where the guaranty is otherwise permitted pursuant to this Section 7.4); (b) all obligations for money borrowed, except for money borrowed from another member of the GHCS Network for purposes consistent with the Local Plans; and (c) capital leases for the acquisition of equipment or real estate, except a capital lease entered into in any Fiscal Year as to which total payments under the lease will not exceed \$75,000 over the term of the lease, provided the total payments under all such capital leases entered into in any year (measured over the terms of those leases) shall not exceed \$150,000 (and all such capital leases shall be a part of the Local Plans (as defined in Section 7.2) in subsequent years.)

Section 7.5 Transfer of Assets. GHCS agrees that neither it nor any member of the GHCS Network shall sell, assign, encumber, lease, or otherwise transfer any assets (other than immaterial assets transferred in the ordinary course) except (a) as specifically provided for in the Local Plans approved by YNHHS, (b) as otherwise approved by YNHHS or (c) to another GHCS Network member consistent with the Local Plans.

Section 7.6 Relationships with Teaching Institutions. YNHHS shall coordinate and have the right to participate in negotiations involving, and the right to approve, any new undergraduate or graduate medical education relationship or agreement entered into by GHCS or any other member of the GHCS Network, including renewals or any material amendments of agreements as to graduate or undergraduate medical education in effect prior to the Closing Date. Without limiting the generality of the foregoing sentence, YNHHS shall coordinate and lead all discussions relating to affiliations and affiliation agreements between YSM and each Local Network.

Section 7.7 Mergers, Consolidations, and Dissolutions. Except with the prior consent of YNHHS, neither GHCS nor any other member of the GHCS Network shall enter into discussions or negotiations with any Entity, or solicit any such discussions or negotiations, or solicit any offer from any Entity, in respect of, nor shall GHCS or any member of the GHCS Network conclude: (a) the sale by GHCS or any such member of all or a substantial part of its assets, (b) any merger or a consolidation involving GHCS or any such member, or (c) any contract to manage or administer GHCS, any such member or a substantial part of the business of GHCS or any such member. Except with the prior consent of YNHHS, neither GHCS nor any member of the GHCS Network shall liquidate or dissolve or file for bankruptcy or similar protection.

Section 7.8 Managed Care Relationships.

7.8.1 Grant of Authority to Contract. YNHHS shall have the exclusive right to negotiate with third party payors, employers and intermediary organizations and commit on behalf of GHCS and the other members of the GHCS Network all terms and conditions of all new or renewed Managed Care Contracts. All Managed Care Contracts shall be consistent with the managed care strategies and policies established from time to time by YNHHS for the System. YNHHS agrees that it will negotiate contracts and arrangements pursuant to this Section 7.8 in good faith to provide the GHCS Network and other System Members the best rate for each System Member in light of then current market conditions, payor requirements and managed care strategies and policies of the System. YNHHS shall not intentionally cause Greenwich Hospital to subsidize other System Members under direct non-risk Managed Care Contracts between payors and Greenwich Hospital other than subsidization that is immaterial to Greenwich Hospital. YNHHS agrees that all risk contracts entered into on behalf of a member of the GHCS Network shall be consistent with the Local Plan then in effect, and GHCS agrees that the Local Plan shall take into account the need for the GHCS Network to (i) take financial and medical service risk, (ii) manage the premium paid to the relevant provider group, (iii) adjust costs to reflect then current and expected market conditions, and (iv) accept that risk contracting may result in significant losses (within loss limits, after taking into account mitigating actions that may be taken in response to such losses, deemed appropriate by the Greenwich Hospital Board and set forth in the then effective Local Plan).

7.8.2 Managed Care Strategies and Policies. The managed care strategies and policies for the System shall outline the type of reimbursement arrangement (e.g., fee-for-service, capitation, percent of premium) and delegated responsibilities (e.g., claims processing, utilization management, credentialing) sought by the System and the third party payors, employers and intermediary organizations targeted by the System. Such System strategies and policies shall be developed and revised from time to time by YNHHS senior management, including the senior management of GHCS and each other Local Network, through regular YNHHS management meetings and, as necessary, System-wide managed care committees. GHCS shall participate, through such meetings and committees in setting the basic contract parameters for Greenwich Hospital and other members of the GHCS Network.

7.8.3 GHCS Obligations. GHCS shall participate in all Managed Care Contracts undertaken by the System that are consistent with the managed care strategies and policies for the System in effect from time to time. GHCS shall operate, and cause the members of the GHCS Network to operate, within such YNHHS' managed care policies. GHCS agrees that it shall, and shall cause the other members of the GHCS Network to, execute such attorney-in-fact or other agreements as YNHHS shall reasonably request to give effect to the provisions of this Section 7.8. GHCS and all members of the GHCS Network shall provide for all YNHHS sponsored products their best competitive pricing based on comparable products. Each member of the GHCS Local Network shall offer the managed care products of System-owned managed care companies to their employees.

7.8.4 GHCS Obligations Concerning Physician Organizations. GHCS shall use its best efforts to obtain in a timely manner for YNHHS contracting authority, within

specified terms and conditions, from local physician-hospital organizations (or similar entities) in which Greenwich Hospital participates and/or such organization's associated physician organization; and as necessary to effectively market competitive managed care products in the GHCS Network's market area, GHCS shall use its best efforts to obtain in a timely manner in cooperation with YNHHS such contracting authority, or such contractual alternative as may be reasonable in the circumstances, from local physicians and physician organizations.

7.8.5 Administration of Managed Care Contracts. All Managed Care Contracts entered into by a member of the GHCS Network, directly or through the attorney-in-fact arrangements described in this Section 7.8, or any local physician-hospital organizations (or similar entities) in which Greenwich Hospital participates shall be managed by YNHHS-MSO, Inc.'s contract management department; and GHCS shall use its best efforts to cause Greenwich Physicians Association and other local physician "IPAs" to utilize YNHHS-MSO, Inc.'s contract management department. In each such case, the organization utilizing the contract management services of YNHHS-MSO, Inc. shall pay YNHHS-MSO, Inc. a commercially reasonable fee for such services. GHCS and other members of the GHCS Network shall be responsible for compliance with their respective obligations pursuant to Managed Care Contracts and for interacting with payors with respect to such obligations.

7.8.6 GHCS-Specific Managed Care Contracts. GHCS may cause YNHHS to negotiate a managed care arrangement with a payor critical to GHCS service area, unless YNHHS has determined, pursuant to its managed care policies, that the System should not enter into a relationship with such payor.

Section 7.9 Local Network Development. GHCS shall use its best efforts to develop a local integrated network as part of the strategy contemplated by the Local Plans.

Section 7.10 Affiliations, Systems, and Alliances. Neither GHCS nor any other member of the GHCS Network currently participates directly or indirectly in any affiliation, network, system or alliance of health care providers for the provision of health care services except as shown on Schedule 7.10. Neither GHCS nor any other member of the GHCS Network shall (a) create or acquire any Affiliate, or (b) participate directly or indirectly in any affiliation, network, system, or alliance of any kind, including without limitation an alliance of health care providers for the provision of health care services, in which GHCS or any member of the GHCS Network does not now participate, in either case without the prior approval of YNHHS. Nothing contained herein shall prevent or restrict GHCS or any member of the GHCS Network from participating in any affiliation, network, system or alliance of health care providers listed on Schedule 7.10.

Section 7.11 System Name; Entity Name. The tradename for the System shall be Yale-New Haven Health, provided, however, the System may operate under another trade name if the System so elects. GHCS and its Affiliates shall use the System tradename in association with their own names in accordance with System policies. Neither GHCS nor any other member of the GHCS Network shall change its name or adopt a trade name without the prior written consent of YNHHS. YNHHS shall not cause a change in the name of any member of the GHCS Network without the prior written consent of GHCS.

Section 7.12 Selection of Chiefs. YNHHS shall be consulted in the recruitment and selection of Chiefs of Service or other comparable positions for GHCS facilities.

Section 7.13 Advertising, Marketing and Promotional Activities. YNHHS shall, in consultation with GHCS, develop System-wide advertising, marketing and promotional policies. The advertising, marketing, and promotional plans developed by GHCS shall be consistent with such YNHHS policies.

Section 7.14 Compliance with Laws, etc. Each of YNHHS and GHCS shall use their best efforts to comply, and shall cause each member of their respective Local Networks to use its best efforts to comply, with all laws, rules and regulations applicable to its business and shall obtain and preserve all licenses and accreditation necessary or useful to the conduct of the business.

Section 7.15 Selection of Auditors and Accounting. The YNHHS Board of Directors, acting alone and without approval of any other entity, will have the right to appoint auditors, establish internal audit programs and set accounting policies and procedures for GHCS, Greenwich Hospital and their Affiliates.

Section 7.16 Corporate Services. GHCS senior management shall participate in the decision-making process relating to the development and implementation of corporate services functions, including without limitation the centralized accounting, purchasing and other "back office" functions, managed care contract administration and management services organization functions. YNHHS shall offer services, when available, to GHCS, and GHCS shall obtain, or establish a plan to obtain as soon as is reasonably possible, such services from YNHHS or an Affiliate designated by YNHHS upon the terms established by YNHHS for members of the System. In connection with the development and implementation of such corporate services functions, YNHHS shall examine the feasibility of such services, which examination shall include consideration of the economics of providing such services, the management benefits thereof, and such other matters as YNHHS may deem appropriate.

Section 7.17 Initiate Programmatic Changes. A Major Programmatic Change affecting a member of the GHCS Network shall be initiated solely through GHCS' inclusion of such Major Programmatic Change in a Local Plan (as defined in Section 7.2), provided that YNHHS shall have the right to approve any decision by GHCS or any other member of the GHCS Network with respect to Major Programmatic Changes. Only GHCS may initiate a change as to the services, programs or facilities of the members of the GHCS Network, and GHCS may only do so through the Local Plans. GHCS shall not, nor shall it allow any member of the GHCS Network to, commence a Major Programmatic Change without the prior approval of YNHHS.

Section 7.18 Utilization Review and Quality Assurance and Improvement. Each member of the GHCS Network shall be responsible for utilization review activities within its facility and shall be responsible for related quality assurance and improvement activities, provided all such activities shall be conducted in a manner consistent with all Managed Care

Contracts and policies applicable to the members of the GHCS Network and in a manner so as to assure the provision of quality, cost-effective services.

Section 7.19 Fund-Raising and Endowment. Each member of the GHCS Network and the Foundation shall undertake such fund-raising as may be necessary from time to time to assure that the GHCS Network has sufficient capital to implement the Local Plans and shall coordinate such efforts with YNHHS. New endowments may be created by any member of the GHCS Network with monies derived from gifts, bequests, fund-raising activities, and other such endowment sources.

ARTICLE VIII

YNHHS MANAGEMENT AND OPERATIONS

Section 8.1 YNHHS Management. The responsibilities of certain principal officers of YNHHS shall be substantially as follows:

8.1.1 **CEO.** The CEO will manage the relationship between YNHHS and the System Members so as to achieve the Goals and Objectives, consistent with the authority of the Boards of Greenwich Hospital and GHCS, respectively, under Section 4.5 and Article XIII hereof. The CEO will be responsible for implementing programs that are consistent with the Goals and Objectives and with the strategies and policies established by YNHHS, as well as with such Greenwich Hospital and GHCS authority.

8.1.2 **GHCS President.** The positions of President and Chief Executive Officer of GHCS and Greenwich Hospital shall be held by the same person, and such person shall be appointed by the CEO in consultation with and with the consent of the GHCS Board of Directors. The President and Chief Executive Officer of GHCS/Greenwich Hospital will be employed by YNHHS and will be elected as an Executive Vice President of YNHHS, and as such shall fully participate as a member of the YNHHS senior management group in the development of YNHHS's strategy, policies and plans. The President and Chief Executive Officer of GHCS/Greenwich Hospital shall report jointly to the GHCS/Greenwich Hospital Boards and to the CEO. The CEO shall periodically evaluate the President and Chief Executive Officer of GHCS/Greenwich Hospital, and in connection therewith shall determine the terms and conditions of that person's employment and compensation, provided the CEO shall consult with the Chairman of the GHCS Board of Directors. The CEO shall have the exclusive right, if the CEO deems it appropriate, to remove the GHCS/Greenwich Hospital President and Chief Executive Officer, provided the CEO shall consult with the GHCS/Greenwich Hospital Board Chairman prior to taking any such action.

8.1.3 **Other GHCS Officers.** The Chief Financial Officer of GHCS, the officer responsible for GHCS' planning and marketing functions, the officer in charge of Greenwich Hospital operations, the officer in charge of GHCS' human resources function, and such other officers of GHCS as the CEO shall from time to time designate, shall become members of the YNHHS management team, be employed by YNHHS, and be assigned full

time to GHCS and Greenwich Hospital, provided, if the CEO designates any such other officer of GHCS to be employed by YNHHS, then that officer shall be employed by YNHHS and that officer shall be offered employment with a salary equivalent to his then existing salary, and provided further that YNHHS shall do so in a manner that does not cause a breach of any contract then existing with any such officer. The foregoing members of GHCS senior management shall hold the same positions for Greenwich Hospital. YNHHS will charge GHCS and Greenwich Hospital for the actual cost of these persons' salaries, bonuses and benefits. Notwithstanding the fact that these officers will be employed by YNHHS, each of them shall report directly to the President and Chief Executive Officer of GHCS. Each of these officers will have an indirect reporting relationship to the YNHHS counterpart for the relevant functional area. The Chief Medical Officer of GHCS will participate fully with other members of the YNHHS management team if not employed by YNHHS. The CEO shall determine the future configuration of the YNHHS staff. Except as described above, the officers of GHCS Affiliates shall be appointed by the President and Chief Executive Officer of GHCS after consultation with the CEO.

Section 8.2 Committee Structure. An important interface between YNHHS and GHCS will be through YNHHS management committees. These committees will include the participation of key GHCS personnel to ensure GHCS involvement in YNHHS planning and operations. The CEO shall establish such committees as may be necessary or desirable from time to time and appoint appropriate individuals.

ARTICLE IX

REPRESENTATIONS AND WARRANTIES

YNHHS hereby represents and warrants to GHCS, and GHCS hereby represents and warrants to YNHHS, that the statements set forth in this Article are as to each of them true and correct as of date hereof, and, except with respect to the representations and warranties set forth in Sections 9.4 and 9.5, will be true and correct on the Effective Date and the Closing Date.

Section 9.1 Authority to Enter into Agreement; Enforceability. It has full corporate power and authority to enter into and to carry out the terms and provisions of this Agreement, and the transactions contemplated hereby, without obtaining the approval or consent of any other party or authority (other than any regulatory approvals required under Connecticut law and other than the expiration of any applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, 15 U.S.C. §§ 7A *et seq.* which period shall have expired on or prior to the Closing Date); all corporate proceedings have been taken and all corporate authorizations have been obtained by such party and its Affiliates which are necessary to authorize the execution and delivery of this Agreement; and this Agreement is a legal, valid and binding obligation of such party enforceable in accordance with its terms.

Section 9.2 Organization and Standing. It and each of its Affiliates is a corporation duly organized, validly existing and in good standing under the laws of the State

of Connecticut. Each such corporation has all requisite corporate power and authority to own, lease, and operate its properties and to carry on its business as it is now being conducted. Complete and correct copies of the Certificate of Incorporation and Bylaws of each party and its Affiliates, as amended to date, have been delivered to the other party.

Section 9.3 Financial Statements. It has provided the other party with the audited balance sheets and income statements of such party and its Affiliates for the most recent three (3) Fiscal Years for which audited statements are available, together with the most recent unaudited balance sheet and income statement of such party. The foregoing financial statements (a) are in accordance with the books and records of such party and its Affiliates, and (b) fairly present the financial condition and results of operations for such party and its Affiliates as of the dates and for the periods indicated in accordance with generally accepted accounting principles applied on a consistent basis, except as may be noted therein. Each party and its Affiliates have no material liabilities or obligations, whether contingent or absolute, direct or indirect, or matured or unmatured, which are not shown or provided for in the most recent of such financial statements or which have not otherwise been disclosed to the other parties.

Section 9.4 Litigation. Except as otherwise disclosed in writing in Schedule 9.4, each party represents and warrants that there are no suits, actions, or legal, administrative, arbitration or other proceedings or governmental investigations pending, filed, or initiated by, or to the best of its knowledge, threatened against or directly involving the party or any of its Affiliates that may materially and adversely affect the operations, financial status or tax-exempt status of such party or its Affiliates or their ability to perform hereunder.

Section 9.5 Compliance with Laws and Other Instruments. To the best of its knowledge, the business and operations of each party and its Affiliates have been and are being conducted in substantial accordance with all applicable laws, ordinances, and rules and regulations of all authorities, the violation of which, individually or in the aggregate, would materially and adversely affect the business or operations of that party or its Affiliates. Except for laws and regulations that commonly apply to health care institutions in Connecticut, and matters, if any, reflected in the financial statements referred to in Section 9.3, each party and its Affiliates are not subject to any restriction of any kind or character which may materially and adversely affect their business or operations. Neither the execution and delivery of this Agreement, nor the consummation of the affiliation contemplated hereby, will conflict with, result in a violation or breach of any term or provision of, or constitute a default under the Corporate Documents of each party or its Affiliates, or any statute, order, judgment, writ, injunction, decree, license, permit, rule or regulation of any court or any governmental or regulatory body, or any indenture, mortgage, lease, contract, agreement, instrument, commitment or other arrangement to which any party or any of its Affiliates is a party or by which it is or may be bound, which conflict, violation, breach or default would materially and adversely affect the operations of the party or any of its Affiliates.

Section 9.6 Insurance. Each party and its Affiliates have continuously maintained and currently maintain fire, casualty, liability, professional liability and all other insurance (including self-insurance) coverages necessary in their respective businesses and operations.

Such insurance policies or programs cover the property, business, and operations of such party and its Affiliates in amounts and against losses and risks such as are generally maintained for comparably situated businesses.

Section 9.7 Material Misstatements or Omissions. No representation or warranty by a party contained in this Agreement or in any certificate or Schedule furnished to the other parties under this Agreement contains any untrue statement of a material fact or omits to state a material fact necessary to make the statements and facts contained therein not materially misleading.

ARTICLE X

COVENANTS

From and after the date hereof and through the Closing Date, each party hereby agrees to keep, perform, and fully discharge the following covenants and agreements.

Section 10.1 Interim Conduct of Business. Each party shall use its best efforts and shall cause its Affiliates to use their best efforts to (a) preserve, protect and maintain the businesses, properties and assets of the party and its Affiliates; (b) operate the businesses of the party and its Affiliates as a going concern consistent with prior practices and in the ordinary course of business except that YNHHS shall continue to pursue System development; (c) preserve the goodwill of all individuals having business or other relations with it or them, including physicians, employees, patients, customers and suppliers; (d) prepare all documents called for by this Agreement and required to facilitate the consummation of the transactions contemplated herein; and (e) enter into no new undergraduate or graduate medical education affiliation with any university, medical school, or teaching institution other than YSM. Each party shall provide the other parties promptly with interim financial statements and any material management reports of the party and its Affiliates as and when they become available. The GHCS Network shall not make or cause its Affiliates to make, any material changes in its Corporate Documents, except for changes expressly authorized by this Agreement.

Section 10.2 Preserve Accuracy of Representations and Warranties. Each party shall take, and shall cause its Affiliates to take, no action that would render any representation and/or warranty contained in Article IX of this Agreement inaccurate as of the Closing Date. Each party shall promptly notify the other party of any lawsuits, claims, administrative actions, investigations, or other proceedings asserted or commenced against the party or any of its Affiliates, or its or their officers, directors, or members involving in any material way the businesses, properties, assets or tax-exempt status of the party or its Affiliates. Each party shall promptly notify the other party in writing of any facts or circumstances which come to the party's attention and which the party reasonably believes causes, or through the passage of time may cause, any of the representations and warranties as to it or its Affiliates contained in Article IX to be false or inaccurate.

Section 10.3 Access to Information. Each party shall give, and shall cause its Affiliates to give, to the other party and to appropriate representatives of each (defined for purposes of this paragraph as a party's directors, officers, employees, agents, or advisors) access, during normal business hours, to such properties, books, records, contracts and other documents pertaining to the businesses, properties and assets of the party and its Affiliates, as may be reasonably requested and appropriate in order for each party to perform its obligations hereunder. Officers and employees of a party and its Affiliates shall be available on a regular and frequent basis to confer with appropriate representatives of the other party to report material operational matters and the general status of ongoing operations. Each party shall cooperate in keeping the other party fully informed and shall promptly provide notice to the other party of any unexpected emergency or other unanticipated adverse change in the business or prospects of the party and its Affiliates.

Section 10.4 Maintain Books and Accounting Practices. Each party shall maintain, and cause its Affiliates to maintain, its and their books of account in the usual, regular and ordinary manner in accordance with generally accepted accounting principles consistently applied and shall make no change in any of their accounting methods or practices without the prior written approval of the other party.

Section 10.5 System Alliances In GHCS Service Area. All decisions as to whether the System shall enter into strategic or other alliances in the GHCS Primary Service Area shall be made by the Board of Directors of YNHHS or YNHHS senior management if such decision-making is so delegated by such Board. GHCS shall participate in the evaluation of any such opportunity and in such decision-making through its representation on the YNHHS Board of Directors and the participation of GHCS senior management in the System planning process.

ARTICLE XI

INDEMNIFICATION

Section 11.1 Indemnification. Each party agrees to indemnify and hold the other party and its Affiliates and their respective directors and officers (collectively a "Section 11.1 indemnified party") forever harmless from and against any and all liabilities, demands, claims, actions, or causes of action, assessments, judgments, losses, costs, damages or expenses, including reasonable attorneys' fees, sustained or incurred by a Section 11.1 indemnified party and not otherwise reimbursed by insurance (other than self-insurance) resulting from or arising out of or by virtue of any false or misleading representation or warranty made herein by such party or any of its Affiliates or non-compliance with or breach by such party or any of its Affiliates of any of the covenants, commitments or obligations of this Agreement to be performed by such party or any of its Affiliates.

The right to indemnification set forth in this Section 11.1 shall survive termination of this Agreement, except that such right shall expire two (2) years after the Closing Date with respect to any false or misleading representation or warranty.

Section 11.2 Indemnification Notice. In the event that any claim is asserted against a Section 11.1 indemnified party as to which such party is entitled to indemnification hereunder, such party (the "indemnified party") shall promptly after learning of such claim notify the party obligated to indemnify it (the "indemnifying party") thereof in writing; provided, however, that the failure of the indemnified party to give prompt notice of such claim shall not relieve the obligation of the indemnified party with respect to such claim. Except to the extent otherwise provided by the terms of applicable insurance policies (other than self-insurance), the indemnifying party shall have the right, upon written notice to the indemnified party within ten (10) days after receipt from the indemnified party of notice of such claim, to conduct at its expense the defense against such claim in its own name, or, if the indemnifying party shall fail to give such notice, it shall be deemed to have elected not to conduct the defense of the subject claim, and in such event the indemnified party shall have the right to conduct such defense and to compromise and settle the claim without prior consent of the indemnifying party. In the event that the indemnifying party elects to conduct the defense of the subject claim, the indemnified party will cooperate with and make available to the indemnifying party such assistance and materials as may be reasonably requested by it, all at the expense of the indemnifying party, and the indemnified party shall have the right at its expense to participate in the defense, provided that the indemnified party shall have the right to compromise and settle the claim only with the prior written consent of the indemnifying party, unless otherwise provided by the terms of applicable insurance policies (other than self-insurance).

ARTICLE XII

CONDITIONS PRECEDENT

Section 12.1 List of Conditions Precedent. The obligations of each party to effect the transactions contemplated hereby are subject to the satisfaction of each of the following conditions:

12.1.1 Each and every representation and warranty by the other party contained in this Agreement (including the representations and warranties contained in Sections 9.4 and 9.5) or in any certificate, Exhibit or Schedule furnished to the other party pursuant hereto shall be true and complete in all material respects on and as of the Closing Date as though made on such date.

12.1.2 The other party shall have performed and complied with all covenants and conditions required by this Agreement to be performed or complied with by it prior to or on the Closing Date.

12.1.3 The party shall have received a certificate of a duly authorized officer of the other party, dated as of the Closing Date, certifying (a) that there have been no material adverse changes in the other party's business or operations prior to the Closing Date, and (b) that the representations and warranties of the other party and its Affiliates contained in Article IX (including the representations and warranties contained in Sections 9.4 and 9.5) are true

and complete on and as of the Closing Date in all material respects as if made on and as of such date.

12.1.4 No suit or action by any party or any investigation, inquiry, or proceeding by any governmental authority, or any legal or administrative proceeding shall have been instituted or threatened on or before the Closing Date which: (a) questions the validity or legality of this Agreement or any transaction contemplated hereby, or (b) seeks to enjoin any transaction contemplated hereby, or (c) seeks material damages on account of the consummation of any transaction contemplated hereby.

12.1.5 No change shall have occurred or have been announced or proposed prior to the Closing Date in the laws, rules, regulations, or policies of any governmental authority which might reasonably be expected to materially and adversely affect the consummation of this transaction or the benefits to be derived by any party therefrom.

12.1.6 Opinions of counsel for each party shall have been delivered to the other party in form and content reasonably satisfactory to the other party.

12.1.7 The party shall have received certified resolutions of the governing body of the other party, dated prior to the Closing Date, evidencing authorization to adopt the changes to the party's Corporate Documents required hereby.

12.1.8 Any applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, 15 U.S.C. §§ 7A *et seq.*, shall have expired, and no judicial action or other proceeding shall have been instituted by any governmental authority or agency, or by any other person before any court or governmental authority or agency which challenges or seeks to restrain or prohibit the performance of this Agreement.

12.1.9 The parties shall have obtained all governmental consents and regulatory approvals required for the consummation of the transaction contemplated by this Agreement, each in form and content acceptable to each party.

12.1.10 Each party shall have completed its respective due diligence investigation of the other party and shall be satisfied with the results of such investigation.

Section 12.2 Additional Conditions Precedent. The obligations of YNHHS to effect the transactions contemplated hereby are subject to the satisfaction of Sections 12.2.1 and 12.2.3 below, and the obligation of GHCS to effect the transactions contemplated hereby are subject to the satisfaction of Section 12.2.2 below.

12.2.1 In accordance with the Act, and effective on or before the Closing Date, GHCS will amend its Certificate of Incorporation and Bylaws in a manner acceptable to YNHHS and to GHCS to reflect the agreements and commitments made in this Agreement. In addition GHCS shall cause its Affiliates to amend their Corporate Documents (if necessary) to reflect the agreements and commitments made in this Agreement on or before the Closing Date.

12.2.2 In accordance with the Act, and effective on or before the Closing Date, YNHHS will amend its Certificate of Incorporation and Bylaws in a manner acceptable to YNHHS and to GHCS to reflect the agreements and commitments made in this Agreement.

12.2.3 In accordance with the Act and the Code, and effective on or before the Closing Date, GHCS and Greenwich Hospital shall cause to be formed the Foundation, and the Certificate of Incorporation and Bylaws of the Foundation will be filed and adopted, respectively, in such forms as are acceptable to YNHHS reflecting the agreements and commitments made in this Agreement.

Section 12.3 Termination of Agreement; Waiver of Conditions Precedent. In the event the Closing has not occurred on or before June 30, 1998, then this Agreement shall terminate and be of no further force and effect, unless otherwise provided in a writing executed by both parties. By proceeding on the Closing Date, each party shall be conclusively deemed to have accepted or waived fulfillment of all conditions set forth in Section 12.1 or elsewhere in this Agreement, unless otherwise provided in a writing executed by both parties at such time.

ARTICLE XIII

REIMBURSEMENT AND FEES

Section 13.1 Basic GHCS Network Support. In consideration for the services to be performed by YNHHS on behalf of the GHCS Network as the institution responsible for developing and leading the System following the Closing Date, GHCS agrees that it will pay to YNHHS: (a) the full cost of compensation and any contractual obligations of those GHCS employees who become employed by YNHHS pursuant to Sections 8.2.2 and 8.2.3 hereof, (b) the direct payment for such services as "MSO Services" (so called), access fees for information systems, etc., and the cost of consolidated hospital services (e.g., business office services), which services shall be developed and implemented in accordance with Section 7.16, in each case on a basis such that acute care hospitals, or entities comprised predominantly of one or more acute care hospitals, make payments to YNHHS on an equal and ratable basis, and (c) a percentage of the annual operating expenses of the GHCS Network as specified by YNHHS, which percentage is currently set at one percent (1%) of such expenses. YNHHS may raise such percentage, upon appropriate notice to the Local Networks to allow for incorporation of such rate change in the regular planning and budgeting process, to permit YNHHS to change the then existing method of paying for corporate services and to pursue the System functions (as opposed to functions relating exclusively to an individual System Member) included from time to time in the Goals and Objectives; provided that no increase in such percentage shall result in acute care hospitals, or entities comprised predominantly of one or more acute care hospitals, making payments to YNHHS other than on an equal and ratable basis. YNHHS shall use all such fees to pay for corporate services and to pursue the System functions (as opposed to functions relating exclusively to an individual System Member) included from time to time in the Goals and Objectives. GHCS shall pay the full amount required by clauses (a) and (b) above on a monthly basis. GHCS

shall pay the amount required by clause (c) above by paying monthly one-twelfth of the applicable percentage of the actual operating expenses of the GHCS Network over the preceding twelve month period. On or before ninety (90) days after the end of each Fiscal Year, the parties shall (if necessary) calculate any adjustment required to be made to the clause (c) payment based upon actual operating expenses for the GHCS Network in the preceding Fiscal Year. Except as provided in this Section, the GHCS Network will provide economic support to YNHHS only as provided in Section 13.2 below.

Section 13.2 Additional GHCS Network Support. YNHHS may request additional economic support, over and above the amounts established pursuant to Section 13.1, from the GHCS Network, either through a higher percentage of annual expenses or a request for a capital contribution, to achieve the Goals and Objectives. GHCS shall consider such request in good faith and if the GHCS Board determines such to be in GHCS' and the System's best interests, taking into account the payments being made to YNHHS by other System Members, GHCS shall increase the percentage of expenses paid to the YNHHS or provide such other support to YNHHS as the GHCS Board shall approve.

ARTICLE XIV

TERM

The term of this Agreement is perpetual unless terminated by a written agreement executed by both parties or as otherwise specifically provided herein.

ARTICLE XV

MISCELLANEOUS

Section 15.1 Strict Compliance. No failure by any party to insist upon the strict performance of any covenant, agreement, term or condition of this Agreement shall constitute a waiver of any such breach of such covenant, agreement, term or condition. No waiver of any breach shall affect or alter this Agreement, but each and every covenant, agreement, term and condition of this Agreement shall continue in full force and effect.

Section 15.2 Notices. All notices, requests, approvals, demands and other communications required or permitted to be given under this Agreement shall be in writing and shall be deemed to have been duly given and to be effective when delivered personally (including delivery by express or courier services) or, if mailed, three (3) business days after being deposited in the United States mail as registered or certified matter, postage prepaid, return receipt requested, addressed to parties at the addresses set forth in Schedule 15.2 or to such other address as either party may designate by notice to the other parties.

Section 15.3 Amendments. Except as provided herein, neither this Agreement nor any term or provision hereof may be changed, waived, discharged or terminated except by the written agreement of the parties.

Section 15.4 Captions. The captions to this Agreement are for convenience of reference only and in no way define, limit or describe the scope or intent of this Agreement or any part hereof, nor in any way affect this Agreement or any part hereof.

Section 15.5 Assignment. This Agreement shall be assignable by a party only upon the prior written consent of the other party.

Section 15.6 Controlling Law. This Agreement shall be construed, and the rights and liabilities of the parties hereto determined, in accordance with the internal laws of the State of Connecticut; provided, however, that the conflicts of law principles of the State of Connecticut shall not apply to the extent that they would operate to apply the laws of another state.

Section 15.7 Severability. If any provision of this Agreement shall for any reason be held to be invalid or unenforceable, such invalidity or unenforceability shall not affect any other provision hereof, and this Agreement shall be construed as if such invalid or unenforceable provision were omitted.

Section 15.8 Confidentiality. Each party agrees to not provide a copy of this Agreement or any portion hereof to any person not a party hereto, and to not discuss the contents hereof, or the negotiations or discussions with respect hereto, with any person not a party hereto, other than with that party's Affiliates, legal counsel, auditors and other professional advisors, and except as required by applicable law, provided the parties shall consult as to the need for and timing of the disclosure of this Agreement to any governmental authority. Notwithstanding the foregoing, to coordinate the efforts and improve the position of YNHHS in attracting new System Members the CEO may disclose such information concerning this Agreement as he considers necessary to insure the success of the System.

Section 15.9 Successors and Assigns. This Agreement shall inure to the benefit of and be binding upon the parties hereto, and their respective successors and permitted assigns.

Section 15.10 Expenses. Each party agrees to pay its own expenses incurred in connection with the creation of the System and the transactions contemplated hereby.

Section 15.11 Remedies. In addition to other remedies available at law or provided for herein, the parties shall be entitled to restraint by injunction of the violation, or attempted or threatened violation, of any condition or provision of this Agreement, or to a decree specifically compelling performance of any such condition or provision.

Section 15.12 Entire Agreement. This Agreement, including any Exhibits or Schedules attached hereto, constitutes the entire agreement between the parties hereto with respect to the subject matter hereof.

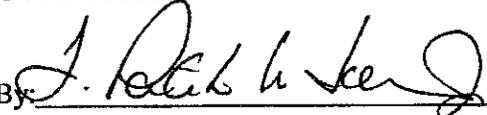

Section 15.13 Cross References. Unless otherwise stated, all references to Exhibits and Schedules in the text of this Agreement are to the Exhibits and Schedules of this Agreement.

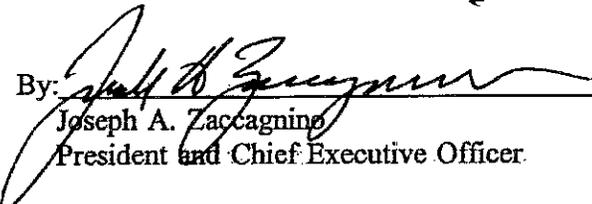

Section 15.14 Execution in Counterparts. This Agreement may be executed in two (2) or more counterparts, each of which shall be an original, but all of which taken together shall constitute one and the same Agreement.

Section 15.15 Change in Governing Law or Regulation. If the application of any present or future law, regulation, ordinance or order, can reasonably be expected to adversely affect the respective rights of any party hereunder, including without limitation a party's ability to exercise its governance responsibilities and, in the case of YNHHS, to undertake managed care contracting on behalf of the GHCS Network in accordance with the terms of this Agreement, YNHHS and GHCS shall negotiate in good faith to amend this Agreement to restore to such party the affected rights so as to achieve the original intent of YNHHS and GHCS. Notwithstanding the failure of the parties to agree upon such an amendment to this Agreement despite good faith negotiations, this Agreement shall remain in full force and effect.

IN WITNESS WHEREOF, the parties have executed this Agreement on the day and year first written above.

**SUMMARY OF AUTHORITIES OF
GREENWICH HOSPITAL BOARD OF TRUSTEES**

- i. Establish a mission for Greenwich Hospital consistent with the Greenwich Hospital Corporate Documents approved by YNHHS.
- ii. Operate and manage Greenwich Hospital within approved Local Plans in accordance with Section 7.2.
- iii. Develop local vertically integrated network in conjunction with Greenwich Hospital medical staff and YNHHS.
- iv. Develop and approve Greenwich Hospital strategic plans, operating budgets and capital budgets in a timely manner for approval by YNHHS.
- v. Solely grant medical staff membership and credential local physicians.
- vi. Initiate and approve major programmatic changes locally through the planning and budgeting process, subject to the approval of YNHHS.
- vii. Oversee Utilization Management/Quality Assurance and Improvement Programs.
- viii. Solely conduct self-evaluation of Board.
- ix. Determine community need.
- x. Solely approve any proposed changes to the YNHHS Bylaws or Certificate of Incorporation that would diminish the rights of the GHCS and Greenwich Hospital Boards established in the definitive agreements.
- xi. Approve any merger, sale, conversion, dissolution, affiliation or joint venture, subject to approval by YNHHS.
- xii. Approve changes to Greenwich Hospital bylaws or certificate of incorporation, subject to approval by YNHHS.
- xiii. Solely make provision for charity care.
- xiv. Solely oversee community relations/local public policy.
- xv. Undertake fund-raising efforts in coordination with YNHHS.
- xvi. Nominate and elect members of the GHCS/Greenwich Hospital Board in accordance with Article IV of this Agreement.

Resolution of Yale-New Haven Health Services Corporation

Board of Directors

YALE-NEW HAVEN HEALTH SERVICES CORPORATION, INC.

I certify that the following is a true and exact copy of a resolution passed by the Board of Directors of Yale-New Haven Health Services Corporation, Inc. on June 20, 1997, and that said resolution continues in full force and effect as of the date of this certification:

NOW, THEREFORE, BE IT RESOLVED that the Corporation enter into the System Affiliation Agreement with GHCS, in a form consistent with the summary of principal terms presented at this meeting, with such changes or additions thereto as may be deemed necessary, appropriate or desirable by the President and Chief Executive Officer of the Corporation (the "CEO") and the Chairman of the Board of Directors in their discretion, and that the CEO and the Chairman be authorized to execute and deliver, for and on behalf of the Corporation, the System Affiliation Agreement, and that the Officers be, and each of them hereby is, authorized to execute and deliver, for and on behalf of the Corporation, such other documents, certificates, applications, filings and agreements with private or public entities or agencies as any such Officer, in his or her sole discretion, deems necessary, appropriate or advisable to effect the transactions contemplated by the System Affiliation Agreement, including without limitation filings pursuant to the Hart-Scott-Rodino Antitrust Improvements Act, applications for Certificates of Need from the Connecticut Office of Health Care Access, and requests for private letter rulings or determination letters from the Internal Revenue Service, the execution and delivery thereof by such Officer or Officers to be conclusive evidence of authorization and approval hereunder.

Resolution of Greenwich Health Care Services, Inc.

Board of Directors

GREENWICH HEALTH CARE SERVICES, INC.

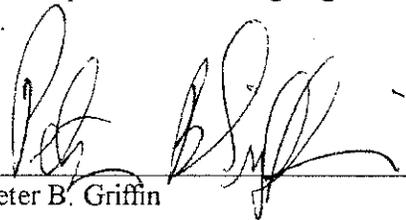

I certify that the following is a true and exact copy of a resolution passed by the Directors of Greenwich Health Care Services, Inc. (the "Corporation") on July 15, 1997, and that said resolution continues in full force and effect as of the date of this certification:

NOW, THEREFORE, BE IT RESOLVED that, subject to certain commitments by YNHHS being satisfactorily resolved, the Corporation enter into the System Affiliation Agreement with YNHHS, in a form consistent with the summary of principal terms presented at this meeting, with such changes or additions thereto as may be deemed necessary, appropriate or desirable by the President and Chief Executive Officer of the Corporation (the "CEO") and the Chairman of the Board of Directors in their discretion, and that the CEO and the Chairman be authorized to execute and deliver, for and on behalf of the Corporation, and cause the Corporation to perform its obligations under the System Affiliation Agreement, and that the Officers be, and each of them hereby is, authorized to execute and deliver, for and on behalf of the Corporation, such other documents, certificates, applications, filings and agreements with private or public entities or agencies as any such Officer, in his or her sole discretion, deems necessary, appropriate or advisable to effect the transactions contemplated by the System Affiliation Agreement, including without limitation filings pursuant to the Hart-Scott-Rodino Antitrust Improvements Act, applications for Certificates of Need from the Connecticut Office of Health Care Access, and requests for private letter rulings or determination letters from the Internal Revenue Service, the execution and delivery thereof by such Officer or Officers to be conclusive evidence of authorization and approval hereunder.

FURTHER RESOLVED that the Officers be, and they hereby are, directed to bring to this Board for approval proposed amendments to the Certificate of Incorporation and Bylaws of the Corporation reflecting such changes as may be necessary or desirable to consummate the transactions contemplated by the System Affiliation Agreement.

FURTHER RESOLVED that the Officers be, and each of them hereby is, authorized, empowered and directed to do and perform all other acts and things deemed by any of them necessary, appropriate or advisable to carry out the intent of the foregoing resolutions.

FURTHER RESOLVED that all actions heretofore taken by any Officer or agent of the Corporation in connection with any matter referred to or contemplated in the foregoing resolutions are hereby approved, ratified and confirmed in all respects.

New Haven, CT 06504

Dear Mr. Zaccagnino:

I am writing about the federal tax exemption status of Yale-New Haven Health Services Corporation ("YNHHSC") and its related entities currently exempt from federal income taxation under section 501(c)(3) of the Internal Revenue Code ("the Code"). You have asked for an opinion concerning the effect on their respective section 501(c)(3) exemptions of the affiliation between YNHHSC and Greenwich Health Care Services, Inc. ("GHCS"), the parent corporation of Greenwich Hospital Association ("GHA") and other subsidiary corporations.

I understand the facts as follows. The proposed affiliation will be effected by having YNHHSC become the sole member of GHCS, which, along with GHA and at least one other GHA controlled corporation, is currently exempt from federal income taxation under section 501(c)(3) of the Code and not a private foundation. Other than the membership change for GHCS and certain other governance changes related to board composition and the broadening of YNHHSC's purpose to include serving as the parent organization of GHCS and supporting GHA, YNHHSC will experience no further significant governance, structural, or operating changes as a result of the affiliation, and the affiliation will not alter YNHHSC's purposes of promoting health care in a charitable manner. You have represented that no activities forbidden to or improper for entities maintaining exemption under section 501(c)(3), including but not limited to private inurement, excessive private benefit, political activity, or excessive unrelated trade or business activity, will be conducted.

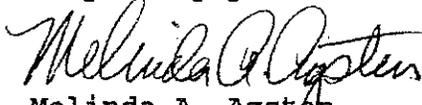

Under these circumstances, in my opinion the affiliation between YNHHSC and GHCS will not affect the tax status of YNHHSC and its affiliated entities currently exempt under section 501(c)(3). It is my further view that approval of the affiliation by the Internal Revenue Service ("IRS") is not required. The IRS must be notified of the affiliation

000138

Mr. Joseph A. Zaccagnino
August 18, 1997
Page -2-

by both YNHSC and GHCS and must also receive copies of the amended corporate documents. This notification should be made either when the next Form 990's are filed or prior to that time by letters to the District Director.

Very truly yours,

Melinda A. Agsten

Greenwich Health Care Services, Inc.
The Greenwich Hospital Association
5 Perryridge Road
Greenwich, CT 06830

Ladies and Gentlemen:

You have requested our opinion as to certain federal income tax consequences to Greenwich Health Care Services, Inc. ("GHCS"), a Connecticut nonstock corporation, resulting from the execution and delivery of and performance by GHCS of its obligations under that certain System Affiliation Agreement dated July 24, 1997 (the "Affiliation Agreement") by and among Yale-New Haven Health Services Corporation ("YNHHS"), GHCS and The Greenwich Hospital Association ("GHA"), a Connecticut nonstock corporation the sole member of which is GHCS, pursuant to which GHCS and YNHHS will, subject to the terms and conditions of the Affiliation Agreement, become permanently affiliated (the "Affiliation"). Except as otherwise provided, capitalized terms not defined herein have the meanings set forth in the Affiliation Agreement. All section references, unless otherwise indicated, are to the Internal Revenue Code of 1986, as amended (the "Code").

Pursuant to the Affiliation Agreement, among other things and except as otherwise provided therein:

(1) With respect to the creation of the Affiliation: (a) YNHHS will become the sole member of GHCS and GHCS will remain the sole member of GHA and (b) GHCS will not, without the consent of YNHHS, amend any of the Corporate Documents relating to GHCS;

Greenwich Health Care Services, Inc. -2-
The Greenwich Hospital Association.

August 19, 1997

(2) With respect to the Foundation: (a) GHCS and GHA will cause the Foundation to be incorporated and thereafter seek and obtain recognition of its exemption from federal taxation under the Code as a supporting organization of GHA, (b) the Foundation will hold, manage and distribute the endowment of GHA which funds will be transferred to the Foundation on the Closing Date, (c) the Foundation will be governed by a self-perpetuating Board of Directors including a designee of YNHHS; the initial members of the Foundation shall be the current members of GHCS, (d) the net income of the Foundation will be distributed annually to GHCS or GHA to be used in accordance with their respective missions, (e) GHCS or GHA may request that the Foundation distribute to a member of the GHCS Network all or a portion of the Principal, (f) Foundation staff and services needs shall be obtained from a member of the GHCS Network at cost, and (g) the Foundation will become obligated with respect to certain bonds issued in connection with that certain Master Trust Indenture dated as of March 1, 1996 by and among GHA, GHCS and Fleet National Bank;

(3) With respect to the authority granted YNHHS: YNHHS will have responsibility for and control over among other things: (a) establishing the System's mission, (b) planning and organizing the System's provision of services, research, managed care contracting services and support systems on an integrated and cost-effective basis, (c) approval of the GHCS' Network strategic plans and related capital and operating budgets and any proposed modifications to same, (d) whether GHCS will incur any debt or lines of credit or transfer any assets, (e) approval of any sale, merger, consolidation, liquidation, dissolution or bankruptcy filing by or involving GHCS, (f) approval of any contract to manage or administer GHCS, (g) negotiations, contracts, strategies, policies, and operations relating to managed care relationships, (h) approval of GHCS affiliations with any other alliance of health care providers, (i) consulting as to recruitment and selection of GHCS Facility Chiefs of service, (j) appoint auditors, establish internal audit programs and set accounting policies for GHCS, GHA and their affiliates, (k) approval of GHCS Major Programmatic changes and decisions regarding same, and (l) coordinate and promote interfacing regarding the System through various management committees.

(4) As to reimbursement and fees, GHCS will pay to YNHHS (a) the compensation costs of GHCS employees who become employed by YNHHS, (b) the direct payment for services, access fees for information systems and costs of consolidated

Greenwich Health Care Services, Inc. -3-
The Greenwich Hospital Association.

August 19, 1997

hospital services (e.g. business office services) on an equal and pro rata basis to other members of the System, and (c) a percentage of the annual operating expenses of the GHCS network as specified by YNHHS.

Such description of the transaction, Affiliation and Affiliation Agreement set forth above and our opinion as stated herein, are qualified in their entirety by the terms of the Affiliation Agreement, and are based upon and subject to the following: (1) at all times prior to the date of the Affiliation Agreement and through the date hereof GHCS and GHA have been organized and operated in such a manner as to satisfy all requirements necessary to be treated as Section 501(c)(3) organizations exempt from federal income tax, (2) the accuracy of the description of the goals of the System and description of the benefits to be derived by GHCS and GHA from the Affiliation and membership in the System contained in the Affiliation Agreement, (3) the Affiliation Agreement and related transactions being effected in accordance with the provisions of the Affiliation Agreement, (4) the performance by GHCS and GHA of their respective obligations under the Affiliation Agreement will be conducted in such a manner as does not adversely impact their qualification as Section 501(c)(3) organizations exempt from federal income tax, or cause them to fail to satisfy any requirements relating thereto, (5) other than performing their respective obligations under the Affiliation Agreement, GHCS and GHA will not engage in or refrain from performing any activity or taking any action which would adversely impact their qualification as Section 501(c)(3) organizations exempt from federal income tax, or cause them to fail to satisfy any requirements relating thereto, (6) the accuracy of the representations and compliance with the covenants contained in the Affiliation Agreement made by the respective parties thereto, insofar as they relate to or affect the tax treatment of the transactions contemplated in or by the Affiliation Agreement, which representations and/or covenants shall be satisfied and/or true and correct, as the case may be, at all times through and/or after the date of the Affiliation Agreement and Closing, and (7) with respect to the formation of the Foundation: (a) other than as required pursuant to the Affiliation Agreement, the Foundation will be organized and operated exclusively as a tax exempt supporting organization of GHA under Section 509(a) and Section 501(c)(3) and in compliance with all requirements relating thereto, and (b) other than with respect to the requirements of the Code, the transfer of the endowment fund as described in Section 6.3 of the Affiliation Agreement (the "Endowment Fund") will be made in compliance with all applicable laws, rules, and regulations and any

Greenwich Health Care Services, Inc. -4-
The Greenwich Hospital Association.

August 19, 1997

agreements, understandings or conditions to which or with respect to which GHCS or GHA is a party or otherwise obligated.

In rendering our opinion, we have considered the applicable provisions of the Code, Treasury Regulations, pertinent judicial authorities, interpretive rulings of the Internal Revenue Service and such other authorities as we have considered relevant as of the date of this opinion, and any subsequent change therein may adversely affect the conclusions reached in this opinion and such opinion may not then be relied upon.

Our review of applicable interpretive rulings included a review of certain private letter rulings ("PLR(s)"), including but not limited to Private Letter Ruling 9726020, and certain Internal Revenue Service ("IRS") announcements (specifically the text of IRS Continuing Education, Exempt Organizations Technical Instruction Program for FY 1997, and that certain IRS Checklist for Hospital Joint Operating Agreement Applicants dated July 9, 1996 and issued by the IRS' Exempt Organization Technical Branch 1 (the "IRS Information")). While the IRS Information may not be relied upon as authority for setting or sustaining a technical tax position, such information is instructive and provides guidance as to how the IRS is likely to rule given the absence of other authority in the area.

A review of the IRS Information indicates that a facts and circumstances test will be applied in analyzing the potential impact on participants of affiliation and joint operating agreements such as the Affiliation Agreement. Except as specifically noted below, the terms of the Affiliation Agreement substantially comply with the requirements of the IRS Information. The delegation of authority by GHCS / GHA to YNHHS is one of the most important and specifically described factors contained in the IRS Information. The following factors are identified by the IRS Information as being relevant to the determination of whether sufficient authority has been delegated to YNHHS. As indicated below, certain of the agreements contained in the Affiliation Agreement differ from those that the IRS Information would expect in an arrangement intended to be without adverse affect on the tax-exempt status of the parties:

(a) with respect to the delegation of authority to YNHHS to establish budgets, YNHHS is given authority to approve budgets but is not specifically granted authority to initiate budgeting / establish budgets,

Greenwich Health Care Services, Inc. -5-
The Greenwich Hospital Association.

August 19, 1997

(b) with respect to the delegation of authority to YNHHS to monitor and audit each participating entity's compliance with its directives, YNHHS is given authority to appoint auditors, establish internal audit programs and set accounting policies and procedures for GHCS, GHA and their Affiliates. (For purposes of our opinion we assume that such authority will be exercised in order to actually monitor and audit each of such entities.) The IRS Information expects that YNHHS will reserve the right to audit to itself,

(c) with respect to the delegation of authority to YNHHS to direct that services be undertaken or not be undertaken by GHCS / GHA, YNHHS is given authority to approve Major Programmatic Changes included in a Local Plan but only GHCS may initiate a change as to the services, programs or facilities of the members of the GHCS Network (and only through Local Plans) and YNHHS does not have express authority to direct that GHCS / GHA refrain from being a provider of specific services,

(d) with respect to the delegation of authority to YNHHS to enter into agreements that bind participating entities, particularly agreements with managed care providers, YNHHS is given the exclusive right to negotiate with third party payors, employers and intermediary organizations and commit on behalf of GHCS and the other members of the GHCS Network to all terms and conditions of all new or renewed Managed Care Contracts but GHCS is responsible for transactions involving members of the GHCS Network, and GHCS shall participate in setting the basic contract parameters for the Members of the GHCS Network,

(e) with respect to the delegation of authority to YNHHS to hire and fire personnel, (i) the CEO of YNHHS has responsibility for / control over appointing the President and Chief Executive Officer of GHCS and GHA, setting the terms of his/her employment and compensation and the removal of such person and (ii) various officers of GHCS including officers designated by the CEO of YNHHS are to be employed directly by YNHHS, but there are no specific provisions as to the hiring and firing of personnel and, while it is unlikely as a practical matter that a director of GHCS would be elected without YNHHS approval, YNHHS does not have authority to block the election of GHCS directors,

(f) with respect to the delegation of authority to YNHHS to grant hospital staff privileges, YNHHS will be consulted in the recruitment and selection of Chiefs of Services or other comparable positions for GHCS facilities, but the authority of the Board of Trustees of

Greenwich Health Care Services, Inc. -6-
The Greenwich Hospital Association.

August 19, 1997

GHA includes the authority to solely grant medical staff membership and credential local physicians,

(g) with respect to the delegation of authority to YNHHS to set or approve fees and prices, YNHHS is given authority to approve Local Plans and budgets but is not specifically authorized to initiate and set or approve fees and prices charged by GHCS and the members of the GHCS Network, and

(h) with respect to the delegation of authority to YNHHS to re-allocate income among the participating entities to balance income and expenses to assure financial integration and to achieve mutual objectives, YNHHS is given authority to obtain from GHCS certain payments based on a percentage of annual operating expenses of the GHCS Network as specified by YNHHS, which percentage may be raised upon Notice to the Local Networks and provided no increase in such percentage may result in acute care hospitals, or entities comprised predominantly of one or more acute care hospitals, making payments to YNHHS other than on an equal and ratable basis, but the terms "equal" and "ratable" basis are not defined in the Affiliation Agreement and there are no other provisions therein which provide for the re-allocation of income among members of the System.

Based on our examination of the foregoing items and subject to the limitations set forth herein and the above discussion, we are of the opinion that it is more likely than not that:

(i) Notwithstanding the differences that may be drawn between the relationships created by the Affiliation Agreement and the IRS Information, the execution and delivery of and performance by GHCS and GHA of their respective obligations under the Affiliation Agreement will not adversely affect GHCS' or GHA's status as exempt from federal income tax pursuant to Section 501(a) as an entity organized and operated as described in Section 501(c)(3); and

(ii) assuming compliance with the other relevant provisions of the Code relating to the formation and operation of the Foundation, the transfer of the Endowment Fund to the Foundation and the Foundation's becoming and remaining an Obligated Group Member under the Bond Indenture will not jeopardize the tax exempt status of GHA, GHCS and/or the Foundation.

Greenwich Health Care Services, Inc. -7-
The Greenwich Hospital Association.

August 19, 1997

This opinion is rendered solely with respect to certain United States federal income tax consequences of the Affiliation under the Code as specifically set forth herein, and does not extend to the income, or other potential tax consequences of the Affiliation under the laws of any State, or any political subdivision of any State, or any other jurisdiction. Furthermore, no opinion is expressed as to the United States federal or state tax treatment of the transaction under any other provisions of the Code and regulations, or as to the tax treatment of any conditions existing at the time of, or effects resulting from, the transaction that is not specifically covered by this opinion. This opinion is being furnished only to GHCS and solely for its benefit in connection therewith and may not be used or relied upon for any other purpose and may not be circulated, quoted or otherwise referred to for any other purpose without our prior express written consent except that this opinion may be included as an exhibit to GHCS's certificate of need application dated August, 1997.

Very truly yours,

Report of Independent Auditors

Board of Trustees
Yale-New Haven Health Services Corporation

We have audited the accompanying combined special-purpose balance sheets of Yale-New Haven Health Services Corporation, Yale-New Haven Hospital and Yale-New Haven Ambulatory Services Corporation (collectively the "entities") as of September 30, 1996 and 1995, and the related combined special-purpose statements of operations and changes in net assets for the years then ended. These financial statements are the responsibility of the entities' management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

The accompanying combined special-purpose financial statements were prepared in connection with certain financing agreements discussed in Note 1 and do not include statements of cash flows or complete footnotes to financial statements as required by generally accepted accounting principles for general-purpose financial statements.

In our opinion, except for the omission of the statements and footnote information discussed in the preceding paragraph, the combined special-purpose financial statements referred to above present fairly, in all material respects, the combined financial position of the entities at September 30, 1996 and 1995, and the combined results of their operations and changes in net assets for the years then ended in conformity with generally accepted accounting principles.

As discussed in Note 2 to the financial statements, Yale-New Haven Health Services Corporation and the Hospital changed their method of accounting for contributions and fund classifications, and changes in carrying value of investments to conform with the provisions of Statements of Financial Accounting Standards Nos. 116, 117 and 124.

This report is intended solely for the information and use of the Board of Trustees, management and Fleet Bank and should not be used for any other purpose.

Yale-New Haven Health Services Corporation, Yale-New Haven Hospital
and Yale-New Haven Ambulatory Services Corporation

Notes to Combined Special-Purpose Financial Statements

September 30, 1996

1. Financing Agreement and Principles of Combination

The accompanying combined special-purpose financial statements were prepared in connection with a Loan and Security Agreement (the "Agreement") dated September 23, 1994, as amended, and modified on September 19, 1996, between Fleet Bank and Yale-New Haven Ambulatory Services Corporation ("ASC"), a subsidiary of Yale-New Haven Health Services Corporation (the "Corporation"). The Corporation has guaranteed payment by ASC of amounts due under notes issued pursuant to the Agreement and certain other amounts specified in a Guaranty Agreement dated September 23, 1994, as amended, and modified on September 19, 1996.

The organizations included in the combined special-purpose financial statements include the Corporation and its wholly-owned subsidiaries, Yale-New Haven Hospital and ASC. All significant intercompany transactions have been eliminated.

2. Adoption of New Accounting Standards

Certain 1995 amounts for Yale-New Haven Health Services Corporation and the Hospital, both tax exempt entities, have been restated to conform to the 1996 presentation including FASB Opinions 116, 117 and 124.

The details of the restatement for the Hospital as of October 1, 1994 are as follows:

	Unrestricted	Temporarily Restricted	Permanently Restricted	Total
Net assets at October 1, 1994, as previously reported	\$ 156,506,385	\$ 29,052,018	\$ 39,021,665	\$ 224,580,068
Adjustment for the cumulative effect on prior years of applying retroactively the new accounting standards for fund classifications and fair value accounting	(43,803,677)	67,663,336	(28,969,935)	(5,110,276)
Net assets at October 1, 1994, as restated	112,702,708	96,715,354	10,051,730	219,469,792
Increase in net assets for the year ended September 30, 1995	26,756,430	3,197,291	750	29,954,471
Net assets at September 30, 1995, as restated	\$ 139,459,138	\$ 99,912,645	\$ 10,052,480	\$ 249,424,263

The restated amounts for Health Services Corporation were not significant to the combined financial statements.

Report of Independent Auditors on Other Financial Information

Board of Trustees
Yale-New Haven Health Services Corporation

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The combining special-purpose balance sheets, combining special-purpose statements of operations and combining special-purpose statements of changes in net assets are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in our audits of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Report of Independent Accountants

Board of Directors
Greenwich Health Care Services, Inc.
Greenwich, Connecticut

We have audited the accompanying consolidated balance sheet of Greenwich Health Care Services, Inc. ("GHCS") and Subsidiaries as of September 30, 1996, and the related consolidated statements of operations, changes in net assets, and cash flows for the year then ended. These financial statements are the responsibility of GHCS's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Greenwich Health Care Services, Inc. and Subsidiaries as of September 30, 1996 and the consolidated results of their operations and their consolidated cash flows for the year then ended, in conformity with generally accepted accounting principles.

As discussed in Note 2 to the financial statements, Greenwich Health Care Services, Inc. and Subsidiaries adopted the provisions of Statement of Financial Accounting Standards No. 117, "Financial Statements of Not-for-Profit Organizations", and Statement of Financial Accounting Standards No. 116, "Accounting for Contributions Received and Contributions Made".

Coopers + Lybrand L.L.P.

*Consolidated Statement of Changes in Net Assets
For the year ended September 30, 1996*

Unrestricted net assets:	
Excess of revenue and gains over expenses and losses	\$ 11,563,992
Net assets released from restrictions for acquisitions of property and equipment	3,891,350
Reclassifications from temporarily restricted net assets (Note 2)	<u>4,725,009</u>
Increase in unrestricted net assets	<u>20,180,351</u>
Temporarily restricted net assets:	
Cumulative effect of change in accounting (Note 2)	682,427
Reclassifications to unrestricted net assets (Note 2)	(4,725,009)
Contributions, pledges and legacies	18,782,016
Interest and investment income	1,508,414
Gains from disposals of securities	1,116,606
Net assets released from restrictions to support operations	(4,953,007)
Net assets released from restrictions for acquisitions of property and equipment	<u>(3,891,350)</u>
Increase in temporarily restricted net assets	<u>8,520,097</u>
Permanently restricted net assets:	
Contributions	<u>5,322</u>
Increase in permanently restricted net assets	<u>5,322</u>
Increase in net assets	28,705,770
Net assets, beginning of year	<u>134,547,749</u>
Net assets, end of year	<u><u>\$ 163,253,519</u></u>

Consolidated Statement of Cash Flows
For the year ended September 30, 1996

Cash flows from operating activities and gains and losses:	
Excess of revenues and gains over expenses and losses	\$ 11,563,992
Adjustments to reconcile to net cash provided by operating activities and gains and losses:	
Depreciation and amortization, net of gain on sale of property and equipment	6,624,746
Net assets released to support operations	(4,953,007)
Pension expense accrual	40,919
Other postretirement and postemployment benefit expense accrual	13,904
Unrealized gain on marketable debt securities	(19,606)
Write-off of construction in progress	66,637
Investment income on assets whose use is limited	(255,279)
Self insurance expense accrual	(535,470)
Changes in assets and liabilities:	
Decrease in patient accounts receivable	5,718,278
Change in other current assets	(46,238)
Decrease in assets whose use is limited	380,478
Increase in other assets	(257)
Increase in other liabilities	3,413,371
Increase in due to third-party payors	4,257,886
Payments for professional self-insurance claims and expenses	(380,478)
Net cash provided by operating activities and gains and losses	<u>25,889,876</u>
Cash flows from investing activities:	
Capital expenditures	(14,803,205)
Proceeds from sale of property and equipment	347,316
Increase in marketable securities	(3,739,078)
Investment in assets whose use is limited	(9,772,785)
Investment of bond proceeds into trust funds	(60,095,401)
Use of trust funds to pay capitalized interest	1,184,464
Use of trust funds for construction in progress	6,368,388
Capitalized interest on trust funds	(1,427,723)
Increase in investments	(192,404)
Net cash used in investing activities	<u>(82,130,428)</u>
Cash flows from financing activities:	
Proceeds from bonds payable	61,867,208
Bond issuance costs	(2,092,427)
Collections of contributions and pledges	7,274,999
Net cash provided by financing activities	<u>67,049,780</u>
Net increase in cash and cash equivalents	10,809,228
Cash and cash equivalents at beginning of year	<u>7,663,384</u>
Cash and cash equivalents at end of year	<u>\$ 18,472,612</u>
The following is supplemental information relating to the statements of cash flows:	
Noncash investing and financing activities:	
Additions to construction in progress financed by retainage payable	\$ 363,902
Pledges and trusts received for temporarily restricted purposes	\$ 17,811,978
Interest, income and realized gains on investments held for temporarily restricted purposes	\$ 2,625,020

See notes to consolidated financial statements.

Notes to Consolidated Financial Statements

1. Organization and Basis of Presentation

Greenwich Health Care Services, Inc. ("GHCS") is the parent corporation for a group of wholly-owned subsidiaries consisting of The Greenwich Hospital Association (the "Hospital"); The Perryridge Corporation ("Perryridge"); Greenwich Health Services, Inc. ("GHSI"); Greenwich Nursing and Health Care Registry, Inc. ("Registry"); and Future Care, Inc. ("Future Care").

The consolidated financial statements of GHCS and its subsidiaries are presented in accordance with guidance of the American Institute of Certified Public Accountants' audit and accounting guide, "Health Care Organizations." For purposes of display, the Consolidated Statement of Operations presents transactions deemed by management to be ongoing, major, or central to the provision of health care services and to the planning and oversight functions of GHCS as revenues and expenses. Peripheral or incidental transactions are reported as gains and losses. Gains and losses deemed by management to be closely related to ongoing operations are classified as operating; other gains and losses are classified as nonoperating.

Investment income on assets held for malpractice self insurance is included in other revenues. Other investment income available for unrestricted purposes is reported in nonoperating gains, as is unrestricted contribution income.

2. Summary of Significant Accounting Policies

Principals of Consolidation:

The consolidated financial statements include the accounts of GHCS and its wholly-owned subsidiaries. All significant intercompany accounts and transactions are eliminated in consolidation. The consolidation of these for-profit and not-for-profit entities is not necessarily indicative of the legal extent of assets available to settle liabilities of the individual entities.

Changes in Accounting and Related Matters:

In fiscal 1996, GHCS and its subsidiaries have adopted the provisions of Statement of Financial Accounting Standards No. 117, "Financial Statements of Not-for-Profit Organizations" ("SFAS 117"). This Statement, among other things, requires classification of an organization's net assets and its revenues, expenses, gains and losses into three classes - permanently restricted (previously referred to as "endowment"), temporarily restricted (previously referred to as "specific purpose" and "restricted building funds"), and unrestricted (previously referred to as "general funds") - and imposes certain changes in the form of financial statement display. In addition, SFAS 117 specifies that income from investments, as well as gains and losses on investments, are to be treated as increases or decreases in unrestricted net assets unless the use of such income, gains, or losses is temporarily or permanently restricted by explicit donor stipulation or by law.

Greenwich Health Care Services, Inc. and Subsidiaries
Notes to Consolidated Financial Statements, Continued

Upon adoption, the provisions of SFAS 117 are required to be retroactively applied. Accordingly, fund balances, as previously reported at September 30, 1995, have been restated to reflect the retroactive application of SFAS 117 as follows:

	<u>General Funds/ Unrestricted Net Assets</u>	<u>Specific Purpose and Restricted Building Funds/ Temporarily Restricted Net Assets</u>	<u>Endowment Funds/ Permanently Restricted Net Assets</u>
As previously reported	\$ 77,860,022	\$ 29,412,848	\$ 27,274,879
Adjustments for retroactive adoption of SFAS 117	<u>7,502,052</u>	<u>3,645,231</u>	<u>(11,147,283)</u>
As restated	<u>\$ 85,362,074</u>	<u>\$ 33,058,079</u>	<u>\$ 16,127,596</u>

The effect of the adoption of SFAS 117 was to increase the excess of revenues over expenses of unrestricted net assets for fiscal 1996 by approximately \$3,050,000.

Effective October 1, 1995, GHCS and its subsidiaries adopted the provisions of Statement of Financial Accounting Standards No. 116, "Accounting for Contributions Received and Contributions Made" ("SFAS 116"). Among other things, this Statement requires that contributions received, including unconditional promises to give, be recognized as revenues or support of either unrestricted, temporarily restricted, or permanently restricted net assets, as appropriate, in the period received, at their fair values. Unconditional promises to give cash are recorded at net present value, less an allowance for doubtful collectibility, to approximate fair value; subsequent accrual of the interest element of such pledges is accounted for as contribution income. Further, GHCS's beneficiary rights under irrevocable charitable remainder trusts, which previously were excluded from the financial statements, are included in such unconditional promise to give. Conditional promises to give are not recorded as revenue or support until the condition upon which they depend has been substantially met. In addition, the expirations of donor-imposed restrictions are now recognized in the period in which the restriction expires and, somewhat different from previous treatment, available temporarily restricted net assets are now applied for such purposes before unrestricted net assets are applied.

Notes to Consolidated Financial Statements, Continued

GHCS has accounted for the adoption of SFAS 116 as a change in accounting as of October 1, 1995. The cumulative effect of this adoption was to increase assets by approximately \$1,355,000, liabilities by approximately \$673,000 and temporarily restricted net assets by a net amount of approximately \$682,000 as of October 1, 1995, with no effect on unrestricted net assets. GHCS has elected to adopt the provisions of SFAS 116 regarding expiration of restrictions prospectively. The effect of adopting SFAS 116 was to increase the excess of revenues and gains over expenses and losses of unrestricted net assets for the fiscal year ended September 30, 1996 by approximately \$4,053,000.

Also, during fiscal 1996, certain reclassifications totaling \$4,725,009 were made of temporarily restricted fund balances to unrestricted fund balances, to reflect donor's intent, the result of which was to increase the excess of revenues and gains over expenses and losses of unrestricted net assets for fiscal 1996 by approximately \$422,000.

Use of Estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents:

Cash and cash equivalents include highly liquid investments purchased with a maturity of three months or less.

Concentration of Credit Risk:

Cash and cash equivalents are maintained primarily within two regional banks and one investment bank-sponsored money market fund. It is GHCS's policy to monitor the financial strength of these institutions and funds on an ongoing basis.

Marketable Securities and Investments:

Marketable securities and investments, except for certain debt securities, are stated at the lower of aggregate cost or market value. Certain debt securities are deemed to be held to maturity and are, therefore, stated at amortized cost. The amortized cost of such debt securities is adjusted for amortization of premiums and accretion of discounts to maturity. The cost of marketable securities or investments received as donations or bequests is deemed to be their fair market value at the date of gift. In calculating realized gains and losses, cost is determined on a specific identification basis.

Greenwich Health Care Services, Inc. and Subsidiaries**Notes to Consolidated Financial Statements, Continued****Net Patient Service Revenue and Patient Accounts Receivable:**

Revenue from patient services is recorded at the Hospital's established rates. Deductions for contractual allowances under third-party reimbursement agreements and courtesy discounts are recorded to arrive at net patient service revenue. Net patient service revenue and patient accounts receivable are recorded when patient services are performed. Adjustments and settlements under reimbursement agreements with third-party payors are accrued on an estimated basis in the period the related services are rendered and adjusted in future periods as final settlements are determined.

Charity Care:

The Hospital provides care to patients who meet certain criteria under its charity care policy without requiring payment or at amounts less than its established and contractual payment rates. Because the Hospital does not pursue collection of amounts determined to qualify as charity care, they are not reported as patient service revenue. For purposes of financial reporting, Medicare and other contractual allowances and bad debts are not deemed to be charity care. Services to patients who otherwise meet the Hospital's criteria for charity care may qualify for alternate sources of reimbursement from certain free care and other funds, charitable trusts or pools, and will therefore be recorded as revenue in the period the services are provided. If it is subsequently determined that such alternate sources are not available, the related receivable is written off and amounts involved are reflected as charity care in the period of such determination.

Restricted Net Assets:

Temporarily restricted net assets are those whose use has been limited by donors to a specific time period or purpose. Permanently restricted net assets have been restricted by donors to be maintained by the Hospital in perpetuity. Some of the income on permanently restricted net assets is unrestricted to the Hospital.

When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, temporarily restricted net assets are reclassified as unrestricted net assets and reported in the statement of operations as net assets released from restrictions. Certain donor-restricted contributions whose restrictions are met within the same year as received are reported as unrestricted contributions in the accompanying financial statements.

Inventories:

Inventories are stated at the lower of cost, using the first-in, first-out method, or market.

Greenwich Health Care Services, Inc. and Subsidiaries**Notes to Consolidated Financial Statements, Continued****Property and Equipment:**

Property and equipment are stated at cost or, if donated, fair market value at date of donation. Depreciation is provided using the straight-line method over the estimated useful lives of the assets.

Charitable Remainder Trusts:

The Hospital is the ultimate beneficiary of certain charitable remainder trusts and similar arrangements. Under most of these arrangements, the Hospital is not currently receiving any distributions, but will be entitled to the remaining assets in the trust upon the death of the donor and any other named beneficiaries. In certain cases, use of such assets ultimately to be received by the Hospital is restricted to specific purposes.

Deferred Financing Costs:

Issuance costs related to the Hospital's 1996 tax-exempt bond issuance are being amortized over the life of the debt using a method that approximates the interest method, and the amortization is included in interest cost. Amortization for the fiscal year ended September 30, 1996 was \$40,593.

Debt Issuance Discount:

The discount from face value at which debt has been issued is reflected as a reduction of the carrying value of such debt. This discount is amortized over the life of the debt using a method that approximates the interest method, and the amortization is included in interest cost. Amortization for the year ended September 30, 1996 was \$19,792.

Capitalization of Interest:

During the construction period of qualifying assets, the related interest cost on the Hospital's tax-exempt borrowings, net of the related interest earned on the investments acquired with the unexpended proceeds of such borrowings, is capitalized and included in construction in progress.

Greenwich Health Care Services, Inc. and Subsidiaries

Notes to Consolidated Financial Statements, Continued

Income Taxes:

GHCS and its subsidiaries, with the exception of Future Care and GHSI, are not-for-profit organizations and are exempt from federal income taxes under Section 501(c)(3) of the Internal Revenue Code.

Future Care and GHSI are for-profit subsidiaries who have available, as of September 30, 1996, unused operating loss carryforwards of approximately \$540,000 and \$1,176,000, respectively. The carryforwards, which are available to offset future taxable income, expire in various years through 2011. Deferred tax assets at September 30, 1996 total approximately \$1,166,000, and relate primarily to the tax effects of net operating loss carryforwards and a reserve for doubtful accounts. Deferred tax liabilities are negligible. The deferred tax assets have been offset by valuation allowances of equal amounts. Due to continuing losses of the two for-profit subsidiaries, there was no current tax provision or benefit in fiscal 1996, and the deferred benefits of approximately \$156,000 were offset by provisions to increase the valuation allowance by corresponding amounts.

3. Net Patient Service Revenue

Net patient service revenue for the year ended September 30, 1996 includes the following:

Gross patient service revenue	\$ 158,018,193
Less, Contractual and other allowances	<u>63,907,233</u>
	<u>\$ 94,110,960</u>

4. Net Assets

Temporarily restricted net assets are available for the following purposes at September 30, 1996:

Hospital's major facility renovation project	\$ 36,567,056
Other specified capital expenditures	735,622
Indigent care	2,055,192
Specified health care services and operations	1,236,975
Education	<u>983,321</u>
	<u>\$ 41,578,166</u>

Greenwich Health Care Services, Inc. and Subsidiaries

Notes to Consolidated Financial Statements, Continued

Permanently restricted net assets at September 30, 1996 are restricted as follows:

Principal to be held in perpetuity, with income expendable to support health care services and other activities (reported as nonoperating gains)	\$ 13,046,376
Principal to be held in perpetuity, with income to be spent for restricted purposes as specified by donor (reported as additions to temporarily restricted net assets until released upon satisfaction of restriction)	<u>3,086,552</u>
	<u>\$ 16,132,928</u>

Unrestricted net assets at September 30, 1996 include the following:

Designated by Board of Directors for:	
Depreciation fund	\$ 19,018,245
Quasi endowment - capital gains	13,673,791
Auxiliary	1,432,248
Undesignated	<u>71,418,141</u>
	<u>\$ 105,542,425</u>

5. Assets Whose Use is Limited

Assets whose use is limited consist of the following at September 30, 1996:

Trustee assets - indenture (see Note 16):	
Cash and cash equivalents	\$ 13,088
Marketable securities	<u>53,957,184</u>
	<u>\$ 53,970,272</u>
Trustee assets - self-insurance:	
Cash and cash equivalents	\$ 2,888
Marketable securities, net of valuation allowance of \$34,031	4,471,988
Accrued interest receivable	<u>57,000</u>
	<u>\$ 4,531,876</u>
By board designation:	
Cash and cash equivalents	\$ 960,063
Marketable securities	<u>33,791,329</u>
	<u>\$ 34,751,392</u>

Greenwich Health Care Services, Inc. and Subsidiaries

Notes to Consolidated Financial Statements, Continued

6. Marketable Securities and Investments

Cost and market values for marketable securities and investments as of September 30, 1996 are summarized as follows:

	<u>Cost</u>	<u>Market Value</u>
Marketable securities in current assets:		
Debt securities	<u>\$ 7,496,582</u>	<u>\$ 7,547,492</u>
Assets whose use is limited:		
Trustee assets - self-insurance:		
Debt securities	<u>\$ 4,506,019</u>	<u>\$ 4,471,988</u>
By board designation:		
Debt securities at amortized cost	\$ 8,492,647	\$ 8,518,995
Debt securities - other	676,512	732,569
Equity securities	6,653,176	7,818,866
Other securities	<u>17,968,994</u>	<u>18,448,304</u>
	<u>\$ 33,791,329</u>	<u>\$ 35,518,734</u>
Investments:		
Debt securities at amortized cost	\$ 16,173,236	\$ 16,193,973
Debt securities - other	226,252	297,502
Equity securities	8,606,903	10,114,314
Other securities	<u>15,457,038</u>	<u>16,103,623</u>
	<u>\$ 40,463,429</u>	<u>\$ 42,709,412</u>

Unrealized gains and losses relating to marketable equity securities as of September 30, 1996 are as follows:

	<u>Gross Unrealized Gains</u>	<u>Gross Unrealized Losses</u>
Board designated	<u>\$ 1,451,725</u>	<u>\$ (286,035)</u>
Investments	<u>\$ 1,877,920</u>	<u>\$ (370,509)</u>

Greenwich Health Care Services, Inc. and Subsidiaries

Notes to Consolidated Financial Statements, Continued

Debt securities as of September 30, 1996 were invested as follows (based on cost):

	<u>U.S. Treasuries and Federal Agencies</u>	<u>Corporate Bonds</u>
Marketable securities in current assets	100%	-
Assets whose use is limited:		
Trustee assets - self-insurance	100%	-
Board designated	99%	1%
Investments	99%	1%

Equity securities as of September 30, 1996 were invested as follows (based on cost):

	<u>Consumer Staples</u>	<u>Financial</u>	<u>Capital Goods</u>	<u>Consumer Cyclical</u>	<u>Other Industries with Concentration of 10% or Less</u>
Board designated	16%	19%	11%	22%	32%
Investments	16%	19%	11%	22%	32%

Other securities consist of investments in short-term funds, mutual funds and Fleet commingled funds.

7. Property and Equipment

Property and equipment, at cost, and accumulated depreciation as of September 30, 1996, are as follows:

Land and leasehold improvements	\$ 4,591,856
Buildings	44,416,852
Fixed equipment	23,313,017
Movable equipment	<u>32,266,277</u>
	104,588,002
Less, Accumulated depreciation	<u>(50,141,349)</u>
	<u>\$ 54,446,653</u>

Greenwich Health Care Services, Inc. and Subsidiaries

Notes to Consolidated Financial Statements, Continued

8. Construction in Progress

Construction in progress at September 30, 1996 represents accumulated costs for the Hospital's major facility renovation project. The Hospital received approval on February 9, 1995 from the State of Connecticut Commission on Hospitals and Health Care for a Certificate of Need application for the facility renovation project in the amount of \$107.3 million. The project is expected to be completed in 2000.

The project is expected to be financed primarily by temporarily restricted funds, qualifying restricted contributions and investment income anticipated to be received and proceeds from the issuance by the Hospital in March 1996, of approximately \$63 million in tax-exempt bonds (see Note 16).

The Hospital has entered into various contractual arrangements related to this project.

Upon completion of a construction in progress project, the cost of that project is transferred to appropriate property and equipment categories and depreciation will commence.

9. Pledges Receivable

Pledges receivable, for unconditional promises to give at September 30, 1996, reflect the following:

Amounts due in less than one year	\$ 2,654,997
Amounts due in one to five years	14,609,909
Amounts due in more than five years	<u>3,000,000</u>
	20,264,906
Less: Unamortized discount	(3,515,563)
Allowance for uncollectibles	<u>(95,700)</u>
Pledges receivable, net	<u>\$ 16,653,643</u>

Substantially all pledges receivable relate to promises to contribute to the Hospital's major facility renovation project (see Note 8), and are, therefore, a component of temporarily restricted net assets. Pledges receivable and contributions exclude letters of intent which are not legally binding and gifts conditional on events that have not yet occurred. GHCS and its subsidiaries have received conditional promises to give totaling \$2,038,495, which, if ultimately received will be restricted for the facility project.

Notes to Consolidated Financial Statements, Continued

10. Lease Commitments

GHCS and its subsidiaries lease various building space and equipment under operating leases and have long-term commitments under service contracts expiring at various dates through fiscal 2004. Expenses relating to those agreements were approximately \$930,000 for fiscal 1996.

Future minimum rental payments at September 30, 1996 under noncancellable operating leases and service contracts are approximately as follows:

1997	\$ 426,000
1998	240,000
1999	178,000
2000	181,000
2001 and thereafter	<u>184,000</u>
	<u>\$ 1,209,000</u>

11. Medical Malpractice and Self Insurance Arrangements

The Hospital has a policy of self-insuring a portion of its professional liability insurance coverage. Prior to 1985, the Hospital had commercial occurrence-basis insurance coverage. Since 1985, the self-insurance portion of the Hospital's commercial claims-made insurance coverage includes deductible limits of \$1,000,000 per claim and \$3,000,000 in the aggregate annually.

The Hospital's estimated professional self-insurance liability represents its best estimate of losses, under its self-insurance arrangements, from asserted and unasserted claims including those identified under the Hospital's incident reporting system.

The Hospital has established an irrevocable trust for the purpose of setting aside assets for self-insurance purposes. Under the trust agreement, the trust assets can only be used for payment of malpractice losses, related expenses, and the cost of administering the trust. The assets of and contributions to the trust are included in the balance sheet. These funds held by the trustee are invested in marketable securities and recorded at the lower of cost or market.

The Hospital is also self-insured, subject to certain umbrella and stop-loss coverage limits, for its employee health plan and workers compensation. The Hospital accrues its best estimate of retained liability for occurrences through each balance sheet date.

Greenwich Health Care Services, Inc. and Subsidiaries

Notes to Consolidated Financial Statements, Continued

12. Pension Plan

GHCS and its subsidiaries have a noncontributory defined benefit pension plan covering substantially all employees. GHCS's funding policy is to make the minimum annual contribution required by applicable regulations. The pension plan's assets are principally invested in investment grade bonds and stocks.

The following table sets forth the funded status of GHCS's pension plan at September 30, 1996:

Actuarial present value of benefit obligations:	
Vested	\$ 37,325,000
Accumulated	\$ 37,550,000
Projected	\$ 46,760,140
Plan assets at fair value	65,572,594
Plan assets in excess of projected benefit obligation	18,812,454
Unrecognized net gain	(13,841,645)
Unrecognized prior service cost	(1,039,630)
Unrecognized net assets at October 1, 1987 being amortized over 18 years	(7,366,426)
Net accrued pension liability	\$ (3,435,247)

Net pension expense for fiscal 1996 included the following components:

Service cost	\$ 2,298,960
Interest cost on projected benefit obligation	3,411,499
Actual return on assets	(6,635,526)
Net amortization and deferral	965,986
Net pension expense	\$ 40,919

For purposes of calculating pension expense, the assumed discount rate was 7.5% for fiscal 1996 (vs. 8.5% in fiscal 1995). For purposes of calculating pension expense, the expected long-term rate of return on plan assets was estimated to be 8.5% for 1996, and future annual compensation increases were estimated at 5.0% for fiscal 1996 (vs. 5.5% in fiscal 1995). The effect of these changes in assumptions was to increase pension expense for 1996 by approximately \$450,000.

The September 30, 1996 valuation of year-end benefit obligations reflects a increase of the discount rate assumption to 8.0% the effect of which was to decrease the actuarial present value of the projected benefit obligation ("PBO") by approximately \$3,500,000 at September 30, 1996. The impact of this change on fiscal 1997 expense is expected to be a decrease of approximately \$525,000.

Greenwich Health Care Services, Inc. and Subsidiaries

Notes to Consolidated Financial Statements, Continued

13. Postretirement Medical and Life Insurance Benefits

GHCS and its subsidiaries provide certain health care and life insurance benefits for eligible retired and active employees. These plans are unfunded. Substantially all of GHCS's full-time employees may become eligible for these applicable benefits after three months of service. Employees who were eligible for these benefits at the time of their retirement, who retired prior to August 1, 1992 and who met the requirements to receive an immediate pension plan benefit are provided continued free hospitalization services rendered by the Hospital throughout their retirement. Health benefits are also provided to eligible dependents. In addition, the eligible retired employees are provided certain life insurance coverage at no cost.

As of October 1, 1991, GHCS adopted the provisions of Statement of Financial Accounting Standards No. 106, "Accounting for Postretirement Benefits Other Than Pensions", and elected the immediate recognition approach for the initial transition obligation. Effective August 1, 1992, GHCS eliminated these postretirement medical and life insurance benefits for all future retirees. However, in conjunction with a 1994 early retirement benefits program, limited postretirement medical benefits were granted to employees who accepted the one-time early retirement offer.

A reconciliation of the status of the plan to amounts reported on GHCS's balance sheet is as follows at September 30, 1996:

Accumulated postretirement benefit obligation	\$ 2,114,772
Unrecognized net gain	<u>283,241</u>
Accrued postretirement benefit liability	2,398,013
Less, Current portion (included in other current liabilities)	<u>(210,000)</u>
Long-term portion (included in other liabilities)	<u>\$ 2,188,013</u>

Net periodic postretirement medical and life insurance benefit full cost for fiscal 1996 consisted of interest cost of \$151,000.

A 9.5% annual rate of increase in the per capita costs of covered health care benefits was assumed for 1996, gradually decreasing to 5.5% by the year 2005. Increasing the assumed health care cost trend rates by one percentage point would increase the accumulated postretirement benefit obligation as of September 30, 1996 by approximately \$110,000, and increase the net periodic postretirement medical and life insurance benefit cost for fiscal 1996 by approximately \$8,800. A discount rate of 8.0% was used to determine the APBO at September 30, 1996 (vs. 7.5% used at September 30, 1995).

Greenwich Health Care Services, Inc. and Subsidiaries

Notes to Consolidated Financial Statements, Continued

14. Postemployment Disability and Leave of Absence and Other Benefits

GHCS follows Statement of Financial Accounting Standards No. 112, "Employers' Accounting for Postemployment Benefits", ("SFAS 112") to account for the estimated liability for providing future medical benefits to employees on long-term disability or leave of absence. SFAS 112 establishes accounting standards for employers who provide benefits to former or inactive employees after employment but before retirement.

The following reconciles amounts reported in GHCS's balance sheet as of September 30, 1996:

Accrued postemployment disability and leave of absence benefit liability	\$ 2,247,300
Less, Current portion (included in other current liabilities)	<u>(560,000)</u>
Long-term portion (included in other long-term liabilities)	<u>\$ 1,687,300</u>

During fiscal 1996, GHCS became self-insured for workers' compensation costs. The impact of this change was to increase the accrued liability for postemployment disability and leave of absence benefits by \$160,000 at September 30, 1996.

15. Reimbursement Arrangements

The Hospital grants credit without collateral to its patients, most of whom are local residents and are insured under third-party payor agreements.

A substantial portion of net patient service revenue is derived from funds provided on behalf of patients under federal (Medicare) and other governmental programs. The Hospital is reimbursed for inpatient services rendered to Medicare patients based on the Federal Prospective Payment System (PPS), whereby payment is made at a predetermined rate according to patient diagnosis. Payments for Medicaid patients and Medicare outpatients are based primarily on defined cost. Revenue from these sources is subject to audit by the applicable agencies.

All net patient service revenue from sources other than Medicare and Medicaid is subject to regulatory review by the State of Connecticut.

The current Connecticut regulatory reimbursement system includes a 6% Connecticut sales tax on nongovernmental cash receipts for hospital services; an 11% gross earnings tax on earnings, as defined, from services covered by nongovernmental payors; mechanisms for disproportionate share and emergency assistance payments to hospitals; and a "compliance" cap on net revenues. Compliance adjustments for annual over-collections of authorized net revenues have, by statute, been able to be assessed by the State in succeeding years either through reductions in net revenue caps, deductions from a hospital's disproportionate share payments from the State, or four equal quarterly payments by the hospital.

Greenwich Health Care Services, Inc. and Subsidiaries

Notes to Consolidated Financial Statements, Continued

Pursuant to certain understandings arrived at in June 1996, many in the industry understood that compliance for fiscal 1995, which would otherwise have become payable in fiscal 1997, was not expected to be assessed, and that there would be no compliance imposed for fiscal 1996 and subsequent years. In October 1996, however, pursuant to existing State law, the Hospital, along with certain other hospitals in the State, made a first quarterly installment payment pertaining to compliance for fiscal 1995. The hospitals have also been informed that the State interprets Connecticut law as requiring the collection of cash compliance for fiscal 1996, which would be payable to the State on and after October 1, 1997.

The Hospital's patient receivables and liability to third party and other payors include its best estimate of net amounts owed related to the State's programs for sales tax, gross earnings tax, disproportionate share, and compliance. The impact of these items are reflected in arriving at net revenues. The Hospital's tax payments to the State have been and are expected to continue to exceed disproportionate share payments by the State to the Hospital.

Patient accounts receivable at September 30, 1996, before allowances for doubtful accounts, consisted of approximately the following:

Medicare and Medicaid	\$ 5,223,000
Commercial insurance	5,583,000
Self-pay patients	3,427,000
Other third-party payors (none over 10%)	5,762,000
	<u>\$ 19,995,000</u>

16. Bonds Payable

Bonds payable consist of the following at September 30, 1996: --

State of Connecticut Health and Educational Facilities Authority:	
Tax-exempt bonds, Series A	\$ 62,905,000
Less, Discount, net of accumulated amortization of \$19,792	<u>(1,018,000)</u>
	<u>\$ 61,887,000</u>

The State of Connecticut Health and Educational Facilities Authority ("CHEFA") issued \$62,905,000 of its Revenue Bonds, the Greenwich Hospital, Series A, dated March 1, 1996, consisting of \$12,760,000 of Serial Bonds and \$50,145,000 of Term Bonds, the proceeds of which have been loaned by CHEFA to the Hospital for the master facility renovation project. The Series A Revenue Bonds outstanding at September 30, 1996 bear interest at rates ranging

Greenwich Health Care Services, Inc. and Subsidiaries

Notes to Consolidated Financial Statements, Continued

from 4.6% to 5.8%. Principal amounts related to the Serial Bonds mature annually each July 1, 2001 through 2009, and the Term Bonds mature on July 1, 2016 and July 1, 2026 in the amounts of \$15,115,000 and \$35,030,000, respectively. However, annual payments to a sinking fund are required from July 1, 2001 through July 1, 2026 to retire such Term Bonds. Interest is due semi-annually on January 1 and July 1, commencing July 1, 1996.

Aggregate principal payments required by the Hospital for the Bonds for fiscal 1997 through 2001 are as follows:

1997	\$ -
1998	-
1999	-
2000	-
2001	1,160,000

Required payments on the Series A Revenue Bonds by the Hospital are to a trustee in the amounts sufficient to provide for the payment of principal, interest and sinking fund installments as the same become due, and certain other payments. Payment of the principal and interest on the Series A Bonds on the regularly scheduled due dates for the payment therefor are insured in accordance with a financial guaranty insurance policy which was issued simultaneously with the delivery of the Series A Bonds by MBIA Insurance Corporation. Additionally, the Hospital has granted a collateral interest to CHEFA on its gross receipts.

Pursuant to the State of Connecticut Health and Educational Authority Trust Indenture ("Trust Indenture") dated March 1, 1996, the Hospital is required to maintain certain funds with a trustee for specified purposes and time periods. These funds can be used only for the purposes specified in the Trust Indenture. Assets held by the trustee pursuant to the indenture as of September 30, 1996 are designated as follows:

Construction account	\$ 41,772,925
Capitalized interest account	7,475,350
Debt service reserve fund	4,717,025
Debt service fund	4,972
	<u>53,970,272</u>
	<u>\$ 53,970,272</u>

Greenwich Health Care Services, Inc. and Subsidiaries

Notes to Consolidated Financial Statements, Continued

Assets held by the trustee pursuant to the indenture consist of cash, money market fund investments and guaranteed investment contracts with two institutions, for which all costs approximated market value at September 30, 1996. A summary of such investments at September 30, 1996 is as follows:

	<u>Interest Rate</u>	<u>Amount</u>
Cash	-	\$ 13,088
Money Market Funds	-	199,882
Guaranteed Investment Contracts	5.63% and 6.78%	<u>53,757,302</u>
		<u>\$ 53,970,272</u>

A description of the funds is as follows:

Construction Account - Bond proceeds, after the allocation of certain specified amounts, were required to be deposited in the Construction Account and may be applied only toward the payment of costs of the Project.

Capitalized Interest Account - A portion of the proceeds of the Bonds was required to be deposited into the Capitalized Interest Account. The Capitalized Interest Account pays the scheduled interest payments related to the borrowings for the construction costs through 1998. Interest earnings are transferred to the Construction Account during the construction period.

Debt Service Reserve Fund - The Hospital is required to maintain the Debt Service Reserve Fund in an amount to at least cover the maximum aggregate annual debt service payment. Interest earnings from the fund are to be transferred to the Construction Account during the construction period.

Debt Service Fund - The Hospital is required to pay amounts semiannually to cover payment of principal and interest as required by the Bond documents. Payments will be made from this fund for required debt service payments.

Total interest cost incurred on the bonds, including amortization of deferred financing costs and debt issuance discounts, was approximately \$1,817,000 for fiscal 1996, all of which was capitalized. Total interest earned on the funds held by the trustee for fiscal 1996 was approximately 1,433,000, all of which was capitalized.

Pursuant to the bond agreements, the Hospital is required to comply with a variety of covenants and a debt service coverage ratio. In addition, events of default on other indebtedness or indebtedness guaranteed by the Hospital can result in an event of default on the bonds. The Parent is part of the "obligated group", with the Hospital, in connection with the bonds.

Notes to Consolidated Financial Statements, Continued

17. Subsidiary Matters

GHCS sold, at negligible losses, the business and certain assets of the Registry (effective September 1, 1995) and of Future Care (effective October 25, 1995), and effectively ceased operations of these subsidiaries at those dates. The operations of both of these subsidiaries have been immaterial to consolidated results in recent years. During fiscal 1996, the remaining net assets of these two subsidiaries were remitted to the Parent.

18. Supplemental Operating Data

GHCS and its subsidiaries provide general health care services to residents primarily within their geographic location. Functional expenses related to their operating activities for the fiscal year ended September 30, 1996 are as follows:

Health care services	\$ 67,086,639
General and administrative	<u>30,304,026</u>
	<u>\$ 97,390,665</u>

Nonoperating gains and losses for the fiscal year ended September 30, 1996 consisted of:

Unrestricted contributions	\$ 1,633,055
Gains on sales of investments	3,241,415
Interest and investment income	2,590,804
Fund-raising expenses	(1,166,759)
Greenwich Health at Greenwich Hospital program	(300,806)
Other	<u>(157,631)</u>
	<u>\$ 5,839,978</u>

19. Fair Value of Financial Instruments

The following methods and assumptions were used by GHCS in estimating the fair value of its financial instruments:

Cash and Cash Equivalents - The carrying amount reported in the balance sheet for cash and cash equivalents approximates its fair value.

Assets Whose Use is Limited - These assets consist primarily of cash, marketable securities and interest receivable.

Marketable Securities and Investments - Fair values are based on quoted market prices, if available, or estimated using quoted market prices for similar securities.

Notes to Consolidated Financial Statements, Continued

Pledges Receivable - The carrying amount reported in the balance sheet for pledges receivable approximates its fair value.

Estimated Third-Party Payor Settlements - The carrying amount reported in the balance sheet for estimated third-party payor settlements approximates its fair value.

Long-Term Debt - Fair values of the Hospital's bonds payable are based on current traded value. The fair value of the Hospital's remaining long-term debt is estimated using discounted cash flow analyses, based on the Hospital's current incremental borrowing rates for similar types of borrowing arrangements.

The carrying amounts and fair values of GHCS and subsidiaries' financial instruments at September 30, 1996 are as follows:

	<u>Carrying Amount</u>	<u>Fair Value</u>
Cash and cash equivalents	\$ 18,472,612	\$ 18,472,612
Marketable securities	7,496,582	7,547,492
Assets whose use is limited:		
Trustee assets - indenture	53,970,272	53,970,272
Trustee assets - self-insurance	4,531,876	4,531,876
By board designation	34,751,392	36,478,797
Investments	40,463,429	42,709,412
Pledges receivable	16,653,643	16,653,643
Estimated third-party payor settlements	17,755,171	17,755,171
Long-term debt	61,887,000	63,535,000

20. New Pronouncement

In November 1995, the Financial Accounting Standards Board issued SFAS No. 124 "Accounting for Certain Investments Held by Not-for-Profit Organizations". It requires, among other things, that investments in equity securities with readily determinable fair values and all investments in debt securities be reported at fair value with gains and losses included in a statement of operations or statement of changes in net assets. This statement is effective for fiscal years beginning after December 15, 1995. The Hospital has elected not to adopt this statement early.

Supplemental Information

Report of Independent Accountants

To the Board of Directors of
Greenwich Health Care Services, Inc.:

The audited consolidated financial statements of GHCS and its subsidiaries and our report thereon are presented in the preceding section of this report. Our audit was conducted for the purpose of forming an opinion on the basic consolidated financial statements taken as a whole. The consolidating information presented hereinafter is presented for purposes of additional analysis of the consolidated financial statements rather than to present the financial position and results of operations of the individual companies. The consolidating information has been subjected to the auditing procedures applied in our audit of the basic consolidated financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic consolidated financial statements taken as a whole. As discussed in Note 2 to the financial statements, GHCS adopted the provisions of Statement of Financial Accounting Standards No. 117, "Financial Statements of Not-for-Profit Organizations", and Statement of Financial Accounting Standards No. 116, "Accounting for Contributions Received and Contributions Made".

STATE OF CONNECTICUT
DEPARTMENT OF PUBLIC HEALTH

December 30, 1996

Joseph A. Zaccagnino, Administrator
Yale-New Haven Hospital
20 York Street
New Haven, CT 06504

Dear Administrator:

Unannounced visits were made to Yale-New Haven Hospital on November 6, 7, 8 and 12, 1996 by a representative of the Division of Health Systems Regulation for the purpose of conducting complaint investigations.

Attached are the violations of the State of Connecticut Public Health Code and/or General Statutes of Connecticut which were noted during the course of the visits.

You may wish to dispute the violations and you may be provided with the opportunity to be heard. If the violations are not responded to by January 14, 1997 or if a request for a meeting is not made by the stipulated date, the violations shall be deemed admitted.

Please address each violation with a prospective plan of correction which includes the following components:

- a. Measures to prevent the reoccurrence of the identified violation, (e.g.:, policy/procedure, inservice program, repairs, etc.).
- b. Date corrective measure will be effected.
- c. Identify the staff member, by title, who has been designated the responsibility for monitoring the individual plan of correction submitted for each violation.

If there are any questions, please do not hesitate to contact this office.

Respectfully,

Janet M. McKiernan, RN
Janet M. McKiernan, RN
Supervising Nurse Consultant
Division of Health Systems Regulation

JAN 2 1997

FACILITY: Yale New Haven Hospital

Page 2 of 2

DATE(S) OF VISIT: November 6, 7, 8 and 12, 1996

THE FOLLOWING VIOLATIONS OF THE STATE OF CONNECTICUT
PUBLIC HEALTH CODE AND/OR CONNECTICUT GENERAL STATUTES
WERE IDENTIFIED

1. Patient #4, a 29 year old female, presented on 4/20/96 to the Emergency Room with exacerbation of back pain relating to a known herniated disc. Surgery had already been scheduled for 5/15/96. The patient was examined by the Emergency Room physician, a neurosurgical resident and an orthopedic surgeon. The patient identified she had increased problems with incontinence. Exam revealed decreased right lower extremity motor ability, but it was not determined if it was related to the disc or to her pain. A repeat CT scan compared with previous films showed no significant change. Nursing progress notes reflected the patient was medicated for pain at 2:45 AM, 4:30 AM, 5:45 AM and 11:10 AM. There was no corresponding physician's order for the first dose of Toradol given at 11:10 AM.

The above is a violation of the State of Connecticut Public Health Code Section 19-13-D3
(d) Medical Records (3).

2. Patient #1, a twenty-five year old profoundly mentally retarded patient, was sent to the hospital for assessment of possible gastrointestinal bleeding. Evaluation in the Emergency Room revealed gastric tube site irritation, but no gastrointestinal bleeding. Significant findings included tachycardia of a rate of 154-175 and an oxygen saturation of 88% on room air. The patient was afebrile. The Emergency Room record lacked documentation that information was forwarded back to the receiving facility identifying clinical findings, recommended interventions (including referral to Endocrine Clinic) to provide for the continuity of care of the patient.

The above is a violation of the State of Connecticut Public Health Code Section 19a-504c
Discharge Planning (e).

Yale New Haven
1826 Hospital

20 York Street, New Haven, CT 06504

January 17, 1997

Janet McKiernan, RN
State of Connecticut
Department of Public Health
410 Capitol Avenue - MS #12HFA
P.O. Box 340308
Hartford, CT 06134

Dear Ms. McKiernan:

I am writing in response to your letter of January 6, 1997 in which you set forth violations related to visits made on November 6, 7, 8 and 12, 1996. I will respond to the allegations as they are set forth in the letter. Thank you for the grant of additional time to reply.

1. Patient #4, a 29 year old female, presented on 4/20/96 to the Emergency Room with exacerbation of back pain relating to a known herniated disc. Surgery had already been scheduled for 5/15/96. The patient was examined by the Emergency Room physician, a neurosurgical resident and an orthopedic surgeon. The patient identified she had increased problems with incontinence. Exam revealed decreased right lower extremity motor ability, but it was not determined if it was related to her pain. A repeat CT scan compared with previous films showed no significant change. Nursing progress notes reflected the patient was medicated for pain at 2:45 AM, 4:30 AM, 5:45 AM and 11:10 AM. There was no corresponding physician's order for the first dose of Toradol given at 11:10 AM.

The above is a violation of the State of Connecticut Public Health Code Section 19-13-D3 (d) Medical Records (3).

Response: The Hospital acknowledges that there was no written order for the first dose of Toradol administered, which was apparently given pursuant to an unsigned verbal order and not properly recorded as such by the nurse who administered the medication. As its Plan of Correction, the Hospital agrees to review with nursing and physician staff in the Emergency Department the current policy for the use and documentation of verbal orders. This will be accomplished by the Co-Director of the Emergency Department within the next two weeks. In addition, the Emergency Service Co-Director will oversee an audit of 10 charts per week for the period

commencing on or about February 1 and ending on or about April 1, 1997 to determine compliance with the verbal order policy. Notable levels of non-compliance will be addressed through retraining and counseling.

2. Patient #1, a twenty-five year old profoundly mentally retarded patient, was sent to the hospital for assessment of possible gastrointestinal bleeding. Evaluation in the Emergency Room revealed gastric tube site irritation, but no gastrointestinal bleeding. Significant findings included tachycardia of a rate of 154-175 and an oxygen saturation of 88% on room air. The patient was afebrile. The Emergency Room record lacked documentation that information was forwarded back to the receiving facility identifying clinical findings, recommended interventions (including referral to Endocrine Clinic) to provide for the continuity of care of the patient.

The above is a violation of the State of Connecticut Public Health Code Section 19a-504c Discharge Planning (e).

Response: The Hospital acknowledges that its record failed to document what information was provided to the receiving facility. It should be noted that discharging a patient to a long term care facility is unusual enough in the Pediatric Emergency Department that it is less familiar to the staff there than at other places in the Hospital. As the Hospital's Plan of Correction, the Co-Director of the Emergency Service will review with all relevant Pediatric Emergency Department staff the discharge procedures for a patient being discharged to a long-term care facility). This review will take place within the next month. Though not directly related to this Plan of Correction, the Hospital wishes to inform the Department of its intent to charter a new Quality Improvement team to review issues surrounding discharge planning for the entire Emergency Department. It is likely that the work of this new team will be performed over the period of the next year.

Thank you for this opportunity to respond to the alleged violations. Please feel free to call should you have further questions.

Very truly yours,

Stuart G. Warner
Assistant Counsel

STATE OF CONNECTICUT

DEPARTMENT OF PUBLIC HEALTH AND ADDICTION SERVICES
BUREAU OF HEALTH SYSTEM REGULATION

000209

April 14, 1994

Robert J. Trefry
President and Chief Executive Officer
Bridgeport Hospital
267 Grant Street
Post Office Box 5000
Bridgeport, Connecticut 06610

Dear Mr. Trefry:

An unannounced visit was made to Bridgeport Hospital on March 16, 1994 by representatives of the Hospital and Medical Care Division and the Monitoring and Radiation Division of the Department of Environmental Protection for the purpose of conducting a licensure inspection.

A focused review of the following services was undertaken:

- Nursing - Evaluation of nursing process and infection control procedures.
- Medical Staff - Control of privileges and quality assurance.
- Dietary Services - Therapeutic clinical services.
- Social Services - Discharge planning.
- Physical Plant - Physical environment and fire safety.
- Radiology - Evaluation of equipment and quality control.

The following violations of the State of Connecticut Public Health Code were observed during the course of the inspection.

1. The Clean Utility Rooms, located on the fifth floor through the tenth floor of the West Tower were not provided with doors to separate the rooms from the corridor.

The above is a violation of the State of Connecticut Public Health Code, Section 19-13-D3 (a) Physical Plant (2).

2. In twelve (12) of seventeen (17) nursing care plans reviewed, the plan failed to reflect the actual problems/needs of the patient as evidenced by:
 - a. In five (5) of ten (10) medical records reviewed, care plans lacked individualization.
 - b. Three (3) nursing assessments identified patient educational needs not addressed on the care plan.

2. c. Three (3) care plans identified assessment of patient pain every three hours. The interventions were not documented as identified on the plan.
- d. One (1) patient with newly diagnosed cancer lacked the psychosocial needs of the patient identified on the plan of care.
3. Four (4) of ten (10) medical records reviewed contained physician notes and orders that were illegible.
4. Two (2) of ten (10) medical records contained physician orders that were nonspecific.
5. The facility failed to weigh one (1) of four (4) patients at nutritional risk both upon admission; and also following a recommendation of the registered dietitian.
6. Two (2) of three (3) records in which patients were documented as having received prn (as necessary) medications, the response to the medication was not identified.

The above, 2 through 6, are violations of the State of Connecticut Public Health Code, Section 19-13-D3 (d) Medical Records (3).

7. Five (5) of ten (10) records of patients transferred to skilled nursing facilities failed to include the signature of the patient or family member or representative on the patient discharge plan.

The above is a violation of the Regulations of Connecticut State Agencies, Section 19a-504c-1 Discharge Planning (f) and the State of Connecticut Public Health Code, Section 19-13-D3 (d) Medical Records (3).

8. The hospital's Department of Obstetrics and Gynecology lacked a written standard for, and two (2) of ten (10) VIP (voluntary interruption of pregnancy) records lacked evidence of, the provision of postoperative counseling including family planning to the patient.

The above is a violation of the State of Connecticut Public Health Code, Section 19-13-D54 Regulations on Abortions (d)(10) and Section 19-13-D3 (d) Medical Records (3).

9. Surfaces and countertops (along with various pieces of equipment) in the Emergency Department contained a visible accumulation of dust.
10. The pediatric scale in the "Emergease" area of the Emergency Department contained a visible accumulation of dust.
11. Supplies were stored uncovered on carts in the Plaster Room suite.

Robert J. Trefry
President and Chief Executive Officer
Bridgeport Hospital
Page 3.

000211

12. Supplies and equipment were stored uncovered in the Clean Utility Room on Tower 7 which lacked doors and was therefore open to the hallways.
13. The pediatric warming unit housed in the Emergency Department lacked evidence of current biomedical inspection (last review date 2/15/93).
14. The Endoscopy suite lacked adequate space to prevent cross-contamination of equipment, equipment processing and equipment storage. The suite, additionally, lacked adequate patient processing.
15. The area identified in the preoperative laboratory of "Surgease" allowed for cross-contamination of personnel and patient medical records.

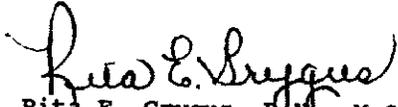

The above, 9 through 15, are violations of the State of Connecticut Public Health Code, Section 19-13-D3 (i) General (7) and (1) Infection Control (4).

Please respond by April 28, 1994 with a plan of correction for these violations.

You may wish to dispute the violations stated above and you may be provided with an opportunity to be heard. If these violations are not responded to by the date requested, or if a request for a meeting is not made within that time period, the violations shall be deemed admitted.

If there are any questions please do not hesitate to contact this office.

Sincerely,

Rita E. Grygus, R.N., M.S.N.
Medical Facilities Consultation Supervisor
Hospital and Medical Care Division

DEPARTMENT OF PUBLIC HEALTH

Greenwich Hospital
Administration Department

January 23, 1997

Certified Mail No. - Z 175 349 142

JAN 27 1997

RECEIVED

Frank Corvino, Administrator
Greenwich Hospital
5 Perryridge Road
Greenwich, CT. 06830

Dear Mr. Corvino:

An unannounced visit was made to Greenwich Hospital on December 13, 1996 by a representative of the Division of Health Systems Regulation for the purpose of investigating an incident with an additional telephone interview conducted on December 20, 1996.

Attached are the violations of the State of Connecticut Public Health Code and/or General Statutes of Connecticut which were noted during the course of the visit.

Section 4-182 (c) of the General Statutes of Connecticut, as amended, requires that you be given the opportunity to show compliance with all lawful requirements for the retention of your license.

In accordance with this Statutory requirement, an office conference has been scheduled for February 7, 1997 at 9:30 a.m. in the Division of Health Systems Regulation Conference Room, Department of Public Health, 410 Capitol Avenue, Hartford, Connecticut.

The purpose of this meeting is to provide you with an opportunity to discuss the violations contained in this letter and to show that further action by this Department should not be instituted.

You may wish to be accompanied by your attorney. It is not mandatory that you attend this meeting, however, if you do not attend we will have no recourse but to institute further proceedings.

Please prepare a written plan of correction for the above mentioned violations to be presented at this conference.

Address each violation with a prospective plan of correction which includes the following components:

- a. Measures to prevent the recurrence of the identified violation, (e.g., policy/procedure, inservice program, repairs, etc.).
- b. Date corrective measure will be effected.
- c. Identify the staff member, by title, who has been designated the responsibility for monitoring the individual plan of correction submitted for each violation.

If there are any questions, please do not hesitate to contact this office.

Respectfully,

Rita E. Grygus

FACILITY: Greenwich Hospital

DATE OF VISIT: December 13, 1996

THE FOLLOWING VIOLATIONS OF THE STATE OF CONNECTICUT
PUBLIC HEALTH CODE AND/OR CONNECTICUT GENERAL STATUTES
WERE IDENTIFIED

1. The hospital failed to have a completed history and physical recorded by the physician within twenty-four hours of admission. Based on medical record review the findings include:
 - a. Three of the five medical records lacked a history and physical, (e.g., Patient's #1, #2 and #3).
2. Through medical record review, policy review and staff interview it was determined that the hospital staff failed to accurately assess skin integrity on admission for five patient's reviewed. Facility policy for wound care states an initial assessment is to include stage, size and description with reassessment of skin integrity every twenty-four hours for potential complications. The findings include:
 - a. Patient #1's initial nursing assessment lacked size and description.
 - b. Patient #2's initial nursing assessment lacked size of the decubiti.
 - c. Patient #3's initial nursing assessment lacked sizing of the lesions.
 - d. Patient #4's initial nursing assessment lacked identification of all areas of skin breakdown except for one. The patient had four other areas of breakdown undocumented.
 - e. Patient #5's initial nursing assessment lacked any assessment of scale to determine risk for pressure sore; fall risk assessment; neurological assessment and pain/comfort scale.
3. The hospital failed to develop a patient care plan to include the problem of skin integrity for four of the five patient's reviewed. The findings based on medical record review include:
 - a. Patient #1's patient care plan of 12/6/96 lacked the problem of skin integrity, goal and/or interventions.
 - b. Patient #2's patient care plan of 12/3/96 identified tissue perfusion but lacked identifying a pressure sore, goal and/or interventions.
 - c. Patient #3's patient care plan of 12/2/96 lacked goals and interventions.
 - d. Patient #4's patient care plan of 11/21/96 lacked the problem of skin integrity, goals and interventions.
4. The hospital staff failed to document accurately in the progress notes of four medical records information on skin integrity and/or pressure sores. Based on medical record review, observation and staff interview the findings include:
 - a. Patient #1's progress notes lacked any documentation of the sacral decubitus. Observation of the patient on 12/13/96 identified a dry and intact Duoderm dressing

FACILITY: Greenwich Hospital

Page 3 of 3

DATE OF VISIT: December 13, 1996

THE FOLLOWING VIOLATIONS OF THE STATE OF CONNECTICUT
PUBLIC HEALTH CODE AND/OR CONNECTICUT GENERAL STATUTES
WERE IDENTIFIED

- over the sacrum, two reddened pressure areas were observed on the left ankle and heel, no protective devices were observed between the legs and on the feet.
- b. Patient #2's progress notes lacked documentation of decubiti. Observation of Patient #2 on 12/13/96 identified two dime sized openings on the right and left buttock and one 1 inch by 2 inch right lower buttock all Stage II.
 - c. Patient #3's progress notes lacked description of old' and new lesions. Observation on 12/13/96 identified three new open areas on the right leg.
 - d. Patient #4's progress notes inconsistently documented some areas which received treatment. Observation on 12/13/96 identified a Stage II sacral decubiti without the benefit of a dressing. A gauze dressing on the inner aspect of the left foot appeared dirty with old dried blood. All observations were confirmed by the nurse manager.

The above are violations of the State of Connecticut Public Health Code Section 19-13-D3 (d)
Medical Records (3).

Rita E. Grygus
Medical Facilities Consultation Supervisor
Division of Health Systems Regulation
State of Connecticut Department of Health
410 Capitol Avenue - MS # 12 HRS
P.O. Box 340308
Hartford, Connecticut 06134

Dear Ms. Grygus:

As you are aware, a representative of the Division of Health Systems Regulation made an unannounced visit to Greenwich Hospital on December 13, 1997. We received a report of the State's findings on January 27, 1997 and subsequently met with you to discuss the violations. At our meeting I agreed to send you a report regarding the issues in June after the Wound Care Team had reported to the Quality Council.

I have enclosed the following for your review:

With regard to issue #1:

The Utilization Review Department continues to notify the Health Information Management Department of any record that does not have a history or physical dictated within 24 hours. The Health Information Management Committee contacts the physician. During the months of April and May only four phone calls had to be made. In all instances the chart was then dictated within 24 hours, except for one which was dictated within 48 hours. We will continue to address this with the medical staff until there is 100% compliance.

With regard to issue #2 and #3:

The Wound Care Team presentation to the Quality Council (Attachment B). In summary, it includes a prevalence study, assessment of documentation patterns, assessment of product usage, and policies and procedures. The team recommendations and status of the action taken is reported on the last five pages of the presentation. The last page of these five is the monitoring plan. (The prevalence study indicated 5 Level I, 6 Level 2, and 1 not documented.)

The "Management of Skin Integrity" (purple binder) is a resource manual on every unit. It includes in the front pocket several tools that have been developed to aid in the documentation of skin integrity. The items included are: a one time use disposable ruler which describes the stages on the front and the wound assessment on the reverse side; a page of skin integrity skin care plans, which come in sticker form, to attach to the chart; and the care plan that has been piloted on ICU which includes the same information. The sticker is an interim step until the piloted care plan is implemented on all units and the care plan is an interim step until the computer documentation system is implemented. The clinical documentation system is anticipated to be operational in November, at that point there should be no lack of documentation because the

000216

system will not allow you to move forward if you have not completed the assessment. Also, included is a yellow laminated reference tool which is on every unit.

The monitoring of skin integrity is an ongoing process on the units. The initial assessment component for skin integrity continues to improve. Documentation of ongoing assessments, nursing care provided, and patient response are addressed close to 100% of the time for patients with issues related to skin integrity. The Documentation Committee is developing a less cumbersome tool to promote the constant updating of the plan of care when new problems occur.

With regard to issue #4:

The Health Information Management Department will conduct quarterly reports on wound care documentation. The first quarter report indicated all records included wound care documentation which was appropriate for the cases reviewed. All records included wound care documentation in the progress notes as well as in other reports including consults, and summaries.

Please contact me if you would like me to provide you with any further information at (203) 863-3337.

Sincerely,

Gail E. Doria
Director Quality Management

Greenwich Hospital Response to
Violations of State of Connecticut Public Health Code

1. **The hospital failed to have a completed history and physical recorded by the physician within twenty-four (24) hours of admission. Based on medical record review, the findings include:**

- a) **Three of five records lacked a history and physical**

The three records noted that lacked a completed history and physical were the responsibility of a single physician. We believe this to be an anomaly with respect to the Hospital's recordkeeping practices. Attached for your review are the historical delinquency rates for history and physical reports (see Attachment I). To help insure that history and physical reports are recorded by physicians within 24 hours of admission, the attached policy has been put into effect as of 1/28/97 (see Attachment II). Sharon Bollerman, Director of Health Information Management, will monitor compliance with this policy. In addition, the responsible physician will be monitored for completeness of record on a concurrent basis for a six month period of time by the Utilization/Quality Management staff. Gail Cucurullo, Director of Quality Management, will report any findings to the Chief of Medicine and to the Executive Committee of the Medical Staff. The initial findings will be presented at the February 24, 1997 Executive Committee meeting.

2. Through medical record review, policy review and staff interview, it was determined that the hospital staff failed to accurately assess skin integrity on admission for five patient's reviewed. Facility policy for wound care states an initial assessment is to include stage, size, description with reassessment of skin integrity every twenty-four hours for potential complications. The findings include:
- a) Patient #1's initial nursing assessment lacked size and description.
 - b) Patient #2's initial nursing assessment lacked size of the decubiti.
 - c) Patient #3's initial nursing assessment lacked sizing of the lesions.
 - d) Patient #4's initial nursing assessment lacked identification of all areas of skin breakdown except for one. The patient had four other areas of breakdown undocumented.
 - e) Patient #5's initial nursing assessment lacked any assessment of scale to determine risk of pressure sore, fall risk assessment, neurological assessment and pain/comfort scale.
- 2a. A 92 year old female admitted 12/6/96 with increasing dyspnea, cough, and orthopnea. She had a 20 year history of COPD, was diagnosed with pneumonia (aspergillus on culture) and CHF. Her respiratory status was of major concern. The nurse's initial assessment described skin condition (see attached page A2), although the size was not noted. Flow sheet indicates skin dry from 12/7-12/10, advancing to normal for 12/11 through 12/15/96 (see A3 - A4). Issue of skin breakdown apparently resolved within 24 hours. Patient's skin condition documented on a 12/6 home care visit to be 0.5cm. X 0.1cm. On admission, the patient was on a pressure guard bed. Acuity sheet documents assistive repositioning on every shift from admission to discharge except for the evening shifts of 12/06 and 12/13. Extensive nurses notes with emphasis on respiratory status, patient expired on 12/15 secondary to pneumonia and severe COPD and Bronchiectasis.
- 2b. An 88 year old male admitted from a nursing home on 12/4/96, obtunded and in a septic state requiring intensive antibiotic treatment. On admission, patient's diagnosis included polymicrobial sepsis with sacral cellulitis, decubitus and urinary tract infection, prognosis guarded. Temperature on admission was 102 - 102.6 degrees. Description and stage of decubitus was noted on initial admission assessment, (B3) although size was not noted. Patient was on a pressure guard bed. He returned to the nursing home on 1/2/97 after resolution of his sepsis, hypovolemia, and dehydration. His skin integrity improved, but continued to be a problem secondary to incontinence of stool and urine. An indwelling foley catheter was used to assist with maintenance of skin care.
- 2c. An 89 year old female with history of recurrent CVA's, chronic renal failure, ASHD, NIDDM, and dementia was admitted from a subacute facility with CHF and blisters in varying stages of development over arms, legs and trunk, which were diagnosed as pemphigus. Initial assessment notes area of involvement and description, as appropriate for this diagnosis (see attached C2 - C3). Initial Dermatology consult on 12/2 documents extent of skin condition (C4). Dermatologist continues to document no new lesions from 12/6/96 through to 1/2/97 where he documents "no new lesions old ones are completely

Greenwich Hospital
Department of Health Response

Page 3

- 2c. healed" (C6-C19). Patient was on a specialty bed. Patient expired on 1/26/96 related to pneumonia as a consequence of recurrent CVA's.
- 2d. An 85 year old male was admitted on 11/20/96 with hypothermia (temperature 93.8) and rhabdomyolysis. The patient was found in a stairwell in his home, which had been condemned. On admission, patient's diagnoses included rhabdomyolysis, pneumonia, dehydration and hypoglycemia (blood glucose was 55). On 12/13/96, the patient started choking during breakfast, Heimlich maneuver was performed. The patient was suctioned, O2 sats were at 60% on 3L oxygen, subsequently O2 sats were back to 95% after further suctioning. Patient expired on 12/17/96 from respiratory distress secondary to pneumonia. The initial admission assessment lacks all documentation of skin breakdown; however, all areas are documented in 11/20/96 nursing notes (see attached D1), although not sized or staged. Patient was on a pressure guard bed.
- 2e. A 90 year old female was admitted from a nursing home on 12/5/96 with shortness of breath secondary to pneumonia and unresponsive to p.o. antibiotics. The patient's condition improved and she was discharged back to the nursing home on 12/13/96. Although the initial nursing assessment form lacks documentation, as noted above, the initial patient care record and flow sheet documents skin is normal and mobility requirements. Patient was on a Pressure guard bed. Nurses notes document assistance with all activities of daily living. The primary emphasis is on patient's respiratory status (see attached E1 - E3).

To help insure the issues noted above do not recur, the following steps have been taken:

1. Unit Manager on 4 South informed staff of preliminary State findings during staff meetings held on December 16, 1996 and January 15, 1997. Reinforcement of policy standards regarding Initial Admission Assessment and Care Planning was carried out. Included in the education plan was problem identification, follow through of assessment, interventions, and outcomes, as well as documentation requirements (see Attachment IIIa, and IIIb).
2. Preliminary State findings were presented at Patient Care Advisory Committee on January 15, 1996.
3. A Multidisciplinary Continuous Quality Improvement team has been launched to improve documentation in assessment and intervention as related to skin integrity (see attached charge and composition, Attachment IV). Team will report results at Quality Council meeting on June 3, 1997. Gail Cucurullo, Director of Quality Management, will be kept apprised of team's status on a regular basis. Preliminary State findings were presented to Quality Council on February 4, 1997.
4. A Quality Assessment tool has been developed to monitor compliance with policy and procedures related to skin and wound management. The monitoring tool includes

4. documentation on Initial Admission Assessment, Care Plan and Reassessment (see Attachment V). Initial collection of data has already been instituted. Initial report will be sent to Gail Cucurullo, Director of Quality Management on March 1, 1997. Subsequent reports will be compiled and sent as indicated.
5. The role of the Geriatric Clinical Specialist has been expanded to include assisting with education and monitoring of patients with skin integrity issues.
6. Unit Managers will consult with Geriatric Nurse Specialist to assist with ongoing education and monitoring as patients are identified in multidisciplinary team rounds. Each unit will meet on a schedule consistent with patient specialty needs.

3. **The hospital failed to develop a patient care plan to include the problem of skin integrity for four of the five patient's reviewed. The findings based on medical record review include:**
- a) **Patient #1's patient care plan of 12/6/96 lacked the problem of skin integrity, goal and/or interventions.**
 - b) **Patient #2's patient care plan of 12/3/96 identified tissue perfusion, but lacked identifying a pressure sore, goal and/or interventions.**
 - c) **Patient #3's patient care plan of 12/2 lacked goals and interventions.**
 - d) **Patient #4's patient care plan of 11/21/96 lacked the problem of skin integrity, goals and interventions.**
- 3a) As noted in 2a above, the emphasis was on patient's respiratory status. Initial and subsequent flow sheets and patient record indicate status of skin. Documentation of interventions for skin care were not specifically documented in a narrative form, but were indicated on the patient care record (see attached A5 - A7). Patient was on a pressure guard bed.
- 3b) Although patient care plan of 12/3 did not specifically delineate goals and interventions for skin integrity, since the emphasis was related to septic condition, the nurses notes on 12/3 clearly indicate interventions and identification of skin condition. A culture was taken, lotrimin applied, patient turned and positioned (see attached B6). Patient Care Record also notes interventions (see attached B7 - B11). Patient was on a pressure guard bed.
- 3c) Plan on initial assessment does not document intervention to be taken, although notation is made to assess and monitor condition (see attached C17 - C18). Patient was on a specialty bed.
- 3d) Care plan notes to assess skin breakdown and goal to return to optimal health (see attachment D2). Flow sheet and patient care record identify skin breakdown and requirements for hygiene and mobility. Interventions are not noted in the plan, but nurses notes on day of admission document orders received for skin care (D1). Medication Kardex notes interventions taken; however, nurses notes inconsistently document interventions taken in a narrative format. Patient was on a pressure guard bed.

To help insure the above noted issues do not recur please refer to action plan as noted above under item 2.

4. The hospital failed to document accurately in the progress notes of four medical records, information on skin integrity and/or pressure sores. Based on medical record review, observation and staff interview, the findings include:
- a) Patient #1's progress note lacks any documentation of sacral decubitus. Observation of patient on 12/13/96 identified a dry and intact Duoderm dressing over the sacrum, two reddened pressure areas were observed on the left ankle and heel, no protective devices were observed between the legs and on the feet.
 - b) Patient #2's progress note lacks documentation of decubiti. Observation of patient on 12/13/96 identified two dime sized openings on the right and left buttock and one 1 inch by 2 inch right lower buttock all Stage II.
 - c) Patient #3's progress note lacked description of old and new lesions. Observation on 12/13/96 identified three new open areas on the right leg.
 - d) Patient #4's progress notes inconsistently documented some areas which received treatment. Observation on 12/13/96 identified a Stage II sacral decubiti without benefit of a dressing. A gauze dressing on the inner aspect of the left foot appeared dirty with old dry blood. All observations were confirmed by the nurse manager.
- 4a) As noted above, progress notes lacked documentation of 0.5cm X 0.1cm decubiti which was resolved within 24 hours, the emphasis was given to patient's respiratory status. Duoderm on sacrum as a precautionary skin barrier; there was no skin breakdown at this time. Patient was on a pressure guard bed.
- 4b) Area of sacral breakdown is noted regularly throughout the primary physician's progress notes, as well as those of the Infectious Disease Specialist (see attached B12 - B15).
- 4c) As noted in 2c above, progress notes consistently document status of lesions, noting on 12/6 no new lesions and on 1/2/97 old ones fully healed (see attached C4 - C16).
- 4d) On 12/13/97 the patient experienced an episode of desaturation secondary to respiratory distress as noted in 2d above. Focus was on respiratory status with observation, continual periodic suctioning, O2, etc. The skin barrier had been removed in the morning during routine care prior to the acute episode. Supply had been exhausted and reordered that morning as explained to the surveyor at the time. Physician's notes regularly document wound condition, but not consistently. As noted, emphasis was on dehydration, hypothermia, rhamdomyolysis and respiratory state. Dressing on ankle abrasion was not routinely documented in notes. Patient had been out of bed with attempted ambulation as noted in nurses notes on 12/12/96, this may have contributed to the visual appearance of the dressing.

To help insure the above issues do not recur, see plan outlined under item 2 above. In addition, the Department of Health findings have been reviewed with the Hospital's Vice President for Medical Services, Dr. A. Michael Marino, who will present the State findings at the Medical Staff

meeting in February. In addition, the Health Information Department will conduct a study of documentation in progress notes as related to wound care. The study will be reported at the April meeting of the Health Information Management committee. Further action will be taken at that time, if indicated.

October 9, 1997

Mr. Harold M. Oberg

**Re: Certificate of Need Application, Docket Number 97-559
Corporate Affiliation of Yale-New Haven Health Services Corporation and
Greenwich Health Care Services, Inc.**

Dear Mr. Oberg:

Please find attached an original and three (3) copies of the responses to the September 18, 1997 completeness questions regarding the Corporate Affiliation of Yale-New Haven Health Services Corporation and Greenwich Health Care Services, Inc. Certificate of Need application. I hope that the following information will clarify any remaining issues regarding this application and bring it to completion.

Please contact me if you have any further inquiries.

Sincerely,

Caroline R. Piselli
Director, Planning & Marketing

CERTIFICATE OF NEED APPLICATION

**CORPORATE AFFILIATION OF
YALE-NEW HAVEN HEALTH SERVICES CORPORATION
AND GREENWICH HEALTH CARE SERVICES, INC.**

DN 97-546

RESPONSES TO 9/18/97 COMPLETENESS QUESTIONS

GENERAL INFORMATION**Question # 1b, Page 13**

1. As requested, please provide a completed Acute Care Hospital Affidavit for each of the following:
 - a. Yale-New Haven Hospital
 - b. Bridgeport Hospital
 - c. Greenwich Hospital Association

Acute Care Hospital Affidavits are presented in Appendix A.

Question # 2, Page 13

2. The Applicants have stated that "This affiliation will enhance the ability of both the regional and local networks to continue their missions centered around serving the health care needs and promoting the health status of people in their communities, within a continually changing health care environment." What mechanisms are planned by the Applicants which would enable network leadership to be responsive to the questions and concerns of the service area population regarding the CON proposal?

As described in the response to Question 14, page 14 in the CON application, the community has been involved through representatives on the parent companies' and hospitals' boards and through community meetings as described in the response to Question 10. Additionally there have been radio call-in shows, extensive news stories in local and regional papers, conversations and meetings with elected officials and a news conference and a press release announcing the affiliation. Prior to the public announcement many community representatives, including political and civic leaders, hospital auxiliarians, volunteers and donors, other local providers and payers, were informed about the proposed affiliation via letters, facsimile, telephone and distribution of the *Focus* magazine as described in the response to Question 10. The Applicants have received no letters of support or opposition to date and do not expect to receive any concerns from either service area. Any concerns that may be received will be addressed fully and in the appropriate forum.

Question # 2, Page 14 and Article VI of the System Affiliation Agreement (“Agreement”)

3. **The Applicants have stated that “The endowment will, at all times, be dedicated to use for the benefit of Greenwich Hospital, its affiliates and the Greenwich community.” Section 6.4 of the Agreement describes uses of income and principal from the fund. In this paragraph, there is no reference to restrictions as to the use of funds for the GHCS network only. In addition, any reference to the handling of restricted principal according to the wishes of the donor appears to be absent.**

The Agreement requires the principal of the endowment and any income earned be used exclusively for the benefit of the GHCS network in a manner consistent with any restrictions imposed by the donors. Please note section 6.4.1 states that income will be distributed to GHCS or Greenwich Hospital to be used in accordance with their respective missions. Since all income is distributed to GHCS or GH, the income must be used for the GHCS network only. Further, Section 6.4.2 requires that distributions of principal be made only with the approval of the Boards of the Foundation and GHCS and that the use of the distributed funds must not be inconsistent with the mission of the Foundation or any donor restrictions. As stated in Section 6.1, the mission of the Foundation is to hold, manage and distribute these funds for the benefit of the GHCS network, exclusively.

- a. **Please explain and document how fund utilization in general will be managed and restricted to use for the only.**

As specified in Section 6.1, the activities of the Foundation will be limited by its mission, which is to hold, manage and distribute the funds for the exclusive benefit of the GHCS network.

- b. **Please explain and document how donor restricted funds will be handled and managed according to donor wishes.**

As specified in Section 6.3, the endowment is being transferred “to the Foundation to be held, managed and distributed in accordance with the mission of the Foundation... and with any and all restrictions placed on such funds by the donor thereof or by law.”

Question # 3, Pages 15 through 19

4. The Applicants' affiliates include the following "For Profit" entities: YNHH-MSO, Inc., York Enterprises, Medical Center Realty, Inc., Medical Center Pharmacy & Home Care, Inc., Harbor Health Plan, Inc., Century Collections Agency, NovaMed, Greenwich Health Services, Inc. and Future Care, Inc. Public Act 97-188 defines a non-profit hospital to include any entity affiliated with such a hospital. Therefore please provide a copy of a legal opinion stating how and whether or not Public Act 97-188 applies to this CON proposal.

A copy of a legal opinion stating that Public Act 97-188 does not apply to this proposal is presented in Appendix B.

5. Please describe the functions of YNHH-MSO, Inc.

YNHH-MSO, Inc. operates two lines of business. The first provides non-clinical management and support services to physician practices. The second provides non-clinical managed care contracting support services to members of the YNHH System and other contracting organizations.

Question # 3, Page 19

6. The Applicants stated that in the short term, there are no plans to consolidate services, therefor no short-term cost savings are anticipated. What long term cost savings excluding computer services are being planned or considered involving the consolidation of any functions or services between YNHHSC and GHCS?

At the present time, plans to consolidate any functions or services between YNHHSC and GHCS have not progressed beyond preliminary conceptual discussions.

Question # 3, Page 19 and Article II, Paragraph 2.1.2 of the Agreement

7. Within Article II, Paragraph 2.1.2, the parties state, "Provide *centralized managed care services* by the System and develop the System's *managed care arrangements* to increase the number of *managed care patients* served by the System, and enhance each System Member's ability to seek and accept regional, statewide, and state/federal government *managed care contracts* for enrolled populations."

a. Please describe the aforementioned *centralized managed care services*.

“*Centralized managed care services*” refers to the use of certain individuals within the System who have substantial managed care experience to handle contracting activities for all members of the YNHH System. In this manner, managed care contract negotiation will be “centralized” so that obligations of System members under managed care contracts will be similar and therefore easier to administer.

b. Describe what the Applicants mean by the term, *managed care arrangements*.

The term “*managed care arrangements*” refers generally to the multitude of contractual relationships being offered by HMOs and other payors.

c. Please describe how the Applicants would increase the number of managed care patients through managed care arrangements.

By centralizing managed care services, YNHHSC hopes to speed the process of negotiating and entering into managed care contracts to facilitate the provision of services to enrollees in managed care plans. Use of experienced personnel across the YNHH System should serve the managed care companies and their enrollees more effectively and efficiently. This will enable members of the YNHH System to attract new contracts and increase enrollment under existing contracts, thereby increasing the number of managed care patients served.

d. Describe the program that the applicants intend to implement which would enhance each member’s ability to seek and accept managed care contracts.

As noted in paragraphs a through c above, YNHHSC plans to utilize managed care experts available within the YNHH System to improve the process by which all members interact with managed care companies, thus enhancing each member’s ability to seek and accept managed care contracts.

e. Do the Applicants intend to allow indemnity and other non-managed care contracts to lapse under the described plan? Please explain.

The Applicants do not intend to allow indemnity and other non-managed care contracts to lapse. YNHHS intends to continue to support traditional insurance arrangements including indemnity plans and otherwise.

Question # 7, Page 21 and Section 5 of the Agreement

8. **The Applicants stated that GHCS will appoint three members to the Board of Directors of YNHHS. The Agreement states "YNHHS will use its best efforts to assure that the YNHHS Board of Directors reflects, to the extent reasonably possible, the geographic diversity of the service area of the System." Please explain why GHCS network service area representation on the Board of Directors of YNHHS is not guaranteed in the agreement.**

GHCS network service area representation on the YNHHS Board of Directors is guaranteed by the Agreement. The Chairman of the GHCS Board is an ex officio member of the YNHHS Board (Section 5.2). Thus, there will always be GHCS representation on the YNHHS Board. The YNHHS Board, with the inclusion of GHCS representation, reflects the service area of the YNHHS System.

9. **Please explain why there is no specific reference in the Agreement regarding the "geographic diversity" of the members of the Board of Directors of GHCS.**

There is no need for a specific reference regarding the geographic diversity of the members of the GHCS Board. The GHCS Board nominates its own successors and thereby can reflect the geographic representation that is appropriate for the GHCS network.

LICENSURE AND COMPLEMENT CHANGES:

Question # 14, Page 24

10. **The Applicants have described efforts to inform the public of the proposed affiliation through community participation involving board representation as well as through efforts which utilize local media sources and direct mailings.**
- a. **Describe mechanisms in place in the GHCS network service area which provide feedback from the community at large concerning the CON proposal.**

There are a number of mechanisms in place that have provided, and will continue to provide, feedback from the Greenwich community-at-large concerning the CON proposal. Most significantly, Greenwich Hospital continues to schedule community meetings, at which members of the senior administrative staff, including Greenwich Hospital's President, update the community on affiliation activities, and encourage feedback through a question and answer session at each presentation.

Greenwich Hospital also is continuing its media relations program, which includes appearances by its President on radio call-in programs on WGCH, the local Greenwich station, and meetings with the editorial staff of the local newspaper, *Greenwich Time*. Greenwich Hospital engages in a direct mailing campaign, including the distribution of its *Focus* magazine to more than 60,000 homes, which has covered the affiliation topic in some detail, and will continue to do so.

- b. **Please provide any letters of support or opposition which the Applicants have received regarding the proposed affiliation.**

The Applicants have not received any letters of support or opposition to the affiliation at this time.

Question # 21, Pages 26 and 27 and Appendix C Beginning on Page 198

11. **Please provide a summary of revenue, expense and volume statistics for the current fiscal year, plus fiscal years 1998, 1999 and 2000 with the CON proposal, without the CON proposal and incrementally due to the CON proposal for each of the following:**
- a. **Yale-New Haven Hospital**
 - b. **Bridgeport Hospital**
 - c. **Greenwich Hospital Association**

Please refer to Appendix C.

The Agreement, Page 92

12. In the conclusion of the WITNESS on Page 1 of the Agreement, the Applicants state, "NOW, THEREFORE, in consideration of the foregoing and the mutual agreements and covenants hereinafter set forth and for other valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:" The Applicants should define the term "other valuable consideration" as it is used in the agreement and should indicate where it is identified in the Agreement.

The quoted reference is legal term of art used frequently in legal documents. As such it is not defined or otherwise identified in the Agreement.

OTHER REVIEW CRITERIAQuestion # 23, Page 27 and Section 7 of the Agreement

13. The Applicants stated that the proposed affiliation will allow for coordination of operations through senior management committees to address clinical and non-clinical issues and thereby increase efficiency.
- a. Describe some of the mechanisms that are currently in place in the existing YNHSC network, that have proved sufficient to achieve the goal of efficiency, that might be adapted for the proposed affiliation.

Each vertical network, including affiliated organizations, benefits from the voluntary sharing of expertise and clinical and non-clinical best practices with all other vertical networks in the YNHH System. The YNHSC senior operating group is the primary forum where clinical and non-clinical best practices information and ideas are exchanged. The senior operating group also identifies appropriate organizational resources required for evaluation of potential projects.

Recently, YNHSC received CON approval for the development and implementation of an integrated information system. The goal of this project is to enable all YNHSC affiliates to communicate electronically and to standardize information and systems wherever possible.

- b. The Agreement states that YNHHS shall be consulted in the recruitment and selection of Chiefs of Service or other comparable positions. Please identify who holds the final approval responsibility for appointment of these positions.**

Final responsibility for the appointment of Chiefs of Service is held by the vertical network Board of Trustees/Directors.

Ms. Gayle L. Capozzalo
Executive Vice President
Yale-New Haven Health Services Corporation
789 Howard Avenue
New Haven, CT 06504

Re: Response to completeness questions for certificate of
need application; applicability of Public Act 97-188

Dear Ms. Capozzalo:

As you know, in the September 18, 1997 letter from the Office of Health Care Access containing completeness questions for the certificate of need application filed in connection with the affiliation between Yale-New Haven Health Services Corporation ("YNHHSC") and Greenwich Health Care Services, Inc. ("GHCS"), a question was raised concerning Connecticut Public Act 97-188. Question number 4 asks that a copy of a legal opinion be provided stating how and whether or not Public Act No. 97-188 applies to the CON proposal.

Public Act No. 97-188 is entitled "An Act Requiring Advance Review And Approval Of The Sale Of Nonprofit Health Care Facilities To For-Profit Entities." This Act provides that no nonprofit hospital (nor the holding company, subsidiary or other affiliate of a nonprofit hospital) shall enter into an agreement to transfer a material amount of its assets or operations or a change in control of operations to a corporation or other entity that is organized or operated for profit without first notifying and, as necessary, obtaining approval from the Commissioner of Health Care Access and the Attorney General.

Ms. Gayle L. Capozzalo
October 2, 1997
Page 2

000239

In the present transaction, GHCS, which is the parent company of a nonprofit hospital, will transfer a substantial amount of control of governance to YNHHS. YNHHS is a non-stock, non-profit, federally tax-exempt corporation and thus is not organized or operated for profit. Therefore, Public Act No. 97-188 does not apply to the proposed corporate affiliation of YNHHS and GHCS.

Yours very truly,

Jeanette C. Schreiber

Re: Certificate of Need Modification, Docket Number 99-537R,
Yale-New New Haven Health Services Corporation and
Greenwich Health Care Services, Inc.
Modification of Docket Number 97-559

Dear Ms. Schreiber:

On December 17, 1997, the Office of Health Care Access ("OHCA") granted a Certificate of Need ("CON") under Docket Number 97-559, to Yale-New Haven Health Services Corporation and Greenwich Health Care Services, Inc. ("Applicants"). The CON authorized the corporate affiliation of Yale-New Haven Health Services Corporation, the parent corporation of Yale-New Haven Hospital, and Greenwich Health Care Services, Inc., the parent corporation of The Greenwich Hospital Association.

Stipulation # 5 in the Agreed Settlement under Docket Number 97-559 states the following:

- "5. OHCA and the Applicants agree that a plan for the attainment of cost savings, which reflects any specific incremental operating expense reductions anticipated to result from actions emerging from the corporate affiliation approved herein, will be filed with OHCA by December 31, 1998. This filing will include a completed **Attachment II** for Yale-New Haven Hospital and The Greenwich Hospital Association individually, and the assumptions related to these operating expense reductions. In addition, OHCA and the Applicants further agree that within sixty (60) days subsequent to the end of each fiscal year for the first three full fiscal years following the corporate affiliation, a fully completed **Attachment II** will be filed for Yale-New Haven Hospital and Bridgeport Hospital and The

Modification: DN 99-536R

Page 2 of 2

Greenwich Hospital Association individually, reflecting a total of all actual cost savings for the completed fiscal year facilitated by the corporate affiliation.”

On May 4, 1999, Yale-New Haven Health Services Corporation and Greenwich Health Care Services, Inc. filed a request under Docket Number 99-537R, seeking modification to eliminate paragraph 5 from the Agreed Settlement. This modification is requested because the information is reported in a format that does not provide useful information to OHCA.

OHCA has reviewed the request for a modification to the Order issued under Docket Number 97-559. The provisions of Section 19a-638, C.G.S., as well as the principles and guidelines set forth in Section 19a-637, C.G.S. were fully considered by OHCA in its review.

OHCA hereby approves the Applicants' modification request. Stipulation # 5 is vacated. All other conditions contained in the June 16, 1996, OHCA order issued under Docket Number 97-559, not amended by this modification remain in effect.

Sincerely,

Raymond J. Gorman
Commissioner

Bridgeport, CT 06610

February 28, 1996

Commissioner William Diamond
Chairman
Commission on Hospitals and Health Care
1049 Asylum Avenue
Hartford, CT 06105-2431

Dear Commissioner Diamond:

Enclosed for review by the Office of Health Care Access is an original and five copies of the Certificate of Need application for the proposed affiliation between Yale-New Haven Health Services Corporation and Southern Connecticut Health System. This affiliation will have no substantial impact on delivery of systems, operations, nor capital expenditures and will not impact rates.

If you have any further question or concerns, please contact Caroline Piselli at 785-2609. We look forward to working with you and your staff on this CON.

Sincerely,

Handwritten signature of Frank Tiedemann.

Frant Tiedemann
Senior Vice President
System Development
Yale-New Haven Health Services Corp.

Handwritten signature of Clayton Medeiros.

Clayton Medeiros
Senior Vice President
Planning & Marketing
Southern Connecticut Health System

FT/CM:jl

cc: Jeanette C. Schreiber, Esq., Wiggin & Dana (Attorney to YNHHS))
Collin P. Baron, Esq., Pullman & Comley (Attorney to SCHS)

leaders, hospital auxiliaries, volunteers and donors, other local providers and payers, were informed about the proposed affiliation via letters, phone call or facsimile.

Clinical Services

15. *Please provide a chart depicting all changes to services provided on each campus of the two Hospitals as of the date of affiliation, compared to the current status and location of these services. For each service, the Hospitals must indicate the following.*

- a. *Relocations*
- b. *Terminations*
- c. *Additions*
- d. *Duplications*
- e. *Anticipated scheduling for future changes.*

No changes to services provided at YNH or BH are planned as a result of the proposed affiliation.

16. *In the same format as Question #15 above, please list those programs and services of the two Hospitals and all affiliates which have yet to be integrated and include a projected timetable for their eventual integration.*

There are no plans to integrate clinical programs and services. Each affiliate will continue to function independently.

17. *Please provide the same information requested in Question #16 above, for all non-health care related services, functions and programs of the two Applicants and their corporate affiliates.*

There are no plans in place to integrate non-health care related services. However, in the future, opportunities may be explored for potential cost savings in areas such as selected business services, purchasing, insurance and information systems.

Financial Information

18. ***Provide an itemized list of all capital expenditures associated with the proposed merger.***

Not applicable. There are no capital expenditures associated with this proposed affiliation.

19. ***How will the proposed capital expenditures be financed? Identify the sources of funding of any equity contribution (fund raising, funded depreciation, etc.) and debt financing (tax-exempt bonds, conventional bank financing, etc.). Provide evidence of the financial feasibility of the proposed merger and the interest of any lenders for the debt financing specified above.***

Not applicable. There are no capital expenditures associated with this proposed affiliation. Therefore, financing is not required.

20. ***Please describe the current financial condition of each corporate parent and the anticipated effect of the proposed merger. Specifically address the impact of the combined level of uncompensated care on the proposed merged entity.***

Not applicable. The current sound financial conditions of each corporate parent will continue following the affiliation. Likewise, the level of uncompensated care of YNHH and BH will continue following the affiliation. YNHH and BH both exhibit strength in their successful marketing of CHEFA bonds. Financial performance resulting from improved managed care contracting is difficult to accurately quantify, and therefore is not included.

21. ***Provide a summary of projections of revenue, expense and volume statistics for the current fiscal year, plus fiscal years 1996, 1997 and 1998 for each Hospital with the merger proposal, without the merger proposal, and incrementally due to the merger proposal (See Attachment 3.)***

This is an affiliation, not a merger. The financial projections for YNHH or BH either alone or as affiliated are the same. The requested projections are provided in Appendix II.

22. ***Discuss the impact of the proposed merger and the rates and financial condition of each Hospital including the continuing ability of each Hospital to operate effectively and efficiently, and to meet its financial obligations consistent with principles of sound financial management.***

This proposal involves an affiliation between the two parent companies, YNHHS and SCHS, which will maintain the current sound financial conditions of both hospitals and their ability to operate effectively and efficiently. The proposed affiliation will not impact the published rates or financial condition of either hospital. Both hospitals have recently undergone redesign and reengineering initiatives to ensure cost effective delivery of care, and subsequently have implemented ongoing Continuous Quality Improvement (CQI) processes.

23. ***Discuss the proposed merger's contribution to the cost effectiveness of health care delivery in the region (including any reduction in FTE's, economies of scale, improvements in productivity and cost containment, reduction in licensed beds/excess capacity, and the integration of non-clinical services such as accounting, laundry, purchasing, etc.). This discussion should include the degree to which the proposed merger is likely to achieve appropriate health service area objectives at the most reasonable financial cost.***

The proposed affiliation will contribute to the cost effectiveness of health care delivery in the region as follows:

- Coordinate operations through senior management committees to address clinical and non-clinical issues and thereby increase efficiencies.
- Improve the quality and cost-effective care of both institutions by sharing clinical and non-clinical best practices between the two hospitals.
- Continue to deliver healthcare services in a cost effective manner.

24. ***Please list and describe all cost savings expected due to the proposed merger.***

Please refer to question # 23.

25. ***Please provide a copy of any consultant's report received by the Applicants' relating to an operational efficiency analysis of the proposed merger.***

Not applicable. Operational efficiency analysis was not performed.

26. *Please comment on the needs of the public that currently are not being met and describe how the proposed merger would help to meet such needs.*

YNHHSC and SCHS are committed to identifying, targeting and serving their respective communities' healthcare needs. The proposed relationship between YNHHSC and SCHS is intended to respond to the needs of the public for improved access to cost effective/coordinated healthcare services. This need has been expressed through the public's move to managed care benefit plans and structures. Communications about the features and benefits of the proposed system will assist the community in making informed choices about hospital provider groups and payor plans. In addition, the integrated system which delivers a high-quality continuum of care will be available to a broader geographic area including people in all socioeconomic classes with a wide range of health care needs. The intent of the affiliation is to utilize the combined system's expertise in delivering primary through quaternary healthcare services to improve the health status of participating segments of the communities served.

27. *Discuss how the proposed merger will serve the public interest.*

The proposed affiliation will serve the public interest by addressing the following constituents:

- The patients by providing access to a patient-focused continuum of integrated healthcare services and clinical centers of excellence of high quality through convenient local access points.
- The community by building a community health resource dedicated to improving the health status of the population served.
- The community in the initiation, development, maintenance and oversight of educational programs for health professionals and the public across the system by ensuring a stable base of qualified professionals and improved health.
- The community in the initiation, development and maintenance of programs of scientific research related to the care of the sick and injured.

- The consumers/employers by enabling long-term partnerships that bring the critical resources of care under one umbrella to manage various aspects of health while providing high quality, cost effective, convenient services to employees and other beneficiaries.

28. ***Discuss how the proposed merger will affect the quality of health care delivery in the combined Hospitals' service area. Please provide copies of each Hospital's most recent Department of Public Health and Addiction Services licensing survey.***

One of the key goals of the affiliation is to maintain quality. This will occur through the sharing of system-wide clinical best practices.

Please refer to Appendix III for the Hospital Licensing Surveys for YNHH and BH.

29. ***Discuss how the proposed merger will contribute to an improvement in access to health care services in the combined Hospitals' service area.***

The proposed affiliation is designed to enable two local delivery systems to remain competitive in a changing marketplace by improving access to care and enhancing quality of care. Both hospitals individually will continue to provide comprehensive healthcare services to their respective service areas. Together, as a part of a system, YNHH and BH will be able to improve access to care by expanding:

- the overall geographic area for care and referrals
- the array of services available for people in the communities served by both hospitals
- the level of shared resources and expertise between affiliates
- options for patients covered by managed care contracts.

30. ***Describe the relationship of the proposed merger to the most recent State Health Plan.***

The proposed affiliation between YNHHSC and SCHS supports the following policies contained in the Connecticut State Health Plan:

Policy AIC-II

Access to high quality patient care along with cost effectiveness should remain an important consideration.

As stated above, a primary goal of the proposed affiliation is to improve community access to the system. The expanded geographic area for care and referrals should make the proposed system accessible to more covered lives. Ongoing efforts to improve the quality, cost effectiveness and the array of needed health care services in their communities represent primary goals for YNHH, BH and the proposed affiliation system.

Policy AIC-IV

The SHCC supports the Certificate of Need Program in Connecticut in order to assure access to needed services while avoiding unnecessary capital expenditure.

The improved access to quality health care, described above, can be achieved through the proposed affiliation without any capital expenditure (please refer to the responses to questions 18 and 19).

31. *Describe the relationship of the proposed merger to each Hospital's long range plan.*

Both YNHH and BH have similar missions and share the primary mission of improving the health of the populations served.

The mission of YNHHSC is to benefit, uphold and promote the welfare, programs and activities of YNHH and other affiliates and to benefit the communities served by the system. The SCHS vision is to be a regional, economically viable, integrated healthcare delivery system which excels on the basis of cost effectiveness, customer satisfaction, documentable quality and compassion.

The proposed YNHHSC/SCHS affiliation allows both organizations to establish a delivery system that offers broad, geographic coverage. This relationship is anticipated to strengthen the individual providers and enhance managed care contracting and patient preference.

Long range plans recognize that the organization and financing of healthcare has changed. In order to carry out the missions, the institutions must become increasingly efficient and proactively enhance quality, improve access and control costs of care. The proposed affiliation will support these activities to further the institutions' missions and long range plans.

32. *Please provide a copy of the long range plan for the proposed merged entity. If a long range plan for the proposed merged entity has not been completed, please indicate the date on which this plan is expected to be completed.*

Not applicable. This is not a merger.

33. *In what way will the proposed merger affect the interests of consumers and payers of health care services based on the merger proposal's contribution to quality, accessibility and cost effectiveness?*

Please refer to the answers to questions #26 and #27.

34. *Discuss whether the proposed merger will result in the elimination of any unnecessary duplication of services.*

Not applicable. There are no unnecessary duplications due to the distinct nature of the markets served independently by SCHS and YNHHS.

35. *In what way will the proposed merger affect the technical, financial and managerial efficiency and expertise of the staff at each Hospital?*

As the combined system begins to operate, system members, including affiliated organizations, will benefit from the voluntary sharing of expertise and non-clinical best practices. In addition, as discussed before, it is expected that there are certain areas in which efficiency and efficacy can be enhanced as a result of this shared knowledge.

36. *Describe any applied research or educational programs that would be developed or affected as a result of the proposed merger.*

The only changes currently planned are the integration of the general surgery residency program and the initiation of a combined program in Emergency Medicine. Specific aspects of the relationship are cited in the System Affiliation Agreement by and between YNHHS and SCHS. Shared information between the two institutions, facilitated by the affiliation, will inevitably enhance both provider education and

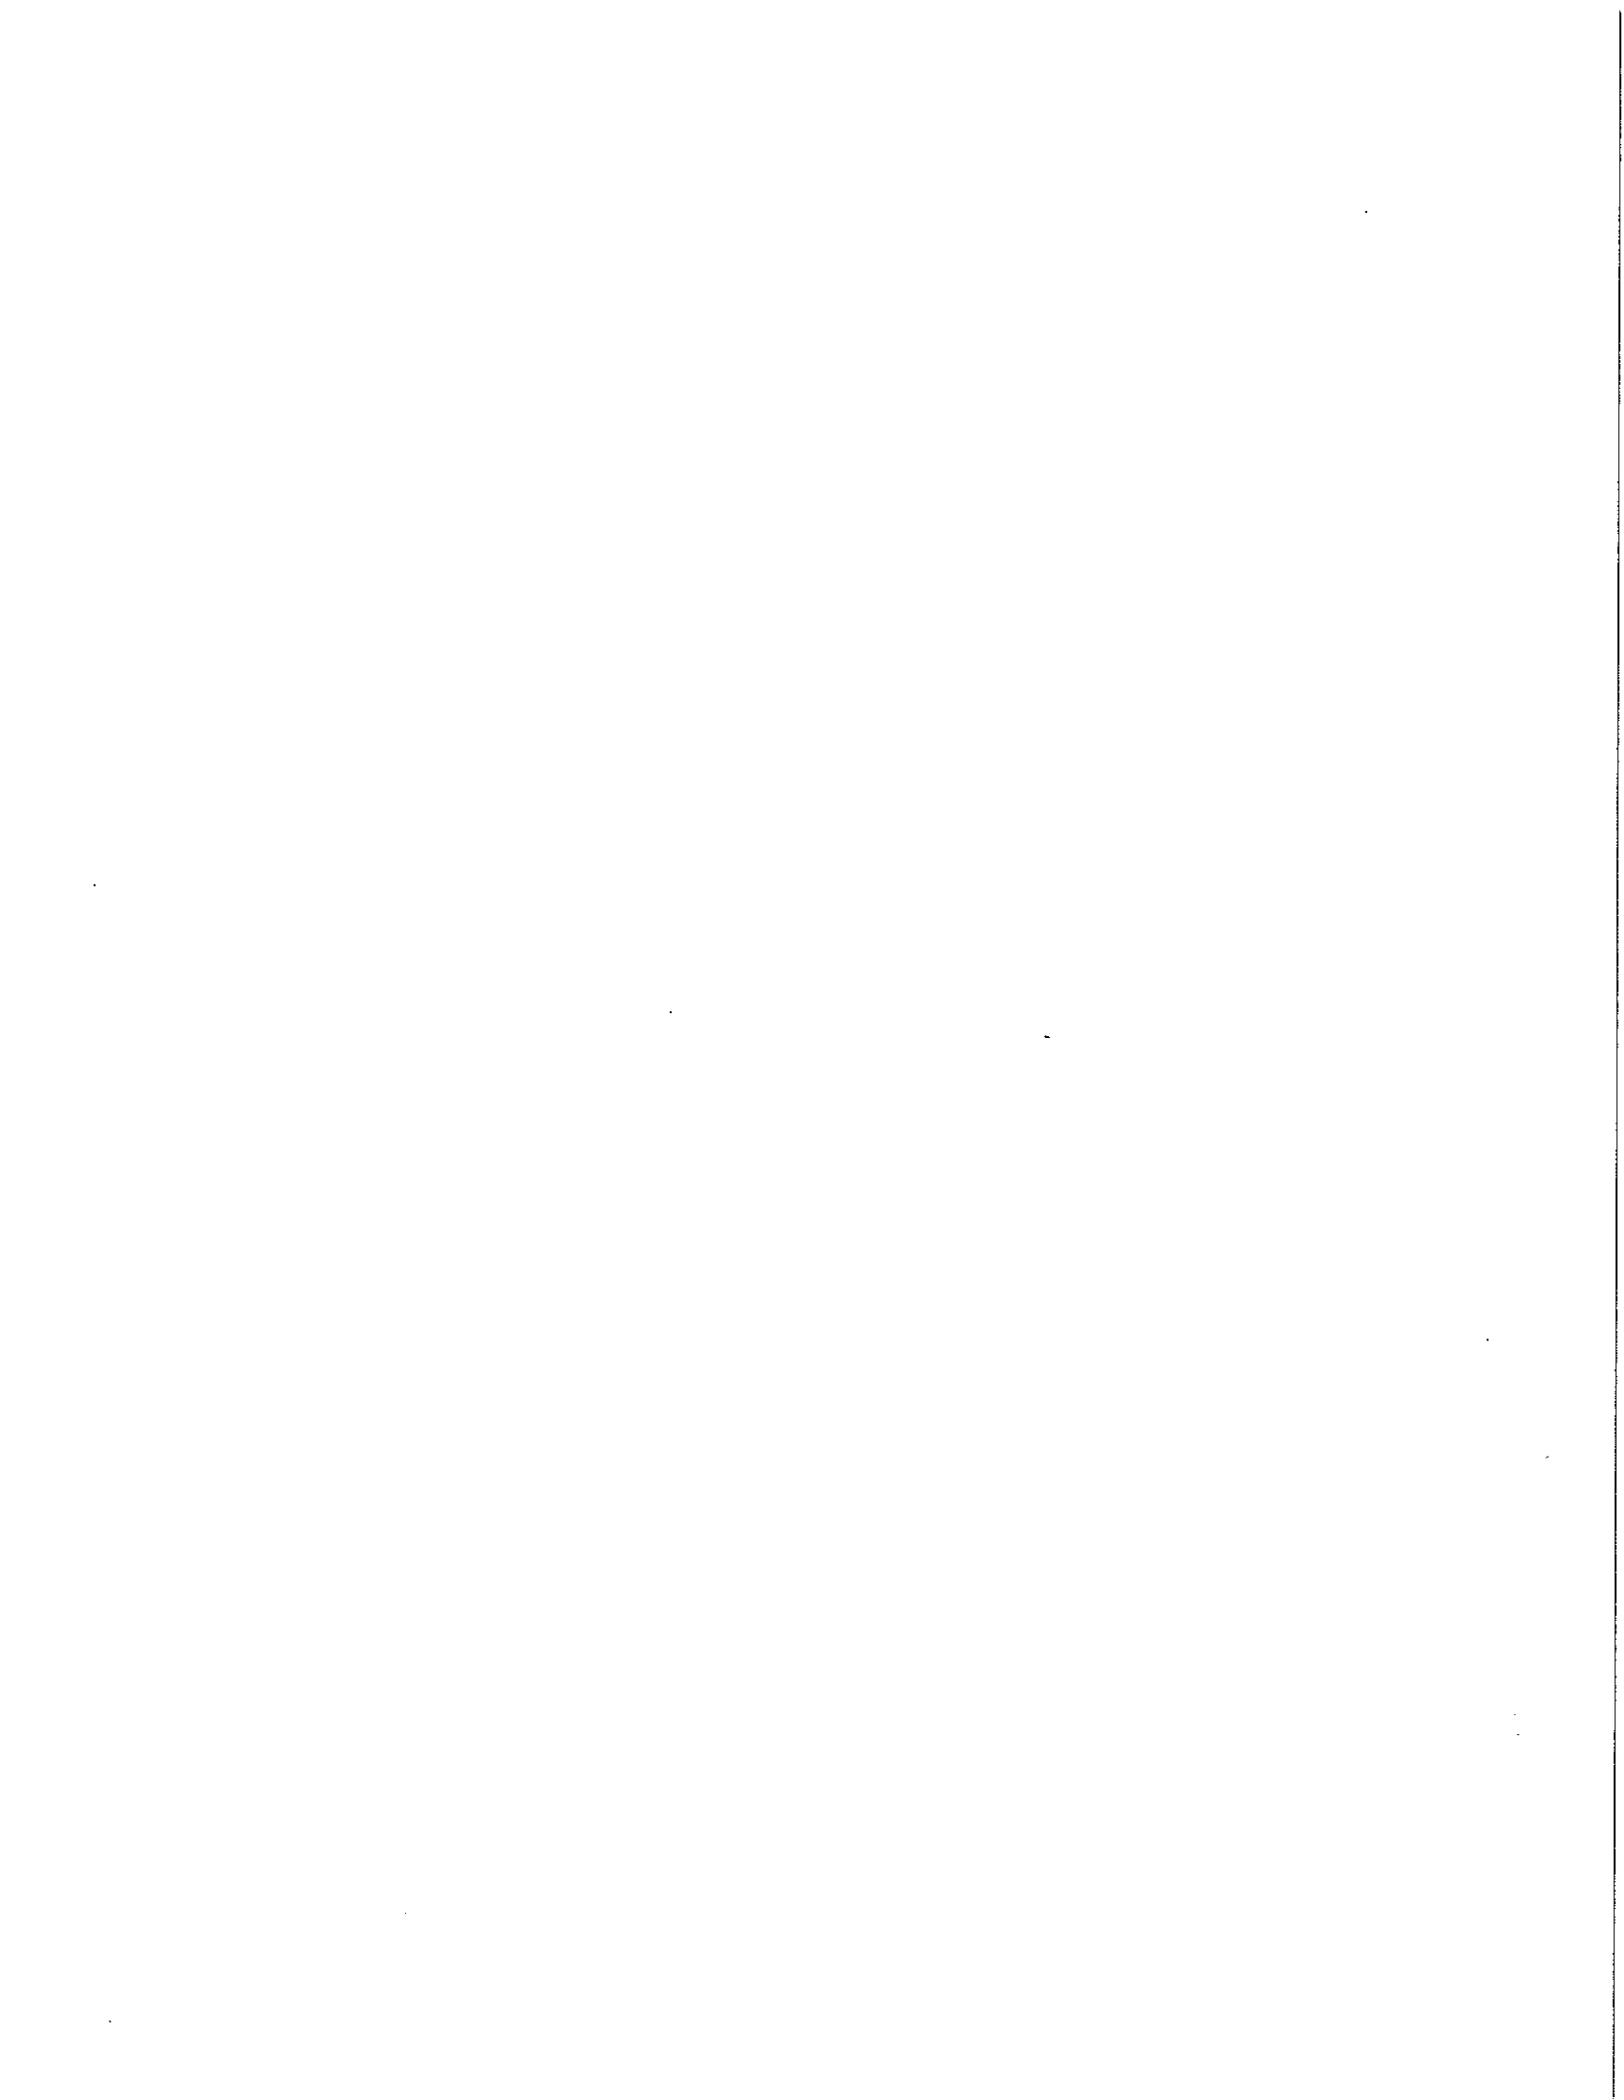

research endeavors. The combined impact of this information transfer will be to improve the quality of care delivered at YNHH and BH as described in the answer to question #28. Future clinical trials and educational programs could be co-developed and made accessible to providers at both hospitals.

37. *Describe how the proposed merger would impact the patient-physician mix of each Hospital.*

The proposed affiliation will not affect the current patient-physician mix at either facility.

38. *Describe any improvements in productivity and cost containment each Hospital would make as a result of the proposed merger.*

Please refer to the answers to questions #22 and #23.

**BYLAWS OF
SOUTHERN CONNECTICUT HEALTH SYSTEM, INC.
(THE "CORPORATION")**

ARTICLE I

OFFICES

Section 1.1 - Principal Office. The principal office of the Corporation shall be at such place in the United States as the Board of Directors shall from time to time designate.

Section 1.2 - Additional Offices. The Corporation may have such additional offices, either within or without the United States, as the Board of Directors may from time to time designate or the business of the Corporation may require.

ARTICLE II

BOARD OF DIRECTORS

Section 2.1 - General Powers. The activities, property and affairs of the Corporation shall be managed by the Board of Directors, which shall exercise all of the powers of the Corporation under the Connecticut Nonstock Corporation Act, the Certificate of Incorporation, and these Bylaws as each may be amended from time to time.

Section 2.2 - Number of Directors and Qualification. The Board of Directors shall consist of not less than ten and not more than twenty persons, which number shall be fixed from time to time by the Board of Directors. At each annual meeting of the Board of Directors, the directors shall be elected by the then Board of Directors to take office immediately following such annual meeting. The Board of Directors shall be elected from among members of the Bridgeport Hospital Board of Directors elected at its last prior annual meeting.

A person who is an ex-officio director with vote of the Bridgeport Hospital Board of Directors and who is elected to the Board of Directors shall be an ex-officio director with vote of the Board of Directors and shall be considered a director for all purposes of these Bylaws except he shall not be subject to the age or term of office provisions.

The Board of Directors also may elect non-voting directors. Non-voting directors shall receive notice of, and shall be entitled to attend and speak at, meetings of the Board of Directors, and shall be eligible to serve as voting members of committees. Such non-voting directors shall be subject to the age and term of office provisions of these Bylaws, but shall not count toward quorum requirements, shall not have voting rights, shall not be considered in calculating the number of directorships and shall not be considered directors for any other purpose under these Bylaws.

Except as otherwise provided in this Section 2.2, a director who has attained age 70 shall be ineligible to continue to serve as a director after the annual meeting of the Board of Directors next following the date the director attains age 70.

Section 2.3 - Terms of Directors. Directors shall hold office for a term of four years or until their successor has been elected and qualified, except that a director may be elected for a term of less than four years as provided in Section 2.12 or if the Board of Directors deems it necessary to serve the objective that the terms of office of approximately one-fourth of all directors shall expire at each annual meeting. A director shall cease to be in office upon his death, resignation or removal. At each annual meeting, the Board of Directors shall elect directors to succeed the directors whose terms are then expiring and to fill any new directorships fixed by the Board of Directors. Such directors shall take office immediately following such annual meeting. No director shall serve more than two successive terms of three or more years. Not included in this limitation shall be a term of less than three years due to effectuating staggered terms or due to a director completing a term due to the death, removal or resignation of another director. Also not included in this limitation shall be any term served prior to March 30, 1995. A director who has served two successive terms of three or more years may again serve as a director following the expiration of a period of not less than one year during which time such individual does not serve as a director.

Directors ex-officio shall hold office for a term of one year or until their successors are elected and qualified or until they no longer are serving in the positions that entitle such persons to such ex-officio directorships.

Non-voting directors shall be elected for a term of four years or until their successors are elected and qualified and shall be subject to the terms of office provisions described in these Bylaws.

Section 2.4 - Annual Meeting. The annual meeting of the Board of Directors shall be held each year on such date, at such time, and at such place as the Board of Directors may determine. At such meeting, the Board of Directors shall elect the officers, directors, non-voting directors and Board of Associates of the Corporation and shall transact such other business relating to the affairs of the Corporation as may come before the meeting. No notice need be given of an annual meeting of the Board of Directors. There shall be no voting by proxy.

Section 2.5 - Regular and Special Meetings. Regular meetings of the Board of Directors shall be held at such times as the Board of Directors shall from time to time determine. Special meetings of the Board of Directors may be called at any time by the Chairman, the Chief Executive Officer, or upon the written request of a majority of the directors then in office. Meetings of the Board of Directors may be held within or without the State of Connecticut and shall be held at such place as shall be designated in the notice of the meeting. Except as otherwise provided in these Bylaws, two days' written or oral notice shall be given of each special meeting of the Board of Directors. No notice need be given of a regular meeting of the Board of Directors. Neither the business to be transacted at, nor the purpose of, any regular or special meeting of the Board of

Directors need be specified in any notice or waiver of notice of such meeting unless otherwise required by law or specified herein. There shall be no voting by proxy.

Section 2.6 - Quorum. A majority of the directors shall constitute a quorum at all meetings of the Board of Directors.

Section 2.7 - Vote Required for Action. The act of a majority of the directors present at a meeting at which a quorum is present shall be the act of the Board of Directors, unless the act of a greater number is required by these Bylaws or by law.

Section 2.8 - Action Without Meeting. If all the directors severally or collectively consent in writing to any action taken or to be taken by the Corporation, the action shall be as valid as though it had been authorized at a meeting of the Board of Directors, and such written consent or consents shall be filed in the corporate minute book.

Section 2.9 - Participation by Conference. A director may participate in a meeting of the Board of Directors by means of a conference telephone or similar communications equipment enabling all directors participating in the meeting to hear one another, and such participation in a meeting shall constitute presence in person at such meeting.

Section 2.10 - Resignation of Directors. Any director and any non-voting director may resign at any time by giving written notice to the Board of Directors or to the Chairman, the President or the Secretary. The resignation shall take effect at the time specified in the notice and, unless otherwise specified in it, acceptance of the resignation shall not be necessary to make it effective.

Section 2.11 - Removal of Directors. Any director and any non-voting director may be removed from office with or without cause at any time, regardless of the term for which such director may have been elected, by the affirmative vote of a majority of all of the directors in office at that time at any regular, annual, or special meeting.

Section 2.12 - Vacancies. In case of any vacancy in the Board of Directors by reason of the death, resignation, or removal of any director, the remaining directors, though less than a quorum, by the concurring vote of a majority of such remaining directors at any meeting of the Board of Directors, may fill such vacancy for the remaining term of such directorship or, for any new or unoccupied directorships, may elect directors to serve until the next annual meeting. Any director so elected must be a member of the Board of Directors of Bridgeport Hospital.

ARTICLE III

COMMITTEES

Section 3.1 - Establishment of Committees. The Board of Directors may, from time to time, establish such committees of the Board of Directors with such responsibilities as the Board of Directors shall determine. All committees shall act in an advisory capacity only and shall have no power or authority to bind the Corporation. Committees of the Board of Directors shall be standing and special. The standing committees shall include the Audit Committee, Development Committee, Director Affairs Committee, Finance Committee, Investment Committee, and Management Affairs Committee.

Section 3.2 - Appointment of Members. Except as otherwise provided in these Bylaws, all committee chairmen and committee members shall be appointed from among the directors, the Board of Associates or others by the Chairman of the Board of Directors. The Chairman of the Board of Directors may increase or decrease the number of members on a committee, may fill vacancies on a committee and may remove, with or without cause, any chairman or member of a committee.

Section 3.3 - Quorum; Vote Required for Action. A majority of the members of any committee shall constitute a quorum for the transaction of business at all meetings of the committee. The act of a majority of the members of any committee present at a meeting at which a quorum is present shall be the act of such committee, unless the act of a greater number is required by these Bylaws, by resolution of the Board of Directors or by law.

Section 3.4 - Meetings of Committees. Except as otherwise provided in these Bylaws, each committee shall establish its own rules and procedures and shall fix the time and place of its meetings. Each committee shall keep minutes of its meetings which shall be made available to the Board of Directors upon request.

Section 3.5 - Audit Committee. The Audit Committee shall cause an annual audit to be made of the books, accounts and records of the Corporation by certified public accountants under the supervision of the Audit Committee. The Audit Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 3.6 - Development Committee. The Development Committee shall recommend policies and procedures for the development, growth, and management of the endowment funds of the Corporation and shall consider funding requests from affiliates. The Development Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 3.7 - Director Affairs Committee. The Director Affairs Committee shall develop criteria for membership on the Board of Directors and its committees and shall consider the eligibility requirements and qualification specified in these Bylaws, as well as the interest and participation in Corporation matters of the individuals under consideration. It shall nominate for election members of the Board of Directors and Board of Associates and shall assist in the selection of individuals for committee assignments. The Director Affairs Committee also shall review the performance of directors and recommend amendments to the Corporation's bylaws and shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 3.8 - Finance Committee. The Finance Committee shall review and recommend to the Board of Directors annual operating and capital budgets for the Corporation and shall monitor and oversee the financial performance of the Corporation. The Finance Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 3.9 - Investment Committee. The Investment Committee shall recommend policies and procedures for the investment of all funds of the Corporation and shall monitor and evaluate the performance of any investment managers charged with the investment of funds of the Corporation. The Investment Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide. The Chief Executive Officer and the Treasurer shall be members of the Investment Committee.

Section 3.10 - Management Affairs Committee. The Management Affairs Committee shall establish performance goals for the Chief Executive Officer and shall conduct annual evaluations of his performance. It shall also review and recommend to the Board of Directors human resource, fringe benefit, and compensation policies and monitor compliance therewith and shall act in an advisory capacity to the Chief Executive Officer. The Management Affairs Committee also shall perform such other functions as a duly adopted resolution of the Board of Director may provide.

ARTICLE IV

OFFICERS

Section 4.1 - Principal and Subordinate Officers. The principal officers of the Corporation shall be Chairman of the Board, Vice Chairmen of the Board, Chief Executive Officer, President, Secretary, and Treasurer. The subordinate officers shall consist of such other officers, assistant officers and agents as may be deemed necessary and as are elected or appointed by the Board of Directors, the Chief Executive Officer or as may be chosen in such other manner as may be prescribed or permitted by these Bylaws. Any two or more offices may be held by the same person provided that the same individual shall not simultaneously occupy the offices of (i) Chief Executive Officer or President and (ii) Secretary. The Chairman of the Board and Vice Chairmen shall be selected from among members of the Board of Directors.

Section 4.2 - General Authority and Duties. All officers and agents of the Corporation shall have such authority and perform such duties in the management of the Corporation as may be provided in these Bylaws or as may be determined by resolution of the Board of Directors not inconsistent with these Bylaws.

Section 4.3 - Election, Term of Office, and Qualifications. The principal officers shall be chosen annually by the Board of Directors at its annual meeting or as soon thereafter as conveniently possible. Subordinate officers may be elected or appointed by the Board of Directors or may be appointed by the Chief Executive Officer or any other principal officer to whom the Chairman of the Board of Directors shall delegate the authority of appointment. Each officer shall hold office until his successor is chosen and qualified, or until his death, his resignation, or his removal, whichever event shall first occur. Election or appointment of an officer or agent shall not of itself create any contractual rights. An individual may not serve in the office of Chairman or Vice Chairman for more than four consecutive one year terms. Not included in this limitation shall be any term served prior to March 30, 1995 or any partial term served to fill a vacancy.

Section 4.4 - Removal. Any officer or agent may be removed by the Board of Directors whenever in their judgment the best interests of the Corporation will be served by so doing. Any officer or agent may also be removed by the Chief Executive Officer, or by any other principal officer having authority to designate or appoint the officer or agent to be removed, with or without cause. Any removal shall be without prejudice to the contract rights, if any, of the person so removed.

Section 4.5 - Resignations. Any officer or agent may resign at any time by giving written notice to the Board of Directors or to the Chairman, the Chief Executive Officer or the Secretary. The resignation shall take effect at the time specified in the notice and, unless otherwise specified in it, acceptance of the resignation shall not be necessary to make it effective.

Section 4.6 - Vacancies. Any vacancy in any office occurring by reason of death, resignation, removal, or any other cause shall be filled for the unexpired portion of the term in the manner prescribed in these Bylaws for election or appointment to the office.

Section 4.7 - Chairman of the Board. The Chairman of the Board shall preside at the annual meeting of the Corporation and at all meetings of the Board of Directors, shall appoint members of all committees and the chairmen thereof, and shall perform such duties as the Board of Directors may from time to time assign to the Chairman of the Board and such other duties as are usual to this office.

Section 4.8 - Vice Chairmen of the Board. The Vice Chairmen of the Board shall perform the duties of the Chairman of the Board in the event of the Chairman's absence or disability and shall assist the Chairman of the Board in such duties as the Chairman of the Board may from time to time assign to the Vice Chairmen of the Board.

Section 4.9 - Chief Executive Officer. The Chief Executive Officer of the Corporation shall be the President, unless otherwise designated by the Board of Directors. The Chief Executive Officer shall exercise general supervision of the business and affairs of the Corporation and over its officers and employees and shall be responsible for seeing that the resolutions and actions of the Board of Directors are carried into effect, and for reporting to the Board of Directors on the conduct and management of the affairs of the Corporation. The Chief Executive Officer shall have the authority to appoint and remove employees of the Corporation, including management level officers, and may delegate to such officers and employees such authority as he deems appropriate provided, however, he shall be responsible for their actions.

Section 4.10 - President. The President shall have such duties and responsibilities as are assigned to him by the Chief Executive Officer and shall report and be responsible to the Chief Executive Officer.

Section 4.11 - Treasurer. The Treasurer shall have supervision over the receipt and custody of the Corporation's funds, and shall cause to be kept correct and complete books and records of account, including full and accurate accounts of receipts and disbursements in books belonging to the Corporation, and in general shall perform all the duties incident to the office of Treasurer and such other duties as may be assigned to him by the Board of Directors, the Chairman of the Board of Directors, or the Chief Executive Officer. The Treasurer shall render to the Chairman of the Board, the Chief Executive Officer and the Board of Directors promptly upon its completion an annual report of the financial condition and operation of the Corporation prepared and certified by the independent certified auditors appointed by the Board of Directors.

Section 4.12 - Secretary. The Secretary shall keep minutes of the proceedings of the Board of Directors shall give or cause to be given all notices in accordance with the provisions of these Bylaws or as required by law; and shall be custodian of the corporate records and of the seal of the Corporation. The Secretary also shall perform all duties incident to the office of Secretary and such other duties as may be assigned to him by the Board of Directors, the Chairman of the Board of Directors, or the Chief Executive Officer.

ARTICLE V

BOARD OF ASSOCIATES

Section 5.1 - Qualifications and Responsibilities. The Board of Associates shall be comprised of individuals who have given special service to the Corporation or its affiliates or who are otherwise deemed by the Board of Directors worthy and deserving to serve as members of the Board of Associates. The Board of Associates shall advise the Board of Directors and management on the activities, property and affairs of the Corporation. The Board of Associates shall be elected annually for four year terms by the Board of Directors at its annual meeting unless the Board of Directors deems it appropriate to serve the objective that the terms of approximately one-fourth of

all Associates shall expire at each annual meeting. There shall be no limit on the number of members of the Board of Associates or on their term of service but it is intended that the Board of Associates shall be comprised of individuals who have the experience, knowledge, and interest to provide the Corporation and its Board of Directors and management with advice and counsel. Members of the Board of Associates may be appointed by the Chairman of the Board to serve on committees of the Board of Directors.

Section 5.2 - Honorary Associates. The Board of Directors may elect for one year terms individuals chosen in recognition of their personal or professional achievements outside the Corporation and its affiliates, particularly as they relate to accomplishments in the general field of health, to the status of Honorary Associates. Past service on the Board of Directors shall not be a requirement. Honorary Associates shall receive notice and may attend all meetings of the Board of Associates, and may serve as voting members on committees of the Board of Directors.

Section 5.3 - Meetings. Meetings of the Board of Associates shall be held on the call of the Board of Directors or the Chairman of the Board who shall preside at all meetings. Meetings may be held within or without the State of Connecticut and shall be held at such place as shall be designated in the notice of meeting. There shall be two days written notice of all meetings.

ARTICLE VI

INDEMNIFICATION OF CORPORATION DIRECTORS, BOARD OF ASSOCIATES, OFFICERS, EMPLOYEES AND AGENTS

Section 6.1 - Rights of Indemnification. Directors, Board of Associates, officers, employees, and agents shall have the rights of indemnification provided by Section 33-454a of the Connecticut General Statutes.

Section 6.2 - Payment of Expenses in Advance. Expenses which may be indemnifiable under the provisions of Section 33-454a of the Connecticut General Statutes, incurred in defending a proceeding, may be paid by the Corporation in advance of the final disposition of such proceeding when authorized by the Board of Directors upon agreement, by or on behalf of the individual entitled to be indemnified, to repay such amount if he is later found not entitled to be indemnified by the Corporation as authorized under the Bylaws.

ARTICLE VII**MISCELLANEOUS PROVISIONS**

Section 7.1 - Amendment. These Bylaws may be amended or repealed, and new Bylaws may be adopted, at any regular, annual or special meeting of the Board of Directors by the affirmative vote of a majority of all directors. Any notice of a meeting of the Board of Directors at which these Bylaws are to be amended or repealed, or new Bylaws are to be adopted, shall be given at least two days prior to such meeting and shall include notice of such proposed action.

Section 7.2 - Fiscal Year. The fiscal year of the Corporation shall end on September 30 in each year unless the Board of Directors shall determine otherwise.

Section 7.3 - Seal. The seal of the Corporation shall be circular in form and shall bear the name of the Corporation and shall be in such form as the Board of Directors may determine.

Section 7.4 - Execution of Negotiable Instruments. All checks, drafts, notes, bonds, bills of exchange and orders for the payment of money shall be signed by the President or such officer or officers of the Corporation as the Board of Directors shall specify from time to time. The Board of Directors may authorize the use of facsimile signatures of any officer or employee in lieu of manual signatures.

Section 7.5 - Execution of Deeds and Contracts. Subject to the general directions of the Board of Directors, all deeds and mortgages made by the Corporation and all other written contracts, agreements and undertakings to which the Corporation shall be a party shall be executed in its name by the Chief Executive Officer or such other officer as may be specified by the Board of Directors or authorized by the Chief Executive Officer and, when requested, the Secretary shall attest to such signatures and affix the corporate seal to such instruments.

Section 7.6 - Conflict of Interest. If any director or member of a director's immediate family has an interest in any contract or transaction involving the Corporation, the provisions of Section 33-457 of the Connecticut General Statutes shall determine the obligation of a director to disclose such interest to the Board of Directors and the legal effect of such contract or transaction.

Section 7.7 - Connecticut General Statutes. Any reference herein to a section of the Connecticut General Statutes shall include reference to any amendment of such section or any successor statute.

Section 7.8 - Pronouns. References herein to the masculine shall include references to the feminine, references to the singular shall include references to the plural and references to the plural shall include references to the singular, where the context of the language involved so permits or requires.

BYLAWS
OF
BRIDGEPORT HOSPITAL FOUNDATION, INC.
(The "Foundation")

ARTICLE I

OFFICES

Section 1.1 Principal Office. The principal office of the Foundation shall be at such place in the United States as the Board of Directors shall from time to time designate.

Section 1.2 Additional Offices. The Foundation may have such additional offices, either within or without the United States, as the Board of Directors may from time to time designate or the business of the Foundation may require.

ARTICLE II

MEMBERSHIP

Section 2.1 Sole Member. The Foundation shall have but one member, Southern Connecticut Health System, Inc., which shall have the right to elect the Board of Directors of the Foundation in accordance with these Bylaws, and shall have all of the other rights, powers and privileges usually or by law accorded to the members of a nonstock nonprofit corporation and not conferred thereby or by the Certificate of Incorporation or Bylaws upon the Board of Directors of the Foundation.

Section 2.2 Specific Rights, Powers and Privileges. In addition to such other rights, powers and privileges as it may have by law, Southern Connecticut Health System, Inc., as the Foundation's sole member, shall have the following rights, powers and privileges:

- A. To approve the long range development plans, annual operating and capital budgets, and plans that materially affect the growth, operations and development of the Foundation.
- B. To approve the Foundation's business plan, its annual budget for fund raising programs and the conduct of all special giving programs.

- C. To elect and remove the members of the Board of Directors and non-voting directors in accordance with the provision of these Bylaws.
- D. To elect and remove the officers of the Foundation in accordance with the provision of these Bylaws.
- E. To vote upon all matters on which members are entitled to vote under the Nonstock Corporation Act of the State of Connecticut.
- F. To act on any other matters on which action by members is required or permitted by these Bylaws.

Section 2.3 Meetings of the Member. The annual meeting of the member shall be held on such day and at such time and place as may be designated by the Board of Directors or the Chairman of the Board of Directors for the purposes set forth in Sections 2.1 and 2.2 herein and for the transaction of any other business as may properly come before such meeting. Regular meetings of the member shall be held at such times as the Board of Directors shall from time to time determine. Special meetings of the member may be called at any time by the Board of Directors, the Chairman of the Board of Directors, the Chief Executive Officer or the member. Each such request for a special meeting shall state the purposes for which the requested meeting is to be called. The member shall cast one vote on each matter submitted to a vote at each regular, annual and special meeting. Except as otherwise provided, any action required to be, or which may be, taken at any regular, annual or special meeting of the member may be taken without a meeting, without prior notice and without a vote, if a consent in writing, setting forth the action so taken, shall be signed by the member.

Section 2.4 Notice of Meeting. A notice of each meeting of the member shall be given in writing to the member not less than seven days or more than fifty days before the date of the meeting. Each notice shall state the place, day and hour of the meeting. The general purpose for which a special meeting is called shall be stated in the notice thereof, and no other business shall be transacted at the meeting.

Section 2.5 Waiver of Notice. Notice of any meeting of the member may be waived in writing by the member.

ARTICLE III

BOARD OF DIRECTORS

Section 3.1 General Powers. Subject to the rights, powers and privileges accorded to the member by law, the Certificate of Incorporation or these Bylaws, the activities, property and affairs of the Foundation shall be managed by the Board of Directors, which shall exercise all of the powers and responsibilities conferred upon the Board of Directors by the Connecticut

Nonstock Corporation Act, the Certificate of Incorporation and these Bylaws as each may be amended from time to time.

Section 3.2 Number of Directors and Qualification. The Board of Directors shall consist of not less than ten and not more than twenty persons, which number shall be fixed from time to time by the member. At each annual meeting of the member, the directors shall be elected by the member to take office immediately following such annual meeting.

A person who is an ex-officio director with vote of the Bridgeport Hospital Board of Directors and who is elected to the Board of Directors shall be an ex-officio director with vote of the Board of Directors and shall be considered a director for all purposes of these Bylaws except he shall not be subject to the age or term of office provisions.

The member also may elect non-voting directors. Non-voting directors shall receive notice of, and shall be entitled to attend and speak at, meetings of the Board of Directors and shall be eligible to serve as voting members of committees. Such non-voting directors shall be subject to the age and term of office provisions of these Bylaws, but shall not count toward quorum requirements, shall not have voting rights, shall not be considered in calculating the number of directorships and shall not be considered directors for any other purpose under these Bylaws.

Except as otherwise provided in this Section 3.2, a director who has attained age 70 shall be ineligible to continue to serve as a director after the annual meeting of the Board of Directors next following the date the director attains age 70.

Section 3.3 Terms of Directors. Directors shall hold office for a term of four years or until their successor has been elected and qualified, except that a director may be elected for a term of less than four years as provided in Section 3.12 or if the member deems it necessary to serve the objective that the terms of office of approximately one-fourth of all directors shall expire at each annual meeting. A director shall cease to be in office upon his death, resignation or removal. At each annual meeting, the member shall elect directors to succeed the directors whose terms are then expiring and to fill any new directorships fixed by the member. Such directors shall take office immediately following such annual meeting. No director shall serve more than two successive terms of three or more years. Not included in this limitation shall be a term of less than three years due to effectuating staggered terms or due to a director completing a term due to the death, removal or resignation of another director. Also not included in this limitation shall be any term served prior to March 30, 1995. A director who has served two successive terms of three or more years may again serve as a director following the expiration of a period of not less than one year during which time such individual does not serve as a director.

Directors ex-officio shall hold office for a term of one year or until their successors are elected and qualified or until they no longer are serving in the positions that entitle such persons to such ex-officio directorships.

Non-voting directors shall be elected for a term of four years or until their successors are elected and qualified and shall be subject to the terms of office provisions described in these Bylaws.

Section 3.4 Annual Meeting. The annual meeting of the Board of Directors shall be held each year on such date, at such time, and at such place as the Board of Directors may determine. At such meeting, the Board of Directors shall transact such business relating to the affairs of the Foundation as may come before the meeting. No notice need be given of an annual meeting of the Board of Directors. There shall be no voting by proxy.

Section 3.5 Regular and Special Meetings. Regular meetings of the Board of Directors shall be held at such times as the Board of Directors shall from time to time determine. Special meetings of the Board of Directors may be called at any time by the Chairman, the Chief Executive Officer, or upon the written request of a majority of the directors then in office. Meetings of the Board of Directors may be held within or without the State of Connecticut and shall be held at such place as shall be designated in the notice of the meeting. Except as otherwise provided in these Bylaws, two days' written or oral notice shall be given of each special meeting of the Board of Directors. No notice need be given of a regular meeting of the Board of Directors. Neither the business to be transacted at, nor the purpose of, any regular or special meeting of the Board of Directors need be specified in any notice or waiver of notice of such meeting unless otherwise required by law or specified herein. There shall be no voting by proxy.

Section 3.6 Quorum. A majority of the directors shall constitute a quorum at all meetings of the Board of Directors.

Section 3.7 Vote Required for Action. The act of a majority of the directors present at a meeting at which a quorum is present shall be the act of the Board of Directors, unless the act of a greater number is required by these Bylaws or by law.

Section 3.8 Action Without Meeting. If all the directors severally or collectively consent in writing to any action taken or to be taken by the Foundation, the action shall be as valid as though it had been authorized at a meeting of the Board of Directors, and such written consent or consents shall be filed in the corporate minute book.

Section 3.9 Participation by Conference. A director may participate in a meeting of the Board of Directors by means of a conference telephone or similar communications equipment enabling all directors participating in the meeting to hear one another, and such participation in a meeting shall constitute presence in person at such meeting.

Section 3.10 Resignation of Directors. Any director and any non-voting director may resign at any time by giving written notice to the Board of Directors, the Chairman, the Chief Executive Officer or the Secretary. The resignation shall take effect at the time specified in the

notice and, unless otherwise specified in it, acceptance of the resignation shall not be necessary to make it effective.

Section 3.11 Removal of Directors. Any director and any non-voting director may be removed from office, with or without cause, at any time, regardless of the term for which such director may have been elected, by the member at any regular, annual or special meeting.

Section 3.12 Vacancies. In case of any vacancy in the Board of Directors by reason of the death, resignation, or removal of any director, the member may fill such vacancy for the remaining term of such directorship or, for any new or unoccupied directorships, may elect director to serve until the next annual meeting.

ARTICLE IV

COMMITTEES

Section 4.1 Establishment of Committees. The Board of Directors may, from time to time, establish such committees of the Board of Directors with such responsibilities as the Board of Directors shall determine. All committees shall act in an advisory capacity only and shall have no power or authority to bind the Foundation. Committees of the Board of Directors shall be standing and special. The standing committees shall include the Audit Committee, Development Committee, Director Affairs Committee, Finance Committee, Investment Committee, and Management Affairs Committee.

Section 4.2 Appointment of Members. Except as otherwise provided in these Bylaws, all committee chairmen and committee members shall be appointed from among the directors or others by the Chairman of the Board of Directors. The Chairman of the Board of Directors may increase or decrease the number of members on a committee, may fill vacancies on a committee and may remove, with or without cause, any chairman or member of a committee.

Section 4.3 Quorum; Vote Required for Action. A majority of the members of any committee shall constitute a quorum for the transaction of business at all meetings of the committee. The act of a majority of the members of any committee present at a meeting at which a quorum is present shall be the act of such committee, unless the act of a greater number is required by these Bylaws, by resolution of the Board of Directors or by law.

Section 4.4 Meetings of Committees. Except as otherwise provided in these Bylaws, each committee shall establish its own rules and procedures and shall fix the time and place of its meetings. Each committee shall keep minutes of its meetings which shall be made available to the Board of Directors upon request.

Section 4.5 Audit Committee. The Audit Committee shall cause an annual audit to be made of the books, accounts and records of the Foundation by certified public accountants under the supervision of the Audit Committee. The Audit Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 4.6 Development Committee. The Development Committee shall recommend policies and procedures for the development, growth, and management of the endowment funds of the Foundation and shall consider funding requests from affiliates. The Development Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 4.7 Director Affairs Committee. The Director Affairs Committee shall develop criteria for membership on the Board of Directors and its committees and shall consider the eligibility requirements and qualification specified in these Bylaws, as well as the interest and participation in Foundation matters of the individuals under consideration. It shall nominate for election members of the Board of Directors and shall assist in the selection of individuals for committee assignments. The Director Affairs Committee also shall review the performance of directors and recommend amendments to the Foundation's Bylaws and shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 4.8 Finance Committee. The Finance Committee shall review and recommend to the Board of Directors annual operating and capital budgets for the Foundation and shall monitor and oversee the financial performance of the Foundation. The Finance Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 4.9 Investment Committee. The Investment Committee shall recommend policies and procedures for the investment of all funds of the Foundation and shall monitor and evaluate the performance of any investment managers charged with the investment of funds of the Foundation. The Investment Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide. The Chief Executive Officer and the Treasurer shall be members of the Investment Committee.

Section 4.10 Management Affairs Committee. The Management Affairs Committee shall establish performance goals for the Chief Executive Officer and President and shall conduct annual evaluations of their performance. It shall also review and recommend to the Board of Directors human resource, fringe benefit, and compensation policies and shall monitor compliance therewith and shall act in an advisory capacity to the Chief Executive Officer. The Management Affairs Committee also shall perform such other functions as a duly adopted resolution of the Board of Director may provide.

ARTICLE V

OFFICERS

Section 5.1 Principal and Subordinate Officers. The principal officers of the Foundation shall be Chairman of the Board, Vice Chairmen of the Board, Chief Executive Officer, President, Secretary, and Treasurer. The subordinate officers shall consist of such other officers, assistant officers and agents as may be deemed necessary and as are elected or appointed by the Board of Directors, the Chief Executive Officer or as may be chosen in such other manner as may be prescribed or permitted by these Bylaws. Any two or more offices may be held by the same person provided that the same individual shall not simultaneously occupy the offices of (i) Chief Executive Officer or President and (ii) Secretary. The Chairman of the Board and Vice Chairmen shall be selected from among members of the Board of Directors.

Section 5.2 General Authority and Duties. All officers and agents of the Foundation shall have such authority and perform such duties in the management of the Foundation as may be provided in these bylaws or as may be determined by resolution of the Board of Directors not inconsistent with these Bylaws.

Section 5.3 Election, Term of Office, and Qualifications. The principal officers shall be chosen annually by the member at its annual meeting or as soon thereafter as conveniently possible. Subordinate officers may be elected or appointed by the Board of Directors or may be appointed by the Chief Executive Officer or any other principal officer to whom the Chairman of the Board of Directors shall delegate the authority of appointment. Each officer shall hold office until his successor is chosen and qualified, or until his death, his resignation, or his removal, whichever event shall first occur. Election or appointment of an officer or agent shall not of itself create any contractual rights. An individual may not serve in the office of Chairman or Vice Chairman for more than four consecutive one year terms. Not included in this limitation shall be any term served prior to March 30, 1995 or any partial term served to fill a vacancy.

Section 5.4 Removal. Any officer or agent may be removed by the member whenever in its judgment the best interests of the Foundation will be served by so doing. Any subordinate officer or agent may also be removed by the Chief Executive Officer, or by any other principal officer having authority to designate or appoint the officer or agent to be removed, with or without cause. Any removal shall be without prejudice to the contract rights, if any, of the person so removed.

Section 5.5 Resignations. Any officer or agent may resign at any time by giving written notice to the Board of Directors or to the Chairman, the Chief Executive Officer or the Secretary. The resignation shall take effect at the time specified in the notice and, unless otherwise specified in it, acceptance of the resignation shall not be necessary to make it effective.

Section 5.6 Vacancies. Any vacancy in any office occurring by reason of death, resignation, removal, or any other cause shall be filled for the unexpired portion of the term in the manner prescribed in these Bylaws for election or appointment to the office.

Section 5.7 Chairman of the Board. The Chairman of the Board shall preside at the annual meeting of the Foundation and at all meetings of the Board of Directors, shall appoint members of all committees and the chairmen thereof, and shall perform such duties as the Board of Directors may from time to time assign to the Chairman of the Board and such other duties as are usual to this office.

Section 5.8 Vice Chairmen of the Board. The Vice Chairmen of the Board shall perform the duties of the Chairman of the Board in the event of the Chairman's absence or disability and shall assist the Chairman of the Board in such duties as the Chairman of the Board may from time to time assign to the Vice Chairmen of the Board.

Section 5.9 Chief Executive Officer. The Chief Executive Officer shall be responsible for seeing that the resolutions and actions of the Board of Directors are carried into effect, and for reporting to the Board of Directors on the conduct and management of the affairs of the Foundation.

Section 5.10 President. The President shall exercise general supervision of the business and affairs of the Corporation and over its officers and employees. The President shall have the authority to appoint and remove employees of the Corporation, including management level officers, and may delegate to such officers and employees such authority as he deems appropriate provided, however, he shall be responsible for their actions. The President also shall have such duties and responsibilities as are assigned to him by the Chief Executive Officer and shall report and be responsible to the Chief Executive Officer.

Section 5.11 Treasurer. The Treasurer shall have supervision over the receipt and custody of the Foundation's funds, and shall cause to be kept correct and complete books and records of account, including full and accurate accounts of receipts and disbursements in books belonging to the Foundation, and in general shall perform all the duties incident to the office of Treasurer and such other duties as may be assigned to him by the Board of Directors, the Chairman of the Board of Directors, or the Chief Executive Officer. The Treasurer shall render to the Chairman of the Board, the Chief Executive Officer and the Board of Directors promptly upon its completion an annual report of the financial condition and operation of the Foundation prepared and certified by the independent certified auditors appointed by the Board of Directors.

Section 5.12 Secretary. The Secretary shall keep minutes of the proceedings of the Board of Directors shall give or cause to be given all notices in accordance with the provisions of these Bylaws or as required by law; and shall be custodian of the corporate records and of the seal of the Foundation. The Secretary also shall perform all duties incident to the office of

Secretary and such other duties as may be assigned to him by the Board of Directors, the Chairman of the Board of Directors, or the Chief Executive Officer.

ARTICLE VI

INDEMNIFICATION OF FOUNDATION DIRECTORS, OFFICERS, EMPLOYEES AND AGENTS

Section 6.1 Rights of Indemnification. Directors, officers, employees, and agents shall have the rights of indemnification provided by Section 33-454a of the Connecticut General Statutes.

Section 6.2 Payment of Expenses in Advance. Expenses which may be indemnifiable under the provisions of Section 33-454a of the Connecticut General Statutes, incurred in defending a proceeding, may be paid by the Foundation in advance of the final disposition of such proceeding when authorized by the Board of Directors upon agreement, by or on behalf of the individual entitled to be indemnified, to repay such amount if he is later found not entitled to be indemnified by the Foundation as authorized under the Bylaws.

ARTICLE VII

MISCELLANEOUS PROVISIONS

Section 7.1 Amendment. These Bylaws may be amended or repealed, and new Bylaws may be adopted, at any regular, annual or special meeting of the member. Any notice of a meeting of the member at which these Bylaws are to be amended or repealed, or new Bylaws are to be adopted, shall be given in writing not less than seven days or more than fifty days prior to such meeting and shall include notice of such proposed action.

Section 7.2 Fiscal Year. The fiscal year of the Foundation shall end on September 30 in each year unless the Board of Directors shall determine otherwise.

Section 7.3 Seal. The seal of the Foundation shall be circular in form and shall bear the name of the Foundation and shall be in such form as the Board of Directors may determine.

Section 7.4 Execution of Negotiable Instruments. All checks, drafts, notes, bonds, bills of exchange and orders for the payment of money shall be signed by the Chief Executive Officer, President or such officer or officers of the Foundation as the Board of Directors shall specify from time to time. The Board of Directors may authorize the use of facsimile signatures of any officer or employee in lieu of manual signatures.

Section 7.5 Execution of Deeds and Contracts. Subject always to the specific directions of the Board of Directors, all deeds and mortgages made by the Foundation and all other written contracts, agreements and undertakings to which the Foundation shall be a party shall be executed in its name by the Chief Executive Officer, President or such other officer as may be specified by the Board of Directors or authorized by the Chief Executive Officer or President and, when requested, the Secretary shall attest to such signatures and affix the corporate seal to such instruments.

Section 7.6 Conflict of Interest. If any director or member of a director's immediate family has an interest in any contract or transaction involving the Foundation, the provisions of Section 33-457 of the Connecticut General Statutes shall determine the obligation of a director to disclose such interest to the Board of Directors and the legal effect of such contract or transaction.

Section 7.7 Connecticut General Statutes. Any reference herein to a section of the Connecticut General Statutes shall include reference to any amendment of such section or any successor statute.

Section 7.8 Pronouns. References herein to the masculine shall include references to the feminine, references to the singular shall include references to the plural and references to the plural shall include references to the singular, where the context of the language involved so permits or requires.

**BYLAWS
OF
BRIDGEPORT HOSPITAL
(THE "HOSPITAL")**

ARTICLE I

PURPOSE

Section 1.1 Objectives. The objectives and purposes for which the Hospital exists are as follows:

- A. To establish, maintain and carry on a general hospital in Bridgeport Connecticut, to provide diagnosis and treatment for all persons who shall apply therefore without regard to sex, race, religious creed, color or national origin and without discrimination, in violation of applicable law, in the selection of employees, volunteers, students and medical staff.
- B. To promote and carry on any educational activities relating to health care to the sick and injured and the promotion of health, which in the opinion of the Board of Directors, may be justified by the facilities, personnel or funds that are, or can be made, available.
- C. To promote and carry on scientific research related to the care of the sick and injured insofar as, in the opinion of the Board of Directors, such research can be carried on in, or in connection with, the Hospital.
- D. To participate, insofar as circumstances warrant, in any activity designed and carried on to promote the general health of the community.
- E. To do all such other things necessary, suitable and proper for the accomplishment of any of the purposes of the Hospital or attainment of any of the objectives of the Hospital herein mentioned either alone or in association with other individuals, corporations, partnerships or other entities, and in general, to do and perform such acts and transact such business in connection with the purposes and objectives of the Hospital not inconsistent with law, including but not limited to the following:

1. to acquire, lease, hold, manage, sell, mortgage, and otherwise dispose of such real or personal property as may be convenient or necessary to carry out the purposes herein mentioned.
2. to borrow money and to issue bonds, debentures, notes and other evidences of indebtedness and obligations and to mortgage, pledge and otherwise charge any or all of the Hospital's properties and assets to secure the payment thereof.
3. to solicit, receive and expend donations, bequests and/or legacies for any purposes or objectives of the Hospital.
4. to make gifts of real and personal property to corporations, trusts, funds, foundations, and other entities organized and operated exclusively for charitable, scientific or educational purposes, no part of the net earnings of which inures to the benefit of any private shareholders or individuals and no substantial part of the activities of which is carrying on propaganda or otherwise attempting to influence legislation.

Section 1.2 Limitations. The Hospital is organized exclusively for charitable, health care, and scientific purposes as a non-profit organization.

ARTICLE II

OFFICES

Section 2.1 Principal Office. The principal office of the Hospital shall be at such place in Bridgeport, Connecticut as the Board of Directors shall from time to time designate.

Section 2.2 Additional Offices. The Hospital may have such additional offices, either within or without the United States, as the Board of Directors may from time to time designate or the business of the Hospital may require.

ARTICLE III

MEMBERSHIP

Section 3.1 Sole Member. The Hospital shall have but one member, Southern Connecticut Health System, Inc., which shall have only the rights, powers and privileges provided in these Bylaws. Subject to the rights, powers and privileges accorded to Southern Connecticut

Health System, Inc. under these Bylaws, the Hospital shall be governed by its Board of Directors which shall elect the persons to serve on such Board of Directors.

Section 3.2 Rights, Powers and Privileges. Southern Connecticut Health System, Inc., as the Hospital's sole member, shall have the following rights, powers and privileges:

- A. To approve the annual operating and capital budgets, programs and expenditures requiring Certificate of Need approval by appropriate governmental bodies, and plans that materially affect the growth, operation and development of the Hospital.
- B. To vote upon all matters, other than the election of the Board of Directors, on which members are entitled to vote under the Nonstock Corporation Act of the State of Connecticut.
- C. To elect and remove the officers of the Hospital in accordance with the provision of these Bylaws.
- D. To act on any other matters on which action by members is required or permitted by these Bylaws.

Section 3.3 Meetings of the Member. The annual meeting of the member shall be held on such day and at such time and place as may be designated by the Board of Directors or the Chairman of the Board of Directors for the purposes set forth in Section 3.2 herein and for the transaction of any other business as may properly come before such meeting. Regular meetings of the member shall be held at such times as the Board of Directors shall from time to time determine. Special meetings of the member may be called at any time by the Board of Directors, the Chairman of the Board of Directors, the President or the member. Each such request for a special meeting shall state the purposes for which the requested meeting is to be called. The member shall cast one vote on each matter submitted to a vote at each regular, annual and special meeting. Except as otherwise provided, any action required to be, or which may be, taken at any regular, annual or special meeting of the member may be taken without a meeting, without prior notice and without a vote, if a consent in writing, setting forth the action so taken, shall be signed by the member.

Section 3.4 Notice of Meeting. A notice of each meeting of the member shall be given in writing to the member not less than seven days or more than fifty days before the date of the meeting. Each notice shall state the place, day and hour of the meeting. The general purpose for which a special meeting is called shall be stated in the notice thereof, and no other business shall be transacted at the meeting.

Section 3.5 Waiver of Notice. Notice of any meeting of the member may be waived in writing by the member.

ARTICLE IV

BOARD OF DIRECTORS

Section 4.1 General Powers. Subject to the rights, powers and privileges accorded to the member under these Bylaws, the activities, property and affairs of the Hospital shall be managed by the Board of Directors, which shall exercise all of the powers of the Corporation under the Connecticut Nonstock Corporation Act, the Charter, and the Bylaws as each may be amended from time to time.

Section 4.2 Number of Directors and Qualifications. The Board of Directors shall consist of not less than ten nor more than twenty persons which number shall be fixed from time to time by the Board of Directors. At each annual meeting of the Board of Directors, the directors shall be elected by the then Board of Directors to take office immediately following such annual meeting. The President of Bridgeport Hospital shall be an ex-officio director with vote.

The Board of Directors shall elect voting physician directors from among physicians nominated by the Bridgeport Hospital medical staff. If the President of the Bridgeport Hospital Medical Staff is elected to this category, he shall serve ex-officio. The Board of Directors shall elect that number of voting physician directors equal to one less than twenty percent of the number of directorships; a number consistent with legal requirements. In the event of a change in such legal requirements, these Bylaws shall be amended to comport with such requirements.

The Board of Directors shall also elect four non-voting physician directors from among physicians nominated by the Bridgeport Hospital medical staff. If the President of the Bridgeport Hospital Medical Staff is elected to this category, he shall serve ex-officio.

Non-voting physician directors (except the President of the Bridgeport Hospital Medical Staff if so elected.) shall receive notice of, and have the right to attend and speak at, meetings of the Board of Directors, and serve on committees as voting members. Such non-voting physician directors shall be subject to the age and term of office provisions of these Bylaws, but shall not count toward quorum requirements, shall not have voting rights, shall not be considered in calculating the number of directorships, and shall not be considered directors for any other purpose.

The Bridgeport Hospital medical staff shall nominate no fewer than two physicians for each position being considered by the Board of Directors for election of a voting physician director and as a non-voting physician director. In any case, the President of the Bridgeport Hospital Medical Staff shall be nominated by the medical staff and shall be elected by the Board of Directors to serve ex-officio as provided above.

An ex-officio director with vote and an ex-officio voting physician director shall be considered a director for all purposes of these Bylaws except he shall not be subject to the age or term of office provisions.

Except as otherwise provided in this Section 4.2, a director or a non-voting physician director who has attained age 70 shall be ineligible to continue to serve as a director or a non-voting physician director after the annual meeting of the Board of Directors next following the date such person attains age 70.

Section 4.3 Terms of Directors. Directors shall hold office for a term of four years or until their successors have been elected and qualified, except that a director may be elected for a term of less than four years as provided in Section 4.12 or if the Board of Directors deems it necessary to serve the objective that the terms of office of approximately one-fourth of all directors shall expire at each annual meeting. A director shall cease to be in office upon his death, resignation or removal. At each annual meeting, the Board of Directors shall elect directors to succeed the directors whose terms are then expiring and to fill any new directorships fixed by the Board of Directors. Such directors shall take office immediately following such annual meeting. No director shall serve more than two successive terms of three or more years. Not included in this limitation shall be a term of less than three years due to effectuating staggered terms or due to a director completing a term due to the death, removal or resignation of another director. Also not included in this limitation shall be any term served prior to March 30, 1995. A director who has served two successive terms of three or more years may again serve as a director following the expiration of a period of not less than one year during which time such individual does not serve as a director.

The President of Bridgeport Hospital and the President of the Bridgeport Hospital Medical Staff shall hold office for a term of one year or until their successors are elected and qualified or until they no longer are serving in the position that entitles them to such ex-officio directorship.

Non-voting physician directors (except the President of the Bridgeport Hospital Medical Staff if so elected) shall be elected for a term of four years or until their successors are elected and qualified and shall be subject to the term of office provisions described in these Bylaws.

Section 4.4 Annual Meeting. The annual meeting of the Board of Directors shall be held each year on such date, at such time, and at such place as the Board of Directors may determine. At such meeting, the Board of Directors shall elect directors and non-voting physician directors of the Hospital and shall transact such other business relating to the affairs of the Hospital as may come before the meeting. No notice need be given of an annual meeting of the Board of Directors. There shall be no voting by proxy.

Section 4.5 Regular and Special Meetings. Regular meetings of the Board of Directors shall be held at such times as the Board of Directors shall from time to time determine. Special meetings of the Board of Directors may be called at any time by the Chairman, the President, or

upon the written request of a majority of the directors then in office. Meetings of the Board of Directors may be held within or without the State of Connecticut and shall be held at such place as shall be designated in the notice of the meeting. Except as otherwise provided in these Bylaws, two days' written or oral notice shall be given of each special meeting of the Board of Directors. No notice need be given of a regular meeting of the Board of Directors. Neither the business to be transacted at, nor the purpose of, any regular or special meeting of the Board of Directors need be specified in any notice or waiver of notice of such meeting unless otherwise required by law or specified herein. There shall be no voting by proxy.

Section 4.6 Quorum. A majority of the directors shall constitute a quorum at all meetings of the Board of Directors.

Section 4.7 Vote Required for Action. The act of a majority of the directors present at a meeting at which a quorum is present shall be the act of the Board of Directors, unless the act of a greater number is required by these Bylaws or by law.

Section 4.8 Action Without Meeting. If all the directors severally or collectively consent in writing to any action taken or to be taken by the Hospital, the action shall be as valid as though it had been authorized at a meeting of the Board of Directors, and such written consent or consents shall be filed in the corporate minute book.

Section 4.9 Participation by Conference . A director may participate in a meeting of the Board of Directors by means of a conference telephone or similar communications equipment enabling all directors participating in the meeting to hear one another, and such participation in a meeting shall constitute presence in person at such meeting.

Section 4.10 Resignation of Directors. Any director and any non-voting physician director may resign at any time by giving written notice to the Board of Directors or to the Chairman, the President or the Secretary. The resignation shall take effect at the time specified in the notice and, unless otherwise specified in it, acceptance of the resignation shall not be necessary to make it effective.

Section 4.11 Removal of Directors. Any director and any non-voting physician director may be removed from office with or without cause at any time, regardless of the term for which such director may have been elected, by the affirmative vote of a majority of all of the directors in office at that time at any regular, annual or special meeting.

Section 4.12 Vacancies. In case of any vacancy in the Board of Directors by reason of the death, resignation, or removal of any director, the remaining directors, though less than a quorum, by the concurring vote of a majority of such remaining directors at any meeting of the Board of Directors, may fill such vacancy for the remaining term of such directorship or, for any new or unoccupied directorships, may elect directors to serve until the next annual meeting.

In case the vacancy is one of the directorships or one of the non-voting physician directorships designated for a physician, the vacancy shall be filled with a physician nominated by the Bridgeport Hospital medical staff, and the medical staff shall nominate no fewer than two physicians for each vacancy.

ARTICLE V

COMMITTEES

Section 5.1 Establishment of Committees. The Board of Directors may, from time to time, establish such committees of the Board of Directors with such responsibilities as the Board of Directors shall determine. All committees shall act in an advisory capacity only and shall have no power or authority to bind the Hospital. Committees of the Board of Directors shall be standing and special. The standing committees shall include the Audit Committee, Development Committee, Director Affairs Committee, Finance Committee, Investment Committee, Management Affairs Committee, and Professional and Quality Review Committee. The Board of Directors shall perform all of the duties of the Executive Committee set forth in the Bridgeport Hospital Medical Staff Bylaws.

Section 5.2 Appointment of Members. Except as otherwise provided in these Bylaws, all committee chairmen and committee members shall be appointed from among the directors or others by the Chairman of the Board of Directors. The Chairman of the Board of Directors may increase or decrease the number of members on a committee, may fill vacancies on a committee and may remove, with or without cause, any chairman or member of a committee.

Section 5.3 Quorum; Vote Required for Action. A majority of the members of any committee shall constitute a quorum for the transaction of business at all meetings of the committee. The act of a majority of the members of any committee present at a meeting at which a quorum is present shall be the act of such committee, unless the act of a greater number is required by these Bylaws, by resolution of the Board of Directors or by law.

Section 5.4 Meetings of Committees. Except as otherwise provided in these Bylaws, each committee shall establish its own rules and procedures and shall fix the time and place of its meetings. Each committee shall keep minutes of its meetings which shall be made available to the Board of Directors upon request.

Section 5.5 Audit Committee. The Audit Committee shall cause an annual audit to be made of the books, accounts and records of the Hospital by certified public accountants under the supervision of the Audit Committee. The Audit Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 5.6 Development Committee. The Development Committee shall recommend policies and procedures for the development, growth, and management of the endowment funds of the Hospital and shall consider funding requests from affiliates. The Development Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 5.7 Director Affairs Committee. The Director Affairs Committee shall develop criteria for membership on the Board of Directors and its committees and shall consider the eligibility requirements and qualification specified in these Bylaws, as well as the interest and participation in Hospital matters of the individuals under consideration. It shall nominate for election members of the Board of Directors and shall assist in the selection of individuals for committee assignments. The Director Affairs Committee also shall review the performance of directors and recommend amendments to the Hospital's and Auxiliary's bylaws and shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 5.8 Finance Committee. The Finance Committee shall review and recommend to the Board of Directors annual operating and capital budgets for the Hospital and shall monitor and oversee the financial performance of the Hospital. The Finance Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 5.9 Investment Committee. The Investment Committee shall recommend policies and procedures for the investment of all funds of the Hospital and shall monitor and evaluate the performance of any investment managers charged with the investment of funds of the Hospital. The Investment Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide. The Chief Executive Officer and the Treasurer shall be members of the Investment Committee.

Section 5.10 Management Affairs Committee. The Management Affairs Committee shall establish performance goals for the President and shall conduct annual evaluations of his performance. It shall also review and recommend to the Board of Directors human resource, fringe benefit, and compensation policies and monitor compliance therewith and shall act in an advisory capacity to the President. The Management Affairs Committee also shall perform such other functions as a duly adopted resolution of the Board of Director may provide.

Section 5.11 Professional and Quality Review Committee. The Professional and Quality Review Committee shall perform all of the duties of the Professional Committee and the Joint Conference Committee as set forth in the Bridgeport Hospital Medical Staff Bylaws including meeting with members of the Medical Staff to resolve conflicts with the Medical Staff regarding appointments, reappointments and privileges. It also shall review recommendations from the Medical Staff and make recommendations to the Board of Directors concerning Medical Staff appointments and reappointments and the assignment, withdrawal, denial or curtailment of privileges. It shall compile and review information relating to the care and treatment of patients for the purposes of establishing mechanisms and policies for evaluating and improving quality of

health care and reducing morbidity and mortality, performance improvement and risk management functions related to patient care and safety. The Professional and Quality Review Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

ARTICLE VI

OFFICERS

Section 6.1 Principal and Subordinate Officers. The principal officers of the Hospital shall be Chairman of the Board, Vice Chairmen of the Board, President, Secretary, and Treasurer. The subordinate officers shall consist of such other officers, assistant officers and agents as may be deemed necessary and as are elected or appointed by the Board of Directors, the President or as may be chosen in such other manner as may be prescribed or permitted by these Bylaws. Any two or more offices may be held by the same person provided that the same individual shall not simultaneously occupy the offices of (i) Chief Executive Officer or President and (ii) Secretary. The Chairman of the Board and Vice Chairmen shall be selected from among members of the Board of Directors.

Section 6.2 General Authority and Duties. All officers and agents of the Hospital shall have such authority and perform such duties in the management of the Hospital as may be provided in these Bylaws or as may be determined by resolution of the Board of Directors not inconsistent with these Bylaws.

Section 6.3 Election, Term of Office, and Qualifications. The principal officers shall be chosen annually by the member at its annual meeting or as soon thereafter as conveniently possible. Subordinate officers may be elected or appointed by the Board of Directors or may be appointed by the President or any other principal officer to whom the Chairman of the Board of Directors shall delegate the authority of appointment. Each officer shall hold office until his successor is chosen and qualified, or until his death, his resignation, or his removal, whichever event shall first occur. Election or appointment of an officer or agent shall not of itself create any contractual rights. An individual may not serve in the office of Chairman or Vice Chairman for more than four consecutive one year terms. Not included in this limitation shall be any term served prior to March 30, 1995, or any partial term served to fill a vacancy.

Section 6.4 Removal. Any officer or agent may be removed by the member whenever in its judgment the best interests of the Hospital will be served by so doing. Any subordinate officer or agent may also be removed by the President, or by any other principal officer having authority to designate or appoint the officer or agent to be removed, with or without cause. Any removal shall be without prejudice to the contract rights, if any, of the person so removed.

Section 6.5 Resignations. Any officer or agent may resign at any time by giving written notice to the Board of Directors or to the Chairman, the President or the Secretary. The resignation shall take effect at the time specified in the notice and, unless otherwise specified in it, acceptance of the resignation shall not be necessary to make it effective.

Section 6.6 Vacancies. Any vacancy in any office occurring by reason of death, resignation, removal, or any other cause shall be filled for the unexpired portion of the term in the manner prescribed in these Bylaws for election or appointment to the office.

Section 6.7 Chairman of the Board. The Chairman of the Board shall preside at the annual meeting of the Hospital and at all meetings of the Board of Directors, shall appoint members of all committees and the chairmen thereof, and shall perform such duties as the Board of Directors may from time to time assign to the Chairman of the Board and such other duties as are usual to this office.

Section 6.8 Vice Chairmen of the Board. The Vice Chairmen of the Board shall perform the duties of the Chairman of the Board in the event of the Chairman's absence or disability and shall assist the Chairman of the Board in such duties as the Chairman of the Board may from time to time assign to the Vice Chairmen of the Board.

Section 6.9 President. The President shall be the Chief Executive Officer of the Hospital and the official representative of the Board of Directors in the management of the Hospital. The President shall exercise general supervision of the business and affairs of the Hospital and over its officers and its employees and shall be responsible for seeing that the resolutions and actions of the Board of Directors are carried into effect, and for reporting to the Board of Directors on the conduct and management of the affairs of the Hospital. The President shall be responsible for insuring Hospital compliance with the Bylaws, rules, regulations, and policies of the Hospital, compliance with all applicable laws and regulations, and prompt action on reports and recommendations from authorized planning, regulatory, and inspecting agencies. The President shall be responsible for establishing internal controls to safeguard physical, financial, information and human resources. The President also shall have the authority to appoint and remove employees of the Hospital, including management level officers, and may delegate to any such officers and employees such authority as he deems appropriate, provided however, he shall be responsible for their actions.

Section 6.10 Treasurer. The Treasurer shall have supervision over the receipt and custody of the Hospital's funds, and shall cause to be kept correct and complete books and records of account, including full and accurate accounts of receipts and disbursements in books belonging to the Hospital, and in general shall perform all the duties incident to the office of Treasurer and such other duties as may be assigned to him by the Board of Directors, the Chairman of the Board of Directors, or the President. The Treasurer shall render to the Chairman of the Board, the President and the Board of Directors promptly upon its completion an annual report of the

financial condition and operation of the Hospital prepared and certified by the independent certified auditors appointed by the Board of Directors.

Section 6.11 Secretary. The Secretary shall keep minutes of the proceedings of the Board of Directors, shall give or cause to be given all notices in accordance with the provisions of these Bylaws or as required by law, and shall be custodian of the corporate records and of the seal of the Hospital. The Secretary shall also perform all duties incident to the office of Secretary and such other duties as may be assigned to him by the Board of Directors, the Chairman of the Board of Directors, or the President.

ARTICLE VII

PROFESSIONAL STAFF

Section 7.1 Establishment of Medical Staff. The Board of Directors hereby establishes and sets forth the organizational structure of the Bridgeport Hospital Medical Staff and its relationship to the Board of Directors and to Hospital administration, and also establishes an Allied Health Professional Staff.

For the purposes of these Bylaws, the term "Medical Staff" shall have the meaning set forth in the Bridgeport Hospital Medical Staff Bylaws which are incorporated herein by reference.

In the event of any conflict between the provisions of these Bylaws and the Medical Staff Bylaws and Rules and Regulations, the provisions of these Bylaws shall supersede any conflicting provisions of the Medical Staff Bylaws and Medical Staff Rules and Regulations; provided, however, that every effort shall be made to interpret these Bylaws and the Medical Staff Bylaws and the Medical Staff Rules and Regulations as being consistent with one another.

Section 7.2 Requirements and Responsibility for Appointment, Reappointment, Granting or Curtailment of Privileges. The Board of Directors, through the Professional and Quality Review Committee, shall require that the Medical Staff be organized into a responsible administrative unit, and that it adopt and periodically review such Bylaws, Rules and Regulations and policies, subject to Section 7.3 for governance of its members' practice in the Hospital as the Board of Directors determines to be of the greatest benefit to the care of patients of the Hospital and as is consistent with Hospital policy, the requirements of the Joint Commission on Accreditation of Healthcare Organizations and applicable requirements of law.

The Board of Directors, through the Professional and Quality Review Committee, shall hold the Medical Staff responsible for making recommendations to the Board of Directors concerning initial staff appointments, reappointments, terminations of appointments, and the granting, termination, curtailment or revision of clinical privileges, and for the submission of regular reports on the review processes carried out by the Medical Staff in accordance with the

requirements of the Medical Staff Bylaws. The Board of Directors shall act on such recommendations within a reasonable time as specified in the Medical Staff Bylaws. In considering recommendations for appointment and privileges, the Board of Directors shall consider the resources of the Hospital.

Any differences between the Medical Staff and the Board of Directors in recommendations concerning Medical Staff appointments, reappointments, terminations of appointments, and the granting, curtailment, revision, or termination of clinical privileges shall be reviewed within a reasonable period of time by the Professional and Quality Review Committee in accordance with the provisions of the Medical Staff Bylaws.

Section 7.3 Medical Staff Bylaws, and Rules and Regulations. Bylaws, Rules and Regulations for the Medical Staff shall set forth its organization and governance including the following: mechanisms for appointment, reappointment, and termination of appointment; mechanisms for the granting, termination, curtailment and revision of clinical privileges; mechanisms for liaison between the Board of Directors and the Medical Staff; and the quality assurance, peer review and other responsibilities of the Medical Staff as required by the Joint Commission on Accreditation of Healthcare Organizations and applicable law.

The Medical Staff Bylaws, Rules and Regulations shall be adopted as provided in the Medical Staff Bylaws. The authority to adopt or amend the Medical Staff Bylaws and Rules and Regulations shall be vested in the Board of Directors, and shall not require recommendation or ratification by the Medical Staff.

Section 7.4 Admission of Patients. Only members of the Medical Staff in good standing and who hold appropriate admitting privileges can admit patients to the Hospital. Physician and dentist members of the Medical Staff, as provided in the Medical Staff Bylaws and Rules and Regulations and as authorized by law, shall be responsible for the medical aspects of patients' care and shall practice only within the scope of their clinical privileges as granted by the Board of Directors. The quality of care provided by these physicians and dentists to patients of the Hospital shall be reviewed as part of the Hospital's quality assurance program.

Section 7.5 Communication with the Board of Directors and Hospital Administration. As provided in these Bylaws and the Medical Staff Bylaws, there shall be effective and systematic liaison and communication between the Board of Directors, the Medical Staff, and Hospital administration. The Professional and Quality Review Committee has been established to further this purpose and shall meet with Members of the Medical Staff to resolve any conflicts between the Hospital and the Medical Staff regarding appointments, reappointments and privileges. In addition, the Medical Staff shall have the right of representation (through attendance and voice at meetings of the Board of Directors); by the President of the Bridgeport Hospital Medical Staff serving on the Board of Directors either as an ex-officio director with vote or as an ex-officio non-voting physician director and as otherwise provided in these Bylaws.

Section 7.6 Medical Staff Recommendations. The Medical Staff, as provided in the Medical Staff Bylaws, shall make recommendations to the Board of Directors for its approval which shall include recommendations pertaining to the following:

1. The structure of the Medical Staff;
2. The mechanism used to review credentials and to delineate individual clinical privileges;
3. Individual Medical Staff membership;
4. Specific delineated clinical privileges for each individual exercising such privileges;
5. The organization of the quality assurance and performance improvement activities of the Medical Staff as well as the mechanisms used to conduct, evaluate, and revise such activities;
6. The mechanism by which membership on the Medical Staff and clinical privileges may be suspended, curtailed or terminated; and
7. The mechanism for a fair hearing plan.

Section 7.7 Termination of Physicians in Medical/Administrative Positions. Physicians or dentists holding Hospital administrative appointments and appointment to the Medical Staff shall be entitled to continue their Medical Staff membership notwithstanding the termination of their Hospital administrative appointment (1) unless their Medical Staff membership is revoked, suspended, not renewed, or lapses in accordance with the Medical Staff Bylaws or Rules and Regulations; (2) unless otherwise provided by agreement with the physician or dentist or his practice group; or (3) unless otherwise provided pursuant to decisions by the Hospital terminating or otherwise affecting their administrative appointment and clinical privileges.

Section 7.8 Allied Health Professional Staff. The Allied Health Professional Staff shall be organized and function as provided in the Medical Staff Bylaws. For purposes of these Bylaws, the term "Allied Health Professional Staff" shall have the meaning set forth in the Medical Staff Bylaws.

ARTICLE VIII

INDEMNIFICATION OF HOSPITAL MEMBER, DIRECTORS, OFFICERS, EMPLOYEES AND AGENTS

Section 8.1 Rights of Indemnification. Member, directors, officers, employees, and agents shall have the rights of indemnification provided by Sec. 33-454a of the Connecticut General Statutes.

Section 8.2 Payment of Expenses in Advance. Expenses which may be indemnifiable under the provisions of Section 33-454a of the Connecticut General Statutes, incurred in defending a proceeding, may be paid by the Hospital in advance of the final disposition of such proceeding

when authorized by the Board of Directors upon agreement, by or on behalf of the individual entitled to be indemnified, to repay such amount if he is later found not entitled to be indemnified by the Hospital.

ARTICLE IX

THE BRIDGEPORT HOSPITAL AUXILIARY, INC.

Section 9.1 Purpose. A Bridgeport Hospital Auxiliary may be organized to further the purposes and interests of the Hospital.

Section 9.2 Adoption of Bylaws. The Auxiliary shall have the authority, subject to the review and approval of the Board of Directors, to adopt and amend Auxiliary Bylaws which shall state its purpose, duties, and organization.

ARTICLE X

MISCELLANEOUS PROVISIONS

Section 10.1 Amendment of Bylaws. These Bylaws may be amended or repealed, and new Bylaws may be adopted, at any regular, annual or special meeting of the Board of Directors by the affirmative vote of a majority of all directors. Any notice of a meeting of the Board of Directors at which these Bylaws are to be amended or repealed, or new Bylaws are to be adopted, shall be given at least two days prior to such meeting and shall include notice of such proposed action. Notwithstanding the foregoing, the provisions of Article III of these Bylaws may be amended or repealed only with the additional approval of the member.

Section 10.2 Corporate Seal. The Corporate seal shall be an appropriate seal as adopted by the Board of Directors.

Section 10.3 Fiscal Year. The fiscal year of the Hospital shall end on September 30 in each year unless the Board of Directors shall determine otherwise.

Section 10.4 Execution of Negotiable Instruments. All checks, drafts, notes, bonds, bills of exchange and orders for the payment of money shall be signed by the President or such officer or officers of the Hospital as the Board of Directors shall specify from time to time. The Board of Directors may authorize the use of facsimile signatures of any officer or employee in lieu of manual signatures.

Section 10.5 Execution of Deeds and Contracts. Subject to the general directions of the Board of Directors, all deeds and mortgages made by the Hospital and all other written contracts,

agreements and undertakings to which the Hospital shall be a party shall be executed in its name by the President or such other officer as may be specified by the Board of Directors or authorized by the President and, when requested, the Secretary shall attest to such signatures and affix the corporate seal to such instruments.

Section 10.6 Conflict of Interest. If any director or member of a director's immediate family has an interest in any contract or transaction involving the Hospital, the provisions of Section 33-457 of the Connecticut General Statutes shall determine the obligation of a director to disclose such interest to the Board of Directors and the legal effect of such contract or transaction.

Section 10.7 Pronouns. References herein to the masculine shall include references to the feminine, references to the singular shall include references to the plural and references to the plural shall include references to the singular, where the context of the language involved so permits or requires.

Section 10.8 Connecticut General Statutes. Any reference herein to a section of the Connecticut General Statutes shall include reference to any amendment of such section or any successor statute.

**BYLAWS
OF
REHABILITATION CENTER OF FAIRFIELD COUNTY, INC.**

(The "Center")

ARTICLE I

PURPOSES

Section 1.1 Objectives. The objectives and purposes for which the Center exists are as follows:

- A. To promote and carry out a program for the medical care, social education, vocational training and the rendering of other assistance to disabled and handicapped people regardless of age and regardless of the cause of the handicap.
- B. To provide for its regional citizens opportunities to achieve health, productivity and self esteem when they are challenged by injury or illness.
- C. To promote and carry on any educational activities relating to the medical care to, and rehabilitation of, the sick and injured and the promotion of health which, in the opinion of the Board of Directors, may be justified by the facilities, personnel or funds that are, or can be made, available
- D. To promote and carry on scientific research related to the care and rehabilitation of the sick and injured insofar as, in the opinion of the Board of Directors, such research can be carried on in, or in connection with, the Center.
- E. To participate, insofar as circumstances warrant, in any activity designed and carried on to promote the general health of the community.
- F. To do all such other things necessary, suitable and proper for the accomplishment of any of the purposes of the Center or attainment of any of the objectives of the Center herein mentioned either alone or in association with other individuals, corporations, partnerships or other entities, and in general, to do and perform such acts and transact such business in connection with the purposes and objectives of the Center not inconsistent with law, including but not limited to the following:
 1. to acquire, lease, hold, manage, sell, mortgage and otherwise dispose of such real or personal property as may be convenient or necessary to carry out the purposes herein mentioned.

2. to borrow money and to issue bonds, debentures, notes and other evidences of indebtedness and obligations and to mortgage, pledge and otherwise charge any or all of its properties and assets to secure the payment thereof.
3. to solicit, receive and expend donations, bequests and/or legacies for any purposes or objectives of the Center.
4. to make gifts of real and personal property to corporations, trusts, funds, foundations, or other entities organized and operated exclusively for charitable, scientific or educational purposes, no part of the net earnings of which inures to the benefit of any private shareholders or individuals and no substantial part of the activities of which is carrying on propaganda or otherwise attempting to influence legislation.

Section 1.2 Limitations. The Center is organized exclusively for charitable, health care, educational, and scientific purposes as a non-profit organization.

ARTICLE II

OFFICES

Section 2.1 Principal Office. The principal office of the Center shall be at such place in the United States as the Board of Directors shall from time to time designate.

Section 2.2 Additional Offices. The Center may have such additional offices, either within or without the United States, as the Board of Directors may from time to time designate or the business of the Corporation may require.

ARTICLE III

MEMBERSHIP

Section 3.1 Sole Member. The Center shall have but one member, Southern Connecticut Health System, Inc., which shall have the right to elect the Board of Directors of the Center in accordance with these Bylaws, and shall have all of the other rights, powers and privileges usually or by law accorded to the members of a nonstock nonprofit corporation and not conferred thereby or by the Articles of Association or Bylaws upon the Board of Directors of the Center.

Section 3.2 Rights, Powers and Privileges. In addition to such other rights, powers and privileges as it may have by law, the Center's sole member shall have the following rights, powers and privileges:

- A. To approve the long range development plans, annual operating and capital budgets, programs and expenditures requiring Certificate of Need approval by appropriate governmental bodies, and plans that materially affect the growth, operations and development of the Center.
- B. To elect and remove members of the Board of Directors of the Center and non-voting directors in accordance with the provisions of these Bylaws.
- C. To elect and remove any officer of the Center in accordance with the provisions of these Bylaws.
- D. To vote upon all matters on which members are entitled to vote under the Nonstock Corporation Act of the State of Connecticut.
- E. To act on any other matters on which action by the member is provided for in these Bylaws.

Section 3.3 Meetings of the Member. The annual meeting of the member shall be held on such day and at such time and place as may be designated by the Board of Directors or the Chairman of the Board of Directors for the purposes set forth in Sections 3.1 and 3.2 herein and for the transaction of any other business as may properly come before such meeting. Regular meetings of the member shall be held at such times as the Board of Directors shall from time to time determine. Special meetings of the member may be called at any time by the Board of Directors, the Chairman of the Board of Directors, the Chief Executive Officer or the member. Each such request for a special meeting shall state the purposes for which the requested meeting is to be called. The member shall cast one vote on each matter submitted to a vote at each regular, annual and special meeting. Except as otherwise provided, any action required to be, or which may be, taken at any regular, annual or special meeting of the member may be taken without a meeting, without prior notice and without a vote, if a consent in writing, setting forth the action so taken, shall be signed by the member.

Section 3.4 Notice of Meeting. A notice of each meeting of the member shall be given in writing to the member not less than seven days or more than fifty days before the date of the meeting. Each notice shall state the place, day and hour of the meeting. The general purpose for which a special meeting is called shall be stated in the notice thereof, and no other business shall be transacted at the meeting.

Section 3.5 Waiver of Notice. Notice of any meeting of the member may be waived in writing by the member.

ARTICLE IV

BOARD OF DIRECTORS

Section 4.1 General Powers. Subject to the rights, powers and privileges accorded to the member by law, the Articles of Association or these Bylaws, the activities, property and affairs of the Center shall be managed by the Board of Directors, which shall exercise all of the powers and responsibilities conferred upon the Board of Directors by the Connecticut Nonstock Corporation Act, the Articles of Association and these Bylaws as each may be amended from time to time.

Section 4.2 Number of Directors and Qualification. The Board of Directors shall consist of not less than ten and not more than twenty persons, which number shall be fixed from time to time by the member. At each annual meeting of the member, the directors shall be elected by the member to take office immediately following such annual meeting.

A person who is an ex-officio director with vote of the Bridgeport Hospital Board of Directors and who is elected to the Board of Directors shall be an ex-officio director with vote of the Board of Directors and shall be considered a director for all purposes of these Bylaws except he shall not be subject to the age or term of office provisions.

The member also may elect non-voting directors. Non-voting directors shall receive notice of, and shall be entitled to attend and speak at, meetings of the Board of Directors and shall be eligible to serve as voting members of committees. Such non-voting directors shall be subject to the age and term of office provisions of these Bylaws, but shall not count toward quorum requirements, shall not have voting rights, shall not be considered in calculating the number of directorships and shall not be considered directors for any other purpose under these Bylaws.

Except as otherwise provided in this Section 4.2, a director who has attained age 70 shall be ineligible to continue to serve as a director after the annual meeting of the Board of Directors next following the date the director attains age 70.

Section 4.3 Terms of Directors. Directors shall hold office for a term of four years or until their successor has been elected and qualified, except that a director may be elected for a term of less than four years as provided in Section 4.12 or if the member deems it necessary to serve the objective that the terms of office of approximately one-fourth of all directors shall expire at each annual meeting. A director shall cease to be in office upon his death, resignation or removal. At each annual meeting, the member shall elect directors to succeed the directors whose terms are then expiring and to fill any new directorships fixed by the member. Such directors shall take office immediately following such annual meeting. No director shall serve more than two successive terms of three or more years. Not included in this limitation shall be a term of less

than three years due to effectuating staggered terms or due to a director completing a term due to the death, removal or resignation of another director. Also not included in this limitation shall be any term served prior to March 30, 1995. A director who has served two successive terms of three or more years may again serve as a director following the expiration of a period of not less than one year during which time such individual does not serve as a director.

Directors ex-officio shall hold office for a term of one year or until their successors are elected and qualified or until they no longer are serving in the positions that entitle such persons to such ex-officio directorships.

Non-voting directors shall be elected for a term of four years or until their successors are elected and qualified and shall be subject to the terms of office provisions described in these Bylaws.

Section 4.4 Annual Meeting. The annual meeting of the Board of Directors shall be held each year on such date, at such time, and at such place as the Board of Directors may determine. At such meeting, the Board of Directors shall elect the subordinate officers, of the Center and shall transact such other business relating to the affairs of the Center as may come before the meeting. No notice need be given of an annual meeting of the Board of Directors. There shall be no voting by proxy.

Section 4.5 Regular and Special Meetings. Regular meetings of the Board of Directors shall be held at such times as the Board of Directors shall from time to time determine. Special meetings of the Board of Directors may be called at any time by the Chairman, the Chief Executive Officer, or upon the written request of a majority of the directors then in office. Meetings of the Board of Directors may be held within or without the State of Connecticut and shall be held at such place as shall be designated in the notice of the meeting. Except as otherwise provided in these Bylaws, two days' written or oral notice shall be given of each special meeting of the Board of Directors. No notice need be given of a regular meeting of the Board of Directors. Neither the business to be transacted at, nor the purpose of, any regular or special meeting of the Board of Directors need be specified in any notice or waiver of notice of such meeting unless otherwise required by law or specified herein. There shall be no voting by proxy.

Section 4.6 Quorum. A majority of the directors shall constitute a quorum at all meetings of the Board of Directors.

Section 4.7 Vote Required for Action. The act of a majority of the directors present at a meeting at which a quorum is present shall be the act of the Board of Directors, unless the act of a greater number is required by these Bylaws or by law.

Section 4.8 Action Without Meeting. If all the directors severally or collectively consent in writing to any action taken or to be taken by the Center, the action shall be as valid as

though it had been authorized at a meeting of the Board of Directors, and such written consent or consents shall be filed in the corporate minute book.

Section 4.9 Participation by Conference. A director may participate in a meeting of the Board of Directors by means of a conference telephone or similar communications equipment enabling all directors participating in the meeting to hear one another, and such participation in a meeting shall constitute presence in person at such meeting.

Section 4.10 Resignation of Directors. Any director and any non-voting director may resign at any time by giving written notice to the Board of Directors or to the Chairman, the Chief Executive Officer or the Secretary. The resignation shall take effect at the time specified in the notice and, unless otherwise specified in it, acceptance of the resignation shall not be necessary to make it effective.

Section 4.11 Removal of Directors. Any director and any non-voting director may be removed from office, with or without cause, at any time, regardless of the term for which such director may have been elected, by the member at any regular, annual or special meeting.

Section 4.12 Vacancies. In case of any vacancy in the Board of Directors by reason of the death, resignation, or removal of any director, the member may fill such vacancy for the remaining term of such directorship or, for any new or unoccupied directorships, may elect directors to serve until the next annual meeting.

ARTICLE V

COMMITTEES

Section 5.1 Establishment of Committees. The Board of Directors may, from time to time, establish such committees of the Board of Directors with such responsibilities as the Board of Directors shall determine. All committees shall act in an advisory capacity only and shall have no power or authority to bind the Center. Committees of the Board of Directors shall be standing and special. The standing committees shall include the Audit Committee, Development Committee, Director Affairs Committee, Finance Committee, Investment Committee, and Management Affairs Committee.

Section 5.2 Appointment of Members. Except as otherwise provided in these Bylaws, all committee chairmen and committee members shall be appointed from among the directors or others by the Chairman of the Board of Directors. The Chairman of the Board of Directors may increase or decrease the number of members on a committee, may fill vacancies on a committee and may remove, with or without cause, any chairman or member of a committee.

Section 5.3 Quorum; Vote Required for Action. A majority of the members of any committee shall constitute a quorum for the transaction of business at all meetings of the committee. The act of a majority of the members of any committee present at a meeting at which a quorum is present shall be the act of such committee, unless the act of a greater number is required by these Bylaws, by resolution of the Board of Directors or by law.

Section 5.4 Meetings of Committees. Except as otherwise provided in these Bylaws, each committee shall establish its own rules and procedures and shall fix the time and place of its meetings. Each committee shall keep minutes of its meetings which shall be made available to the Board of Directors upon request.

Section 5.5 Audit Committee. The Audit Committee shall cause an annual audit to be made of the books, accounts and records of the Center by certified public accountants under the supervision of the Audit Committee. The Audit Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 5.6 Development Committee. The Development Committee shall recommend policies and procedures for the development, growth, and management of the endowment funds of the Center and shall consider funding requests from affiliates. The Development Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 5.7 Director Affairs Committee. The Director Affairs Committee shall develop criteria for membership on the Board of Directors and its committees and shall consider the eligibility requirements and qualification specified in these Bylaws, as well as the interest and participation in Center matters of the individuals under consideration. It shall nominate for election members of the Board of Directors and shall assist in the selection of individuals for committee assignments. The Director Affairs Committee also shall review the performance of directors and recommend amendments to the Center's and Auxiliary's Bylaws and shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 5.8 Finance Committee. The Finance Committee shall review and recommend to the Board of Directors annual operating and capital budgets for the Center and shall monitor and oversee the financial performance of the Center. The Finance Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

Section 5.9 Investment Committee. The Investment Committee shall recommend policies and procedures for the investment of all funds of the Center and shall monitor and evaluate the performance of any investment managers charged with the investment of funds of the Center. The Investment Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide. The Chief Executive Officer and the Treasurer shall be members of the Investment Committee.

Section 5.10 Management Affairs Committee. The Management Affairs Committee shall establish performance goals for the Chief Executive Officer and President and shall conduct annual evaluations of their performance. It shall also review and recommend to the Board of Directors human resource, fringe benefit, and compensation policies and monitor compliance therewith and shall act in an advisory capacity to the Chief Executive Officer. The Management Affairs Committee also shall perform such other functions as a duly adopted resolution of the Board of Director may provide.

Section 5.11 Professional and Quality Review Committee. The Professional and Quality Review Committee shall compile and review information relating to the care and treatment of patients for the purposes of establishing mechanisms and policies for evaluating and improving quality of health care and reducing morbidity and mortality, performance improvement and risk management functions related to patient care and safety. The Professional and Quality Review Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

ARTICLE VI

OFFICERS

Section 6.1 Principal and Subordinate Officers. The principal officers of the Center shall be Chairman of the Board, Vice Chairmen of the Board, Chief Executive Officer, President, Secretary, and Treasurer. The subordinate officers shall consist of such other officers, assistant officers and agents as may be deemed necessary and as are elected or appointed by the Board of Directors, the Chief Executive Officer or as may be chosen in such other manner as may be prescribed or permitted by these Bylaws. Any two or more offices may be held by the same person provided that the same individual shall not simultaneously occupy the offices of (i) Chief Executive Officer or President and (ii) Secretary. The Chairman of the Board and Vice Chairmen shall be selected from among members of the Board of Directors.

Section 6.2 General Authority and Duties. All officers and agents of the Center shall have such authority and perform such duties in the management of the Center as may be provided in these bylaws or as may be determined by resolution of the Board of Directors not inconsistent with these Bylaws.

Section 6.3 Election, Term of Office, and Qualifications. The principal officers shall be chosen annually by the member at its annual meeting or as soon thereafter as conveniently possible. Subordinate officers may be elected or appointed by the Board of Directors or may be appointed by the Chief Executive Officer or any other principal officer to whom the Chairman of the Board of Directors shall delegate the authority of appointment. Each officer shall hold office until his successor is chosen and qualified, or until his death, his resignation, or his removal,

whichever event shall first occur. Election or appointment of an officer or agent shall not of itself create any contractual rights. An individual may not serve in the office of Chairman or Vice Chairman for more than four consecutive one year terms. Not included in this limitation shall be any term served prior to March 30, 1995 or any partial term served to fill a vacancy.

Section 6.4 Removal. Any officer or agent may be removed by the member whenever in its judgment the best interests of the Center will be served by so doing. Any subordinate officer or agent may also be removed by the Chief Executive Officer, or by any other principal officer having authority to designate or appoint the officer or agent to be removed, with or without cause. Any removal shall be without prejudice to the contract rights, if any, of the person so removed.

Section 6.5 Resignations. Any officer or agent may resign at any time by giving written notice to the Board of Directors or to the Chairman, the Chief Executive Officer or the Secretary. The resignation shall take effect at the time specified in the notice and, unless otherwise specified in it, acceptance of the resignation shall not be necessary to make it effective.

Section 6.6 Vacancies. Any vacancy in any office occurring by reason of death, resignation, removal, or any other cause shall be filled for the unexpired portion of the term in the manner prescribed in these Bylaws for election or appointment to the office.

Section 6.7 Chairman of the Board. The Chairman of the Board shall preside at the annual meeting of the Center and at all meetings of the Board of Directors, shall appoint members of all committees and the chairmen thereof, and shall perform such duties as the Board of Directors may from time to time assign to the Chairman of the Board and such other duties as are usual to this office.

Section 6.8 Vice Chairmen of the Board. The Vice Chairmen of the Board shall perform the duties of the Chairman of the Board in the event of the Chairman's absence or disability and shall assist the Chairman of the Board in such duties as the Chairman of the Board may from time to time assign to the Vice Chairmen of the Board.

Section 6.9 Chief Executive Officer. The Chief Executive Officer shall be responsible for seeing that the resolutions and actions of the Board of Directors are carried into effect, and for reporting to the Board of Directors on the conduct and management of the affairs of the Center.

Section 6.10 President. The President shall exercise general supervision of the business and affairs of the Center and over its officers and employees. The President shall have the authority to appoint and remove employees of the Center, including management level officers, and may delegate to such officers and employees such authority as he deems appropriate provided, however, he shall be responsible for their actions. The President shall have such additional duties and responsibilities as are assigned to him by the Chief Executive Officer.

Section 6.11 Treasurer. The Treasurer shall have supervision over the receipt and custody of the Center's funds, and shall cause to be kept correct and complete books and records of account, including full and accurate accounts of receipts and disbursements in books belonging to the Center, and in general shall perform all the duties incident to the office of Treasurer and such other duties as may be assigned to him by the Board of Directors, the Chairman of the Board of Directors, or the Chief Executive Officer. The Treasurer shall render to the Chairman of the Board, the Chief Executive Officer and the Board of Directors promptly upon its completion an annual report of the financial condition and operation of the Center prepared and certified by the independent certified auditors appointed by the Board of Directors.

Section 6.12 Secretary. The Secretary shall keep minutes of the proceedings of the Board of Directors shall give or cause to be given all notices in accordance with the provisions of these Bylaws or as required by law; and shall be custodian of the corporate records and of the seal of the Center. The Secretary also shall perform all duties incident to the office of Secretary and such other duties as may be assigned to him by the Board of Directors, the Chairman of the Board of Directors, or the Chief Executive Officer.

ARTICLE VII

INDEMNIFICATION OF CENTER DIRECTORS, CORPORATORS, OFFICERS, EMPLOYEES AND AGENTS

Section 7.1 Rights of Indemnification. Directors, officers, employees, and agents shall have the rights of indemnification provided by Section 33-454a of the Connecticut General Statutes.

Section 7.2 Payment of Expenses in Advance. Expenses which may be indemnifiable under the provisions of Section 33-454a of the Connecticut General Statutes, incurred in defending a proceedings, may be paid by the Center in advance of the final disposition of such proceeding when authorized by the Board of Directors upon agreement, by or on behalf of the individual entitled to be indemnified, to repay such amount if he is later found not entitled to be indemnified by the Center as authorized under the Bylaws.

ARTICLE VIII

THE AUXILIARY OF THE REHABILITATION CENTER OF FAIRFIELD COUNTY

Section 8.1 Purpose. The purposes of the Auxiliary shall be to promote the objectives of the Center and support its activities throughout the community. The Auxiliary shall not act contrary to the policies set forth by the Center's Board of Directors.

Section 8.2 Operation of Auxiliary. The Auxiliary shall have the right pursuant to its Constitution and Bylaws, to elect its officers, maintain its own bank accounts and collect membership dues.

Section 8.3 Adoption and Amendment of Constitution or Bylaws. The Auxiliary shall have the authority, subject to the review and approval of the Center's Board of Directors, to adopt and amend their Constitution and Bylaws.

ARTICLE IX

MISCELLANEOUS PROVISIONS

Section 9.1 Amendment. These Bylaws may be amended or repealed, and new Bylaws may be adopted, at any regular, annual or special meeting of the member. Any notice of a meeting of the member at which these Bylaws are to be amended or repealed, or new Bylaws are to be adopted, shall be given in writing not less than seven days or more than fifty days prior to such meeting and shall include notice of such proposed action..

Section 9.2 Fiscal Year. The fiscal year of the Center shall end on September 30 in each year unless the Board of Directors shall determine otherwise.

Section 9.3 Seal. The seal of the Center shall be circular in form and shall bear the name of the Corporation and shall be in such form as the Board of Directors may determine.

Section 9.4 Execution of Negotiable Instruments. All checks, drafts, notes, bonds, bills of exchange and orders for the payment of money shall be signed by the President, Chief Executive Officer, or such officer or officers of the Center as the Board of Directors shall specify from time to time. The Board of Directors may authorize the use of facsimile signatures of any officer or employee in lieu of manual signatures.

Section 9.5 Execution of Deeds and Contracts. Subject to the general directions of the Board of Directors, all deeds and mortgages made by the Center and all other written contracts, agreements and undertakings to which the Center shall be a party shall be executed in its name by the Chief Executive Officer, President or such other officer as may be specified by the Board of Directors or authorized by the Chief Executive Officer or President and, when requested, the Secretary shall attest to such signatures and affix the corporate seal to such instruments.

Section 9.6 Conflict of Interest. If any director or member of a director's immediate family has an interest in any contract or transaction involving the Corporation, the provisions of Section 33-457 of the Connecticut General Statutes shall determine the obligation of a director to disclose such interest to the Board of Directors and the legal effect of such contract or transaction.

Section 9.7 Connecticut General Statutes. Any reference herein to a section of the Connecticut General Statutes shall include reference to any amendment of such section or any successor statute.

Section 9.8 Pronouns. References herein to the masculine shall include references to the feminine, references to the singular shall include references to the plural and references to the plural shall include references to the singular, where the context of the language involved so permits or requires.

**BYLAWS  
OF  
NOVAMED CORPORATION**

(The "Corporation")

**ARTICLE I**

**OFFICES**

**Section 1.1 Principal Office.** The principal office of the Corporation shall be at such place in the United States as the Board of Directors shall from time to time designate.

**Section 1.2 Additional Offices.** The Corporation may have such additional offices, either within or without the United States, as the Board of Directors may from time to time designate or the business of the Corporation may require.

**ARTICLE II**

**MEETINGS OF SHAREHOLDERS**

**Section 2.1 Place of Meetings.** All meetings of the shareholders shall be held either at the principal office or place of business of the Corporation, or at such other place within or without the United States as from time to time may be designated by the Board of Directors.

**Section 2.2 Annual Meetings.** The annual meetings of shareholders shall be held on such day (other than a legal holiday) in each calendar year and at such time and place as may be designated by the Board of Directors or the President, for the election of directors and for the transaction of such other business as may properly come before such meeting.

**Section 2.3 Special Meetings.** Special meetings of the shareholders may be called at any time by the Board of Directors, the Chairman of the Board of Directors, or the President, and shall be called by the President or the Secretary upon the written request of a majority of the directors then in office or upon the written request of one or more shareholders holding in the aggregate at least 10% of the total number of shares outstanding and entitled to vote. Each such request shall state the purposes for which the requested meeting is to be called.

**Section 2.4 Notice of Annual or Special Meeting.** A notice setting forth the day, hour and place of each annual or special meeting of shareholders shall be mailed, postage prepaid, to each shareholder of record, at his last known post office address as the same appears on the stock records of the Corporation, or such notice shall be left with each such shareholder at his residence or usual place of business, not less than seven nor more than fifty days before such annual or

special meeting. In the case of a special meeting, the notice shall also state the general purpose or purposes thereof.

**Section 2.5 Waiver of Notice.** Notice of any shareholders' meeting may be waived in writing by any shareholder either before or after the time stated therein for convening the meeting and, if any person present in person or by proxy at a shareholders' meeting does not protest the lack of proper notice prior to or at the commencement of the meeting, such person shall be deemed to have waived notice of such meeting.

**Section 2.6 Quorum** The holders of a majority of the issued and outstanding stock entitled to vote, present either in person or by proxy, shall constitute a quorum for the transaction of business at any meeting of the shareholders. The shareholders present at a validly called and convened meeting at which a quorum is present may continue to transact business notwithstanding the withdrawal of persons holding enough shares to leave less than a quorum

**Section 2.7 Adjournment of Shareholders' Meeting.** If a quorum is not present at any meeting of the shareholders, the holders of a majority of the voting power of the shares entitled to vote who are present, in person or by proxy, may adjourn the meeting to such future time as shall be agreed upon by them and announced at the meeting, and no notice of such adjournment need be given to the shareholders not present or represented at the meeting unless the adjournment is for more than 30 days or, if after the adjournment, a new record date is fixed for the adjourned meeting; in either of the latter two events, a notice of the adjourned meeting shall be given to each shareholder of record entitled to vote at the meeting.

**Section 2.8 Proxies.** At all meetings of the shareholders, any shareholder entitled to vote may vote either in person or by written proxy signed by such shareholder or by his duly authorized attorney-in-fact or other legal representative.

**Section 2.9 Number of Votes of Each Shareholder.** Each outstanding share, regardless of class, shall be entitled to one vote on each matter submitted to a vote at a meeting of shareholders unless, and except to the extent that, voting rights of shares of any class are increased, limited or denied by the Corporation's Certificate of Incorporation.

**Section 2.10 Voting.** In voting on any question on which a vote by ballot is required by law or is demanded by any shareholder, the voting shall be by ballot; on all other questions it may be by voice vote.

**Section 2.11 Consent of Shareholders in Lieu of Meeting.** Except as otherwise provided in the Certificate of Incorporation of the Corporation, any action required to be, or which may be, taken at any annual or special meeting of the shareholders of the Corporation may be taken without a meeting, without prior notice and without a vote, if a consent in writing, setting forth the action so taken, shall be signed by the holders (or their duly authorized attorneys or other legal

representatives) of all of the validly issued and outstanding shares of common stock which would be entitled to vote upon such action at such meeting.

### ARTICLE III

#### **BOARD OF DIRECTORS**

**Section 3.1 General Powers.** The activities, properties and affairs of the Corporation shall be managed by its Board of Directors, which shall exercise all of the responsibilities conferred upon the Board of Directors by the Connecticut Stock Corporation Act, the Certificate of Incorporation and these Bylaws, as each may be amended from time to time.

**Section 3.2 Number, Election and Term of Office.** The property, business and affairs of the Corporation shall be managed by a Board of Directors consisting of not less than three nor more than eight, which number may be fixed, changed and reestablished from time to time by the shareholders entitled to elect the Board of Directors. Included in this number shall be the President of the Corporation, the Chief Executive Officer of Southern Connecticut Health System, Inc., the Chief Financial Officer of Southern Connecticut Health System, Inc., and the General Counsel of Southern Connecticut Health System, Inc. Each such person shall be a director ex-officio with vote, whose presence shall count in determining whether a quorum is present but who shall not be subject to the age provisions of these Bylaws. Directors shall be elected by the shareholders at the annual meeting or at any special meeting called for the election of directors, and it shall not be a qualification of office that the directors be shareholders of the Corporation or residents of any of the United States. Each director shall hold office for a term of one year or until his successor has been elected and qualified except that a director shall cease to be in office upon his death, resignation or removal. A director ex-officio shall cease to be in office as a director upon his resignation or removal from the office that entitles him to serve as a director ex-officio or his removal pursuant to Section 3.14. Except as otherwise provided herein, directors who have attained age 70 shall not be eligible to continue to serve as directors beyond the annual meeting of the shareholders following the director's 70th birthday.

**Section 3.3 Annual Meeting.** The annual meeting of the Board of Directors shall be held each year on such date, at such time, and at such place as the Board of Directors may determine. At such meeting, the Board of Directors shall elect the subordinate officers of the Corporation and shall transact such other business relating to the affairs of the Corporation as may come before the meeting. No notice need be given of an annual meeting of the Board of Directors. There shall be no voting by proxy.

**Section 3.4 Regular and Special Meetings.** Regular meetings of the Board of Directors shall be held at such times as the Board of Directors shall from time to time determine. Special meetings of the Board of Directors may be called at any time by the Chairman, the Chief

Executive Officer, or upon the written request of a majority of the directors then in office. Meetings of the Board of Directors may be held within or without the State of Connecticut and shall be held at such place as shall be designated in the notice of the meeting. Except as otherwise provided in these Bylaws, two days' written or oral notice shall be given of each special meeting of the Board of Directors. No notice need be given of a regular meeting of the Board of Directors. Neither the business to be transacted at, nor the purpose of, any regular or special meeting of the Board of Directors need be specified in any notice or waiver of notice of such meeting unless otherwise required by law or specified herein. There shall be no voting by proxy.

**Section 3.5 Quorum.** A majority of the directors shall constitute a quorum at all meetings of the Board of Directors.

**Section 3.6 Vote Required for Action.** The act of a majority of the directors present at a meeting at which a quorum is present shall be the act of the Board of Directors, unless the act of a greater number is required by these Bylaws or by law.

**Section 3.7 Action Without Meeting.** If all the directors severally or collectively consent in writing to any action taken or to be taken by the Corporation, the action shall be as valid as though it had been authorized at a meeting of the Board of Directors, and such written consent or consents shall be filed in the corporate minute book.

**Section 3.8 Participation by Conference.** A director may participate in a meeting of the Board of Directors by means of a conference telephone or similar communications equipment enabling all directors participating in the meeting to hear one another, and such participation in a meeting shall constitute presence in person at such meeting.

**Section 3.9 Resignation of Directors.** Any director may resign at any time by giving written notice to the Board of Directors or to the Chairman, the Chief Executive Officer or the Secretary. The resignation shall take effect at the time specified in the notice and, unless otherwise specified in it, acceptance of the resignation shall not be necessary to make it effective.

**Section 3.10 Removal of Directors.** Any director may be removed from office, with or without cause, at any time, regardless of the term for which such director may have been elected, by the shareholders at any regular, annual or special meeting.

**Section 3.11 Vacancies.** In case of any vacancy in the Board of Directors by reason of the death, resignation, or removal of any director, the shareholders may fill such vacancy for the remaining term of such directorship or, for any new or unoccupied directorships, may elect director to serve until the next annual meeting.

**ARTICLE IV**  
**COMMITTEES**

**Section 4.1 Establishment of Committees.** The Board of Directors may, from time to time, establish such committees of the Board of Directors with such responsibilities as the Board of Directors shall determine. All committees shall act in an advisory capacity only and shall have no power or authority to bind the Corporation. Committees of the Board of Directors shall be standing and special. The standing committees shall include the Audit Committee, Finance Committee and Investment Committee.

**Section 4.2 Appointment of Members.** Except as otherwise provided in these Bylaws, all committee chairmen and committee members shall be appointed from among the directors or others, by the Chairman of the Board of Directors. The Chairman of the Board of Directors may increase or decrease the number of members on a committee, may fill vacancies on a committee and may remove, with or without cause, any chairman or member of a committee.

**Section 4.3 Quorum; Vote Required for Action.** A majority of the members of any committee shall constitute a quorum for the transaction of business at all meetings of the committee. The act of a majority of the members of any committee present at a meeting at which a quorum is present shall be the act of such committee, unless the act of a greater number is required by these Bylaws, by resolution of the Board of Directors or by law.

**Section 4.4 Meetings of Committees.** Except as otherwise provided in these Bylaws, each committee shall establish its own rules and procedures and shall fix the time and place of its meetings. Each committee shall keep minutes of its meetings which shall be made available to the Board of Directors upon request.

**Section 4.5 Audit Committee.** The Audit Committee shall cause an annual audit to be made of the books, accounts and records of the Corporation by certified public accountants under the supervision of the Audit Committee. The Audit Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

**Section 4.6 Finance Committee.** The Finance Committee shall review and recommend to the Board of Directors annual operating and capital budgets for the Corporation and shall monitor and oversee the financial performance of the Corporation. The Finance Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

**Section 4.7 Investment Committee.** The Investment Committee shall recommend policies and procedures for the investment of all funds of the Corporation and shall monitor and evaluate the performance of any investment managers charged with the investment of funds of the

Corporation. The Investment Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

## ARTICLE V

### OFFICERS

**Section 5.1 Principal and Subordinate Officers.** The principal officers shall consist of the Chairman of the Board, the President, the Secretary and the Treasurer. The subordinate officers shall consist of such other officers, assistant officers and agents as may be deemed necessary and as are elected or appointed by the Board of Directors, the Chairman of the Board, the President or as may be chosen in such other manner as may be prescribed or permitted by these Bylaws. Any two or more principal offices may be held by the same person, and any one or more subordinate offices may be held by any principal or subordinate officer; provided that the same individual shall not simultaneously occupy the offices of both President and Secretary.

**Section 5.2 General Authority and Duties.** All officers and agents of the Corporation shall have such authority and perform such duties in the management of the Corporation as may be provided in these Bylaws or as may be determined by resolution of the Board of Directors not inconsistent with these Bylaws.

**Section 5.3 Election, Term of Office, and Qualifications.** The principal officers shall be chosen annually by the shareholders at its annual meeting or as soon thereafter as conveniently possible. Subordinate officers may be elected or appointed by the Board of Directors or may be appointed by the Chairman or President or any other principal officer to whom the Chairman of the Board of Directors shall delegate the authority of appointment. Each officer shall hold office until his successor is chosen and qualified, or until his death, his resignation, or his removal, whichever event shall first occur. Election or appointment of an officer or agent shall not of itself create any contractual rights

**Section 5.4 Removal.** Any officer or agent may be removed by the shareholders whenever in their judgment the best interests of the Corporation will be served by so doing. Any subordinate officer or agent may also be removed by the President, or by any other principal officer having authority to designate or appoint the officer or agent to be removed, with or without cause. Any removal shall be without prejudice to the contract rights, if any, of the person so removed.

**Section 5.5 Resignations.** Any officer or agent may resign at any time by giving written notice to the Board of Directors or to the Chairman, the President or the Secretary. The resignation shall take effect at the time specified in the notice and, unless otherwise specified in it, acceptance of the resignation shall not be necessary to make it effective.

**Section 5.6 Vacancies.** Any vacancy in any office occurring by reason of death, resignation, removal, or any other cause shall be filled for the unexpired portion of the term in the manner prescribed in these Bylaws for election or appointment to the office.

**Section 5.7 Chairman of the Board.** The Chairman of the Board, who shall be the Chief Executive Officer of Southern Connecticut Health System, Inc. and a director ex-officio, shall preside at all meetings of the Board of Directors, if present, and shall, in general, perform all duties incident to the office of Chairman of the Board and such other duties as may be assigned to him by the Board of Directors.

**Section 5.8 President.** The President, who need not be chosen from among the directors but who shall become a director ex-officio when chosen for office, shall have active executive management of the operations of the Corporation, subject, however, to the control of the Board of Directors and to the restrictions or limitations imposed by any applicable rules, regulations or contractual provisions. The President shall report to the Chairman of the Board. In the absence of the Chairman of the Board, the President shall preside at meetings of the Board of Directors.

**Section 5.9 Secretary.** The Secretary shall keep or cause to be kept in books provided for that purpose the minutes of the meetings of the shareholders and of the Board of Directors; shall see that all notices are duly given in accordance with the provisions of these Bylaws and as required by law; shall be custodian of the records and of the seal of the Corporation and shall see that the seal is affixed to all documents, the execution of which on behalf of the Corporation under its seal is duly authorized; and, in general, shall perform all duties incident to the office of Secretary and such other duties as may be assigned to him by the Board of Directors, the Chairman of the Board or the President.

**Section 5.10 Treasurer.** The Treasurer shall be the chief financial officer; shall have charge and custody of, and be responsible for, all funds and deposit all such funds in the name of the Corporation in such banks, trust companies, or other depositories as shall be selected by the Board of Directors; shall receive and give receipts for monies due and payable to the Corporation from any source whatsoever; and, in general, shall perform all the duties incident to the office of Treasurer and such other duties as may be assigned to him by the Board of Directors, the Chairman of the Board of Directors, or the President. The Treasurer shall render to the Chairman of the Board, the President, and the Board of Directors, whenever the same shall be required, an account of all his transactions as Treasurer and of the financial condition of the Corporation. He shall, if required so to do by the Board of Directors, give the Corporation a bond in such amount and with such surety or sureties as may be ordered by the Board of Directors for the faithful performance of the duties of his office and for the restoration to the Corporation, in case of his death, resignation, retirement, or removal from office, of all books, papers, vouchers, money, and other property of whatever kind in his possession or under his control belonging to the Corporation.

## ARTICLE VI

### ISSUE AND TRANSFER OF CAPITAL STOCK

**Section 6.1 Certificates.** Certificates of capital stock and other documentary evidences of equity securities shall be in the form authorized or adopted by the Board of Directors and shall be consecutively numbered. Each certificate shall set forth upon its face as at the time of issue: the name of the Corporation; a statement that the Corporation is organized under the laws of the State of Connecticut; the name of the person to whom issued; the number, class and designation of series, if any, of shares or units represented thereby; and the par value of each such share. Each certificate shall be signed by the President and by the Secretary or the Treasurer, and shall be sealed with the seal of the Corporation or a facsimile thereof; provided that the certificate shall also contain such other recitals as may from time to time be required by law. The signatures of any officers upon a certificate may be facsimiles if the certificate is countersigned by a transfer agent, or registered by a registrar, other than the Corporation itself or an employee of the Corporation. In case any officer who has signed or whose facsimile signature has been placed upon a certificate shall have ceased to be such officer before such certificate is issued, it may be issued by the Corporation with the same effect as if he were such officer at the date of its issue.

Whenever the Corporation shall be authorized to issue more than one class of stock or more than one series of any class of stock, the certificates representing shares of any such class or series shall set forth thereon the statements prescribed by the law of Connecticut. Any restrictions on the transfer or registration of transfer of any shares of stock or any class or series shall be noted conspicuously on the certificate representing such shares

**Section 6.2 Transfer.** The capital stock or other equity securities of the Corporation shall be transferred only upon the books of the Corporation either by the shareholder in person or by power of attorney executed by him for that purpose upon the surrender for cancellation of the old stock certificate. Prior to due presentment for registration of transfer of a certificate, the Corporation may treat the registered owner of such certificate as the person exclusively entitled to vote, receive notifications and distributions, and otherwise to exercise all the rights and powers of the shares represented by such certificate.

**Section 6.3 Lost Certificates.** The Corporation may issue a new certificate of stock in place of any certificate theretofore issued by it, alleged to have been lost, stolen or destroyed, and the Board of Directors may require the owner of any lost, stolen or destroyed certificate, or his legal representative, to give the Corporation a bond sufficient to indemnify the Corporation against any claim that may be made against it on account of the alleged loss, theft or destruction of any such certificate or the issuance of any such new certificate.

**ARTICLE VII****SPECIAL CORPORATE ACTS**

**Section 7.1 Execution of Negotiable Instruments.** All checks, drafts, notes, bonds, bills of exchange, and orders for the payment of money shall be signed by the Chairman of the Board or the President or such officer or officers of the Corporation as the Board shall determine from time to time. The Board of Directors may authorize the use of facsimile signatures of any officer or employee in lieu of manual signatures

**Section 7.2 Execution of Deeds, Contracts, etc.** Subject to the general directions of the Board of Directors, all deeds and mortgages made by the Corporation and all other written contracts, agreements, and undertakings to which the Corporation shall be a party shall be executed in its name by the Chairman of the Board or the President or such other officer as may be specified by the Board of Directors or authorized by the Chairman of the Board or President and, when requested, the Secretary shall attest to such signatures and affix the corporate seal to the instruments.

**Section 7.3 Endorsement of Stock Certificates.** Subject to the general directions of the Board of Directors, any share or shares of stock issued by any corporation and owned by the Corporation (including reacquired shares of stock of the Corporation) may, for sale or transfer, be endorsed in the name of the Corporation by the Chairman of the Board or the President and his signature shall be attested to by the Secretary who shall affix the corporate seal.

**Section 7.4 Voting of Shares Owned by Corporation.** Subject to the general directions of the Board of Directors, any share or shares of stock issued by any other corporation and owned or controlled by the Corporation may be voted at any shareholders' meeting of the other corporation by the Chairman of the Board or the President of the Corporation. Whenever, in the judgment of the Chairman of the Board or the President it is desirable for the Corporation to execute a proxy or give a shareholders' consent in respect to any share or shares of stock issued by any other corporation and owned or controlled by the Corporation, the proxy or consent shall be executed in the name of the Corporation by the Chairman of the Board or the President without necessity of any authorization by the Board of Directors. Any person or persons designated in the manner above stated as the proxy or proxies of the Corporation shall have full right, power, and authority to vote the share or shares of stock issued by the other corporation.

### ARTICLE VIII

#### **INDEMNIFICATION OF CORPORATION DIRECTORS, OFFICERS, EMPLOYEES, SHAREHOLDERS AND AGENTS**

**Section 8.1 Rights of Indemnification.** Shareholders, directors, officers, employees, and agents shall have the rights of indemnification provided by Sec. 33-320a of the Connecticut General Statutes.

**Section 8.2 Payment of Expenses in Advance.** Expenses which may be indemnifiable under the provisions of Section 33-320a of the Connecticut General Statutes, incurred in defending a proceeding, may be paid by the Corporation in advance of the final disposition of such proceeding when authorized by the Board of Directors upon agreement, by or on behalf of the individual entitled to be indemnified, to repay such amount if he is later found not entitled to be indemnified by the Corporation as authorized under these Bylaws.

### ARTICLE IX

#### **AMENDMENTS AND MISCELLANEOUS**

**Section 9.1 Amendment.** The shareholders shall have the power to make, amend and repeal these Bylaws, in whole or in part, by the affirmative vote of the holders of a majority of the capital stock of the Corporation outstanding and entitled to vote in the election of directors of the Corporation. Any such vote of shareholders making, amending or repealing the Bylaws may be had at any annual or special meeting of shareholders, provided that notice of the intention or proposal to make, amend or repeal the Bylaws at such meeting previously shall have been given to the shareholders entitled to vote thereon.

**Section 9.2 Fiscal Year.** The fiscal year of the Corporation shall end on September 30 in each year unless the Board of Directors shall determine otherwise.

**Section 9.3 Seal.** The seal of the Corporation shall have inscribed thereon the name of the Corporation, the word "Seal" and the word "Connecticut", and shall be maintained in the custody of the Secretary.

**Section 9.4 Conflicts of Interest.** If any director or member of a director's immediate family has an interest in any contract or transaction involving the Corporation, the provisions of Section 33-323 of the Connecticut General Statutes shall determine the obligation of a director to disclose such interest to the Board of Directors and the enforceability of such contract or transaction.

**Section 9.5 Pronouns.** References herein to the masculine shall include reference to the feminine, reference to the singular shall include references to the plural and references to the plural shall include the singular, where the context of the language involved so permits or requires.

**Section 9.6 Connecticut General Statutes.** Any reference herein to a section of the Connecticut General Statutes shall include reference to any amendment of such section or any successor statute.

**BYLAWS**  
**OF**  
**SCHS PROPERTIES, INC.**  
**(The "Corporation")**

**ARTICLE I**

**OFFICES**

**Section 1.1 Principal Office.** The principal office of the Corporation shall be at such place in the United States as the Board of Directors shall from time to time designate.

**Section 1.2 Additional Offices.** The Corporation may have such additional offices, either within or without the United States, as the Board of Directors may from time to time designate or the business of the Corporation may require.

**ARTICLE II**

**MEMBERSHIP**

**Section 2.1 Sole Member.** The Corporation shall have but one member, Southern Connecticut Health System, Inc., which shall have the right to elect the Board of Directors of the Corporation in accordance with these Bylaws, and shall have all of the other rights, powers and privileges usually or by law accorded to the members of a nonstock nonprofit corporation and not conferred thereby or by the Certificate of Incorporation or Bylaws upon the Board of Directors of the Corporation.

**Section 2.2 Specific Rights, Powers and Privileges.** In addition to such other rights, powers and privileges as it may have by law, the member shall have the following rights, powers and privileges:

- A. To elect the Board of Directors of the Corporation in accordance with the provisions of these Bylaws;
- B. To remove any director of the Board of Director's at any time in accordance with the provisions of these Bylaws;
- C. To elect and remove at any time any officer of the Corporation in accordance with the provisions of these Bylaws;

- D. To vote upon all matters on which members are entitled to vote under the Nonstock Corporation Act of the State of Connecticut;
- E. To act on any other matters on which action by members is required or permitted by these Bylaws;
- F. To approve the Corporation's business plan, annual operating and capital budgets, and plans that materially affect the growth, operation and development of the Corporation.

**Section 2.3 Meetings of the Member.** The annual meeting of the member shall be held on such day and at such time and place as may be designated by the Board of Directors or the Chairman of the Board of Directors for the purposes set forth in Sections 2.1 and 2.2 herein and for the transaction of any other business as may properly come before such meeting. Regular meetings of the member shall be held at such times as the Board of Directors shall from time to time determine. Special meetings of the member may be called at any time by the Board of Directors, the Chairman of the Board of Directors, the Chief Executive Officer or the member. Each such request for a special meeting shall state the purposes for which the requested meeting is to be called. The member shall cast one vote on each matter submitted to a vote at each regular, annual and special meeting. Except as otherwise provided, any action required to be, or which may be, taken at any regular, annual or special meeting of the member may be taken without a meeting, without prior notice and without a vote, if a consent in writing, setting forth the action so taken, shall be signed by the member.

**Section 2.4 Notice of Meeting.** A notice of each meeting of the member shall be given in writing to the member not less than seven days or more than fifty days before the date of the meeting. Each notice shall state the place, day and hour of the meeting. The general purpose for which a special meeting is called shall be stated in the notice thereof, and no other business shall be transacted at the meeting.

**Section 2.5 Waiver of Notice.** Notice of any meeting of the member may be waived in writing by the member.

### **ARTICLE III**

#### **BOARD OF DIRECTORS**

**Section 3.1 General Powers.** Subject to the rights, powers and privileges accorded to the Corporation's sole member by law, the Certificate of Incorporation or these Bylaws, the activities, properties and affairs of the Corporation shall be managed by its Board of Directors, which shall exercise all of the responsibilities conferred upon the Board of Directors by the

Connecticut Nonstock Corporation Act, the Certificate of Incorporation and these Bylaws, as each may be amended from time to time.

**Section 3.2 Number, Election and Term of Office.** The property, business and affairs of the Corporation shall be managed by a Board of Directors consisting of not less than three nor more than eight, which number may be fixed, changed and reestablished from time to time by the member. Included in this number shall be the President of the Corporation, the Chief Executive Officer of Southern Connecticut Health System, Inc., the Chief Financial Officer of Southern Connecticut Health System, Inc., and the General Counsel of Southern Connecticut Health System, Inc. Each such person shall be a director ex-officio with vote, whose presence shall count in determining whether a quorum is present but who shall not be subject to the age provisions of these Bylaws. Directors shall be elected by the member at the annual meeting or at any special meeting called for the election of directors, and it shall not be a qualification of office that the directors be residents of any of the United States. Each director shall hold office for a term of one year or until his successor has been elected and qualified except that a director shall cease to be in office upon his death, resignation or removal. A director ex-officio shall cease to be in office as a director upon his resignation or removal from the office that entitles him to serve as a director ex-officio or his removal pursuant to Section 3.14. Except as otherwise provided herein, directors who have attained age 70 shall not be eligible to continue to serve as directors beyond the annual meeting of the member following the director's 70th birthday.

**Section 3.3 Annual Meeting.** The annual meeting of the Board of Directors shall be held each year on such date, at such time, and at such place as the Board of Directors may determine. At such meeting, the Board of Directors shall elect the subordinate officers of the Corporation and shall transact such other business relating to the affairs of the Corporation as may come before the meeting. No notice need be given of an annual meeting of the Board of Directors. There shall be no voting by proxy.

**Section 3.4 Regular and Special Meetings.** Regular meetings of the Board of Directors shall be held at such times as the Board of Directors shall from time to time determine. Special meetings of the Board of Directors may be called at any time by the Chairman, the Chief Executive Officer, or upon the written request of a majority of the directors then in office. Meetings of the Board of Directors may be held within or without the State of Connecticut and shall be held at such place as shall be designated in the notice of the meeting. Except as otherwise provided in these Bylaws, two days' written or oral notice shall be given of each special meeting of the Board of Directors. No notice need be given of a regular meeting of the Board of Directors. Neither the business to be transacted at, nor the purpose of, any regular or special meeting of the Board of Directors need be specified in any notice or waiver of notice of such meeting unless otherwise required by law or specified herein. There shall be no voting by proxy.

**Section 3.5 Quorum.** A majority of the directors shall constitute a quorum at all meetings of the Board of Directors.

**Section 3.6 Vote Required for Action.** The act of a majority of the directors present at a meeting at which a quorum is present shall be the act of the Board of Directors, unless the act of a greater number is required by these Bylaws or by law.

**Section 3.7 Action Without Meeting.** If all the directors severally or collectively consent in writing to any action taken or to be taken by the Corporation, the action shall be as valid as though it had been authorized at a meeting of the Board of Directors, and such written consent or consents shall be filed in the corporate minute book.

**Section 3.8 Participation by Conference.** A director may participate in a meeting of the Board of Directors by means of a conference telephone or similar communications equipment enabling all directors participating in the meeting to hear one another, and such participation in a meeting shall constitute presence in person at such meeting.

**Section 3.9 Resignation of Directors.** Any director may resign at any time by giving written notice to the Board of Directors or to the Chairman, the Chief Executive Officer or the Secretary. The resignation shall take effect at the time specified in the notice and, unless otherwise specified in it, acceptance of the resignation shall not be necessary to make it effective.

**Section 3.10 Removal of Directors.** Any director may be removed from office, with or without cause, at any time, regardless of the term for which such director may have been elected, by the member at any regular, annual or special meeting.

**Section 3.11 Vacancies.** In case of any vacancy in the Board of Directors by reason of the death, resignation, or removal of any director, the member may fill such vacancy for the remaining term of such directorship or, for any new or unoccupied directorships, may elect director to serve until the next annual meeting.

## ARTICLE IV

### COMMITTEES

**Section 4.1 Establishment of Committees.** The Board of Directors may, from time to time, establish such committees of the Board of Directors with such responsibilities as the Board of Directors shall determine. All committees shall act in an advisory capacity only and shall have no power or authority to bind the Corporation. Committees of the Board of Directors shall be standing and special. The standing committees shall include the Audit Committee, Finance Committee and Investment Committee.

**Section 4.2 Appointment of Members.** Except as otherwise provided in these Bylaws, all committee chairmen and committee members shall be appointed from among the directors or others, by the Chairman of the Board of Directors. The Chairman of the Board of Directors may increase or decrease the number of members on a committee, may fill vacancies on a committee and may remove, with or without cause, any chairman or member of a committee.

**Section 4.3 Quorum; Vote Required for Action.** A majority of the members of any committee shall constitute a quorum for the transaction of business at all meetings of the committee. The act of a majority of the members of any committee present at a meeting at which a quorum is present shall be the act of such committee, unless the act of a greater number is required by these Bylaws, by resolution of the Board of Directors or by law.

**Section 4.4 Meetings of Committees.** Except as otherwise provided in these Bylaws, each committee shall establish its own rules and procedures and shall fix the time and place of its meetings. Each committee shall keep minutes of its meetings which shall be made available to the Board of Directors upon request.

**Section 4.5 Audit Committee.** The Audit Committee shall cause an annual audit to be made of the books, accounts and records of the Corporation by certified public accountants under the supervision of the Audit Committee. The Audit Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

**Section 4.6 Finance Committee.** The Finance Committee shall review and recommend to the Board of Directors annual operating and capital budgets for the Corporation and shall monitor and oversee the financial performance of the Corporation. The Finance Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

**Section 4.7 Investment Committee.** The Investment Committee shall recommend policies and procedures for the investment of all funds of the Corporation and shall monitor and evaluate the performance of any investment managers charged with the investment of funds of the Corporation. The Investment Committee shall perform such other functions as a duly adopted resolution of the Board of Directors may provide.

## ARTICLE V

### OFFICERS

**Section 5.1 Principal and Subordinate Officers.** The principal officers shall consist of the Chairman of the Board, the President, the Secretary and the Treasurer. The subordinate officers shall consist of such other officers, assistant officers and agents as may be deemed necessary and as are elected or appointed by the Board of Directors, the Chairman of the Board, the President or as may be chosen in such other manner as may be prescribed or permitted by these Bylaws. Any two or more principal offices may be held by the same person, and any one

or more subordinate offices may be held by any principal or subordinate officer; provided that the same individual shall not simultaneously occupy the offices of both President and Secretary.

**Section 5.2 General Authority and Duties.** All officers and agents of the Corporation shall have such authority and perform such duties in the management of the Corporation as may be provided in these Bylaws or as may be determined by resolution of the Board of Directors not inconsistent with these Bylaws.

**Section 5.3 Election, Term of Office, and Qualifications.** The principal officers shall be chosen annually by the member at its annual meeting or as soon thereafter as conveniently possible. Subordinate officers may be elected or appointed by the Board of Directors or may be appointed by the Chairman or President or any other principal officer to whom the Chairman of the Board of Directors shall delegate the authority of appointment. Each officer shall hold office until his successor is chosen and qualified, or until his death, his resignation, or his removal, whichever event shall first occur. Election or appointment of an officer or agent shall not of itself create any contractual rights

**Section 5.4 Removal.** Any officer or agent may be removed by the member whenever in its judgment the best interests of the Corporation will be served by so doing. Any subordinate officer or agent may also be removed by the President, or by any other principal officer having authority to designate or appoint the officer or agent to be removed, with or without cause. Any removal shall be without prejudice to the contract rights, if any, of the person so removed.

**Section 5.5 Resignations.** Any officer or agent may resign at any time by giving written notice to the Board of Directors or to the Chairman, the President or the Secretary. The resignation shall take effect at the time specified in the notice and, unless otherwise specified in it, acceptance of the resignation shall not be necessary to make it effective.

**Section 5.6 Vacancies.** Any vacancy in any office occurring by reason of death, resignation, removal, or any other cause shall be filled for the unexpired portion of the term in the manner prescribed in these Bylaws for election or appointment to the office.

**Section 5.7 Chairman of the Board.** The Chairman of the Board, who shall be the Chief Executive Officer of Southern Connecticut Health System, Inc. and a director ex-officio, shall preside at all meetings of the Board of Directors, if present, and shall, in general, perform all duties incident to the office of Chairman of the Board and such other duties as may be assigned to him by the Board of Directors.

**Section 5.8 President.** The President, who need not be chosen from among the directors but who shall become a director ex-officio when chosen for office, shall have active executive management of the operations of the Corporation, subject, however, to the control of the Board of Directors and to the restrictions or limitations imposed by any applicable rules, regulations or contractual provisions. The President shall report to the Chairman of the Board.

In the absence of the Chairman of the Board, the President shall preside at meetings of the Board of Directors.

**Section 5.9 Secretary.** The Secretary shall keep or cause to be kept in books provided for that purpose the minutes of the meetings of the shareholders and of the Board of Directors; shall see that all notices are duly given in accordance with the provisions of these Bylaws and as required by law; shall be custodian of the records and of the seal of the Corporation and shall see that the seal is affixed to all documents, the execution of which on behalf of the Corporation under its seal is duly authorized; and, in general, shall perform all duties incident to the office of Secretary and such other duties as may be assigned to him by the Board of Directors, the Chairman of the Board or the President.

**Section 5.10 Treasurer.** The Treasurer shall be the chief financial officer; shall have charge and custody of, and be responsible for, all funds and deposit all such funds in the name of the Corporation in such banks, trust companies, or other depositories as shall be selected by the Board of Directors; shall receive and give receipts for monies due and payable to the Corporation from any source whatsoever; and, in general, shall perform all the duties incident to the office of Treasurer and such other duties as may be assigned to him by the Board of Directors, the Chairman of the Board of Directors, or the President. The Treasurer shall render to the Chairman of the Board, the President, and the Board of Directors, whenever the same shall be required, an account of all his transactions as Treasurer and of the financial condition of the Corporation. He shall, if required so to do by the Board of Directors, give the Corporation a bond in such amount and with such surety or sureties as may be ordered by the Board of Directors for the faithful performance of the duties of his office and for the restoration to the Corporation, in case of his death, resignation, retirement, or removal from office, of all books, papers, vouchers, money, and other property of whatever kind in his possession or under his control belonging to the Corporation.

## ARTICLE VI

### **INDEMNIFICATION OF CORPORATION DIRECTORS, OFFICERS, EMPLOYEES, AND AGENTS**

**Section 6.1 Rights of Indemnification.** Directors, officers, employees, and agents shall have the rights of indemnification provided by Sec. 33-454a of the Connecticut General Statutes.

**Section 6.2 Payment of Expenses in Advance.** Expenses which may be indemnifiable under the provisions of Section 33-454a of the Connecticut General Statutes, incurred in defending a proceeding, may be paid by the Corporation in advance of the final disposition of such proceeding when authorized by the Board of Directors upon agreement, by or on behalf of the

individual entitled to be indemnified, to repay such amount if he is later found not entitled to be indemnified by the Corporation as authorized under these Bylaws.

## ARTICLE VII

### MISCELLANEOUS PROVISIONS

**Section 7.1 Amendment.** These Bylaws may be amended or repealed, and new Bylaws may be adopted, at any regular, annual or special meeting of the member. Any notice of a meeting of the member at which these Bylaws are to be amended or repealed, or new Bylaws are to be adopted, shall be given in writing not less than seven days or more than fifty days prior to such meeting and shall include notice of such proposed action.

**Section 7.2 Fiscal Year.** The fiscal year of the Corporation shall end on September 30 in each year unless the Board of Directors shall determine otherwise.

**Section 7.3 Seal.** The seal of the Corporation shall be circular in form and shall bear the name of the Corporation and shall be in such form as the Board of Directors may determine.

**Section 7.4 Execution of Negotiable Instruments.** All checks, drafts, notes, bonds, bills of exchange and orders for the payment of money shall be signed by the Chairman of the Board of Directors or the President or such officer or officers of the Corporation as the Board of Directors shall specify from time to time. The Board of Directors may authorize the use of facsimile signatures of any officer or employee in lieu of manual signatures.

**Section 7.5 Execution of Deeds and Contracts.** Subject to the general directions of the Board of Directors, all deeds and mortgages made by the Corporation and all other written contracts, agreements and undertakings to which the Corporation shall be a party shall be executed in its name by the Chairman of the Board of Directors or the President or such other officer as may be specified by the Board of Directors or authorized by the Chairman of the Board of Directors or President and, when requested, the Secretary shall attest to such signatures and affix the corporate seal to such instruments.

**Section 7.6 Conflict of Interest.** If any director or member of a director's immediate family has an interest in any contract or transaction involving the Corporation, the provisions of Section 33-457 of the Connecticut General Statutes shall determine the obligation of a director to disclose such interest to the Board of Directors and the legal effect of such contract or transaction.

**Section 7.7 Connecticut General Statutes.** Any reference herein to a section of the Connecticut General Statutes shall include reference to any amendment of such section or any successor statute.

**Section 7.8 Pronouns.** References herein to the masculine shall include references to the feminine, references to the singular shall include references to the plural and references to the plural shall include references to the singular, where the context of the language involved so permits or requires.

~~~~~

EXHIBIT E

**Amended and Restated Post-Affiliation Corporate Bylaws --
Yale-New Haven Health Services Corp.**

BYLAWS
OF
YALE-NEW HAVEN HEALTH SERVICES CORPORATION
(Revised January , 1996)

ARTICLE I

Directors

Section 1.01. General Powers. The activities, property and affairs of the corporation shall be managed by the Board of Directors, which shall exercise all of the responsibilities conferred upon the Board of Directors by these Bylaws and by law. Directors shall serve without compensation for their services as Directors, but may be reimbursed by the corporation for their reasonable expenses and disbursements on behalf of the corporation.

Section 1.02. Number of Directors and Further Qualifications. The Board of Directors shall consist of fifteen (15) directorships, subject to reduction pursuant to Section 1.02.C, and shall be composed of two designations of directorships, Ex Officio Directors and Elected Directors, as follows:

A. Ex Officio Directors. The following persons shall, by virtue of their offices, be Directors of the corporation during their tenure in such offices, and shall be designated Ex Officio Directors: (i) the Chair of the Board of Trustees of Yale-New Haven Hospital, Inc. ("YNHH"); (ii) the President of Yale University; (iii) the Chief Executive Officer of the

corporation; and (iv) the Chair of the Board of Directors of Southern Connecticut Health System, Inc. ("SCHS") who shall at all times be a member of the Board of Directors of Bridgeport Hospital. Ex Officio Directors shall be counted in determining a quorum and shall have full voting rights.

B. Elected Directors. The remaining directorships shall be Elected Directors. Elected Directors shall be elected by ballot at each annual meeting of the Board of Directors for terms of three years, or for such shorter terms as may be prescribed by the Nominating Committee (if there be one) or the Board of Directors in order to comply with these Bylaws. The Nominating Committee (if there be one) or the Board of Directors shall exercise its responsibilities to nominate persons for election as Elected Directors and to prescribe the terms of such persons in such a way that there will at all times be included among the Elected Directors, the following:

(i) six persons (at least one of whom shall, when nominated, be a trustee of YNHH) whose names have been submitted for nomination by the Chair of the Board of Trustees of YNHH;

(ii) three persons (at least one of whom shall, when nominated, be a trustee of YNHH) whose names shall have been submitted for nomination by the President of Yale University, provided that (x) no more than two Directors nominated in accordance with this clause shall be employees of Yale University and (y) if any Directors nominated in accordance with this clause are employees of Yale University, then such Directors shall hold an officer position at Yale University throughout the term of such person's service as a Director; and

(iii) subject to Section 1.02C hereof, two persons (both of whom shall be, when nominated, members of the Board of Directors of SCHS) whose names have been submitted to the Nominating Committee (if there be one) or to the Board of Directors for nomination by the Chair of the Board of Directors of SCHS.

The Nominating Committee (if there be one) or the Board of Directors shall exercise its responsibilities to nominate and encourage the nomination of persons for election as Elected Directors and to prescribe the terms of such persons in such a way that the Elected Directors, when considered as a body, shall to the extent reasonably possible reflect the geographic diversity of the area served by the corporation.

C. Expiration of Certain Directorships. The terms of the Directors specified in Section 1.02.B(iii), and the directorships they hold, shall expire as follows:

- (i) one Director, and the directorship held by such Director, shall expire on the date two (2) years after the date of that Director's election; and
- (ii) one Director, and the directorship held by such Director, shall expire on the date one (1) year after the closing date described in Section 6.4 of the Affiliation Agreement between the corporation and SCHS, dated January 19, 1996, as such Agreement may be hereinafter amended.

Section 1.03. Terms of Directors. Subject to the provisions of Section 1.02C, the Board of Directors may prescribe terms of office of one, two or three years for Elected Directors, with the objective that the terms of office of approximately one-third of all of the Elected Directors shall expire at each subsequent annual meeting. At each such annual meeting, the Board of Directors shall elect Directors to succeed the Elected Directors whose terms are then expiring. No person shall be elected an Elected Director for a term beginning after the date of his seventy-second birthday. An Elected Director who has served three successive three-year terms shall not be eligible for re-election until one year has elapsed, except that such

Director may serve a fourth successive term if also elected, at the beginning of the fourth term, as an officer of the corporation as defined in Section 3.01 herein.

Section 1.04. Resignation of Directors. The written resignation of a Director shall be effective upon the date stated in such written resignation or, if no date is so stated or the Board of Directors so determines, immediately upon receipt of the resignation by the corporation. Acceptance of the resignation shall not be necessary to make it effective.

Section 1.05. Removal of Elected Directors. Any Elected Director may be removed from office with or without cause at any time, regardless of the term for which such Director may have been elected, by the affirmative vote of two-thirds of all of the Directors in office at that time, provided the Directors specified in Section 1.02.B(iii) may be removed without cause only with the consent of the Board of Directors of SCHS.

Section 1.06. Vacancies. In case of any vacancy in the Board of Directors by reason of the death, resignation or removal of any Elected Director, the institution (be it YNHH, Yale University or SCHS) that submitted the name of such person for nomination as a Director shall submit the name of a replacement nominee in a manner that complies with Section 1.02, and the remaining Directors, though less than a quorum, by the concurring vote of a majority of such remaining Directors, shall fill such vacancy until the next annual meeting of the Directors with the person whose name is so submitted.

Section 1.07. Organization Meeting. The organization meeting of the Board of Directors shall be held each year at such time and place as the Board of Directors may determine. At such meeting the Board of Directors shall elect the officers of the corporation and shall transact such other business relating to the affairs of the corporation as may come before the meeting.

Section 1.08. Regular and Special Meetings. Regular meetings of the Board of Directors shall be held at such times as the Board of Directors shall from time to time determine. Special meetings of the Board of Directors may be called at any time by the Chief Executive Officer and shall be called by him upon the written request of any three of the Directors. Meetings of the Board of Directors may be held within or without the State of Connecticut and shall be held at such place as shall be designated in the notice of the meeting. Not less than seven days' notice by mail, telephone, telegraph, facsimile or e-mail shall be given of each regular meeting of the Board of Directors, except in the case of regular meetings held in accordance with an approved schedule. Except as otherwise provided in these Bylaws, not less than three days' notice by mail, telephone, telegraph, facsimile or e-mail shall be given of each special meeting of the Board of Directors. A majority of the Directors shall constitute a quorum at all meetings of the Board.

Section 1.09. Vote Required for Action.

The act of a majority of the Directors present at a meeting at which a quorum is present at the time of the act shall be the

act of the Board of Directors, unless the act of a greater number is required by these Bylaws or by law.

Section 1.10. Action Without Meeting. If all the Directors severally or collectively consent in writing to any action taken or to be taken by the corporation, the action shall be as valid as though it had been authorized at a meeting of the Board of Directors, and such written consent or consents shall be filed in the corporate minute book.

Section 1.11. Participation by Conference Telephone. A Director may participate in a meeting of the Board of Director's by means of a conference telephone or similar communications equipment enabling all Directors participating in the meeting to hear one another, and such participation in a meeting shall constitute presence in person at such meeting.

ARTICLE II

Committees

Section 2.01. Standing Committees. If so determined by affirmative action of the Board of Directors, there shall be a Nominating Committee and a Finance and Audit Committee, and such other standing committees as the Board of Directors shall from time to time determine. Standing committees shall be chaired by a member of the Board of Directors. Except for Ex Officio members of a committee, the Board of Directors shall appoint the members of each committee, which may include individuals who are not Directors. Each committee shall serve at the pleasure of the Board of Directors. Each committee shall have such authority and

shall perform such duties as the Board of Directors shall from time to time determine, including but not limited to those duties enumerated below.

A. Nominating Committee. The Nominating Committee (if there be one) shall have not fewer than five nor more than seven members of whom the following shall be Ex Officio members: (i) the Chair of the Board of Trustees of YNHH; (ii) the President of Yale University; (iii) the Chief Executive Officer of the corporation; and (iv) the Chair of the Board of Directors of SCHS. Ex Officio members shall be counted in determining a quorum and shall have full voting rights. All other members of the Nominating Committee shall be named subject to the consent of the Chair of the Board of Directors of YNHH, and at least one of the non-Ex Officio members of the Nominating Committee shall be a Director of YNHH. The Chairman of the Board shall appoint the chairperson of the Nominating Committee. Reasonable notice of the date, time, and place of each meeting shall be given by mail, phone, or otherwise. The Nominating Committee (if there be one) shall nominate candidates for election at the annual meeting as Elected Directors and to fill vacancies in any such positions.

B. Finance and Audit Committee. The responsibilities of the Finance and Audit Committee (if there be one) shall include fact-finding for the Board on matters relating to the financial administration of the corporation and its affiliates, examination and analysis of financial reports of

the corporation and its affiliates and preparation of annual operating and capital budgets for presentation to the Board that takes into account the financial plans for the corporation and its affiliates. The Board of Directors shall appoint the chairperson of the Finance and Audit Committee.

Section 2.02. Other Committees. The Board of Directors may constitute and appoint from among its number or others such other committees with such powers and authority as the Board of Directors shall determine.

Section 2.03. Quorum; Vote Required for Action. A majority of the members of any committee shall constitute a quorum for the transaction of business. The act of a majority of the members of any committee present at a meeting at which a quorum is present at the time of the act shall be the act of such committee, unless the act of a greater number is required by these Bylaws, by resolution of the Board of Directors or by law.

ARTICLE III

Officers

Section 3.01. Number and Title. The officers of the corporation shall be a President and Chief Executive Officer, a Secretary, a Treasurer, and such Vice Presidents and other officers as the Board of Directors may from time to time deem necessary; and a Chairman and Vice Chairman, if the Board of Directors so determines.

Section 3.02. Election, Term of Office and Vacancies. The officers of the corporation, except for those officers who shall be paid employees of the corporation, shall be elected annually by the Board of Directors, and shall hold office until the next annual meeting or until others shall have been chosen in their stead. Vacancies or new offices may be filled at any meeting of the Board of Directors. Employees of the corporation who are designated as officers shall be appointed by the Board of Directors and shall hold office at the pleasure of the Board of Directors.

Section 3.03. Duties and Powers. The duties of the officers shall be as follows:

A. Chairman: The Chairman, if one there be, shall preside at all meetings of the Board of Directors and shall perform such duties as the Board of Directors may from time to time assign to the Chairman and such other duties as are usual to this office.

B. Vice Chairman: The Board of Directors may designate a Vice Chairman who shall exercise the powers and duties of the Chairman when the Chair is absent or disabled.

C. President and Chief Executive Officer: The President and Chief Executive Officer shall be the chief executive officer of the corporation. The President and Chief Executive Officer shall be delegated the responsibility for the overall conduct and management of the corporation's affairs and shall be given the authority necessary to carry out this responsibility, subject only to such policies as may be adopted by the Board of Directors. The President and Chief Executive Officer shall be ex

officio a voting member of all committees, and shall act as the duly authorized representative of the corporation in all matters in which the Board of Directors has not formally delegated some other person so to act. In the absence of the Chairman and Vice Chairman, or if there be no Chairman or Vice Chairman, the President and Chief Executive Officer shall preside at all meetings of the Board of Directors. The President and Chief Executive Officer shall also serve, so long as he is appointed by the Board of Trustees of YNHH, as Chief Executive Officer of YNHH.

D. Treasurer: The Treasurer shall have supervision over the receipt and custody of the corporation's funds, and shall cause to be kept correct and complete books and records of account, including full and accurate accounts of receipts and disbursements in books belonging to the corporation, and in general shall perform such duties as the Board of Directors may from time to time assign to the Treasurer. The Treasurer, if required by the Board of Directors, shall give the corporation a bond in a sum and with one or more sureties satisfactory to the Board of Directors, for the faithful performance of his duties and for the delivery to the corporation, in case of his death, resignation, retirement or removal from office, of all books, papers and other property of whatever kind in his possession or under his control belonging to or pertaining to the affairs of the corporation.

E. Secretary: The Secretary shall keep minutes of the proceedings of the Board of Directors; shall give, or cause to be

given, all notices in accordance with the provisions of these Bylaws or as required by law; and shall be custodian of the corporate records and of the seal of the corporation. The Secretary shall keep at the principal office of the corporation in the State of Connecticut, a record of the Directors of the corporation, giving the names and addresses of all such Directors, and in general shall perform such duties as the Board of Directors may from time to time assign to the Secretary.

Section 3.04. Removal. The Board of Directors may remove any elected or appointed officer of the corporation from office with or without cause at any time, regardless of the term for which any elected officer may have been elected, subject to the terms of any existing employment contract with any such officer.

ARTICLE IV

Related Corporations

Section 4.01. Policy as to Business Activities. The corporation is nonprofit and shall not engage directly in activities for profit. It may, however, from time to time organize and control, through stock ownership or otherwise, one or more corporations organized and operated for profit. In considering the appropriateness of organizing or controlling corporations organized and operated for profit, the corporation shall give principal consideration to corporations engaged in activities which relate to health care or which directly or indirectly support, advance or contribute to the purposes and objectives of the corporation and YNH and Bridgeport Hospital.

The Board of Directors shall establish guidelines, consistent with the provisions of this Section, for consideration of activities which might suitably be developed through for-profit corporations controlled by the corporation.

Section 4.02. Names of Controlled Corporations. The corporation shall not use the words "Yale-New Haven" or the word "Yale" in the name of any corporation organized and operated for profit, nor shall it permit any such corporation to utilize such words in the conduct of its business.

ARTICLE V

Amendments and Miscellaneous

Section 5.01. Amendment by Directors. The Board of Directors shall have power to alter, amend or repeal these Bylaws at any regular or special meeting of the Board by the affirmative vote of a majority of all of the Directors, provided notice of the proposed alteration, amendment or repeal shall have been given in the notice of the meeting, and provided further that any amendment to reduce or alter the number, conditions of office, or terms of Directors that are either (x) required to be trustees of YNHH or (y) whose names have been submitted for nomination by the Chair of the Board of Trustees of YNHH, shall be subject to approval by at least a majority of the seven Directors which include the Chair of the YNHH Board and the six Directors who were nominated by the Chair of the YNHH Board.

Section 5.02. Principal Office. The principal office of the corporation shall be located in New Haven, Connecticut. The

corporation may have other offices within or without the State of Connecticut as the Board of Directors may from time to time determine.

Section 5.03. Seal. The seal of the corporation shall be in such form as the Board of Directors may determine.

EXHIBIT F

**Post-Affiliation Certificate of Incorporation --
Yale-New Haven Health Services Corp.**

CERTIFICATE OF INCORPORATION**YALE-NEW HAVEN HEALTH SERVICES CORPORATION**

The undersigned incorporators hereby form a corporation under the Nonstock Corporation Act of the State of Connecticut:

1. The name of the corporation is YALE-NEW HAVEN HEALTH SERVICES CORPORATION.

2. The nature of the activities to be conducted, or the purposes to be promoted or carried out by the corporation shall be exclusively charitable, scientific and educational within the meaning of Section 501(c)(3) of the Internal Revenue Code of 1954 (the "Code"), as the same may be amended from time to time, and shall include the following:

A. To benefit, carry out the purposes of, and uphold, promote and further the welfare, programs and activities of Yale-New Haven Hospital, of New Haven, Connecticut ("YNHH").

B. To benefit, carry out the purposes of, and uphold, promote and further the welfare, programs and activities of Bridgeport Hospital, of Bridgeport, Connecticut ("BH");

C. To collaborate with YNHH and BH, with Yale University and with other hospitals and health care institutions and organizations in the initiation, development and maintenance of programs directed toward improving the efficiency and reducing the cost of health care services while maintaining a high quality of such care;

D. To collaborate with Yale University and with other colleges and schools in the initiation, development and maintenance of educational programs for health professionals and for the public, including programs of medical and nursing education, continuing education, graduate medical education and community health education;

E. To collaborate with YNHH and BH, with Yale University and with other hospitals, health care institutions, colleges and schools in the initiation, development and maintenance of programs of scientific research related to the care of the sick and injured;

F. To initiate, develop, operate and maintain, in collaboration with YNHH and BH and with other hospitals and health care institutions and organizations, programs for the delivery of health care services through one or more separate corporations;

G. To acquire, improve, hold and lease any real or personal property useful to the accomplishment of the purposes of this corporation;

H. To receive and accept public and private gifts, trusts, donations, grants, loans and other sources of funding to promote the purposes of this corporation; and generally to do and perform such other acts and to exercise such other powers as may be authorized or permitted under the laws of the State of Connecticut to promote and attain the purposes set forth herein;

I. To engage in any lawful act or activity for which a corporation may be organized under the Nonstock Corporation Act of the State of Connecticut in furtherance of the foregoing.

3. The corporation is nonprofit and shall not have or issue shares of stock or pay dividends.

4. The corporation shall have no Members, and the corporation shall be operated under the management of the Board of Directors.

5. The Board of Directors shall be composed of two designations of directorships, Elected Directors and Ex Officio Directors, with the directors to be selected as provided in the Bylaws. Ex-officio Directors may be counted in determining a quorum and have the right to vote as shall be provided in the Bylaws.

6. No part of the net earnings of the corporation shall inure to the benefit of or be distributable to the corporation's directors, officers or other private persons, except that the corporation shall be authorized and empowered to pay reasonable compensation for services rendered and to make payments and distributions in furtherance of the purposes set forth in Paragraph 2 hereof. No substantial part of the activities of the corporation shall be the carrying on of propaganda, or otherwise attempting to influence legislation, and the corporation shall not participate in, or intervene in (including the publishing or distribution of statements), any political campaign on behalf of (or in opposition to) any candidate for public office. Notwithstanding any other provision of this Certificate of Incorporation, the corporation shall not carry on any other activities not permitted to be carried on (a) by a corporation exempt from Federal Income Tax under Section 501(c)(3) of the Code or (b) by a corporation,

contributions to which are deductible under Section 170(c)(2) of the Code.

7. Upon any dissolution or termination of the existence of the corporation, all of its property and assets shall, after payment of the lawful debts of the corporation and the expenses of its dissolution or termination, be delivered, conveyed and paid over (subject to any restrictions imposed by any applicable will, deed, grant, conveyance, agreement, memorandum, writing or other governing document) to Yale-New Haven Hospital, Inc. and Bridgeport Hospital, provided they shall then qualify as exempt organizations under Section 501(c)(3) of the Code, in such proportions as the Board of Directors may deem appropriate consistent with the relative financial and other contributions of each to the corporation, and to such other charitable, scientific or educational organizations qualified as exempt organizations under Section 501(c)(3) of the Code, in such proportions and for such exclusively charitable, scientific or educational purposes as the Board of Directors may determine.

8. References to sections of the Code shall be deemed references to the Internal Revenue Code of 1986, as the same may be amended from time to time, and to the corresponding provisions of any future United States Internal Revenue Law.

Adopted: December 12, 1983
Filed: December 14, 1983

SYSTEM AFFILIATION AGREEMENT

THIS SYSTEM AFFILIATION AGREEMENT is made and entered as of January 19, 1996, by and between **YALE-NEW HAVEN HEALTH SERVICES CORPORATION**, a Connecticut non-stock corporation having its principal office at 789 Howard Avenue, New Haven, Connecticut 06504, and **SOUTHERN CONNECTICUT HEALTH SYSTEM, INC.**, a Connecticut non-stock corporation having its principal office at 267 Grant Street, P.O. Box 5000, Bridgeport, Connecticut 06610-0120.

WITNESSETH:

WHEREAS, the health care industry is being substantially affected by significant changes in federal and state government regulatory and reimbursement programs, rapid technological developments, shifts in demographics and demand, greatly expanding use of managed care and an increased need for capital, all of which have encouraged health care providers to affiliate by creating health care systems to share resources and provide additional, integrated, and cost-effective services and facilities to the communities they serve;

WHEREAS, the parties have analyzed the regional health care marketplace and the costs and benefits to the organizations and the communities they serve of various potential models of integration and affiliation;

WHEREAS, the parties deem it to be consistent with and in furtherance of their respective charitable purposes and in the best interests of their communities and constituencies to become permanently affiliated;

WHEREAS, the parties desire to foster both an academically-oriented medical care delivery system and a primary care-based, integrated, regional delivery system to enhance their excellence in quality patient care, education and research; their ability to maintain qualified, diverse medical staffs; and their ability to serve their respective communities while competing in an increasingly competitive health care environment;

WHEREAS, a permanent affiliation between the parties will provide coordination of the provision of patient care services, which should reduce duplication of resources, increase efficiencies and decrease costs to health care consumers; provide additional patient access to specialized services; improve strategic planning within geographic areas; and enhance other clinical, medical educational, clinical research, marketing, planning, finance, human resources, information systems and management services and expertise;

WHEREAS, the parties have determined that a permanent affiliation can best be developed and implemented through the planning and coordination efforts of Yale-New Haven Health Services Corporation, which shall become the sole member of Southern Connecticut Health System, Inc.;

WHEREAS, the parties intend Yale-New Haven Health Services Corporation to direct and implement the System's activities and to have various leadership responsibilities and powers with respect to Southern Connecticut Health System, Inc., as more fully set forth in this Agreement, while allowing the parties and their affiliates, to a significant and meaningful extent, to retain their unique traditions, constituencies, and philanthropic support; and

WHEREAS, each party considers it in its best interest to enter into a permanent affiliation on the terms and conditions set forth in this Agreement.

NOW, THEREFORE, in consideration of the foregoing and the mutual agreements and covenants hereinafter set forth and for other valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

ARTICLE I

DEFINITIONS

In addition to the words and terms defined elsewhere in this Agreement, the following words and terms shall have the following meanings:

1.1 "Act" shall mean The Connecticut Non-Stock Corporations Act, as amended, Chapter 600 of the Conn. Gen. Stat., or successor provisions.

1.2 "Affiliate" shall mean, with respect to any Entity, any other Entity which at the time Affiliate status is being determined is directly or indirectly Controlling or Controlled by or under direct or indirect common Control with such Entity. "Control" shall mean the legal power to (a) elect or cause the election of a majority of the governing body of the subject Entity, or (b) direct or cause the direction of the subject Entity's operations or management, whether the foregoing power(s) exist(s) through voting securities, other voting rights, reserved powers, contract rights, or other legally enforceable means.

1.3 "Agreement" shall mean this System Affiliation Agreement.

1.4 "CEO" shall mean the YNHHS President and Chief Executive Officer.

1.5 "Closing Date" shall mean the date five business days after the last of conditions in Article XIV has been satisfied to the reasonable satisfaction of the parties, or waived by the parties in writing, but not later than September 30, 1996, unless such date is extended by written agreement of the parties.

1.6 "Code" shall mean the Internal Revenue Code of 1986, as amended, and any corresponding provision of any future United States Internal Revenue law.

1.7 "Corporate Documents" shall mean, as the context requires, the Certificate of Incorporation or similar charter document, Bylaws and other agreements that address the powers and governance of a corporation.

1.8 "Effective Date" shall mean the date on which the last of the conditions specified in Article XIV hereof shall have been satisfied.

1.9 "Entity" shall mean a corporation, association, partnership, trust, limited liability company, organization, business or any other entity.

1.10 "Fiscal Year" shall mean the year ending September 30.

1.11 "Goals and Objectives" shall mean the goals and objectives for the System, as set forth in Section 2.2.

1.12 "Local Network" shall mean, respectively, the SCHS Network or the YNHH Network; and "Local Networks" shall mean the SCHS Network and the YNHH Network collectively.

1.13 "Managed Care Contract" shall mean any agreement between a provider and any payor, or any intermediary organization acting on behalf of either itself or a payor, to provide covered health care services, whether on an indemnity basis, or under an arrangement in which there are incentives to utilize the contracting provider for covered services, or on any other basis.

1.14 "Major Programmatic Changes" shall mean the creation of any major new health care service, the establishment of any new location for the delivery of health care services outside of the then existing primary service area of the affected Entity, the addition or deletion of a major clinical program, the substantial alteration of a health care facility or clinic and other major modifications of services, programs or facilities.

1.15 "Primary Service Area" shall mean as to YNHHS the cities and towns listed in Exhibit A, and as to SCHS shall mean the cities and towns listed on Exhibit B.

1.16 "SCHS" shall mean Southern Connecticut Health System, Inc.

1.17 "SCHS Network" (sometimes referred to as the "member(s) of the SCHS Network") shall mean SCHS and all then existing SCHS Affiliates; provided that none of YNHHS or any of its Affiliates shall be included in the definition of the SCHS Network.

1.18 "System" shall mean YNHHS and all the System Members acting in concert pursuant to this Agreement and such other agreements as may be entered into by YNHHS with any additional System Member, it being acknowledged that when acting as a part of the System YNHHS is acting in its capacity as the sole member of YNHHS, and in its capacity as sole member of SCHS, and in its capacity as the institution directed and empowered to manage the System and to exercise the rights and privileges granted to it in this Agreement.

1.19 "System Member" shall mean each Local Network and each Entity that hereafter (a) affiliates with YNHHS such that YNHHS exercises Control over such Entity, or (b) merges into or consolidates with YNHHS or any Entity that is part of either Local Network or any Entity that hereafter becomes an Affiliate of YNHHS.

1.20 "YNHH" shall mean Yale-New Haven Hospital.

1.21 "YNHH Network" (sometimes referred to as "member(s) of the YNHH Network") shall mean YNHH and all then existing YNHH Affiliates, provided that YNHHS shall not be included in the definition of YNHH Network, and provided further that none of SCHS or any of its Affiliates shall be included in the definition of the YNHH Network.

1.22 "YNHHS" shall mean Yale-New Haven Health Services Corporation.

1.23 "YSM" shall mean Yale University, a Connecticut specially chartered corporation, acting through its School of Medicine.

ARTICLE II

STRUCTURAL CONSIDERATIONS AND GOALS AND OBJECTIVES

Section 2.1 Underlying Structural Considerations. One of the most significant considerations in achieving successful system integration and accomplishing effectively the Goals and Objectives is the commitment of the Local Networks to provide YNHHS with sufficient authority over the Local Networks to operate a successful, integrated System. This delegation of authority is intended to be accomplished, however, while addressing adequately the need of each Local Network to maintain the ability to respond to the needs of its community while acknowledging the contributions of its constituencies.

The following summarizes the basic principles upon which the parties are entering into this Agreement:

2.1.1 **Local Networks**. Each of the Local Networks serves unique constituencies. Consistent with the need to achieve the Goals and Objectives, the Local Networks will be responsive to their communities and their base of philanthropic support, and function and be recognized as integral components of an integrated, regional primary and tertiary health care delivery system of national stature and reputation in areas of patient care and health professional education.

2.1.2 **Governing Boards**. Each of the Local Networks provides a consistently high quality of care and is well regarded in its community. The Local Networks have attained such status through the dedication and efforts of individuals who are experienced in health care matters and who are concerned about the future of health care in their respective communities. Given this commonality of interests of the Local Networks' governing boards, YNHHS recognizes that, consistent with the need to achieve the Goals and Objectives, there will be substantial local responsibility for the delivery of health care services.

2.1.3 **Medical Staff**. A primary reason for developing the System is to maintain and expand the level of excellence in health care that exists in each region served by the Local Networks. This commitment to a consistently high quality of care will require the support of each Local Network's medical staff. The parties recognize the importance of and vital roles played by both full-time physicians and private medical practitioners to the success of the System and to the quality of care, level of research, and medical education programs that the Local Networks provide. Each Local Network shall make its own decisions concerning the granting and renewal of medical staff membership and the granting and renewal of medical staff privileges. All such decisions shall be consistent with the requirements of this Agreement, including the Goals and Objectives.

2.1.4 **Management and Financial Operations**. The System's management and financial operations will evolve to permit each Local Network to enjoy the benefits of integration in order to permit the development and ultimate delivery of health care services by the Local Networks on an integrated, non-duplicative, cost-effective basis.

2.1.5 **University Affiliated System**. The parties' commitment to provide a consistently high quality of care is paralleled by their individual, historical commitments to health professional education. The Local Networks desire their respective medical education and research programs be coordinated by YNHHS, including coordination of the affiliation agreements between YSM and each Local Network.

Section 2.2 System Goals and Objectives. The Goals and Objectives for the System are as follows:

2.2.1 Create an integrated, regional health care delivery system composed of local, vertically integrated networks that provides high quality, cost-effective health services and that successfully operates in a managed care marketplace;

2.2.2 Affiliate with additional local networks;

2.2.3 Implement a managed care contracting and product structure to increase the number of managed care patients served by the System, and enhance each System Member's ability to seek and accept regional, statewide, and state/federal government managed care contracts for enrolled populations;

2.2.4 Assist each System Member to develop and work effectively with local and regional physician organizations, physician-hospital organizations, management service organizations and primary care organizations; including doing so with existing organizations of those types;

2.2.5 Establish insurance plans to meet community and market needs;

2.2.6 Provide leadership in the development of improved health care delivery, health professional education, and research programs;

2.2.7 Actively support healthcare in Connecticut by working with local communities and providers to maintain appropriate access to care;

2.2.8 Maximize operating efficiencies and reduce capital costs of System Members by sharing technology, services, management and programs, where appropriate;

2.2.9 Ensure the long-term financial viability of YNHHS and each System Member by assisting System Members in providing quality health care in Connecticut and throughout the Northeast;

2.2.10 Provide coordination for clinical services, medical, nursing, and other health professional education, research, fund raising, finance, strategic planning, marketing, human resources, information systems and such other administrative and management activities important to System Members as YNHHS and each System Member shall identify in order to enhance quality, reduce duplication of resources, increase efficiencies, maintain and improve the System Members' financial condition, and decrease costs to health care consumers;

2.2.11 Recognize the importance of physicians to the success of the System and assist System Members to maintain active and productive medical staffs;

2.2.12 Establish centralized managed care participation by the System and develop and administer the System's managed care products;

2.2.13 Strengthen and develop each System Member's position as a referral institution in its market;

2.2.14 Develop information collection and management capabilities to improve the quality and cost-effectiveness of health care delivery and to foster medical research and education;

2.2.15 Achieve such other objectives as necessary or appropriate to the successful implementation and operation of the System in as prompt, efficient and effective a manner as possible; and

2.2.16 Achieve such other objectives as YNHHS, with Local Network input, shall establish as necessary or appropriate to the successful implementation and operation of the System.

ARTICLE III

SYSTEM STRUCTURE AND FORMATION

Section 3.1 Required SCHS Action. In accordance with the Act, and effective on or before the Closing Date, SCHS will amend its Certificate of Incorporation and Bylaws in a manner acceptable to YNHHS and to SCHS to reflect the agreements and commitments made in this Agreement. In addition SCHS shall cause its Affiliates to amend their Corporate Documents (if necessary) to conform to this Agreement on or before the Closing Date.

Section 3.2 Required YNHHS Action. In accordance with the Act, and effective on or before the Closing Date, YNHHS will amend its Certificate of Incorporation and Bylaws in a manner acceptable to YNHHS and to SCHS to reflect the agreements and commitments made in this Agreement.

ARTICLE IV

THE ROLES OF YNHHS AND OF THE SCHS NETWORK IN THE SYSTEM

Section 4.1 YNHHS' Role. YNHHS' role in the System is to lead a statewide healthcare delivery and financing system dedicated to providing high quality, cost-effective services to the communities it serves. The specific actions to be undertaken by YNHHS in fulfilling this role include:

- (a) Develop, manage, coordinate and lead the System;
- (b) Develop strategies by which the System can achieve the Goals and Objectives, including developing System-wide strategic plans, operating budgets and capital budgets in a timely manner;
- (c) Organize and coordinate the provision of services of all System Members to ensure that the System provides high quality, cost-effective and coordinated health care services in a manner that balances each System Member's needs with System-wide strategies;
- (d) Through the sponsorship of System insurance plans, manage the financing of healthcare delivery to ensure that health care dollars are used to improve the health status of the populations served; including providing leadership in the promotion of community wellness, health education and accessible preventive health services;
- (e) Enhance collaboration among the Local Networks, YSM and other health-care institutions, colleges and schools in the initiation, development, maintenance and oversight of (i) educational programs for health professionals and the public, and (ii) programs of scientific research related to the care of the sick and injured, in each case of consistently high quality;
- (f) Develop System-wide resources for use by the System and the Local Networks to provide the full continuum of care to the populations served;
- (g) Develop System-wide Managed Care Contracts, within the specifications and conditions of the contracting authority granted by each Local Network and affiliated physician organization(s);
- (h) In coordination with the hospitals associated with each System Member, develop primary care networks that will be linked to the local integrated networks through one or more management services organizations or other appropriate mechanisms;
- (i) Establish and coordinate management objectives, incentives and performance measures for the System, and coordinate such for all System Members;
- (j) Provide guidance and support for local strategic plans, local network operating and capital budgets, day-to-day management functions, the development and implementation of managed care strategies, and local and regional clinical management initiatives; and

- (k) Strengthen local network medical education programs.

Section 4.2 Role of the SCHS Network. The role of the SCHS Network in the System includes accomplishing the following specific actions in a manner that is consistent with the Goals and Objectives:

- (a) Develop, manage and coordinate a local, vertically integrated network (including physicians, ambulatory and extended care services) in conjunction with the Bridgeport Hospital medical staff and YNHHS;
- (b) Provide high quality, cost-effective services to the local community and to patients referred to it for clinical services, including tertiary care;
- (c) Develop, maintain and nurture key local community relationships, and to this end work with other local community organizations in the coordination and provision of health services;
- (d) Collaborate through YNHHS with YSM and other healthcare institutions, colleges and schools in the initiation, development and maintenance of (i) graduate physician medical education programs, (ii) educational programs for other health professionals and the public, and (iii) sites for scientific research related to the care of the sick and injured, in each case of consistently high quality;
- (e) Disseminate through YNHHS information developed by the SCHS Network as appropriate for System-wide functions and System oversight of Local Network operations; this may include information as to: financial, human resources, information systems, government relations, community and public relations, planning and marketing, managed care, purchasing, business and new product development and legal;
- (f) Develop and maintain medical staff relationships;
- (g) Coordinate clinical program development with YNHHS;
- (h) Maintain day-to-day management functions with oversight and, if necessary, assistance from YNHHS, subject to rights granted to YNHHS to approve certain actions as specified in this Agreement; and
- (i) Develop and maintain relationships with local physician organizations and/or physician-hospital organizations.

ARTICLE V**GOVERNANCE OF SCHS**

The following sets forth certain rights granted to YNHHS and the CEO in connection with the governance of SCHS and the SCHS Network. The substance of this Article V has been, or shall be in accordance with Section 3.1, incorporated into the Corporate Documents of SCHS and any conflict between the terms of this Article V and the SCHS Corporate Documents shall be determined by reference to such Corporate Documents.

Section 5.1 SCHS Network Governance. SCHS covenants that it shall from and after the Closing Date (a) maintain, and cause all members of the SCHS Network to maintain, the present size, structure and overlap of the governing body of each such member, (b) cause the Boards of SCHS and each of the SCHS Affiliates to be composed of the same persons, (except for the Boards of NovaMed Corporation, SCHS Properties, Inc. and any Affiliates approved as provided in Section 8.11 hereof if at the time of approval a different Board structure is consented to by YNHHS), (c) not amend, modify, alter or rescind, or permit any member of the SCHS Network to amend, modify, alter or rescind, in any material respect, any of the Corporate Documents relating to SCHS or to that member, and (d) not adopt, or permit any member of the SCHS Network to adopt, any resolution, rule, regulation or procedure that would affect the covenants in clauses (a), (b) and (c) of this paragraph.

Section 5.2 Election of SCHS Directors. The SCHS Board shall nominate persons to serve as SCHS directors as vacancies occur on the SCHS Board in the ordinary course due to expiration of term, death, voluntary resignation or removal pursuant to Section 5.3 below or as otherwise provided in the SCHS Bylaws. All persons nominated by the SCHS Board shall have the background and experience appropriate to that position. No person shall be elected a director of SCHS unless such person's election is approved by the YNHHS Board of Directors, except as provided below. For each such vacancy, the SCHS Board shall nominate one (1) person. If the YNHHS Board fails to approve such nominee, then: (a) the SCHS Board will promptly nominate two other individuals to that Board position; (b) the YNHHS Board may approve either of such nominees in which case the nominee so approved shall be promptly elected by the SCHS Board as an SCHS director, or the YNHHS Board may reject both of such nominees in which case the SCHS Board shall promptly nominate two other individuals to that Board position; (c) the YNHHS Board may approve either of such additional nominees in which case the nominee so approved shall be promptly elected by the SCHS Board as a director; and (d) the YNHHS Board may reject both of such additional nominees in which case the choice of which of any of the foregoing proposed persons to name as an SCHS director shall be made by the Chairman of the Board of SCHS after consultation with the CEO and the Chairman of the Board of YNHHS. Until a new

director of SCHS is elected in accordance with this section, the director previously holding the seat as to which an election is occurring (unless such director shall have been removed) shall, if willing and able to do so, continue to hold that position.

Section 5.3 Removal of SCHS Directors. The Board of Directors of YNHHS may remove any SCHS director: (a) for an act or omission that constitutes a breach of fiduciary duty by such director under applicable law; or (b) if such director voted in favor of a resolution approved by the SCHS Board, and as a consequence of the actions taken or not taken as a result of the implementation of such resolution SCHS or an Affiliate of SCHS (i) violates a law, rule or regulation to the material detriment of SCHS or any such Affiliate, or (ii) takes any action specifically prohibited by this Agreement or fails to take any action specifically required by this Agreement. Any SCHS director may be removed pursuant to this Section only by the affirmative vote of three-fourths (3/4) of the Directors of YNHHS then in office. No SCHS director removed in accordance with this Section shall hold or be nominated or proposed for any directorship or position of similar responsibility in any member of the SCHS Network, and SCHS shall cause any such director to be promptly removed from any such positions.

Section 5.4 Senior Executive Officer. The CEO shall appoint SCHS' President and Chief Executive Officer in consultation with and with the consent of the SCHS Board. The CEO shall periodically evaluate the SCHS President and Chief Executive Officer, and in connection therewith shall determine the terms and conditions of that person's employment and compensation, provided the CEO shall consult with the Chairman of the SCHS Board, and if the SCHS Chairman so requests, then with the SCHS Board or an appropriate Committee thereof prior to taking any action as to any such evaluation or as to the terms of such person's employment. The CEO shall have the sole right, if the CEO deems it appropriate, to remove the SCHS President and Chief Executive Officer, provided the CEO shall consult with the SCHS Board prior to taking any such action.

Section 5.5 YNHHS Board Designee to SCHS. YNHHS shall have the right at all times to have one person designated by it serve as a director of SCHS. Such person shall be designated by the CEO. SCHS shall promptly cause any such designee to be elected as a director of SCHS and each of its Affiliates to enjoy all rights and privileges enjoyed by the directors of SCHS and each of its Affiliates. YNHHS shall have the sole right to remove its designee from the SCHS Board and the boards of its Affiliates. If SCHS has an active executive committee, or any committee that has been delegated all or most of the Board's power to act, the YNHHS designee shall serve on that committee.

ARTICLE VI**GOVERNANCE OF YNHHS**

The following sets forth certain aspects of the governance structure for YNHHS. The substance of this Article VI has been, or shall be in accordance with Section 3.2, incorporated into the Corporate Documents of YNHHS and any conflict between the terms of this Agreement and the YNHHS Corporate Documents shall be determined by reference to such Corporate Documents.

Section 6.1 YNHHS Governance. YNHHS covenants that it shall from and after the Closing Date (a) maintain the total size of its Board of Directors (including Ex Officio Directors) at 15 members, subject to reduction as provided in Section 6.4 and subject to increase as provided in agreements entered into in connection with the addition of new System Members to the System, (b) not amend, modify, alter or rescind in any material respect any of the Corporate Documents relating to YNHHS so as to deprive the SCHS Network of the benefits of this Agreement, and (c) not adopt any resolution, rule, regulation or procedure that would affect the covenants in clauses (a) and (b) of this paragraph.

Section 6.2 Ex Officio Directors. The persons holding the following offices from time to time shall, by virtue of their offices, be Directors of YNHHS during their tenure in such offices, and shall be designated Ex Officio Directors: (i) the Chairman of the Board of Trustees of Yale-New Haven Hospital, Inc.; (ii) the President of Yale University; (iii) the President and Chief Executive Officer of YNHHS; and (iv) the Chairman of the Board of Directors of SCHS. Ex Officio Directors shall be counted in determining a quorum and shall have full voting rights.

Section 6.3 Elected Directors. The directors of YNHHS who are not otherwise ex-officio directors shall include the two persons (both of whom shall, when nominated, be directors of SCHS) whose names are submitted for nomination by SCHS and listed on Schedule 6.3 ("SCHS Directors"). If not previously accomplished, at the first meeting of the YNHHS Directors following the Closing Date, the Board of Directors shall elect as Directors those persons set forth on Schedule 6.3. The terms of the SCHS Directors shall expire as set forth in Section 6.4 below. In addition, the directors of YNHHS who are not ex-officio directors shall include (unless otherwise agreed by YNHHS and Yale University) three persons (at least one of whom shall, when nominated, be a trustee of Yale-New Haven Hospital) whose names shall have been submitted for nomination by the President of Yale University, provided that (x) no more than two directors nominated in this manner shall be employees of Yale University and (y) if any directors nominated in this manner are employees of Yale University, then such directors shall hold one of the officer positions of Yale University throughout the term of such person's service as a director.

Section 6.4 Terms of SCHS Directors. As designated by SCHS in Schedule 6.3, the term of one SCHS Director shall expire two years following his election. The other SCHS Director's term shall expire one year after the closing date of the next transaction by which a hospital, with total annual expenses equal to or greater than Seventy Million Dollars (\$70,000,000) as reported in the 1995/1996 AHA Guide, or any of its Affiliates becomes a System Member with the right to cause the election or designation of one or more persons to the YNHHS Board. Upon the expiration of an SCHS Director's term, such SCHS Director's directorship shall be eliminated and the number of directors shall be reduced accordingly. Prior to such expiration, SCHS and YNHHS may mutually agree to remove such director without cause, and in any event SCHS shall have the right to fill any vacancy arising in any directorship as to which it has the right to nominate a director.

Section 6.5 Geographic Diversity. YNHHS will use its best efforts to assure that the YNHHS Board of Directors reflects, to the extent reasonably possible, the geographic diversity of the service area of the System.

Section 6.6 YNHHS Nominating Process. The Chairman of SCHS, in his or her capacity as an ex-officio director of YNHHS, shall be involved in whatever process the YNHHS Board employs for selecting nominees to the YNHHS Board, whether as a member of any nominating committee that may exist at any time, or through consultation with the CEO, the Chairman of YNHHS and the President of Yale University, or in such other way as permits the SCHS Chairman to participate in a meaningful way in that process.

ARTICLE VII

POWERS RESERVED TO THE SCHS NETWORK

Notwithstanding anything else contained in Article VIII hereof or in any other section of this Agreement, the members of the SCHS Network shall have the following rights:

Section 7.1 Enforcement of this Agreement. Notwithstanding anything else contained herein, the SCHS Board of Directors shall have the right to take such actions as it deems necessary to enforce the commitments made to SCHS and the members of the SCHS Network in this Agreement by YNHHS.

Section 7.2 Medical Staff. Each member of the SCHS Network that has a medical staff shall maintain its own medical staff bylaws and credentialing procedures, and its own medical staff rules and regulations. Each such member of the SCHS Network shall make its own decisions concerning the granting and renewal of medical

staff membership and the granting and renewal of medical staff privileges. All such decisions shall be consistent with the requirements of this Agreement, including the Goals and Objectives.

Section 7.3 Initiate Programmatic Changes. A Major Programmatic Change affecting a member of the SCHS Network shall be initiated solely through SCHS' inclusion of such Change in a Local Plan (as defined in Section 8.2), subject to YNHHS' right to approve any such Major Programmatic Change as provided in Section 8.6. Only SCHS may initiate a change as to the services, programs or facilities of the members of the SCHS Network, and SCHS may only do so through the Local Plans.

Section 7.4 Utilization Review and Quality Assurance and Improvement. Each member of the SCHS Network shall be responsible for utilization review activities within its facility and shall be responsible for related quality assurance and improvement activities, provided all such activities shall be conducted in a manner consistent with all Managed Care Contracts applicable to the members of the SCHS Network and in a manner so as to assure the provision of quality, cost-effective services.

Section 7.5 Medical Education. Each member of the SCHS Network shall be responsible for overseeing its medical education program and house staff (if any), and (subject to Section 8.7.2) shall be responsible for determining and revising from time to time all aspects of its graduate medical education programs.

Section 7.6 Endowments and Fund-Raising. Each member of the SCHS Network shall be responsible for and have full authority, control and ownership of its own endowment funds. New endowments may be created by any member of the SCHS Network with monies derived from gifts, bequests, fund-raising activities, and other such endowment sources. Each member of the SCHS Network shall be responsible for its own fund-raising, but shall coordinate all such efforts with YNHHS.

ARTICLE VIII

ALLOCATION OF RIGHTS AND RESPONSIBILITIES

Certain of the rights and responsibilities of SCHS and of YNHHS in connection with their affiliation are set forth in this Article VIII. Each party agrees and covenants with the other that it will fulfill its responsibilities as set forth herein, and that in exercising its rights set forth herein it will do so using its reasonable judgment taking into account the Goals and Objectives.

Section 8.1 System Planning and Implementation. YNHHS shall establish the System's mission and to that end shall plan and organize the System's provision of

clinical services, clinical research, and support systems on an integrated and cost-effective basis. The planning, organization and implementation of all such activities shall be consistent with the Goals and Objectives.

Section 8.2 Local Planning. SCHS shall prepare or cause to be prepared each year a strategic plan and related capital and operating budgets (collectively, the "Local Plans") for the SCHS Network as a whole and separately for each member of the SCHS Network. The Local Plans shall be consistent with the Goals and Objectives, and shall be prepared annually in a format acceptable to YNHHS and at the same time that YNHHS prepares its annual strategic plan and budgets. YNHHS shall review and approve the Local Plans, and neither SCHS nor any member of the SCHS Network shall implement any portion of the Local Plans unless and until approved by YNHHS. YNHHS agrees to act promptly to review the Local Plans and not to unreasonably withhold or delay approval of the Local Plans. On the Closing Date, or as otherwise agreed by the parties, SCHS shall prepare and deliver to YNHHS transition Local Plans for the period from the Closing Date through the end of SCHS' 1996 fiscal year, and such transition Local Plans shall be subject to review and approval by YNHHS as and to the extent provided in this Section 8.2.

As to each organization in which SCHS or any member of the SCHS Network participates through an equity interest or by Board representation, the annual capital and operating budgets for that organization, and its strategic plans, shall be reviewed by SCHS with YNHHS prior to the adoption or approval of such budgets and plans so that YNHHS has a reasonable opportunity to comment on such budgets and plans.

Section 8.3 Implementation of Local Plans. Once the Local Plans have been approved by YNHHS, SCHS shall use its best efforts to cause the Local Plans to be implemented in accordance with their terms, and shall not modify the Local Plans in any material respect, or deviate therefrom in any material respect, without the prior written approval of YNHHS, which approval shall not be unreasonably withheld or delayed.

Section 8.4 Incurrence of Debt. Neither SCHS nor any member of the SCHS Network shall incur any "debt" or enter into any line of credit except as specifically contemplated by the Local Plans or unless such debt or line of credit is otherwise approved by YNHHS. In addition to utilizing any line of credit approved by YNHHS, any SCHS Network member may incur short-term debt in any fiscal year in addition to any approved lines of credit without approval of YNHHS and without such debt being specifically contemplated by the Local Plans, provided the amount of that debt does not exceed two percent of such member's budgeted expenses for such fiscal year and provided further that any such borrowing is approved by the SCHS Board prior to the borrowing being made. For purposes of this paragraph, "debt" shall include (a) the guaranty of a financial obligation of a third party (other than the guaranty on behalf of another SCHS Network member where the guaranty is of an amount permitted to be incurred pursuant to this Section 8.4); (b) all obligations for money borrowed, except for

money borrowed from another member of the SCHS Network for purposes consistent with the Local Plans; and (c) capital leases for the acquisition of equipment or real estate, except a capital lease entered into in any fiscal year as to which total payments under the lease will not exceed \$75,000 over the term of the lease, provided the total payments under all such capital leases entered into in any year (measured over the terms of those leases) shall not exceed \$150,000 (and all such capital leases shall be a part of the Local Plans (as defined in Section 8.2) in subsequent years.)

Section 8.5 Transfer of Assets. SCHS agrees that neither it nor any member of the SCHS Network shall sell, assign, encumber, lease, or otherwise transfer any assets (other than immaterial assets transferred in the ordinary course) except (a) as specifically provided for in the Local Plans approved by YNHHS, (b) as otherwise approved by YNHHS, or (c) to another SCHS Network member consistent with the Local Plans.

Section 8.6 Major Programmatic Changes. Without limiting the scope and effect of Section 8.2 or Section 7.3, YNHHS shall have the right to approve any decision by SCHS or any other member of the SCHS Network with respect to Major Programmatic Changes. SCHS agrees that neither it nor any member of the SCHS Network shall commence a Major Programmatic Change without the prior approval of YNHHS.

Section 8.7 Relationships with Teaching Institutions.

8.7.1 General. After the Closing Date, YNHHS shall have the right to participate in negotiations involving, and the right to approve, any new undergraduate or graduate medical education relationship or agreement entered into by SCHS or any other member of the SCHS Network, including renewals or any material amendments of agreements as to graduate or undergraduate medical education in effect prior to the Closing Date.

8.7.2 Medical Education. YNHHS shall use its best efforts to assist SCHS in attaining high quality residents and will encourage as appropriate the integration of the SCHS graduate medical education programs with the YNHHS graduate medical education programs (subject to Residency Review Commission approvals). If integration of such programs is not accomplished, YNHHS shall use its best efforts to support the continuation of separate graduate medical education programs at Bridgeport Hospital and at YNHHS.

YNHHS will use its best efforts to encourage the integration where appropriate of SCHS fellowships with YSM fellowship training programs and to encourage appropriate recognition of SCHS medical staff members engaged in YSM affiliated training at Bridgeport Hospital.

Changes to the scope of graduate medical education programs at SCHS, and any revisions thereto contemplated by Section 7.5 hereof, will be subject to the approval of SCHS and YNHHS.

Section 8.8 Mergers, Consolidations, and Dissolutions. Except with the prior consent of YNHHS, neither SCHS nor any other member of the SCHS Network shall enter into discussions or negotiations with any Entity, or solicit any such discussions or negotiations, or solicit any offer from any Entity, in respect of, nor shall SCHS or any member of the SCHS Network conclude: (a) the sale by SCHS or any such member of all or a substantial part of its assets, (b) any merger or a consolidation involving SCHS or any such member, or (c) any contract to manage or administer SCHS, any such member or a substantial part of the business of SCHS or any such member. Except with the prior consent of YNHHS, neither SCHS nor any member of the SCHS Network shall liquidate or dissolve or file for bankruptcy or similar protection.

Section 8.9 Managed Care Relationships. YNHHS has the exclusive right to negotiate with third party payors and commit on behalf of SCHS and the other members of the SCHS Network all terms and conditions of all new or renewed Managed Care Contracts, the grant of such rights to be subject to the following agreements:

- (a) YNHHS shall price competitively in SCHS' Primary Service Area within parameters established in SCHS' Local Plans (as defined in Section 8.2);
- (b) SCHS and all members of the SCHS Network shall provide for all YNHHS sponsored products their best competitive pricing based on comparable products;
- (c) Whenever commercially reasonable, YNHHS shall not offer to (i) any future System Member of which YNHHS is sole member or (ii) any Affiliate of that future System Member, the authority to exclude that System Member's or that Affiliate's competitors from participating in YNHHS sponsored products; the foregoing agreement on the part of YNHHS shall not apply to any product as to which YNHHS or a YNHHS Affiliate does not have the ability to itself control how and to whom that product will be offered;
- (d) Whenever commercially reasonable, YNHHS shall seek exclusive contracts for SCHS and all members of the SCHS Network in SCHS' Primary Service Area; and
- (e) YNHHS shall include all services of members of the SCHS Network available at the time of contracting in all YNHHS Managed Care Contract proposals.

YNHHS and SCHS senior management will each be actively involved in developing YNHHS' managed care policies for the System and in developing the provider network for the Managed Care Contracts offered by the System.

SCHS shall operate, and cause the members of the SCHS Network to operate, within the managed care policies established by the System.

SCHS agrees that it shall, and shall cause the other members of the SCHS Network to, execute such attorney-in-fact or other agreements as YNHHS shall reasonably request to give effect to the provisions of this paragraph.

SCHS shall use its best efforts to obtain in a timely manner for YNHHS contracting authority, within specified terms and conditions, from local physician-hospital organizations in which Bridgeport Hospital participates and/or such organization's related professional corporation; and as necessary to effectively market competitive managed care products in the SCHS Network's market area, SCHS shall use its best efforts to obtain in a timely manner in cooperation with YNHHS such contracting authority, or such contractual alternative as may be reasonable in the circumstances, from local physicians and physician organizations.

Section 8.10 Local Network Development. SCHS shall use its best efforts to develop a local integrated network as part of the strategy contemplated by the Local Plans.

Section 8.11 Affiliations, Systems, and Alliances. Neither SCHS nor any other member of the SCHS Network currently participates directly or indirectly in any affiliation, network, system or alliance of health care providers for the provision of health care services except as shown on Schedules 8.11 A and B. Neither SCHS nor any other member of the SCHS Network shall (a) create or acquire any Affiliate, or (b) except as set forth in Schedule 8.11 B, participate directly or indirectly in any affiliation, network, system, or alliance of health care providers for the provision of health care services in which SCHS or any member of the SCHS Network does not now participate, in either case without the prior approval of YNHHS. Nothing contained herein shall prevent or restrict SCHS or any member of the SCHS Network from participating in any affiliation, network, system or alliance of health care providers listed on Schedule 8.11 A or any arrangements similar to those listed on Schedule 8.11 A.

Section 8.12 System Name; Entity Name. The name of the System shall be Yale-New Haven Health Services Corporation, provided, however, the System may operate under the trade name Yale-New Haven Health System. Prior to the Closing, should another name for the System be selected by YNHHS, that will only be done with the concurrence of SCHS. Neither SCHS nor any other member of the SCHS Network shall change its name or adopt a trade name without the prior written consent of YNHHS.

Section 8.13 Selection of Chiefs. YNHHS shall use its best efforts to assist Bridgeport Hospital in the recruitment and selection of Chiefs of Service in the event that such support is not available through Bridgeport Hospital's affiliation with YSM.

Section 8.14 Advertising, Marketing and Promotional Activities. YNHHS shall, in consultation with SCHS, develop general policies to coordinate the System's and the System Members' advertising, marketing and promotional efforts.

Section 8.15 Compliance with Laws, etc. SCHS shall comply, and shall cause each member of the SCHS Network to comply, with all laws, rules and regulations applicable to its business and shall obtain and preserve all licenses and accreditations necessary or useful to the conduct of the business.

ARTICLE IX

YNHHS MANAGEMENT AND OPERATIONS

Section 9.1 General. YNHHS shall be responsible for establishing the critical balance of local autonomy for the System Members while still achieving System integration. For that reason, and because it is imperative to the accomplishment of the Goals and Objectives, System operations will be guided by policies established by the Board of Directors of YNHHS and with such policies implemented by the management of YNHHS under the general guidelines set forth in this Article.

Section 9.2 YNHHS Management. The responsibilities of certain principal officers of YNHHS shall be substantially as follows:

9.2.1 CEO. The CEO will manage the relationship between YNHHS and the System Members so as to achieve the Goals and Objectives. The CEO will be responsible for implementing programs that are consistent with the Goals and Objectives and with the strategies and policies established by YNHHS.

9.2.2 SCHS President. The SCHS President and Chief Executive Officer will report directly to the CEO and to the SCHS Board and will be elected as a Senior Vice President of YNHHS, and as such shall fully participate as a member of the YNHHS senior management group in the development of YNHHS's strategy, policies and plans.

9.2.3 Other SCHS Officers. The Chief Financial Officer of SCHS, the officer responsible for SCHS' planning and marketing functions, the officer in charge of SCHS' human resources function, and such other officers of SCHS as the Chief Executive Officer of YNHHS shall from time to time designate, shall become members of the YNHHS management team and be employed by YNHHS, provided, if the CEO

designates any such other officer of SCHS, that officer shall be offered employment with compensation equivalent to his then existing compensation, and YNHHS shall do so in a manner that does not cause a breach of any contract then existing with any such officer. Notwithstanding the fact that these officers will be employed by YNHHS, each of them shall report directly to the President and Chief Executive Officer of SCHS. Each of these officers will have an indirect reporting relationship to the YNHHS counterpart for the relevant functional area. The Chief Medical Officer of SCHS will participate fully with other members of the YNHHS management team if not employed by YNHHS. The CEO shall determine the future configuration of the YNHHS staff.

Section 9.3 Committee Structure. An important interface between YNHHS and SCHS will be through YNHHS management committees. These committees will include the participation of key SCHS personnel to ensure SCHS involvement in YNHHS planning and operations. The CEO shall establish such committees as may be necessary or desirable from time to time and appoint appropriate individuals.

ARTICLE X

EXCLUSIVE ALLIANCE

SCHS, including Bridgeport Hospital and its controlled subsidiaries, shall be the exclusive hospital member or hospital affiliate of the System with a principal service area of which Bridgeport, Connecticut is the major component.

ARTICLE XI

REPRESENTATIONS AND WARRANTIES

YNHHS hereby represents and warrants to SCHS, and SCHS hereby represents and warrants to YNHHS, that the statements set forth in this Article are true and correct as of date hereof, and will be true and correct on the Effective Date and the Closing Date, as to it.

Section 11.1 Authority to Enter into Agreement; Enforceability. It has full corporate power and authority to enter into and to carry out the terms and provisions of this Agreement, and the transactions contemplated hereby, without obtaining the approval or consent of any other party or authority (other than any regulatory approvals required under Connecticut law and other than the expiration of any applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, 15 U.S.C. §§ 7A et seq. which period shall have expired on or prior to the Closing Date); all corporate proceedings have been taken and all corporate authorizations have been

obtained by such party and its Affiliates which are necessary to authorize the execution and delivery of this Agreement; and this Agreement is a legal, valid and binding obligation of such party enforceable in accordance with its terms.

Section 11.2 Organization and Standing. It and each of its Affiliates is a corporation duly organized, validly existing and in good standing under the laws of the State of Connecticut. Each such corporation has all requisite corporate power and authority to own, lease, and operate its properties and to carry on its business as it is now being conducted. Complete and correct copies of the Certificate of Incorporation and Bylaws of each party and its Affiliates, as amended to date, have been delivered to the other party.

Section 11.3 Financial Statements. It has provided the other party with the audited balance sheets and income statements of such party and its Affiliates for the most recent three (3) Fiscal Years for which audited statements are available, together with the most recent unaudited balance sheet and income statement of such party. The foregoing financial statements (a) are in accordance with the books and records of such party and its Affiliates, and (b) fairly present the financial condition and results of operations for such party and its Affiliates as of the dates and for the periods indicated in accordance with generally accepted accounting principles applied on a consistent basis, except as may be noted therein. Each party and its Affiliates have no material liabilities or obligations, whether contingent or absolute, direct or indirect, or matured or unmatured, which are not shown or provided for in the most recent of such financial statements or which have not otherwise been disclosed to the other parties.

Section 11.4 Litigation. Except as otherwise disclosed in writing in Schedule 11.4, each party represents and warrants that there are no suits, actions, or legal, administrative, arbitration or other proceedings or governmental investigations pending, filed, or initiated by, or to the best of its knowledge, threatened against or directly involving the party or any of its Affiliates that may materially and adversely affect the operations, financial status or tax-exempt status of such party or its Affiliates or their ability to perform hereunder.

Section 11.5 Compliance with Laws and Other Instruments. To the best of its knowledge, the business and operations of each party and its Affiliates have been and are being conducted in substantial accordance with all applicable laws, ordinances, and rules and regulations of all authorities, the violation of which, individually or in the aggregate, would materially and adversely affect the business or operations of that party or its Affiliates. Except for laws and regulations that commonly apply to health care institutions in Connecticut, and matters, if any, reflected in the financial statements referred to in Section 11.3, each party and its Affiliates are not subject to any restriction of any kind or character which may materially and adversely affect their business or operations. Neither the execution and delivery of this Agreement, nor the consummation of the affiliation contemplated hereby, will conflict with, result in a violation or breach of

any term or provision of, or constitute a default under the Corporate Documents of each party or its Affiliates, or any statute, order, judgment, writ, injunction, decree, license, permit, rule or regulation of any court or any governmental or regulatory body, or any indenture, mortgage, lease, contract, agreement, instrument, commitment or other arrangement to which any party or any of its Affiliates is a party or by which it is or may be bound, which conflict, violation, breach or default would materially and adversely affect the operations of the party or any of its Affiliates.

Section 11.6 Insurance. Each party and its Affiliates have continuously maintained and currently maintain fire, casualty, liability, professional liability and all other insurance (including self-insurance) coverages necessary in their respective businesses and operations. Such insurance policies or programs cover the property, business, and operations of such party and its Affiliates in amounts and against losses and risks such as are generally maintained for comparably situated businesses.

Section 11.7 Material Misstatements or Omissions. No representation or warranty by a party contained in this Agreement or in any certificate or Schedule furnished to the other parties under this Agreement contains any untrue statement of a material fact or omits to state a material fact necessary to make the statements and facts contained therein not materially misleading. Each party and its Affiliates have no "material agreements" other than those that such party and its Affiliates have provided in response to the other party's due diligence investigation which preceded execution of this Agreement.

ARTICLE XII

COVENANTS

From and after the date hereof and through the Closing Date, each party hereby agrees to keep, perform, and fully discharge the following covenants and agreements.

Section 12.1 Interim Conduct of Business. Each party shall use its best efforts and shall cause its Affiliates to use their best efforts to (a) preserve, protect and maintain the businesses, properties and assets of the party and its Affiliates; (b) operate the businesses of the party and its Affiliates as a going concern consistent with prior practices and in the ordinary course of business except that YNHHS shall continue to pursue System development; (c) preserve the goodwill of all individuals having business or other relations with it or them, including physicians, employees, patients, customers and suppliers; (d) prepare all documents called for by this Agreement and required to facilitate the consummation of the transactions contemplated herein; and (e) enter into no new undergraduate or graduate medical education affiliation with any university, medical school, or teaching institution other than YSM. Each party shall provide the other parties promptly with interim financial statements and any material management

reports of the party and its Affiliates as and when they become available. Each Local Network shall make, and shall cause its Affiliates to make, no material changes in its or their Corporate Documents, except for changes expressly authorized by this Agreement.

Section 12.2 Preserve Accuracy of Representations and Warranties. Each party shall take, and shall cause its Affiliates to take, no action that would render any representation and/or warranty contained in Article XI of this Agreement inaccurate as of the Closing Date. Each party shall promptly notify the other party of any lawsuits, claims, administrative actions, investigations, or other proceedings asserted or commenced against the party or any of its Affiliates, or its or their officers, directors, or members involving in any material way the businesses, properties, assets or tax-exempt status of the party or its Affiliates. Each party shall promptly notify the other party in writing of any facts or circumstances which come to the party's attention and which the party reasonably believes causes, or through the passage of time may cause, any of the representations and warranties as to it or its Affiliates contained in Article XI to be false or inaccurate.

Section 12.3 Access to Information. Each party shall give, and shall cause its Affiliates to give, to the other party and to appropriate representatives of each (defined for purposes of this paragraph as a party's directors, officers, employees, agents, or advisors) access, during normal business hours, to such properties, books, records, contracts and other documents pertaining to the businesses, properties and assets of the party and its Affiliates, as may be reasonably requested and appropriate in order for each party to perform its obligations hereunder. Officers and employees of a party and its Affiliates shall be available on a regular and frequent basis to confer with appropriate representatives of the other party to report material operational matters and the general status of ongoing operations. Each party shall cooperate in keeping the other party fully informed and shall promptly provide notice to the other party of any unexpected emergency or other unanticipated adverse change in the business or prospects of the party and its Affiliates.

Section 12.4 Maintain Books and Accounting Practices. Each party shall maintain, and cause its Affiliates to maintain, its and their books of account in the usual, regular and ordinary manner in accordance with generally accepted accounting principles consistently applied and shall make no change in any of their accounting methods or practices without the prior written approval of the other party.

ARTICLE XIII

INDEMNIFICATION

Section 13.1 Indemnification. Each party agrees to indemnify and hold the other party and its Affiliates and their respective directors and officers (collectively a "Section

13.1 indemnified party") forever harmless from and against any and all liabilities, demands, claims, actions, or causes of action, assessments, judgments, losses, costs, damages or expenses, including reasonable attorneys' fees, sustained or incurred by a Section 13.1 indemnified party and not otherwise reimbursed by insurance (other than self-insurance) resulting from or arising out of or by virtue of any false or incomplete representation or warranty made herein by such party or any of its Affiliates or non-compliance with or breach by such party or any of its Affiliates of any of the covenants, commitments or obligations of this Agreement to be performed by such party or any of its Affiliates.

The right to indemnification set forth in this Section 13.1 shall survive termination of this Agreement, except that such right shall expire two (2) years after the Closing Date with respect to any false or incomplete representation or warranty.

Section 13.2 Indemnification Notice. In the event that any claim is asserted against a Section 13.1 indemnified party as to which such party is entitled to indemnification hereunder, such party (the "indemnified party") shall promptly after learning of such claim notify the party obligated to indemnify it (the "indemnifying party") thereof in writing; provided, however, that the failure of the indemnified party to give prompt notice of such claim shall not relieve the obligation of the indemnified party with respect to such claim. Except to the extent otherwise provided by the terms of applicable insurance policies (other than self-insurance), the indemnifying party shall have the right, upon written notice to the indemnified party within ten (10) days after receipt from the indemnified party of notice of such claim, to conduct at its expense the defense against such claim in its own name, or, if the indemnifying party shall fail to give such notice, it shall be deemed to have elected not to conduct the defense of the subject claim, and in such event the indemnified party shall have the right to conduct such defense and to compromise and settle the claim without prior consent of the indemnifying party. In the event that the indemnifying party elects to conduct the defense of the subject claim, the indemnified party will cooperate with and make available to the indemnifying party such assistance and materials as may be reasonably requested by it, all at the expense of the indemnifying party, and the indemnified party shall have the right at its expense to participate in the defense, provided that the indemnified party shall have the right to compromise and settle the claim only with the prior written consent of the indemnifying party, unless otherwise provided by the terms of applicable insurance policies (other than self-insurance).

ARTICLE XIV

CONDITIONS PRECEDENT

Section 14.1 List of Conditions Precedent. The obligations of each party to effect the transactions contemplated hereby are subject to the satisfaction of each of the following conditions:

14.1.1 Each and every representation and warranty by the other party contained in this Agreement or in any certificate, Exhibit or Schedule furnished to the other party pursuant hereto shall be true and complete in all material respects on and as of the Closing Date as though made on such date.

14.1.2 The other party shall have performed and complied with all covenants and conditions required by this Agreement to be performed or complied with by it prior to or on the Closing Date.

14.1.3 The party shall have received a certificate of a duly authorized officer of the other party, dated as of the Closing Date, certifying (a) that there have been no material adverse changes in the other party's business or operations prior to the Closing Date, and (b) that the representations and warranties of the other party and its Affiliates contained in Article XI are true and complete on and as of the Closing Date in all material respects as if made on and as of such date.

14.1.4 No suit or action by any party or any investigation, inquiry, or proceeding by any governmental authority, or any legal or administrative proceeding shall have been instituted or threatened on or before the Closing Date which: (a) questions the validity or legality of this Agreement or any transaction contemplated hereby, or (b) seeks to enjoin any transaction contemplated hereby, or (c) seeks material damages on account of the consummation of any transaction contemplated hereby.

14.1.5 No change shall have occurred or have been announced or proposed prior to the Closing Date in the laws, rules, regulations, or policies of any governmental authority which might reasonably be expected to materially and adversely affect the consummation of this transaction.

14.1.6 Opinions of counsel for each party shall have been delivered to the other party in form and content reasonably satisfactory to the other party.

14.1.7 The party shall have received certified resolutions of the governing body of the other party, dated prior to the Closing Date, evidencing authorization to adopt the changes to the party's Corporate Documents required hereby.

14.1.8 Any applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, 15 U.S.C. §§ 7A *et seq.*, shall have expired, and no judicial action or other proceeding shall have been instituted by any governmental authority or agency, or by any other person before any court or governmental authority or agency which challenges or seeks to restrain or prohibit the performance of this Agreement.

14.1.9 The parties shall have obtained all governmental consents and regulatory approvals required for the consummation of the transaction contemplated by this Agreement.

14.1.10 Each party shall have completed its respective due diligence investigation of the other party.

14.1.11 The parties shall have agreed upon a corporate name for SCHS and for Bridgeport Hospital and for the other members of the SCHS Network that is satisfactory to both parties.

Section 14.2 Failure to Fulfill Conditions Precedent; Waiver. In the event that any of the conditions set forth in Section 14.1 or elsewhere in this Agreement has not been fulfilled as of the appropriate dates, a party may, at its option, provided it has not been the cause of the nonfulfillment or has not contributed thereto, by written notice to the other party, terminate its obligations hereunder (other than its obligations described in Article XIII), and thereupon this Agreement shall be of no further force or effect. By proceeding on the Closing Date, each party shall be conclusively deemed to have accepted or waived fulfillment of all such conditions, unless otherwise provided in a writing executed by both parties at such time. In the event the Closing has not occurred on or before September 30, 1996, then this Agreement shall terminate and be of no further force and effect, unless otherwise provided in a writing executed by both parties.

ARTICLE XV

REIMBURSEMENT AND FEES

In consideration for the services to be performed by YNHHS on behalf of the SCHS Network as the institution responsible for developing and leading the System following the Closing Date, SCHS agrees that it will pay to YNHHS: (a) the full cost of compensation and any contractual obligations of those SCHS employees who become employed by YNHHS pursuant to Sections 9.2.2 and 9.2.3 hereof, and (b) a percentage of the annual operating expenses of the SCHS Network as reflected in the SCHS Network Local Plans, but not more than one percent (1%) of such expenses. SCHS shall pay the full amount required by clause (a) above on a monthly basis. SCHS shall pay the amount required by clause (b) above by paying monthly one-twelfth of the

applicable percentage of the actual operating expenses of the SCHS Network over the preceding twelve month period. On or before ninety (90) days after the end of each fiscal year, the parties shall (if necessary) calculate any adjustment required to be made to the clause (b) payment based upon actual operating expenses for the SCHS Network in the preceding fiscal year. YNHHS may request additional economic support, either through a higher percentage of annual expenses or a request for a capital contribution, to achieve the Goals and Objectives. SCHS shall consider such request and if the SCHS Board determines such to be in SCHS' and the System's best interests, taking into account the payments being made to YNHHS by other System Members, SCHS shall increase the percentage of expenses paid to the YNHHS.

ARTICLE XVI

TERM

The term of this Agreement is perpetual unless terminated by a written agreement executed by both parties or as otherwise specifically provided herein.

ARTICLE XVII

MISCELLANEOUS

Section 17.1 Strict Compliance. No failure by any party to insist upon the strict performance of any covenant, agreement, term or condition of this Agreement shall constitute a waiver of any such breach of such covenant, agreement, term or condition. No waiver of any breach shall affect or alter this Agreement, but each and every covenant, agreement, term and condition of this Agreement shall continue in full force and effect.

Section 17.2 Notices. All notices, requests, approvals, demands and other communications required or permitted to be given under this Agreement shall be in writing and shall be deemed to have been duly given and to be effective when delivered personally (including delivery by express or courier services) or, if mailed, three (3) business days after being deposited in the United States mail as registered or certified matter, postage prepaid, return receipt requested, addressed to parties at the addresses set forth in Schedule 17.2 or to such other address as either party may designate by notice to the other parties.

Section 17.3 Amendments. Except as provided herein, neither this Agreement nor any term or provision hereof may be changed, waived, discharged or terminated except by the written agreement of the parties.

Section 17.4 Captions. The captions to this Agreement are for convenience of reference only and in no way define, limit or describe the scope or intent of this Agreement or any part hereof, nor in any way affect this Agreement or any part hereof.

Section 17.5 Assignment. This Agreement shall be assignable by a party only upon the prior written consent of the other party.

Section 17.6 Controlling Law. This Agreement shall be construed, and the rights and liabilities of the parties hereto determined, in accordance with the internal laws of the State of Connecticut; provided, however, that the conflicts of law principles of the State of Connecticut shall not apply to the extent that they would operate to apply the laws of another state.

Section 17.7 Severability. If any provision of this Agreement shall for any reason be held to be invalid or unenforceable, such invalidity or unenforceability shall not affect any other provision hereof, and this Agreement shall be construed as if such invalid or unenforceable provision were omitted.

Section 17.8 Confidentiality. Each party agrees to not provide a copy of this Agreement or any portion hereof to any person not a party hereto, and to not discuss the contents hereof, or the negotiations or discussions with respect hereto, with any person not a party hereto, other than with that party's legal counsel, auditors and other professional advisors, and except as required by applicable law, provided the parties shall consult as to the need for and timing of the disclosure of this Agreement to any governmental authority. Notwithstanding the foregoing, to coordinate the efforts and improve the position of YNHHS in attracting new System Members the CEO may disclose such information concerning this Agreement as he considers necessary to insure the success of the System.

Section 17.9 Successors and Assigns. This Agreement shall inure to the benefit of and be binding upon the parties hereof, and their respective successors and permitted assigns.

Section 17.10 Expenses. Each party agrees to pay its own expenses incurred in connection with the creation of the System and the transactions contemplated hereby.

Section 17.11 Remedies. In addition to other remedies available at law or provided for herein, the parties shall be entitled to restraint by injunction of the violation, or attempted or threatened violation, of any condition or provision of this Agreement, or to a decree specifically compelling performance of any such condition or provision.

Section 17.12 Entire Agreement. This Agreement, including any Exhibits or Schedules attached hereto, constitutes the entire agreement between the parties hereto with respect to the subject matter hereof.

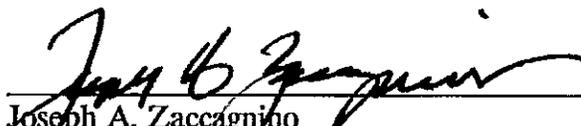

Section 17.13 Cross References. Unless otherwise stated, all references to Exhibits and Schedules in the text of this Agreement are to other Exhibits and Schedules of this Agreement.

Section 17.14 Execution in Counterparts. This Agreement may be executed in two (2) or more counterparts, each of which shall be an original, but all of which taken together shall constitute one and the same Agreement.

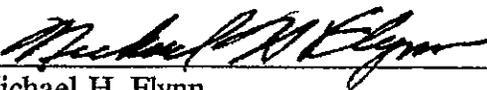

IN WITNESS WHEREOF, the parties have executed this Agreement on the day and year first written above.

Board of Directors (approving proposed affiliation)**

**CERTIFICATION OF
SECRETARY**

I, Sandra Jarva Weiss, Secretary of Southern Connecticut Health System, Inc., a corporation organized and existing under the laws of the State of Connecticut (the Corporation), do hereby certify that a meeting of the Board of Directors of the Corporation duly held on the 18th day of January, 1996, at which a quorum was present and acting throughout, the following resolutions were adopted and are now in full force and effect:

WHEREAS, the Board of Directors has considered the implications of the proposed affiliation with Yale-New Haven Health Services Corporation and finds the affiliation to be in the best interests of the Corporation, its affiliates and the communities and constituencies that they serve; and

WHEREAS, the Board of Directors has considered the legal and financial due diligence materials and presentations that describe the material legal and financial status of Yale-New Haven Health Services Corporation and its affiliates, and

WHEREAS, the Board of Directors has reviewed all of the material terms and conditions of the System Affiliation Agreement between Yale-New Haven Health Services Corporation and the Corporation.

NOW, THEREFORE, be it

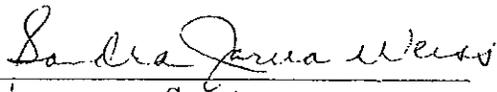

RESOLVED, that the President and Chief Executive Officer and Chairman of the Corporation are hereby authorized to execute on behalf of the Corporation the System Affiliation Agreement with Yale-New Haven Health Services Corporation presented and reviewed at this meeting subject to such modifications as the President and Chief Executive Officer and Chairman deem necessary and appropriate; and it is further

RESOLVED, that the President and Chief Executive Officer and Chairman of the Corporation are authorized to execute on behalf of the Corporation the "Business Plan for Southern Connecticut Health System and Affiliates" ("Business Plan") presented and reviewed at this meeting subject to such modifications as the President and Chief Executive Officer and Chairman deem necessary and appropriate; and it is further

RESOLVED, that the Corporation will work cooperatively with Yale-New Haven Health Services Corporation and will use all commercially reasonable efforts to accomplish the Business Plan within the parameters of the proposed Business Plan budget and accepts the level of financial commitment outlined in the proposed budget as necessary to accomplish the Business Plan; and it is further

RESOLVED, that the President and Chief Executive Officer and Chairman of the Corporation are hereby authorized to execute on behalf of the Corporation all such other contracts, documents and agreements as they deem necessary and appropriate to effectuate proper execution and effect of the System Affiliation Agreement and the Business Plan for the Corporation and its affiliates and to make such filings with regulatory authorities as is necessary to effectuate the affiliation between the Corporation and Yale-New Haven Health Services Corporation

IN WITNESS WHEREOF, I have signed my name as Secretary and have caused the seal of the corporation to be placed this 20th day of February, 1996.

Mr. Joseph A. Zaccagnino
President & Chief Executive Officer
Yale-New Haven Health Services Corporation
789 Howard Avenue
New Haven, CT 06504

Dear Mr. Zaccagnino:

I am writing about the federal tax exemption status of Yale New Haven Health Services Corporation ("YNHHSC") and its related entities currently exempt from federal income taxation under section 501(c)(3) of the Internal Revenue Code ("the Code"). You have asked for an opinion concerning the effect on their respective section 501(c)(3) exemptions of the affiliation between YNHHSC and Southern Connecticut Health Services, Inc. ("SCHS"), the parent corporation of Bridgeport Hospital ("BH") and other subsidiary corporations.

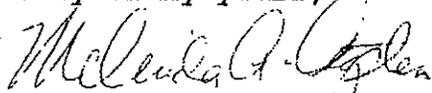

I understand the facts as follows. The proposed affiliation will be effected by having YNHHSC become the sole member of SCHS, which, along with BH and two other SCHS controlled corporations, is currently exempt from federal income taxation under section 501(c)(3) of the Code and not a private foundation. Other than the membership change for SCHS and certain other governance changes related to board composition and the broadening of YNHHSC's purpose to include serving as the parent organization of SCHS and its affiliates, no further significant governance, structural, or operating changes will occur as a result of the affiliation, and it will not alter YNHHSC's purposes of promoting health care in a charitable manner. You have represented that no activities forbidden to or improper for entities maintaining exemption under section 501(c)(3), including but not limited to private inurement, excessive private benefit, political activity, or excessive unrelated trade or business activity, will be conducted.

Under these circumstances, in my opinion the affiliation between YNHHSC and SCHS will not affect the tax status of YNHHSC and its affiliated entities currently exempt under section 501(c)(3). It is my further view that approval of the affiliation by the Internal Revenue Service ("IRS") is not required. The IRS must be notified of the affiliation

Mr. Joseph A. Zaccagnino
February 23, 1996
Page 2

by both YNHHS and SCHS and must also receive copies of the amended corporate documents. This notification should be made either when the next Form 990's are filed or prior to that time by letters to the District Director.

Very truly yours,

Melinda A. Agsten

Reply to Bridgeport
(203) 330-2219

February 22, 1996

Mr. Robert J. Trefry
President and Chief Executive Officer
Southern Connecticut Health System, Inc.
267 Grant Street
Bridgeport, CT 06610

Re: Affiliation with Yale-New Haven Health Services Corporation

Dear Mr. Trefry:

You have requested our opinion as to whether the planned affiliation between Southern Connecticut Health System, Inc. ("SCHS") and Yale-New Haven Health Services Corporation ("YNHHS") would adversely affect the tax-exempt status of SCHS, Bridgeport Hospital, Bridgeport Hospital Foundation, Inc., Rehabilitation Center of Fairfield County, Inc. or SCHS Properties, Inc. SCHS Properties, Inc. is exempt from federal income taxation under Section 501(c)(2) of the Internal Revenue Code of 1986 ("Code") and each of the other aforementioned organizations is exempt from federal income taxation under Section 501(c)(3) of the Code.

SCHS has entered into a System Affiliation Agreement dated January 19, 1996, with YNHHS. The Affiliation Agreement provides, *inter alia*, that YNHHS shall become the sole member of SCHS. As the sole member of SCHS, YNHHS would have certain reserve powers that are detailed in the Affiliation Agreement. Among those powers are the following:

1. Approve SCHS strategic plans, operating budgets and capital budgets.
2. Approve SCHS incurrence of debt over an agreed upon amount.
3. Approve the appointment and removal of the President and Chief Executive Officer of SCHS.
4. Designate a member of the Board of Directors of SCHS.
5. Approve the election of members of the Board of Directors of SCHS.
6. Approve material changes to the Bylaws and Certificates of Incorporation of SCHS and its affiliates.
7. Approve any sale of assets, merger, consolidation or reorganization of SCHS and its affiliates.
8. Approve any major programmatic changes at SCHS and its affiliates.

PULLMAN & COMLEY, LLC

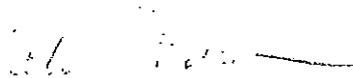

Page 2

The Bylaws and Certificate of Incorporation of SCHS and Bridgeport Hospital Foundation, Inc. and the Bylaws of Bridgeport Hospital and the Rehabilitation Center of Fairfield County, Inc. will be amended effective upon the closing date of the affiliation between SCHS and YNHHS to reflect the provisions of the Affiliation Agreement.

We understand that aside from the revisions to the Bylaws and the Certificates of Incorporation discussed above, no other changes in the corporate documents of SCHS or its affiliates will be made, that their charitable purposes will not change and their actual operation also will remain unchanged. We also understand that the various proscriptions set forth in Section 501(c)(3) of the Code shall continue to be followed by SCHS, Bridgeport Hospital, Bridgeport Hospital Foundation, Inc. and the Rehabilitation Center of Fairfield County, Inc.

Based upon the foregoing, it is our opinion that the affiliation between SCHS and YNHHS as contemplated under the Affiliation Agreement will not adversely affect the exemption from federal income taxation under Section 501(c)(3) of the Code now held by SCHS, Bridgeport Hospital, Bridgeport Hospital Foundation and the Rehabilitation Center of Fairfield County, Inc. or the exemption of SCHS Properties, Inc. under Section 501(c)(2) of the Code.

Very truly yours,

Collin P. Baron

November 1, 1995

Ms. Joan Symon
Assistant Director of Operations
Office of Health Care Access
1049 Asylum Avenue
Hartford, CT 06105

RE: Affiliation of Yale-New Haven Health Services Corporation and
Southern Connecticut Health Systems, Inc.; Letter of Intent

Dear Ms. Symon:

We are writing to inform the Office of Health Care Access ("OHCA") of a proposed affiliation between Yale-New Haven Health Services Corporation ("YNHHSC," the parent corporation of Yale-New Haven Hospital) and Southern Connecticut Health System, Inc. ("SCHS, Inc." the parent corporation of Bridgeport Hospital). The affiliation is designed to establish a strategic alliance between the two systems, enabling these organizations to remain competitive in a changing marketplace by enhancing quality of care and controlling costs. As part of the affiliation, YNHHSC will become the parent corporation of SCHS, Inc. The governing boards and financial structures of each system will remain separate. The Medical Staff appointments and licensure of two hospitals will remain separate.

This proposed affiliation will not involve or result in the introduction of any new functions or services nor the expansion or termination of any functions or services at either hospital. There will be no capital expenditures associated with the affiliation. As such, we would like to explore as appropriate whether any approval of this affiliation by OHCA is required.

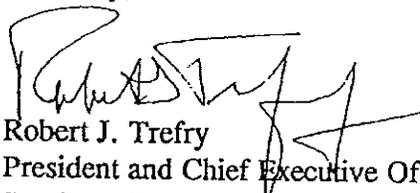

In the event it is determined that certificate-of-need approval is required, this letter is submitted as a letter of intent pursuant to section 19a-154 of the Connecticut General Statutes. The CON applicant would be Yale-New Haven Health Services Corporation, and, if requested by OHCA, Southern Connecticut Health System, Inc. as applicant. The CON application would seek approval as required for the affiliation described above. As noted, there would be no capital cost. The two hospitals would continue to be located at their present locations in New Haven and Bridgeport, Connecticut.

Ms. Joan Symon
November 1, 1995
Page 2

Please forward a copy of the appropriate CON application forms and requests for any additional information to Frank Tiedemann at Yale-New Haven Health Services Corporation. Also, since this affiliation will not affect in any substantive way the operation of either hospital, the applicants would greatly appreciate the assistance of OHCA in expediting any CON review process, including making a determination without holding a hearing.

Thank you for your consideration.

Sincerely,

Robert J. Trefry

Re: Application for Certificate of Need
Other Than Long Term Care - Affiliations/Mergers
LOI # 95-163

Dear Sirs:

Effective July 1, 1995, pursuant to Public Act ("P..A.") 95-257, the Office of Health Care Access ("OHCA") constitutes a successor agency to the Commission on Hospitals and Health Care ("Commission") and the Commission's regulations until amended, repealed or superseded pursuant to law shall remain in effect.

On November 1, 1995, the Office of Health Care Access ("OHCA") received your Letter of Intent ("LOI") dated November 1, 1995. Pursuant to Sections 19a-154 and 19a-155, of the Connecticut General Statutes ("C.G.S."), as amended, your LOI will be considered to be current from **November 1, 1995** to **March 1, 1996**, and will allow for filing of your Certificate of Need ("CON") between **January 30, 1996** and **March 1, 1996**. A complete current LOI must be on file with OHCA not less than 90 days before a Certificate of Need ("CON") application may be considered filed with OHCA. A current LOI is one not more than 120 days old.

OHCA is required pursuant to Sections 19a-153, 19a-154, and Section 19a-155, C.G.S., as amended, to take into consideration certain criteria in its review of CON applications. Please address the questions found in the enclosed CON application related to these criteria as they pertain to your proposal.

When responding to the questions, please repeat each question prior to the answer. If you indicate that the question is "not applicable," please provide an explanation and proper justification. The application should be paginated using consecutive numbering and page numbers should be referenced on a Table of Contents. An original and five (5) copies of the responses with all supporting documentation should be filed with OHCA in the format prescribed in Section 19a-160-27 of OHCA's Regulations and in the time frames described in Sections 19a-154 and 19a-155 C.G.S., as amended, as set forth on page 1 of this correspondence. All subsequent material filed with OHCA will be required in this format and an original and five (5) copies of all material is necessary.

As of January 1, 1993, all Certificate of Need applications and requests to modify a Certificate of Need decision must include a filing fee per Section 19a-160-65b of the Regulations of Connecticut State Agencies. Please complete the attached Certificate of Need Filing Fee Computation Schedule and attach the proper fee in a certified check or cashier's check, made out to "Treasurer, State of Connecticut."

Prior to the submission of the application, please contact the Assistant Director of Operations to discuss your filing date and status of your Letter of Intent.

If you have any questions regarding this matter, please contact me at 566-3880.

Sincerely,

Joan K. Symon
Assistant Director of Operations

WACHHC\FORMS\MRGRCON

Note: Please note that duplicate forms have been sent to each co-applicant for your convenience since some portions of the forms must be filled out by each, with only one filing fee being required.

DEPARTMENT OF PUBLIC HEALTH AND ADDICTION SERVICES BUREAU OF HEALTH SYSTEM REGULATION

November 10, 1994

Joseph A. Zaccagnino
President and Chief Executive Officer
Yale-New Haven Hospital
20 York Street
New Haven, Connecticut 06510-3203

Dear Mr. Zaccagnino:

Unannounced visits were made to Yale-New Haven Hospital on September 13, 1994 with subsequent visits on September 19 and 26, 1994 by representatives of the Hospital and Medical Care Division for the purpose of conducting a licensure inspection.

As requested by the facility, the individual recommendations of the inspection team members made at the time of the exit summary are noted as follows:

As requested by the facility, the individual recommendations of the inspection team members made at the time of the exit summary are noted as follows:

PHYSICAL PLANT/FIRE SAFETY

- o The completion of work orders issued by the Engineering Department should be verified by a Department Supervisor. The Acute Dialysis Unit-Clean Utility Room was noted to have an unrepaired pipe leak above the ceiling located above clean supplies.
- o The Engineering Department maintenance staff, which are assigned to specific areas of the hospital, should be provided with a list of critical and safety items that are monitored, e.g. safe storage of oxygen cylinders, repairs that are required, building and safety code violations, or where hospital systems are altered and used for other purposes.
- o The Engineering Department should develop a Policy and Procedure requiring all out-of-hospital contractors/vendors to submit proposed installations for approval in writing. Upon completion of the installation, the Engineering Department would inspect to assure code compliance.
- o Medical gas valves and valve boxes, located in high materials handling traffic areas should be protected against physical damage and/or tampering.

Phone: 203-566-5758 TDD: 203-566-1279
150 Washington Street -- Hartford, CT 06106
An Equal Opportunity Employer

MEDICAL STAFF BYLAWS AND QUALITY ASSURANCE

- o Consideration should be given to modifying the temporary privileges section which is Article V, Section G on pages 23-24, as follows:
 - a. The temporary privileges in paragraph 1 which may be renewed but shall not extend beyond the period of the pendency of the application should have a firm number affixed when these temporary privileges are given someone. By this I mean "period of pendency of application" is an open-ended period however short it may seem to be and it would make more sense and be more consistent with the rest of the bylaws and with bylaws around the state to assign a particular number of months like three or six months with one extension even for something like this which is envisioned to be a short period.
 - b. The temporary privileges for a visiting physician or dentist may be given for a "specified limited time." Here too, there should be a number like six months with one extension rather than the open-ended adjective or adverb restricting the time period.
 - c. The temporary privileges that may be summarily suspended by the joint action of a chief of staff and a chief or associate chief leads to the possibility that, in departments where there is only a chief and no associate chief, this summary suspension action may come down to a decision involving two people. It is a practice of the Division to discourage very strongly any summary action which is dependent upon an even number of people and therefore possible deadlock. I would recommend that for this temporary privileges summary suspension that any one of the following people be designated to exercise summary suspension of temporary privileges: chief or staff, chief, associate chief, etc. This presently is actually a more restrictive and cumbersome summary suspension clause than the summary suspension clause involving full privileges.
- o As discussed with Attorney Cohn and Dr. Crede, the inconsistent use of practice parameters and volume figures for certain privileges be revisited. By this I mean the expectation that anyone who wishes to do a paracentesis should have done two per year for the two years since the last re-appointment does not make a lot of sense when no one who was requesting privileges to do pericardiocentesis is not asked what his or her particular volume vis-à-vis outcome is. This is to say nothing of the fact that none of these surgical subspecialties whether it's OB/Gyn or vascular surgery is asked such questions. I fully understand the reasoning behind the internal medicine volume questions (and the attempt to limit the number of practitioners requesting but not using certain privileges) but this may be a practice that could lead to more problems than Yale-New Haven Hospital wishes to encounter.
- o Make it clear without going into peer review details the fact and the general nature of the incorporation of QA and QI data in the re-appointment process. Something a little more than a simple statement on the re-appointment sheet should be present.

NURSING

- o Nursing's Quality Improvement Program for the Maternity Department has not been implemented since June 1994. Although the restructuring of the department is in process and a care coordinator role is evolving for the area which will impact on the QI Program, projects which have already been implemented need to go forward/concluded until such time as a new direction has been set.
- o The facility should update its legend to include abbreviations used in current practice. All patient care units should be supplied with a copy.
- o The facility should include training in basic arrhythmia monitoring for those nurses engaged in IV conscious sedation procedures.

DIETARY SERVICES

- o Appropriate arrangements should be made with nursing and dietary services to ensure soiled meal trays are returned to the dietary department in a timely fashion, i.e. prior to service of the next meal.
- o Nursing should obtain admission weights and follow weights when requested by the dietitian, in a timely manner.
- o Consider implementation of a Hazard Analysis or "HACCP" program to identify and avoid potential problems in food handling which may result in outbreaks of food borne illness.
- o Contact the local sanitarian to request a kitchen inspection for the year of 1994.
- o Assess which nutritional risk categories would indicate testing of serum albumin in order to complete the nutritional assessment. Consider proposing that patients in these categories have standing orders which would allow albumins to be tested for patients in these specific nutritional risk categories.

GENERAL

- o Increased surveillance of refrigerators for temperature and cleanliness. Four refrigerators on two units (C-T ICU, and 6-4) were maintained at temperatures of 40, 42, and 44 degrees. Refrigerators were observed cluttered with food and had ice buildup in the freezer.
- o Secure oxygen tanks in all areas.

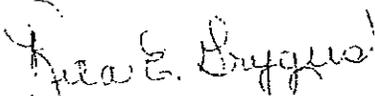

Joseph A. Zaccagnino
President and Chief Executive Officer
Yale-New Haven Hospital
Page 4.

000224

These recommendations are offered for internal consideration only. No response from the facility is anticipated. Should you have any questions please feel free to contact the individual consultant for additional clarification or assistance. On site consultative services are available from the Hospital and Medical Care Division upon written request.

On behalf of the inspection team, my thanks and appreciation for the cooperation and assistance of the hospital staff.

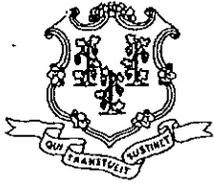

Sincerely,

Rita E. Grygus, R.N., M.S.N.
Medical Facilities Consultation Supervisor

DEPARTMENT OF PUBLIC HEALTH AND ADDICTION SERVICES BUREAU OF HEALTH SYSTEM REGULATION

April 14, 1994

Robert J. Trefry
President and Chief Executive Officer
Bridgeport Hospital
267 Grant Street
Post Office Box 5000
Bridgeport, Connecticut 06610

Dear Mr. Trefry:

An unannounced visit was made to Bridgeport Hospital on March 16, 1994 by representatives of the Hospital and Medical Care Division and the Monitoring and Radiation Division of the Department of Environmental Protection for the purpose of conducting a licensure inspection.

A focused review of the following services was undertaken:

- Nursing - Evaluation of nursing process and infection control procedures.
- Medical Staff - Control of privileges and quality assurance.
- Dietary Services - Therapeutic clinical services.
- Social Services - Discharge planning.
- Physical Plant - Physical environment and fire safety.
- Radiology - Evaluation of equipment and quality control.

The following violations of the State of Connecticut Public Health Code were observed during the course of the inspection.

1. The Clean Utility Rooms, located on the fifth floor through the tenth floor of the West Tower were not provided with doors to separate the rooms from the corridor.

The above is a violation of the State of Connecticut Public Health Code, Section 19-13-D3 (a) Physical Plant (2).

2. In twelve (12) of seventeen (17) nursing care plans reviewed, the plan failed to reflect the actual problems/needs of the patient as evidenced by:
 - a. In five (5) of ten (10) medical records reviewed, care plans lacked individualization.
 - b. Three (3) nursing assessments identified patient educational needs not addressed on the care plan.

Phone: 566-5758 TDD: 203-566-1279
150 Washington Street — Hartford, CT 06106
An Equal Opportunity Employer

2. c. Three (3) care plans identified assessment of patient pain every three hours. The interventions were not documented as identified on the plan.
- d. One (1) patient with newly diagnosed cancer lacked the psychosocial needs of the patient identified on the plan of care.
3. Four (4) of ten (10) medical records reviewed contained physician notes and orders that were illegible.
4. Two (2) of ten (10) medical records contained physician orders that were nonspecific.
5. The facility failed to weigh one (1) of four (4) patients at nutritional risk both upon admission; and also following a recommendation of the registered dietitian.
6. Two (2) of three (3) records in which patients were documented as having received prn (as necessary) medications, the response to the medication was not identified.

The above, 2 through 6, are violations of the State of Connecticut Public Health Code, Section 19-13-D3 (d) Medical Records (3).

7. Five (5) of ten (10) records of patients transferred to skilled nursing facilities failed to include the signature of the patient or family member or representative on the patient discharge plan.

The above is a violation of the Regulations of Connecticut State Agencies, Section 19a-504c-1 Discharge Planning (f) and the State of Connecticut Public Health Code, Section 19-13-D3 (d) Medical Records (3).

8. The hospital's Department of Obstetrics and Gynecology lacked a written standard for, and two (2) of ten (10) VIP (voluntary interruption of pregnancy) records lacked evidence of, the provision of postoperative counseling including family planning to the patient.

The above is a violation of the State of Connecticut Public Health Code, Section 19-13-D54 Regulations on Abortions (d)(10) and Section 19-13-D3 (d) Medical Records (3).

9. Surfaces and countertops (along with various pieces of equipment) in the Emergency Department contained a visible accumulation of dust.
10. The pediatric scale in the "Emergease" area of the Emergency Department contained a visible accumulation of dust.
11. Supplies were stored uncovered on carts in the Plaster Room suite.

12. Supplies and equipment were stored uncovered in the Clean Utility Room on Tower 7 which lacked doors and was therefore open to the hallways.
13. The pediatric warming unit housed in the Emergency Department lacked evidence of current biomedical inspection (last review date 2/15/93).
14. The Endoscopy suite lacked adequate space to prevent cross-contamination of equipment, equipment processing and equipment storage. The suite, additionally, lacked adequate patient processing.
15. The area identified in the preoperative laboratory of "Surgease" allowed for cross-contamination of personnel and patient medical records.

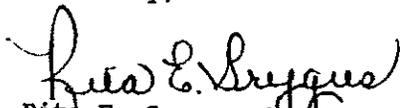

The above, 9 through 15, are violations of the State of Connecticut Public Health Code, Section 19-13-D3 (i) General (7) and (1) Infection Control (4).

Please respond by April 28, 1994 with a plan of correction for these violations.

You may wish to dispute the violations stated above and you may be provided with an opportunity to be heard. If these violations are not responded to by the date requested, or if a request for a meeting is not made within that time period, the violations shall be deemed admitted.

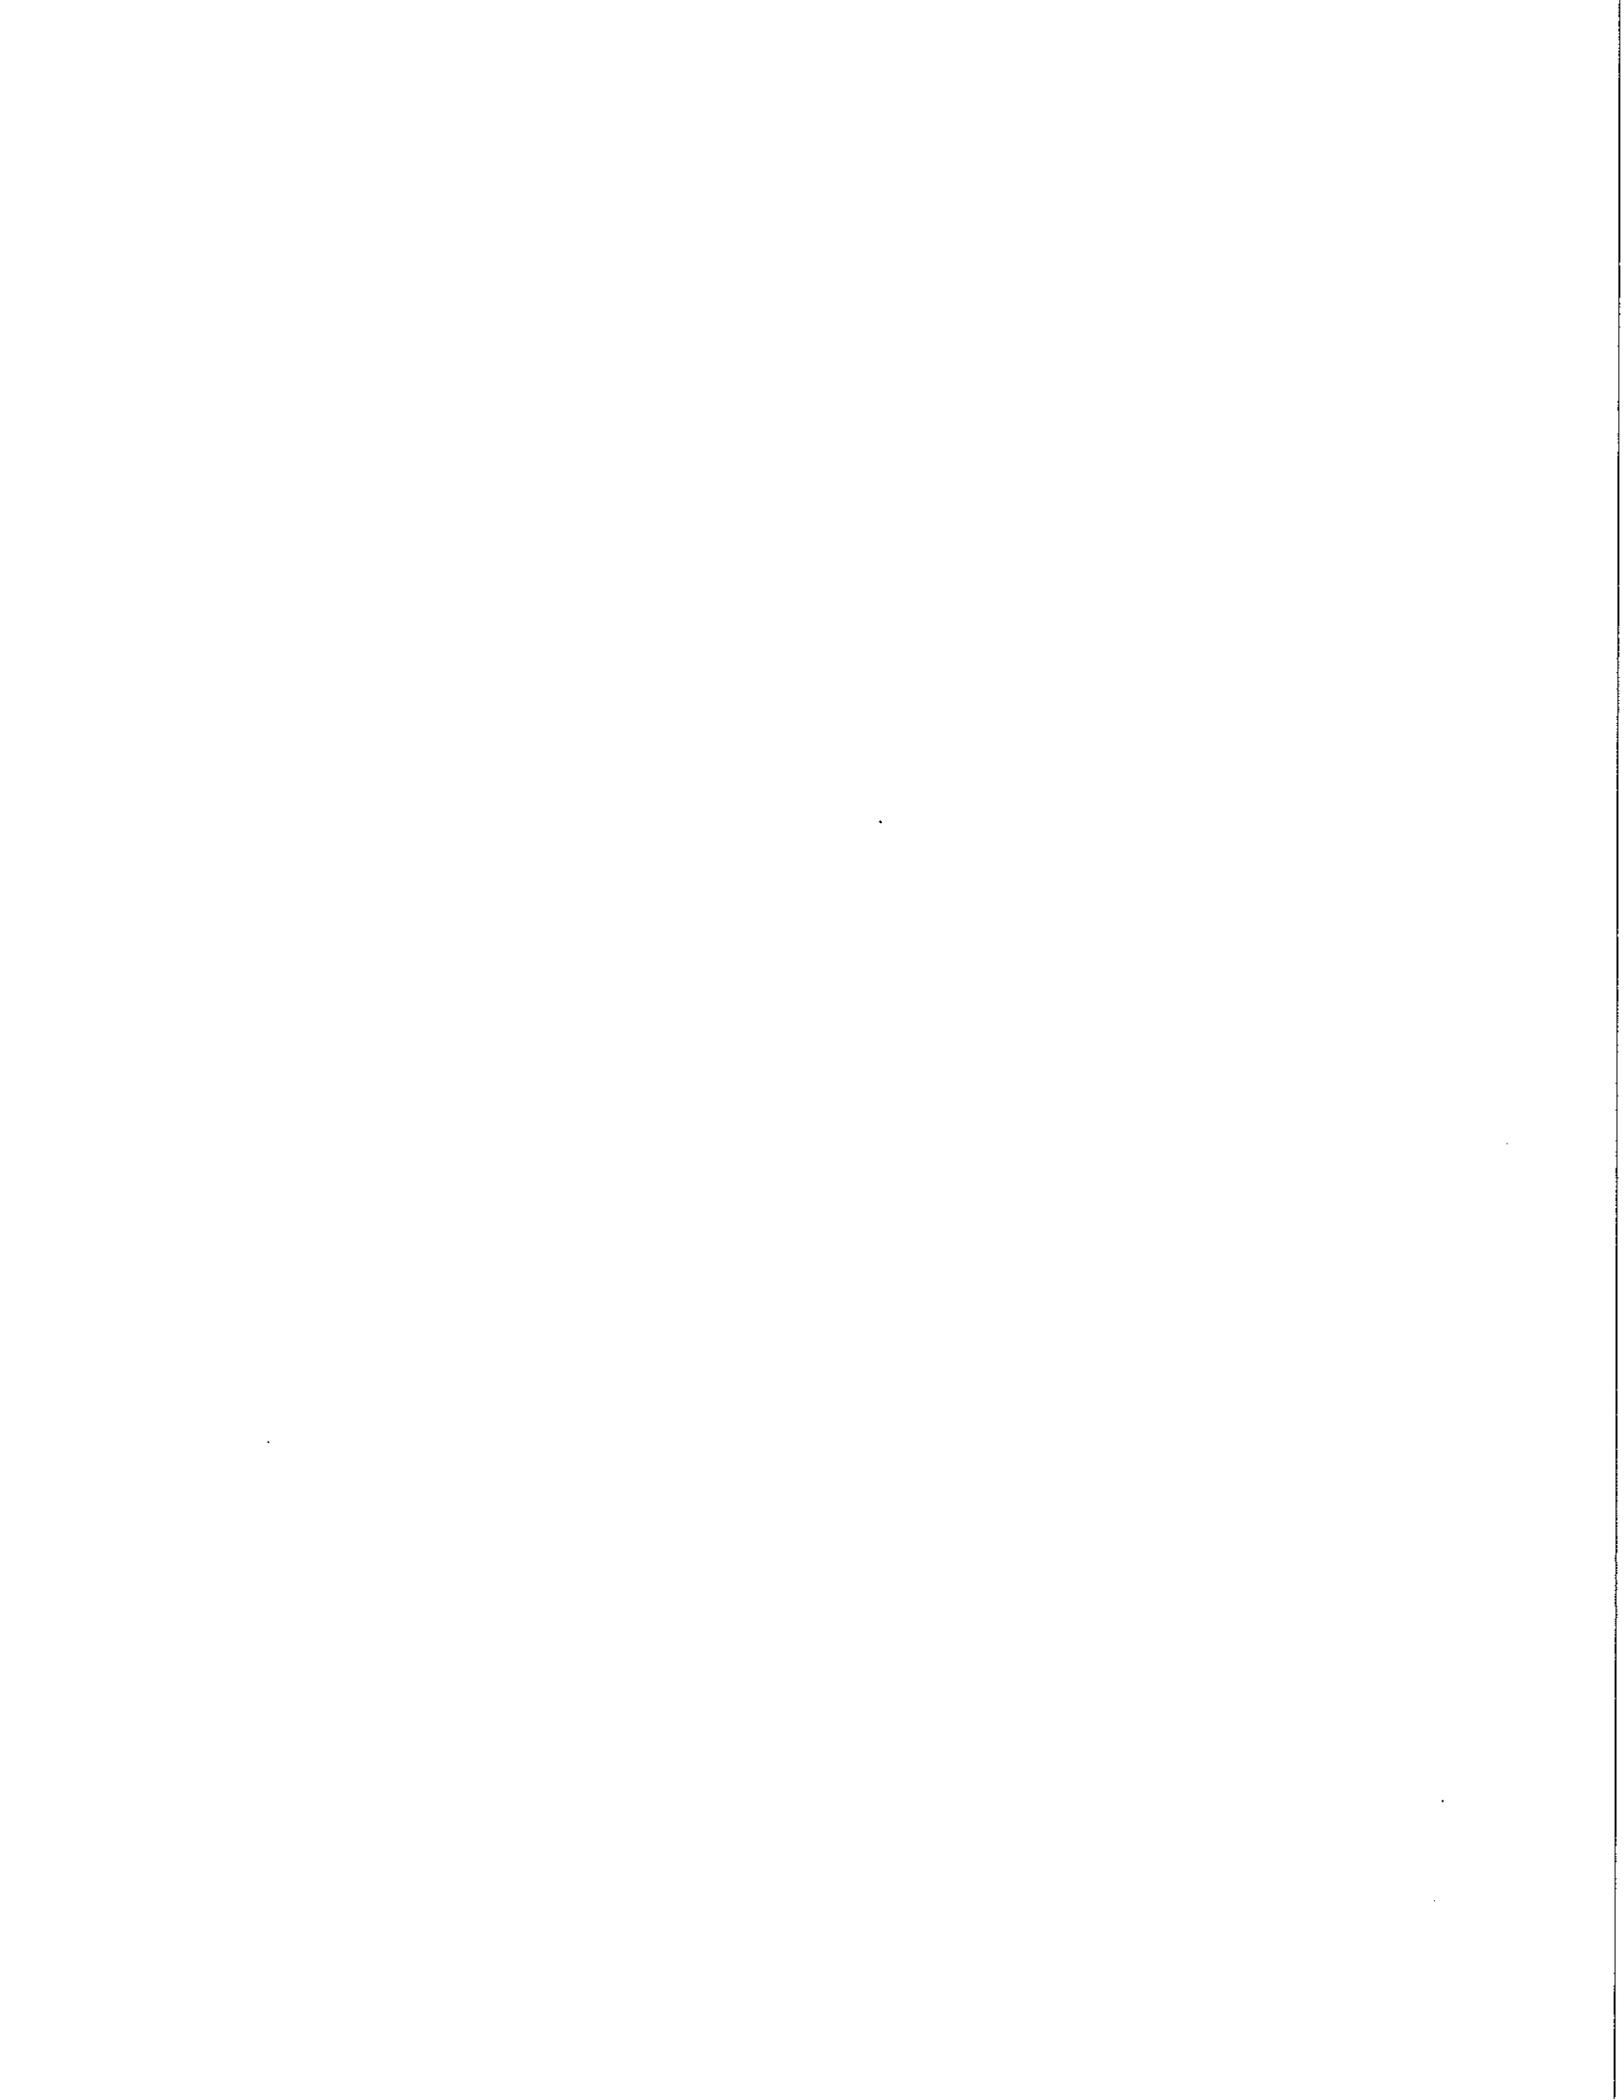

If there are any questions please do not hesitate to contact this office.

Sincerely,

Rita E. Grygus, R.N., M.S.N.

Re: Corporate Affiliation of YNHHS and SCHS, DN 96-518

Dear Hal:

Thank you for updating me about your progress in evaluating the Yale-New Haven Health Services, Inc. (YNHHS) and Southern Connecticut Health System (SCHS) affiliation CON. Per your telephone request on May 21, I am forwarding you the following information.

Clarification of page 17 of the CON application regarding the proposed effective date of the affiliation.

This will be amended to state that the proposed effective date of the affiliation be on or about June 14, 1996.

Clarification of p.21 of the CON application regarding the post-affiliation bylaws of SCHS and its affiliates and post-affiliation Certificates of Incorporation.

These are post-affiliation documents and will be provided upon receiving CON approval.

Please feel free to contact me with any further questions or concerns you may have.

Yours truly,

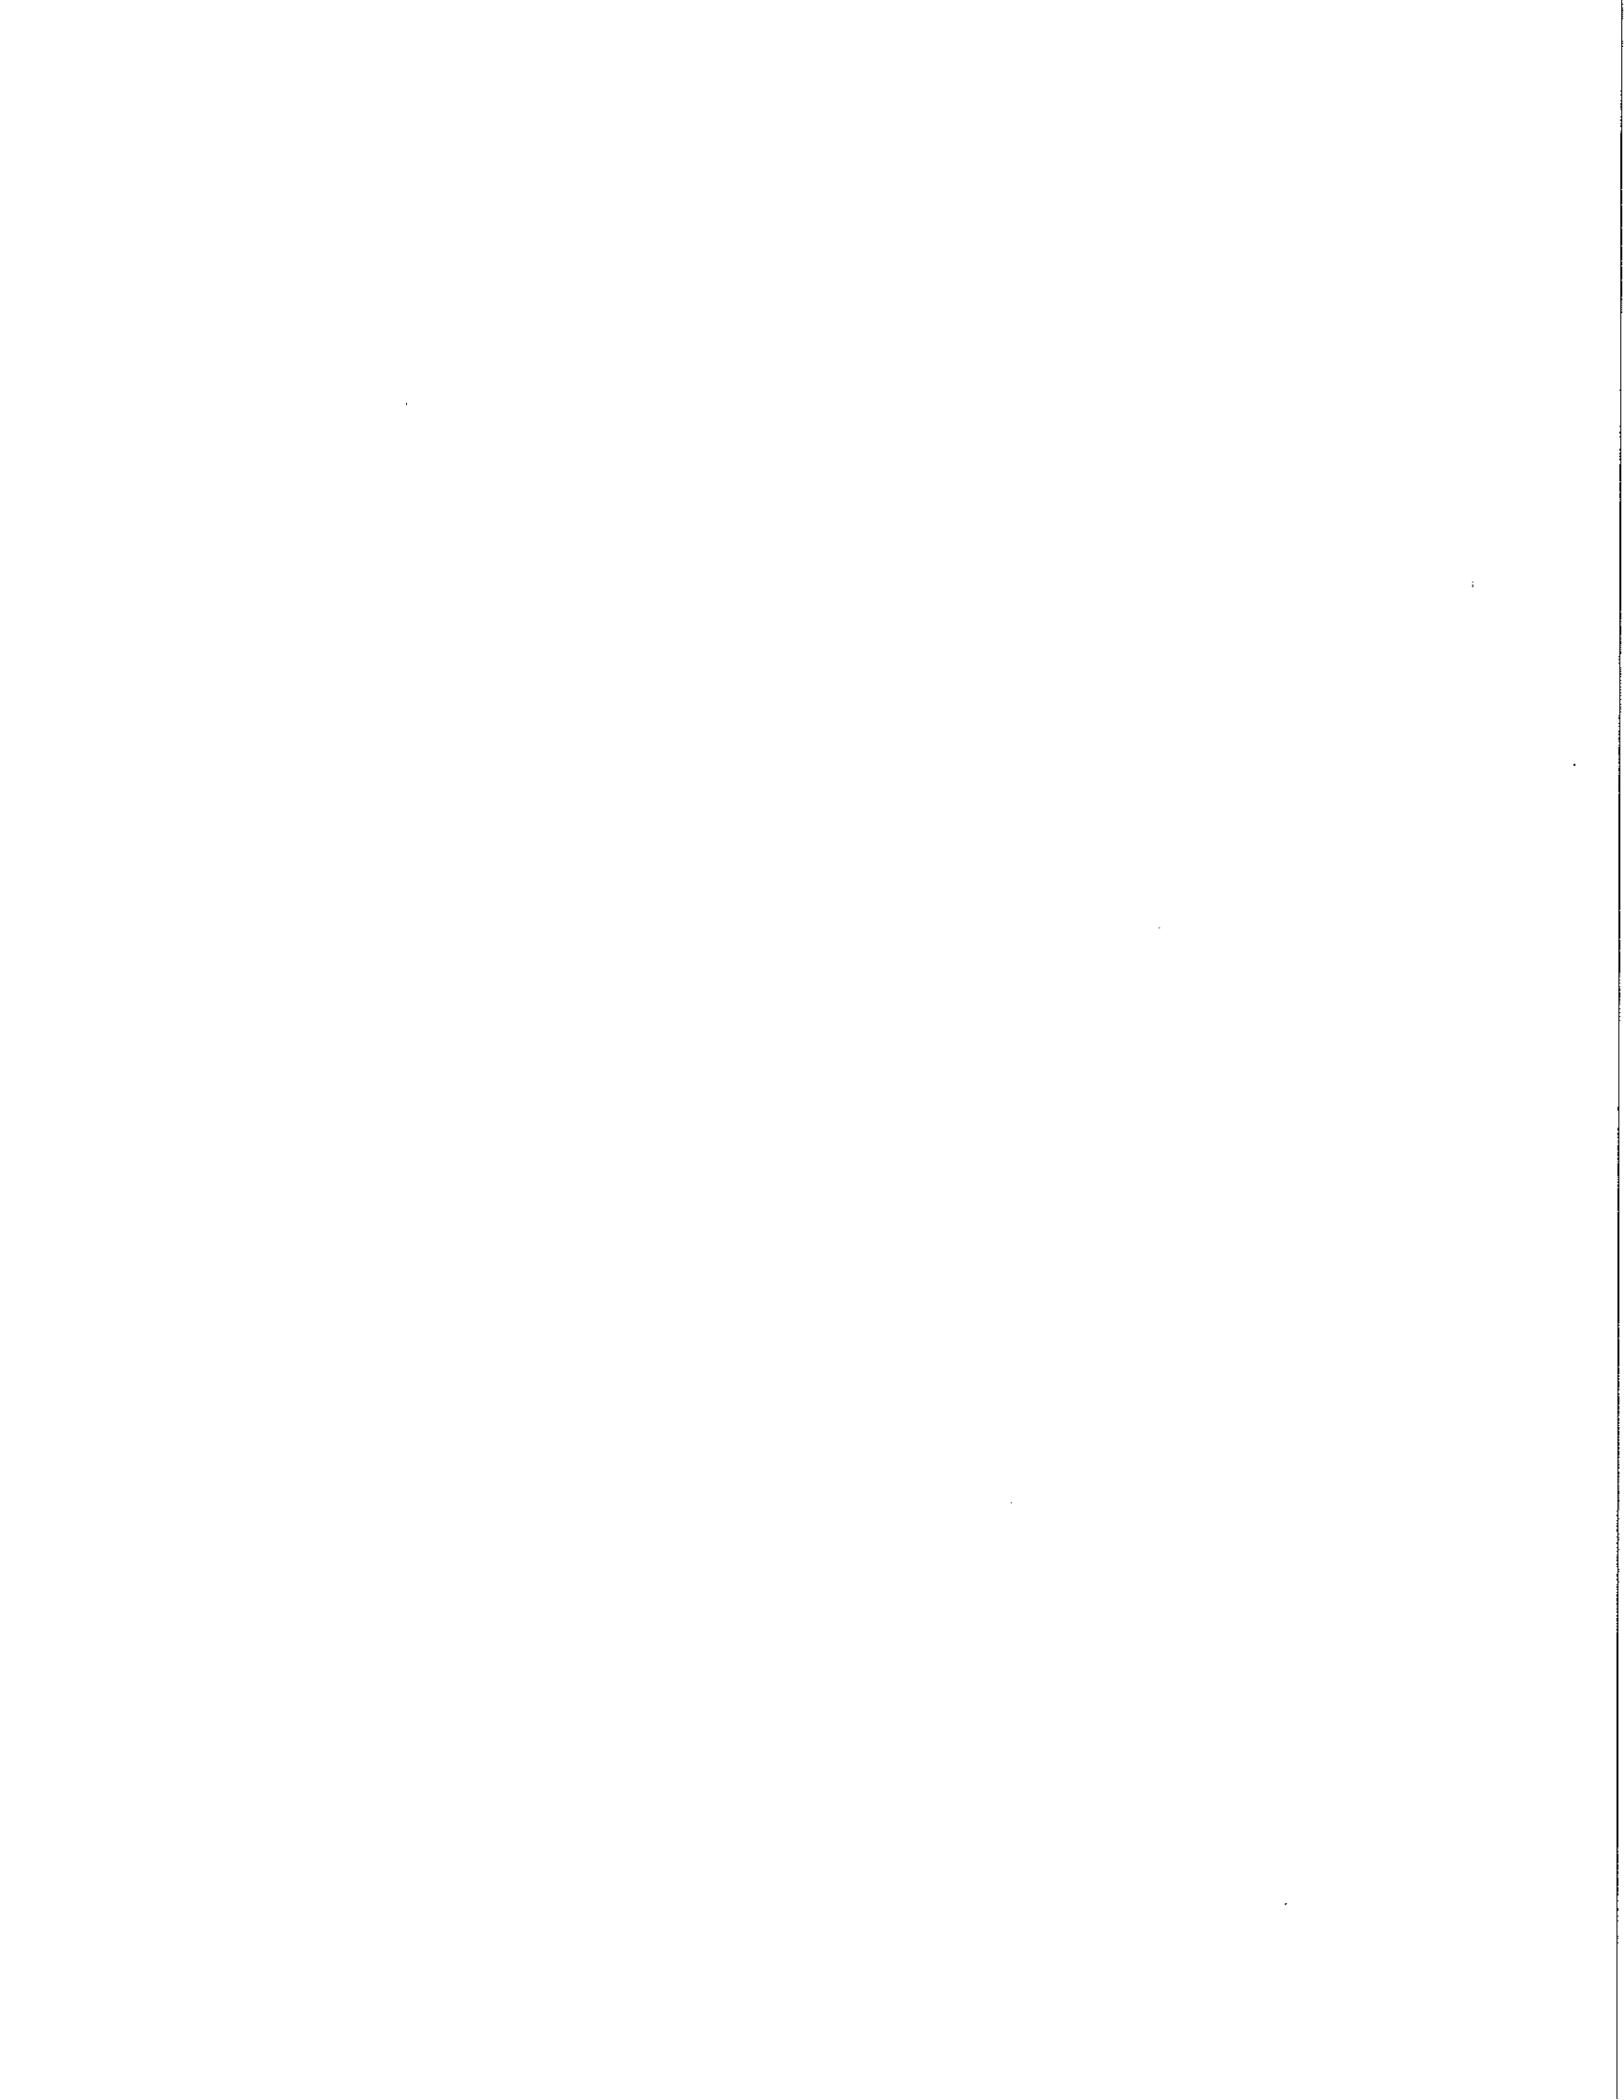

Caroline R. Piselli
Planning Consultant, YNHHS

**Re: Certificate of Need Application, Docket Number 96-513
Corporate Affiliation of Yale-New Haven Health Services Corp.
and Southern Connecticut Health System, Inc.**

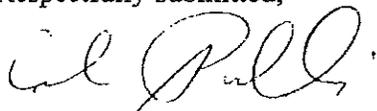

Dear Mr. Oberg:

Enclosed are responses to the completeness questions for DN 96-513, Corporate Affiliation of Yale-New Haven Health Services Corp. (YNHHSC) and Southern Connecticut Health System, Inc. (SCHS) and three copies for your review.

We respectfully request that the remaining review process be expedited and concluded without a hearing, as is authorized pursuant to section 19a-154. The proposed affiliation does not involve any substantive change in the operations of either of the hospitals.

Thank you for your consideration and anticipated cooperation. We are available to answer any questions that you may wish to address to us.

Respectfully submitted,

Caroline Piselli
Planning Consultant

**YALE-NEW HAVEN HEALTH SERVICES CORPORATION
AND
SOUTHERN CONNECTICUT HEALTH SYSTEM, INC.**

Completeness Questions

- 1. The Applicants stated that in the short term, there are no plans to consolidate services; therefore no short-term cost savings are anticipated. Define in terms of months and/or years what the Applicants consider to be "the short-term".**

There are no anticipated cost savings in the foreseeable future, i.e., in 3-5 years. As stated in the response to question #2, p.16 of the CON application, Yale-New Haven Health Services Corporation (YNHHSC) and Southern Connecticut Health System (SCHS) are pursuing a corporate affiliation to create an integrated regional healthcare system.

- 2. Regarding the post-affiliation corporate structure, explain the function of Century Collections which is a part of the proposed corporate structure and why it will be linked to both YNHHSC and SCHS, Inc.**

The stock of Century Collections is held by a number of shareholders including Nova Med (an SCHS affiliate) and York (a YNHHSC affiliate). Because the combined interests of Nova Med and York are greater than 50% of the total stock, Century Collections is shown as linked to both.

- 3. Discuss any future plans the Applicants may have regarding joint purchases of medical equipment and unified patient information systems as a result of the proposed corporate affiliation.**

Independently of the affiliation process, YNHHSC may seek to initiate certain market-driven programs to benefit the system. There are no plans regarding joint purchases of medical equipment and unified patient information systems as a result of the proposed corporate affiliation, but these may be areas for future discussion after the affiliation is complete.

4. **Discuss any future plans the Applicants may have regarding achieving cost savings in areas such as selected business services, purchasing and insurance as a result of the proposed corporate affiliation.**

Currently, there are no plans to achieve cost savings in areas such as business services, purchasing and insurance as a result of the proposed corporate affiliation.

5. **Discuss the change currently planned which involves the integration of the general surgery residency program and the initiation of a combined program in Emergency Medicine as a result of the proposed corporate affiliation.**

Discussions concerning the integration of the residency program in General Surgery between Bridgeport Hospital and Yale-New Haven Hospital began approximately five years ago. Discussions were coordinated by the Chairmen of the Department of Surgery at the School of Medicine, Dr. William Collins and his successor, Dr. Ronald Merrell, and the Chairman of the Department of Surgery at Bridgeport Hospital, Dr. John MacArthur. These discussions pre-dated and were independent of discussions regarding the corporate affiliation of Yale-New Haven Health Services Corporation and Southern Connecticut Health System. An application was forwarded to the Residency Review Committee in General Surgery in 1994 and approval was obtained from that body for integration of the residencies on 8/8/95.

Similarly, discussions concerning the creation of an integrated residency program between Yale-New Haven Hospital and Bridgeport Hospital were initiated approximately 3 years ago. Neither hospital had a residency in Emergency Medicine, but both felt the need for a residency to train physicians in this specialty. An application was forwarded to the Residency Review Committee in Emergency Medicine and approval was obtained from that body on 10/30/95. Again, these discussions and planning were independent of the discussions concerning the corporate affiliation of Yale-New Haven Health Services Corporation and Southern Connecticut Health System, Inc.

6. **Discuss how shared information between YNHHS and SCHS, Inc., facilitated by the proposed corporate affiliation, will enhance both provider education and research endeavors.**

YNHHS and SCHS have collaborated on Yale School of Medicine practice issues prior to the affiliation and will continue to do so. The Definitive Agreement encourages the sharing of information. In the

spirit of true collegiality, the communication of research findings across the system will provide health care professionals with a broader knowledge base and subsequently improve patient care on a continuous basis.

7. **Specify whether the Summaries of Revenue, Expense and Volume Statistics on pages 211, 212 and 213 are for Yale-New Haven Hospital or for Yale-New Haven Health Services Corp. These schedules should pertain only to Yale-New Haven Hospital.**

The Summaries of Revenue, Expense and Volume Statistics on pp.211, 212, and 213 are for Yale-New Haven Hospital.

IN THE MATTER OF:

Yale-New Haven Health Services Corporation
789 Howard Street
New Haven, CT 06520

Docket Number: 96-513
June 13, 1996

Southern Connecticut Health System, Inc.
267 Grant Street
Bridgeport, CT 06610

AGREED SETTLEMENT

WHEREAS, pursuant to Public Act 95-257 and effective July 1, 1995, the Office of Health Care Access ("OHCA") constitutes a successor agency to the Commission on Hospitals and Health Care ("Commission"), and the Commission's Regulations unless amended, repealed or superseded pursuant to law will remain in effect; and

WHEREAS, Yale-New Haven Health Services Corporation and Southern Connecticut Health System, Inc. ("Applicants"), health care facilities and institutions as defined in Section 19a-145 of the Connecticut General Statutes ("C.G.S."), as amended, filed a Certificate of Need ("CON") application with OHCA on April 12, 1996 under Docket Number 96-513, pursuant to Section 19a-154, C.G.S., as amended; and

WHEREAS, the CON application was for the corporate affiliation of Yale-New Haven Health Services Corporation ("YNHHSC"), the parent corporation of Yale-New Haven Hospital doing business at 20 York Street in New Haven, and Southern Connecticut Health System, Inc. ("SCHS"), the parent corporation of Bridgeport Hospital doing business at 267 Grant Street in Bridgeport, with no associated capital expenditure; and

WHEREAS, the Applicants are proposing that YNHHSC, the parent company and sole member of Yale-New Haven Hospital, will also become the parent company and sole member of SCHS, which is and will remain the parent company and sole member of Bridgeport Hospital; and

WHEREAS, the Applicants stated that the proposed corporate affiliation of YNHHSC and SCHS, which is to be effective on or about June 14, 1996, will enhance each entity's patient care, community service, education and research missions, and that the proposed business concept for YNHHSC and SCHS incorporates a proactive approach to anticipate and meet the demands of the healthcare environment; and

WHEREAS, the Applicants stated that upon the effective date of the proposed affiliation of YNHHSC and SCHS, the combined system will be overseen by the YNHHSC Board of Directors, with boards remaining at each of its corporate affiliates which will have specific responsibilities and functions; and

WHEREAS, the Applicants stated that the governing boards, financial structures, medical staff appointments and hospital licensure for each health delivery system will remain separate and will not be impacted by the proposed corporate affiliation; and

WHEREAS, both YNHHC and SCHS are non-stock corporations which are tax-exempt under Section 501(c)(3) of the Internal Revenue Service Code; and

WHEREAS, YNHHC's corporate affiliates are Yale-New Haven Hospital, Yale-New Haven Ambulatory Services Corporation, Harbor Health Plan, Inc. and York Enterprises, Inc. (and its subsidiaries, Medical Center Realty, Inc. and Medical Center Pharmacy & Home Health Care, Inc.); and

WHEREAS, SCHS's corporate affiliates are Bridgeport Hospital, NovaMed Corporation, SCHS Properties, Inc., Rehabilitation Center of Fairfield County, Inc. and Bridgeport Hospital Foundation, Inc.; and

WHEREAS, the Applicants stated that upon the effective date of the proposed affiliation, the role and oversight authority of the YNHHC Board of Directors over SCHS will be as follows:

1. Approve SCHS strategic plans, operating budgets and capital budgets.
2. Approve SCHS incurrence of debt over an agreed upon amount.
3. Designate a member of SCHS Board and approve/consult with respect to other SCHS Board appointments as further described in Article V, Section 5.2 of the System Affiliation Agreement.
4. Approve material changes to the bylaws or certificates of incorporation of SCHS or its affiliates.
5. Approve affiliations by SCHS or its affiliates with other healthcare providers.
6. Approve changes of name, sale of assets or the merger, consolidation or reorganization of SCHS or its affiliates.
7. Approve major programmatic changes by SCHS or its affiliates; and

WHEREAS, the Applicants stated that the licensure of beds and healthcare services at Yale-New Haven Hospital and Bridgeport Hospital will not be changed as a result of the proposed affiliation; and

WHEREAS, the Applicants stated that there are no current plans to integrate clinical programs or non-health care related services, and that the proposed affiliation will not affect the published rates or financial condition of either Yale-New Haven Hospital or Bridgeport Hospital; and

WHEREAS, the Applicants stated that there are no currently anticipated cost savings in the foreseeable future resulting from the proposed affiliation, and that in the future opportunities may be explored for potential cost savings in certain areas such as selected business services, purchasing, insurance and information systems; and

WHEREAS, pursuant to Section 19a-154, C.G.S., as amended, OHCA shall determine whether any additional function or service which a health care facility or institution intends to provide is justified; and

WHEREAS, Section 19a-153, C.G.S. sets forth the principles and guidelines to be considered by OHCA in its review of the CON application; and

WHEREAS, OHCA has reviewed the CON application pursuant to Section 19a-154, C.G.S., as amended, and has fully considered the principles and guidelines set forth in Section 19a-153, C.G.S. in its review; and

WHEREAS, the Applicants' proposal will not impede the Applicants' ability to meet the goals of the most recent State Health Plan that relate to health care services provided by the acute care system in Connecticut; and

WHEREAS, the Applicants' proposal demonstrates that the Applicants are committed to a long range planning process which will be facilitated by the proposed corporate affiliation; and

WHEREAS, the Applicants' proposal appears to be financially feasible and appears to have no adverse impact on the Applicants' financial condition; and

WHEREAS, the Applicants' proposal is not inconsistent with the interests of consumers of health care services and the payers for such services; and

WHEREAS, the Applicants' proposal will not impede the Applicants' continued ability to offer the health care services they currently provide in their region of the state, thereby maintaining the quality of health care delivery in the region; and

WHEREAS, the Applicants' proposal will not impede the Applicants' ability to maintain the current level of accessibility of health care delivery in the region; and

WHEREAS, the Applicants' proposal will not impede the Applicants' ability to continue to maintain the cost-effectiveness of health care delivery in the region; and

WHEREAS, the Applicants' proposal appears to demonstrate that the Applicants are technically, financially and managerially competent to provide efficient and adequate service to the public; and

WHEREAS, the Applicants' proposal does not include any proposed capital expenditure or incremental operating expenses; and

WHEREAS, the Applicants' proposal will not impact the Applicants' current utilization statistics, as there are no service relocations, additions or terminations planned to occur as a result of the proposed corporate affiliation; and

WHEREAS, the Applicants' proposal will not affect the teaching and research responsibilities of the Applicants but future collaboration between the Applicants in these areas may eventually be developed as a result of the proposed corporate affiliation; and

WHEREAS, the Applicants presented no evidence concerning the proportionate number of patients of different types and physicians of different types, that differentiates the Applicants from otherwise similar applicants; and

WHEREAS, the Applicants' proposal demonstrates that the Applicants have committed themselves to making voluntary efforts in improving productivity and containing costs; and

WHEREAS, the Applicants' stated that currently there are no plans to achieve operational cost savings as a result of the proposed corporate affiliation, and that in the future opportunities may be explored for potential cost savings in various areas of health care delivery system operations; and

WHEREAS, both OHCA and the Applicants wish to resolve their differences regarding this CON application.

NOW, THEREFORE, the Office of Health Care Access ("OHCA") and Yale-New Haven Health Services Corporation and Southern Connecticut Health System, Inc. ("Applicants"), hereby stipulate and agree to the terms of settlement with respect to the Applicants' request for a Certificate of Need ("CON") for the corporate affiliation of Yale-New Haven Health Services Corporation ("YNHHSC"), the parent corporation of Yale-New Haven Hospital doing business at 20 York Street in New Haven, and Southern Connecticut Health System, Inc. ("SCHS"), the parent corporation of Bridgeport Hospital doing business at 267 Grant Street in Bridgeport, with no associated capital expenditure, as follows:

1. The Applicants' request for a CON for the corporate affiliation of YNHHSC, the parent corporation of Yale-New Haven Hospital doing business at 20 York Street in New Haven, and SCHS, the parent corporation of Bridgeport Hospital doing business at 267 Grant Street in Bridgeport, with no associated capital expenditure, is hereby approved. The effective date of the approved corporate affiliation presented in **Attachment I**, will be on or about June 14, 1996.
2. OHCA and the Applicants agree that within sixty (60) days of the effective date of the approved corporate affiliation, the Applicants will submit to OHCA a copy of the final executed corporate affiliation documents, which will also include a copy of the final post-affiliation Certificates of Incorporation and bylaws of the Applicants and their affiliates.

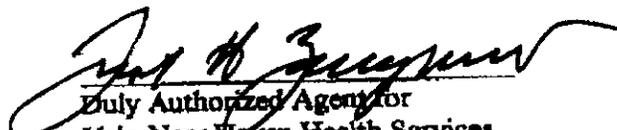

3. OHCA and the Applicants agree that there is no capital expenditure associated with this CON project. In the event that the scope of project is changed or that the Applicants expect to incur capital expenditures, the Applicants shall file with OHCA a request for approval of the changed scope or capital expenditures prior to implementing such change in scope or incurring such capital expenditures.
4. For purposes of CON approval requirements, Yale-New Haven Hospital and Bridgeport Hospital will continue to be considered as two separate hospitals operating on two separate campuses, with any movement of beds and services from one hospital campus to the other hospital campus requiring CON approval. Pursuant to Section 19a-154, C.G.S., as amended, should Yale-New Haven Hospital and/or Bridgeport Hospital seek to add, consolidate or terminate services on either hospital campus and /or substantively reduce the services offered by either hospital, CON approval would be required for either hospital to so proceed. Nothing contained herein shall cause the Applicants to be exempt from compliance with federal and state antitrust laws, and such laws shall remain in full force and effect as to the Applicants as if no action had been taken by OHCA.
5. OHCA and the Applicants agree that a plan for the attainment of cost savings, which reflects any specific incremental operating expense reductions anticipated to result from actions emerging from the corporate affiliation approved herein, will be filed with OHCA by July 31, 1997. This filing will include a completed **Attachment II** for Yale-New Haven Hospital and Bridgeport Hospital individually, and the assumptions related to these operating expense reductions. In addition, OHCA and the Applicants further agree that within sixty (60) days subsequent to the end of each fiscal year for the first three full fiscal years following the corporate affiliation, a fully completed **Attachment II** will be filed for Yale-New Haven Hospital and Bridgeport Hospital individually, reflecting a total of all actual cost savings for the completed fiscal year facilitated by the corporate affiliation.
6. The Applicants shall obtain the further approval of the Department of Public Health and all other local, state and federal agencies governing the licensing of health care facilities, and the Applicants shall report to OHCA upon receiving such licensure approvals.
7. This CON authorization shall expire on June 13, 1997, unless the Applicants present evidence to OHCA that the corporate Affiliation has become effective by that date.
8. OHCA and the Applicants recognize and agree that Section 4-38d(b), C.G.S. shall apply to the terms of this Agreed Settlement.
9. OHCA and Yale-New Haven Health Services Corporation and Southern Connecticut Health System, Inc. agree that this represents a final agreement between OHCA and Yale-New Haven Health Services Corporation and Southern Connecticut Health System, Inc. with respect to this request. The signing of this Agreed Settlement resolves all objections, claims and disputes which may have been raised by the Applicants with regard to Docket Number 96-513.

Re: Certificate of Need Modification, Docket Number 99-536R
Yale-New Haven Health Services Corporation and
Southern Connecticut Health Systems, Inc.
Modification of Docket Number 96-513

Dear Ms. Schreiber:

On June 16, 1996, the Office of Health Care Access ("OHCA") granted a Certificate of Need ("CON") under Docket Number 96-513, to Yale-New Haven Health Services Corporation and Southern Connecticut Health System, Inc. ("Applicants"). The CON authorized the corporate affiliation of Yale-New Haven Health Services Corporation, the parent corporation of Yale-New Haven Hospital, and Southern Connecticut Health System, Inc., the parent corporation of Bridgeport Hospital.

Stipulation # 5 in the Agreed Settlement under Docket Number 96-513 states the following:

- "5. OHCA and the Applicants agree that a plan for the attainment of cost savings, which reflects any specific incremental operating expense reductions anticipated to result from actions emerging from the corporate affiliation approved herein, will be filed with OHCA by July 31, 1997. This filing will include a completed **Attachment II** for Yale-New Haven Hospital and Bridgeport Hospital individually, and the assumptions related to these operating expense reductions. In addition, OHCA and the Applicants further agree that within sixty (60) days subsequent to the end of each fiscal year for the first three full fiscal years following the corporate affiliation, a fully completed **Attachment II** will be filed for Yale-New Haven Hospital and Bridgeport Hospital individually, reflecting a

total of all actual cost savings for the completed fiscal year facilitated by the corporate affiliation.”

On May 4, 1999, Yalc-New Haven Health Services Corporation and Southern Connecticut Health System, Inc. filed a request under Docket Number 99-536R, seeking modification to eliminate paragraph 5 from the Agreed Settlement. This modification is requested because the information is reported in a format that does not provide useful information to OHCA.

OHCA has reviewed the request for a modification to the Order issued under Docket Number 96-513. The provisions of Section 19a-638, C.G.S., as well as the principles and guidelines set forth in Section 19a-637, C.G.S. were fully considered by OHCA in its review.

OHCA hereby approves the Applicants' modification request. Stipulation # 5 is vacated. All other conditions contained in the June 16, 1996, OHCA order issued under Docket Number 96-513, not amended by this modification remain in effect.

Sincerely,

Raymond J. Gorman

Memorandum

Yale-New Haven Hospital

To: Mert Gollaher, Esq., Terry Jones, Esq., Jeanette Schreiber
From: Caroline Piselli *CP*
Date: February 23, 1996
Subject: YNHHC/SCHS CON Submission

Enclosed for your review is a final draft of the YNHHC-SCHS Affiliation CON application questions and responses. Please provide your comments by Monday morning.

The package of exhibits and appendices had been previously provided to you on February 16. Since that time, the following changes/additions have been made to those attachments:

- Replacement of Bridgeport Hospital Foundation Pre-Affiliation Bylaws with clean copy;
- Removal of all drafts of Post-Affiliation Bylaws for SCHS, Inc. and its affiliates;
- Replacement of Post-Affiliation Bylaws for YNHHC with final version;
- Removal of all Post-Affiliation Certificates of Incorporation for SCHS, Inc. and its affiliates;
- Addition of two Directors and representations of the proposed Post-Affiliation Board of Directors;
- Inclusion of the signed SCHS Board Resolution;
- Inclusion of legal opinion regarding continued tax-exempt status for both YNHHC and SCHS;
- Inclusion of the most recent Department of Health and Addiction's Services licensing survey for YNH and BH.

In addition, a copy of the legal opinion regarding continued tax-exempt status (Exhibit M.2) from Collin Baron, Esq. is included for your review.

As of January 1, 1993, all Certificate of Need applications and requests to modify a Certificate of Need decision must include a filing fee per Section 19a-160-65b of the Regulations of Connecticut State Agencies. Please complete the attached Certificate of Need Filing Fee Computation Schedule and attach the proper fee in a certified check or cashier's check, made out to "Treasurer, State of Connecticut."

Prior to the submission of the application, please contact the Assistant Director of Operations to discuss your filing date and status of your Letter of Intent.

If you have any questions regarding this matter, please contact me at 566-3880.

Sincerely,

Joan K. Symon
Assistant Director of Operations

W:\CHHC\FORMS\MRGRCON

P.S.: Please note that duplicate forms have been sent to each co-applicant for your convenience since some portions of the forms must be filled out by each, with only one filing fee being required.

Re: Application for Certificate of Need
Other Than Long Term Care - Affiliations/Mergers
LOI # 95-163

Dear Sirs:

Effective July 1, 1995, pursuant to Public Act ("P.A.") 95-257, the Office of Health Care Access ("OHCA") constitutes a successor agency to the Commission on Hospitals and Health Care ("Commission") and the Commission's regulations until amended, repealed or superseded pursuant to law shall remain in effect.

On November 1, 1995, the Office of Health Care Access ("OHCA") received your Letter of Intent ("LOI") dated November 1, 1995. Pursuant to Sections 19a-154 and 19a-155, of the Connecticut General Statutes ("C.G.S."), as amended, your LOI will be considered to be current from **November 1, 1995 to March 1, 1996**, and will allow for filing of your Certificate of Need ("CON") between **January 30, 1996 and March 1, 1996**. A complete current LOI must be on file with OHCA not less than 90 days before a Certificate of Need ("CON") application may be considered filed with OHCA. A current LOI is one not more than 120 days old.

OHCA is required pursuant to Sections 19a-153, 19a-154, and Section 19a-155, C.G.S., as amended, to take into consideration certain criteria in its review of CON applications. Please address the questions found in the enclosed CON application related to these criteria as they pertain to your proposal.

When responding to the questions, please repeat each question prior to the answer. If you indicate that the question is "not applicable," please provide an explanation and proper justification. The application should be paginated using consecutive numbering and page numbers should be referenced on a Table of Contents. An original and five (5) copies of the responses with all supporting documentation should be filed with OHCA in the format prescribed in Section 19a-160-27 of OHCA's Regulations and in the time frames described in Sections 19a-154 and 19a-155 C.G.S., as amended, as set forth on page 1 of this correspondence. All subsequent material filed with OHCA will be required in this format and an original and five (5) copies of all material is necessary.

Assistant Director of Operations
Office of Health Care Access
1049 Asylum Avenue
Hartford, CT 06105

RE: Affiliation of Yale-New Haven Health Services Corporation and
Southern Connecticut Health Systems, Inc.; Letter of Intent

Dear Ms. Symon:

We are writing to inform the Office of Health Care Access ("OHCA") of a proposed affiliation between Yale-New Haven Health Services Corporation ("YNHHC," the parent corporation of Yale-New Haven Hospital) and Southern Connecticut Health System, Inc. ("SCHS, Inc." the parent corporation of Bridgeport Hospital). The affiliation is designed to establish a strategic alliance between the two systems, enabling these organizations to remain competitive in a changing marketplace by enhancing quality of care and controlling costs. As part of the affiliation, YNHHC will become the parent corporation of SCHS, Inc. The governing boards and financial structures of each system will remain separate. The Medical Staff appointments and licensure of two hospitals will remain separate.

This proposed affiliation will not involve or result in the introduction of any new functions or services nor the expansion or termination of any functions or services at either hospital. There will be no capital expenditures associated with the affiliation. As such, we would like to explore as appropriate whether any approval of this affiliation by OHCA is required.

In the event it is determined that certificate-of-need approval is required, this letter is submitted as a letter of intent pursuant to section 19a-154 of the Connecticut General Statutes. The CON applicant would be Yale-New Haven Health Services Corporation, and, if requested by OHCA, Southern Connecticut Health System, Inc. as applicant. The CON application would seek approval as required for the affiliation described above. As noted, there would be no capital cost. The two hospitals would continue to be located at their present locations in New Haven and Bridgeport, Connecticut.

Steve, Brian, Ron and Kaila,

Attached is the cover letter and Word/Adobe responses to the second set of completeness questions for the affiliation of L+M Corp and YNHHS. Thank you for your consideration of this important project.

Thank you.

Nancy

Re: Affiliation of Lawrence + Memorial Corporation with Yale New Haven Health Services Corporation (DN: 15-32033-CON) – 2nd Completeness Letter Responses

Dear Ms. Martone:

Please find attached to this email communication, an MS Word and Adobe Acrobat file containing the responses to the second set of completeness questions posed by the Office of Healthcare Access on February 4, 2015.

We appreciate OHCA's time and effort related to this critically important proposal. Please feel free to contact me at (203) 688-5721 with any questions.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Nancy Rosenthal'.

Docket Number: 15-32033-CON

Responses to Completeness Questions – 2nd Letter

March 30, 2016

1. Provide or address the following regarding prices, charges and cost savings as related to this proposal and past Yale New Haven Health Services Corporation (“YNHHSC”) hospital affiliations:

- a. Explain the impact on prices charged to patients that received health care services at the Hospital of St. Raphael (“HSR”) main and satellite campuses both before and after the acquisition of HSR by YNHHS. Provide a detailed explanation for any increases or decreases in price structure, average pricing and pricing policies following the acquisition.**

In the aggregate, rates have not increased by virtue of the integration, in part, because YNHH had agreed to blend the commercial rates for most YNHH and HSR payers so that commercial rates before and after the integration were essentially equivalent¹. However, comparison of rates between the former HSR and YNHH is akin to proverbially comparing apples and oranges, because so many changes were made as the result of the integration of HSR into YNHH.

As previously stated in this Application, YNHHS does not negotiate rates on a system-wide basis for its affiliated providers. Rather, YNHHS negotiates with relevant payers based upon each provider’s individual cost structure, intensity of service, payer relationship and physician relationships. YNHHS’s managed care department does negotiate on behalf of all the providers in YNHHS, which provides economies of scale from consistent billing protocols, care management arrangements, management of denials, and other non-financial details of the payer agreements. However, the financial terms of each payer agreement are unique to each institution, and there are no common rates across all YNHHS providers. Thus, pricing for each YNHHS provider is not arbitrarily established, without regard to the operational needs of the provider or each payer’s unique pricing policies or methodologies. More importantly, YNHHS does not control its reimbursement; rather, rates are set through negotiations with each payer. With respect to government payers, who represent approximately sixty percent (60%) of the patient mix at YNHH (both the York Street campus and the former HSR campus), reimbursement rates are not at all negotiated; instead, they are established by the governmental payer.

¹ YNHH agreed to “budget neutrality” for six of its largest payers. It is also worth noting that in the last four years since YNHH took over the operations on the former HSR campus, governmental reimbursement has progressively decreased while taxation of hospitals has progressively increased. Therefore, comparing prices at HSR before YNHH assumed operations with now is not an accurate assessment of how the integration has affected the price of health care. By way of example, see Memo to hospitals on “Supplemental Payments” from the State of Connecticut Office of Policy and Management attached hereto as Exhibit A.

At the time of the HSR CON filing (see Docket Number: 12-31747-CON and 12-31747-MDF), the financial viability of HSR was in question. Had YNHH not purchased the assets of the HSR, it is very likely that many of the patients who had historically frequented the HSR would have turned to YNHH as their provider of choice. Instead of allowing the hospital to languish, with the strong support of the community, YNHH purchased the hospital and invested significant resources and capital into the HSR campus, transforming the level of care on the HSR campus, all the while keeping most of the HSR workforce intact.

- b. Provide a detailed comparison of risk-adjusted prices for health care services currently provided at L+M, Yale-New Haven, Greenwich and Bridgeport Hospitals and provide supporting evidence. Identify any assumptions made in this comparison. Discuss whether and how Greenwich and Bridgeport Hospital's affiliation with the YNHHSC system has provided identifiable benefits to payers and consumers as a result of any changed pricing structure, in the 3 years immediately after these affiliations and at present.**

Currently, none of the hospitals referenced above have the ability to provide the specific analysis relating to risk-adjusted pricing because there is no such standard industry metric that measures patient acuity or other variables that may affect cost and price. In addition, even if L+M and the current YNHHSC hospitals had the ability to conduct a risk-adjusted analysis, such information, which would include pricing information, is competitively sensitive, and could not be shared under applicable antitrust laws. As stated earlier, each of the above-referenced hospital providers has different negotiated rates with each of the payers, subject to contractual confidentiality provisions imposed by the payer. Moreover, and as stated earlier, YNHHSC does not negotiate its provider rates on a system-wide basis, but rather negotiates each provider's rates in accordance with the specific provider's cost structure. It is also assumed in this Application that the costs associated with the transformation from volume to value-based purchasing will be less costly for L+M, and any of the other hospitals mentioned above, by virtue of the cost efficiencies achieved by being part of the YNHHSC System.

- c. Describe in detail how the prices for health care services at L+M will be affected following the YNHHSC ownership change.**

As previously stated, the transaction will not result in any change in the L+M Hospital chargemaster, and there is no evidence that prices will go up as a result of the proposed affiliation. The Federal Trade Commission reviewed the affiliation and declined to investigate it further because there was no reason to conclude that the affiliation would lessen competition or allow the applicants to raise prices for general acute-care hospital services. To the extent that L+M can achieve greater operational efficiencies and

economies of scale through its affiliation with YNHHS, L+M’s ability to control costs will in fact be more favorable than that of a standalone community hospital.

d. Discuss in detail and provide the associated dollar amounts for any cost savings achieved at Greenwich Hospital, Bridgeport Hospital and HSR following their affiliation with YNHHS. Specify the timeframes related to any identified cost saving initiatives for the Greenwich and Bridgeport affiliations.

As a result of consolidated corporate and operational infrastructures, Bridgeport Hospital’s and Greenwich Hospital’s affiliations with YNHHS have yielded significant cost savings. Recent examples of the cost savings in supply chain management, information technology infrastructure and insurance coverage for Bridgeport Hospital and Greenwich Hospital are as follows:

- *Supply Chain:*

System-based contracting initiatives and other system-wide cost savings initiatives have resulted in annual cost savings for both Greenwich Hospital and Bridgeport Hospital as described below. For example, cost savings were achieved through standardization of supply and pharmaceutical purchases along with integration of service contracts, cost avoidance was achieved through volume discounts and rebates, and capital avoidance was achieved by virtue of efficient utilization of space, information technology and medical equipment existing within the system.

Entity	Hospital Fiscal Year						
	2015	2014	2013	2012	2011	2010	Sub Total
BH	2,808,051	4,010,478	2,683,641	3,752,395	2,854,590	2,896,549	19,005,704
GH	2,581,091	3,413,779	2,334,711	2,219,950	1,845,579	1,411,870	13,806,980
BH/GH Total	5,389,142	7,424,257	5,018,352	5,972,345	4,700,169	4,308,419	32,812,684

Savings related to supply chain initiatives can be broken down into three general categories: Operational Cost Savings, Operational Cost Avoidance, and Capital Cost Avoidance. The below table provides a breakout.

Cost Savings	22,966,807
Cost Avoidance	6,757,941
Capital Avoidance	3,087,936
	32,812,684

- *Information Technology Integration Efforts:*

The implementation of Epic across the YNHHS system has resulted in a reduction of expenses associated with its legacy information technology systems. Over a four year period, the costs associated with contracts related to pre-Epic systems have gradually decreased to a point that YNHHS now gets the benefit of an improved EMR at a lower cost.

- *Insurance:*

In 2011, by consolidating property insurance coverage under a single contract YNHHS was able to generate reoccurring annual savings of \$147, 000, of which \$84, 000 is associated with cost reductions at Bridgeport Hospital and Greenwich Hospital. Savings such as these would not have been possible if each entity procured the insurance separately.

In 2005, YNHHS had determined that Bridgeport Hospital and Greenwich Hospital had saved \$580,000 and \$700,000 respectively each year in professional and general liability insurance costs, resulting from access to YNHHS's insurance carrier (a federal risk retention group in which YNHHS is a shareholder).

With respect to HSR, cost savings resulting from the integration of HSR have been significant and regularly reported to OHCA. Pursuant to the Agreed Settlement dated June 27, 2012, YNHHS has provided semi-annual reports to OHCA outlining the integration activities and cost savings achieved since the acquisition. As of November 30, 2015, cost savings have exceeded \$213 million, well above the projected savings of \$198.3 million. In general, savings have been achieved through a variety of initiatives, including but not limited to, the areas of supply chain management, insurance, back office functions and standardization of clinical practices.

- e. **The response provided several examples where costs will increase (e.g., the fringe benefit package for NEMG employees and additional staff and supplies for an anticipated increase in volume). Complete the table below providing data on the incremental expenses for the first three years of the proposal for the combined health system.**

Incremental Expenses of the Affiliation* (\$ in millions)	FY 2016	FY 2017	FY 2018
NEMG Fringe Benefits	\$562,875	\$1,125,750	\$1,125,750
Non-Epic ITS Legacy System Wind Down	\$338,424	NA	NA
Additional Staff and Supplies for Incremental Volume**	\$3,123,013	\$7,877,657	\$10,058,134
Depreciation for Non Epic YNHHS ITS System Integration	\$161,689	\$323,378	\$323,378

*The above expense detail represents incremental cost due to the affiliation only

**This incremental cost relating to supplies and staff for incremental volume will be offset by the associated additional revenue relating to the \$85 million dollar commitment relating to investments in clinical programs, services and capital.

- 2. **Page 26 of the Application indicates YNHHS will commit \$300 million to the proposal, however the response indicated a commitment of \$316 million from the following sources:**

\$163 million - L+M base operating cash flows
\$ 68 million - Incremental cash flows from synergies/efficiencies
\$ 85 million - YNHHS
\$316 million

Provide the following as it relates to the \$300 million commitment of YNHHS:

a) verification of the exact dollar amount of the YNHHS commitment and its funding sources;

The Application does not indicate a commitment from YNHHS of \$316 million. Pursuant to the Affiliation Agreement, YNHHS agreed to commit up to \$300 million in resources in the Yale New Haven Health System's Eastern Connecticut and Western Rhode Island region over a period of five years to enhance and support clinical and operational capabilities and services consistent with community need, the YNHHS strategic plan and mutually agreed upon business plans which display a positive return on investment. Please see the Affiliation Agreement at Attachment III of the Application at page 81.

The \$300 million is composed of \$85 million in capital and resources from YNHHS as described in (1) and (2) below and the deployment of \$215 million in additional resources as described in (3) below. The Applicants' response to Question 27a of OHCA's Completeness Questions dated January 5, 2016, was intended to explain possible revenue sources with respect to the \$215 million dollar commitment to the Eastern Connecticut and Western Rhode Island region (over a five year period) that will be funded by YNHHS and its affiliates, including but not limited to L+M. While the Applicants anticipate that some of the \$215 million in revenue may be sourced from the projected \$68 million that L+M is expected to gain from system synergies and efficiencies, along with the \$163 million that would otherwise have funded L+M's capital spending without the affiliation, it must be understood that these are projections. Accordingly, the Applicants never intended that these two-sources from L+M alone would fund the commitment; instead, these numbers were provided as examples of possible sources to fund the commitment. In the event that market forces, continued Medicaid reimbursement reductions, and/or increases in state hospital taxes substantially change the financial projections of either Applicant, the mutually agreed-upon business plans would prudently reflect such changes.

(1) With respect to the \$85 million commitment in capital and resources by YNHHS, YNHHS agrees to commit an aggregate of \$41 million in resources allocated as follows:

- Implementation of Epic, Lawson and other IT platforms;
- Effectuation and implementation of branding;
- Up to \$10 million in value associated with participation and access to YNHHS population health infrastructure; and
- Recruitment and development of clinical programs and services.

(2) As for the remainder of the \$85 million commitment by YNHHS, YNHHS agrees to commit an additional \$44 million to the clinical programs listed below (along with such other programs mutually agreed upon), provided that such investments are consistent with community need, the YNHHS strategic plan and mutually agreed upon business

plans which display a positive return on investment to the clinical programs listed below along with such other programs mutually agreed upon:

- Expansion of primary care network and ambulatory presence, including ambulatory surgery;
- Access to pediatric specialty services;
- Development of a multi-disciplinary musculoskeletal center with orthopedic, neurosurgery, spine and physiatry clinical complements;
- Expansion of maternal fetal medicine and obstetrics capabilities;
- Enhancement of oncology services associated with Smilow Cancer Hospital;
- Reintroduction and expansion of bariatric and/or laparoscopic surgical programs;
- Expansion of neuromuscular and stroke programs;
- Development of a multidisciplinary vascular program and enhancement of cardiac services including electrophysiology;
- Enhancement of endocrinology/thyroid services;
- Development of population health and risk contracting capabilities and participating in population health infrastructure;
- Continued access to SkyHealth;
- Expanded emergency services; and
- Physical plant and infrastructure maintenance, development and renovations.

In summary, between items listed in (1) and (2) above, YNHHS (alone) will invest \$85 million in Eastern Connecticut and Western Rhode Island.

- (3) Finally, YNHHS along with its affiliates, (including L+M) will fund the remaining \$215 million that will also support the projects listed in (2) above; provided they are consistent with community need, the YNHHS strategic plan and mutually agreed upon business plans and will display a positive return on investment.

b) a detailed explanation of the sources of revenue that may be included as part of L+M's base operating cash flows;

The L+M base operating cash flows includes the net patient revenue associated with the clinical activities, and non-operating activities that exist at L+M today. In the multiyear forecast for L+M, independent of the proposed affiliation, these cash flows fund the anticipated capital spending, and are represented on the profit and loss statements as depreciation. As part of the proposed affiliation, YNHHS will provide the funding source for the capital represented in this baseline forecast. It is for this reason that the \$163 million in anticipated capital spend is included as a funding source from YNHHS, and is categorized as L+M base operating cash flows.

c) a breakdown of the \$68 million in efficiencies and synergies relating to allocation of costs across the system.

	FY 2016	FY 2017	FY 2018	FY 2019	FY 2020	5 Year Total
Category						
Incremental Volume - IP and OP	3,048	7,691	11,381	14,526	17,657	54,303
Corporate Services Integration	(1,623)	5,543	7,482	7,678	7,657	26,737
Medical Group	(1,398)	(2,846)	(2,847)	(2,848)	(2,849)	(12,788)
Yearly Total	27	10,388	16,016	19,356	22,465	68,252

3. It appears from the response on page 624 that YNHHS’s \$300 million commitment includes significant contributions from the operations of L+M (approx. \$215 million), while only \$85 million is coming from YNHHS. Provide the following:

a) Specific details of how L+M’s contribution (\$215 million) will be funded, considering the L+M System had operating losses of more than \$36 million in fiscal years (FY) 2013-2015 and only \$35 million in incremental operating gains are projected cumulatively from FYs 2016-2019.

As discussed above in response to question 2a, L+M is not funding the \$215 million alone. Rather, funding is intended to come from YNHHS and its affiliates.

b) If L+M is unable to achieve its funding level contribution from operations, how will the balance of the commitment be funded?

As discussed above in response to question 2a, L+M is not funding the \$215 million alone. Rather, funding is intended to come from YNHHS-and its affiliates. If market forces or continued State hospital taxes and Medicaid rate reductions result in L+M being unable to achieve the financial performance and synergies underpinning the forecast, the parties would consider other opportunities to achieve similar results, or would make other adjustments as needed to address the economic reality. This is further outlined in Section 2.11(d) of the Affiliation Agreement, which states that if L+M’s financial performance materially deviates from certain metrics set forth in Exhibit 2.11, then this \$215 million in resource commitment will be revised in a way that is mutually agreed upon by YNHHS and L+M.

4. Has the financial performance (e.g., operating margin) of Bridgeport and Greenwich Hospitals improved because of their affiliations with YNHHS? At what point in time after the affiliations in the 1990s did any financial impact (specific to the YNHHS affiliation) begin to occur for these two hospitals? What financial impact on these two hospitals and their patients continues to be experienced as a result of the ongoing affiliation with the YNHHS system? Provide details.

Please see response to question 1d above. Both Bridgeport and Greenwich Hospitals’ financial performance has improved since their affiliation with YNHHS as described above. In the case of Bridgeport Hospital, which was facing serious economic pressures prior to the affiliation, Bridgeport Hospital is now more financially stable with a stronger future. Given the fact that

these affiliations occurred over twenty (20) years ago, it is difficult to identify the exact date when performance improved, but based on performance over the last 4-5 years it is clear that both hospitals and their patients are benefitting significantly from their respective affiliations. Had these two hospitals remained as standalone entities, they would have not achieved the level that they are performing at today. More importantly, given increased demands by governmental and commercial payers for greater value with significantly lower reimbursement, both hospitals are more strongly positioned to transform their delivery of care into the future.

In response to OHCA's request, YNHHS has provided the CON materials for Greenwich and Bridgeport Hospitals (Docket Numbers 96-513 and 97-559) under separate cover.

EXHIBIT A

STATE OF CONNECTICUT
OFFICE OF POLICY AND MANAGEMENT

To: Chief Financial Officer

From: Benjamin Barnes 
Secretary

Subject: Supplemental Payments

Date: March 2, 2016

Please be advised that I have asked the Department of Social Services to hold on making any additional supplemental payments (through either the inpatient supplemental pool or the small hospital pool) until we have identified the steps needed to address this fiscal year's budget deficit. While I hope to have this task completed later this month, due to the significant drop in revenues, I am not optimistic that we will be able to move forward with any further state payments this fiscal year. This decision will also impact federally qualified health centers, which will be receiving a similar letter.

I apologize for any inconvenience this may cause.

STATE OF CONNECTICUT
SUPERIOR COURT
At: NEW LONDON
Docket Number: FKNLVC1360166545
Plaintiff's Name: RBS Citizens, N.A.
Defendant's Name: Rodriguez, Erik D Ct Ai
Order Regarding: 04/06/2016 107.00 Motion for Order of Notice

This proceeding, having been considered by the Court, is hereby:
Order: Granted
Notice to: ERIK D. Rodriguez and Leticia Mercado

The plaintiff has named you as a defendant in the complaint brought to the above named court seeking foreclosure of the mortgage on the property located at 24 BLOOMINGDALE ROAD, QUAKER HILL, CT 06365. This complaint was returnable to the above named court on 3/13/2015 and is now pending therein.

The court finds that the defendant (s)listed below has (have) not appeared in this action, and so far as the plaintiff knows, has (have) not received actual notice of the institution or pendency of it; that so far as its known each resides at 3123 MESA VERDE DRIVE, APT. 2707, ORLANDO, FLORIDA 32837.

Now therefore, it is hereby ordered that further notice of the institution and pendency of this action be given to each such defendant by some proper officer (or person) causing a true and attested copy of this order to be published in ORLANDO SENTINEL AND THE NEW LONDON DAY once a week for 2 successive weeks, commencing on or before 6/2/2016 and then return of such service to made to this court.

Judicial Notice (JDNO) sent regarding this order.
Order Number 419136

Northeast Medical Group, Inc. and Transfer of ownership of L+M Corporation to Yale New
Haven Health Services Corporation
Request for Prefile Testimony and Issues for Combined Public Hearings

Dear Ms. Rosenthal,

The Office of Health Care Access ("OHCA") will hold a public hearing on the above docket numbers on June 27, 2016. The hearing is at 3:00 p.m. at New London High School – Auditorium, 490 Jefferson Avenue, New London, Connecticut. Pursuant to the Regulations of Connecticut State Agencies § 19a-9-29(e), any party or other participant is required to prefile in written form all substantive, technical, or expert testimony that it proposes to offer at the hearing. Yale-New Haven Hospital ("Applicant") submit prefiled testimony by 4:00 p.m. on **June 22, 2016**.

All persons providing prefiled testimony must be present at the public hearing to adopt their written testimony under oath and must be available for cross-examination for the entire duration of the hearing. If you are unable to meet the specified time for filing the prefiled testimony you must request a time extension in writing, detailing the reasons for not being able to meet the specified deadline.

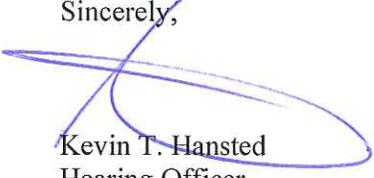

Phone: (860) 418-7001 • Fax: (860) 418-7053
410 Capitol Avenue, MS#13HCA
Hartford, Connecticut 06134-0308

Office of Health Care Access

Public Hearing Issues

Docket Number: 15-32032-CON: Transfer of Ownership of Group Practice by merger of L&M Physician Association, Inc. into Northeast Medical Group, Inc.; and

Docket Number: 15-32033-CON: Transfer of ownership of L+M Corporation ("L+M") to Yale New Haven Health Services Corporation ("YNNHSC")

The Applicants should be prepared to present and discuss supporting evidence on the following issues:

- The clear public need for the proposal.
- The effect of the proposed transfer of ownership on the residents of the region with respect to health care services, including how access to services (including specialty care) will be maintained or improved in the area following the acquisition.
- Describe the benefits achieved in the Bridgeport/Greenwich Hospital service areas following the YNNHSC affiliation, in terms of financial stability or enhanced programs or services.
- Please describe how successful the CHNA implementation plan has been in addressing priority health issues in L+M's service area.
- How will the proposal affect community health improvement spending (community benefits) and community building activities in L+M's service area?

June 17, 2016

Ms Kimberly Martone, Director
Mr. Kevin Hansted, Hearing Officer
Office of Health Care Access
410 Capitol Ave.
Hartford CT 06106

REFERENCE: Certificate of Need Application, Docket # 15-32032, *Northeast Medical Group (NMG) and L&M Physician Association: Transfer of Ownership of a Group Practice by merger of L&MPA and into NMG*, and;

Certificate of Need Application, Docket # 15-32033, *Yale-New Haven Health Services Corporation ("YNHHSC") and Lawrence + Memorial Corporation: ("L+M"), Acquisition of L+M by YNHHSC*

Dear Ms. Martone and Mr. Hansted:

The undersigned organizations seek intervenor status in the two above-referenced dockets as a coalition of faith-based organizations, physicians, labor organizations and health policy leaders. The interests of each organization are directly affected by the acquisition of Lawrence and Memorial Health by Yale-New Haven Health Services Corporation, as described below. Accordingly we seek full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Collectively, we represent in various ways more than 8,000 residents of L+M Hospital's primary and secondary service areas, and more than 75,000 residents statewide whose interests are affected by the ongoing consolidation of the state's health care system.

We support Governor Malloy's Executive Order 51, and urge OHCA not to render any decision on these applications until January 2017 or until the Governor's Task Force has reviewed the state's Certificate of Need laws, and made recommendations. If statutory deadlines force OHCA to decide the case, OHCA must follow the letter of Executive Order 51 and deny the application. Please note that among the intervenors are two members of the Task Force.

Even if the application does not ripen for decision until next year, as currently written it must be rejected. The deal fails to protect patients from escalating costs or to ensure local access to the fullest possible range of services. The application does not describe an adequate investment in community health needs, given that the community will lose any measure of control to a multi-billion dollar system from out of town. Any transaction in the future must provide for adequate oversight and accountability to the local community. In our submissions to the Commission as Intervenors we will also demonstrate that in attempting to address these issues, applicants have submitted inaccurate, misleading or incomplete information.

Cost and Price:

- OHCA requested comparative risk-adjusted prices for L+M Hospital and the three Yale-New Haven system hospitals: Bridgeport, Greenwich, and Yale-New Haven. YNHHS claims that such data do not exist, and that if the data did exist, they would not submit them.¹ In fact, adjusted prices for the most common diagnoses at L+M are consistently lower than other Yale-New Haven system hospitals. YNHHS has also refused to supply actual data on prices before and after their takeovers of the Hospital of St. Raphael, Greenwich Hospital and Bridgeport Hospital.
- Without relevant data, OHCA cannot evaluate the transaction. The deal will leave Yale-New Haven with nearly 60% market share from New York to Rhode Island, and more than 80% in L+M's primary service area.² Consolidation in such markets most often leads to price increases of 20% or more.³
- Through an analysis of billions of claims, provider pricing has been proven the most influential factor in regional private sector health care costs, and market power is the most potent price driver.⁴ YNHHS's description of negotiating prices separately for each hospital is irrelevant. The available evidence shows that separate price negotiations do not blunt the power of monopoly pricing.⁵
- Applicants' refusal to respond to OHCA's data request alone is grounds for rejection. Employee premium and point of service cost-sharing are exploding, putting needed services out of reach of many people with insurance, and threatening the coverage expansion under the Affordable Care Act. New London County's median family income lags the state average, and in the city of New London median family income is less than 60% of the state average. We will offer firsthand evidence of the pressure that systemic costs in the New London area are putting on patients, and describe the challenge of attempting to create a tailored health plan for low-wage service workers as Connecticut's provider systems consolidate.
- With out of pocket costs skyrocketing, Yale-New Haven's record of abusive debt collection practices creates deep concerns about the future of vulnerable populations in the wake of the acquisition. YNHHS's aggressive use of liens, foreclosures, wage garnishment and bank executions in past years forced changes in the state's medical debt collection laws, and resulted in settlements worth tens of millions of dollars. L+M patients cannot risk a repeat in Southeastern Connecticut.

Community Access and Well-being:

When Hartford HealthCare bought Windham Hospital five years ago, it stated that "currently they will not be terminating any services," although Hartford left itself wiggle room to reduce "duplicative services" in the future. But the CON went on to state that one of the benefits of the deal to Windham would be to "increase the services and technology offered locally," and to "decrease the out-migration of patients."⁶ Now with the ICU and CCU closed, patients are traveling long distances by ambulance, private car or even helicopter for urgently needed care that used to be available at Windham. Our coalition has broad experience treating patients and working to ensure the transportation, community

outreach, and follow up services that a community needs are in place. We cannot afford another Windham.

- Applicants told media outlets they will invest \$300 million in our community's health. But YNHHS requires that all investment generate a "positive return on investment" (i.e. profit), and most of the \$300 million will only come if L+M and other system hospitals hit profit targets.⁷ We will present testimony from physician and community leaders who will identify and analyze the community's health needs, and demonstrate the fundamental inadequacy of the proposed "investment."
- A true investment in our community would preserve existing services, expand services in areas of critical need, especially the provision and coordination of mental and behavioral health services and expanded community outreach to underserved populations. L+M management has wasted millions of dollars on acquisitions and punitive labor relations, rather than focusing on community health needs. L+M's community health needs assessment is underway. That process is far more robust today than three years ago. While encouraging, there is no real commitment to making major investments to address the needs identified in the process.
- Applicants have offered no compelling rationale for the merger achieving quality improvement. The electronic medical record EPIC has already been installed, and tight clinical coordination and clear clinical communication are being achieved without the negative consequences of a takeover.

Workforce:

- L+M is New London's 2nd largest private sector employer. Going forward, L+M must ensure that its workforce represents the community at large, protect job quality by respecting collective bargaining agreements and using hiring best practices.

Community Accountability and Monitoring:

- Given YNHHS's troubling record on collections, stonewalling on production of price data, and distorted claims about "investment," in the event of any transaction, L+M Hospital and the acquiring health system must negotiate with a representative cross-section of the community a written Community Benefits Agreement with binding commitments enforced by an independent monitor on the issues of access, affordability, community benefits, efficiencies and jobs;
- L+M Hospital must remain under the control of a locally controlled Board of Directors with decision making authority and accountability to the community. Despite public protestations to the contrary, under the applications as proposed, YNHHS will have ultimate authority over all meaningful decisions at L+M, including nominating members of the "local" boards.
- Rather than seek an unneeded merger, L+M Hospital must develop, finance and implement a Community Health Needs Assessment (CHNA), independent of its affiliated partner and will devote sufficient resources to address the health priorities identified in the needs assessment;
- The CHNA will be conducted every three years, and will include on-going accountability structures including independent monitoring for measuring implementation progress and effectiveness.

The Intervenors: Interests and Evidence

Collectively, the coalition includes thousands of L+M patients, local clergy, patient advocates, physicians, nurses and other caregivers, and leaders responsible for the purchase of health plans.

In addition to the specific interests of the various organizations, the coalition also brings a broad range of health care expertise to the proceedings. The coalition includes:

- Professors at Brown University and Columbia University Medical schools;
- Key statewide health care leaders:
 - Members of the Governor’s Health Care Cabinet
 - Members of the Governor’s Certificate of Need Review Task Force, and;
 - Members of the steering committee of L+M’s current Community Needs Assessment process.

The coalition will present first-hand evidence from the entire range of the organizations’ experiences in the Southeastern Connecticut health care system. In addition, the coalition will present expert analysis of the proposed acquisitions, including: data on Connecticut hospital market concentration; comparative price data; an exhaustive review of the rapidly growing literature on the impact of consolidation on cost, access, “efficiency” and quality, and; a breakdown of the Applicants’ financial statements to shed light on claims of financial hardship.

AFT CONNECTICUT including Locals 5049, 5051, 5123 and 5119

AFT Connecticut is a statewide federation of the local unions of the American Federation of Teachers. Our locals have more than 1,800 members who work for Lawrence and Memorial Hospital and its affiliates. They all live in L+M’s primary or secondary service area. They account for more than 50% of the total workforce at L+M, including the Visiting Nurses Association of Southeastern Connecticut. When counting non-L+M employees, altogether AFT Connecticut (State Federation) represents over 5,000 members who live in L+M’s Primary and Secondary Service Areas.⁸ . Based on AFT Connecticut’s large concentration of members and their families in L+M services areas, the organization’s interests are directly affected by the acquisition proposal, both as workers and as patients.

AFT Connecticut was previously granted intervenor status by OHCA in a 2004 CON hearing (04-30348-CON) involving the Hospital’s desire to close the Hospital’s OB/GYN clinic. AFT Connecticut will offer testimony on the efficiency of current L+M operations, the impact of aggressive expansion on core missions, and expert testimony on trends in consolidation, cost, prices, access and governance.

CONNECTICUT CITIZEN ACTION GROUP

Connecticut Citizen Action Group is a statewide membership organization dedicated to involving the residents of Connecticut in bringing about a fair and equitable society. For over 40 years, CCAG has been at the forefront of advocating for a high quality, affordable and fully accessible health care system for all Connecticut residents. CCAG has worked effectively to advance health care policies that strengthen consumer access to fair, affordable health care services, coverage and benefits. CCAG's health care reform work includes monitoring hospital consolidation and regulation, expanding and protecting Medicaid coverage and benefits, and strengthening the ACA law.

CCAG has 500 members who live within the L+M catchment region, and will be directly impacted by potential increased costs, loss of local access, and changes in community programming directed toward health and well-being. Our members include a broad, diverse cross-section of the community including health care providers, child care providers, municipal workers, senior citizens, and educators. In addition to presenting testimony on the need for controlling cost and sustaining local community access to health care services, we will offer testimony on previous attempts to impose public accountability conditions on hospital acquisitions, and the need to impose strong community oversight, monitoring and accountability measures on this acquisition to ensure that the terms adequately and appropriately meet community health care needs and priorities, and that any such terms or conditions are actually carried out.

UNITE HERE CONNECTICUT

UNITE HERE Connecticut is a labor organization representing more than 7,000 employees in Connecticut, including 250 in the primary and secondary service areas of L+M Hospital. We bargain health benefits for all of our members in the state, and have a powerful interest in preserving access to affordable, high quality health care. UNITE HERE members cook and serve food in corporate, university and K-12 cafeterias. These are low-wage, seasonal, often part-time jobs. For them, comprehensive, affordable health insurance coverage is essential to achieving any hope of a middle class life. UNITE HERE members at Electric Boat in New London are engaged in bargaining for health benefits. Members currently pay 20% of the cost, which is unaffordable for workers who make \$12 per hour. If regional costs continue to escalate, workers will be forced to drop coverage, or be forced to choose between rent and health care. The price structure of the Greater New London market is vital to our members' future well-being.

UNITE HERE's Taft-Hartley fund, jointly administered by the union and management, has established a national health plan tailored specifically for food service workers. In Connecticut, nearly 1,000 members have enrolled in the past several years. In some cases, the savings compared to commercial plans have been large enough to maintain comprehensive coverage and actually reduce the cost to individual members. But the efficiency of this plan will not ultimately protect members if the state's largest hospital is permitted to grow unchecked.

UNITE HERE will offer evidence of the immediate impact of any pricing changes at L+M on service sector workers struggling at the margins of the health care system. UNITE HERE will also offer testimony based on experience establishing a specially designed Taft-Hartley health plan for food service workers in Connecticut, as market consolidation continues to drive prices up.

NATIONAL PHYSICIANS ALLIANCE IN CONNECTICUT (NPA-CT)

The National Physicians Alliance in Connecticut (NPA-CT) is part of a national 501(c)3 organization, the National Physicians Alliance (NPA), that creates research and education programs that promote health and foster active engagement of physicians with their communities to achieve high quality, affordable health care for all. The NPA offers a home to physicians across medical specialties who share a commitment to professional integrity and health justice. NPA-CT physicians are members of the staff of the parties involved in the affiliation and primary care physicians in the communities served by the two entities. As such, they have a key interest in assuring that their patients and communities have access to affordable, high-quality hospital care.

NPA will provide evidence that the purported clinical goals of the takeover – tight coordination of care and ease of communication and close cooperation among providers – can be achieved without the potential loss of local control and threat of monopoly economic power inherent in a takeover.

CONNECTICUT HEALTH POLICY PROJECT

Since 1999 as a nonprofit consumer advocacy organization, the CT Health Policy Project has labored to expand access to high quality, affordable health care for all Connecticut residents, with a particular focus on ensuring access for people in low-income communities of color. The proposed acquisition of Lawrence and Memorial Hospital/Health System by Yale-New Haven Hospital/Health System will undermine every part of our mission.

Executive Director Ellen Andrews, who sits on the Governor’s Health Care Cabinet, will provide expert testimony regarding the impact of mergers and acquisitions on low-income consumers and the state Medicaid program.

UNITED ACTION CONNECTICUT

United Action Connecticut is an interfaith, multiracial, multilingual organization of congregations and community organizations crossing political, economic, urban and suburban boundaries. UACT is dedicated to building powerful, broad based community organizations. UACT brings congregations together to help them grow and thrive, develop leaders and move into action on concrete issues of social equity and justice. UACT has been working actively toward health care reform for nearly a decade. UACT’s New London area congregations include L+M physicians, caregivers and patients, whose interests in preserving community access to high quality affordable health care are directly affected by the applications.

UACT will offer evidence on the local need for access and associated social services that will allow all Greater New London residents to obtain the care they need in their immediate community. The evidence will focus specifically on challenges facing vulnerable populations, including seniors.

NEW ENGLAND HEALTH CARE EMPLOYEES UNION, DISTRICT 1199, SEIU

District 1199 represents approximately 25,000 health care workers in the state of Connecticut, including state employees, hospital employees, nursing home employees, direct care and professional workers at private Mental Health and Developmental Disability agencies and FQHCs, and home care workers providing personal care and support services to Medicaid recipients. Of those, more than 1,000 health care workers live in Lawrence and Memorial’s Primary and Secondary Service Areas.

At this time, District 1199 is also negotiating first Collective Bargaining Agreements for more than 300 low-wage nursing home employees of two skilled nursing facilities in New London (Crossings East and Crossings West), and one in Mystic, CT (Pendleton Health and Rehabilitation Center). Wages for these workers start at just \$10.35 per hour and more than 40% are scheduled for fewer than 32 hours per week. The cost of providing health benefits to these workers is a key issue in difficult ongoing contract negotiations. Current premiums for these workers are so expensive that many elect not to take insurance coverage at all or take the least expensive plan in terms of premiums, resulting in high out-of-pocket and co-pay expenses.

Based on 1199's significant membership in L&M's service areas and the need to negotiate affordable insurance for low-wage workers within the service areas, 1199's interests are directly affected by potential price increases or service cuts that typically accompany mergers. Cost, access and the maintenance of quality healthcare services are of vital importance to the organization and to the communities in which 1199 members reside and receive acute care health services.

In sum, the undersigned organizations' interests are directly affected by the proposed Certificates of Need. Collectively, they bring vast experience and expertise to inform OHCA's decision, and each will provide evidence from a different perspective. Respectfully, we request full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Very truly yours,

AFT Connecticut

Putting People First

June 17, 2016

Ms Kimberly Martone, Director
Mr. Kevin Hansted, Hearing Officer
Office of Health Care Access
410 Capitol Ave.
Hartford CT 06106

REFERENCE: Certificate of Need Application, Docket # 15-32032, *Northeast Medical Group (NMG) and L&M Physician Association: Transfer of Ownership of a Group Practice by merger of L&MPA and into NMG*, and;

Certificate of Need Application, Docket # 15-32033, *Yale-New Haven Health Services Corporation ("YNHHSC") and Lawrence + Memorial Corporation: ("L+M"), Acquisition of L+M by YNHHSC*

Dear Ms. Martone and Mr. Hansted:

The undersigned organizations seek intervenor status in the two above-referenced dockets as a coalition of faith-based organizations, physicians, labor organizations and health policy leaders. The interests of each organization are directly affected by the acquisition of Lawrence and Memorial Health by Yale-New Haven Health Services Corporation, as described below. Accordingly we seek full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Collectively, we represent in various ways more than 8,000 residents of L+M Hospital's primary and secondary service areas, and more than 75,000 residents statewide whose interests are affected by the ongoing consolidation of the state's health care system.

We support Governor Malloy's Executive Order 51, and urge OHCA not to render any decision on these applications until January 2017 or until the Governor's Task Force has reviewed the state's Certificate of Need laws, and made recommendations. If statutory deadlines force OHCA to decide the case, OHCA must follow the letter of Executive Order 51 and deny the application. Please note that among the intervenors are two members of the Task Force.

Even if the application does not ripen for decision until next year, as currently written it must be rejected. The deal fails to protect patients from escalating costs or to ensure local access to the fullest possible range of services. The application does not describe an adequate investment in community health needs, given that the community will lose any measure of control to a multi-billion dollar system from out of town. Any transaction in the future must provide for adequate oversight and accountability to the local community. In our submissions to the Commission as Intervenors we will also demonstrate that in attempting to address these issues, applicants have submitted inaccurate, misleading or incomplete information.

Cost and Price:

- OHCA requested comparative risk-adjusted prices for L+M Hospital and the three Yale-New Haven system hospitals: Bridgeport, Greenwich, and Yale-New Haven. YNHHS claims that such data do not exist, and that if the data did exist, they would not submit them.¹ In fact, adjusted prices for the most common diagnoses at L+M are consistently lower than other Yale-New Haven system hospitals. YNHHS has also refused to supply actual data on prices before and after their takeovers of the Hospital of St. Raphael, Greenwich Hospital and Bridgeport Hospital.
- Without relevant data, OHCA cannot evaluate the transaction. The deal will leave Yale-New Haven with nearly 60% market share from New York to Rhode Island, and more than 80% in L+M's primary service area.² Consolidation in such markets most often leads to price increases of 20% or more.³
- Through an analysis of billions of claims, provider pricing has been proven the most influential factor in regional private sector health care costs, and market power is the most potent price driver.⁴ YNHHS's description of negotiating prices separately for each hospital is irrelevant. The available evidence shows that separate price negotiations do not blunt the power of monopoly pricing.⁵
- Applicants' refusal to respond to OHCA's data request alone is grounds for rejection. Employee premium and point of service cost-sharing are exploding, putting needed services out of reach of many people with insurance, and threatening the coverage expansion under the Affordable Care Act. New London County's median family income lags the state average, and in the city of New London median family income is less than 60% of the state average. We will offer firsthand evidence of the pressure that systemic costs in the New London area are putting on patients, and describe the challenge of attempting to create a tailored health plan for low-wage service workers as Connecticut's provider systems consolidate.
- With out of pocket costs skyrocketing, Yale-New Haven's record of abusive debt collection practices creates deep concerns about the future of vulnerable populations in the wake of the acquisition. YNHHS's aggressive use of liens, foreclosures, wage garnishment and bank executions in past years forced changes in the state's medical debt collection laws, and resulted in settlements worth tens of millions of dollars. L+M patients cannot risk a repeat in Southeastern Connecticut.

Community Access and Well-being:

When Hartford HealthCare bought Windham Hospital five years ago, it stated that "currently they will not be terminating any services," although Hartford left itself wiggle room to reduce "duplicative services" in the future. But the CON went on to state that one of the benefits of the deal to Windham would be to "increase the services and technology offered locally," and to "decrease the out-migration of patients."⁶ Now with the ICU and CCU closed, patients are traveling long distances by ambulance, private car or even helicopter for urgently needed care that used to be available at Windham. Our coalition has broad experience treating patients and working to ensure the transportation, community

outreach, and follow up services that a community needs are in place. We cannot afford another Windham.

- Applicants told media outlets they will invest \$300 million in our community's health. But YNHHS requires that all investment generate a "positive return on investment" (i.e. profit), and most of the \$300 million will only come if L+M and other system hospitals hit profit targets.⁷ We will present testimony from physician and community leaders who will identify and analyze the community's health needs, and demonstrate the fundamental inadequacy of the proposed "investment."
- A true investment in our community would preserve existing services, expand services in areas of critical need, especially the provision and coordination of mental and behavioral health services and expanded community outreach to underserved populations. L+M management has wasted millions of dollars on acquisitions and punitive labor relations, rather than focusing on community health needs. L+M's community health needs assessment is underway. That process is far more robust today than three years ago. While encouraging, there is no real commitment to making major investments to address the needs identified in the process.
- Applicants have offered no compelling rationale for the merger achieving quality improvement. The electronic medical record EPIC has already been installed, and tight clinical coordination and clear clinical communication are being achieved without the negative consequences of a takeover.

Workforce:

- L+M is New London's 2nd largest private sector employer. Going forward, L+M must ensure that its workforce represents the community at large, protect job quality by respecting collective bargaining agreements and using hiring best practices.

Community Accountability and Monitoring:

- Given YNHHS's troubling record on collections, stonewalling on production of price data, and distorted claims about "investment," in the event of any transaction, L+M Hospital and the acquiring health system must negotiate with a representative cross-section of the community a written Community Benefits Agreement with binding commitments enforced by an independent monitor on the issues of access, affordability, community benefits, efficiencies and jobs;
- L+M Hospital must remain under the control of a locally controlled Board of Directors with decision making authority and accountability to the community. Despite public protestations to the contrary, under the applications as proposed, YNHHS will have ultimate authority over all meaningful decisions at L+M, including nominating members of the "local" boards.
- Rather than seek an unneeded merger, L+M Hospital must develop, finance and implement a Community Health Needs Assessment (CHNA), independent of its affiliated partner and will devote sufficient resources to address the health priorities identified in the needs assessment;
- The CHNA will be conducted every three years, and will include on-going accountability structures including independent monitoring for measuring implementation progress and effectiveness.

The Intervenors: Interests and Evidence

Collectively, the coalition includes thousands of L+M patients, local clergy, patient advocates, physicians, nurses and other caregivers, and leaders responsible for the purchase of health plans.

In addition to the specific interests of the various organizations, the coalition also brings a broad range of health care expertise to the proceedings. The coalition includes:

- Professors at Brown University and Columbia University Medical schools;
- Key statewide health care leaders:
 - Members of the Governor's Health Care Cabinet
 - Members of the Governor's Certificate of Need Review Task Force, and;
 - Members of the steering committee of L+M's current Community Needs Assessment process.

The coalition will present first-hand evidence from the entire range of the organizations' experiences in the Southeastern Connecticut health care system. In addition, the coalition will present expert analysis of the proposed acquisitions, including: data on Connecticut hospital market concentration; comparative price data; an exhaustive review of the rapidly growing literature on the impact of consolidation on cost, access, "efficiency" and quality, and; a breakdown of the Applicants' financial statements to shed light on claims of financial hardship.

AFT CONNECTICUT including Locals 5049, 5051, 5123 and 5119

AFT Connecticut is a statewide federation of the local unions of the American Federation of Teachers. Our locals have more than 1,800 members who work for Lawrence and Memorial Hospital and its affiliates. They all live in L+M's primary or secondary service area. They account for more than 50% of the total workforce at L+M, including the Visiting Nurses Association of Southeastern Connecticut. When counting non-L+M employees, altogether AFT Connecticut (State Federation) represents over 5,000 members who live in L+M's Primary and Secondary Service Areas.⁸ . Based on AFT Connecticut's large concentration of members and their families in L+M services areas, the organization's interests are directly affected by the acquisition proposal, both as workers and as patients.

AFT Connecticut was previously granted intervenor status by OHCA in a 2004 CON hearing (04-30348-CON) involving the Hospital's desire to close the Hospital's OB/GYN clinic. AFT Connecticut will offer testimony on the efficiency of current L+M operations, the impact of aggressive expansion on core missions, and expert testimony on trends in consolidation, cost, prices, access and governance.

CONNECTICUT CITIZEN ACTION GROUP

Connecticut Citizen Action Group is a statewide membership organization dedicated to involving the residents of Connecticut in bringing about a fair and equitable society. For over 40 years, CCAG has been at the forefront of advocating for a high quality, affordable and fully accessible health care system for all Connecticut residents. CCAG has worked effectively to advance health care policies that strengthen consumer access to fair, affordable health care services, coverage and benefits. CCAG's health care reform work includes monitoring hospital consolidation and regulation, expanding and protecting Medicaid coverage and benefits, and strengthening the ACA law.

CCAG has 500 members who live within the L+M catchment region, and will be directly impacted by potential increased costs, loss of local access, and changes in community programming directed toward health and well-being. Our members include a broad, diverse cross-section of the community including health care providers, child care providers, municipal workers, senior citizens, and educators. In addition to presenting testimony on the need for controlling cost and sustaining local community access to health care services, we will offer testimony on previous attempts to impose public accountability conditions on hospital acquisitions, and the need to impose strong community oversight, monitoring and accountability measures on this acquisition to ensure that the terms adequately and appropriately meet community health care needs and priorities, and that any such terms or conditions are actually carried out.

UNITE HERE CONNECTICUT

UNITE HERE Connecticut is a labor organization representing more than 7,000 employees in Connecticut, including 250 in the primary and secondary service areas of L+M Hospital. We bargain health benefits for all of our members in the state, and have a powerful interest in preserving access to affordable, high quality health care. UNITE HERE members cook and serve food in corporate, university and K-12 cafeterias. These are low-wage, seasonal, often part-time jobs. For them, comprehensive, affordable health insurance coverage is essential to achieving any hope of a middle class life. UNITE HERE members at Electric Boat in New London are engaged in bargaining for health benefits. Members currently pay 20% of the cost, which is unaffordable for workers who make \$12 per hour. If regional costs continue to escalate, workers will be forced to drop coverage, or be forced to choose between rent and health care. The price structure of the Greater New London market is vital to our members' future well-being.

UNITE HERE's Taft-Hartley fund, jointly administered by the union and management, has established a national health plan tailored specifically for food service workers. In Connecticut, nearly 1,000 members have enrolled in the past several years. In some cases, the savings compared to commercial plans have been large enough to maintain comprehensive coverage and actually reduce the cost to individual members. But the efficiency of this plan will not ultimately protect members if the state's largest hospital is permitted to grow unchecked.

UNITE HERE will offer evidence of the immediate impact of any pricing changes at L+M on service sector workers struggling at the margins of the health care system. UNITE HERE will also offer testimony based on experience establishing a specially designed Taft-Hartley health plan for food service workers in Connecticut, as market consolidation continues to drive prices up.

NATIONAL PHYSICIANS ALLIANCE IN CONNECTICUT (NPA-CT)

The National Physicians Alliance in Connecticut (NPA-CT) is part of a national 501(c)3 organization, the National Physicians Alliance (NPA), that creates research and education programs that promote health and foster active engagement of physicians with their communities to achieve high quality, affordable health care for all. The NPA offers a home to physicians across medical specialties who share a commitment to professional integrity and health justice. NPA-CT physicians are members of the staff of the parties involved in the affiliation and primary care physicians in the communities served by the two entities. As such, they have a key interest in assuring that their patients and communities have access to affordable, high-quality hospital care.

NPA will provide evidence that the purported clinical goals of the takeover – tight coordination of care and ease of communication and close cooperation among providers – can be achieved without the potential loss of local control and threat of monopoly economic power inherent in a takeover.

CONNECTICUT HEALTH POLICY PROJECT

Since 1999 as a nonprofit consumer advocacy organization, the CT Health Policy Project has labored to expand access to high quality, affordable health care for all Connecticut residents, with a particular focus on ensuring access for people in low-income communities of color. The proposed acquisition of Lawrence and Memorial Hospital/Health System by Yale-New Haven Hospital/Health System will undermine every part of our mission.

Executive Director Ellen Andrews, who sits on the Governor's Health Care Cabinet, will provide expert testimony regarding the impact of mergers and acquisitions on low-income consumers and the state Medicaid program.

UNITED ACTION CONNECTICUT

United Action Connecticut is an interfaith, multiracial, multilingual organization of congregations and community organizations crossing political, economic, urban and suburban boundaries. UACT is dedicated to building powerful, broad based community organizations. UACT brings congregations together to help them grow and thrive, develop leaders and move into action on concrete issues of social equity and justice. UACT has been working actively toward health care reform for nearly a decade. UACT's New London area congregations include L+M physicians, caregivers and patients, whose interests in preserving community access to high quality affordable health care are directly affected by the applications.

UACT will offer evidence on the local need for access and associated social services that will allow all Greater New London residents to obtain the care they need in their immediate community. The evidence will focus specifically on challenges facing vulnerable populations, including seniors.

NEW ENGLAND HEALTH CARE EMPLOYEES UNION, DISTRICT 1199, SEIU

District 1199 represents approximately 25,000 health care workers in the state of Connecticut, including state employees, hospital employees, nursing home employees, direct care and professional workers at private Mental Health and Developmental Disability agencies and FQHCs, and home care workers providing personal care and support services to Medicaid recipients. Of those, more than 1,000 health care workers live in Lawrence and Memorial's Primary and Secondary Service Areas.

At this time, District 1199 is also negotiating first Collective Bargaining Agreements for more than 300 low-wage nursing home employees of two skilled nursing facilities in New London (Crossings East and Crossings West), and one in Mystic, CT (Pendleton Health and Rehabilitation Center). Wages for these workers start at just \$10.35 per hour and more than 40% are scheduled for fewer than 32 hours per week. The cost of providing health benefits to these workers is a key issue in difficult ongoing contract negotiations. Current premiums for these workers are so expensive that many elect not to take insurance coverage at all or take the least expensive plan in terms of premiums, resulting in high out-of-pocket and co-pay expenses.

Based on 1199's significant membership in L&M's service areas and the need to negotiate affordable insurance for low-wage workers within the service areas, 1199's interests are directly affected by potential price increases or service cuts that typically accompany mergers. Cost, access and the maintenance of quality healthcare services are of vital importance to the organization and to the communities in which 1199 members reside and receive acute care health services.

In sum, the undersigned organizations' interests are directly affected by the proposed Certificates of Need. Collectively, they bring vast experience and expertise to inform OHCA's decision, and each will provide evidence from a different perspective. Respectfully, we request full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Very truly yours,

AFT Connecticut

Certificate of Need Application, Docket # 15-32033, *Yale-New Haven Health Services Corporation ("YNHHSC") and Lawrence + Memorial Corporation: ("L+M"), Acquisition of L+M by YNHHSC*

Dear Ms. Martone and Mr. Hansted:

The undersigned organizations seek intervenor status in the two above-referenced dockets as a coalition of faith-based organizations, physicians, labor organizations and health policy leaders. The interests of each organization are directly affected by the acquisition of Lawrence and Memorial Health by Yale-New Haven Health Services Corporation, as described below. Accordingly we seek full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Collectively, we represent in various ways more than 8,000 residents of L+M Hospital's primary and secondary service areas, and more than 75,000 residents statewide whose interests are affected by the ongoing consolidation of the state's health care system.

We support Governor Malloy's Executive Order 51, and urge OHCA not to render any decision on these applications until January 2017 or until the Governor's Task Force has reviewed the state's Certificate of Need laws, and made recommendations. If statutory deadlines force OHCA to decide the case, OHCA must follow the letter of Executive Order 51 and deny the application. Please note that among the intervenors are two members of the Task Force.

Even if the application does not ripen for decision until next year, as currently written it must be rejected. The deal fails to protect patients from escalating costs or to ensure local access to the fullest possible range of services. The application does not describe an adequate investment in community health needs, given that the community will lose any measure of control to a multi-billion dollar system from out of town. Any transaction in the future must provide for adequate oversight and accountability to the local community. In our submissions to the Commission as Intervenors we will also demonstrate that in attempting to address these issues, applicants have submitted inaccurate, misleading or incomplete information.

Cost and Price:

- OHCA requested comparative risk-adjusted prices for L+M Hospital and the three Yale-New Haven system hospitals: Bridgeport, Greenwich, and Yale-New Haven. YNHHS claims that such data do not exist, and that if the data did exist, they would not submit them.¹ In fact, adjusted prices for the most common diagnoses at L+M are consistently lower than other Yale-New Haven system hospitals. YNHHS has also refused to supply actual data on prices before and after their takeovers of the Hospital of St. Raphael, Greenwich Hospital and Bridgeport Hospital.
- Without relevant data, OHCA cannot evaluate the transaction. The deal will leave Yale-New Haven with nearly 60% market share from New York to Rhode Island, and more than 80% in L+M's primary service area.² Consolidation in such markets most often leads to price increases of 20% or more.³
- Through an analysis of billions of claims, provider pricing has been proven the most influential factor in regional private sector health care costs, and market power is the most potent price driver.⁴ YNHHS's description of negotiating prices separately for each hospital is irrelevant. The available evidence shows that separate price negotiations do not blunt the power of monopoly pricing.⁵
- Applicants' refusal to respond to OHCA's data request alone is grounds for rejection. Employee premium and point of service cost-sharing are exploding, putting needed services out of reach of many people with insurance, and threatening the coverage expansion under the Affordable Care Act. New London County's median family income lags the state average, and in the city of New London median family income is less than 60% of the state average. We will offer firsthand evidence of the pressure that systemic costs in the New London area are putting on patients, and describe the challenge of attempting to create a tailored health plan for low-wage service workers as Connecticut's provider systems consolidate.
- With out of pocket costs skyrocketing, Yale-New Haven's record of abusive debt collection practices creates deep concerns about the future of vulnerable populations in the wake of the acquisition. YNHHS's aggressive use of liens, foreclosures, wage garnishment and bank executions in past years forced changes in the state's medical debt collection laws, and resulted in settlements worth tens of millions of dollars. L+M patients cannot risk a repeat in Southeastern Connecticut.

Community Access and Well-being:

When Hartford HealthCare bought Windham Hospital five years ago, it stated that "currently they will not be terminating any services," although Hartford left itself wiggle room to reduce "duplicative services" in the future. But the CON went on to state that one of the benefits of the deal to Windham would be to "increase the services and technology offered locally," and to "decrease the out-migration of patients."⁶ Now with the ICU and CCU closed, patients are traveling long distances by ambulance, private car or even helicopter for urgently needed care that used to be available at Windham. Our coalition has broad experience treating patients and working to ensure the transportation, community

outreach, and follow up services that a community needs are in place. We cannot afford another Windham.

- Applicants told media outlets they will invest \$300 million in our community's health. But YNHHS requires that all investment generate a "positive return on investment" (i.e. profit), and most of the \$300 million will only come if L+M and other system hospitals hit profit targets.⁷ We will present testimony from physician and community leaders who will identify and analyze the community's health needs, and demonstrate the fundamental inadequacy of the proposed "investment."
- A true investment in our community would preserve existing services, expand services in areas of critical need, especially the provision and coordination of mental and behavioral health services and expanded community outreach to underserved populations. L+M management has wasted millions of dollars on acquisitions and punitive labor relations, rather than focusing on community health needs. L+M's community health needs assessment is underway. That process is far more robust today than three years ago. While encouraging, there is no real commitment to making major investments to address the needs identified in the process.
- Applicants have offered no compelling rationale for the merger achieving quality improvement. The electronic medical record EPIC has already been installed, and tight clinical coordination and clear clinical communication are being achieved without the negative consequences of a takeover.

Workforce:

- L+M is New London's 2nd largest private sector employer. Going forward, L+M must ensure that its workforce represents the community at large, protect job quality by respecting collective bargaining agreements and using hiring best practices.

Community Accountability and Monitoring:

- Given YNHHS's troubling record on collections, stonewalling on production of price data, and distorted claims about "investment," in the event of any transaction, L+M Hospital and the acquiring health system must negotiate with a representative cross-section of the community a written Community Benefits Agreement with binding commitments enforced by an independent monitor on the issues of access, affordability, community benefits, efficiencies and jobs;
- L+M Hospital must remain under the control of a locally controlled Board of Directors with decision making authority and accountability to the community. Despite public protestations to the contrary, under the applications as proposed, YNHHS will have ultimate authority over all meaningful decisions at L+M, including nominating members of the "local" boards.
- Rather than seek an unneeded merger, L+M Hospital must develop, finance and implement a Community Health Needs Assessment (CHNA), independent of its affiliated partner and will devote sufficient resources to address the health priorities identified in the needs assessment;
- The CHNA will be conducted every three years, and will include on-going accountability structures including independent monitoring for measuring implementation progress and effectiveness.

The Intervenors: Interests and Evidence

Collectively, the coalition includes thousands of L+M patients, local clergy, patient advocates, physicians, nurses and other caregivers, and leaders responsible for the purchase of health plans.

In addition to the specific interests of the various organizations, the coalition also brings a broad range of health care expertise to the proceedings. The coalition includes:

- Professors at Brown University and Columbia University Medical schools;
- Key statewide health care leaders:
 - Members of the Governor’s Health Care Cabinet
 - Members of the Governor’s Certificate of Need Review Task Force, and;
 - Members of the steering committee of L+M’s current Community Needs Assessment process.

The coalition will present first-hand evidence from the entire range of the organizations’ experiences in the Southeastern Connecticut health care system. In addition, the coalition will present expert analysis of the proposed acquisitions, including: data on Connecticut hospital market concentration; comparative price data; an exhaustive review of the rapidly growing literature on the impact of consolidation on cost, access, “efficiency” and quality, and; a breakdown of the Applicants’ financial statements to shed light on claims of financial hardship.

AFT CONNECTICUT including Locals 5049, 5051, 5123 and 5119

AFT Connecticut is a statewide federation of the local unions of the American Federation of Teachers. Our locals have more than 1,800 members who work for Lawrence and Memorial Hospital and its affiliates. They all live in L+M’s primary or secondary service area. They account for more than 50% of the total workforce at L+M, including the Visiting Nurses Association of Southeastern Connecticut. When counting non-L+M employees, altogether AFT Connecticut (State Federation) represents over 5,000 members who live in L+M’s Primary and Secondary Service Areas.⁸ . Based on AFT Connecticut’s large concentration of members and their families in L+M services areas, the organization’s interests are directly affected by the acquisition proposal, both as workers and as patients.

AFT Connecticut was previously granted intervenor status by OHCA in a 2004 CON hearing (04-30348-CON) involving the Hospital’s desire to close the Hospital’s OB/GYN clinic. AFT Connecticut will offer testimony on the efficiency of current L+M operations, the impact of aggressive expansion on core missions, and expert testimony on trends in consolidation, cost, prices, access and governance.

CONNECTICUT CITIZEN ACTION GROUP

Connecticut Citizen Action Group is a statewide membership organization dedicated to involving the residents of Connecticut in bringing about a fair and equitable society. For over 40 years, CCAG has been at the forefront of advocating for a high quality, affordable and fully accessible health care system for all Connecticut residents. CCAG has worked effectively to advance health care policies that strengthen consumer access to fair, affordable health care services, coverage and benefits. CCAG’s health care reform work includes monitoring hospital consolidation and regulation, expanding and protecting Medicaid coverage and benefits, and strengthening the ACA law.

CCAG has 500 members who live within the L+M catchment region, and will be directly impacted by potential increased costs, loss of local access, and changes in community programming directed toward health and well-being. Our members include a broad, diverse cross-section of the community including health care providers, child care providers, municipal workers, senior citizens, and educators. In addition to presenting testimony on the need for controlling cost and sustaining local community access to health care services, we will offer testimony on previous attempts to impose public accountability conditions on hospital acquisitions, and the need to impose strong community oversight, monitoring and accountability measures on this acquisition to ensure that the terms adequately and appropriately meet community health care needs and priorities, and that any such terms or conditions are actually carried out.

UNITE HERE CONNECTICUT

UNITE HERE Connecticut is a labor organization representing more than 7,000 employees in Connecticut, including 250 in the primary and secondary service areas of L+M Hospital. We bargain health benefits for all of our members in the state, and have a powerful interest in preserving access to affordable, high quality health care. UNITE HERE members cook and serve food in corporate, university and K-12 cafeterias. These are low-wage, seasonal, often part-time jobs. For them, comprehensive, affordable health insurance coverage is essential to achieving any hope of a middle class life. UNITE HERE members at Electric Boat in New London are engaged in bargaining for health benefits. Members currently pay 20% of the cost, which is unaffordable for workers who make \$12 per hour. If regional costs continue to escalate, workers will be forced to drop coverage, or be forced to choose between rent and health care. The price structure of the Greater New London market is vital to our members' future well-being.

UNITE HERE's Taft-Hartley fund, jointly administered by the union and management, has established a national health plan tailored specifically for food service workers. In Connecticut, nearly 1,000 members have enrolled in the past several years. In some cases, the savings compared to commercial plans have been large enough to maintain comprehensive coverage and actually reduce the cost to individual members. But the efficiency of this plan will not ultimately protect members if the state's largest hospital is permitted to grow unchecked.

UNITE HERE will offer evidence of the immediate impact of any pricing changes at L+M on service sector workers struggling at the margins of the health care system. UNITE HERE will also offer testimony based on experience establishing a specially designed Taft-Hartley health plan for food service workers in Connecticut, as market consolidation continues to drive prices up.

NATIONAL PHYSICIANS ALLIANCE IN CONNECTICUT (NPA-CT)

The National Physicians Alliance in Connecticut (NPA-CT) is part of a national 501(c)3 organization, the National Physicians Alliance (NPA), that creates research and education programs that promote health and foster active engagement of physicians with their communities to achieve high quality, affordable health care for all. The NPA offers a home to physicians across medical specialties who share a commitment to professional integrity and health justice. NPA-CT physicians are members of the staff of the parties involved in the affiliation and primary care physicians in the communities served by the two entities. As such, they have a key interest in assuring that their patients and communities have access to affordable, high-quality hospital care.

NPA will provide evidence that the purported clinical goals of the takeover – tight coordination of care and ease of communication and close cooperation among providers – can be achieved without the potential loss of local control and threat of monopoly economic power inherent in a takeover.

CONNECTICUT HEALTH POLICY PROJECT

Since 1999 as a nonprofit consumer advocacy organization, the CT Health Policy Project has labored to expand access to high quality, affordable health care for all Connecticut residents, with a particular focus on ensuring access for people in low-income communities of color. The proposed acquisition of Lawrence and Memorial Hospital/Health System by Yale-New Haven Hospital/Health System will undermine every part of our mission.

Executive Director Ellen Andrews, who sits on the Governor’s Health Care Cabinet, will provide expert testimony regarding the impact of mergers and acquisitions on low-income consumers and the state Medicaid program.

UNITED ACTION CONNECTICUT

United Action Connecticut is an interfaith, multiracial, multilingual organization of congregations and community organizations crossing political, economic, urban and suburban boundaries. UACT is dedicated to building powerful, broad based community organizations. UACT brings congregations together to help them grow and thrive, develop leaders and move into action on concrete issues of social equity and justice. UACT has been working actively toward health care reform for nearly a decade. UACT’s New London area congregations include L+M physicians, caregivers and patients, whose interests in preserving community access to high quality affordable health care are directly affected by the applications.

UACT will offer evidence on the local need for access and associated social services that will allow all Greater New London residents to obtain the care they need in their immediate community. The evidence will focus specifically on challenges facing vulnerable populations, including seniors.

NEW ENGLAND HEALTH CARE EMPLOYEES UNION, DISTRICT 1199, SEIU

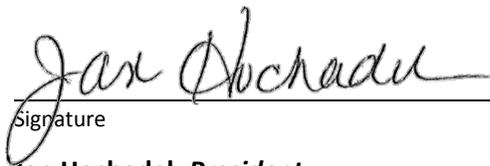

District 1199 represents approximately 25,000 health care workers in the state of Connecticut, including state employees, hospital employees, nursing home employees, direct care and professional workers at private Mental Health and Developmental Disability agencies and FQHCs, and home care workers providing personal care and support services to Medicaid recipients. Of those, more than 1,000 health care workers live in Lawrence and Memorial’s Primary and Secondary Service Areas.

At this time, District 1199 is also negotiating first Collective Bargaining Agreements for more than 300 low-wage nursing home employees of two skilled nursing facilities in New London (Crossings East and Crossings West), and one in Mystic, CT (Pendleton Health and Rehabilitation Center). Wages for these workers start at just \$10.35 per hour and more than 40% are scheduled for fewer than 32 hours per week. The cost of providing health benefits to these workers is a key issue in difficult ongoing contract negotiations. Current premiums for these workers are so expensive that many elect not to take insurance coverage at all or take the least expensive plan in terms of premiums, resulting in high out-of-pocket and co-pay expenses.

Based on 1199's significant membership in L&M's service areas and the need to negotiate affordable insurance for low-wage workers within the service areas, 1199's interests are directly affected by potential price increases or service cuts that typically accompany mergers. Cost, access and the maintenance of quality healthcare services are of vital importance to the organization and to the communities in which 1199 members reside and receive acute care health services.

In sum, the undersigned organizations' interests are directly affected by the proposed Certificates of Need. Collectively, they bring vast experience and expertise to inform OHCA's decision, and each will provide evidence from a different perspective. Respectfully, we request full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

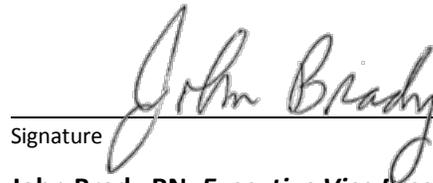

Very truly yours,

REFERENCE: Certificate of Need Application, Docket # 15-32032, *Northeast Medical Group (NMG) and L&M Physician Association: Transfer of Ownership of a Group Practice by merger of L&MPA and into NMG*, and;

Certificate of Need Application, Docket # 15-32033, *Yale-New Haven Health Services Corporation ("YNHHSC") and Lawrence + Memorial Corporation: ("L+M"), Acquisition of L+M by YNHHSC*

Dear Ms. Martone and Mr. Hansted:

The undersigned organizations seek intervenor status in the two above-referenced dockets as a coalition of faith-based organizations, physicians, labor organizations and health policy leaders. The interests of each organization are directly affected by the acquisition of Lawrence and Memorial Health by Yale-New Haven Health Services Corporation, as described below. Accordingly we seek full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Collectively, we represent in various ways more than 8,000 residents of L+M Hospital's primary and secondary service areas, and more than 75,000 residents statewide whose interests are affected by the ongoing consolidation of the state's health care system.

We support Governor Malloy's Executive Order 51, and urge OHCA not to render any decision on these applications until January 2017 or until the Governor's Task Force has reviewed the state's Certificate of Need laws, and made recommendations. If statutory deadlines force OHCA to decide the case, OHCA must follow the letter of Executive Order 51 and deny the application. Please note that among the intervenors are two members of the Task Force.

Even if the application does not ripen for decision until next year, as currently written it must be rejected. The deal fails to protect patients from escalating costs or to ensure local access to the fullest possible range of services. The application does not describe an adequate investment in community health needs, given that the community will lose any measure of control to a multi-billion dollar system from out of town. Any transaction in the future must provide for adequate oversight and accountability to the local community. In our submissions to the Commission as Intervenors we will also demonstrate that in attempting to address these issues, applicants have submitted inaccurate, misleading or incomplete information.

Cost and Price:

- OHCA requested comparative risk-adjusted prices for L+M Hospital and the three Yale-New Haven system hospitals: Bridgeport, Greenwich, and Yale-New Haven. YNHHS claims that such data do not exist, and that if the data did exist, they would not submit them.¹ In fact, adjusted prices for the most common diagnoses at L+M are consistently lower than other Yale-New Haven system hospitals. YNHHS has also refused to supply actual data on prices before and after their takeovers of the Hospital of St. Raphael, Greenwich Hospital and Bridgeport Hospital.
- Without relevant data, OHCA cannot evaluate the transaction. The deal will leave Yale-New Haven with nearly 60% market share from New York to Rhode Island, and more than 80% in L+M's primary service area.² Consolidation in such markets most often leads to price increases of 20% or more.³
- Through an analysis of billions of claims, provider pricing has been proven the most influential factor in regional private sector health care costs, and market power is the most potent price driver.⁴ YNHHS's description of negotiating prices separately for each hospital is irrelevant. The available evidence shows that separate price negotiations do not blunt the power of monopoly pricing.⁵
- Applicants' refusal to respond to OHCA's data request alone is grounds for rejection. Employee premium and point of service cost-sharing are exploding, putting needed services out of reach of many people with insurance, and threatening the coverage expansion under the Affordable Care Act. New London County's median family income lags the state average, and in the city of New London median family income is less than 60% of the state average. We will offer firsthand evidence of the pressure that systemic costs in the New London area are putting on patients, and describe the challenge of attempting to create a tailored health plan for low-wage service workers as Connecticut's provider systems consolidate.
- With out of pocket costs skyrocketing, Yale-New Haven's record of abusive debt collection practices creates deep concerns about the future of vulnerable populations in the wake of the acquisition. YNHHS's aggressive use of liens, foreclosures, wage garnishment and bank executions in past years forced changes in the state's medical debt collection laws, and resulted in settlements worth tens of millions of dollars. L+M patients cannot risk a repeat in Southeastern Connecticut.

Community Access and Well-being:

When Hartford HealthCare bought Windham Hospital five years ago, it stated that "currently they will not be terminating any services," although Hartford left itself wiggle room to reduce "duplicative services" in the future. But the CON went on to state that one of the benefits of the deal to Windham would be to "increase the services and technology offered locally," and to "decrease the out-migration of patients."⁶ Now with the ICU and CCU closed, patients are traveling long distances by ambulance, private car or even helicopter for urgently needed care that used to be available at Windham. Our coalition has broad experience treating patients and working to ensure the transportation, community

outreach, and follow up services that a community needs are in place. We cannot afford another Windham.

- Applicants told media outlets they will invest \$300 million in our community's health. But YNHHS requires that all investment generate a "positive return on investment" (i.e. profit), and most of the \$300 million will only come if L+M and other system hospitals hit profit targets.⁷ We will present testimony from physician and community leaders who will identify and analyze the community's health needs, and demonstrate the fundamental inadequacy of the proposed "investment."
- A true investment in our community would preserve existing services, expand services in areas of critical need, especially the provision and coordination of mental and behavioral health services and expanded community outreach to underserved populations. L+M management has wasted millions of dollars on acquisitions and punitive labor relations, rather than focusing on community health needs. L+M's community health needs assessment is underway. That process is far more robust today than three years ago. While encouraging, there is no real commitment to making major investments to address the needs identified in the process.
- Applicants have offered no compelling rationale for the merger achieving quality improvement. The electronic medical record EPIC has already been installed, and tight clinical coordination and clear clinical communication are being achieved without the negative consequences of a takeover.

Workforce:

- L+M is New London's 2nd largest private sector employer. Going forward, L+M must ensure that its workforce represents the community at large, protect job quality by respecting collective bargaining agreements and using hiring best practices.

Community Accountability and Monitoring:

- Given YNHHS's troubling record on collections, stonewalling on production of price data, and distorted claims about "investment," in the event of any transaction, L+M Hospital and the acquiring health system must negotiate with a representative cross-section of the community a written Community Benefits Agreement with binding commitments enforced by an independent monitor on the issues of access, affordability, community benefits, efficiencies and jobs;
- L+M Hospital must remain under the control of a locally controlled Board of Directors with decision making authority and accountability to the community. Despite public protestations to the contrary, under the applications as proposed, YNHHS will have ultimate authority over all meaningful decisions at L+M, including nominating members of the "local" boards.
- Rather than seek an unneeded merger, L+M Hospital must develop, finance and implement a Community Health Needs Assessment (CHNA), independent of its affiliated partner and will devote sufficient resources to address the health priorities identified in the needs assessment;
- The CHNA will be conducted every three years, and will include on-going accountability structures including independent monitoring for measuring implementation progress and effectiveness.

The Intervenors: Interests and Evidence

Collectively, the coalition includes thousands of L+M patients, local clergy, patient advocates, physicians, nurses and other caregivers, and leaders responsible for the purchase of health plans.

In addition to the specific interests of the various organizations, the coalition also brings a broad range of health care expertise to the proceedings. The coalition includes:

- Professors at Brown University and Columbia University Medical schools;
- Key statewide health care leaders:
 - Members of the Governor’s Health Care Cabinet
 - Members of the Governor’s Certificate of Need Review Task Force, and;
 - Members of the steering committee of L+M’s current Community Needs Assessment process.

The coalition will present first-hand evidence from the entire range of the organizations’ experiences in the Southeastern Connecticut health care system. In addition, the coalition will present expert analysis of the proposed acquisitions, including: data on Connecticut hospital market concentration; comparative price data; an exhaustive review of the rapidly growing literature on the impact of consolidation on cost, access, “efficiency” and quality, and; a breakdown of the Applicants’ financial statements to shed light on claims of financial hardship.

AFT CONNECTICUT including Locals 5049, 5051, 5123 and 5119

AFT Connecticut is a statewide federation of the local unions of the American Federation of Teachers. Our locals have more than 1,800 members who work for Lawrence and Memorial Hospital and its affiliates. They all live in L+M’s primary or secondary service area. They account for more than 50% of the total workforce at L+M, including the Visiting Nurses Association of Southeastern Connecticut. When counting non-L+M employees, altogether AFT Connecticut (State Federation) represents over 5,000 members who live in L+M’s Primary and Secondary Service Areas.⁸ . Based on AFT Connecticut’s large concentration of members and their families in L+M services areas, the organization’s interests are directly affected by the acquisition proposal, both as workers and as patients.

AFT Connecticut was previously granted intervenor status by OHCA in a 2004 CON hearing (04-30348-CON) involving the Hospital’s desire to close the Hospital’s OB/GYN clinic. AFT Connecticut will offer testimony on the efficiency of current L+M operations, the impact of aggressive expansion on core missions, and expert testimony on trends in consolidation, cost, prices, access and governance.

CONNECTICUT CITIZEN ACTION GROUP

Connecticut Citizen Action Group is a statewide membership organization dedicated to involving the residents of Connecticut in bringing about a fair and equitable society. For over 40 years, CCAG has been at the forefront of advocating for a high quality, affordable and fully accessible health care system for all Connecticut residents. CCAG has worked effectively to advance health care policies that strengthen consumer access to fair, affordable health care services, coverage and benefits. CCAG’s health care reform work includes monitoring hospital consolidation and regulation, expanding and protecting Medicaid coverage and benefits, and strengthening the ACA law.

CCAG has 500 members who live within the L+M catchment region, and will be directly impacted by potential increased costs, loss of local access, and changes in community programming directed toward health and well-being. Our members include a broad, diverse cross-section of the community including health care providers, child care providers, municipal workers, senior citizens, and educators. In addition to presenting testimony on the need for controlling cost and sustaining local community access to health care services, we will offer testimony on previous attempts to impose public accountability conditions on hospital acquisitions, and the need to impose strong community oversight, monitoring and accountability measures on this acquisition to ensure that the terms adequately and appropriately meet community health care needs and priorities, and that any such terms or conditions are actually carried out.

UNITE HERE CONNECTICUT

UNITE HERE Connecticut is a labor organization representing more than 7,000 employees in Connecticut, including 250 in the primary and secondary service areas of L+M Hospital. We bargain health benefits for all of our members in the state, and have a powerful interest in preserving access to affordable, high quality health care. UNITE HERE members cook and serve food in corporate, university and K-12 cafeterias. These are low-wage, seasonal, often part-time jobs. For them, comprehensive, affordable health insurance coverage is essential to achieving any hope of a middle class life. UNITE HERE members at Electric Boat in New London are engaged in bargaining for health benefits. Members currently pay 20% of the cost, which is unaffordable for workers who make \$12 per hour. If regional costs continue to escalate, workers will be forced to drop coverage, or be forced to choose between rent and health care. The price structure of the Greater New London market is vital to our members' future well-being.

UNITE HERE's Taft-Hartley fund, jointly administered by the union and management, has established a national health plan tailored specifically for food service workers. In Connecticut, nearly 1,000 members have enrolled in the past several years. In some cases, the savings compared to commercial plans have been large enough to maintain comprehensive coverage and actually reduce the cost to individual members. But the efficiency of this plan will not ultimately protect members if the state's largest hospital is permitted to grow unchecked.

UNITE HERE will offer evidence of the immediate impact of any pricing changes at L+M on service sector workers struggling at the margins of the health care system. UNITE HERE will also offer testimony based on experience establishing a specially designed Taft-Hartley health plan for food service workers in Connecticut, as market consolidation continues to drive prices up.

NATIONAL PHYSICIANS ALLIANCE IN CONNECTICUT (NPA-CT)

The National Physicians Alliance in Connecticut (NPA-CT) is part of a national 501(c)3 organization, the National Physicians Alliance (NPA), that creates research and education programs that promote health and foster active engagement of physicians with their communities to achieve high quality, affordable health care for all. The NPA offers a home to physicians across medical specialties who share a commitment to professional integrity and health justice. NPA-CT physicians are members of the staff of the parties involved in the affiliation and primary care physicians in the communities served by the two entities. As such, they have a key interest in assuring that their patients and communities have access to affordable, high-quality hospital care.

NPA will provide evidence that the purported clinical goals of the takeover – tight coordination of care and ease of communication and close cooperation among providers – can be achieved without the potential loss of local control and threat of monopoly economic power inherent in a takeover.

CONNECTICUT HEALTH POLICY PROJECT

Since 1999 as a nonprofit consumer advocacy organization, the CT Health Policy Project has labored to expand access to high quality, affordable health care for all Connecticut residents, with a particular focus on ensuring access for people in low-income communities of color. The proposed acquisition of Lawrence and Memorial Hospital/Health System by Yale-New Haven Hospital/Health System will undermine every part of our mission.

Executive Director Ellen Andrews, who sits on the Governor’s Health Care Cabinet, will provide expert testimony regarding the impact of mergers and acquisitions on low-income consumers and the state Medicaid program.

UNITED ACTION CONNECTICUT

United Action Connecticut is an interfaith, multiracial, multilingual organization of congregations and community organizations crossing political, economic, urban and suburban boundaries. UACT is dedicated to building powerful, broad based community organizations. UACT brings congregations together to help them grow and thrive, develop leaders and move into action on concrete issues of social equity and justice. UACT has been working actively toward health care reform for nearly a decade. UACT’s New London area congregations include L+M physicians, caregivers and patients, whose interests in preserving community access to high quality affordable health care are directly affected by the applications.

UACT will offer evidence on the local need for access and associated social services that will allow all Greater New London residents to obtain the care they need in their immediate community. The evidence will focus specifically on challenges facing vulnerable populations, including seniors.

NEW ENGLAND HEALTH CARE EMPLOYEES UNION, DISTRICT 1199, SEIU

District 1199 represents approximately 25,000 health care workers in the state of Connecticut, including state employees, hospital employees, nursing home employees, direct care and professional workers at private Mental Health and Developmental Disability agencies and FQHCs, and home care workers providing personal care and support services to Medicaid recipients. Of those, more than 1,000 health care workers live in Lawrence and Memorial’s Primary and Secondary Service Areas.

At this time, District 1199 is also negotiating first Collective Bargaining Agreements for more than 300 low-wage nursing home employees of two skilled nursing facilities in New London (Crossings East and Crossings West), and one in Mystic, CT (Pendleton Health and Rehabilitation Center). Wages for these workers start at just \$10.35 per hour and more than 40% are scheduled for fewer than 32 hours per week. The cost of providing health benefits to these workers is a key issue in difficult ongoing contract negotiations. Current premiums for these workers are so expensive that many elect not to take insurance coverage at all or take the least expensive plan in terms of premiums, resulting in high out-of-pocket and co-pay expenses.

Based on 1199's significant membership in L&M's service areas and the need to negotiate affordable insurance for low-wage workers within the service areas, 1199's interests are directly affected by potential price increases or service cuts that typically accompany mergers. Cost, access and the maintenance of quality healthcare services are of vital importance to the organization and to the communities in which 1199 members reside and receive acute care health services.

In sum, the undersigned organizations' interests are directly affected by the proposed Certificates of Need. Collectively, they bring vast experience and expertise to inform OHCA's decision, and each will provide evidence from a different perspective. Respectfully, we request full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Very truly yours,

AFT Connecticut

Dear Ms. Martone and Mr. Hansted:

Attach please find an electronic version of my appearance on behalf of a coalition of organizations that filed an application today for Intervenor status in the above referenced matters. Each organization is signing and sending the application to OCHA today but as a courtesy I have also included an electronic version of that application with this notice of appearance. As I state in my attached cover letter I would like to get a copy of the Service Sheet in these matters so I can forward my appearance to counsel for the Petitioners. Thank you.

REFERENCE: Certificate of Need Application, Docket # 15-32032, *Northeast Medical Group (NMG) and L&M Physician Association: Transfer of Ownership of a Group Practice by merger of L&MPA and into NMG*, and;

Certificate of Need Application, Docket # 15-32033, *Yale-New Haven Health Services Corporation ("YNHHSC") and Lawrence + Memorial Corporation: ("L+M"), Acquisition of L+M by YNHHSC*

Dear Ms. Martone and Mr. Hansted:

The undersigned organizations seek intervenor status in the two above-referenced dockets as a coalition of faith-based organizations, physicians, labor organizations and health policy leaders. The interests of each organization are directly affected by the acquisition of Lawrence and Memorial Health by Yale-New Haven Health Services Corporation, as described below. Accordingly we seek full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Collectively, we represent in various ways more than 8,000 residents of L+M Hospital's primary and secondary service areas, and more than 75,000 residents statewide whose interests are affected by the ongoing consolidation of the state's health care system.

We support Governor Malloy's Executive Order 51, and urge OHCA not to render any decision on these applications until January 2017 or until the Governor's Task Force has reviewed the state's Certificate of Need laws, and made recommendations. If statutory deadlines force OHCA to decide the case, OHCA must follow the letter of Executive Order 51 and deny the application. Please note that among the intervenors are two members of the Task Force.

Even if the application does not ripen for decision until next year, as currently written it must be rejected. The deal fails to protect patients from escalating costs or to ensure local access to the fullest possible range of services. The application does not describe an adequate investment in community health needs, given that the community will lose any measure of control to a multi-billion dollar system from out of town. Any transaction in the future must provide for adequate oversight and accountability to the local community. In our submissions to the Commission as Intervenors we will also demonstrate that in attempting to address these issues, applicants have submitted inaccurate, misleading or incomplete information.

Cost and Price:

- OHCA requested comparative risk-adjusted prices for L+M Hospital and the three Yale-New Haven system hospitals: Bridgeport, Greenwich, and Yale-New Haven. YNHHS claims that such data do not exist, and that if the data did exist, they would not submit them.¹ In fact, adjusted prices for the most common diagnoses at L+M are consistently lower than other Yale-New Haven system hospitals. YNHHS has also refused to supply actual data on prices before and after their takeovers of the Hospital of St. Raphael, Greenwich Hospital and Bridgeport Hospital.
- Without relevant data, OHCA cannot evaluate the transaction. The deal will leave Yale-New Haven with nearly 60% market share from New York to Rhode Island, and more than 80% in L+M's primary service area.² Consolidation in such markets most often leads to price increases of 20% or more.³
- Through an analysis of billions of claims, provider pricing has been proven the most influential factor in regional private sector health care costs, and market power is the most potent price driver.⁴ YNHHS's description of negotiating prices separately for each hospital is irrelevant. The available evidence shows that separate price negotiations do not blunt the power of monopoly pricing.⁵
- Applicants' refusal to respond to OHCA's data request alone is grounds for rejection. Employee premium and point of service cost-sharing are exploding, putting needed services out of reach of many people with insurance, and threatening the coverage expansion under the Affordable Care Act. New London County's median family income lags the state average, and in the city of New London median family income is less than 60% of the state average. We will offer firsthand evidence of the pressure that systemic costs in the New London area are putting on patients, and describe the challenge of attempting to create a tailored health plan for low-wage service workers as Connecticut's provider systems consolidate.
- With out of pocket costs skyrocketing, Yale-New Haven's record of abusive debt collection practices creates deep concerns about the future of vulnerable populations in the wake of the acquisition. YNHHS's aggressive use of liens, foreclosures, wage garnishment and bank executions in past years forced changes in the state's medical debt collection laws, and resulted in settlements worth tens of millions of dollars. L+M patients cannot risk a repeat in Southeastern Connecticut.

Community Access and Well-being:

When Hartford HealthCare bought Windham Hospital five years ago, it stated that "currently they will not be terminating any services," although Hartford left itself wiggle room to reduce "duplicative services" in the future. But the CON went on to state that one of the benefits of the deal to Windham would be to "increase the services and technology offered locally," and to "decrease the out-migration of patients."⁶ Now with the ICU and CCU closed, patients are traveling long distances by ambulance, private car or even helicopter for urgently needed care that used to be available at Windham. Our coalition has broad experience treating patients and working to ensure the transportation, community

outreach, and follow up services that a community needs are in place. We cannot afford another Windham.

- Applicants told media outlets they will invest \$300 million in our community's health. But YNHHS requires that all investment generate a "positive return on investment" (i.e. profit), and most of the \$300 million will only come if L+M and other system hospitals hit profit targets.⁷ We will present testimony from physician and community leaders who will identify and analyze the community's health needs, and demonstrate the fundamental inadequacy of the proposed "investment."
- A true investment in our community would preserve existing services, expand services in areas of critical need, especially the provision and coordination of mental and behavioral health services and expanded community outreach to underserved populations. L+M management has wasted millions of dollars on acquisitions and punitive labor relations, rather than focusing on community health needs. L+M's community health needs assessment is underway. That process is far more robust today than three years ago. While encouraging, there is no real commitment to making major investments to address the needs identified in the process.
- Applicants have offered no compelling rationale for the merger achieving quality improvement. The electronic medical record EPIC has already been installed, and tight clinical coordination and clear clinical communication are being achieved without the negative consequences of a takeover.

Workforce:

- L+M is New London's 2nd largest private sector employer. Going forward, L+M must ensure that its workforce represents the community at large, protect job quality by respecting collective bargaining agreements and using hiring best practices.

Community Accountability and Monitoring:

- Given YNHHS's troubling record on collections, stonewalling on production of price data, and distorted claims about "investment," in the event of any transaction, L+M Hospital and the acquiring health system must negotiate with a representative cross-section of the community a written Community Benefits Agreement with binding commitments enforced by an independent monitor on the issues of access, affordability, community benefits, efficiencies and jobs;
- L+M Hospital must remain under the control of a locally controlled Board of Directors with decision making authority and accountability to the community. Despite public protestations to the contrary, under the applications as proposed, YNHHS will have ultimate authority over all meaningful decisions at L+M, including nominating members of the "local" boards.
- Rather than seek an unneeded merger, L+M Hospital must develop, finance and implement a Community Health Needs Assessment (CHNA), independent of its affiliated partner and will devote sufficient resources to address the health priorities identified in the needs assessment;
- The CHNA will be conducted every three years, and will include on-going accountability structures including independent monitoring for measuring implementation progress and effectiveness.

The Intervenors: Interests and Evidence

Collectively, the coalition includes thousands of L+M patients, local clergy, patient advocates, physicians, nurses and other caregivers, and leaders responsible for the purchase of health plans.

In addition to the specific interests of the various organizations, the coalition also brings a broad range of health care expertise to the proceedings. The coalition includes:

- Professors at Brown University and Columbia University Medical schools;
- Key statewide health care leaders:
 - Members of the Governor’s Health Care Cabinet
 - Members of the Governor’s Certificate of Need Review Task Force, and;
 - Members of the steering committee of L+M’s current Community Needs Assessment process.

The coalition will present first-hand evidence from the entire range of the organizations’ experiences in the Southeastern Connecticut health care system. In addition, the coalition will present expert analysis of the proposed acquisitions, including: data on Connecticut hospital market concentration; comparative price data; an exhaustive review of the rapidly growing literature on the impact of consolidation on cost, access, “efficiency” and quality, and; a breakdown of the Applicants’ financial statements to shed light on claims of financial hardship.

AFT CONNECTICUT including Locals 5049, 5051, 5123 and 5119

AFT Connecticut is a statewide federation of the local unions of the American Federation of Teachers. Our locals have more than 1,800 members who work for Lawrence and Memorial Hospital and its affiliates. They all live in L+M’s primary or secondary service area. They account for more than 50% of the total workforce at L+M, including the Visiting Nurses Association of Southeastern Connecticut. When counting non-L+M employees, altogether AFT Connecticut (State Federation) represents over 5,000 members who live in L+M’s Primary and Secondary Service Areas.⁸ . Based on AFT Connecticut’s large concentration of members and their families in L+M services areas, the organization’s interests are directly affected by the acquisition proposal, both as workers and as patients.

AFT Connecticut was previously granted intervenor status by OHCA in a 2004 CON hearing (04-30348-CON) involving the Hospital’s desire to close the Hospital’s OB/GYN clinic. AFT Connecticut will offer testimony on the efficiency of current L+M operations, the impact of aggressive expansion on core missions, and expert testimony on trends in consolidation, cost, prices, access and governance.

CONNECTICUT CITIZEN ACTION GROUP

Connecticut Citizen Action Group is a statewide membership organization dedicated to involving the residents of Connecticut in bringing about a fair and equitable society. For over 40 years, CCAG has been at the forefront of advocating for a high quality, affordable and fully accessible health care system for all Connecticut residents. CCAG has worked effectively to advance health care policies that strengthen consumer access to fair, affordable health care services, coverage and benefits. CCAG’s health care reform work includes monitoring hospital consolidation and regulation, expanding and protecting Medicaid coverage and benefits, and strengthening the ACA law.

CCAG has 500 members who live within the L+M catchment region, and will be directly impacted by potential increased costs, loss of local access, and changes in community programming directed toward health and well-being. Our members include a broad, diverse cross-section of the community including health care providers, child care providers, municipal workers, senior citizens, and educators. In addition to presenting testimony on the need for controlling cost and sustaining local community access to health care services, we will offer testimony on previous attempts to impose public accountability conditions on hospital acquisitions, and the need to impose strong community oversight, monitoring and accountability measures on this acquisition to ensure that the terms adequately and appropriately meet community health care needs and priorities, and that any such terms or conditions are actually carried out.

UNITE HERE CONNECTICUT

UNITE HERE Connecticut is a labor organization representing more than 7,000 employees in Connecticut, including 250 in the primary and secondary service areas of L+M Hospital. We bargain health benefits for all of our members in the state, and have a powerful interest in preserving access to affordable, high quality health care. UNITE HERE members cook and serve food in corporate, university and K-12 cafeterias. These are low-wage, seasonal, often part-time jobs. For them, comprehensive, affordable health insurance coverage is essential to achieving any hope of a middle class life. UNITE HERE members at Electric Boat in New London are engaged in bargaining for health benefits. Members currently pay 20% of the cost, which is unaffordable for workers who make \$12 per hour. If regional costs continue to escalate, workers will be forced to drop coverage, or be forced to choose between rent and health care. The price structure of the Greater New London market is vital to our members' future well-being.

UNITE HERE's Taft-Hartley fund, jointly administered by the union and management, has established a national health plan tailored specifically for food service workers. In Connecticut, nearly 1,000 members have enrolled in the past several years. In some cases, the savings compared to commercial plans have been large enough to maintain comprehensive coverage and actually reduce the cost to individual members. But the efficiency of this plan will not ultimately protect members if the state's largest hospital is permitted to grow unchecked.

UNITE HERE will offer evidence of the immediate impact of any pricing changes at L+M on service sector workers struggling at the margins of the health care system. UNITE HERE will also offer testimony based on experience establishing a specially designed Taft-Hartley health plan for food service workers in Connecticut, as market consolidation continues to drive prices up.

NATIONAL PHYSICIANS ALLIANCE IN CONNECTICUT (NPA-CT)

The National Physicians Alliance in Connecticut (NPA-CT) is part of a national 501(c)3 organization, the National Physicians Alliance (NPA), that creates research and education programs that promote health and foster active engagement of physicians with their communities to achieve high quality, affordable health care for all. The NPA offers a home to physicians across medical specialties who share a commitment to professional integrity and health justice. NPA-CT physicians are members of the staff of the parties involved in the affiliation and primary care physicians in the communities served by the two entities. As such, they have a key interest in assuring that their patients and communities have access to affordable, high-quality hospital care.

NPA will provide evidence that the purported clinical goals of the takeover – tight coordination of care and ease of communication and close cooperation among providers – can be achieved without the potential loss of local control and threat of monopoly economic power inherent in a takeover.

CONNECTICUT HEALTH POLICY PROJECT

Since 1999 as a nonprofit consumer advocacy organization, the CT Health Policy Project has labored to expand access to high quality, affordable health care for all Connecticut residents, with a particular focus on ensuring access for people in low-income communities of color. The proposed acquisition of Lawrence and Memorial Hospital/Health System by Yale-New Haven Hospital/Health System will undermine every part of our mission.

Executive Director Ellen Andrews, who sits on the Governor’s Health Care Cabinet, will provide expert testimony regarding the impact of mergers and acquisitions on low-income consumers and the state Medicaid program.

UNITED ACTION CONNECTICUT

United Action Connecticut is an interfaith, multiracial, multilingual organization of congregations and community organizations crossing political, economic, urban and suburban boundaries. UACT is dedicated to building powerful, broad based community organizations. UACT brings congregations together to help them grow and thrive, develop leaders and move into action on concrete issues of social equity and justice. UACT has been working actively toward health care reform for nearly a decade. UACT’s New London area congregations include L+M physicians, caregivers and patients, whose interests in preserving community access to high quality affordable health care are directly affected by the applications.

UACT will offer evidence on the local need for access and associated social services that will allow all Greater New London residents to obtain the care they need in their immediate community. The evidence will focus specifically on challenges facing vulnerable populations, including seniors.

NEW ENGLAND HEALTH CARE EMPLOYEES UNION, DISTRICT 1199, SEIU

District 1199 represents approximately 25,000 health care workers in the state of Connecticut, including state employees, hospital employees, nursing home employees, direct care and professional workers at private Mental Health and Developmental Disability agencies and FQHCs, and home care workers providing personal care and support services to Medicaid recipients. Of those, more than 1,000 health care workers live in Lawrence and Memorial’s Primary and Secondary Service Areas.

At this time, District 1199 is also negotiating first Collective Bargaining Agreements for more than 300 low-wage nursing home employees of two skilled nursing facilities in New London (Crossings East and Crossings West), and one in Mystic, CT (Pendleton Health and Rehabilitation Center). Wages for these workers start at just \$10.35 per hour and more than 40% are scheduled for fewer than 32 hours per week. The cost of providing health benefits to these workers is a key issue in difficult ongoing contract negotiations. REFERENCE: Certificate of Need Application, Docket # 15-32032, *Northeast Medical Group (NMG) and L&M Physician Association: Transfer of Ownership of a Group Practice by merger of L&MPA and into NMG*, and;

Certificate of Need Application, Docket # 15-32033, *Yale-New Haven Health Services Corporation ("YHHSC") and Lawrence + Memorial Corporation: ("L+M"), Acquisition of L+M by YHHSC*

Dear Ms. Martone and Mr. Hansted:

The undersigned organizations seek intervenor status in the two above-referenced dockets as a coalition of faith-based organizations, physicians, labor organizations and health policy leaders. The interests of each organization are directly affected by the acquisition of Lawrence and Memorial Health by Yale-New Haven Health Services Corporation, as described below. Accordingly we seek full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Collectively, we represent in various ways more than 8,000 residents of L+M Hospital's primary and secondary service areas, and more than 75,000 residents statewide whose interests are affected by the ongoing consolidation of the state's health care system.

We support Governor Malloy's Executive Order 51, and urge OHCA not to render any decision on these applications until January 2017 or until the Governor's Task Force has reviewed the state's Certificate of Need laws, and made recommendations. If statutory deadlines force OHCA to decide the case, OHCA must follow the letter of Executive Order 51 and deny the application. Please note that among the intervenors are two members of the Task Force.

Even if the application does not ripen for decision until next year, as currently written it must be rejected. The deal fails to protect patients from escalating costs or to ensure local access to the fullest possible range of services. The application does not describe an adequate investment in community health needs, given that the community will lose any measure of control to a multi-billion dollar system from out of town. Any transaction in the future must provide for adequate oversight and accountability to the local community. In our submissions to the Commission as Intervenors we will also demonstrate that in attempting to address these issues, applicants have submitted inaccurate, misleading or incomplete information.

Cost and Price:

- OHCA requested comparative risk-adjusted prices for L+M Hospital and the three Yale-New Haven system hospitals: Bridgeport, Greenwich, and Yale-New Haven. YNHHS claims that such data do not exist, and that if the data did exist, they would not submit them.¹ In fact, adjusted prices for the most common diagnoses at L+M are consistently lower than other Yale-New Haven system hospitals. YNHHS has also refused to supply actual data on prices before and after their takeovers of the Hospital of St. Raphael, Greenwich Hospital and Bridgeport Hospital.
- Without relevant data, OHCA cannot evaluate the transaction. The deal will leave Yale-New Haven with nearly 60% market share from New York to Rhode Island, and more than 80% in L+M's primary service area.² Consolidation in such markets most often leads to price increases of 20% or more.³
- Through an analysis of billions of claims, provider pricing has been proven the most influential factor in regional private sector health care costs, and market power is the most potent price driver.⁴ YNHHS's description of negotiating prices separately for each hospital is irrelevant. The available evidence shows that separate price negotiations do not blunt the power of monopoly pricing.⁵
- Applicants' refusal to respond to OHCA's data request alone is grounds for rejection. Employee premium and point of service cost-sharing are exploding, putting needed services out of reach of many people with insurance, and threatening the coverage expansion under the Affordable Care Act. New London County's median family income lags the state average, and in the city of New London median family income is less than 60% of the state average. We will offer firsthand evidence of the pressure that systemic costs in the New London area are putting on patients, and describe the challenge of attempting to create a tailored health plan for low-wage service workers as Connecticut's provider systems consolidate.
- With out of pocket costs skyrocketing, Yale-New Haven's record of abusive debt collection practices creates deep concerns about the future of vulnerable populations in the wake of the acquisition. YNHHS's aggressive use of liens, foreclosures, wage garnishment and bank executions in past years forced changes in the state's medical debt collection laws, and resulted in settlements worth tens of millions of dollars. L+M patients cannot risk a repeat in Southeastern Connecticut.

Community Access and Well-being:

When Hartford HealthCare bought Windham Hospital five years ago, it stated that "currently they will not be terminating any services," although Hartford left itself wiggle room to reduce "duplicative services" in the future. But the CON went on to state that one of the benefits of the deal to Windham would be to "increase the services and technology offered locally," and to "decrease the out-migration of patients."⁶ Now with the ICU and CCU closed, patients are traveling long distances by ambulance, private car or even helicopter for urgently needed care that used to be available at Windham. Our coalition has broad experience treating patients and working to ensure the transportation, community

outreach, and follow up services that a community needs are in place. We cannot afford another Windham.

- Applicants told media outlets they will invest \$300 million in our community's health. But YNHHS requires that all investment generate a "positive return on investment" (i.e. profit), and most of the \$300 million will only come if L+M and other system hospitals hit profit targets.⁷ We will present testimony from physician and community leaders who will identify and analyze the community's health needs, and demonstrate the fundamental inadequacy of the proposed "investment."
- A true investment in our community would preserve existing services, expand services in areas of critical need, especially the provision and coordination of mental and behavioral health services and expanded community outreach to underserved populations. L+M management has wasted millions of dollars on acquisitions and punitive labor relations, rather than focusing on community health needs. L+M's community health needs assessment is underway. That process is far more robust today than three years ago. While encouraging, there is no real commitment to making major investments to address the needs identified in the process.
- Applicants have offered no compelling rationale for the merger achieving quality improvement. The electronic medical record EPIC has already been installed, and tight clinical coordination and clear clinical communication are being achieved without the negative consequences of a takeover.

Workforce:

- L+M is New London's 2nd largest private sector employer. Going forward, L+M must ensure that its workforce represents the community at large, protect job quality by respecting collective bargaining agreements and using hiring best practices.

Community Accountability and Monitoring:

- Given YNHHS's troubling record on collections, stonewalling on production of price data, and distorted claims about "investment," in the event of any transaction, L+M Hospital and the acquiring health system must negotiate with a representative cross-section of the community a written Community Benefits Agreement with binding commitments enforced by an independent monitor on the issues of access, affordability, community benefits, efficiencies and jobs;
- L+M Hospital must remain under the control of a locally controlled Board of Directors with decision making authority and accountability to the community. Despite public protestations to the contrary, under the applications as proposed, YNHHS will have ultimate authority over all meaningful decisions at L+M, including nominating members of the "local" boards.
- Rather than seek an unneeded merger, L+M Hospital must develop, finance and implement a Community Health Needs Assessment (CHNA), independent of its affiliated partner and will devote sufficient resources to address the health priorities identified in the needs assessment;
- The CHNA will be conducted every three years, and will include on-going accountability structures including independent monitoring for measuring implementation progress and effectiveness.

The Intervenors: Interests and Evidence

Collectively, the coalition includes thousands of L+M patients, local clergy, patient advocates, physicians, nurses and other caregivers, and leaders responsible for the purchase of health plans.

In addition to the specific interests of the various organizations, the coalition also brings a broad range of health care expertise to the proceedings. The coalition includes:

- Professors at Brown University and Columbia University Medical schools;
- Key statewide health care leaders:
 - Members of the Governor's Health Care Cabinet
 - Members of the Governor's Certificate of Need Review Task Force, and;
 - Members of the steering committee of L+M's current Community Needs Assessment process.

The coalition will present first-hand evidence from the entire range of the organizations' experiences in the Southeastern Connecticut health care system. In addition, the coalition will present expert analysis of the proposed acquisitions, including: data on Connecticut hospital market concentration; comparative price data; an exhaustive review of the rapidly growing literature on the impact of consolidation on cost, access, "efficiency" and quality, and; a breakdown of the Applicants' financial statements to shed light on claims of financial hardship.

AFT CONNECTICUT including Locals 5049, 5051, 5123 and 5119

AFT Connecticut is a statewide federation of the local unions of the American Federation of Teachers. Our locals have more than 1,800 members who work for Lawrence and Memorial Hospital and its affiliates. They all live in L+M's primary or secondary service area. They account for more than 50% of the total workforce at L+M, including the Visiting Nurses Association of Southeastern Connecticut. When counting non-L+M employees, altogether AFT Connecticut (State Federation) represents over 5,000 members who live in L+M's Primary and Secondary Service Areas.⁸ . Based on AFT Connecticut's large concentration of members and their families in L+M services areas, the organization's interests are directly affected by the acquisition proposal, both as workers and as patients.

AFT Connecticut was previously granted intervenor status by OHCA in a 2004 CON hearing (04-30348-CON) involving the Hospital's desire to close the Hospital's OB/GYN clinic. AFT Connecticut will offer testimony on the efficiency of current L+M operations, the impact of aggressive expansion on core missions, and expert testimony on trends in consolidation, cost, prices, access and governance.

CONNECTICUT CITIZEN ACTION GROUP

Connecticut Citizen Action Group is a statewide membership organization dedicated to involving the residents of Connecticut in bringing about a fair and equitable society. For over 40 years, CCAG has been at the forefront of advocating for a high quality, affordable and fully accessible health care system for all Connecticut residents. CCAG has worked effectively to advance health care policies that strengthen consumer access to fair, affordable health care services, coverage and benefits. CCAG's health care reform work includes monitoring hospital consolidation and regulation, expanding and protecting Medicaid coverage and benefits, and strengthening the ACA law.

CCAG has 500 members who live within the L+M catchment region, and will be directly impacted by potential increased costs, loss of local access, and changes in community programming directed toward health and well-being. Our members include a broad, diverse cross-section of the community including health care providers, child care providers, municipal workers, senior citizens, and educators. In addition to presenting testimony on the need for controlling cost and sustaining local community access to health care services, we will offer testimony on previous attempts to impose public accountability conditions on hospital acquisitions, and the need to impose strong community oversight, monitoring and accountability measures on this acquisition to ensure that the terms adequately and appropriately meet community health care needs and priorities, and that any such terms or conditions are actually carried out.

UNITE HERE CONNECTICUT

UNITE HERE Connecticut is a labor organization representing more than 7,000 employees in Connecticut, including 250 in the primary and secondary service areas of L+M Hospital. We bargain health benefits for all of our members in the state, and have a powerful interest in preserving access to affordable, high quality health care. UNITE HERE members cook and serve food in corporate, university and K-12 cafeterias. These are low-wage, seasonal, often part-time jobs. For them, comprehensive, affordable health insurance coverage is essential to achieving any hope of a middle class life. UNITE HERE members at Electric Boat in New London are engaged in bargaining for health benefits. Members currently pay 20% of the cost, which is unaffordable for workers who make \$12 per hour. If regional costs continue to escalate, workers will be forced to drop coverage, or be forced to choose between rent and health care. The price structure of the Greater New London market is vital to our members' future well-being.

UNITE HERE's Taft-Hartley fund, jointly administered by the union and management, has established a national health plan tailored specifically for food service workers. In Connecticut, nearly 1,000 members have enrolled in the past several years. In some cases, the savings compared to commercial plans have been large enough to maintain comprehensive coverage and actually reduce the cost to individual members. But the efficiency of this plan will not ultimately protect members if the state's largest hospital is permitted to grow unchecked.

UNITE HERE will offer evidence of the immediate impact of any pricing changes at L+M on service sector workers struggling at the margins of the health care system. UNITE HERE will also offer testimony based on experience establishing a specially designed Taft-Hartley health plan for food service workers in Connecticut, as market consolidation continues to drive prices up.

NATIONAL PHYSICIANS ALLIANCE IN CONNECTICUT (NPA-CT)

The National Physicians Alliance in Connecticut (NPA-CT) is part of a national 501(c)3 organization, the National Physicians Alliance (NPA), that creates research and education programs that promote health and foster active engagement of physicians with their communities to achieve high quality, affordable health care for all. The NPA offers a home to physicians across medical specialties who share a commitment to professional integrity and health justice. NPA-CT physicians are members of the staff of the parties involved in the affiliation and primary care physicians in the communities served by the two entities. As such, they have a key interest in assuring that their patients and communities have access to affordable, high-quality hospital care.

NPA will provide evidence that the purported clinical goals of the takeover – tight coordination of care and ease of communication and close cooperation among providers – can be achieved without the potential loss of local control and threat of monopoly economic power inherent in a takeover.

CONNECTICUT HEALTH POLICY PROJECT

Since 1999 as a nonprofit consumer advocacy organization, the CT Health Policy Project has labored to expand access to high quality, affordable health care for all Connecticut residents, with a particular focus on ensuring access for people in low-income communities of color. The proposed acquisition of Lawrence and Memorial Hospital/Health System by Yale-New Haven Hospital/Health System will undermine every part of our mission.

Executive Director Ellen Andrews, who sits on the Governor’s Health Care Cabinet, will provide expert testimony regarding the impact of mergers and acquisitions on low-income consumers and the state Medicaid program.

UNITED ACTION CONNECTICUT

United Action Connecticut is an interfaith, multiracial, multilingual organization of congregations and community organizations crossing political, economic, urban and suburban boundaries. UACT is dedicated to building powerful, broad based community organizations. UACT brings congregations together to help them grow and thrive, develop leaders and move into action on concrete issues of social equity and justice. UACT has been working actively toward health care reform for nearly a decade. UACT’s New London area congregations include L+M physicians, caregivers and patients, whose interests in preserving community access to high quality affordable health care are directly affected by the applications.

UACT will offer evidence on the local need for access and associated social services that will allow all Greater New London residents to obtain the care they need in their immediate community. The evidence will focus specifically on challenges facing vulnerable populations, including seniors.

NEW ENGLAND HEALTH CARE EMPLOYEES UNION, DISTRICT 1199, SEIU

District 1199 represents approximately 25,000 health care workers in the state of Connecticut, including state employees, hospital employees, nursing home employees, direct care and professional workers at private Mental Health and Developmental Disability agencies and FQHCs, and home care workers providing personal care and support services to Medicaid recipients. Of those, more than 1,000 health care workers live in Lawrence and Memorial’s Primary and Secondary Service Areas.

At this time, District 1199 is also negotiating first Collective Bargaining Agreements for more than 300 low-wage nursing home employees of two skilled nursing facilities in New London (Crossings East and Crossings West), and one in Mystic, CT (Pendleton Health and Rehabilitation Center). Wages for these workers start at just \$10.35 per hour and more than 40% are scheduled for fewer than 32 hours per week. The cost of providing health benefits to these workers is a key issue in difficult ongoing contract negotiations. Current premiums for these workers are so expensive that many elect not to take insurance coverage at all or take the least expensive plan in terms of premiums, resulting in high out-of-pocket and co-pay expenses.

Based on 1199's significant membership in L&M's service areas and the need to negotiate affordable insurance for low-wage workers within the service areas, 1199's interests are directly affected by potential price increases or service cuts that typically accompany mergers. Cost, access and the maintenance of quality healthcare services are of vital importance to the organization and to the communities in which 1199 members reside and receive acute care health services.

In sum, the undersigned organizations' interests are directly affected by the proposed Certificates of Need. Collectively, they bring vast experience and expertise to inform OHCA's decision, and each will provide evidence from a different perspective. Respectfully, we request full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Very truly yours,

AFT Connecticut

REFERENCE: Certificate of Need Application, Docket # 15-32032, *Northeast Medical Group (NMG) and L&M Physician Association: Transfer of Ownership of a Group Practice by merger of L&MPA and into NMG*, and;

Certificate of Need Application, Docket # 15-32033, *Yale-New Haven Health Services Corporation ("YHHSC") and Lawrence + Memorial Corporation: ("L+M"), Acquisition of L+M by YHHSC*

Dear Ms. Martone and Mr. Hansted:

The undersigned organizations seek intervenor status in the two above-referenced dockets as a coalition of faith-based organizations, physicians, labor organizations and health policy leaders. The interests of each organization are directly affected by the acquisition of Lawrence and Memorial Health by Yale-New Haven Health Services Corporation, as described below. Accordingly we seek full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Collectively, we represent in various ways more than 8,000 residents of L+M Hospital's primary and secondary service areas, and more than 75,000 residents statewide whose interests are affected by the ongoing consolidation of the state's health care system.

We support Governor Malloy's Executive Order 51, and urge OHCA not to render any decision on these applications until January 2017 or until the Governor's Task Force has reviewed the state's Certificate of Need laws, and made recommendations. If statutory deadlines force OHCA to decide the case, OHCA must follow the letter of Executive Order 51 and deny the application. Please note that among the intervenors are two members of the Task Force.

Even if the application does not ripen for decision until next year, as currently written it must be rejected. The deal fails to protect patients from escalating costs or to ensure local access to the fullest possible range of services. The application does not describe an adequate investment in community health needs, given that the community will lose any measure of control to a multi-billion dollar system from out of town. Any transaction in the future must provide for adequate oversight and accountability to the local community. In our submissions to the Commission as Intervenors we will also demonstrate that in attempting to address these issues, applicants have submitted inaccurate, misleading or incomplete information.

Cost and Price:

- OHCA requested comparative risk-adjusted prices for L+M Hospital and the three Yale-New Haven system hospitals: Bridgeport, Greenwich, and Yale-New Haven. YNHHS claims that such data do not exist, and that if the data did exist, they would not submit them.¹ In fact, adjusted prices for the most common diagnoses at L+M are consistently lower than other Yale-New Haven system hospitals. YNHHS has also refused to supply actual data on prices before and after their takeovers of the Hospital of St. Raphael, Greenwich Hospital and Bridgeport Hospital.
- Without relevant data, OHCA cannot evaluate the transaction. The deal will leave Yale-New Haven with nearly 60% market share from New York to Rhode Island, and more than 80% in L+M's primary service area.² Consolidation in such markets most often leads to price increases of 20% or more.³
- Through an analysis of billions of claims, provider pricing has been proven the most influential factor in regional private sector health care costs, and market power is the most potent price driver.⁴ YNHHS's description of negotiating prices separately for each hospital is irrelevant. The available evidence shows that separate price negotiations do not blunt the power of monopoly pricing.⁵
- Applicants' refusal to respond to OHCA's data request alone is grounds for rejection. Employee premium and point of service cost-sharing are exploding, putting needed services out of reach of many people with insurance, and threatening the coverage expansion under the Affordable Care Act. New London County's median family income lags the state average, and in the city of New London median family income is less than 60% of the state average. We will offer firsthand evidence of the pressure that systemic costs in the New London area are putting on patients, and describe the challenge of attempting to create a tailored health plan for low-wage service workers as Connecticut's provider systems consolidate.
- With out of pocket costs skyrocketing, Yale-New Haven's record of abusive debt collection practices creates deep concerns about the future of vulnerable populations in the wake of the acquisition. YNHHS's aggressive use of liens, foreclosures, wage garnishment and bank executions in past years forced changes in the state's medical debt collection laws, and resulted in settlements worth tens of millions of dollars. L+M patients cannot risk a repeat in Southeastern Connecticut.

Community Access and Well-being:

When Hartford HealthCare bought Windham Hospital five years ago, it stated that "currently they will not be terminating any services," although Hartford left itself wiggle room to reduce "duplicative services" in the future. But the CON went on to state that one of the benefits of the deal to Windham would be to "increase the services and technology offered locally," and to "decrease the out-migration of patients."⁶ Now with the ICU and CCU closed, patients are traveling long distances by ambulance, private car or even helicopter for urgently needed care that used to be available at Windham. Our coalition has broad experience treating patients and working to ensure the transportation, community

outreach, and follow up services that a community needs are in place. We cannot afford another Windham.

- Applicants told media outlets they will invest \$300 million in our community's health. But YNHHS requires that all investment generate a "positive return on investment" (i.e. profit), and most of the \$300 million will only come if L+M and other system hospitals hit profit targets.⁷ We will present testimony from physician and community leaders who will identify and analyze the community's health needs, and demonstrate the fundamental inadequacy of the proposed "investment."
- A true investment in our community would preserve existing services, expand services in areas of critical need, especially the provision and coordination of mental and behavioral health services and expanded community outreach to underserved populations. L+M management has wasted millions of dollars on acquisitions and punitive labor relations, rather than focusing on community health needs. L+M's community health needs assessment is underway. That process is far more robust today than three years ago. While encouraging, there is no real commitment to making major investments to address the needs identified in the process.
- Applicants have offered no compelling rationale for the merger achieving quality improvement. The electronic medical record EPIC has already been installed, and tight clinical coordination and clear clinical communication are being achieved without the negative consequences of a takeover.

Workforce:

- L+M is New London's 2nd largest private sector employer. Going forward, L+M must ensure that its workforce represents the community at large, protect job quality by respecting collective bargaining agreements and using hiring best practices.

Community Accountability and Monitoring:

- Given YNHHS's troubling record on collections, stonewalling on production of price data, and distorted claims about "investment," in the event of any transaction, L+M Hospital and the acquiring health system must negotiate with a representative cross-section of the community a written Community Benefits Agreement with binding commitments enforced by an independent monitor on the issues of access, affordability, community benefits, efficiencies and jobs;
- L+M Hospital must remain under the control of a locally controlled Board of Directors with decision making authority and accountability to the community. Despite public protestations to the contrary, under the applications as proposed, YNHHS will have ultimate authority over all meaningful decisions at L+M, including nominating members of the "local" boards.
- Rather than seek an unneeded merger, L+M Hospital must develop, finance and implement a Community Health Needs Assessment (CHNA), independent of its affiliated partner and will devote sufficient resources to address the health priorities identified in the needs assessment;
- The CHNA will be conducted every three years, and will include on-going accountability structures including independent monitoring for measuring implementation progress and effectiveness.

The Intervenors: Interests and Evidence

Collectively, the coalition includes thousands of L+M patients, local clergy, patient advocates, physicians, nurses and other caregivers, and leaders responsible for the purchase of health plans.

In addition to the specific interests of the various organizations, the coalition also brings a broad range of health care expertise to the proceedings. The coalition includes:

- Professors at Brown University and Columbia University Medical schools;
- Key statewide health care leaders:
 - Members of the Governor’s Health Care Cabinet
 - Members of the Governor’s Certificate of Need Review Task Force, and;
 - Members of the steering committee of L+M’s current Community Needs Assessment process.

The coalition will present first-hand evidence from the entire range of the organizations’ experiences in the Southeastern Connecticut health care system. In addition, the coalition will present expert analysis of the proposed acquisitions, including: data on Connecticut hospital market concentration; comparative price data; an exhaustive review of the rapidly growing literature on the impact of consolidation on cost, access, “efficiency” and quality, and; a breakdown of the Applicants’ financial statements to shed light on claims of financial hardship.

AFT CONNECTICUT including Locals 5049, 5051, 5123 and 5119

AFT Connecticut is a statewide federation of the local unions of the American Federation of Teachers. Our locals have more than 1,800 members who work for Lawrence and Memorial Hospital and its affiliates. They all live in L+M’s primary or secondary service area. They account for more than 50% of the total workforce at L+M, including the Visiting Nurses Association of Southeastern Connecticut. When counting non-L+M employees, altogether AFT Connecticut (State Federation) represents over 5,000 members who live in L+M’s Primary and Secondary Service Areas.⁸ . Based on AFT Connecticut’s large concentration of members and their families in L+M services areas, the organization’s interests are directly affected by the acquisition proposal, both as workers and as patients.

AFT Connecticut was previously granted intervenor status by OHCA in a 2004 CON hearing (04-30348-CON) involving the Hospital’s desire to close the Hospital’s OB/GYN clinic. AFT Connecticut will offer testimony on the efficiency of current L+M operations, the impact of aggressive expansion on core missions, and expert testimony on trends in consolidation, cost, prices, access and governance.

CONNECTICUT CITIZEN ACTION GROUP

Connecticut Citizen Action Group is a statewide membership organization dedicated to involving the residents of Connecticut in bringing about a fair and equitable society. For over 40 years, CCAG has been at the forefront of advocating for a high quality, affordable and fully accessible health care system for all Connecticut residents. CCAG has worked effectively to advance health care policies that strengthen consumer access to fair, affordable health care services, coverage and benefits. CCAG’s health care reform work includes monitoring hospital consolidation and regulation, expanding and protecting Medicaid coverage and benefits, and strengthening the ACA law.

CCAG has 500 members who live within the L+M catchment region, and will be directly impacted by potential increased costs, loss of local access, and changes in community programming directed toward health and well-being. Our members include a broad, diverse cross-section of the community including health care providers, child care providers, municipal workers, senior citizens, and educators. In addition to presenting testimony on the need for controlling cost and sustaining local community access to health care services, we will offer testimony on previous attempts to impose public accountability conditions on hospital acquisitions, and the need to impose strong community oversight, monitoring and accountability measures on this acquisition to ensure that the terms adequately and appropriately meet community health care needs and priorities, and that any such terms or conditions are actually carried out.

UNITE HERE CONNECTICUT

UNITE HERE Connecticut is a labor organization representing more than 7,000 employees in Connecticut, including 250 in the primary and secondary service areas of L+M Hospital. We bargain health benefits for all of our members in the state, and have a powerful interest in preserving access to affordable, high quality health care. UNITE HERE members cook and serve food in corporate, university and K-12 cafeterias. These are low-wage, seasonal, often part-time jobs. For them, comprehensive, affordable health insurance coverage is essential to achieving any hope of a middle class life. UNITE HERE members at Electric Boat in New London are engaged in bargaining for health benefits. Members currently pay 20% of the cost, which is unaffordable for workers who make \$12 per hour. If regional costs continue to escalate, workers will be forced to drop coverage, or be forced to choose between rent and health care. The price structure of the Greater New London market is vital to our members' future well-being.

UNITE HERE's Taft-Hartley fund, jointly administered by the union and management, has established a national health plan tailored specifically for food service workers. In Connecticut, nearly 1,000 members have enrolled in the past several years. In some cases, the savings compared to commercial plans have been large enough to maintain comprehensive coverage and actually reduce the cost to individual members. But the efficiency of this plan will not ultimately protect members if the state's largest hospital is permitted to grow unchecked.

UNITE HERE will offer evidence of the immediate impact of any pricing changes at L+M on service sector workers struggling at the margins of the health care system. UNITE HERE will also offer testimony based on experience establishing a specially designed Taft-Hartley health plan for food service workers in Connecticut, as market consolidation continues to drive prices up.

NATIONAL PHYSICIANS ALLIANCE IN CONNECTICUT (NPA-CT)

The National Physicians Alliance in Connecticut (NPA-CT) is part of a national 501(c)3 organization, the National Physicians Alliance (NPA), that creates research and education programs that promote health and foster active engagement of physicians with their communities to achieve high quality, affordable health care for all. The NPA offers a home to physicians across medical specialties who share a commitment to professional integrity and health justice. NPA-CT physicians are members of the staff of the parties involved in the affiliation and primary care physicians in the communities served by the two entities. As such, they have a key interest in assuring that their patients and communities have access to affordable, high-quality hospital care.

NPA will provide evidence that the purported clinical goals of the takeover – tight coordination of care and ease of communication and close cooperation among providers – can be achieved without the potential loss of local control and threat of monopoly economic power inherent in a takeover.

CONNECTICUT HEALTH POLICY PROJECT

Since 1999 as a nonprofit consumer advocacy organization, the CT Health Policy Project has labored to expand access to high quality, affordable health care for all Connecticut residents, with a particular focus on ensuring access for people in low-income communities of color. The proposed acquisition of Lawrence and Memorial Hospital/Health System by Yale-New Haven Hospital/Health System will undermine every part of our mission.

Executive Director Ellen Andrews, who sits on the Governor’s Health Care Cabinet, will provide expert testimony regarding the impact of mergers and acquisitions on low-income consumers and the state Medicaid program.

UNITED ACTION CONNECTICUT

United Action Connecticut is an interfaith, multiracial, multilingual organization of congregations and community organizations crossing political, economic, urban and suburban boundaries. UACT is dedicated to building powerful, broad based community organizations. UACT brings congregations together to help them grow and thrive, develop leaders and move into action on concrete issues of social equity and justice. UACT has been working actively toward health care reform for nearly a decade. UACT’s New London area congregations include L+M physicians, caregivers and patients, whose interests in preserving community access to high quality affordable health care are directly affected by the applications.

UACT will offer evidence on the local need for access and associated social services that will allow all Greater New London residents to obtain the care they need in their immediate community. The evidence will focus specifically on challenges facing vulnerable populations, including seniors.

NEW ENGLAND HEALTH CARE EMPLOYEES UNION, DISTRICT 1199, SEIU

District 1199 represents approximately 25,000 health care workers in the state of Connecticut, including state employees, hospital employees, nursing home employees, direct care and professional workers at private Mental Health and Developmental Disability agencies and FQHCs, and home care workers providing personal care and support services to Medicaid recipients. Of those, more than 1,000 health care workers live in Lawrence and Memorial’s Primary and Secondary Service Areas.

At this time, District 1199 is also negotiating first Collective Bargaining Agreements for more than 300 low-wage nursing home employees of two skilled nursing facilities in New London (Crossings East and Crossings West), and one in Mystic, CT (Pendleton Health and Rehabilitation Center). Wages for these workers start at just \$10.35 per hour and more than 40% are scheduled for fewer than 32 hours per week. The cost of providing health benefits to these workers is a key issue in difficult ongoing contract negotiations. Current premiums for these workers are so expensive that many elect not to take insurance coverage at all or take the least expensive plan in terms of premiums, resulting in high out-of-pocket and co-pay expenses.

Based on 1199's significant membership in L&M's service areas and the need to negotiate affordable insurance for low-wage workers within the service areas, 1199's interests are directly affected by potential price increases or service cuts that typically accompany mergers. Cost, access and the maintenance of quality healthcare services are of vital importance to the organization and to the communities in which 1199 members reside and receive acute care health services.

In sum, the undersigned organizations' interests are directly affected by the proposed Certificates of Need. Collectively, they bring vast experience and expertise to inform OHCA's decision, and each will provide evidence from a different perspective. Respectfully, we request full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Very truly yours,

AFT Connecticut

REFERENCE: Certificate of Need Application, Docket # 15-32032, *Northeast Medical Group (NMG) and L&M Physician Association: Transfer of Ownership of a Group Practice by merger of L&MPA and into NMG*, and;

Certificate of Need Application, Docket # 15-32033, *Yale-New Haven Health Services Corporation ("YNHHSC") and Lawrence + Memorial Corporation: ("L+M"), Acquisition of L+M by YNHHSC*

Dear Ms. Martone and Mr. Hansted:

The undersigned organizations seek intervenor status in the two above-referenced dockets as a coalition of faith-based organizations, physicians, labor organizations and health policy leaders. The interests of each organization are directly affected by the acquisition of Lawrence and Memorial Health by Yale-New Haven Health Services Corporation, as described below. Accordingly we seek full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Collectively, we represent in various ways more than 8,000 residents of L+M Hospital's primary and secondary service areas, and more than 75,000 residents statewide whose interests are affected by the ongoing consolidation of the state's health care system.

We support Governor Malloy's Executive Order 51, and urge OHCA not to render any decision on these applications until January 2017 or until the Governor's Task Force has reviewed the state's Certificate of Need laws, and made recommendations. If statutory deadlines force OHCA to decide the case, OHCA must follow the letter of Executive Order 51 and deny the application. Please note that among the intervenors are two members of the Task Force.

Even if the application does not ripen for decision until next year, as currently written it must be rejected. The deal fails to protect patients from escalating costs or to ensure local access to the fullest possible range of services. The application does not describe an adequate investment in community health needs, given that the community will lose any measure of control to a multi-billion dollar system from out of town. Any transaction in the future must provide for adequate oversight and accountability to the local community. In our submissions to the Commission as Intervenors we will also demonstrate that in attempting to address these issues, applicants have submitted inaccurate, misleading or incomplete information.

Cost and Price:

- OHCA requested comparative risk-adjusted prices for L+M Hospital and the three Yale-New Haven system hospitals: Bridgeport, Greenwich, and Yale-New Haven. YNHHS claims that such data do not exist, and that if the data did exist, they would not submit them.¹ In fact, adjusted prices for the most common diagnoses at L+M are consistently lower than other Yale-New Haven system hospitals. YNHHS has also refused to supply actual data on prices before and after their takeovers of the Hospital of St. Raphael, Greenwich Hospital and Bridgeport Hospital.
- Without relevant data, OHCA cannot evaluate the transaction. The deal will leave Yale-New Haven with nearly 60% market share from New York to Rhode Island, and more than 80% in L+M's primary service area.² Consolidation in such markets most often leads to price increases of 20% or more.³
- Through an analysis of billions of claims, provider pricing has been proven the most influential factor in regional private sector health care costs, and market power is the most potent price driver.⁴ YNHHS's description of negotiating prices separately for each hospital is irrelevant. The available evidence shows that separate price negotiations do not blunt the power of monopoly pricing.⁵
- Applicants' refusal to respond to OHCA's data request alone is grounds for rejection. Employee premium and point of service cost-sharing are exploding, putting needed services out of reach of many people with insurance, and threatening the coverage expansion under the Affordable Care Act. New London County's median family income lags the state average, and in the city of New London median family income is less than 60% of the state average. We will offer firsthand evidence of the pressure that systemic costs in the New London area are putting on patients, and describe the challenge of attempting to create a tailored health plan for low-wage service workers as Connecticut's provider systems consolidate.
- With out of pocket costs skyrocketing, Yale-New Haven's record of abusive debt collection practices creates deep concerns about the future of vulnerable populations in the wake of the acquisition. YNHHS's aggressive use of liens, foreclosures, wage garnishment and bank executions in past years forced changes in the state's medical debt collection laws, and resulted in settlements worth tens of millions of dollars. L+M patients cannot risk a repeat in Southeastern Connecticut.

Community Access and Well-being:

When Hartford HealthCare bought Windham Hospital five years ago, it stated that "currently they will not be terminating any services," although Hartford left itself wiggle room to reduce "duplicative services" in the future. But the CON went on to state that one of the benefits of the deal to Windham would be to "increase the services and technology offered locally," and to "decrease the out-migration of patients."⁶ Now with the ICU and CCU closed, patients are traveling long distances by ambulance, private car or even helicopter for urgently needed care that used to be available at Windham. Our coalition has broad experience treating patients and working to ensure the transportation, community

outreach, and follow up services that a community needs are in place. We cannot afford another Windham.

- Applicants told media outlets they will invest \$300 million in our community's health. But YNHHS requires that all investment generate a "positive return on investment" (i.e. profit), and most of the \$300 million will only come if L+M and other system hospitals hit profit targets.⁷ We will present testimony from physician and community leaders who will identify and analyze the community's health needs, and demonstrate the fundamental inadequacy of the proposed "investment."
- A true investment in our community would preserve existing services, expand services in areas of critical need, especially the provision and coordination of mental and behavioral health services and expanded community outreach to underserved populations. L+M management has wasted millions of dollars on acquisitions and punitive labor relations, rather than focusing on community health needs. L+M's community health needs assessment is underway. That process is far more robust today than three years ago. While encouraging, there is no real commitment to making major investments to address the needs identified in the process.
- Applicants have offered no compelling rationale for the merger achieving quality improvement. The electronic medical record EPIC has already been installed, and tight clinical coordination and clear clinical communication are being achieved without the negative consequences of a takeover.

Workforce:

- L+M is New London's 2nd largest private sector employer. Going forward, L+M must ensure that its workforce represents the community at large, protect job quality by respecting collective bargaining agreements and using hiring best practices.

Community Accountability and Monitoring:

- Given YNHHS's troubling record on collections, stonewalling on production of price data, and distorted claims about "investment," in the event of any transaction, L+M Hospital and the acquiring health system must negotiate with a representative cross-section of the community a written Community Benefits Agreement with binding commitments enforced by an independent monitor on the issues of access, affordability, community benefits, efficiencies and jobs;
- L+M Hospital must remain under the control of a locally controlled Board of Directors with decision making authority and accountability to the community. Despite public protestations to the contrary, under the applications as proposed, YNHHS will have ultimate authority over all meaningful decisions at L+M, including nominating members of the "local" boards.
- Rather than seek an unneeded merger, L+M Hospital must develop, finance and implement a Community Health Needs Assessment (CHNA), independent of its affiliated partner and will devote sufficient resources to address the health priorities identified in the needs assessment;
- The CHNA will be conducted every three years, and will include on-going accountability structures including independent monitoring for measuring implementation progress and effectiveness.

The Intervenors: Interests and Evidence

Collectively, the coalition includes thousands of L+M patients, local clergy, patient advocates, physicians, nurses and other caregivers, and leaders responsible for the purchase of health plans.

In addition to the specific interests of the various organizations, the coalition also brings a broad range of health care expertise to the proceedings. The coalition includes:

- Professors at Brown University and Columbia University Medical schools;
- Key statewide health care leaders:
 - Members of the Governor’s Health Care Cabinet
 - Members of the Governor’s Certificate of Need Review Task Force, and;
 - Members of the steering committee of L+M’s current Community Needs Assessment process.

The coalition will present first-hand evidence from the entire range of the organizations’ experiences in the Southeastern Connecticut health care system. In addition, the coalition will present expert analysis of the proposed acquisitions, including: data on Connecticut hospital market concentration; comparative price data; an exhaustive review of the rapidly growing literature on the impact of consolidation on cost, access, “efficiency” and quality, and; a breakdown of the Applicants’ financial statements to shed light on claims of financial hardship.

AFT CONNECTICUT including Locals 5049, 5051, 5123 and 5119

AFT Connecticut is a statewide federation of the local unions of the American Federation of Teachers. Our locals have more than 1,800 members who work for Lawrence and Memorial Hospital and its affiliates. They all live in L+M’s primary or secondary service area. They account for more than 50% of the total workforce at L+M, including the Visiting Nurses Association of Southeastern Connecticut. When counting non-L+M employees, altogether AFT Connecticut (State Federation) represents over 5,000 members who live in L+M’s Primary and Secondary Service Areas.⁸ . Based on AFT Connecticut’s large concentration of members and their families in L+M services areas, the organization’s interests are directly affected by the acquisition proposal, both as workers and as patients.

AFT Connecticut was previously granted intervenor status by OHCA in a 2004 CON hearing (04-30348-CON) involving the Hospital’s desire to close the Hospital’s OB/GYN clinic. AFT Connecticut will offer testimony on the efficiency of current L+M operations, the impact of aggressive expansion on core missions, and expert testimony on trends in consolidation, cost, prices, access and governance.

CONNECTICUT CITIZEN ACTION GROUP

Connecticut Citizen Action Group is a statewide membership organization dedicated to involving the residents of Connecticut in bringing about a fair and equitable society. For over 40 years, CCAG has been at the forefront of advocating for a high quality, affordable and fully accessible health care system for all Connecticut residents. CCAG has worked effectively to advance health care policies that strengthen consumer access to fair, affordable health care services, coverage and benefits. CCAG’s health care reform work includes monitoring hospital consolidation and regulation, expanding and protecting Medicaid coverage and benefits, and strengthening the ACA law.

CCAG has 500 members who live within the L+M catchment region, and will be directly impacted by potential increased costs, loss of local access, and changes in community programming directed toward health and well-being. Our members include a broad, diverse cross-section of the community including health care providers, child care providers, municipal workers, senior citizens, and educators. In addition to presenting testimony on the need for controlling cost and sustaining local community access to health care services, we will offer testimony on previous attempts to impose public accountability conditions on hospital acquisitions, and the need to impose strong community oversight, monitoring and accountability measures on this acquisition to ensure that the terms adequately and appropriately meet community health care needs and priorities, and that any such terms or conditions are actually carried out.

UNITE HERE CONNECTICUT

UNITE HERE Connecticut is a labor organization representing more than 7,000 employees in Connecticut, including 250 in the primary and secondary service areas of L+M Hospital. We bargain health benefits for all of our members in the state, and have a powerful interest in preserving access to affordable, high quality health care. UNITE HERE members cook and serve food in corporate, university and K-12 cafeterias. These are low-wage, seasonal, often part-time jobs. For them, comprehensive, affordable health insurance coverage is essential to achieving any hope of a middle class life. UNITE HERE members at Electric Boat in New London are engaged in bargaining for health benefits. Members currently pay 20% of the cost, which is unaffordable for workers who make \$12 per hour. If regional costs continue to escalate, workers will be forced to drop coverage, or be forced to choose between rent and health care. The price structure of the Greater New London market is vital to our members' future well-being.

UNITE HERE's Taft-Hartley fund, jointly administered by the union and management, has established a national health plan tailored specifically for food service workers. In Connecticut, nearly 1,000 members have enrolled in the past several years. In some cases, the savings compared to commercial plans have been large enough to maintain comprehensive coverage and actually reduce the cost to individual members. But the efficiency of this plan will not ultimately protect members if the state's largest hospital is permitted to grow unchecked.

UNITE HERE will offer evidence of the immediate impact of any pricing changes at L+M on service sector workers struggling at the margins of the health care system. UNITE HERE will also offer testimony based on experience establishing a specially designed Taft-Hartley health plan for food service workers in Connecticut, as market consolidation continues to drive prices up.

NATIONAL PHYSICIANS ALLIANCE IN CONNECTICUT (NPA-CT)

The National Physicians Alliance in Connecticut (NPA-CT) is part of a national 501(c)3 organization, the National Physicians Alliance (NPA), that creates research and education programs that promote health and foster active engagement of physicians with their communities to achieve high quality, affordable health care for all. The NPA offers a home to physicians across medical specialties who share a commitment to professional integrity and health justice. NPA-CT physicians are members of the staff of the parties involved in the affiliation and primary care physicians in the communities served by the two entities. As such, they have a key interest in assuring that their patients and communities have access to affordable, high-quality hospital care.

NPA will provide evidence that the purported clinical goals of the takeover – tight coordination of care and ease of communication and close cooperation among providers – can be achieved without the potential loss of local control and threat of monopoly economic power inherent in a takeover.

CONNECTICUT HEALTH POLICY PROJECT

Since 1999 as a nonprofit consumer advocacy organization, the CT Health Policy Project has labored to expand access to high quality, affordable health care for all Connecticut residents, with a particular focus on ensuring access for people in low-income communities of color. The proposed acquisition of Lawrence and Memorial Hospital/Health System by Yale-New Haven Hospital/Health System will undermine every part of our mission.

Executive Director Ellen Andrews, who sits on the Governor’s Health Care Cabinet, will provide expert testimony regarding the impact of mergers and acquisitions on low-income consumers and the state Medicaid program.

UNITED ACTION CONNECTICUT

United Action Connecticut is an interfaith, multiracial, multilingual organization of congregations and community organizations crossing political, economic, urban and suburban boundaries. UACT is dedicated to building powerful, broad based community organizations. UACT brings congregations together to help them grow and thrive, develop leaders and move into action on concrete issues of social equity and justice. UACT has been working actively toward health care reform for nearly a decade. UACT’s New London area congregations include L+M physicians, caregivers and patients, whose interests in preserving community access to high quality affordable health care are directly affected by the applications.

UACT will offer evidence on the local need for access and associated social services that will allow all Greater New London residents to obtain the care they need in their immediate community. The evidence will focus specifically on challenges facing vulnerable populations, including seniors.

NEW ENGLAND HEALTH CARE EMPLOYEES UNION, DISTRICT 1199, SEIU

District 1199 represents approximately 25,000 health care workers in the state of Connecticut, including state employees, hospital employees, nursing home employees, direct care and professional workers at private Mental Health and Developmental Disability agencies and FQHCs, and home care workers providing personal care and support services to Medicaid recipients. Of those, more than 1,000 health care workers live in Lawrence and Memorial’s Primary and Secondary Service Areas.

At this time, District 1199 is also negotiating first Collective Bargaining Agreements for more than 300 low-wage nursing home employees of two skilled nursing facilities in New London (Crossings East and Crossings West), and one in Mystic, CT (Pendleton Health and Rehabilitation Center). Wages for these workers start at just \$10.35 per hour and more than 40% are scheduled for fewer than 32 hours per week. The cost of providing health benefits to these workers is a key issue in difficult ongoing contract negotiations. Current premiums for these workers are so expensive that many elect not to take insurance coverage at all or take the least expensive plan in terms of premiums, resulting in high out-of-pocket and co-pay expenses.

Based on 1199's significant membership in L&M's service areas and the need to negotiate affordable insurance for low-wage workers within the service areas, 1199's interests are directly affected by potential price increases or service cuts that typically accompany mergers. Cost, access and the maintenance of quality healthcare services are of vital importance to the organization and to the communities in which 1199 members reside and receive acute care health services.

In sum, the undersigned organizations' interests are directly affected by the proposed Certificates of Need. Collectively, they bring vast experience and expertise to inform OHCA's decision, and each will provide evidence from a different perspective. Respectfully, we request full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Certificate of Need Application, Docket # 15-32033, *Yale-New Haven Health Services Corporation ("YNHHSC") and Lawrence + Memorial Corporation: ("L+M"), Acquisition of L+M by YNHHSC*

Dear Ms. Martone and Mr. Hansted:

The undersigned organizations seek intervenor status in the two above-referenced dockets as a coalition of faith-based organizations, physicians, labor organizations and health policy leaders. The interests of each organization are directly affected by the acquisition of Lawrence and Memorial Health by Yale-New Haven Health Services Corporation, as described below. Accordingly we seek full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Collectively, we represent in various ways more than 8,000 residents of L+M Hospital's primary and secondary service areas, and more than 75,000 residents statewide whose interests are affected by the ongoing consolidation of the state's health care system.

We support Governor Malloy's Executive Order 51, and urge OHCA not to render any decision on these applications until January 2017 or until the Governor's Task Force has reviewed the state's Certificate of Need laws, and made recommendations. If statutory deadlines force OHCA to decide the case, OHCA must follow the letter of Executive Order 51 and deny the application. Please note that among the intervenors are two members of the Task Force.

Even if the application does not ripen for decision until next year, as currently written it must be rejected. The deal fails to protect patients from escalating costs or to ensure local access to the fullest possible range of services. The application does not describe an adequate investment in community health needs, given that the community will lose any measure of control to a multi-billion dollar system from out of town. Any transaction in the future must provide for adequate oversight and accountability to the local community. In our submissions to the Commission as Intervenors we will also demonstrate that in attempting to address these issues, applicants have submitted inaccurate, misleading or incomplete information.

Cost and Price:

- OHCA requested comparative risk-adjusted prices for L+M Hospital and the three Yale-New Haven system hospitals: Bridgeport, Greenwich, and Yale-New Haven. YNHHS claims that such data do not exist, and that if the data did exist, they would not submit them.¹ In fact, adjusted prices for the most common diagnoses at L+M are consistently lower than other Yale-New Haven system hospitals. YNHHS has also refused to supply actual data on prices before and after their takeovers of the Hospital of St. Raphael, Greenwich Hospital and Bridgeport Hospital.
- Without relevant data, OHCA cannot evaluate the transaction. The deal will leave Yale-New Haven with nearly 60% market share from New York to Rhode Island, and more than 80% in L+M's primary service area.² Consolidation in such markets most often leads to price increases of 20% or more.³
- Through an analysis of billions of claims, provider pricing has been proven the most influential factor in regional private sector health care costs, and market power is the most potent price driver.⁴ YNHHS's description of negotiating prices separately for each hospital is irrelevant. The available evidence shows that separate price negotiations do not blunt the power of monopoly pricing.⁵
- Applicants' refusal to respond to OHCA's data request alone is grounds for rejection. Employee premium and point of service cost-sharing are exploding, putting needed services out of reach of many people with insurance, and threatening the coverage expansion under the Affordable Care Act. New London County's median family income lags the state average, and in the city of New London median family income is less than 60% of the state average. We will offer firsthand evidence of the pressure that systemic costs in the New London area are putting on patients, and describe the challenge of attempting to create a tailored health plan for low-wage service workers as Connecticut's provider systems consolidate.
- With out of pocket costs skyrocketing, Yale-New Haven's record of abusive debt collection practices creates deep concerns about the future of vulnerable populations in the wake of the acquisition. YNHHS's aggressive use of liens, foreclosures, wage garnishment and bank executions in past years forced changes in the state's medical debt collection laws, and resulted in settlements worth tens of millions of dollars. L+M patients cannot risk a repeat in Southeastern Connecticut.

Community Access and Well-being:

When Hartford HealthCare bought Windham Hospital five years ago, it stated that "currently they will not be terminating any services," although Hartford left itself wiggle room to reduce "duplicative services" in the future. But the CON went on to state that one of the benefits of the deal to Windham would be to "increase the services and technology offered locally," and to "decrease the out-migration of patients."⁶ Now with the ICU and CCU closed, patients are traveling long distances by ambulance, private car or even helicopter for urgently needed care that used to be available at Windham. Our coalition has broad experience treating patients and working to ensure the transportation, community

outreach, and follow up services that a community needs are in place. We cannot afford another Windham.

- Applicants told media outlets they will invest \$300 million in our community's health. But YNHHS requires that all investment generate a "positive return on investment" (i.e. profit), and most of the \$300 million will only come if L+M and other system hospitals hit profit targets.⁷ We will present testimony from physician and community leaders who will identify and analyze the community's health needs, and demonstrate the fundamental inadequacy of the proposed "investment."
- A true investment in our community would preserve existing services, expand services in areas of critical need, especially the provision and coordination of mental and behavioral health services and expanded community outreach to underserved populations. L+M management has wasted millions of dollars on acquisitions and punitive labor relations, rather than focusing on community health needs. L+M's community health needs assessment is underway. That process is far more robust today than three years ago. While encouraging, there is no real commitment to making major investments to address the needs identified in the process.
- Applicants have offered no compelling rationale for the merger achieving quality improvement. The electronic medical record EPIC has already been installed, and tight clinical coordination and clear clinical communication are being achieved without the negative consequences of a takeover.

Workforce:

- L+M is New London's 2nd largest private sector employer. Going forward, L+M must ensure that its workforce represents the community at large, protect job quality by respecting collective bargaining agreements and using hiring best practices.

Community Accountability and Monitoring:

- Given YNHHS's troubling record on collections, stonewalling on production of price data, and distorted claims about "investment," in the event of any transaction, L+M Hospital and the acquiring health system must negotiate with a representative cross-section of the community a written Community Benefits Agreement with binding commitments enforced by an independent monitor on the issues of access, affordability, community benefits, efficiencies and jobs;
- L+M Hospital must remain under the control of a locally controlled Board of Directors with decision making authority and accountability to the community. Despite public protestations to the contrary, under the applications as proposed, YNHHS will have ultimate authority over all meaningful decisions at L+M, including nominating members of the "local" boards.
- Rather than seek an unneeded merger, L+M Hospital must develop, finance and implement a Community Health Needs Assessment (CHNA), independent of its affiliated partner and will devote sufficient resources to address the health priorities identified in the needs assessment;
- The CHNA will be conducted every three years, and will include on-going accountability structures including independent monitoring for measuring implementation progress and effectiveness.

The Intervenor: Interests and Evidence

Collectively, the coalition includes thousands of L+M patients, local clergy, patient advocates, physicians, nurses and other caregivers, and leaders responsible for the purchase of health plans.

In addition to the specific interests of the various organizations, the coalition also brings a broad range of health care expertise to the proceedings. The coalition includes:

- Professors at Brown University and Columbia University Medical schools;
- Key statewide health care leaders:
 - Members of the Governor's Health Care Cabinet
 - Members of the Governor's Certificate of Need Review Task Force, and;
 - Members of the steering committee of L+M's current Community Needs Assessment process.

The coalition will present first-hand evidence from the entire range of the organizations' experiences in the Southeastern Connecticut health care system. In addition, the coalition will present expert analysis of the proposed acquisitions, including: data on Connecticut hospital market concentration; comparative price data; an exhaustive review of the rapidly growing literature on the impact of consolidation on cost, access, "efficiency" and quality, and; a breakdown of the Applicants' financial statements to shed light on claims of financial hardship.

AFT CONNECTICUT including Locals 5049, 5051, 5123 and 5119

AFT Connecticut is a statewide federation of the local unions of the American Federation of Teachers. Our locals have more than 1,800 members who work for Lawrence and Memorial Hospital and its affiliates. They all live in L+M's primary or secondary service area. They account for more than 50% of the total workforce at L+M, including the Visiting Nurses Association of Southeastern Connecticut. When counting non-L+M employees, altogether AFT Connecticut (State Federation) represents over 5,000 members who live in L+M's Primary and Secondary Service Areas.⁸ . Based on AFT Connecticut's large concentration of members and their families in L+M services areas, the organization's interests are directly affected by the acquisition proposal, both as workers and as patients.

AFT Connecticut was previously granted intervenor status by OHCA in a 2004 CON hearing (04-30348-CON) involving the Hospital's desire to close the Hospital's OB/GYN clinic. AFT Connecticut will offer testimony on the efficiency of current L+M operations, the impact of aggressive expansion on core missions, and expert testimony on trends in consolidation, cost, prices, access and governance.

CONNECTICUT CITIZEN ACTION GROUP

Connecticut Citizen Action Group is a statewide membership organization dedicated to involving the residents of Connecticut in bringing about a fair and equitable society. For over 40 years, CCAG has been at the forefront of advocating for a high quality, affordable and fully accessible health care system for all Connecticut residents. CCAG has worked effectively to advance health care policies that strengthen consumer access to fair, affordable health care services, coverage and benefits. CCAG's health care reform work includes monitoring hospital consolidation and regulation, expanding and protecting Medicaid coverage and benefits, and strengthening the ACA law.

CCAG has 500 members who live within the L+M catchment region, and will be directly impacted by potential increased costs, loss of local access, and changes in community programming directed toward health and well-being. Our members include a broad, diverse cross-section of the community including health care providers, child care providers, municipal workers, senior citizens, and educators. In addition to presenting testimony on the need for controlling cost and sustaining local community access to health care services, we will offer testimony on previous attempts to impose public accountability conditions on hospital acquisitions, and the need to impose strong community oversight, monitoring and accountability measures on this acquisition to ensure that the terms adequately and appropriately meet community health care needs and priorities, and that any such terms or conditions are actually carried out.

UNITE HERE CONNECTICUT

UNITE HERE Connecticut is a labor organization representing more than 7,000 employees in Connecticut, including 250 in the primary and secondary service areas of L+M Hospital. We bargain health benefits for all of our members in the state, and have a powerful interest in preserving access to affordable, high quality health care. UNITE HERE members cook and serve food in corporate, university and K-12 cafeterias. These are low-wage, seasonal, often part-time jobs. For them, comprehensive, affordable health insurance coverage is essential to achieving any hope of a middle class life. UNITE HERE members at Electric Boat in New London are engaged in bargaining for health benefits. Members currently pay 20% of the cost, which is unaffordable for workers who make \$12 per hour. If regional costs continue to escalate, workers will be forced to drop coverage, or be forced to choose between rent and health care. The price structure of the Greater New London market is vital to our members' future well-being.

UNITE HERE's Taft-Hartley fund, jointly administered by the union and management, has established a national health plan tailored specifically for food service workers. In Connecticut, nearly 1,000 members have enrolled in the past several years. In some cases, the savings compared to commercial plans have been large enough to maintain comprehensive coverage and actually reduce the cost to individual members. But the efficiency of this plan will not ultimately protect members if the state's largest hospital is permitted to grow unchecked.

UNITE HERE will offer evidence of the immediate impact of any pricing changes at L+M on service sector workers struggling at the margins of the health care system. UNITE HERE will also offer testimony based on experience establishing a specially designed Taft-Hartley health plan for food service workers in Connecticut, as market consolidation continues to drive prices up.

NATIONAL PHYSICIANS ALLIANCE IN CONNECTICUT (NPA-CT)

The National Physicians Alliance in Connecticut (NPA-CT) is part of a national 501(c)3 organization, the National Physicians Alliance (NPA), that creates research and education programs that promote health and foster active engagement of physicians with their communities to achieve high quality, affordable health care for all. The NPA offers a home to physicians across medical specialties who share a commitment to professional integrity and health justice. NPA-CT physicians are members of the staff of the parties involved in the affiliation and primary care physicians in the communities served by the two entities. As such, they have a key interest in assuring that their patients and communities have access to affordable, high-quality hospital care.

NPA will provide evidence that the purported clinical goals of the takeover – tight coordination of care and ease of communication and close cooperation among providers – can be achieved without the potential loss of local control and threat of monopoly economic power inherent in a takeover.

CONNECTICUT HEALTH POLICY PROJECT

Since 1999 as a nonprofit consumer advocacy organization, the CT Health Policy Project has labored to expand access to high quality, affordable health care for all Connecticut residents, with a particular focus on ensuring access for people in low-income communities of color. The proposed acquisition of Lawrence and Memorial Hospital/Health System by Yale-New Haven Hospital/Health System will undermine every part of our mission.

Executive Director Ellen Andrews, who sits on the Governor's Health Care Cabinet, will provide expert testimony regarding the impact of mergers and acquisitions on low-income consumers and the state Medicaid program.

UNITED ACTION CONNECTICUT

United Action Connecticut is an interfaith, multiracial, multilingual organization of congregations and community organizations crossing political, economic, urban and suburban boundaries. UACT is dedicated to building powerful, broad based community organizations. UACT brings congregations together to help them grow and thrive, develop leaders and move into action on concrete issues of social equity and justice. UACT has been working actively toward health care reform for nearly a decade. UACT's New London area congregations include L+M physicians, caregivers and patients, whose interests in preserving community access to high quality affordable health care are directly affected by the applications.

UACT will offer evidence on the local need for access and associated social services that will allow all Greater New London residents to obtain the care they need in their immediate community. The evidence will focus specifically on challenges facing vulnerable populations, including seniors.

NEW ENGLAND HEALTH CARE EMPLOYEES UNION, DISTRICT 1199, SEIU

District 1199 represents approximately 25,000 health care workers in the state of Connecticut, including state employees, hospital employees, nursing home employees, direct care and professional workers at private Mental Health and Developmental Disability agencies and FQHCs, and home care workers providing personal care and support services to Medicaid recipients. Of those, more than 1,000 health care workers live in Lawrence and Memorial's Primary and Secondary Service Areas.

At this time, District 1199 is also negotiating first Collective Bargaining Agreements for more than 300 low-wage nursing home employees of two skilled nursing facilities in New London (Crossings East and Crossings West), and one in Mystic, CT (Pendleton Health and Rehabilitation Center). Wages for these workers start at just \$10.35 per hour and more than 40% are scheduled for fewer than 32 hours per week. The cost of providing health benefits to these workers is a key issue in difficult ongoing contract negotiations. Current premiums for these workers are so expensive that many elect not to take insurance coverage at all or take the least expensive plan in terms of premiums, resulting in high out-of-pocket and co-pay expenses.

Based on 1199's significant membership in L&M's service areas and the need to negotiate affordable insurance for low-wage workers within the service areas, 1199's interests are directly affected by potential price increases or service cuts that typically accompany mergers. Cost, access and the maintenance of quality healthcare services are of vital importance to the organization and to the communities in which 1199 members reside and receive acute care health services.

In sum, the undersigned organizations' interests are directly affected by the proposed Certificates of Need. Collectively, they bring vast experience and expertise to inform OHCA's decision, and each will provide evidence from a different perspective. Respectfully, we request full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Very truly yours,

AFT Connecticut

REFERENCE: Certificate of Need Application, Docket # 15-32032, *Northeast Medical Group (NMG) and L&M Physician Association: Transfer of Ownership of a Group Practice by merger of L&MPA and into NMG*, and;

Certificate of Need Application, Docket # 15-32033, *Yale-New Haven Health Services Corporation ("YNHHC") and Lawrence + Memorial Corporation: ("L+M"), Acquisition of L+M by YNHHC*

Dear Ms. Martone and Mr. Hansted:

The undersigned organizations seek intervenor status in the two above-referenced dockets as a coalition of faith-based organizations, physicians, labor organizations and health policy leaders. The interests of each organization are directly affected by the acquisition of Lawrence and Memorial Health by Yale-New Haven Health Services Corporation, as described below. Accordingly we seek full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Collectively, we represent in various ways more than 8,000 residents of L+M Hospital's primary and secondary service areas, and more than 75,000 residents statewide whose interests are affected by the ongoing consolidation of the state's health care system.

We support Governor Malloy's Executive Order 51, and urge OHCA not to render any decision on these applications until January 2017 or until the Governor's Task Force has reviewed the state's Certificate of Need laws, and made recommendations. If statutory deadlines force OHCA to decide the case, OHCA must follow the letter of Executive Order 51 and deny the application. Please note that among the intervenors are two members of the Task Force.

Even if the application does not ripen for decision until next year, as currently written it must be rejected. The deal fails to protect patients from escalating costs or to ensure local access to the fullest possible range of services. The application does not describe an adequate investment in community health needs, given that the community will lose any measure of control to a multi-billion dollar system from out of town. Any transaction in the future must provide for adequate oversight and accountability to the local community. In our submissions to the Commission as Intervenors we will also demonstrate that in attempting to address these issues, applicants have submitted inaccurate, misleading or incomplete information.

Cost and Price:

- OHCA requested comparative risk-adjusted prices for L+M Hospital and the three Yale-New Haven system hospitals: Bridgeport, Greenwich, and Yale-New Haven. YNHHS claims that such data do not exist, and that if the data did exist, they would not submit them.¹ In fact, adjusted prices for the most common diagnoses at L+M are consistently lower than other Yale-New Haven system hospitals. YNHHS has also refused to supply actual data on prices before and after their takeovers of the Hospital of St. Raphael, Greenwich Hospital and Bridgeport Hospital.
- Without relevant data, OHCA cannot evaluate the transaction. The deal will leave Yale-New Haven with nearly 60% market share from New York to Rhode Island, and more than 80% in L+M's primary service area.² Consolidation in such markets most often leads to price increases of 20% or more.³
- Through an analysis of billions of claims, provider pricing has been proven the most influential factor in regional private sector health care costs, and market power is the most potent price driver.⁴ YNHHS's description of negotiating prices separately for each hospital is irrelevant. The available evidence shows that separate price negotiations do not blunt the power of monopoly pricing.⁵
- Applicants' refusal to respond to OHCA's data request alone is grounds for rejection. Employee premium and point of service cost-sharing are exploding, putting needed services out of reach of many people with insurance, and threatening the coverage expansion under the Affordable Care Act. New London County's median family income lags the state average, and in the city of New London median family income is less than 60% of the state average. We will offer firsthand evidence of the pressure that systemic costs in the New London area are putting on patients, and describe the challenge of attempting to create a tailored health plan for low-wage service workers as Connecticut's provider systems consolidate.
- With out of pocket costs skyrocketing, Yale-New Haven's record of abusive debt collection practices creates deep concerns about the future of vulnerable populations in the wake of the acquisition. YNHHS's aggressive use of liens, foreclosures, wage garnishment and bank executions in past years forced changes in the state's medical debt collection laws, and resulted in settlements worth tens of millions of dollars. L+M patients cannot risk a repeat in Southeastern Connecticut.

Community Access and Well-being:

When Hartford HealthCare bought Windham Hospital five years ago, it stated that "currently they will not be terminating any services," although Hartford left itself wiggle room to reduce "duplicative services" in the future. But the CON went on to state that one of the benefits of the deal to Windham would be to "increase the services and technology offered locally," and to "decrease the out-migration of patients."⁶ Now with the ICU and CCU closed, patients are traveling long distances by ambulance, private car or even helicopter for urgently needed care that used to be available at Windham. Our coalition has broad experience treating patients and working to ensure the transportation, community

outreach, and follow up services that a community needs are in place. We cannot afford another Windham.

- Applicants told media outlets they will invest \$300 million in our community's health. But YNHHS requires that all investment generate a "positive return on investment" (i.e. profit), and most of the \$300 million will only come if L+M and other system hospitals hit profit targets.⁷ We will present testimony from physician and community leaders who will identify and analyze the community's health needs, and demonstrate the fundamental inadequacy of the proposed "investment."
- A true investment in our community would preserve existing services, expand services in areas of critical need, especially the provision and coordination of mental and behavioral health services and expanded community outreach to underserved populations. L+M management has wasted millions of dollars on acquisitions and punitive labor relations, rather than focusing on community health needs. L+M's community health needs assessment is underway. That process is far more robust today than three years ago. While encouraging, there is no real commitment to making major investments to address the needs identified in the process.
- Applicants have offered no compelling rationale for the merger achieving quality improvement. The electronic medical record EPIC has already been installed, and tight clinical coordination and clear clinical communication are being achieved without the negative consequences of a takeover.

Workforce:

- L+M is New London's 2nd largest private sector employer. Going forward, L+M must ensure that its workforce represents the community at large, protect job quality by respecting collective bargaining agreements and using hiring best practices.

Community Accountability and Monitoring:

- Given YNHHS's troubling record on collections, stonewalling on production of price data, and distorted claims about "investment," in the event of any transaction, L+M Hospital and the acquiring health system must negotiate with a representative cross-section of the community a written Community Benefits Agreement with binding commitments enforced by an independent monitor on the issues of access, affordability, community benefits, efficiencies and jobs;
- L+M Hospital must remain under the control of a locally controlled Board of Directors with decision making authority and accountability to the community. Despite public protestations to the contrary, under the applications as proposed, YNHHS will have ultimate authority over all meaningful decisions at L+M, including nominating members of the "local" boards.
- Rather than seek an unneeded merger, L+M Hospital must develop, finance and implement a Community Health Needs Assessment (CHNA), independent of its affiliated partner and will devote sufficient resources to address the health priorities identified in the needs assessment;
- The CHNA will be conducted every three years, and will include on-going accountability structures including independent monitoring for measuring implementation progress and effectiveness.

The Intervenors: Interests and Evidence

Collectively, the coalition includes thousands of L+M patients, local clergy, patient advocates, physicians, nurses and other caregivers, and leaders responsible for the purchase of health plans.

In addition to the specific interests of the various organizations, the coalition also brings a broad range of health care expertise to the proceedings. The coalition includes:

- Professors at Brown University and Columbia University Medical schools;
- Key statewide health care leaders:
 - Members of the Governor's Health Care Cabinet
 - Members of the Governor's Certificate of Need Review Task Force, and;
 - Members of the steering committee of L+M's current Community Needs Assessment process.

The coalition will present first-hand evidence from the entire range of the organizations' experiences in the Southeastern Connecticut health care system. In addition, the coalition will present expert analysis of the proposed acquisitions, including: data on Connecticut hospital market concentration; comparative price data; an exhaustive review of the rapidly growing literature on the impact of consolidation on cost, access, "efficiency" and quality, and; a breakdown of the Applicants' financial statements to shed light on claims of financial hardship.

AFT CONNECTICUT including Locals 5049, 5051, 5123 and 5119

AFT Connecticut is a statewide federation of the local unions of the American Federation of Teachers. Our locals have more than 1,800 members who work for Lawrence and Memorial Hospital and its affiliates. They all live in L+M's primary or secondary service area. They account for more than 50% of the total workforce at L+M, including the Visiting Nurses Association of Southeastern Connecticut. When counting non-L+M employees, altogether AFT Connecticut (State Federation) represents over 5,000 members who live in L+M's Primary and Secondary Service Areas.⁸ . Based on AFT Connecticut's large concentration of members and their families in L+M services areas, the organization's interests are directly affected by the acquisition proposal, both as workers and as patients.

AFT Connecticut was previously granted intervenor status by OHCA in a 2004 CON hearing (04-30348-CON) involving the Hospital's desire to close the Hospital's OB/GYN clinic. AFT Connecticut will offer testimony on the efficiency of current L+M operations, the impact of aggressive expansion on core missions, and expert testimony on trends in consolidation, cost, prices, access and governance.

CONNECTICUT CITIZEN ACTION GROUP

Connecticut Citizen Action Group is a statewide membership organization dedicated to involving the residents of Connecticut in bringing about a fair and equitable society. For over 40 years, CCAG has been at the forefront of advocating for a high quality, affordable and fully accessible health care system for all Connecticut residents. CCAG has worked effectively to advance health care policies that strengthen consumer access to fair, affordable health care services, coverage and benefits. CCAG's health care reform work includes monitoring hospital consolidation and regulation, expanding and protecting Medicaid coverage and benefits, and strengthening the ACA law.

CCAG has 500 members who live within the L+M catchment region, and will be directly impacted by potential increased costs, loss of local access, and changes in community programming directed toward health and well-being. Our members include a broad, diverse cross-section of the community including health care providers, child care providers, municipal workers, senior citizens, and educators. In addition to presenting testimony on the need for controlling cost and sustaining local community access to health care services, we will offer testimony on previous attempts to impose public accountability conditions on hospital acquisitions, and the need to impose strong community oversight, monitoring and accountability measures on this acquisition to ensure that the terms adequately and appropriately meet community health care needs and priorities, and that any such terms or conditions are actually carried out.

UNITE HERE CONNECTICUT

UNITE HERE Connecticut is a labor organization representing more than 7,000 employees in Connecticut, including 250 in the primary and secondary service areas of L+M Hospital. We bargain health benefits for all of our members in the state, and have a powerful interest in preserving access to affordable, high quality health care. UNITE HERE members cook and serve food in corporate, university and K-12 cafeterias. These are low-wage, seasonal, often part-time jobs. For them, comprehensive, affordable health insurance coverage is essential to achieving any hope of a middle class life. UNITE HERE members at Electric Boat in New London are engaged in bargaining for health benefits. Members currently pay 20% of the cost, which is unaffordable for workers who make \$12 per hour. If regional costs continue to escalate, workers will be forced to drop coverage, or be forced to choose between rent and health care. The price structure of the Greater New London market is vital to our members' future well-being.

UNITE HERE's Taft-Hartley fund, jointly administered by the union and management, has established a national health plan tailored specifically for food service workers. In Connecticut, nearly 1,000 members have enrolled in the past several years. In some cases, the savings compared to commercial plans have been large enough to maintain comprehensive coverage and actually reduce the cost to individual members. But the efficiency of this plan will not ultimately protect members if the state's largest hospital is permitted to grow unchecked.

UNITE HERE will offer evidence of the immediate impact of any pricing changes at L+M on service sector workers struggling at the margins of the health care system. UNITE HERE will also offer testimony based on experience establishing a specially designed Taft-Hartley health plan for food service workers in Connecticut, as market consolidation continues to drive prices up.

NATIONAL PHYSICIANS ALLIANCE IN CONNECTICUT (NPA-CT)

The National Physicians Alliance in Connecticut (NPA-CT) is part of a national 501(c)3 organization, the National Physicians Alliance (NPA), that creates research and education programs that promote health and foster active engagement of physicians with their communities to achieve high quality, affordable health care for all. The NPA offers a home to physicians across medical specialties who share a commitment to professional integrity and health justice. NPA-CT physicians are members of the staff of the parties involved in the affiliation and primary care physicians in the communities served by the two entities. As such, they have a key interest in assuring that their patients and communities have access to affordable, high-quality hospital care.

NPA will provide evidence that the purported clinical goals of the takeover – tight coordination of care and ease of communication and close cooperation among providers – can be achieved without the potential loss of local control and threat of monopoly economic power inherent in a takeover.

CONNECTICUT HEALTH POLICY PROJECT

Since 1999 as a nonprofit consumer advocacy organization, the CT Health Policy Project has labored to expand access to high quality, affordable health care for all Connecticut residents, with a particular focus on ensuring access for people in low-income communities of color. The proposed acquisition of Lawrence and Memorial Hospital/Health System by Yale-New Haven Hospital/Health System will undermine every part of our mission.

Executive Director Ellen Andrews, who sits on the Governor's Health Care Cabinet, will provide expert testimony regarding the impact of mergers and acquisitions on low-income consumers and the state Medicaid program.

UNITED ACTION CONNECTICUT

United Action Connecticut is an interfaith, multiracial, multilingual organization of congregations and community organizations crossing political, economic, urban and suburban boundaries. UACT is dedicated to building powerful, broad based community organizations. UACT brings congregations together to help them grow and thrive, develop leaders and move into action on concrete issues of social equity and justice. UACT has been working actively toward health care reform for nearly a decade. UACT's New London area congregations include L+M physicians, caregivers and patients, whose interests in preserving community access to high quality affordable health care are directly affected by the applications.

UACT will offer evidence on the local need for access and associated social services that will allow all Greater New London residents to obtain the care they need in their immediate community. The evidence will focus specifically on challenges facing vulnerable populations, including seniors.

NEW ENGLAND HEALTH CARE EMPLOYEES UNION, DISTRICT 1199, SEIU

District 1199 represents approximately 25,000 health care workers in the state of Connecticut, including state employees, hospital employees, nursing home employees, direct care and professional workers at private Mental Health and Developmental Disability agencies and FQHCs, and home care workers providing personal care and support services to Medicaid recipients. Of those, more than 1,000 health care workers live in Lawrence and Memorial's Primary and Secondary Service Areas.

At this time, District 1199 is also negotiating first Collective Bargaining Agreements for more than 300 low-wage nursing home employees of two skilled nursing facilities in New London (Crossings East and Crossings West), and one in Mystic, CT (Pendleton Health and Rehabilitation Center). Wages for these workers start at just \$10.35 per hour and more than 40% are scheduled for fewer than 32 hours per week. The cost of providing health benefits to these workers is a key issue in difficult ongoing contract negotiations. Current premiums for these workers are so expensive that many elect not to take insurance coverage at all or take the least expensive plan in terms of premiums, resulting in high out-of-pocket and co-pay expenses.

Based on 1199's significant membership in L&M's service areas and the need to negotiate affordable insurance for low-wage workers within the service areas, 1199's interests are directly affected by potential price increases or service cuts that typically accompany mergers. Cost, access and the maintenance of quality healthcare services are of vital importance to the organization and to the communities in which 1199 members reside and receive acute care health services.

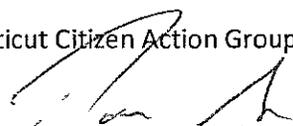

In sum, the undersigned organizations' interests are directly affected by the proposed Certificates of Need. Collectively, they bring vast experience and expertise to inform OHCA's decision, and each will provide evidence from a different perspective. Respectfully, we request full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Very truly yours,

AFT Connecticut

Certificate of Need Application, Docket # 15-32033, *Yale-New Haven Health Services Corporation ("YNHHSC") and Lawrence + Memorial Corporation: ("L+M"), Acquisition of L+M by YNHHC*

Dear Ms. Martone and Mr. Hansted:

The undersigned organizations seek intervenor status in the two above-referenced dockets as a coalition of faith-based organizations, physicians, labor organizations and health policy leaders. The interests of each organization are directly affected by the acquisition of Lawrence and Memorial Health by Yale-New Haven Health Services Corporation, as described below. Accordingly we seek full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Collectively, we represent in various ways more than 8,000 residents of L+M Hospital's primary and secondary service areas, and more than 75,000 residents statewide whose interests are affected by the ongoing consolidation of the state's health care system.

We support Governor Malloy's Executive Order 51, and urge OHCA not to render any decision on these applications until January 2017 or until the Governor's Task Force has reviewed the state's Certificate of Need laws, and made recommendations. If statutory deadlines force OHCA to decide the case, OHCA must follow the letter of Executive Order 51 and deny the application. Please note that among the intervenors are two members of the Task Force.

Even if the application does not ripen for decision until next year, as currently written it must be rejected. The deal fails to protect patients from escalating costs or to ensure local access to the fullest possible range of services. The application does not describe an adequate investment in community health needs, given that the community will lose any measure of control to a multi-billion dollar system from out of town. Any transaction in the future must provide for adequate oversight and accountability to the local community. In our submissions to the Commission as Intervenors we will also demonstrate that in attempting to address these issues, applicants have submitted inaccurate, misleading or incomplete information.

Cost and Price:

- OHCA requested comparative risk-adjusted prices for L+M Hospital and the three Yale-New Haven system hospitals: Bridgeport, Greenwich, and Yale-New Haven. YNHHS claims that such data do not exist, and that if the data did exist, they would not submit them.¹ In fact, adjusted prices for the most common diagnoses at L+M are consistently lower than other Yale-New Haven system hospitals. YNHHS has also refused to supply actual data on prices before and after their takeovers of the Hospital of St. Raphael, Greenwich Hospital and Bridgeport Hospital.
- Without relevant data, OHCA cannot evaluate the transaction. The deal will leave Yale-New Haven with nearly 60% market share from New York to Rhode Island, and more than 80% in L+M's primary service area.² Consolidation in such markets most often leads to price increases of 20% or more.³
- Through an analysis of billions of claims, provider pricing has been proven the most influential factor in regional private sector health care costs, and market power is the most potent price driver.⁴ YNHHS's description of negotiating prices separately for each hospital is irrelevant. The available evidence shows that separate price negotiations do not blunt the power of monopoly pricing.⁵
- Applicants' refusal to respond to OHCA's data request alone is grounds for rejection. Employee premium and point of service cost-sharing are exploding, putting needed services out of reach of many people with insurance, and threatening the coverage expansion under the Affordable Care Act. New London County's median family income lags the state average, and in the city of New London median family income is less than 60% of the state average. We will offer firsthand evidence of the pressure that systemic costs in the New London area are putting on patients, and describe the challenge of attempting to create a tailored health plan for low-wage service workers as Connecticut's provider systems consolidate.
- With out of pocket costs skyrocketing, Yale-New Haven's record of abusive debt collection practices creates deep concerns about the future of vulnerable populations in the wake of the acquisition. YNHHS's aggressive use of liens, foreclosures, wage garnishment and bank executions in past years forced changes in the state's medical debt collection laws, and resulted in settlements worth tens of millions of dollars. L+M patients cannot risk a repeat in Southeastern Connecticut.

Community Access and Well-being:

When Hartford HealthCare bought Windham Hospital five years ago, it stated that "currently they will not be terminating any services," although Hartford left itself wiggle room to reduce "duplicative services" in the future. But the CON went on to state that one of the benefits of the deal to Windham would be to "increase the services and technology offered locally," and to "decrease the out-migration of patients."⁶ Now with the ICU and CCU closed, patients are traveling long distances by ambulance, private car or even helicopter for urgently needed care that used to be available at Windham. Our coalition has broad experience treating patients and working to ensure the transportation, community

outreach, and follow up services that a community needs are in place. We cannot afford another Windham.

- Applicants told media outlets they will invest \$300 million in our community's health. But YNHHS requires that all investment generate a "positive return on investment" (i.e. profit), and most of the \$300 million will only come if L+M and other system hospitals hit profit targets.⁷ We will present testimony from physician and community leaders who will identify and analyze the community's health needs, and demonstrate the fundamental inadequacy of the proposed "investment."
- A true investment in our community would preserve existing services, expand services in areas of critical need, especially the provision and coordination of mental and behavioral health services and expanded community outreach to underserved populations. L+M management has wasted millions of dollars on acquisitions and punitive labor relations, rather than focusing on community health needs. L+M's community health needs assessment is underway. That process is far more robust today than three years ago. While encouraging, there is no real commitment to making major investments to address the needs identified in the process.
- Applicants have offered no compelling rationale for the merger achieving quality improvement. The electronic medical record EPIC has already been installed, and tight clinical coordination and clear clinical communication are being achieved without the negative consequences of a takeover.

Workforce:

- L+M is New London's 2nd largest private sector employer. Going forward, L+M must ensure that its workforce represents the community at large, protect job quality by respecting collective bargaining agreements and using hiring best practices.

Community Accountability and Monitoring:

- Given YNHHS's troubling record on collections, stonewalling on production of price data, and distorted claims about "investment," in the event of any transaction, L+M Hospital and the acquiring health system must negotiate with a representative cross-section of the community a written Community Benefits Agreement with binding commitments enforced by an independent monitor on the issues of access, affordability, community benefits, efficiencies and jobs;
- L+M Hospital must remain under the control of a locally controlled Board of Directors with decision making authority and accountability to the community. Despite public protestations to the contrary, under the applications as proposed, YNHHS will have ultimate authority over all meaningful decisions at L+M, including nominating members of the "local" boards.
- Rather than seek an unneeded merger, L+M Hospital must develop, finance and implement a Community Health Needs Assessment (CHNA), independent of its affiliated partner and will devote sufficient resources to address the health priorities identified in the needs assessment;
- The CHNA will be conducted every three years, and will include on-going accountability structures including independent monitoring for measuring implementation progress and effectiveness.

The Intervenors: Interests and Evidence

Collectively, the coalition includes thousands of L+M patients, local clergy, patient advocates, physicians, nurses and other caregivers, and leaders responsible for the purchase of health plans.

In addition to the specific interests of the various organizations, the coalition also brings a broad range of health care expertise to the proceedings. The coalition includes:

- Professors at Brown University and Columbia University Medical schools;
- Key statewide health care leaders:
 - Members of the Governor's Health Care Cabinet
 - Members of the Governor's Certificate of Need Review Task Force, and;
 - Members of the steering committee of L+M's current Community Needs Assessment process.

The coalition will present first-hand evidence from the entire range of the organizations' experiences in the Southeastern Connecticut health care system. In addition, the coalition will present expert analysis of the proposed acquisitions, including: data on Connecticut hospital market concentration; comparative price data; an exhaustive review of the rapidly growing literature on the impact of consolidation on cost, access, "efficiency" and quality, and; a breakdown of the Applicants' financial statements to shed light on claims of financial hardship.

AFT CONNECTICUT including Locals 5049, 5051, 5123 and 5119

AFT Connecticut is a statewide federation of the local unions of the American Federation of Teachers. Our locals have more than 1,800 members who work for Lawrence and Memorial Hospital and its affiliates. They all live in L+M's primary or secondary service area. They account for more than 50% of the total workforce at L+M, including the Visiting Nurses Association of Southeastern Connecticut. When counting non-L+M employees, altogether AFT Connecticut (State Federation) represents over 5,000 members who live in L+M's Primary and Secondary Service Areas.⁸ . Based on AFT Connecticut's large concentration of members and their families in L+M services areas, the organization's interests are directly affected by the acquisition proposal, both as workers and as patients.

AFT Connecticut was previously granted intervenor status by OHCA in a 2004 CON hearing (04-30348-CON) involving the Hospital's desire to close the Hospital's OB/GYN clinic. AFT Connecticut will offer testimony on the efficiency of current L+M operations, the impact of aggressive expansion on core missions, and expert testimony on trends in consolidation, cost, prices, access and governance.

CONNECTICUT CITIZEN ACTION GROUP

Connecticut Citizen Action Group is a statewide membership organization dedicated to involving the residents of Connecticut in bringing about a fair and equitable society. For over 40 years, CCAG has been at the forefront of advocating for a high quality, affordable and fully accessible health care system for all Connecticut residents. CCAG has worked effectively to advance health care policies that strengthen consumer access to fair, affordable health care services, coverage and benefits. CCAG's health care reform work includes monitoring hospital consolidation and regulation, expanding and protecting Medicaid coverage and benefits, and strengthening the ACA law.

CCAG has 500 members who live within the L+M catchment region, and will be directly impacted by potential increased costs, loss of local access, and changes in community programming directed toward health and well-being. Our members include a broad, diverse cross-section of the community including health care providers, child care providers, municipal workers, senior citizens, and educators. In addition to presenting testimony on the need for controlling cost and sustaining local community access to health care services, we will offer testimony on previous attempts to impose public accountability conditions on hospital acquisitions, and the need to impose strong community oversight, monitoring and accountability measures on this acquisition to ensure that the terms adequately and appropriately meet community health care needs and priorities, and that any such terms or conditions are actually carried out.

UNITE HERE CONNECTICUT

UNITE HERE Connecticut is a labor organization representing more than 7,000 employees in Connecticut, including 250 in the primary and secondary service areas of L+M Hospital. We bargain health benefits for all of our members in the state, and have a powerful interest in preserving access to affordable, high quality health care. UNITE HERE members cook and serve food in corporate, university and K-12 cafeterias. These are low-wage, seasonal, often part-time jobs. For them, comprehensive, affordable health insurance coverage is essential to achieving any hope of a middle class life. UNITE HERE members at Electric Boat in New London are engaged in bargaining for health benefits. Members currently pay 20% of the cost, which is unaffordable for workers who make \$12 per hour. If regional costs continue to escalate, workers will be forced to drop coverage, or be forced to choose between rent and health care. The price structure of the Greater New London market is vital to our members' future well-being.

UNITE HERE's Taft-Hartley fund, jointly administered by the union and management, has established a national health plan tailored specifically for food service workers. In Connecticut, nearly 1,000 members have enrolled in the past several years. In some cases, the savings compared to commercial plans have been large enough to maintain comprehensive coverage and actually reduce the cost to individual members. But the efficiency of this plan will not ultimately protect members if the state's largest hospital is permitted to grow unchecked.

UNITE HERE will offer evidence of the immediate impact of any pricing changes at L+M on service sector workers struggling at the margins of the health care system. UNITE HERE will also offer testimony based on experience establishing a specially designed Taft-Hartley health plan for food service workers in Connecticut, as market consolidation continues to drive prices up.

NATIONAL PHYSICIANS ALLIANCE IN CONNECTICUT (NPA-CT)

The National Physicians Alliance in Connecticut (NPA-CT) is part of a national 501(c)3 organization, the National Physicians Alliance (NPA), that creates research and education programs that promote health and foster active engagement of physicians with their communities to achieve high quality, affordable health care for all. The NPA offers a home to physicians across medical specialties who share a commitment to professional integrity and health justice. NPA-CT physicians are members of the staff of the parties involved in the affiliation and primary care physicians in the communities served by the two entities. As such, they have a key interest in assuring that their patients and communities have access to affordable, high-quality hospital care.

NPA will provide evidence that the purported clinical goals of the takeover – tight coordination of care and ease of communication and close cooperation among providers – can be achieved without the potential loss of local control and threat of monopoly economic power inherent in a takeover.

CONNECTICUT HEALTH POLICY PROJECT

Since 1999 as a nonprofit consumer advocacy organization, the CT Health Policy Project has labored to expand access to high quality, affordable health care for all Connecticut residents, with a particular focus on ensuring access for people in low-income communities of color. The proposed acquisition of Lawrence and Memorial Hospital/Health System by Yale-New Haven Hospital/Health System will undermine every part of our mission.

Executive Director Ellen Andrews, who sits on the Governor’s Health Care Cabinet, will provide expert testimony regarding the impact of mergers and acquisitions on low-income consumers and the state Medicaid program.

UNITED ACTION CONNECTICUT

United Action Connecticut is an interfaith, multiracial, multilingual organization of congregations and community organizations crossing political, economic, urban and suburban boundaries. UACT is dedicated to building powerful, broad based community organizations. UACT brings congregations together to help them grow and thrive, develop leaders and move into action on concrete issues of social equity and justice. UACT has been working actively toward health care reform for nearly a decade. UACT’s New London area congregations include L+M physicians, caregivers and patients, whose interests in preserving community access to high quality affordable health care are directly affected by the applications.

UACT will offer evidence on the local need for access and associated social services that will allow all Greater New London residents to obtain the care they need in their immediate community. The evidence will focus specifically on challenges facing vulnerable populations, including seniors.

NEW ENGLAND HEALTH CARE EMPLOYEES UNION, DISTRICT 1199, SEIU

District 1199 represents approximately 25,000 health care workers in the state of Connecticut, including state employees, hospital employees, nursing home employees, direct care and professional workers at private Mental Health and Developmental Disability agencies and FQHCs, and home care workers providing personal care and support services to Medicaid recipients. Of those, more than 1,000 health care workers live in Lawrence and Memorial’s Primary and Secondary Service Areas.

At this time, District 1199 is also negotiating first Collective Bargaining Agreements for more than 300 low-wage nursing home employees of two skilled nursing facilities in New London (Crossings East and Crossings West), and one in Mystic, CT (Pendleton Health and Rehabilitation Center). Wages for these workers start at just \$10.35 per hour and more than 40% are scheduled for fewer than 32 hours per week. The cost of providing health benefits to these workers is a key issue in difficult ongoing contract negotiations. Current premiums for these workers are so expensive that many elect not to take insurance coverage at all or take the least expensive plan in terms of premiums, resulting in high out-of-pocket and co-pay expenses.

Based on 1199's significant membership in L&M's service areas and the need to negotiate affordable insurance for low-wage workers within the service areas, 1199's interests are directly affected by potential price increases or service cuts that typically accompany mergers. Cost, access and the maintenance of quality healthcare services are of vital importance to the organization and to the communities in which 1199 members reside and receive acute care health services.

In sum, the undersigned organizations' interests are directly affected by the proposed Certificates of Need. Collectively, they bring vast experience and expertise to inform OHCA's decision, and each will provide evidence from a different perspective. Respectfully, we request full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

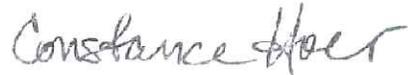

Very truly yours,

Laurie Kennington

Certificate of Need Application, Docket # 15-32033, *Yale-New Haven Health Services Corporation ("YNHHSC") and Lawrence + Memorial Corporation: ("L+M"), Acquisition of L+M by YNHHSC*

Dear Ms. Martone and Mr. Hansted:

The undersigned organizations seek intervenor status in the two above-referenced dockets as a coalition of faith-based organizations, physicians, labor organizations and health policy leaders. The interests of each organization are directly affected by the acquisition of Lawrence and Memorial Health by Yale-New Haven Health Services Corporation, as described below. Accordingly we seek full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Collectively, we represent in various ways more than 8,000 residents of L+M Hospital's primary and secondary service areas, and more than 75,000 residents statewide whose interests are affected by the ongoing consolidation of the state's health care system.

We support Governor Malloy's Executive Order 51, and urge OHCA not to render any decision on these applications until January 2017 or until the Governor's Task Force has reviewed the state's Certificate of Need laws, and made recommendations. If statutory deadlines force OHCA to decide the case, OHCA must follow the letter of Executive Order 51 and deny the application. Please note that among the intervenors are two members of the Task Force.

Even if the application does not ripen for decision until next year, as currently written it must be rejected. The deal fails to protect patients from escalating costs or to ensure local access to the fullest possible range of services. The application does not describe an adequate investment in community health needs, given that the community will lose any measure of control to a multi-billion dollar system from out of town. Any transaction in the future must provide for adequate oversight and accountability to the local community. In our submissions to the Commission as Intervenors we will also demonstrate that in attempting to address these issues, applicants have submitted inaccurate, misleading or incomplete information.

Cost and Price:

- OHCA requested comparative risk-adjusted prices for L+M Hospital and the three Yale-New Haven system hospitals: Bridgeport, Greenwich, and Yale-New Haven. YNHHS claims that such data do not exist, and that if the data did exist, they would not submit them.¹ In fact, adjusted prices for the most common diagnoses at L+M are consistently lower than other Yale-New Haven system hospitals. YNHHS has also refused to supply actual data on prices before and after their takeovers of the Hospital of St. Raphael, Greenwich Hospital and Bridgeport Hospital.
- Without relevant data, OHCA cannot evaluate the transaction. The deal will leave Yale-New Haven with nearly 60% market share from New York to Rhode Island, and more than 80% in L+M's primary service area.² Consolidation in such markets most often leads to price increases of 20% or more.³
- Through an analysis of billions of claims, provider pricing has been proven the most influential factor in regional private sector health care costs, and market power is the most potent price driver.⁴ YNHHS's description of negotiating prices separately for each hospital is irrelevant. The available evidence shows that separate price negotiations do not blunt the power of monopoly pricing.⁵
- Applicants' refusal to respond to OHCA's data request alone is grounds for rejection. Employee premium and point of service cost-sharing are exploding, putting needed services out of reach of many people with insurance, and threatening the coverage expansion under the Affordable Care Act. New London County's median family income lags the state average, and in the city of New London median family income is less than 60% of the state average. We will offer firsthand evidence of the pressure that systemic costs in the New London area are putting on patients, and describe the challenge of attempting to create a tailored health plan for low-wage service workers as Connecticut's provider systems consolidate.
- With out of pocket costs skyrocketing, Yale-New Haven's record of abusive debt collection practices creates deep concerns about the future of vulnerable populations in the wake of the acquisition. YNHHS's aggressive use of liens, foreclosures, wage garnishment and bank executions in past years forced changes in the state's medical debt collection laws, and resulted in settlements worth tens of millions of dollars. L+M patients cannot risk a repeat in Southeastern Connecticut.

Community Access and Well-being:

When Hartford HealthCare bought Windham Hospital five years ago, it stated that "currently they will not be terminating any services," although Hartford left itself wiggle room to reduce "duplicative services" in the future. But the CON went on to state that one of the benefits of the deal to Windham would be to "increase the services and technology offered locally," and to "decrease the out-migration of patients."⁶ Now with the ICU and CCU closed, patients are traveling long distances by ambulance, private car or even helicopter for urgently needed care that used to be available at Windham. Our coalition has broad experience treating patients and working to ensure the transportation, community

outreach, and follow up services that a community needs are in place. We cannot afford another Windham.

- Applicants told media outlets they will invest \$300 million in our community's health. But YNHHS requires that all investment generate a "positive return on investment" (i.e. profit), and most of the \$300 million will only come if L+M and other system hospitals hit profit targets.⁷ We will present testimony from physician and community leaders who will identify and analyze the community's health needs, and demonstrate the fundamental inadequacy of the proposed "investment."
- A true investment in our community would preserve existing services, expand services in areas of critical need, especially the provision and coordination of mental and behavioral health services and expanded community outreach to underserved populations. L+M management has wasted millions of dollars on acquisitions and punitive labor relations, rather than focusing on community health needs. L+M's community health needs assessment is underway. That process is far more robust today than three years ago. While encouraging, there is no real commitment to making major investments to address the needs identified in the process.
- Applicants have offered no compelling rationale for the merger achieving quality improvement. The electronic medical record EPIC has already been installed, and tight clinical coordination and clear clinical communication are being achieved without the negative consequences of a takeover.

Workforce:

- L+M is New London's 2nd largest private sector employer. Going forward, L+M must ensure that its workforce represents the community at large, protect job quality by respecting collective bargaining agreements and using hiring best practices.

Community Accountability and Monitoring:

- Given YNHHS's troubling record on collections, stonewalling on production of price data, and distorted claims about "investment," in the event of any transaction, L+M Hospital and the acquiring health system must negotiate with a representative cross-section of the community a written Community Benefits Agreement with binding commitments enforced by an independent monitor on the issues of access, affordability, community benefits, efficiencies and jobs;
- L+M Hospital must remain under the control of a locally controlled Board of Directors with decision making authority and accountability to the community. Despite public protestations to the contrary, under the applications as proposed, YNHHS will have ultimate authority over all meaningful decisions at L+M, including nominating members of the "local" boards.
- Rather than seek an unneeded merger, L+M Hospital must develop, finance and implement a Community Health Needs Assessment (CHNA), independent of its affiliated partner and will devote sufficient resources to address the health priorities identified in the needs assessment;
- The CHNA will be conducted every three years, and will include on-going accountability structures including independent monitoring for measuring implementation progress and effectiveness.

The Intervenors: Interests and Evidence

Collectively, the coalition includes thousands of L+M patients, local clergy, patient advocates, physicians, nurses and other caregivers, and leaders responsible for the purchase of health plans.

In addition to the specific interests of the various organizations, the coalition also brings a broad range of health care expertise to the proceedings. The coalition includes:

- Professors at Brown University and Columbia University Medical schools;
- Key statewide health care leaders:
 - Members of the Governor's Health Care Cabinet
 - Members of the Governor's Certificate of Need Review Task Force, and;
 - Members of the steering committee of L+M's current Community Needs Assessment process.

The coalition will present first-hand evidence from the entire range of the organizations' experiences in the Southeastern Connecticut health care system. In addition, the coalition will present expert analysis of the proposed acquisitions, including: data on Connecticut hospital market concentration; comparative price data; an exhaustive review of the rapidly growing literature on the impact of consolidation on cost, access, "efficiency" and quality, and; a breakdown of the Applicants' financial statements to shed light on claims of financial hardship.

AFT CONNECTICUT including Locals 5049, 5051, 5123 and 5119

AFT Connecticut is a statewide federation of the local unions of the American Federation of Teachers. Our locals have more than 1,800 members who work for Lawrence and Memorial Hospital and its affiliates. They all live in L+M's primary or secondary service area. They account for more than 50% of the total workforce at L+M, including the Visiting Nurses Association of Southeastern Connecticut. When counting non-L+M employees, altogether AFT Connecticut (State Federation) represents over 5,000 members who live in L+M's Primary and Secondary Service Areas.⁸ Based on AFT Connecticut's large concentration of members and their families in L+M services areas, the organization's interests are directly affected by the acquisition proposal, both as workers and as patients.

AFT Connecticut was previously granted intervenor status by OHCA in a 2004 CON hearing (04-30348-CON) involving the Hospital's desire to close the Hospital's OB/GYN clinic. AFT Connecticut will offer testimony on the efficiency of current L+M operations, the impact of aggressive expansion on core missions, and expert testimony on trends in consolidation, cost, prices, access and governance.

CONNECTICUT CITIZEN ACTION GROUP

Connecticut Citizen Action Group is a statewide membership organization dedicated to involving the residents of Connecticut in bringing about a fair and equitable society. For over 40 years, CCAG has been at the forefront of advocating for a high quality, affordable and fully accessible health care system for all Connecticut residents. CCAG has worked effectively to advance health care policies that strengthen consumer access to fair, affordable health care services, coverage and benefits. CCAG's health care reform work includes monitoring hospital consolidation and regulation, expanding and protecting Medicaid coverage and benefits, and strengthening the ACA law.

CCAG has 500 members who live within the L+M catchment region, and will be directly impacted by potential increased costs, loss of local access, and changes in community programming directed toward health and well-being. Our members include a broad, diverse cross-section of the community including health care providers, child care providers, municipal workers, senior citizens, and educators. In addition to presenting testimony on the need for controlling cost and sustaining local community access to health care services, we will offer testimony on previous attempts to impose public accountability conditions on hospital acquisitions, and the need to impose strong community oversight, monitoring and accountability measures on this acquisition to ensure that the terms adequately and appropriately meet community health care needs and priorities, and that any such terms or conditions are actually carried out.

UNITE HERE CONNECTICUT

UNITE HERE Connecticut is a labor organization representing more than 7,000 employees in Connecticut, including 250 in the primary and secondary service areas of L+M Hospital. We bargain health benefits for all of our members in the state, and have a powerful interest in preserving access to affordable, high quality health care. UNITE HERE members cook and serve food in corporate, university and K-12 cafeterias. These are low-wage, seasonal, often part-time jobs. For them, comprehensive, affordable health insurance coverage is essential to achieving any hope of a middle class life. UNITE HERE members at Electric Boat in New London are engaged in bargaining for health benefits. Members currently pay 20% of the cost, which is unaffordable for workers who make \$12 per hour. If regional costs continue to escalate, workers will be forced to drop coverage, or be forced to choose between rent and health care. The price structure of the Greater New London market is vital to our members' future well-being.

UNITE HERE's Taft-Hartley fund, jointly administered by the union and management, has established a national health plan tailored specifically for food service workers. In Connecticut, nearly 1,000 members have enrolled in the past several years. In some cases, the savings compared to commercial plans have been large enough to maintain comprehensive coverage and actually reduce the cost to individual members. But the efficiency of this plan will not ultimately protect members if the state's largest hospital is permitted to grow unchecked.

UNITE HERE will offer evidence of the immediate impact of any pricing changes at L+M on service sector workers struggling at the margins of the health care system. UNITE HERE will also offer testimony based on experience establishing a specially designed Taft-Hartley health plan for food service workers in Connecticut, as market consolidation continues to drive prices up.

NATIONAL PHYSICIANS ALLIANCE IN CONNECTICUT (NPA-CT)

The National Physicians Alliance in Connecticut (NPA-CT) is part of a national 501(c)3 organization, the National Physicians Alliance (NPA), that creates research and education programs that promote health and foster active engagement of physicians with their communities to achieve high quality, affordable health care for all. The NPA offers a home to physicians across medical specialties who share a commitment to professional integrity and health justice. NPA-CT physicians are members of the staff of the parties involved in the affiliation and primary care physicians in the communities served by the two entities. As such, they have a key interest in assuring that their patients and communities have access to affordable, high-quality hospital care.

NPA will provide evidence that the purported clinical goals of the takeover – tight coordination of care and ease of communication and close cooperation among providers – can be achieved without the potential loss of local control and threat of monopoly economic power inherent in a takeover.

CONNECTICUT HEALTH POLICY PROJECT

Since 1999 as a nonprofit consumer advocacy organization, the CT Health Policy Project has labored to expand access to high quality, affordable health care for all Connecticut residents, with a particular focus on ensuring access for people in low-income communities of color. The proposed acquisition of Lawrence and Memorial Hospital/Health System by Yale-New Haven Hospital/Health System will undermine every part of our mission.

Executive Director Ellen Andrews, who sits on the Governor's Health Care Cabinet, will provide expert testimony regarding the impact of mergers and acquisitions on low-income consumers and the state Medicaid program.

UNITED ACTION CONNECTICUT

United Action Connecticut is an interfaith, multiracial, multilingual organization of congregations and community organizations crossing political, economic, urban and suburban boundaries. UACT is dedicated to building powerful, broad based community organizations. UACT brings congregations together to help them grow and thrive, develop leaders and move into action on concrete issues of social equity and justice. UACT has been working actively toward health care reform for nearly a decade. UACT's New London area congregations include L+M physicians, caregivers and patients, whose interests in preserving community access to high quality affordable health care are directly affected by the applications.

UACT will offer evidence on the local need for access and associated social services that will allow all Greater New London residents to obtain the care they need in their immediate community. The evidence will focus specifically on challenges facing vulnerable populations, including seniors.

NEW ENGLAND HEALTH CARE EMPLOYEES UNION, DISTRICT 1199, SEIU

District 1199 represents approximately 25,000 health care workers in the state of Connecticut, including state employees, hospital employees, nursing home employees, direct care and professional workers at private Mental Health and Developmental Disability agencies and FQHCs, and home care workers providing personal care and support services to Medicaid recipients. Of those, more than 1,000 health care workers live in Lawrence and Memorial's Primary and Secondary Service Areas.

At this time, District 1199 is also negotiating first Collective Bargaining Agreements for more than 300 low-wage nursing home employees of two skilled nursing facilities in New London (Crossings East and Crossings West), and one in Mystic, CT (Pendleton Health and Rehabilitation Center). Wages for these workers start at just \$10.35 per hour and more than 40% are scheduled for fewer than 32 hours per week. The cost of providing health benefits to these workers is a key issue in difficult ongoing contract negotiations. Current premiums for these workers are so expensive that many elect not to take insurance coverage at all or take the least expensive plan in terms of premiums, resulting in high out-of-pocket and co-pay expenses.

Based on 1199's significant membership in L&M's service areas and the need to negotiate affordable insurance for low-wage workers within the service areas, 1199's interests are directly affected by potential price increases or service cuts that typically accompany mergers. Cost, access and the maintenance of quality healthcare services are of vital importance to the organization and to the communities in which 1199 members reside and receive acute care health services.

In sum, the undersigned organizations' interests are directly affected by the proposed Certificates of Need. Collectively, they bring vast experience and expertise to inform OHCA's decision, and each will provide evidence from a different perspective. Respectfully, we request full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Very truly yours,

AFT Connecticut

Certificate of Need Application, Docket # 15-32033, *Yale-New Haven Health Services Corporation ("YNHHSC") and Lawrence + Memorial Corporation: ("L+M"), Acquisition of L+M by YNHHSC*

Dear Ms. Martone and Mr. Hansted:

The undersigned organizations seek intervenor status in the two above-referenced dockets as a coalition of faith-based organizations, physicians, labor organizations and health policy leaders. The interests of each organization are directly affected by the acquisition of Lawrence and Memorial Health by Yale-New Haven Health Services Corporation, as described below. Accordingly we seek full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Collectively, we represent in various ways more than 8,000 residents of L+M Hospital's primary and secondary service areas, and more than 75,000 residents statewide whose interests are affected by the ongoing consolidation of the state's health care system.

We support Governor Malloy's Executive Order 51, and urge OHCA not to render any decision on these applications until January 2017 or until the Governor's Task Force has reviewed the state's Certificate of Need laws, and made recommendations. If statutory deadlines force OHCA to decide the case, OHCA must follow the letter of Executive Order 51 and deny the application. Please note that among the intervenors are two members of the Task Force.

Even if the application does not ripen for decision until next year, as currently written it must be rejected. The deal fails to protect patients from escalating costs or to ensure local access to the fullest possible range of services. The application does not describe an adequate investment in community health needs, given that the community will lose any measure of control to a multi-billion dollar system from out of town. Any transaction in the future must provide for adequate oversight and accountability to the local community. In our submissions to the Commission as Intervenors we will also demonstrate that in attempting to address these issues, applicants have submitted inaccurate, misleading or incomplete information.

Cost and Price:

- OHCA requested comparative risk-adjusted prices for L+M Hospital and the three Yale-New Haven system hospitals: Bridgeport, Greenwich, and Yale-New Haven. YNHHS claims that such data do not exist, and that if the data did exist, they would not submit them.¹ In fact, adjusted prices for the most common diagnoses at L+M are consistently lower than other Yale-New Haven system hospitals. YNHHS has also refused to supply actual data on prices before and after their takeovers of the Hospital of St. Raphael, Greenwich Hospital and Bridgeport Hospital.
- Without relevant data, OHCA cannot evaluate the transaction. The deal will leave Yale-New Haven with nearly 60% market share from New York to Rhode Island, and more than 80% in L+M's primary service area.² Consolidation in such markets most often leads to price increases of 20% or more.³
- Through an analysis of billions of claims, provider pricing has been proven the most influential factor in regional private sector health care costs, and market power is the most potent price driver.⁴ YNHHS's description of negotiating prices separately for each hospital is irrelevant. The available evidence shows that separate price negotiations do not blunt the power of monopoly pricing.⁵
- Applicants' refusal to respond to OHCA's data request alone is grounds for rejection. Employee premium and point of service cost-sharing are exploding, putting needed services out of reach of many people with insurance, and threatening the coverage expansion under the Affordable Care Act. New London County's median family income lags the state average, and in the city of New London median family income is less than 60% of the state average. We will offer firsthand evidence of the pressure that systemic costs in the New London area are putting on patients, and describe the challenge of attempting to create a tailored health plan for low-wage service workers as Connecticut's provider systems consolidate.
- With out of pocket costs skyrocketing, Yale-New Haven's record of abusive debt collection practices creates deep concerns about the future of vulnerable populations in the wake of the acquisition. YNHHS's aggressive use of liens, foreclosures, wage garnishment and bank executions in past years forced changes in the state's medical debt collection laws, and resulted in settlements worth tens of millions of dollars. L+M patients cannot risk a repeat in Southeastern Connecticut.

Community Access and Well-being:

When Hartford HealthCare bought Windham Hospital five years ago, it stated that "currently they will not be terminating any services," although Hartford left itself wiggle room to reduce "duplicative services" in the future. But the CON went on to state that one of the benefits of the deal to Windham would be to "increase the services and technology offered locally," and to "decrease the out-migration of patients."⁶ Now with the ICU and CCU closed, patients are traveling long distances by ambulance, private car or even helicopter for urgently needed care that used to be available at Windham. Our coalition has broad experience treating patients and working to ensure the transportation, community

outreach, and follow up services that a community needs are in place. We cannot afford another Windham.

- Applicants told media outlets they will invest \$300 million in our community's health. But YNHHS requires that all investment generate a "positive return on investment" (i.e. profit), and most of the \$300 million will only come if L+M and other system hospitals hit profit targets.⁷ We will present testimony from physician and community leaders who will identify and analyze the community's health needs, and demonstrate the fundamental inadequacy of the proposed "investment."
- A true investment in our community would preserve existing services, expand services in areas of critical need, especially the provision and coordination of mental and behavioral health services and expanded community outreach to underserved populations. L+M management has wasted millions of dollars on acquisitions and punitive labor relations, rather than focusing on community health needs. L+M's community health needs assessment is underway. That process is far more robust today than three years ago. While encouraging, there is no real commitment to making major investments to address the needs identified in the process.
- Applicants have offered no compelling rationale for the merger achieving quality improvement. The electronic medical record EPIC has already been installed, and tight clinical coordination and clear clinical communication are being achieved without the negative consequences of a takeover.

Workforce:

- L+M is New London's 2nd largest private sector employer. Going forward, L+M must ensure that its workforce represents the community at large, protect job quality by respecting collective bargaining agreements and using hiring best practices.

Community Accountability and Monitoring:

- Given YNHHS's troubling record on collections, stonewalling on production of price data, and distorted claims about "investment," in the event of any transaction, L+M Hospital and the acquiring health system must negotiate with a representative cross-section of the community a written Community Benefits Agreement with binding commitments enforced by an independent monitor on the issues of access, affordability, community benefits, efficiencies and jobs;
- L+M Hospital must remain under the control of a locally controlled Board of Directors with decision making authority and accountability to the community. Despite public protestations to the contrary, under the applications as proposed, YNHHS will have ultimate authority over all meaningful decisions at L+M, including nominating members of the "local" boards.
- Rather than seek an unneeded merger, L+M Hospital must develop, finance and implement a Community Health Needs Assessment (CHNA), independent of its affiliated partner and will devote sufficient resources to address the health priorities identified in the needs assessment;
- The CHNA will be conducted every three years, and will include on-going accountability structures including independent monitoring for measuring implementation progress and effectiveness.

The Intervenors: Interests and Evidence

Collectively, the coalition includes thousands of L+M patients, local clergy, patient advocates, physicians, nurses and other caregivers, and leaders responsible for the purchase of health plans.

In addition to the specific interests of the various organizations, the coalition also brings a broad range of health care expertise to the proceedings. The coalition includes:

- Professors at Brown University and Columbia University Medical schools;
- Key statewide health care leaders:
 - Members of the Governor's Health Care Cabinet
 - Members of the Governor's Certificate of Need Review Task Force, and;
 - Members of the steering committee of L+M's current Community Needs Assessment process.

The coalition will present first-hand evidence from the entire range of the organizations' experiences in the Southeastern Connecticut health care system. In addition, the coalition will present expert analysis of the proposed acquisitions, including: data on Connecticut hospital market concentration; comparative price data; an exhaustive review of the rapidly growing literature on the impact of consolidation on cost, access, "efficiency" and quality, and; a breakdown of the Applicants' financial statements to shed light on claims of financial hardship.

AFT CONNECTICUT including Locals 5049, 5051, 5123 and 5119

AFT Connecticut is a statewide federation of the local unions of the American Federation of Teachers. Our locals have more than 1,800 members who work for Lawrence and Memorial Hospital and its affiliates. They all live in L+M's primary or secondary service area. They account for more than 50% of the total workforce at L+M, including the Visiting Nurses Association of Southeastern Connecticut. When counting non-L+M employees, altogether AFT Connecticut (State Federation) represents over 5,000 members who live in L+M's Primary and Secondary Service Areas.⁸. Based on AFT Connecticut's large concentration of members and their families in L+M services areas, the organization's interests are directly affected by the acquisition proposal, both as workers and as patients.

AFT Connecticut was previously granted intervenor status by OHCA in a 2004 CON hearing (04-30348-CON) involving the Hospital's desire to close the Hospital's OB/GYN clinic. AFT Connecticut will offer testimony on the efficiency of current L+M operations, the impact of aggressive expansion on core missions, and expert testimony on trends in consolidation, cost, prices, access and governance.

CONNECTICUT CITIZEN ACTION GROUP

Connecticut Citizen Action Group is a statewide membership organization dedicated to involving the residents of Connecticut in bringing about a fair and equitable society. For over 40 years, CCAG has been at the forefront of advocating for a high quality, affordable and fully accessible health care system for all Connecticut residents. CCAG has worked effectively to advance health care policies that strengthen consumer access to fair, affordable health care services, coverage and benefits. CCAG's health care reform work includes monitoring hospital consolidation and regulation, expanding and protecting Medicaid coverage and benefits, and strengthening the ACA law.

CCAG has 500 members who live within the L+M catchment region, and will be directly impacted by potential increased costs, loss of local access, and changes in community programming directed toward health and well-being. Our members include a broad, diverse cross-section of the community including health care providers, child care providers, municipal workers, senior citizens, and educators. In addition to presenting testimony on the need for controlling cost and sustaining local community access to health care services, we will offer testimony on previous attempts to impose public accountability conditions on hospital acquisitions, and the need to impose strong community oversight, monitoring and accountability measures on this acquisition to ensure that the terms adequately and appropriately meet community health care needs and priorities, and that any such terms or conditions are actually carried out.

UNITE HERE CONNECTICUT

UNITE HERE Connecticut is a labor organization representing more than 7,000 employees in Connecticut, including 250 in the primary and secondary service areas of L+M Hospital. We bargain health benefits for all of our members in the state, and have a powerful interest in preserving access to affordable, high quality health care. UNITE HERE members cook and serve food in corporate, university and K-12 cafeterias. These are low-wage, seasonal, often part-time jobs. For them, comprehensive, affordable health insurance coverage is essential to achieving any hope of a middle class life. UNITE HERE members at Electric Boat in New London are engaged in bargaining for health benefits. Members currently pay 20% of the cost, which is unaffordable for workers who make \$12 per hour. If regional costs continue to escalate, workers will be forced to drop coverage, or be forced to choose between rent and health care. The price structure of the Greater New London market is vital to our members' future well-being.

UNITE HERE's Taft-Hartley fund, jointly administered by the union and management, has established a national health plan tailored specifically for food service workers. In Connecticut, nearly 1,000 members have enrolled in the past several years. In some cases, the savings compared to commercial plans have been large enough to maintain comprehensive coverage and actually reduce the cost to individual members. But the efficiency of this plan will not ultimately protect members if the state's largest hospital is permitted to grow unchecked.

UNITE HERE will offer evidence of the immediate impact of any pricing changes at L+M on service sector workers struggling at the margins of the health care system. UNITE HERE will also offer testimony based on experience establishing a specially designed Taft-Hartley health plan for food service workers in Connecticut, as market consolidation continues to drive prices up.

NATIONAL PHYSICIANS ALLIANCE IN CONNECTICUT (NPA-CT)

The National Physicians Alliance in Connecticut (NPA-CT) is part of a national 501(c)3 organization, the National Physicians Alliance (NPA), that creates research and education programs that promote health and foster active engagement of physicians with their communities to achieve high quality, affordable health care for all. The NPA offers a home to physicians across medical specialties who share a commitment to professional integrity and health justice. NPA-CT physicians are members of the staff of the parties involved in the affiliation and primary care physicians in the communities served by the two entities. As such, they have a key interest in assuring that their patients and communities have access to affordable, high-quality hospital care.

NPA will provide evidence that the purported clinical goals of the takeover – tight coordination of care and ease of communication and close cooperation among providers – can be achieved without the potential loss of local control and threat of monopoly economic power inherent in a takeover.

CONNECTICUT HEALTH POLICY PROJECT

Since 1999 as a nonprofit consumer advocacy organization, the CT Health Policy Project has labored to expand access to high quality, affordable health care for all Connecticut residents, with a particular focus on ensuring access for people in low-income communities of color. The proposed acquisition of Lawrence and Memorial Hospital/Health System by Yale-New Haven Hospital/Health System will undermine every part of our mission.

Executive Director Ellen Andrews, who sits on the Governor’s Health Care Cabinet, will provide expert testimony regarding the impact of mergers and acquisitions on low-income consumers and the state Medicaid program.

UNITED ACTION CONNECTICUT

United Action Connecticut is an interfaith, multiracial, multilingual organization of congregations and community organizations crossing political, economic, urban and suburban boundaries. UACT is dedicated to building powerful, broad based community organizations. UACT brings congregations together to help them grow and thrive, develop leaders and move into action on concrete issues of social equity and justice. UACT has been working actively toward health care reform for nearly a decade. UACT’s New London area congregations include L+M physicians, caregivers and patients, whose interests in preserving community access to high quality affordable health care are directly affected by the applications.

UACT will offer evidence on the local need for access and associated social services that will allow all Greater New London residents to obtain the care they need in their immediate community. The evidence will focus specifically on challenges facing vulnerable populations, including seniors.

NEW ENGLAND HEALTH CARE EMPLOYEES UNION, DISTRICT 1199, SEIU

District 1199 represents approximately 25,000 health care workers in the state of Connecticut, including state employees, hospital employees, nursing home employees, direct care and professional workers at private Mental Health and Developmental Disability agencies and FQHCs, and home care workers providing personal care and support services to Medicaid recipients. Of those, more than 1,000 health care workers live in Lawrence and Memorial’s Primary and Secondary Service Areas.

At this time, District 1199 is also negotiating first Collective Bargaining Agreements for more than 300 low-wage nursing home employees of two skilled nursing facilities in New London (Crossings East and Crossings West), and one in Mystic, CT (Pendleton Health and Rehabilitation Center). Wages for these workers start at just \$10.35 per hour and more than 40% are scheduled for fewer than 32 hours per week. The cost of providing health benefits to these workers is a key issue in difficult ongoing contract negotiations. Current premiums for these workers are so expensive that many elect not to take insurance coverage at all or take the least expensive plan in terms of premiums, resulting in high out-of-pocket and co-pay expenses.

Based on 1199's significant membership in L&M's service areas and the need to negotiate affordable insurance for low-wage workers within the service areas, 1199's interests are directly affected by potential price increases or service cuts that typically accompany mergers. Cost, access and the maintenance of quality healthcare services are of vital importance to the organization and to the communities in which 1199 members reside and receive acute care health services.

In sum, the undersigned organizations' interests are directly affected by the proposed Certificates of Need. Collectively, they bring vast experience and expertise to inform OHCA's decision, and each will provide evidence from a different perspective. Respectfully, we request full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Very truly yours,

AFT Connecticut

Certificate of Need Application, Docket # 15-32033, *Yale-New Haven Health Services Corporation ("YNHHC") and Lawrence + Memorial Corporation: ("L+M")*, *Acquisition of L+M by YNHHC*

Dear Ms. Martone and Mr. Hansted:

The undersigned organizations seek intervenor status in the two above-referenced dockets as a coalition of faith-based organizations, physicians, labor organizations and health policy leaders. The interests of each organization are directly affected by the acquisition of Lawrence and Memorial Health by Yale-New Haven Health Services Corporation, as described below. Accordingly we seek full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Collectively, we represent in various ways more than 8,000 residents of L+M Hospital's primary and secondary service areas, and more than 75,000 residents statewide whose interests are affected by the ongoing consolidation of the state's health care system.

We support Governor Malloy's Executive Order 51, and urge OHCA not to render any decision on these applications until January 2017 or until the Governor's Task Force has reviewed the state's Certificate of Need laws, and made recommendations. If statutory deadlines force OHCA to decide the case, OHCA must follow the letter of Executive Order 51 and deny the application. Please note that among the intervenors are two members of the Task Force.

Even if the application does not ripen for decision until next year, as currently written it must be rejected. The deal fails to protect patients from escalating costs or to ensure local access to the fullest possible range of services. The application does not describe an adequate investment in community health needs, given that the community will lose any measure of control to a multi-billion dollar system from out of town. Any transaction in the future must provide for adequate oversight and accountability to the local community. In our submissions to the Commission as Intervenors we will also demonstrate that in attempting to address these issues, applicants have submitted inaccurate, misleading or incomplete information.

Cost and Price:

- OHCA requested comparative risk-adjusted prices for L+M Hospital and the three Yale-New Haven system hospitals: Bridgeport, Greenwich, and Yale-New Haven. YNHHS claims that such data do not exist, and that if the data did exist, they would not submit them.¹ In fact, adjusted prices for the most common diagnoses at L+M are consistently lower than other Yale-New Haven system hospitals. YNHHS has also refused to supply actual data on prices before and after their takeovers of the Hospital of St. Raphael, Greenwich Hospital and Bridgeport Hospital.
- Without relevant data, OHCA cannot evaluate the transaction. The deal will leave Yale-New Haven with nearly 60% market share from New York to Rhode Island, and more than 80% in L+M's primary service area.² Consolidation in such markets most often leads to price increases of 20% or more.³
- Through an analysis of billions of claims, provider pricing has been proven the most influential factor in regional private sector health care costs, and market power is the most potent price driver.⁴ YNHHS's description of negotiating prices separately for each hospital is irrelevant. The available evidence shows that separate price negotiations do not blunt the power of monopoly pricing.⁵
- Applicants' refusal to respond to OHCA's data request alone is grounds for rejection. Employee premium and point of service cost-sharing are exploding, putting needed services out of reach of many people with insurance, and threatening the coverage expansion under the Affordable Care Act. New London County's median family income lags the state average, and in the city of New London median family income is less than 60% of the state average. We will offer firsthand evidence of the pressure that systemic costs in the New London area are putting on patients, and describe the challenge of attempting to create a tailored health plan for low-wage service workers as Connecticut's provider systems consolidate.
- With out of pocket costs skyrocketing, Yale-New Haven's record of abusive debt collection practices creates deep concerns about the future of vulnerable populations in the wake of the acquisition. YNHHS's aggressive use of liens, foreclosures, wage garnishment and bank executions in past years forced changes in the state's medical debt collection laws, and resulted in settlements worth tens of millions of dollars. L+M patients cannot risk a repeat in Southeastern Connecticut.

Community Access and Well-being:

When Hartford HealthCare bought Windham Hospital five years ago, it stated that "currently they will not be terminating any services," although Hartford left itself wiggle room to reduce "duplicative services" in the future. But the CON went on to state that one of the benefits of the deal to Windham would be to "increase the services and technology offered locally," and to "decrease the out-migration of patients."⁶ Now with the ICU and CCU closed, patients are traveling long distances by ambulance, private car or even helicopter for urgently needed care that used to be available at Windham. Our coalition has broad experience treating patients and working to ensure the transportation, community

outreach, and follow up services that a community needs are in place. We cannot afford another Windham.

- Applicants told media outlets they will invest \$300 million in our community's health. But YNHHS requires that all investment generate a "positive return on investment" (i.e. profit), and most of the \$300 million will only come if L+M and other system hospitals hit profit targets.⁷ We will present testimony from physician and community leaders who will identify and analyze the community's health needs, and demonstrate the fundamental inadequacy of the proposed "investment."
- A true investment in our community would preserve existing services, expand services in areas of critical need, especially the provision and coordination of mental and behavioral health services and expanded community outreach to underserved populations. L+M management has wasted millions of dollars on acquisitions and punitive labor relations, rather than focusing on community health needs. L+M's community health needs assessment is underway. That process is far more robust today than three years ago. While encouraging, there is no real commitment to making major investments to address the needs identified in the process.
- Applicants have offered no compelling rationale for the merger achieving quality improvement. The electronic medical record EPIC has already been installed, and tight clinical coordination and clear clinical communication are being achieved without the negative consequences of a takeover.

Workforce:

- L+M is New London's 2nd largest private sector employer. Going forward, L+M must ensure that its workforce represents the community at large, protect job quality by respecting collective bargaining agreements and using hiring best practices.

Community Accountability and Monitoring:

- Given YNHHS's troubling record on collections, stonewalling on production of price data, and distorted claims about "investment," in the event of any transaction, L+M Hospital and the acquiring health system must negotiate with a representative cross-section of the community a written Community Benefits Agreement with binding commitments enforced by an independent monitor on the issues of access, affordability, community benefits, efficiencies and jobs;
- L+M Hospital must remain under the control of a locally controlled Board of Directors with decision making authority and accountability to the community. Despite public protestations to the contrary, under the applications as proposed, YNHHS will have ultimate authority over all meaningful decisions at L+M, including nominating members of the "local" boards.
- Rather than seek an unneeded merger, L+M Hospital must develop, finance and implement a Community Health Needs Assessment (CHNA), independent of its affiliated partner and will devote sufficient resources to address the health priorities identified in the needs assessment;
- The CHNA will be conducted every three years, and will include on-going accountability structures including independent monitoring for measuring implementation progress and effectiveness.

The Intervenor: Interests and Evidence

Collectively, the coalition includes thousands of L+M patients, local clergy, patient advocates, physicians, nurses and other caregivers, and leaders responsible for the purchase of health plans.

In addition to the specific interests of the various organizations, the coalition also brings a broad range of health care expertise to the proceedings. The coalition includes:

- Professors at Brown University and Columbia University Medical schools;
- Key statewide health care leaders:
 - Members of the Governor's Health Care Cabinet
 - Members of the Governor's Certificate of Need Review Task Force, and;
 - Members of the steering committee of L+M's current Community Needs Assessment process.

The coalition will present first-hand evidence from the entire range of the organizations' experiences in the Southeastern Connecticut health care system. In addition, the coalition will present expert analysis of the proposed acquisitions, including: data on Connecticut hospital market concentration; comparative price data; an exhaustive review of the rapidly growing literature on the impact of consolidation on cost, access, "efficiency" and quality, and; a breakdown of the Applicants' financial statements to shed light on claims of financial hardship.

AFT CONNECTICUT including Locals 5049, 5051, 5123 and 5119

AFT Connecticut is a statewide federation of the local unions of the American Federation of Teachers. Our locals have more than 1,800 members who work for Lawrence and Memorial Hospital and its affiliates. They all live in L+M's primary or secondary service area. They account for more than 50% of the total workforce at L+M, including the Visiting Nurses Association of Southeastern Connecticut. When counting non-L+M employees, altogether AFT Connecticut (State Federation) represents over 5,000 members who live in L+M's Primary and Secondary Service Areas.⁸ . Based on AFT Connecticut's large concentration of members and their families in L+M services areas, the organization's interests are directly affected by the acquisition proposal, both as workers and as patients.

AFT Connecticut was previously granted intervenor status by OHCA in a 2004 CON hearing (04-30348-CON) involving the Hospital's desire to close the Hospital's OB/GYN clinic. AFT Connecticut will offer testimony on the efficiency of current L+M operations, the impact of aggressive expansion on core missions, and expert testimony on trends in consolidation, cost, prices, access and governance.

CONNECTICUT CITIZEN ACTION GROUP

Connecticut Citizen Action Group is a statewide membership organization dedicated to involving the residents of Connecticut in bringing about a fair and equitable society. For over 40 years, CCAG has been at the forefront of advocating for a high quality, affordable and fully accessible health care system for all Connecticut residents. CCAG has worked effectively to advance health care policies that strengthen consumer access to fair, affordable health care services, coverage and benefits. CCAG's health care reform work includes monitoring hospital consolidation and regulation, expanding and protecting Medicaid coverage and benefits, and strengthening the ACA law.

CCAG has 500 members who live within the L+M catchment region, and will be directly impacted by potential increased costs, loss of local access, and changes in community programming directed toward health and well-being. Our members include a broad, diverse cross-section of the community including health care providers, child care providers, municipal workers, senior citizens, and educators. In addition to presenting testimony on the need for controlling cost and sustaining local community access to health care services, we will offer testimony on previous attempts to impose public accountability conditions on hospital acquisitions, and the need to impose strong community oversight, monitoring and accountability measures on this acquisition to ensure that the terms adequately and appropriately meet community health care needs and priorities, and that any such terms or conditions are actually carried out.

UNITE HERE CONNECTICUT

UNITE HERE Connecticut is a labor organization representing more than 7,000 employees in Connecticut, including 250 in the primary and secondary service areas of L+M Hospital. We bargain health benefits for all of our members in the state, and have a powerful interest in preserving access to affordable, high quality health care. UNITE HERE members cook and serve food in corporate, university and K-12 cafeterias. These are low-wage, seasonal, often part-time jobs. For them, comprehensive, affordable health insurance coverage is essential to achieving any hope of a middle class life. UNITE HERE members at Electric Boat in New London are engaged in bargaining for health benefits. Members currently pay 20% of the cost, which is unaffordable for workers who make \$12 per hour. If regional costs continue to escalate, workers will be forced to drop coverage, or be forced to choose between rent and health care. The price structure of the Greater New London market is vital to our members' future well-being.

UNITE HERE's Taft-Hartley fund, jointly administered by the union and management, has established a national health plan tailored specifically for food service workers. In Connecticut, nearly 1,000 members have enrolled in the past several years. In some cases, the savings compared to commercial plans have been large enough to maintain comprehensive coverage and actually reduce the cost to individual members. But the efficiency of this plan will not ultimately protect members if the state's largest hospital is permitted to grow unchecked.

UNITE HERE will offer evidence of the immediate impact of any pricing changes at L+M on service sector workers struggling at the margins of the health care system. UNITE HERE will also offer testimony based on experience establishing a specially designed Taft-Hartley health plan for food service workers in Connecticut, as market consolidation continues to drive prices up.

NATIONAL PHYSICIANS ALLIANCE IN CONNECTICUT (NPA-CT)

The National Physicians Alliance in Connecticut (NPA-CT) is part of a national 501(c)3 organization, the National Physicians Alliance (NPA), that creates research and education programs that promote health and foster active engagement of physicians with their communities to achieve high quality, affordable health care for all. The NPA offers a home to physicians across medical specialties who share a commitment to professional integrity and health justice. NPA-CT physicians are members of the staff of the parties involved in the affiliation and primary care physicians in the communities served by the two entities. As such, they have a key interest in assuring that their patients and communities have access to affordable, high-quality hospital care.

NPA will provide evidence that the purported clinical goals of the takeover – tight coordination of care and ease of communication and close cooperation among providers – can be achieved without the potential loss of local control and threat of monopoly economic power inherent in a takeover.

CONNECTICUT HEALTH POLICY PROJECT

Since 1999 as a nonprofit consumer advocacy organization, the CT Health Policy Project has labored to expand access to high quality, affordable health care for all Connecticut residents, with a particular focus on ensuring access for people in low-income communities of color. The proposed acquisition of Lawrence and Memorial Hospital/Health System by Yale-New Haven Hospital/Health System will undermine every part of our mission.

Executive Director Ellen Andrews, who sits on the Governor's Health Care Cabinet, will provide expert testimony regarding the impact of mergers and acquisitions on low-income consumers and the state Medicaid program.

UNITED ACTION CONNECTICUT

United Action Connecticut is an interfaith, multiracial, multilingual organization of congregations and community organizations crossing political, economic, urban and suburban boundaries. UACT is dedicated to building powerful, broad based community organizations. UACT brings congregations together to help them grow and thrive, develop leaders and move into action on concrete issues of social equity and justice. UACT has been working actively toward health care reform for nearly a decade. UACT's New London area congregations include L+M physicians, caregivers and patients, whose interests in preserving community access to high quality affordable health care are directly affected by the applications.

UACT will offer evidence on the local need for access and associated social services that will allow all Greater New London residents to obtain the care they need in their immediate community. The evidence will focus specifically on challenges facing vulnerable populations, including seniors.

NEW ENGLAND HEALTH CARE EMPLOYEES UNION, DISTRICT 1199, SEIU

District 1199 represents approximately 25,000 health care workers in the state of Connecticut, including state employees, hospital employees, nursing home employees, direct care and professional workers at private Mental Health and Developmental Disability agencies and FQHCs, and home care workers providing personal care and support services to Medicaid recipients. Of those, more than 1,000 health care workers live in Lawrence and Memorial's Primary and Secondary Service Areas.

At this time, District 1199 is also negotiating first Collective Bargaining Agreements for more than 300 low-wage nursing home employees of two skilled nursing facilities in New London (Crossings East and Crossings West), and one in Mystic, CT (Pendleton Health and Rehabilitation Center). Wages for these workers start at just \$10.35 per hour and more than 40% are scheduled for fewer than 32 hours per week. The cost of providing health benefits to these workers is a key issue in difficult ongoing contract negotiations. Current premiums for these workers are so expensive that many elect not to take insurance coverage at all or take the least expensive plan in terms of premiums, resulting in high out-of-pocket and co-pay expenses.

Based on 1199's significant membership in L&M's service areas and the need to negotiate affordable insurance for low-wage workers within the service areas, 1199's interests are directly affected by potential price increases or service cuts that typically accompany mergers. Cost, access and the maintenance of quality healthcare services are of vital importance to the organization and to the communities in which 1199 members reside and receive acute care health services.

In sum, the undersigned organizations' interests are directly affected by the proposed Certificates of Need. Collectively, they bring vast experience and expertise to inform OHCA's decision, and each will provide evidence from a different perspective. Respectfully, we request full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Very truly yours,

AFT Connecticut

REFERENCE: Certificate of Need Application, Docket # 15-32032, *Northeast Medical Group (NMG) and L&M Physician Association: Transfer of Ownership of a Group Practice by merger of L&MPA and into NMG*, and;

Certificate of Need Application, Docket # 15-32033, *Yale-New Haven Health Services Corporation ("YNHHSC") and Lawrence + Memorial Corporation: ("L+M"), Acquisition of L+M by YNHSC*

Dear Ms. Martone and Mr. Hansted:

The undersigned organizations seek intervenor status in the two above-referenced dockets as a coalition of faith-based organizations, physicians, labor organizations and health policy leaders. The interests of each organization are directly affected by the acquisition of Lawrence and Memorial Health by Yale-New Haven Health Services Corporation, as described below. Accordingly we seek full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

Collectively, we represent in various ways more than 8,000 residents of L+M Hospital's primary and secondary service areas, and more than 75,000 residents statewide whose interests are affected by the ongoing consolidation of the state's health care system.

We support Governor Malloy's Executive Order 51, and urge OHCA not to render any decision on these applications until January 2017 or until the Governor's Task Force has reviewed the state's Certificate of Need laws, and made recommendations. If statutory deadlines force OHCA to decide the case, OHCA must follow the letter of Executive Order 51 and deny the application. Please note that among the intervenors are two members of the Task Force.

Even if the application does not ripen for decision until next year, as currently written it must be rejected. The deal fails to protect patients from escalating costs or to ensure local access to the fullest possible range of services. The application does not describe an adequate investment in community health needs, given that the community will lose any measure of control to a multi-billion dollar system from out of town. Any transaction in the future must provide for adequate oversight and accountability to the local community. In our submissions to the Commission as Intervenors we will also demonstrate that in attempting to address these issues, applicants have submitted inaccurate, misleading or incomplete information.

Cost and Price:

- OHCA requested comparative risk-adjusted prices for L+M Hospital and the three Yale-New Haven system hospitals: Bridgeport, Greenwich, and Yale-New Haven. YNHHS claims that such data do not exist, and that if the data did exist, they would not submit them.¹ In fact, adjusted prices for the most common diagnoses at L+M are consistently lower than other Yale-New Haven system hospitals. YNHHS has also refused to supply actual data on prices before and after their takeovers of the Hospital of St. Raphael, Greenwich Hospital and Bridgeport Hospital.
- Without relevant data, OHCA cannot evaluate the transaction. The deal will leave Yale-New Haven with nearly 60% market share from New York to Rhode Island, and more than 80% in L+M's primary service area.² Consolidation in such markets most often leads to price increases of 20% or more.³
- Through an analysis of billions of claims, provider pricing has been proven the most influential factor in regional private sector health care costs, and market power is the most potent price driver.⁴ YNHHS's description of negotiating prices separately for each hospital is irrelevant. The available evidence shows that separate price negotiations do not blunt the power of monopoly pricing.⁵
- Applicants' refusal to respond to OHCA's data request alone is grounds for rejection. Employee premium and point of service cost-sharing are exploding, putting needed services out of reach of many people with insurance, and threatening the coverage expansion under the Affordable Care Act. New London County's median family income lags the state average, and in the city of New London median family income is less than 60% of the state average. We will offer firsthand evidence of the pressure that systemic costs in the New London area are putting on patients, and describe the challenge of attempting to create a tailored health plan for low-wage service workers as Connecticut's provider systems consolidate.
- With out of pocket costs skyrocketing, Yale-New Haven's record of abusive debt collection practices creates deep concerns about the future of vulnerable populations in the wake of the acquisition. YNHHS's aggressive use of liens, foreclosures, wage garnishment and bank executions in past years forced changes in the state's medical debt collection laws, and resulted in settlements worth tens of millions of dollars. L+M patients cannot risk a repeat in Southeastern Connecticut.

Community Access and Well-being:

When Hartford HealthCare bought Windham Hospital five years ago, it stated that "currently they will not be terminating any services," although Hartford left itself wiggle room to reduce "duplicative services" in the future. But the CON went on to state that one of the benefits of the deal to Windham would be to "increase the services and technology offered locally," and to "decrease the out-migration of patients."⁶ Now with the ICU and CCU closed, patients are traveling long distances by ambulance, private car or even helicopter for urgently needed care that used to be available at Windham. Our coalition has broad experience treating patients and working to ensure the transportation, community

outreach, and follow up services that a community needs are in place. We cannot afford another Windham.

- Applicants told media outlets they will invest \$300 million in our community's health. But YNHHS requires that all investment generate a "positive return on investment" (i.e. profit), and most of the \$300 million will only come if L+M and other system hospitals hit profit targets.⁷ We will present testimony from physician and community leaders who will identify and analyze the community's health needs, and demonstrate the fundamental inadequacy of the proposed "investment."
- A true investment in our community would preserve existing services, expand services in areas of critical need, especially the provision and coordination of mental and behavioral health services and expanded community outreach to underserved populations. L+M management has wasted millions of dollars on acquisitions and punitive labor relations, rather than focusing on community health needs. L+M's community health needs assessment is underway. That process is far more robust today than three years ago. While encouraging, there is no real commitment to making major investments to address the needs identified in the process.
- Applicants have offered no compelling rationale for the merger achieving quality improvement. The electronic medical record EPIC has already been installed, and tight clinical coordination and clear clinical communication are being achieved without the negative consequences of a takeover.

Workforce:

- L+M is New London's 2nd largest private sector employer. Going forward, L+M must ensure that its workforce represents the community at large, protect job quality by respecting collective bargaining agreements and using hiring best practices.

Community Accountability and Monitoring:

- Given YNHHS's troubling record on collections, stonewalling on production of price data, and distorted claims about "investment," in the event of any transaction, L+M Hospital and the acquiring health system must negotiate with a representative cross-section of the community a written Community Benefits Agreement with binding commitments enforced by an independent monitor on the issues of access, affordability, community benefits, efficiencies and jobs;
- L+M Hospital must remain under the control of a locally controlled Board of Directors with decision making authority and accountability to the community. Despite public protestations to the contrary, under the applications as proposed, YNHHS will have ultimate authority over all meaningful decisions at L+M, including nominating members of the "local" boards.
- Rather than seek an unneeded merger, L+M Hospital must develop, finance and implement a Community Health Needs Assessment (CHNA), independent of its affiliated partner and will devote sufficient resources to address the health priorities identified in the needs assessment;
- The CHNA will be conducted every three years, and will include on-going accountability structures including independent monitoring for measuring implementation progress and effectiveness.

The Intervenors: Interests and Evidence

Collectively, the coalition includes thousands of L+M patients, local clergy, patient advocates, physicians, nurses and other caregivers, and leaders responsible for the purchase of health plans.

In addition to the specific interests of the various organizations, the coalition also brings a broad range of health care expertise to the proceedings. The coalition includes:

- Professors at Brown University and Columbia University Medical schools;
- Key statewide health care leaders:
 - Members of the Governor's Health Care Cabinet
 - Members of the Governor's Certificate of Need Review Task Force, and;
 - Members of the steering committee of L+M's current Community Needs Assessment process.

The coalition will present first-hand evidence from the entire range of the organizations' experiences in the Southeastern Connecticut health care system. In addition, the coalition will present expert analysis of the proposed acquisitions, including: data on Connecticut hospital market concentration; comparative price data; an exhaustive review of the rapidly growing literature on the impact of consolidation on cost, access, "efficiency" and quality, and; a breakdown of the Applicants' financial statements to shed light on claims of financial hardship.

AFT CONNECTICUT including Locals 5049, 5051, 5123 and 5119

AFT Connecticut is a statewide federation of the local unions of the American Federation of Teachers. Our locals have more than 1,800 members who work for Lawrence and Memorial Hospital and its affiliates. They all live in L+M's primary or secondary service area. They account for more than 50% of the total workforce at L+M, including the Visiting Nurses Association of Southeastern Connecticut. When counting non-L+M employees, altogether AFT Connecticut (State Federation) represents over 5,000 members who live in L+M's Primary and Secondary Service Areas.⁸. Based on AFT Connecticut's large concentration of members and their families in L+M services areas, the organization's interests are directly affected by the acquisition proposal, both as workers and as patients.

AFT Connecticut was previously granted intervenor status by OHCA in a 2004 CON hearing (04-30348-CON) involving the Hospital's desire to close the Hospital's OB/GYN clinic. AFT Connecticut will offer testimony on the efficiency of current L+M operations, the impact of aggressive expansion on core missions, and expert testimony on trends in consolidation, cost, prices, access and governance.

CONNECTICUT CITIZEN ACTION GROUP

Connecticut Citizen Action Group is a statewide membership organization dedicated to involving the residents of Connecticut in bringing about a fair and equitable society. For over 40 years, CCAG has been at the forefront of advocating for a high quality, affordable and fully accessible health care system for all Connecticut residents. CCAG has worked effectively to advance health care policies that strengthen consumer access to fair, affordable health care services, coverage and benefits. CCAG's health care reform work includes monitoring hospital consolidation and regulation, expanding and protecting Medicaid coverage and benefits, and strengthening the ACA law.

CCAG has 500 members who live within the L+M catchment region, and will be directly impacted by potential increased costs, loss of local access, and changes in community programming directed toward health and well-being. Our members include a broad, diverse cross-section of the community including health care providers, child care providers, municipal workers, senior citizens, and educators. In addition to presenting testimony on the need for controlling cost and sustaining local community access to health care services, we will offer testimony on previous attempts to impose public accountability conditions on hospital acquisitions, and the need to impose strong community oversight, monitoring and accountability measures on this acquisition to ensure that the terms adequately and appropriately meet community health care needs and priorities, and that any such terms or conditions are actually carried out.

UNITE HERE CONNECTICUT

UNITE HERE Connecticut is a labor organization representing more than 7,000 employees in Connecticut, including 250 in the primary and secondary service areas of L+M Hospital. We bargain health benefits for all of our members in the state, and have a powerful interest in preserving access to affordable, high quality health care. UNITE HERE members cook and serve food in corporate, university and K-12 cafeterias. These are low-wage, seasonal, often part-time jobs. For them, comprehensive, affordable health insurance coverage is essential to achieving any hope of a middle class life. UNITE HERE members at Electric Boat in New London are engaged in bargaining for health benefits. Members currently pay 20% of the cost, which is unaffordable for workers who make \$12 per hour. If regional costs continue to escalate, workers will be forced to drop coverage, or be forced to choose between rent and health care. The price structure of the Greater New London market is vital to our members' future well-being.

UNITE HERE's Taft-Hartley fund, jointly administered by the union and management, has established a national health plan tailored specifically for food service workers. In Connecticut, nearly 1,000 members have enrolled in the past several years. In some cases, the savings compared to commercial plans have been large enough to maintain comprehensive coverage and actually reduce the cost to individual members. But the efficiency of this plan will not ultimately protect members if the state's largest hospital is permitted to grow unchecked.

UNITE HERE will offer evidence of the immediate impact of any pricing changes at L+M on service sector workers struggling at the margins of the health care system. UNITE HERE will also offer testimony based on experience establishing a specially designed Taft-Hartley health plan for food service workers in Connecticut, as market consolidation continues to drive prices up.

NATIONAL PHYSICIANS ALLIANCE IN CONNECTICUT (NPA-CT)

The National Physicians Alliance in Connecticut (NPA-CT) is part of a national 501(c)3 organization, the National Physicians Alliance (NPA), that creates research and education programs that promote health and foster active engagement of physicians with their communities to achieve high quality, affordable health care for all. The NPA offers a home to physicians across medical specialties who share a commitment to professional integrity and health justice. NPA-CT physicians are members of the staff of the parties involved in the affiliation and primary care physicians in the communities served by the two entities. As such, they have a key interest in assuring that their patients and communities have access to affordable, high-quality hospital care.

NPA will provide evidence that the purported clinical goals of the takeover – tight coordination of care and ease of communication and close cooperation among providers – can be achieved without the potential loss of local control and threat of monopoly economic power inherent in a takeover.

CONNECTICUT HEALTH POLICY PROJECT

Since 1999 as a nonprofit consumer advocacy organization, the CT Health Policy Project has labored to expand access to high quality, affordable health care for all Connecticut residents, with a particular focus on ensuring access for people in low-income communities of color. The proposed acquisition of Lawrence and Memorial Hospital/Health System by Yale-New Haven Hospital/Health System will undermine every part of our mission.

Executive Director Ellen Andrews, who sits on the Governor's Health Care Cabinet, will provide expert testimony regarding the impact of mergers and acquisitions on low-income consumers and the state Medicaid program.

UNITED ACTION CONNECTICUT

United Action Connecticut is an interfaith, multiracial, multilingual organization of congregations and community organizations crossing political, economic, urban and suburban boundaries. UACT is dedicated to building powerful, broad based community organizations. UACT brings congregations together to help them grow and thrive, develop leaders and move into action on concrete issues of social equity and justice. UACT has been working actively toward health care reform for nearly a decade. UACT's New London area congregations include L+M physicians, caregivers and patients, whose interests in preserving community access to high quality affordable health care are directly affected by the applications.

UACT will offer evidence on the local need for access and associated social services that will allow all Greater New London residents to obtain the care they need in their immediate community. The evidence will focus specifically on challenges facing vulnerable populations, including seniors.

NEW ENGLAND HEALTH CARE EMPLOYEES UNION, DISTRICT 1199, SEIU

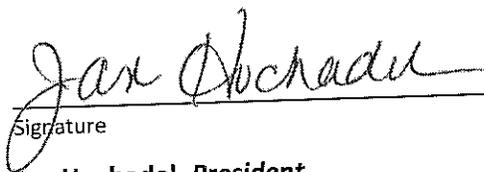

District 1199 represents approximately 25,000 health care workers in the state of Connecticut, including state employees, hospital employees, nursing home employees, direct care and professional workers at private Mental Health and Developmental Disability agencies and FQHCs, and home care workers providing personal care and support services to Medicaid recipients. Of those, more than 1,000 health care workers live in Lawrence and Memorial's Primary and Secondary Service Areas.

At this time, District 1199 is also negotiating first Collective Bargaining Agreements for more than 300 low-wage nursing home employees of two skilled nursing facilities in New London (Crossings East and Crossings West), and one in Mystic, CT (Pendleton Health and Rehabilitation Center). Wages for these workers start at just \$10.35 per hour and more than 40% are scheduled for fewer than 32 hours per week. The cost of providing health benefits to these workers is a key issue in difficult ongoing contract negotiations. Current premiums for these workers are so expensive that many elect not to take insurance coverage at all or take the least expensive plan in terms of premiums, resulting in high out-of-pocket and co-pay expenses.

Based on 1199's significant membership in L&M's service areas and the need to negotiate affordable insurance for low-wage workers within the service areas, 1199's interests are directly affected by potential price increases or service cuts that typically accompany mergers. Cost, access and the maintenance of quality healthcare services are of vital importance to the organization and to the communities in which 1199 members reside and receive acute care health services.

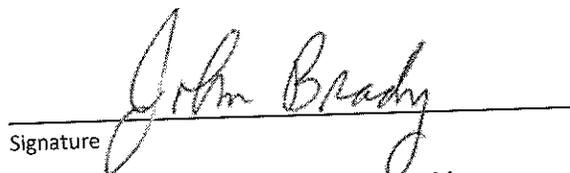

In sum, the undersigned organizations' interests are directly affected by the proposed Certificates of Need. Collectively, they bring vast experience and expertise to inform OHCA's decision, and each will provide evidence from a different perspective. Respectfully, we request full intervenor status with the right to submit pre-file testimony, and fully participate in the OCHA hearing including providing opening statements, presenting witness testimony and cross examining the applicants.

**Re: Objection to the Coalition's Petition for Full Intervenor Status in the
Matters of Docket NOs. 15-32032-CON and 15-32033-CON**

Dear Attorney Hansted:

On behalf of the Applicants in the above-referenced Applications, I respectfully object to AFT Connecticut's, Connecticut Citizen Action Group's, UNITE HERE Connecticut's, National Physicians Alliance in Connecticut's, Connecticut Health Policy Project's, United Action Connecticut's, and New England Health Care Employees, 1199, SEIU's (collectively the "Coalition") petition for full intervenor status (the "Petition").

The Applicants share some of the same concerns set forth in the Coalition's Petition regarding healthcare costs, retaining services in the community and maintaining a commitment to local governance. Thus, we do not object to the Coalition's participation in the hearings for the above-referenced Applications as an intervenor. For the reasons described herein, however, we object to the Coalition's request to cross-examine the Applicants' witnesses, and to the scope of the testimony that the Coalition seeks to introduce.

While we do not object to the Coalition's ability to participate in the hearings as an intervenor, we object to their Petition for "full" intervenor status. More specifically, and in the interests of an orderly hearing and facilitating OHCA's fact-finding and application of the statutorily mandated criteria by which OHCA approves or denies applications, the Applicants believe that the Coalition's participation should be limited solely to submitting

Kevin Hansted, Esq.
June 22, 2016
Page Two

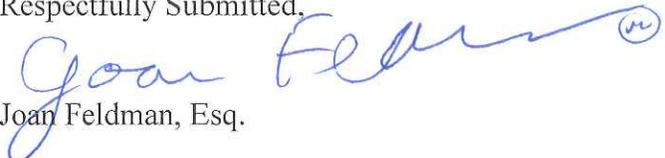

pre-file testimony and presenting witness testimony at the hearing(s). The Coalition should not be allowed to make opening statements or cross-examine witnesses. The Applicants are concerned that if the Coalition were granted the right to cross-examine the Applicants' witnesses, it would provide a forum and an opportunity for the Coalition to address issues and grievances that are not relevant to the Applications at hand. Moreover, and as you know, OHCA has the right to ask the Applicants and their witnesses questions that can address any of the concerns set forth by the Coalition in its pre-filed testimony. By proceeding in this manner, OHCA will ensure that the hearings proceed in an orderly manner and focus only on the relevant issues within OHCA's jurisdiction.

Accordingly, we respectfully request that the Coalition's Petition for full intervenor status be denied and that said Petition be approved on a very limited basis as described herein. The Applicants believe that a more appropriate avenue for many of the Coalition's statements or grievances is through the public portion of the upcoming hearing(s) at which time OHCA may permit any member of the Coalition's views to be heard or outside these proceedings directly between the Applicants and the Coalition's members.

The Applicants request that should the Coalition be granted intervenor status, that OHCA limits the Coalition's testimony to a list of issues specified by OHCA prior to the hearings on the aforementioned Applications.

Finally, the Coalition states that Executive Order 51 requires OHCA to deny the Applications. While the Applicants recognize that OHCA is not in a position to decide the lawfulness of that Executive Order, we want OHCA to be aware that the Applicants disagree with the Coalition's statements regarding Executive Order 51. We are of the opinion that Executive Order 51 should not be enforced and/or adhered to by OHCA in the aforementioned proceedings.

Respectfully Submitted,

Joan Feldman, Esq.

Northeast Medical Group, Inc.

Docket Numbers: 15-32032-CON
15-32033-CON

RULING ON PETITION FOR INTERVENOR STATUS

By petition dated June 17, 2016, AFT Connecticut, Connecticut Citizen Action Group, UNITE HERE Connecticut, National Physicians Alliance in Connecticut, Connecticut Health policy Project, United Action Connecticut, and New England Health Care Employees, District 1199, SEIU ("Petitioners") requested Intervenor status in the public hearing to be held by the Department of Public Health ("DPH") Office of Health Care Access ("OHCA") regarding the Certificate of Need ("CON") applications filed under Docket Numbers: 15-32032-CON and 15-32033-CON. The Applicants filed an objection thereto on June 22, 2016.

Pursuant to Connecticut General Statutes § 4-177a, the Petitioners are hereby designated as Intervenors with full rights of at the hearing scheduled for July 11, 2016 at Holiday Inn, 35 Governor Winthrop Blvd., New London, Connecticut. As Intervenors with full rights, the Petitioners may participate as indicated below.

The Petitioners are granted the right to inspect and copy records on file with OHCA related to the CONs filed under Docket Numbers 15-32032-CON and 15-32033-CON and shall be copied on all pleadings, correspondence and filings submitted from this point forward by the Applicants until the issuance of a final decision by OHCA. As Intervenors with full rights of, the Petitioners may be cross-examined by the Applicants and the Petitioners have the right to cross-examine the Applicants. **The Petitioners shall file their pre-file testimony by the close of business on July 1, 2016.**

OHCA's jurisdiction in this matter is limited to the guidelines and principles set forth in Connecticut General Statutes § 19a-639. Therefore, with respect to pre-filed testimony, direct testimony, and any cross-examination at the hearing, the Petitioners are limited to those guidelines and principles as set forth below.

Affirmative Action/Equal Opportunity Employer

- (1) Whether the proposed project is consistent with any applicable policies and standards adopted in regulations by the Department of Public Health;
- (2) The relationship of the proposed project to the state-wide health care facilities and services plan;
- (3) Whether there is a clear public need for the health care facility or services proposed by the applicant;
- (4) Whether the applicant has satisfactorily demonstrated how the proposal will impact the financial strength of the health care system in the state or that the proposal is financially feasible for the applicant;
- (5) Whether the applicant has satisfactorily demonstrated how the proposal will improve quality, accessibility and cost effectiveness of health care delivery in the region, including, but not limited to, provision of or any change in the access to services for Medicaid recipients and indigent persons;
- (6) The applicant's past and proposed provision of health care services to relevant patient populations and payer mix, including, but not limited to, access to services by Medicaid recipients and indigent persons;
- (7) Whether the applicant has satisfactorily identified the population to be served by the proposed project and satisfactorily demonstrated that the identified population has a need for the proposed services;
- (8) The utilization of existing health care facilities and health care services in the service area of the applicant;
- (9) Whether the applicant has satisfactorily demonstrated that the proposed project shall not result in an unnecessary duplication of existing or approved health care services or facilities;
- (10) Whether an applicant, who has failed to provide or reduced access to services by Medicaid recipients or indigent persons, has demonstrated good cause for doing so, which shall not be demonstrated solely on the basis of differences in reimbursement rates between Medicaid and other health care payers;
- (11) Whether the applicant has satisfactorily demonstrated that the proposal will not negatively impact the diversity of health care providers and patient choice in the geographic region; and
- (12) Whether the applicant has satisfactorily demonstrated that any consolidation resulting from the proposal will not adversely affect health care costs or accessibility to care.

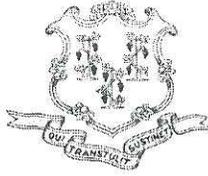

OHCA will make any additional rulings as to the extent of the hearing participation rights of the Petitioners throughout the hearing in the interest of justice and to promote the orderly conduct of the proceedings.

OHCA PUBLIC HEARING ISSUES

1. The clear public need for proposal.

The Applicants are of the opinion and belief that there is a clear public need for the services it provides to the residents of the Eastern Connecticut region. More specifically, L+M is a vital resource to the community because it provides everyone with the healthcare they need, regardless of their ability to pay and regardless of the fact that the cost of efficiently providing such health care to those in need significantly exceeds government sponsored healthcare reimbursement (e.g., Medicaid). As stated in the Application and pre-filed testimony, L+M provides essential access and services to those individuals in the community that other providers are unwilling to accept because of their payer or socioeconomic status. Declining revenue from governmental payers coupled with increasing Connecticut hospital taxes have put enormous financial pressure on L+M's ability to continue to subsidize the level of services and access for which there is a clear public need. Given these realities and the associated demands of health care reform (discussed in greater detail in the Application), L+M's financial stability is considerably less certain. In order to responsibly address this financial instability and ensure that patients located in the Eastern Connecticut Region continue to have access to quality healthcare services, L+M is of the belief that it must affiliate with Yale New Haven Health to gain needed access to the operational and clinical infrastructure and expertise that Yale New Haven Health offers. Without this proposed affiliation, L+M believes that the quality of and access to the services that L+M provides will be reduced, all to the detriment of the residents of Eastern Connecticut.

15-32033 07/01/16 0879

2. The effect of the proposed transfer of ownership on the residents of the region with respect to health care services, including how access to services (including specialty care) will be maintained or improved in the area following the acquisition.

If OHCA approves the subject Applications, the Applicants are of the firm belief and opinion that the residents of the Eastern Connecticut will benefit from L+M being a more financially stable hospital. Financial stability for L+M means: more improvements in L+M's facilities, more investment in needed infrastructure, greater access to needed medical equipment and technology, expanded clinical service offerings, and job stability. The more investments that L+M can make in clinical service offerings and clinical programming for the community, the more financially stable L+M will become and the more L+M can promote the overall health and wellness of its community. In addition, access to capital for the infrastructure needed to improve and manage care, such as data analytics, will ultimately inure and contribute to the well-being of our residents in the Eastern Connecticut region. Denial of the Applications will force L+M to reduce scope, hours and type of clinical service offerings. As a direct consequence, the most vulnerable of our residents will have no choice but to go elsewhere for their healthcare. However, given the limited public transportation in the Eastern Connecticut region, this may not be a viable option for many of our patients.

The L+M Board of Directors will continue as a fiduciary board and as such, will have the right to approve any major new programs and clinical services, or the discontinuation or consolidation of any such clinical programs. L+M and Yale New Haven Health also expect that many of the clinical specialty services that were introduced by Yale New Haven Health at Greenwich Hospital and Bridgeport Hospital will also be offered in the L+M community, including bariatric surgery, endocrinology and vascular surgery to name a few.

3. Describe the benefits achieved in the Bridgeport/Greenwich Hospital service areas following the YNHHS affiliation, in terms of financial stability or enhanced programs or services.

Greenwich and Bridgeport Hospitals have enhanced clinical service offerings to their communities as a result of the Yale New Haven Health affiliation. By way of example, the development of cancer, pediatric and cardiovascular surgical programs has increased the scope and level of acuity of clinical services provided by both Greenwich and Bridgeport Hospitals. As a result, both hospitals have been able to offer more advanced and sophisticated clinical offerings on a local basis with patient access to some of the best and brightest physicians in the nation. Each hospital has also benefitted from the sharing of evidence-based best practices, enhanced patient satisfaction, employee engagement and physician growth and engagement. Bridgeport Hospital and Greenwich Hospital have also achieved significant cost savings in areas such as, supply chain, information technology, and

insurance to name a few. Most importantly, since affiliating with Yale New Haven Health both hospitals are in stronger financial positions with consistent positive operating and net incomes.

4. Please describe how successful the CHNA implementation plan has been in addressing priority health issues in L+M's service area.

L+M's last community needs assessment was performed in 2013 and implementation has been ongoing by L+M on its own and through collaborative efforts among community stakeholders to ensure strategies are implemented and outcomes measured. Socioeconomic factors, physical environment, health behaviors and clinical care are all factors in the assessment and the plan. Areas of focus have been chronic conditions such as heart disease, obesity, diabetes, cancer, sexual health, asthma and behavioral health and is more particularly described in our Applications. L+M has been successful in implementing strategies to address the prioritized identified needs following our 2013 CHNA in partnership with a multi-sector community collaborative. L+M has measured process outcomes, but going forward, we believe that Yale New Haven Health will enhance L+M's analytical capabilities and support more robust program evaluation and tracking of outcome measures. L+M's challenge is to identify metrics on which it can obtain the data to measure whether it is moving the needle at all. A new CHNA will be completed shortly with the implementation plan completed and approved by the L+M board in August of 2016. Please see <http://www.lmhealthcare.org/> for current information.

5. How will the proposal affect community health improvement spending (community benefits) and community building activities in L+M's service area?

Pursuant to the Affiliation Agreement between the Applicants, there is a mutual commitment to maintain (at a minimum) the current level of spending on L+M community benefit programming. If the proposed affiliation is approved, the parties will share resources and knowledge in collaboration with other community organizations to achieve and offer the best and most effective community programs with the best outcomes. L+M will continue to perform its local community health needs assessment every three (3) years. If the proposed affiliation is not approved, it is very likely that L+M will need to reduce its community programming.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Bruce Cummings", is written over a horizontal line. The signature is stylized and cursive.

Bruce Cummings
President & CEO, Lawrence + Memorial Corporation

**STATE OF CONNECTICUT
DEPARTMENT OF PUBLIC HEALTH
OFFICE OF HEALTH CARE ACCESS**

AFFILIATION OF LAWRENCE + MEMORIAL CORPORATION WITH YALE-NEW HAVEN HEALTH SERVICES CORPORATION : **DOCKET NO. 15-32033-CON**
: **July 11, 2016**

**PRE-FILED TESTIMONY OF BRUCE D. CUMMINGS, PRESIDENT AND
CHIEF EXECUTIVE OFFICER OF LAWRENCE + MEMORIAL
CORPORATION**

Good afternoon, Attorney Hansted, and staff of the Office of Health Care Access (“OHCA”). My name is Bruce D. Cummings and I am the President & Chief Executive Officer of Lawrence + Memorial Corporation (“L+M”), the parent corporation of Lawrence + Memorial Hospital, Westerly Hospital, L&M Physician Association, Inc., and the Visiting Nurse Association of Southeastern Connecticut Inc., otherwise and collectively known as the L+M Healthcare System. I am most grateful to have this opportunity to speak with you and convey the many reasons for recommending to OHCA that it approve the above-referenced application (the “Application”) which will allow L+M to affiliate with Yale-New Haven Health Services Corporation (“Yale New Haven Health”) (collectively, the “Applicants”).

While the Applicants believe that their above-referenced Application: (i) sets forth the specific reasons for the proposed affiliation (the “Proposal”); and (ii) comprehensively addresses all of the statutory criteria required for approval pursuant to

Connecticut General Statutes Section 19a-639¹, it is worth restating more concisely here today that the most important reason for this Proposal is to preserve continued access to high-quality affordable healthcare services for individuals in the Eastern Connecticut Region (the “Region”). As I will discuss herein, we firmly believe that if this Application is not approved, that access to services in the Region will be adversely impacted.

As you have most likely observed by now, the momentum of consolidation within the healthcare industry, on both a local, state and national level, is undeniable.² It is also quite evident that the momentum for consolidation is not merely a trend, but rather it is an appropriate solution for the provision of coordinated high quality care at a lower cost.

As OHCA is aware, Governor Malloy (the “Governor”), recently issued Executive Order 51. The Applicants believe that Executive Order 51 is void, unenforceable, and unconstitutional as relates to the Application³ and strongly believe, as set forth below, that, judged against the proper legislatively prescribed criteria, their Application, along with the testimony provided through this legislatively prescribed process, will demonstrate convincingly to OHCA the benefits associated with the approval of the Application and, conversely, the serious harm that will result if OHCA denies it.

¹ The statutory criteria in effect for CON applications filed prior to December 1, 2015.

² Forecasts by Moody’s, the bond credit rating company, have consistently recognized that the hospitals that will fare the best in the future are those hospitals that are integrated with an integrated healthcare delivery system with access to the critical resources required to thrive in a demanding and competitive marketplace. See *Moody’s Hospital Consolidation and Deferred Capital Support Issuance Volume* (March 5, 2012); see also *Moody’s: US Not-for-Profit Hospital Outlook Remains Negative for 2014* (November 5, 2013).

³ Deputy Commissioner refers to the Deputy Commissioner of the Connecticut Department of Public Health.

I. History of Collaboration.

L+M and Yale New Haven Health have a long history of clinical collaboration and support. At times during the past ten (10) years when L+M lacked either the capacity or the resources to offer certain specialty healthcare services to its patients, it has turned to and collaborated with Yale New Haven Health and/or its affiliates to provide such needed services within the L+M community. L+M has done so, not because it had longstanding plans to consummate a corporate affiliation with Yale New Haven Health, rather, it has historically chosen Yale New Haven Health because it offered and continues to offer high quality services for the Region's patients.⁴ To date, clinical collaborations in the area of heart and vascular care, medical and radiation oncology, pediatric and neonatal services, neurosurgery and neurology have been extremely beneficial to the L+M community. In addition, and as a collateral benefit to these historical clinical collaborations, L+M's affiliated physicians have had regular clinical opportunities to advance their training and knowledge on both the L+M and Yale-New Haven Hospital campuses. However, as beneficial as these clinical collaborations are, they have not been sufficient to allow L+M to address the realities of health care today, as other market forces have created other imperatives for L+M that make this Proposal a necessity rather than a luxury.

II. Driving Forces for Affiliation.

⁴ See Exhibit A attached hereto.

A. Health Care Reform. As mentioned above, consolidation is an outgrowth of a sea change in health care — a shift that requires hospitals to provide quality care, at lower cost and for a defined patient population over a continuum of care needs and settings. As hospitals and health systems undertake this transition from a traditional fee-for-service environment to a value-based delivery system, they will need access to all the components of a fully integrated healthcare delivery model.⁵ In other words, this shift requires a robust portfolio of alternative care models and access to affordable capital to fund prohibitively expensive technology and resource development, along with data analytics to efficiently provide care and measurably improve the health of the population served. When you couple those imperatives with aging infrastructure, a growing population of older and sicker adults, and demands for more effective medical treatments and technologies, it becomes clear that the challenges for hospitals and health systems are daunting on many levels, not the least of which is financial.

These strategic and financial realities require organizations like L+M to determine whether they can remain viable as an independent community healthcare provider, or whether partnership with a larger established integrated healthcare delivery system is necessary. For L+M, this decision was gradual and not immediate. In fact, because L+M had initially intended to remain independent, it became one of the founding members of ValueCare Alliance, an organization formed by five (5) relatively independent hospitals to take advantage of shared best practices, and analytic tools. Within time, however, it became very apparent to L+M's leadership that this alliance

⁵ See Moody's "Not-for-Profit Hospitals: The Pursuit of Value" (May 8, 2013); Moody's "*New Forces see also Driving Rise in Not-for-Profit Hospital Consolidation*" (March 8, 2012). See Exhibit B attached hereto.

was not enough to address all of L+M's mounting challenges (as more particularly described herein) in the rapidly changing healthcare market. Therefore, L+M's Board of Directors made the decision to approach Yale New Haven Health, a proven and trusted partner, to engage in discussions regarding a possible affiliation. After several months of focused and thorough discussions, combined with the realization that L+M and Yale New Haven Health held common visions, missions and goals for the Region, the Applicants entered into the Affiliation Agreement.⁶

B. Declining Financial Performance. One significant driving force behind L+M's decision to affiliate with Yale New Haven Health was its progressively declining financial performance over the last three (3) fiscal years. More specifically, during the last three (3) fiscal years, L+M has experienced an overall decline in its operating margins. This decline has been, in part, due to a number of factors, including: (i) State of Connecticut hospital tax increases coupled with budgetary rescissions (significantly reducing L+M Hospital's Medicaid supplemental pool payments and creating a net revenue reduction to L+M Hospital of approximately \$12,700,000 in 2016 as compared to approximately \$1,000,000 in 2013); (ii) no inflationary increases in Medicaid rates since 2008 despite the fact that the number of individuals on Medicaid has greatly increased; (iii) a significant reduction in federal disproportionate share hospital payments despite the significant number of Medicaid beneficiaries cared for by L+M; (iv) Medicare's and commercial payers' increasing shift from fee-for-service to value and

⁶ "Consolidation offers the promise of greater operating efficiency and risk diversification across larger organizations, likely leading to stronger and more stable bond ratings for affected hospitals." See page 11 of Center for Healthcare Economics and Policy, *Hospital Realignment: Mergers Offer Significant Patient and Community Benefits* (January 23, 2014). See Exhibit C attached hereto.

risk-based payments; (v) a pervasive unwillingness by commercial payers to bear the burden of insufficient government funding for governmental payer programs, the uninsured or underinsured care (i.e., Medicaid, Medicare, and DSH reductions); and (vi) reductions in inpatient hospital utilization (e.g., significant changes in Medicare reimbursement shifting more patients to observation status from inpatient status despite the same resource commitment). All of these factors have had a cumulative and detrimental impact on L+M's financial status.⁷

In fact, on May 17, 2016, L+M's bond rating for its CHEFA Series F bonds was downgraded to a BBB+ rating from the A+ rating it was given just three (3) years earlier. According to the Standard & Poor's Global rating agency, this downgrade can be attributed to three (3) factors: "a sharp decrease in operating profitability in the last three fiscal years from historic levels, pressure from the Connecticut state hospital tax, the impact of which as incrementally increased each year, continued inpatient softness in fiscal 2016 with mix shift to outpatient; and a weakened balance sheet position with less financial flexibility than when the rating was initially assigned."⁸ It is worth noting that in the same report, the rating agency stated that:

There's upward rating potential if the integration with Yale New Haven Health System (which includes Yale New Haven Hospital) comes to fruition and provides immediate lift to financial performance and stability to the balance sheet and our group rating methodology would then apply.⁹

Currently, L+M is projecting a negative 4.9% margin compared with a budgeted loss of 1.2%. It is also worth stating that despite the decline in L+M's revenue and

⁷ "Hospitals are faced with an unprecedented threat to revenues... we expect revenue growth to continue to be weak and not able to keep pace with normal spending inflation." See Exhibit C attached hereto.

⁸ See Exhibit D attached hereto.

⁹ See Exhibit D attached hereto.

creditworthiness, L+M's demand for capital has been the greatest it has ever been for some of the reasons discussed herein.

C. Need for Capital. Health care reform requires innovative responses to meet the demands for higher quality care at a lower cost. Regardless of whether the chosen model is an accountable care organization or "ACO"¹⁰, a clinically integrated organization (i.e. physician and hospital participants share financial risk for providing high quality care under alternative payment models), a patient-centered medical home, or population health programs, each of these initiatives will require a certain degree of size, depth and breadth of experience, and capital to be successful. In particular, each of these models must be large enough to: (i) maximize efficiencies through leveraging economies of scale; and (ii) access the logistical resources and data to develop evidence-based best practices for the purpose of achieving the highest levels of performance while assuming the risks associated with care management.¹¹

For the last several years, Yale New Haven Health has been in the forefront of innovation in connection with its development of a population health management program to address an array of socioeconomic and environmental factors that are believed to influence health outcomes, reduce disparities, improve patient care management and reduce health care costs. "Aligning the needs and assets of the hospital

¹⁰ Accountable care systems require that the health care system be large enough so that the cost savings are truly tied to quality improvements rather than fluctuations in care. See <http://www.ama-assn.org/amednews/2009/08/31/gvsa0831.htm>.

¹¹ "Research by Elliott Fisher, Mark McClellan, and colleagues demonstrates that such a program, implemented with the establishment of Accountable Care Organizations (ACOs), would benefit patients, payers, and providers. The ACO shared savings concept would eliminate waste, reduce overuse and misuse of care, and support the development of health systems that can deliver high quality, affordable care...." See http://www.dartmouthatlas.org/press/HA_Fisher_McClellan.pdf.

and community with metrics allows for meaningful and significant analysis.”¹² Since more and more health care organizations are being asked to assume financial risk for a specific patient population, they need access to data on populations of a specified size “to help identify appropriate risk corridors and drivers of utilization and cost in various patient subpopulations.”¹³ While the potential to transform the delivery of health care in our Region is of vital importance to L+M, there is no question that L+M is without the capacity or capital to take on a project of this magnitude as an independent community hospital.¹⁴

As more fully described in the Application, the Proposal will allow L+M to continue to meet the needs of the Region through a strategic plan that will be jointly developed by the Applicants (the “Plan”).¹⁵ This Plan will specifically focus on the areas of greatest need for the L+M communities in the Region, including but not limited to, the creation of greater access to primary care, population health management, cost-effective alignment of service lines, including but not limited to, oncology, cardiology, neurosurgery, emergency medicine, surgery, orthopedics and behavioral health. As specifically stated in Section 2.3 of the Affiliation Agreement, the Applicants are

¹² See Health Research & Educational Trust, *The Second Curve of Population Health* (March 2014). See Exhibit E attached hereto. For example, Yale New Haven Health conducts a community needs assessment and then develops specific and targeted community health programs. This assessment supported the growth of one program, Project Access, which connects uninsured community members to local health services and health resources. Another Yale New Haven Health program provides onsite care management for the health system’s own employees living with chronic disease. This early-intervention initiative provides care coordination, navigation, coaching and goal setting to employees and their adult dependents. Within one year, this employee health program improved compliance with evidence-based care by 10 percent, brought risk-adjusted, per-member per-month spending in line with the general employee population and resulted in zero readmissions and avoidable admissions. The program also had 95 percent or higher participant satisfaction ratings. *Id.* at page 15.

¹³ See An HFMA Value Project and Report, *Acquisition and Affiliation Strategies*, (June 2014) at page 2. <https://www.hfma.org>.

¹⁴ See Health Research & Educational Trust, *The Second Curve of Population Health* (March 2014) at page 3.

¹⁵ See CON at page 100.

committed to addressing the needs of the Region based upon ongoing L+M community health needs assessments:

Each Party reaffirms its commitment to the delivery of high-quality, effective health care to the communities it serves, and to supporting, enhancing and sustaining the ability of the L+M Affiliates...to provide high-quality, cost-effective care that will drive broader efficiencies while increasing high quality outcomes, address increasing consumer demands for integrated collaborative care, manage risk more effectively, enhance the population health infrastructure, improve the efficient access to capital, and maintain and grow provider diversity, consumer choice and access to quality and affordable care. In furtherance of the foregoing, L+M may dedicate and commit at least \$11,000,000 ("***L+M Community Benefit Funds***") to support community benefit programs and reinvestments in the communities that the L+M Affiliates serve, including, without limitation, instituting, maintaining, preserving, and/or reinvesting in ambulance services, mental health programs, smoking cessation programs, pediatric asthma programs, diabetes outreach, and/or services important to the community and/or at risk populations, in each case, as may be identified in a biennial community needs assessment or that otherwise are in furtherance of L+M's charitable mission...¹⁶

Specifically and subject to OHCA's approval of this Application, Yale New Haven Health has committed Three Hundred Million Dollars in resources to the Region (over a period of five (5) years) to enhance and support clinical and operational capabilities and services consistent with the needs of the Region. Forty-One of the Three Hundred Million Dollars will be dedicated (over a five (5)-year period) to the implementation of L+M's Epic, Lawson and other IT platforms; participation and access by L+M to Yale New Haven Health's Population Health infrastructure; and development of needed L+M clinical programs, including associated physician recruitment. Forty-Four of the Three Hundred Million Dollars will be committed by Yale New Haven Health to L+M to support a number of clinical programs and services

¹⁶ See CON at pages 95-96.

as specified in the Affiliation Agreement.¹⁷ Two-Hundred and Fifteen of the Three Hundred Million Dollars (along with a portion of the Forty-Four Million) will be committed to enhance clinical and operational capabilities and services, including but not limited to: expansion of L+M's primary care network and ambulatory presence; access to pediatric specialty services; development of a multi-disciplinary musculoskeletal center with orthopedic, neurosurgery, spine and physiatry clinical complements; expansion of maternal fetal medicine and obstetrics capabilities; enhancement of oncology services associated with the Smilow Cancer Hospital; reintroduction and expansion of bariatric and/or laparoscopic surgical programs; expansion of neuromuscular and stroke programs; development of a multidisciplinary vascular program and enhancement of cardiac services including electrophysiology; enhancement of endocrinology/thyroid services; development of population health and risk contracting capabilities and participation in population health infrastructure; continued access to SkyHealth; expanded emergency services; and physical plant and infrastructure maintenance, development and renovations.¹⁸ Most importantly, it is expected that the proposed affiliation will produce enhanced revenue for L+M by virtue of the operating efficiencies achieved through expansion of scale and operational and clinical integration opportunities.

Clearly, there are significant patient and community benefits associated with the Proposal. Continued access for patients to quality and more cost-effective and affordable health care services are the ultimate goals of the Applicants. In the event that this Application is not approved, given L+M's rapidly deteriorating financial position and its

¹⁷ See Section 2.11(c) of the Affiliation Agreement at CON at page 99.

¹⁸ See Section 2.11(d) of the Affiliation Agreement at CON at page 99.

financial forecast without the Proposal, it is my opinion and belief that many of the programs discussed in this Application and some of those not discussed in the Application will be in serious jeopardy. Simply put, decreasing revenues and increasing hospital taxes will force us to make the type of difficult decisions that will inevitably negatively impact our community benefit programs and clinical offerings.

III. OHCA's Criteria for Approval.

A. The Criteria In Place Prior to December 1, 2015 Must Be Applied to the Application. In assessing the Application, OHCA must apply the criteria in place prior to December 1, 2015, as was intended and expressly enacted by the Connecticut legislature and cannot lawfully make findings or delay decision on the Application as purportedly dictated by paragraphs 5 or 7 of Executive Order 51.

Pursuant to Conn. Gen. Stat. § 19a-639 ("Section 19a-639"), OHCA is expressly empowered and directed to consider and make findings with respect to the factors established by the legislature in determining whether to approve a CON application.¹⁹ These determinations must be made within a statutorily determined time-period.²⁰ Moreover, the legislature has determined that the Deputy Commissioner of Public Health "shall exercise independent decision-making authority over all certificate of need decisions."²¹

¹⁹ Conn. Gen. Stat. § 19a-639(a) ("In any deliberations involving a certificate of need application filed pursuant to section 19a-638, ... the office *shall* take into consideration and make written findings concerning each of the following guidelines and principals" (emphasis added)); *see also* Conn. Gen. Stat. § 19a-630(13) ("'Office' means the Office of Health Care Access division within the Department of Public Health.").

²⁰ *See* Conn. Gen. Stat. § 19a-639a.

²¹ *See* Conn. Gen. Stat. § 19a-612d (emphasis added).

The CON regulatory process is the regular subject of review by the Connecticut legislature. Most recently, in the 2015 legislative session, S.B. 811 was proposed and ultimately was passed as part of P.A. 15-146. Among other things, that Act amended Section 19a-639 to include additional factors that must be considered by OHCA when the transfer of ownership of a hospital is the subject of a CON application. Those additional factors, however, expressly do not apply “to a transfer of ownership of a hospital in which either a certificate of need application is filed on or before December 1, 2015, or where a certificate of need determination letter is filed on or before December 1, 2015.”²² Thus, the legislature has made an express determination that the criteria to be applied to CON applications prior to December 1, 2015 *must* be considered under the criteria in place prior to December 1, 2015. The Application was filed on or about October 7, 2015 and therefore must be considered under the criteria in place at that time.

On or about February 25, 2016, the Governor issued Executive Order 51 (the “Order”). Among other things, that Order (a) directs OHCA “not make any final decisions on any CON application Until January 15, 2017, insofar as permitted by law” or (b) “insofar as it becomes necessary for the Department of Public Health to act on an application” prior to January 15, 2017, directs OHCA to make adverse findings on three key criteria set forth in § 19a-639.²³ As discussed above, Executive Order 51 is unenforceable and thus, the appropriate criteria for assessing the Application are set forth in Section 19a-639 and the Deputy Commissioner must exercise independent decision-

²² See Conn. Gen. Stat. § 19a-639(f).

²³ See Executive Order 51, ¶¶ 5 & 7.

making authority in assessing the Application. Applying the criteria mandated by the legislature, it is clear that the Application should be approved.

B. State-Wide Health Care Facilities and Services Plan. In accordance with the Guiding Principles set forth in the State-Wide Health Care Facilities and Services Plan (“Plan”), the Applicants set forth the reasons why they believe that the Proposal achieves the Plan’s stated objectives:

- **Promote and support the long term viability of the state’s health care delivery system;**

If the Proposal is approved by OHCA, L+M will achieve the benefits more particularly described in the Affiliation Agreement, and thus, be positioned to achieve financial stability and remain a valuable component of the healthcare delivery system in the State.

- **Ensure that any regulated service will maintain overall access to quality health care;**

If the Proposal is not approved by OHCA, L+M will be forced to reduce and terminate clinical services and will have no choice but to limit the type of clinical programming that directly benefits the community. Conversely, if the Proposal is approved by OHCA, the described capital commitments, innovative care strategies, and efficiencies associated with greater scale will allow L+M to continue to provide access to quality and affordable health care services in the Region.

- **Promote equitable access to health care services (e.g., reducing financial barriers, increasing availability of physicians) and facilitate access to preventive and medically necessary health care;**

If the Proposal is not approved by OHCA, L+M will not have the capital to enhance access to primary care providers, recruit physicians, fund community benefit programs and avoid reduction and termination of health care services. If OHCA approves the Proposal, L+M will benefit from the capital commitment to be made by Yale New Haven Health as described herein and in the Affiliation Agreement.

- **Encourage and support health education, promotion and prevention initiatives;**

If the Proposal is not approved by OHCA, the community health programs that L+M presently provides and is committed to providing to meet the community health needs will either be terminated or reduced. If the Proposal is approved by OHCA, L+M will be able to maintain the health education, promotion and prevention initiatives that it regularly identifies through its regular community health needs assessments.

- **Encourage collaboration among health care providers to develop health care delivery networks;**

L+M has a long history of collaboration with Yale New Haven Health and this Proposal will further enhance continued collaborations. While collaborative efforts are not enough in this instance, they are an ongoing and integral component to the Proposal.

- **Support the need for a sufficient health care workforce that facilitates access to the appropriate level of care in a timely manner (e.g., optimal number of primary and specialty care providers);**

If the Proposal is not approved by OHCA, L+M will be less likely to attract, recruit and maintain the specialty and primary care physicians needed in its community and thus, access to an adequate number of primary care providers and certain health care specialists will be unavailable to patients of L+M. Dr. Lehrach, the President of L&M Physician Association, Inc. will address the recruitment of primary and specialty care physicians in his testimony today.

- **Maintain and improve the quality of health care services offered to the state's residents;**

If the Proposal is approved by OHCA, L+M will have access to the infrastructure for population health programming, IT platforms and other innovative health care delivery models to provide evidence-based services.

- **Promote planning that helps to contain the cost of delivering health care services to its residents;**

The Applicants have a shared commitment for strategic planning in the Region. If the Proposal is not approved, L+M will continue to experience financial uncertainty which will inevitably result in L+M not being positioned to address the health care needs of the community to the extent it would otherwise be able to do if the Proposal is approved.

- **Encourage regional and local participation in discussions/collaboration on health care delivery, financing and provider supply;**

L+M's Board is constituted of diverse representatives from the Region and is committed to addressing the health care needs of the community in accordance with its charitable purpose and mission.

- **Promote public policy development through measuring and monitoring unmet need; and**

The Applicants are charitable organizations and, thus, are required and committed to continually assess and meet the health care needs of the community.

- **Promote planning or other mechanisms that will achieve appropriate allocation of health care resources in the state.**

The Applicants are committed to joint strategic planning to avoid unnecessary duplication in services and achieve the most efficient allocation of resources for the Region.

IV. Clear Public Need and Access to Care.

If L+M does not affiliate with Yale New Haven Health pursuant to the statutorily prescribed regulatory timeframe, it will be forced to reduce and or terminate services and consequently, reduce its staffing. A financial downward spiral for L+M would be counterproductive, hard to recover from, and is likely to result in L+M attempting to negotiate with third-party payers for significant rate increases (to cover losses),²⁴ and less access to care for the financially disadvantaged and underserved and most vulnerable members of the L+M community. Currently, the other hospital in the Region, Backus Hospital, is affiliated with Hartford HealthCare, and by virtue of that affiliation, Backus has a significant advantage over L+M with respect to access to capital and innovative care models, technology, specialty networks, physician recruitment, IT platforms and

²⁴ Higher prices are likely to result because of lack of scale, reduction of services and the inability to manage risk.

efficiencies associated with scale that L+M does not and will not have if the Proposal is not approved by OHCA. Thus, if the Proposal is either denied or delayed by OHCA, L+M will not be able to compete with Backus on the same level, and L+M will have no choice but to reduce services thereby negatively impacting the diversity of providers in the Region.

As demonstrated in its Application, L+M serves a large number of individuals who are on Medicaid and provides a significant amount of uncompensated care each year. Given the cuts in reimbursement by the State, L+M is seriously challenged with respect to maintaining access, transforming care and continuing to be a vital and significant employer in the Region. While the Proposal itself will not result in the reduction or termination of services within the Region, the mere delay or denial will have a significantly adverse impact on L+M.

V. Health Care Costs Will Not Be Adversely Affected by the Proposal.

Despite some very misinformed statements made by some regarding the impact that integration will have, or in particular, the impact that this Proposal will have on costs, none of those statements, opinions, positions or directives are based upon the actual facts or knowledge. The Applicants have no ability to increase the reimbursement that they receive from government payers, which for L+M Hospital represents approximately seventy percent (70%) of its payer mix, nor does L+M have the ability to unilaterally decide what reimbursements it receives from commercial payers. Yale New Haven Health does not contract with commercial payers on a system-wide basis, nor does

it negotiate a single DRG payment for all affiliated hospitals.²⁵ As stated in the Application, should this Proposal be approved, L+M's managed care contracts will be separately negotiated for L+M and it will be based upon the costs of care in the Region, not the cost of care of Yale-New Haven Hospital.

Moreover, because reimbursement is shifting from fee-for-service to risk-based contracting, any conclusion that this Proposal will result in an increase in hospital costs is outdated.

The reliance on past (and in some cases quite distant past) merger activity reveals the imperative for a more comprehensive understanding of current market conditions, current merger motivations and more rigorous examination of merger effects to evaluate the likely benefits or competitive risks of current and future hospital transactions. Fundamentally different market conditions mean that past research can be ill-suited to infer the impact of current merger transactions. Past research may not capture dramatic changes ongoing in the healthcare industry, including transformative changes on the provider and insurer side, and the pressures and results of healthcare reform - particularly requirements for new technologies, new business models, innovative payment reform, and reduced reimbursements. Most of these oft-cited studies are based on mergers or data from the 1990s which occurred under substantially different market conditions than those present today. This may lead to incorrect and even misleading inferences on the impact of mergers in today's health care environment.²⁶

There is ample evidence that affiliations like the one proposed here can result in significant cost savings and benefits in the following areas:

- Administrative and overhead savings;
- Reduced costs or reduced rate of cost/expense growth through improved operating efficiency or reduction/elimination of redundant services;
- Improved overall operations and efficiency;
- Realignment of services to achieve greater scale of operations or to improved quality of care delivered;

²⁵ "The slow economic recovery has resulted in a reduction in patient volume and a weakening in payor mix (i.e., there is an increased proportion of revenue derived from Medicaid and Medicare which offer less generous reimbursement than do commercial payors)." See Exhibit C attached hereto.

²⁶ See Center for Healthcare Economics and Policy, *Hospital Realignment: Mergers Offer Significant Patient and Community Benefits* (January 23, 2014) at page 3.

- Reduction of excess capacity;
- Access to capital and improved ability to make necessary investments such as technology and update facilities or services; and
- Ability to maintain or expand services in a community (and thereby maintain quality of services or care and/or access to care).²⁷

It is the position and belief of the Applicants that developing integrated information systems, coordinating care, improving efficiencies, engaging in evidence-based practices and incorporating population health improvements into the L+M culture, will ultimately reduce waste and inefficiencies and thus, decrease medical costs. The bottom line is that the factors that cause price variation include the acuity of the patient, the health of populations served and the underfunding of government-sponsored health care programs, *not* the consolidation proposed herein.

VI. Conclusion.

Recently, efforts by Penn State Hershey Medical Center and PinnacleHealth System to merge were challenged by the Federal Trade Commission. In an attempt to obtain an injunction blocking such merger, the Federal Judge denied the request for the injunction and stated the following, which we believe are relevant:

After a thorough consideration of the equities in play, we find that the majority of these factors weigh in the public interest. The patients of Hershey and Pinnacle stand to gain much from a combined entity that is capable of competing with a variety of other merged and already growing hospital systems in the region. This decision further recognizes a growing need for all those involved to adapt to an evolving landscape of health care that includes, among other changes, the institution of the Affordable Care Act, fluctuations in Medicare and Medicaid reimbursement, and the adoption of risk-based contracting. Our determination reflects the healthcare world as it is, and not as the FTC wishes it to be. We find it no small irony that the same federal government under which the FTC operates has created a climate that virtually compels institutions to seek alliances such as the Hospitals intend hereto. Like the corner store, the community medical center

²⁷ See Center for Healthcare Economics and Policy, *Hospital Realignment: Mergers Offer Significant Patient and Community Benefits* (January 23, 2014) at page 13.

is a charming but increasingly antiquated concept. It is better for the people they treat that such hospitals unite and survive rather than remain divided and wither.²⁸

If this Proposal is approved, the Applicants will be able to accomplish a wide range of objectives: value-based care delivery models; seamless care across all settings; proactive and systematic patient education; workplace competencies and education on population health; integrated, comprehensive IT that supports risk stratification of patients with real-time accessibility; and mature community partnerships to collaborate on community-based solutions. If this Proposal is denied or delayed by OHCA, despite the preponderance of evidence provided to OHCA by the Applicants, not only does the Region suffer, but the entire health care delivery system in the State of Connecticut suffers for all the reasons stated herein. For all of the above reasons, I urge OHCA to approve this Application.

²⁸ See Federal Trade Commission and Commonwealth of Pennsylvania vs. Penn State Hershey Medical Center and Pinnacle Health System, Civil Action No.: 1:15-cv-2362, (May 9, 2016).

I hereby adopt this pre-filed testimony as my own.

HEADLINE: Yale-New Haven Hospital U.S. News ranking remains high but dips slightly

BYLINE: Ed Stannard

BODY:

NEW HAVEN >> Yale-New Haven Hospital is one of the nation's top- performing hospitals in eight of 16 specialties, according to U.S. News and World Report's latest rankings, but has dropped slightly in rank this year in all but psychiatry.

In that specialty, Yale-New Haven rose from No. 11 nationally to No. 10.

"It's not quite as many specialties as they were ranked in last year," when Yale-New Haven made the top 50 in 11 specialties, according to Ben Harder, chief of health analysis for U.S. News and World Report.

The hospital did not make U.S. News' honor roll of the top 15 hospitals nationally; No. 1 on that list is Massachusetts General Hospital in Boston. Only 137 hospitals, less than 3 percent of the nation's institutions, earned a national ranking in at least one specialty, U.S. News reported.

However, Yale-New Haven ranked No. 1 in the state this year, followed by Hartford Hospital and Danbury Hospital.

The complex care specialties in which Yale-New Haven made the top 50 were:

- Diabetes and endocrinology, No. 8.
- Psychiatry, 10.
- Pulmonology, 21.
- Gastroenterology and gastro-intestinal surgery, 22.

Yale-New Haven Hospital U.S. News ranking remains high but dips slightly New Haven Register July 22, 2015
Wednesday

- Geriatrics, 25.
- Gynecology, 27.
- Cancer, 42.
- Ear, nose and throat, 43.

The high-performing specialties at Yale-New Haven that did not make the top 50 were cardiology and heart surgery; nephrology; neurology and neurosurgery; orthopedics; and urology. The "high performing" rating means they did better than 90 percent of U.S. hospitals, Harder said. The hospital went unranked in ophthalmology, rehabilitation and rheumatology.

Dr. Thomas Balcezak, chief medical officer for Yale-New Haven, said, "We continue to rank very highly in most specialties."

He pointed out that U.S. News "changes slightly the methodology every year. ... They try to do it in such a way that they can rank a high number of U.S. hospitals."

In addition to the complex care procedures, U.S. News rated the nation's hospitals in five "common care" procedures that most hospitals perform, whether they are trauma centers like Yale-New Haven or less specialized hospitals. While it ranks high in specialties such as diabetes and gynecology, Yale-New Haven is rated average in heart bypass, hip replacement and heart failure and below average in knee replacement and chronic obstructive pulmonary disease. "Yale did not distinguish itself," Harder said. "It was average or below average in each of those areas."

Smaller hospitals that do not specialize in complex diseases and procedures tend to do better in the common care areas, Harder said. For example, Waterbury Hospital was "not ... ranked in any of the adult specialties, and yet they did perform very well" in hip and knee replacements -- "better than 90 percent of the hospitals in the country," Harder said.

Lawrence + Memorial Hospital, which last week agreed to be acquired by the Yale New Haven Health System, was rated highly in hip replacements and average in knee replacements, heart failure and COPD, he said. Patients should look for at least an average ranking in such common procedures, Harder said.

Rating these procedures is important, Harder said, because "it helps patients and their physicians find the right hospital given their particular circumstances."

"We're proud of all of our services," Balcezak said -- "services that go up" in rankings, as well as "services that go down. They're excellent across the continuum."

Among the measures U.S. News uses to rate the top hospitals is patient safety. Yale-New Haven's grade of 2 out of 5 pulled down its specialty rankings, but the hospital did improve from a grade of 1 last year. "They did, in our analysis, improve on that measure," Harder said.

Balcezak said that "particularly in hospitals that have more complex kinds of patients" with "other challenges ... 95 or 98 percent performance only puts you in the 50th percentile.

"It's usually a documentation issue; it's not a clinical care issue," he said.

Balcezak said U.S. News uses Medicare billing data to measure patient safety and, "It isn't sensitive to true safety measures."

The Mayo Clinic in Rochester, Minnesota, was ranked No. 2 nationally, followed by Johns Hopkins Hospital in Baltimore and UCLA Medical Center in Los Angeles, which tied for third.

Yale-New Haven Hospital U.S. News ranking remains high but dips slightly New Haven Register July 22, 2015
Wednesday

Yale-New Haven Hospital has 1,571 beds in its York Street and St. Raphael campuses and 1,664 doctors on its rolls, according to U.S. News.

HEADLINE: YALE-NEW HAVEN TOPS RANKING OF CONNECTICUT HOSPITALS;
U.S. NEWS & WORLD REPORT

BYLINE: MIRANDA ZHANG, Courant Staff Writer

BODY:

Yale-New Haven Hospital ranked No. 1 in Connecticut in the latest best hospitals ranking released Tuesday by U.S. News & World Report.

None of the hospitals in Connecticut appeared on the overall national Honor Roll, a list of the nation's best 17 hospitals, led by Mayo Clinic in Rochester, Minn.

Yale-New Haven, however, was ranked nationally in 11 of 16 specialty categories. Each category lists the top 50 hospitals nationwide.

Yale-New Haven's top national rankings were No. 7 in diabetes and endocrinology -- it was No. 6 last year -- and No. 11 in psychiatry, same as last year.

"It's a very welcomed recognition, and it's difficult to earn the success in terms of reputation, high technology and clinical expertise," said Peter Herbert, chief medical officer at Yale-New Haven Hospital. The rankings are important to patients looking for excellent expertise, reputation and complex care, Herbert said.

Hospitals that are not nationally ranked in a specialty but have scores in the top 25 percent of all hospitals are recognized as high performers in that specialty.

Hartford Hospital, which placed second in the state, led all Connecticut institutions with a high performance ranking in 11 categories.

"It is an honor to be recognized once again as being among the best in the region," Stuart Markowitz, president of Hartford Hospital and senior vice president of Hartford HealthCare, said in a prepared statement. "It solidifies our

YALE-NEW HAVEN TOPS RANKING OF CONNECTICUT HOSPITALS; U.S. NEWS & WORLD REPORT
Hartford Courant (Connecticut) July 15, 2014 Tuesday

reputation for excellence in several service line areas, thanks to the steadfast dedication of every single Hartford Hospital staff member to deliver the best care in the safest environment."

Seven other Connecticut hospitals received numbers for high performance: St. Vincent's Medical Center in Bridgeport, St. Francis Hospital and Medical Center in Hartford, Middlesex Hospital in Middletown, Danbury Hospital, Lawrence + Memorial Hospital in New London, Stamford Hospital and William W. Backus Hospital in Norwich.

The U.S. News & World Report has been publishing the annual hospital rankings since 1990.

DATELINE: NEW HAVEN, CT

BODY:

The following information was released by Yale-New Haven Hospital:

Yale-New Haven Hospital continues to rank among the top U.S. hospitals, according to U.S. News and World Report's annual "America's Best Hospitals." Of the nearly 5,000 hospitals surveyed, YNHH ranks nationally in 10 of 16 specialties.

Diabetes and endocrinology ranks in the nation's top 10 at #6, while psychiatry is at #11, gynecology at #14, and gastroenterology and GI surgery at #18. YNHH is also the only Connecticut hospital to be included in the U.S. News and World Report national listings and is among the highest ranked in the region.

In addition, Yale-New Haven is ranked among the best nationally in six other medical specialties: cancer, cardiology and heart surgery, ear, nose and throat, geriatrics, nephrology and pulmonology.

"For 22 consecutive years, Yale-New Haven's consistent presence in the U.S. News and World Report annual rankings shows the national recognition of our skilled physicians, nurses and staff and their dedication to providing safe, high-quality care to our patients and families," said Peter Herbert, MD, chief of staff at Yale-New Haven Hospital. "Across the entire hospital, this honor is a direct reflection of their hard work, compassion and commitment to the best patient care."

Summary

Providing quality healthcare services at an affordable cost will be integral to a hospital's financial strength as the sector begins a historic shift to value-based reimbursement after decades of following volume-based incentives. Measuring and proving value will become necessary for healthcare systems to maintain operating stability and distinguish themselves as market leaders.

Not-for-profit hospitals¹ are attempting to shift to a new quality-based business model that is driven by longer-term trends, notably excessive cost inflation, and by near-term reforms in government policies. The sector is facing reimbursement reductions and incentive changes imbedded in The Patient Protection and Affordability Act (ACA), in addition to cuts associated with federal deficit reduction. Private and government payers are increasing their emphasis on value by introducing risk-based contracts that create incentives for hospitals to achieve certain quality and cost targets or, in some cases, face financial penalties. Individuals and businesses have become more discerning in their healthcare purchases since the recession. Both payers and purchasers will accelerate their demand for high value healthcare products with the start of mandated insurance exchanges in 2014.

This report discusses two broad topics of creating value and measuring value.

» Creating value - there are four management objectives hospitals are pursuing during the business model shift:

1. Achieve breakeven performance with Medicare rates
2. Build scale through non-traditional methods
3. Improve patient experience
4. Cultivate informed leadership

¹ Unless noted otherwise, the term "hospitals or providers" used in this report includes single site hospitals as well as multi-site hospital systems

- » Measuring value - there are six new credit indicators we will use to measure quality and demand in a value-based payment structure:
1. Unique patients
 2. Covered lives
 3. Employed physicians
 4. Medicare readmission rates
 5. All payer readmission rate
 6. Risk-based revenues

Four Management Objectives to Create Value

There are four common objectives hospitals are seeking to create a high value healthcare product.

1. Achieve breakeven performance with Medicare rates

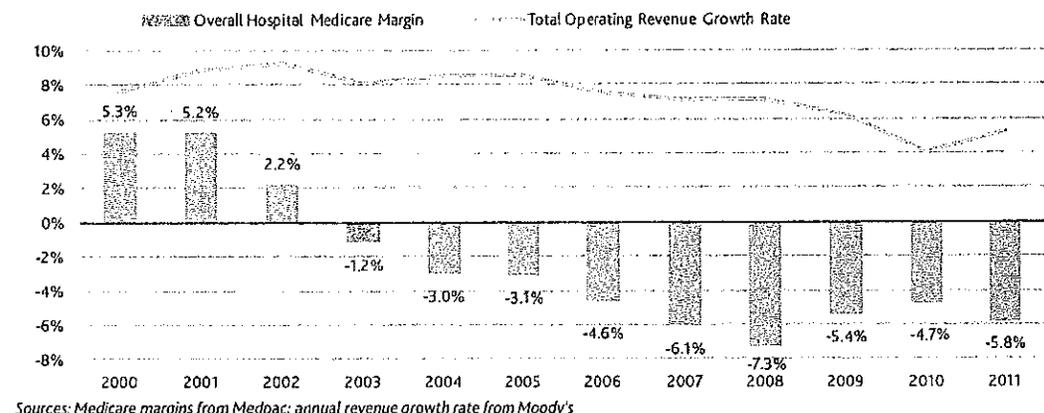

Expense reduction strategies have moved beyond removing "low hanging fruit" which has been a key strategy to improve operating efficiency since the 2008-09 financial crisis. Today's expense strategies involve overhauling operational processes with the aim of achieving breakeven performance with Medicare despite lower Medicare reimbursement rates.

Medicare is the largest single payer for most not-for-profit hospitals. Our medians show Medicare provided 43.7% of gross patient revenues for FY 2011. Most Moody's-rated hospitals report that they incur losses with Medicare on a total cost basis, an assertion that data from Medicare Payment Advisory Commission (Medpac) supports.

As Exhibit 1 shows, the most recent Medpac data available show that hospitals recorded a -5.8% overall margin on Medicare in 2011, continuing the trend of losses since 2003. Declining revenue growth during this same period increased pressure on hospitals to lower their costs, which many did through headcount reductions, revenue cycle improvements and other steps that were relatively easy to achieve compared to the more fundamental cost realignments now beginning.

EXHIBIT 1

Overall Medicare Margins Show Losses Since 2003 as Revenue Growth Rates Declined

One of the most prevalent objectives is to reach breakeven performance with Medicare rates (on a total cost basis) by lowering costs. Some hospitals compute what the financial gap is to reaching breakeven performance by assuming every patient (including commercially insured) is paid at Medicare rates. This approach is based on the belief that over time blended rates from all payers, including commercial, exchange-based products, Medicaid, and self-pay patients, will equate to Medicare rates.

One specific strategy to lower costs is improving the flow of patients between clinical areas within the hospital. Discharge planning with the patient and family is also done to ensure that medications and post-care treatments are well understood, which is particularly important because of Medicare penalties for unplanned readmissions (discussed further in this report). Finally, many hospitals are opening lower-cost units designated exclusively for 23-hour observation patients who consume the same resources as an inpatient admission but for whom reimbursement is usually much less.

2: Build scale through non-traditional methods

Hospital management teams frequently face the question of optimal size. A hospital's strategy for growth will depend on the local market dynamics and long-term goals to support its charitable mission and provide high quality care that is affordable while remaining financially strong. Achieving scale may include expanding outside of a hospital's traditional geographic service area into a new state, city or suburb. A hospital may determine it must expand from a single site facility to multiple locations in order to grow its covered lives and gain greater efficiencies.

We expect full-asset mergers and acquisitions to continue.² Hospitals will also pursue scale through non-traditional consolidation strategies, which can diversify revenues while building size and expertise in managing a population. These contemporary consolidation strategies are taking various forms (see Exhibit 2). Our analysis of these new strategies takes a case-by-case approach. Rating implications will depend on the near-term financial and capital investment compared to the long-term impact on hospital performance and debt coverage.

EXHIBIT 2

Four Examples of Non-Traditional Diversification Strategies

Strategy	Examples	Rating implications
Create clinical centers of excellence; market to new purchasers of healthcare services	Wal-Mart's exclusive contracts with 6 not-for-profit healthcare systems for quaternary services*	New tertiary volumes from markets outside traditional service area viewed favorably
Diversify revenues by expanding into new geographic service areas	Christus Health (A1 stable, \$3.7 billion revenues) adds healthcare operations in Mexico and Chile	Further diversification away from Texas and Louisiana viewed favorably
Create healthcare collaborative of independent hospitals to coordinate purchases, improve patient access and outcomes	BJC Collaborative comprised of: BJC HealthCare (Aa2 stable, \$3.8 billion revenues), Saint Luke's Health System (A1 stable, \$1.2 billion revenues; CoxHealth (A2 stable \$1.9 billion revenues), Memorial Health System (A1 stable, \$749 million revenues)	Credit positive if savings can be demonstrated
Create a network of like-size rural hospitals for supply savings, billing services, reference laboratory testing and other services	Aspen Valley Health District (Baa2 stable, \$65 million revenues) is part of Western Healthcare Alliance	Credit positive; savings through group purchasing already demonstrated

Source: Moody's

* Participating hospitals are the following: Scott & White Healthcare (A1 stable); Cleveland Clinic (Aa2 stable); Mayo Clinic (Aa2 stable); Virginia Mason Medical Center (Baa2 stable); Geisinger Health System (Aa2 stable); Mercy Hospital (Springfield, MO, part of Mercy Health System, Aa3 stable)

² Please see "New Forces Driving Rise in Not-for-Profit Hospital Consolidation" March 2012 for more discussion on traditional mergers and acquisitions and their credit implications.

Some hospitals are returning to business lines previously divested, such as home health, rehabilitation and skilled nursing. Instead of taking ownership, however, many are entering joint venture arrangements with post acute care providers. These services will take on greater importance when the Centers for Medicare and Medicaid (CMS) implements bundled payments (pilot programs begin January 1, 2013), whereby a hospital is reimbursed for a single episode of care. The hospital must distribute the single payment to all parties involved in the delivery of care, including physicians and pre- and post- care providers.

Size and scale are important credit features, particularly because creating a high value healthcare system means having multiple patient access points and a continuum of care. One proxy for measuring scale is total operating revenues. Total operating revenues accounts for the highest weighting (25%) in our methodology and scorecard among the 10 financial and demand metrics.³

3: Improve Patient Experience

The third objective that hospitals are commonly pursuing to increase value is improving the patient experience. This strategy is a response to three main forces: (1) more selective consumers who are looking for high quality and convenience at an affordable price; (2) increasing competition for patient loyalty, especially in non Certificate-of-Need, high growth markets; and (3) new Medicare incentive payments.

Beginning October 1, 2012, Medicare rewards hospitals for favorable patient satisfaction scores through the Value Based Purchasing (VBP) program. The VBP is based on whether a hospital meets or exceeds the performance standards established with respect to the measures. With this program, CMS rewards hospitals based on actual quality performance on measures, rather than simply reporting data for those measures.⁴ The VBP withholds Medicare inpatient payments to hospitals by 0% to 1% and will redistribute the funds to those hospitals that achieve the quality measures.⁵

Hospitals are using a variety of strategies to improve the patient experience. Examples include care navigators to accompany a patient through the course of his/her hospital treatments and team-based care models to determine a patient's treatment plan. Some hospitals are using social media applications to increase their brand and promote convenience, particularly with respect to emergency room waiting times. Some hospitals have added a Chief of Patient Experience in the c-suite to oversee these strategies.

Information technology (IT) plays a big role in coordinating care to improve the patient experience. Many hospitals have invested heavily in IT to create a single electronic medical record (EMR) that follows the patient through his or her continuum of care. Hospitals stand to gain federal reimbursement of their EMR costs through the American Recovery and Reinvestment Act (ARRA) stimulus plan if they demonstrate meaningful use of their EMRs. Additionally the migration to a single IT platform and away from a "best of breed" multi-vendor strategy will eliminate over-customization of software systems and the need for "bolt-on" applications to create interoperability between various platforms.

Our median financial data show that hospitals have increased their capital spending following a decline during the last recession while annual healthcare debt issuance has increased (Exhibit 3). Management

³ Please see "Not-for-Profit Healthcare Rating Methodology" March 2012

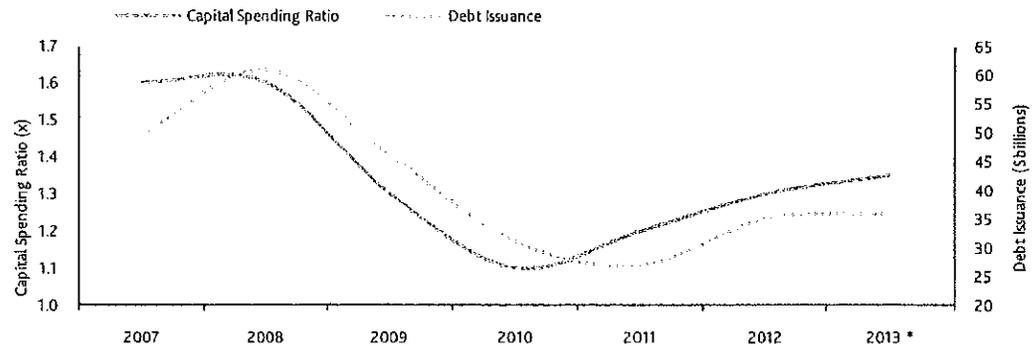

⁴ Federal Register, <http://www.gpo.gov/fdsys/pkg/FR-2011-05-06/html/2011-10569.htm>

⁵ Kaiser Family Foundation, <http://healthreform.kff.org/document-finder/cms/cms-final-rule-establishing-the-hospital-value-based-purchasing-program.aspx>

teams are taking a more deliberate approach when planning capital needs with a noticeable movement away from bricks and mortar. We estimate that a growing share of the capital spend is for IT at one-quarter to one-third of a hospital's annual budget. IT spending is typically not a reasonable use of bond proceeds, given that the assets are short-lived.

EXHIBIT 3

Capital Spending and Debt Issuance Increase Post Recession

Source: Capital spending ratio from Moody's FY 2011 Hospital Medians (2008-2011) and FY 2012 Preliminary Medians; Healthcare debt issuance from Bond Buyer. Note, sample sets are different; healthcare issuance includes refunding and new money issuance

* 2013 Moody's estimate

Effective management involves identifying IT needs and funding sources and providing projections that show operating expenses associated with the installation. Some hospitals have shown stable financial performance during a period of IT installation while others have seen performance decline beyond initial expectations. Rating pressure may be thwarted if cash resources remain intact or if we believe the fundamental position of the provider has not been impaired.

4: Cultivate Informed Leadership

It is undeniably clear that effective management and governance is paramount to creating high value healthcare systems. Governance is one of the five key factors in our not for profit hospital methodology and strong governance is a common characteristic of financially successful and higher rated hospitals.

Simply stated, healthcare reform is a federal mandate to replace an antiquated and unsustainable reimbursement system with a more rational payment system based on value. The ACA is driving providers to re-examine their business model with an accelerated urgency. The 1984 conversion to a prospective payment system from cost-based reimbursement was a significant change, as was the Medicare rate reduction from the Balanced Budget Act of 1998. Likewise, the most recent recession led to unprecedented patient volume declines and unexpected growth in uncompensated care. Each of these events led to unplanned mid-course changes during the course of a single fiscal year. In some cases, hospitals re-adjusted budgets multiple times during the year, especially during the peak of the last recession.

The new ACA payment models will test management and governance in a profound way, particularly due to the ambiguity that exists in many of the law's requirements. The most successful hospitals will be able to quickly and effectively make changes mid course and re-adjust longer-term plans to respond to the rapidly changing dynamics in the industry.

Because of the process changes that may be required, many hospitals are adding executives and board members with atypical skills and backgrounds, including individuals with engineering and manufacturing backgrounds. Hospitals are recruiting managers with corporate backgrounds who bring consolidation expertise. Additionally, they are adding management and board members who come from industries with a heavy reliance on technology, particularly relevant given the large IT investment most hospitals are making.

Measuring Value: Moody's New Indicators

Earlier this year we introduced several new indicators to more accurately capture the changing payment and care models. These new indicators are part of our commitment to publish forward-looking, anticipatory ratings and research that look beyond the near term.

Our new indicators complement our historical volume-based statistics and add new ways to measure value.⁶ In the coming months we will publish additional research on these new metrics that answers various questions received since announcing these new indicators. Over time we anticipate adding more metrics as new payment models evolve.

Three of the new indicators measure demand: unique patients, covered lives and employed physicians. Three of the new indicators measure reimbursement risk: Medicare readmissions rates, all-payer readmission rates and risk-based reimbursement contracts.

New measurements of demand

- » **Unique patients** captures the number of individual patients who receive care at the hospital in a 12-month period, irrespective of inpatient or outpatient care. Unique patients differs from annual hospital admissions which count an individual's multiple stays at a hospital in a 12-month period. We expect that unique patients will be a key measurement of a hospital's market capture as population health management accelerates.
- » **Covered lives** is similar to unique patients, measuring the number of individuals or beneficiaries that a hospital is responsible for, either through an exclusive contract, ACO contract, or through an ACO-like structure through Medicare, Medicaid and commercial payors. Covered lives also includes the members and beneficiaries of a hospital-owned health insurance plan.
- » **Employed physicians** serves as a cursory predictor of referrals. We count the number of physicians paid by the hospital or associated foundation or clinic through a salary or management fee. We include hospital-based physicians and hospitalists but exclude faculty practice groups and contracted groups.

New measures of reimbursement risk

- » **Medicare readmission rate (%)**: On October 1, 2012 CMS began penalizing hospitals with high Medicare readmission rates for three clinical diagnoses: congestive heart failure, heart attack and pneumonia. Medicare readmissions reflect readmissions within 30 days of discharge as a percentage of total Medicare admission excluding readmissions that are part of the plan of care (based on CMS criteria and definition as of reporting date).

⁶ Please see "New Analytical Indicators for a New Era in Healthcare" February 2013

- » **All-payer readmission rate (%):** We fully expect that commercial payers will follow Medicare, placing a hospital's entire payer mix at risk. All-payer readmissions are within 30 days of discharge excluding readmissions that are part of the plan of care and include all payors and all clinical diagnoses.
- » **Risk-based revenues (%):** We have added a new section in our annual data form that asks hospitals to provide data on the type of reimbursement methodology in its contracts. Along with the traditional forms of payment such as DRGs, per diems and traditional capitation in which hospital receives a per member/ per month payment, we are also including a risk-based revenue category. Risk-based revenues includes most of the emerging reimbursement models such as bundled payment and pay-for-performance, whereby reimbursement is based on the ability of the provider to delivery care at a cost lower than what is agreed upon.

Summary

The growing trend toward not-for-profit hospital consolidation is positive for the financial health of many, but not all, hospitals. Consolidation offers the promise of greater operating efficiency and risk diversification across larger organizations, likely leading to stronger and more stable bond ratings for affected hospitals. However, given current looming headwinds confronting the sector, those hospitals left out of consolidations, especially smaller stand-alone hospitals that cannot match the financial, managerial or market access capabilities of larger multi-hospital systems, will face greater negative rating pressure going forward¹. For bondholders or lenders, consolidation can also provide an exit strategy if bonds or loans are fully redeemed or assumed by the consolidator.

Akin to the last pronounced wave of hospital consolidation in the late 1990s to mid 2000s, the forces behind the current round of consolidation are numerous, with both similarities and differences. Reimbursement challenges, spiraling healthcare costs, and a slow economic recovery are some of the market forces that have ignited the national explosion of consolidation, much like in the past. Driven by healthcare reform and an unsustainable payment system, the deep and impactful financial changes that are undoubtedly coming have led many hospitals to seek long-term partnerships. The current consolidation participants vary greatly and consolidation models are different, each with unique credit risks.

In the past, hospital mergers and acquisitions (M&A) was the primary vehicle to consolidation with a goal to increase market share and leverage with payers. Gaining size and scale remains a key reason to consolidate. Because the opportunities to gain leverage and higher rates from commercial payers are quickly dissipating, size and scale are now a more important means to gaining greater efficiencies and driving waste and costs out of the delivery system. The ability to demonstrate lower costs while providing high quality care will be the key driver in governmental and commercial reimbursement going forward. Physician alignment, another form of consolidation that many are pursuing, is also a strategy to control costs and drive improved quality by adopting evidence-based medicine.

¹ See Moody's *U.S. Not-For-Profit Healthcare Outlook Remains Negative for 2012*, January 2012

This report outlines the drivers of current hospital consolidation strategies and what Moody's looks for when evaluating these strategies and their impact on bond ratings. We will publish additional research on our rating analysis of consolidations, including specific research on hospital-physician alignment strategies.

The New World of Consolidation

The Drivers: Weak Economy, Insurmountable Federal Deficit and Looming Reimbursement Changes New to the Equation

Many of the forces behind today's consolidation are similar to those in the past. However, this cycle's deeper and more prolonged economic downturn is the key backdrop driving the recent wave of consolidations (see figure 1). Data from Moody's FY 2010 medians showed a -0.4% decline in hospital admissions from FY 2009, the first time we have observed such a decline even during other economic downturns. Inpatient volumes are down for many hospitals, while uncompensated care has increased, creating greater financial challenges and contributing to many recent downgrades. Access to the capital markets has become more difficult for smaller and lower-rated hospitals, driving the need for many to seek a partner.

Spiraling healthcare costs and the insurmountable federal deficit necessitate reducing waste and gaining efficiencies through consolidation. Medicare reductions, such as those legislated by the Balanced Budget Act of 1997, drove much of the consolidation in the late 1990s and Medicare reductions continue to loom. In 2010, national healthcare expenditures represented 17.9% of GDP² and The Patient Protection and Affordable Care Act (federal healthcare reform) is focused on reducing Medicare costs. Annual reductions to Medicare inpatient hospital payment rates are now hardwired into the Medicare payment formula. Hospitals are also facing lower Medicare reimbursement related to bundled payment programs, readmissions, and continued recovery audit contractor (RAC) reviews that seek to recoup overpayments made to hospitals. Bundled payment programs in particular will reimburse hospitals a flat amount that must cover hospital, physician, and post-acute care costs, driving the need for greater efficiencies.

During the last consolidation wave in the late 1990s to mid 2000 period, hospitals generally received favorable annual increases from commercial payers that subsidized losses with governmental payers. Hospitals are now facing significant reimbursement changes from commercial payers that will force changes to how hospitals operate. Most hospitals now report moderate to low single-digit rate increases after years of double-digit increases as a result of leverage gained from consolidation. Some large hospital systems have proactively negotiated global cost and quality contracts that include a reduction in reimbursement rates and shifts much of the financial risk to the hospital. This new payment platform requires hospitals to achieve greater cost reductions and efficiencies to manage this risk, much as capitation did in the 1990s.

Managing increased regulation and absorbing the costs of regulation is another reason to consolidate. Already subject to close regulatory scrutiny, hospitals face even tighter regulations stemming from healthcare reform. Medicare more closely scrutinizes more closely hospital admissions, readmissions and in-hospital patient safety violations, for example.

Largely absent in the last consolidation wave, significant pension liabilities for hospitals with defined benefit plans is a new issue in consolidation discussions. Falling discount rates, lackluster long-term

¹ Centers for Medicare & Medicaid Services

investment returns and federal requirements to be 80% funded have created overwhelming pension obligations relative to unrestricted resources that many hospitals cannot afford, driving the need for a capital partner.

FIGURE 1

Factors Behind Current Consolidation Strategies Are Different

Historical Factors:	Current Factors:
1 Medicare reimbursement pressures	1 All payers creating reimbursement pressures
2 Increased need for capital for inpatient facilities	2 Increased need for capital for outpatient facilities, information technology
3 Possibility that tax-exemption benefits will diminish	3 Pressure to justify tax-exempt status
4 Limited access to capital for lower-rated hospitals	4 Costly access to capital for smaller hospitals
5 Need to reduce operating expenses	5 Need for fundamental changes in healthcare delivery
6 Need to increase admissions, market share	6 Need to increase covered lives
7 Need for size and scale to leverage with payers	7 Need for size and scale to gain greater efficiencies
	8 Costly regulatory and compliance changes
	9 Riskier debt structures with costly interest rate swaps, onerous bank covenants
	10 Need for greater alignment with physicians, payers to create ACO or ACO-like structures
	11 Spiraling healthcare costs and insurmountable federal deficit
	12 Large unfunded pension liabilities
	13 Prolonged economic downturn

The Consolidators: New Players Join Traditional Participants

In this cycle, there is a noticeable difference in the type of participants involved in consolidations. In addition to the traditional market consolidators, such as large not-for-profit or established for-profit hospital companies, new players have entered the hospital industry.

One of the more interesting developments is the expansion of health insurance companies into healthcare services. Since the passage of healthcare reform, there have been several mergers, acquisitions and partnerships of insurers and provider systems with the goal of reducing healthcare costs and improving quality. The proposed affiliation between Highmark, Inc. in western Pennsylvania and West Penn Allegheny Health System is one of the largest movements of a payer into the hospital industry. Other recent examples include Humana's December 2010 acquisition of Concentra, which provides physical therapy, urgent care and occupational medicine, and WellPoint's August 2011 acquisition of CareMore Health Plan, a Medicare Advantage plan and clinic network³.

Hospitals and payers are affiliating to form new coordinated global healthcare insurance plans, such as Banner Health Network and Aetna in Arizona. Steward Health Care and Tufts Health Plan, both in Boston, have also created a narrow network to provide healthcare services at a lower cost. We expect payer and provider affiliations to become more common as additional aspects of healthcare reform are defined and implemented and the demand for low cost/high quality healthcare escalates.

³ See Moody's *Affiliation with Highmark Would Be Credit Positive for West Penn Allegheny Health System*, July 2011.

Private equity is not new to the hospital industry as many private equity funds have long backed some of the largest for-profit hospital companies, including HCA and Vanguard. However, two new private equity firms recently entered the hospital ownership model. In 2010, Cerberus acquired six-hospital system Caritas Christi Health System in Boston, now called Steward Health Care, and continues to pursue a growth strategy through the acquisition of other not-for-profit hospitals. In 2011, Oak Hill Capital Partners established a joint venture with Ascension Health, the largest faith-based hospital system in the country, to acquire distressed Catholic hospitals. If these ventures prove to be successful, we anticipate more private equity firms may enter the hospital industry through acquisition.

The Models: Innovative but not without Risk, Credit Implications Depend on a Number of Factors

We expect that full-asset mergers or acquisitions will be the most common form of consolidation strategies over the near term although some new models are evolving, each with different credit risks and implications for bond ratings (see figure 2).

In acquisition strategies, the "cost" of the acquisition may include debt and other obligations of the acquired hospital, such as pension liabilities, along with a multi-year capital commitment. When a for-profit hospital acquires a not-for-profit hospital, the debt is redeemed and the rating is withdrawn upon receipt and review of redemption documents.

In many not-for-profit merger strategies, the debt of both organizations is refinanced by debt of the newly combined organization, or the higher-rated entity may guarantee or assume the debt of the lower-rated provider. In other cases, each hospital may join each other's obligated group, effectively creating one new credit group. We will assess the impact of the guaranty on the higher rated credit or the creditworthiness of the combined organization. Sometimes the different debt securities of the merging hospitals are not changed, warranting a determination of the near-term and long-term impact on each borrower's rating.

Joint ventures between not-for-profit and for-profit healthcare systems are emerging across the country. The percentage of each party's ownership interest in the operations usually determines a hospital's tax status. In most joint ventures of this type, the for-profit company usually has majority ownership, which leads to redemption of all debt and exit strategy for bondholders. Health Management Associates, LHP Hospital Group and Lifepoint have engaged in this joint venture strategy usually with rural not-for-profit community hospitals, and we expect this trend to continue.

Joint operating companies (JOCs) or joint operating agreements (JOAs) between not-for-profit hospitals largely function like a full asset merger. Our assessment mostly weighs the strength of security on the bonds and which joint operating partner assumes the debt obligation. Accordingly, we evaluate the creditworthiness of a JOC or JOA if they provide security for the debt. As we have seen in the past, disruptions may occur if management and governance roles are complex or not clearly defined, such as requiring multiple approvals from multiple boards. In one instance, management at the JOA had to seek approvals from three different boards for capital spending, budgets, and strategies, creating an onerous process and ambiguity as to which board had final authority.

We expect to see some of the larger systems create separate obligated groups, particularly those that have a faith-based mission but want to merge with secular hospitals. Other not-for-profit systems have created joint ventures with for-profit companies to assist distressed hospitals with their financial and capital needs. Finally, some not-for-profit systems have different obligated groups largely because of state regulatory issues. Catholic Health East, for example, is the sole corporate member of St. Peter's Health Partners in Albany, NY. New York regulation currently prohibits hospitals from being

obligated on the debt of a corporate parent that is located outside of the state. Nonetheless, the Baa2 rating assigned to St. Peter's debt reflects the shared benefits of being part of a national system while Catholic Health East's A2 rating reflects its strong geographic diversity. Our ratings reflect the creditworthiness of the security pledged to the bondholders, which includes the impact of non-obligated entities on the obligated group, requiring an analysis of the entire enterprise to understand the management, governance, strategic and financial relationship among the various entities⁴.

Irrespective of the model used, management teams should be able to engage in much better financial planning than in the past due to better technology to assess the short-term and long-term financial risks. These tools include much more sophisticated software tools to assess costs and clinical outcomes, and to produce more detailed financial data.

FIGURE 2 Consolidation Models Have Varied Rating Impact

Consolidation Model	Credit Positives	Credit Negatives
1 Acquisition of a not-for-profit hospital by a for-profit hospital	100% debt repayment	N/A as rating is withdrawn
2 Acquisition of a not-for-profit hospital by larger not-for-profit hospital	100% debt repayment	N/A as rating is withdrawn
3 Merger between not-for-profit hospitals: - scenario 1: debt remains outstanding for both hospitals with no change in debt security - scenario 2: debt is guaranteed by higher rated hospital - scenario 3: each hospital joins the other's obligated group	<ul style="list-style-type: none"> » Greater synergies as a larger system with critical mass, particularly if in same or adjacent markets » Ability to spread costs over a larger enterprise » Greater diversification of cash flows » Greater access to capital as a larger enterprise » May result in higher rating for both organizations either immediately or over time » Upgrade of lower rated hospital to that of higher rated hospital if guaranty meets Moody's methodology and Moody's determines there is no impact to the guarantor's rating » May result in higher rating for both organizations either immediately or over time 	<ul style="list-style-type: none"> » Hospital may lose local control over strategic direction and expenditures once part of a larger system; more restricted ability to determine capital spending may result in loss of market share » Increase demands on finite capital as part of a larger system » Short-term merger difficulties, such as medical staff integration or cultural differences » Governance issues of legacy hospitals; "us" versus "them" mentality » Financial disruptions if financial systems are different, or reserve methodologies are different » Downgrade may occur if the performance of the lower rated hospital weakens the creditworthiness of the higher rated hospital » Downgrade may occur for the higher rated hospitals if the performance of the lower rated hospital weakens the creditworthiness
4 Affiliation between payer and not-for-profit hospital (no change in debt security)	<ul style="list-style-type: none"> » Access to larger unrestricted resources » Benefits of joining larger enterprise with financial expertise » May result in upgrade of hospital's rating if financial performance improves over the longer term 	<ul style="list-style-type: none"> » Untested strategy for both payer and provider » Potential misalignment of focus and resources if mission is unclear and goals conflict, leading to a downgrade

⁴ See Moody's *Not-for-Profit Hospital and Health Systems Rating Methodology*, January 2008

FIGURE 2
Consolidation Models Have Varied Rating Impact

Consolidation Model	Credit Positives	Credit Negatives
5 Joint operating companies or agreements between not-for-profit hospitals	<ul style="list-style-type: none"> » Nearly the same as a full asset merger » Upgrade may occur if debt is guaranteed by the larger JOC hospital 	<ul style="list-style-type: none"> » Disruptions may occur if leadership and governance roles are blurred or unclear from the start; multiple boards may create governance issues and inability to execute strategies
6 Joint ventures with between not-for-profit hospitals and for-profit hospitals	<ul style="list-style-type: none"> » Likely the same as an acquisition with 100% debt repayment 	N/A as rating is withdrawn
7 Joint ventures between not-for-profit hospitals with for-profit hospitals to form limited liability company (LLC) for growth strategy	<ul style="list-style-type: none"> » Incremental cash flow; geographic diversification 	<ul style="list-style-type: none"> » Credit implications may be present depending on the strategic and financial linkages of the LLC to the not-for-profit system, such as debt guarantees or potential capital calls; use of system's resources

Consolidation Through the Lens of a Bond Rating

For all types of consolidation models, our analysis incorporates the five key rating factors in our general rating methodology for not-for-profit hospitals. Below is a list of the key areas Moody's assesses within these broad rating factors. More detailed research on how we assess hospital consolidations will be forthcoming.

1. Governance and Management

- » Clarity of roles for senior management team including the CEO, CFO and medical staff and nursing leadership
- » Composition of parent and subsidiary boards and clearly defined reserve powers
- » Extent of centralized functions, coordination and control over system entities
- » Likelihood of successfully forming a cohesive governance structure that provides unified direction and avoids conflict caused by historical allegiances
- » Ability of the board to execute strategies and respond to unforeseen challenges quickly
- » Adequacy of disclosure practices to all stakeholders including bondholders

2. Market Position

- » Integration of physician leadership to support the consolidation and goals to engage physicians in the planning and execution stages
- » Plans to engage and align with community and teaching medical staff, employed and independent physicians, and small- and large-group practices
- » Strategies to address merger of unionized and non-unionized hospitals
- » Goals to achieve market share growth, increase covered lives

3. Operating Performance

- » Integrated operating, financial and capital plans that outline the short-term risks as well as the expected long-term benefits of the consolidation, including service and facility consolidation or coordination, IT interoperability and medical staff compatibility
- » Multi-year projections based on conservative assumptions of reimbursement, volumes and expense reductions
- » Scenario planning in the event of an economic downturn or unforeseen challenge and strategies to respond to these events
- » Thorough review by management of methodologies between the hospitals to assess accounting differences in areas such as charity care policies, provision for bad debt, discount policies and contractual allowances
- » Plans to address inequities in salary and benefits including pension plans
- » Approach to commercial payer contracting (centralized or local; payment methodologies, unified terms)

4. Balance Sheet and Capital Plan

- » Assessment of current and future capital needs and funding sources, including information technology, inpatient and ambulatory needs and pension requirements
- » Decisions on asset allocation and investment strategies, along with the use of consultants and investment managers

5. Debt Structure and Legal Covenants

- » Assessment of outstanding debt and lease obligations including covenants and exposure to third parties such as banks and swap counterparties
- » Decisions around debt obligations and changes to security packages
- » Receipt of all regulatory and bond approvals, including church approval, university approval, and municipal parent approval, if needed

HOSPITAL REALIGNMENT: Mergers Offer Significant Patient and Community Benefits

By Margaret E. Guerin-Calvert and Jen A. Maki, PhD*

Overview

Hospital mergers offer substantial benefits for patients and communities. This study provides a comprehensive review and analysis of hospital merger studies and trends that uncovers a reality rooted in research and quite different than what many people think.

Hospital consolidation has been much studied, but often on narrow issues without the comprehensive examination that provides understanding of its overall effects. The extensive review of trends and literature provided in this study illustrates this point and finds that there is not a sufficient appreciation of the positive contribution realignment makes to patients and communities.

All too frequently, conventional wisdom suggested by media coverage is that hospital realignment, mergers and consolidations systematically result in pricing power, with anticompetitively higher prices for those needing care. Yet, in terms of prices for consumers, this study's extensive review of the literature finds no consistent statistical relationship between consolidation patterns and hospital prices across the studies. What also can get lost is that these claims about hospital merger effects often rely on outdated data that do not reflect today's dynamic market conditions.

This comprehensive analysis of consolidation studies reveals hospital realignment offers benefits including improved service offerings, cost reduction, and enhanced competitiveness. Importantly, the analysis underscores that without realignment, patients and communities could face disruption and instability, hospital closures, and reduced access to care.

Under current conditions, hospitals are moving toward a new system of coordinated care as a means to maintain, improve, and expand access for patients. This trend comes as another broader trend is taking place with important implications across the economy: a spending slowdown in health care that many experts believe is structural and likely to continue. Currently, health care inflation is at record lows, as is spending growth at hospitals and other providers throughout the country.

Overall, the impact of hospital realignment – particularly in the challenging environment today – is much broader than what currently is being discussed. This study outlines and examines major systemic changes occurring across the health care system that are driven by a number of factors, such as policy, economic conditions and demographics. This analysis also highlights that many of the studies cited in recent media reports and by academia focus on hospital business transactions of the 1990s, a data set that is old and not representative of the operating environment in which hospitals compete.

KEY FINDINGS

- Studies point to real benefits from hospital realignment – enhanced access, higher value and greater efficiency.
- Hospital realignment is driven by a mix of policy reforms and a changing economic landscape.
- Claims of negative realignment effects often cite outdated data not reflective of today's market or narrow studies not representative of most transactions.
- Government antitrust reviews underscore that the vast majority of mergers do not raise risks of a substantial lessening of competition.
- Fundamental realignment changes are underway within the context of a historic slowdown in the rate of healthcare spending.

The co-authors have worked on healthcare matters for a variety of healthcare entities, including providers, health plans, government, and associations.

Studies Point to Real Benefits of Hospital Realignment – Enhanced Access, Higher Value, Greater Efficiency

- A key driver of realignment has been the ability of hospitals to maintain services for their communities that otherwise might be reduced or eliminated through hospital downsizing or closure. Studies show that factors driving realignment include hospitals' financial circumstances, and the need to reduce redundant services, achieve efficient realignment and improve access to capital.
- The alternative to mergers or acquisitions is shown by some studies to be hospital closures, downsizing, or reduction in service mix. Hospital closures can reduce access to care and can result in negative welfare effects for the local community; literature found some negative impact on mortality rates.
- A review of literature on the benefits from mergers – including value, cost and efficiency – found that merger efficiencies can stem from:
 - Realignment of services to achieve greater scale of operations or to improve quality of care and enhance access to care. Economies of scale resulting from hospital mergers can result in sustained, measurable savings.
 - Access to capital and improved ability to make necessary investments such as upgrading technology and updating facilities or services.
 - Reduced costs or reduced rate of cost growth through improved operating efficiency, reduced administrative and overhead costs, and reduction or elimination of redundant services.
 - Reduction in excess capacity.
 - Reduction of costs through realignment, to benefit poorly performing or inefficient hospitals (hospitals with high prices and high costs).

A key driver of realignment has been the ability of hospitals to maintain services for their communities that otherwise might be reduced or eliminated through hospital downsizing or closure.

Hospital Realignment is Driven By a Mix of Policy Reforms and a Changing Economic Landscape

- Major systemic changes underway in the healthcare sector are driven by government policy changes as well as economic conditions and demographics. The challenges facing the healthcare industry include the slow economic recovery, reduced reimbursements, difficulty in obtaining capital, a changing infrastructure promoting coordination of care, and essential investments in and implementation of costly healthcare information technology ("IT") systems. Poor occupancy rates and excess capacity are a pressing concern in many areas. A review of the economic literature reveals that these types of factors have been drivers of past mergers.
- Key factors shaping healthcare delivery and realignment are:
 - Efforts to achieve "Triple Aim" goals of enhanced patient care, improved population health, and reduction in rate of increase in per-capita costs. Achieving these goals requires a broader focus on coordinated care delivery for populations rather than episodes of care; more efficient delivery systems of integrated and coordinated care are essential.
 - Shifts from inpatient to outpatient care and excess inpatient capacity, along with improvements in technologies enabling less invasive procedures and shorter stays, have resulted in a significant increase in outpatient care and a reduction in inpatient care, both of which generally improve the quality of care and lower the cost of delivering care.
 - Integrated delivery systems (or integrated delivery networks) provide the means for systems of hospitals (community and tertiary) and physicians to deliver a full spectrum of care to a community. The development and adoption of integrated delivery systems has been accomplished by adding hospitals and/or providers to a system and by expansion of outreach efforts of health systems to serve a wider community and population.

Claims of Negative Realignment Effects Often Cite Outdated Data Not Reflective of Today's Market or Narrow Studies Not Representative of Most Transactions

Recent press and academic articles convey divergent views about hospital merger and acquisition activity, including the key drivers and the likely impact of transactions upon price, value and access. Most agree that a variety of government policy, market, and hospital-specific factors create pressures and incentives for significant realignment of healthcare delivery accomplished by the creation of integrated systems or by mergers, affiliations, or acquisitions of hospitals. These pressures are particularly pressing for smaller stand-alone

hospitals. These articles acknowledge, as drivers for restructuring, the increasing financial pressures currently facing hospitals, and the need to transform healthcare delivery from its current fragmented state to improve care and reduce costs. At the same time, other articles suggest trends toward consolidation lead to potential anticompetitive effects across a broad array of mergers and often reference selected academic studies of price effects of mergers in the 1990s to draw inferences about what is happening today.

- This reliance on past (and in some cases quite distant past) merger activity reveals the imperative for a more comprehensive understanding of current market conditions, current merger motivations and more rigorous examination of merger effects to evaluate the likely benefits or competitive risks of *current* and future hospital transactions. Fundamentally different market conditions mean that past research can be ill-suited to infer the impact of *current* merger transactions. Past research may not capture dramatic changes ongoing in the healthcare industry, including transformative changes on the provider and insurer side, and the pressures and results of healthcare reform – particularly requirements for new technologies, new business models, innovative payment reform, and reduced reimbursements. Most of these oft-cited studies are based on mergers or data from the 1990s which occurred under substantially different market conditions than those present today. This may lead to incorrect and even misleading inferences on the impact of mergers in today's health care environment.

Fundamentally different market conditions mean that past research can be ill-suited to infer the impact of current merger transactions... Most of these oft-cited studies are based on mergers or data from the 1990s which occurred under substantially different market conditions than those present today.

Our comprehensive review of available studies shows:

- Many studies examine changes in concentration, not actual mergers. However, across studies, there is no consistently quantified relationship between changes in market concentration and observed hospital price increases.
- Actual merger retrospectives show common market characteristics – such as fewer competitors and higher concentration – but inconsistent results on price effects, suggesting that market share and concentration alone may be poor predictors of competitive effects. This suggests that offsetting benefits or other dynamics likely are important factors.
- It is difficult to generalize about merger effects from some studies due to methodology and approach. Several are based on simulations or models that either have not been validated against actual mergers or on assumptions that areas studied are actual markets or that no longer may be consistent with market conditions. Price predictions thus may be overstated.
- Price variation studies tend to be based on limited data and narrow samples. Empirical research demonstrates that many factors account for price variation, including cost of patient care, the severity of care, and the health of populations served. Price variation neither is necessary nor sufficient to demonstrate market power exercise in differentiated products, and differences in price levels are not indicative of market power.
- Studies reporting significant – 20% or more – price increases from mergers are specific cases involving selected transactions or data from mergers in highly concentrated markets and thus are not generalizable to all mergers and acquisitions or even to those in highly concentrated markets.

However, across studies, there is no consistently quantified relationship between changes in market concentration and observed hospital price increases.

- The majority of hospital acquisitions occur between hospitals located in different markets and would not be subject to the same market conditions that study authors hypothesize drove price increases.
- Many "in-market" mergers occur in the largest metropolitan areas with many competitors and do not involve material changes in concentration.
- Even the selected case studies show mixed results – concentrated markets alone did not yield statistically significant price increases.

Government Antitrust Reviews Underscore That the Vast Majority of Mergers Do Not Raise Risks of Substantial Lessening of Competition

- Antitrust review is a fact-intensive inquiry into whether a merger is likely substantially to lessen competition. Only a small proportion of actual hospital transactions raised significant risks of substantial lessening of competition. Only a minority of mergers involved prolonged review, and several of these were not challenged. Most involved hospitals operating in different geographies or in ones with numerous competitors. According to former FTC Chairman Jon Leibowitz, less than two percent of all hospital mergers reviewed between 2007 and 2011 were challenged in court.
- These trends are more supportive of a conclusion that the majority of transactions enhance value or are competitively benign.
- These trends also reveal high concentration, high market shares and the number of competitors are not predictive of either hospital merger challenges or of predicted or actual anticompetitive effects: Both retrospective and prospective hospital merger analyses in highly concentrated markets show that many hospital mergers, even in concentrated markets, either did not result in or were not predicted to result in substantial increases in prices.

Fundamental Realignment Changes Are Underway within the Context of A Historic Slowdown in the Rate of Healthcare Spending.

- Overall healthcare spending growth is slowing, as reflected by the hospital Producer Price Index (PPI). Some of the key factors behind this trend involve changes in the healthcare delivery system including greater provider efficiency, increased cost sharing, as well as a reduction in imaging technology proliferation, and the advent of new pharmaceuticals. This slowing in the rate of growth of healthcare spending and in hospital PPI, on balance, suggests some benefit from changes in the healthcare delivery system.

This slowing in the rate of growth of healthcare spending and in hospital PPI, on balance, suggests some benefit from changes in the healthcare delivery system.

Methodology

The Center for Healthcare Economics and Policy was commissioned by the Federation of American Hospitals (FAH) to contribute to understanding the likely benefits or competitive risks of hospital consolidation by undertaking research on trends influencing transactions and healthcare delivery, and to assess the literature on the price, value (cost and quality) and access effects of hospital merger transactions. We were tasked to evaluate these research findings for today's dynamic environment of major systemic change in healthcare delivery in the US with its increasing demands for both integrated care and reduction in healthcare costs along with fundamental changes in payment methodologies (i.e., the transition to value and risk-based from fee-for-service models). We evaluate research on the expected and actual benefits and competitive risks of hospital transactions and the circumstances in which they occur. We examine studies of price effects of mergers, and study the specifics of antitrust review of hospital mergers. We limit our analysis to focus on only those studies and articles examining US data and trends. Sources included in the study were identified based on literature searches conducted as of September 2013.

I. Introduction and Overview

A. Objectives and Approach

Recent press and academic articles convey divergent views about the key drivers and likely impact of hospital merger and acquisition activity on value (costs, quality), access and price. Most agree that government policies including healthcare reform initiatives, market conditions, and hospital-specific factors create incentives for significant realignment of healthcare delivery whether by mergers and acquisitions of hospitals – particularly smaller stand-alone hospitals – or by development and expansion of integrated delivery systems. There is little agreement, however, about both the drivers and impacts of transactions.

Most agree that government policies including healthcare reform initiatives, market conditions, and hospital-specific factors create incentives for significant realignment of healthcare delivery whether by mergers and acquisitions of hospitals – particularly smaller stand-alone hospitals – or by development and expansion of integrated delivery systems. There is little agreement, however, about both the drivers and impacts of transactions.

- A recent news article suggests dramatic consolidation yields substantial cost increases: “Hospitals across the nation are being swept up in the biggest wave of mergers since the 1990s, a development that is creating giant hospital systems that could one day dominate American health care and drive up costs.”¹
- Yet, a recent academic article views the trends as efficiency-enhancing and necessary to improve cost, quality and access: “Our healthcare system is fragmented, with a misalignment of incentives, or lack of coordination, that spawns inefficient allocation of resources. Fragmentation adversely impacts quality, cost, and outcomes. Eliminating waste from unnecessary, unsafe care is crucial for improving quality and reducing costs—and making the system financially sustainable. Many believe this can be achieved through greater integration of healthcare delivery, more specifically via integrated delivery systems (IDSs).”²

Specifically, the sharpest disagreement is over what is likely realized from hospital transactions –whether current and anticipated hospital transactions will yield important consumer and community benefits in improved value, efficiency, and access or instead result in anticompetitive pricing without offsetting benefits.³ The latter perspective often relies on selected academic studies or modeling of price effects of mergers in the 1990s or in highly concentrated markets to draw their more general inferences about market power impact and motivations for current and future transactions.⁴ Importantly, this reliance on past (and in some cases quite distant past) data or studies reveals the imperative for a more comprehensive understanding of *current* market conditions, *current* merger motivations and more rigorous examination of merger effects to evaluate the likely benefits or competitive risks of current and future hospital transactions.

Reliance on findings from past studies including ones evaluated under possibly fundamentally different market conditions points to some potentially critical gaps in and issues with using past research to inform current understanding of merger effects. In turn, this has precipitated calls for more careful review and re-focused research to better understand current merger trends and their

See also: Anemona Hartocollis, *2 Hospital Networks Agree to Merge, Raising Specter of Costlier Care*, THE NEW YORK TIMES (July 16, 2013), available online at <http://www.nytimes.com/2013/07/17/nyregion/2-hospital-networks-agree-to-merge-raising-specter-of-costlier-care.html>, and Eduardo Porter, *Health Care's Overlooked Cost Factor*, THE NEW YORK TIMES (June 11, 2013), available online at http://www.nytimes.com/2013/06/12/business/examinations-of-health-costs-overlook-mergers.html?_r=1&.
- 2 Alain C. Enthoven, *Integrated Delivery Systems: The Cure for Fragmentation*, 15 AMERICAN JOURNAL OF MANAGED CARE 10S (2009): S284-S290 at S284.
- 3 Recent Congressional testimony highlights these different perspectives. For example: “The health care field is undergoing a period of fundamental transformation in which the very model of health care delivery is being changed in order to improve quality and lower costs. The reasons for such change are varied, but chief among them are expectations [for]...greater value. Meeting these expectations requires building a continuum of care to replace the current fragmented system of health care. In addition, hospitals are facing enormous pressure to raise capital to invest in new technologies and facility upgrades. Mergers or acquisitions are often essential to make these goals a reality.” Sharis Pozen, *The Patient Protection and Affordable Care Act, Consolidation, and the Consequent Impact on Competition in Healthcare*, Statement of the American Hospital Association, U.S. CONGRESS, HOUSE JUDICIARY COMMITTEE, SUBCOMMITTEE ON REGULATORY REFORM, COMMERCIAL AND ANTITRUST LAW (September 19, 2013). Testimony indicating concerns about mergers includes: Joe Miller, *Competition and Consolidation in the U.S. Health Care System*, U.S. CONGRESS, HOUSE JUDICIARY COMMITTEE, SUBCOMMITTEE ON REGULATORY REFORM, COMMERCIAL AND ANTITRUST LAW (September 19, 2013). Several news article reference economist statements on inferences drawn from prior studies on merger price effects or price variation such as Martin Gaynor, Hartocollis (2013); and Paul Ginsburg, Robert Weisman, *Hospital Mergers May Drive up Costs*, THE BOSTON GLOBE (October 3, 2013), available online at <http://www.bostonglobe.com/business/2013/10/02/health-care-leaders-warn-that-hospital-consolidation-could-drive-costs/2Ag3WY0tomHOPK3UNihwOJ/story.html> and articles such as Robert A. Berenson, Paul B. Ginsburg and Nicole Kemper, *Unchecked Provider Clout in California Foreshadows Challenges to Health Reform*, 29 HEALTH AFFAIRS 4 (2010): 699-70 (The latter is critiqued in Margaret E. Guerin-Calvert and Guillermo Israilevich, *Assessment of Cost Trends and Price Differences for U.S. Hospitals* (March 2011)). These same press articles, however, highlight the many pressures facing hospitals and the benefits from acquisitions or system affiliation and potential gains from transactions [See, Weisman (2013)].
- 4 As noted in the discussion below of antitrust review of hospital mergers, concentration alone is not predictive of anticompetitive effects or challenge to a merger. While hospital mergers have been challenged, these represent a small proportion of those subject to review and scrutiny by the antitrust agencies. Martin Gaynor and Robert Town, *The Impact of Hospital Consolidation – Update*, THE SYNTHESIS PROJECT (June 2012), available online at <http://www.rwjf.org/en/research-publications/find-rwjf-research/2012/06/the-impact-of-hospital-consolidation.html> or David M. Cutler and Fiona Scott Morton, *Hospitals, Market Share, and Consolidation* 310 JOURNAL OF THE AMERICAN MEDICAL ASSOCIATION 18 (2013): 1964-1970

impacts and implications for future mergers, and to take into consideration the dynamic effects and impacts of mergers on non-price competition. For example: "There is disagreement about whether the current trend toward provider consolidation is a desirable development, but many think continued horizontal and vertical integration based around hospitals is inevitable... Whatever the merits of consolidation, there is a need to understand the effect of that consolidation on prices, service use, access and quality..." (Emphasis added.)⁵

Importantly, this reliance on past (and in some cases quite distant past) data or studies reveals the imperative for a more comprehensive understanding of current market conditions, current merger motivations and more rigorous examination of merger effects to evaluate the likely benefits or competitive risks of current and future hospital transactions.

The Federation of American Hospitals (FAH) commissioned The Center for Healthcare Economics and Policy to contribute to this understanding by undertaking research on trends influencing transactions and healthcare delivery and to assess the literature and empirical studies on the price, value (cost and quality) and access effects of hospital merger transactions. We were tasked to evaluate these research findings for today's dynamic environment of major systemic change in healthcare delivery in the US.

In this study, we examine the role played by and the effects of hospital realignment. Specifically, we seek to identify and evaluate research on the factors that lead to hospital transactions and examine studies on the attributes and realization of expected benefits. We also document current merger and acquisition activity and other marketplace changes. To do so, we perform a comprehensive assessment of the literature and review 75 studies and 36 primary sources.

In reaching the findings presented in this report and summarized in the Overview, we examined studies about hospital realignment to identify how it may provide a means for hospitals to adapt to changes in the industry as well as to address current challenges (Sections I and II). For example, acquisitions or system affiliation can facilitate access to needed capital and speedier implementation of essential technology (such as electronic medical records).

To understand the effects of hospital realignment, we turn to an extensive review of the existing literature on access, cost and efficiency, and quality (Section III). We also provide a review of key factors and trends facing healthcare delivery today to provide context.

As much of the discussion surrounding hospital mergers and acquisitions pertains to expected price effects, we conduct an exhaustive survey and analysis of pricing studies. In addition, we report and discuss findings from antitrust reviews and retrospectives to put mergers that may pose significant competitive risks (e.g., those receiving close scrutiny or challenge) into context (Section IV). We end our analysis with a review of macro developments and cover, in particular, recent healthcare expenditure and price growth trends (Section V).

Consolidation can lead to better coordinated care and enhance delivery points of care to patients. Mergers can also reduce operating costs or improve outcomes through economies of scale, realignment, or expansion of services.

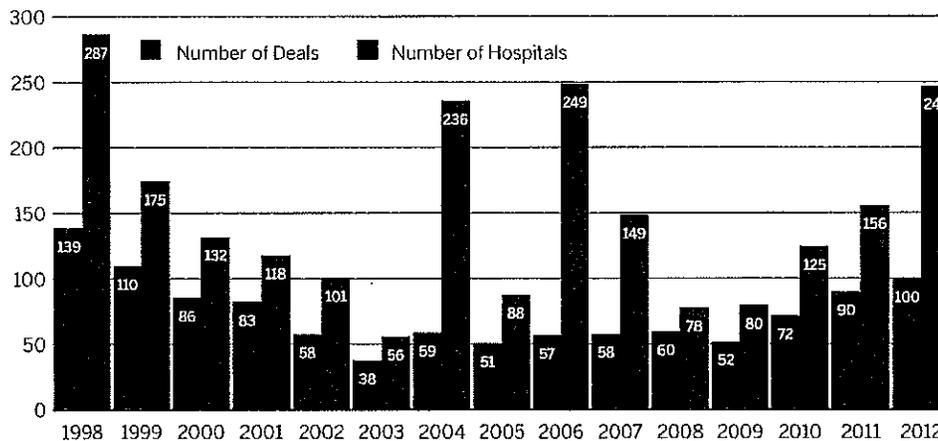

In today's challenging environment, mergers provide an opportunity to realign the healthcare delivery system to the benefit of patients and communities. Consolidation can lead to better coordinated care and enhance delivery points of care to patients. Mergers can also reduce operating costs or improve outcomes through economies of scale, realignment, or expansion of services.

⁵ Co-Chair G. William Hoagland quoted in a press release for a National Academy of Social Insurance project evaluating policy options that address the trend towards provider consolidation and its impact on health care spending, *Study Panel Announced for NASI Project to Address Pricing Power in Health Care Markets*, NATIONAL ACADEMY OF SOCIAL INSURANCE (July 18, 2013), available online at <http://www.nasi.org/press/releases/2013/07/press-release-study-panel-announced-project-address-prici>. Quoted in another press release on this project, he states that the study will "... explore the role of health plan consolidation on prices and quality and consider the role of factors besides consolidation on prices and quality." *NASI Announces New Project on Addressing Pricing Power in Health Care Markets*, NATIONAL ACADEMY OF SOCIAL INSURANCE (August 8, 2013), available online at <http://www.nasi.org/press/releases/2013/06/press-release-announces-new-project-addressing-pricing-po>.

B. Review of Hospital Merger and Acquisition Trends During the Past 20 Years

Facts about hospital consolidation activity over the last 20 years show some activity in each year—mergers are not uncommon but economic and financial factors likely play an important role in overall transaction activity. Figure 1 shows a steady baseline of mergers in each year; there have been 50 or more deals in every year but one (2003) since 1998. The graphic shows some variation in number of transactions and acquired hospitals per year – there generally have been more transactions in years of economic and financial pressures (e.g., after 2008); these factors are also relevant in the mid-to-late 1990s. For example, the number of hospitals involved in transactions has increased in the last 3 years relative to the preceding years – similar trends are found leading up to 1998. Data on individual transactions reveals that more than half of acquired hospitals in recent years had fewer than 150 beds, suggesting financial and economic pressures and/or effects of healthcare reform may be significant factors for this category of hospitals.⁶

Figure 1: Announced Hospital Mergers and Acquisitions, 1998 – 2012

Source: AHA TrendWatch Chartbook 2013, Chart 2.9: Announced Hospital Mergers and Acquisitions, 1998 – 2012

In fact, merger activity is characterized largely by single firm acquisition rather than “mega-mergers” – the majority of hospitals involved in transactions since 2007 were stand-alone hospitals; and many of these combined via mergers or acquisitions with just one or two other hospitals.⁷ System acquisitions tended to involve expansion into new geographies and acquisitions of stand-alone hospitals, whether in the same or different geographies.⁸ While the number of hospitals in systems has increased over time, there remain a very large number (almost 2,000) of independent hospitals (Figure 2) – many of which are smaller hospitals in rural or smaller urban areas.⁹

...merger activity is characterized largely by single firm acquisition rather than “mega-mergers” – the majority of hospitals involved in transactions since 2007 were stand-alone hospitals; and many of these combined via mergers or acquisitions with just one or two other hospitals.

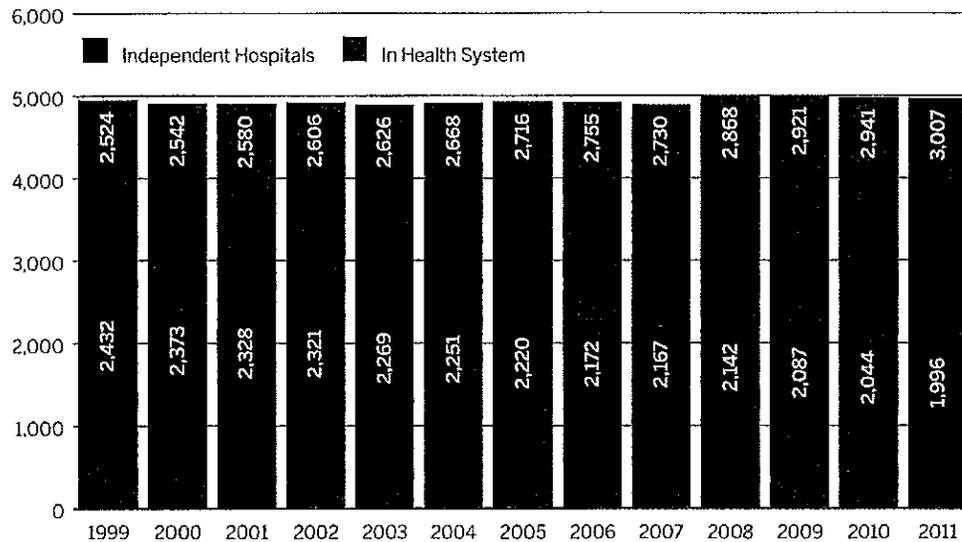

6 AHA TrendWatch Chartbook 2013, AMERICAN HOSPITAL ASSOCIATION (2013) Chart 2.9: Announced Hospital Mergers and Acquisitions, 1998 – 2012, available online at <http://www.aha.org/research/reports/tw/chartbook/ch2.shtml>. See also, *The Health Care Acquisition Report: Eighteenth Edition*, IRVING LEVIN ASSOCIATES, INC. (2012) at 3. The number of hospitals involved in mergers and number of transactions is affected by individual large transactions, such as HCA in 2006. Data from the mid-1990s also showed an increasing number of transactions and associated hospitals in the years leading up to 1998. For transactions before 1998 see AHA data reported in Allison E. Cuellar and Paul J. Gertler, *Trends in Hospital Consolidation: the Formation of Local Systems*, 22 HEALTH AFFAIRS 6 (2003): 677-687.

7 The Center for Healthcare Economics and Policy conducted an extensive study of hospital merger and acquisition activity for the period 2007 through June 2013; the study was commissioned by AHA. The study found that the average transaction size was small (on average one or two acquired hospitals), and a large proportion involved acquired hospitals with 150 or fewer beds, many of which were not previously affiliated with systems. The study also found that about half of all transactions involved hospitals in separate geographies (e.g., non-overlapping) and overlap transactions predominantly occurred in metropolitan areas with 5 or more competitors. Metropolitan areas were defined using MSAs. See *How Hospital Mergers and Acquisitions Benefit Communities: Updated Study by the Center for Healthcare Economics and Policy*, CENTER FOR HEALTHCARE ECONOMICS AND POLICY AND THE AMERICAN HOSPITAL ASSOCIATION (September 2013), available online at <http://www.aha.org/content/13/13mergebenefitcommnty.pdf> for detail and methodology.

8 Based on data referenced in footnote 8.

9 And, the average size of hospital systems is relatively small with just over 3 hospitals. See, Cutler and Scott Morton (2013) at 1965.

Figure 2: Number of Independent Hospitals and Hospitals in Health Systems in the US, 1999-2011

Source: AHA TrendWatch Chartbook 2013, Table 2.1: Number of Community Hospitals, 1991 - 2011

About half of transactions occurred between organizations located in separate geographies and of those that involved overlaps in the same geography, the majority occurred in metropolitan areas with five or more independent competitors. Indeed, a large proportion of transactions occurred in metropolitan areas with multiple independent competitors¹⁰ that are characterized as moderately concentrated or unconcentrated in the 2010 US Department of Justice and FTC Horizontal Merger Guidelines.¹¹ A recent study estimates concentration measures ("HHIs") for over 300 geographies using hospital referral regions ("HRRs") as the geographic unit in which to measure shares and 2011 data.¹² Interestingly, the study finds that over half of these 306 geographic areas are unconcentrated or moderately concentrated (suggesting that mergers in such areas would be less likely to raise a challenge under the 2010 Merger Guidelines on structural grounds).¹³ These areas include many of the major metropolitan areas in the country such as Boston, Chicago, Los Angeles and New York, which account for a substantial proportion of US population.¹⁴ Indeed, a population-adjusted map in the study shows that many of the moderately or low concentrated areas are geographies with larger populations and include large numbers of hospital competitors implying substantial alternatives for merging parties.¹⁵

10 See footnote 8 for detail. Competitors may also include other firms than those physically located in an area.

11 The 2010 Horizontal Merger Guidelines use the Herfindahl Hirschman Index (HHI) as a measure of concentration, and establish thresholds for unconcentrated (<1000), moderately concentrated (1000-2500) and highly concentrated (>2500) markets, and indicate the levels of HHI and change in concentration due to merger likely to precipitate more extensive scrutiny or possible challenge. See *Horizontal Merger Guidelines*, U.S. DEPARTMENT OF JUSTICE AND THE FEDERAL TRADE COMMISSION (2010) available online at <http://ftc.gov/os/2010/03/100819hmg.pdf>. Market shares and concentration involve assessment of relevant markets and are just one part of merger review, which involves substantial analyses.

12 David M. Cutler and Fiona Scott Morton, *Hospitals, Market Share, and Consolidation*, 310 JOURNAL OF THE AMERICAN MEDICAL ASSOCIATION 18 (2013): 1964-70. HRRs are derived based on hospital service areas of hospitals and use methodologies based on Medicare data; these are developed by Dartmouth Atlas. *Appendix on the Geography of Health Care in the United States*, THE DARTMOUTH ATLAS OF CARE 1999, The Dartmouth Institute for Health Policy and Clinical Practice: Lebanon, New Hampshire (1999). HRRs tend to be relatively broad areas often encompassing a MSA and surrounding areas.

13 This assumes HRRs as proxies for "markets" in estimating HHIs. See Cutler and Scott Morton (2013) at 1966. The study also refers to changes in concentration from mid-1980s.

14 See, e.g., HHI measures and areas from Cutler and Scott Morton (2013) measuring concentration using hospital referral regions (HRRs).

15 Cutler and Scott Morton (2013) at 1966.

II. Key Policy, Demographic and Economic Factors Shaping Healthcare Delivery and Realignment

Major systemic changes are underway in the healthcare sector driven by government policy changes as well as economic conditions and demographics. The challenges facing the healthcare industry include the slow economic recovery, reduced reimbursements, difficulty in obtaining capital, a changing infrastructure for coordination of care, and an essential investment in and implementation of costly healthcare IT systems. Lower occupancy and excess or misaligned capacity are pressing concerns in many areas. The economic literature shows that these types of factors have been drivers of past mergers and of current ones.

Hospitals and health systems are under increasing pressure to deliver high quality, cost-effective healthcare that is integrated and coordinated across the delivery system in a community.

Hospitals and health systems are under increasing pressure to deliver high quality, cost-effective healthcare that is integrated and coordinated across the delivery system in a community. Pressures affect virtually all hospitals and geographies, albeit in varying degrees and have significant implications for mergers and realignment of healthcare delivery capacity. How these changes affect individual hospitals can vary considerably, depending on local market conditions, the specific situation of the hospital, and the healthcare needs of its community. Among important hospital-specific factors are: payor and service mix, age of plant and need for investments in plant or new technologies, patient volumes and occupancy rates, and financial circumstances including access to capital.¹⁶

Case in Point: *In an effort to increase efficiency and improve quality of care, the Health Information Technology for Economic and Clinical Health (HITECH) Act of 2009 developed both financial incentives (and penalties) designed to encourage hospitals to implement EMR technology. However, adopting this technology requires significant investment and may be prohibitively expensive for some hospitals. Recent studies show a large proportion of hospitals, particularly smaller hospitals, face significant challenges in meeting these requirements. DesRoches et al. (2013) explores hospital EMR uptake.¹⁷ They find that while 42.2 percent of hospitals have adopted EMR in 2012, the vast majority of their systems are very basic ones.¹⁸ The authors note differences in uptake by hospital characteristics: small hospitals are much less likely to have even a basic system than large hospitals and rural hospitals were also less likely to have a system in place compared to urban hospitals.¹⁹ Both types of hospitals often face financial and human resource constraints to purchase and implement technology, and they may fall behind the more able institutions. If EMR prove not only to increase efficiency and quality of care,²⁰ but stave off penalties and garner incentives, failing to implement this technology could result in significant, long term costs and relative cost differences among hospitals, and may adversely affect a hospital's ability to compete in the future.*

These legislative and policy changes occur in the context of a broader set of economic, demographic, and patient care pressures.²¹

Key factors shaping healthcare delivery and realignment are: (1) Efforts to achieve "Triple Aim" goals of enhanced patient care, improved health of population, and reduction in rate of increase in per capita costs. These aims are accomplished by a broader

16 There are many major changes confronting hospitals including actual and expected changes in reimbursements and modes of care delivery; reduced Medicare reimbursements and new payment models (e.g., global risk and value-based reimbursement), and penalties for avoidable readmissions and hospital-acquired conditions; potential expansion of Medicaid and expanded coverage of currently uninsured, required investments in technologies such as electronic health records; and new forms of care delivery such as Accountable Care Organizations, or "ACOs." See Patient Protection and Affordable Care Act, Pub. L. No. 111-148, § 6001, 124 Stat. 119, 684-89 (2010). See also, *The Affordable Care Act Three Years Post-Enactment*, THE HENRY J. KAISER FAMILY FOUNDATION (March 2013), available online at <http://kaiserfamilyfoundation.files.wordpress.com/2013/04/84291.pdf>, and Douglas W. Elmendorf, Dir., Cong. Budget Office, *CBO's Analysis of the Major Health Care Legislation Enacted in March 2010*, US CONGRESS, COMMITTEE ON ENERGY AND COMMERCE, SUBCOMMITTEE ON HEALTH (March 30, 2011), available online at <http://www.cbo.gov/sites/default/files/cbofiles/ftpdocs/121xx/doc12119/03-30-healthcarelegislation.pdf>.

17 The study uses data from the American Hospital Association (AHA) 2012 health IT supplement. Catherine DesRoches, Dustin Charles, Michael Furukawa, Maulik S. Joshi, et al., *Adoption of Electronic Health Records Grows Rapidly, But Fewer than Half of US Hospitals had at least a Basic System in 2012*, 32 HEALTH AFFAIRS 8 (2013):1-9.

18 While they are compliant with the stage 1 guidelines which require compliance as of July 1, 2014, only 5.1 percent would comply with the stage 2 federal requirements. As more advanced systems (i.e., those that meet stage 2 requirements) are thought to provide a larger benefit, there is still substantial improvement which has yet to be realized. DesRoches et al. (2013) at 1.

19 Of the 2,796 survey respondents, 483 reported having a comprehensive EMR system, 792 had a basic system, and 1,521 had no system at all. There are marked differences in system type adoption among small, medium and large hospitals: 61.7 percent of small hospitals reported having no EHR system in 2012, while 25.3 percent had a basic system and 13.0 percent had a comprehensive system. For large hospitals, 38.1 percent had no system, 33.6 percent had a basic system and 28.3 percent had a comprehensive system. There also appears to be an urban/rural divide as 66.5 percent of rural hospitals reported having no system, 23.1 percent had a basic system and 10.4 percent had a comprehensive system. Among urban hospitals, 52.3 percent reported having no system, 28.8 had a basic system, and 18.9 percent had a comprehensive system. DesRoches et al. (2013) at 4, Exhibit 2.

20 Because EMR technology is a precursor to full participation in a regional health information organization (a facilitator of information sharing among stakeholders), the disadvantage the hospitals which fail to adopt the technology may be further compounded. Similar to the findings presented for EMR adoption, Furukawa et al. (2013) studies regional health information organization activity and finds that providers in rural locations had lower levels of exchange activity than did their urban counterparts. Michael F. Furukawa, Vaishali Patel, Dustin Charles, Matthew Swain and Farzad Mostashari, *Hospital Electronic Health Information Exchange Grew Substantially in 2008-12*, 32 HEALTH AFFAIRS 8 (2013):1346-1354.

21 Hospitals in the US have experienced a decline in inpatient admissions over the past several years, due in part to shifts to outpatient care (discussed in more detail below) as well as economic conditions. *AHA TrendWatch Chartbook 2013*, AMERICAN HOSPITAL ASSOCIATION, (2013) Table 3.1, available online at <http://www.aha.org/research/reports/tw/chartbook/2013/table3-1.pdf>, and Moody's Investor Services, *U.S. NOT-FOR-PROFIT HEALTHCARE OUTLOOK REMAINS NEGATIVE FOR 2012*, OUTLOOK (2012).

focus on coordinated care delivery for populations rather than episodes of care, and through more efficient delivery systems of integrated and coordinated care.²² Shifting from individual patient episodes and fee-for-service to managing population health effectively requires significant movement from unaligned and fragmented entities toward systems of healthcare providers.²³ In turn, this may result in increased restructuring of care delivery with increased coordination or ownership change, and is likely to implicate more transactions involving hospitals given the large number of hospitals that are stand-alone facilities.²⁴ (2) Shifts from inpatient to outpatient care and excess inpatient capacity. Improvements in technologies enabling less invasive procedures and shorter stays have resulted in a significant increase in outpatient care and a reduction in inpatient care. Outpatient care now accounts for about 60 percent of patient care, and an increasing proportion of that care is delivered in free standing facilities rather than in hospital-owned facilities.²⁵ The number of such facilities has increased significantly in the last decade.²⁶

Key factors shaping healthcare delivery and realignment are ... Efforts to achieve "Triple Aim" goals of enhanced patient care, improved health of population, and reduction in rate of increase in per capita costs.

And (3) Development of integrated delivery systems or integrated delivery networks (IDS or IDN) is expanding considerably with systems of hospitals (community and tertiary) and physicians, and in some cases with insurance plans, to deliver a full spectrum of care to a community. This has been accomplished by adding hospitals or providers to a system, or by expansion and outreach efforts of a health system to serve a wider community and population with outpatient or physician offices.²⁷

The net effect of economic factors (including decline in employment, shifts of industries from one area to another) and population shifts, along with the shift in location of care from inpatient to outpatient already has resulted in significant under-utilized inpatient capacity at many hospitals and financial pressures.²⁸ We turn to these factors specifically in the following and examine in detail the implications for access to capital and hospital executive perceptions of the impact of economic and financial conditions, as well as the impact of capacity on costs.

Financial trends and implications for hospitals' operations, access to and cost of capital in 2013 and beyond: Reductions in the healthcare spending trend along with other factors exert pressure on hospital profit margins. Moody's Investors' Service (2012) revised its not-for-profit hospital industry outlook to negative (from stable) in 2008 and reports in 2012 that the outlook is expected to remain negative for the foreseeable future.²⁹ The slow economic recovery has resulted in a reduction in inpatient volume and a weakening in payor mix (i.e., there is an increased proportion of revenue derived from Medicaid and Medicare which offer less generous reimbursement than do commercial payors), both of which lead to increased financial pressures.³⁰ Moody's

Berenson, *Hospitals' Geographic Expansion in Quest Of Well-Insured Patients: Will The Outcome Be Better Care, More Cost, Or Both?*, 31 HEALTH AFFAIRS 827 (2012):827-835; Douglas McCarthy, and Kimberly Mueller, *Organizing for Higher Performance: Case Studies of Organized Delivery Systems*, THE COMMONWEALTH FUND (2009); McCarthy, Douglas, Kimberly Mueller and Ingrid Tillmann, *HealthPartners: Consumer-Focused Mission and Collaborative Approach Support Ambitious Performance Improvement Agenda*, THE COMMONWEALTH FUND (2009); Douglas McCarthy, Kimberly Mueller, and Jennifer Wrann, *Geisinger Health System: Achieving the Potential of System Integration through Innovation, Leadership, Measurement, and Incentives*, THE COMMONWEALTH FUND (2009); and Kathleen H. McCarthy and Alan M. Zuckerman, *Realizing the Full Financial Benefits of True Integration*, 64 HEALTHCARE FINANCIAL MANAGEMENT 11 (Nov 2010): 78-82, 84, 86 passim, available online at <http://www.hfma.org/Content.aspx?id=2740>.

28 Trends in occupancy rates are provided in *Health, United States, 2010*, U.S. DEPARTMENT OF HEALTH & HUMAN SERVICES, CENTERS FOR DISEASE CONTROL & PREVENTION, (2010) available online at <http://www.cdc.gov/nchs/data/abus/hus10.pdf> (listing trends in occupancy). Significant excess capacity can result in higher operating costs per patient, reduction or elimination of excess capacity may be difficult to achieve absent mergers or consolidation. See, e.g., Kathleen Carey, *Stochastic Demand for Hospitals and Optimizing "Excess" Bed Capacity*, 14 JOURNAL OF REGULATORY ECONOMICS 2 (1998):165-187; and Esther Gal-Or, *Excessive Investment in Hospital Capacities*, 3 JOURNAL OF ECONOMICS & MANAGEMENT STRATEGY 1 (1994):53-70.

29 Moody's Investor Services, *U.S. Not-for-Profit Healthcare Outlook Remains Negative for 2012*, OUTLOOK (2012). Hospital credit ratings by state are listed on pages 18-32.

30 In part, revenue growth reduction can be attributed to reductions in reimbursement in Medicare and Medicaid which represent 43 percent and 11 percent of a hospital's net revenue, respectively. For the federal fiscal years 2011 and 2012, Medicare payments were reduced by 2.9 percent per year, for a total reduction of 5.8 percent, and a number of states are implementing reductions in Medicaid reimbursement. *Ibid.*, at 4.

notes: "Hospitals are faced with an unprecedented threat to revenues...we expect revenue growth to continue to be weak and not able to keep pace with normal spending inflation."³¹

A second 2012 Moody's report states that: "Consolidation offers the promise of greater operating efficiency and risk diversification across larger organizations, likely leading to stronger and more stable bond ratings for affected hospitals."³² The economic logic underlying these statements is that size and scale can play a role in spreading semi-fixed and fixed costs, a significant portion of overall hospital costs, over a greater volume of business, as well as in providing variable cost efficiencies.³³ Transactions or affiliations with systems can provide access to capital that may otherwise be unavailable or prohibitively expensive.³⁴ A recent study estimates that less than 20 percent of almost 500 hospitals' debt rated by Moody's had a high bond rating, implying higher costs of capital or greater difficulty in accessing capital.³⁵

Perspectives from hospital executives: Surveys of industry executives provide perspectives on the implications of these financial, regulatory and economic trends. A recent survey about capital constraints fielded to non-federal hospital CEOs revealed that nearly half of the hospitals surveyed reported putting capital projects on hold (including stopping ones currently in progress).³⁶ Projects included facility upgrades, acquisition of clinical technology and the acquisition of health information technology. Various surveys of hospital executives echo these concerns and indicate that the current healthcare environment is exceptionally challenging, with pressure coming from all angles.³⁷ A Deloitte (2011) study reported that many hospital CEOs believe that navigating the current healthcare environment poses the biggest challenge of their professional careers. Their responses suggest that significant realignment may be necessary for long-term survival.³⁸ Mergers may provide a means to address these concerns as transactions can include cash transfusions to the acquired party, allowing stalled projects to continue. In addition, mergers allow the potential for realignment which can lead to decreased costs. This reduction in cost would ameliorate some of the financial pressures these firms currently face.

Utilization Trends and "Excess" Capacity: Analyses of bed capacity for U.S. major metropolitan areas show that potentially higher available capacity at the MSA level is a widespread phenomenon: Many cities have above average bed capacity – and in some cases substantial capacity relative to expected usage.³⁹ Statistics on inpatient utilization trends show an overall decline in inpatient utilization which are likely to be exacerbated where Triple Aim efforts succeed in shifting more patients to preventive care or reduce inpatient

34 Capital and scale issues have a disproportionate effect on smaller hospitals. Smaller stand-alone hospitals are more vulnerable to changes and may struggle to cope with new regulations stemming from the ACA. They may find implementing IT features such as electronic medical records (EMR) would create excessive financial burden. See, *US Hospital M&A Generally Positive for Bondholders*, FITCHRATINGS (July 2012) available online at http://www.fitchratings.com/gws/en/fitchwire/fitchwirearticle/US-Hospital-M%26A?pr_id=754425; Ryan S. 36 *AHA Report on the Capital Crisis: Impact on Hospitals*, AMERICAN HOSPITAL ASSOCIATION (January 2009) at 3, available online at www.aha.org/content/00-10/090122capitalcrisis-report.pdf. Specifically, 82 percent report putting facilities projects on hold, 65 percent have put clinical technology projects on hold and 62 percent have put information technology projects on hold.

37 Collectively, the survey responses indicate that the current healthcare environment presents significant challenges and that the business model hospitals employed in the past is no longer relevant. Many of the respondents plan to explore consolidation possibilities within the near future (one study found that half of respondents believed that it was extremely likely that their organization would be absorbed or be absorbed by another hospital system [U.S. News, 2011]). Findings from a Huron Healthcare (2013) report highlight the perceived benefits from consolidation. Specifically, "CEOs recognize that spreading fixed costs through consolidation or collaboration is one way to create efficiencies in process and pricing. This approach can also help organizations quickly acquire new capabilities at a lower cost structure. In the long term, CEOs are considering how consolidation may help provide more effective population health management." *Inventing the Future of Healthcare: Top CEOs on the Real Work of Transforming the Healthcare Industry*, HURON HEALTHCARE (2013) at 11-12, available online at <http://healthcareceforum.com/report/>. See, *Issue Brief: A Look Around the Corner: Healthcare CEO's Perspective's on the Future*, DELOITTE (June 2012), available online at http://www.deloitte.com/view/en_US/us/Industries/life-sciences/2871421814108310VgnVCM2000001b56100aRCRD.html#; *Annual Executive Survey*, CRANEWARE (February 2012), available online at <http://www.craneware.com/stoptheleakage/blog/post/The-results-are-in-Cranewares-Annual-Executive-Industry-Survey.aspx>; *Top Issues Confronting Hospitals: 2012*, AMERICAN COLLEGE OF HEALTHCARE EXECUTIVES (January 2013), available online at <http://www.ache.org/PUBS/research/ceoissues.cfm>; *Eighty-Eight Percent of Healthcare Services Execs Will Pursue M&A in the Next Year*, Shows GE Capital Healthcare Survey, GE CAPITAL (September 2013), available online at <http://www.gewscen.com/Press-Releases/Eighty-Eight-Percent-of-Healthcare-Services-Execs-Will-Pursue-M-A-in-the-Next-Year-Shows-GE-Capital-42b5.aspx#downloads>; *Hospital Executives Survey*, U.S. NEWS (July 2011), available online at <http://health.usnews.com/health-news/best-practices-in-health/articles/2011/07/18/healthsurveytables>; and *CEO Report: Optimism on the Upswing*, HEALTHLEADERS MEDIA, 2013, available online at http://www.healthleadersmedia.com/intelligence/detail.cfm?content_id=287883&year=2013

38 "The bottom line: Many hospital CEOs stated that the new normal represents the biggest test thus far in their professional career. They anticipate two eventualities for their organization: it will be paid less for the entirety of services provided, and its portfolio of acute clinical services is likely to become a cost center in a bigger, more complex organization that is focused on care for the healthy, not just the sick." Deloitte (2012) at 2

39 Bed capacity per capita serves as a rough proxy for available capacity (total bed capacity may also be a useful measure). Above average bed capacity is determined by using the average number of hospital beds per thousand population for MSAs in the country. Other capacity or available capacity measures used include utilization or occupancy rates.

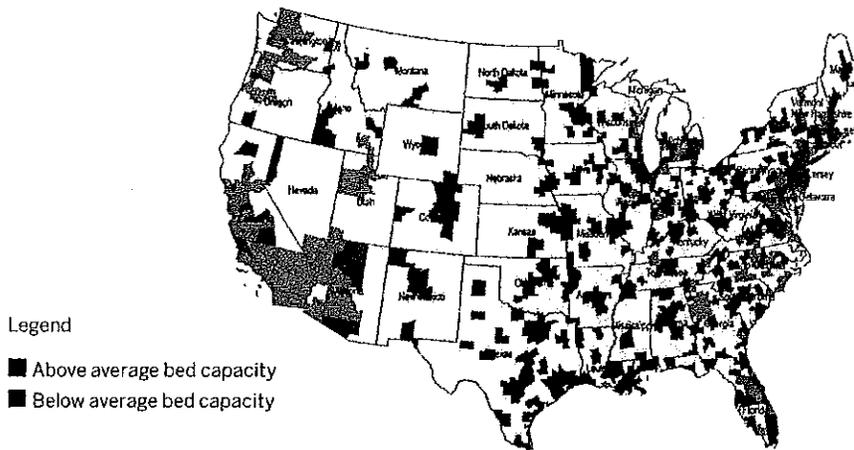

utilization, or where there are increased pressures to reduce readmissions.⁴⁰ The following graphics (Figures 3 and 4) depict estimates of bed capacity by MSA. The first graphic presents bed-capacity for small to medium-sized MSAs and demonstrates that many of these areas are likely to have excess bed capacity at least as measured by this proxy of beds per thousand. Our focus on smaller cities comes from the fact that these include cities with a number of stand-alone hospitals.⁴¹ To get a national perspective, the map depicts MSAs (regardless of population size) with above or below average capacity across the US. This provides a perspective on the location of geographies where *current* configuration of capacity may well exceed needed capacity in the future. These figures present geographies where consolidation or realignment may be relevant as a means to improve costs and quality of care.⁴²

Figure 3: Estimated Bed Capacity by Metropolitan Statistical Area (MSA) for Selected MSAs
(Limited to MSAs with a population of 250,000 to 500,000)

Source: Author's Calculations using 2011 AHA Survey data
Notes: Bed count presented in this graph is not limited to general acute care (GAC) facilities only but represents beds in all hospital facilities located within the specified MSA

Figure 4: Estimated Bed Capacity by Metropolitan Statistical Area (Map)

Dartmouth Atlas of Health Care, DARTMOUTH INST. FOR HEALTH POLICY & CLINICAL PRACTICES (2009) at 2-3. The map and graphic show regional variation at the MSA level in capacity per capita, above average capacity per capita may be indicative of overall potential excess of capacity relative to demand at the MSA level, individual hospitals within an MSA may have higher utilization.

40 Over the past two decades there has been a shift from inpatient to outpatient care. Inpatient admissions per 1,000 have declined since 1991 from 123.2 to 111.8 in 2011. Inpatient Days per 1,000 have similarly declined from 883.9 in 1991 to 600.4 in 2011. From 1991-2011, the average length of stay has declined from 7.2 to 5.4 days. Conversely, outpatient visits per 1,000 have risen from 1,273.4 to 2,105.6 over that time period. The change is more pronounced in recent years. From 2006 - 2011, inpatient admissions have declined by 5.4 percent while outpatient visits have risen by 5.2 percent. AHA TrendWatch Chartbook 2013, AMERICAN HOSPITAL ASSOCIATION (2013); Table 3.1 Trends in Inpatient Utilization in Community Hospitals, 1991 - 2011, available online at <http://www.aha.org/research/reports/tw/chartbook/2013/table3-1.pdf>. AHA TrendWatch Chartbook 2013, AMERICAN HOSPITAL ASSOCIATION (2013); Table 3.4. Outpatient Utilization in Community Hospitals available online at <http://www.aha.org/research/reports/tw/chartbook/2013/table3-4.pdf>.

41 The table depicts hospital bed capacity per capita for those 83 MSAs with a population between 250,000 and 500,000 as of 2011

42 Average bed capacity is about 2.6 beds per thousand people for metro MSA areas in the US. See also, David C. Goodman, Elliott S. Fisher, and Kristen K. Bronner, *Hospital and Physician Capacity Update: A Brief Report from the Dartmouth Atlas of Health Care*, DARTMOUTH INST. FOR HEALTH POLICY & CLINICAL PRACTICES (2009) at 2-3. The map and graphic show regional variation at the MSA level in capacity per capita, above average capacity per capita may be indicative of overall potential excess of capacity relative to demand at the MSA level; individual hospitals within an MSA may have higher utilization.

Reduction in *actual* excess capacity at the hospital level or at the city level could result in significant operational cost savings; realignment and restructuring through mergers may provide a means to accomplish cost reduction. A study of capacity utilization by US hospitals determined there was potentially significant excess capacity measured at the hospital level. Where substantial excess capacity was present and could be reduced, it has been estimated that operating costs could be reduced.⁴³ Restructuring (i.e., turning general acute care beds into other uses) that can be accomplished by merger may be an effective tool to address excess capacity. Mergers and acquisitions may provide an effective market mechanism to yield better alignment of capacity with demand. Studies of hospital decision-making suggest that independent decision-making, while beneficial in many respects, can lead to over-investment and excess capacity relative to market demand, and that mechanisms for joint investments or decision making may lead to closer alignment of capacity with market demand.⁴⁴ Taking unnecessary costs out of a hospital system frees up funds to invest in unmet healthcare needs or to use in reducing overall healthcare costs.

Reduction in actual excess capacity at the hospital level or at the city level could result in significant operational cost savings; realignment and restructuring through mergers may provide a means to accomplish cost reduction.

III. Review of Literature on Merger Rationale and Effects: Value (Cost, Quality) and Access

A. Overview

In this section, we review the economic literature regarding the role that mergers and acquisitions play in responding to financial and policy pressures, changing demographic and economic conditions, and changes in demand or supply conditions in healthcare. One key driver of mergers has been the ability to maintain services in a community that might otherwise be reduced or eliminated through downsizing or closure of hospitals.⁴⁵ Studies show that financial circumstances, reduction in redundant services, efficient realignment

One key driver of mergers has been the ability to maintain services in a community that might otherwise be reduced or eliminated through downsizing or closure of hospitals.... Hospital closures can reduce access to care and can result in substantial welfare effects for the local community...

and improved access to capital have all contributed to the trend. Many hospitals anticipated and made significant changes in service offerings post-merger, including re-organization. The alternative to merger or acquisitions is shown by some studies to be hospital closures, downsizing, or reduction in service mix such as elimination of maternity services or lower volume tertiary services. Hospital closures can reduce access to care and can result in substantial welfare effects for the local community; the literature shows some impact on mortality rates.

The literature identifies a number of potential benefits from mergers that fall into the categories of value (cost, quality) and access. Among the benefits identified in the literature are:

- Administrative and overhead savings
- Reduced costs or reduced rate of cost/expense growth through improved operating efficiency or reduction/elimination of redundant services
- Improved overall operations and efficiency
- Realignment of services to achieve greater scale of operations or to improve quality of care delivered
- Reduction of excess capacity
- Access to capital and improved ability to make necessary investments such as technology and update facilities or services
- Ability to maintain or expand services in a community (and thereby maintain quality of services or care and/or access to care)

43 Carey (1998) uses data from the AHA and the Hospital Cost Reporting Information System (HCRIS) for the period 1987-1992 in order to determine the optimal number of excess beds a facility should hold. Carey defines the optimal level of bed capacity as occurring "where the ratio of the hospital's cost of staffing the last bed to the cost of not having the bed available is equal to the probability that the hospital is full." Carey (1998) at 179.

44 Gal-Or (1994).

45 Realignment resulting from a merger may reduce service line duplication which could have a negative impact on access.

These benefits provide the ability to respond to the pressures and challenges facing stand-alone hospitals.

In the following section, we examine the literature on price effects of mergers. The majority of this empirical literature on hospital transactions is based on studies of mergers from the 1990s and early 2000s. We start our review by examining the economic literature on both the drivers and consequences of hospital mergers. For comparative purposes, we also survey the literature on outcomes for hospitals that faced comparable challenges but did not merge. We review numerous studies addressing a very diverse set of market conditions, transactions, and sources of benefits. Many studies involve large numbers of transactions as well as hospitals (including those not involved in transactions) from the 1990s; many are recent studies and trends. This review spans decades of data and information on transactions often not studied in detail—predominantly because the vast majority of mergers raise no significant competitive risks, and their benefits may not be scrutinized or quantified expressly. We are not predicting that specific benefits found in studies from the 1990s will be replicated in each merger in the future, but believe they are informative of the types of benefits achievable by many mergers in the future, particularly where assessment of the current environment suggests increased demand for improvements in quality, access, and costs. Moreover, these studies provide insight into the gains from addressing those contemporaneous challenges.

B. The Role of Mergers and Acquisitions in Realigning the Healthcare Delivery System

As in any industry, a firm will remain viable in the long run only if it is able to adapt to changes in both supply and demand as well as adjust to overall changes in the environment. The hospital industry, in particular, currently faces many challenges that adversely impact hospitals' operations and ability to operate in their original configuration and capacity. The previous section enumerated myriad challenges facing the healthcare industry including slow economic recovery, reduced reimbursements, difficulty in obtaining capital, and a changing infrastructure that stresses the coordination of care and requires the use and implementation of expensive healthcare IT systems. In addition to these challenges, lower occupancy and excess capacity remain pressing concerns. These environmental factors and trends can drive consolidation activity.

Studies on restructuring through consolidation show that mergers and acquisitions can prove an effective means to deal with excess capacity/lower occupancy and financial pressures. *Bazzoli et al. (2002)* examine reasons for hospital restructuring and reorganization during 1989-1996.⁴⁶ In comparing the acquired and acquiring hospitals, the authors found that the acquired hospitals had lower occupancy rates, on average, than did the acquiring hospitals.⁴⁷ Self-reported reasons for merging demonstrate the importance of several factors, among which the desire to improve operating efficiency emerges as a primary objective.⁴⁸ Expansion was also indicated as an important reason to merge. 54.4 percent stated that the desire to expand market share was an important consideration, as was the desire to expand access to care (53.2 percent), and to expand the scope of services provided (44.3 percent).⁴⁹

The hospital industry, in particular, faces many challenges that adversely impact operations and the organization's ability to operate in its original configuration and capacity.... Studies on restructuring through consolidation show that mergers and acquisitions can prove an effective means to deal with excess capacity/lower occupancy and financial pressures.

The reasons that motivate consolidation indicate that hospitals perceive growth through merger as an effective way to meet current demand and adjust to the changing healthcare environment. Realignment of services can lead to an organization that is better able to meet the needs of the community and maintain service offerings in challenging times – factors which contribute to hospital survival. Review of the literature suggests that many transactions in the 1990s actually resulted in significant realignment and provides some evidence of administrative and other savings due to consolidation. *Bazzoli et al. (2002)* explore actual changes in service mix among hospitals both pre and post-merger and provide useful insights into what many mergers actually accomplished in

46 Gloria J. Bazzoli, Anthony LoSasso, Richard Arnould and Madeline Shalowitz, *Hospital Reorganization and Restructuring Achieved through Merger*, 27 HEALTH CARE MANAGEMENT REVIEW 1 (Winter 2002) 7-20. Using AHA annual hospital survey data, they identified mergers occurring during the specified time period. They further limited their sample to those mergers which involved only two hospitals. Of the 153 mergers which met their selection criteria, 80 (52.3 percent) responded to a survey developed by the study authors.

47 The reported average occupancy rate of the acquired hospitals during the 1989-1996 period was 57.3 percent while the occupancy rate of the acquirer during this same time period averaged 62.5 percent. Occupancy rates post-transaction were not reported. *Ibid.*, at 11

48 Respondents were asked to rate a given set of reasons in matter of importance using a Likert-type scale, where 1 indicates "not important" and 7 indicates "very important." The top three reasons were to strengthen financial performance (83.5 percent), to achieve operating economies (79.7%) and to consolidate services (70.9). *Ibid.*, at 11.

49 Less commonly reported reasons include expanding the size of the system (22.8 percent), reducing bed capacity (17.7 percent), and expanding bed capacity (8.9 percent). *Ibid.*

terms of reorganization during the 1990s.⁵⁰ The results they present suggest significant realignment of services occurred, primarily through reduction in service duplication.

To explore the magnitude of realignment resulting from mergers, the study reports the percentage of hospitals where both hospitals offered a service prior to merger and the percentage where both offered that same service post-merger. During the period 1989-1996 (the pre-merger period), 82.7 percent of hospitals offered both inpatient medical service and emergency care. Post-merger, only 42.7 percent of the pairs both retained inpatient medical services and 49.3 percent retained emergency medical care at both facilities.⁵¹ Bazzoli notes that the significant reduction is likely related to the fact that many hospitals were located nearby one another.⁵² Nearby hospitals that consolidate provide a greater opportunity for service realignment and repurposing.

In addition to service mix realignment, the authors note that many of the merging pairs report administrative downsizing. The parties reported significant reductions in CEO/COO staffing as well as reductions in order of 12 to 37 percent of general administrative staff. The declines highlight the potential for economies of scale and the associated reduction in cost which may result from a merger.

These savings are particularly relevant as labor comprises a significant portion of a hospital's operating costs.⁵³

...hospitals perceive growth through merger as an effective way to meet current demand and adjust to the changing healthcare environment (Bazzoli et al. (2002)). Realignment of services can lead to an organization that is better able to meet the needs of the community and maintain service offerings in challenging times — factors which contribute to hospital survival.

Spetz et al. (1999) studied hospitals in California to examine the characteristics of merging hospitals.⁵⁴ Of 296 ownership changes between 1986 and 1996, 13 included conversions from not-for-profit to for-profit, and 12 switched from for-profit to nonprofit. Approximately 80 percent of the changes did not include any changes in profit status. Most of the ownership changes during this time were the result of consolidations and mergers between hospital corporations. Multi-hospital systems grew during the period under review with more than half of all hospitals in California affiliated with multi-site hospital corporations. Less than 10% of merger activity during this period occurred in rural areas.

Mergers can be an effective tool in responding to marketplace needs and can help ameliorate resource constraints. Benefits from affiliations include gaining access to personnel, expertise, and/or capital. Bazzoli et al. (2006) employs a case study design to explore both the reason for and response to demand and supply conditions in local healthcare geographies.⁵⁵ Hospital executives reported that expected population growth or changes in insurance coverage lead to an increase in perceived demand and estimates of the required level of capacity to meet future needs.⁵⁶ However, results suggest that there may be several constraints facing hospitals in their ability to respond to marketplace conditions, including physical space, regulation, capital, and personnel. Merger and acquisitions may provide a means for hospitals to overcome these constraints.

50 This and related studies provide insights into the role that realignment plays in the hospital sector both in form and in the types of benefits, suggesting benefits that likely occurred during the period under their study that may not be captured in other studies.

51 Changes among other service lines were reported as well. Pre-merger, 40.0 percent of the hospital pairs had inpatient OB-GYN, 38.7 had inpatient pediatrics, and 23.0 percent had inpatient rehabilitation. In the post-merger period, the percentage in which both hospitals offered the service line dropped with 8.0 percent retaining inpatient OB-GYN, 9.3 retaining inpatient pediatric services, and 12.2 percent retaining inpatient rehabilitation at both facilities. The authors find that consolidation of departments was a very common occurrence. Among similar hospitals (those having common services), 96.4 percent report consolidating or merging two or more departments or programs compared with 86.1 percent at dissimilar hospitals. Similar hospitals as defined as those hospitals that offered 50 percent or more of the same major services. *Ibid.*, at 15.

52 The merging hospitals tended to be located near to one another. The average distance between urban hospital merging pairs was 4.91 miles, while the distance between rural hospital merger pairs was 11.14 miles (Bazzoli 2002, page 11). Among the hospitals in the sample, 5 percent of rural hospitals and 8 percent of urban hospitals closed, 52 percent of rural hospitals retained acute care services as did 61 percent of urban hospitals. Significant realignment occurred as a result of the merger as 43 percent of rural and 31 percent of urban hospitals were converted to other uses. *Ibid.*, at 14.

53 The study did not report changes in outcome measures or improvements resulting from realignment/consolidation or staffing changes.

54 Joanne Spetz, Jean Ann Seago and Shannon Mitchell, *Changes in Hospital Ownership in California*, PUBLIC POLICY INSTITUTE OF CALIFORNIA (1999).

55 The study uses data collected during 1995-2003 for the Community Tracking Study (CTS), a study which collects data on health system change for a randomly selected, nationally representative sample of 60 communities. The CTS is a study directed by the Center for Studying Health System Change. The randomly selected communities are defined as MSAs with populations of 200,000 or more. Although the CTS includes in-depth interviews in 12 of the 60 sites, four cities (Boston, Cleveland, Miami, and Phoenix) were selected for inclusion in the study as they are located in major metropolitan areas and had diverse hospital resources. The survey questions developed to elicit information regarding capacity constraints are as follows: To what extent has your hospital (or the hospitals in your system) experienced capacity constraints in the past year? In what specific service lines, units, or patient care departments has your hospital (or hospitals in your system) experienced capacity problems? What are the major factors that have caused capacity problems in your hospital (or hospitals in your system)? How is your hospital currently responding to capacity problems? Have there been any community-led efforts to address capacity problems? Gloria J. Bazzoli, Linda R. Brewster, Jessica H. May and Sylvia Kyo, *The Transition from Excess Capacity to Strained Capacity in U.S. Hospitals*, 84 THE MILBANK QUARTERLY 2 (2006): 273-304.

56 However, estimated service demand may not be well aligned with actual future demand.

In the sections below, we highlight findings from key studies that contribute significantly to the literature on access, efficiency, and value (quality).⁵⁷

C. Evaluation of Outcome Measures from Mergers and Acquisitions

1. Access

Studies of hospital mergers generally explore mergers' impact on cost, efficiency, quality, and price. These outcomes focus on what happens in the event of a merger. However, it is as useful to consider what might happen if a merger does not take place since the status quo often is not an alternative, e.g., a merger may prevent a hospital from entering into bankruptcy.

Becker and Dunn (2010) note that during 2000-2010, there were approximately 70 hospital bankruptcies.⁵⁸ They identify seven factors that drive bankruptcy including high levels of competition, an aging physical plant, poor physician alignment (resulting in low patient referrals), coping with a dominant commercial payor or an especially large percentage of Medicare/Medicaid reimbursement, poor cost structure, poor management, and poor quality. **Yarbrough and Landry (2009)** explore the precursors to poor financial performance and identify factors related to bankruptcy.⁵⁹ They investigate the 36 urban bankruptcies that occurred during 2000-2006. They find that reimbursement challenges including reductions in Medicare and Medicaid payments led to poor financial performance. In exploring characteristics of those firms that file for bankruptcy, they find that both smaller hospitals and independent hospitals are more vulnerable.⁶⁰

Unstable or poor financial health are often times precursors to merger activity as the firm may need financial assistance and merging with another firm provides a means to access that capital and cash flow. Actual merger activity bears this theory out as many mergers and acquisitions result in a cash infusion for the target. If not for the financial support, many of these institutions would be at risk of bankruptcy and closure. Many studies indicate that hospital closure can have disruptive effects on the local community. Hospital closure potentially reduces access to care at least in the short to medium term and vulnerable populations (e.g., the elderly or those with low-income) are more likely to be adversely impacted. Not only can a closure negatively impact access, it may influence health outcomes as well; with literature suggesting a link between hospital closure and increased mortality.⁶¹ Although cost savings may occur from a closure, the savings are not shared equally by stakeholders. The literature suggests that the local community loses while government parties and the payors absorb gains.⁶²

Many studies indicate that hospital closure can have disruptive effects on the local community. Hospital closure potentially reduces access to care at least in the short to medium term and vulnerable populations (e.g., the elderly or those with low-income) are more likely to be adversely impacted. Not only can a closure negatively impact access, it may influence health outcomes as well; with literature suggesting a link between hospital closure and increased mortality.

Kirby et al. (2005) analyze the hospital industry in California, uncovering trends that highlight challenges facing hospitals and their responses to these challenges.⁶³ The hospital industry in California has faced both income reductions and increased expenses.⁶⁴

57 We note that this listing is not exhaustive; several of the reviewed studies have extensive bibliographies of related research.

63 Paul B. Kirby, Joanne Spetz, Lisa S. Maiuro and Richard M. Scheffler, *Hospital Service Changes in California: Trends, Community Impacts and Implications for Policy*, THE NICHOLAS C. PETRIS CENTER ON HEALTH CARE MARKETS AND CONSUMER WELFARE (2005).

64 Reimbursement rates from public sector payors such as Medi-Cal and Medicare have declined and the high managed care penetration and cost containment practices they employ (i.e., utilization management such as restrictions on covered procedures, etc.) further reduce revenue from these payors. Meanwhile, operating expenses are high as California hospitals have to contend with some of the highest wages in the country, comply with nurse-to-patient staffing requirement, and implement seismic retrofitting for hospital buildings. *Ibid.*, at 10.

The authors find that in an effort to re-align and improve financial performance, struggling hospitals eliminate unprofitable service lines. During the 1995-2002 study period, approximately half of all hospitals made a change in their service offerings and one-fourth dropped one or more services.⁶⁵ Hospitals that closed four or more services tended to be financially troubled, rural, and small. Hospitals that closed completely tended to be small and less efficient. Scott-Morton and Cutler (2013) note that about 15% of hospitals in the US closed over the period 1981 to 2011.⁶⁶

Hospital closure would reduce access and may negatively impact local community-level health and wellbeing. Studies that explore the relationship between reduced access and health highlight the impact hospital closure may have on community welfare. Buchmueller *et al.* (2006) explore the impact of urban hospital closure on healthcare access and outcomes.⁶⁷ The impact of a hospital closure increases not just travel time for those residents located near the closed facility, but may increase demand at remaining hospitals and result in reduced access to care. Waiting time may increase and this may cause some to delay receiving care initially (when more easily treatable), and instead seek care once the illness is more severe. The authors explore a rash of hospital closures in LA County during the late 1980's and early 1990's. Due to financial pressures, 10 percent of the total 131 LA county hospitals were closed between 1997 and 2002.⁶⁸ To explore the impact of hospital closure, the authors use Los Angeles County Health Surveys (LACHS) for the period 1997-2003 and California's Department of Health Services cause-specific mortality data for the period 1997-2001. Hospital closures do appear to increase utilization of usual source of care for some populations.⁶⁹ However, for those individuals over age 65, a one-mile increase in the distance to the hospital reduces perceived ease of access by four percentage points. This may lead some individuals to postpone preventative care.

As hospital closure without offsetting changes in the existing healthcare infrastructure could increase the distance some residents will have to travel to obtain care, the authors focus on events for which timely treatment is crucial to achieving positive outcomes. Specifically, they examine death from heart attack (AMI) and unintentional injury sustained from home.⁷⁰ They find that a one-mile increase in distance to the nearest hospital leads to a 6.5 percent increase in AMI deaths. For unintentional injuries, the effect of an increase in distance is even more extreme. A one-mile increase in distance to the nearest hospital leads to an 11-20 percent increase in deaths due to unintentional injuries. The results presented in this paper provide evidence that hospital closures can have significant negative social welfare effects.

Capps *et al.* (2010) explore the change in social welfare due to a local hospital closing.⁷¹ Using data from the State Inpatient Database of Healthcare Cost and Utilization for two states in the mid- to late-1990s,⁷² they study five hospital closures. Their findings suggest that the local community experiences large losses from a hospital closure and that the equivalent utility of the loss ranges from \$270,000 to \$3.9 million.⁷³ However, if it is the inefficient hospitals that close, their closure would result in cost savings to payors (Medicaid, Medicare, and commercial payors). The authors find that at the national level, these cost savings overwhelm the decline in local level utility.

The set of available studies, while informative, is based on historical data and has a narrow geographic focus. Expanding the sample size and using current data especially on service offerings and impacts would prove to be directly relevant to the current discussion regarding the cost and benefits of some proposed hospital mergers and acquisitions. Changes in the healthcare environment in which hospitals operate today is significantly more challenging than in the period when the vast majority of these studies took place.

65 The most common type of service closure was for those lines related to labor and delivery. Surprisingly, the authors note that there was little negative impact resulting from the closure of obstetrics services as the average incremental increase in travel time to the next nearest hospital was a only two-tenths of a mile. However low-income expectant mothers may have been adversely impacted by increased travel time. *Ibid.*, at 8-9

66 Culler and Scott Morton (2013) at 1965.

67 Thomas C. Buchmueller, Mireille Jacobson and Cheryl Wold, *How Far to the Hospital? The Effect of Hospital Closures on Access to Care*, 25 JOURNAL OF HEALTH ECONOMICS 4 (Jul 2006): 740-761

68 The authors include three Orange County hospitals in the analysis as they were the closest general acute care facility for some LA County residents. Four hospitals closed in 1998, eight in 1999, one in 2000, and two in 2002. Of the 15 hospitals that closed, 12 hospitals were for-profit and all but five had an emergency department. *Ibid.*, at 742.

69 This may be through redirecting individuals from the local emergency room to their primary care provider.

70 As a specification check, the authors test the relationship between deaths from two causes which should not be influenced by an increase in travel time: cancer and chronic ischemic heart disease. Their findings show that the mortality rate for either of these conditions does not appear to be sensitive to changes in distance. Buchmueller *et al.* (2006) at 744.

71 Corey Capps, David Dranove and Richard Lindrooth, *Hospital Closure and Economic Efficiency* 29 JOURNAL OF HEALTH ECONOMICS 1 (Jan 2010): 87-109

72 The authors study the Tampa market in 1995 and 1996, the Tucson market in 1998, and the Phoenix market in 1997. They narrow their analysis to focus on the data required for the analysis is available from HCUP and because each area has a well-defined geographic market and contains small to medium sized MSAs. Reasons for each of the hospital closures are not provided.

73 The loss is measured using a consumer discrete choice model that captures the extra distance an individual will have to drive when his "first choice" hospital is no longer an option. The model measures willingness to pay (WTP) and the authors convert this to dollars using two estimates of the average value of travel time (low end: \$16/hour, high end: \$20/hour). Travel time is calculated not as actual travel time but effective travel time (this is the calculated as expected length of stay times actual travel time). Assuming that only one person travels round trip to the hospital per day, and time is valued at \$16.00 per hour, the low end estimate of the utility loss from closure is \$270,000. The high end estimate, \$3.9 million is calculated assuming that travel time is valued at \$20 per hour and two people visit the patient each day. Capps *et al.* (2010) at 94

As noted elsewhere in this report, significant differences in the operating environment include technology advances, different reimbursement frameworks and payor mix, technological changes such as the drive to increase adoption of electronic medical records, and a shift from inpatient to outpatient care. As access to care is a fundamental component of achieving the Triple Aim, more studies along these lines of those presented here should be undertaken that consider the challenges of today's hospital operating environment, including financial challenges, and the impact of hospital transaction activity.

2. Cost and Efficiency

As evidenced in studies about views of hospital industry executives and financial experts, many believe consolidation can lead to substantial value creation. Consolidation provides the opportunity to realize operating efficiencies, including consolidation of operations, and operating expense reductions. Studies find that consolidation may lead to realignment of services and a reduction in excess capacity as well as slower cost growth and increases in economies of scale and scope.⁷⁴

Studies find that consolidation may lead to realignment of services and a reduction in excess capacity as well as slower cost growth and increases in economies of scale and scope.

Alexander *et al.* (1996) analyze 92 hospital mergers that occurred between 1982 and 1989 to explore the short-term effects of a merger on scale of activity, staffing, and operating efficiency.⁷⁵ Their empirical findings indicate that although the occupancy rate declines during the study period, the decline is significantly less drastic among the merging sample than among those in the control group of non-merging hospitals. A similar result emerges in cost growth. Costs increased for both merging and non-merging hospitals, but the observed increases were more modest among the former. The study finds evidence of reorganization and realignment as a result of mergers with changes occurring primarily within operating areas. However, these changes are not equally distributed among all hospitals within the sample and are instead a function of the characteristics of the merging organizations and conditions of the respective transaction. For example, mergers that occurred later in the period tended to have larger efficiency impacts than did those occurring earlier. Mergers between similarly sized hospitals resulted in the largest change in operating characteristics.

"...merging hospitals experience significantly lower cost growth, 10.1 percentage points lower than that of non-merging hospitals. They find similar results for price growth and noted that it was 7.9 percentage points lower than among non-merging hospitals. Spang et al. (2001)

Several studies find that consolidation leads to significantly slower cost growth. Spang *et al.* (2001) explore this topic by examining how cost and price growth over an extended period of time differ between firms that merge and those that do not.⁷⁶ They find that merging hospitals experience significantly lower cost growth, 10.1 percentage points lower than that of non-merging hospitals. They find similar results for price growth and noted that it was 7.9 percentage points lower than among non-merging hospitals.⁷⁷ Dranove and Lindrooth (2003) undertake a study to determine if hospital consolidation leads to cost savings.⁷⁸ The analysis includes both hospital mergers and system consolidation and compares the estimated differential effects between the two. **The results suggest that the median hospital merger resulted in a cost reduction of 14 percent and that these cost savings persist.** The savings were evident in the follow-up period extending two, three, and four years following the consummation of the transaction. They note that having significant service overlap appears to be a driver of the observed cost reduction. However, among the system acquisition sample, they do not find statistically significant cost reductions during the four-year period following the merger event.⁷⁹

ential effects between the two. **The results suggest that the median hospital merger resulted in a cost reduction of 14 percent and that these cost savings persist.** The savings were evident in the follow-up period extending two, three, and four years following the consummation of the transaction. They note that having significant service overlap appears to be a driver of the observed cost reduction. However, among the system acquisition sample, they do not find statistically significant cost reductions during the four-year period following the merger event.⁷⁹

74 For example, a recent study by Cutler and Scott Morton reference "robust" findings of studies with regard to benefits such as the ability of larger health systems to undertake more costly investments; while noting that empirical findings on other benefits are mixed, the authors note the prospect of improved efficiency from more efficient care coordination, citing this as one of the rationales for ACOs. Cutler and Scott Morton (2013). In a 2009 study, Fisher *et al.* examine opportunities for cost savings and note that increases in efficiency and reductions in cost may be possible through coordinated/integrated care. Eliot S. Fisher, Mark B. McClellan, John Bertko *et al.*, *Fostering Accountable Health Care: Moving Forward in Medicare* 28 HEALTH AFFAIRS 2 (2009):w219-w231.

78 David Dranove and Richard Lindrooth, *Hospital Consolidation and Costs: Another Look at the Evidence*, 22 JOURNAL OF HEALTH ECONOMICS 6 (2003):983-97

79 *Ibid.*, at 991-993.

Contrary to the findings of Dranove and Lindrooth (2003), Spang *et al.* (2009) do find significant cost savings resulting from system acquisition.⁸⁰ Their results suggest that pre-consolidation, hospitals in their sample had both higher costs and higher prices than the average hospital in the comparison group. They postulate that these factors may have driven these firms toward consolidation in an effort to become more efficient and competitive by reducing costs and lowering price. In testing for differential effects by ownership status, the authors find that the observed cost and price savings which resulted from the merger were present for for-profit hospitals only.

Economies of scale are one vehicle through which consolidation may lead to efficiency gains. Harrison (2011) employs a novel approach that disentangles cost savings occurring from changes in output mix with savings that occur from actual economies of scale.⁸¹ She finds that cost savings due to achieving economies of scale amount to a two percent reduction in pre-merger costs and that hospitals experience these cost savings almost immediately. However, Harrison notes that savings due to economies of scale may not persist over time. Long term cost saving is likely due to changes in output levels.

Available empirical evidence on recent mergers supports findings of improvement in performance (e.g. patient volumes) for merged hospitals. Although the vast majority of studies focus on merger activity during the mid-1990s, Deloitte (2013) recently released a study analyzing a set of transactions occurring in 2007-2008.⁸² The report provides some useful basic insights about the outcomes of more recent hospital transactions. Analyzing 101 hospital transactions consummated during this time period, the study evaluates basic performance measures of merging hospitals over time, and relative to a comparison group. Although the report finds that the hospitals involved in a transaction typically track below those in the comparison group on some measures, they find that over the 2008-2010 period, acquired hospitals, as a group, realized substantial increases in patient volumes. This is a significant finding suggesting that these hospitals not only remained in operation, but may have improved quality or altered service mix to attract these higher volumes. More comprehensive controls and econometric estimation of these and other metrics for acquired and control hospitals could provide greater insights into benefits for consolidation generally and as compared to the status quo of no transaction.

The literature reviewed in this section presents strong evidence that hospital mergers can lead to increased efficiency and reduced cost, particularly where they permit economies of scale or realignment of services. The cost savings that result from mergers appear to be persistent and are not limited to a level drop, but produce slower cost growth overtime. Economies of scale resulting from hospital mergers could amount to a cost savings of two percent operating expenses. Another benefit is that merging hospitals have improved occupancy rates compared to non-merging hospitals. In addition, poor performing or inefficient hospitals (hospitals with high price and high costs) are able to benefit from consolidation by reducing costs and prices, becoming more competitive. The findings from these studies combine to provide strong evidence that hospital mergers and acquisitions result in significant efficiency improvements and cost declines.

3. Quality

Mergers and system acquisitions have the potential to impact quality through many different mechanisms. Consolidated operations may be able to increase the volume of certain types of procedures, thereby increasing the experience level (and performance) of the physicians as well as increase utilization of other hospital resources and technologies.⁸³ This is an important consideration as seemingly modest improvements in hospital quality can have a significant effect on patient welfare. As Section III points out, access to capital is a growing concern as many planned or in-progress projects are forced to be put on hold for lack of funds. An acquired struggling hospital may benefit from a capital infusion which permits increased investment in staff, technology, or facilities, all of which may lead to increased quality of service. **Another benefit of consolidation is that successful operating practices and procedures established at one location may be adopted by the other party in the transaction, thereby offering an opportunity for improvement.**

Cuellar and Gertler (2005) explore the effects of system consolidation on quality as measured by inpatient mortality, overuse of procedures, and patient safety indicators.⁸⁴ They find that the rate of overused procedures declines by 1.2 percent following a system consolidation, but that this finding applies to managed care patients only. They fail to find any other change among the quality

83 Volume impacts are recognized for example in a recent study on mergers by Cutler and Scott Morton (2013) at 1967 citing to Birkenmeyer *et al.* (2002 and 2003).

84 Allison E. Cuellar and Paul J. Gertler, *How the Expansion of Hospital Systems Has Affected Consumers* 24 HEALTH AFFAIRS 1 (Jan-Feb 2005): 213-219 [2]. They restrict their analysis to hospitals in four states: Arizona, Florida, Massachusetts, and Wisconsin. They utilize patient-level discharge data, hospital financial data (obtained from the state), and AHA survey data for period 1995-2000.

measures selected for the analysis and conclude that there is little effect from system acquisition on quality. In interpreting these results, it is important to note that their study has several limitations. The authors note that the effects of implementing change that will materially improve hospital level quality takes time to show up in quality metrics. The relatively short duration of the observation period may not have allowed enough time for meaningful change to be observed. They also note that it may be that some changes which impact quality had been successfully implemented, but these factors may not have been captured by the outcome measures investigated in the study. In addition, the study focuses only on four states and the results presented may not be representative of transactions occurring in other states.

Mutter et al. (2011) perform a pre-post analysis of hospital consolidations in 16 states that occurred in 1999 and 2000.⁸⁵ Their findings indicate that evaluating the quality effects of a merger or acquisition is complex and that the results vary depending upon the entities' role in the transaction (acquirer or target) and the type of transaction (system acquisition or two-to-one merger). The authors find that hospital consolidation is associated with some increases in quality measures as well as some that suggest decreased quality.⁸⁶ In comparing the difference in quality effects between the target and acquirer, the authors find that acquiring hospitals experience some improvement for procedures with a likely volume-outcome relationship. However they note that overall, hospital consolidation did not appear to have a significant effect on the vast majority of quality indicators considered in the study.⁸⁷ General literature also addresses the volume-quality relationship and finds some strong relationships.⁸⁸ **Town (2011)** raises important considerations regarding Mutter's (2011) paper.⁸⁹ He notes that although Mutter concludes that there is no consistent impact on quality due to mergers, an alternative interpretation of his findings is that there was no observed impact for the average hospital in the sample. As the ability to improve quality depends upon many factors (market structure and patient characteristics, etc.), the effect of mergers on quality is expected to be heterogeneous. As such, the impact may not be detected using a linear framework.⁹⁰ In addition, Town points out that even relatively small changes in a quality measure could have a significant effect on patient welfare.⁹¹

Romano and Balan (2010) measure quality changes due to a merger by using Inpatient Quality Indicators (IQIs) and Patient Safety Indicators (PSIs) as well as risk-adjusted mortality for heart attacks, neonatal mortality, and obstetric trauma.⁹² This study differs from those presented in this section as it focuses on a single transaction (the acquisition of Highland Park by Evanston Northwestern Healthcare) and attempts to identify changes that occurred in patient quality as a result of acquisition.⁹³ The results from these analyses do find some improvements at both Highland Park and Evanston. Several nursing sensitive PSIs at Highland Park Hospital indicate statistically significant improvements, however, risk adjusted obstetric PSI measures show some deteriorations post-merger. At Evanston, the authors find a post-merger decreased risk of adjusted pneumonia and stroke mortality. All other indicators are of mixed sign and are statistically insignificant.⁹⁴

85 Ryan L. Mutter, Patrick S Romano and Herbert S Wong, *The Effects of Us Hospital Consolidations on Hospital Quality* 18 INTERNATIONAL JOURNAL OF THE ECONOMICS OF BUSINESS 1 (2011): 109-26. They employ the use of Healthcare Cost and Utilization Project (HCUP) data and measure patient quality using 25 of the Agency for Healthcare Research and Quality (AHRQ) Inpatient Quality Indicators (IQIs) and Patient Safety Indicators (PSIs)

86 The authors find that hospital consolidation is associated with decreased rates of failures to rescue and in-hospital mortality for pneumonia, increased rates of incidental appendectomy (for the elderly only), and increased rates of bloodstream infections *ibid.*, at 119.

87 The research design the authors implement presents advancement over the methodology used in many other studies as it considers both parties separately, and specifically seeks to find the ways in which the acquirer may itself individually benefit. This is an important consideration as consolidating services may result in one party experiencing improvement in a selected outcome because they are able to benefit from the volume-outcome relationship. However, if quality measures selected for analysis in studies are those for which volume is not an influencing factor, the studies may not detect actual improvements in quality.

88 Birkmeyer et al. (2002) find an inverse relationship between hospital surgical volume and mortality (operative death) for each of the 14 inpatient procedures (six types of cardiovascular procedures and eight types of major cancer resections) they investigate. They note that the relative importance of surgical volume varies depending on procedure type and ranges between a difference of 12 percent (for pancreatic resection) at the high end of the range and a difference of 0.2 percent (for carotid endarterectomy) at the low end of the range. John D. Birkmeyer, Andrea E. Siewers, Emily V.A. Finlayson, et al., *Hospital Volume and Surgical Mortality in the United States*, 346 NEW ENGLAND JOURNAL OF MEDICINE 15 (2002): 1128-1137. Birkmeyer et al. (2003) find that surgeon volume and operative mortality are inversely related for each of the eight procedures they investigate (cardiovascular procedures and cancer resections). They note that although hospital volume appears initially to be the driver of this volume-outcome relationship, surgeon volume that accounts for a large proportion of the effect they identify. For aortic-valve replacement, surgeon volume accounts for 100 percent of the effect (the high end of the range), while 24 percent of the effect (the low end of the range) is due to surgeon volume for lung resection. John D. Birkmeyer, Therese A. Stukel, Andrea E. Siewers et al., *Surgeon Volume and Operative Mortality in the United States*, 349 NEW ENGLAND JOURNAL OF MEDICINE 2 (2003): 2117-2127.

89 Robert Town, *The Effects of Us Hospital Consolidations on Hospital Quality: A Comment*, 18 INTERNATIONAL JOURNAL OF THE ECONOMICS OF BUSINESS 1 (2011): 127-131.

90 A linear framework refers to the commonly utilized methodology relied upon to test for the effect of a merger by comparing observed rates pre-merger with observed rates post-merger for the sample under review.

91 Town presents a simple calculation under which a five percent decline in in-patient mortality would save 255 lives at a hypothetical hospital, representing an increase in consumer benefit of \$1275 million. Town (2011) at 128.

92 Patrick S. Romano and David J. Balan., *A Retrospective Analysis of the Clinical Quality Effects of the Acquisition of Highland Park Hospital by Evanston Northwestern Healthcare*, FTC BUREAU OF ECONOMICS WORKING PAPERS (2010).

93 The transaction of interest occurred in 2000 and the authors use data from 1998-2003

94 Romano and Balan (2010) at 55.

Ho and Hamilton (2000) explore the quality effects of hospital mergers occurring in California.⁹⁵ Results both for patients as a whole and patients grouped by insurance type indicate that there was no change for inpatient mortality. However, patients receiving treatment in a merged hospital experienced a 1.7 percentage point increase in the probability of readmission compared to a 0.9 percentage points increase for those receiving treatment in a hospital acquired by a system. The probability of early discharge (for newborns) increased by 3.2 percentage points in those hospitals acquired by another system. Although this study is often cited when addressing the quality effects of mergers and acquisitions, it has several limitations.⁹⁶

The literature reviewed in this section demonstrates that a fairly narrow range of outcomes are generally explored when attempting to identify the quality effects of hospital mergers and acquisitions. While most studies focus on readmission and mortality, some include IQIs and PSI. Although readmission and mortality have the advantage of being discrete events that are readily identified, they can present measurement challenges. Readmission can be used as a measure of quality with the justification that if a patient receives appropriate care, the probability of readmission should be lower. However, it is unclear over what length of time readmission should be measured. Additionally, ill patients may seek care at a different facility if they perceive the quality of care at their original institution as being suboptimal. Or at the extreme, critically ill patients may experience increased mortality preventing readmission from occurring. Most quality studies suffer from a significant limitation in that they fail to identify an appropriate control group. This is important as hospitals that merge (or are acquired) may be fundamentally different from those that do not. Identifying quality effects due to consolidation is difficult as the time period under review may be too brief to detect change. A longer time span would allow for implementation/adoption of new processes and procedures that may produce meaningful improvements in quality. In general, the results presented in this section highlight the need for caution when interpreting results and demonstrate the need for more research within this area of study.⁹⁷

IV. Insights from Antitrust Review of Hospital Transactions: There is More to Hospital Merger Impact Assessment than Market Concentration and Share

A. Overview

Much of the popular press on hospital mergers and antitrust concerns focuses primarily on aggregate market share and concentration trends by city as the basis for competition concerns about future mergers – that is, that local metropolitan areas (e.g., MSAs) may have fewer competitors or have experienced increased market shares of top hospitals or concentration today as compared to some point in the past.⁹⁸ This approach, however, does not connect the dots between concentration trends and the actual merger activity that has occurred – or is likely to occur in the future. Moreover, predictions about adverse effects on competition from this “trend” toward concentration typically are not based on any specific or fact-intensive inquiry into the effects of recent mergers, their

Moreover, predictions about adverse effects on competition from this “trend” toward concentration typically are not based on any specific or fact-intensive inquiry into the effects of recent mergers, their effects or motivations, but largely by reference to academic research evaluating price effects or studies examining relationships between price and structure conducted predominantly on data from the 1990s.

95 Vivian Ho and Barton H. Hamilton. *Hospital Mergers and Acquisitions: Does Market Consolidation Harm Patients?* 19 JOURNAL OF HEALTH ECONOMICS 5 (2000): 767-91. To investigate the effect of hospital mergers and acquisitions on quality, they identify 21 independent hospitals involved in a merger and 54 hospitals acquired by a system in California during 1992-1995. They use patient-level data from the California Office of Statewide Health Planning and Development (OSHPD) and AHA survey data. The outcomes measures of interest are inpatient mortality for heart attack and stroke patients, 90 day readmission rates for heart attack patients, and early discharge of newborns. The authors believe that quality effects may be due to changes in market power. If mergers and acquisitions increase market power by reducing competition, the hospitals within these markets may face less pressure to maintain or improve quality in order to stay competitive. They hypothesize that since a hospital may have little opportunity to exert market power to influence price, they may instead attempt to improve their bottom line by reducing cost via offering lower quality of care. The authors note that hospitals may have very limited ability to utilize increases in market power gained via mergers or acquisitions to influence price. This is because a large proportion of the hospital's volume stems from Medicare patients and the prices Medicare offers are essentially fixed. In addition, private insurers may use Medicare prices as a benchmark, so if Medicare prices remain steady, private payer prices may remain fixed as well.

96 The most significant limitation is in the failure to identify a better matched control group as hospitals that merge (or are acquired) may be fundamentally different from those that do not. In addition, the explanation for what drives the observed outcomes is at odds with findings from many other studies. Even if the findings were accurate for transactions which occurred in the early 1990s, results may not be applicable in today's operating environment, 20 years later. Information sharing and the availability of hospital performance measures along with financial penalties for poor performance (which are based on factors such as readmission and safety indicators) would moderate any desire to cut quality in order to reduce costs. Furthermore, the authors do not attempt to explain the mechanism through which quality reduction occurs.

97 For a more detailed review of the issues associated measuring quality in the empirical literature, see Guerin-Calvert and Israilevich (2011).

98 We note that this is sometimes portrayed as the increase in average concentration which can obscure the many cities that have lower concentration. For example, one study cites the increase in the average MSA level HHI from 2,440 in 1992 to 3,261 in 2006. Martin Gaynor, *The Three Ws of Consolidation and Competition in US Health Care*, Presentation to BIG HEALTH: CONSOLIDATION AND COMPETITION UNDER THE AFFORDABLE CARE ACT, The American Enterprise Institute, Washington, DC (March 1, 2013), slide 10, available online at www.aei.org/files/2013/03/05/gaynor-slides_102018805600.pptx. Other studies that show concentration measures by geography reveal that many of the largest cities in the country are unconcentrated or moderately concentrated. See, e.g., Cutler and Scott Morton (2003) who compare concentration in the mid-1980s to today (at 1966).

effects or motivations, but largely by reference to academic research evaluating price effects or studies examining relationships between price and structure conducted predominantly on data from the 1990s.⁹⁹ Few conduct systematic examination using data on actual transactions *in the past decade* or place mergers that were the subject to challenge in the context of overall merger activity.

This section provides a summary of antitrust review of hospital transactions to provide insights into whether recent transaction trends are consistent with concerns about anticompetitive effects across a large population of mergers – and also to assess the findings from the empirical literature on merger competitive effects:

- Only a small proportion of actual hospital transactions raise significant risks of substantial lessening of competition. The vast majority of transactions occurred in separate geographies or in ones with numerous competitors. Only a minority of mergers involved prolonged review by the antitrust agencies and of those several were not challenged.
- These trends are more supportive of a conclusion that the majority of transactions are competitively benign or value-enhancing transactions.
- High concentration, high market shares and the number of competitors are not predictive of either hospital merger challenges or predicted or actual anticompetitive effects: Both retrospective and prospective hospital merger analyses in highly concentrated markets show that mergers even in concentrated markets were not predicted to bring about, nor resulted in, substantial increases in prices.

- There were approximately 333 hospital mergers from 2007-2011
 - Approximately 111 of those were reported to the FTC under Hart-Scott-Rodino
 - Approximately less than 1/10 of these triggered Second Requests
 - Only four were challenged in court – less than two percent of all hospital mergers over the last five years
- Leibowitz (2012)

B. Summary of Recent Antitrust Review of Hospital Mergers

In evaluating the impact of hospital mergers on competition and pricing it is useful to turn first to some statistics regarding antitrust review of recent hospital mergers. Government statistics suggest that only a small proportion of actual hospital transactions raise any risk of substantial lessening of competition. This finding is consistent with overall merger review statistics, which show that the vast majority of transactions reviewed by the federal agencies are found to be unlikely to result in a substantial lessening of competition.¹⁰⁰ The FTC has handled the prospective review of the vast majority of hospital transactions in recent years.¹⁰¹ According to Former FTC Chairman Leibowitz: "Let me pause here lest you get the impression that we never see a hospital merger we like. These are rough numbers, but according to public sources, 2007 to 2011 witnessed approximately 333 hospital mergers nationwide. About one third of those, approximately 111, were reported to the FTC under Hart-Scott-Rodino. Of those, approximately one tenth triggered Second Requests. We challenged only four in court – less than two percent of all hospital mergers over the last five years."¹⁰²

99 Moreover much of this research focuses on highly concentrated "markets" or on mergers of geographically proximate competitors with few rivals. See, e.g., William B. Vogt and Robert Town, *How Has Hospital Consolidation Affected the Price and Quality of Hospital Care?* THE SYNTHESIS PROJECT, 9 (Feb 2006) available online at http://www.rwjf.org/content/dam/lam/reports/issue_briefs/2006/rwjf12056/subassets/twjf12056_1

100 "Mergers between competing firms, i.e., "horizontal" mergers, are a significant dynamic force in the American economy. The vast majority of mergers pose no harm to consumers, and many produce efficiencies that benefit consumers in the form of lower prices, higher quality goods or services, or investments in innovation. (Forward) The core concern of the antitrust laws, including as they pertain to mergers between rivals, is the creation or enhancement of market power...Most mergers between rivals do not create or enhance market power. However, the Agencies challenge mergers that are likely to create or enhance the merged firm's ability—either unilaterally or through coordination with rivals—to exercise market power. The Agencies focus their attention on quickly identifying those transactions that could violate the antitrust laws, subjecting those mergers to greater scrutiny. For more than 95% of the transactions reported under HSR, the Agencies promptly determine...that a substantial lessening of competition is unlikely." US DOJ/ FTC Commentary on the Horizontal Merger Guidelines, March 2006 at Forward and Introduction. <http://www.justice.gov/atr/public/guidelines/215247.htm>.

101 The FTC reviews transactions under the Hart-Scott-Rodino Act, and has also reviewed hospital transactions that do not meet HSR criteria.

102 Jon Leibowitz, Chairman, Federal Trade Commission, *Are Titanic Health Care Costs Sinking Us? What the FTC is Doing to Keep Patients Afloat*, Remarks at the ANTITRUST IN HEALTHCARE CONFERENCE, American Bar Association/American Health Lawyers Association, Arlington, VA (May 3, 2012)(emphasis added), available online at <http://www.ftc.gov/speeches/leibowitz/120503antitrustinhealthcare.pdf>. This speech and Maureen O'Hausen provide a summary of the challenged transactions. Maureen K. O'Hausen, *Protecting Consumer Welfare in the U.S. Health Care Sector*, Remarks at the FORUM FOR EU-US LEGAL-ECONOMIC AFFAIRS, the Mentor Group (September 13, 2013). See also Jeffrey W. Brennan and Margaret E. Guerin-Calvert, *Assessing Hospital Mergers and Rivalry in an Era of Health Care Reform*, 27 ANTITRUST 3 (Summer 2013).

Hospital Realignment: Mergers Offer Significant Patient and Community Benefits

Although about half of all transactions between 2007 and 2012 occurred within the same geography, statistics show that the vast majority of hospital merger transactions passed antitrust review without need for extensive additional information. Moreover, not all of the healthcare transactions that triggered Second Requests led to challenges or threatened challenges (and/or abandonment) even though the alleged geographic markets were highly concentrated and had few hospital competitors in each of these transactions. This suggests other factors provided sufficient evidence of post-merger competitive discipline or consumer and community benefits from these specific transactions, including the absence of "customer complaints."¹⁰³

...the absence of antitrust action for the vast majority of hospital transactions is inconsistent with concern that hospital mergers routinely implicate anticompetitive behavior, triggering higher prices.

While the challenges indicate that some mergers were regarded as posing significant risks to competition, the absence of antitrust action for the vast majority of hospital transactions is inconsistent with concern that hospital mergers *routinely* implicate anticompetitive behavior, triggering higher prices. First, the statistics suggest that the market structure in which many of the mergers occurred were not likely to raise competitive concerns. As noted previously, a large proportion of the acquisitions in the last six years did not involve overlapping geographies or, where there was an overlap, involved hospitals in areas with numerous competitors.¹⁰⁴ The transactions data also confirm that system acquisitions or formations infrequently have resulted in antitrust challenges, even though there have been a number of such transactions in the past two decades. Many of the larger healthcare systems in the US have facilities in a number of states, and acquisitions often have involved geographic expansion into new areas or states.¹⁰⁵

The transactions data also confirm that system acquisitions or formations infrequently have resulted in antitrust challenges, even though there have been a number of such transactions in the past two decades.

Second, the overview of hospital antitrust review highlights the fact-intensive nature of the inquiry involved in assessing the likely competitive effects and expected benefits of transactions. Merger review in the hospital sector as in other industries examines whether the specific transaction is likely to result in a substantial lessening of competition, or alternatively be pro-competitive with benefits manifested in efficiencies or quality.¹⁰⁶ The record from antitrust review and merger retrospectives (discussed below) makes clear that market structure alone is not a sufficient basis

from which to infer competitive effects. In assessing the relative merit of a merger transaction, several factors are considered including:

- The sufficiency of competitive alternatives (hospital rivals for the merging firms) and rivalry among hospitals
- The factors that promote or limit the ability of payors to negotiate competitive rates post-merger (including the importance of payors to hospitals and mechanisms that encourage use of higher value/lower cost alternatives)
- The rationale for the transaction and its quality and access benefits in the form of improved value relative to the "status quo."

103 See, Darren Tucker, *A Survey of Evidence Leading to Second Requests at the FTC*, 78 ANTITRUST LAW JOURNAL 3 (2013):591-617 at Table 4, which shows 11 hospital transactions received Second Requests and most were in markets that FTC staff considered to be highly concentrated with few competitors. While there were no closing statements issued, other tables in the Tucker article suggest that reasons for conclusions that the transactions would not substantially lessen competition or warrant challenge could be absence of customer complaints or other factors with offsetting benefits or lower risks of competitive concerns (such as financial condition, capacity, or efficiencies). See also, closing statement on one FTC retrospective discussed below. For a discussion of possible efficiencies or benefits from transactions that could meet staff's concerns see, e.g., Jeffrey H. Perry and Richard H. Cunningham, *Effective Defenses of Hospital Mergers in Concentrated Markets*, 27 ANTITRUST (Spring 2013):43-47

104 See, discussion above in Section I. See, *The Hospital Acquisition Report*, IRVING LEVIN ASSOCIATES INC (2012) at 15-228 and *How Hospital Mergers and Acquisitions Benefit Communities: Updated Study by the Center for Healthcare Economics and Policy*, CENTER FOR HEALTHCARE ECONOMICS AND POLICY AND THE AMERICAN HOSPITAL ASSOCIATION (September 2013), available online at <http://www.aha.org/content/13/13mergebeneitcommty.pdf>. The largest cities (as measured by Metropolitan Statistical Areas or MSAs) tend to be unconcentrated, based on measures of hospital systems and bed counts. See, *AHA Hospital Statistics*, AMERICAN HOSPITAL ASSOCIATION (2013) for bed counts and hospital affiliations, and for population and definition of MSAs, *Metropolitan and Micropolitan Statistical Areas*, U.S. CENSUS BUREAU, POPULATION DIV., available online at <http://www.census.gov/popest/data/metro/totals/2011>. See also, Thomas C. Brown, Jr., et al., *Current Trends in Hospital Mergers and Acquisitions*, 66 HEALTHCARE FINANCIAL MANAGEMENT 114 (2012)

105 See, *The Hospital Acquisition Report*, IRVING LEVIN ASSOCIATES, INC (2012) at 6 for listing of transactions involving systems. Antitrust concerns raised in system transactions are infrequent and tend to involve overlaps in specific geographies. See, e.g., in the Matter of Inova Health System Foundation, and Prince William Health System, Inc., File No.: 061.0166, which was abandoned after FTC challenge. Some of the litigated hospital cases have involved systems, such as FTC and State of Missouri v. Tenet Healthcare Corporation and Poplar Bluff Physicians Group, File No. 971.0090; US v. Long Island Jewish Medical Center and North Shore Health System, Inc; and California v. Sutter Health System, No. C99-03803 MMC. These were cases where the Courts ultimately concluded that there were sufficient competitors even within the local area, and that payors had the ability to discipline pricing post-merger by making increased use of these alternatives.

106 As noted herein, there are many potential sources of pro-competitive efficiencies from mergers, including quality and cost-savings; see, Joseph Farrell, David J. Balan, Keith Brand and Brett W. Wendling, *Economics at the FTC: Hospital Mergers, Authorized Generic Drugs, and Consumer Credit Markets*, 39 REVIEW OF INDUSTRIAL ORGANIZATION 4 (2011): 271-296 for discussion in hospital industry. Assessment of these effects form a fundamental part of evaluating horizontal merger effects. See, Robert D. Willig, *Incremental Consumer's Surplus and Hedonic Price Adjustment*, 17 JOURNAL OF ECONOMIC THEORY 2 (1978):227-253 and *Unilateral Competitive Effects of Mergers: Upward Pricing Pressure, Product Quality, and Other Extensions* 39 REVIEW OF INDUSTRIAL ORGANIZATION 1 (2011):19-38. For examples in other industries see, Heyer, Ken, Carl Shapiro and Jeffrey Wilder, *The Year in Review: Economics at the Antitrust Division, 2008-2009*, 35 REVIEW OF INDUSTRIAL ORGANIZATION 4 (2009):349-367 and Mark, Israel, Bryan Keating, Daniel Rubinfeld and Robert Willig, *Airline Network Effects and Consumer Welfare: A Preliminary Overview of Methodology and Findings*, Unpublished Working Paper (2011)

Value and access benefits may be firm-specific – e.g., improving the operation and performance of a given hospital, or market-specific – e.g., enabling restructuring that aligns capacity more efficiently or enables hospitals and providers to better meet needs of a community in a more cost effective way. Moreover, benefits may be significant relative to what the hospital would do absent a merger; as discussed below, hospitals that do not merge may be forced to close or to downsize in staffing or in service lines.

Finally, the statistics and review suggest that measures of share and concentration in local geographies are not necessarily a good predictor of competitive concerns in prospective merger review or indicative of anticompetitive results from actual transactions. The variability in findings in FTC economists' studies of FTC hospital merger retrospectives provides insights. These reports are based on actual consummated mergers where the merging firms were two of relatively few competitors in what are alleged to have been highly concentrated markets. Only one of these cases (Evanston) was ultimately challenged by the FTC, and the investigation in one was actually affirmatively closed based, in part, on the majority of the Commission's assessment that the transaction had *not* resulted in significant price impact or other adverse impact for payors or consumers despite high shares and high concentration.¹⁰⁷ The other two cases examined in the FTC retrospective studies (Sutter, New Hanover) involved mixed evidence of estimated price impacts in the FTC authors' analyses, and countervailing factors or explanations such as failing firm, efficiencies, or quality effects offered by the authors or other commentators.¹⁰⁸

These retrospectives, however, are frequently cited as the primary basis for concern about the likely anticompetitive effects of hospital mergers and for the magnitude of possible price effects. For example, Cutler and Scott Morton (2013) refer to Martin Gaynor's 2011 Congressional testimony about two of these studies (on the Evanston and Sutter-Summit mergers) as a primary basis for concern about merger price effects. Gaynor and Town refer to these two retrospectives as well as one in North Carolina (Cape Fear-New Hanover) as bases for concern that hospital mergers could lead to 20-40 percent price increases.¹⁰⁹

These specific case studies and related hospital merger literature (such as that referenced in Gaynor and Town 2012) appear to have influenced perceptions of likely price impact of mergers and concerns that structural change in concentrated markets would routinely lead to higher prices. The following section provides a brief overview and assessment of these studies.

C. Review of Studies on the Estimated Price Effects from Hospital Mergers

A commonly voiced concern about hospital consolidation is that it leads to higher prices. Mergers and acquisitions are thought to increase market concentration by reducing alternatives available to payors. Fewer competitors, it is argued, equates to increased bargaining power for both the newly consolidated firm and those within the same market. This change in market concentration may ultimately influence price negotiations. Support for the assessment that mergers are likely to result in enhanced market power reference selected academic studies of price effects of mergers in the 1990s or early 2000s to draw inferences about market power impact and motivations for current and future transactions. As discussed below, some of the studies rely on payor negotiation models based on conditions more prevalent in the late 1990s – namely, broad and all inclusive networks where bargaining tended to be characterized as inclusion (or exclusion) of hospitals from a network.

A commonly voiced concern about hospital consolidation is that it leads to higher prices... Many studies examine changes in concentration over time – not discrete events (i.e. merger transactions). No consistent quantified relationship is found, however, between changes in market concentration and observed hospital price increases across studies.

107 Statement of the Federal Trade Commission in re: Victory Memorial Hospital/Provena St. Therese Medical Center. File No. 011 0225. FTC economists conducted a retrospective analysis of the pricing impact of this transaction using a difference-in-difference (DID) approach, and concluded that the transaction did not result in statistically significant increases in prices to payors relative to chosen cohorts. See, Deborah Haas-Wilson and Christopher Garmon, *Hospital Mergers and Competitive Effects: Two Retrospective Analyses*, 18 INTERNATIONAL JOURNAL OF THE ECONOMICS OF BUSINESS 17 (2011):17-32.

108 While the methodology used to estimate relative price increases at merged hospitals relative to cohorts has been critiqued, these studies show mixed results about the effects of transactions in seemingly similar market structures. In the Cape Fear-New Hanover merger (Thompson), for example, there are mixed findings for three payors studied, in Sutter-Summit (Tenn). There was no finding of statistically significant increase for the acquiring firm (Sutter Alta Bates) but only for the acquired firm (which may be explained by adjustments due to its financial condition, or as suggested by Gowrisankaran in his comment due to quality increases). The Vista transaction found little evidence of significant increases instead finding statistically significant decreases for some payors. See, Haas-Wilson and Garmon (2011) for an overview. See also, Steven Tenn, *The Price Effects of Hospital Mergers: A Case Study of the Sutter-Summit Transaction*, 18 INTERNATIONAL JOURNAL OF THE ECONOMICS OF BUSINESS 17 (2011): 65-82; Gautam Gowrisankaran, *Evaluating the Impact of a Hospital Merger Using the Difference-in-Difference of Prices (Comment on article by Steven Tenn.)* (October 2010); Aileen Thompson, *The Effect of Hospital Mergers on Inpatient Prices: A Case Study of the New Hanover-Cape Fear Transaction*, 18 INTERNATIONAL JOURNAL OF THE ECONOMICS OF BUSINESS (2011):91-101, and Decision, California v. Sutter Health System, No. C99-03803 MMC for discussion of the financial condition of Summit and the finding that Summit met the failing firm defense.

109 See, e.g., Martin Gaynor, *Health Care Industry Consolidation*, Statement before THE U.S. CONGRESS, HOUSE COMMITTEE ON WAYS AND MEANS HEALTH SUBCOMMITTEE Congress, (September 9, 2011). Gaynor references other studies based on simulations, price-concentration studies, and other methodologies, which are discussed below.

Importantly, this reliance on past (and in some cases quite distant past) merger activity and assumptions reveals the imperative for a more comprehensive understanding of *current* market conditions, *current* merger motivations and more rigorous examination of merger effects to evaluate the likely benefits or competitive risks of current and future hospital transactions. Fundamentally different market conditions could imply that this past research is ill-suited – if not misleading – to inform current understanding of likely merger effects. Past research may not capture dramatic changes ongoing in the healthcare industry, including transformative changes on the provider and insurer side, and the pressures and results of healthcare reform – particularly requirements for new technologies, new business models, and reduced reimbursements. **Most of the oft-cited studies are based on mergers or data from the 1990s, under substantially different market conditions than current conditions.** As importantly, the studies should be kept in perspective as to their ability to inform prospective merger review across all mergers and for likely price impacts of actual mergers.

Fundamentally different market conditions could imply that this past research is ill-suited – if not misleading – to inform current understanding of likely merger effects. Past research may not capture dramatic changes ongoing in the healthcare industry...

In an effort to consolidate the many pricing studies and draw together common themes and findings, Gaynor and Town (2012) and Vogt and Town (2006) prepared synthesis reports on effects of hospital consolidation.¹¹⁰ They summarize the findings of a number of studies examining merger effects and changes in concentration, including price-concentration studies, merger retrospectives, studies assessing specific mergers or sets of mergers and merger simulations using hypothetical mergers or actual mergers and specific econometric models.

They conclude from their review of selected merger retrospectives and a study by Leemore Dafny (addressed below) that “price increases exceeded 20% when mergers occurred in concentrated markets” (Gaynor and Town, 2012). As a starting point, it is important to note that the studies they reference are *specific* cases involving selected transactions or data from mergers in highly concentrated markets and thus are not generalizable to all mergers and acquisitions or even to *all* mergers in highly concentrated markets: (1) The majority of hospital acquisitions occur between firms located in different markets and would not be subject to the same market forces that study authors hypothesize drove price increases. (2) Many “in-market” mergers occur in the largest metropolitan areas with many competitors and do not involve material changes in concentration. (3) Even the selected case studies show mixed results – concentrated markets alone did not yield significant price increases.

- **Many studies examine changes in concentration over time – not discrete events (i.e., merger transactions). No consistent quantified relationship is found, however, between changes in market concentration and observed hospital price increases across studies.**¹¹¹

We review here some of the most frequently cited concentration studies and their findings. The studies attempt not only to determine if a relationship exists, but to quantify the impact increases in market concentration may have on the price level. Vogt and Town (2006) provide a summary of many of these studies and, importantly, report mixed findings. According to the authors, Structure-Conduct-Performance Studies find estimated price effects with findings ranging from negative to positive (a price change of *negative* three percent to positive 17 percent) while selected event studies also find price increases, including one study which finds increases of 40 percent.¹¹² These studies they review are based on data from the late 1980s and 1990s and utilize a range of methodologies.

Additional studies that are somewhat more current but largely based on historical data include Antwi *et al.* (2009). They explore price and market concentration changes in California during the period 1992-2006.¹¹³ They find that hospital prices almost doubled¹¹⁴ and market concentration increased significantly during this period.¹¹⁵ However, when disaggregating by market area, they do not find any correlation between the rate of hospital price growth and HHI. This result suggests that changes in market concentration did *not* cause

110 William B. Vogt and Robert Town, *How Has Hospital Consolidation Affected the Price and Quality of Hospital Care?* THE SYNTHESIS PROJECT, 9 (Feb 2006) available online at http://www.rwjf.org/content/dam/farm/reports/issue_briefs/2006/rwjf12056/subassets/rwjf12056_1; Martin Gaynor and Robert Town, *The Impact of Hospital Consolidation – Update*, THE SYNTHESIS PROJECT (June 2012), available online at <http://www.rwjf.org/en/research-publications/find-rwjf-research/2012/06/the-impact-of-hospital-consolidation.html>. Gaynor’s 2011 Congressional testimony refers to eight of these studies, and summarizes additional literature on price variation and simulations.

111 See, Gaynor and Town (2012) at Table I for a summary of results.

112 See, Vogt and Town (2006) at 6-8 for a detailed summary of several structure-performance studies, and their review and critique of them.

113 Yaa Akosa Antwi, Martin Gaynor and William Vogt, *A Bargain at Twice the Price? California Hospital Prices in the New Millennium*, 12 FORUM FOR HEALTH ECONOMICS AND POLICY 1 (2009).

114 Price is measured by net revenue per discharge.

115 During 1992-2003, market concentration in the average county in California increased from 2,046 to 2,824. This change is consistent with the nationwide increase in HHI during this period. Antwi *et al.* (2009) at 8.

increases in hospital price. The authors mention increased costs¹¹⁶ and HMO backlash as potential contributing factors, but are not able to identify the cause of the price increases they find. Moriya *et al.* (2010) analyze the relationship between insurer and hospital market concentration and hospital prices.¹¹⁷ Using commercial claims data covering 11 million commercially insured lives during 2001-2003, their findings suggest that hospital concentration is *not* significantly associated with price increases.¹¹⁸ However, the authors do find that insurer market concentration is associated with a statistically significant reduction in hospital prices.¹¹⁹ Dranove *et al.* (2008) examine whether the market concentration-hospital price relationship began to weaken during the 1990's through early 2000's.¹²⁰ To do so, they use data from California and Florida for the years 1990-2003.¹²¹ This study presents results about the hospital price-market concentration relationship; review of the study suggests that it declined and possibly reversed after peaking in 2001.¹²² Although not specifically addressed in their study, it may be that the recent shift in payor concentration and changes in payment mechanisms may have played a role in the results they find. Payment mechanisms that encourage consumers or physicians to take relative costs of care into account may increase the ability of payors to discipline pricing in geographies.¹²³

- It is difficult to generalize about merger effects from some studies due to methodology and approach; several are based on simulations or models that either have not been validated against actual mergers or whose key assumptions may no longer be consistent with market realities. Price predictions may thus be overstated – possibly substantially.

One frequently cited study regarding the price effects of hospital mergers is the 2009 study by Dafny.¹²⁴ This study is characterized as an "event study" by Town and Vogt. To address the concern of selection, namely that firms that merge tend to be different than firms that do not, Dafny instruments for rival mergers using rival co-located pairs.¹²⁵ The author's main results are based on the particular estimation technique used, *i.e.*, instrumental variable analysis.¹²⁶ The author compares the results obtained using the instrumental variable approach with the results obtained from using actual mergers.¹²⁷ While the former indicate large and statistically significant price changes, the latter, *finds no price increase*. This highlights the fact that the results presented as main findings are highly sensitive to the methodology employed.¹²⁸ Finally, the analysis focuses only on markets with co-located merging hospital pairs and may have limited external validity. The author notes "Caution must be exercised, however, when extrapolating these conclusions to hospital mergers in general. The estimates I obtain rely on responses to mergers of co-located hospitals, which likely enjoy especially strong post-merger increases in market power."

116 Two items which could have contributed to cost increases during this time are the newly adopted mandatory nurse-patient staffing levels and the seismic retrofitting mandate for hospital buildings.

117 Asako Moriya, William Vogt and Martin Gaynor, *Hospital Prices and Market Structure in the Hospital and Insurance Industries* 5 HEALTH ECONOMICS, POLICY AND LAW 4 (2010): 459-479.

118 Price is measured by actual transaction price. Although the coefficient on hospital concentration was positive, it was imprecisely measured as evidenced by the large standard errors. In a sensitivity test using different subset of states, the correlation between prices and hospital HHI remained statistically insignificant in every specification and was of varying sign. The hospital market was defined using Hospital Services Areas which consists of several counties.

119 It is unclear whether this is associated with monopsony power or other effects.

120 David Dranove, Richard Lindrooth, William White and Jack Zwanziger, *Is the Impact of Managed Care on Hospital Prices Decreasing?* 27 JOURNAL OF HEALTH ECONOMICS 2 (2008): 362-367.

121 Hospital financial data and patient-level discharge from California Office of State Health Planning and Development (OSHPD) and Florida State Center for Health Statistics (SCHS) was obtained for: 1990, 1995, 1999, 2001, and 2003. Price is the weighted average of the net revenues received by the hospital for 10 common DRGs

122 Both OLS and IV estimates demonstrate a statistically significant negative relationship between market concentration and hospital price. However, in estimating the relationship for each year individually, the estimates are positive, statistically significant, and increase through 2001, after which point they decline. Dranove *et al.* (2008) at Table 2.

123 See discussion below with regard to changes in marketplace changes.

124 Leemore Dafny, *Estimation and Identification of Merger Effects: An Application to Hospital Mergers*, 52 JOURNAL OF LAW AND ECONOMICS 3 (August 2009): 523-550.

125 The instrument, co-located pairs, is defined as hospitals located within 0.3 miles from each other and no more than 5 blocks apart. This produces a set of 191 pairs, of which 10 actually merged during the period under review. AHA annual survey and Medicare Cost Reports data are used in the analysis. Dafny used data for the time period 1989-1996 and limited her analysis to MSAs or counties with populations greater than 100,000. As there are factors that influence both the probability of merging and outcome measures, failing to control for these factors introduces bias. For example, a hospital suffering from poor management may be financially distressed and not able to maintain adequate staffing levels. This may lead to both sub-optimal outcomes as insufficient staff reduces the quality of care, as well as an increase in the probability of a merger since financially distressed firms may be more inclined to merge than healthy, self-sustaining organizations. However, since poor management (an unobservable factor) affects both the probability of merging and the quality of care (the outcome of interest), conventional techniques would produce biased estimates. In general, bias estimates result whenever an omitted factor is correlated with both the outcome of interest and the probability of merging. The author justifies the use of co-located pairs as an appropriate instrument because she reasons that the number of co-located pairs should be correlated with the probability of merging but should not influence any outcome measure. While the author does test the first assumption and finds that it holds, the second assumption, that the number of co-located pairs should not influence the outcome measure, is more suspect (especially since concerns regarding market concentration and price are so prevalent). To further address the concern of selection, Dafny looks not at the effect of a merger on the firm's own price, but on that of rival firms located within the same market.

126 As the number of co-located pairs likely experiences little variation over time, her identification is primarily based upon cross-market variation. This approach implicitly assumes that different geographic markets are very similar and remain so over an extended period of time. The main results are based on a ratio of estimates. This calculation is based on the first stage estimation of the relationship between the number of co-located pairs and number of rival mergers: 0.119 (this value is presented in Table 2, column 3, row 2) and the relationship between price growth and rival collocation: 0.045 (this value is presented in Table 3, column 3, row 1). The resulting IV value is obtained by dividing the two estimates and can be interpreted as representing a 46% increase (0.045/0.119 = 0.376; e 376 = 1.46).

127 Table 4 in the paper compares the value obtained using the instrumental variable (columns 1 and 2) with those obtained using actual mergers (columns 3 and 4)

128 In specific, the estimated effect found relies heavily on the validity of the instrument.

Hospital Realignment: Mergers Offer Significant Patient and Community Benefits

Several studies rely on merger simulation or similar methodologies to test the likely impact of mergers. The economic models of hospital mergers that are referenced in the "simulation" or "event" studies cited by Town and Gaynor, Town and Vogt, and Cutler and Scott Morton and that suggest significant price predictions for mergers do not take into account current realities of new network structures and benefit designs.¹²⁹ These new network structures involve greater cost accountability by consumers (higher co-pays, deductibles, co-insurance, or premiums for choices involving broader networks or use of specific providers) that can influence consumer choice and are increasingly prevalent even in marketplaces with relatively few hospital systems, but especially in larger cities with substantial hospital alternatives. These networks provide increased flexibility for insurers to make use of alternatives and to respond to pricing or other conditions by changes in offerings – whether benefit or tier design.

An increasing proportion of consumers with private insurance are enrolled in plans with higher deductibles and co-pays, as well as in narrower or tiered networks.¹³⁰ Narrower or tiered networks typically provide lower premiums than broader or more inclusive networks at time of choosing plans and offer lower co-pays, deductibles or co-insurance for choice of specific providers by consumers. Narrow or limited networks are those that include a subset of hospitals offering the full range of hospital services while tiered networks are those that place hospitals on lower tiers based on meeting quality standards at lower relative "cost" to consumers in the form of out-of-pocket costs, and typically lower costs for services. These provide the ability to use out-of-pocket costs or premiums to encourage consumers to choose specific plans, or once a plan is chosen to motivate use of lower cost providers.

The omission of these important current real-world market facts that differ substantially from the all-inclusive networks prevalent in the late 1990s after backlash from HMOs means that critical elements of current competitive dynamics are not well accounted for in reported merger simulations based on older models. These network and benefit designs change a key assumption in prior models, which largely assumed all-inclusive networks. The omission is critical not just for the potential disconnect with real world conditions but for the impact on price predictions: models that do not take into account these realities may overstate predicted price increases from mergers where the ability of insurers to be responsive to pricing by use of new tools for network reconfiguration and for enhanced in-network steering impacts model predictions.¹³¹

This section has focused primarily on the price effects of mergers. Antitrust review of mergers, however, consider the impact on both price and non-price competition, and attempts to take into account many dynamic factors including entry and reposition, customer alternatives and potential benefits such as discussed above with regard to access, value and efficiency. As noted above, a comprehensive evaluation of the welfare effects of mergers takes these into account.¹³² Current simulation models for hospitals do not take into account these more dynamic factors and benefits.

Despite the role market concentration is thought to play in price increases, transactions between firms in disparate markets may also be subject to claims that such a transaction will result

The omission of these important current real-world market facts that differ substantially from the all-inclusive networks prevalent in the late 1990s after backlash from HMOs means that critical elements of current competitive dynamics are not well accounted for in reported merger simulations based on older models...The omission is critical not just for the potential disconnect with real world conditions but for the impact on price predictions....

129 For convenience we summarize from Gaynor Congressional testimony the most frequently cited studies, which are based on econometric models based on specific assumptions: "Last a few research papers have estimated the impacts of hospital mergers using simulation. These papers estimate models of hospital competition, then use the estimated parameters of those models to simulate the impacts of mergers (Town and Vistnes, 2001; Capps et al., 2003; Gaynor and Vogt, 2003; Brand et al., 2011). These papers find estimated impacts of mergers ranging from 5 to 53 percent increases in price. Town and Vistnes (2001) examine mergers among hospitals in Los Angeles and Orange Counties, California, where there are more than 120 hospitals between the two counties. They find that many of the mergers they examine would result in price increases of 5 percent or greater, in spite of the large number of hospitals in these counties. Capps et al. (2003) examine a three hospital merger in the southern suburbs of San Diego County, California, and find a price increase due to the merger of over 10 percent. Gaynor and Vogt (2003) find that a three-to-two hospital merger in San Luis Obispo, California (which was attempted, but blocked by the FTC) would have raised prices by over 50 percent. Brand et al. (2011) consider the recent proposed acquisition of Prince William hospital in Manassas, Virginia by Inova health system in Northern Virginia. They estimate that the acquisition would have led to price increases at Prince William hospital of anywhere from 19 to 33 percent." At 7.

130 *Employer Health Benefits: 2013 Annual Survey*, THE KAISER FAMILY FOUNDATION AND HEALTH RESEARCH AND EDUCATIONAL TRUST (2013).

131 Authors and reviewers of simulation studies note the assumptions made in many models and possible impact: For example "The exclusion of any hospital from the [managed care organization] MCO may lead to changes in the negotiated prices and/or network inclusion status of other hospitals," Farrell et al. (2011) at note 10: "[T]he [FTC] model does not take into account the sophisticated bargaining strategies and contractual solutions often adopted by MCOs and hospitals. These bargaining strategies may (and increasingly do) include an MCO's ex ante commitment to limited or tiered networks in order to extract better terms from hospitals by inducing them to compete for membership in the network or for placement in the most attractive network tiers, both of which are likely to bring a larger volume of patients to hospitals in the network by restricting the number of other, competing hospitals in the network." See Bryan Keating, Paolo Ramezzana, Robert Willig, Margaret Guerin-Calvert and Nauman Ilias, *Comment on Farrell, Balan, Brand and Wendling (2011), 'Economics at the FTC: Hospital Mergers, Authorized Generic Drugs, and Consumer Credit Markets'* (2012) at 4-5; See, also: Kate Ho and Robin S. Lee, *Insurer Competition and Negotiated Hospital Prices*, NBER Working Paper 19401 (2013) at 7; Robert Town and Gregory Vistnes, *Hospital Competition in HMO Networks*, 20 *Journal of Health Economics* 5 (2001): 733-753 at 734; and Gautam Gowrisankaran, Aviv Nevo and Robert Town, *Mergers When Prices Are Negotiated: Evidence from the Hospital Industry*, National Bureau of Economic Research, Working Paper No. 18875 (2013).

132 See, Robert D. Willig, *Incremental Consumer's Surplus and Hedonic Price Adjustment*, 17 *JOURNAL OF ECONOMIC THEORY* 2 (1978):227-253 and *Unilateral Competitive Effects of Mergers: Upward Pricing Pressure, Product Quality, and Other Extensions* 39 *REVIEW OF INDUSTRIAL ORGANIZATION* 1 (2011):19-38.

in price increases. This bias is particularly troubling as the majority of merger and acquisition transactions that take place occur in different markets and have no direct impact on market concentration.¹³³ Melnick and Keeler (2007) undertake a study to investigate whether system affiliation alone can influence hospital price.¹³⁴ Using financial data and patient-level discharge data from California Office of State Health Planning and Development (OSHPD) for the years 1998-2003, they find that hospitals in large systems appear to be able to increase prices significantly more than those in small systems.¹³⁵ These differential price increases hold for both system-affiliated hospitals with and without local hospitals in the same system. The authors hypothesize that systems obtain this favorable pricing through their ability to negotiate. Specifically, they theorize a multi-hospital system could exert leverage even if they have only one hospital in a local market by threatening to pull out all member hospitals from the insurer's plan. Alternatively, the authors note that it may be that system affiliated hospitals provide greater quality and observed differential pricing is a reflection of the quality differences, which would be a more pro-competitive explanation. Either explanation would be consistent with their reported results.

The Wall Street Journal notes that medical prices are rising at the lowest rate of the past half century. According to the Altarum Institute's Health Care Price Index, the rate of health care price growth is at an all-time low.

- Price variation studies tend to be based on limited data or methodology. Empirical research demonstrates many factors account for price variation, including cost of patient care, severity of care, and health of populations served. Price variation is neither necessary nor sufficient to demonstrate market power exercise in differentiated products industries such as healthcare and differences in price levels are not indicative of market power.

Moreover, empirical research demonstrates that a wide variety of factors account for price variation, including cost of patient care, the severity of illness, and the health of the populations served. ...price variation in and of itself is neither necessary nor sufficient to demonstrate market power exercise in differentiated products – indeed, FTC economists have noted that price levels and comparisons of levels are not indicative of market power in hospital services.

Price variation studies that address concerns about market power or anticompetitive pricing by payors are another relevant subsection of the pricing literature. These studies attempt to reconcile observed geographic variation in prices paid by private insurers or Medicare and often attribute any residual or unexplained portion as indicative of market power. For example, economists Paul Ginsburg and Robert Berenson have conducted interviews of executives or examine price variation across geographic markets and concluded that there is substantial price variation among hospitals. They conclude that such price variation is supportive of market power concerns, but they do not control for factors that could explain price variation.¹³⁶ Taking a more rigorous approach, Guerin-Calvert and Israilevich (2011)¹³⁷ explore geographic variation in hospital prices across the US and find that 72 percent of the observed difference can be explained by regional costs, case mix, hospital investments in capital, and other factors. They find that the remaining differ-

ence is likely due to differences in quality of care, cost due to complying with state regulations, and errors in the data. Based on their study findings, they conclude that there is no basis to assume that price variation is due to provider market power.

Some price variation studies estimate the variation in prices for private insurers versus Medicare. White et al. (2013)¹³⁸ compare an estimated actual price paid for medical services by private insurers to an estimate of what Medicare would have paid for a comparable service in order to assess the magnitude of geographic variation in price. The study authors assume that Medicare represents an

133 *How Hospital Mergers and Acquisitions Benefit Communities: Updated Study by the Center for Healthcare Economics and Policy*, CENTER FOR HEALTHCARE ECONOMICS AND POLICY AND THE AMERICAN HOSPITAL ASSOCIATION (September 2013), available online at <http://www.aha.org/content/13/13mergebenefitcommty.pdf>.

134 Price is measured as average net price index per inpatient day for private pay patients. Multi-system hospitals referenced in the study include affiliated hospitals with and without local hospitals in the same system. Glenn Melnick and Emmett Keeler, *The Effects of Multi-Hospital Systems on Hospital Prices* 26 JOURNAL OF HEALTH ECONOMICS 2 (2007): 400-413.

135 The authors report a 34 percent increase in price growth for large systems and 17 percent for small systems. Market concentration was not correlated with the effect of hospital system affiliation on price. *Ibid.*, at 400.

136 See, e.g., Berenson et al. (2010).

138 Chapin White, Amelia M. Bond and James D. Reschovsky, *High and Varying Prices for Privately Insured Patients Underscore Hospital Market Power*, RESEARCH BRIEF, FINDINGS FROM HSC 27 (September 2013).

appropriate benchmark for evaluation of commercial reimbursements and can be used as an indicator of competitive "price." The study concludes that market power, leverage, and "must-have hospital status" are responsible for estimated high prices and/or observed price variation. However, this conclusion is not supported by any standard economic analysis that relates "price" or "price"

As market conditions including financial pressures, excess capacity, the nature of hospital-insurer bargaining, the types of payment systems including shifts from fee-for-service, and other healthcare reform are changing over time, findings from these studies are ill-suited for inferring likely price impacts of transactions in 2013.

variation to market structure or competitive conditions (concentration, number of competitors, share, etc.). The paper excludes critical details that would allow for a thorough assessment of the methodological approach employed. The authors do not disclose sample size or service mix in any city included in their analysis. Nor do they account for the fact that the variation present could be due to comparing different types of physicians and hospitals with potentially widely varying services within and across cities. In addition, the policy recommendations presented in the study concerning price caps (such as setting commercial rates to be equal to Medicare) are unsupported by any analyses of whether medical services and access are sustainable at those rates.

While the recent focus in price variation is attracting attention, studies that attempt to explain the source of the variation tend to be suggestive at best and do not provide conclusive evidence to support their findings. Moreover, empirical research demonstrates that a wide variety of factors account for price variation, including cost of patient care, the severity of illness, and the health of the populations served. Finally, price variation in and of itself is neither necessary nor sufficient to demonstrate market power exercise in differentiated products – indeed, FTC economists have noted that price levels and comparisons of levels are not indicative of market power in hospital services.¹³⁹

The articles presented in this section highlight the fact that the relationship between market concentration and price is complex. **Mergers and acquisitions are thought to increase hospital prices through gains in market power (evidenced by increased concentration), but review of recent studies finds no consistent quantified statistical relationship between concentration and price.** Academic studies cited as supporting the concern that consolidation leads to increased prices tend to examine specific subsamples of hospitals. As such, the findings in these studies are not necessarily applicable or relevant for the broader sample of hospital mergers and acquisitions. Finally, many studies are based on transactions that occurred in the 1990s. As market conditions including financial pressures, excess capacity, the nature of hospital-insurer bargaining, the types of payment systems including shifts from fee-for-service, and other healthcare reform are changing over time, findings from these studies are ill-suited for inferring likely price impacts of transactions in 2013. These results suggest that the ultimate impact of consolidation on hospital prices is far from established and that the discussion would benefit from additional research on this topic.

V. "Price" Trends and Slowing of Rate of Growth

Changes in health care costs and prices attract significant attention and are among the most highly scrutinized trends in the health-care industry. Recent data indicate that increases in the price of health care are at record lows.¹⁴⁰ *The Wall Street Journal* notes that medical prices are rising at the lowest rate of the past half century. According to the Altarum Institute's Health Care Price Index,¹⁴¹ the rate of health care price growth is at an all-time low.¹⁴² Hospital prices, a key driver of the index, experienced 1.5 percent year over year growth. This growth rate held steady from the August levels and is the lowest since 1998. Prices for physician and clinical services grew by only 0.2 percent while home health care prices fell by 0.4 percent. Data from the Bureau of Labor and Statistics tell a similar story. The September 2013 hospital Producer Price Index (PPI) increased 0.1 percent from the previous month.¹⁴³ For the 12-month period ending September 2013, annual hospital PPI increased 1.5 percent, significantly less than the 2.4 percent increase

¹³⁹ See, Haas-Wilson and Garmon (2011).

¹⁴⁰ Eric Morath and Louise Radnofsky, *Medical-Price Inflation is at Slowest Pace in 50 Years*, THE WALL STREET JOURNAL (September 17, 2013).

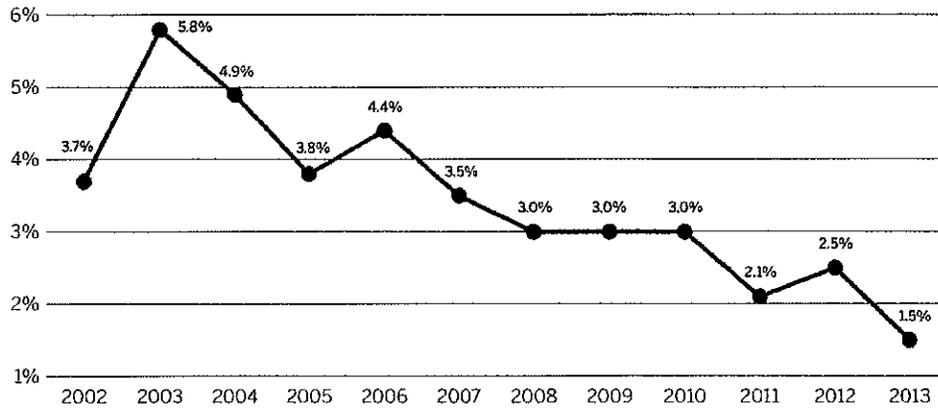

¹⁴¹ *Health Sector Economic Indicators: Insights from Monthly Price Indices through October 2013*, 13 ALTARUM INSTITUTE PRICE BRIEF 11 (November 13, 2013).

¹⁴² This represents a 23 year low as the data have been tracked since January of 1990.

¹⁴³ The PPI is an industry-specific index that tracks price growth for that sector over time by measuring changes in price. The Consumer Price Index (CPI) calculates price growth for all items and is used as a measure of general inflation. Both measures are calculated by the Bureau of Labor Statistics (BLS). <http://www.bls.gov/home.htm>. The American Hospital Association routinely issues briefs reporting changes in hospital price growth. http://www.ahanews.com/ahanews/jsp/display.jsp?dcrpath=AHANews/AHANewsNowArticle/data/ann_103013_PPI&domain=AHANews

observed in the preceding 12 month period. This trend can have a significant impact on the government's finances as healthcare represents one of the biggest components of the federal deficit. Figure 5 presents the change in hospital PPI for 2002-2012 and depicts a downward trend in rate of change hospital prices over time a sustained period of time.

Figure 5: Annual Percent Change in Hospital Prices

Source: Bureau of Labor Statistics, Producer Price Index data, 2002-2012 for Hospitals

In a recent paper, Cutler and Shani (2013) indicate that overall healthcare spending growth is slowing and identify several reasons including improved efficiency in the delivery of healthcare. Both the Centers for Medicare & Medicaid Services (CMS) and the Congressional Budget Offices (CBO) have reduced their spending forecasts as projected healthcare spending exceeded actual spending by a large margin. The CMS budget for the period 2003-2012 projected an annual per capita health care spending increase of 3.9 percent. However, real per capita health care spending increased 1.9 percent, on average during this period. Accordingly, CMS reduced its 2018 forecast by eight percent and the CBO reduced its 2020 forecast by seven percent.¹⁴⁴

Although the 2007 – 2009 recession is credited with a one-time decrease in the spending growth rate, Cutler and Shani find that this accounted for only 37 percent of the overall reduction in healthcare spending observed during the 2003-2012 period. A reduction in Medicare payment rates and a decline in commercial insurance coverage account for another eight percent of the observed decline.

They estimate that the remaining 55 percent of the reduction in spending is due to changes in the healthcare delivery system including greater provider efficiency and increased cost sharing, as well as a reduction in imaging technology proliferation and the advent of new pharmaceuticals.¹⁴⁵ **This slowing in the rate of growth of healthcare spending and in hospital PPI, on balance, suggests some benefit from changes in the health-care delivery system.**

Both the Centers for Medicare & Medicaid Services (CMS) and the Congressional Budget Offices (CBO) have reduced their spending forecasts as projected healthcare spending exceeded actual spending by a large margin.

VI. Conclusions

To contribute to the understanding of the likely effects of hospital mergers, we surveyed the literature (including both studies and articles in the press) to assess the competitive risks and benefits of consolidation. We focused on trends influencing transactions and healthcare delivery as well as literature on price, value, and quality effects. We find that the effects and in particular the benefits

¹⁴⁴ David M. Cutler and Nikhil R. Sahn, *If Slow Rate of Health Care Spending Growth Persists, Projections may be off by \$770 Billion*, 32 HEALTH AFFAIRS 5 (2013): 841-850. Slowdown in the rate of growth of healthcare spend is a positive development; the imperatives to strive for "Triple Aim" goals of enhanced patient care, improved population health, and reduction in rate of increase in per-capita costs in healthcare remain strong.

¹⁴⁵ Efficiency gains refer to the reduction in hospital acquired infections and reduced readmissions. The percentage of workers with high deductible health insurance plans has increased by 24 percentage points since 2006 and copayments for doctors office visits have increased 1.9 percent annually (in real terms) between 2006-2012. Magnetic resonance imaging and computed tomography use growth rate leveled off in 2006 after growing rapidly during 1996-2005. Prescription drug spending growth was 10.1 percent annually during 1993-2003, but slowed to an annual rate 2.3 percent during 2003-2012. *Ibid.*, at 845-846. For an additional empirical analysis of factors accounting for these trends, see: Henry J Kaiser Family Foundation, *Assessing the Effects of the Economy on the Recent Slowdown in Health Spending* (Apr 22, 2013) available online at <http://kff.org/health-costs/issue-brief/assessing-the-effects-of-the-economy-on-the-recent-slowdown-in-health-spending>

of hospital mergers are identifiable but broad-based current studies demonstrating these benefits are lacking. Academic studies and retrospective reviews, especially on price effects, present conflicting evidence and often rely on outdated data or assumptions about market realities. **There is considerable misinformation regarding the drivers of consolidation and the benefits due to realignment which include improvements in access, value, and efficiency. Despite significant concern that most mergers can unilaterally result in increased prices, FTC/DOJ reviews and enforcement actions suggest otherwise.** In addition, hospital price growth has been slowing and is at a record low, a fact that suggests that healthcare system redesign and realignment is yielding some benefits.

Realignment of services can achieve economies of scale and scope, improve quality of care and maintain or enhance access to care. Access to capital made possible by consolidation can enable facility and/or technology upgrades and investments.

Economic conditions and major systematic changes including the slow economic recovery, reduced reimbursements, increased demand for coordinated delivery of care, and implementation of costly healthcare IT systems (i.e., electronic medical records) present significant challenges to the hospital industry as a whole. Mergers provide a means to face these challenges and adapt to the changing landscape. Consolidation allows for realignment of services which can be used to address issues of excess capacity and may lead to cost savings and increases in efficiency. Realignment of services can achieve

economies of scale and scope, improve quality of care and maintain or enhance access to care. Access to capital made possible by consolidation can enable facility and/or technology upgrades and investments.

Despite concerns that mergers lead to anti-competitive pricing, FTC/DOJ reviews suggest that the risk of a substantial lessening of competition is not pervasive as only a handful of hospital mergers were actually challenged. High concentration or market share alone do not equate to anticompetitive effects. Prospective and retrospective merger analysis show that even in highly concentrated markets, the estimated effects on price often is mixed. In addition, although hospital mergers and acquisitions have not slowed, spending and price measures for the hospital industry indicate that price growth is slowing. The reliance on past (and in some cases quite distant past) merger activity and assumptions about market conditions to inform current policy reveals the imperative for a more comprehensive understanding of *current* market conditions, *current* merger motivations and more rigorous examination of merger effects to evaluate the likely benefits or competitive risks of current and future hospital transactions. **Fundamentally different market conditions could and do imply that past research is ill-suited – if not misleading – to inform current understanding of likely merger effects.** Past research may not capture dramatic changes ongoing in the healthcare industry, including pressures and results of healthcare reform – particularly requirements for new technologies, new business models, new benefit and network designs, and reduced reimbursements. Moreover, most of the oft-cited price-effect studies are based on mergers or data from the 1990s, under substantially different market conditions than current conditions, and using models that do not fully capture current conditions, thereby overstating merger effects potentially significantly. Further empirical study would be constructive to assess more fully the relevance of prior findings for today – such as the benefits from sustained operations and avoidance of service disruption or closure, and also to assess more completely the effects of mergers in this more complex environment.

...although hospital mergers and acquisitions have not slowed, spending and price measures for the hospital industry indicate that price growth is slowing.

CRITICAL THINKING
AT THE CRITICAL TIME™

The Center for Healthcare Economics and Policy is a separate business unit in the Economics Practice of FTI Consulting, Inc. FTI Consulting, Inc. is a global business advisory firm dedicated to helping organizations protect and enhance enterprise value in an increasingly complex legal, regulatory and economic environment. FTI Consulting professionals, who are located in all major business centers throughout the world, work closely with clients to anticipate, illuminate and overcome complex business challenges in areas such as investigations, litigation, mergers and acquisitions, regulatory issues, reputation management and restructuring.

Credit Profile

Connecticut Hlth & Educl Facs Auth, Connecticut

Lawrence + Memorial Hospital, Inc., Connecticut

Series 2011F

Long Term Rating

BBB+/Developing

Downgraded

Rationale

S&P Global Ratings lowered its rating on the Connecticut Health & Educational Facilities Authority's series F bonds, issued for Lawrence + Memorial Hospital Inc. (L+M), to 'BBB+' from 'A-'. The outlook is developing.

The lower rating reflects weaker-than-expected system operating performance in the most recent period generating less than 1x debt service coverage based on S&P Global Ratings' calculations and a continued weakening of balance sheet metrics. (S&P Global Ratings' debt service coverage calculation differs from the obligated group calculation.)

Operating performance is weaker in part due to the increasing burden of the Connecticut state hospital tax but also volume issues and ongoing losses in the physician group. We assess the enterprise profile as strong with dominant market share. We assess the financial profile as adequate characterized by challenged financial performance with operating losses and debt service coverage weaker than medians but solid reserves relative to long-term debt. Combined, we think these credit factors lead to an indicative rating level of 'bbb+' and final rating of 'BBB+'.

The rating reflects our assessment of L+M's weaknesses, including:

- A sharp decrease in operating profitability in the last three fiscal years from historical levels;
- Pressure from the Connecticut state hospital tax, the impact of which has been increasing;
- Continued inpatient volume softness in fiscal 2016 with some shift of care to the outpatient setting; and
- A weakened balance-sheet position with less financial flexibility than when we assigned our rating.

The rating reflects our assessment of L+M's following strengths:

- Dominant business position in the primary service area with about 66% market share;
- Significant focus on expense-control measures and potential for some additional reimbursement from the state that is not factored into performance or projections; and
- Healthy reserves relative to debt, which are above median levels.

Our rating is based on our view of L+M's group credit profile (GCP) and the obligated group's core status. Accordingly, the long-term rating is at the level of the GCP. A pledge of gross receipts of the obligated group, which includes the parent Lawrence + Memorial Corp. and Lawrence + Memorial Hospital Inc., secures the bonds. Entities outside the

obligated group include Westerly Hospital, a foundation, physicians, a home health agency, a captive insurance company, and other joint ventures. The financial figures in this report refer to the system as a whole, unless otherwise noted.

L+M includes the 198 staffed bed Lawrence + Memorial Hospital and 75-staffed beds at the Westerly Hospital, primarily serving 10 towns in southeastern Connecticut and Westerly, R.I.

Outlook

The developing outlook reflects our opinion that there are credit factors that could determine upward or downward rating potential. We believe that there is potential for benefits from an increased relationship with Yale New Haven Health System, expected improvement in operating performance, and maintenance of the strong business position based on management's initiatives. While cash flow, margins, and coverage should improve based on management's projections to be more in line with the rating, there are external factors that we believe could limit the organization's ability to generate profitability sufficient for the rating.

Downside scenario

A lower rating is possible if the balance sheet deteriorates, coverage is not improved to be more in line with the rating, and cash flow doesn't improve to be more in line with the rating level.

Upside scenario

There's upward rating potential if the integration with Yale New Haven Health System (which includes Yale New Haven Hospital) comes to fruition and provides immediate lift to financial performance and stability to the balance sheet and our group rating methodology would then apply.

Enterprise Profile

Industry risk

Industry risk addresses the health care sector's overall cyclical and competitive risk and growth by applying various stress scenarios and evaluating barriers to entry; the level and trend of industry profit margins; risk from secular change and substitution of products, services, and technologies; and risk in growth trends. We believe the health care services industry represents an intermediate credit risk when compared with other industries and sectors.

Economic fundamentals

The primary service area includes: New London, East Lyme, Groton, Ledyard, Lyme, Montville, North Stonington, Old Lyme, Stonington, and Waterford. New London County's population has grown over the past five years, though we expect minimal population growth over the next five. New London County's major employers include two local casinos; local universities; a U.S. naval submarine base; and Electric Boat, a submarine manufacturer that plans to increase hiring in the near term. We expect increasing employment and income levels over the next five years.

Market position

L+M maintains about a 66% market position in the primary service area, which is down from 68% reported at the last

review. Some of the decline may be due to some service line changes at Westerly, which are part of efficiency goals and therefore expected. Competition in the Connecticut portion of the service area is limited to two main hospitals: William W. Backus Hospital (part of Hartford Health) and Yale New Haven Hospital. Within 60 miles of L+M are two additional tertiary providers: Hartford Hospital and Rhode Island Hospital. In June 2013, L+M acquired the assets of Westerly Hospital, a 125-bed general acute-care hospital in Westerly, R.I whose main competitor is South County. As part of the transaction, L+M agreed to fund \$30 million in capital for Westerly Hospital over five years, more than half of which is already committed there. While the Westerly acquisition allows L+M to extend its geographic reach, though market share benefit has not be realized to date.

L+M employs about 87 physicians (both primary care physicians and specialists) and also has exclusive service arrangements with other physicians. Management hopes to extend its reach in the market with growth in the employed-physician group and believes this alignment better prepares the system for health care reform initiatives. The employed group is dilutive to the system and management expects that support will continue in a significant way, though we believe the strategy will likely benefit the organization over time. With regard to other staff, L+M is in labor contracts with three unions representing over 1,200 full-time equivalents. Following a strike (which lasted four days) and lock-out in November-December 2013, all three unions are currently under contract, with a three-year renewal agreement achieved in March 2016.

L+M is working toward an affiliation with Yale New Haven Health Services. The affiliation has already passed FTC and is pending certificate of need (CON) approval. Our understanding from management is that the Connecticut application is complete and a public hearing is scheduled for June 2016 and the Rhode Island CON is still pending. There was an executive order in Connecticut that could delay this process but management feels that an integration is possible with a one year time frame. In our opinion, L+M's operations and recruitment efforts could benefit from a more formal partnership with YNHHS.

Management and governance

There have been no changes in senior management since the last review when the CFO and physician leadership changed. We believe there are challenges still facing L+M, including volumes, reimbursement, and expense management. The organization's operating performance did not meet expectations for fiscal 2016 and the rating hinges on L+M's ability to execute cost-containment initiatives, partnerships, physician alignment strategies to boost performance and generate debt service coverage in line with the rating while offsetting the impact of the Connecticut state hospital tax and other operating challenges.

Financial Profile

Financial policies

The financial policies assessment is neutral reflecting our opinion that, while there may be some areas of risk, the organization's overall financial policies are not likely to negatively affect its future ability to pay debt service. Our analysis of financial policies includes a review of the organization's financial reporting and disclosure, investment allocation and liquidity, debt profile, contingent liabilities, and legal structure and a comparison of these policies to comparable providers.

Financial performance

L+M has posted operating losses in the last three fiscal years and the interim period of fiscal 2016. While we expected an operating loss in fiscal 2015 based on guidance from management at the last review, results were weaker than expected with a loss of \$16.6 million (negative 3.7% margin) compared with a budgeted loss of 1.2%. Performance in the most recent periods was weaker due to the Connecticut state hospital tax volume issues and reduced revenues associated with the shift to outpatient, and some physician competition and departures. The pressure from the tax has been increasing each year and the negative net impact of the tax on operations (the hospital tax less the supplemental payments received) increased from \$4 million in fiscal 2014 to \$9 million in fiscal 2015, and then following a budget rescission in fiscal 2016, could reach \$18 million. However, \$5.2 million was approved for restoration by legislative special session with the net impact forecasted at \$13 million for the full fiscal year. For the first six months of fiscal 2016, the system is reporting that operating results remain negative and weaker than budgets. While S+P calculates coverage for the system below 1x, management's calculation of coverage for the obligated remains ahead of covenant requirements. Management's projection is for a loss close to \$16 million for the full fiscal year in 2016 with a return to breakeven in fiscal 2017 and then a 2% gain in fiscal 2018. These projections include the expected pressure from the hospital tax, continued reimbursement pressures, service line enhancements, significant expense savings, and successful integration with Yale New Haven Health System.

Liquidity and financial flexibility

Historically, the balance sheet has been a credit strength, with solid reserves relative to debt and relatively low leverage levels. At the current rating, these metrics remain ahead of median levels and offset the weaker cash flows and performance. Operating liquidity as measured by days' cash on hand is below median levels but sufficient for the rating and has decreased significantly in recent years due to operating losses and weak investment market performance. We do not expect any additional debt and reserves should be stable to improving if cash flows improve as indicated by the projections.

Debt and contingent liabilities

The obligor has contingent liability risk exposures from financial instruments with payment provisions that change on the occurrence of certain events, but we consider the risk manageable at the current rating level. In October 2013, L+M issued \$30 million in long-term fixed-rate debt (series G), which was a direct purchase arrangement with Bank of America Merrill Lynch. In November 2013, L+M issued the series H bonds to refinance the series E bonds—the bonds are secured by a TD Bank letter of credit. L+M has almost 80% fixed-rate debt versus about 20% variable-rate debt, though contingent debt (the series G and H) is equal to \$49.8 million. Our understanding is that the direct purchase agreement documents contain covenants, including requirements to maintain 75 days' cash on hand, debt to capitalization not more than between 0.5x and 1x, and debt service coverage of not less than 1.25x to 1.0x. Related to the series G, we understand that there is a 30-day cure period for certain covenants, which we feel mitigates some of the acceleration risk. In addition, the organization's solid unrestricted reserves to contingent liabilities somewhat mitigates the risks associated with the contingent debt. \$72 million of unrestricted reserves are available on a daily basis and more than \$120 million available in 30 days—the liquidity is sufficient to cover the contingent debt.

Executive Summary

As hospitals and care systems transform, they are increasingly prioritizing population health as a platform to improve the health of patients and communities. Myriad forces are driving these health care organizations to actively address a broad array of socioeconomic and environmental factors and provide preventive care, particularly for populations who lack access to care or engage the system at the wrong place and time. Building on health care futurist Ian Morrison's idea of health care transformation as a shift from a fee-for-service first curve to a value-based second curve, the second curve of population health depicts an integrated approach to improving patient and community health. For many hospitals, thriving in the second-curve environment will necessitate making challenging organizational and cultural changes to support new goals and initiatives.

This guide builds upon prior American Hospital Association reports that outline a road map for hospitals and care systems to use as they transition to the second curve of population health. Though the rate and extent to which hospitals and care systems engage in population health initiatives may vary, a significant shift toward population health is anticipated in the next three to five years. The tactics described in this guide provide a framework for initiatives that hospitals and care systems could pursue to develop an institutional infrastructure that supports population health. These tactics are:

- Value-based reimbursement
- Seamless care across all settings
- Proactive and systematic patient education
- Workplace competencies and education on population health
- Integrated, comprehensive HIT that supports risk stratification of patients with real-time accessibility
- Mature community partnerships to collaborate on community-based solutions

Hospitals and care systems transitioning to the second curve of population health evaluate process and outcomes metrics to measure their progress in improving patient and community health. Aligning the needs and assets of the hospital and community with metrics allows for meaningful and significant analysis. Possible metrics include but are not limited to:

- Summary measures
- Inequality measures
- Health status
- Psychological state
- Ability to function
- Access to health care
- Clinical preventive services
- Cost of care

As established community stakeholders with extensive knowledge and resources, hospitals are in a unique position to lead population health transformation. Hospitals should challenge themselves to reach beyond their walls and partner with community organizations to implement innovative approaches that sustainably improve total population health.

Driving the Change

As the U.S. health care system transforms, hospitals are expanding their scope to include population health as a model to improve the health of their patients and surrounding communities. Though population health is not traditionally considered a major focus of hospitals and care systems, myriad forces are driving these organizations to address both the medical and nonmedical factors that determine health status. Driving forces include:

- Shift in financial arrangements away from fee-for-service to value-based payments that incentivize positive outcomes
- Increase in provider accountability for the cost and quality of health care
- Increased access to care for underserved and vulnerable populations through the Affordable Care Act
- Constant demand to reduce fragmentation and improve efficiency by redesigning care delivery
- Increased transparency of financial, quality and community benefit data
- Economic and legislative pressures to curb increases in health care spending
- Demographic changes in the patient population that will increase demand for health care services, along with projected shortages of primary care providers
- Recognition that acute medical care is only one aspect of maintaining and improving health

Population health is commonly described as “the health outcomes of a group of individuals including the distribution of outcomes within the group.”¹ By integrating preventive principles into care delivery, the ultimate goal of population health is to improve the overall health of a given population while also reducing health disparities.² A population health approach aims to improve health outcomes, particularly for individuals who lack access to care or engage the system at the wrong place and time, and complements the Triple Aim goals of improving the patient experience of care, improving population health and reducing per capita cost.

The American Hospital Association published two guides, “Managing Population Health: The Hospital’s Role” (available at <http://www.hpoe.org/population-health>) and “The Role of Small and Rural Hospitals and Care Systems in Effective Population Health Partnerships” (available at <http://www.hpoe.org/small-rural-partnerships>), that outline how population health can serve as a strategic platform to improve health outcomes by focusing on three interrelated approaches:

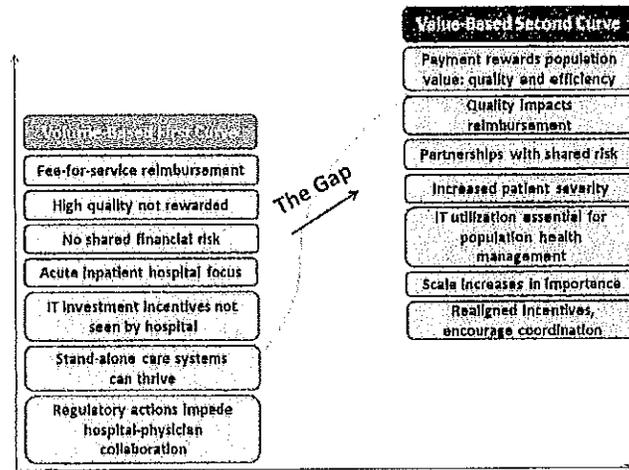

1. Identifying and analyzing the distribution of specific health statuses and outcomes within a population
2. Identifying and evaluating factors that cause the health outcomes
3. Identifying and implementing interventions that modify determinants of health outcomes

Population health resides at the intersection of three distinct health care mechanisms: (1) increasing the prevalence of evidence-based preventive health services and behaviors, (2) improving care quality and patient safety and (3) advancing care coordination across the health care continuum. Health status is influenced by personal behaviors, environmental and social forces, and family history and genetics, while only a small percentage of health status is attributable to medical care.³ This ecological model of health points to the importance of proactively addressing the upstream factors that affect health to sustainably improve the health of any population. Achieving improved population health will ultimately decrease medical costs and allow hospitals to invest in prevention.

First and Second Curves of Health Care

Economic futurist Ian Morrison suggests that as payment incentives shift, health care providers will modify their core models for business and service delivery. He calls this a first curve to second curve shift.⁴ Morrison describes the *first curve* as an economic paradigm driven by the volume of services provided and fee-for-service reimbursement. The *second curve* is concerned with value: the cost and quantity of care necessary to produce desired health outcomes within a particular population. Figure 1 details the first and second curves of health care.

Figure 1. First Curve to Second Curve of Health Care

Source: Adapted from Ian Morrison, 2011.

As hospitals and care systems shift from the volume-based first curve to the value-based second curve, they must transform their business and health care delivery models to balance quality, cost, patient preferences and health status to achieve real value and improved health outcomes. Hospitals and care systems moving to the second curve use performance metrics to identify clinical, financial and process improvements; incorporate the appropriate incentives; and evaluate results. The AHA "Hospitals and Care Systems of the Future" report (available at <http://www.aha.org/about/org/hospitals-care-systems-future.shtml>) outlines 10 must-do strategies to be successful in the transformation from the first curve to the second curve:

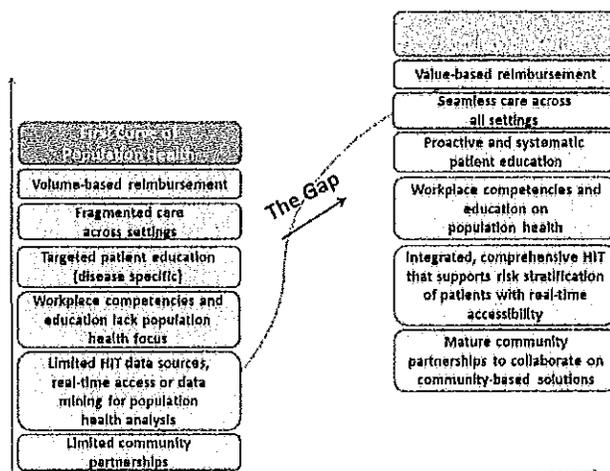

1. Aligning hospitals, physicians and other clinical providers across the continuum of care
2. Utilizing evidence-based practices to improve quality and patient safety
3. Improving efficiency through productivity and financial management
4. Developing integrated information systems
5. Joining and growing integrated provider networks and care systems
6. Educating and engaging employees and physicians to create leaders
7. Strengthening finances to facilitate reinvestment and innovation
8. Partnering with payers
9. Advancing an organization through scenario-based strategic, financial and operational planning
10. Seeking population health improvement through pursuit of the Triple Aim

The Second Curve of Population Health

As health care organizations transition to the second curve, population health approaches must also change to align with new goals and processes aimed at improving patient and community health. Applying the curve concept to population health provides a road map to guide hospitals and care systems as they integrate population health into their organizations.

Adopting a second-curve population health approach will require hospitals and care systems to make major systemic and cultural shifts. They will need to develop a formalized care delivery system that addresses disease prevention and management of the patient population and reaches outside hospital walls to improve community health (see Figure 2).

Figure 2. Second Curve of Population Health

Source: Health Research & Educational Trust, 2014.

The rate and extent of transitioning to the second curve may be dependent on each hospital's or care system's marketplace and influence, other hospitals and care systems in the community, other providers and available resources. Significant transformation across the field is expected to occur in the next three to five years. Some markets are moving more quickly toward the second curve, based on payer, competitor and other market pressures, while others remain in a fee-for-service model.

The tactics described here contribute to an organizational infrastructure that supports population health and the 10 must-do strategies for transitioning to the second curve of health care. Each organization should select the tactics that are best aligned with its mission, goals and resources.

Value-based reimbursement:

- Hospitals and care systems deliver defined services to a specific population at a predetermined price and quality level.
- Large hospitals and care systems provide or contract for a full continuum of services across acuity levels for regional populations.
- Providers link payment contracts and compensation models to performance results.
- Hospitals and care systems participate in an accountable care organization or patient-centered medical home model across a significant population.

- Smaller providers deliver specified services to target populations, working under contract or in partnership within networks that are managed by larger entities functioning as population health managers.
- Care delivery systems align with the Triple Aim to improve the patient experience of care, improve population health and reduce per capita cost.

Seamless care across all settings:

- Preventive services are integrated into all care settings.
- Care transition programs support seamless patient handoffs and excellent communication to reduce readmissions or complications, ensure treatment compliance and engage patients and families as they transition to new settings of care.
- Care teams or navigators are widely used to assist in managing complicated patient cases across the care continuum.
- Hospitals and care systems provide care or develop partnerships for care delivery in a community-based setting, such as community clinics or patients' homes.
- Small and rural hospitals may utilize telemedicine to connect with remote patients and remote specialty or emergency services.

Proactive and systematic patient education:

- All patients receive holistic education about disease management and prevention.
- Education and chronic disease management initiatives target at-risk groups and include medical and behavioral approaches to preventing illness.
- Multidisciplinary teams of case managers, health coaches and nurses coordinate chronic disease cases, set goals and track progress, and follow up after transitions.
- Providers use patient-engagement strategies, such as shared decision-making aids, shift-change reports at the bedside, patient and family advisory councils, and health and wellness programs.
- Providers regularly measure or report on patient and family engagement, with positive results.
- Hospitals lead community outreach screening or health education programs.

Workplace competencies and education on population health:

- Hospitals have leadership and staff dedicated to population health.
- Existing staff and clinicians are trained in population health competencies, including working across sectors, aggregating data and identifying systemic issues, and developing policy and environmental solutions.⁵
- Staff have defined roles within the population health management process.
- Staff receive ongoing training on population health as it relates to their specific job duties.
- Hospitals employ care coordinators, community health workers and health educators and augment population health staff as necessary.

Integrated, comprehensive HIT that supports risk stratification of patients with real-time accessibility:

- HIT possesses capacity for sophisticated analytics for prospective and predictive modeling to support clinical and business decisions.
- Data warehouse is fully integrated and interoperable, incorporating multiple data types for a variety of care settings (e.g., clinical, financial, demographic, patient experience, participating and nonparticipating providers).
- Data from multiple community partners are combined in regional health information exchanges and data registries to comprehensively address the needs of patients and communities.
- Timely and local data that identify the health issues in a community are accessible by clinical staff in real time to guide the care of individuals.

Mature community partnerships to collaborate on community-based solutions:

- Hospitals and care systems engage the community by exchanging resources, sharing knowledge and developing relationships and skills to manage communitywide challenges and leverage collective advantages.
- Extensive and diverse partnerships between hospitals and local organizations use collective impact approaches to address specific and general health needs of the community.
- Hospitals and care systems partner with the community and public health departments to address gaps and limitations in health care delivery and to target community health needs.
- Hospitals and care systems provide balanced leadership that recognizes the resources and contributions of community partners, and they include community representatives in their leadership structure.
- Hospital-led initiatives address community issues such as environmental hazards, poverty, unemployment, housing and other socioeconomic factors.
- Community partners collaborate to develop relevant health metrics to measure progress and community needs.

Bridging the Gap

Every hospital and care system approaches population health differently depending on organizational priorities, resources and population needs. A survey by the American Hospital Association and the Association for Community Health Improvement confirmed anecdotal evidence that implementation of population health initiatives varies widely across hospitals.⁶ To move to the second curve of population health, hospitals and care systems will need to align their mission, organizational culture and services with a population health approach that addresses the needs of the community. Each organization's alignment is unique because the hospital's or care system's structure and resources, along with the surrounding community, influence and shape the transformation.

Many hospitals and care systems are taking steps toward the second curve by incorporating population health initiatives into their operations. A common impetus for initially engaging in population health is community benefit regulations that require not-for-profit hospitals to demonstrate their positive impact. Hospitals can achieve their community benefit requirement through community health promotion, education, charity care or other activities.

Part of this regulation mandates hospitals to conduct community health needs assessments at least once every three years and develop implementation plans to address identified needs in the population. By bringing together stakeholders from across the health care system and local community, the community health needs assessment process encourages collaboration between organizations to address the health issues unique to their community.

Some hospitals and care systems take a narrow approach to population health by focusing improvement efforts on their patient population. Many are developing accountable care organizations and patient-centered medical homes to manage care across the continuum for a specific population of patients. While these pilot programs are showing promising results for patient health and cost savings, these approaches do not address the needs of the greater community, particularly those individuals who do not have access to care.

Second-curve organizations go beyond community benefit regulations and accountable care organizations to develop a culture that integrates a population health approach into all facets of the organization. Because hospitals and care systems have different care services and organizational structures, leaders should define the target population and associated health goals. As health care moves to the second curve, hospitals and care systems may be challenged to expand their defined population into the broader community to address growing health issues.

As established stakeholders and leaders, hospitals and care systems should play a significant role in population health transformation. Hospitals can leverage their clinical expertise and extensive resources to promote wellness and support a variety of external collaborative relationships to achieve their population health goals. As the public health and provider sectors become better aligned, hospitals will need to engage in challenging but necessary changes to improve the health of the patient and community population as well as the organization's financial bottom line.

Measuring Transformation to the Second Curve of Population Health

Hospitals and care systems that move toward the second curve of population health should evaluate process metrics but prioritize outcomes measures. For example, success is not the number of people who attend a wellness event; rather, success is the impact that the wellness event has on specific health outcomes.

Hospital and care system leaders can collaborate with their clinical staff and community leaders to develop metrics that are mutually acceptable and attainable. Aligning the needs and assets of the hospital and community with the metrics allows for more significant analysis. Choosing the appropriate metrics to measure transformation to the second the curve of population health involves identifying metrics that are:

- Simple, robust, credible, impartial, actionable and reflective of community values
- Valid and reliable, easily understood, and accepted by those using them and being measured by them
- Useful over time and for specific geographic, membership or demographically defined populations
- Verifiable, independently from the entity being measured
- Responsive to factors that may influence population health during the time that inducement is offered
- Sensitive to the level and distribution of disease in a population

Table 1 outlines possible outcome metrics for assessing the impact of population health initiatives. The metrics can be applied at the patient or community level.

Table 1. Sample Population Health Metrics

Metric Area	Description
Summary measures	<ul style="list-style-type: none"> • Health-adjusted life expectancy at birth (years) • Quality-adjusted life expectancy • Years of healthy life • Disability-adjusted life years • Quality-adjusted years
Inequality measures	<ul style="list-style-type: none"> • Geographic variation in age-adjusted mortality rate (AAMR) among counties in a state (standard deviation of county AAMR/state AAMR) • Mortality rate stratified by sex, ethnicity, income, education level, social class or wealth • Life expectancy stratified by sex, ethnicity, income, education level, social class or wealth
Health status	<ul style="list-style-type: none"> • Percentage of adults who self-report fair or poor health • Percentage of children reported by their parents to be in fair or poor health • Percentage of children aged 3–11 years exposed to secondhand smoke
Psychological state	<ul style="list-style-type: none"> • Percentage of adults with serious psychological distress (score ≥ 13 on the K6 scale) • Percentage of adults who report joint pain during the past 30 days (adults self-report) • Percentage of adults who are satisfied with their lives
Ability to function	<ul style="list-style-type: none"> • Percentage of adults who report a disability (for example, limitations of vision or hearing, cognitive impairment, lack of mobility) • Mean number of days in the past 30 days with limited activity due to poor mental or physical health (adults self-report)
Access to health care	<ul style="list-style-type: none"> • Percentage of population that is insured • Percentage of the population that has a designated primary care physician
Clinical preventive services	<ul style="list-style-type: none"> • Adults who receive a cancer screening based on the most recent guidelines • Adults with hypertension whose blood pressure is under control • Adult diabetic population with controlled hemoglobin A1c values • Children aged 19–35 months who receive the recommended vaccines
Cost of care	<ul style="list-style-type: none"> • Percentage of unnecessary ER visits • Percentage decrease in ER costs • Percentage decrease in cost of care per patient, per year

Source: Adapted from R. Gibson Parrish, 2010 and Healthy People 2020, 2013.

Conclusion

To improve the health of a population, hospitals and care systems need to provide high-quality patient care and proactively address the environmental and social factors that affect health status. Hospitals and care systems have the opportunity to redesign their care delivery models to achieve long-term outcomes and cut costs. While most hospitals and care systems do not have the resources or desire to assume all of the health needs of their community, they can leverage their resources and influence to lead community health transformation. Some hospitals are well situated to lead transformation in their communities by strengthening their mission to improve health and investing in capital and collaborations that bind them to their communities.⁷

Specific tactics to operate in the second curve of population health are:

- Value-based reimbursement
- Seamless care across all settings
- Proactive and systematic patient education
- Workplace competencies and education on population health
- Integrated, comprehensive HIT that supports risk stratification of patients with real-time accessibility
- Mature community partnerships to collaborate on community-based solutions

Measuring and evaluating the process and outcomes of population health initiatives are critical to identify gaps and opportunities for improvement. Each tactic can be measured with metrics that allow a hospital or care system to assess its progress to the second curve of population health.

Moving to the second curve of population health will require challenging cultural and systemic shifts alongside buy-in and commitment from hospital leadership. Transformation will not occur over night; forward-thinking hospitals and care systems should engage their leadership, staff and community to develop a road map to the second curve that is congruent with the hospital's and community's needs, resources and priorities. Innovative approaches can be implemented not only to address rising costs and an increased demand for health services, but also to improve the patient experience of care and improve population health.

Case Example I: Michigan Stroke Network

Background: While many of Michigan's hospitals have neuroendovascular specialists on staff, others cannot support a dedicated stroke expert available around the clock. St. Joseph Mercy Oakland is the first Certified Primary Stroke Center in Michigan.

Intervention: Addressing the need to increase access, in October 2006 Trinity Health launched the Michigan Stroke Network, a collaborative of 30 hospitals. Member hospitals have around-the-clock access to telemedicine services and stroke specialists.

Using Remote Presence™ Robotics, a remotely controlled mobile teleconferencing system, the Michigan Stroke Network ensures that every hospital has the ability to offer all patients the most advanced stroke care available. Initially, the Michigan Stroke Network deployed nearly two dozen RP-7 robots to hospitals throughout the state. The Michigan Stroke Network is funded by SJMO, so participating hospitals received the remote presence robots at minimal cost.

Participating hospitals pay no fee to join the network and there are no additional consultation fees. Stroke patients who are transferred to SJMO receive treatment and are returned to the member hospital for further care. Along with clinical support, the Michigan Stroke Network reaches out to member hospitals and surrounding communities to educate them about identifying strokes. Network representatives visit health fairs and conduct preventive screenings.

Results: As a result of the Michigan Stroke Network, remote presence robots are deployed across Michigan. Since 2006, network staff has seen a considerable increase in calls from partner hospitals requesting a referral for treatment. Additionally, patients who are referred to SJMO for stroke intervention have seen improvement in their NIH stroke assessment score. For example, patients who are admitted with a stroke assessment score between 11–14 are transferred back to their community hospital after treatment with an assessment score of 6–9.

Lessons Learned: Key learnings from the Michigan Stroke Network's experience include:

- Set up electronic communication and reporting between member hospitals and a primary stroke center at the beginning of the project to facilitate transfer of information
- Incorporate a community-based approach to enhance outreach and preventive services

Case Example 2: Banner Health

Background: Banner Health, a large nonprofit health care organization based in Phoenix, provides care for patients in Alaska, Arizona, California, Colorado, Nebraska, Nevada and Wyoming. Banner Health is driven by its mission: "to make a difference in people's lives through excellent patient care."

Intervention: In 2011 Banner Health redefined the aim of its care delivery process by transforming its organizational culture toward population health management. This redefinition began with formation of the Banner Health Network, an organization comprising Banner Health, Arizona Integrated Physicians, Banner Medical Group and Banner Health Physician Hospital Organization.

Banner Health Network is a comprehensive care system that is responsible for the continuum of patient care and accepts financial accountability for those served by the network. By bringing together Banner Health-affiliated physicians, 13 acute-care Banner hospitals and other Banner services in Arizona, Banner Health Network offers patients convenient access to a full range of high-quality health care services, such as acute care, home care, nursing registries and residential care through an accountable care organization model. It is one of a few networks in Arizona serving patients in a population health management model.

Results: Banner Health Network is one of the top five performing Pioneer ACOs in performance year one in terms of shared savings, with more than \$19 million saved. Additionally, BHN had the following results in performance year one:

- 8.9 percent fewer hospital admissions
- 14.4 percent reduction in average length of hospital stay
- 6 percent fewer hospital readmissions
- 6.7 percent drop in use of X-rays, MRIs or other imaging services
- 2.5 percent drop in Medicare payments per beneficiary

Lessons Learned: Critical to the success of BHN were:

- Aligning incentive payments with the physicians, e.g., using a software program to determine claims data and patient volume
- Providing robust support and organization for the primary care team
- Engaging the community with a variety of methods, including community representation on BHN boards

Case Example 3: Yale New Haven Health System

Background: Yale New Haven Health System, based in New Haven, Connecticut, comprises four delivery networks: Yale-New Haven Hospital, Bridgeport Hospital, Greenwich Hospital, and Northeast Medical Group, a physician foundation. YNHHS is an academic medical center affiliated with the Yale University School of Medicine.

Intervention: Over the last five years, YNHHS has progressed quickly in its population health approach. At first, YNHHS used clinic settings to provide basic health care services to the community. Community health needs assessments provided the data to develop targeted community health programs such as Project Access, which connects uninsured community members to local social services and health resources. An early intervention was the development of an onsite care management program for YNHHS employees living with chronic disease. This interview-based program provides care coordination, navigation, coaching and goal setting to employees and their adult dependents.

Recognizing the growing need for population health initiatives, YNHHS developed a set of core competencies for its organizational model that includes primary care access, clinical integration, care management, financial management/direct contracting and data analysis. A leadership group was formed to develop an accountable care organization to support population health initiatives. Working with a variety of health care partners, YNHHS is currently developing a clinically integrated health network.

Results: Within one year, the employee health program improved compliance with evidence-based care by 10 percent, brought risk-adjusted, per-member per-month spending in line with the general employee population, resulted in zero readmissions and avoidable admissions and consistently had 95 percent or higher participant satisfaction ratings.

Lessons Learned: As its population health approach has evolved, YNHHS identified several key factors that contributed to its success:

- An electronic medical record that provides data warehousing, actionable analytics and care management support
- Patient engagement and activation
- Local innovation when scaling small programs to the larger community

Case Example 4: Mercy and Memorial Hospitals

Background: Mercy Hospital Downtown, Mercy Hospital Southwest and Memorial Hospital, the three Dignity Health hospitals in Bakersfield, California, are the largest health care providers in the southern San Joaquin Valley and serve a diverse population of urban and rural residents. The hospitals' missions are to provide high-quality, compassionate health care to their patients and advocate on behalf of the poor. Created in 1991, the Department of Special Needs and Community Outreach was formed to take hospital resources beyond the walls of the three hospitals and help create a healthier community.

Intervention: Mercy and Memorial Hospitals have greatly expanded their population health initiatives over the last 10 years. They coordinate more than 45 outreach programs and collaborate with several hundred different partners in the community. A central component of the population health effort has been addressing access to care, preventive care, job training, chronic disease management, nutrition services and youth interventions. The programs are expanding with increased hospital support, grant funding and donations. Mercy and Memorial Hospitals continue to coordinate their population health programs through three outreach centers located in the most vulnerable areas of Bakersfield. These centers have become the hub of resources for the underserved. Residents have come to trust the employees, who provide a variety of health- and nonhealth-related services, including:

- Art for Healing
- Breakfast Club
- Breast health program
- Car seat program
- Community fitness classes
- Community Health Initiative
- Dinner Bell program
- Emergency food baskets
- Empowerment (chronic disease self management)
- Health education seminars and classes
- Health screenings
- Healthy Kids in Healthy Homes
- Homemaker Care job training
- In-home health education
- Operation Back to School
- Referrals for basic needs

Results: Of the patients who enter the empowerment seminars for chronic disease and diabetes self-management, 93 percent avoided admissions to the hospital or emergency department for six months following their participation. In the Homemaker Care job training program, 66 percent of participants have gained employment within six months. In 2013, the Community Health Initiative of Kern County enrolled 9,519 children in health insurance programs. The Art for Healing program has become a popular destination for community caseworkers to bring clients suffering from mental illness.

Lessons Learned:

- Collaboration with other providers and partners enables Mercy and Memorial Hospitals to create a network of community members to enroll residents into health insurance programs.
- By offering evidence-based chronic disease management programs, Mercy and Memorial Hospitals are effective in avoiding hospital admissions and readmissions.
- Many program participants become volunteers, leaders and, in some cases, employees.

<http://www.bakersfieldmemorial.org>, <http://www.mercybakersfield.org/>

Case Example 5: Sentara Healthcare

Background: Sentara Healthcare operates more than 100 sites of care, including 11 acute care hospitals in Virginia and North Carolina. Through its insurance plan, Optima Health, Sentara Healthcare provides health insurance to about 450,000 people.

Intervention: To advance its population health efforts, Sentara Healthcare developed core population health competencies for its leaders and staff from existing small-scale population health programs. To strengthen the population health model, primary care delivery was redesigned, a pilot patient-centered medical home was initiated and clinical and technological capabilities were developed. A group of Sentara senior leaders oversaw the transformation process. Sentara leveraged its insurance plan and created new care delivery processes focused on what is best for the patient. For example, care managers were introduced to focus on high-risk and high-utilization patients.

Sentara Healthcare conducted community health needs assessments, which provided a picture of the health status of community residents and helped direct Sentara in developing and providing health services. Through collaboration with community partners, such as health departments, free clinics and community health centers, Sentara works to improve the health of its community. In 2012, Sentara provided more than \$282.2 million in community benefits.

Results: The pilot health programs have met their goals and showed great promise for Sentara Healthcare. Pilot programs resulted in:

- 44 percent decrease in average emergency department visits
- 46 percent decrease in hospital all-cause admissions
- 18 percent decrease in hospital all-cause 30 day readmissions
- 87 percent increase in seven day follow-up visits
- 17 percent reduction payments by Sentara's insurance company, Optima Health

Additionally, the various population health programs have reported high patient satisfaction scores.

Lessons Learned: With a more deliberate approach to the development of its population health initiatives, Sentara learned:

- Using multidisciplinary teams for the leadership group and other project groups helped create a comprehensive and flexible program.
- Taking time to determine the exact significance of the results of small-scaled programs is important before expanding programs to the greater population.
- Breaking down silos and having continuity are critical to improving patient outcomes.

About HRET

Founded in 1944, the Health Research & Educational Trust (HRET) is the not-for-profit research and education affiliate of the American Hospital Association (AHA). HRET's mission is to transform health care through research and education. HRET's applied research seeks to create new knowledge, tools and assistance in improving the delivery of health care by providers and practitioners within the communities they serve.

About HPOE

Hospitals in Pursuit of Excellence (HPOE) is the American Hospital Association's strategic platform to accelerate performance improvement and support delivery system transformation in the nation's hospitals and health systems. HPOE shares best practices, synthesizes evidence for application, and engages leaders in the health industry through education, research tools and guides, leadership development programs and national engagement projects.

About ACHI

The Association for Community Health Improvement (ACHI) is a personal membership group of the American Hospital Association. ACHI provides education, professional development, resources and engagement opportunities to its members in the fields of population health, community health and community benefit. ACHI is working to cultivate a society of professionals who apply their specialized knowledge and expertise to effectively educate and collaborate with their communities in achieving the highest potential health for community residents.

OFFICE OF HEALTH CARE ACCESS**

AFFILIATION OF LAWRENCE + MEMORIAL CORPORATION WITH YALE-NEW HAVEN HEALTH SERVICES CORPORATION : **DOCKET NO. 15-32033-CON**
: **July 11, 2016**

PRE-FILED TESTIMONY OF ROSS SANFILIPPO, DMD, LAWRENCE + MEMORIAL CORPORATION BOARD OF DIRECTORS

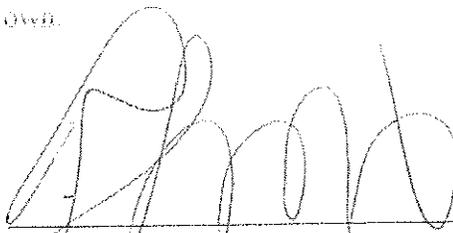

Good afternoon, Attorney Hansted, and staff of the Office of Health Care Access (“OHCA”). My name is Ross Sanfilippo and I am a member of the Board of Directors for Lawrence + Memorial Corporation (“L+M”). I am very appreciative of this opportunity to personally speak with you today and provide, on behalf of the Board of Directors of L+M, our collective reasons for recommending to OHCA that it approve the above-referenced application (the “Application”) allowing L+M to affiliate with Yale-New Haven Health Services Corporation (“Yale New Haven Health”).

I would like to tell you something about our dedicated L+M Board. The L + M Board is made up of very capable and committed individuals who live and work in the Eastern Connecticut region. These individuals devote significant time to overseeing a vital and important resource to our community. As you heard from Mr. Cummings, the Board engaged in a very deliberate and thoughtful process in arriving at the decision to affiliate with Yale New Haven Health. There were, of course, a number of precipitating factors. Since 2010, the time in which The Patient Protection and Affordable Care Act (the “Act”) was passed, it became very clear to the Board that we were in for some very fundamental

changes in health care, and that past assumptions and or approaches to the delivery of health care would no longer serve us well. In fact, it was not long after the passage of the Act that we began seeing reductions in reimbursement at both a State and Federal level. Although we endeavored to counterbalance such reductions by consulting with experts who helped us reduce expenses, we soon realized that cutting expenses was not enough. Given the associated costs relating to data analytics, IT platforms, population health, and care coordination, we knew that enhanced scale would be essential to our success. We also knew that we needed access to capital.

As Mr. Cummings also mentioned, L + M has enjoyed a very positive working relationship with Yale New Haven Health. Quite honestly, we were excited to be associated with their brand. This excitement was not about the name only, but more importantly, it was about their quality, their standards and about being able to recruit the best and brightest physicians to our L + M community. While the changes to the healthcare landscape have left the Board with many uncertainties regarding L+M's future, we are certain that Yale New Haven Health is the most logical partner to support our values and mission going forward. If OHCA either denies or delays the Application, I am here to say that there will be negative consequences for our L + M community; some of which may not be reversible, may result in less access to care, less diversity in providers and even worse, a less healthy community. I urge OHCA to consider our testimony today and allow us to form a relationship on our terms as we are very committed to the future of our L + M.

I adopt this profited testimony as my own.

A handwritten signature in black ink, appearing to read 'Rosa Sanfilippo', written over a horizontal line.

Rosa Sanfilippo, DMD
Board Member
Lawrence J. Memorial Corporation

**STATE OF CONNECTICUT
DEPARTMENT OF PUBLIC HEALTH
OFFICE OF HEALTH CARE ACCESS**

AFFILIATION OF LAWRENCE + MEMORIAL CORPORATION WITH YALE-NEW HAVEN HEALTH SERVICES CORPORATION : **DOCKET NO. 15-32033-CON**
: **July 11, 2016**

PRE-FILED TESTIMONY OF JOSEPH CRESPO, CHAIRMAN OF YALE-NEW HAVEN HEALTH SERVICES CORPORATION BOARD OF TRUSTEES

Good afternoon, Attorney Hansted and members of the staff of the Office of Health Care Access (“OHCA”). My name is Joseph Crespo and I am the Chairman of the Board of Trustees for Yale-New Haven Health Services Corporation (“YNHHSC” known as Yale New Haven Health). I am very appreciative of this opportunity to speak on behalf of our Board of Trustees and present our strong and enthusiastic recommendation to OHCA that it approve the above-referenced application (the “Application”) allowing Lawrence + Memorial Corporation (“L+M”) to affiliate with Yale New Haven Health.

Yale-New Haven Health is an integrated health care delivery system with a national reputation for high quality patient-centric care and education. One of Yale New Haven Health’s many strengths is the diversity of its member hospitals and affiliated providers. Each member of Yale New Haven Health brings unique capabilities and expertise to our system, from Greenwich Hospital’s outstanding reputation for patient satisfaction to Yale-New Haven Hospital’s position as a preeminent quaternary care and teaching facility.

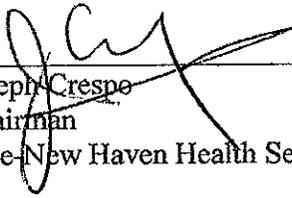

The boards of our hospitals are composed of community, business and physician leaders from their service area. Our boards are diverse, active and engaged – just last month, we convened a joint board retreat where trustees from each “delivery network” within Yale New Haven Health, including Northeast Medical Group – our physician foundation, came together for two days of meetings and discussion regarding the challenges facing our industry. Yale New Haven Health is strongest when each member hospital learns from and informs the others. We are committed to selecting diverse individuals representative of the local communities they serve, with strong interest in serving as fiduciaries for their respective delivery network. An engaged and committed local fiduciary board with authority and accountability is critical to Yale New Haven Health’s success in that these diverse and local perspectives influence both local and system-wide strategy decisions.

As we have outlined in the Application, L+M’s board will continue to ensure that the needs of its community are represented and well served when considering both local and system strategy. While Yale New Haven Health will have reserve powers over certain decisions made by the L+M board, as is the case with all hospitals in Yale New Haven Health, decisions regarding major new programs and clinical services or discontinuation or consolidation of any such program will require the approval of the L+M board in all instances. We have followed this process with the boards of other member hospitals, and we find that it allows for an open dialogue between the boards, as the local boards present perspectives tailored to their area and input on system-wide strategies.

Both Bridgeport and Greenwich Hospitals have made tremendous strides as part of Yale New Haven Health, and the integration of the Hospital of St. Raphael into Yale-New Haven Hospital has helped ensure that a vital community resource remains available to the residents of New Haven. It is my strong belief that the addition of L+M to Yale New Haven Health will not only benefit the Eastern Connecticut region, but also will enhance Yale New Haven Health as a whole as we collaborate with and learn from L+M Hospital and Westerly Hospital.

I have met with members of the L+M Board of Directors, and they are remarkably dedicated and talented people. They are excited about what the future holds as part of Yale New Haven Health and as Dr. Sanfilippo has relayed, they are very concerned about the effect on their community if this affiliation is not approved. They have chosen to form a relationship with Yale New Haven Health that will allow us to address community needs, ensure continued access to needed services and enhance the efficiency of the health care system in this state. I urge OHCA to approve the Application, and allow Yale New Haven Health and L+M to forge a partnership that will be truly beneficial for all involved.

I adopt this pre-filed testimony as my own.

Joseph Crespo
Chairman
Yale New Haven Health Services Corporation

**STATE OF CONNECTICUT

PRE-FILED TESTIMONY OF THOMAS BALCEZAK, CHIEF MEDICAL OFFICER OF YALE-NEW HAVEN HOSPITAL

Good afternoon, Attorney Hansted, and staff of the Office of Health Care Access (“OHCA”). My name is Thomas Balczak and I am Chief Medical Officer of Yale-New Haven Hospital (“YNHH”). I appreciate this opportunity to present to you today about the many benefits that will result from approval of the above-referenced application (the “Application”).

CURRENT CLINICAL RELATIONSHIP

YNHH has worked with L+M Hospital for a number of years, helping the hospital form an infrastructure for change management, contributing to their pediatric program, and forming an innovative “telestroke” program that addressed the lack of neurologists in their service area, allowing our specialists to provide electronic consultation for stroke patients. Together, we have had significant successes in providing access to certain specialty services, and I think I can confidently state that we have saved lives together. But our current relationship is essentially that of a vendor and customer – we provide a service for which L+M Hospital pays. We cannot integrate L+M into our broader quality improvement program, we cannot extend our efficiencies in purchasing, and we cannot roll out the standardized clinical protocols and evidence-

based practices that we are adopting across Yale New Haven Health and to other Yale New Haven Health hospitals to improve the care that patients receive. And as L+M's financial condition deteriorates, its ability to contract for these services weakens. If this Application is not approved by OHCA, L+M Hospital may be forced to curtail some of these specialty clinical programs, as they may take a backseat to the most basic services.

MAINTAINING LOCAL COMMUNITY HOSPITAL STRENGTH

YNHH's goal here is not to move patients from beds in New London to beds in New Haven. YNHH is at capacity, as is Bridgeport Hospital, and we simply do not have the beds for significant amounts of additional patients. Rather, our intention is to keep patients close to home in New London and in their local communities, transferring only the most complex cases to our campus in New Haven based upon the need to provide services that L+M does not. In fact, we want to enhance the local capabilities, so that our community hospitals are strengthened and can care for the majority of the cases that come in through their doors. This is how we have worked with Bridgeport and Greenwich Hospitals during the years those hospitals have been part of Yale New Haven Health – we have added and helped develop programs in bariatric surgery, gynecologic oncology, cardiac surgery and surgical otolaryngology, just to name a few. However, at the same time when patients in our Yale New Haven Health community hospitals need complex care beyond the expertise or resources of the those hospitals, patients receive access to YNHH in the most seamless, coordinated, efficient and timely manner. It is my opinion that collaboration between our member hospitals and their medical staffs yields many excellent outcomes that would otherwise not be achieved.

INTEGRATING BEST PRACTICES

As a health system, we are seeking to enhance value and reduce costs, and we have found that we need scale to spread costs in order to achieve these aims. By “scale,” I am referring not only to the number of beds and size of the hospitals, but also the number of patients that seek care at our institutions and affiliated providers. L+M Hospital and YNHH already share a number of patients, systems and medical staff members – a cardiologist at L+M Hospital trained at and is on the faculty of the Yale School of Medicine, as is the primary neurosurgeon at L+M. By joining Yale New Haven Health, L+M will have access to our sophisticated infrastructure for care management and clinical redesign – and we will have the ability to drive value by spreading the costs of that infrastructure across a wider patient base. Furthermore, by affiliating with a nationally ranked teaching hospital, L+M patients will have access to participate in innovative research studies and potentially life-saving clinical trials. They will also benefit as research findings get integrated into clinical care delivery.

Our goals in rolling out standardized clinical protocols and best practices is not to dictate from New Haven how patients should be cared for at our system member hospitals – instead, we develop protocols and care pathways in conjunction with all hospitals, through a collaborative process that relies on the unique experiences and expertise that each hospital brings to bear. As an example, our Formulary Integration Council, or “FIC,” is an integrated group made up of physician and pharmacy representatives from each hospital and from Northeast Medical Group, our medical

foundation. As OHCA is aware, hospital pharmacies face many challenges these days, ranging from drug shortages to drug expense to contamination in compounded pharmaceuticals. The FIC draws on the best practices of each institution to develop a system-level formulary, which is implemented at each hospital and at NEMG. System resources manage the process and support the FIC, and each hospital has a voice in the development of the formulary. We have followed similar processes in developing standardized protocols on infection prevention, prevention of blood clots, improved utilization of telemetry, and other initiatives that have improved care while lowering costs. In some cases, we use the operational expertise of our smaller hospitals to inform how we deliver care at YNHH. For example, Bridgeport Hospital implemented an “Enhanced Recovery After Surgery” program that allowed orthopedic and gynecology patients to have improved pain management, earlier ambulation, and faster return to home. This model is currently being deployed at YNHH. In each case, our approach is the same – draw on the experience and expertise of each hospital, supported by a system-level infrastructure.

In closing, I would like to summarize my key points. Yale New Haven Health does not intend to reduce services or move them to New Haven, and will not weaken the clinical services that are provided in eastern Connecticut. To the contrary, a review of our history with Bridgeport and Greenwich hospitals demonstrates that we have strengthened and enhanced the clinical offerings in these communities. While we have worked closely with L+M for many years, our current contractual relationship is not sufficient to address the many challenges facing L+M at this time, and the only way that L+M can truly benefit from our care management and quality improvement

infrastructure is by affiliating with Yale New Haven Health as a member. OHCA has a unique opportunity here to set eastern Connecticut on a path towards improved access and patient-centered care, and I urge you to approve this Application.

I adopt my pre-filed testimony as my own.

A handwritten signature in blue ink, appearing to read "Tom Balczak".

AFFILIATION OF LAWRENCE + MEMORIAL CORPORATION WITH YALE-NEW HAVEN HEALTH SERVICES CORPORATION : **DOCKET NO. 15--32033-CON**
:
:
: **July 11, 2016**

**PRE-FILED TESTIMONY OF MONICA NOETHER, PH.D.,
VICE PRESIDENT OF CHARLES RIVER ASSOCIATES AND EXPERT ON BEHALF
OF LAWRENCE + MEMORIAL CORPORATION AND YALE-NEW HAVEN HEALTH
SERVICES CORPORATION**

I. INTRODUCTION

Good afternoon Attorney Hansted, and staff of the Office of Health Care Access (“OHCA”). My name is Monica Noether. I am a vice president of Charles River Associates, an economic consulting firm. I have over 30 years of experience in evaluating the antitrust issues associated with health care transactions. I have published in peer-reviewed journals on the topic and have also testified to federal and state government agencies and in federal court on several occasions. Previously, I was employed by the Federal Trade Commission (“FTC”). I have a Ph.D. in Economics and an M.B.A in Economics and Finance from the University of Chicago, and a B.A. from Wesleyan University. A copy of my curriculum vitae is attached as Exhibit 1.

II. SUMMARY OF OPINIONS

It is my professional opinion that the proposed affiliation of Yale-New Haven Health Services Corporation (known as “Yale New Haven Health”) with Lawrence + Memorial Corporation (“L+M”) will benefit the citizens of Connecticut (and Rhode Island) by “improv[ing] quality, accessibility and cost effectiveness of health care delivery in the region.”¹ Moreover, “the proposal will not negatively impact the diversity of health care providers and

¹ General Statutes of Connecticut, Office of Health Care Access, Chapter 368z, Section 19a-639. Guideline and Principle 5.

patient choice in the geographic region; and...will not adversely affect health care costs or accessibility to care.”² My opinion is based on my economic analysis of the transaction and the markets in which Yale New Haven Health and L+M operate, as well as my general experience as a health economist.

As Marna Borgstrom, President and CEO of Yale New Haven Health will testify, as a result of the proposed affiliation, substantial resources will be dedicated to enhancing the health care services delivered by L+M.³ These resource commitments will upgrade facilities, increase access to services, and facilitate recruitment of additional physicians to the L+M system. In addition, I understand that the parties anticipate cost savings to exceed \$30 million over the next five years as operations are streamlined and L+M’s currently underutilized capacity is more effectively used. The combined scale of Yale New Haven Health and L+M will enable the newly affiliated entities to engage more effectively in cost-effective population health initiatives that will reduce costs and increase the quality of care. As a result, Connecticut citizens who reside in the area served by L+M will benefit from increased access to higher-quality, lower-cost services close to their homes.

Alan Hunter, Chairman of the Board of Directors of L+M Corporation, and Bruce Cummings, President and CEO of L+M Corporation, have testified that without this affiliation, L+M is unlikely to continue to be able to provide the same level of access to consumers.⁴ Like many small systems of community hospitals, L+M faces substantial financial challenges related to its size and lack of access to capital. These problems will only become more severe in the coming years as commercial and government reimbursements decrease and the costs of operating as an independent system increase.

The proposed affiliation between Yale New Haven Health and L+M can achieve these clinical and financial benefits without reducing competition, which is consistent with the fact that

² *Id.*, Guidelines and Principles 11 and 12.

³ Pre-Filed Testimony of Marna P. Borgstrom, President and Chief Executive Officer of Yale-New Haven Health Services Corporation and Chief Executive Officer of Yale New Haven Hospital. Submitted July 11, 2016 to State of Connecticut Department of Public Health, Office of Health Care Access, Docket No. 15-32033-CON.

⁴ Pre-Filed Testimonies of Alan Hunter, Chairman of Lawrence + Memorial Corporation Board of Directors, and Bruce Cummings, President and Chief Executive Officer of Lawrence + Memorial Corporation. Submitted July 11, 2016 to State of Connecticut Department of Public Health, Office of Health Care Access, Docket No. 15-32033-CON.

the proposed affiliation has already received approval from federal antitrust regulators. Because competition will be maintained, the affiliation of Yale New Haven Health and L+M will pass on to consumers the cost savings and clinical benefits that their affiliation will allow them to achieve. As a result, these consumers will benefit directly from the affiliation.

As I discuss below, the proposed affiliation will not reduce competition because Yale New Haven Health and L+M are focused on different patient populations: Yale New Haven Health's flagship hospital is an academic medical center offering complex tertiary and quaternary care that is located in New Haven, while L+M's Connecticut hospital is located nearly 50 miles to the east in New London and is a community hospital offering less complex services. Given their different focuses and the substantial distance between the hospitals, Yale New Haven Health and L+M do not compete directly for many patients. Rather, both face more substantial competition from other health care providers. Similarly, the combination of Yale New Haven Health and L+M's physician groups also does not raise competitive concerns.

While Yale New Haven Health and L+M have developed clinical affiliations over the last several years, they are limited in the extent of financial and clinical integration that they can undertake without regulatory approval. Further advancements will require capital investment and closer alignment of clinical and financial operations, which are only possible through corporate affiliation.

I have reviewed the Intervenor's Petition for Intervenor Status, dated June 17, 2016, submitted by seven interested organizations.⁵ As I discuss below, it is my professional opinion that many of the claims made by the Intervenor regarding the extent of overlap and the effect of hospital affiliations are not factually based or have no relevance to the proposed affiliation, given the limited extent to which Yale New Haven Health and L+M currently compete.

I have also reviewed the study coauthored by Yale University economist Dr. Zack Cooper entitled "The Price Ain't Right? Hospital Prices and Health Spending on the Privately

⁵ Petition for Appearance by Henry F. Murray, Esq. on behalf of a coalition comprised of AFT Connecticut, Connecticut Citizen Action Group (CCAG), UNITE HERE Connecticut, National Physicians Alliance in Connecticut (NPA-CT), Connecticut Health Policy Project, United Action Connecticut, and New England Health Care Employees, District 1199, SEIU [hereinafter "Intervenor's Petition"].

Insured.”⁶ As I explain below, the study has no relevance to this proposed affiliation. The study focuses on competition between hospitals within a 15-mile radius, while the closest hospitals in the Yale New Haven Health and L+M systems are nearly 50 miles apart.

III. EXPECTED BENEFITS OF THE AFFILIATION

The proposed affiliation between Yale New Haven Health and L+M will allow the systems to achieve both clinical and financial benefits, which will accrue to consumers served by the systems’ hospitals. Clinically, the proposed affiliation offers L+M an opportunity to broaden its expertise, thereby providing enhanced local access to cutting-edge, sophisticated services to residents of its service area. The existing clinical programs between the two systems (*e.g.*, heart and vascular, radiation therapy, pediatric hospitalist, and telestroke) will be strengthened and new programs may be developed. As L+M’s hospitals are currently underutilized, there is capacity to deploy more clinical resources at its hospitals to enable patients who do not require the most complex services to have better access to high-quality care locally and in a lower-cost setting. The closer affiliation will also facilitate access for residents of L+M service areas who need the tertiary and quaternary services offered by Yale New Haven Hospital. In addition, Yale New Haven Health—which owns the Northeast Medical Group (“NEMG”) and is affiliated with the Yale School of Nursing and Yale Medical Group (“YMG”)—will assist L+M in recruiting and retaining physicians and other health care professionals to the New London area.

Financially, given L+M’s relatively small size and limited access to capital, it lacks the resources needed to maintain its current service offerings, much less achieve the scale necessary to respond to the capital-intensive and risk-bearing demands of health care reform. The financial strength of Yale New Haven Health and its broader scope of services will position L+M to be part of a health care system that is better able to assume the responsibility and the financial risks necessary to achieve quality and service outcomes in value-based contracts with health insurers.

L+M’s financial condition as an independent system is worsening. Recently, L+M’s bond rating was reduced,⁷ which is a sign of its inability to meet the needs of consumers in

⁶ Zack Cooper, Stuart Craig, Martin Gaynor, John Van Reenen, “The Price Ain’t Right? Hospital Prices and Health Spending on the Privately Insured” National Bureau of Economic Research Working Paper 21815, December 2015 [hereinafter “*The Price Ain’t Right? Study*”].

Connecticut and Rhode Island as an independent entity. As the bond rating memorandum indicated, L+M's "[o]perating performance is weaker in part due to...volume issues and ongoing losses in the physician group."⁸ The memorandum also notes "[a] sharp decrease in operating profitability in the last three fiscal years from historical levels."⁹ An affiliation with Yale New Haven Health addresses these limitations and provides an immediate benefit to the community.

The access to capital and lower borrowing costs that would result from the affiliation will allow L+M to better maintain and improve state-of-the-art facilities, and to invest in new technologies and diagnostic capabilities. L+M will also be able to access Yale New Haven Health's expertise in population health management and Yale New Haven Health's enhanced and more cost-effective IT platforms (*e.g.*, Epic, which is the gold standard for electronic health record systems).

The parties estimate that they will realize \$31 million in cost savings over five years, which will be offset in part by approximately \$9 million in implementation costs. Yale New Haven Health has a history of successfully reducing costs as a result of acquiring hospitals: for example, my understanding is that it is well on its way to meeting its five-year goal of achieving \$300 million in cost savings from its acquisition of the Hospital of Saint Raphael. In fact, three years after its affiliation with the Hospital of Saint Raphael, it had exceeded its then-current cost savings target.¹⁰

The cost savings and quality benefits that the affiliation will produce will directly benefit the residents of the New London area. Intervenors express concern over "exploding" insurance premiums and cost-sharing, noting that "New London County's median family income lags the state average."¹¹ However, absent the affiliation, hospital prices are likely to be higher, as these

⁷ S&P Global Ratings, Connecticut Health & Educational Facilities Authority Lawrence + Memorial Hospital Inc.; Hospital, May 17, 2016.

⁸ *Id.*, at 2.

⁹ *Id.*

¹⁰ Yale New Haven Hospital, "Saint Raphael Integration: 3 Years Progress Review," September 2015, at 2.

¹¹ Intervenors' Petition, at 2. While the Intervenors' note that New London County's median family income is less than the Connecticut state average, it exceeds that of New Haven County, where Yale New Haven Hospital is located. (*See* United States Census Bureau, American FactFinder, 2010-2014 American Community Survey 5-Year Estimates, Select Economic Characteristics, available at <http://factfinder.census.gov/faces/nav/jsf/pages/index.xhtml>.)

affiliation-specific savings will not be able to be realized. As a result, New London area residents would be worse off.

IV. COMPETITION AMONG HOSPITALS AND THE FRAMEWORK FOR ANTITRUST ANALYSIS

The benefits of the proposed affiliation between L+M and Yale New Haven Health can be achieved without reducing competition. While the criteria that OHCA considers in evaluating whether to grant Certificate of Need (“CON”) approval to a proposed transaction do not directly address the transaction’s likely effect on competition, maintaining competition guarantees that the enhanced quality and cost-effectiveness resulting from a transaction inure to patients. Moreover, competition also guarantees that the transaction will not negatively affect diversity of choice or health care costs and access. Here, the affiliation will maintain—not reduce—competition.

In order to explain why the affiliation will not reduce competition, I provide some background on how the antitrust agencies, including the FTC, U.S. Department of Justice (“DOJ”) and most state attorneys general analyze the competitive effects of hospital affiliations on consumers. This approach is also consistent with economic theory and application. The FTC and DOJ’s *Horizontal Merger Guidelines* provide useful guidance regarding this approach.¹²

Hospitals compete for two interrelated sets of customers: patients and the health insurers that insure many of these patients.¹³ Therefore, analyses of competition between hospitals must consider what influences the choices of both patients and health insurers. Hospitals compete for health insurer customers by offering favorable price terms that they negotiate in contracts with health insurers to become in-network providers. Insurers then create incentives to encourage their members to utilize the services of in-network hospitals instead of more expensive hospitals that are not included in the insurers’ networks.

Hospitals also compete to provide care to members of the insurers’ plans. This competition generally focuses more on service and quality than on price, primarily taking the

¹² U.S. Department of Justice and The Federal Trade Commission, *Horizontal Merger Guidelines*, August 19, 2010 [hereinafter “*Horizontal Merger Guidelines*”].

¹³ See, e.g., Gregory Vistnes, “Hospitals, Mergers, and Two-Stage Competition,” *Antitrust Law Journal*, Vol. 67, No. 3, 671-692 (2000).

form of providing excellent clinical services, having well-regarded physicians on their medical staff, and offering amenities that make the hospital visit more pleasant for the patient.

A variety of factors are considered in determining the extent to which health insurers and patients view hospitals (and other health care providers) as competitors. All hospitals are differentiated based on a myriad of factors, such as the services they provide, the physicians who are affiliated with them, their general reputation, the amenities they offer, and their location. In general, hospitals that offer comparable services, affiliate with the same physicians, and are geographically proximate to each other are more likely to be viewed as close substitutes by their customers than those that provide different services or are located further apart.

With this background, I discuss product and geographic market definition in the next sections.

A. The Relevant Product Market

Within the context of this transaction, I focus on the proposed affiliation's effect on the provision of inpatient general acute care ("GAC") services that are offered by both Yale New Haven Health and L+M. I also discuss the implications of a market limited to GAC services utilized by patients enrolled in commercial health plans to be consistent with the approach typically adopted by the antitrust agencies.¹⁴

Separate product markets could also be defined and evaluated for outpatient services and for physician services. However, in the case of outpatient services, numerous other free-standing

¹⁴ The antitrust agencies typically focus their analyses on GAC services provided to *commercial* health plans and their members, because they are generally the only customers subject to a potentially anticompetitive price increase. Consumers enrolled in government-funded health insurance such as Medicare or Medicaid pay pre-determined, regulated rates. See Complaint, *In the Matter of Inova Health System Foundation, and Prince William Health System, Inc.*, No. 0610166 (F.T.C. May 8, 2008); Complaint, *In the Matter of ProMedica Health System, Inc.*, No. 1010167 (F.T.C. Jan. 6, 2011); Complaint for Temporary Restraining Order and Preliminary Injunction, *Federal Trade Commission v. OSF Healthcare System and Rockford Health System*, No. 111 0102 (F.T.C. Nov. 18, 2011); Complaint, *In the Matter of Reading Health System and Surgical Institute of Reading*, No. 1210155 (F.T.C. Nov. 16, 2012); Complaint for Permanent Injunction, *Federal Trade Commission and State of Idaho v. St. Luke's Health System, LTD and Saltzer Medical Group, P.A.*, No. 121 0069 (F.T.C. Mar. 26, 2013); Complaint, *In the Matter of Cabell Huntington Hospital, Inc.; Pallottine Health Services, Inc.; and St. Mary's Medical Center, Inc.*, No. 141 0218 (F.T.C. Nov. 5, 2015); Complaint, *In the Matter of The Penn State Hershey Medical Center and PinnacleHealth System*, No. 141-0191 (F.T.C. Dec. 7, 2015); Complaint, *In the Matter of Advocate Health Network; Advocate Health and Hospitals Corporation; and NorthShore University Health System*, No. 1410231 (F.T.C. Dec. 17, 2015). The antitrust agencies do recognize that hospitals compete for patients on quality and service dimensions as well as on price; however, they believe that the same factors that determine the extent and nature of price competition affect the quality dimensions of competition as well.

(as well as hospital-based) competitors exist, making the combination of Yale New Haven Health's and L+M's outpatient facilities inconsequential from a competitive perspective. With respect to physician services, as I discuss below, there is little overlap between the physicians employed by Yale New Haven Health and L+M.

B. The Relevant Geographic Market

As I described previously, analyses of competition between hospitals must consider the choices of both patients and the health insurers who insure them. The question of geographic market definition asks what alternative hospitals would patients be willing to travel to if, post-affiliation, the affiliating hospitals raised prices or lowered quality. Generally, a patient's willingness to travel depends on, among other things, the type of care the patient requires and the services offered by the hospital. Health insurers develop hospital networks that provide health plan members with access to relatively local in-network hospitals because their enrollees prefer to stay close to home for certain types of reasonably routine care such as the care that L+M offers.

To define candidate geographic markets in which to assess competition between Yale New Haven Health and L+M, I follow the recent guidance provided by the FTC and DOJ in *Statement of Antitrust Enforcement Policy Regarding Accountable Care Organizations Participating in the Medicare Share Savings Program*.¹⁵ In that statement, the antitrust agencies set forth antitrust safety zones for Accountable Care Organizations ("ACOs") based on ACO-member hospitals' shares in their primary service area ("PSA"). The FTC and DOJ define a PSA as the "lowest number of postal [ZIP C]odes from which [a hospital] draws at least 75 percent of its [patients]."¹⁶ The geographic contours of the PSA reflect consumers' willingness to travel to receive health care services, and can be used to infer the geographic access to care that patients demand.

¹⁵ Federal Trade Commission and U.S. Department of Justice, *Statement of Antitrust Enforcement Policy Regarding Accountable Care Organizations Participating in the Medicare Shared Savings Program*, Federal Register Vol. 76, No. 209, Oct. 28, 2011, at 67028.

¹⁶ Similarly, OHCA's 2015 CON application guide, citing Connecticut Statute, defines the primary service area as "the smallest number of [ZIP C]odes from which the [applicant] draws at least seventy-five percent of its patients." State of Connecticut Department of Public Health, Office of Health Care Access, Certificate of Need Application Guide, 2015, at 40.

In several recent challenges to hospital mergers, the FTC has defined geographic markets to include the area from which the merging parties draw approximately 85 to 90 percent of their patients.¹⁷ As such, I also present shares for Yale New Haven Health and L+M in the systems' combined primary and secondary service areas ("PSA/SSA"). This combined area includes the smallest number of ZIP Codes from which the systems draw at least 90 percent of their patients.

V. COMPETITIVE EFFECTS ANALYSIS

A. Yale New Haven Health and L+M Each Have Small Shares in the Other's Service Areas

Exhibit 2 depicts the PSA and SSA for Yale New Haven Health for all patients; this analysis is limited to inpatient GAC services offered by both Yale New Haven Health and L+M.¹⁸ The PSA for Yale New Haven Health extends westward along the Connecticut coast to the New York border, and roughly 20 miles east of New Haven. It also extends to the north about 20 miles, roughly half of the distance to Hartford. The PSA/SSA for Yale New Haven Health is broader, extending past New London almost to the Rhode Island border. It also extends northward to reach areas proximate to Hartford, and includes about a dozen competing hospitals. The breadth of Yale New Haven Health's PSA and PSA/SSA reflects its ownership of

¹⁷ See Complaint for Temporary Restraining Order and Preliminary Injunction, *Federal Trade Commission v. OSF Healthcare System and Rockford Health System*, No. 111 0102 (F.T.C. Nov. 18, 2011), ¶ 37 ("this relevant geographic market accounts for 87% of the inpatient admissions of the merging parties"); Complaint, *In the Matter of Reading Health System and Surgical Institute of Reading*, No. 121 0155 (F.T.C. Nov. 16, 2012), ¶ 51 ("The relevant geographic market in which to analyze the effects of the Acquisition... is the area corresponding to Reading Hospital's primary service area, which is defined by RHS in the ordinary course of business as the set of [ZIP C]odes from which Reading Hospital draws approximately 85 percent of its patients"); Complaint, *In the Matter of Inova Health System Foundation, and Prince William Health System, Inc.*, 061 0166 (F.T.C. May 8, 2008), ¶ 22 ("for the hospitals located in [the relevant geographic market], approximately 90 percent of their patients came from [the relevant geographic market]").

¹⁸ To avoid double-counting inpatients, I exclude newborns and transfers from within or from another short-term acute care facility. I also exclude discharges with invalid patient ZIP Codes and services with invalid or ungroupable DRGs. As explained in the text above, my analysis is also limited to GAC services which exclude services related to behavioral health, rehabilitation and substance use disorder. I also focus on patients categorized into DRGs that are offered by both Yale New Haven Health and L+M as these are the services over which the two systems might compete for patients. I consider a health system to "offer" a DRG if that health system performed the DRG at least once for primary and secondary services and at least three times for tertiary and quaternary services in the last fiscal year. (I define primary and secondary services as medical DRGs with a relative weight of less than 1.3 and surgical DRGs with a relative weight of less than 3 in fiscal year 2015. All other DRGs are considered tertiary and quaternary services.) A "without complications" DRG that does not meet the above criteria for "offered" DRG is still considered to be "offered" if one of the corresponding "with complications" DRGs meets the "offered" DRG criteria.

an academic medical center and its strategy to develop Yale New Haven Hospital into a “destination hospital.”

In contrast, L+M draws patients from a relatively narrow area as depicted in Exhibit 3, reflecting its hospitals’ status as community hospitals. L+M’s PSA is concentrated in areas within a few miles of each of its hospitals, and does not include any other hospitals. The PSA/SSA for L+M is slightly broader, extending along the Connecticut coast from 10-15 miles west of L+M Hospital to 10-15 miles east of Westerly Hospital. The SSA also extends slightly further to the north, including William Backus Hospital in Norwich, which is affiliated with Hartford HealthCare.

It is evident from these maps that a substantial proportion of the residents of the PSAs and PSA/SSAs of Yale New Haven Health and L+M receive care from those facilities, and many also receive care from competing hospital systems, located both within and outside the service areas. In assessing the likely competitive effects of a transaction, competing hospitals that also provide care to service area residents, regardless of whether they are actually located in the PSA or PSA/SSA, should be viewed as alternative hospital choices for residents of the service area.

Service areas defined based only on commercially insured patients are slightly broader than those for all patients, reflecting commercial patients’ somewhat greater willingness to travel. These service areas are shown in the maps included in the Appendix as Exhibits A-1 and A-2. (Generally, my conclusions regarding the effects of the proposed affiliation between Yale New Haven Health and L+M do not depend on whether the analysis includes all patients or only those covered by commercial health plans.)

Despite the broad service area of Yale New Haven Health, Yale New Haven Health and L+M largely do not compete for patients residing in the same geographic areas. As Exhibit 4 depicts, a substantial distance exists between the non-overlapping PSAs of the two systems. Moreover, only four ZIP Codes in Yale New Haven Health’s extensive SSA are also in L+M’s PSA/SSA.

As the table below indicates, L+M treats a high share of the residents of its own service areas: 77 percent of all patients in its own PSA and 60 percent in its own PSA/SSA.

	L+M Service Area		Yale New Haven Health Service Area	
	PSA	PSA/SSA	PSA	PSA/SSA
L+M Share	77%	60%	0%	4%
Yale New Haven Health Share	7%	6%	75%	48%

On the other hand, Yale New Haven Health has a limited presence in L+M’s service areas: only 7 percent of residents of L+M’s PSA and 6 percent of residents of L+M’s PSA/SSA were discharged from Yale New Haven Health. Almost all of these patients received care at Yale New Haven Hospital and a substantial number were admitted in service lines in which there is currently a clinical affiliation between Yale New Haven Health, YMG, and L+M. Hartford HealthCare—largely because of William Backus Hospital, which is the closest competing hospital to L+M Hospital—has a larger presence in L+M’s service area than does Yale New Haven Health.

Yale New Haven Health also has a substantial share in its own service area, but L+M has virtually no presence in Yale New Haven Health’s PSA, and has a share of only 4 percent in Yale New Haven Health’s PSA/SSA. Consistent with the difference in the missions of the two hospital systems, this analysis suggests that L+M is not a significant competitor to Yale New Haven Health.¹⁹

Intervenors argue that the affiliation will “leave Yale[]New Haven [Health] with...more than 80% [share] in L+M’s primary service area.”²⁰ While this statement may be true, it is almost entirely attributable to L+M’s existing presence in its own primary service area, rather than being the result of combining the significant shares of two existing competitors, which might suggest that meaningful competition between the two systems could be eliminated as a

¹⁹ The shares of commercially insured discharges in these service areas are qualitatively similar to the all-patient shares. Reflecting commercially insured patients’ somewhat greater willingness to travel, Yale New Haven Health’s share of commercial discharges in L+M’s PSA and PSA/SSAs are 12 percent and 11 percent, respectively, while those of L+M are 62 percent and 47 percent. Again, Hartford HealthCare treats more patients from L+M’s service area than does Yale New Haven Health.

²⁰ Intervenors’ Petition, at 2.

result of the proposed affiliation. To the contrary, as I discuss in my testimony, current competition between the systems is limited.

B. Yale New Haven Health and L+M Are Not Close Competitors

Yale New Haven Health and L+M focus on different patients. Yale New Haven Health is a nationally recognized health system providing complex care to patients throughout New England and extending into New York State. Yale New Haven Hospital, the system's largest hospital, provides the most complex tertiary and quaternary care to patients in this multi-state area. It is the primary teaching hospital of the Yale School of Medicine and the Yale School of Nursing, and is ranked nationally by U.S. News & World Report.²¹ As part of its strategy to become a "destination hospital," Yale New Haven Hospital facilitates transfers of complex cases from community hospitals and coordinates direct admissions to the hospital through its Y Access Line program. The hospital does not actively compete to provide care to patients who can be served at community hospitals like those operated by L+M, but instead competes against other large systems providing highly complex care (e.g., Hartford HealthCare, as well as systems located in Boston and New York City). In contrast, the L+M hospitals are community hospitals, largely offering primary and secondary services.

To the extent that L+M offers some more complex services, it is mostly through clinical affiliations with tertiary hospitals like Yale New Haven Hospital. The difference in the hospitals' missions is reflected in the services they provide. Yale New Haven Health treats patients categorized into more than 700 acute care DRGs, while L+M treats patients in only approximately 500 acute care DRGs. The greater complexity of care that Yale New Haven Health delivers is also reflected in the higher average casemix for inpatient care provided by the system. Excluding obstetric cases, Yale New Haven Health's average casemix for GAC services is 1.70, while the same figure for L+M is 1.44.

Moreover, L+M's community hospitals lack the clinical and financial resources needed to achieve the goals of health care reform and to compete with larger systems in the evolving marketplace. In particular, L+M cannot by itself fully provide integrated care spanning the

²¹ U.S. News & World Report, Best Hospitals Rankings: Yale New Haven Hospital, 2015-16. (Available at <http://health.usnews.com/best-hospitals/area/ct/yale-new-haven-hospital-6160400>.)

continuum of services; it cannot assume the responsibility and accept the financial risk for achieving quality and service outcomes; it cannot invest in the new capabilities necessary to execute on population health initiatives; and it cannot maintain and improve state-of-the-art facilities, technologies and diagnostic capabilities.

Perhaps most importantly, as I noted earlier, Yale New Haven Hospital (the closest Yale New Haven Health hospital to the hospitals operated by L+M) is almost 50 miles away from L+M Hospital and more than 60 miles away from Westerly Hospital. It is one of 14 hospitals and six large health systems with a presence within 50 miles of L+M Hospital. Exhibit 5 contains a map of these hospitals and shows driving times from L+M Hospital.

C. The Proposed Affiliation Will Not Affect Negotiations with Health Insurers

For the reasons described above—especially the distance between the systems’ hospitals and differences in service offerings and clinical focus—neither Yale New Haven Health nor L+M is a significant competitive constraint on the other. And because the two systems do not competitively constrain one another, the proposed transaction would not increase the combined entity’s leverage in negotiations with insurers. Insurers could not offer a marketable network to residents of the New London area that excluded L+M and instead steered those patients to Yale New Haven Hospital, nor could insurers offer a marketable network to residents of the New Haven area that excluded Yale New Haven Hospital and steered those patients to L+M Hospital. As a result, the proposed affiliation will not affect bargaining dynamics between Yale New Haven Health (including the hospitals now owned by L+M) and health insurers, and Yale New Haven Health will be unable to demand anticompetitive increase in prices from insurers. Moreover, my understanding is that Yale New Haven Health will honor L+M Hospital and Westerly Hospital’s existing contracts with health insurers, ensuring that the cost of hospital services will not increase as a result of the affiliation.

In addition, a large number of competing hospitals and hospital systems also provide care to residents of Yale New Haven Health’s and L+M’s service areas. These competitors include, among others, Hartford HealthCare (William Backus Hospital, MidState Medical Center, and Hartford Hospital, and The Hospital of Central Connecticut), Middlesex Hospital, Ascension Health (St. Vincent’s Medical Center), and Trinity Health (Saint Francis Hospital). These competitors will remain after the proposed affiliation.

The Intervenors argue that “[risk-]adjusted prices for the most common diagnoses at L+M are consistently lower than other [Yale New Haven Health] hospitals.”²² However, the Intervenors provide no support for this statement, and it is not clear where they could obtain the data necessary to conduct an analysis that would allow any meaningful conclusions about relative prices. As Yale New Haven Health has explained, a “specific analysis relating to risk-adjusted pricing [is not possible] because there is no such standard industry metric that measures patient acuity or other variables that may affect cost and price.”²³ While detailed confidential claims data from different hospital systems would provide information on *unadjusted* prices, the only adjustment that could readily be made to such data would be to control for the specific DRG in which a patient is categorized. Such adjustment, however, would not account for the myriad other factors that affect patient complexity and hospital-specific cost factors (such as Yale New Haven Hospital’s substantial teaching mission) and the resulting resources that are required to treat them.

VI. THE PROPOSED AFFILIATION WILL NOT CAUSE ANY REDUCTION IN COMPETITION FOR PHYSICIAN SERVICES

I understand that OHCA is also reviewing a separate CON filing regarding the proposed merger of L&M Physicians Association Inc. (“L&MPA”) into NEMG. It is my opinion that there are no competitive concerns associated with this proposed transaction.

I have assessed the overlaps between the two physician groups using the same *Horizontal Merger Guidelines* framework that I applied above in my analysis of the proposed hospital affiliation. While I do not have data to assess directly from where each physician associated with each group draws his or her patients, based on my experience, I believe that geographic markets for most physician services are no broader than, and may be narrower than, those associated with hospital services. Therefore, I focus my assessment on whether the two groups have physician offices that are located in the same county.

²² Intervenors’ Petition, at 2.

²³ Yale-New Haven Health Services Corporation, Lawrence and Memorial Corporation, “Affiliation of Lawrence + Memorial Corporation with Yale New Haven Health Services Corporation, Docket Number: 15-32033-CON, Responses to Completeness Questions - 2nd Letter,” March 30, 2016, at 868.

I perform my analysis at the specialty level. While patients may, on occasion, choose physicians in different specialties to provide care for the same condition, this is relatively uncommon.²⁴ Moreover, the market conditions affecting different physician specialties may vary considerably.

The only county-level overlap between L&MPA and the physician component of Yale New Haven Health occurs in cardiology in New London County. In this county, L&MPA employs eight cardiologists, while 11 are associated with Yale New Haven Health. The two groups largely complement each other (rather than closely competing with each other) in the cardiology services that they offer. Reflecting the difference in services provided at the respective hospital employers of these physicians, most of the L&MPA cardiologists practice general cardiology, while many of the Yale New Haven Health physicians offer subspecialty cardiology services such as nuclear or interventional cardiology. Moreover, an affiliation already exists between the two cardiology groups. Several of the Yale New Haven Health-affiliated cardiologists see patients in New London and Waterford pursuant to an agreement between Yale New Haven Health and L+M. The combination of the two groups will strengthen this preexisting arrangement, thereby allowing more seamless integration of physician services for patients in New London County.

VII. THE COOPER ET AL. STUDY OF HOSPITAL PRICES IS NOT RELEVANT TO THE ASSESSMENT OF THE PROPOSED AFFILIATION BETWEEN YALE NEW HAVEN HEALTH AND L+M

The Price Ain't Right? Study has received substantial attention since its release in December 2015. For example, Dr. Cooper, one of the study's coauthors, testified to The Connecticut Healthcare Cabinet regarding the study's findings.²⁵ *The Price Ain't Right? Study's* most commonly cited finding is that hospitals negotiate higher prices with health plans when they face fewer competitors. However, the authors themselves caution against over-interpretation of their results. Indeed, the authors explicitly note that their "estimates should be

²⁴ One exception is primary care, where I do consider that patients can choose between internal medicine and family practice physicians to obtain primary care.

²⁵ Zack Cooper. "The Price Ain't Right? Hospital Prices and Health Spending on the Privately Insured." Testimony to the Connecticut Healthcare Cabinet Meetings, February 9, 2016 [hereinafter "Cooper Testimony"].

interpreted as associations, not causal effects.”²⁶ That is, their finding of an association between hospital market concentration and negotiated prices for hospital services does not imply that hospital market concentration causes higher prices. For example, it would be incorrect to infer from the study’s analysis that a hospital merger that increased concentration caused prices to rise in its market.

Regardless of the general significance of *The Price Ain’t Right? Study*, it has no relevance to an assessment of the competitive effects of Yale New Haven Health’s proposed acquisition of L+M. As I noted earlier, L+M Hospital is almost 50 miles in driving distance from Yale New Haven Hospital. *The Price Ain’t Right? Study*, on the other hand, assesses the association between the number of hospitals within a 15-mile radius of a particular hospital and that hospital’s prices, *i.e.*, it focuses on hospitals that are more than three times as close as are L+M Hospital and Yale New Haven Hospital.²⁷ That is, the findings of *The Price Ain’t Right? Study* simply have nothing to say about the effect of the proposed affiliation between Yale New Haven Health and L+M, the main and closest hospitals of which are separated by almost 50 miles.

VIII. CONCLUSION

For all of the reasons that I discuss in this pre-filed testimony, it is my opinion that the proposed affiliation of L+M and Yale New Haven Health will benefit the citizens of Connecticut (and Rhode Island) by improving quality, accessibility, and cost effectiveness of health care services. The expected benefits of improving quality of service and achieving cost savings cannot happen absent the proposed transaction. It is also my opinion that the proposed affiliation will not provide Yale New Haven Health with any increase in market power and therefore will not negatively impact the diversity of health care providers, patient choice, health care costs or accessibility to care. As a result, the Intervenor’s concerns that the affiliation will lead to higher prices are unfounded. Quite the contrary, it is my opinion that the affiliation will allow health care services to be more affordable. Finally, findings from the study coauthored by Dr. Zack

²⁶ *The Price Ain’t Right? Study*, at 25.

²⁷ While the study does consider “markets” defined based on alternative radii from a hospital, the largest distance it evaluates is 30 miles, still less than two thirds of the distance between L+M Hospital and Yale New Haven Hospital.

Cooper, "The Price Ain't Right? Hospital Prices and Health Spending on the Privately Insured" have no relevance for the competitive assessment of this transaction.

I adopt this pre-filed testimony as my own.

Wesleyan University

Dr. Noether specializes in antitrust analysis and other competitive issues related to the health care industry for law firms, professional associations, government agencies, and other clients. She has analyzed dozens of hospital and health plan mergers as well as competitive disputes between different players in the health care sector. She is also expert in public and private sector provider reimbursement policies. She has provided expert testimony in antitrust and reimbursement litigation, analyzing class certification, merits, and damages questions. While she is best known for her work in the health care industry, she also has broad general expertise in all aspects of antitrust analyses. She has also worked on matters involving insurance, pharmaceuticals, software, retailing, wholesale, distribution, music, soft drinks, and energy.

Dr. Noether has also served in several senior leadership positions at CRA, including as Chief Operating Officer from 2009 to 2012. Prior to joining CRA 20 years ago, Dr. Noether served as a managing vice president at Abt Associates, where she specialized in federal reimbursement policy for hospitals and physicians and in antitrust issues. She also spent several years at the Federal Trade Commission as a deputy assistant director in the Bureau of Economics and Commissioner Advisor.

Professional experience

Antitrust

Antitrust litigation. Dr. Noether has provided economic analysis to various cases involving allegations of attempted monopolization, supracompetitive pricing and monopsonistic purchasing, exclusive dealing, boycotts, or tying for a variety of healthcare services. Cases have involved physicians, hospitals, ambulatory facilities, health plans, pharmaceutical products, medical devices and clinical laboratories across a variety of health care segments such as radiology, anesthesia, cardiology, dental services, women's health, dialysis, and trauma, among others. Dr. Noether has also assessed similar economic issues in a variety of other industries: retailing, wholesale distribution, software, and chemicals. She has provided deposition and trial testimony in a variety of these matters on class certification, liability, and damages questions.

Hospital mergers. Dr. Noether has analyzed the economic effects of dozens of proposed hospital mergers all over the country, including issues related to market definition, nature of existing competition, ownership structure, scale and scope requirements for hospitals to engage in meaningful risk bearing and delivery of population health, and importance of network development to payment reform initiatives. She has testified in federal district court and/or been deposed in a variety of hospital merger cases in federal district court, including the Federal Trade Commission's challenge of the consummated merger between Evanston Northwestern Healthcare and Highland Park Hospital and the FTC's challenge of the proposed acquisition of Rockford Health System by the OSF Healthcare System (on behalf of the hospitals).

Health plan mergers. Dr. Noether has assessed the likely competitive effects of several health plan consolidations. She has provided expert testimony to state departments of insurance in some of these matters. In some, such as Aetna's purchase of Prudential; United's acquisitions of Oxford, PacifiCare, and Sierra; Humana's acquisition of CHA; and Anthem's acquisition of WellPoint; she has prepared white papers for and made presentations to federal and/or state antitrust authorities. Issues have included definition of the appropriate product and geographic markets for antitrust analysis, assessment of the likelihood and sufficiency of entry or expansion by competitors, and the potential for the exercise of monopsony power over providers. She is familiar with the variety of databases useful to these efforts.

Other mergers. Dr. Noether has evaluated the effects of mergers proposed in a variety of industries, including clinical laboratories, pharmaceuticals, medical devices, physician services, disability insurance, soft drinks, supermarkets, energy, chemicals, recorded music, and building materials. Each of these analyses has required assessment of market definition, entry conditions, and the impact of unique industry conditions on competition among market participants. In some cases, Dr. Noether has been involved in presentations to state or federal antitrust agencies.

Policy issues. Dr. Noether has provided research and analysis on a number of important policy issues in health care. She has developed and evaluated models of bundled payment for health care services, designed physician payment methodologies, and assessed the effects of various innovative payment mechanisms. She estimated the costs of proposed legislation that would have allowed physicians the right to negotiate collectively with health plans, and the results of her analysis were widely disseminated to federal and state legislators. She has also been involved in various Certificate of Need proceedings in which she has provided expert testimony on issues relating to competitive impact.

Other litigation

Class certification. Dr. Noether has addressed the economic questions that relate to the issues of predominance and typicality in class certification matters and has provided expert testimony on these questions. Her analysis has focused on whether common interests and methods of assessing harm pertain to all members of putative classes as well as whether, from an economic perspective, the named class members can adequately represent the interests of the class.

Damages. Dr. Noether has constructed and estimated models of the "but for world" that are well-founded in industry and market specifics to assess potential damages or consumer harm that might have accrued from alleged illegal activity. Cases have involved allegations of attempted monopolization and exclusion, underpayments of health care providers, denials of claims, collusion, and delayed entry of generic pharmaceuticals, among others.

Regulatory issues. Dr. Noether has assessed the economic issues arising from various forms of health care regulation, including fair market value provisions of the fraud and abuse laws, Orphan Drug Act, and Certificate of Need statutes. Analysis has focused on the regulations' effects on the economic incentives and behavior induced by the regulation as well as on their likely impact on market competition. She has provided testimony in a number of these matters.

Hospital and physician payment. Dr. Noether has analyzed the economic issues and, in some cases, testified in various matters relating to hospital and physician reimbursement by private and public payers. These have included issues related to out-of-network reimbursement, appropriate payment by Medicaid risk plans, benchmarking of competitive rates, reimbursement of salaried teaching physicians, and Boren Amendment mandates that rates support efficiently operated hospitals.

Physician studies

Medicare physician fee schedule analyses. Dr. Noether was active in all aspects of the congressionally mandated reform of Medicare's physician payment system to reflect a "resource-based relative value" approach. For the Health Care Financing Administration (now CMS), she directed the design of the data collection strategy for measuring physician practice expenses, which relied on national survey data as well as information obtained from clinical panels. She also conducted a variety of studies and data collection efforts on behalf of specific medical specialties (including cardiothoracic, vascular, orthopedic, otolaryngologic, and general surgeons; gastroenterologists, radiologists, pathologists, and nuclear medicine physicians) to assess the effects of the proposed reforms of practice expense reimbursement as well as of the work and malpractice components of the Medicare Physician Fee Schedule. In other fee-schedule-related work, Dr. Noether also assisted in the development of the methodology used to update and reevaluate the work component of the fee schedule, evaluated the effects of volume performance standards, and assessed the visit patterns associated with global surgical fees.

Forecast of staffing requirements in various specialties. Dr. Noether assessed current utilization of anesthesiology, nephrology, oral, and maxillofacial surgery, critical care staffing in different settings, and projected requirements in future years based on anticipated demographic and technological changes and the influence of health care reform. She compared projected requirements and supply to estimate training needs.

Development of bundled surgical episode payment options. Dr. Noether developed design and implementation options for lump-sum prospective payment of all services associated with a surgical episode. She analyzed particular procedures (cataract extraction, cardiac surgery) to determine options for episode definition, risk stratification, payment mechanisms, and other design and implementation features.

Hospital studies

Development of estimates of effect of new technologies on hospital costs. Dr. Noether developed the annual estimate of the scientific and technological advance allowance presented by the Prospective Payment Assessment Commission (now MedPAC) to Congress as part of its recommendation regarding payment updates for hospitals and dialysis facilities. The project involved collecting cost and diffusion data on cost-increasing, quality-enhancing technologies.

Analysis of factors contributing to growth in outpatient surgery. Dr. Noether evaluated factors that explain switch from inpatient to outpatient setting for five outpatient surgical and diagnostic procedures. Changes in technology, reimbursement, and clinical risk were assessed through literature review and structured interviews with clinicians and medical device manufacturers.

Hospital prospective payment system evaluations. Dr. Noether conducted various economic analyses of the effects of federal and state prospective reimbursement programs on utilization, quality, and cost of hospital services as well as on medical education provided by hospitals. She also designed and evaluated a prospective ambulatory reimbursement system.

Outcomes research

Practice guideline development. Dr. Noether assisted a specialty society coalition in developing an AHCPR-funded guideline on colorectal cancer screening. She coordinated a comprehensive literature review and analysis of the resulting data and convened an expert panel.

Profiling of hospitals and physicians for managed care plan network development. Dr. Noether implemented a scoring system to evaluate hospitals and physicians on the quality and efficiency of care they provide for possible inclusion in a point-of-service managed care plan. The system involved the use of discharge and claims data in scoring algorithm designed to rank medical providers.

Previous professional experience

- | | |
|-----------|--|
| 1987–1996 | <p><i>Managing Vice President and Area Manager of Economic Consulting to Healthcare Organizations, Senior Economist, Abt Associates Inc.</i></p> <p>Dr. Noether developed a new practice of health economics consulting to private clients on policy issues. She also directed a variety of publicly funded research initiatives.</p> |
| 1983–1987 | <p><i>Deputy Assistant Director, Staff Economist, Antitrust Division, Bureau of Economics, Federal Trade Commission</i></p> <p>Dr. Noether analyzed economic consequences of various actions subject to antitrust scrutiny, including mergers in various industries, price fixing, group boycotts, and other horizontal restraints. She was particularly active in investigations of competitive practices of various members of the health care industry. She served as lead economist on the Commission's investigation of various acquisitions in the soft drink industry; she also supervised and worked</p> |

on investigations of mergers in the oil, polyester, recorded music, and supermarket industries. In addition, she supervised several staff economists.

As part-time economic consultant to Commissioner Azcuenaga, Dr. Noether advised the Commissioner on specific cases before the Commission and on general economic theory. She also advised the Commissioner on acquisitions in chemical, natural gas, and other industries.

1979 *Research Associate*, Office of Domestic Policy Coordination, US Department of Commerce

Dr. Noether prepared briefings to the Secretary on various policy issues.

1974–1978 *Administrative Positions*, American Association of Psychiatric Services for Children and the American Psychiatric Association

Dr. Noether was responsible for federal lobbying activities as well as management of Associations' finances, meetings, and newsletter editing.

**STATE OF CONNECTICUT
DEPARTMENT OF PUBLIC HEALTH
OFFICE OF HEALTH CARE ACCESS**

AFFILIATION OF LAWRENCE + MEMORIAL CORPORATION WITH YALE-NEW HAVEN HEALTH SERVICES CORPORATION : **DOCKET NO. 15-32033-CON**
: **July 11, 2016**

PRE-FILED TESTIMONY OF MARNA P. BORGSTROM, PRESIDENT AND CHIEF EXECUTIVE OFFICER OF YALE-NEW HAVEN HEALTH SERVICES CORPORATION AND CHIEF EXECUTIVE OFFICER OF YALE-NEW HAVEN HOSPITAL

Good afternoon, Attorney Hansted, and staff of the Office of Health Care Access (“OHCA”). My name is Marna Borgstrom and I am the President and Chief Executive Officer of Yale-New Haven Health Services Corporation and Chief Executive Officer of Yale-New Haven Hospital. I appreciate having this opportunity to speak with you today and convey my many reasons for recommending to OHCA that it approve the above-referenced application to affiliate L+M Corporation (“L+M”) with Yale-New Haven Health Services Corporation (“YNHHSC” known as “Yale New Haven Health”) (collectively, the “Applicants”).

I believe that it is important for OHCA to know and understand that the proposed affiliation between L+M and Yale New Haven Health is a value-driven affiliation designed to improve access to health care, enhance the quality of care, and reduce costs through scale. Quite simply, the objective of the proposed affiliation is to meet policy and consumer expectations for greater value in the delivery of healthcare services.

CULTURE & HISTORY OF SUCCESSFUL AFFILIATIONS

Our culture and philosophy as an integrated healthcare delivery system is neither driven by a desire to grow for growth's sake, nor to reduce healthcare services in the communities served by the affiliated hospitals for the sole purpose of referring patients to Yale-New Haven Hospital. Rather, if one looks at the evolution of our system over the last twenty years, they will observe that our hospital affiliations have yielded very positive results and benefits to its system member hospitals, and most importantly, the communities served by each of our hospitals.

In 1996, Bridgeport Hospital joined Yale New Haven Health, and then two years later in 1998, Greenwich Hospital affiliated with Yale New Haven Health. It was approximately fifteen years later in 2012, that Yale New Haven Hospital acquired the assets of the Hospital of Saint Raphael ("HSR"). Each of these organizations and their communities, as well as the founding hospital – Yale-New Haven Hospital – have benefitted from their participation in Yale New Haven Health.

For example, early on Bridgeport Hospital was a struggling organization that was losing money, losing physicians, losing patients and losing ground. Located in the heart of the City of Bridgeport, it was the primary provider of care to medically indigent patients in that region. With new leadership and support from Yale New Haven Health, Bridgeport Hospital was able to turn things around to become a leader in its service area. It has enhanced the depth and strength of its medical staff, its patient satisfaction rank in the State has improved from being 29th to 12th, its employee engagement has grown from 50% to 90%, physician satisfaction is up to 81% from 20%, cash on hand has

grown from 84 to 110 days, and emergency department visits are over 92,000. In addition, as a member of Yale New Haven Health, Bridgeport Hospital is now home to Yale-New Haven Hospital Children's Hospital, a vibrant heart and vascular center, the Smilow Cancer Hospital, and a number of other innovative clinical programs that have benefitted patients and the surrounding communities tremendously. The same is true of Greenwich Hospital, as it and the surrounding community and patients too have benefitted from greater efficiencies, clinical linkages with Yale-New Haven Hospital and access to our best and most successful programs in the areas of cancer care, heart and vascular care, and pediatric specialists to name a few.

The acquisition of the Hospital of Saint Raphael ("HSR") by Yale-New Haven Hospital in 2012 also has been a success with very positive and measurable outcomes. Specifically, 3,000 HSR employees remained employed with enhanced job security and wages and benefits; an aging physical plant was rejuvenated with more than \$100 million in infrastructure investments made (e.g., installment of Epic, replacement of chillers, generators and patient beds, investment in new technologies, innovations on patient care units and in the operating rooms); clinical programs were developed and those already in existence, strengthened; and, \$250 million dollars in cost savings (versus the targeted \$198 million) were achieved. At the same time, Yale-New Haven Hospital obtained much needed additional inpatient capacity and was able to avoid the \$400-700 million dollar cost associated with the construction of a new patient tower. By all standards, the HSR story is a success story, and has been recognized as such by national organizations

such as the Advisory Board.¹ We are confident that L+M can experience similar success.

ADDING VALUE

Yale New Haven Health's goal is to add value to our system members and enhance access to the most vulnerable people in our community, along with becoming a world-class destination healthcare system. Coordination of care and enhanced delivery points of care to patients will help us achieve all of our goals relating to access, reduction in costs and enhancement of value. As to the benefits that this proposed affiliation will have for L+M, I will not waste OHCA's time today by repeating the testimony provided to you by Mr. Bruce Cummings and Dr. Ross Sanfilippo. However, I do want to take this opportunity to stress to OHCA once again that: (1) health care reform requires that hospitals reduce costs, improve value, coordinate care, and manage risk-based payment; and (2) if this Application is not approved, I worry that L+M and the patients and communities it serves will face disruption, instability and reduced access to care.

MISCONCEPTIONS REGARDING OUR AFFILIATION

It is important to note that our approach to governance is community driven and decentralized. In other words, the primary responsibility for services provided by our system members rests with the member hospitals. Our corporate focus is not one of control, but of creating a unified system strategy, enhancing performance, setting standards for quality and value, and achieving cost reductions through economies of scale. Thus, despite assertions to the contrary, our hospitals are governed locally, and their respective fiduciary boards are accountable for their hospital's service and

¹ See Exhibit A attached hereto.

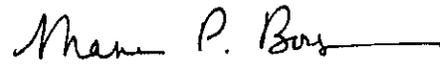

operations, including the provision of high quality and safe clinical services, unique service area strategies, nurturing a high quality medical staff and achieving performance benchmarks commensurate with the Yale New Haven Health brand.

There have been those who have cited our size as a system as a potential concern. Let me address that directly. Nationally speaking, Yale New Haven Health is modest in size. We are not even among the 40 largest systems in the nation. However, our competitors such as New York Presbyterian, Northwell and Partners are all in that group. It is not our goal, interest, desire or objective to drive up costs or increase prices for consumers. We do not negotiate rates as a system, but rather each hospital has its own cost structure and prices that serve as the basis for negotiations. With a commitment to bringing greater value and assuming risk, as stated by Dr. Noether, it is counterintuitive to think that we see logic in raising costs and charges. What we want to raise is the standards for quality, safety and patient experience and through that, we will bring added value, which today is essential for any health care organization to not only survive, but thrive. We will all succeed if L+M is financially stable and vibrant.

OHCA is tasked with the statutory mandate to evaluate proposals against certain statutory guidelines. We believe that this affiliation satisfies all of these guidelines, including advancing everyone's goal of increasing access to high quality care in the most efficient and cost-effective manner possible. Moreover, and given what you have heard from Mr. Bruce Cummings and Dr. Sanfilippo today, I believe that if this Application is delayed or denied, the opportunity for Yale New Haven Health to make a positive difference may be diminished, or worse, lost. Put simply, the alternative to this

Application may be the eventual closure, reduction and or termination of services, lost jobs, and reduced access to care. Accordingly, I urge OHCA to approve this Application.

I adopt this pre-filed testimony as my own.

Yale New Haven Health System's Execution of Hospital of Saint Raphael Integration

Success Built on Strong Planning Foundation

Identifying Leadership, Top Priorities First Step

Integration Leadership Selected from Yale New Haven Hospital

Yale New Haven Hospital President chosen to lead integration efforts

Supported by Leadership Team at YNNH¹ and HSR²

Created 12 planning teams to develop 41 specific transition plans

Selected Transition Task Teams

1. Employee Transition
2. Finance/Operations
3. Marketing/Communications
4. Labor Contracts

Top Integration Work Plan Priorities

- 1** *Uninterrupted Patient Care*
 - ✓ Transporting patients between campuses
 - ✓ Continuing care plans through transition
- 2** *Benefits & Compensation*
 - ✓ Centralizing payroll system
 - ✓ Enrolling staff in single benefits plan
- 3** *Supply Chain*
 - ✓ Streamlining supply orders
 - ✓ Centralize receiving process
- 4** *Billing & Collections*
 - ✓ Combine patient bills from two organizations
 - ✓ Prevent disruptions in reimbursement, denials work

1) Yale New Haven Hospital.
2) Hospital of Saint Raphael.

Hard Work of Integration Started Early

Staff Given Roles for Integration, System Develops Tracking Mechanisms

Assigning Responsibilities

Collaborative workshops solicited input from staff on potential integration issues

3,400 staff transitions from Hospital of Saint Raphael to Yale New Haven employees

Service closure duties delegated to service line leaders

Tracking Progress

Centralized dashboard created to track deadlines and progress on organizational goals

Employee tracker matched existing staff with future roles, identified overlapping duties

Contract management reassigned vendors to central supply chain office

Each Service Evaluated on Strategic Considerations

Non-negotiable Principle: Zero Tolerance for Redundancy

Strategic Considerations for Rationalization of Services

Matching access and capacity to historical volumes

Rationalization Actions Based on Strategic Considerations

Analyzed OR procedural volumes to determine appropriate locations

Opportunity for growth in new and existing service lines

Invested in services with high forecasted demand to create care destinations

Regulatory issues with FTC, State Attorney General, CMS

Required zero duplication of new services or technologies at two sites

Culture of clinical and non-clinical staff constituencies

Created single medical staff, evaluated clinical need at sites

Religious directives for Hospital of Saint Raphael (Catholic Church)

Respected Ethical and Religious Directives for Catholic Health Care at Hospital of Saint Raphael

Something for Each Side

Clinical Campus Configuration of Yale New Haven Hospital

Service Allocation Post-Acquisition of Hospital of Saint Raphael

York Street Campus	Both Campuses	Saint Raphael Campus
Children's Hospital	Behavioral Health	New Musculoskeletal Center
High-Risk Obstetrics	Emergency Services	Low-risk, High Amenities Obstetrics
Major Trauma	General Medicine	Specialty Geriatrics Care
Transplant	Heart & Vascular	Specialty GI Surgery
Cardiac Surgery	Neurosciences	Neurovascular
	Oncology	Medical Heart Failure
	Urology	
	Women's Services	

Nothing Possible Without Physician Support

Concrete Benefits Bring Physicians on Board

Tactics for Achieving Physician Buy-In During Integration

Facilitated physician focus groups to discuss data-driven decisions on service rationalization

Established new Musculoskeletal and Restorative Care Centers; planning Centers of Excellence for bariatrics and neurovascular services

Renovated facilities and invested in new equipment at Hospital of Saint Raphael to improve quality of care

Offered medical staff membership to all physicians at Hospital of Saint Raphael to join Yale New Haven Hospital staff

4.9%

Percentage decrease in cost per case after acquisition

\$80M

Savings after one year as a result of consolidation

\$300M

Projected five-year reduction in clinical, operational costs

Structural Advantage: Yale New Haven Health System

Balancing Growth and Service Rationalization

Lessons from Yale New Haven Health System

- 1** Asset density creates opportunities for footprint redesign.
- 2** The assignment of responsibility for executive disruptive change should preserve both local and system-wide perspectives and authority.
- 3** Organization-wide information and analytics both reveal opportunity and support implementation.
- 4** Tangible, concrete displays of the benefits of disruptive change signal good faith and engender support among the most disrupted parties.

TESTIMONY to the Office of Health Care Access
July 1, 2016

Re: CON application regarding acquisition of Lawrence & Memorial Hospital and its physicians' group by Yale-New Haven Health System

Ellen Andrews, PhD, Executive Director

My name is Ellen Andrews. I reside at 49 Wilkins St., Hamden Connecticut. I am Executive Director of the Connecticut Health Policy Project. I'm here today to urge OHCA not to approve the application of Yale-New Haven Health System to take over Lawrence and Memorial Health.

We are in the midst of enormous transition in our health care system. The Affordable Care Act has enabled 16 million Americans to gain health insurance coverage, and covered thousands of Connecticut's previously uninsured residents. The ACA offers ongoing incentives and supports to help our state get coverage for the remaining 250,000 uninsured that live in Connecticut.

But not all the news is good. The continued consolidation of providers and insurers is driving an ongoing cost spiral that threatens to undo much of the positive change that we've seen in the past few years. . Dr. Hyde has described the overwhelming body of research demonstrating that as competition is drained from our health care system, costs inevitably go up, and consumers lose choice.

The Connecticut Health Policy Project is particularly concerned about the impact of these trends on low income and underserved communities, the state budget and the growing trend of underinsurance among those with private coverage.

Connecticut has received national recognition for its work reining in Medicaid costs.¹ We are the only state to take back Medicaid recipients from private managed care plans and negotiate provider rates ourselves. That decision and resulting reforms has reduced per member costs, increased the number of physicians participating in the Medicaid program, and reduced emergency room visits. More people covered for less money seen by more providers and better quality care in the appropriate setting. Sounds like a win.

But it hasn't been enough. Underlying provider prices are destroying access to care for many in our state. Due to budget constraints, 11,677 working parents are losing HUSKY coverage at the end of this month. Medicaid beneficiaries in high cost areas like New Haven still struggle to get appointments. HUSKY families "transitioning" to coverage in AccessHealthCT insurance plans, our state's health insurance exchange, are expected to meet a \$500 deductible and spend 10-12% of their income on health care. Enrollees in AccessHealthCT plans face enormous

¹ Melinda Beck, "Connecticut Moves Away From Private Insurers to Administer Medicaid Program," *Wall Street Journal*, March 18, 2016. <http://www.wsj.com/articles/connecticut-moves-away-from-private-insurers-to-administer-medicaid-program-1458325696>

deductibles as subsidies decrease up the income scale. Even workers with decent jobs are increasingly stuck in cost-prohibitive plans. Nearly a quarter of workers are in high deductible plans, up from just 4% in 2006. According to the Kaiser Family Foundation deductibles have increased at nearly seven times the rate of workers' earnings.

Some policymakers insist that high cost sharing is necessary to reduce excess utilization. But utilization isn't really our main problem. Despite progress, Medicaid members, the remaining uninsured and the growing ranks of underinsured state residents still struggle to access recommended care. The US has the highest health care costs by far in the world – we spend twice as much per person on average as the rest of the world, and nobody spends even three quarters as much as we do. Except for Switzerland, we already have the highest out of pocket costs. So if out of pocket costs are the solution, why isn't the problem solved?

As Dr. Hyde's literature review shows, our problem is price, not utilization, and monopoly creates a disaster for prices. Jason Pelletier's testimony contains a shocking fact – workers at a corporate cafeteria run by a global food service company serving food to workers at one of the most profitable companies in the world are forced to go without health insurance or be covered by state assistance programs because their premium share is too high. Shame on those employers, but let's not kid ourselves. Employers are fighting with workers over premiums because underlying provider prices are forcing them to.

And when you lose your coverage, or your deductible goes up to five thousand dollars, what happens? You go to the doctor, and, now that the hospitals are buying up all the doctors, you get charged a facility fee for the privilege of seeing a new sign on your doctor's office door. You find yourself choosing between rent, food, and the electric bill for your family or going to the doctor for yourself.

To approve this CON, OHCA must look the public in the eye and say "Yale is different." Unlike all the other giant monopolies, Yale will throw away its monopoly bargaining advantage and keep prices low. Or you must say "New London County is different." For some reason Yale won't buy up all the doctors the way they have in the New Haven area.

No one can take those arguments seriously. One of the few things that Yale's proposed \$300 million investment clearly identifies as a specific priority is physician recruitment. To most of us, that suggests recruiting neurologists to move to New London so that telemedicine visits or an hour's drive to New Haven aren't patients' only options. But Yale's past behavior in the New Haven area suggests that money is earmarked for physician practice acquisitions – which means more market power, more facility fees, higher prices and people skipping needed care because of cost.

Perhaps the most telling passage in the CON can be found on page 34. Asked how "low income persons, racial and ethnic minorities, disabled persons and other underserved groups" will benefit from the proposal, YNHHS replies that L+M and YNHHS provide services to the uninsured, underinsured and all patients regardless of race, ethnicity, income or ability to pay. "That will not change as a result of this proposal."

The proposal offers no visions for improvement of services to underserved populations save for the general clinical benefits presumed to accrue to all patients. One must assume that this, like so many other specifics, would be left to the post-acquisition strategic planning process to decide. The rest of us are supposed to wait and hope.

As a member of the Governor's Health Care Cabinet, I view this proposal as the leading example of one of the most dangerous trends in health care, and one of the few key issues we must grapple with to set Connecticut on course

for an accountable 21st Century health care system. I urge you not to rule on this application until my colleagues and I, and our counterparts on the Certificate of Need Task Force have completed our recommendations. If you must rule before that, you must deny the application. Without dramatic changes to address the issues of access, price and quality within a framework of true accountability to the community and protections for underserved and at-risk residents, you must deny it whenever it ripens for decision. There is no public need for this deal and very great risk to state residents and the state's budget.

Pre-file testimony from Stephen R. Smith, M.D., M.P.H.

My name is Stephen R. Smith, M.D. I am a professor emeritus of family medicine at the Warren Alpert Medical School of Brown University. I live in New London.

I am a family physician working at the Community Health Center of New London. I also speak on behalf of the National Physicians Alliance in Connecticut. This group includes physicians from a variety of different specialties who serve on the medical staff and/or work as community-based physicians who refer their patients to either Yale/New Haven Hospital or Lawrence and Memorial (L+M) Hospital.

I am also speaking on behalf of the Universal Health Care Foundation of Connecticut in my capacity as a member of the board of directors of the Connecticut Health Advancement and Research Trust (CHART), the parent organization of the foundation.

I am a lifelong resident of New London residing at 899 Montauk Avenue and have served on the medical staff at Lawrence and Memorial Hospital in the past.

The initial position that the Office of Health Care Access should take when considering any hospital merger or acquisition is that such mergers are not in the best interest of the public and should be denied. As our testimony has previously shown, hospital mergers are, by their very nature, anti-competitive and generally lead to higher prices without concomitant improvements in efficiency, quality, accessibility, or accountability. Mergers and acquisitions should be permitted *only* when convincing evidence has been presented demonstrating that no other means is available to achieve the purported goals of the merger that would serve the community's interests in preserving high-quality, affordable, and accessible health services.

The proposed acquisition of L+M by Yale/New Haven Health Services Corporation does not demonstrate any compelling public interest, or evidence suggesting a public good.

Close clinical coordination and cooperation is already achieved between the two institutions and with health care providers in the community without the benefit of formal acquisition.

As a family physician working in an independent community health center in New London, I already have instant access to the L+M computers to obtain laboratory data, x-ray reports, emergency room reports, and hospital discharge summaries on my patients. If a patient of our health center is seen in the emergency room at L+M, procedures already exist that allow the emergency physician to schedule a visit for the patient with us within 24 hours. Yet our community health center and L+M are separate, independent entities.

I already have excellent relationships with the specialists at Yale/New Haven, many of whom have office hours at L+M for the convenience of our patients. Yale/New Haven specialists have often called me on the telephone to discuss mutual patients with serious vascular problems and pulmonary conditions. At their behest, I have seen the patients and ordered tests and managed their conditions in between visits to the specialists in New Haven. All of this is done without the need for one hospital to “own” the other, especially given all of the bad results from such ownership.

The neonatal intensive care unit at L+M is already staffed by Yale/New Haven neonatologists. The NICU staff already arrange for babies to be seen within 24 hours at our community health center following their discharge. This occurs without the necessity of L+M being owned by Yale/New Haven.

This and other evidence demonstrates that close clinical coordination and cooperation already exists between L+M and Yale/New Haven. This clinical coordination already exists between Yale/New Haven personnel and community health providers in the New London area. The formal acquisition of L+M by Yale/New Haven is neither required nor justified to achieve clinical goals—that is, to serve our patients.

Should the Office of Health Care Access nevertheless consider approval of such an acquisition, it must condition such an acquisition on agreement by both parties to stipulations that would safeguard health care services in Southeastern Connecticut. These stipulations should be in force for at least 10 years and would include:

- Retaining existing health services in the New London community and not outsourcing them to other Yale hospitals or relocating them to more affluent communities in the L+M service area
- Freezing the prices charged and negotiated by L+M to existing levels with annual increases no greater than the Consumer Price Index
- Ensuring help with any transportation for health care that has to be delivered at another hospital
- Expanding health services to Southeastern Connecticut by fully funding and implementing all the recommendations emanating from the 2016 Community Health Needs Assessment conducted by L+M and the Ledge Light Health District
- Requiring that L+M and Yale/New Haven negotiate with a representative cross-section of the community a written Community Benefits Agreement with binding commitments enforced by an independent monitor on the issues of access, affordability, community benefits, efficiencies and jobs
- Assuring that L+M Hospital remains under the control of a locally controlled and locally elected Board of Directors with decision making authority and accountability to the community.

The Office of Health Care Access must consider this proposed acquisition in the context of the entire state's health care system. Consolidation of the health care system is not in the best interests of patients or communities. Consolidation weakens accountability to the communities these hospitals serve. Consolidation erodes competition and innovation, increase costs, and provides little or no additional benefits in terms of quality, safety, or accessibility.
