I urge the Office of Health Care Access to deny the proposals to transfer ownership of L+M to Yale/New Haven Health Services Corporation and the merger of L&M Physician Association, Inc. into Northeast Medical Group, Inc.

Stephanie Johnson, RPSGT
President, AFTCT Local 5051 LPN/Technologists

Pre-filed Testimony
July 1, 2016
Office of Health Care Access

My name is Stephanie Johnson and I am the president of AFTCT Local 5051 which represents more than 270 LPN's and Technologists at Lawrence Memorial Hospital. I am a 15 year employee, the last 13 years being in my current position as a polysomnographic technologist and a resident of East Lyme. Today I am here to ask you, Office of Health Care Access, to follow Governor Malloy's directive to hold off on this takeover of Lawrence Memorial Hospital by Yale New Haven Hospital.

As a caregiver in the hospital and as president of the union, I have seen many changes and understand that sometimes change is necessary. In this instance I would say that not only is this change for the sake of change but also the changes that are made can be devastating to our community. I have reservations about many things but primarily I am concerned about access to the quality care that we provide. I think it is irresponsible for a community hospital to not be there for the region we are supposed to be here to care for. The story has already played out in Windham, how long before it reaches New London and Westerly?

I was at a meeting held jointly by L&M and Yale recently and heard for myself from Bruce Cummings, CEO of L&M Hospital that Westerly Hospital does not have the physical footprint that the hospital needs to do inpatient and outpatient services. As an employee of the New London hospital, which is also land locked and has constraints that might prevent future growth, how long until we are told that the services we provide are not going to continue. How far will our patients have to travel to receive care? I am not just a care giver but I also utilize the hospital for my care. I was born at Lawrence and Memorial Hospital, gave birth to my son there and have said final good byes to close relatives who died there. I cannot imagine having to drive to Yale to visit a sick family member and more importantly, I cannot imagine how our patients who may not have the benefit of transportation and rely on public transportation will get there.

Decisions about which services will be kept at both campuses will be made by Yale. We are asking for assurances that services for our patients will not be made by a board that seeks to fatten the already large pocket of Yale New Haven's system, as there will no longer be any viable competition which. That means reduced patient's choice to seek care at a lower cost. I have personally read the bylaws changes in the Certificate of Need and have seen the handover of control to Yale. When I asked about it, I was not taken seriously and told "Oh those are just words written in the contract." Luckily, I know how to read contracts.

We were surprised to see Yale and L+M say that L+M lacks the financial and clinical resources to run the programs necessary to take care of our community. We've watched management spend \$17 million dollars that could have gone to take care of people in Greater New London on strikebreakers, lawyers

and other expenses to lock their workers out of their jobs. We've watched management spend \$35 million dollars to buy an unprofitable hospital out of bankruptcy. We've watched management spend more \$78 million of our hospital's profits subsidizing the growth of its physician practice, and now Yale-New Haven says the combined NEMG/LMPA practice will run \$70 million a year in losses.

All of that money could have, and should have gone to strengthening our hospital's clinical programs. Instead, we see staffing cuts, the first of what may be many. In the CON, Yale-New Haven says it doesn't have any planned service cuts, but it may reduce "duplicate" services in the future. We are concerned that the duplicate services may simply be the profitable services, which will be extracted from the hospital and placed far from New London, where poorer patients and those who need help with transportation will struggle with access.

When you look at this proposal, make sure you ask what Yale's goals will be. We've already lived under management that thought they were building a small empire. Now the biggest empire in the state wants to take over.

We are asking that services be made available to this community in this community. We are asking that the community be made aware of who will be in control of these services. We are asking that any promises be guaranteed, in writing, with enforcement and oversight by the community. We are asking for you, Office of Healthcare Access to slow down this process. If, after all is said and done, and the bodies that Governor Malloy put in place to look into the laws that govern deals like this find that our concerns are not necessary, we can start a new conversation about the future of L+M, Yale and our health care system. Please allow the process to be followed, and give us time so that all questions can be asked and answered—truthfully.

Pre-filed testimony of Jason Pelletier

Office of Health Care Access

Docket #s 15-30233 CON and 15-30233, Acquisition of L+M Health Care by Yale-New Haven Health Services Corporation and Merger of Lawrence and Memorial Physicians Association into Northeast Medical Group

June 30, 2016

My name is Jason Pelletier. I live at 28 E Street, Groton Connecticut. I am a cook in the cafeteria at Pfizer in Groton, and a shop steward for UNITE HERE Local 217.

I am now almost 49 years old and have always been in great health until last year, when I contracted Lyme disease. After a run of antibiotics, all was well until symptoms started to recur this year.

My health care coverage is very important in order to cover costs of recurring doctor visits and prescriptions. I am also concerned about having adequate health coverage as I get older and have more health issues.

We are in in contract negotiations with our employers. So are 7 other corporate cafeterias in Connecticut that are operated by Compass, including our brothers and sisters at Electric Boat. We pay 20% of our premiums now, and are trying to reduce that percentage at the bargaining table.

The cost of employees' share of the premiums went up by 10% last October. That means that everyone who had coverage had a big bite taken out of the raises that we negotiated with our employer. We have a really good health plan and have fought to keep costs down, but I have coworkers who are uninsured or on state assistance because they can't afford the premiums.

Before I talk about Yale taking over our hospital, I want to tell you how hard our union works on health care costs. Our health plan, UNITE HERE Health, is run jointly by our union and employers in our industries. Workers in our union take leave from their jobs for several weeks to educate their coworkers and help them sign up for a primary care doctor and get their biometric tests so that they can work with our health plan to improve their health and avoid going the hospital. We have run a union-wide education program to educate our coworkers on how to tell the difference between a health care problem and a real emergency, and to use Urgent Care or see their doctors instead of the Emergency Room, unless they really need to go. As a steward, I'm trained to help my coworkers use health care the right way, and to help them connect with our health plan if they have problems.

But that won't matter if prices for hospitals and doctors go up because Yale takes over our hospital. Even if we convince our employer to lower the percentage of the premiums that we pay, if the care itself gets more expensive, premiums will go up and we'll be paying what we paid before. Please stop this takeover, or, if it is approved, make Yale-New Haven guarantee in writing that they won't raise prices.

We don't make a lot of money. As a cook, I make \$16.44 an hour, and I'm one of the better paid people in our workplace. I'm fortunate to have full-time hours and a steady paycheck. But none of us can afford

to pay more for health care. Affordable health insurance has always been important to me, but where I'm at in my life now, I can't do without it. Thank you.

**Pre-filed Testimony
July 1, 2016**

Fred Hyde, M.D.
57 Main Street
Ridgefield, CT 06877

A. General Background

- (1) The proposed acquisition of L+M Health Corporation (L+M) by Yale-New Haven Health Services Corporation (YNHHSC) comes at an important moment in the American and Connecticut health care systems.
- (2) The Patient Protection and Affordable Care Act (PPACA) has failed to control the ongoing growth of health care costs.
- (3) In the five years since passage of the PPACA, private sector health care insurance premiums grew at three times the rate of general inflation, faster in relation to inflation than during the five years prior to passage.
- (4) A portion of this increase in health and hospital expense can be *directly attributable to the consolidation of hospitals and health systems*. These consolidations result in:
 - (a) Higher prices through monopoly market position;
 - (b) Inflated expenses resulting from more complex and more generously compensated management, with hospital administration now accounting for 1.43% of the nation's Gross Domestic Product; and
 - (c) Compromise to the integrity of physician judgment when such hospital and health system consolidations include physician practices.
- (5) The burden of these costs falls on the patient, the patients' families, and society, through higher health insurance premiums, higher out-of-pocket payments and compromises to choice and freedom. The Kaiser Family Foundation reports that insurance deductibles grew nearly seven times faster than worker earnings in the five years following PPACA passage.
- (6) This is the background against which OHCA is called upon to evaluate yet another attempt at monopoly acquisition (another hospital by a health system) and consolidation of institutional control over professional judgment through hospital-sponsored medical groups.
- (7) *OHCA's task is non-delegable*. Legal redress opposing or attempting to remedy hospital monopolies has proven to be unreliable: even when "after-the-merger" remedies or checks are in place, inevitable cost increase occurs.

The FTC has allowed the Hart-Scott-Rodino review period to lapse, and the federal government continues to struggle to win cases under antitrust laws.

- (8) OHCA awards a Certificate of Need "franchise" to private corporations which are engaged in publicly funded services: *the award must be based on the public good, not on private gain.*

One state with challenges parallel to those of Connecticut is Massachusetts. Testimony is offered on the applicability of findings from that state to the challenge facing OHCA in this and similar Certificate of Need applications.

B. The Applicants assert these arguments in support of Docket No. 15-32033-CON (**affiliation of Lawrence + Memorial Corporation with Yale-New Haven Health Services Corporation**), and Docket No 15-32032, (**merger of L&M Physician Association and Northeast Medical Group**):

(1) Lawrence + Memorial as a system *does “not have the clinical and financial resources” to “integrate service delivery and assume responsibility for achieving specific quality, cost and service outcomes.”*¹;

a. Lawrence + Memorial only lacks financial resources as a result of empire building and other imprudent management decisions, including:

(i) Expensive attempts to outsource services, and to “lock out” unionized employees performing those services, about which other members of the coalition will provide more detailed testimony;

(ii) The acquisition of the bankrupt Westerly Hospital for a reported price of \$35 million; and

(iii) The extraordinary subsidy of physician practices. The **first attachment** to this document shows the extent to which hospital revenues are generating adequate margins to support operations and maintenance, but are subsidizing physician practice and other “system” losses. Those losses amount to \$78 million over the past five years. The combined new NEMG practice is expected to lose \$70 million per year.

b. In general, not-for-profit hospitals are doing well financially.² In fiscal year 2015 Moody’s reports that not-for-profit hospitals had median annual growth rate of 7.4% and median three-year revenue compounded annual growth rate of 5.6%.

(2) If acquired by Yale-New Haven Health Services Corporation, Lawrence + Memorial as a system would *achieve efficiencies through economies of scale*, and patients will receive *“the right care at the right time and in the most cost effective setting.”*

a. However, evidence provided here (the **second attachment**, a list of peer-reviewed journal articles provided electronically) shows that such economies have not been achieved in similar health system acquisitions in the past, and that consolidation leads to significant price increases and resulting systemic cost growth. Consider these critical examples from a body of literature that grows daily:

i. A comprehensive study by the Massachusetts Health Policy Commission found that market power is the primary determinant of prices in the state,

¹ OHCA Docket 15-32033-CON, p. 25

² Health Care Policies and Trends, *Healthcare Financial Management*, June 2016, Page 18

and that community hospitals provide the same care at much lower price as the dominant system.

- ii. Cooper³ et al studied nearly 4 billion private sector claims nationwide and found that the primary determinant of health care costs is the price of provider services, and that the most powerful determinant of provider price is market power – not quality, not size, not academic status or reputation. Parenthetically, these authors noted that one area of the country with *both* high Medicare and high private commercial health insurance costs is New Haven, CT.
- iii. Gowrisankaran⁴ et al studied data on post-merger pricing and found that separately negotiated prices do not negate the impact of a system's market power. Newly purchased hospitals still gain a price premium.

A new study of leverage in California hospitals⁵ indicates that monopolist health systems took active advantage of their status, leading to steadily increasing price differentials, separating them from non-monopolist hospitals by as much as \$4,000 per discharge.

- iv. The Applicant's own evidence makes this point. The Health Care Cost Institute's report submitted with the application notes that the primary driver of health care cost increases is provider and pharmaceutical pricing.
- b. Despite OHCA's request and the urging of legislators, the Applicants flatly refuse to provide comparative price data between L+M and the YNHHS hospitals. However, original analysis of Medicare payments submitted as part of this testimony shows that, almost uniformly, payments for services at Yale-New Haven (including low acuity services) are significantly higher than those at Lawrence + Memorial and much higher than other currently independent hospitals.

The **third attachment** to this testimony is excerpted from 2013 CMS records of billing and payment by DRG by hospital for the top 100 DRGs in Connecticut hospitals.

No evidence has been offered by applicants to demonstrate that past acquisitions or affiliations (Bridgeport, Greenwich) have produced economies similar to those predicted in the current application. To the contrary, these hospitals remain among the most expensive in Connecticut;

³ Cooper, Z. et al, "The Price Ain't Right? Hospital Prices and Health Spending on the Privately Insured," NBER Health Care Pricing Project, December 2015

⁴ Gowrisankaran, G., et al, "Mergers When Prices Are Negotiated: Evidence from the Hospital Industry," *The American Economic Review*, March 2013

⁵ Melnick, G. and K. Fonkych, "Hospital Price Increases in California, Especially Among Hospitals in the Largest Multi-hospital Systems," *INQUIRY: The Journal of Health Care Organization, Provision, and Financing*, Volume 53: 1-7, 2016

- c. A report by members of the intervenor coalition from December of last year, submitted as the **fourth attachment**, demonstrates that this acquisition will lead to extreme market concentration in the L+M service area, and intensify Yale-New Haven's market power from New York to the Rhode Island border. If this acquisition is consummated, Yale-New Haven Health Systems will account for 83% of discharges in L+M's primary service area, and nearly 60% of all inpatient discharges in the southern half of the state. Using the federal government's standard measure, the growth in market concentration in each of those areas would be presumed to create excessive market power.
- d. Consolidation can alter financial and referral relationships to create a "death spiral" for community hospitals. The Massachusetts Health Policy Commission, in its comprehensive study of community hospitals and the effect of monopolist systems, has concluded that the provision of *routine* hospital care at academic medical centers and teaching hospitals leads to lower total and commercial inpatient volume at community hospitals.

This sequence of events, in turn, leads to lower prices at community hospitals, poor hospital financial performance, limited ability to invest, and barriers to adoption of new technology. This cycle reinforces patient preferences for academic medical centers and teaching hospitals, even for routine hospital care.

For patients left behind in communities like Windham and New London, especially those (i) without transportation to the central hospital, (ii) good health insurance, or (iii) well-connected doctors, this practice results *in patient red-lining*, leaving the poor and aged to be served by inferior hospitals, made inferior as their patients are drawn out of local services, and into the central "name-brand" academic medical center.

The initial and understandable community "rapture" at being part of a larger, more exciting, more capable health system becomes, in short order, the recognition that the community hospital has been "left behind."

- e. The Applicants have offered no evidence that the acquisition of Lawrence + Memorial Physicians Association, L+M's 70-physician group medical practice, will create efficiencies with any meaningful return to patients and payers. Extensive bibliographic evidence of studies in academic, professional and public service literature, submitted as the **fifth attachment**, indicates that such efficiencies will not result.
- f. For example, Robinson⁶ et al, found that physician practices in California that were owned by local community hospitals had costs 10% higher than physician-owned organizations. Practices owned by regional multi-hospital systems generated costs 20% higher than physician-owned practices.
- g. **Excessive bureaucracy** will increase expenses, including (a) more layers of management between the physician and the patient, (b) attempts to conform

⁶ Robinson, J. and K. Miller, "Total Expenditures per Patient in Hospital-Owned and Physician-Owned Physician Organizations in California," *JAMA*, October 22/29, 2014;312(16):1663-1669

physician behavior to purchasing, referral or other financial direction, (c) hospital-oriented -- that is, institutional and hospital revenue cycle-oriented -- information systems.

- h. OHCA should view with skepticism the idea that installation of the EPIC electronic medical record system will generate efficiency or improve quality. The Partners system in Massachusetts spent \$1.2 billion to go live in 2015, double the original budgeted \$600 million. Auditors for Southcoast Health hospitals in Massachusetts attribute a \$30 million 2014 operating loss and 105 layoffs in part to the cost of EPIC.⁷ Southcoast (and other Massachusetts hospitals) are attempting to “keep up” with the highest priced system, Partners, as Partners attempts to meet its own budget requirements by electronic steering of patients from distant corners of that State.

Moreover, “efficiencies” or quality improvements resulting from the use of one or another brand of electronic health record systems are purely speculative. There is no generalizable data showing that EHRs are actually helping control health costs, and EPIC is an extraordinarily expensive product.

- (3) If acquired by Yale-New Haven Health Services Corporation, Lawrence + Memorial would achieve *higher quality* in care provided.
 - a. The recent comprehensive study of all hospitals in Massachusetts by the Health Policy Commission (HPC), cited above, reveals that spending at community hospitals is lower for low acuity inpatients and “is not associated with any difference in quality.”
 - b. In fact, the HPC study showed that “Most community hospitals provide care at a lower cost per discharge, without significant differences in quality,” nearly \$1,500 less per inpatient according to that study. This HPC study is **the sixth attachment** to this testimony.
 - c. The **fifth attachment** (as also noted above) is a list of peer-reviewed journal articles that report, among other findings, no evidence that consolidation of large and small hospital systems produces higher quality care. There is, to the contrary, some evidence that care improvements and patient safety both become victims of bureaucratic inertia and indifference.
 - d. Extensive bibliographic evidence of studies in academic, professional and public service literature indicates that the “quality” of physician services will not increase, and may, in fact, be compromised.

(4) That *access to primary and advanced specialty care will be greatly enhanced* for the citizens of the Lawrence and Memorial hospital service area through the acquisition. This argument is contradicted by:

- a. The example of Windham Hospital’s acquisition by Hartford HealthCare, to which testimony will be given by others.

⁷ Akanksha Jayanthi, “8 Epic EHR implementations with the biggest price tags in 2015,” *Becker’s Health IT and CIO Review*, 7/1/2015

- b. Compromise to physician resistance achieved through acquisition of medical practices. Doctors will ordinarily be fighting for their patients' rights, with insurance companies, vendors and even with hospitals. When the doctor is owned by the hospital, judgments may be altered concerning necessary services, referrals and costs. See the **fifth attachment** for journal studies in this area;
- c. Changing governance and control will render local officials and L+M itself incapable of protecting local services. The hearing notice makes clear that OHCA rejects the notion that this is not an acquisition. Upon consummation, the deal will leave all relevant decision-making authority in the hands of Yale-New Haven Health System.
- d. **Patient choice** will be severely compromised, if not eliminated. The Massachusetts Health Policy Commission study indicated that, as the result of consolidation in that state, "Patients often mentioned that they did not feel they had a choice of hospitals because their primary care provider or insurance plan determined where they could go for care."

In fact, insurance carriers are driven by the financial impact of monopolist pricing to develop narrow networks of providers. This results in limited or non-existent flexibility for the patient and the patient's treating physician. Insurers are compelled to this strategy as a means of attempting to secure discounted prices from price-gouging monopolist systems, in return for assurance of increased volume.

- e. **Physician integrity** may be compromised. Since patients rarely evaluate the quality of medical care, instead valuing the recommendations of physicians, those recommendations become very important.

Contracts involving "owned" physicians reveal requirements for which service to use, what imaging center, what laboratory, what pharmaceutical products have been included in the formulary of the monopolist system, all of these limitations on the ability of the practicing physician to put their patients' interest first.

Many physicians in independent practice face overwhelming bureaucracy and micro-regulation. These bureaucratic challenges are complicated by the extraordinary difficulty of actually being paid for work done. Many therefore have thrown in this particular "towel," resigned to doing the best they are able under the constraints of monopolist systems. By way of recompense, physicians who have ceded such freedoms now have salaries or practice income guarantees supported by double billing and price-gouging associated with large health systems.

- f. Applicants' submission of misleading data about the flow of patients to out-of-state providers, obscuring a potential reduction in the diversity of providers. The applicants break out discharges from New York and Massachusetts providers, but neglect discharges from Rhode Island Hospital. RIH, the affiliated hospital of Brown University Medical School, is the most obvious competitor for subspecialty care to Yale-New Haven Hospital – the two hospitals are exactly equidistant from New London.

OHCA must ask the Applicants what mechanism they will use to shift patient flows from "distant" competitors. Why should an acquisition change referral patterns? Without reviewing all provider employment, affiliation and practice management

agreements between YNHHS, NEMG and all employed physicians and/or affiliated group practices, OHCA cannot fairly evaluate the impact on access. If doctors are contractually bound to refer to YNHHS, patients – especially those in towns west of the Thames River – will lose choice and will incur higher costs due to monopoly pricing effects.

The cancellation of L+M’s affiliation with the Dana Farber Institute offers an ominous foreshadowing of this effect. There is no reason L+M can’t allow its doctors and their patients access to two brand-name cancer hospitals. Patients should have their choice of providers when their care requires subspecialty services only available outside New London.

- g. The terms of the supposed **\$300 million investment** in health in Southeastern Connecticut. The applicants refuse to offer specifics about how much they will really invest, what they will invest in, or where the money will come from.

All of the hypothetical \$300 million appears to be contingent on future programs being consistent with the YNHHS strategic plan, mutually agreed upon (between YNHHS and L+M), and *displaying a positive return on investment*. In other words, there would be no new investment in the Greater New London community’s health unless that investment earns Yale-New Haven Health System a profit.

The proposed expenditures for “physician and clinical recruitment” require scrutiny. The system spent \$54.5 million in cash to buy PriMed LLC in 2014. If by “recruitment,” Yale actually means “buying up the physician practices that L+M hasn’t already purchased,” patients will not benefit.

In fact some or all of the \$300 million is supposed to come from efficiencies that lead to lower expenses in L+M’s future operations, or perhaps from the other YNHHS hospitals. The application assumes that L+M will eliminate more than 200 jobs and more than \$130 million in wage and benefit expense *during the first three years*. (See **attachment seven**, excerpts from the application.) Over seven to ten years, L+M could generate its own \$300 million in funds to invest, and have control over how they would be invested. Of course, these may be needed jobs for the delivery of patient services.

- h. **Financial pressure on patients** will be increased, perhaps intolerably so, as evidenced by these examples:

There is a well-known history of abusive bill collection practices at Yale-New Haven. These abuses were investigated by the then-Attorney General;

Approximately 35% of the accounts receivable of the nation’s hospitals is now categorized as “patient responsibility.” Articles in the hospital field call the patient the “new payer.” Pressure on hospital revenue cycle performance will, of necessity, be addressed now more directly and forcefully to patients;

Also, narrow networks allow referral only to “approved” doctors, leading to “surprise” bills (for out-of-network services, specialties not covered, services in other parts of Connecticut, other states).

Hospitals Owning Doctors

The shift of physician practices from 70% physician-owned in 2003 to less than 55% physician-owned by the end of 2010 (Mathews, A., “When the Doctor Has a Boss,” *The Wall Street Journal*, November 8, 2010) was accompanied by extraordinary increases in the cost of medical care, even by the standards of high prices and inflation in the health care field.

Who benefits? If these proposals before OHCA will not produce efficiency, improvement in quality or control of cost, but will, to the contrary, lead to bureaucratic inefficiency, decline in physician integrity and accountability, and increase in cost, why then do their sponsors put them forward?

Hospitals and the Public Interest

Put simply, executives prosper. At Yale-New Haven, for example, **attachment eight** demonstrates that compensation of the top ten most highly compensated executives has increased by 100% in the time period (2006-2014) when smaller and independent hospitals have had increases of 20 – 25%.

Moreover, the doubling of administrative cost has an impact on the perception of those less handsomely compensated, such as practicing doctors. The surge of doctors seeking to become administrators has spawned extraordinary growth in schools of business, public health and hospital administration. Doctors see the lavish compensation of executives, the unhurried hours, and quickly deduce the market strategy (get bigger, earn more). Of course, all of this affects the patient.

A study published in *Health Affairs* and summarized by the Commonwealth Fund compared hospital administrative costs in eight countries and found that such costs accounted for 25% of hospital spending in the United States, twice the proportion seen in other advanced nations.

The hospital administration share of gross domestic product for the entire country rose from .98% to 1.43% between 2000 and 2011. Moreover, “There was no apparent link between higher administrative costs and better-quality care.”

This anomaly—societal concern and even outrage over health prices, yet skyrocketing compensation for hospital administrators—is made possible by the financial insulation enjoyed by members of those hospital boards.

In short, public agencies—not private boards or conflicted executives—will have to “stand in” for governance, if public interests are to be served.

C. Summary

In summary, the applicants have failed to successfully address these issues identified by OHCA:

(1) Public need:

- a. There is no “public need” demonstrated for this proposal;
- b. To the contrary, the public good (preservation of the lowest possible rates for health services and health insurance; the guarantee of local autonomy concerning decisions involving access to services; measures preserving the independence and integrity of physicians) argues against this proposal;

- (2) **Impact on residents**, including how access to services (including specialty care) will be maintained or improved:
- a. The applicants have failed to provide evidence that the access to specialty services will be improved. To the contrary, evidence has been presented that in other acquisitions by market-leading health systems in Connecticut (e.g., Hartford HealthCare acquisition of Windham Hospital), services have diminished. In that example, specialty and hospital care has been transferred incrementally to centrally-located specialists with Hartford.
 - b. Similar migration of specialty services has been demonstrated in a comprehensive study of community hospitals in Massachusetts by the Massachusetts Health Policy Commission.
- (3) **Benefits achieved** in the Bridgeport/Greenwich Hospitals service areas:
- a. There is no evidence that has been presented that either financial stability or enhanced programs or services have taken place in the Bridgeport and/or Greenwich Hospital services areas, beyond whatever trends and factors have applied to the hospital industry as a whole.
 - b. Neither OHCA nor the applicants have produced complete records of the “before” and “after” assessment of “financial stability or enhanced programs or services.” The submission of incremental and selected information by the applicants more than six months after the beginning of the CoN process indicates that demonstration of the benefits of previous hospital acquisitions has not been a priority.

These applications fail to meet the standards in PA 14-168 Section 7(a)(3), (4), (5), (11) and (12).

(3) Applicants have not demonstrated a clear public need.

(4) By refusing to provide price data, applicants have failed to adequately demonstrate how the proposal will impact the financial strength of the health care system, particularly if one views patients and payers as part of the system.

(5) Applicants have not satisfactorily demonstrated how the proposal will improve the quality, accessibility, and cost effectiveness of health care. Intervenors have presented a large volume of evidence to the contrary.

(11) Applicants have not satisfactorily demonstrated that the proposal will *not* negatively impact the diversity of health care providers and patient choice in the geographic region. This is a new and much higher burden of proof for both OHCA and the Applicants. Intervenors have raised a series of questions about the vague generalities in the application, without answers to which OHCA cannot plausibly certify having met this standard.

(12) Applicants have failed to provide any evidence that the consolidation from the proposal will *not* adversely affect health care costs or accessibility to care. Again, this is a new standard, enacted by the General Assembly specifically to address the circumstances currently under review. When OHCA pressed the applicants to say whether any of the supposed cost savings from the acquisition would be passed on to consumers, they simply refused.

These proposals should not be ruled on until January 15, 2017 or until the Governor's Task Force makes its recommendations. If forced to rule by the statutory calendar, OHCA must deny them. Regardless of Executive Order 51, the applications as written fail the relevant statutory tests and must be denied whenever they ripen for decision.

The only possible scenario under which a proposed takeover of L+M by YNHHS or any other major system could proceed is with permanent, concrete written guarantees on access, cost, quality and workplace standards, all negotiated directly with a representative cross-section of the community and with ongoing enforceable community oversight. We have attached our coalition's "Vision and Values Statement" which includes details of our vision for the future of the Southeastern Connecticut health care system.

Thank you for your attention.

EXHIBIT 4

HOSPITAL MARKET CONCENTRATION
IN CONNECTICUT:

The Impact of Yale-New Haven Health System's Expansion

EXECUTIVE SUMMARY

The last twenty years have transformed the Connecticut health care system. As recently as 1995, every hospital in the state was independent, but the era of the community hospital is over. If currently proposed mergers are completed, more than 80% of Connecticut's patients will receive care from hospitals owned by large, powerful multi-hospital systems. Driven in part by new "shared savings" reimbursement policies in the state Medicaid and federal Medicare programs, this trend is accelerating.

Connecticut now has five major acquisitions pending, including the expansion of the state's most powerful health care entity. The Yale-New Haven Health System has proposed to buy Lawrence and Memorial Health, which owns both Lawrence and Memorial Hospital in New London and Westerly Hospital in Rhode Island. At the same time, Milford Hospital was forced to shut down Labor and Delivery services when its leading Obstetrician/Gynecologists defected to Yale-New Haven Hospital. Financially distressed, Milford now leases space to Yale-New Haven Hospital for its regional inpatient rehabilitation services. A slow-motion takeover appears to be in process.

The most recent data available show that Connecticut has the 4th highest health care costs in the United States, but lags in most measures of quality. Numerous academic studies show that as providers take each other over and limit competition, prices go up without service improvement—and the more heavily concentrated the market is to begin with, the higher the price increases.

The co-authors of *Hospital Market Concentration in Connecticut: The Impact of Yale-New Haven Health System's Expansion*, have worked together on legislative solutions to the challenges of growing hospital monopoly for the past several years. In continuing that work, we have analyzed state inpatient hospital discharge data and mapped the potential changes to the state's health care markets if Yale-New Haven buys L+M and swallows up Milford Hospital. The report examines five geographic areas, from L+M's relatively small self-defined service area, to an area covering the southern half of the state.

The data yield three key metrics: the percentage market share held by Yale-New Haven Health, the score for each area on a standard government measure of market concentration called the Herfindahl-Hirschmann Index, or “HHI”, and the amount of change in the concentration of the hospital market in each area. The findings include:

- Though consumers already face a market with limited competitive pressure to protect them, the Milford and L+M takeovers will significantly increase the Yale-New Haven Health System’s market share in all five areas. In L+M’s primary service area, Yale-New Haven Health System will grow from 14% to 83% of inpatient discharges.
- All five geographic regions studied easily meet the federal government’s standard for a “highly concentrated” market even before the two takeovers. Highly concentrated markets lack competition and can lead to artificially excessive prices.
- In the market areas studied, the size of the increase in consolidation caused by YNHHS’s expansion would be significantly higher—by a factor ranging between 50% and 900%—than the level that requires regulators to presume that merging entities will “obtain market power,” which federal regulatory standards warn against.¹ Studies show that mergers in already highly consolidated markets can often lead to price increases of 20%.
- Although hospitals are consolidating across the state, the shoreline areas dominated by YNHHS are the most heavily concentrated regions in Connecticut, and thus most vulnerable to price increases. The three-hospital Yale-New Haven system claims a “local service area” comprising nearly half the state’s population. Upon full absorption of Milford and L+M, the Yale-New Haven system will account for 59% of discharges in this area.

The report’s co-authors urge public officials to take three steps before any decisions are made on whether or not, and under what conditions, the merger should proceed.

- In 2015, Connecticut passed a sweeping health care consumer protection law, SB 811. The law requires a cost and market analysis prior to regulatory action on hospital mergers. Although Yale-New Haven and L+M applied for approval before the new law took effect, state officials should conduct the cost and market analysis prior to any action on the proposed merger.
- In particular, state officials should examine the pricing impact in Greater New Haven of Yale-New Haven Hospital’s 2012 takeover of the Hospital of St. Raphael. No data will better illuminate the potential impact of Yale-New Haven’s expansion than what happened to prices after this deal, which created the 6th largest hospital in the United States.
- The L+M transaction should not be viewed in isolation. Yale-New Haven’s market power on the shoreline is expanding by leasing a wing of Milford Hospital. This adds a small but significant further increase in the extent of Yale-New Haven’s market control. State officials should include the potential absorption of Milford in their analyses.

1. GROWING CONCENTRATION IN THE HEALTH CARE MARKETPLACE

The last twenty years have transformed the Connecticut health care system. As recently as 1995, every hospital in the state was independent, but the era of the community hospital is over. If current proposed mergers are completed, more than 80% of Connecticut's inpatients will pass through hospitals owned by large, powerful multi-hospital systems, with few legal checks on price increases to protect them.

The Affordable Care Act has delivered health insurance to millions of people, a significant policy victory. At the same time, however, changes in reimbursement policies, mandates for technology improvements, and new regulations have tilted the market even further in favor of large, wealthy hospital systems. In Connecticut, the State Innovation Model (SIM) and "shared savings" policies for Medicare and Medicaid are creating incentives for large combinations of hospitals and doctors that can accept risk for broad patient populations. These systems are taking advantage of the new conditions to overrun their smaller competitors and build market power.

Unfortunately, the ACA contains few proven cost control measures. Congress largely left it up to states, employers, payers, municipalities, and individual patients to rein in costs as health care

systems undergo rapid consolidation. Academic studies consistently show that the main impact of hospital consolidation is increased prices without improvement in quality.² Nationally, ballooning prices threaten newly expanded access. Although increasing numbers of Americans have health insurance, out of pocket costs are rising at 3-4 times the rate of wages.³ More Americans than ever report delaying needed medical care for cost reasons.⁴ Without cost control, the long-overdue expansion of health insurance coverage will not be sustainable.

These challenges have become clear in Connecticut in recent years. Despite a dramatic growth in their market power – which will continue if the combined \$91 billion Anthem-Cigna and Aetna-Humana deals are completed – health insurers have done little to restrain costs.⁵ Meanwhile, the rise of multi-hospital systems has created concentrated markets in the state, and the Yale-New Haven and Hartford HealthCare systems have developed a dominant grip on health care statewide. The two major health systems account for nearly half the inpatient discharges in the state, and each has even tighter regional control in its respective market. Hospital consolidation and price inflation will continue unless checked at the state level.

Acquisition and Absorption: Yale-New Haven Expands

Yale-New Haven Hospital (YNHH) began the process of industry consolidation in Connecticut in 1995, when YNHH added Bridgeport Hospital to its network. Greenwich Hospital joined the growing system in 1998. In 2010, the health system added Northeast Medical Group, a start-up physician multispecialty group that now employs over 550 doctors and is wholly owned by the Yale-New Haven Health Services Corporation, the parent corporation of the Yale-New Haven Health System (YNHHS).

In 2012, Yale-New Haven Hospital's takeover of the Hospital of St. Raphael created the 6th largest hospital in the country.⁶ After the merger, the Yale-New Haven Health System (YNHHS) market share rose to 98% of inpatient discharges among New Haven residents and 76% in Greater New Haven, up from 68% and 48% respectively.⁷

In 2014, Texas-based for-profit hospital operator Tenet Healthcare proposed purchasing five Connecticut hospitals in an equity partnership with YNHHS, with Tenet owning 80% and Yale-New Haven 20%. Adding five of its competitors to Yale-New Haven's existing market share would have meant that 37.5% of all discharges in the state were from the newly merging system, a major expansion of the Yale network. The deal fell through after the Office of Health Care Access imposed unusually strong requirements on the terms of the deal, in the face of concerns about the impact of the transaction on cost, access, services, financial burden on the uninsured, and accountability of the hospitals to local communities.

Now, YNHHS has two impending hospital takeovers that will expand its control over the health care market along Connecticut's coastline.

One is widely known. The Yale-New Haven Health System has announced a deal to purchase Lawrence + Memorial Health, a smaller system that controls: Lawrence + Memorial Hospital in New London; Westerly Hospital in Westerly, Rhode Island; L+M Physicians Association, a 72-member

multispecialty physician practice; and several other outpatient facilities.⁹

In a series of less publicized moves, YNHHS seems to be quietly acquiring pieces of financially struggling Milford Hospital.

Milford has reported negative operating margins in each of the last seven years. The hospital's license allows it to operate 118 beds, but due to declining patient volume, only 43 are currently staffed. Documents filed with the state Office of Health Care Access reveal that physician defections to Yale-New Haven Hospital contributed to those losses and inflicted severe competitive damage on Milford's labor and delivery service. According to these documents, in 2012, six OB/GYN doctors who accounted for a majority of Milford Hospital's deliveries told management that they would no longer deliver babies there. One had decided to stop delivering babies altogether, but the other five told Milford management that they were making Yale-New Haven Hospital their "exclusive hospital provider."¹⁰

Milford subsequently attempted to hire additional obstetricians, but could not keep them. In February of 2015, Milford applied for state approval to terminate its Labor and Delivery service. Milford's family birthing center, which occupies a large portion of the hospital's third floor, will no longer accept patients.¹¹

Having expanded its OB/GYN network due to Milford's financial distress, Yale-New Haven Hospital announced last fall that it would open a 24-bed inpatient rehabilitation clinic on one of the three floors of Milford Hospital. The clinic would serve patients suffering from certain neurological, orthopedic, musculoskeletal, and other conditions. These patients typically have received inpatient treatment such as surgery for their conditions, and require extensive nursing care and supervision while undergoing treatments such as physical or occupational therapy.

YNHH's proposal would shift all patients who would have been treated in the current rehab unit at the St. Raphael's campus to Milford. Shortly after, YNHHS-owned Bridgeport Hospital submitted its

own paperwork to terminate its inpatient rehabilitation services as well.¹² In essence, YNHHS is regionalizing its inpatient rehabilitation services at its leased space at Milford Hospital, even as Milford's traditional hospital services decline and close. Taken together, these events suggest that Yale-New Haven Health System's absorption of Milford Hospital is in process. Yet state regulators have treated each submission—Milford's closure of its Labor and Delivery service, the opening of Yale-New Haven's inpatient rehabilitation unit, and the two separate YNHHS inpatient rehabilitation unit closures—as distinct, unrelated events.

In contrast to Milford Hospital, Lawrence + Memorial Hospital is a financially successful 256-bed hospital in New London that recently acquired Westerly Hospital in Rhode Island, pledging to invest \$36.5 million over five years in the new acquisition. In September, the parent company of the two hospitals and Yale New Haven Health System filed a Certificate of Need application for YNHHS to take over the L+M system. In the application, YNHHS promises to make a \$300 million capital investment in the region.¹³ This deal is now in front of state regulators seeking approval.

Connecticut's Growing Monopolies

Hospital consolidation is a recent and rapid phenomenon in Connecticut: twenty years ago, every hospital in the state was independent.

The trend has accelerated recently. A tally of transactions by the Universal Health Care Foundation in December 2014 reported that "between 2009 and 2013 there were thirteen attempted and seven successful hospital consolidations and/or partnerships [in Connecticut], a substantial increase from the four that occurred in the previous decade."¹⁴

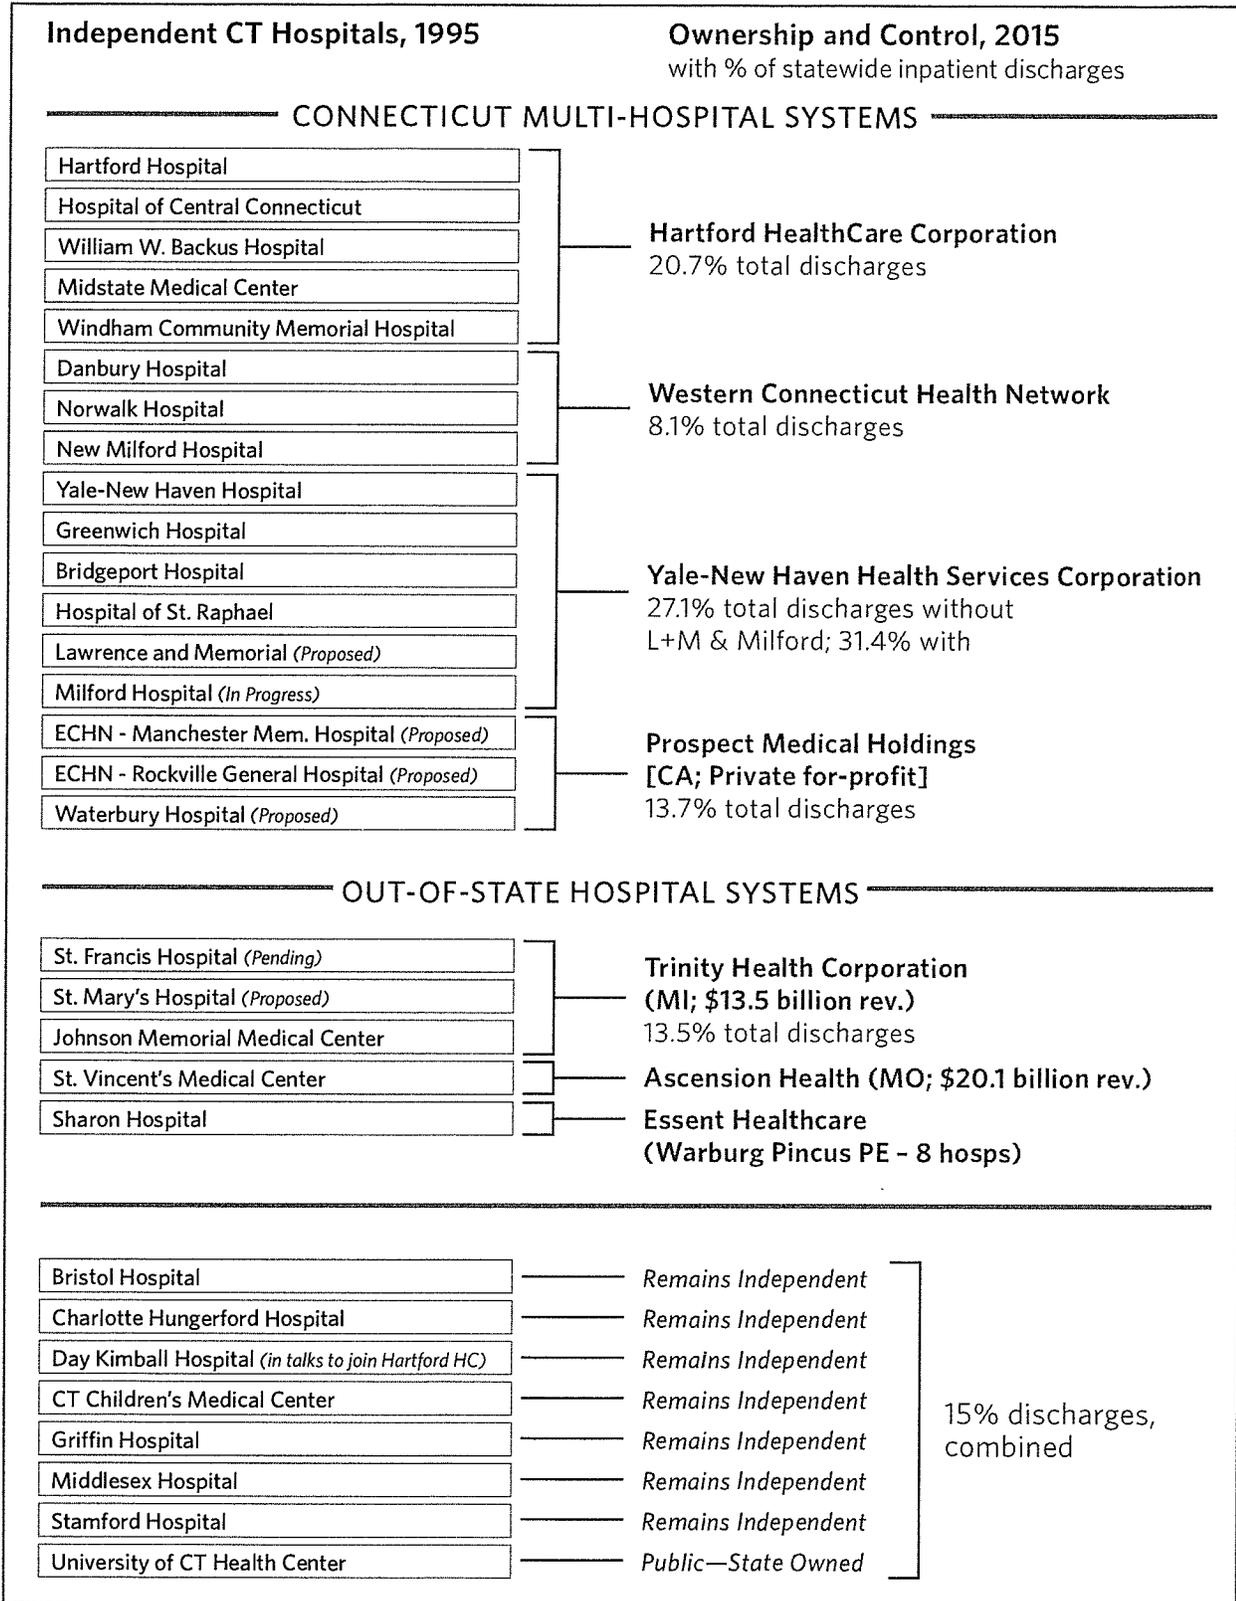

As a result of these consolidations, Hartford HealthCare accounted for 20.7% of inpatient discharges in the state in FY 2013, while Yale-New Haven Health System saw another 27.1%. The two health systems combine for nearly half of the

state's discharges, a lopsided market for Connecticut consumers.

In the year since the UHCF report, at least five major hospital affiliations or purchases have been announced or proposed: private for-profit Prospect Medical Holdings has moved to purchase the Eastern Connecticut Health Network and Waterbury Hospital; St. Francis Hospital affiliated with Trinity Health Corporation, a \$16 billion national company based in Michigan, has acquired Johnson Memorial Hospital, and has moved to acquire St. Mary's Hospital; and Ascension Health has purchased St. Vincent's Medical Center—all in addition to Yale's proposed acquisition of L+M and progressive annexation of Milford. Today, the eight hospitals that will remain independent if all pending transactions are approved provide only 15% of inpatient discharges in the state.

Unless radical change to reimbursement and support for financially distressed hospitals is on the horizon, some consolidation is inevitable. Unlike many of the other recent and proposed hospital acquisitions, however, the Lawrence + Memorial deal is not spurred by a community hospital's financial crisis. The conditions of this proposal create an opportunity for regulators to take a closer look at the growing monopolies in the state.

Figure 1: Hospital Ownership Changes, 1995-2015

2. THE DATA: YALE-NEW HAVEN'S LATEST MOVES INCREASE CONSOLIDATION

New data make it possible to chart the development of Connecticut's hospital systems, including the expansion of Yale's regional control in the last several years, and to anticipate how such control will grow as hospital networks expand. The authors obtained general acute inpatient care discharge data from the Office of Health Care Access, showing the number of discharges from each hospital by patients' town of residence during fiscal year 2013.

The question of how to define health care markets is highly contested and technically complex. For a detailed discussion, see Appendix A. Courts, hospitals, and regulators have disputed market boundaries for a quarter of a century while hospital systems completed 1,881 mergers.¹⁵

Recently, economists have developed improved tools to measure market boundaries, but courts are still catching up. Despite an academic consensus that hospital markets are much smaller and therefore more concentrated than courts were willing to accept a decade ago, only a handful of cases have actually seen anti-trust remedies applied to mergers.¹⁶ Meanwhile, mergers are proceeding at a rate of more than 90 per year.¹⁷

For our initial analysis, we focus on market areas defined by the health systems and hospitals themselves, including concentric areas surrounding different hospitals that define smaller and larger

markets. This approach gives a thorough preliminary analysis of market concentration at varying scales. The analysis examines five areas:

- **Yale-New Haven Health System's local service area:** In the Official Statement accompanying its most recent bond offering, YNHHS defined the "local service area" for its full system as a 55-town region encompassing roughly the southern half of the state. The area includes 1.6 million people, 46% of the state's population.¹⁸
- **Yale-New Haven Hospital local service area:** A 34-town region also defined in YNHHS bond statements.¹⁹
- **Greater New Haven Area/Southern Connecticut Region Council of Governments (SCRCOG):** We use the area defined by membership in the Southern Connecticut Regional Council of Governments (SCRCOG) as a definition of Greater New Haven. SCRCOG contains fifteen towns with 16% of the state's population.
- **Lawrence + Memorial Hospital Primary Service Area:** L+M Hospital defines its primary service area as a ten-town region surrounding New London, both in the Official

Statement for its most recent bond issue and in its Certificate of Need application.

- **Lawrence and Memorial Hospital Secondary Service Area:** In the same sources, L+M also identifies as its secondary service area a twenty-town area surrounding New London.²⁰

Within these five areas, our analysis focuses on three key metrics:

- The percentage market share for the Yale-New Haven Health System in each area prior to and after the absorption of Milford and the purchase of L+M Health.
- The Herfindahl-Hirschman Index, or “HHI,” score for each area pre- and post-acquisitions. HHI measures the degree to which a market is concentrated, and thus how likely consumers are to face anticompetitive practices. It is a standard FTC and DOJ metric, also used by the American Medical Association, Congressional Budget Office, Kaiser Family Foundation, insurance industry, and other economists and regulators for analyses.
- The change in HHI for each area before and after a transaction, a prediction of merging hospitals’ gain in market power.

In examining these metrics, we found that:

- Though consumers already face a market with limited competitive pressure to protect them, the ongoing absorption of Milford and the proposed purchase of L+M will significantly increase the Yale-New Haven Health System’s market share in all five areas we examined – by a factor of 5 or 6 in the markets surrounding New London – at the further expense of competition.
- All five geographic regions studied easily meet the federal government’s standard for a “highly concentrated” market even before the two takeovers. Highly concentrated markets can lead to artificially excessive prices.

- In the market areas studied, the size of the increase in consolidation caused by YNHHS’s expansion would be significantly higher—by a factor ranging between 50% and 900%—than the level that requires regulators to presume that merging entities will “obtain market power,” which federal regulatory standards warn against.²¹
- Although there is rapid consolidation across the state, the coastline areas dominated by YNHHS are the most heavily concentrated regions of the state and therefore are most vulnerable to price increases.

In each of these areas, the expansion is significant. The ultimate absorption of Milford Hospital and the L+M deal as proposed will leave YNHHS with nearly 60% of inpatient discharges in the Yale-New Haven Health System’s local service area, which covers roughly the southern half of the state, including 46% of its population. It will also add the L+M service area to the swath of coastal areas in which YNHHS dominates the market. [See Figures 3 and 4.] Yale-New Haven Hospital already treats the second highest volume of patients in L+M’s primary service area and third highest in its larger secondary service area. Combining the two hospital networks will leave YNHHS with monopoly pricing power.

When federal and state anti-trust regulators measure the degree to which a market is concentrated, they use a tool called the Herfindahl-Hirschman Index (HHI), which measures market concentration by aggregating measures of firms’ market shares.

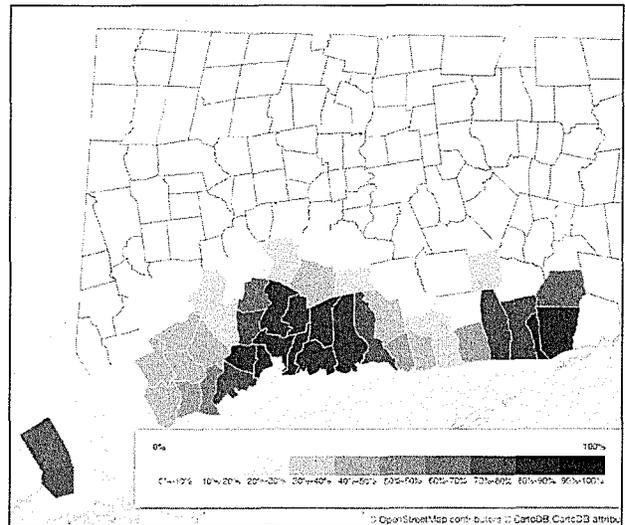

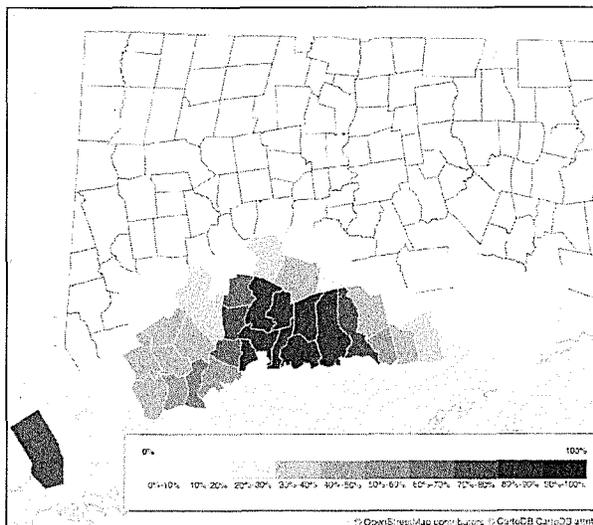

The DOJ and FTC assert that “mergers should not be permitted to create, enhance, or entrench market power or to facilitate its exercise” because of the threat to competition. When a merger increases the HHI in a highly concentrated market by 100 points, regulators expect that merger to “potentially” raise significant concerns because of an increase in market power. When it increases by 200 points or more, they “presume” that an impermissible market power increase is likely. This presumption can be rebutted only by “persuasive evidence showing that the merger is unlikely to enhance market power.”²² We applied HHI to the discharge data from towns and multi-town areas to determine the health of the state’s markets.

Figure 2: YNHHS inpatient discharge share by region, before and after addition of L+M and Milford

	Population	YNHHS discharge share now	YNHHS discharge share with deals
Statewide	3,570,000	27%	31%
YNHHS local service area	1,650,000	51%	59%
YNHH local service area	1,096,135	60%	65%
GNH/SCRCOG	570,000	74%	83%
L+M primary service area	175,000	14%	83%
L+M secondary service area	362,000	12%	59%

Figures 3 and 4: YNHHS local service area market share, before and after

These maps illustrate the percentage of inpatients from each town within the Yale-New Haven Health System's local service area who were discharged from a hospital in the YNHHS, before and after the addition of L+M and Milford.

Measuring Market Power

To calculate HHI, one adds the squares of the market shares together to get a number on a scale of 100–10,000:

- A region with a pure monopoly on a good or service would score an HHI of 10,000: $(100\%)^2 = 10,000$.
- A region with 10 competitors, each with equal market shares of 10% would score 1,000: $(10\%)^2 = 100$ for each competitor. 100×10 competitors = 1,000.
- A region with five competitors, one with 50% market share, one with 20% market share, and three with 10% market share would score 3,200 on HHI. $(50\%)^2 = 2,500$; $(20\%)^2 = 400$; $(10\%)^2 = 100 \times 3$ competitors = 300.

The federal government divides markets into three categories based on HHI scores to assess the risk of monopoly:

- Less than 1,500—unconcentrated market with adequate competition
- Between 1,500 and 2,500—“moderately concentrated” market
- Above 2,500—“highly concentrated” market with an elevated risk of inefficiency and collusion to fix prices.

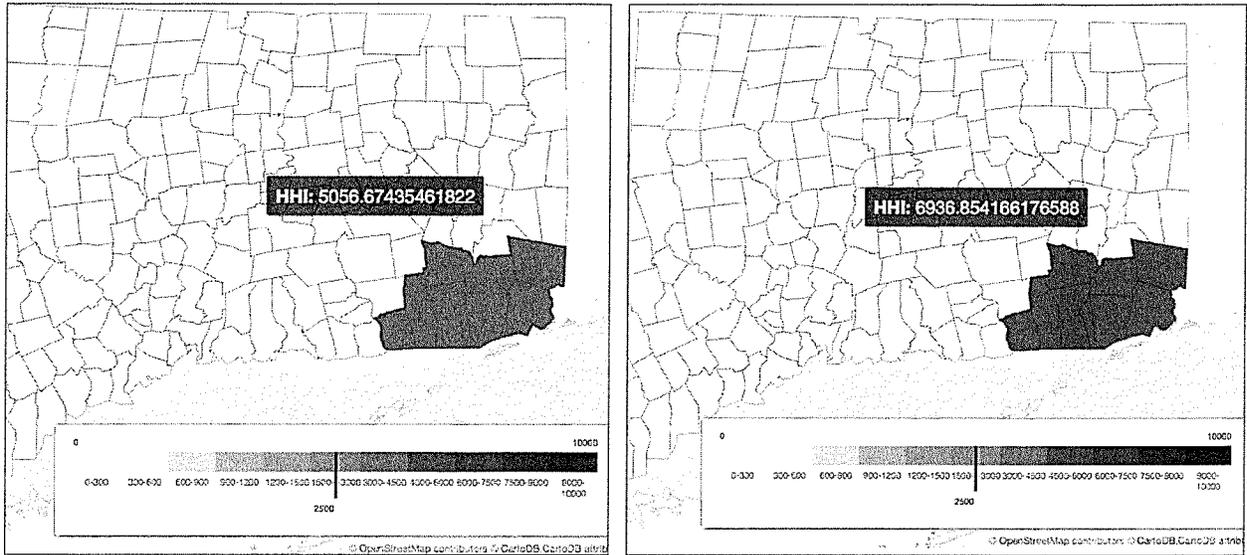

Regulators apply the strictest scrutiny to “highly concentrated” markets with scores of 2,500 or above.¹⁸

We found that every one of the five regions is already a highly concentrated hospital market to begin with. In every region, the increase in HHI was dramatic. The maps on the opposite page illustrate the HHI increase in the L+M service area. For the full table showing HHI and change in HHI for each geographic area, see Appendix B.

In every relevant local or regional area we examined, the HHI indicates that the market is already highly concentrated. When concentration is already high, increases to HHI are more concerning: federal standards indicate that the strictest scrutiny should be applied to markets like these because of the risk to competition. In every one of these markets, the magnitude of the HHI increase is far higher than the 200-point threshold at which federal regulations presume an impermissible increase to market power. In the L+M primary service area, the increase is over nine times the 200-point standard. In the YNHHS local service area—which encompasses 46% of the state’s population—the increase is more than quadruple the standard.

The state of Connecticut is far too large to consider a “market.” Even if we did consider Connecticut as a “market” of its own, however, it would already have an HHI of 1412. After these transactions, it would have an HHI of 1716—an increase of 304 points that would move it from the “unconcentrated” category to the “moderately concentrated” category. These two acquisitions constitute a substantial increase to overall market concentration in the state because they bolster the market power of its largest health system.

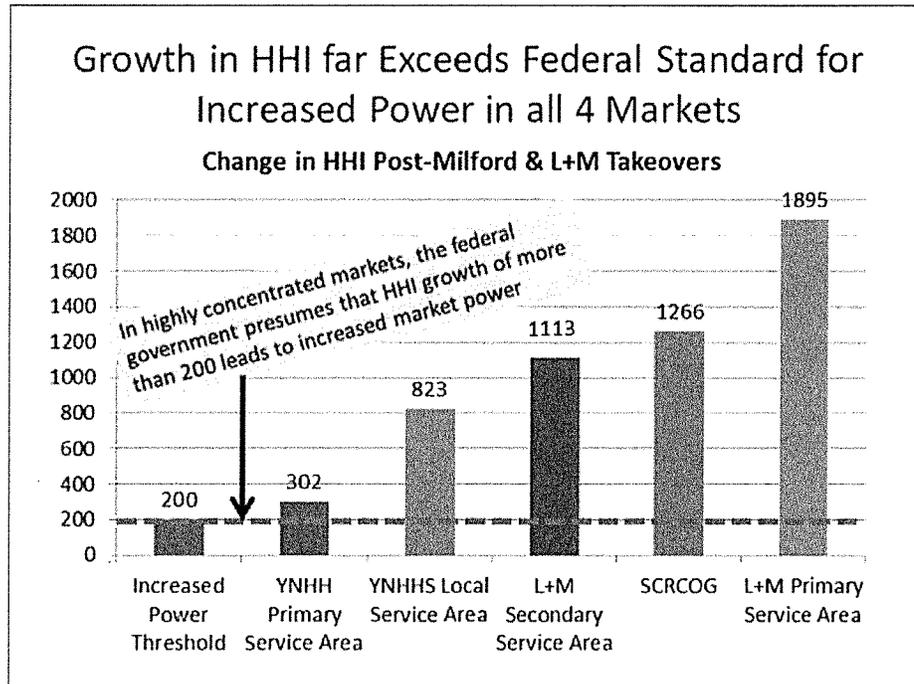

Consolidation is not equally threatening everywhere, however. We also calculated market concentration on a town-by-town basis for the entire state to demonstrate the distribution and comparative level of concentration across regions. Hartford’s expansion in northern Connecticut has been more diffuse than Yale-New Haven’s southern growth to date. In Hartford, for example, Hartford Hospital continues to face direct competition from St. Francis, which is now aligned with a multi-billion dollar national non-profit chain and is itself seeking to buy two hospitals. In the southern half of the state, highly concentrated multi-town regions clearly show the dominance of the Yale-New Haven Health System.

Figures 5 and 6: L+M Service Area HHI, before and after YNHHS takeover

This map demonstrates the dramatic increase in market concentration for the L+M Primary Service Area that will result from the potential takeovers. Because the market is already highly concentrated before the acquisition, combining YNHHS and L+MH will cause a large spike in market concentration, leaving few alternatives to the newly dominant Yale-New Haven system.

Figure 7

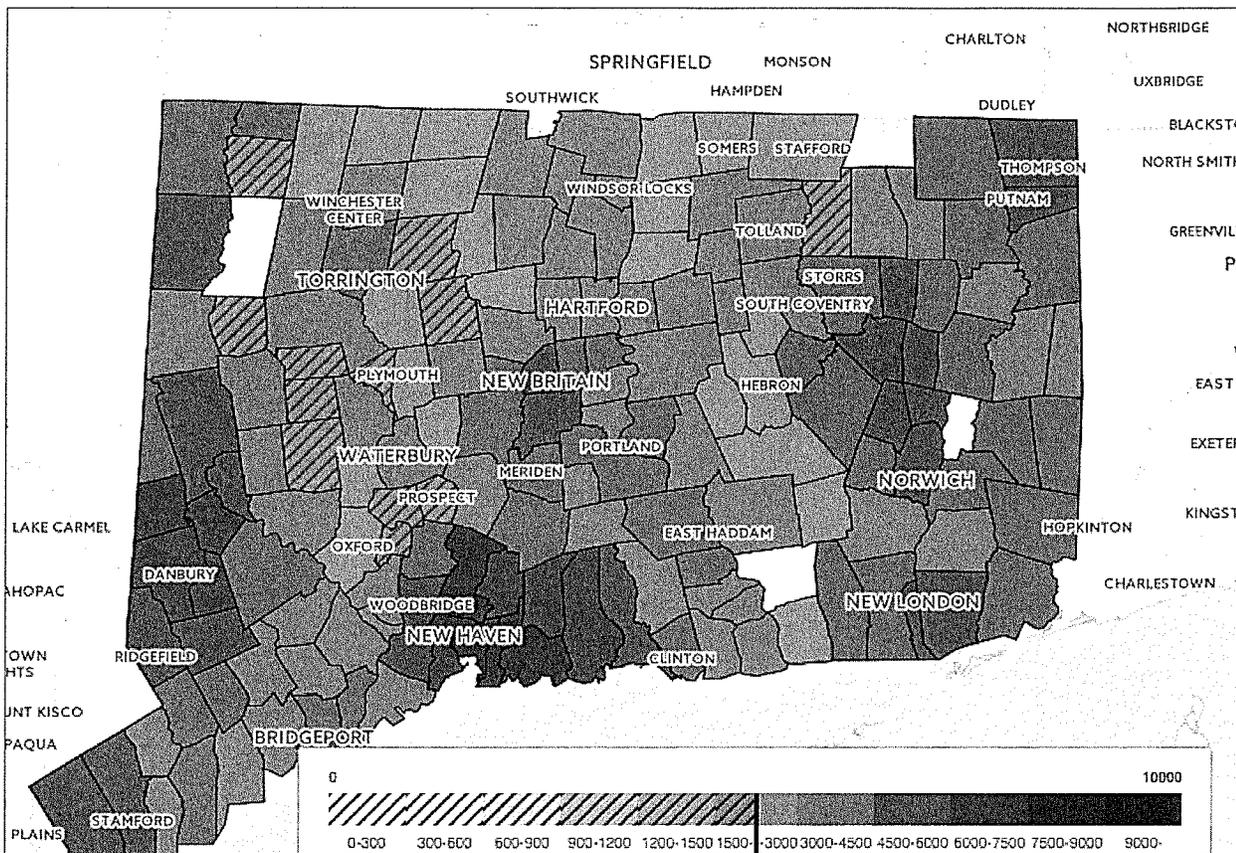

Figure 8: Town-by-town market concentration, Connecticut

This map shows the existing HHI scores for each town in Connecticut. Though discrete towns are not complete health care markets in themselves, the map shows roughly the distribution of highly and extremely concentrated markets throughout the state. Though Hartford HealthCare controls a large number of hospitals statewide, its hospitals are distributed in such a way that most towns in the north of the state exhibit comparatively lower market concentration, although most would still be defined as "highly concentrated" under federal standards. In the Yale-New Haven-controlled southern half, however, we see the highest density of towns with extremely high market concentration—above 6,000, indicating that Yale-New Haven's control of the market is geographically consolidated. Note that the region around New London is already heavily concentrated, and will become even more so if Yale-New Haven takes over L+M.

3. THE UNAFFORDABLE CONSEQUENCES OF MARKET CONCENTRATION

Prices Go Up as Hospitals Gain Market Power

Hospitals often claim that consolidation increases efficiency. There is little evidence to support this claim.

Independent comprehensive reviews of the academic literature have rejected this interpretation. Nationally, the Robert Wood Johnson Foundation reports, based on a review of five independent studies, that when hospitals “merge in already concentrated markets, the price increase can be dramatic, often exceeding 20 percent.”²³ Locally, the Universal Health Care Foundation of Connecticut concluded in its December 2014 review that “almost all retrospective studies suggest that hospital consolidation results in concentration of market power and a rise in the price of care.”²⁴

In Massachusetts, the Attorney General has documented that monopoly pricing, especially by the non-profit Harvard-affiliated Partners system, is the state’s most significant cost driver.²⁵ In a court ruling this year against a hospital merger involving Partners, the Massachusetts judge found that the system was able to “exercise ‘near monopoly power’ that allows it to charge prices far in excess of its competitors for the same services.”²⁶

The fact that the dominant systems in Connecticut are nominally not-for-profit corporations does not protect Connecticut patients. A majority of U.S. acute care hospitals are structured as private, non-profit enterprises. That fact has not prevented a massive wave of mergers and skyrocketing prices.

For years, judges permitted mergers of non-profit hospitals on the theory that they would behave

charitably with greater market power. In 2007, the Federal Trade Commission studied the pricing impacts of a non-profit merger in Illinois. It found that, according to the hospitals’ own economist, managed care prices increased by 42% over four years, 12% above the market as a whole.²⁷

With rising health care costs one of the largest drivers of perennial state budget crises, state officials are increasingly concerned about the long-term cost of consolidation to taxpayers. Comptroller Kevin Lembo, who administers the state employee health plan covering 210,000 people at a cost of \$1.4 billion annually, recently testified stating, “We’re going to be negotiating potentially with 2 or 3 large systems and that’s basically it, if things keep going the way they are going. I don’t think you need to be an actuary to know that that’s going to be a tough spot for us.”²⁸

Non-profit hospitals claim they need surplus revenue to serve low income people. But Duke University Professor Clark Havighorst points out that the IRS allows non-profit hospitals “to spend their untaxed surpluses on anything that arguably ‘promotes health.’ Much of what hospitals count as charitable behavior or community benefit is not spent on lower income people.”²⁹ University of Illinois tax law professor John Colombo adds:

“The standard non-profit hospital doesn’t act like a charity any more than Microsoft does—they also give some stuff away for free. Hospitals’ primary purpose is to deliver high quality health care for a fee, and they’re good at that. But don’t try to tell me that’s charity. They price like a business. They make acquisitions like a business. They are businesses.”³⁰

We're Not Getting the Quality Care We're Paying For

Already, Connecticut has the 4th highest per capita health care costs in the nation: we paid 27% more per person than the national average for health care in 2009, the most recent year for which data are available,³¹ and what we spend at the hospital annually nearly tripled from 1991 to 2009, from \$3.9 billion to \$9.3 billion.³²

The science of measuring hospital quality is still in its infancy. No single set of metrics is backed by a wide consensus. However, we examined several federal and independent evaluations. The available data provide no evidence that Connecticut's high health care costs are correlated to high quality. On several currently available metrics, Connecticut ranks among the states with the lowest scores.

For example, Medicare penalizes hospitals if patients are frequently readmitted within a month of their discharge. Based on these readmission standards, 90% of Connecticut hospitals received penalties for the 2015-2016 fiscal year, the second highest penalty rate for any state.³³ These 28 penalized hospitals included all three in the Yale-New Haven Health System, and Yale-New Haven Hospital itself received the seventh most severe penalty in the state.³⁴

Medicare also assesses hospitals based on patient satisfaction across a number of areas like communication, cleanliness, and pain management. In the most recent scores compiled from quarterly Hospital Consumer Assessment of Healthcare Providers and Systems surveys, no Connecticut hospital received the top rating of five stars. Eighteen out of twenty-five hospitals received a three star rating, including YNHHS's Bridgeport and Yale-New Haven hospitals.³⁵

The independent Leapfrog Group assesses hospital quality nationally and grades hospitals "A" to "F" based on factors such as safe surgery practices, infection rates, and use of correct staffing and procedures to minimize mistakes.³⁶ Connecticut ranked 36th in the percentage of hospitals scoring "A" in Fall

2015.³⁷ Maine and Massachusetts were 1st and 2nd nationally. Yale-New Haven and Greenwich Hospitals received "C" grades, Bridgeport a "D". Three of Hartford HealthCare's five hospitals received "C" grades, one a "B" and one a "D".³⁸

As the science of quality measurement improves, and analysts are better able to account for factors such as the severity of patients' conditions across populations, these scorecards may yield different results. However, the Robert Wood Johnson Foundation examined the literature on hospital consolidation in relation to currently available quality indicators, and found that "a slim majority of studies find that, at least for some procedures, increases in hospital concentration reduce quality. The strongest studies confirm this result."³⁹

4. CONFRONTING CONNECTICUT'S HOSPITAL MONOPOLIES

The Affordable Care Act and new Connecticut reimbursement policy are accelerating changes in how care is delivered and measured, and how the business of health care is structured. Before our very eyes, Connecticut is being carved up by a few hospital systems. The leader is clearly Yale-New Haven, with a level of control in many areas that easily meets any definition of market power. Meanwhile, our patients and payers are carrying a heavier and heavier financial burden as their health care costs rise.

Fortunately, Connecticut's legislative leaders have acted to curb the threat of consolidation by giving more tools to public consumers and to regulators. Two hospital regulatory bills in the last two years leave Connecticut better prepared to protect its consumers from the ill effects of monopoly. These reforms have put us in the forefront of states asserting the public interest in creating a fair health marketplace that benefits all. State regulators and advocates should use those tools now.

The acquisition of Lawrence + Memorial Health by the Yale-New Haven Health Services Corporation is a pivotal opportunity for stemming the growth

of monopoly in Connecticut's health care market and limiting the ill effects of consolidation. The proposal will be reviewed under Public Act 14-168, which passed in 2014. Portions of Public Act 14-168 were quickly superseded by SB 811, which passed in 2015. However, the L+M acquisition application was submitted before the newer law took effect. Nevertheless, PA 14-168 added new standards for the Certificate of Need. In any decision to grant or refuse a CoN, the law requires the Office of Health Care Access to take into account whether the applicants have

"satisfactorily demonstrated that the proposal will not negatively impact the diversity of health care providers and patient choice in the geographic region; and [w]hether the applicant has satisfactorily demonstrated that any consolidation resulting from the proposal will not adversely affect health care costs or accessibility to care."⁴⁰

The sale as proposed unquestionably poses a threat to both provider diversity and health care costs along the shoreline.

In light of this threat, state officials should

rigorously examine the likely consequences of the transaction in order to decide whether to allow it to proceed. In particular, we recommend that prior to any approval or rejection, and prior to developing any proposed conditions, regulators take the following steps:

- SB 811 requires the state to undertake a “cost and market analysis” for such mergers. Although SB 811 does not formally apply, the Attorney General retains responsibility to enforce the Connecticut Anti-trust Act, and the Office of Health Care Access now must specifically examine the impact of merger-related consolidation on cost and access. Having public market analysis was critical to the process of public comment to the judge in the case of proposed mergers by Partners Health System in Massachusetts. Accordingly, we urge regulators to conduct the cost and market analysis that our state legislators have deemed appropriate for sales like this one.
- In order to understand the likely results of these acquisitions, we also believe that a thorough analysis of potential consolidation-related cost and access impacts calls for a retrospective look at any price changes following YNHH’s acquisition of the Hospital of St. Raphael three years ago. This is a clear test of whether or not YNHHS exercises market power to artificially inflate prices: if St. Raphael’s or Yale-New Haven’s overall prices increased significantly post-merger, there is no question that the system is flexing monopoly muscle within the SCRCOG region. Understanding any changes in the two hospitals’ prices may portend similar behavior in eastern Connecticut.
- We urge OHCA and the Attorney General to view the L+M acquisition in tandem with the unannounced takeover of Milford Hospital. To date, the relationship between YNHHS and

Milford Hospital has been viewed as a series of individual transactions.

The changes to the market statewide pose high potential risks to patients. In the interest of quality and affordability in our health care marketplace, regulators must use these tools and more before they decide whether this transaction should proceed.

APPENDIX A: DEFINING AND MEASURING HOSPITAL MARKETS

The authors have chosen to apply HHI to the five geographic areas identified in the report as an initial illustration of the challenges posed by YNHHS's slow-motion consumption of Milford Hospital and proposed acquisition of L+M Health. We are awaiting further data to allow more thorough analysis, and also expect that regulators will apply a more rigorous methodology as full information on the transaction becomes available.

The definition and measurement of hospital markets is a hotly contested legal subject. As noted in the body of the report, for many years courts tended to assume that it was appropriate to entrust not-for-profit entities with market power because of their "charitable" nature. As courts began to take the threat to competition from consolidating non-profit hospitals seriously, the prosecution of anti-trust cases foundered on the use of analytic tools that fail adequately to account for the inelasticity of hospital demand.

In 1982, the FTC and Department of Justice Guidelines adopted a test that sets the boundaries of a monopoly market at the furthest limits at which a potential cartel or monopolist can impose a small but significant non-transitory increase in price ("SSNIP"). A SSNIP is generally assumed to be a 5% increase for a year without losing market share.

To define the SSNIP boundary, economists used two tests. For hospitals, the Elzinga-Hogarty test uses "patient flow" data to determine consumers' ability to enter and exit the market boundaries. Any boundary in which 10% or more patients leave to get care elsewhere is assumed to have enough competition to preclude anti-competitive behavior. "Critical Loss Analysis" examines the ability of firms to withstand profitably the loss of customers expected under a given market definition following a price increase. Once the market was defined,

analysts would then apply a measure of market concentration such as the Herfindahl-Hirschman Index (HHI) to determine the anti-trust risk.

E-H and CLA both proved inadequate for hospital mergers. Neither accounts for factors that influence patient choice other than price (3rd party payment, role of the physician, proximity, availability of subspecialty services, etc.). Standard CLA analysis often results in "inconsistent logic and erroneous conclusions." Use of these tools allowed hospital defendants to win a series of cases between 1997 and 2004 in part by successfully defining markets as large geographic areas within which any single combination of hospitals posed a minimal threat to competition.

Gaynor, Kleiner, and Vogt estimate that these older methods overstated the elasticity of hospital demand "by a factor of 2.4 to 3.4 and were likely a contributing factor to the permissive legal environment for hospital mergers." That permissive environment allowed 1,425 mergers and acquisitions to be consummated between 1994 and 2009. Dr. Elzinga himself questioned the value of his own test on hospital markets in 2011.

In the early 2000s, economists developed the "option demand" analysis (Town and Vistnes, 2001; Capps, Dranove, and Satterthwaite, 2003) and the Differentiated Bertrand Oligopoly Model (DB). These models attacked the issue of third party reimbursement by envisioning a hypothetical health plan attempting to construct a provider network in the region of the merging competitors. "This is a reasonable characterization of managed care markets," write Gaynor, et al., of the option demand model.

The new methods yield markets far smaller and closer to economic reality than the older tests, and

lead to clearer pictures of market concentration. According to Gaynor et al, they allow analysts “to assess merger effects without a market definition.”

However, they are not yet universally accepted in court, and even though the new methods are capable of assessing merger effects without a market definition, courts expect definitions and FTC guidelines for state Attorneys General insist on them as well. The new tools are powerful, and once we obtain data sufficient to apply them we will attempt to do so.

For our initial analysis, we have chosen to examine markets defined by the hospitals in their public descriptions of themselves. These analyses serve as an adequate preliminary basis for gauging the degree of concentration, and we examine several concentric markets that present analyses at varying scales of market definitions.

However, we recognize that in the policy process, any attempt at market definition will be contentious. Therefore, we urge regulators to heed the words of Kenneth Elzinga closely. In evaluating the usefulness of his original model in the context of

hospital mergers, Dr. Elzinga notes “where direct evidence of anticompetitive effects attributable to a merger is available, its use may diminish the need to rely on geographic market definition tools such as the E-H test,” writes Dr. Elzinga. “Such direct evidence is most readily available in post-closing merger challenges such as the FTC’s Evanston case.”

Connecticut patients cannot wait until Milford and L+M are fully in the Yale-New Haven orbit to understand the potential price impact of the deals. Although there is no direct evidence, there is a useful precedent. Yale-New Haven’s purchase of the Hospital of St. Raphael resulted in intense market concentration in the Greater New Haven area.

The Certificate of Need filed for that transaction in 2012 states that “YNHH has no plans to raise charges as a result of the HSR acquisition,” language similar to that in the Certificate of Need for L+M. If an analysis of the market before and after that merger reveals significant price increases, there will be little question that YNHHS exerts monopoly pricing power.

**APPENDIX B:
HHI TABLE, BEFORE AND AFTER BOTH HOSPITAL ACQUISITIONS, BY AREA**

Market name	HHI before	HHI after	Change
Lawrence + Memorial Primary Service Area	5087	6982	+1895
Lawrence + Memorial Secondary Service Area	3485	4598	+1113
YNHHS Local Service Area	2911	3735	+823
Greater New Haven (SCRCOG)	5665	6931	+1266
YNHH Primary Service Area	3920	4222	+302

**APPENDIX C:
MARKET SHARE AND HHI CALCULATIONS FOR L+M ACQUISITION ONLY,
WITHOUT MILFORD HOSPITAL ACQUISITION, BY AREA**

Data in this table include YNHHS's proposed acquisition of L+M, but not the addition of Milford Hospital. HHI increase is compared to HHI with the Yale-New Haven system as is.

Market name	YNHHS Discharges	HHI	HHI Increase
State	31%	1667	+254
Lawrence + Memorial Primary Service Area	83%	6972	+1884
Lawrence + Memorial Secondary Service Area	59%	4592	+1107
YNHHS Local Service Area	57%	3539	+628
Greater New Haven (SCRCOG)	79%	6309	+643
YNHH Primary Service Area	61%	3933	+14

EXHIBIT 6

Community Hospitals at a Crossroads

Findings from an Examination of
the Massachusetts Health Care
System

MASSACHUSETTS
HEALTH POLICY COMMISSION

Background of the report: building a path to a thriving, community-based health care system

The need for the report

- Hospitals and health systems across the country are facing **unprecedented impetus to adapt** to new care delivery approaches and value-based payments
- Community hospitals are under particular pressure to change and are uniquely challenged by **current market and utilization trends**, as evidenced by a number of recent consolidations, closures, and conversions in Massachusetts
- The state is pursuing sweeping delivery system transformation to achieve shared cost containment goals, and effective, **action-oriented planning is necessary**

Objectives of the report

- To understand and describe the **current state of and challenges facing community hospitals**
- To examine the implications of **market dynamics** that can lead to elimination or reduction of community hospital services
- To **identify challenges to and opportunities for transformation** in community hospitals
- To **encourage proactive planning** to ensure sustainable access to high-quality and efficient care and catalyze a **multi-stakeholder dialogue** about the future of community health systems

“ I don’t see any future for community hospitals...I think there’s a **fantastic future for community health systems**. If small stand-alone hospitals are only doing what hospitals have done historically, I don’t see much of a future for that. But I see a **phenomenal future** for health systems with a strong community hospital that breaks the mold [of patient care].”

COMMUNITY HOSPITAL CEO

Key themes of the report

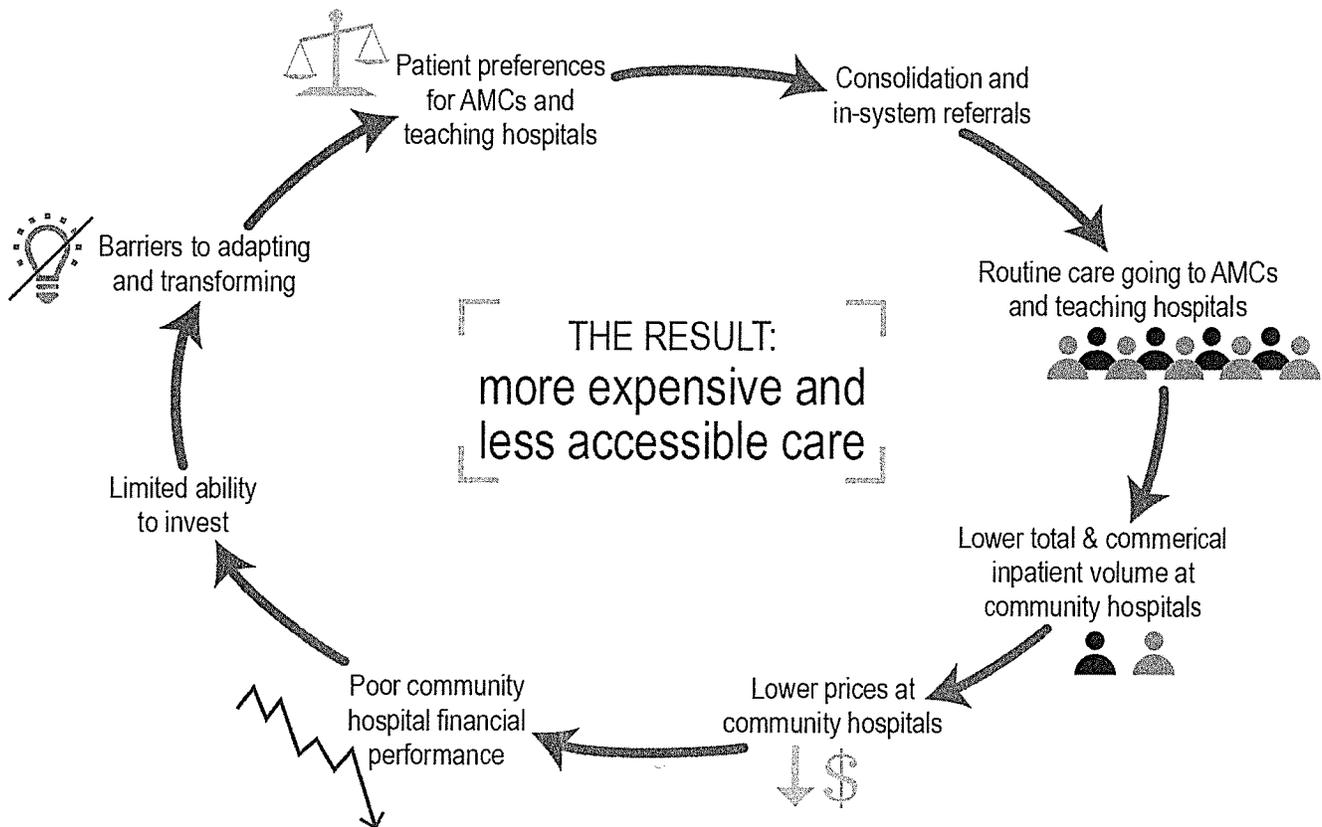

Community hospitals provide a unique value to the Massachusetts health care system

- While individual characteristics vary, as a cohort community hospitals play a critical role in care for publicly insured patients; providing local, community-based access; and, in particular, meeting behavioral health needs
- Community hospitals provide more than half of all inpatient discharges and more than 2/3 of all ED visits statewide
- Community hospitals generally provide high-quality health care at a low-cost, providing a direct benefit to the consumers and employers who ultimately bear the costs of the health care system

The traditional role and operational model for many community hospitals faces tremendous challenges

- Community hospitals generally have worse financial status, older facilities, and lower average occupancy rates than AMCs and teaching hospitals
- Many hospitals face barriers to transformation:
 - Consolidation of acute and physicians services into major health systems
 - Routine care going to AMCs and teaching hospitals
 - Lower commercial volume and prices leading to lack of resources for reinvestment
 - Difficulty participating in current alternative payment models

Community hospitals face self-reinforcing challenges that lead to more expensive and less accessible care

Community Hospitals at a Crossroads: Findings from an Examination of the Massachusetts Health Care System

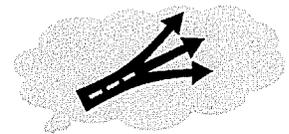

Overview

Value

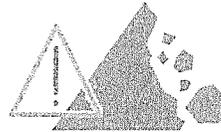

Challenges

Path Forward

- An **overview** of community hospitals in Massachusetts
- The **value** of community hospitals to the health care system
- **Challenges** facing community hospitals
- The **path** to a thriving community-based health care system

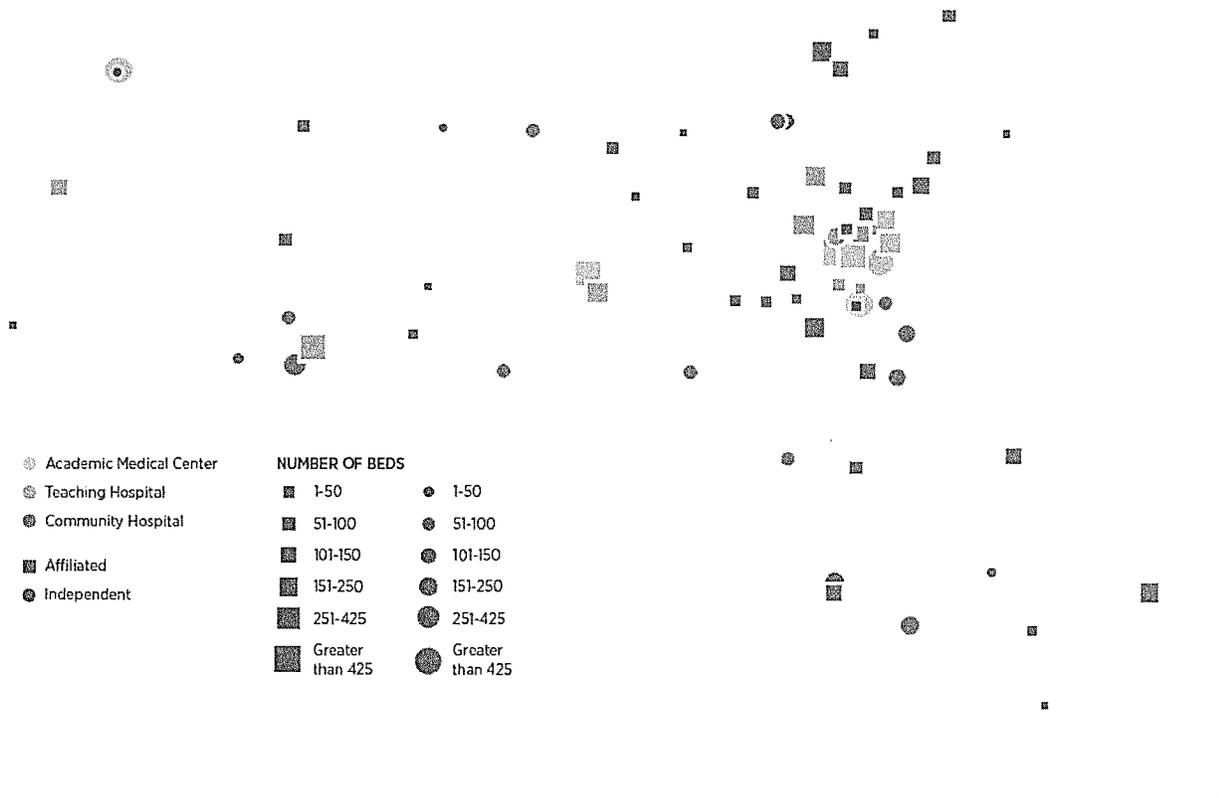

An overview of community hospitals in Massachusetts

Overview

- Key distinguishing features of community hospitals (geographic distribution, patient populations, services, financial condition)
- Key community hospital trends (transitions, consolidation and closure)

Community hospitals serve all parts of the Commonwealth

The value of community hospitals to the health care system

Community-based care and access

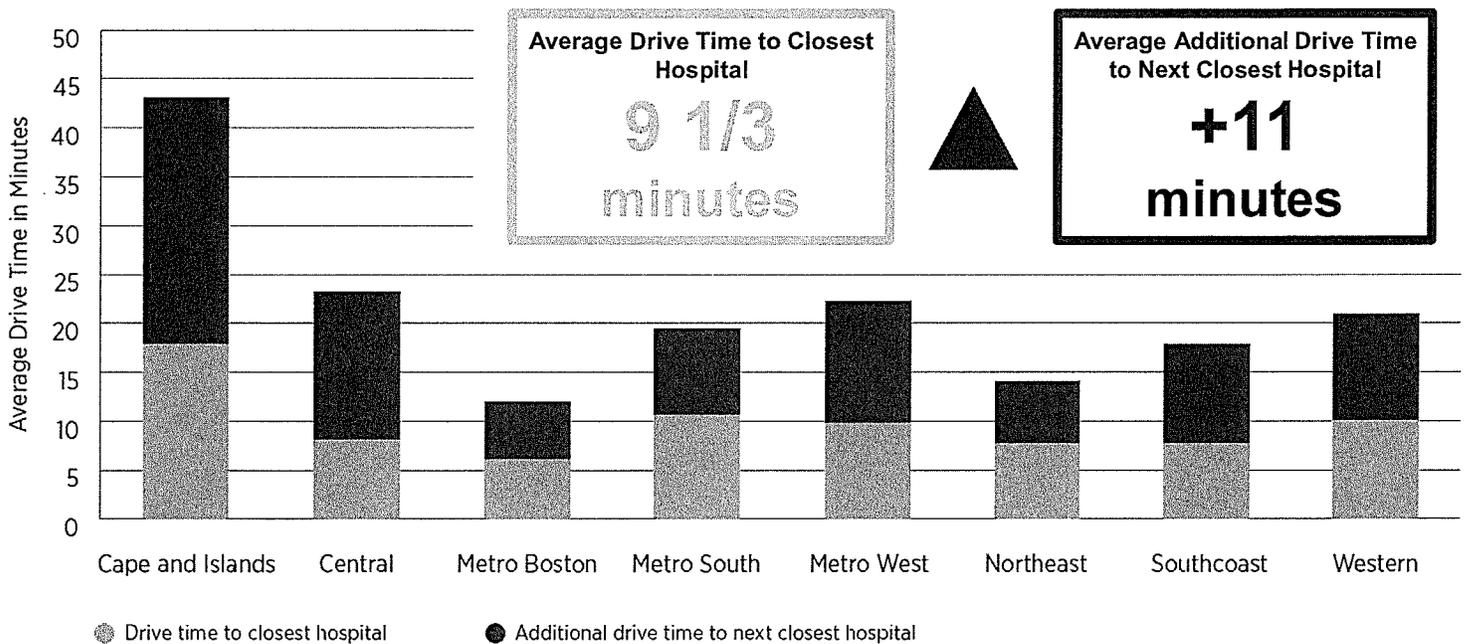

- Care close to home / drive time analyses
- Patient populations / payer mix

Quality and Efficiency

- Examination of quality performance by community hospitals and patient perception of quality and value
- Variation in spending and costs for community-appropriate care at community vs other hospitals

Community hospitals provide local access for local patients

Average Drive Times for Patients Using Their Local Community Hospital
Analysis of patients who use their closest community hospital as a usual site of care

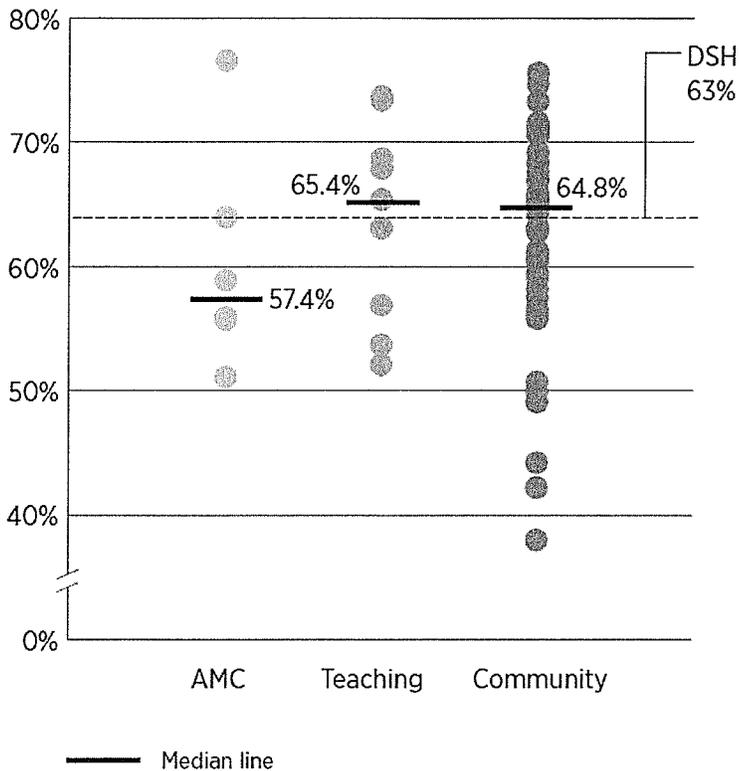

Source: HPC analysis of MHDC 2013 discharge data.

Notes: Drive times may underrepresent travel time and travel time differentials for populations relying on public modes of transportation. The Cape and Islands region includes only Falmouth and Cape Cod Hospital for the purposes of this analysis, since measuring drive times for Hospitals on Nantucket and Martha's Vineyard islands would not be meaningful.

Community hospitals serve a high proportion of vulnerable populations for whom access to care is often difficult, such as elders, individuals with disabilities, and individuals with low incomes

Percent of Hospital Gross Patient Revenue from Public Payers by Hospital Cohort, FY13

“ ”

The community hospital plays a role as a cultural and social staple for the community that it serves. It's the place you're born at, that you grow up with, and get most of your basic care at...The state should ensure access to community-based, cost-effective care

MASSACHUSETTS STATE LEGISLATOR

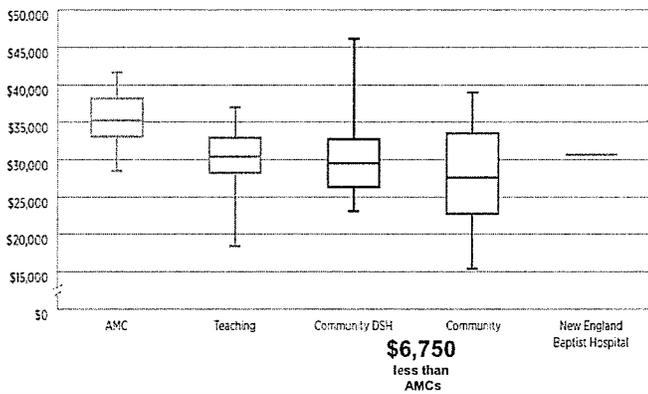

Source: HPC analysis of CHIA Acute Hosp. Databook, supra footnote 11, at Appendix D.

Note: Public payers include Medicare and Medicaid/MassHealth fee for service and managed care plans, Health Safety Net payments, and charges designated by hospitals as "other government."

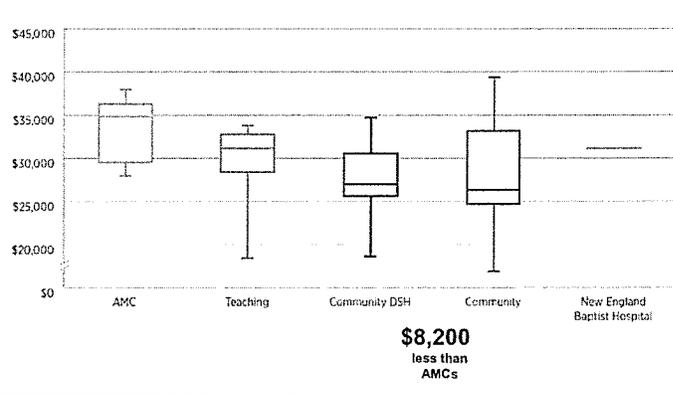

Spending at community hospitals is generally lower for low-acuity orthopedic and maternity care and is not associated with any difference in quality

Orthopedics

Hip Replacement

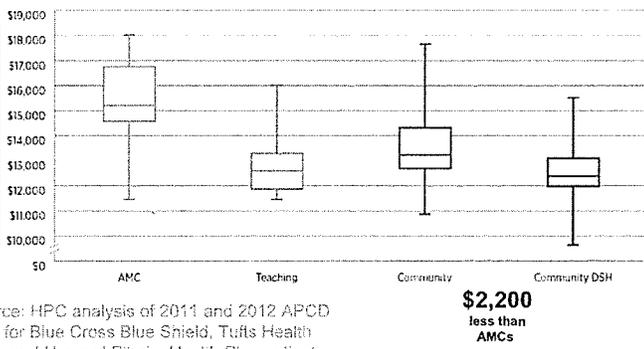

Knee Replacement

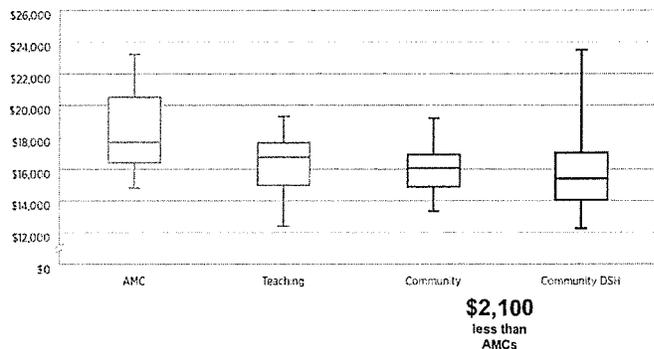

Deliveries

Pregnancy - Vaginal Delivery

Pregnancy - Caesarian Delivery

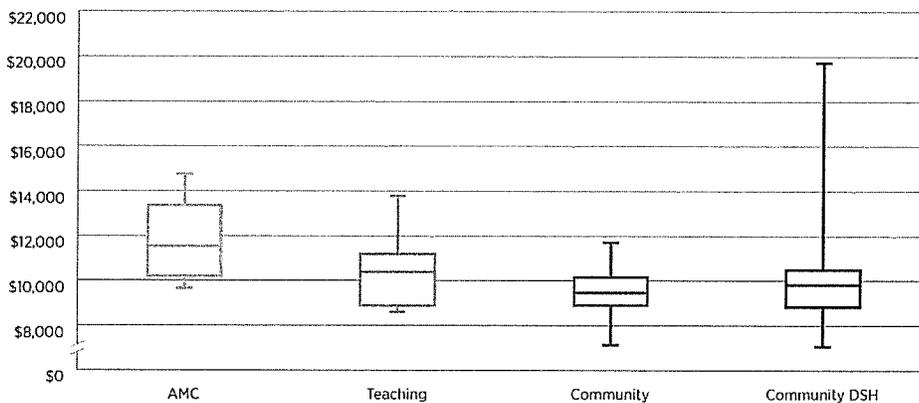

Source: HPC analysis of 2011 and 2012 APCD data for Blue Cross Blue Shield, Tufts Health Plan, and Harvard Pilgrim Health Plan patients

We found no correlation between hospital cost and quality. Each group of hospitals has higher and lower quality performers but no cohort outperforms any other overall.

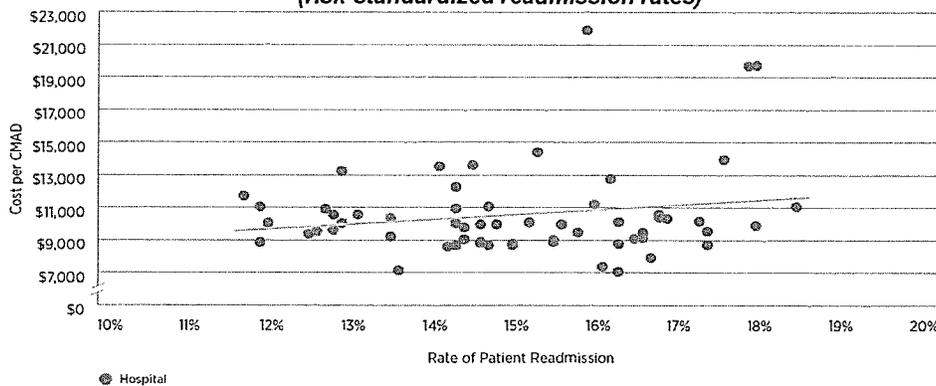

Most community hospitals provide care at a lower cost per discharge, without significant differences in quality

Hospital costs per case mix adjusted discharge, by cohort

Source: HPC analysis of CHIA Hosp. Profiles, 2013

Costs per CMAD are not correlated with lower quality (risk-standardized readmission rates)

● Hospital

Source: HPC analysis of CHIA Hosp. Profiles, 2013; CHIA Focus on Provider Quality Databook, Jan 2015

On average, **community hospital costs are nearly \$1,500 less per inpatient stay** as compared to AMCs, although there is some variation among the hospitals in each group

Although costs per discharge for community hospitals have grown at a slightly higher rate than those for AMCs, the gap between AMC and community hospital costs has not substantially changed

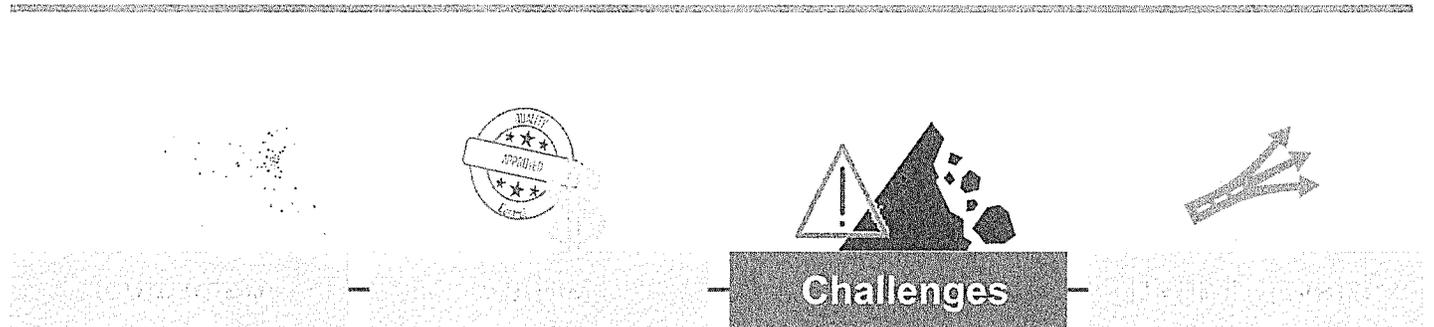

Reasons for differences in efficiency likely vary, and may include service offerings, support for teaching programs, and, particularly for community hospitals, the pressure of tight operating margins

Increases in health care spending on inpatient care would result from the closure of most community hospitals, due to commercial price variation

The HPC modeled where patients would likely seek care if community hospitals were to close and to estimate commercial spending impact.

- In most cases, a community hospital closure would **increase annual spending on inpatient care**
- **The majority of these increases would be less than \$4 million**, due to the disproportionately low volume of commercially insured patients at many community hospitals
- Spending would increase by **more than \$5 million for seven community hospitals**
 - The closure of **Lowell General Hospital** would cause the greatest increase: **over \$16 million**
- Spending would actually **decrease** in the event of the closure of any of eight community hospitals, primarily those with higher relative prices
 - The greatest decreases in spending would result from **South Shore Hospital (\$4.2 million annually)** or **Cooley-Dickinson Hospital (\$2.8 million annually)** becoming unavailable

Challenges facing community hospitals

- Referral patterns and consumer perceptions
- Consolidation of hospitals and primary care providers with large systems
- Decreasing inpatient volume and misalignment of supply and demand for hospital services (current and future)
- Payer mix, service mix, and variation in prices
- Competition from non-traditional market entrants
- Implications if current trends continue

Driven by referrals and perceived quality, many patients are choosing AMCs and teaching hospitals over community hospitals for routine care

HPC commissioned qualitative analyses (8 focus groups in four regions of the state) by Tufts University to better understand what drives consumer choices of hospitals

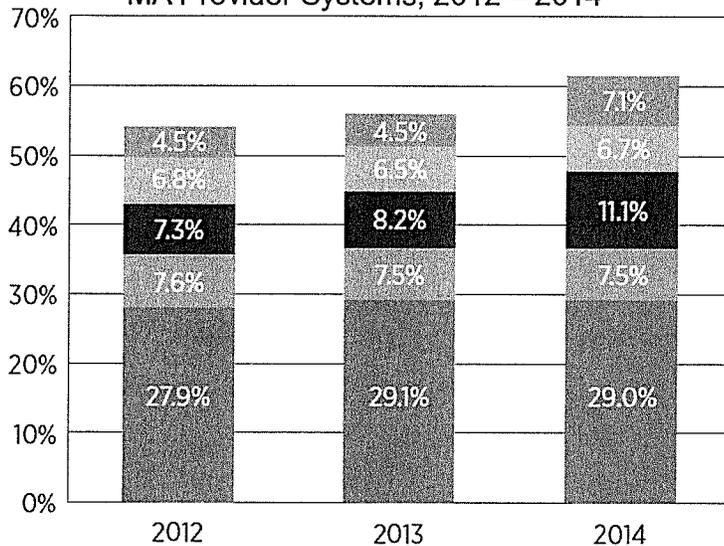

“ I guess it might be something in your psyche because I like brand-name products. So maybe that’s what drives me to Boston.”

FOCUS GROUP PARTICIPANT

- Patients often mentioned that **they did not feel that they had a choice** of hospitals because their primary care provider or insurance plan determined where they could go for care
- **Two in three Massachusetts adults** have **never sought information** about the safety or quality of medical care, instead valuing the experiences of peers and recommendations of their primary care physicians.
- Many patients stated that they felt that **AMCs and teaching hospitals were better** because they had the best physicians, including doctors who had graduated from medical schools they considered prestigious. Many patients indicated that they **believed AMCs and teaching hospitals had developed reputable brands**
- Some patients stated that the **higher costs of AMCs and teaching hospitals must mean that they provided better quality**, regardless of what quality data showed. Many also said they wanted to “get their money’s worth” from the health care system after investing heavily in health insurance coverage. Others reported that **cost is not a factor when it comes to health**

Increased consolidation of providers has driven referrals to large provider systems, including their anchor AMCs and teaching hospitals

Percent of Statewide Inpatient Discharges at the Five Largest MA Provider Systems, 2012 – 2014

- Lahey Health System
- UMass Memorial Health Care
- Beth Israel Deaconess Care Organization
- Steward Health Care System
- Partners Healthcare System

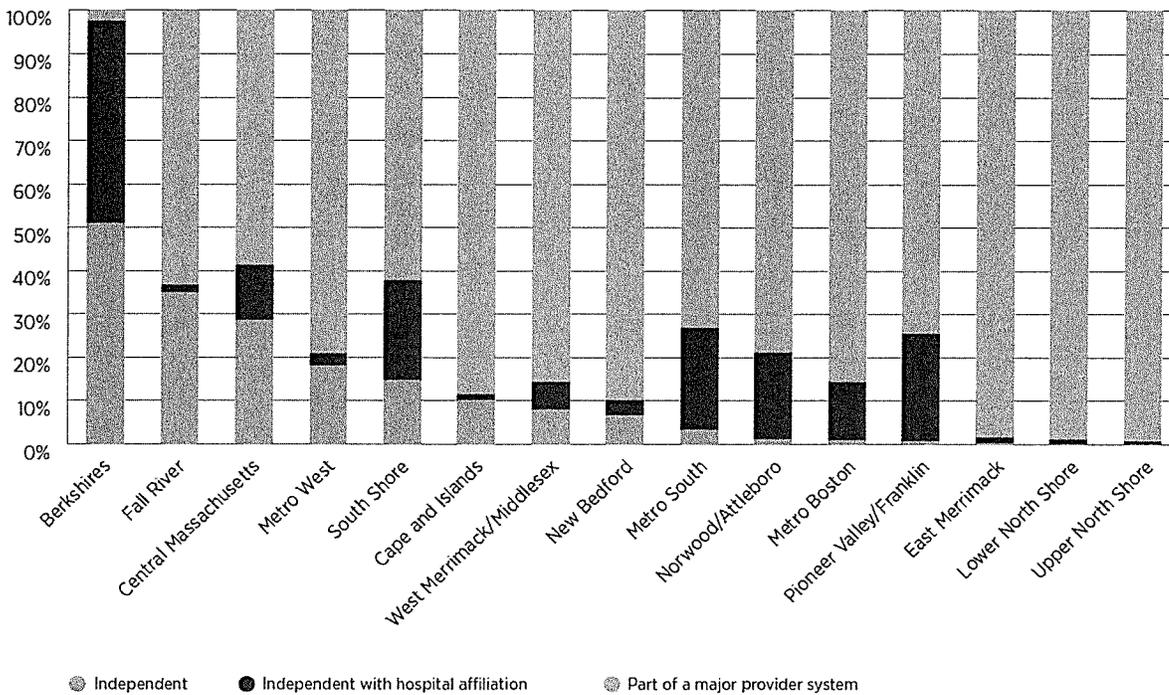

“Retaining primary care staff and specialists, ‘the gatekeepers to volume’ is challenging. Providers continue to leave for big-name systems and AMCs – and patients follow”

Synthesis of
MASSACHUSETTS PROVIDER INTERVIEWS

Source: HPC analysis of MHDIC discharge data.
Note: Systems shown have the highest total net patient service revenue among providers in the Commonwealth.

Most primary care services are now delivered by physicians affiliated with major provider systems

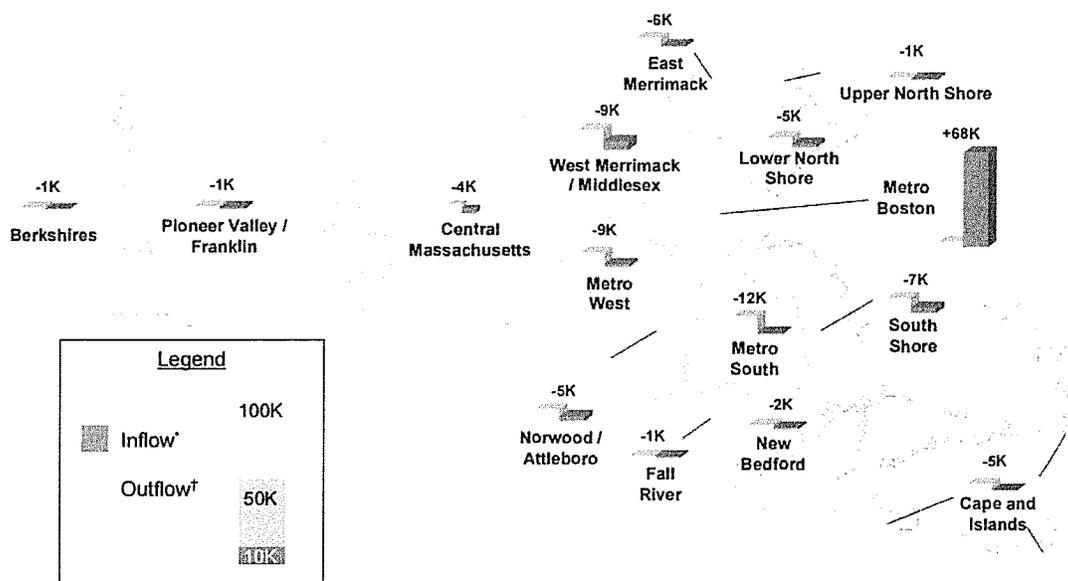

Percentage of Primary Care Services Delivered by Independent versus Affiliated Physicians by Region, 2012

Percentage of PCPs Affiliated with Eight Largest Systems Grew from **62%** in 2008 to **76%** in 2014

Source: HPC analysis of 2012 APCD claims for BCBS and HPHC; 2012 MHQP Master Provider Database.
 Note: For the purposes of this analysis, major provider systems include Aetna Health, Baycare Health Partners, Beth Israel Deaconess Care Organization, Lahey Health System, New England Quality Alliance, Partners Community Health Care, Steward Health Care Network, and UMass Memorial Health Care. PCPs affiliated with multiple systems are counted as being part of a major provider system.

Most Massachusetts residents who leave their home region for inpatient care seek care in Metro Boston at higher-priced hospitals

Commercially insured patients are most likely to outmigrate to Boston

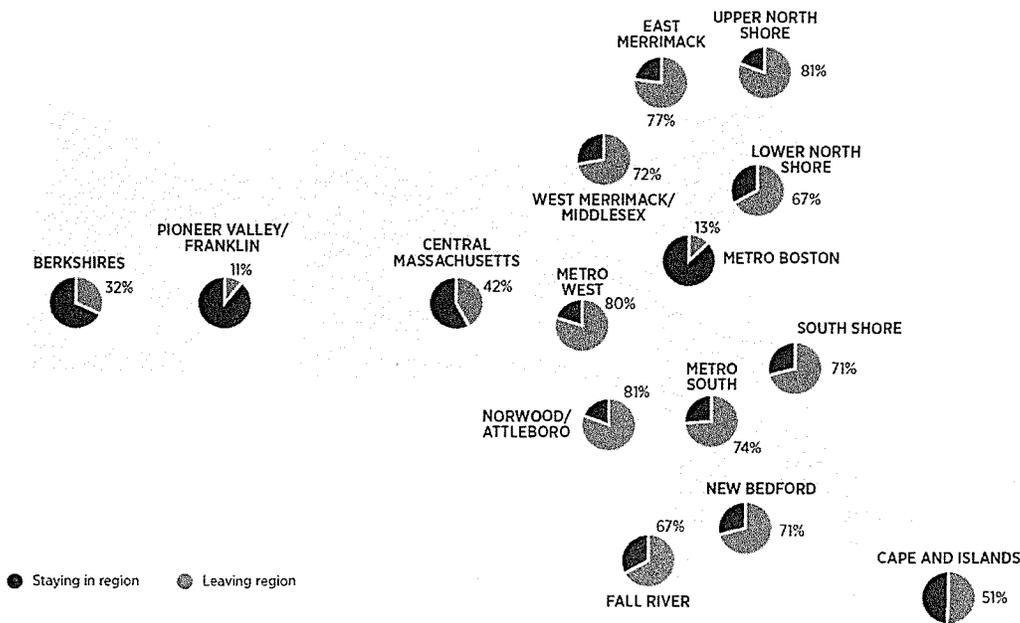

Patients from higher income regions are more likely to outmigrate to Boston

Trends hold across a variety of service lines, including deliveries

* Discharges at hospitals in region for patients who reside outside of region
 † Discharges at hospitals outside of region for patients who reside in region

Large proportions of patients leave their home regions for deliveries

Percentage of Patients Leaving their Home Regions for Community-Appropriate Deliveries, 2013

74% → 50%

change in proportion of all births in community hospitals from 1992 – 2012¹

¹Healthcare Equality and Affordability League. *Restoring Insurance in Massachusetts: Breaking the Vicious Cycle*

6 hospitals saw **53%**

of low risk births in 2011-2012. 5 of these hospitals had above average delivery costs.

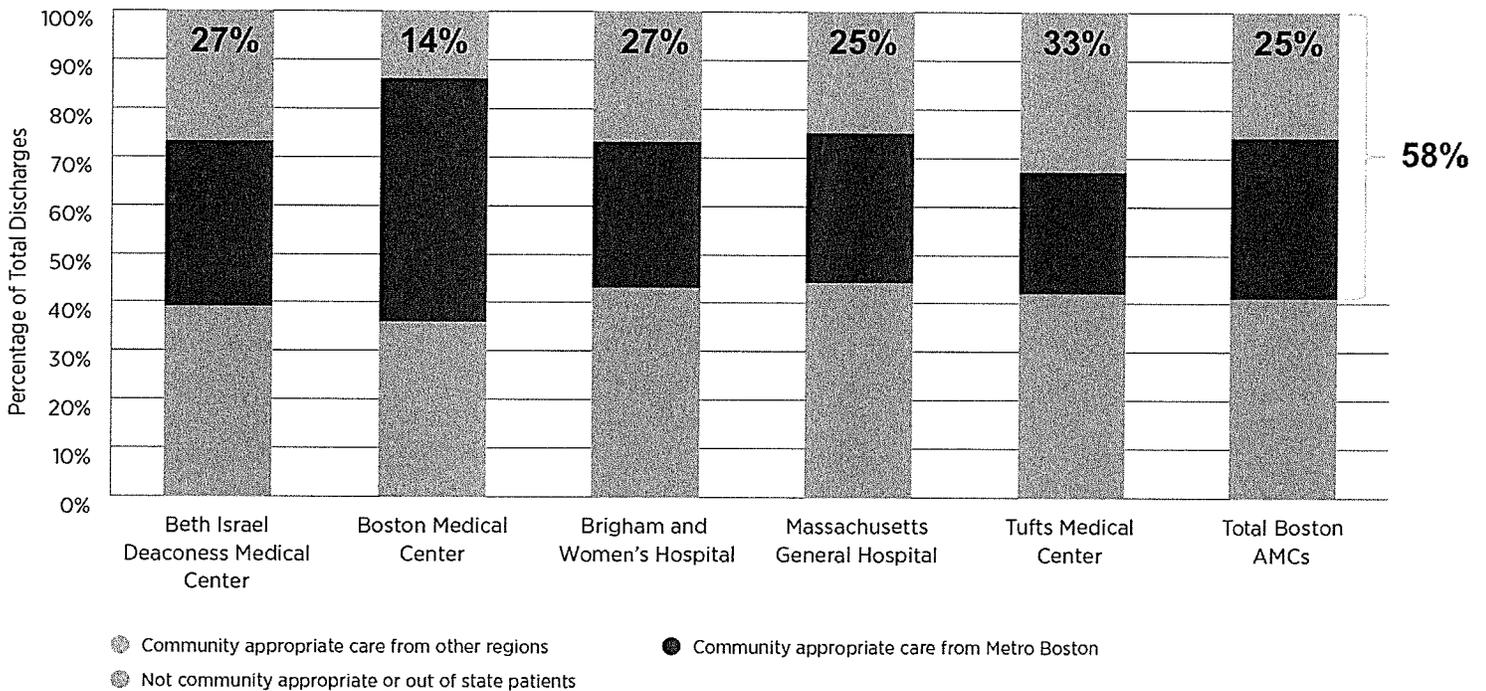

Massachusetts General Hospital and Brigham and Women's Hospital have highest costs statewide for maternity care and saw

20%

of all low-risk births in the state

A significant portion of the care provided at Boston AMCs could be appropriately provided in a community hospital setting

Inpatient Discharges at Boston AMCs, 2013
Community-Appropriate Volume as a Proportion of Total Volume

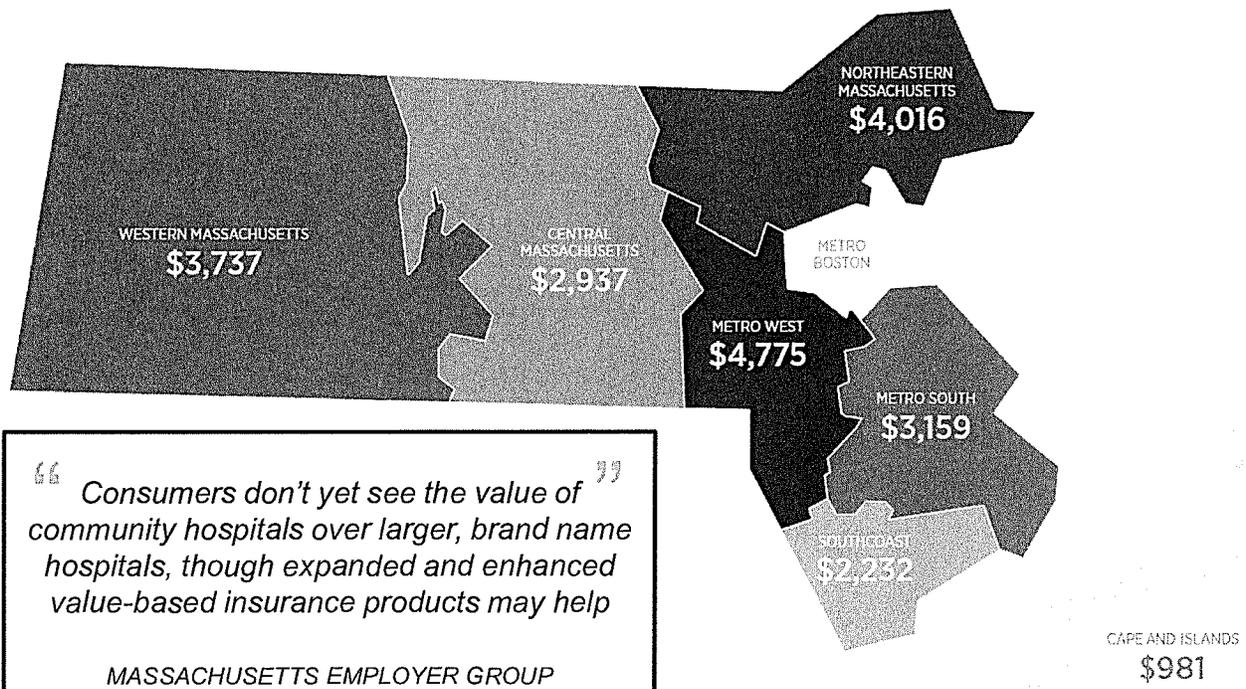

Source: HPC analysis of MHDC 2013 discharge data.

Note: Figure shows proportion of volume at each hospital, and does not reflect differences in total volume amongst the hospitals shown. Estimates of the volume of community appropriate care provide at AMCs are conservative as community appropriate care is defined to exclude cases which some community hospitals could effectively handle but that many community hospitals could not.

Patient migration to Boston increases health care spending

Average Additional Case-Mix Adjusted Cost for Each Commercial Discharge at a Boston Hospital Rather Than a Local Hospital, by Region of Patient Origin

“ Consumers don't yet see the value of community hospitals over larger, brand name hospitals, though expanded and enhanced value-based insurance products may help

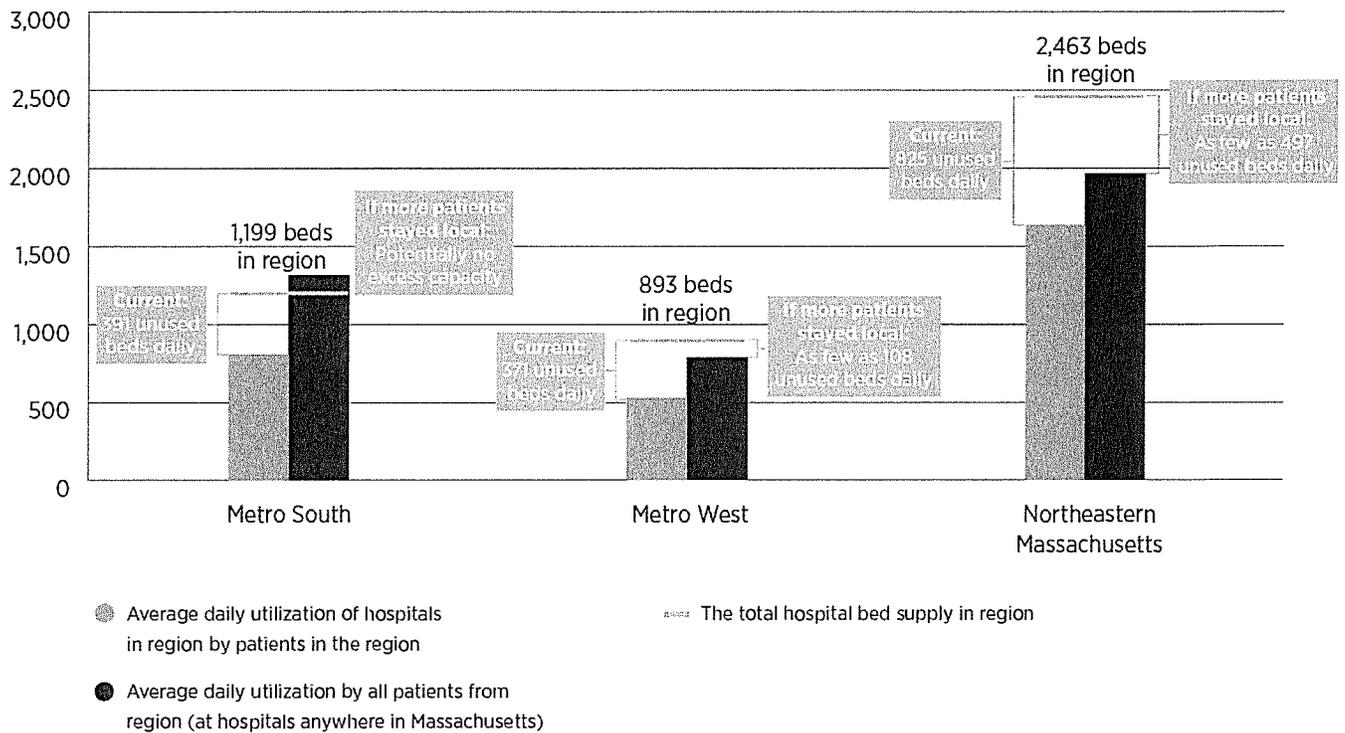

MASSACHUSETTS EMPLOYER GROUP

Source: HPC analysis of MHDC 2013 discharge data and raw CHIA relative price data.

Note: Figures shown are differences in average commercial revenue per CMAD for hospitals in each region compared to those in Metro Boston, adjusted for payer mix.

In most regions, hospitals have the capacity to treat more patients locally

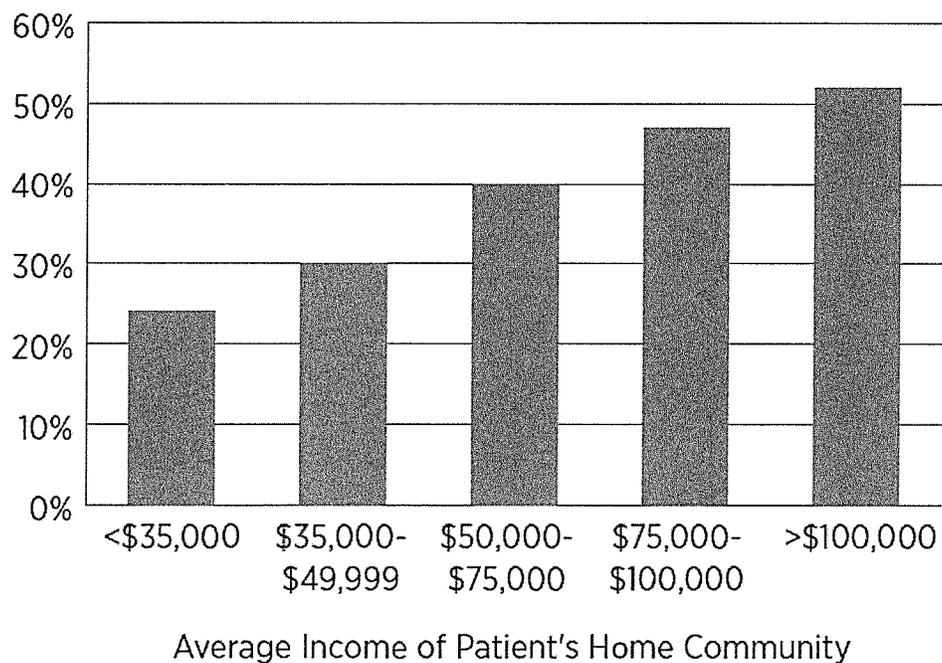

Average Use of Hospitals in Regions Neighboring Metro Boston versus Average Use of All Hospitals by Region Residents, 2013

Source: HPC analysis of MHDC 2013 discharge data and CHIA hospital 405 reports.

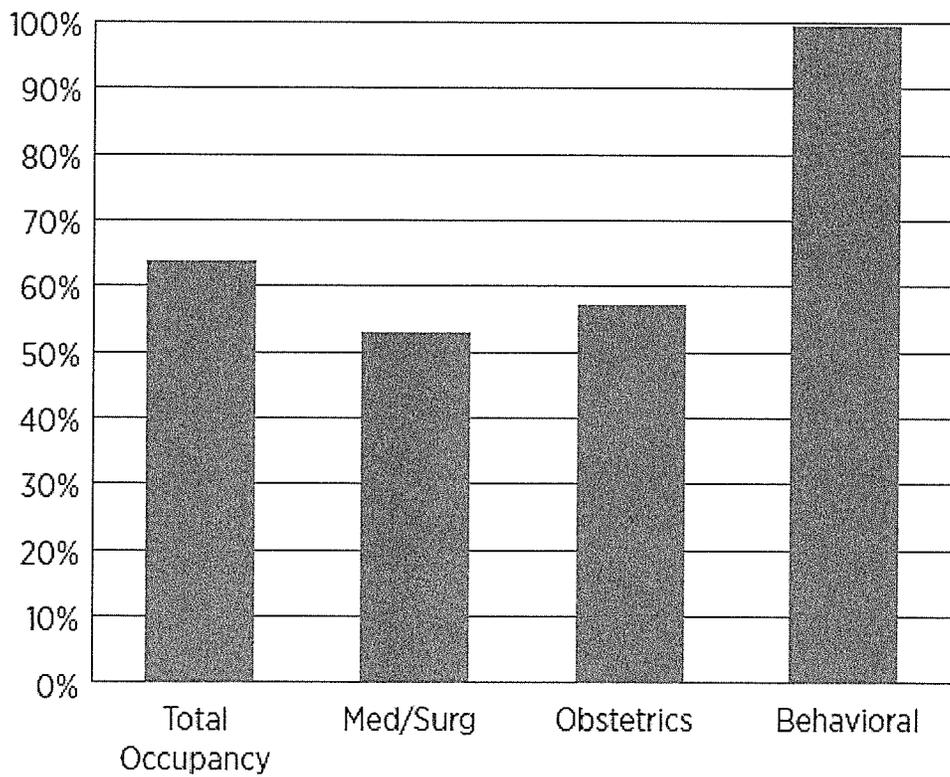

Commercially insured patients and patients from wealthier communities are more likely to migrate to Boston for care

Probability that Patient will Travel Outside of His/Her Home Region for Inpatient Care, Based on Home Community Income

In addition to lowering volume, migration results in community hospitals seeing larger proportions of government payer patients and those seeking low-margin services

Community Hospital Staffed Bed Occupancy Rate by Admission Type

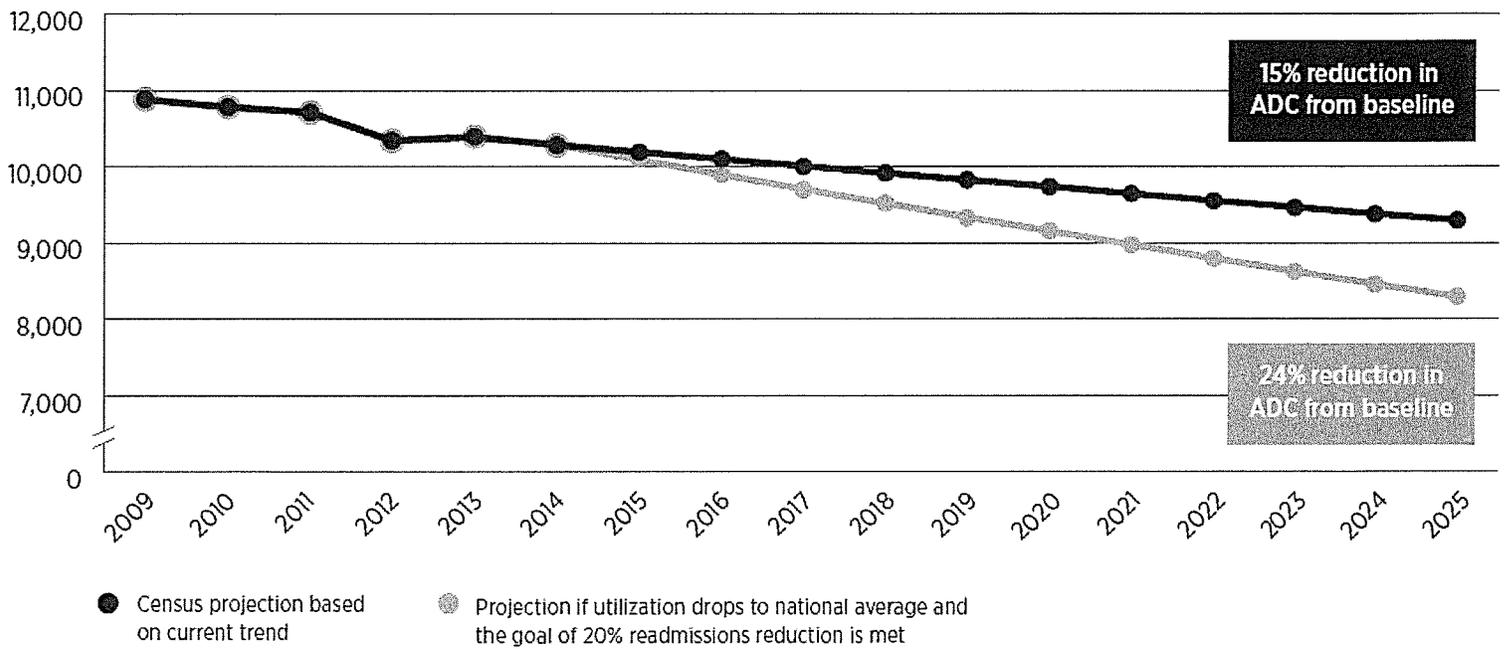

Boarding of behavioral health patients in emergency departments increased by 40% from 2012 - 2014

Source: HPC analysis of Department of Public Health data

Source: HPC analysis of NCHS 2013 discharge data and CHA hospital -09 rooms.

Declining inpatient utilization poses a structural challenge to the traditional community hospital model

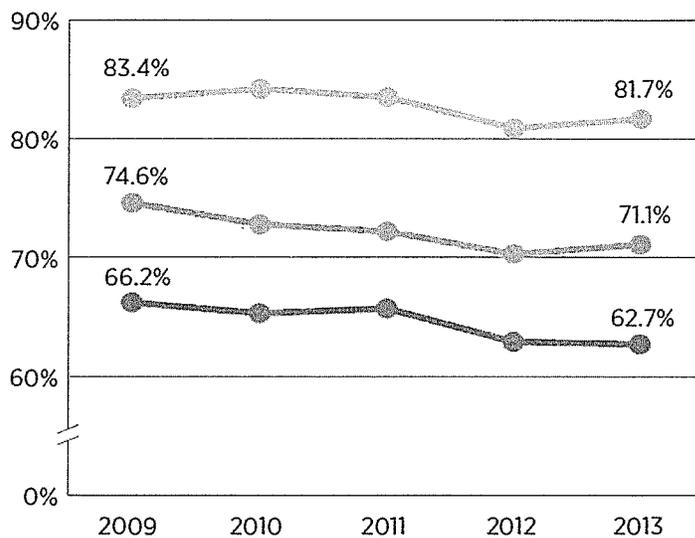

Total Average Daily Census Projections for all Massachusetts Hospitals, 2009 - 2025

Sources: HPC analysis of HPC database data, DHF hospital ADR records, HPI Financial Services, and population data from the Secretary of Massachusetts Department of State. Note: Projection based on current trend assumes a continuation of recent utilization trends. Inpatient services coverage is not adjusted for the population growth or other structural changes (e.g., the replacement of more beds or care from inpatient to outpatient settings). The alternate projection assumes a 100% reduction that would bring Massachusetts in line with national hospital inpatient bed a DRG with national standards and to the goal of reducing inpatient readmissions.

Community hospitals have lower average occupancy, and declining hospital utilization has further impacted occupancy rates

Total Inpatient Occupancy by Hospital Cohort,
2009 – 2013

If current trend continues,
community hospitals could
face average occupancy rates
of less than

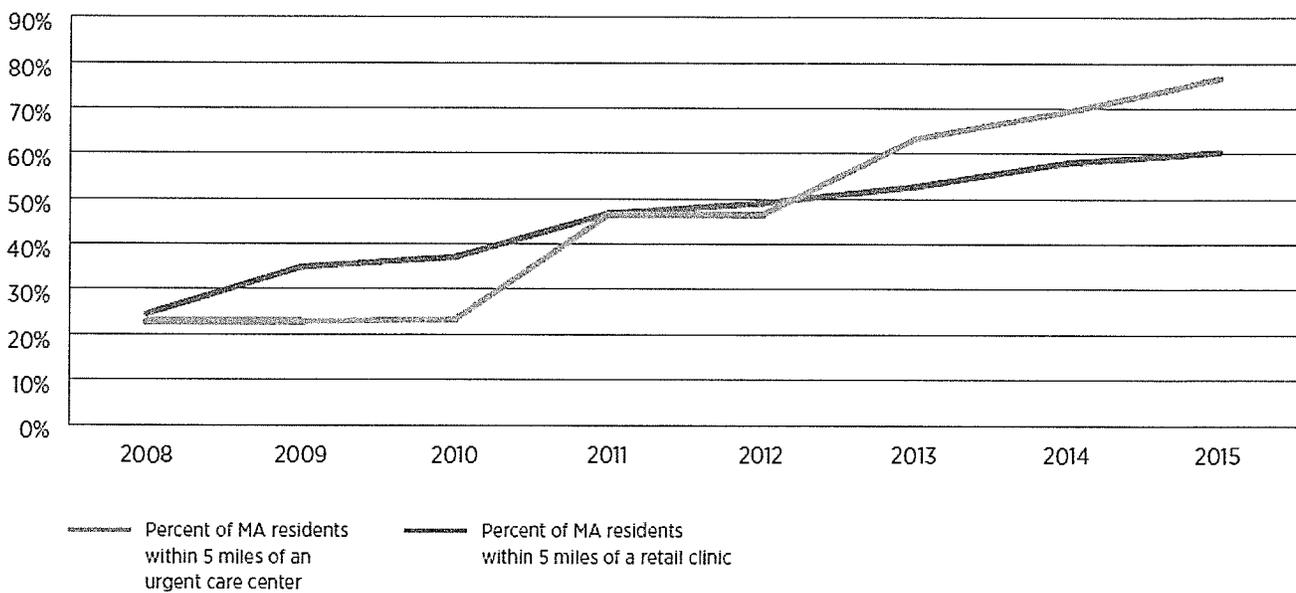

50% within
10 years

- AMCs
- Teaching Hospitals
- Community Hospitals

Sources: HPI analysis of ICD-9 discharge data and CHA hospital AOS reports.
Notes: Paired on assessment or discharge and average patient length of stay compared to bed counts. Bed counts as of 2013. Bed types include the medical surgical division (ICU), obstetric, behavioral, and neonatal (neonatal newborn bassinets are excluded).

Declining inpatient utilization is driven in part by growing accessibility of non-hospital health care providers

Percent of MA Residents Living Within 5 Miles of Retail Clinics and Urgent Care Centers

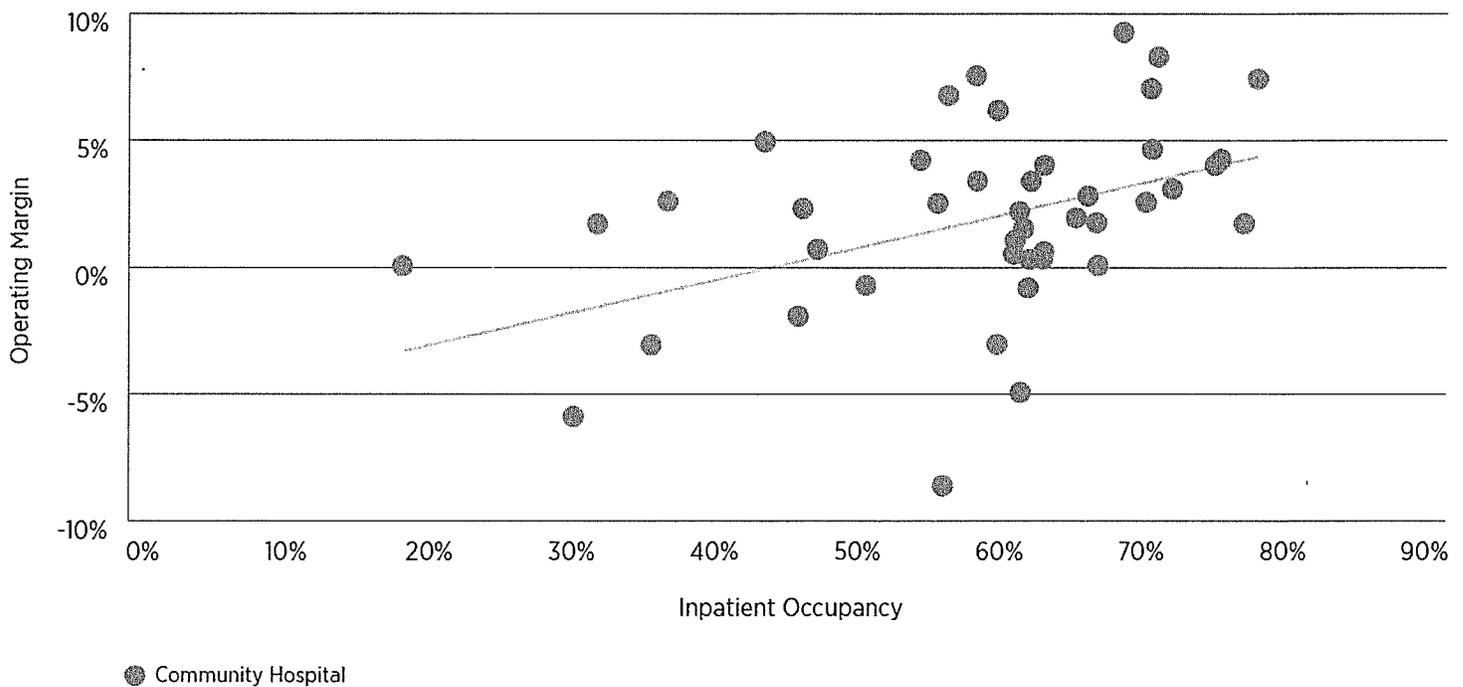

Source: HHS, Urban and Rural Health Atlas, 2014. Data for 2008-2010 is from the 2009-2010 Census. Data for 2011-2015 is from the 2013-2014 Census.

“ When [they] opened an urgent care center down the block we saw an immediate and precipitous decline in ED volume, especially the commercially insured, non-acute patients. It might be good for costs in the short term, but if we cannot keep our ED open, then what’s next? ”

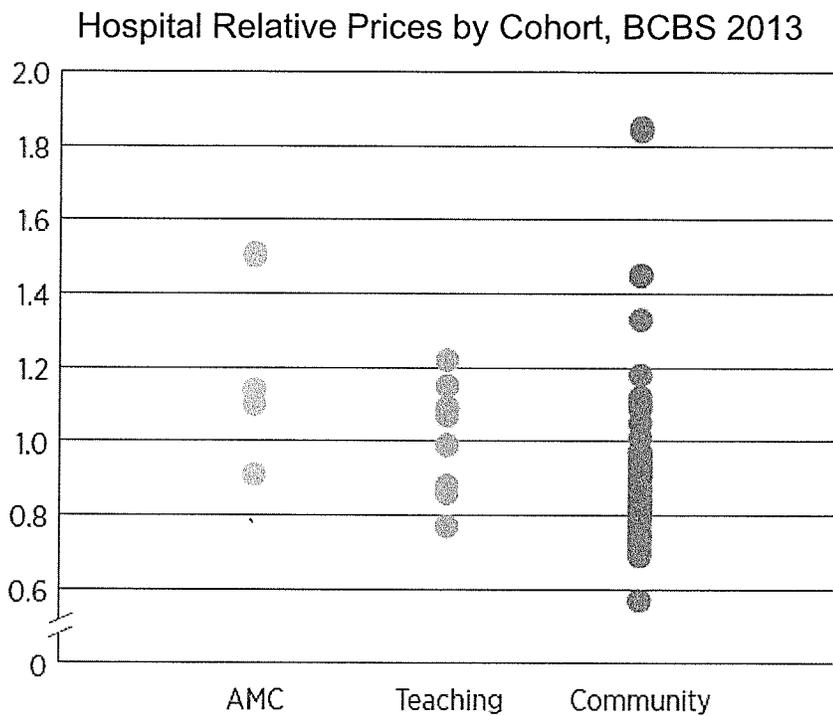

COMMUNITY HOSPITAL CHIEF STRATEGY OFFICER

Lower occupancy is associated with lower operating margins for community hospitals, and may threaten their financial stability

Massachusetts Community Hospitals
Inpatient Occupancy vs. Operating Margin, FY13

Community hospitals tend to receive lower commercial relative prices than AMCs or teaching hospitals

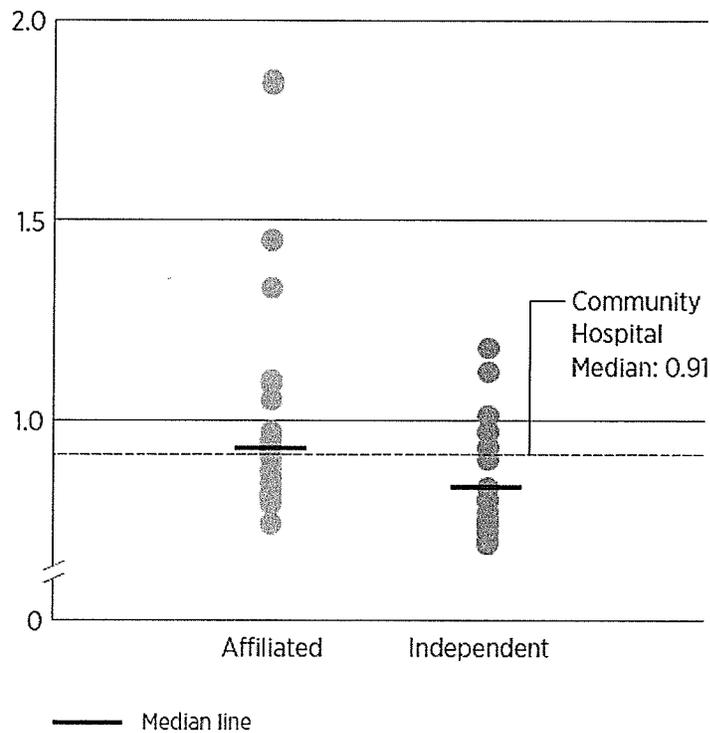

“The gap in prices, [which is] a reflection of the market power dynamics in the state, is probably the biggest threat to a lot of the community hospitals”

MASSACHUSETTS HEALTH INSURANCE LEADER

Sources: HPC analysis of Ctr. For Health Info & Analysis, Provider Price Variation in the Massachusetts Health Care Market (calendar year 2013 data), Databook (Feb. 2015), [hereinafter CHIA 2013 RP Databook] available at <http://chiamass.gov/assets/Uploads/relative-price-databook-2013.xlsx>

Community hospitals affiliated with systems tend to have higher relative prices

Community Hospital Relative Prices and Affiliation Status, BCBS FY13

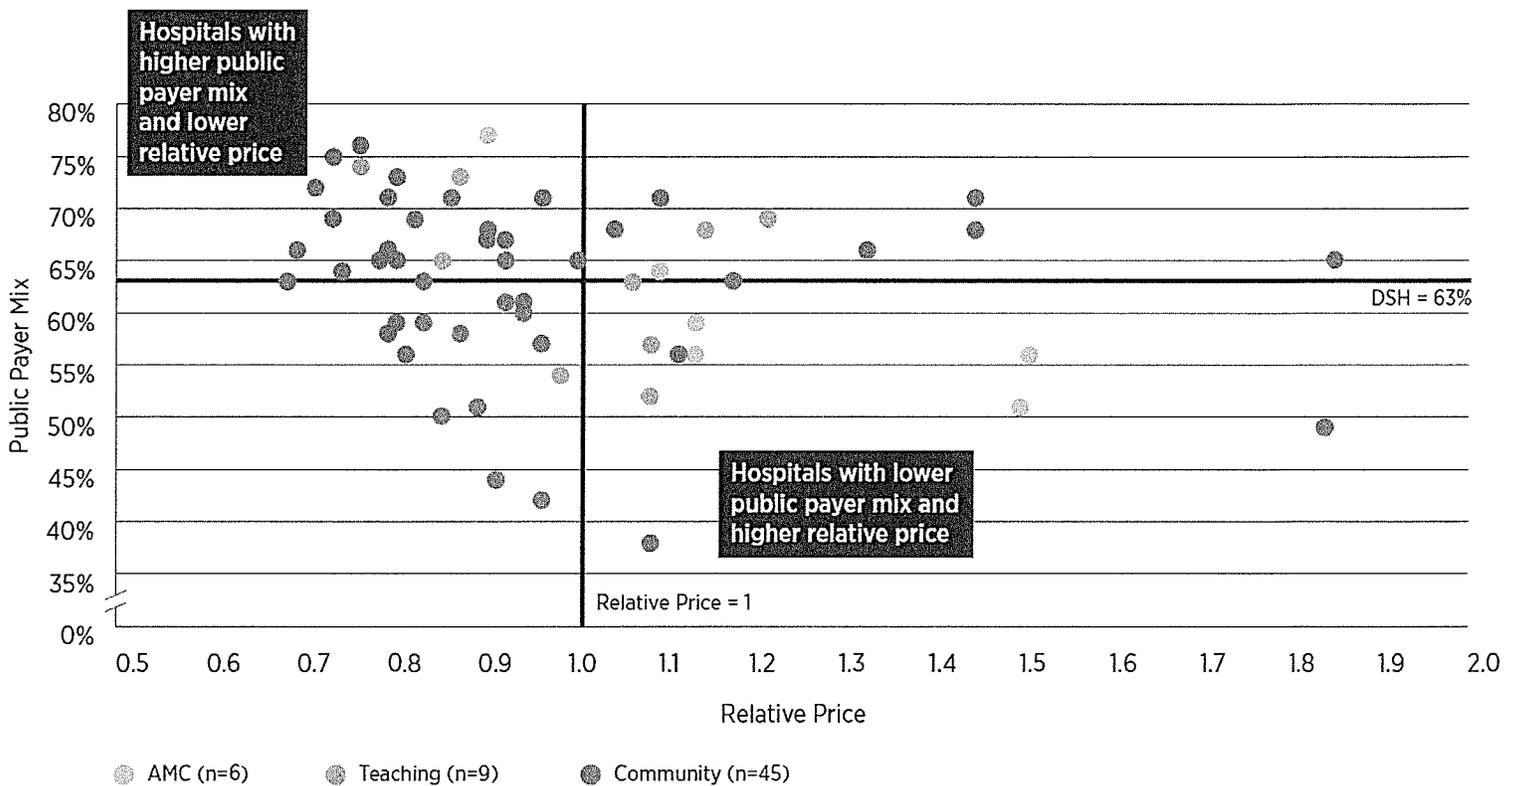

Source: HPC analysis of CHIA 2013 RP Databook

Note: While this graph shows relative prices for only one major commercial payer, price and affiliation status are similarly correlated for the other two major commercial payers.

Hospitals with higher public payer mix tend to have lower relative prices, compounding financial stresses; cross-subsidization of higher public payer mix with higher commercial prices is not observed

Hospital Commercial RP and Percent of Revenue from Public Payers by Cohort, BCBS FY13

Market participants report facing additional barriers to transformation

To successfully meet challenges and adapt to a changing delivery and payment system, community hospitals must overcome barriers and utilize resources and capabilities that may not be readily available. Barriers reported to the HPC during stakeholder interviews include:

- Lack of **resources**, including financial resources and the ability to attract and retain new staff.
- Lack of needed **data and analytic support** to enable transformation efforts, including a lack of information about health needs and coordinated health planning.
- **Concern about change** by hospital governing bodies and community representatives.
- Challenges **aligning the interests of hospital labor and management** to more effectively pursue transformation efforts.
- Difficulty participating in **alternative payment models**, including challenges under current risk adjustment methodologies for hospitals serving patient populations with socioeconomic disadvantages.
- **Insufficient alignment** among programs designed to fund or assist transformation efforts.
- **Policy or regulatory frameworks** that limit deployment of new structures of care.

The path to a thriving community-based health care system

- Most patients should get most care in an efficient and high-quality setting close to home
- Providers must adapt to make this possible, and incentives and policies should align to support them
- Call to develop an Action Plan in concert with market participants

Building a path to a thriving community-based health care system

Vision of Community-based Health

A health care system in which patients in Massachusetts are able to get most of their health care in a local, convenient, cost-effective, high-quality setting.

- **The traditional role and operational model for many community hospitals faces tremendous challenges:**
 - evolution in the health care delivery and payment system
 - persistent market dysfunction → resource inequities and overreliance on higher cost care settings

- **A re-envisioning of the role of community hospitals will require:**
 - development of a roadmap for care delivery transformation focused around the community
 - planning and investment for better alignment of providers with community needs

- **Multi-sector dialogue** is necessary to build consensus and identify a series of targeted actions to be taken by providers, payers, consumers, and government

Fostering dialogue and developing an Action Plan

Community Hospitals at a Crossroads: A Conversation to Foster a Sustainable Community Health System

Developing a successful path to a thriving community-based health care system requires multi-stakeholder engagement and incorporation of many diverse viewpoints.

The report findings are designed to spur market-wide dialogue and support identification of priority actions to be taken by providers, payers, purchasers and government.

March 29, 2016 at 9:00AM at Suffolk University School of Law

The HPC Commissioners and staff will convene industry leaders and stakeholders to discuss findings from the report and its implications for transformation of the Commonwealth's community hospitals. Interested members of the public are invited to attend: register online at www.mass.gov/hpc

In collaboration with stakeholders, HPC will develop an Action Plan to address findings of the report. Action Plan recommendations will be oriented towards providers, payers, purchasers and policymakers

Key themes for further discussion, consensus-building, and action planning

Community Hospitals at a Crossroads: A Conversation to Foster a Sustainable Community Health System

*Planning and support for community
hospital transformation*

*Encouraging consumers to use high-value
providers for their care*

*Creating a sustainable, accessible, and
value-based payment system*

“ We need to **stop playing defense and start playing offense**. This [challenge of supporting community hospitals] is one of the most complex health policy issues we have, but we cannot keep just relying on short term fixes. These hospitals are the backbones of our communities — we owe it to our communities to come together to develop a plan for their future

MASSACHUSETTS STATE LEGISLATOR

TESTIMONY to the Office of Health Care Access
July 1, 2016

Re: CON application regarding acquisition of Lawrence & Memorial Hospital and its physicians' group by Yale-New Haven Health System

Ellen Andrews, PhD, Executive Director

My name is Ellen Andrews. I reside at 49 Wilkins St., Hamden Connecticut. I am Executive Director of the Connecticut Health Policy Project. I'm here today to urge OHCA not to approve the application of Yale-New Haven Health System to take over Lawrence and Memorial Health.

We are in the midst of enormous transition in our health care system. The Affordable Care Act has enabled 16 million Americans to gain health insurance coverage, and covered thousands of Connecticut's previously uninsured residents. The ACA offers ongoing incentives and supports to help our state get coverage for the remaining 250,000 uninsured that live in Connecticut.

But not all the news is good. The continued consolidation of providers and insurers is driving an ongoing cost spiral that threatens to undo much of the positive change that we've seen in the past few years. . Dr. Hyde has described the overwhelming body of research demonstrating that as competition is drained from our health care system, costs inevitably go up, and consumers lose choice.

The Connecticut Health Policy Project is particularly concerned about the impact of these trends on low income and underserved communities, the state budget and the growing trend of underinsurance among those with private coverage.

Connecticut has received national recognition for its work reining in Medicaid costs.¹ We are the only state to take back Medicaid recipients from private managed care plans and negotiate provider rates ourselves. That decision and resulting reforms has reduced per member costs, increased the number of physicians participating in the Medicaid program, and reduced emergency room visits. More people covered for less money seen by more providers and better quality care in the appropriate setting. Sounds like a win.

But it hasn't been enough. Underlying provider prices are destroying access to care for many in our state. Due to budget constraints, 11,677 working parents are losing HUSKY coverage at the end of this month. Medicaid beneficiaries in high cost areas like New Haven still struggle to get appointments. HUSKY families "transitioning" to coverage in AccessHealthCT insurance plans, our state's health insurance exchange, are expected to meet a \$500 deductible and spend 10-12% of their income on health care. Enrollees in AccessHealthCT plans face enormous

¹ Melinda Beck, "Connecticut Moves Away From Private Insurers to Administer Medicaid Program," *Wall Street Journal*, March 18, 2016. <http://www.wsj.com/articles/connecticut-moves-away-from-private-insurers-to-administer-medicaid-program-1458325696>

deductibles as subsidies decrease up the income scale. Even workers with decent jobs are increasingly stuck in cost-prohibitive plans. Nearly a quarter of workers are in high deductible plans, up from just 4% in 2006. According to the Kaiser Family Foundation deductibles have increased at nearly seven times the rate of workers' earnings.

Some policymakers insist that high cost sharing is necessary to reduce excess utilization. But utilization isn't really our main problem. Despite progress, Medicaid members, the remaining uninsured and the growing ranks of underinsured state residents still struggle to access recommended care. The US has the highest health care costs by far in the world – we spend twice as much per person on average as the rest of the world, and nobody spends even three quarters as much as we do. Except for Switzerland, we already have the highest out of pocket costs. So if out of pocket costs are the solution, why isn't the problem solved?

As Dr. Hyde's literature review shows, our problem is price, not utilization, and monopoly creates a disaster for prices. Jason Pelletier's testimony contains a shocking fact – workers at a corporate cafeteria run by a global food service company serving food to workers at one of the most profitable companies in the world are forced to go without health insurance or be covered by state assistance programs because their premium share is too high. Shame on those employers, but let's not kid ourselves. Employers are fighting with workers over premiums because underlying provider prices are forcing them to.

And when you lose your coverage, or your deductible goes up to five thousand dollars, what happens? You go to the doctor, and, now that the hospitals are buying up all the doctors, you get charged a facility fee for the privilege of seeing a new sign on your doctor's office door. You find yourself choosing between rent, food, and the electric bill for your family or going to the doctor for yourself.

To approve this CON, OHCA must look the public in the eye and say "Yale is different." Unlike all the other giant monopolies, Yale will throw away its monopoly bargaining advantage and keep prices low. Or you must say "New London County is different." For some reason Yale won't buy up all the doctors the way they have in the New Haven area.

No one can take those arguments seriously. One of the few things that Yale's proposed \$300 million investment clearly identifies as a specific priority is physician recruitment. To most of us, that suggests recruiting neurologists to move to New London so that telemedicine visits or an hour's drive to New Haven aren't patients' only options. But Yale's past behavior in the New Haven area suggests that money is earmarked for physician practice acquisitions – which means more market power, more facility fees, higher prices and people skipping needed care because of cost.

Perhaps the most telling passage in the CON can be found on page 34. Asked how "low income persons, racial and ethnic minorities, disabled persons and other underserved groups" will benefit from the proposal, YNHHS replies that L+M and YNHHS provide services to the uninsured, underinsured and all patients regardless of race, ethnicity, income or ability to pay. "That will not change as a result of this proposal."

The proposal offers no visions for improvement of services to underserved populations save for the general clinical benefits presumed to accrue to all patients. One must assume that this, like so many other specifics, would be left to the post-acquisition strategic planning process to decide. The rest of us are supposed to wait and hope.

As a member of the Governor's Health Care Cabinet, I view this proposal as the leading example of one of the most dangerous trends in health care, and one of the few key issues we must grapple with to set Connecticut on course

for an accountable 21st Century health care system. I urge you not to rule on this application until my colleagues and I, and our counterparts on the Certificate of Need Task Force have completed our recommendations. If you must rule before that, you must deny the application. Without dramatic changes to address the issues of access, price and quality within a framework of true accountability to the community and protections for underserved and at-risk residents, you must deny it whenever it ripens for decision. There is no public need for this deal and very great risk to state residents and the state's budget.

Pre-file testimony from Stephen R. Smith, M.D., M.P.H.

My name is Stephen R. Smith, M.D. I am a professor emeritus of family medicine at the Warren Alpert Medical School of Brown University. I live in New London.

I am a family physician working at the Community Health Center of New London. I also speak on behalf of the National Physicians Alliance in Connecticut. This group includes physicians from a variety of different specialties who serve on the medical staff and/or work as community-based physicians who refer their patients to either Yale/New Haven Hospital or Lawrence and Memorial (L+M) Hospital.

I am also speaking on behalf of the Universal Health Care Foundation of Connecticut in my capacity as a member of the board of directors of the Connecticut Health Advancement and Research Trust (CHART), the parent organization of the foundation.

I am a lifelong resident of New London residing at 899 Montauk Avenue and have served on the medical staff at Lawrence and Memorial Hospital in the past.

The initial position that the Office of Health Care Access should take when considering any hospital merger or acquisition is that such mergers are not in the best interest of the public and should be denied. As our testimony has previously shown, hospital mergers are, by their very nature, anti-competitive and generally lead to higher prices without concomitant improvements in efficiency, quality, accessibility, or accountability. Mergers and acquisitions should be permitted *only* when convincing evidence has been presented demonstrating that no other means is available to achieve the purported goals of the merger that would serve the community's interests in preserving high-quality, affordable, and accessible health services.

The proposed acquisition of L+M by Yale/New Haven Health Services Corporation does not demonstrate any compelling public interest, or evidence suggesting a public good.

Close clinical coordination and cooperation is already achieved between the two institutions and with health care providers in the community without the benefit of formal acquisition.

As a family physician working in an independent community health center in New London, I already have instant access to the L+M computers to obtain laboratory data, x-ray reports, emergency room reports, and hospital discharge summaries on my patients. If a patient of our health center is seen in the emergency room at L+M, procedures already exist that allow the emergency physician to schedule a visit for the patient with us within 24 hours. Yet our community health center and L+M are separate, independent entities.

I already have excellent relationships with the specialists at Yale/New Haven, many of whom have office hours at L+M for the convenience of our patients. Yale/New Haven specialists have often called me on the telephone to discuss mutual patients with serious vascular problems and pulmonary conditions. At their behest, I have seen the patients and ordered tests and managed their conditions in between visits to the specialists in New Haven. All of this is done without the need for one hospital to “own” the other, especially given all of the bad results from such ownership.

The neonatal intensive care unit at L+M is already staffed by Yale/New Haven neonatologists. The NICU staff already arrange for babies to be seen within 24 hours at our community health center following their discharge. This occurs without the necessity of L+M being owned by Yale/New Haven.

This and other evidence demonstrates that close clinical coordination and cooperation already exists between L+M and Yale/New Haven. This clinical coordination already exists between Yale/New Haven personnel and community health providers in the New London area. The formal acquisition of L+M by Yale/New Haven is neither required nor justified to achieve clinical goals—that is, to serve our patients.

Should the Office of Health Care Access nevertheless consider approval of such an acquisition, it must condition such an acquisition on agreement by both parties to stipulations that would safeguard health care services in Southeastern Connecticut. These stipulations should be in force for at least 10 years and would include:

- Retaining existing health services in the New London community and not outsourcing them to other Yale hospitals or relocating them to more affluent communities in the L+M service area
- Freezing the prices charged and negotiated by L+M to existing levels with annual increases no greater than the Consumer Price Index
- Ensuring help with any transportation for health care that has to be delivered at another hospital
- Expanding health services to Southeastern Connecticut by fully funding and implementing all the recommendations emanating from the 2016 Community Health Needs Assessment conducted by L+M and the Ledge Light Health District
- Requiring that L+M and Yale/New Haven negotiate with a representative cross-section of the community a written Community Benefits Agreement with binding commitments enforced by an independent monitor on the issues of access, affordability, community benefits, efficiencies and jobs
- Assuring that L+M Hospital remains under the control of a locally controlled and locally elected Board of Directors with decision making authority and accountability to the community.

The Office of Health Care Access must consider this proposed acquisition in the context of the entire state's health care system. Consolidation of the health care system is not in the best interests of patients or communities. Consolidation weakens accountability to the communities these hospitals serve. Consolidation erodes competition and innovation, increase costs, and provides little or no additional benefits in terms of quality, safety, or accessibility.

I urge the Office of Health Care Access to deny the proposals to transfer ownership of L+M to Yale/New Haven Health Services Corporation and the merger of L&M Physician Association, Inc. into Northeast Medical Group, Inc.

Stephanie Johnson, RPSGT
President, AFTCT Local 5051 LPN/Technologists

Pre-filed Testimony
July 1, 2016
Office of Health Care Access

My name is Stephanie Johnson and I am the president of AFTCT Local 5051 which represents more than 270 LPN's and Technologists at Lawrence Memorial Hospital. I am a 15 year employee, the last 13 years being in my current position as a polysomnographic technologist and a resident of East Lyme. Today I am here to ask you, Office of Health Care Access, to follow Governor Malloy's directive to hold off on this takeover of Lawrence Memorial Hospital by Yale New Haven Hospital.

As a caregiver in the hospital and as president of the union, I have seen many changes and understand that sometimes change is necessary. In this instance I would say that not only is this change for the sake of change but also the changes that are made can be devastating to our community. I have reservations about many things but primarily I am concerned about access to the quality care that we provide. I think it is irresponsible for a community hospital to not be there for the region we are supposed to be here to care for. The story has already played out in Windham, how long before it reaches New London and Westerly?

I was at a meeting held jointly by L&M and Yale recently and heard for myself from Bruce Cummings, CEO of L&M Hospital that Westerly Hospital does not have the physical footprint that the hospital needs to do inpatient and outpatient services. As an employee of the New London hospital, which is also land locked and has constraints that might prevent future growth, how long until we are told that the services we provide are not going to continue. How far will our patients have to travel to receive care? I am not just a care giver but I also utilize the hospital for my care. I was born at Lawrence and Memorial Hospital, gave birth to my son there and have said final good byes to close relatives who died there. I cannot imagine having to drive to Yale to visit a sick family member and more importantly, I cannot imagine how our patients who may not have the benefit of transportation and rely on public transportation will get there.

Decisions about which services will be kept at both campuses will be made by Yale. We are asking for assurances that services for our patients will not be made by a board that seeks to fatten the already large pocket of Yale New Haven's system, as there will no longer be any viable competition which. That means reduced patient's choice to seek care at a lower cost. I have personally read the bylaws changes in the Certificate of Need and have seen the handover of control to Yale. When I asked about it, I was not taken seriously and told "Oh those are just words written in the contract." Luckily, I know how to read contracts.

We were surprised to see Yale and L+M say that L+M lacks the financial and clinical resources to run the programs necessary to take care of our community. We've watched management spend \$17 million dollars that could have gone to take care of people in Greater New London on strikebreakers, lawyers

and other expenses to lock their workers out of their jobs. We've watched management spend \$35 million dollars to buy an unprofitable hospital out of bankruptcy. We've watched management spend more \$78 million of our hospital's profits subsidizing the growth of its physician practice, and now Yale-New Haven says the combined NEMG/LMPA practice will run \$70 million a year in losses.

All of that money could have, and should have gone to strengthening our hospital's clinical programs. Instead, we see staffing cuts, the first of what may be many. In the CON, Yale-New Haven says it doesn't have any planned service cuts, but it may reduce "duplicate" services in the future. We are concerned that the duplicate services may simply be the profitable services, which will be extracted from the hospital and placed far from New London, where poorer patients and those who need help with transportation will struggle with access.

When you look at this proposal, make sure you ask what Yale's goals will be. We've already lived under management that thought they were building a small empire. Now the biggest empire in the state wants to take over.

We are asking that services be made available to this community in this community. We are asking that the community be made aware of who will be in control of these services. We are asking that any promises be guaranteed, in writing, with enforcement and oversight by the community. We are asking for you, Office of Healthcare Access to slow down this process. If, after all is said and done, and the bodies that Governor Malloy put in place to look into the laws that govern deals like this find that our concerns are not necessary, we can start a new conversation about the future of L+M, Yale and our health care system. Please allow the process to be followed, and give us time so that all questions can be asked and answered—truthfully.

Pre-filed testimony of Jason Pelletier

Office of Health Care Access

Docket #s 15-30233 CON and 15-30233, Acquisition of L+M Health Care by Yale-New Haven Health Services Corporation and Merger of Lawrence and Memorial Physicians Association into Northeast Medical Group

June 30, 2016

My name is Jason Pelletier. I live at 28 E Street, Groton Connecticut. I am a cook in the cafeteria at Pfizer in Groton, and a shop steward for UNITE HERE Local 217.

I am now almost 49 years old and have always been in great health until last year, when I contracted Lyme disease. After a run of antibiotics, all was well until symptoms started to recur this year.

My health care coverage is very important in order to cover costs of recurring doctor visits and prescriptions. I am also concerned about having adequate health coverage as I get older and have more health issues.

We are in in contract negotiations with our employers. So are 7 other corporate cafeterias in Connecticut that are operated by Compass, including our brothers and sisters at Electric Boat. We pay 20% of our premiums now, and are trying to reduce that percentage at the bargaining table.

The cost of employees' share of the premiums went up by 10% last October. That means that everyone who had coverage had a big bite taken out of the raises that we negotiated with our employer. We have a really good health plan and have fought to keep costs down, but I have coworkers who are uninsured or on state assistance because they can't afford the premiums.

Before I talk about Yale taking over our hospital, I want to tell you how hard our union works on health care costs. Our health plan, UNITE HERE Health, is run jointly by our union and employers in our industries. Workers in our union take leave from their jobs for several weeks to educate their coworkers and help them sign up for a primary care doctor and get their biometric tests so that they can work with our health plan to improve their health and avoid going the hospital. We have run a union-wide education program to educate our coworkers on how to tell the difference between a health care problem and a real emergency, and to use Urgent Care or see their doctors instead of the Emergency Room, unless they really need to go. As a steward, I'm trained to help my coworkers use health care the right way, and to help them connect with our health plan if they have problems.

But that won't matter if prices for hospitals and doctors go up because Yale takes over our hospital. Even if we convince our employer to lower the percentage of the premiums that we pay, if the care itself gets more expensive, premiums will go up and we'll be paying what we paid before. Please stop this takeover, or, if it is approved, make Yale-New Haven guarantee in writing that they won't raise prices.

We don't make a lot of money. As a cook, I make \$16.44 an hour, and I'm one of the better paid people in our workplace. I'm fortunate to have full-time hours and a steady paycheck. But none of us can afford

to pay more for health care. Affordable health insurance has always been important to me, but where I'm at in my life now, I can't do without it. Thank you.

**Pre-filed Testimony
July 1, 2016**

Fred Hyde, M.D.
57 Main Street
Ridgefield, CT 06877

A. General Background

- (1) The proposed acquisition of L+M Health Corporation (L+M) by Yale-New Haven Health Services Corporation (YNHHSC) comes at an important moment in the American and Connecticut health care systems.
- (2) The Patient Protection and Affordable Care Act (PPACA) has failed to control the ongoing growth of health care costs.
- (3) In the five years since passage of the PPACA, private sector health care insurance premiums grew at three times the rate of general inflation, faster in relation to inflation than during the five years prior to passage.
- (4) A portion of this increase in health and hospital expense can be *directly attributable to the consolidation of hospitals and health systems*. These consolidations result in:
 - (a) Higher prices through monopoly market position;
 - (b) Inflated expenses resulting from more complex and more generously compensated management, with hospital administration now accounting for 1.43% of the nation's Gross Domestic Product; and
 - (c) Compromise to the integrity of physician judgment when such hospital and health system consolidations include physician practices.
- (5) The burden of these costs falls on the patient, the patients' families, and society, through higher health insurance premiums, higher out-of-pocket payments and compromises to choice and freedom. The Kaiser Family Foundation reports that insurance deductibles grew nearly seven times faster than worker earnings in the five years following PPACA passage.
- (6) This is the background against which OHCA is called upon to evaluate yet another attempt at monopoly acquisition (another hospital by a health system) and consolidation of institutional control over professional judgment through hospital-sponsored medical groups.
- (7) *OHCA's task is non-delegable*. Legal redress opposing or attempting to remedy hospital monopolies has proven to be unreliable: even when "after-the-merger" remedies or checks are in place, inevitable cost increase occurs.

The FTC has allowed the Hart-Scott-Rodino review period to lapse, and the federal government continues to struggle to win cases under antitrust laws.

- (8) OHCA awards a Certificate of Need "franchise" to private corporations which are engaged in publicly funded services: the *award must be based on the public good*, not on private gain.

One state with challenges parallel to those of Connecticut is Massachusetts. Testimony is offered on the applicability of findings from that state to the challenge facing OHCA in this and similar Certificate of Need applications.

B. The Applicants assert these arguments in support of Docket No. 15-32033-CON (**affiliation of Lawrence + Memorial Corporation with Yale-New Haven Health Services Corporation**), and Docket No 15-32032, (**merger of L&M Physician Association and Northeast Medical Group**):

(1) Lawrence + Memorial as a system *does “not have the clinical and financial resources” to “integrate service delivery and assume responsibility for achieving specific quality, cost and service outcomes.”*¹;

a. Lawrence + Memorial only lacks financial resources as a result of empire building and other imprudent management decisions, including:

(i) Expensive attempts to outsource services, and to “lock out” unionized employees performing those services, about which other members of the coalition will provide more detailed testimony;

(ii) The acquisition of the bankrupt Westerly Hospital for a reported price of \$35 million; and

(iii) The extraordinary subsidy of physician practices. The **first attachment** to this document shows the extent to which hospital revenues are generating adequate margins to support operations and maintenance, but are subsidizing physician practice and other “system” losses. Those losses amount to \$78 million over the past five years. The combined new NEMG practice is expected to lose \$70 million per year.

b. In general, not-for-profit hospitals are doing well financially.² In fiscal year 2015 Moody’s reports that not-for-profit hospitals had median annual growth rate of 7.4% and median three-year revenue compounded annual growth rate of 5.6%.

(2) If acquired by Yale-New Haven Health Services Corporation, Lawrence + Memorial as a system would *achieve efficiencies through economies of scale*, and patients will receive *“the right care at the right time and in the most cost effective setting.”*

a. However, evidence provided here (the **second attachment**, a list of peer-reviewed journal articles provided electronically) shows that such economies have not been achieved in similar health system acquisitions in the past, and that consolidation leads to significant price increases and resulting systemic cost growth. Consider these critical examples from a body of literature that grows daily:

i. A comprehensive study by the Massachusetts Health Policy Commission found that market power is the primary determinant of prices in the state,

¹ OHCA Docket 15-32033-CON, p. 25

² Health Care Policies and Trends, *Healthcare Financial Management*, June 2016, Page 18

and that community hospitals provide the same care at much lower price as the dominant system.

- ii. Cooper³ et al studied nearly 4 billion private sector claims nationwide and found that the primary determinant of health care costs is the price of provider services, and that the most powerful determinant of provider price is market power – not quality, not size, not academic status or reputation. Parenthetically, these authors noted that one area of the country with *both* high Medicare and high private commercial health insurance costs is New Haven, CT.
- iii. Gowrisankaran⁴ et al studied data on post-merger pricing and found that separately negotiated prices do not negate the impact of a system's market power. Newly purchased hospitals still gain a price premium.

A new study of leverage in California hospitals⁵ indicates that monopolist health systems took active advantage of their status, leading to steadily increasing price differentials, separating them from non-monopolist hospitals by as much as \$4,000 per discharge.

- iv. The Applicant's own evidence makes this point. The Health Care Cost Institute's report submitted with the application notes that the primary driver of health care cost increases is provider and pharmaceutical pricing.
- b. Despite OHCA's request and the urging of legislators, the Applicants flatly refuse to provide comparative price data between L+M and the YNHHS hospitals. However, original analysis of Medicare payments submitted as part of this testimony shows that, almost uniformly, payments for services at Yale-New Haven (including low acuity services) are significantly higher than those at Lawrence + Memorial and much higher than other currently independent hospitals.

The **third attachment** to this testimony is excerpted from 2013 CMS records of billing and payment by DRG by hospital for the top 100 DRGs in Connecticut hospitals.

No evidence has been offered by applicants to demonstrate that past acquisitions or affiliations (Bridgeport, Greenwich) have produced economies similar to those predicted in the current application. To the contrary, these hospitals remain among the most expensive in Connecticut;

³ Cooper, Z. et al, "The Price Ain't Right? Hospital Prices and Health Spending on the Privately Insured," NBER Health Care Pricing Project, December 2015

⁴ Gowrisankaran, G., et al, "Mergers When Prices Are Negotiated: Evidence from the Hospital Industry," *The American Economic Review*, March 2013

⁵ Melnick, G. and K. Fonkych, "Hospital Price Increases in California, Especially Among Hospitals in the Largest Multi-hospital Systems," *INQUIRY: The Journal of Health Care Organization, Provision, and Financing*, Volume 53: 1-7, 2016

- c. A report by members of the intervenor coalition from December of last year, submitted as the **fourth attachment**, demonstrates that this acquisition will lead to extreme market concentration in the L+M service area, and intensify Yale-New Haven's market power from New York to the Rhode Island border. If this acquisition is consummated, Yale-New Haven Health Systems will account for 83% of discharges in L+M's primary service area, and nearly 60% of all inpatient discharges in the southern half of the state. Using the federal government's standard measure, the growth in market concentration in each of those areas would be presumed to create excessive market power.
- d. Consolidation can alter financial and referral relationships to create a "death spiral" for community hospitals. The Massachusetts Health Policy Commission, in its comprehensive study of community hospitals and the effect of monopolist systems, has concluded that the provision of *routine* hospital care at academic medical centers and teaching hospitals leads to lower total and commercial inpatient volume at community hospitals.

This sequence of events, in turn, leads to lower prices at community hospitals, poor hospital financial performance, limited ability to invest, and barriers to adoption of new technology. This cycle reinforces patient preferences for academic medical centers and teaching hospitals, even for routine hospital care.

For patients left behind in communities like Windham and New London, especially those (i) without transportation to the central hospital, (ii) good health insurance, or (iii) well-connected doctors, this practice results *in patient red-lining*, leaving the poor and aged to be served by inferior hospitals, made inferior as their patients are drawn out of local services, and into the central "name-brand" academic medical center.

The initial and understandable community "rapture" at being part of a larger, more exciting, more capable health system becomes, in short order, the recognition that the community hospital has been "left behind."

- e. The Applicants have offered no evidence that the acquisition of Lawrence + Memorial Physicians Association, L+M's 70-physician group medical practice, will create efficiencies with any meaningful return to patients and payers. Extensive bibliographic evidence of studies in academic, professional and public service literature, submitted as the **fifth attachment**, indicates that such efficiencies will not result.
- f. For example, Robinson⁶ et al, found that physician practices in California that were owned by local community hospitals had costs 10% higher than physician-owned organizations. Practices owned by regional multi-hospital systems generated costs 20% higher than physician-owned practices.
- g. **Excessive bureaucracy** will increase expenses, including (a) more layers of management between the physician and the patient, (b) attempts to conform

⁶ Robinson, J. and K. Miller, "Total Expenditures per Patient in Hospital-Owned and Physician-Owned Physician Organizations in California," *JAMA*, October 22/29, 2014;312(16):1663-1669

physician behavior to purchasing, referral or other financial direction, (c) hospital-oriented -- that is, institutional and hospital revenue cycle-oriented -- information systems.

- h. OHCA should view with skepticism the idea that installation of the EPIC electronic medical record system will generate efficiency or improve quality. The Partners system in Massachusetts spent \$1.2 billion to go live in 2015, double the original budgeted \$600 million. Auditors for Southcoast Health hospitals in Massachusetts attribute a \$30 million 2014 operating loss and 105 layoffs in part to the cost of EPIC.⁷ Southcoast (and other Massachusetts hospitals) are attempting to “keep up” with the highest priced system, Partners, as Partners attempts to meet its own budget requirements by electronic steering of patients from distant corners of that State.

Moreover, “efficiencies” or quality improvements resulting from the use of one or another brand of electronic health record systems are purely speculative. There is no generalizable data showing that EHRs are actually helping control health costs, and EPIC is an extraordinarily expensive product.

- (3) If acquired by Yale-New Haven Health Services Corporation, Lawrence + Memorial would achieve *higher quality* in care provided.
 - a. The recent comprehensive study of all hospitals in Massachusetts by the Health Policy Commission (HPC), cited above, reveals that spending at community hospitals is lower for low acuity inpatients and “is not associated with any difference in quality.”
 - b. In fact, the HPC study showed that “Most community hospitals provide care at a lower cost per discharge, without significant differences in quality,” nearly \$1,500 less per inpatient according to that study. This HPC study is **the sixth attachment** to this testimony.
 - c. The **fifth attachment** (as also noted above) is a list of peer-reviewed journal articles that report, among other findings, no evidence that consolidation of large and small hospital systems produces higher quality care. There is, to the contrary, some evidence that care improvements and patient safety both become victims of bureaucratic inertia and indifference.
 - d. Extensive bibliographic evidence of studies in academic, professional and public service literature indicates that the “quality” of physician services will not increase, and may, in fact, be compromised.

(4) That *access to primary and advanced specialty care will be greatly enhanced* for the citizens of the Lawrence and Memorial hospital service area through the acquisition. This argument is contradicted by:

- a. The example of Windham Hospital’s acquisition by Hartford HealthCare, to which testimony will be given by others.

⁷ Akanksha Jayanthi, “8 Epic EHR implementations with the biggest price tags in 2015,” *Becker’s Health IT and CIO Review*, 7/1/2015

- b. Compromise to physician resistance achieved through acquisition of medical practices. Doctors will ordinarily be fighting for their patients' rights, with insurance companies, vendors and even with hospitals. When the doctor is owned by the hospital, judgments may be altered concerning necessary services, referrals and costs. See the **fifth attachment** for journal studies in this area;
- c. Changing governance and control will render local officials and L+M itself incapable of protecting local services. The hearing notice makes clear that OHCA rejects the notion that this is not an acquisition. Upon consummation, the deal will leave all relevant decision-making authority in the hands of Yale-New Haven Health System.
- d. **Patient choice** will be severely compromised, if not eliminated. The Massachusetts Health Policy Commission study indicated that, as the result of consolidation in that state, "Patients often mentioned that they did not feel they had a choice of hospitals because their primary care provider or insurance plan determined where they could go for care."

In fact, insurance carriers are driven by the financial impact of monopolist pricing to develop narrow networks of providers. This results in limited or non-existent flexibility for the patient and the patient's treating physician. Insurers are compelled to this strategy as a means of attempting to secure discounted prices from price-gouging monopolist systems, in return for assurance of increased volume.

- e. **Physician integrity** may be compromised. Since patients rarely evaluate the quality of medical care, instead valuing the recommendations of physicians, those recommendations become very important.

Contracts involving "owned" physicians reveal requirements for which service to use, what imaging center, what laboratory, what pharmaceutical products have been included in the formulary of the monopolist system, all of these limitations on the ability of the practicing physician to put their patients' interest first.

Many physicians in independent practice face overwhelming bureaucracy and micro-regulation. These bureaucratic challenges are complicated by the extraordinary difficulty of actually being paid for work done. Many therefore have thrown in this particular "towel," resigned to doing the best they are able under the constraints of monopolist systems. By way of recompense, physicians who have ceded such freedoms now have salaries or practice income guarantees supported by double billing and price-gouging associated with large health systems.

- f. Applicants' submission of misleading data about the flow of patients to out-of-state providers, obscuring a potential reduction in the diversity of providers. The applicants break out discharges from New York and Massachusetts providers, but neglect discharges from Rhode Island Hospital. RIH, the affiliated hospital of Brown University Medical School, is the most obvious competitor for subspecialty care to Yale-New Haven Hospital – the two hospitals are exactly equidistant from New London.

OHCA must ask the Applicants what mechanism they will use to shift patient flows from "distant" competitors. Why should an acquisition change referral patterns? Without reviewing all provider employment, affiliation and practice management

agreements between YNHHS, NEMG and all employed physicians and/or affiliated group practices, OHCA cannot fairly evaluate the impact on access. If doctors are contractually bound to refer to YNHHS, patients – especially those in towns west of the Thames River – will lose choice and will incur higher costs due to monopoly pricing effects.

The cancellation of L+M's affiliation with the Dana Farber Institute offers an ominous foreshadowing of this effect. There is no reason L+M can't allow its doctors and their patients access to two brand-name cancer hospitals. Patients should have their choice of providers when their care requires subspecialty services only available outside New London.

- g. The terms of the supposed **\$300 million investment** in health in Southeastern Connecticut. The applicants refuse to offer specifics about how much they will really invest, what they will invest in, or where the money will come from.

All of the hypothetical \$300 million appears to be contingent on future programs being consistent with the YNHHS strategic plan, mutually agreed upon (between YNHHS and L+M), and *displaying a positive return on investment*. In other words, there would be no new investment in the Greater New London community's health unless that investment earns Yale-New Haven Health System a profit.

The proposed expenditures for "physician and clinical recruitment" require scrutiny. The system spent \$54.5 million in cash to buy PriMed LLC in 2014. If by "recruitment," Yale actually means "buying up the physician practices that L+M hasn't already purchased," patients will not benefit.

In fact some or all of the \$300 million is supposed to come from efficiencies that lead to lower expenses in L+M's future operations, or perhaps from the other YNHHS hospitals. The application assumes that L+M will eliminate more than 200 jobs and more than \$130 million in wage and benefit expense *during the first three years*. (See **attachment seven**, excerpts from the application.) Over seven to ten years, L+M could generate its own \$300 million in funds to invest, and have control over how they would be invested. Of course, these may be needed jobs for the delivery of patient services.

- h. **Financial pressure on patients** will be increased, perhaps intolerably so, as evidenced by these examples:

There is a well-known history of abusive bill collection practices at Yale-New Haven. These abuses were investigated by the then-Attorney General;

Approximately 35% of the accounts receivable of the nation's hospitals is now categorized as "patient responsibility." Articles in the hospital field call the patient the "new payer." Pressure on hospital revenue cycle performance will, of necessity, be addressed now more directly and forcefully to patients;

Also, narrow networks allow referral only to "approved" doctors, leading to "surprise" bills (for out-of-network services, specialties not covered, services in other parts of Connecticut, other states).

Hospitals Owning Doctors

The shift of physician practices from 70% physician-owned in 2003 to less than 55% physician-owned by the end of 2010 (Mathews, A., “When the Doctor Has a Boss,” *The Wall Street Journal*, November 8, 2010) was accompanied by extraordinary increases in the cost of medical care, even by the standards of high prices and inflation in the health care field.

Who benefits? If these proposals before OHCA will not produce efficiency, improvement in quality or control of cost, but will, to the contrary, lead to bureaucratic inefficiency, decline in physician integrity and accountability, and increase in cost, why then do their sponsors put them forward?

Hospitals and the Public Interest

Put simply, executives prosper. At Yale-New Haven, for example, **attachment eight** demonstrates that compensation of the top ten most highly compensated executives has increased by 100% in the time period (2006-2014) when smaller and independent hospitals have had increases of 20 – 25%.

Moreover, the doubling of administrative cost has an impact on the perception of those less handsomely compensated, such as practicing doctors. The surge of doctors seeking to become administrators has spawned extraordinary growth in schools of business, public health and hospital administration. Doctors see the lavish compensation of executives, the unhurried hours, and quickly deduce the market strategy (get bigger, earn more). Of course, all of this affects the patient.

A study published in *Health Affairs* and summarized by the Commonwealth Fund compared hospital administrative costs in eight countries and found that such costs accounted for 25% of hospital spending in the United States, twice the proportion seen in other advanced nations.

The hospital administration share of gross domestic product for the entire country rose from .98% to 1.43% between 2000 and 2011. Moreover, “There was no apparent link between higher administrative costs and better-quality care.”

This anomaly—societal concern and even outrage over health prices, yet skyrocketing compensation for hospital administrators—is made possible by the financial insulation enjoyed by members of those hospital boards.

In short, public agencies—not private boards or conflicted executives—will have to “stand in” for governance, if public interests are to be served.

C. Summary

In summary, the applicants have failed to successfully address these issues identified by OHCA:

(1) Public need:

- a. There is no “public need” demonstrated for this proposal;
- b. To the contrary, the public good (preservation of the lowest possible rates for health services and health insurance; the guarantee of local autonomy concerning decisions involving access to services; measures preserving the independence and integrity of physicians) argues against this proposal;

- (2) **Impact on residents**, including how access to services (including specialty care) will be maintained or improved:
- a. The applicants have failed to provide evidence that the access to specialty services will be improved. To the contrary, evidence has been presented that in other acquisitions by market-leading health systems in Connecticut (e.g., Hartford HealthCare acquisition of Windham Hospital), services have diminished. In that example, specialty and hospital care has been transferred incrementally to centrally-located specialists with Hartford.
 - b. Similar migration of specialty services has been demonstrated in a comprehensive study of community hospitals in Massachusetts by the Massachusetts Health Policy Commission.
- (3) **Benefits achieved** in the Bridgeport/Greenwich Hospitals service areas:
- a. There is no evidence that has been presented that either financial stability or enhanced programs or services have taken place in the Bridgeport and/or Greenwich Hospital services areas, beyond whatever trends and factors have applied to the hospital industry as a whole.
 - b. Neither OHCA nor the applicants have produced complete records of the “before” and “after” assessment of “financial stability or enhanced programs or services.” The submission of incremental and selected information by the applicants more than six months after the beginning of the CoN process indicates that demonstration of the benefits of previous hospital acquisitions has not been a priority.

These applications fail to meet the standards in PA 14-168 Section 7(a)(3), (4), (5), (11) and (12).

(3) Applicants have not demonstrated a clear public need.

(4) By refusing to provide price data, applicants have failed to adequately demonstrate how the proposal will impact the financial strength of the health care system, particularly if one views patients and payers as part of the system.

(5) Applicants have not satisfactorily demonstrated how the proposal will improve the quality, accessibility, and cost effectiveness of health care. Intervenors have presented a large volume of evidence to the contrary.

(11) Applicants have not satisfactorily demonstrated that the proposal will *not* negatively impact the diversity of health care providers and patient choice in the geographic region. This is a new and much higher burden of proof for both OHCA and the Applicants. Intervenors have raised a series of questions about the vague generalities in the application, without answers to which OHCA cannot plausibly certify having met this standard.

(12) Applicants have failed to provide any evidence that the consolidation from the proposal will *not* adversely affect health care costs or accessibility to care. Again, this is a new standard, enacted by the General Assembly specifically to address the circumstances currently under review. When OHCA pressed the applicants to say whether any of the supposed cost savings from the acquisition would be passed on to consumers, they simply refused.

These proposals should not be ruled on until January 15, 2017 or until the Governor's Task Force makes its recommendations. If forced to rule by the statutory calendar, OHCA must deny them. Regardless of Executive Order 51, the applications as written fail the relevant statutory tests and must be denied whenever they ripen for decision.

The only possible scenario under which a proposed takeover of L+M by YNHHS or any other major system could proceed is with permanent, concrete written guarantees on access, cost, quality and workplace standards, all negotiated directly with a representative cross-section of the community and with ongoing enforceable community oversight. We have attached our coalition's "Vision and Values Statement" which includes details of our vision for the future of the Southeastern Connecticut health care system.

Thank you for your attention.

EXHIBIT 4

HOSPITAL MARKET CONCENTRATION
IN CONNECTICUT:

The Impact of Yale-New Haven Health System's Expansion

EXECUTIVE SUMMARY

The last twenty years have transformed the Connecticut health care system. As recently as 1995, every hospital in the state was independent, but the era of the community hospital is over. If currently proposed mergers are completed, more than 80% of Connecticut's patients will receive care from hospitals owned by large, powerful multi-hospital systems. Driven in part by new "shared savings" reimbursement policies in the state Medicaid and federal Medicare programs, this trend is accelerating.

Connecticut now has five major acquisitions pending, including the expansion of the state's most powerful health care entity. The Yale-New Haven Health System has proposed to buy Lawrence and Memorial Health, which owns both Lawrence and Memorial Hospital in New London and Westerly Hospital in Rhode Island. At the same time, Milford Hospital was forced to shut down Labor and Delivery services when its leading Obstetrician/Gynecologists defected to Yale-New Haven Hospital. Financially distressed, Milford now leases space to Yale-New Haven Hospital for its regional inpatient rehabilitation services. A slow-motion takeover appears to be in process.

The most recent data available show that Connecticut has the 4th highest health care costs in the United States, but lags in most measures of quality. Numerous academic studies show that as providers take each other over and limit competition, prices go up without service improvement—and the more heavily concentrated the market is to begin with, the higher the price increases.

The co-authors of *Hospital Market Concentration in Connecticut: The Impact of Yale-New Haven Health System's Expansion*, have worked together on legislative solutions to the challenges of growing hospital monopoly for the past several years. In continuing that work, we have analyzed state inpatient hospital discharge data and mapped the potential changes to the state's health care markets if Yale-New Haven buys L+M and swallows up Milford Hospital. The report examines five geographic areas, from L+M's relatively small self-defined service area, to an area covering the southern half of the state.

The data yield three key metrics: the percentage market share held by Yale-New Haven Health, the score for each area on a standard government measure of market concentration called the Herfindahl-Hirschmann Index, or “HHI”, and the amount of change in the concentration of the hospital market in each area. The findings include:

- Though consumers already face a market with limited competitive pressure to protect them, the Milford and L+M takeovers will significantly increase the Yale-New Haven Health System’s market share in all five areas. In L+M’s primary service area, Yale-New Haven Health System will grow from 14% to 83% of inpatient discharges.
- All five geographic regions studied easily meet the federal government’s standard for a “highly concentrated” market even before the two takeovers. Highly concentrated markets lack competition and can lead to artificially excessive prices.
- In the market areas studied, the size of the increase in consolidation caused by YNHHS’s expansion would be significantly higher—by a factor ranging between 50% and 900%—than the level that requires regulators to presume that merging entities will “obtain market power,” which federal regulatory standards warn against.¹ Studies show that mergers in already highly consolidated markets can often lead to price increases of 20%.
- Although hospitals are consolidating across the state, the shoreline areas dominated by YNHHS are the most heavily concentrated regions in Connecticut, and thus most vulnerable to price increases. The three-hospital Yale-New Haven system claims a “local service area” comprising nearly half the state’s population. Upon full absorption of Milford and L+M, the Yale-New Haven system will account for 59% of discharges in this area.

The report’s co-authors urge public officials to take three steps before any decisions are made on whether or not, and under what conditions, the merger should proceed.

- In 2015, Connecticut passed a sweeping health care consumer protection law, SB 811. The law requires a cost and market analysis prior to regulatory action on hospital mergers. Although Yale-New Haven and L+M applied for approval before the new law took effect, state officials should conduct the cost and market analysis prior to any action on the proposed merger.
- In particular, state officials should examine the pricing impact in Greater New Haven of Yale-New Haven Hospital’s 2012 takeover of the Hospital of St. Raphael. No data will better illuminate the potential impact of Yale-New Haven’s expansion than what happened to prices after this deal, which created the 6th largest hospital in the United States.
- The L+M transaction should not be viewed in isolation. Yale-New Haven’s market power on the shoreline is expanding by leasing a wing of Milford Hospital. This adds a small but significant further increase in the extent of Yale-New Haven’s market control. State officials should include the potential absorption of Milford in their analyses.

1. GROWING CONCENTRATION IN THE HEALTH CARE MARKETPLACE

The last twenty years have transformed the Connecticut health care system. As recently as 1995, every hospital in the state was independent, but the era of the community hospital is over. If current proposed mergers are completed, more than 80% of Connecticut's inpatients will pass through hospitals owned by large, powerful multi-hospital systems, with few legal checks on price increases to protect them.

The Affordable Care Act has delivered health insurance to millions of people, a significant policy victory. At the same time, however, changes in reimbursement policies, mandates for technology improvements, and new regulations have tilted the market even further in favor of large, wealthy hospital systems. In Connecticut, the State Innovation Model (SIM) and "shared savings" policies for Medicare and Medicaid are creating incentives for large combinations of hospitals and doctors that can accept risk for broad patient populations. These systems are taking advantage of the new conditions to overrun their smaller competitors and build market power.

Unfortunately, the ACA contains few proven cost control measures. Congress largely left it up to states, employers, payers, municipalities, and individual patients to rein in costs as health care

systems undergo rapid consolidation. Academic studies consistently show that the main impact of hospital consolidation is increased prices without improvement in quality.² Nationally, ballooning prices threaten newly expanded access. Although increasing numbers of Americans have health insurance, out of pocket costs are rising at 3-4 times the rate of wages.³ More Americans than ever report delaying needed medical care for cost reasons.⁴ Without cost control, the long-overdue expansion of health insurance coverage will not be sustainable.

These challenges have become clear in Connecticut in recent years. Despite a dramatic growth in their market power - which will continue if the combined \$91 billion Anthem-Cigna and Aetna-Humana deals are completed - health insurers have done little to restrain costs.⁵ Meanwhile, the rise of multi-hospital systems has created concentrated markets in the state, and the Yale-New Haven and Hartford HealthCare systems have developed a dominant grip on health care statewide. The two major health systems account for nearly half the inpatient discharges in the state, and each has even tighter regional control in its respective market. Hospital consolidation and price inflation will continue unless checked at the state level.

Acquisition and Absorption: Yale-New Haven Expands

Yale-New Haven Hospital (YNHH) began the process of industry consolidation in Connecticut in 1995, when YNHH added Bridgeport Hospital to its network. Greenwich Hospital joined the growing system in 1998. In 2010, the health system added Northeast Medical Group, a start-up physician multispecialty group that now employs over 550 doctors and is wholly owned by the Yale-New Haven Health Services Corporation, the parent corporation of the Yale-New Haven Health System (YNHHS).

In 2012, Yale-New Haven Hospital's takeover of the Hospital of St. Raphael created the 6th largest hospital in the country.⁶ After the merger, the Yale-New Haven Health System (YNHHS) market share rose to 98% of inpatient discharges among New Haven residents and 76% in Greater New Haven, up from 68% and 48% respectively.⁷

In 2014, Texas-based for-profit hospital operator Tenet Healthcare proposed purchasing five Connecticut hospitals in an equity partnership with YNHHS, with Tenet owning 80% and Yale-New Haven 20%. Adding five of its competitors to Yale-New Haven's existing market share would have meant that 37.5% of all discharges in the state were from the newly merging system, a major expansion of the Yale network. The deal fell through after the Office of Health Care Access imposed unusually strong requirements on the terms of the deal, in the face of concerns about the impact of the transaction on cost, access, services, financial burden on the uninsured, and accountability of the hospitals to local communities.

Now, YNHHS has two impending hospital takeovers that will expand its control over the health care market along Connecticut's coastline.

One is widely known. The Yale-New Haven Health System has announced a deal to purchase Lawrence + Memorial Health, a smaller system that controls: Lawrence + Memorial Hospital in New London; Westerly Hospital in Westerly, Rhode Island; L+M Physicians Association, a 72-member

multispecialty physician practice; and several other outpatient facilities.⁹

In a series of less publicized moves, YNHHS seems to be quietly acquiring pieces of financially struggling Milford Hospital.

Milford has reported negative operating margins in each of the last seven years. The hospital's license allows it to operate 118 beds, but due to declining patient volume, only 43 are currently staffed. Documents filed with the state Office of Health Care Access reveal that physician defections to Yale-New Haven Hospital contributed to those losses and inflicted severe competitive damage on Milford's labor and delivery service. According to these documents, in 2012, six OB/GYN doctors who accounted for a majority of Milford Hospital's deliveries told management that they would no longer deliver babies there. One had decided to stop delivering babies altogether, but the other five told Milford management that they were making Yale-New Haven Hospital their "exclusive hospital provider."¹⁰

Milford subsequently attempted to hire additional obstetricians, but could not keep them. In February of 2015, Milford applied for state approval to terminate its Labor and Delivery service. Milford's family birthing center, which occupies a large portion of the hospital's third floor, will no longer accept patients.¹¹

Having expanded its OB/GYN network due to Milford's financial distress, Yale-New Haven Hospital announced last fall that it would open a 24-bed inpatient rehabilitation clinic on one of the three floors of Milford Hospital. The clinic would serve patients suffering from certain neurological, orthopedic, musculoskeletal, and other conditions. These patients typically have received inpatient treatment such as surgery for their conditions, and require extensive nursing care and supervision while undergoing treatments such as physical or occupational therapy.

YNHH's proposal would shift all patients who would have been treated in the current rehab unit at the St. Raphael's campus to Milford. Shortly after, YNHHS-owned Bridgeport Hospital submitted its

own paperwork to terminate its inpatient rehabilitation services as well.¹² In essence, YNHHS is regionalizing its inpatient rehabilitation services at its leased space at Milford Hospital, even as Milford's traditional hospital services decline and close. Taken together, these events suggest that Yale-New Haven Health System's absorption of Milford Hospital is in process. Yet state regulators have treated each submission—Milford's closure of its Labor and Delivery service, the opening of Yale-New Haven's inpatient rehabilitation unit, and the two separate YNHHS inpatient rehabilitation unit closures—as distinct, unrelated events.

In contrast to Milford Hospital, Lawrence + Memorial Hospital is a financially successful 256-bed hospital in New London that recently acquired Westerly Hospital in Rhode Island, pledging to invest \$36.5 million over five years in the new acquisition. In September, the parent company of the two hospitals and Yale New Haven Health System filed a Certificate of Need application for YNHHS to take over the L+M system. In the application, YNHHS promises to make a \$300 million capital investment in the region.¹³ This deal is now in front of state regulators seeking approval.

Connecticut's Growing Monopolies

Hospital consolidation is a recent and rapid phenomenon in Connecticut: twenty years ago, every hospital in the state was independent.

The trend has accelerated recently. A tally of transactions by the Universal Health Care Foundation in December 2014 reported that "between 2009 and 2013 there were thirteen attempted and seven successful hospital consolidations and/or partnerships [in Connecticut], a substantial increase from the four that occurred in the previous decade."¹⁴

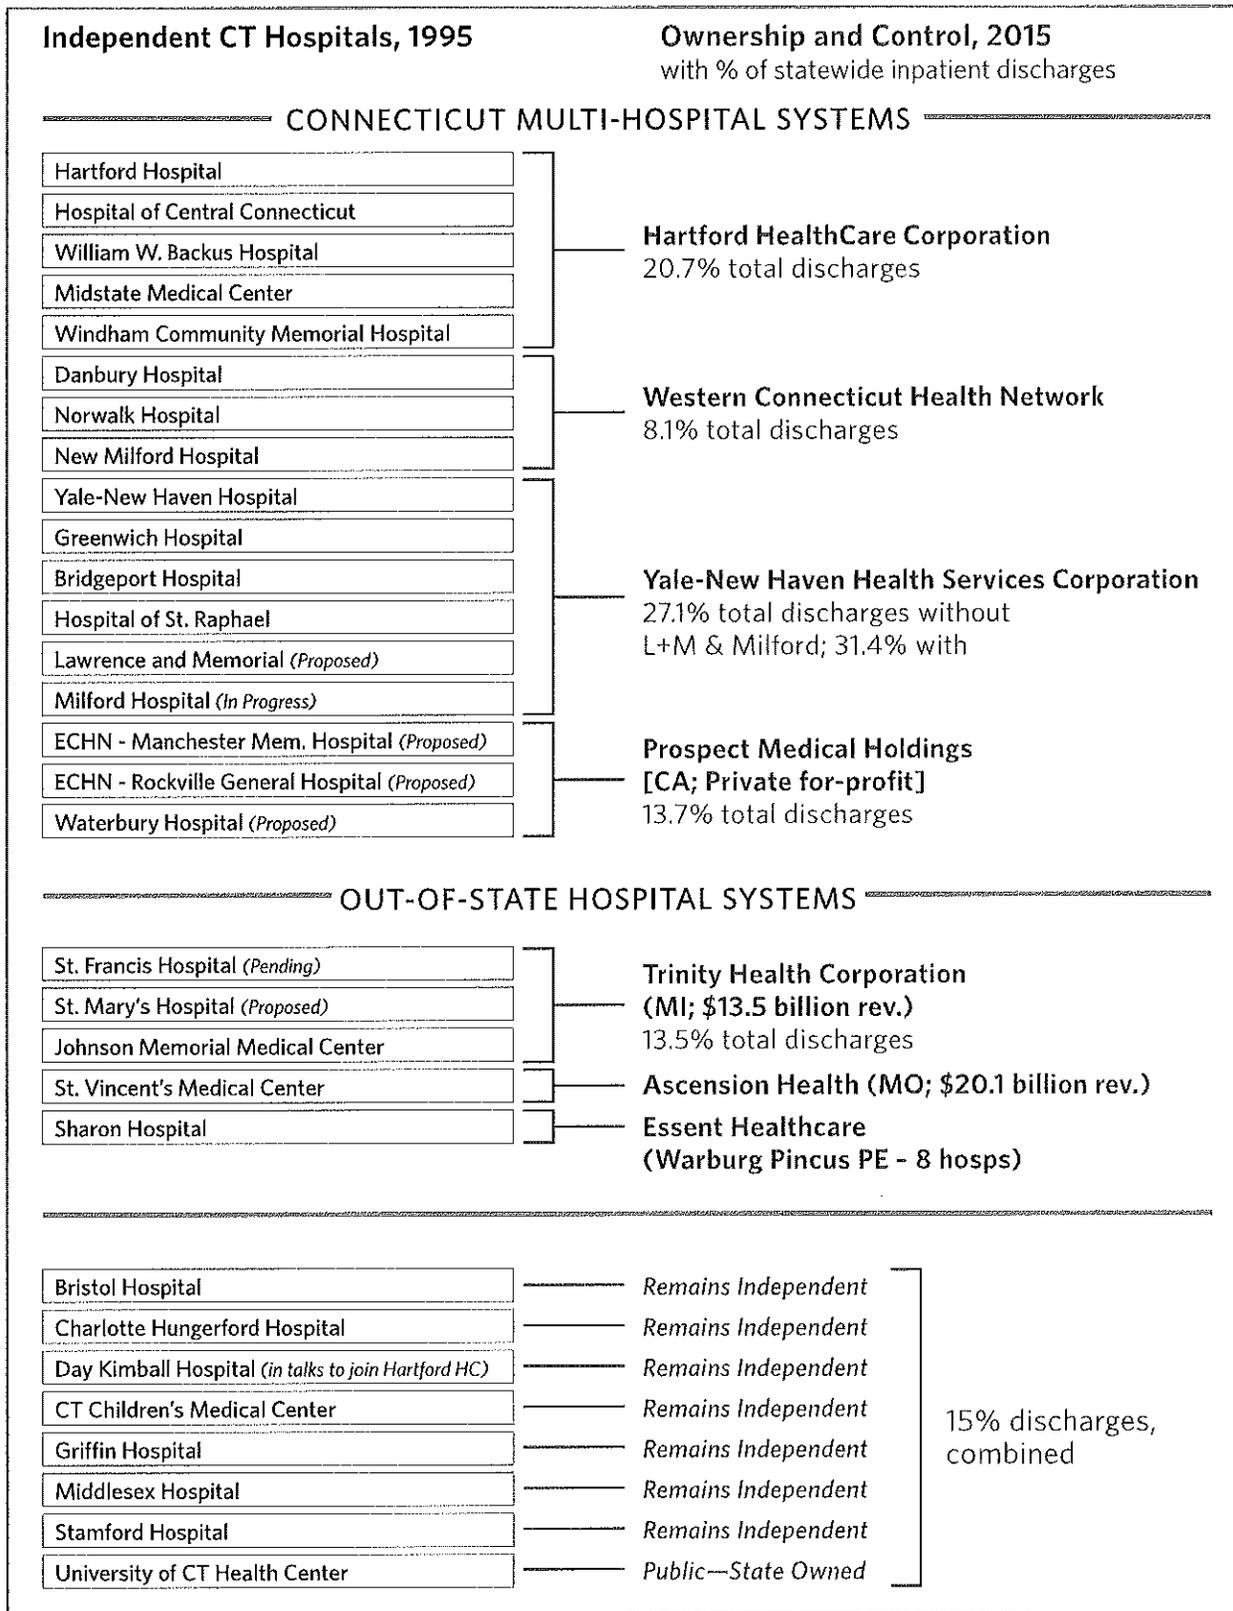

As a result of these consolidations, Hartford HealthCare accounted for 20.7% of inpatient discharges in the state in FY 2013, while Yale-New Haven Health System saw another 27.1%. The two health systems combine for nearly half of the

state's discharges, a lopsided market for Connecticut consumers.

In the year since the UHCF report, at least five major hospital affiliations or purchases have been announced or proposed: private for-profit Prospect Medical Holdings has moved to purchase the Eastern Connecticut Health Network and Waterbury Hospital; St. Francis Hospital affiliated with Trinity Health Corporation, a \$16 billion national company based in Michigan, has acquired Johnson Memorial Hospital, and has moved to acquire St. Mary's Hospital; and Ascension Health has purchased St. Vincent's Medical Center—all in addition to Yale's proposed acquisition of L+M and progressive annexation of Milford. Today, the eight hospitals that will remain independent if all pending transactions are approved provide only 15% of inpatient discharges in the state.

Unless radical change to reimbursement and support for financially distressed hospitals is on the horizon, some consolidation is inevitable. Unlike many of the other recent and proposed hospital acquisitions, however, the Lawrence + Memorial deal is not spurred by a community hospital's financial crisis. The conditions of this proposal create an opportunity for regulators to take a closer look at the growing monopolies in the state.

Figure 1: Hospital Ownership Changes, 1995-2015

2. THE DATA: YALE-NEW HAVEN'S LATEST MOVES INCREASE CONSOLIDATION

New data make it possible to chart the development of Connecticut's hospital systems, including the expansion of Yale's regional control in the last several years, and to anticipate how such control will grow as hospital networks expand. The authors obtained general acute inpatient care discharge data from the Office of Health Care Access, showing the number of discharges from each hospital by patients' town of residence during fiscal year 2013.

The question of how to define health care markets is highly contested and technically complex. For a detailed discussion, see Appendix A. Courts, hospitals, and regulators have disputed market boundaries for a quarter of a century while hospital systems completed 1,881 mergers.¹⁵

Recently, economists have developed improved tools to measure market boundaries, but courts are still catching up. Despite an academic consensus that hospital markets are much smaller and therefore more concentrated than courts were willing to accept a decade ago, only a handful of cases have actually seen anti-trust remedies applied to mergers.¹⁶ Meanwhile, mergers are proceeding at a rate of more than 90 per year.¹⁷

For our initial analysis, we focus on market areas defined by the health systems and hospitals themselves, including concentric areas surrounding different hospitals that define smaller and larger

markets. This approach gives a thorough preliminary analysis of market concentration at varying scales. The analysis examines five areas:

- **Yale-New Haven Health System's local service area:** In the Official Statement accompanying its most recent bond offering, YNHHS defined the "local service area" for its full system as a 55-town region encompassing roughly the southern half of the state. The area includes 1.6 million people, 46% of the state's population.¹⁸
- **Yale-New Haven Hospital local service area:** A 34-town region also defined in YNHHS bond statements.¹⁹
- **Greater New Haven Area/Southern Connecticut Region Council of Governments (SCRCOG):** We use the area defined by membership in the Southern Connecticut Regional Council of Governments (SCRCOG) as a definition of Greater New Haven. SCRCOG contains fifteen towns with 16% of the state's population.
- **Lawrence + Memorial Hospital Primary Service Area:** L+M Hospital defines its primary service area as a ten-town region surrounding New London, both in the Official

Statement for its most recent bond issue and in its Certificate of Need application.

- **Lawrence and Memorial Hospital Secondary Service Area:** In the same sources, L+M also identifies as its secondary service area a twenty-town area surrounding New London.²⁰

Within these five areas, our analysis focuses on three key metrics:

- The percentage market share for the Yale-New Haven Health System in each area prior to and after the absorption of Milford and the purchase of L+M Health.
- The Herfindahl-Hirschman Index, or “HHI,” score for each area pre- and post-acquisitions. HHI measures the degree to which a market is concentrated, and thus how likely consumers are to face anticompetitive practices. It is a standard FTC and DOJ metric, also used by the American Medical Association, Congressional Budget Office, Kaiser Family Foundation, insurance industry, and other economists and regulators for analyses.
- The change in HHI for each area before and after a transaction, a prediction of merging hospitals’ gain in market power.

In examining these metrics, we found that:

- Though consumers already face a market with limited competitive pressure to protect them, the ongoing absorption of Milford and the proposed purchase of L+M will significantly increase the Yale-New Haven Health System’s market share in all five areas we examined – by a factor of 5 or 6 in the markets surrounding New London – at the further expense of competition.
- All five geographic regions studied easily meet the federal government’s standard for a “highly concentrated” market even before the two takeovers. Highly concentrated markets can lead to artificially excessive prices.

- In the market areas studied, the size of the increase in consolidation caused by YNHHS’s expansion would be significantly higher—by a factor ranging between 50% and 900%—than the level that requires regulators to presume that merging entities will “obtain market power,” which federal regulatory standards warn against.²¹

- Although there is rapid consolidation across the state, the coastline areas dominated by YNHHS are the most heavily concentrated regions of the state and therefore are most vulnerable to price increases.

In each of these areas, the expansion is significant. The ultimate absorption of Milford Hospital and the L+M deal as proposed will leave YNHHS with nearly 60% of inpatient discharges in the Yale-New Haven Health System’s local service area, which covers roughly the southern half of the state, including 46% of its population. It will also add the L+M service area to the swath of coastal areas in which YNHHS dominates the market. [See Figures 3 and 4.] Yale-New Haven Hospital already treats the second highest volume of patients in L+M’s primary service area and third highest in its larger secondary service area. Combining the two hospital networks will leave YNHHS with monopoly pricing power.

When federal and state anti-trust regulators measure the degree to which a market is concentrated, they use a tool called the Herfindahl-Hirschman Index (HHI), which measures market concentration by aggregating measures of firms’ market shares.

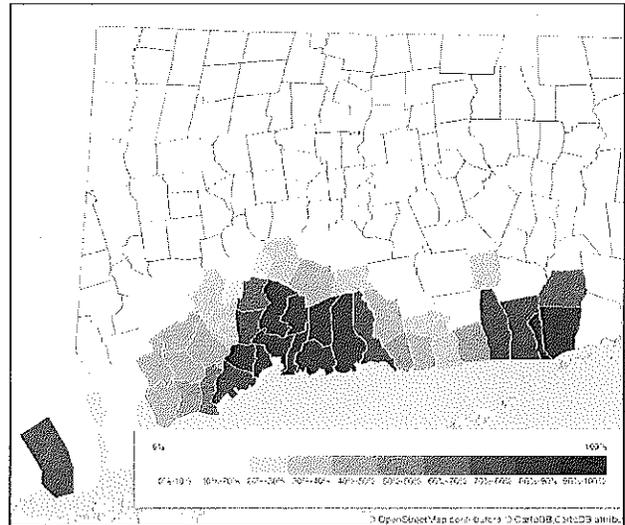

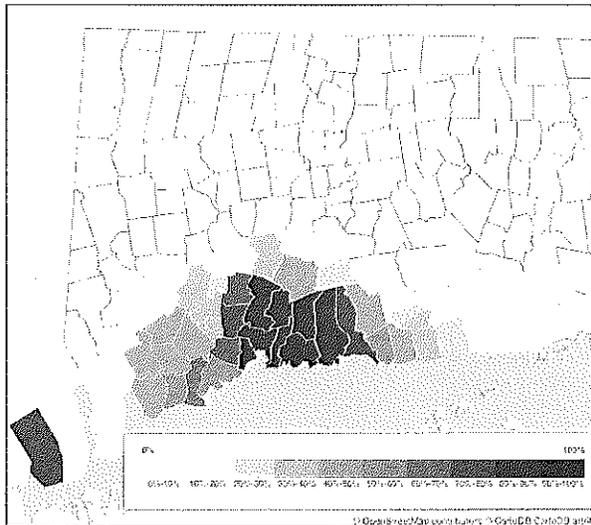

The DOJ and FTC assert that “mergers should not be permitted to create, enhance, or entrench market power or to facilitate its exercise” because of the threat to competition. When a merger increases the HHI in a highly concentrated market by 100 points, regulators expect that merger to “potentially” raise significant concerns because of an increase in market power. When it increases by 200 points or more, they “presume” that an impermissible market power increase is likely. This presumption can be rebutted only by “persuasive evidence showing that the merger is unlikely to enhance market power.”²² We applied HHI to the discharge data from towns and multi-town areas to determine the health of the state’s markets.

Figure 2: YNHHS inpatient discharge share by region, before and after addition of L+M and Milford

	Population	YNHHS discharge share now	YNHHS discharge share with deals
Statewide	3,570,000	27%	31%
YNHHS local service area	1,650,000	51%	59%
YNHH local service area	1,096,135	60%	65%
GNH/SCRCOG	570,000	74%	83%
L+M primary service area	175,000	14%	83%
L+M secondary service area	362,000	12%	59%

Figures 3 and 4: YNHHS local service area market share, before and after

These maps illustrate the percentage of inpatients from each town within the Yale-New Haven Health System's local service area who were discharged from a hospital in the YNHHS, before and after the addition of L+M and Milford.

Measuring Market Power

To calculate HHI, one adds the squares of the market shares together to get a number on a scale of 100-10,000:

- A region with a pure monopoly on a good or service would score an HHI of 10,000: $(100\%)^2 = 10,000$.
- A region with 10 competitors, each with equal market shares of 10% would score 1,000: $(10\%)^2 = 100$ for each competitor. 100×10 competitors = 1,000.
- A region with five competitors, one with 50% market share, one with 20% market share, and three with 10% market share would score 3,200 on HHI. $(50\%)^2 = 2,500$; $(20\%)^2 = 400$; $(10\%)^2 = 100 \times 3$ competitors = 300.

The federal government divides markets into three categories based on HHI scores to assess the risk of monopoly:

- Less than 1,500—unconcentrated market with adequate competition
- Between 1,500 and 2,500—“moderately concentrated” market
- Above 2,500—“highly concentrated” market with an elevated risk of inefficiency and collusion to fix prices.

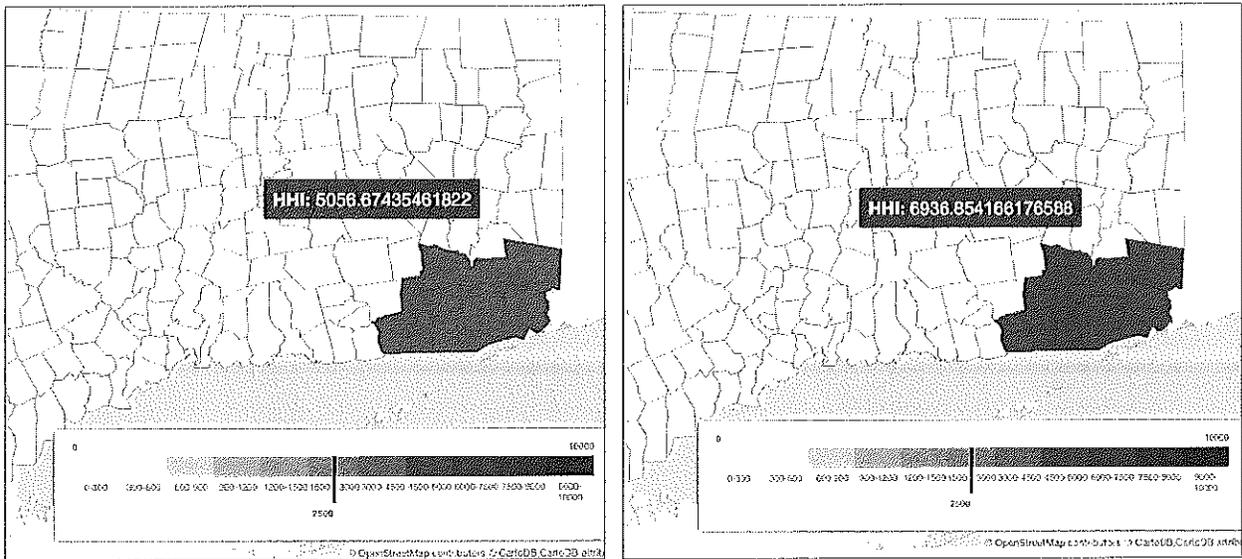

Regulators apply the strictest scrutiny to “highly concentrated” markets with scores of 2,500 or above.¹⁸

We found that every one of the five regions is already a highly concentrated hospital market to begin with. In every region, the increase in HHI was dramatic. The maps on the opposite page illustrate the HHI increase in the L+M service area. For the full table showing HHI and change in HHI for each geographic area, see Appendix B.

In every relevant local or regional area we examined, the HHI indicates that the market is already highly concentrated. When concentration is already high, increases to HHI are more concerning: federal standards indicate that the strictest scrutiny should be applied to markets like these because of the risk to competition. In every one of these markets, the magnitude of the HHI increase is far higher than the 200-point threshold at which federal regulations presume an impermissible increase to market power. In the L+M primary service area, the increase is over nine times the 200-point standard. In the YNHHS local service area—which encompasses 46% of the state’s population—the increase is more than quadruple the standard.

The state of Connecticut is far too large to consider a “market.” Even if we did consider Connecticut as a “market” of its own, however, it would already have an HHI of 1412. After these transactions, it would have an HHI of 1716—an increase of 304 points that would move it from the “unconcentrated” category to the “moderately concentrated” category. These two acquisitions constitute a substantial increase to overall market concentration in the state because they bolster the market power of its largest health system.

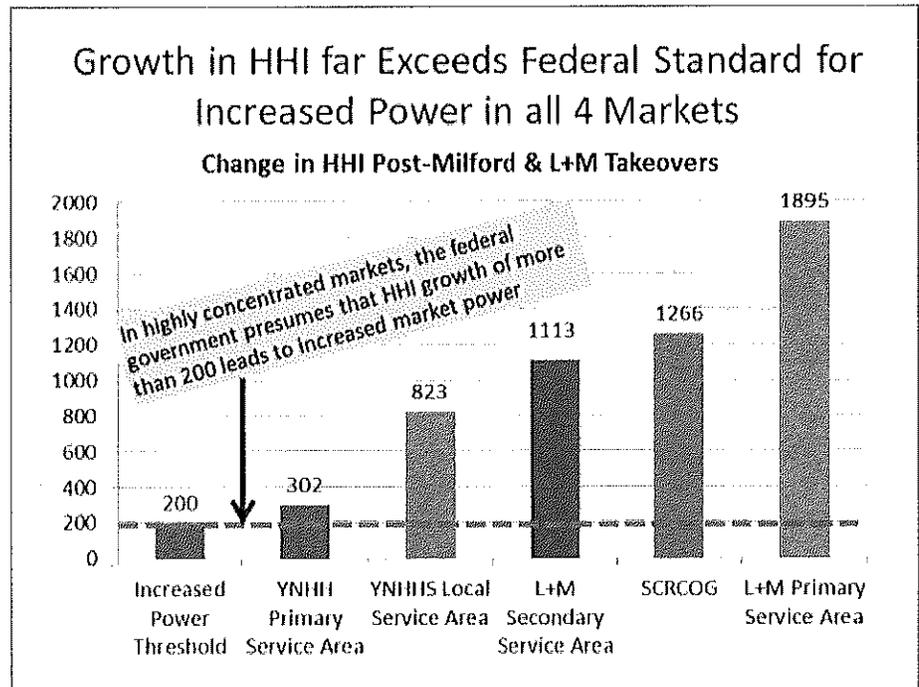

Consolidation is not equally threatening everywhere, however. We also calculated market concentration on a town-by-town basis for the entire state to demonstrate the distribution and comparative level of concentration across regions. Hartford’s expansion in northern Connecticut has been more diffuse than Yale-New Haven’s southern growth to date. In Hartford, for example, Hartford Hospital continues to face direct competition from St. Francis, which is now aligned with a multi-billion dollar national non-profit chain and is itself seeking to buy two hospitals. In the southern half of the state, highly concentrated multi-town regions clearly show the dominance of the Yale-New Haven Health System.

Figures 5 and 6: L+M Service Area HHI, before and after YNHHS takeover

This map demonstrates the dramatic increase in market concentration for the L+M Primary Service Area that will result from the potential takeovers. Because the market is already highly concentrated before the acquisition, combining YNHHS and L+MH will cause a large spike in market concentration, leaving few alternatives to the newly dominant Yale-New Haven system.

Figure 7

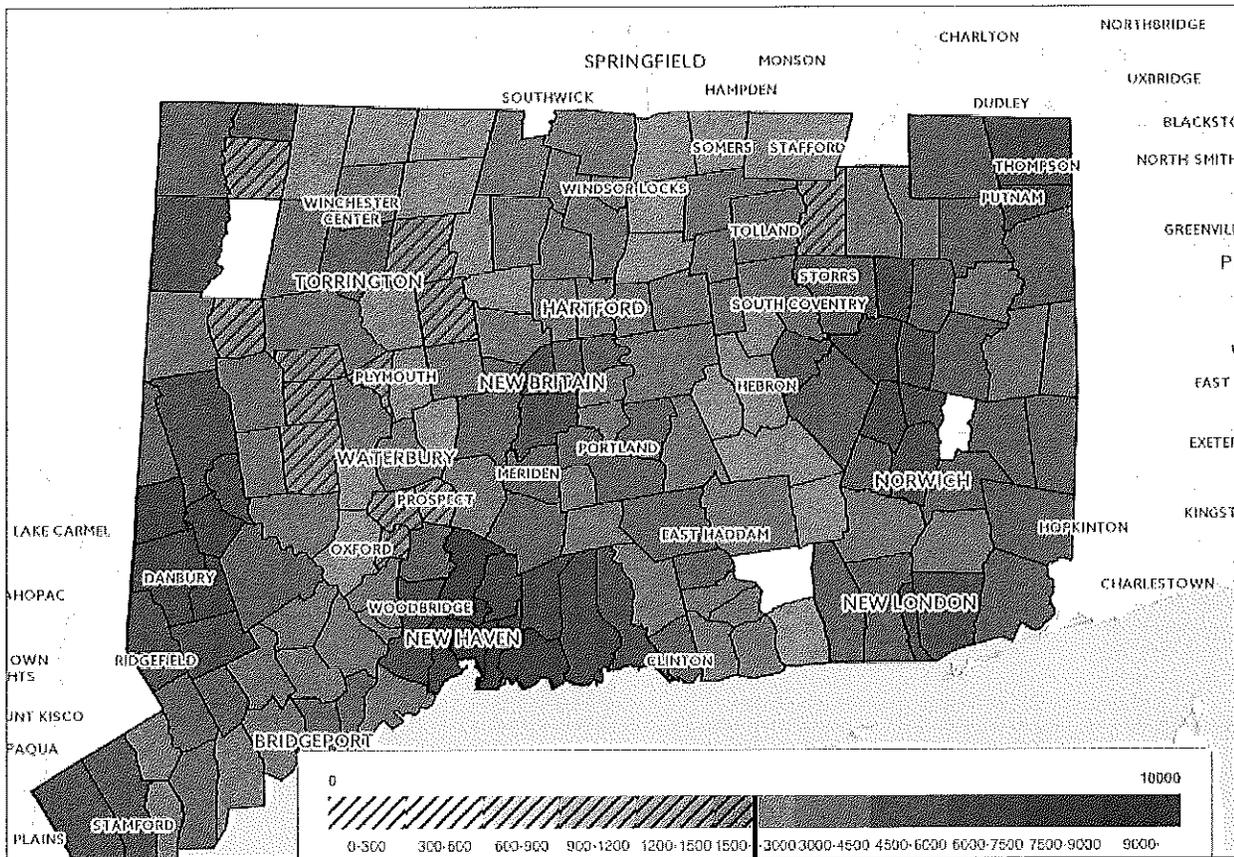

Figure 8: Town-by-town market concentration, Connecticut

This map shows the existing HHI scores for each town in Connecticut. Though discrete towns are not complete health care markets in themselves, the map shows roughly the distribution of highly and extremely concentrated markets throughout the state. Though Hartford HealthCare controls a large number of hospitals statewide, its hospitals are distributed in such a way that most towns in the north of the state exhibit comparatively lower market concentration, although most would still be defined as “highly concentrated” under federal standards. In the Yale-New Haven-controlled southern half, however, we see the highest density of towns with extremely high market concentration—above 6,000, indicating that Yale-New Haven’s control of the market is geographically consolidated. Note that the region around New London is already heavily concentrated, and will become even more so if Yale-New Haven takes over L+M.

3. THE UNAFFORDABLE CONSEQUENCES OF MARKET CONCENTRATION

Prices Go Up as Hospitals Gain Market Power

Hospitals often claim that consolidation increases efficiency. There is little evidence to support this claim.

Independent comprehensive reviews of the academic literature have rejected this interpretation. Nationally, the Robert Wood Johnson Foundation reports, based on a review of five independent studies, that when hospitals “merge in already concentrated markets, the price increase can be dramatic, often exceeding 20 percent.”²³ Locally, the Universal Health Care Foundation of Connecticut concluded in its December 2014 review that “almost all retrospective studies suggest that hospital consolidation results in concentration of market power and a rise in the price of care.”²⁴

In Massachusetts, the Attorney General has documented that monopoly pricing, especially by the non-profit Harvard-affiliated Partners system, is the state’s most significant cost driver.²⁵ In a court ruling this year against a hospital merger involving Partners, the Massachusetts judge found that the system was able to “exercise ‘near monopoly power’ that allows it to charge prices far in excess of its competitors for the same services.”²⁶

The fact that the dominant systems in Connecticut are nominally not-for-profit corporations does not protect Connecticut patients. A majority of U.S. acute care hospitals are structured as private, non-profit enterprises. That fact has not prevented a massive wave of mergers and skyrocketing prices.

For years, judges permitted mergers of non-profit hospitals on the theory that they would behave

charitably with greater market power. In 2007, the Federal Trade Commission studied the pricing impacts of a non-profit merger in Illinois. It found that, according to the hospitals’ own economist, managed care prices increased by 42% over four years, 12% above the market as a whole.²⁷

With rising health care costs one of the largest drivers of perennial state budget crises, state officials are increasingly concerned about the long-term cost of consolidation to taxpayers. Comptroller Kevin Lembo, who administers the state employee health plan covering 210,000 people at a cost of \$1.4 billion annually, recently testified stating, “We’re going to be negotiating potentially with 2 or 3 large systems and that’s basically it, if things keep going the way they are going. I don’t think you need to be an actuary to know that that’s going to be a tough spot for us.”²⁸

Non-profit hospitals claim they need surplus revenue to serve low income people. But Duke University Professor Clark Havighorst points out that the IRS allows non-profit hospitals “to spend their untaxed surpluses on anything that arguably ‘promotes health.’ Much of what hospitals count as charitable behavior or community benefit is not spent on lower income people.”²⁹ University of Illinois tax law professor John Colombo adds:

“The standard non-profit hospital doesn’t act like a charity any more than Microsoft does—they also give some stuff away for free. Hospitals’ primary purpose is to deliver high quality health care for a fee, and they’re good at that. But don’t try to tell me that’s charity. They price like a business. They make acquisitions like a business. They are businesses.”³⁰

We're Not Getting the Quality Care We're Paying For

Already, Connecticut has the 4th highest per capita health care costs in the nation: we paid 27% more per person than the national average for health care in 2009, the most recent year for which data are available,³¹ and what we spend at the hospital annually nearly tripled from 1991 to 2009, from \$3.9 billion to \$9.3 billion.³²

The science of measuring hospital quality is still in its infancy. No single set of metrics is backed by a wide consensus. However, we examined several federal and independent evaluations. The available data provide no evidence that Connecticut's high health care costs are correlated to high quality. On several currently available metrics, Connecticut ranks among the states with the lowest scores.

For example, Medicare penalizes hospitals if patients are frequently readmitted within a month of their discharge. Based on these readmission standards, 90% of Connecticut hospitals received penalties for the 2015-2016 fiscal year, the second highest penalty rate for any state.³³ These 28 penalized hospitals included all three in the Yale-New Haven Health System, and Yale-New Haven Hospital itself received the seventh most severe penalty in the state.³⁴

Medicare also assesses hospitals based on patient satisfaction across a number of areas like communication, cleanliness, and pain management. In the most recent scores compiled from quarterly Hospital Consumer Assessment of Healthcare Providers and Systems surveys, no Connecticut hospital received the top rating of five stars. Eighteen out of twenty-five hospitals received a three star rating, including YNHHS's Bridgeport and Yale-New Haven hospitals.³⁵

The independent Leapfrog Group assesses hospital quality nationally and grades hospitals "A" to "F" based on factors such as safe surgery practices, infection rates, and use of correct staffing and procedures to minimize mistakes.³⁶ Connecticut ranked 36th in the percentage of hospitals scoring "A" in Fall

2015.³⁷ Maine and Massachusetts were 1st and 2nd nationally. Yale-New Haven and Greenwich Hospitals received "C" grades, Bridgeport a "D". Three of Hartford HealthCare's five hospitals received "C" grades, one a "B" and one a "D".³⁸

As the science of quality measurement improves, and analysts are better able to account for factors such as the severity of patients' conditions across populations, these scorecards may yield different results. However, the Robert Wood Johnson Foundation examined the literature on hospital consolidation in relation to currently available quality indicators, and found that "a slim majority of studies find that, at least for some procedures, increases in hospital concentration reduce quality. The strongest studies confirm this result."³⁹

4. CONFRONTING CONNECTICUT'S HOSPITAL MONOPOLIES

The Affordable Care Act and new Connecticut reimbursement policy are accelerating changes in how care is delivered and measured, and how the business of health care is structured. Before our very eyes, Connecticut is being carved up by a few hospital systems. The leader is clearly Yale-New Haven, with a level of control in many areas that easily meets any definition of market power. Meanwhile, our patients and payers are carrying a heavier and heavier financial burden as their health care costs rise.

Fortunately, Connecticut's legislative leaders have acted to curb the threat of consolidation by giving more tools to public consumers and to regulators. Two hospital regulatory bills in the last two years leave Connecticut better prepared to protect its consumers from the ill effects of monopoly. These reforms have put us in the forefront of states asserting the public interest in creating a fair health marketplace that benefits all. State regulators and advocates should use those tools now.

The acquisition of Lawrence + Memorial Health by the Yale-New Haven Health Services Corporation is a pivotal opportunity for stemming the growth

of monopoly in Connecticut's health care market and limiting the ill effects of consolidation. The proposal will be reviewed under Public Act 14-168, which passed in 2014. Portions of Public Act 14-168 were quickly superseded by SB 811, which passed in 2015. However, the L+M acquisition application was submitted before the newer law took effect. Nevertheless, PA 14-168 added new standards for the Certificate of Need. In any decision to grant or refuse a CoN, the law requires the Office of Health Care Access to take into account whether the applicants have

"satisfactorily demonstrated that the proposal will not negatively impact the diversity of health care providers and patient choice in the geographic region; and [w]hether the applicant has satisfactorily demonstrated that any consolidation resulting from the proposal will not adversely affect health care costs or accessibility to care."⁴⁰

The sale as proposed unquestionably poses a threat to both provider diversity and health care costs along the shoreline.

In light of this threat, state officials should

rigorously examine the likely consequences of the transaction in order to decide whether to allow it to proceed. In particular, we recommend that prior to any approval or rejection, and prior to developing any proposed conditions, regulators take the following steps:

- SB 811 requires the state to undertake a “cost and market analysis” for such mergers. Although SB 811 does not formally apply, the Attorney General retains responsibility to enforce the Connecticut Anti-trust Act, and the Office of Health Care Access now must specifically examine the impact of merger-related consolidation on cost and access. Having public market analysis was critical to the process of public comment to the judge in the case of proposed mergers by Partners Health System in Massachusetts. Accordingly, we urge regulators to conduct the cost and market analysis that our state legislators have deemed appropriate for sales like this one.
- In order to understand the likely results of these acquisitions, we also believe that a thorough analysis of potential consolidation-related cost and access impacts calls for a retrospective look at any price changes following YNHH’s acquisition of the Hospital of St. Raphael three years ago. This is a clear test of whether or not YNHHS exercises market power to artificially inflate prices: if St. Raphael’s or Yale-New Haven’s overall prices increased significantly post-merger, there is no question that the system is flexing monopoly muscle within the SCRCOG region. Understanding any changes in the two hospitals’ prices may portend similar behavior in eastern Connecticut.
- We urge OHCA and the Attorney General to view the L+M acquisition in tandem with the unannounced takeover of Milford Hospital. To date, the relationship between YNHHS and

Milford Hospital has been viewed as a series of individual transactions.

The changes to the market statewide pose high potential risks to patients. In the interest of quality and affordability in our health care marketplace, regulators must use these tools and more before they decide whether this transaction should proceed.

APPENDIX A: DEFINING AND MEASURING HOSPITAL MARKETS

The authors have chosen to apply HHI to the five geographic areas identified in the report as an initial illustration of the challenges posed by YNHHS's slow-motion consumption of Milford Hospital and proposed acquisition of L+M Health. We are awaiting further data to allow more thorough analysis, and also expect that regulators will apply a more rigorous methodology as full information on the transaction becomes available.

The definition and measurement of hospital markets is a hotly contested legal subject. As noted in the body of the report, for many years courts tended to assume that it was appropriate to entrust not-for-profit entities with market power because of their "charitable" nature. As courts began to take the threat to competition from consolidating non-profit hospitals seriously, the prosecution of anti-trust cases foundered on the use of analytic tools that fail adequately to account for the inelasticity of hospital demand.

In 1982, the FTC and Department of Justice Guidelines adopted a test that sets the boundaries of a monopoly market at the furthest limits at which a potential cartel or monopolist can impose a small but significant non-transitory increase in price ("SSNIP"). A SSNIP is generally assumed to be a 5% increase for a year without losing market share.

To define the SSNIP boundary, economists used two tests. For hospitals, the Elzinga-Hogarty test uses "patient flow" data to determine consumers' ability to enter and exit the market boundaries. Any boundary in which 10% or more patients leave to get care elsewhere is assumed to have enough competition to preclude anti-competitive behavior. "Critical Loss Analysis" examines the ability of firms to withstand profitably the loss of customers expected under a given market definition following a price increase. Once the market was defined,

analysts would then apply a measure of market concentration such as the Herfindahl-Hirschman Index (HHI) to determine the anti-trust risk.

E-H and CLA both proved inadequate for hospital mergers. Neither accounts for factors that influence patient choice other than price (3rd party payment, role of the physician, proximity, availability of subspecialty services, etc.). Standard CLA analysis often results in "inconsistent logic and erroneous conclusions." Use of these tools allowed hospital defendants to win a series of cases between 1997 and 2004 in part by successfully defining markets as large geographic areas within which any single combination of hospitals posed a minimal threat to competition.

Gaynor, Kleiner, and Vogt estimate that these older methods overstated the elasticity of hospital demand "by a factor of 2.4 to 3.4 and were likely a contributing factor to the permissive legal environment for hospital mergers." That permissive environment allowed 1,425 mergers and acquisitions to be consummated between 1994 and 2009. Dr. Elzinga himself questioned the value of his own test on hospital markets in 2011.

In the early 2000s, economists developed the "option demand" analysis (Town and Vistnes, 2001; Capps, Dranove, and Satterthwaite, 2003) and the Differentiated Bertrand Oligopoly Model (DB). These models attacked the issue of third party reimbursement by envisioning a hypothetical health plan attempting to construct a provider network in the region of the merging competitors. "This is a reasonable characterization of managed care markets," write Gaynor, et al., of the option demand model.

The new methods yield markets far smaller and closer to economic reality than the older tests, and

lead to clearer pictures of market concentration. According to Gaynor et al, they allow analysts "to assess merger effects without a market definition."

However, they are not yet universally accepted in court, and even though the new methods are capable of assessing merger effects without a market definition, courts expect definitions and FTC guidelines for state Attorneys General insist on them as well. The new tools are powerful, and once we obtain data sufficient to apply them we will attempt to do so.

For our initial analysis, we have chosen to examine markets defined by the hospitals in their public descriptions of themselves. These analyses serve as an adequate preliminary basis for gauging the degree of concentration, and we examine several concentric markets that present analyses at varying scales of market definitions.

However, we recognize that in the policy process, any attempt at market definition will be contentious. Therefore, we urge regulators to heed the words of Kenneth Elzinga closely. In evaluating the usefulness of his original model in the context of

hospital mergers, Dr. Elzinga notes "where direct evidence of anticompetitive effects attributable to a merger is available, its use may diminish the need to rely on geographic market definition tools such as the E-H test," writes Dr. Elzinga. "Such direct evidence is most readily available in post-closing merger challenges such as the FTC's Evanston case."

Connecticut patients cannot wait until Milford and L+M are fully in the Yale-New Haven orbit to understand the potential price impact of the deals. Although there is no direct evidence, there is a useful precedent. Yale-New Haven's purchase of the Hospital of St. Raphael resulted in intense market concentration in the Greater New Haven area.

The Certificate of Need filed for that transaction in 2012 states that "YNHH has no plans to raise charges as a result of the HSR acquisition," language similar to that in the Certificate of Need for L+M. If an analysis of the market before and after that merger reveals significant price increases, there will be little question that YNHHS exerts monopoly pricing power.

**APPENDIX B:
HHI TABLE, BEFORE AND AFTER BOTH HOSPITAL ACQUISITIONS, BY AREA**

Market name	HHI before	HHI after	Change
Lawrence + Memorial Primary Service Area	5087	6982	+1895
Lawrence + Memorial Secondary Service Area	3485	4598	+1113
YNHHS Local Service Area	2911	3735	+823
Greater New Haven (SCRCOG)	5665	6931	+1266
YNHH Primary Service Area	3920	4222	+302

**APPENDIX C:
MARKET SHARE AND HHI CALCULATIONS FOR L+M ACQUISITION ONLY,
WITHOUT MILFORD HOSPITAL ACQUISITION, BY AREA**

Data in this table include YNHHS's proposed acquisition of L+M, but not the addition of Milford Hospital. HHI increase is compared to HHI with the Yale-New Haven system as is.

Market name	YNHHS Discharges	HHI	HHI Increase
State	31%	1667	+254
Lawrence + Memorial Primary Service Area	83%	6972	+1884
Lawrence + Memorial Secondary Service Area	59%	4592	+1107
YNHHS Local Service Area	57%	3539	+628
Greater New Haven (SCRCOG)	79%	6309	+643
YNHH Primary Service Area	61%	3933	+14

EXHIBIT 6

Community Hospitals at a Crossroads

Findings from an Examination of the Massachusetts Health Care System

Background of the report: building a path to a thriving, community-based health care system

The need for the report

- Hospitals and health systems across the country are facing **unprecedented impetus to adapt** to new care delivery approaches and value-based payments
- Community hospitals are under particular pressure to change and are uniquely challenged **by current market and utilization trends**, as evidenced by a number of recent consolidations, closures, and conversions in Massachusetts
- The state is pursuing sweeping delivery system transformation to achieve shared cost containment goals, and effective, **action-oriented planning is necessary**

Objectives of the report

- To understand and describe the **current state of and challenges facing community hospitals**
- To examine the implications of **market dynamics** that can lead to elimination or reduction of community hospital services
- **To identify challenges to and opportunities for transformation** in community hospitals
- To **encourage proactive planning** to ensure sustainable access to high-quality and efficient care and catalyze a **multi-stakeholder dialogue** about the future of community health systems

“ I don’t see any future for community hospitals...I think there’s a **fantastic future for community health systems**. If small stand-alone hospitals are only doing what hospitals have done historically, I don’t see much of a future for that. But I see a **phenomenal future** for health systems with a strong community hospital that breaks the mold [of patient care].”

COMMUNITY HOSPITAL CEO

Key themes of the report

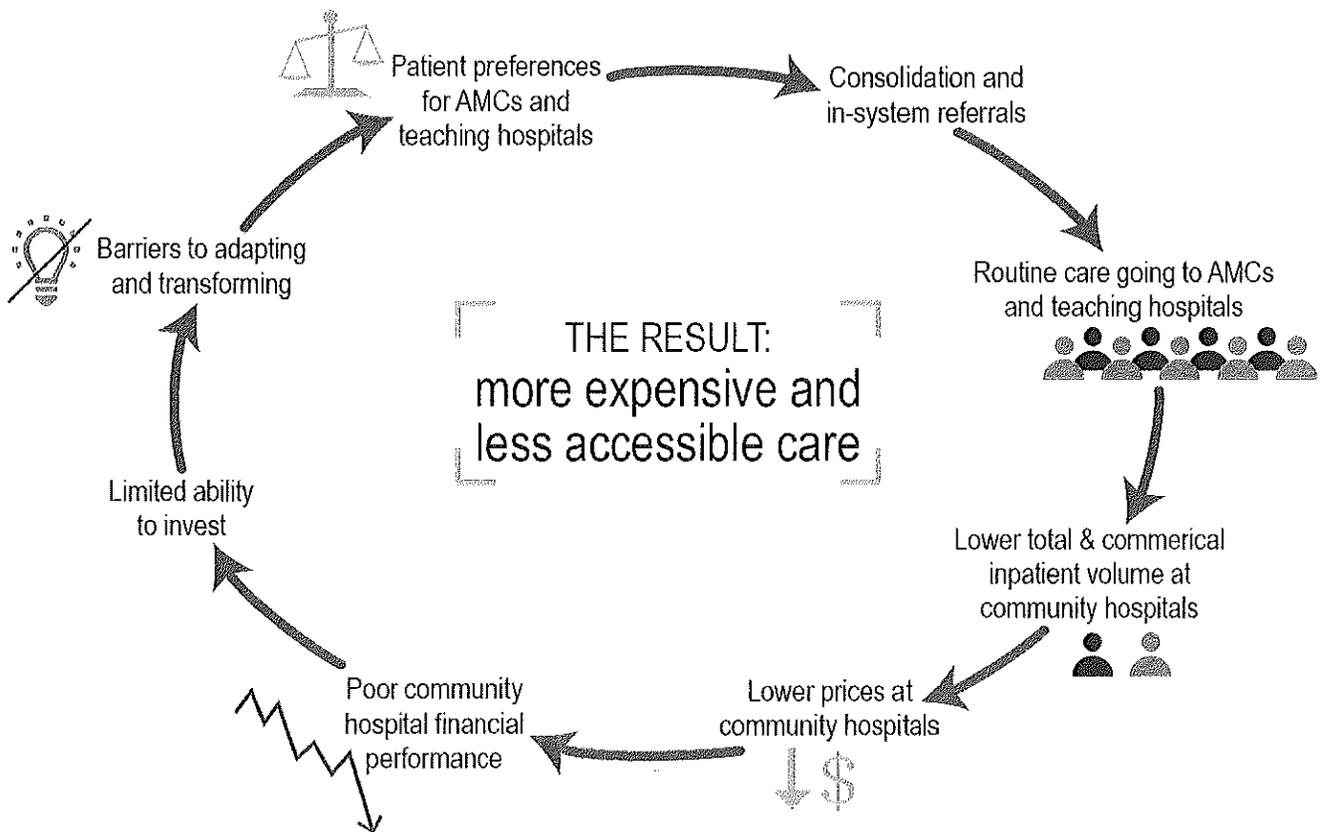

Community hospitals provide a unique value to the Massachusetts health care system

- While individual characteristics vary, as a cohort community hospitals play a critical role in care for publicly insured patients; providing local, community-based access; and, in particular, meeting behavioral health needs
- Community hospitals provide more than half of all inpatient discharges and more than 2/3 of all ED visits statewide
- Community hospitals generally provide high-quality health care at a low-cost, providing a direct benefit to the consumers and employers who ultimately bear the costs of the health care system

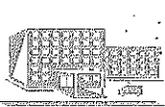

The traditional role and operational model for many community hospitals faces tremendous challenges

- Community hospitals generally have worse financial status, older facilities, and lower average occupancy rates than AMCs and teaching hospitals
- Many hospitals face barriers to transformation:
 - Consolidation of acute and physicians services into major health systems
 - Routine care going to AMCs and teaching hospitals
 - Lower commercial volume and prices leading to lack of resources for reinvestment
 - Difficulty participating in current alternative payment models

Community hospitals face self-reinforcing challenges that lead to more expensive and less accessible care

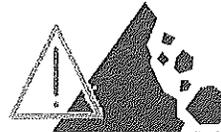

Community Hospitals at a Crossroads: Findings from an Examination of the Massachusetts Health Care System

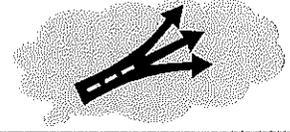

Overview

Value

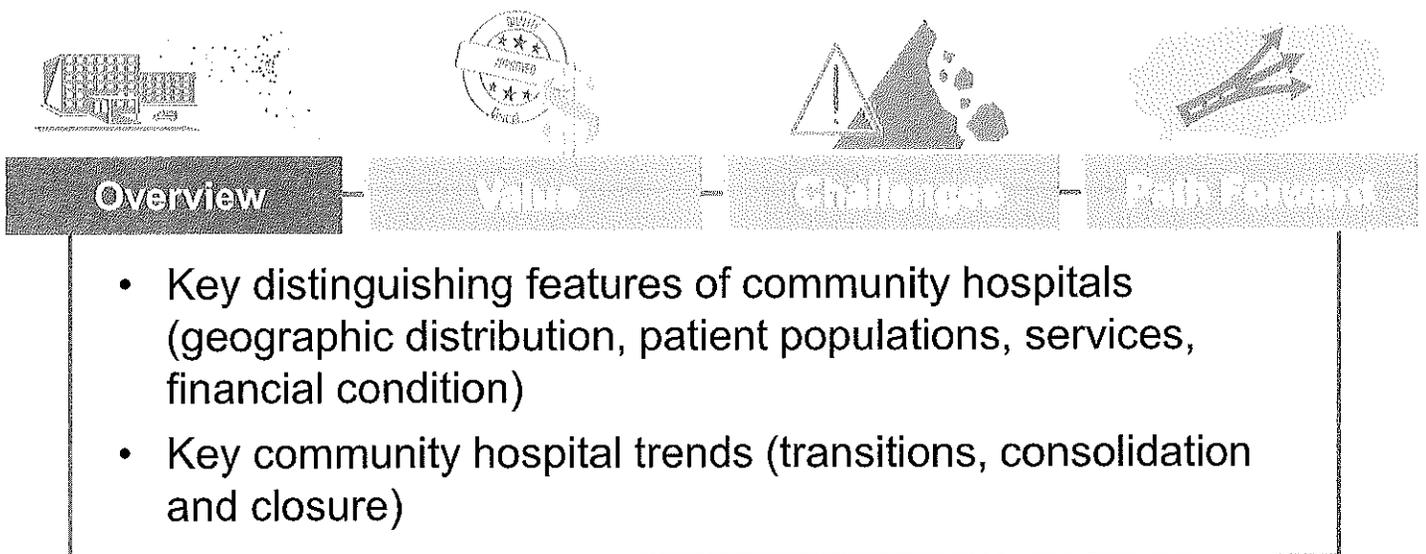

Challenges

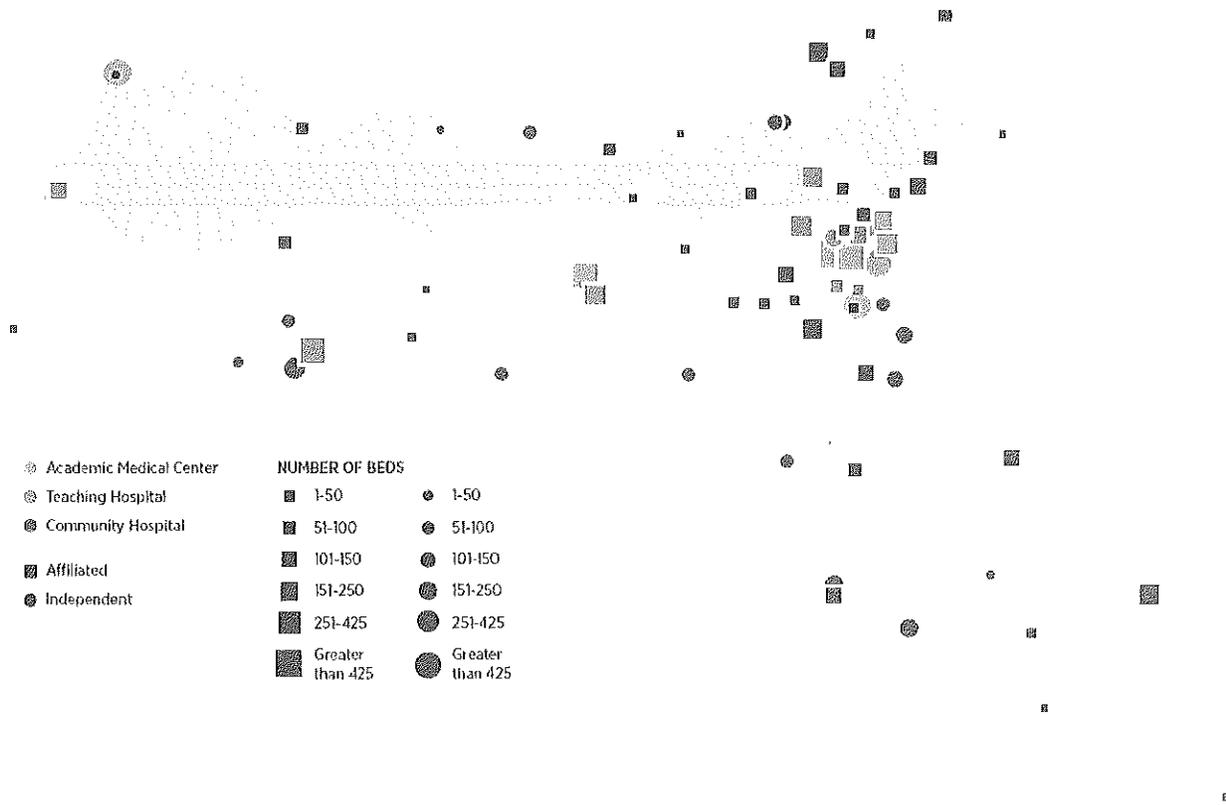

Path Forward

- An **overview** of community hospitals in Massachusetts
- The **value** of community hospitals to the health care system
- **Challenges** facing community hospitals
- The **path** to a thriving community-based health care system

An overview of community hospitals in Massachusetts

Community hospitals serve all parts of the Commonwealth

Source: HPC analysis of CHIA Hosp. Profiles, 2013

Community hospitals at a glance

7,518 | 52%
more than half of beds statewide
(19 – 556)

417,275 | 51.3%
more than half of discharges statewide
(556 – 40,303)

5.8 | 42
million | %
outpatient visits

1.9 | 65
million | %
2/3 of ED visits
(10,329 – 155,236)

64% | 84%
community hospitals | AMCs
low occupancy rate
(29% – 74%)

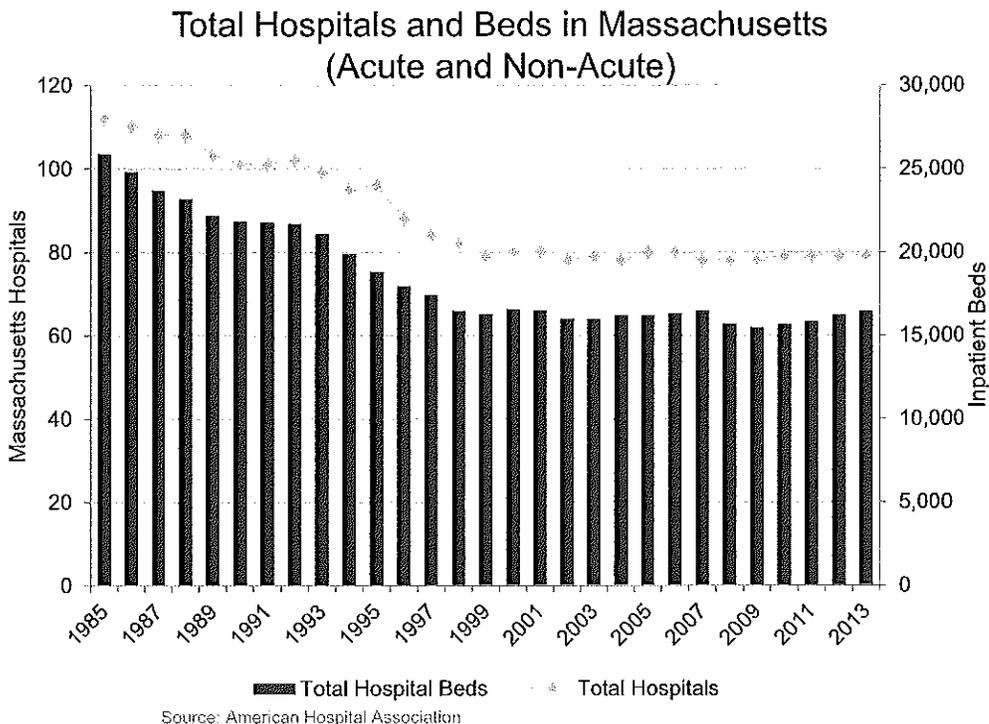

0.8 | 1.33
community hospitals | AMCs
low case mix index
(0.60 – 0.93)

9.3 | +11
minutes | minutes
local patients drive 9.3
minutes on average to
community hospitals;
they would drive 11
minutes more on
average to get to the
next closest hospital

Older age of plant
Community hospitals generally
have older physical plants than
AMCs or teaching hospitals

Higher public payer mix
Community hospitals generally
have disproportionately high
shares of Medicaid and Medicare
patients

Consolidations and closures over the last 30 years have contributed to a dynamic hospital market in Massachusetts

Recent Conversions in Massachusetts Have Had Varied Impact

North Adams Regional Hospital

Steward Quincy Medical Center

Two Conversions Are Being Currently Contemplated

mergers or acquisitions of one hospital by another

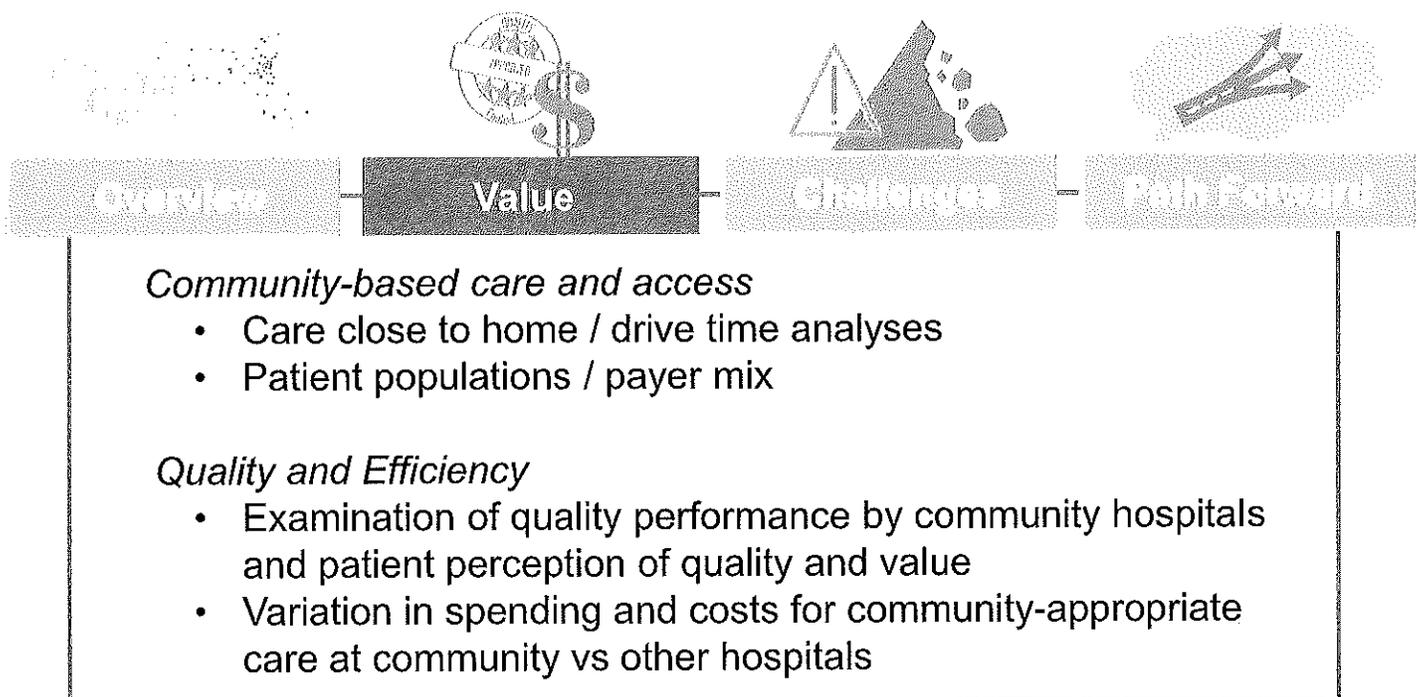

16

new contracting or clinical relationships between hospitals

5

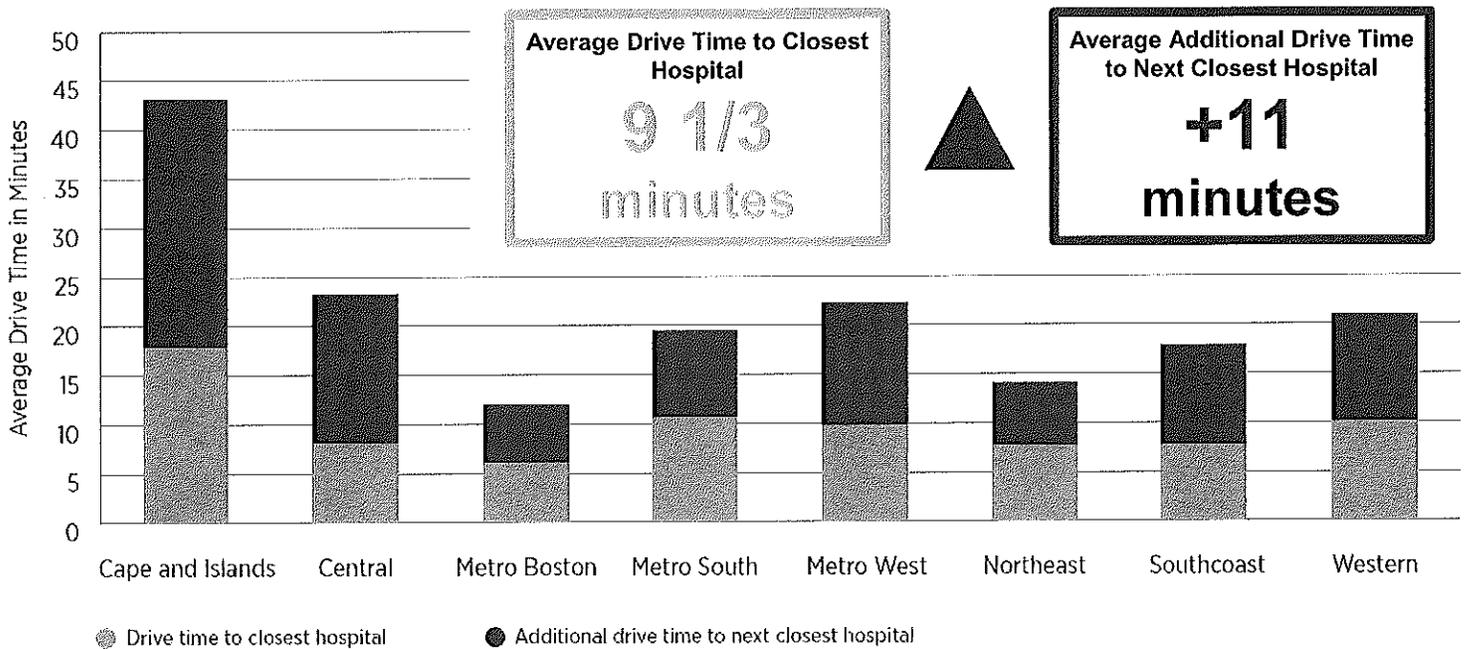

hospitals acquiring physician groups

The value of community hospitals to the health care system

Community hospitals provide local access for local patients

Average Drive Times for Patients Using Their Local Community Hospital
Analysis of patients who use their closest community hospital as a usual site of care

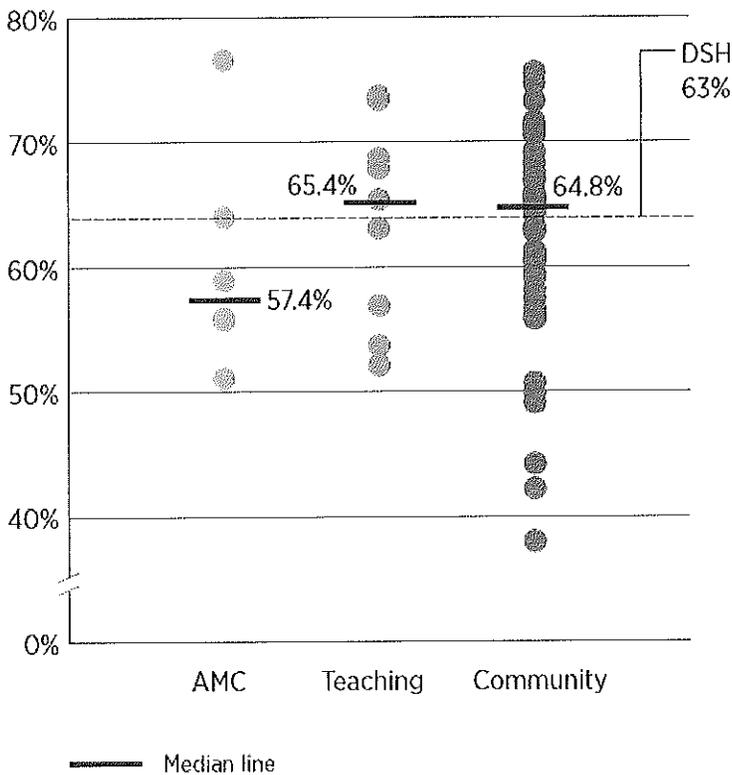

Source: HPC analysis of MHDC 2013 discharge data.

Notes: Drive times may underrepresent travel time and travel time differentials for populations relying on public modes of transportation. The Cape and Islands region includes only Falmouth and Cape Cod Hospital for the purposes of this analysis, since measuring drive times for Hospitals on Nantucket and Martha's Vineyard islands would not be meaningful.

Community hospitals serve a high proportion of vulnerable populations for whom access to care is often difficult, such as elders, individuals with disabilities, and individuals with low incomes

Percent of Hospital Gross Patient Revenue from Public Payers by Hospital Cohort, FY13

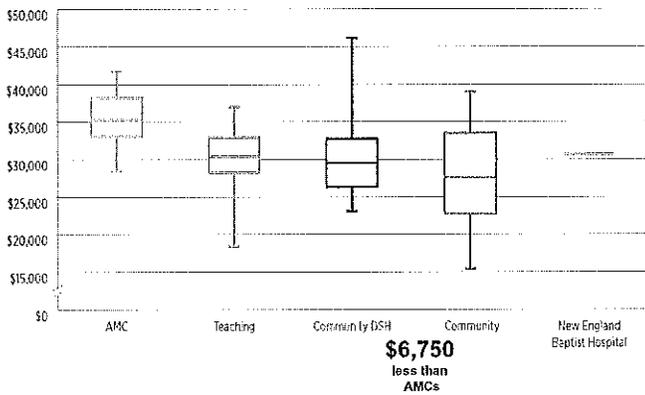

“
The community hospital plays a role as a cultural and social staple for the community that it serves. It’s the place you’re born at, that you grow up with, and get most of your basic care at...The state should ensure access to community-based, cost-effective care
 ”
 MASSACHUSETTS STATE LEGISLATOR

Source: HPC analysis of CHHA Acute Hosp. Databook, supra footnote 11, at Appendix D.
 Note: Public payers include Medicare and Medicaid/Massal health fee for service and managed care plans, Health Safety Net payments, and charges designated by hospitals as “other government.”

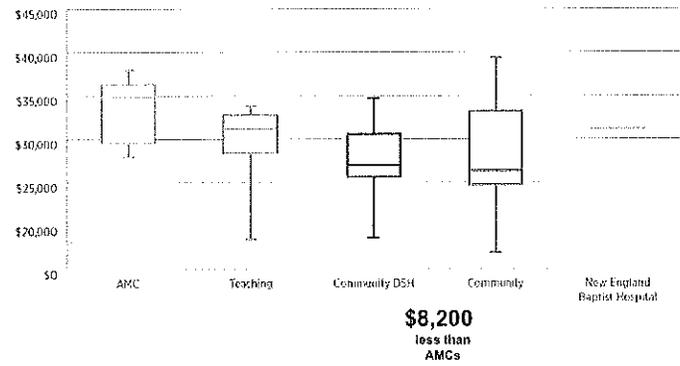

Spending at community hospitals is generally lower for low-acuity orthopedic and maternity care and is not associated with any difference in quality

Orthopedics

Hip Replacement

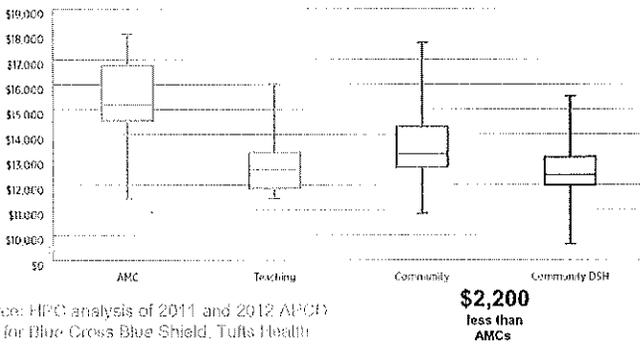

Knee Replacement

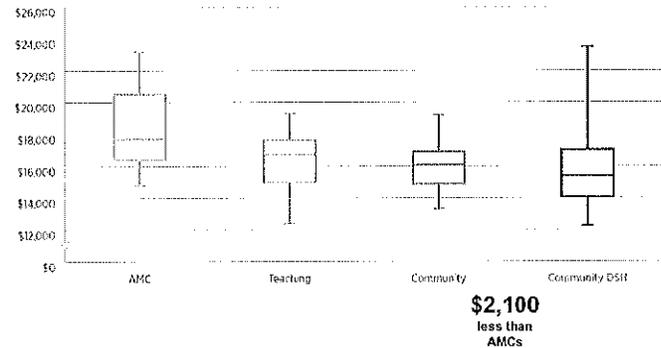

Deliveries

Pregnancy - Vaginal Delivery

Pregnancy - Caesarian Delivery

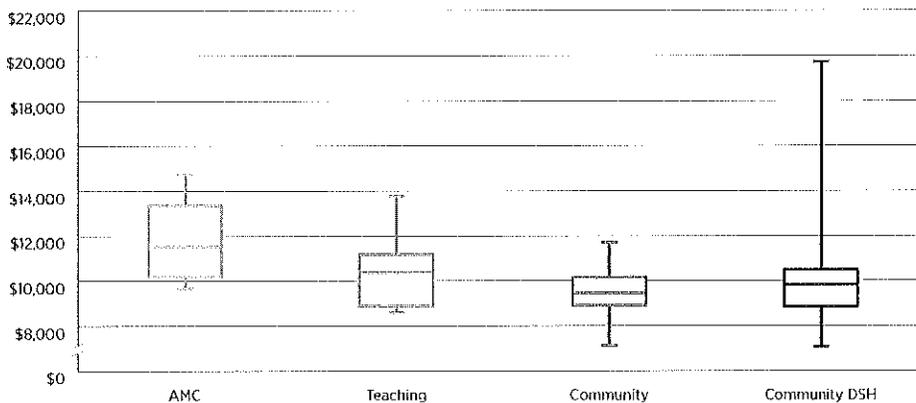

Source: HPC analysis of 2011 and 2012 APCD data for Blue Cross Blue Shield, Tufts Health Plan, and Harvard Pilgrim Health Plan patients

We found no correlation between hospital cost and quality. Each group of hospitals has higher and lower quality performers but no cohort outperforms any other overall.

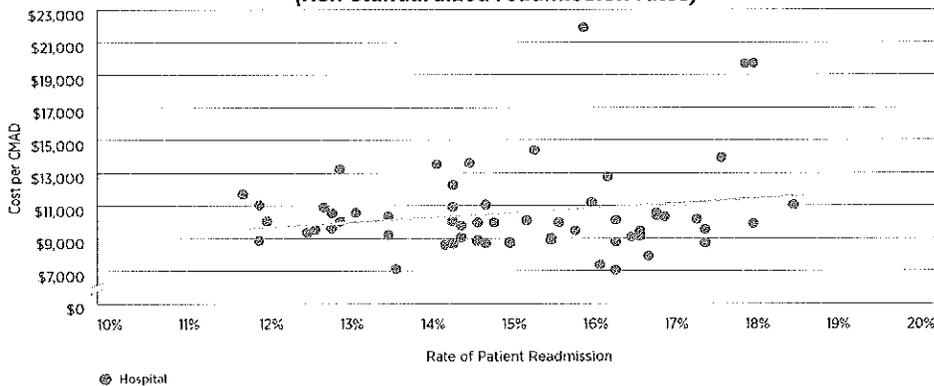

Most community hospitals provide care at a lower cost per discharge, without significant differences in quality

Hospital costs per case mix adjusted discharge, by cohort

Source: HPC analysis of CHA Hosp. Profiles, 2013

Costs per CMAD are not correlated with lower quality (risk-standardized readmission rates)

Source: HPC analysis of CHA Hosp. Profiles, 2013; CHA Focus on Provider Quality Databook, Jan 2015

On average, **community hospital costs are nearly \$1,500 less per inpatient stay** as compared to AMCs, although there is some variation among the hospitals in each group

Although costs per discharge for community hospitals have grown at a slightly higher rate than those for AMCs, the gap between AMC and community hospital costs has not substantially changed

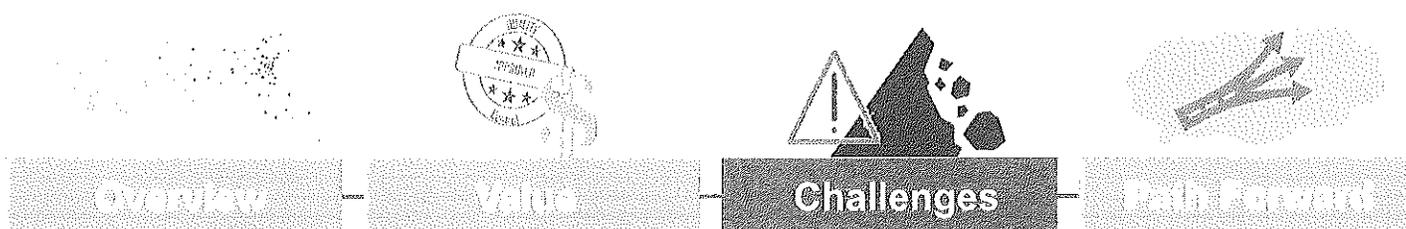

Reasons for differences in efficiency likely vary, and may include service offerings, support for teaching programs, and, particularly for community hospitals, the pressure of tight operating margins

Increases in health care spending on inpatient care would result from the closure of most community hospitals, due to commercial price variation

The HPC modeled where patients would likely seek care if community hospitals were to close and to estimate commercial spending impact.

- In most cases, a community hospital closure would **increase annual spending on inpatient care**
- **The majority of these increases would be less than \$4 million**, due to the disproportionately low volume of commercially insured patients at many community hospitals
- Spending would increase by **more than \$5 million for seven community hospitals**
 - The closure of **Lowell General Hospital** would cause the greatest increase: **over \$16 million**
- Spending would actually **decrease** in the event of the closure of any of eight community hospitals, primarily those with higher relative prices
 - The greatest decreases in spending would result from **South Shore Hospital (\$4.2 million annually)** or **Cooley-Dickinson Hospital (\$2.8 million annually)** becoming unavailable

Challenges facing community hospitals

- Referral patterns and consumer perceptions
- Consolidation of hospitals and primary care providers with large systems
- Decreasing inpatient volume and misalignment of supply and demand for hospital services (current and future)
- Payer mix, service mix, and variation in prices
- Competition from non-traditional market entrants
- Implications if current trends continue

Driven by referrals and perceived quality, many patients are choosing AMCs and teaching hospitals over community hospitals for routine care

HPC commissioned qualitative analyses (8 focus groups in four regions of the state) by Tufts University to better understand what drives consumer choices of hospitals

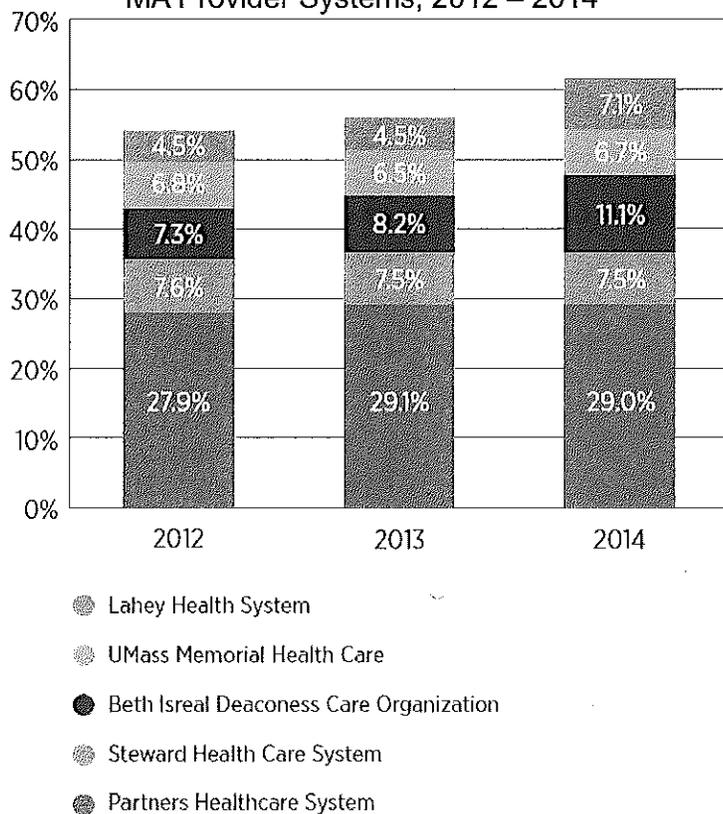

“ I guess it might be something in your psyche because I like brand-name products. So maybe that’s what drives me to Boston. ”

FOCUS GROUP PARTICIPANT

- Patients often mentioned that **they did not feel that they had a choice** of hospitals because their primary care provider or insurance plan determined where they could go for care
- **Two in three Massachusetts adults** have **never sought information** about the safety or quality of medical care, instead valuing the experiences of peers and recommendations of their primary care physicians.
- Many patients stated that they felt that **AMCs and teaching hospitals were better** because they had the best physicians, including doctors who had graduated from medical schools they considered prestigious. Many patients indicated that they **believed AMCs and teaching hospitals had developed reputable brands**
- Some patients stated that the **higher costs of AMCs and teaching hospitals must mean that they provided better quality**, regardless of what quality data showed. Many also said they wanted to “get their money’s worth” from the health care system after investing heavily in health insurance coverage. Others reported that **cost is not a factor when it comes to health**

Increased consolidation of providers has driven referrals to large provider systems, including their anchor AMCs and teaching hospitals

Percent of Statewide Inpatient Discharges at the Five Largest MA Provider Systems, 2012 – 2014

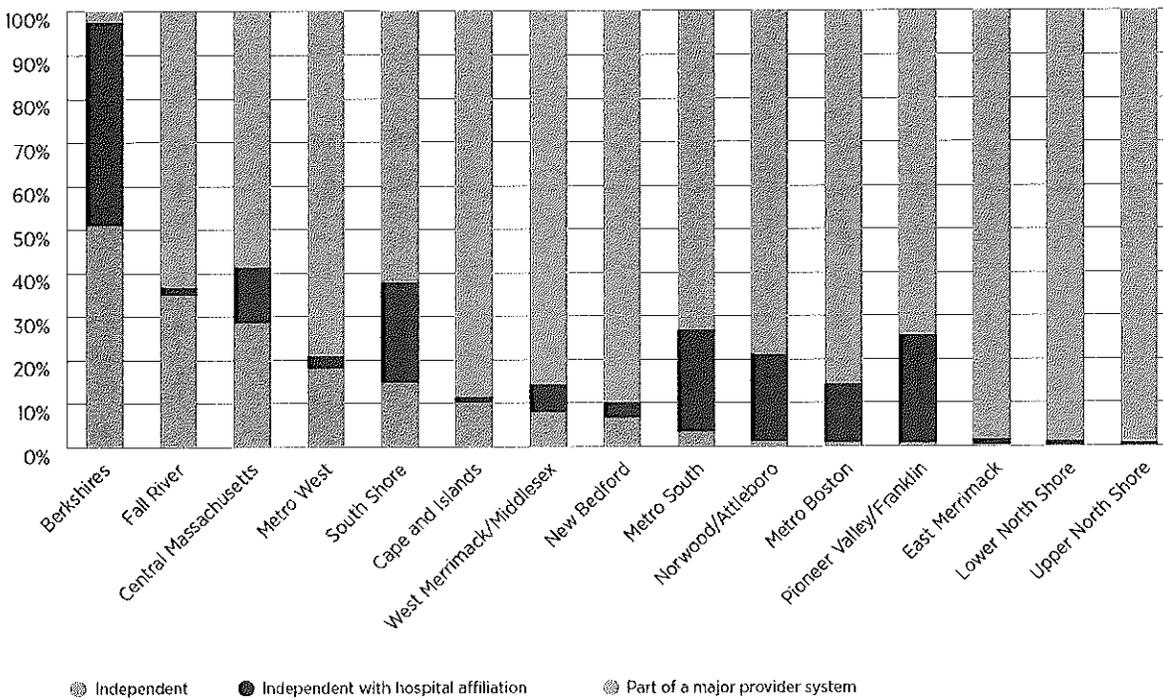

“Retaining primary care staff and specialists, ‘the gatekeepers to volume’ is challenging. Providers continue to leave for big-name systems and AMCs – and patients follow”

Synthesis of MASSACHUSETTS PROVIDER INTERVIEWS

Source: HPC analysis of MADC discharge data
 Note: Systems shown have the highest total net patient service revenue among providers in the Commonwealth.

Most primary care services are now delivered by physicians affiliated with major provider systems

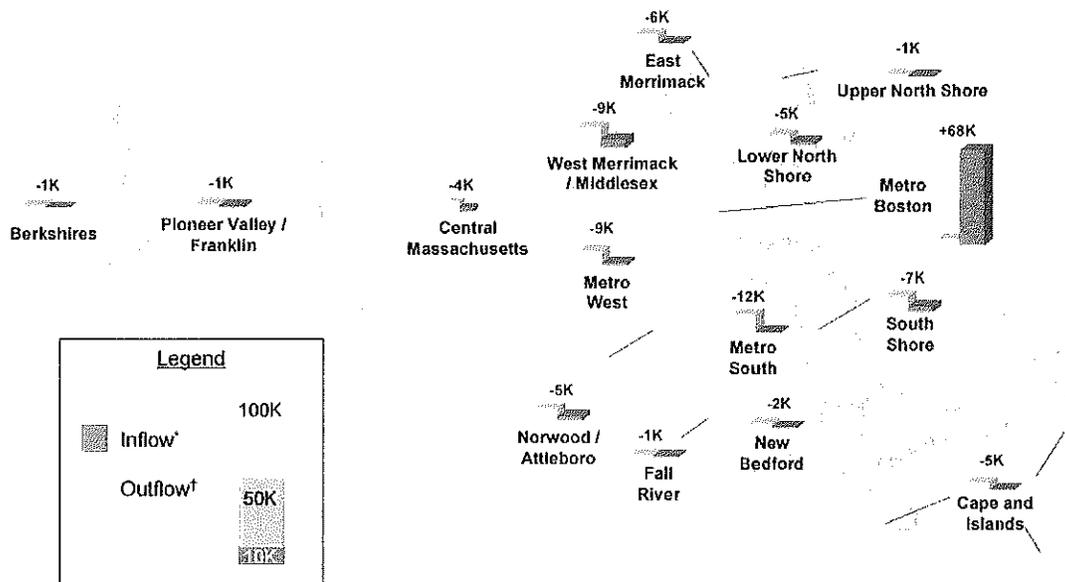

Percentage of Primary Care Services Delivered by Independent versus Affiliated Physicians by Region, 2012

Percentage of PCPs Affiliated with Eight Largest Systems Grew from **62%** in 2008 to **76%** in 2014

Source: HPC analysis of 2012 APCD claims for BCBS and HPHIC; 2012 MHOP Master Provider Database.
 Note: For the purposes of this analysis, major provider systems include Atrius Health, Baycare Health Partners, Beth Israel Deaconess Care Organization, Laroey Health System, New England Quality Alliance, Partners Community Health Care, Steward Health Care Network, and UMass Memorial Health Care. PCPs affiliated with multiple systems are counted as being part of a major provider system.

Most Massachusetts residents who leave their home region for inpatient care seek care in Metro Boston at higher-priced hospitals

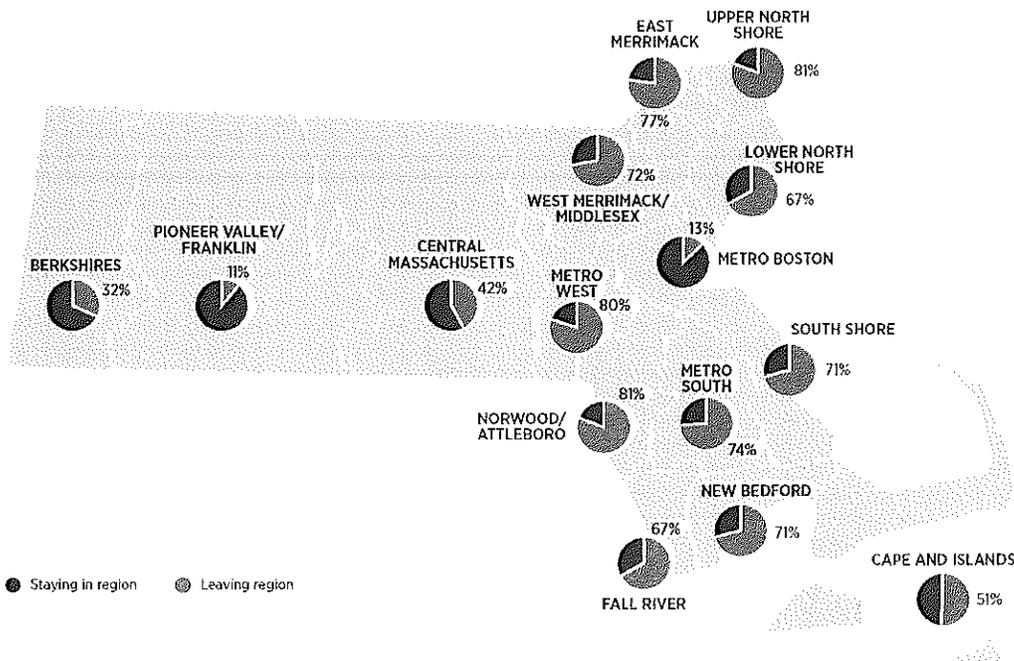

<p>Commercially insured patients are most likely to outmigrate to Boston</p>	<p>Patients from higher income regions are more likely to outmigrate to Boston</p>	<p>Trends hold across a variety of service lines, including deliveries</p>
--	--	--

* Inpatient care at hospitals in region for patients who reside outside of region
 † Inpatient care at hospitals outside of region for patients who reside in region

Large proportions of patients leave their home regions for deliveries

Percentage of Patients Leaving their Home Regions for Community-Appropriate Deliveries, 2013

74% → 50%

change in proportion of all births in community hospitals from 1992 – 2012¹

¹Institute for Equality and Affordability League, *Healthcare Equity in Massachusetts: Breaking the Victim Cycle*

6 hospitals saw **53%**

of low risk births in 2011-2012. 5 of these hospitals had above average delivery costs.

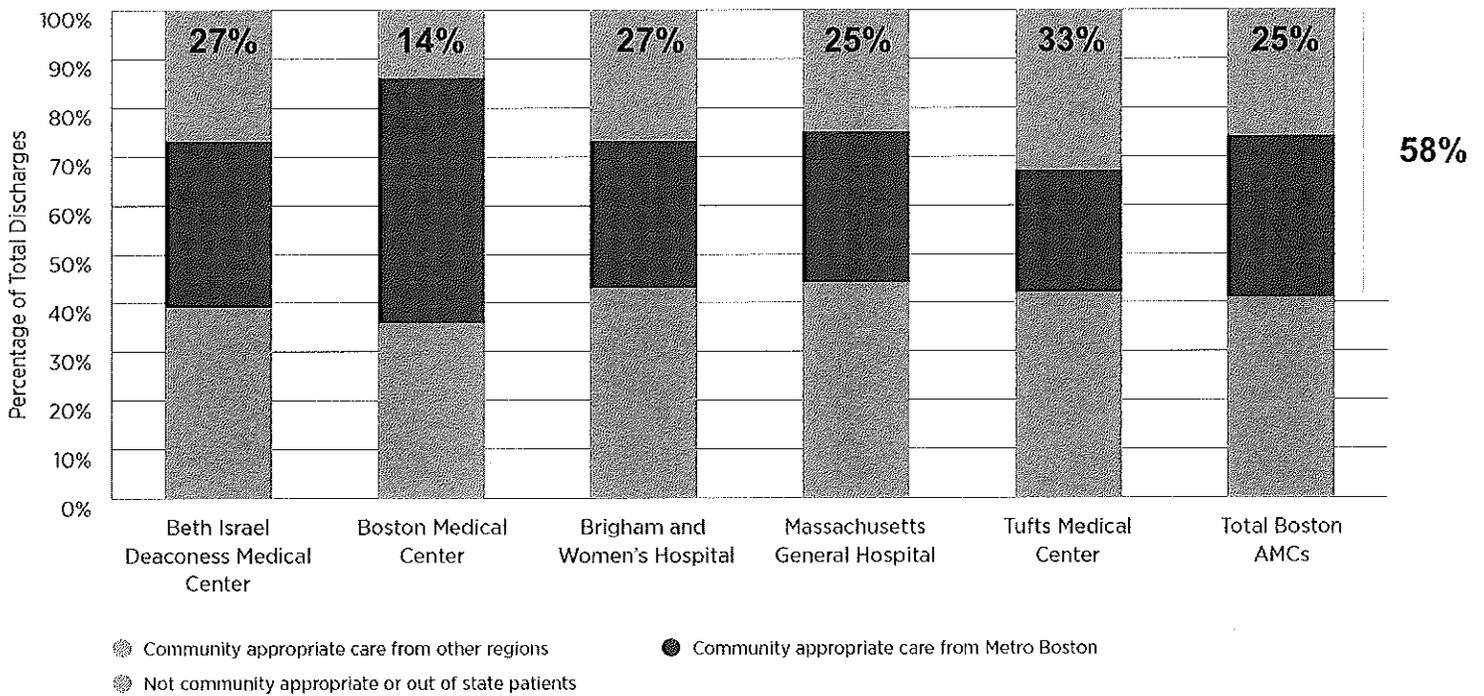

Massachusetts General Hospital and Brigham and Women's Hospital have highest costs statewide for maternity care and saw

20%

of all low-risk births in the state

A significant portion of the care provided at Boston AMCs could be appropriately provided in a community hospital setting

Inpatient Discharges at Boston AMCs, 2013
Community-Appropriate Volume as a Proportion of Total Volume

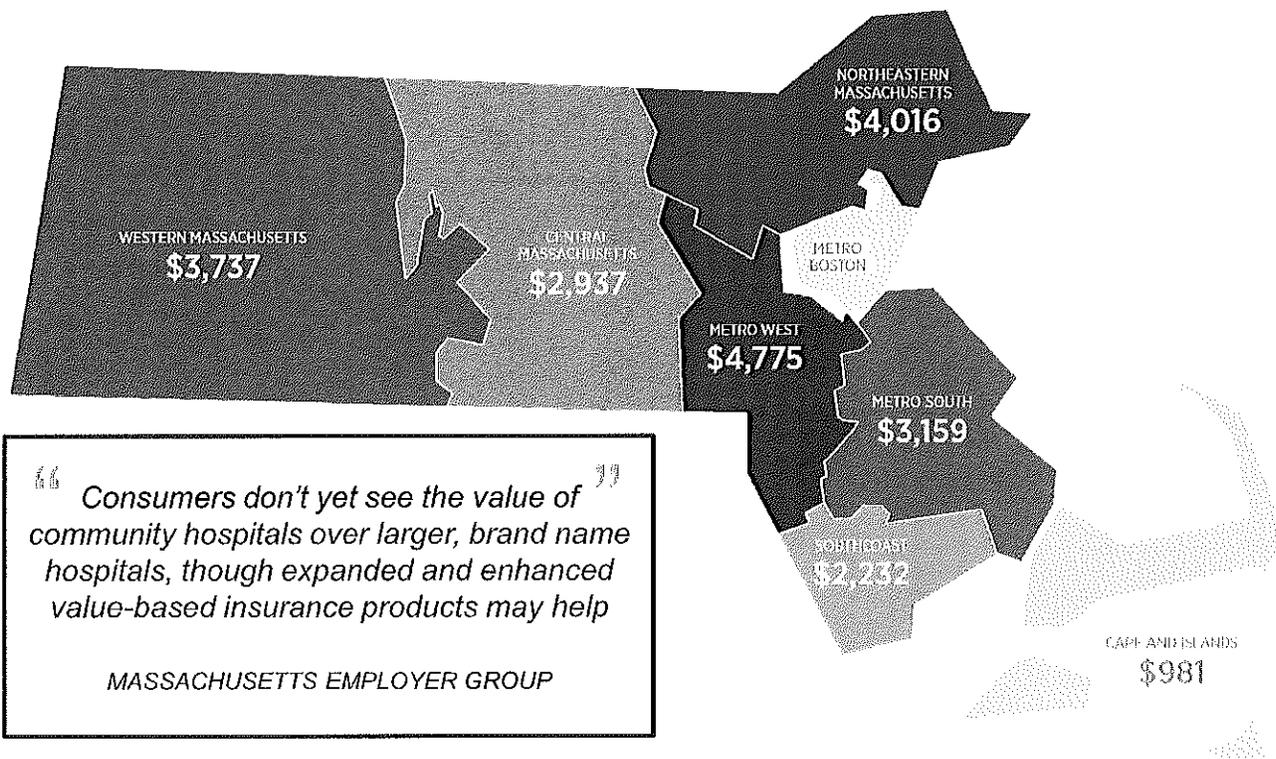

Source: HMC analysis of MEDC 2013 discharge data.

Note: Figure shows proportion of volume at each hospital, and does not reflect differences in total volume amongst the hospitals shown. Estimates of the volume of community appropriate care provided at AMCs are conservative as community appropriate care is defined to exclude cases which some community hospitals could effectively handle but that many community hospitals could not.

Patient migration to Boston increases health care spending

Average Additional Case-Mix Adjusted Cost for Each Commercial Discharge at a Boston Hospital Rather Than a Local Hospital, by Region of Patient Origin

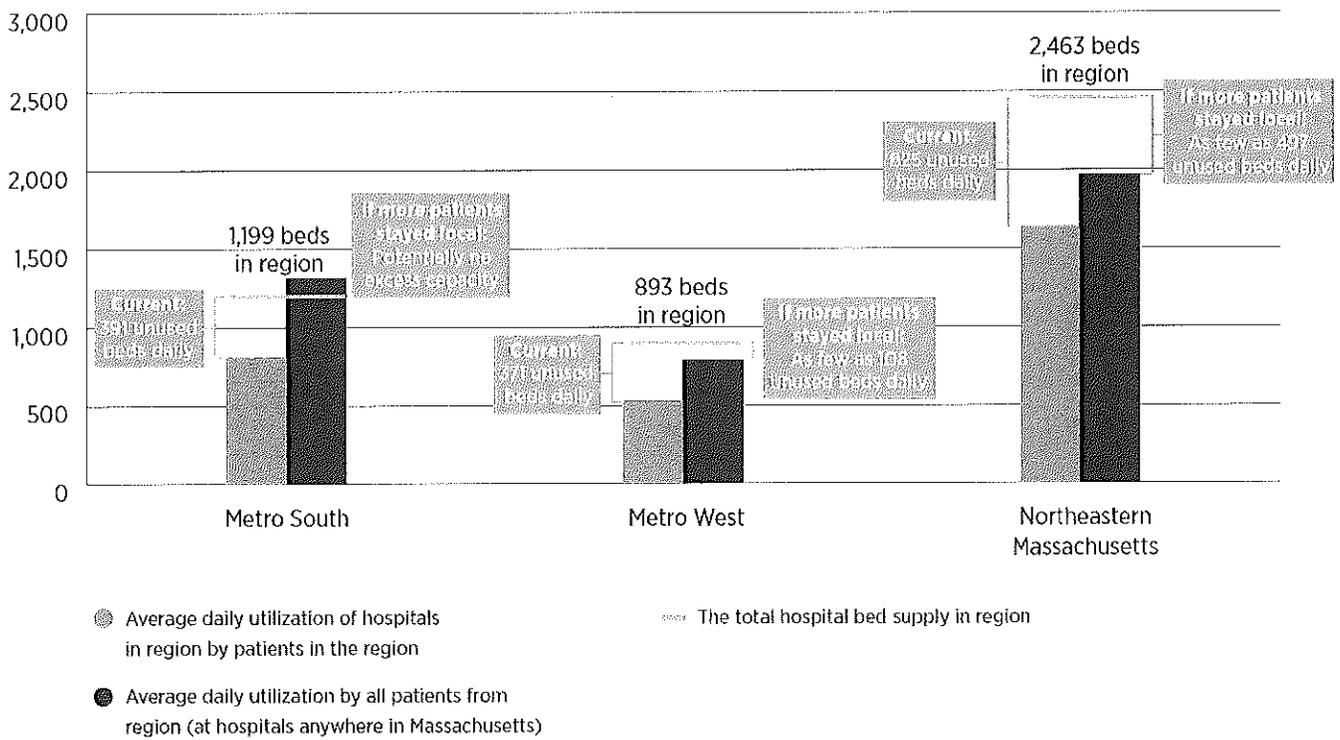

Source: HPC analysis of MHDC 2013 discharge data and raw CHIA relative price data.

Note: Figures shown are differences in average commercial revenue per CMAD for hospitals in each region compared to those in Metro Boston, adjusted for payer mix.

In most regions, hospitals have the capacity to treat more patients locally

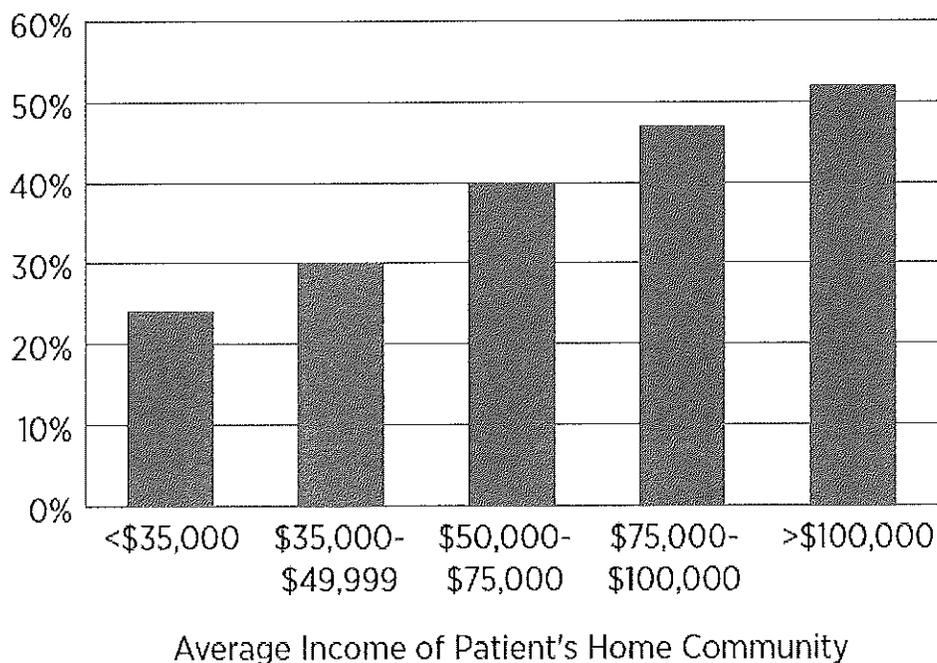

Average Use of Hospitals in Regions Neighboring Metro Boston versus Average Use of All Hospitals by Region Residents, 2013

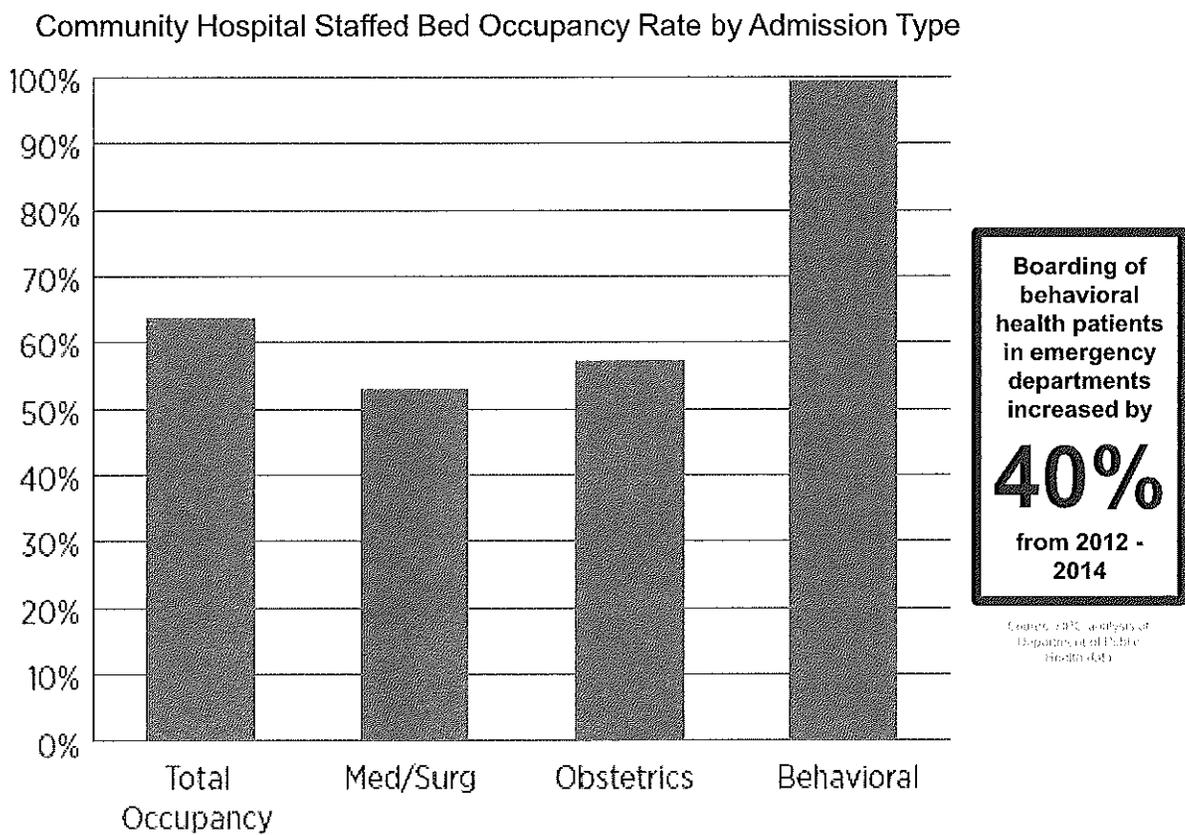

Source: HPC analysis of MHDG 2013 discharge data and CHA hospital 403 reports.

Commercially insured patients and patients from wealthier communities are more likely to migrate to Boston for care

Probability that Patient will Travel Outside of His/Her Home Region for Inpatient Care, Based on Home Community Income

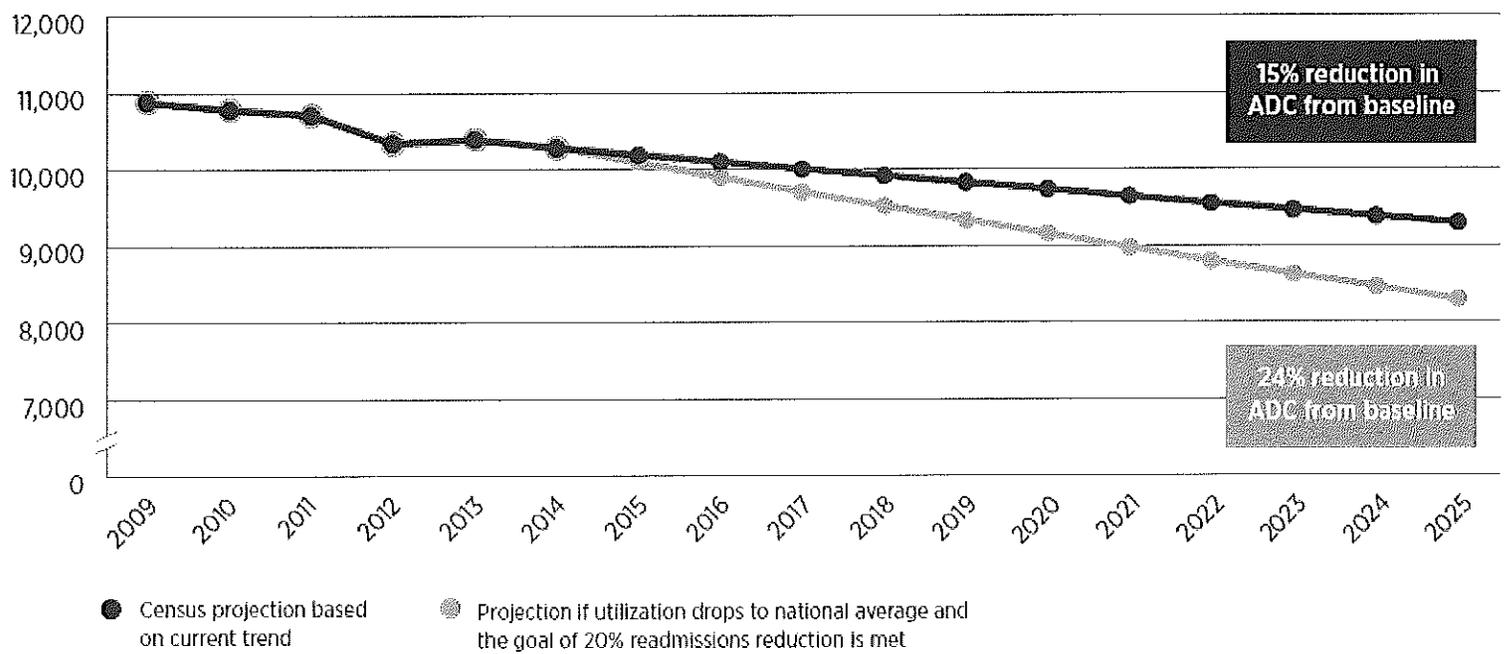

In addition to lowering volume, migration results in community hospitals seeing larger proportions of government payer patients and those seeking low-margin services

Source: CDC Analysis of Department of Public Health Data

Declining inpatient utilization poses a structural challenge to the traditional community hospital model

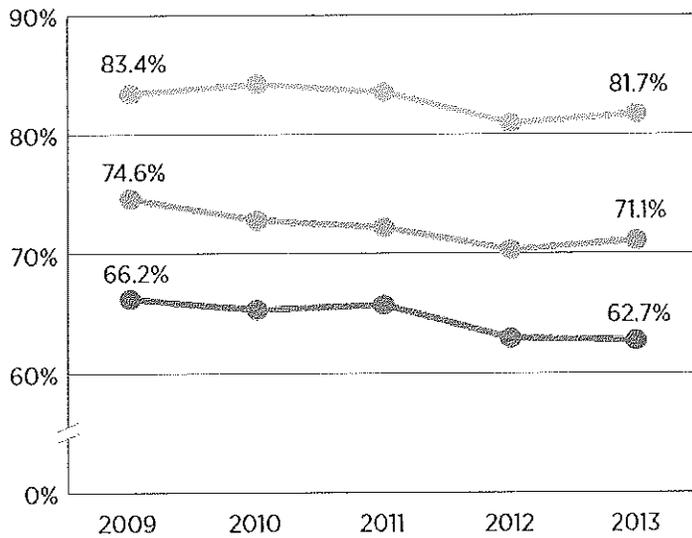

Total Average Daily Census Projections for all Massachusetts Hospitals, 2009 - 2025

Source: Health Policy Commission, based on data from the Massachusetts Department of Health, "Average Daily Census Projections for All Massachusetts Hospitals, 2009-2025." The chart shows a steady decline in the total average daily census (ADC) for all Massachusetts hospitals from 2009 to 2025. The current trend projection shows a 15% reduction in ADC from the 2009 baseline of approximately 11,000 to about 9,400 by 2025. A second projection, assuming utilization drops to the national average and a 20% readmissions reduction goal is met, shows a more significant 24% reduction, resulting in an ADC of approximately 8,400 by 2025.

Community hospitals have lower average occupancy, and declining hospital utilization has further impacted occupancy rates

Total Inpatient Occupancy by Hospital Cohort,
2009 – 2013

- AMCs
- Teaching Hospitals
- Community Hospitals

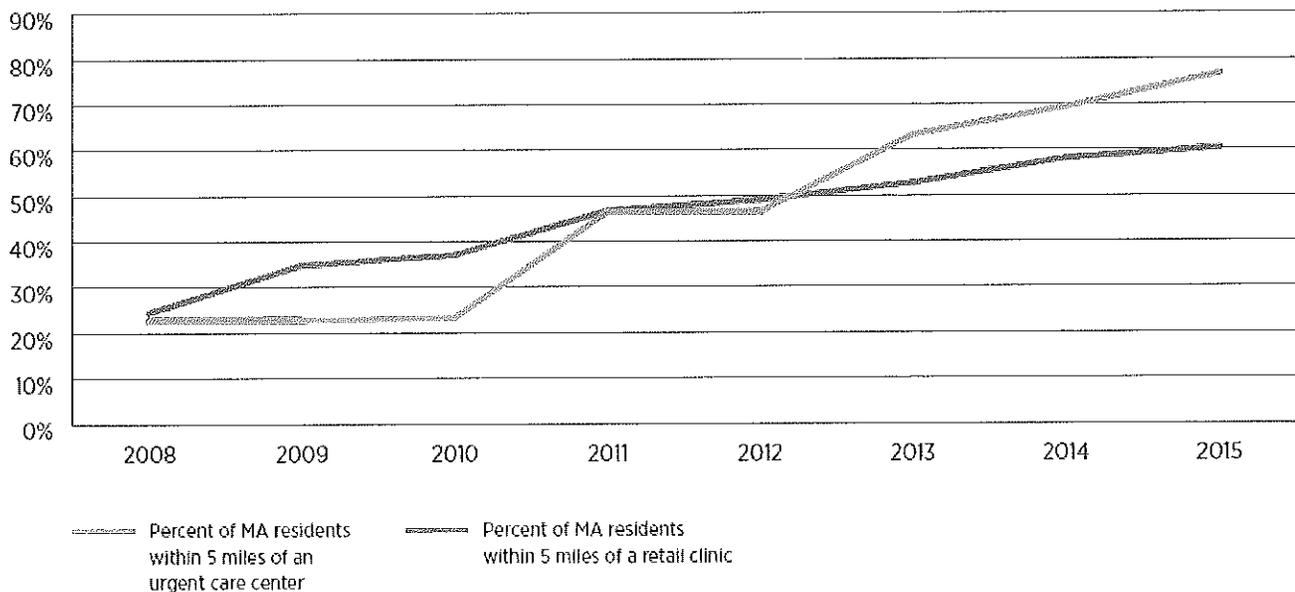

Source: HPC analysis of HCUP data and other data from the IHA to 2013. The data shows that occupancy rates for all hospital cohorts have declined since 2009. The decline is most pronounced for community hospitals, which have seen a 4.5 percentage point decline in occupancy rates from 66.2% in 2009 to 62.7% in 2013. This decline is consistent with the overall trend of declining hospital utilization.

If current trend continues, community hospitals could face average occupancy rates of less than

50% within
10 years

Declining inpatient utilization is driven in part by growing accessibility of non-hospital health care providers

Percent of MA Residents Living Within 5 Miles of Retail Clinics and Urgent Care Centers

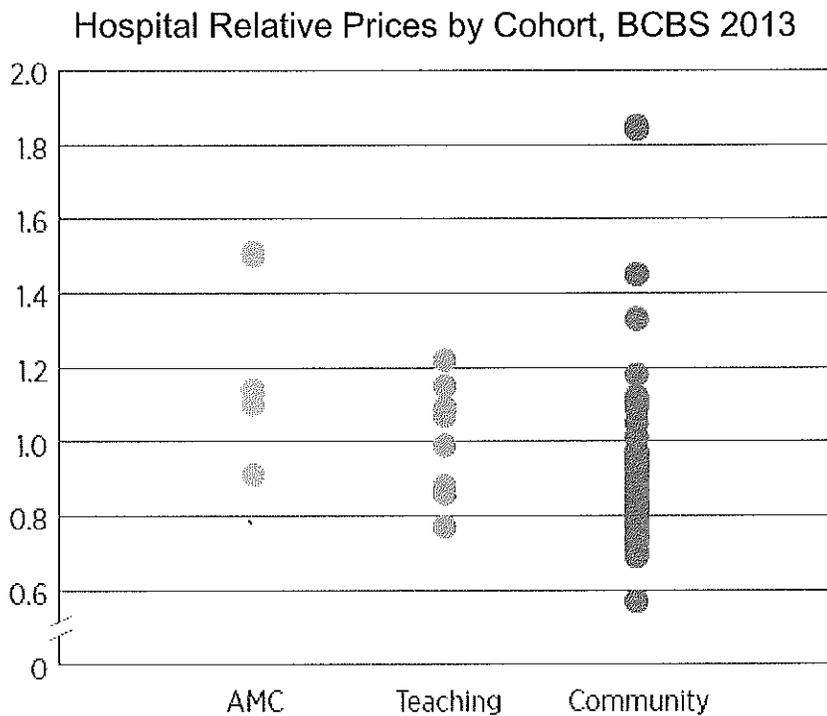

Source: Massachusetts Department of Health, "Statewide Health Care Access and Quality Report 2015" (2015)

“When [they] opened an urgent care center down the block we saw an immediate and precipitous decline in ED volume, especially the commercially insured, non-acute patients. It might be good for costs in the short term, but if we cannot keep our ED open, then what’s next?”

COMMUNITY HOSPITAL CHIEF STRATEGY OFFICER

Community hospitals tend to receive lower commercial relative prices than AMCs or teaching hospitals

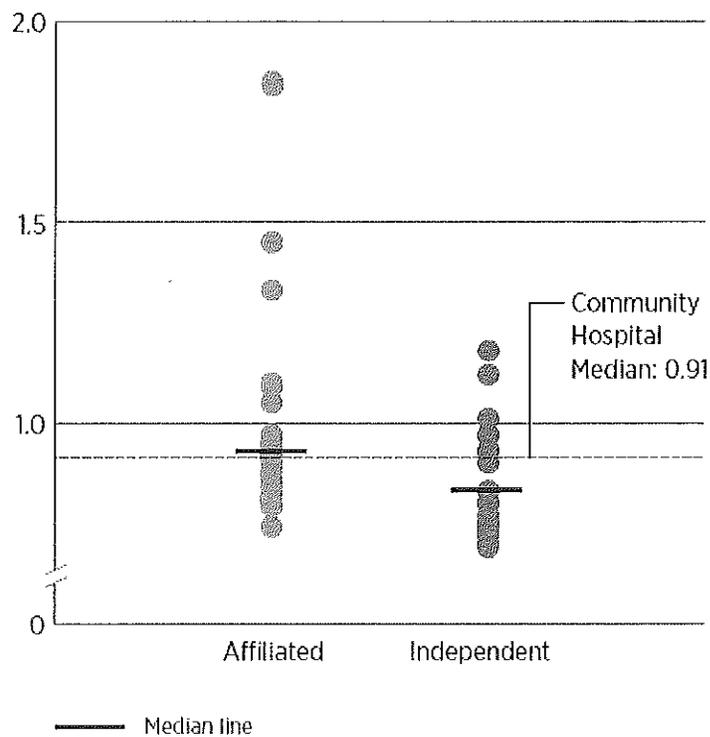

“The gap in prices, [which is] a reflection of the market power dynamics in the state, is probably the biggest threat to a lot of the community hospitals

MASSACHUSETTS HEALTH
INSURANCE LEADER

Sources: HPC analysis of Ctr. For Health Info & Analysis, Provider Price Variation in the Massachusetts Health Care Market (calendar year 2013 data), Databook (Feb. 2015), [hereinafter CHIA 2013 RP Databook] available at <http://chiamass.gov/assets/Uploads/relative-price-databook-2013.xlsx>

Community hospitals affiliated with systems tend to have higher relative prices

Community Hospital Relative Prices and Affiliation Status, BCBS FY13

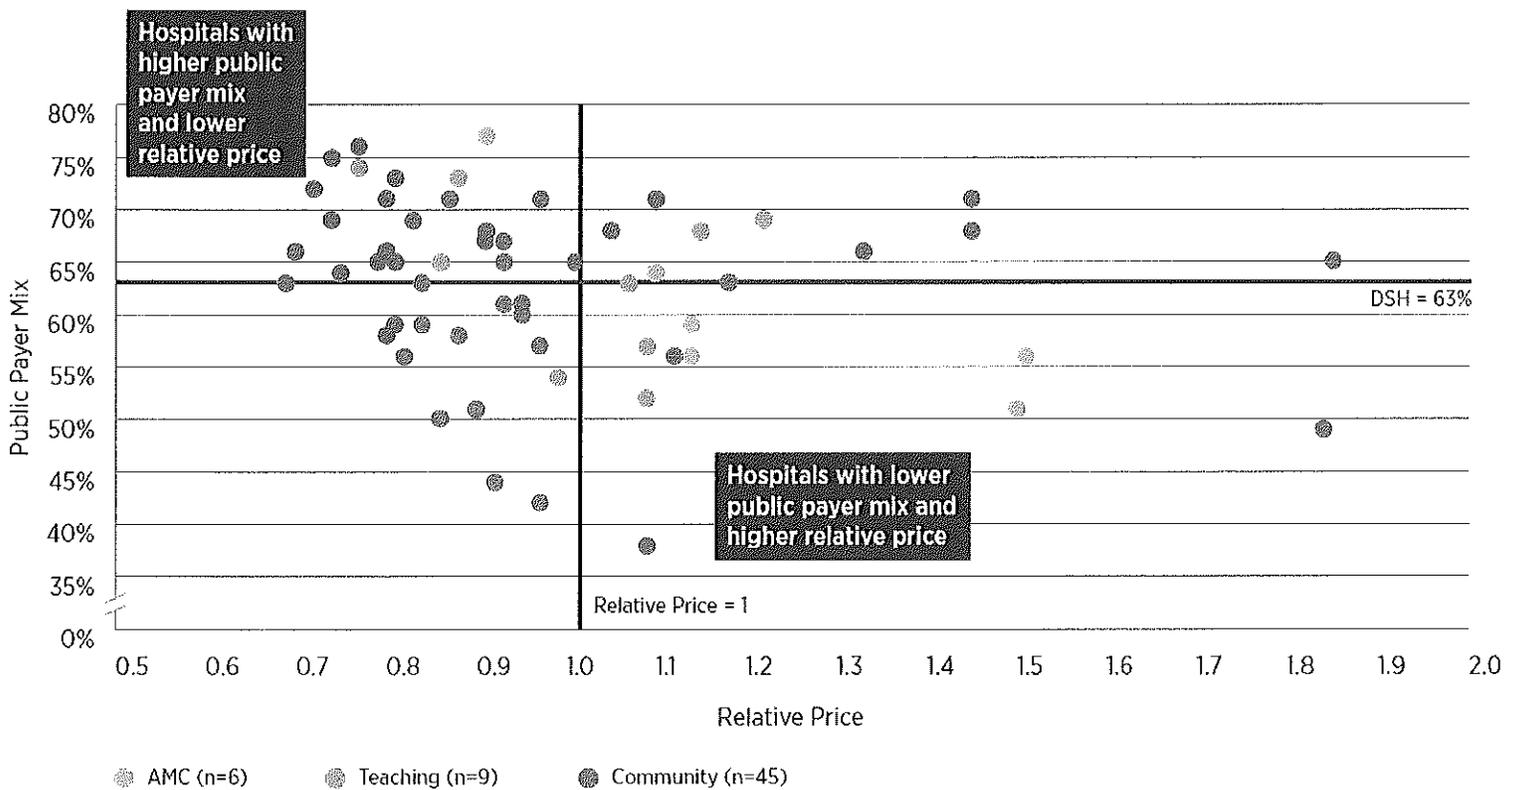

Source: HPC analysis of CHIA 2013 RP Databook

Note: While this graph shows relative prices for only one major commercial payer, price and affiliation status are similarly correlated for the other two major commercial payers.

Hospitals with higher public payer mix tend to have lower relative prices, compounding financial stresses; cross-subsidization of higher public payer mix with higher commercial prices is not observed

Hospital Commercial RP and Percent of Revenue from Public Payers by Cohort, BCBS FY13

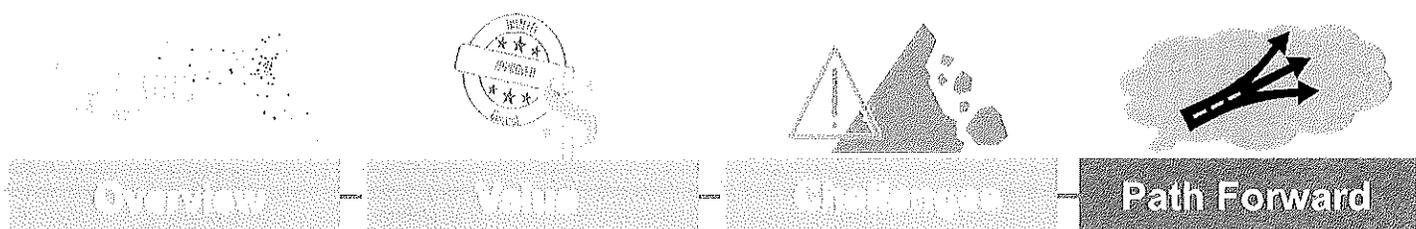

Source: HPC analysis of CHA 2013 RP Databook and CHA Hosp. Profiles, 2013

Market participants report facing additional barriers to transformation

To successfully meet challenges and adapt to a changing delivery and payment system, community hospitals must overcome barriers and utilize resources and capabilities that may not be readily available. Barriers reported to the HPC during stakeholder interviews include:

- Lack of **resources**, including financial resources and the ability to attract and retain new staff.
- Lack of needed **data and analytic support** to enable transformation efforts, including a lack of information about health needs and coordinated health planning.
- **Concern about change** by hospital governing bodies and community representatives.
- Challenges **aligning the interests of hospital labor and management** to more effectively pursue transformation efforts.
- Difficulty participating in **alternative payment models**, including challenges under current risk adjustment methodologies for hospitals serving patient populations with socioeconomic disadvantages.
- **Insufficient alignment** among programs designed to fund or assist transformation efforts.
- **Policy or regulatory frameworks** that limit deployment of new structures of care.

The path to a thriving community-based health care system

- Most patients should get most care in an efficient and high-quality setting close to home
- Providers must adapt to make this possible, and incentives and policies should align to support them
- Call to develop an Action Plan in concert with market participants

Building a path to a thriving community-based health care system

Vision of Community-based Health

A health care system in which patients in Massachusetts are able to get most of their health care in a local, convenient, cost-effective, high-quality setting.

- **The traditional role and operational model for many community hospitals faces tremendous challenges:**
 - evolution in the health care delivery and payment system
 - persistent market dysfunction → resource inequities and overreliance on higher cost care settings
- **A re-envisioning of the role of community hospitals will require:**
 - development of a roadmap for care delivery transformation focused around the community
 - planning and investment for better alignment of providers with community needs
- **Multi-sector dialogue** is necessary to build consensus and identify a series of targeted actions to be taken by providers, payers, consumers, and government

Fostering dialogue and developing an Action Plan

Community Hospitals at a Crossroads: A Conversation to Foster a Sustainable Community Health System

Developing a successful path to a thriving community-based health care system requires multi-stakeholder engagement and incorporation of many diverse viewpoints.

The report findings are designed to spur market-wide dialogue and support identification of priority actions to be taken by providers, payers, purchasers and government.

March 29, 2016 at 9:00AM at Suffolk University School of Law

The HPC Commissioners and staff will convene industry leaders and stakeholders to discuss findings from the report and its implications for transformation of the Commonwealth's community hospitals. Interested members of the public are invited to attend: register online at www.mass.gov/hpc

In collaboration with stakeholders, HPC will develop an Action Plan to address findings of the report. Action Plan recommendations will be oriented towards providers, payers, purchasers and policymakers

Key themes for further discussion, consensus-building, and action planning

Community Hospitals at a Crossroads: A Conversation to Foster a Sustainable Community Health System

*Planning and support for community
hospital transformation*

*Encouraging consumers to use high-value
providers for their care*

*Creating a sustainable, accessible, and
value-based payment system*

“ We need to **stop playing defense and start playing offense**. This [challenge of supporting community hospitals] is one of the most complex health policy issues we have, but we cannot keep just relying on short term fixes. These hospitals are the backbones of our communities — we owe it to our communities to come together to develop a plan for their future ”

MASSACHUSETTS STATE LEGISLATOR

**APPLICANTS' SUPPLEMENTAL PREFILED TESTIMONY REBUTTING
PREFILE TESTIMONY OF FRED HYDE ON BEHALF OF INTERVENORS**

The Applicants are filing this supplemental prefiled testimony to address the unsubstantiated, conclusory and false and misleading statements made by Dr. Hyde ("Hyde") in his prefiled testimony on behalf of the Intervenors. More particularly, Hyde's prefiled testimony impugns the intent, the community commitment, and the integrity of the Applicants. The Applicants believe that such statements are irresponsible and self-serving given Hyde's personal history with Windham Community Memorial Hospital ("Windham Hospital") and his role as a member of the Certificate of Need Task Force established pursuant to the Governor's Executive Order No. 51 (the "Task Force"). Certainly, one would expect that the members of the Task Force would refrain from participating in matters in which they have an apparent conflict of interest in or, at a minimum, be less biased and inflammatory in their statements.

Accordingly, for the purpose of ensuring an accurate record, the Applicants respectfully dispute and respond to Hyde's prefiled testimony for the reasons described below and in the order they are presented in his prefiled testimony:

Hyde's Statement:

"A portion of this increase in health and hospital expense can be directly attributable to the consolidation of hospitals and health systems. These consolidations result in:

- a) Higher prices through monopoly market position;
- b) Inflated expenses resulting from more complex and more generously compensated management, with hospital administration now accounting for 1.43% of the nation's Gross Domestic Product; and
- c) Compromise to the integrity of physician judgment when such hospital and health system consolidations include physician practices."¹

¹ See Page 1 of Hyde's Prefiled Testimony.

Applicants' Response:

The above statements are unsubstantiated, generalized and based upon Hyde's own personal opinion, rather than the facts in the instant Application. Hyde selectively picks and chooses excerpts from publications to support his desired position, objectives and beliefs, and by doing so creates a montage of statements and arguments to support his belief that all affiliations and consolidations of community hospitals with larger systems are bad for consumers. The reality is far more complex and depends on the facts of the particular affiliation in question, as demonstrated by the prefiled testimony of Dr. Noether.

The Applicants would like to provide OHCA with information regarding Hyde's misuse of the word "monopoly." There is no monopoly being created by virtue of the proposal and further, neither Yale New Haven Health nor L+M is currently a monopolist. "Monopoly" is a specific term used by economists and antitrust regulators – the same regulators who declined to further investigate the affiliation between Yale New Haven Health and L+M - to indicate a situation in which a firm faces no competition. Given the geographic distance between the systems and their different clinical focuses, it simply defies common sense that the affiliation of Yale New Haven Health and L+M would eliminate meaningful competition or result in the creation of a monopolist.

The studies referenced by Hyde are neither definitive nor relevant to the instant case. At best, they may show correlation between certain consolidations and price increases, but Dr. Hyde has failed to demonstrate any causal relationship between the two, nor has he demonstrated that the literature applies to the specific market conditions in which this proposed affiliation will occur. In some contexts to assess the competitive effects of an affiliation, regulators may have to consider whether the pass-through of cost-savings (economic theory indicates that a portion of any cost savings is almost always passed on to consumers, even by monopolists) is enough to offset the increase in prices that is associated with the creation of market power. But that is not the calculus that OHCA is faced with here: the affiliation of Yale New Haven Health and L+M results in significant cost savings with no creation or enhancement of market power. So contrary to Hyde's belief, the proposed affiliation can only benefit consumers.

Hyde's Statement:

"In general, not-for-profit hospitals are doing well financially...In fiscal year 2015 Moody's reports that not-for-profit hospitals had median annual growth rate of 7.4% and median three-year revenue compounded annual growth rate of 5.6%."

Applicants' Response:

On May 17, 2016, L+M's bond rating for its CHEFA Series F bonds was downgraded to a BBB+ rating from the A+ rating it was given just three (3) years earlier. According to the Standard & Poor's Global rating agency, this downgrade can be attributed to three (3) factors: "a sharp decrease in operating profitability in the last three fiscal years from historic levels, pressure from the Connecticut state hospital tax, the

impact of which has incrementally increased each year, continued inpatient softness in fiscal 2016 with mix shift to outpatient; and a weakened balance sheet position with less financial flexibility than when the rating was initially assigned.” It is worth noting that in the same report, the rating agency stated that:

There's upward rating potential if the integration with Yale New Haven Health System (which includes Yale New Haven Hospital) comes to fruition and provides immediate lift to financial performance and stability to the balance sheet and our group rating methodology would then apply.²

Clearly, the report referenced by Hyde is irrelevant in the instant case.

Hyde's Statement:

“This is the background against which OHCA is called upon to evaluate yet another attempt at monopoly acquisition (another hospital by a health system) and consolidation of institutional control over professional judgment through hospital-sponsored medical groups.”³

Applicants' Response:

Neither Yale New Haven Health nor L+M have any control over the professional judgment of the physicians employed or contracted with their affiliated medical foundations. Hyde has provided no evidence to support these statements in the instant case and the Applicants consider such statements to be harmful to the trust developed by the Applicants with their respective communities. Financial relationships between hospitals and physicians are highly regulated and both Applicants take compliance with these laws very seriously. Had the Connecticut legislature thought that a medical foundation would have interfered with the professional judgment of physicians, it would not have created this statutory exception to the corporate practice of medicine doctrine.

Hyde's Statement:

“The FTC has allowed the Hart-Scott-Rodino review period to lapse, and the federal government continues to struggle to win cases under the antitrust laws.”⁴

Applicant's Response:

This is a misleading statement at best. First, the use of the word “lapse” suggests that the FTC was negligent in its review of the proposed affiliation, which is not the case.⁵ Second, the FTC cleared the proposed affiliation only several months before filing three hospital merger challenges in federal court. At the time they cleared the proposed

² See Page 6 of Bruce Cumming's Prefiled Testimony in Docket No. 15-32033

³ See Page 1 of Hyde's Prefiled Testimony.

⁴ See Page 1 of Hyde's Prefiled Testimony.

⁵ Please note that the Connecticut Attorney General participated in the same FTC review.

affiliation, the FTC had not lost a hospital merger challenge since the late 1990s. So, it seems unlikely that the FTC would have hesitated to bring a case in the instant case if they thought there was cause to do so.

Hyde's Statement:

"OHCA awards a Certificate of Need 'franchise' to private corporations which are engaged in publicly funded services: the award must be based on the public good, not on private gain."⁶

Applicants' Response:

The above statement is false and wrongly characterizes the statutory purpose of OHCA and imbues to OHCA a purpose that only exists in Hyde's own mind.

Hyde's Statement:

"Lawrence + Memorial only lacks financial resources as a result of empire building and other imprudent management decisions, including:

- (i) Expensive attempts to outsource services, and to 'lock out' unionized employees performing those services....
- (ii) The acquisition of the bankrupt Westerly Hospital for a reported price of \$35 million; and
- (iii) The extraordinary subsidy of physician practices. The **first attachment** to this document shows the extent to which hospital revenues are generating adequate margins to support operations and maintenance, but are subsidizing practices and other "system" losses...."⁷

Applicants' Response:

Hyde fails to understand the efforts and investments made by L+M to bring primary care and specialty services to the Eastern Connecticut region for the purpose of improving access to high quality care for those who live in the region. L+M's financial difficulties are not due to its acquisition of Westerly Hospital. In fact, the continued operation of Westerly Hospital has been very positive for consumers in the Eastern Connecticut region. L+M's financial difficulties are due to declining state and federal government revenues and dramatic increases in state hospital taxes. They are also not caused by executive compensation. It is particularly ironic that Hyde characterizes these actions as mismanagement given the news stories that are highly critical of Hyde's efforts to financially manage the institutions in which he was in charge.

⁶ See Page 1 of Hyde's Prefiled Testimony.

⁷ See Page 2 of Hyde's Prefiled Testimony.

More specifically, with respect to Hyde's criticism of mission support associated with the Applicants' two medical foundations, Hyde fails to realize that prior to formation of the legislatively created medical foundations, these expenses would have been incurred by their affiliated hospitals. Both L+M and Yale New Haven Health are tax-exempt entities, and the hospitals that are part of these systems are subject to strict regulatory requirements and limitations with respect to their financial relationships with physicians. Therefore, the extent to which these systems provide mission support to their medical foundations is by no means extraordinary, and complies with all relevant legal standards. Rather, the extent of mission support represents the true cost of maintaining access to physicians in their respective communities. Consistent with a commitment to excellence and innovation in patient care and service to the community, the financial investments made by each Applicant represents an investment in furtherance of the charitable mission of the health system and its hospitals. In order to provide for the key elements of the charitable mission, there are certain programs/service lines that are unable to collect patient revenue in amounts sufficient to cover their associated expenses. For these reasons, hospitals and health systems, including L+M and Yale New Haven Health, typically provide support to physician foundations to cover these losses. Without this mission support, access by Medicaid patients and other underserved populations would be very limited because many physicians in private practice are unwilling to care for individuals whose only source of payment is the government. Moreover, as stated in the Applicants' prefiled testimony and CON application, L+M has historically had challenges recruiting physicians to its community. Without L+M providing mission support to these physician practices, certain specialty services would not be available in the community.

While NEMG and L&MPA have reported losses from an accounting perspective, medical foundations are key strategic initiatives of integrated health systems that provide a number of benefits, including but not limited to: (i) development of stronger clinical integration among various medical disciplines and operating units of the health system allowing for management of the patient continuum of care within the health system; (ii) development of greater focus on evidence-based quality measures in primary care and specialty physician services; and (iii) management of the transition from traditional volume-based reimbursement to alternative payment models with government and commercial payers. Thus, focusing solely on the accounting results of NEMG and L&MPA does not account for the benefits associated with patient access, continuum of care, preparedness for population health and community need fulfillment that NEMG and L&MPA provide to their respective systems.

Hyde's Statement:

"[A] list of peer-reviewed journal articles...shows that such economies [of scale] have not been achieved in similar health system acquisitions in the past, and that consolidation leads to significant price increases and resulting systemic cost growth...."⁸

⁸ See Page 2 of Hyde's Prefiled Testimony.

Applicants' Response:

Hyde is clearly unaware of the significant cost savings achieved by Yale New Haven Hospital at the Hospital of Saint Raphael campus. Specifically, since 2012, Yale New Haven Hospital achieved over \$250 million dollars in cost savings from a hospital that was previously on the brink of bankruptcy, while upgrading its facilities and services. Hyde must also be unaware of the clinical and operational improvements that have been achieved by Bridgeport Hospital and Greenwich Hospital also discussed in the Applicants' application and prefiled testimony. If Hyde had read the Applicants' CON Application carefully, the substantial efforts by both Applicants to improve quality would be very evident. See Attachment II of CON application at page 645-722. Comparisons to other states are irrelevant when most would agree that Yale New Haven Hospital is nationally recognized by independent third parties for its exceptional quality.

Hyde's Statement:

"Despite OHCA's request and the urging of legislators, the Applicants flatly refuse to provide comparative price data between L+M and the YNHHS hospitals. However, original analysis of Medicare payments submitted as part of this testimony shows that, almost uniformly, payments for services at Yale-New Haven (including low acuity services) are significantly higher than those at Lawrence + Memorial and much higher than other currently independent hospitals."⁹

Applicants' Response:

As Applicants have previously explained, comparable risk-adjusted price data are not readily available and therefore could not be submitted. The so-called "original analysis" that is presented in Exhibit 3 of Hyde's prefiled testimony does not provide complete and/or useful information. It presents "prices" that are administratively determined by the Medicare program (CMS) rather than those that are the result of market-based negotiations between hospital systems and health insurers. Because these are administratively determined prices, the fact that Yale New Haven Hospital is paid more than most other hospitals in Connecticut reflects CMS' recognition that Yale New Haven Hospital incurs higher costs because of its teaching mission and the higher patient acuity (within a particular DRG) that it treats. But those administratively determined prices have no relevancy as to the cost efficiency of a hospital.

Notably, a hospital's Medicare DRG rate is not based on its specific costs or efficiency, but rather on standardized factors intended to reflect the typical costs of providing medical education, providing services to a disproportionate share of low-income patients, providing outlier services to patients requiring additional services, and not having the payments reduced for short stay transfers to other Medicare providers.¹⁰ All of these

⁹ See Page 3 of Hyde's Prefiled Testimony.

¹⁰ Specifically, Medicare's annual base DRG per discharge amount is uniformly set for all hospitals at national base payment rates for standardized amounts at each hospital. The final DRG payment rate at a hospital is then adjusted by the following: (i) the Hospital Geographic classification; (ii) an Indirect Medical

factors influence the DRG rate at Yale New Haven Hospital and Bridgeport Hospital both of which have substantial teaching programs. This aside, the emphasis on price differences between Yale New Haven Health, L+M Hospital, and other hospitals in Connecticut is entirely misplaced. In a market in which competitors are highly differentiated, it should be expected that they receive different reimbursement.

The same analysis offered by Hyde also presents gross charges across different hospitals, but these are also not informative as they do not reflect the prices actually negotiated by health insurers or paid by patients. Even if prices paid are sometimes based on a percentage of charges, the percentage discount is negotiated and can vary, so, again, a comparison of the gross charges by themselves is not indicative of relative payment amounts across hospitals. Moreover, even if there were some validity to an analysis based on gross charges as proxies for pricing power, then the data does not support a conclusion that Yale-New Haven Hospital possesses market power.

In connection with Hyde's claims that Yale New Haven Health affiliated hospitals are the most expensive in Connecticut, Hyde references 2013 CMS records of billing and payment by DRG by hospital for the top 100 DRGs in Connecticut Hospitals.¹¹ As noted above, the Medicare payments are set on national rates and national formulas; the Medicare payments are not based on the hospitals' actual costs. In describing these data, CMS states that "Users will be able to make comparisons between the amount charged by individual hospitals within local markets, and nationwide, for services that might be furnished in connection with a particular inpatient stay." CMS does not state that this information reflects on hospitals' costs or efficiency.

Moreover, Hyde appears to have cherry-picked his data. In reviewing the DRGs that Hyde selected, the Applicants noted the following:

- All the DRGs selected had relative weights above that of the typical discharge;
- None of the DRGs selected are provided by all 29 Medicare Acute Care Hospitals in Connecticut in 2013; and
- Yale New Haven Hospital had more residents as it has the largest teaching program in the state. It also has a high DSH adjustment and is the largest provider of services to Medicaid beneficiaries, along with outlier payments.

Education add-on based on the hospital's Resident to Bed Ratio; (iii) a DSH add-on for hospitals that treat a disproportionate share of low-income patients; (iv) a DRG Outlier add-on for claims utilizing services beyond the outlier threshold established by CMS; (v) CMS' Transfer Reduction Policy for short stays that are transferred to other Medicare facilities.

¹¹ The data used by Hyde was published by CMS on their website at <https://www.cms.gov/Research-Statistics-Data-and-Systems/Statistics-Trends-and-Reports/Medicare-Provider-Charge-Data/Inpatient.html>. The data published included the hospital-specific data for the more than 3,000 U.S. hospitals that receive Medicare Inpatient Prospective Payment System (IPPS) payments for Fiscal Year (FY) 2011, 2012, 2013, and 2014; 2014 was recently published.

Of the top 100 DRGs in the CMS data, Yale New Haven Hospital has the highest charge-to-Medicare allowed ratio for only 7 DRGs, which is less than Middlesex (44 DRGs), Stamford (10), Waterbury (8), and tied with Norwalk (Greenwich has the highest multiple for 13 DRGs, while Bridgeport Hospital has the highest ratio for only one DRG). Hyde also uses these data to argue that there is no evidence that the acquisitions of Greenwich and Bridgeport Hospitals produced savings for consumers. Again, because the Medicare data have nothing to do with pricing or costs, he has no basis for such a conclusion. Moreover, even if the data were valid, the pattern does not reflect any variation in cost or quality and therefore would not be dispositive.

Most importantly, even assuming that Hyde's analysis demonstrated that YNHH did currently negotiate higher prices than L+M, it does not follow that the affiliation will allow Yale New Haven Health to confer those higher prices on the services provided at L+M. Rather, the question is whether the proposed affiliation will increase the market power of Yale New Haven Health, which would allow it to negotiate higher prices for L+M. We have previously explained in the prefiled testimony of Monica Noether, our expert economist, that YNHH and L+M are not close competitors, and, as a result, the affiliation will not change bargaining dynamics with managed care companies or otherwise allow YNHH to increase the prices charged by L+M.

Hyde's Statement:

"[T]his acquisition will lead to extreme market concentration in the L+M service area, and intensify Yale-New Haven's market power from New York to the Rhode Island border. If this acquisition is consummated, Yale-New Haven Health Systems will account for 83% of discharges in L+M's primary service area, and nearly 60% of all inpatient discharges in the southern half of the state...."¹²

Applicant's Response:

We agree that, once L+M affiliates with Yale New Haven Health, as a system, Yale New Haven Health will account for over 80% of the discharges from L+M's primary service area ("PSA"). However, that is attributable to the strong presence that L+M already enjoys in its service area – of the post-affiliation share of approximately 75% in L+M's PSA, L+M already has approximately 67%.¹³ That does not contradict the fact that it also faces competition from proximate competitors such as Backus Hospital.

Hyde also includes as an attachment a report that concludes the affiliation will exceed the FTC/DOJ *Horizontal Merger Guidelines*' thresholds for a change in the Herfindahl-Hirschman index ("HHI"). This report does not identify any authors or provide their qualifications for drawing such conclusions, or in any other way provide OHCA with enough information to determine whether this report is a credible source of factual information. Even assuming this report's reported HHI is calculated correctly, as with

¹² See Page 4 of Hyde's Prefiled Testimony.

¹³ 64% to 67% does not include Rhode Island in that OHCA is interested in Connecticut. Please note that Monica Noether's prefiled testimony includes Westerly and is at 77%.

Hyde's discussion of the post-affiliation share in L+M's PSA, it is likely attributable to L+M's strong existing presence in its own service area, not because the affiliation will eliminate meaningful competition with YNHH. Most importantly, however, the HHI is only an initial screen; it is not dispositive. Indeed the FTC itself, which along with the Department of Justice issued the *Horizontal Merger Guidelines*, determined that there was no reason to investigate this transaction beyond the statutory filing period.

Also, OHCA should note that even this report acknowledges the economic imperative behind affiliations: "In Connecticut, the State Innovation Model (SIM) and 'shared savings' policies for Medicare and Medicaid are creating incentives for large combinations of hospitals and doctors that can accept risk for broad patient populations."¹⁴

This is correct and explains why community hospitals such as L+M that might have been successful historically as independent entities can no longer deliver care effectively on their own. The ensuing combinations into larger systems, however, are not anticompetitive. Rather they can benefit patients by providing more integrated care and allowing health systems to become accountable for the cost of delivering effective care, which in turn reduces incentives for excess utilization.

Hyde's Statement:

"The Applicants have offered no evidence that the acquisition of Lawrence + Memorial Physicians Association, L+M's 70-physician group medical practice, will create efficiencies with any meaningful return to patients and payers."¹⁵

Applicants' Response:

As discussed above, Hyde fails to understand the purpose and importance of the L&MPA and NEMG merger as discussed above with respect to maintaining access to primary and specialty care in the L+M service area. Once merged, there will be less duplication in medical services and greater coordination of care between treating physicians, more widespread use by former L&MPA physicians of evidence-based practices, and greater certainty with respect to the retention of L&MPA physicians. Without the continued presence of L&MPA physicians in the L+M community, patients would have to travel outside of the community and ultimately this will negatively impact access and the health of the community. Access to the combined infrastructure of L&MPA and NEMG will undoubtedly result in added efficiencies. Given the antitrust laws' restrictions against sharing sensitive information, and limitations on planning at this point, the Applicants' are limited in their modeling of cost savings.

As stated by the Applicants, it is the payer who designs health plans and determines the patient's deductible or cost sharing responsibilities. Hyde also decries the development of narrow network products that limit patient choice. As Hyde acknowledges, narrow network products are a vehicle that health insurers used to control costs because they

¹⁴ See Attachment 4 from Hyde's Prefiled Testimony.

¹⁵ See Page 4 of Hyde's Prefiled Testimony.

provide them with greater bargaining leverage over hospitals (through the threat to exclude hospitals from the narrow network). This is not anticompetitive, but rather is a procompetitive way to force hospitals to compete more aggressively to reduce costs that can also result in lower health plan premiums.¹⁶

Hyde's Statement:

“OHCA should view with skepticism the idea that installation of the EPIC electronic medical record system will generate efficiency or improve quality.”¹⁷

Applicants' Response:

Hyde makes statements critical of the Applicants purchase of Epic and plan to have affiliated entities on a common electronic health record platform. To support this position, he cites the implementation at other systems in other states, but that experience is inapposite – it is Yale New Haven Health's experience that is relevant. Yale New Haven Health's implementation of Epic was on time and nearly \$10 million dollars under budget. More importantly, having a single, integrated electronic health record (“EHR”) across multiple care settings is the key to enhancing quality and safety. A single platform for clinical care and revenue cycle operations affords synergies and economies of scale across the broad range of clinical services and geographic regions. These economies enable even smaller community hospitals in Yale New Haven Health to immediately access the clinical content developed in concert with its largest academic medical center. This would not be possible for a freestanding community hospital on its own. Yale New Haven Health has already reduced cost and made improvements by efficiently creating pathways, evidence-based decision support, and analytics tools that power the clinical decision making of the entire care team – Yale New Haven Health has created it once rather than multiple times, for a uniform, high standard of care. Specifically, it is this success and an effective clinical, business and analytics platform that Yale New Haven Health can offer to L+M at a cost they cannot achieve on their own even with another EHR vendor. What many, including Hyde, fail to realize is that greater than 80-85% of the cost of implementations is in the people – in Yale New Haven Health's case 29,000 doctors, nurses, and staff who collaborated on local decisions in configuration decision and training. None of this is achievable by L+M on its own.

Hyde's Statement:

“That access to primary and advanced specialty care will be greatly enhanced for the citizens of the Lawrence and Memorial hospital service area through the acquisition. This argument is contradicted by...[t]he example of Windham Hospital's acquisition by Hartford HealthCare....”¹⁸

¹⁶ Hyde also fails to acknowledge the driving force behind the merger – Connecticut state law requires that health systems may have only one medical foundation. Compliance with the law certainly constitutes “clear public need.”

¹⁷ See Page 5 of Hyde's Prefiled Testimony.

¹⁸ See Page 5 of Hyde's Prefiled Testimony.

Applicants' Response:

Yale New Haven Health and Harford HealthCare do not operate in the same manner, nor do they conspire to develop the same "playbook." It is completely irrelevant to discuss Windham Hospital in the context of this proceeding. Windham Hospital historically and currently is a very different hospital than L+M - it is in a different geographic area and not at all comparable in breadth and depth of services. Dr. Hyde's obsession with Windham Hospital is perhaps the result of his own tenure there, but OHCA should not allow his repeated references to Windham to obscure the fact that the affiliation before it involves a very different hospital and a very different health system.

Hyde's Statement:

"Changing governance and control will render local officials and L+M itself incapable of protecting local services."¹⁹

Applicants' Response:

This statement by Hyde demonstrates his misunderstanding of hospital governance and the terms of this transaction. Decisions regarding community services will only be made upon the approval of L+M. As a matter of governance, after the affiliation most significant decisions must emanate from the L+M board before the YNHHS board can act. Hyde continues to approach this application as if it were based upon nonexistent terms to the affiliation. It is also contrary to Yale New Haven Health's culture and philosophy to direct patients away from their community to Yale-New Haven Hospital for care that these patients can receive locally. Yale-New Haven Hospital has not done that with Bridgeport Hospital or Greenwich Hospital, nor does it have the capacity to take on the volume of patients that Hyde suggests in his prefiled testimony.

Hyde's Statement:

"Patient choice will be severely compromised, if not eliminated."²⁰

Applicants' Response:

Quite the contrary, the entire proposal is about maintaining the financial stability and strength of L+M. Without the proposal, access to care in the L+M community will be restricted and only then, will patient choice be severely compromised.

¹⁹ See Page 6 of Hyde's Prefiled Testimony.

²⁰ See Page 6 of Hyde's Prefiled Testimony.

Hyde's Statement:

“All of the hypothetical \$300 million appears to be contingent on future programs being consistent with the YNHHS strategic plan, mutually agreed upon (between YNHHS and L+M), and displaying a positive return on investment. In other words, there would be no new investment in the Greater New London community's health unless that investment earns Yale-New Haven Health System a profit...In fact, some or all of the \$300 million is supposed to come from efficiencies that lead to lower expenses in L+M's future operations...The application assumes that L+M will eliminate more than 200 jobs and more than \$130 million in wage and benefit expense during the first three years.”²¹

Applicants' Response:

The notion that the affiliation will result in 200 job eliminations in the first year is inaccurate. The drop in FTEs noted on the document attached to Hyde's testimony is in part due to L&MPA becoming part of NEMG. These FTEs are not being eliminated, but instead are being transferred to another company (in this case NEMG). Another reason for the decline in FTEs, and subsequent stabilization in the out years, is that when the CON was filed it was based on the assumption that the affiliation would take place mid-year FY 16. Therefore, the number of employees transferred is only counted at 50% in that first year.

Regarding the supposed loss of \$130 million in wages and benefits, it appears Hyde is misinterpreting the financial statements from the Applicants' CON filing. Adding the columns for salary and benefits for the first three years after the transaction (note: given the timing, the columns for FYs 16, 17, and 18 really represent only 2 ½ years) found in the attachment to his testimony, the affiliation actually adds \$5.4 million in wages and benefits, rather than reducing them by \$130 million.

All information relative to the sources and uses has been outlined in the initial CON, and subsequent Completeness Question Filings.

\$85 million in investments by Yale New Haven Health will be made entirely independent of financial performance at L+M, or the generation of any “profit”. \$41 million of this investment will be spent in the following areas as stated in the Completeness Question Responses on January 5, 2016 (see response 28 a.).

²¹ See Page 7 of Hyde's Prefiled Testimony.

Break-down of \$41 Million	Description
\$14 million	Epic installation and other IT investments
\$10 million	Population health infrastructure and related services
\$15 million	Development of clinical programs and services for eastern CT and western Rhode Island
\$2 million	Rebranding and communication initiatives

Total: \$41 million

Of the initial \$85 million investment, the remaining \$44 million will be invested in further clinical programs in the L+M service area. Decisions regarding service programming will take place after the proposed affiliation is approved as part of the joint strategic planning process. The amount of detail that will be reviewed during that process will require the understanding of the strategic plan of L+M which cannot legally be shared prior to the proposed affiliation.

The programs invested in as part of the \$44 million will require mutual agreement. While a return on investment analysis will be performed, the services are not necessarily expected to generate a “profit” in the initial years, or at all - rather, the agreement requires only that the analysis be performed and that Yale New Haven Health and L+M have a multiyear understanding of the financial impact made during these investments. \$41 million of the \$85 million will come directly from existing funding at Yale New Haven Health.

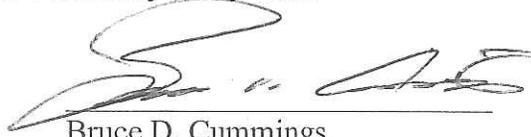

After this initial \$85 million investment, an additional \$215 million will be made. The \$215 million investment will go to the further development in the Eastern Connecticut region. This can come in the way of new clinical programs, capital development, or any other use deemed consistent with improvement to care for our patients. While the detail of this spending will be developed during the strategic planning phase, the potential areas of investment were also shared during the Completeness Question Responses on January 5, 2016.

The sources of the \$215 million will be generated from the improved cash flow of L+M inclusive of the synergies generated by affiliating with Yale New Haven Health. It is for this reason that this funding will be dependent upon financial performance. Given the information we have today, the investment will be made in its entirety, but as payment models and sources of funding continue to change in our industry the future availability of these funds are uncertain. In the event that economic forces drive down the cash flows expected to fund these investments, the two organizations will work to either identify other sources of funding, or change the investment to best meet the missions of both organizations and the community at large. The notion that the entirety of the \$300 million will only be made if Yale New Haven Health generates a profit is entirely inaccurate. Rather, the parties will look to whether the business plan makes sense for L+M overall, in light of its then-current financial condition.

Conclusion:

Hyde seems to lay all the problems in our current health care system at the feet of hospital and health system consolidation generally, and consolidation at Yale New Haven Health in particular. Hyde pays little heed to the effect of declining governmental reimbursement, increased hospital taxes and the financial challenges posed by changes in health care reimbursement. It would appear that Hyde is trying to drive forward while following a path he sees in the rear view mirror. Health system consolidation is a response to these challenges and an attempt to meet the need for improved care at a lower cost, not a cause of further instability. Applicants believe that they have provided sufficient context to allow OHCA to assess Hyde's exaggerated, false, irrelevant, and inflammatory statements in his prefiled testimony. Having done so, it is our hope that OHCA can rightfully focus on the facts and the clear public need for the proposed affiliation rather than be distracted by misdirected personal agendas.

Price Information, Historical Challenges in Examining Hospital Mergers

Dr. Noether's pre-filed testimony and published articles discuss price information, the difficulty of obtaining that information, and of knowing what it means. This difficulty reflects the challenges facing OHCA generally in the evaluation of this application: the complexity of the field, the difficulties facing researchers in the field, but also the unwillingness of applicants (such as those now before OHCA) to share what they are able to. Dr. Noether noted this problem almost thirty years ago in a major report done with staff at the Federal Trade Commission.¹ Unfortunately, however, Dr. Noether's testimony does not recognize more modern work, in fact "breakthrough" information about hospital monopoly prices.

New Information on Hospital Prices

Major changes have taken place in the intervening three decades since Dr. Noether's original work in this field.

First, Medicare payments have become available to the press and public, through the efforts of the Association of Health Care Journalists working with the Centers for Medicare and Medicaid Services. These comparisons have been offered by the Intervenor.² No mention is made of these differences in Medicare payments by Dr. Noether in her testimony.

Second, a major study of information gathered by the Health Care Cost Containment Institute³ shows price disparities in payments by commercial health insurers. Dr. Noether faults this Cooper study⁴ for not including Blue Cross information. Unfortunately, Blue Cross information which would complement that available through the Health Care Cost Containment Institute is not available. Dr. Noether does not dispute a finding of the Cooper report pertinent to this application, namely that New Haven, Connecticut, the home of the Yale-New Haven Health Services Corporation, is an *epicenter of extraordinarily high prices in both the private sector and for Medicare.*

¹ Noether, M., "Competition Among Hospitals," Staff Report of the Bureau of Economics, Federal Trade Commission, 1987

² Exhibit Two,, Pre-Filed Testimony, Fred Hyde, MD

³ Cooper, Z., et al, "The Price Ain't Right? Hospital Prices and Health Spending on the Privately Insured," NBER Health Care Pricing Project, December 2015

⁴ Noether, M., "Commentary on 'The Price Ain't Right? Hospital Prices and Health Spending on the Privately Insured,'" Charles River Associates, January 7, 2016

Third, information from the Department of Social Services in Connecticut will shortly be made available to a task force studying certificate of need in Connecticut. This information will directly impact one question, namely, to what extent does the State of Connecticut pay Medicaid rates which reflect monopoly pricing by Yale-New Haven?

Finally, Section 2(c) of PA 15-146 requires the Connecticut Department of Public Health and the Department of Insurance to have transmitted lists of the fifty most common inpatient and outpatient diagnoses and procedures and the twenty-five most common outpatient surgical and imaging procedures in the State to the Health Insurance Exchange and to the public. Under section 2(d), the Exchange is required to publish reports from insurance carriers showing prices – both billed and allowed amounts – for these procedures broken down by specific payer by specific provider on January 1, 2017.

The applicant therefore has two choices to demonstrate that it has been responsive to the information required by OHCA. The first would be to make known its prices, including those paid by Blue Cross. The second would be to voluntarily defer action until the hearing record can be completed. If the applicant takes neither route, we recommend that OHCA hold the public hearing record open until January to obtain the data that the applicant is not providing.

In summary, Dr. Noether's comments concerning pricing reflect challenges to regulators and the public generally, as well as to economists. Information made available more recently has been either not included in her testimony, or has been refuted on grounds (Blue Cross) of its incompleteness. Dr. Noether's concerns with regard to prices have been reflected in her writings over three decades, not however fully accommodating more recent information. The statute requires OHCA to make written findings to determine whether the applicant has "satisfactorily demonstrated that any consolidation resulting from the proposal will *not* adversely affect health care costs or accessibility to care." Given the volume of literature on the relationship between consolidation, provider prices and health care costs, OHCA's responsibility to obtain current information which will reflect the impact of monopoly pricing is clear.

New Studies on Hospital (and Physician) Monopoly Behavior

Dr. Noether has written that separate negotiations need not necessarily lead to monopolist behavior. However, again, Dr. Noether has not taken into account more recent work (see paper in Exhibit One by Gowrisankaran). Dr. Noether, a speaker at a February 2015 Federal Trade Commission and Department of Justice conference in which Gowrisankaran and colleagues presented their findings, does not address those findings or refute them.

Parenthetically, Dr. Noether's career-long writing is critical of certificate of need⁵, that is, that prices seem to be higher and/or increase in states with certificate of need. Her hypothesis has been that regulation creates market barriers and allows price increases to exceed what otherwise would have taken place. However, there is no legitimate control with which to evaluate that hypothesis, or "counterfactual." In addition, there are plausible alternative hypotheses: for example, that prices are higher in certificate of need states because the extent of that price

⁵ Noether, M., "Competition Among Hospitals," Staff Report of the Bureau of Economics, Federal Trade Commission, 1987

differential has created the political climate which made possible the passage of certificate of need legislation, and/or protection against CoN repeal by those who would rely on “market forces.”

In evaluating monopoly behavior, Dr. Noether, in support of the application, appears to take a position contrary to the majority of economists who have studied the merger of non-profit hospitals. The Intervenor has submitted an exhibit with extensive evidence that other economists have evaluated hospital mergers with traditional tools.⁶

Even current and former colleagues of Dr. Noether have taken the opposite position. For example, Seth Sacher of Charles River Associates and Michael G. Vita of the U.S. Federal Trade Commission have written on “The Competitive Effects of Not-for-Profit Hospital Mergers: A Case Study.” In that paper, in which non-profit competitors were reduced from three to two, Sacher and Vita found the following: “We find that the transaction resulted in significant price increases; we reject the hypothesis that these price increases reflect higher post-merger quality.”⁷ Sacher and Vita indicate that “Studies using data from the mid-1980s and after” present this general relationship: “a *positive* relationship between concentration and price.”⁸ In this paper, further reference to case studies indicated price increased for medical-surgical services of as much as 9%.

Moreover, Dr. Noether has commented⁹ on the favorable results from a reduction in concentration. In a paper written during Dr. Noether’s tenure at the FTC, she says that reduction in concentration “may lead to an increase in both price and quality competition.”¹⁰ [The word “quality” in Dr. Noether’s reports “is used to refer to all non-price aspects of competition,” not as we generally refer to quality in hospital and regulatory discussions today.¹¹ She notes “an increase in ‘quality’ is not necessarily welfare-enhancing...] In this paper, Dr. Noether goes on to note that “when concentration is reduced, prices (per unit of output, not adjusted for quality) are prevented from rising by a concomitant increase in price competition. This result implies that, for a given level of quality, price is lower in areas with less concentrated markets.” She concludes that “the hospital industry can be analyzed, for the most part, like other industries when, for example, applying the anti-trust laws.”¹² In her conclusion, Dr. Noether writes that, “The results suggest that hospital margins rise and expenses fall with increases in hospital industry concentration.”¹³ Addressing one of the changes already underway by the 1987 publication of the FTC report, Dr. Noether writes that “This study also provides no evidence to support the conjecture that managed and system hospitals are more efficient than independent ones. Expenses for both former types appear to be greater.”¹⁴

¹¹ Ibid, page one

¹² Ibid, page three

¹³ Ibid, page 81

¹⁴ Ibid, page 83

Questions remain that are not addressed in Dr. Noether's testimony. The first is: Will health plans be able to offer a marketable network to residents in the New London area that for whatever reason excludes Yale-New Haven Hospital, the Northeast Medical Group, the Yale Medical Group, and the other Yale-New Haven Health System entities? The Intervenor would answer unequivocally, "No."

Also, this question: Are there additional market factors that tip the balance of negotiating power in favor of the Yale-New Haven Health System? The Intervenor's answer to this question is, "Yes."

Indeed, the applicants have signaled that eliminating competition may be one of the goals of their transaction, for example, by cancellation of the Lawrence + Memorial affiliation with the Dana-Farber Institute, Partners' best-known cancer hospital.

New research (for example, the Dafny, Ho and Lee paper included in those submitted by the Intervenor) has analyzed the impact of cross-market mergers on prices.¹⁵ Their findings are as follows:

*We find that hospitals gaining system members in-state (but not in the same geographic market) experience price increases of 6 – 10 percent relative to control hospitals, while hospitals gaining system members out-of-state exhibit no statistically significant changes in price. The former groups are likelier to share common customers and insurers. This effect remains sizeable even when the merging parties are located further than 90 minutes apart. The results suggest that cross-market, within-state hospital mergers appear to increase hospital systems' leverage when bargaining with insurers.*¹⁶

In summary, the proposed acquisition would appear to fit all of the criteria that Dafny, Ho and Lee find most closely associated with the risk of higher prices, that is, Yale-New Haven and Lawrence + Memorial occupy immediately contiguous markets, the anchor hospitals are less than 90 miles apart, they share common insurers who value both systems, and they share common customers who value both systems.

In fact, three of the organizations intervening in this transaction are themselves common customers of the two systems under these authors' definitions.

This research (Dafny, Ho, Lee) was presented at a conference organized by the Federal Trade Commission and the Department of Justice in February 2015. Dr. Noether, also a speaker at the conference, did not acknowledge this work in her pre-filed testimony. The weight of this paper, as well as the work of Cooper and Gaynor, makes clear that private sector pricing is the factor which best explains the continued unsustainable growth of U.S. health care costs.

Dr. Noether reflected some aspects of this issue in comments at the FTC/DoJ seminar¹⁷ when she said that "patients who are using those hospitals don't overlap, and they're not going to travel

¹⁵ Dafny, L., et al, "The Price Effects of Cross-Market Hospital Mergers," NBER, March 18, 2016

¹⁶ Ibid, page 1

¹⁷ FTC Workshop Transcript, February 25, 2015, page 117

from one market to another. On the other hand, if they're both employed- and Leemore Dafny mentioned this- by the same employer, and that employer is looking for a single payer to cover all of its employees, then maybe the customer in this case is the employer or the plan who is contracting with the employer. And you need to kind of think about the whole market definition a little bit differently.”

Other Issues

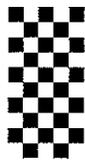

Finally, with regard to the “companion” application concerning physicians, Dr. Noether indicated in the February 25, 2015 FTC conference¹⁸ that “a lot of those questions are relevant within what we would normally consider a single geographic market, when you’ve got a system, and – is there a bundled or tying kind of issue. And it can also happen between hospitals and physicians for example as well.” The potential for tie-in pricing—more services, more “linked services,” at higher prices—would be the result.

Another issue not addressed in Dr. Noether’s testimony is narrow networks and tiering, that is, the prospect that insurers would be compelled - - if these applications were approved - - to charge additional amounts for entry into the most favorable tier.

At the FTC/DoJ conference, Dr. Noether observes, “Of course, you need to have something that controls the providers from saying, you have to take me...But I think like in any kind of exclusive contract situation, if you’ve got competition to be part of that exclusive or narrow network, then that can certainly work.”¹⁹ She points to the effectiveness of these narrow networks “for price-sensitive customers where they’re willing to forgo complete freedom of choice in return for having lower premiums.” It isn’t clear what Dr. Noether’s advice would be to those in New London who, for reasons of insurance, transportation or socioeconomic immobility, would be unable to participate in the new networks.

Kevin Hansted, Hearing Officer

RE: Proposed Yale New Haven (YNH) acquisition of L+M Hospital, OHCA Docket #15-32032, and 32033

DATE: July 1, 2016

Dear Ms. Martone and Mr. Hansted,

As a local nonprofit organization who implements programs that aim to *enhance access to culturally and linguistically appropriate healthcare education and increase the diversity, quality, and distribution of future healthcare professionals within Eastern Connecticut*, I urge your agency to take the necessary steps to ensure that communities of New London County will not be negatively affected by the proposed Yale and Lawrence & Memorial Hospital merger. This community is primarily comprised of low socioeconomic status' including veterans and urban Hispanic residents who are primarily Spanish speaking. Regionalizing healthcare is not an adequate means to quality and equitable care.

Reducing, eliminating, our outsourcing health services is detrimental to communities' ability to access adequate and timely care, impact our health care workforce, and worsen health disparities among underserved communities. In Windham, we are already experiencing the impact of what can occur when hospital services are reduced following a merger. This past fall, a woman in her early 50s, with limited English proficiency suffered a minor stroke. When transported to Windham Hospital, the family was told they could not provide the care she needed because they did not have a neurologist on site. Instead, the woman was put in a Life Star helicopter and transported to Hartford Hospital. Thankfully, this woman's story didn't end tragically. The community in Windham County deserves quality health care that is delivered in a culturally and linguistic appropriate manner. Transporting patients to facilities over 30 minutes away can be catastrophic. In particular, the ability for ambulatory care to effectively communicate with patients that experience language barriers is nonexistent. With the CCU closed, patients are traveling long distances by ambulance, private car or even helicopter for urgently needed care that used to be available at Windham.

I raise this issue because when Hartford HealthCare bought Windham their application strongly suggested that they would not reduce services. Windham selling out to Hartford was supposed to “increase the services and technology offered locally,” and to “decrease the out-migration of patients.”ⁱ Hartford also said that “currently they will not be terminating any services.” But they also left the door open to reducing “duplicate” services. At the end, Hartford’s original CON was filled with broken promises.

Now, Yale is using almost identical language. We’re told the acquisition will bring expanded access to clinical programs, and that there are no “planned” reductions in services. But we’re also told that there may be a need to reduce “duplicate” services. Again, no guarantees, no real commitments.

It is critical your department carefully reviews this upcoming merger to ensure that communities within New London county’s health are not compromised. Thank you for the opportunity to submit public comment for the Health Care cabinet meeting. If you wish to discuss the detrimental impact hospital mergers, call (860) 465-8281 ext. 402 or bond@easternctahec.org

Thank you for your consideration.

Sincerely,

A handwritten signature in cursive script, appearing to read "M. Bond".

Testimony Concerning the L+M Hospital / Yale New Haven Health System Proposed Deal
Frances G. Padilla, President
Universal Health Care Foundation of Connecticut
July 11, 2016

Like politics, all health care is local. This is even truer in Connecticut, with our 169 towns and municipalities, and our parochial attitudes about local control. Health care is also intensely personal.

The Office of Health Care Access (OHCA) has an enormous responsibility in reviewing Certificate of Need applications, especially ones such as this, where one health system and medical group (L+M Hospital & Medical Group) is proposing to affiliate with another, larger, system (Yale New Haven Health & Northeast Medical Group).

As this Certificate of Need application is reviewed, it is important to consider the both parties' answers to the following questions:

- How will this affiliation between L + M and YNHHS help the greater New London community?
- How will the city of New London and its surrounding region be better off in terms of health care services, health outcomes, employment, and the social determinants of health?
- How will Lawrence and Memorial Hospital's ability to meet its mission and serve its community be strengthened?
- How will L + M remain connected to its community as a resource for health and health care?

We ask that OHCA consider the conditions urged by local residents and leaders. L + M and Yale must not only listen to the community, but satisfactorily demonstrate that they are addressing the concerns underlying the proposed conditions. The community has serious concerns about this proposed deal. As L + M should ultimately be accountable to the people and community it serves, this community deserves measures in place to directly address their concerns.

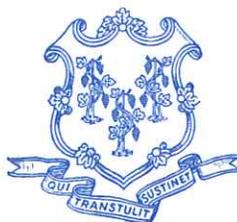

- Members of the community are worried they may lose essential services like behavioral and reproductive health. Where will decision-making about service elimination or addition reside, in the local community, informed by local priority needs and members of the community, or in the board room in New Haven?
- Population health should be the driving force behind affiliations and mergers, and OHCA's decision-making. Hospitals should use local health needs assessments as a roadmap for improved community health. Accountability should be built into any approval, so that the hospital(s) must demonstrate clearly and publicly what they have done to make a positive difference in the priorities identified by the needs assessment.
- Health care in Connecticut is unaffordable to many, many people. Hospital costs are a big part of this. How will affiliation demonstrably address affordability to the patient?
- Lower income people, the elderly, families with only one car, and others, struggle with transportation in Connecticut. Public transportation is unreliable. Auto insurance is expensive, particularly in low income urban areas. Health care reform has shifted delivery of care from inpatient to outpatient, often requiring travel and reliable supports to get you back and forth from procedures and appointments. Providing financial support for creative transportation solutions (in the short-term) and using hospitals' lobbying influence for improved public transportation should become an integral component of "community benefit." Moreover, accessibility to the target population must be a prime consideration of locational decisions.
- Local people do not trust that these institutions have their interests at heart. It is incumbent on the institutions to acknowledge and genuinely address this mistrust. Whether affiliated or merged, every hospital should have a robust local board of directors with true governance power. In L + M's case, their governing board must also be able to effectively influence the YNHHS board and not merely have an insignificant seat at the table. Moreover, the local hospital board should be accountable to an independent community body for demonstrated results on community benefit, progress on local needs assessment priorities and hospital financial stability. That independent community body should represent a cross-section of the public, private, nonprofit and resident population of the community.

Dear Attorney General Jepsen and Commissioner Pino:

When the two applications were filed in regard to the affiliation between Yale New-Haven and Lawrence and Memorial, I (as well as several other legislators) urged OHCA not to proceed on the applications unless it was able to review both comparative prices between L+M and the Yale-New Haven System Hospitals, and prices at St. Raphael's, Bridgeport and Greenwich Hospitals before and after Yale-New Haven's acquisition of those facilities. I was pleased that OHCA in fact requested this data. Since that time, the Governor issued Executive Order 51 which creates a task force on Certificate of Need and restricts OHCA's ability to allow mergers and acquisitions until the Task Force has made its recommendations.

The Executive Order, among other things, seeks to "coordinate the state's regulatory oversight of its health care delivery systems with the broader goals of maintaining open, transparent, and competitive health care markets in the state that enhance access and quality of care and improve affordability without losing sight of the economic development impact of the hospital systems." These goals are impossible without access to hospital pricing and other hospital data. It is my understanding that Yale-New Haven has refused to provide the requested information and is claiming that risk adjusted prices do not exist, and that if they did exist, YNHH would refuse to provide them because they are proprietary. The claim that the data does not exist lacks credibility. Without such data, OHCA cannot achieve the goals of the Executive order and cannot plausibly find that the Applicant "has satisfactorily demonstrated that any consolidation resulting from the proposal will not adversely affect health care costs or accessibility to care," as required by section 19a-639 (a)(12), in effect as of the date of the applications.

It would appear that under the terms of the Governor's Executive Order 51 OHCA could not decide either case until at least January 15, 2017 or it would be required to deny the applications if the statutory calendar requires a decision prior to that time. Regardless of the outcome of the Governor's Task Force, I believe that OHCA should not approve these applications at any point in the absence of credible price data. PA 14-168 and PA 15-146 strengthened the standards for review of the impact of the change of ownership of health systems, hospitals and physician practices to ensure that transactions like these by our state's biggest market actors are scrutinized to protect patients in terms of cost, quality and provider choice. This proposed merger would have an extraordinary effect on our health care system and the state must ensure that any allowed merger is in the best interests of our citizens.

Sincerely,

A handwritten signature in blue ink that reads "Martin M. Looney".

To whom it may concern;

I write in my role as the State Senator of the 20th Senatorial District, which includes the main campus of the Lawrence and Memorial Healthcare System infrastructure in New London and its Cancer Center in Waterford.

The States position regarding funding cuts and excessive taxes on healthcare and hospitals in particular, have created an extraordinarily difficult problem for hospitals in our state.

Hospitals provide crucial health and related services to its local community, are large job creators with a highly skilled and trained workforce and attempt to do so in an industry that already faces many challenging and complex problems. The need to create efficiencies that result in service improvements and fiscal stability has seen many permitted mergers, affiliations and acquisitions here in Connecticut including 25 of our states 28 hospitals.

The proposed affiliation between Yale and L/M is being structured as an affiliation rather than a takeover or a merger in an effort to preserve its local identity in both of the communities in which they serve.

There are always concerns when service providers of any nature get larger; and hospitals are no exceptions. The need to preserve existing jobs to the extent possible by maintaining access and affordability to all the current services provided in both markets are of great concern. This seems to be addressed here as these two systems already have 6 clinical affiliations that work well and compliment each other while providing an expanded service portfolio to SE CT. Though there may be efficiencies created that combine some departments, there are assurances that the existing negotiated union agreements will continue. In addition, the infusion of a multi-million dollar capital investment and access to Yale's advanced technology would indicate a long term stabilizing win for L/M and our region.

If this affiliation were to be approved, I remain confident in the long term viability of L/M: that they will be able to continue to be locally controlled and managed with jobs sustained and services that remain both affordable and convenient to our residents. It is for these reasons I express my strong support.

Additionally I would offer to participate and/or facilitate in any discussions that work to satisfy those affected by this affiliation.

On a personal note my family has had the benefit one of L/M's partnerships with Yale. My wife was in need of complex cardiac care that resulted in trips to New Haven for treatments of a more specialized nature. We were grateful for that opportunity.

Thank you for your thoughtful service and for considering my comments.

Paul M Formica
State Senator
20th District

Ms. Kim Martone
Office of Health Care Access
Connecticut Department of Public Health
410 Capitol Avenue
Hartford, Connecticut 06134

To Whom It May Concern:

I write today to strongly support the proposed affiliation between L&M/Westerly Hospitals and Yale New Haven Health System. As a member of the local community, I have personally witnessed the extraordinary work performed at L&M for friends, coworkers, and family members. As president of a local community bank that serves the same market area as L&M and Westerly, I have personally witnessed the tremendous impact the hospitals have on our local community, both economically and socially. As a member and officer of the L&M Healthcare's Board of Directors, I have witnessed personally the impact of changes in the national and in-state healthcare environment at large on our hospitals, and believe strongly that the key to our success in the future is through this affiliation.

I cannot put into words how impressed I have been with everyone I have come into contact with at L&M and Westerly hospitals. They are professional, compassionate, and innovative. They are dedicated first and foremost to their patients. In spite of their extraordinary efforts, the forces of change in healthcare that they face every day are such that going it alone seems impossible. I believe that the combination of two well-managed, locally focused hospitals, with access to the talent and resources available to a world-class organization like Yale New Haven Health is a powerful combination and a role model for the future of healthcare.

I strongly urge you to approve this affiliation as soon as possible to help strengthen our local healthcare system and our community.

Sincerely yours,

B. Michael Rauh, Jr.
Resident of Mystic, CT
President & CEO, Chelsea Groton Bank

Reference: Certificate of Need Application, Docket # 15-32032 & Docket # 15-32033; Yale NH Affiliation

Dear Ms. Martone/Mr. Harnsted,

Lawrence & Memorial and Yale New Haven Hospital deserve great respect for what they do. I know many doctors who have provided extraordinary service and I know of many patients who have received extraordinary service from L & M and Yale NH. This should be the most important thing to continue because we can't live without it.

Having said that, there is great concern in modern economics about health care. I have been following health care since I wrote my thesis in 1973 – that thesis was on the unsustainable inflation in health care cost. At that time however, the concerns in economics did not include the impact we are living with today, of the loss of some 60,000 manufacturing facilities nationwide, thousands in Connecticut. The modern problem of not being able to pay our current health care bills has been severely compounded by the loss of these factories, where growth in income has lagged way behind growth in health care expense. Robert Kraft, the billionaire owner of the Patriots, in advocating for a Casino in Foxboro, spoke of the cultural changes resulting from closed factories, where a person once could get a job, buy a house, and join a community forever. Those days, he lamented, are gone with the hope a casino that can't be moved overseas, might replace some of that. Paul Krugman, the noted Princeton economist, has stated the continued extreme growth in health care expense will bankrupt this country.

While this is not the focus of this application, this awareness should present to local officials that how we manage health care going forward is critical and this affiliation could be critical in that as we deal in total with the cost of health care, this affiliation could result in the loss of L & M altogether. Why? Should we become part of Yale NH and they are forced to cut service, you can imagine they would cut services in Southeastern CT first.

With the above in mind, I want to make the following suggestions that reflect the thoughts of many, and would help to improve the confidence that this merger currently lacks:

- 1) The affiliation needs to include and give authority to a community Board of Directors governing L & M alone. The current L&M Bylaw changes give Yale NH Health total authority over L&M including the right to control the Board by having the right to provide and therefore control the list from which Board Members can be elected.
- 2) The Board of Directors should be defined by the State and should have authority over the actions of L&M even if the affiliation is approved. We cannot have a Board that can legally serve only the self-interest of the administration or Yale NH. Therefore a Board must include the

Administrator, Doctors, Employee representatives and Community members. The community members should be representatives from the Towns primarily served by the hospital as they have a very strong interest in making sure the hospital provides full and quality service at prices that reflect the local economy. The Board should also include an expert representative from the State since they represent the primary funding source.

- 3) The current administration and Board should recuse themselves from the negotiation to improve confidence.
- 4) Our Southeast Connecticut community needs the services and employment of L & M. This need includes the Doctors, administrators, nurses and technicians in full. We cannot afford transfer of services and employment to Yale NH.
- 5) The hospital needs to include the community need as its primary goal as with or without the merger - it is a basic need that we can't live without. Whether it returns to being a community based hospital or not, it will serve basic community needs without which it cannot and would not exist.
- 6) L & M assets total hundreds of millions of dollars that should not be turned over to Yale without restrictions that would return the assets to the community should Yale NH be found not to be serving the interests of the Southeast CT community.
- 7) Surplus funds created through operations should be returned to the community in the form of reduced rates, development of assets in the community, or other benefits approved by the Board.
- 8) The need to affiliate has not been proven. There is no evidence that supports any conclusion that L&M is losing money.

This affiliation represents a great risk of the loss of assets built over many years and loss of service and employment in Southeastern CT. Yale NH was written up in a Time magazine article titled 'Why Medical Bills are Killing Us' where they were included as a not-for-profit hospital, behaving as 'for profit', running up the bills and rewarding administrators much like a Wall Street corporation. Last count there were nine Yale NH administrators making over \$1 million a year.

Oddly many of the comments I have heard from people who have worked with L&M for decades suggest the current L & M administration has been behaving in the same manner as Yale NH administration. This country cannot afford to have the bills run up any more. The middle income group has suffered tremendous income loss due to the competition of cheap foreign labor based on favorable and sometimes manipulated currency exchange rates. While the banking industry is strong in NYC, and that has indirectly benefitted southwestern CT, the vast majority of middle income workers nationwide have suffered extremely and that includes Southeastern CT. As an example of this I can point to the small government entity I work for where our health insurance cost has gone from \$30,000 per month in 2008 to \$71,000 in 2017, over 200% growth. At the same time annual wage increases averaged just 3% and mostly covered the increase in the employee share of the health insurance premium. This is repeated in every town, every business, and is very much the reason for the unstable budgeting our state is suffering. If you do the math where will we be in another 8 years.

I hope the regional New London community will recognize the need to be proactive in protecting Southeastern Connecticut's very important asset, and with that in mind request the L & M / Yale NH affiliation be disapproved.

Sincerely,

Alfred Fritzsche

P.O. BOX 340308
Hartford, CT 06134-0308

Dear Ms. Martone,

I am writing to you concerning the proposed merger/affiliation of L+M Hospital and Yale-New Haven Health system. Please excuse that this letter is hand-written, as I am penniless and have no computer access.

You ABSOLUTELY CANNOT allow this merger to happen and this is why: It will only make what they did to me even easier for them to do to others. I was a victim of diabolical medical malpractice and horrific patient abuse that occurred at both hospitals and was deliberately covered up by everyone involved. The lawyer I went to, Beth Hogan, failed to inform me that she was on L+M's corporate board and therefore had a conflict of interest. She pretended to take my case while actually working for the

other side, actually helping to make sure they would never get sued. They "cleaned-up" my medical records and threw away anything that could ever be used against them. Meanwhile, I could not get ANY follow-up care because I had become a "hot potato," no doctor connected with L+M would have anything to do with me. I am a medicaid patient, I am assigned to an area and can only go to the doctors in that area and connected to that area hospital. Their refusal to help me resulted in further malpractice including the development of multiple, progressive neurological conditions, one of which will eventually cause me to lose the use of my hands, arms, legs, lose control of bladder and bowels, and eventually work its way up my spinal nerve and shut down my breathing and kill me. To this day it is still not being properly treated because they don't want to admit it is caused by the two feet of bent, crooked, twisted rods in my spine. For about 12 or 13 years no doctor would even lift up the back of my shirt and LOOK at it no matter what symptoms I complained of, they just prescribed more narcotic pain pills even though they were already prescribing WAY beyond the prescribing guidelines. They would not send me to any specialists or order any tests even when I developed VERY RAPIDLY progressing neurological symptoms* because

they did not want to generate any evidence. They were hoping I would overdose on opiates because only then would THEIR problem go away, I did not.

Beth Hagan waited out the two years of pretending to be my lawyer and then mailed me a letter saying she has decided not to take the case, with no explanation.

This of course left me no time to get another lawyer. Incidentally, she is now running for State representative. A true politician indeed, since her illegal actions are costing the taxpayers ALOT of money due to the fact that I now continue to qualify for medicaid, food stamps, (housing voucher, too, but lost that because nobody in this State can do their job correctly) and the extra malpractice is driving up the cost of my healthcare for the rest of my life.

She overlooked one detail: because she prevented a lawsuit, I never signed a non-disclosure agreement. Interesting very... (For the hospitals, it was never really about the money, it was about preventing the bad publicity from getting out. I wonder if they still care about that?)

To fully understand the gravity of the situation, you need to know the extent of my injuries and exactly what the malpractice and abuse was, and the toll it has taken.

The car accident resulted in a major concussion, several broken ribs, lung injury, temporarily paralyzed left arm due to a brachial plexus injury (doctors said it would be completely healed in about one year), and approximately 12 spinal fractures including a broken neck. At L+M they were not following proper procedures at all, re-injured my shoulder and now it will never fully heal. My shoulder is permanently partially paralyzed, and although I have use of my hand and arm (due to extensive physical therapy) it is very painful and weak and will deteriorate.

At Yale they put two feet of bent, crooked, twisted rods in my spine. Rods are literally poking right out of my back. After I was awoken from the surgery I spent two days without any pain medication because they put the button for the pain meds in my paralyzed hand, did not tell me about it, and I could not look because of the neck brace. I kept complaining of excruciating pain but they would not do anything about it. *Next the brace specialist brought the back brace, telling me, "This is for physical therapy next week, try it on to make sure it fits," but he forgot to bring the tools to adjust it. He put it on me anyway. It shoved my head ten inches too far forwards injuring my broken neck (this is why I now have CONSTANT migraines). Then he told me to tell the nurse to remove the brace

4 * then I would pass out from the pain. Repeatedly this happened.

and change me back into the neck brace and he left. The nurse refused to do that and proceeded to literally **TORTURE** me for the next six, or seven hours or so, so severely that I now have PTSD. She even claimed that because I asked her to remove the brace that I was supposedly trying to harm my self, using that as an excuse to **HANDCUFF** me to the bed. I literally thought I died and went to hell. None of this is in my records because they realized they were wrong by morning, when her shift ended and the doctors showed up and asked why I was wearing a physical therapy brace in bed* when I don't start PT until next week - just like I had been saying all night, she just wouldn't listen because she was too busy **TORTURING** me.

(I'm just giving you the highlights, a lot more bad things happened, but you get the idea).

After being released from Yale I could not get follow-up care. At one doctor's office, Dr. Radin, in New London, where I was to have x-rays because the neck bone was so close to the nerve it could paralyze me from the neck down and I would die from not breathing - I was turned away. They said, "You're not his patient, he's not your doctor, you have to leave." Dr. Kelly, also of NL, refused to operate on a bunion even though I explained three times that it was interfering with my

*PT brace is NOT supposed to be worn lying down, in bed.

ability to do physical therapy for my arm because they were all standing resistance exercises with exercise bands, and because my toes are completely crossed I would just wobble and fall over. He got up and walked out while I was mid-sentence. Some of the metal in my back stuck out so far I would actually knock things off of shelves behind me with them! That actually happened numerous times. The rods should have been taken out within a year or so of putting them in but these people did not want any other doctor to see what had been done for fear I would go to another lawyer. So they colluded to cover it all up. More than a dozen years later I went to a surgeon at L+M, Dr. Samuels, and she claimed removing the rods wouldn't help me. She did everything she could to talk circles around me. Recently I went to a GOOD surgeon, Dr. Paonessa, at Backus Hospital, who DID perform another surgery on my back. There was a long delay in even scheduling the surgery because we could not get the records we needed from Yale Hospital. Dr. Paonessa had to guess at which set of tools to use to remove the rods because Yale destroyed my records because they did not want to get sued, and consequently we could not get the right tools. Some of what is in my back, the worst of it, cannot be removed because we cannot identify the manufacturer of the

tools we need to do it, and the original surgeon refuses to return his calls, Some of the metal cannot be removed because so much time has passed that bone has grown over it and now it is too late.

Bone will eventually grow over the rest as well if that first doctor never tells us what we need to know. My fate is already sealed.

Before this happened, I was working as a professional seamstress and hairdresser, had tons hobbies, grew apple trees from seed, had a social life, wanted to volunteer at animal shelters, could bake the best Christmas cookies and cakes ever, and was about to start teaching bellydance. Now I am permanently disabled, weigh 88 pounds, live on about \$8,000 a year, take 16 different prescriptions, can't afford to buy food or anything else, have constant migraines, insomnia, nightmares, agonizing pain, two kinds of progressive neuropathy, my digestive system no longer works because of both the neuropathy and because I have been on narcotic pain drugs for 15 years, have depression, anxiety, and PTSD, and I'm not even going to include all the other medical problems I had before this.

Please, I am begging you, do not let them do this to anyone else. I have met DOZENS of other people who told me, "They did the same thing to me!" This is actually the root cause of the heroin epidemic - it starts with an injury or bad surgery and some type of medical malpractice which is ALWAYS

June 17, 2016

Written Testimony Concerning Lawrence and Memorial Hospital and Yale New Haven Hospital Merger

To Whom It May Concern:

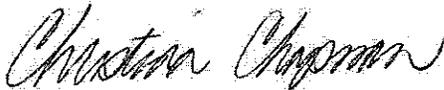

I am submitting testimony today to express my concern about the Lawrence and Memorial Hospital and Yale New Haven Hospital takeover. I am very concerned with the cost of care and how it will affect New London County, if this merger happens. Also, I have my own personal concerns on this matter.

I am concerned with the Yale New Haven Hospital Administration's practice of placing liens on client's homes for nonpayment of medical bills. Yale New Haven Hospital is a very profitable. I would prefer seeing this hospital focus its attention on working with its clients to create manageable budget plans. Many people in New Haven County have lost their homes for nonpayment. We do not want to see people in New London County losing their homes over nonpayment of medical bills.

I have worked at Lawrence and Memorial Hospital as a Registered Nurse for almost thirty years and have seen many positive changes. However, I have also seen many changes in business practices recently to cut costs to benefit upper management's salaries, while the workers and patients suffer. I believe this will be the case if there is a merger. Many thoughts are going through my mind regarding this possible merger. Will this merger bring less autonomy to the community hospital administration to effect decisions in the boardroom? Will the administration and local unions have less power to affect change in the workplace? I am very concerned with the quality of bedside care for my patients as well as my own financial future and future retirement opportunities as a result of this merger.

The outcome of this merger is not only important to me personally and professionally, but it will have a dramatic impact to the community in New London County. This is why I am passionate about being involved to create the best possible outcome for everyone in this area. Thank you for allowing me to share my testimony.

Sincerely,

Christina Chapman, RN, BSN, CRRN

7/26/16

L&M/Yale Merger Public Hearing

Dear Attorney Hanstead,

I am respectfully writing to you as a representative of Riverfront Children's Center, Inc. which is a non-profit child care program in Groton, CT. We have been following the merger on behalf of our 144 clients, and have a few concerns regarding the effects that a merger between Yale and L&M could have on our region.

L&M recently merged with Westerly Hospital, so that if Yale merged with L&M, all the Hospitals from New Haven up the coastline and into RI would be run by 1 entity. My experience with centralization is it causes a kind of monopoly on services. Thus, with no local competition for pricing, the cost generally goes up to consumers. Our concern with that is that the majority of our low to middle income clients (144 children) use the emergency room as their primary care medical home. A needs assessment study was recently done I believe by Ledge Light Health District and L&M Hospital and when I attended the meeting summarizing the findings of that report, it showed that a higher proportion of SECT families were seeking their primary care directly at the ER than anywhere else in the state. With many clients going off of HUSKY August 1, 2016 (especially parents), we fear that they will no longer get the health care they need and put off preventative care because of rising costs. With behavioral mental health and adult mental health in the high level of crisis that it is already in for our region, we fear that the outcome would be disastrous if the costs of medical care became prohibitive to our clients. Even small increases would prevent them from seeking care once they are off HUSKY.

In addition, we have noticed that in the past 2 years that more and more of the children and elderly needing medical care at L&M have had to be sent to Yale, CCMC, Hartford Hospital or another larger hospital more than 1 hour away for their care for things that might have previously been handled locally at less of a stress on the children and families. Personally, we were almost sent to Hartford for our daughter's broken arm because there may not have been a children's specialist available that day. After already driving to L&M by ambulance, we were lucky that the specialist was available, because our child suffers from high anxiety and would not have done well with an additional hour long transport after sitting with a broken arm for 2 hours. It is a concern that with the merger, more patients will be transported to the larger hospital hubs and fewer personnel (especially specialists) will be here locally at the L&M facilities. That could also mean lost jobs and economic impact that would hurt our clients who fill the roles of the service industry locally.

Overall, though we acknowledge that there could also be benefits from a merger such as this, we fear that the negative impacts will far outweigh the positives for our clients specifically. They are already marginalized, and barely making it by from day to day. Any increases in stress, costs or decreases in their health care would be highly detrimental to their overall life outcomes.

Sincerely,

Susan Corrice

Executive Director

The Riverfront Children's Center, Inc.

Testimony

July 25, 2016

Dear Attorney Hansted:

My name is Susan Goldman. I have lived in Norwich for 27 years. I am a retiree member of AFSCME (local 2422), and I recently retired from my position as Program Assistant at the city of Norwich Office of Community Development where we administered all of the HUD grant funds.

I want to express my strong opposition to the Yale New Haven – L+M Hospital acquisition as currently proposed.

The City of Norwich, and many of its surrounding communities, are already experiencing significant economic challenges, with municipalities faced with eliminating core human service programs due to budget constraints, residents having difficulties securing good jobs, decent housing and putting food on the table. These issues are real, for families not only from traditionally "low-income" families, but are impacting a growing number of people further along the income spectrum. A few years ago, the United Way released a report on ALICE Households- an acronym for Asset Limited Income Constrained Employed families—powerfully illustrating the challenge for both low income and moderate income families. These families earn more than the US Poverty level, but less than the basic cost of living for the county. Combined, the number of poverty and ALICE households equals the total population struggling to afford basic needs. In New London County, out of a population of 105,801 there are 36,681 households struggling with providing basic human needs for their families.

It is within this context that I urge OCHA to be vigilant in their ^{Review} approval of this proposed acquisition. Yale New Haven Hospital and L+M Hospital are vital, critical community institutions providing essential services to the whole of the population residing within their service area. If there are significant changes/increases on cost and prices, access to essential health care services, loss of local control or an overall decline in our community's access to basic services, the impact on an already struggling population could be devastating.

Cost & Price:

It is my understanding that if and when this acquisition goes through, Yale New Haven will have 80% of the market share within the L& M service area. Studies show with this kind of market share, prices increase by at least 20%. This would severely impact access to health care services for a very large percentage of our population. Despite request by legislative and executive branch officials for data on impact of previous mergers on cost & pricing, YNHH has not provided this data. If there is no data, OHCA—given its charge and mission to protect consumers from rising health care costs—cannot reasonably or responsibly approve this proposal.

Local Control:

While YNHH & L+M have both claimed that full control of decision making would remain with the local board, recent review of the proposed by-laws reveal that YNHH would assume that power and authority. This revelation undermines Yale's veracity and commitment to engage in authentic and transparent negotiations with the community.

Local Access to Health Care Services:

What happened at Windham Hospital, through the decisions made by its parent company- Hartford Health Care, has had a chilling impact on many members of this community. We do not want our community hospital to be another Windham. YNHH and L+M must provide concrete guarantees to OHCA, to elected leaders and to community members that local access to health care services will not be impacted by this acquisition.

Accountability:

These vital issues require a signed, legally enforceable community benefits agreement between Yale New Haven and a broad cross-section of our community before we can even consider allowing control of our community hospital to change.

June 16,2016

To whom it may concern,

My name is Victoria Longo , I grew up in New London and have lived in New London. I presently live in Uncasville,Ct. I am a registered nurse and have been employed at Lawrence and Memorial hospital for 35 years.

The hospital has been a fixture in our shoreline community for over100 years, not only do I work there but all of my family members have been patient 's at the hospital at one time or another. Since we are a fairly small town I have seen familiar faces all the time using the services at our local hospital. For many people it is very comforting to see familiar faces when they come into the hospital and to know that while they are at the hospital they are still close to home.

I am cautiously optimistic about our pending affiliation with Yale New Haven Hospital.... I know that in the ever changing healthcare atmosphere certain changes have to be made. However I do not want these changes to be made at the expense of our employees,community, and our local hospital . I am concerned about access to care if services get moved closer to New Haven, and I am also concerned about the cost of procedures etc. going higher because of our affiliation with a larger hospital; as everyone knows healthcare is already very expensive. Our employees are dedicated hard working people who deserve to work for an employer that respects each and everyone of them and values them.

Thank you all for your consideration on the very important matter, I'm sure we all want to do what is in the best interest of everyone involved.

Respectively submitted ,
Victoria Long

Mary Ellen Masciale

Secretary, Local 5051 L+M Hospital LPN/Technical Employee Union

Long term employee in Neurodiagnostics Lab for 26 years

Live with my family in New London, with other relatives in Waterford and East Lyme

Thank you for allowing me to be heard. I am terrified of public speaking, so this is something I feel very strongly and deeply about or I wouldn't be here this evening! I have some concerns about this affiliation and feel like we are being railroaded into it. I have concerns that our patients, and therefore our community, are pawns in a political game that is really about big business.

My department is responsible for performing nerve conductions on patients with peripheral nerve issues. We work closely with a physician who is either a neurologist or physiatrist. We have grown this service steadily over the past 5 years and serve about _____ patients a year. Last year, our main physician left for another state; there was no initiative from the administration to find another to take his place. We were able to get someone to take on the patient volume ourselves. After a year, she is also leaving for another state. There has again been no initiative to hire another doctor; I know this because we asked the physician recruiter. We typically have a 4 week wait for an appointment. Now we are only able to schedule 6 patients a week instead of 24, which will prolong diagnostics to at least a 3 month wait. Administration response to this is to "wait and hope Yale will be able to help us." I am very concerned that this aspect of my department will dwindle over the next 6 months and then get moved off site to Yale when the "affiliation" takes place.

I also have concerns that we will be forced to adopt some questionable clinical practices, which will lead to higher patient costs even if L+M does not fall under Yale's DRG rates. At L+M, and most hospitals, a 30 minute EEG tracing is standard. Yale runs a 63 minute EEG so that they can charge for a higher cost procedure, even if it is not clinically necessary.

I've watched over the last 7 years as this administration has ricocheted from one trend to another with limited commitment and success (durable medical equipment, Dana Farber Cancer Center affiliation, large orthopedic inpatient addition, ideas for outpatient pharmacy, "Pequot South", off site psychiatric facility, etc), and I am concerned that this deal is going to follow suit, but be a done deal.

I urge you to delay your decision on this case until the state has had time to review the laws that govern hospital mergers. There are big changes going on in health care, and once this deal gets done it cannot be undone. Let's make sure it is right for our community first!

Good afternoon,

My name is Kristen Powers. I have been an employee at Lawrence + Memorial Hospital for 29 years. I am also a life-long, local community individual that has entrusted all of my healthcare needs to L+M hospital for nearly 52 years.

I am here today to show support for and, **more importantly**, to encourage you to honor the Governors Executive order of delaying large mergers, affiliations or corporate associations amongst **our** Connecticut hospitals. Let the Governors committee do the work they have set out to do.

I ask this because I have read multiple articles regarding **“associations”** of this sort and **I am** concerned that this “affiliation” will, in the long run, lead to increased costs to our patients and our community.

I believe that if L+M **“affiliates”** with a larger entity like Yale, we, as a community hospital, may be fueling the “ever-growing fire” of rising health care costs. No one can dispute that the cost of healthcare is rising at a ridiculous rate; most people cannot even afford it! If L+M affiliates with Yale, Yale will become the dominant player along the CT shoreline from New York all of the way into RI. This means that if Yale becomes the dominant “player” in the game in our community, **and this is not a game**, they can set whatever prices they want or claim to need.

I have read many articles over the last several months about “hospital mergers” and have found that even the FTC is “wary of mergers by hospitals.” The New York Times¹ and the LA Times², among others, have written articles about this subject and have found that, although the goal was to become more efficient and save money by merging or affiliating, costs have actually increased after the “deal was done.”

**I cannot accept this, you should not accept this, nor should anyone!
It is time to reign in the madness!**

I **insist** that you take a very long, hard look at what this “affiliation” will mean to my patients, my community, my family and yours! You may or may not live in this part of CT, but your decision will have great impact and be far reaching for the rest of the citizens of CT.

Personal story on effects of Yale-New Haven Takeover of L & M

My name is Ken Rowland, and I live in Waterford, CT. I am a UAW member who is lucky enough to be offered decent health care coverage benefits through my employer. Until recently, I have been fortunate enough to say my family's health has been good and therefore healthcare costs were not a big concern. My company provides what would be considered as good coverage, at a fairly reasonable cost. Over the years, that coverage cost has evolved, though. Where once the employee had a small premium and a modest co-pay, coverages have changed to require higher premiums and deductibles. Co-pays are gone, now the employee is responsible for a deductible cost. Out of pocket expenses have increased greatly. That brings me to my story about competition, and why it is vital to the community.

Upon a recent diagnosis of a medical condition, the specialist ordered a CAT scan to provide more detail prior to surgery. Since he is affiliated with L & M, he suggested the test be performed there. I called and scheduled the test and later heard back from the billing department informing me of the anticipated cost. I was shocked to hear that after my insurance paid a portion of the cost, my responsibility for the 10 minute test would be over \$1500. That drove me to research what the typical price may be and if the procedure was provided elsewhere in the area. According to a medical cost website, the procedure should average around \$600 to \$800. I called Southeastern Imaging Center in Waterford to ask their price and their response was that they had been bought out by L & M and the cost would be the same as at the hospital, or the Pequot medical center, all of which had become consolidated under L & M. The procedure would be billed at \$2300 before I received the "discounted" rate of \$1520.

Under most current healthcare plans, the patient is responsible for a deductible cost, and out of pocket costs are higher than ever. We cannot afford another merger which would give Yale-New Haven Hospital a monopoly of services along a vast region of the shoreline from Rhode Island to New York. Competition is the key to holding down cost, which is either paid by individuals or shared by groups through higher and higher premiums. Recent studies have shown that high cost rather than excessive healthcare usage is the major driver in rising healthcare costs. More competition not less is needed to put the cost of services in line with market costs; less competition only lines the pockets of the Board of Directors at those mega healthcare institutions.

This is one facet of the story; monopolistic healthcare entities would also be free to move low returning procedures and facilities out of the communities they have served for decades. Let's keep Lawrence and Memorial a true Full Service Community Hospital.

To Whom It May Concern,

I am submitting testimony today to express concerns of the proposed Yale/ L&M take over.

I currently work at this community hospital. I currently use this community hospital. This is why I am writing to you. To help give a voice to the families and patients I serve at L&M Hospital. We do not want to become another Windham Hospital. We want to use our community hospital in our community. When referencing Windham Hospital, what I am referring to is the closing of the ICU/CCU. This was not part of the plan or CON process when originally looked at by Hartford Healthcare. Somehow they were able to close these 2 units without another CON process. This leaves those families stuck vulnerable. If their loved one needs increased care many can't travel to Hartford.

As a nurse, I have cared for many patients that start out on a regular, some type of complication, change in status occurs and we transfer them to the ICU/CCU. Depending on the status of the pt. Stay may be short, long or their last. Just imagine you loved one coming to the hospital without an ICU/CCU. First few shifts are uneventful, nightshift comes along. Change in status, your loved one now needs to be life flighted to Yale. You now can't go visit because you usually take the bus to L&M. The change in condition is so great your loved one goes from a full code to comfort measures only. Now your loved one is 50 minutes away from you only to die alone.

What I am asking is for you to have Yale/ L&M have answers. So far we have had community forums and came up with what we want to hold this takeover accountable for.

- 1) Accountability
- 2) Community Access and Well Being
- 3) Affordability
- 4) Workforce

Respectfully Submitted,

Jeanne Wehling

Uncasville Ct

Testimony Regarding Yale New Haven Hospital Takeover of Lawrence and Memorial Hospital

July 26, 2016 Public Hearing

My concerns regarding Yale New Haven's takeover of L&M is in regards to Yale's indication that the local board will retain control of L+M. I would like to know how that is possible. Doesn't Yale approve all board appointments? If so, can't Yale fire any local board member without cause? Doesn't the CEO work "at the pleasure" of Yale? Doesn't Yale retain the authority to make and/or approve all important decisions?

I would like see an open and true conversation about the future of our community hospital. Yale must give the community concrete, written, legally enforceable commitments.

Sincerely,

JoAnn Merolla-Martin

Norwich, CT 06360

Testimony of Tom Swan, Executive Director of the Connecticut Citizen
Action Group (CCAG)

On the proposed takeover L & M Hospital by the Yale Health Services
Corporation

7/26/16

Good evening, my name is Tom Swan and I am the Executive Director of the CT. Citizen Action Group. My testimony today is on behalf of our members, including hundreds living in the L & M service area. CCAG has been working on health care issues for 45 years and has been very active on health care issues, including recent hospital consolidations.

CCAG strongly opposes the proposed takeover and urge you to reject it as Connecticut continues to work to design an adequate regulatory framework for a 21st Century health care system. The legislature has taken some positive steps over the past few years, but they are not enough to guarantee that people can get the care they need at a price they can afford.

I want to thank you for giving us the opportunity to address this proposed takeover. It is important for us to look at this in a larger context. Regulators and health care policy analysts are increasingly voicing alarm at the trend towards increased consolidation in health care. Just yesterday, the Guardian published a piece entitled: "Healthcare mega-mergers drive income inequality. They must stop." The piece pointed out that "since the mid-1990s more than 1,200 hospital mergers have resulted in larger hospital systems, which wield their market power to extract excessive prices."

It also referenced a recent report that estimated that in areas with significant hospital concentration, which the resulting corporation from

this proposal would have for virtually all of the Route 95 corridor in CT, hospitals charge prices that are 15 % higher than prices in more competitive markets. If this takeover is approved as proposed, we can expect significantly higher costs due to not just L & M being taken over, but also the increased control by the Yale New Haven Health Services Corporation of physician practices - particularly specialists.

The fact that the applicants have refused to share with you pricing data - that they will need to make available in less than 6 months – should be enough of a reason for you to reject this deal.

On a related note, I would like to point out that the US Department of Justice announced its intention to sue to block two large health insurance mergers on anti-trust grounds just last week. Attorney General Jepsen signed onto the Anthem-Cigna suit due to concerns about consolidation in the Connecticut health care landscape and its impact on cost. These same concerns must be part of any review of this transaction.

In closing, I want to touch on the loss of local control as another reason to reject this takeover. Input should not be confused with control and Yale New Haven Health Services Corporation saying otherwise is dishonest and needs to be rejected. Eastern Connecticut is already suffering the effects of a hospital conglomerate making promises to get a deal approved and then turning around and slashing services as we are witnessing with Windham Hospital. Our future regulatory framework needs to have our hospitals be more accountable to our communities not less.

Thank you for your consideration.

Testimony for Hospital Merger or Affiliation or Take Over

I'd like to start by thanking everybody involved in this process to help all of us determine what direction the healthcare industry is going. The future of our community health care system is in the balance as this committee weighs the effects on our care and the need for these corporate takeovers to continue to take shape.

The facts aren't as clear for the general public about certain subjects when it involves healthcare choices. We try to understand the information presented by the pros and cons of affiliations and mergers, in our mind, not knowing but relying on others to help guide us. The facts aren't as clear when we see the fighting which takes place over the interests of profitability for Hospitals and Health Care Systems and the well being of Patients and the Services which are being provided.

The public has been lead to believe that our Community Hospital L&M is in good shape when we see the purchase of Westerly Hospital. The interesting part is we have a **NON PROFIT HOSPITAL** but a **For Profit** group running the Corporate, daily practices of Lawrence and Memorial in New London. I have yet to understand how that actually works. Then we see a bitter labor dispute, millions of dollars spent and lost, along with patient confidence deteriorating. The Management of L&M Hospital has driven some Doctor's in our community away to other hospitals along with bulling and strong arming them into a group practice called LMMG in order to survive. The concept of LMMG may be a necessity but were the Doctors even given a chance to be represented as to how they think things should be formulated? The hospital management took a building on Howard Street, renovated it

and told the doctors, "Staff is interchangeable here's your cubicle and your sharing it with a few other Doctors". I find this practice to be a very indignant act. These are people who provide the care and medical attention to our community. Doctors work long hours they are constantly giving and sacrificing themselves to patient care and I doubt any CEO or Corporate Executive would be delighted to sit and dictate reports or consult with clients and other team officers and corporate staff in a cubicle the size of a closet.

I see these quality care givers as our front line warriors. Their staffs are more than likely understaffed, overworked and probably underpaid due to fixed pricing for their services. The constant corporate mentality of work harder with less and our numbers will increase to streamline or services by paying our executives more bonuses and compensation is a normal modern day practice. I need not exam the true nature of miss information or the bitterness I felt when the Hospital three plus years ago refused to negotiate as the term goes "bargaining in good faith" in a contract negotiation with employees of L&M Hospital. What will happen next time with the interchangeable mentality of Corporate Health Care Systems? Will our Caregivers once again be put out in the streets to settle for less and pay in more money for their health benefits themselves? This has been the formula for Corporations all over our country.

I have done some homework as to the ever changing landscape of healthcare with mergers, takeovers or affiliations. The Yale Health Care Industry Symposium which took place this April of 2016 addresses the industry's Consolidation, Integration, and Competition. This is a great area for the public to review. I have read and re-read about the transformation of Hospitals acquiring other Hospitals as well as Doctors

practices. What troubles me more is they are also acquiring Insurance Businesses. They also seem to look at the management of all sectors of healthcare. The mentality of monopolizing all areas of health care services and looking at our health not as individual patients but in a model format is a bit troubling. The statement of fee-for-service and accountable care practice models are driving a market of Insurance mergers. Insurance companies are arguing their own mergers are necessary to counterbalance the excessive and growing **POWER of Hospitals**. The laws that legislators have created are in place to protect us as patients and to keep a free market in order for us to choose what's best for our health. I have seen what deregulation has done and its track record is quite clear. The Power Industry or the Cable and Phone Industry all have created increased wealth with mergers and takeovers and the public pays the price. The fact our choices are reduced and we have fewer options at higher costs seem to be a normal occurrence.

The question here is will consolidation improve patient care? The other question I ask is will the patient care and services be decrease in our Community hospital? The merging of departments and the corporate comfort words of streamlining and reduction of patient care and services are evident in many areas. Profitability with bigger corporate players leads to a lack of diversity in the health care industry. The bigger the corporation, the more layers of problems persist. The front line caregivers are the constant recipient of layoffs and increased health care premium increases. The pools of premiums with more group coverage should bring the rates down but this is not a guarantee. The fact is we see Departments in smaller Community Hospitals either closed or downsized due to profitability and don't think for one second

that all of this data isn't gathered before the takeover is even attempted. The outlook for health care remains hotly contested as stated in the reviews I've read. The statements I seem to read all focus on basic industry survival techniques. We are hearing that health care is in a crisis but the jury is still out. Economists and Industry leaders are at odds over the outcome of these changes Industry leaders see the modern move not only as necessary but beneficial to consumers and industry alike while economist critique consolidation for raising prices while reducing consumer choices and failing to improve outcomes. We also see little information about market changes on the most vulnerable populations, the everyday patient experience or the average physician and the scientific research and development within health care.

The completeness of the transformation of mergers needs to be an all or nothing proposal mostly due to cost and that many providers don't have the stomach or the resources to do what needs to be done. The cultural changes that are required for the Accountable Care approach may not be the kind of change that can happen in small steps or integrating old methods with new. This new model for profitability is here and we're in the middle of the road trying to not get run over on the superhighway of health care as it evolves. The complex issues of profitability in the Hospital Industry are quite perplexing. The Non-Profit to for Profit intermingling of Health Care groups and the laws governing anti-trust and Monopolies are even more confusing for the lay person. The "Horizontal Consolidations" and the "Vertical Integration" mergers across the board only better confuse the issues more than clarify the subjects involved in caring for the patients and families of those who are sick and infirmed. The Health Care Systems

seem to swallow their competition as the total population approach to care marches on. The fact Accountable Care is a difficult thing to measure only reflects on how prudent we should be to advocate such mergers. I would like to share some basic facts about the Industry leader in this merger and some research areas I have reviewed before I wrote my testimony today.

I've read various internet articles coming from "The Yale Health Care Industry Symposium, Chris Cheney Health Leaders media article, the Beckers Hospital Review, the Hartford Business Journal, the Yale New Haven Health Facts and Figures, along with the Yale New Haven Health Service Corporation Financials for the filing with the State of Connecticut.

1. \$3.4 billion dollar Health Care System
2. \$4.2 billion in assets
3. 27.1% of market share in the State now
4. 31.4 % with L&M and Milford mergers
5. 1.6 million people or 46% of state population is in YNHHS region
6. 150 million in spending cuts last year
7. CEO of Yale New Haven Health System (YNHHS) compensation and fringe benefits \$3,520,872 dollars

9.16 with law

These are a few of the items that make me wonder if bigger is better. I have only one real concern and that is will we be cared for with dignity and respect or will the Money and Profits run this new model of Health Care. We have an obligation to each other to speak up and question this type of Affiliation or Merger or Takeover. This will affect our families and the future of our Doctors and Staff in each institution

that provides PROFIT CARE for People IN NON-PROFIT COMMUNITY HOSPITALS

Thank you for your time in addressing these critical matters which face our community

Respectfully Submitted,

A handwritten signature in black ink, appearing to read "Shawn Powers", is written over a solid horizontal line.

Shawn Powers

Testimony

Submitted by State Representative Ernest Hewett, District 39, New London
July 26, 2016

Good afternoon Attorney Hansted:

My name is Ernest Hewett, State Representative for District 39, representing the City of New London. As you can imagine, I have been keenly interested and concerned about the impact of this acquisition on the individuals and families that live and work in this city. Several months ago, I expressed my support for the Yale/L+M affiliation, based upon the facts and information at the time. Most importantly, I was concerned about the negative impacts this merger might have had on working families, and those employed at L+M Hospital. I agreed to support the proposed deal when I received assurances from the union and the hospital that job protections would be in place and secure.

Since that time, I have received new information that raises significant concerns about the benefits of this acquisition to the community, specifically related to local control, cost & price and sustained access of health care services to our community.

Local Control:

In initial statements by Yale New Haven and L+M management, we were assured that a local board of directors will control L+M. I have recently learned that, in fact, according to the proposed by-laws for L+M Health Corporation, Yale New Haven is designated as the "sole corporate member" of L+M Health. In other words, Yale New Haven will have total control over membership, and will ultimately have control over the decisions made about our community hospital.

It is essential we have an honest, upfront conversation about what this acquisition means for our community. This newly revealed information about the power and authority held by Yale over our community hospital undermines our trust in the key players within this proposed deal, and calls into question Yale New Haven and L+M's commitment to transparency and authentic dialogue with this community.

Cost & Pricing:

According to a report released at the beginning of this year, if this acquisition is approved Yale will control 60% market share from NY to RI, and more than 80% in L+M's primary service area. Consolidation in such markets can lead to price increases of 20% or more. This would be a significant blow to our community, and would further exacerbate challenges to accessing affordable health care services.

I understand that OCHA has asked Yale New Haven Hospital to provide data on how previous Yale New Haven mergers impacted prices in the case of Bridgeport, Greenwich and St. Raphael's acquisitions, helping us to potentially dispel some of these concerns. To date, Yale has not provided this data. It does not make sense for OCHA to move forward with this acquisition without this crucial data.

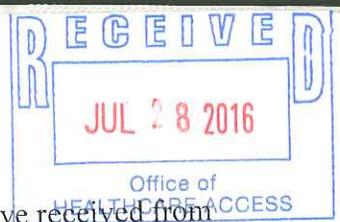

Access to local services:

My colleagues who represent constituents in the Windham area recently briefed me on the changes made to critical health care services at Windham hospital. Several years ago, Hartford Hospital promised improvements and no cuts to services within that community. These promises were not kept

and Windham Hospital closed its critical care unit, necessitating patients to drive and fly on helicopters to get normal hospital care. What assurances do we have that this will not be our fate as well?

L+M Hospital is a vital and crucial institution within the community, and its continued service to the individuals and families residing throughout the New London area must remain secure. In order for me to have confidence in supporting this proposal, these issues must be addressed.

I strongly urge OHCA to require Yale New Haven Hospital and L+M Hospital to enter into a signed, legally enforceable community benefits agreement negotiated with a broad cross-section of our community before we move forward with allowing any kind of change in our community hospital.

On July 11, 2016 I gave a brief oral testimony regarding the excellent care I have received from the L&M medical system based out of New London, CT in both Connecticut and Rhode Island. To say that I would take all day to describe in detail this quality, in stark contrast to the deplorable medical care I received from other medical agencies, particularly in Rhode Island, was understandable, and after talking with the board am fulfilling their request to put this detail in writing to be better understood.

I was born in Vermont and grew up in Connecticut, Rhode Island, New York, and Vermont and have additionally lived in Massachusetts, with my immediate family having owned residential property in Greenwich, CT, Yonkers and Westchester county NY, and Shelter Harbor and Bradford, RI. My paternal grandfather and namesake ran two medical facilities in Yonkers and Mount Vernon, NY from the 1940's until his death of tuberculosis on January 4, 1968. I attended Waterford High School from 1993-6, after being expelled from Chariho school system in Rhode Island in 1992 and meeting further problems at Harmony Hill and Briggs in the same state 1992, and I am familiar with the excellent reputation CT has in terms of quality of life, as that change of placement, and subsequent sojourns in New London county CT, have helped me greatly in times of crisis.

It was on August 3, 2013 that I first experienced the excellent quality of the L&M medical system. I had been released from prison in Rhode Island after serving a 7 2/3 month sentence, including 5 months in solitary confinement where I had lost 1/4 of my body mass. On that particular morning I was found around 3:30 AM passed out at the MGM Grand at Foxwoods. Three hours later I took the seat bus to exit 92 and began walking south down Rt 2 in Stonington. After a half hour of walking slowly then pain I was experiencing was so intense as soon as I arrived at the Henny Penny I asked the clerk to call 911. Paramedics and the Stonington PD arrived, and being shocked at my physical state, transported me to L&M's hospital in Westerly. I was greeted in the emergency room by Dr. Fred Jaccarino, who was familiar with my walks around NL county and my beach workouts. He remained calm, examined me, and noticed that I was experiencing severe dehydration and severe constipation as a result of prison neglect, and for the first time in my life I was put on IV fluids for four hours. Even though I have a long list of allergies to prescription, as well as illicit, drugs, much of that info had been misplaced as the last time I had experienced that type of medical problems was as a juvenile, and my records were under my adopted name, however Dr. Jaccarino prescribed miralax to help with my constipation, and to address any potential effects requested the contact info of Doctors I was already seeing in RI and MA should something occur. Once I was well enough to walk unassisted the staff at L&M Westerly helped me get to the Westerly train station where I boarded a train for Kingston station.

Several weeks later that month, four days after I began using the miralax, I was experiencing a burning pain in my back around my kidneys. I had an appointment with Dr. Richard Robin that day and went to see him. I had seen Dr. Robin first in June 2012 in order to fulfill a court request for a psychiatric evaluation, and on September 28, 2012 Dr. Robin intervened after he noticed I was experiencing complications from a life saving operation performed the previous day in Stoneham, MA to remove an infection from my jaw as the result of a bullet wound from July 21, 2002 which had become seriously infected. It was during that intervention that Dr. Robin made me realize that even though I do not have a major mental illness, I do have situations in my life in which intervention would assist. That afternoon when I experienced that pain and described it to Dr. Robin I found out he was part of the L&M system, the quality of treatment I was receiving from him should have been a tip-off, and he contacted

L&M Westerly and told me to walk to the emergency room there or he would call 911. Once there Dr. Jaccarino noticed I was having an allergic reaction to the miralax, stopped the prescription, and managed to stabilize me.

The quality of treatment in August 2013 made me a L&M patient. Previously I had experienced one incident after another of deplorable medical treatment in Rhode Island. That included Dr. Frank Gencarelle treating the wrong eye as a juvenile until 1995, and as a result I receive a disability check from the government solely for the visual impairment which I have as a result of this mistreatment. This involved a botched operation on my right foot at Westerly hospital in 1991 long before L&M took it over which required specialized treatment by L&M's Dr. Lawrence in 1992 to correct the damage, and doctors at Bradley Hospital prescribing medication without properly obtaining my medical records in October 1992 which required treatment in Washington County VT to correct the damage in 1992-3, and attempts by South Shore Mental Health in 1995-6 to coerce me into treatment that was unnecessary at the urging of a stepdad, and this attempt was stopped by Dr. James Greer, with the assistance of the faculty at Waterford High School, in 1996 one it was noticed that the stepdad and I were involved in a dispute over the substantial estate of my biological grandmother/adoptive mother, and bad experiences with court ordered mental health counselling in 2008-9 and 2011-2 before dealing with Dr. Robin.

I later found out to my disgust that L&M subcontracts with South Shore in Rhode Island on November 6, when Dr. Robin's staff noticed I had been in a confrontation with someone I had issues with in prison, and they did an emergency certification to L&M Westerly. I was released after four hours. L&M Westerly helped prevent any adverse experience. They did this by verifying in August 2013 and keeping on their records my association with Dr. William Beeman, my former dept. head at Brown University. Other mental health agencies claimed my knowing him was a grandiose delusion, however they were able to work with him to verify my statements regarding my history and family, partly as my closest living relatives in America are my relatives from Iran, who were Gilanshahi members of the Imperial Iranian court who have trouble understanding English. By L&M documenting this the staff at South Shore was prevented from calling this delusional. They also noted that the inmate I beat up was a violent individual who would create a conflict until compelled to stop, and L&M Westerly has worked with L&M facilities in CT to help me obtain treatment so I do not have to deal with menacing individuals like that.

I also had L&M assist me when I received malicious treatment from Thundermist and Fellowship Rhode Island in the summer of 2014. In June 2014 when experiencing pain from unknown marks on my ankles I went to Thundermist for treatment. Once they saw the condition of my feet the staff screamed, diagnosed scabies without performing any tests, and wrote a prescription for an overelaborate treatment. The staff at Fellowship Rhode Island, who I had been court ordered to see for mental health counselling by Judge Jabour in Rhode Island as part of probation terms to replace Dr. Robin, who had discharged me and most of his patients in November 2013, repeated what Thundermist said and tried to coerce me into taking this overelaborate treatment. I sought a second opinion from Dr. Kevin Torres at L&M Westerly in July 2014. Within two minutes of examining my feet and legs he determined that it could not be scabies as the marks remained under my knees, and the foot injuries L&M Westerly treated me for in May 2014 were healing, which were inconsistent with scabies. When Thundermist and Fellowship Rhode Island further attempted to coerce me in August 2014 into this unnecessary treatment, including filing charges after I confronted their attempt to coerce this treatment. L&M

worked with me to successfully beat those charges and to disassociate myself from those organizations who would have harmed me by their incompetence.

I received quality care once again from L&M in 2015. In January 2015, after a Cranston detective and doctors matthews and ottowicz at fatima hospital lied to judge hastings, who stated on the record that she would allow hearsay testimony, at a mental health court hearing in rhode island and gave me drugs which continue to cause me serious health problems, the people at L&M worked to get me discharged from that facility. When I experienced severe chest pain and breathing trouble as a result of the drugs given to me at fatima hospital shortly after being discharged there Dr. Keith Hilliker stabilized me and stopped the prescription that was given to me at fatima, particularly as the staff at fatima would not release the names of all drugs given to me there. I did experience problems when L&M attempted to discharge me, as it was 6PM, I can not get a drivers license in RI because of my visual impairment, then last bus leaving Westerly in RI had left, all buses in CT were going to the casinos, I could not get a ride, and the pain I was experiencing was so severe I asked the staff "not to discharge me too soon" upon which they brought someone from south shore mental health who could not understand my request and had me transported to butler hospital. I spent one week there with violent patients who the staff had to keep away from me, making the work Dr. Furman did with me more difficult, however once he noticed I was not seeking conflict he concurred with Dr. Hilliker and released me. Had L&M in rhode island not affiliated itself with a deplorable association I would not have been deprived of my freedom simply because someone could not understand a simple phrase.

I received excellent care from L&M again from May-December 2015 for a foot infection I received in April 2015 while serving 30 days in rhode island prison for beating up the arsonist who destroyed the place I was staying at. When Dr. Torres saw me in the L&M Westerly emergency room on May 3-4 he focused on my stabilizing my heart which was experiencing a serious palpitation, yet noted the condition of my foot. From then until September 2015 the staff at L&M New London, Stonington, and Westerly worked to stabilize my foot, even dealing with the staff at Backus Hospital when I was brought there on labor day weekend after having a bad fall on a greyhound bus, and with Quinnipiac Medical, as the student intern from there who examined me at L&M Westerly helped solve the problems I had finding a podiatrist and in obtaining the prescriptions I needed to treat the foot, the former by tirelessly and creatively working to arrange an appointment for my treatment, the latter by calling up the pharmacy I was to obtain my prescription from, as L&M Westerly has no dispensary, and form me to receive the prescription upon my ID being verified in order to prevent prescription theft/fraud. The podiatrist that student intern referred me to worked successfully with me, and when treatment became disjointed in December 2015 the staff at L&M Stonington worked not only to see that my foot was healed by the end of that month.

The treatment became disjointed after an incident on a bus in rhode island, two days after receiving successful treatment for that foot injury on November 11, 2015 where my foot brace snagged on some punk's backpack, and the bus driver called 911 claiming I tried to assault that punk. As the bus had stopped on the uri campus when this occurred the campus pd pulled me off the bus and beat me while handcuffed, causing me to experience a narcoleptic attack later that night, and when campus pd brought me to south county hospital they continued to beat me while handcuffed to the stretcher. Even though the prison staff noted the marks on me as a result of the beating they did nothing to treat me. Even though the L&M podiatrist was the only physician to respond in a timely manner to the court, it was enough to demonstrate I had a medical condition which effected my actions during that incident and that imprisonment would only make things

worse, securing my release. The day after my release the staff at mario's pizzeria noticed I had trouble eating, and when I went into the nearby cumberland farms to use the bathroom I was on the toilet for over 30 minutes, and when I got up there was blood everywhere, and as that store was crowded I rushed across the street and called 911. I was brought to L&M Westerly where Dr. Wendy Witt and her nurses treated my condition. They were able to restore my digestion, noting I had been dehydrated and as the food I had was with me they examined it and noted it was not the cause of my troubles. When I had to use the bathroom they brought a commode over and had me use it while they watched. Dr. Witt noted the blood in my shit was small, however a contusion from the beating I received at south county hospital while handcuffed was bleeding profusely and had been neglected in prison and they treated that injury stopping the bleeding. When I tried following through with my primary care Dr. stuart he was more worried about the fact I had to walk over a mile in pouring rain to the stop than about the injury. I reported his behavior to L&M Westerly, who referred me to L&M Stonington, who assisted me with follow on treatment and referred me to Dr. Brandon Luk with my first appointment on March 1, 2016. Even though Dr. Luk is new, he has been working with me to obtain all my medical information, the only problem at this time his being overbooked and as a result not being able to get info from all my doctors, and ones I have and continue to have malicious experiences with respond rapidly and inaccurately.

Having described the good quality of treatment I shall now elaborate on the deplorable treatment I mentioned briefly earlier. I shall first describe the bad experience I continue to have with gateway health, as I am currently on probation in rhode island on two charges, one which expires in September, the other expires in December, and I have been court ordered to undergo mental health counseling on the former sentence, which has become a frequent practice in rhode island that people like myself who do not have a major mental illness are asked to undergo this as a preventative measure, yet it only has created more problems for those undergoing the counseling. I had mentioned earlier how L&M had worked with fatima hospital to get me discharged, especially after RI mental health advocate Jackie Burns learned how I was behaving violently as a result of the drugs given to me at fatima, and noting prominently that I had not been violent until given those drugs worked with fatima on psychiatric referrals. The staff at fatima made me an appointment with someone at gateway in Johnston before L&M could respond, and L&M advised me to at least visit them, and if things became bad they would work on finding another referral. Once at gateway the doctors were over insistent on my taking drugs even before I had signed my releases. Once I signed the releases I knew the doctors at gateway were lying, as they claimed that Dr. Robin had prescribed medication for me when in fact he never had, partly because of my physical health issues, and that they obtained my records from the providence center, when in fact I had obtained all my records from there in 2007, nine years after I terminated my services with them. The only reason I remained with gateway was I ended up on probation in April 2015, and part of the terms was court ordered counseling, and the staff at L&M only said to contact them for a referral if problems persisted with gateway, and as they have I brought them to Dr. Luk's attention. Even though he does not have all my medical records yet, he did note that gateway was not working with ALL my doctors and that after spending five days doing an emergency move after walking from Stonington to Richmond on the Sunday before Memorial Day Dr. Luk noted that gateway should have examined me more thoroughly.

I should also note the treatment at fatima I received there prior to my bad experience at gateway had been the most malicious I have yet received as a adult. I noted earlier how a

Cranston detective had lied to do an emergency certification on me, and dr.s veronica matthews and bill ottowicz would not allow me to sign medical releases for essential information. When dr. matthews filed a mental health court petition it occurred around the same time she had to leave fatima hospital. Not only did dr. ottowicz continue her petition he blatantly lied in court, even claiming my being shot in the head in July 2002 was a delusion, despite the fact that the bullet wound on my nose is visible once my prescription glasses are removed, and I had to have the other would operated on by Dr. Hamid Esbah in Stoneham, MA on September 27, 2012 when it became infected, and I am currently working working with Dr. Mohammed Mobasherat of Medford, MA as I require specialized followup care. As it turned out I was not the only patient who experienced maltreatment by dr. ottowicz, as another patient, a paralyzed Vietnam veteran named Craig Sampson who had served with Rob Simmons, had been treated so badly that he and I talked with other patients about notifying our next of kin if we were to die, and I notified Rob of what I and Craig experienced when I saw him again in October 2015. As it turned out the deplorable treatment I, Craig, and others received at fatima led to that hospital being sold, and a check of their website shows that ottowicz and matthews are no longer there, and I already detailed how Dr. Hilliker, then later Dr. Furman agreed that I received unnecessary treatment there. However as a result I have continued to experience violent palpitations, and narcoleptic attacks, and my vision has become worse.

Prior to that I had another involuntary experience at roger williams hospital in providence on May 3, 2014. I had been swarmed by the ppd based on malicious lies they had spread about me, even claiming I was homeless when I was living in Watertown, MA. Once at roger williams dr peter kirk refused to deal with the staff at L&M regarding my records and had me restrained, then drugged. Once on the unit Dr. Findley was able to verify my address in Watertown and prove that the ppd acted on lies, and had me released, however I continued to have adverse effects from those drugs.

Even though the other bad mental health experiences I had mentioned above were brief the bad treatment I received as a juvenile needs mention. In 1991 my stepdad had me see the staff at south shore mental health around the time my biological grandmother/adoptive mother was dying, and the staff there recommended I keep seeing them. In October 1992 when facing assault charges I was placed in bradley hospital, where dr grapentine and dr neeper put me on a thorazine treatment which almost killed me, partly because they neglected to note the behaviors of my stepdad and biological father, the latter having a lengthy criminal history, much of it drug related, in New York, Vermont, Connecticut, and Rhode Island. It was the interventions first of my teachers at Waterford High School in 1993, then when my stepdad placed me in RI DCYF custody the actions of Dr. Alan Mark at the Kent Center and Dr. James Greer at the Providence Center that determined that the problems was due to my being in a hostile environment caused by my stepdad, and that treatment was unnecessary as I suffered from no major mental illness.

Also I received malicious treatment to my eyes as a juvenile from dr. francis gencerella, who from 1993-5 deliberately treated the wrong eye. This mishap was caught by Dr. Harry Pass of Providence, in 1998, and as a result I have been receiving a disability check solely for this visual mishap, and I continue to use Dr. Pass's clinic.

Now I will describe my concerns about Yale-New Haven. In April 2014 I had to get a former classmate of mine under control who was overintoxicated, and part of it involved telling her I would find out what happened to an elementary school High Incentive teacher we had, Joanne Holberton, partly as many had not seen her in almost two decades and many assumed she was still alive. Finding her obituary was a shock. I had known about her heart transplant and her

retiring after her husband died, however the fact that she was maltreated by assisted living/daycare staff, promised excellent treatment at Yale New Haven, and not only did not get it but due to maltreatment at YNH died there on June 20, 2001. It should be noted that Joanne was a direct descendant of Roger Williams and started RRI's first High incentive program for elementary school students, and could not get essential treatment in RI. Just as shocking was the fact she died exactly ten days after my fiancée was murdered by a doctor and she was buried in a location I had passed by thousands of times without realizing she was there, and only located her burial spot because of her husband's WWII service record. When I broke the news to our former classmates they shared my distress.

I have also felt unsafe and insulted while on Yale campus by the behavior of the students and faculty. There the students regularly ride bikes, skateboards, scooters, and other objects into people with clear physical disabilities and nothing is done to stop them. When attending a conference at the Middle East studies dept the staff had to separate me from a professor who made a slanderous remark about one of my ancestors, despite the fact the speaker had studied under my former dept. Head at Brown and noted it during the conversation leading up to that confrontation. If one thinks I am alone in feeling this way consider the fact that few people venture onto Yale campus because they feel unsafe there.

In conclusion, the treatment I have received at L&M has been excellent, partly because whenever something happens they work to fix the issue. This makes them unique in Rhode Island and is one reason for the patient overload there, specifically people fleeing the deplorable treatment in the rest of the state. I was glad to learn that L&M is upgrading its info sharing network to prevent me and other people experiencing medical mishaps. I do express concern that L&M in Rhode Island has subcontracted with South Shore, as many continue to get horrendous treatment there, and would be better sending people to New London for evaluations, as the staff there are more professional. Were L&M to merge with Yale New Haven that would give YNH a presence in a community bitter at their maltreatment of a beloved teacher. Even though L&M would get immediate cash relief from YNH, it would not address the underlying issues and cause long term damage.

Ms. Kimberly Martone
Director of Operations
Office of Health Care Access

Attorney Kevin Hansted
Hearing Officer
Office of Health Care Access

Dr. Pino, Ms. Martone, Attorney Hansted:

The undersigned constitute a majority of the New London City Council. We write to urge you to ignore the September 8 expiration of the Federal Trade Commission's approval in your deliberations on the proposed acquisition of L+M Health Corporation by the Yale New Haven Health Services Corporation and the merger of L+M Physicians Association into Northeast Medical Group.

Yale CEO Marna Borgstrom told the media that if the state doesn't approve the proposed takeover of our community hospital immediately, she'll have to spend \$250,000 getting re-approval from the federal government, and that will hurt patient care.

The FTC's approval is expiring for one reason only: Ms. Borgstrom and L+M Health CEO Bruce Cummings have stonewalled the Office of Health Care Access for 8 months, refusing to produce price data from the two hospitals so you and the public can understand the potential threat to consumers' wallets.

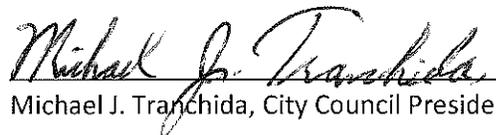

Yale says the data doesn't exist, and they wouldn't produce it anyway, even though their prices become public next year. The first claim lacks credibility. The second insults patients who depend on L+M.

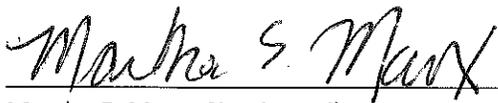

Renewing FTC approval takes all of 30 days, and the deal sailed through last time. As for spending \$250,000 so you can make sure we won't face price gouging, Yale can afford it – that's less than one month of Ms. Borgstrom's \$3.6 million annual compensation.

We also have unanswered concerns that Yale refuses to guarantee there will be no future service cuts, that most of Yale's supposed \$300 million "investment" is to be generated by L+M's own future profits, and the lack of specifics on how they will spend whatever they do invest. Finally, Yale's continued insistence that L+M will be locally controlled, when Mr. Cummings' sworn testimony and the plain language of their proposed bylaws directly contradict these claims, remains a mystery.

In the end, L+M and our community may benefit from an acquisition. But far too many important questions remain. The future of our hospital and health system is too important to be rushed. OHCA should insist on seeing all the data before making a decision, and take whatever statutory time is necessary to thoroughly evaluate all the information before it. Let Yale worry about the FTC.

Attorney Kevin Hansted
Hearing Officer
Office of Health Care Access
410 Capitol Avenue
PO Box 340308
Hartford CT 06134

Dear Dr. Pino, Ms. Martone, and Attorney Hansted:

I am writing to express my appreciation for your consideration of the proposed affiliations of Yale New Haven Health Services Corporation with the L+M Health Corporation and Northeast Medical Group with L+M Physicians Association. You may recall that I testified at the first day of your public hearing in New London. I hope your deliberations, so critical to the delivery of healthcare in our city and region and to the future of our community hospital, will not be influenced or rushed by the September 8 expiration of the Federal Trade Commission's approval of the affiliation.

I am hopeful that an affiliation between Yale-New Haven and L+M will only strengthen the delivery of healthcare in the region and benefit our community hospital. However, I believe the intervenors have raised valid questions that should be answered and significant concerns that must be resolved by your commission. Evaluating the terms of the proposed affiliation is too important to be rushed.

Sincerely,

Michael E. Passero
Mayor

TESTIMONY RE: PROPOSED MERGER OF YALE NEW HAVEN HOSPITAL WITH L+M HOSPITAL

1. **THANK YOU.** The Arc New London County **thinks the panel for the opportunity to offer testimony.**
2. **WHO WE ARE.** The Arc New London County is a **64-year-old, grassroots agency in Southeastern Connecticut founded by families to support loved ones with Intellectual and Developmental Disabilities (I/DD).** Driven by a philosophy that every person deserves full inclusion, **The Arc walks with people as they live their best lives as independently as possible saving millions of taxpayer dollars each year.** Our sphere of influence – families served, employees, volunteers and Board members – number approximately 2,000 people in New London County.
3. **HEALTH AND WELLNESS.** **Of critical concern to The Arc NLC is the health and wellness of people with I/DD in Southeastern Connecticut.** *Healthcare supports for the vulnerable residents of SE CT must be measurably enhanced by this merger.* Special populations can be challenging in several respects: Healthcare providers too frequently are untrained in supporting fragile populations whose challenges can present physically, emotionally and behaviorally. It is essential that demonstrating a data-driven suitability and preparedness to serve vulnerable people, specifically people with I/DD, be a critical criterion for approval of this merger.
4. **NONPROFIT HOSPITALS AND COMMUNITY WELFARE.** The first hospitals in the United States were for-profit enterprises, established by doctors to serve wealthy clients. **As an understanding of public health, sanitation and prevention evolved, nonprofit hospitals were established to serve the public good.** Among the critical services nonprofit hospitals provide to a community:
 - **Community health.** Nonprofit hospitals are less likely to engage in turnkey services, shortening stays inadvisably for quicker profit.
 - **Community research.** Nonprofit hospitals are more likely to invest in research to find cures for disease.
 - **Community well-being.** Nonprofit hospitals readily serve patients whose services are Medicaid reimbursed and provide other critical supports such as community investment, rate caps to hedge against runaway costs, regional economic stability, jobs and facilities investment.

Regrettably, over the last two decades, nonprofit hospitals have increasingly found it necessary to compete with for-profit entities to survive, behaving more like for-profit hospitals. For this reason, the above concerns require established remedies that are measurable, enforceable and ongoing to ensure that this merger benefits New London County and its residents rather than the deal-makers at the top of the healthcare food chain.

5. **SOUTHEASTERN CONNECTICUT’S ECONOMIC WELL BEING. As one of the wealthiest states in America with the second-richest capital city in the nation, Connecticut will not be better off if this partnership does not leave New London County better off economically. As one of America’s 10 most economically distressed regions, New London County must benefit by this merger in the following, data-driven ways or the merger cannot and should not be permitted to happen: 1) A significant number of new, quality jobs must be created and maintained. 2) Demonstrated facilities investment in the region must be a part of this plan; 3) A demonstrated commitment to investment and wellness for the region for the next decade must be provided by means of a written plan. Penalties for falling short of these goals must be clear, enforceable and implemented as appropriate.**

Kathleen Stauffer, MPA
Chief Executive Officer
The Arc New London County

Office of Health Care Access
Proposed L+M Health Care and Yale New Haven Health Affiliation
Public Hearing
July 11, 2016

My name is Catherine Zall and I serve on the L+M Healthcare Board. I am here today, however, in my capacity as the Executive Director of the New London Homeless Hospitality Center. In this capacity I have had the opportunity to see first hand the multiple health care challenges that face our neighbors experiencing homelessness. We deal every day with individuals with serious unaddressed health issues often made more acute by homelessness. Every day we also see the precious health care resources that are ineffectively used when people receive high quality medical care but cannot follow up on that care due to the challenges of homelessness.

We are already working with L+M Hospital to address multiple aspects of this issue. With funding from the hospital, we have established a special respite section of our emergency shelter that provides people facing both homelessness and a serious health crisis with access to emergency shelter specifically designed to meet their needs. We are jointly giving people a setting conducive to recuperation, helping people connect to follow-up medical care and providing a setting where people can follow the discharge instructions they receive on release from the emergency room or inpatient care.

This effort represents an important start toward improving health outcomes for a very underserved population. But there is so much more that needs to be done. Drawing on the growing body of evidence generated through population health research, we need to use data to identify individuals experiencing homelessness who could benefit from increase health engagement before they end up in an acute crisis requiring inpatient or emergency room care. We need to apply best practices in reaching people who have chronic conditions to be sure they have access to the basic resources they need to maintain health. We need an even more in-depth partnership between housing and health care providers to address the social determinants of health.

All of these efforts—respite and other health interventions—require access to sophisticated analytical tools and knowledge of population health interventions. Standing alone L+M Hospital has access to some of this expertise. The proposed partnership with the Yale New Haven Health System, however, would allow access far superior support in the effort to improve health outcomes. With help from Yale New Haven, L+M could more effectively utilize data and population health models to address health disparities thereby improving lives and reducing unnecessary costs.

A deeper partnership with Yale New Haven would also streamline care coordination as many of our guests experiencing homelessness touch both the L+M Hospital and the Yale health systems. Being part of a bigger system would allow us

to more effectively collaborate with colleagues in New Haven to test new models of delivering care and develop new best practices that could improve health outcomes across the state for people experiencing homelessness. Finally the proposed affiliation could free up additional community benefit resources that could, in turn, be invested in community based health improvement efforts.

Our neighbors experiencing homelessness need access to new tools to improve health outcomes. We all need to deliver health care more cost effectively by intervening earlier and improving continuity of care. The proposed affiliation would help achieve that goal. I urge the Office of Health Care Access to support the proposed affiliation.

Thank you.

**Statement to the Office of Health Care Access
Re: CON application regarding Lawrence & Memorial Healthcare and Yale New Haven
Health system**

July 11, 2016

Hello. My name is Jack Callaci, I live in Cranston, Rhode Island and I represent the employees of Westerly Hospital. I am here to state in the strongest and most unequivocal terms our support for the affiliation of Lawrence and Memorial Healthcare that includes Westerly Hospital with Yale-New Health System. I would like to make three major points.

First, this is not about this one transaction before you. The overwhelming pressures and trends nationwide in the healthcare industry including insurance companies, hospitals, visiting nurse services and doctor practices is towards affiliations and consolidations. The evidence of this is abundant here in Connecticut, in my home state of Rhode Island and around the country. The parties to this affiliation are not creating the nationwide pressures and trends. They are responding to them as best they can.

I wish that the trends did not exist and that we could return to a time of free standing nonprofit hospitals serving each community. Whether we like it or not that time is long gone. So the question is not, in my opinion, whether we can stop this particular transaction and roll back the clock, we can't, but what is the best way for Lawrence and Memorial Healthcare and Westerly Hospital to address these overwhelming pressures.

That brings me to the second point. If this proposal is killed, what is the alternative and is that alternative better than what is before us today? Killing this proposal does not mean that Lawrence and Memorial Healthcare and Westerly Hospital will remain as is. It only means that this particular option is foreclosed. Look at the alternatives out there. I am sad to report on many of the alternatives from our own experience.

Prospect Medical Holdings is about to purchase several hospitals in your state. They are a for profit, out of state entity backed by a venture capital firm. They are aggressively expanding in the east. In Rhode Island, they have reneged on agreements made after demanding and getting tax breaks and governmental benefits. You saw the article in the Manchester newspaper demonstrating the poor quality of care Prospect California Hospitals provide including quality concerns so severe that medicare closed some of their hospital units. Prime Healthcare also a California based for profit expanding in the East coast was recently been indicted for Medicare fraud. Steward Health Care Systems in Massachusetts closed a hospital after agreeing not to do so and have left a hospital and its community in the lurch by endless delays, endless demands on

top of demands and then finally deserting the hospital and its community without notice. My point here is this. Hospital consolidations are going to continue. So the issue is what is the best agreement to make?

I believe that an affiliation with a non-profit, Connecticut based entity with a Board that has members based in our communities and the standing and record Yale-New Haven Health Systems has is by far the best choice.

I have read about and listened to the concerns raised by those opposed to this affiliation. I think many or all of the concerns are legitimate and well thought out. It is those very concerns that lead me to say that those concerns are better addressed in an affiliation such as the one before you rather than killing this affiliation and taking the chances with another entity down the road. Again, perhaps this affiliation can be sunk. But the pressures to affiliate somewhere will not go away. The pressures in fact will build. Don't take my word for it. Look around your state, Rhode Island, Massachusetts and nationwide.

The third and last point I want to make is that with whom you affiliate makes all of the difference in the world. It was only a few years ago that sadly, in my opinion, the Westerly Hospital entered bankruptcy and ceased being the free standing hospital it was. Lawrence and Memorial Healthcare has made good and continues to make good on every commitment they made to the Westerly Hospital, the State of Rhode Island and the Westerly community. Many of those commitments have several more years to run and Yale New Haven Health System committed in writing to honor those commitments. I mentioned earlier Prospect has reneged on its commitments, Steward closed a hospital they committed to keeping open and Prime has been indicted for Medicare fraud.

If one thinks this is a matter of killing this affiliation and freezing all of the national trends in the healthcare industry in this relatively small community, good luck. But if you believe that the industry trends are bigger than all of us and accelerating as I do, then the challenge is what is the best affiliation we can effectuate and to my mind there is no doubt whatsoever that the affiliation of Lawrence and Memorial Healthcare and Westerly Hospital with Yale New Haven Health System is by far the best option for our respective communities and it should be supported.

Sincerely,

John V. Callaci

P.O. Box 340308
Hartford, CT 06134

Dear Commissioner Pino,

I am writing in regard to the proposed affiliation between Yale New Haven Health Services Corporation (Yale New Haven) and Lawrence & Memorial Hospital (L&M) – Docket No. 15-32033-CON – now before the Office of Health Care Access (OHCA) in the Department of Public Health. The Comptroller's Office administers the state employee health care plan, providing health coverage to over 200,000 members. Any cost increases or service reductions associated with the proposed affiliation between Yale New Haven and L&M will directly impact the state health care plan and its members. I am calling on OHCA to use its authority under the Certificate of Need (CON) review process to ensure that the proposed affiliation between Yale New Haven and L&M results in the retention and expansion of medical services in the L&M service area and does not increase total health care costs.

As you know, Yale New Haven has the largest market share of health care services in the state and is the dominant health system along the Connecticut shoreline. Yale New Haven's significant market share is one factor that has enabled the system to command some of the highest reimbursement rates in Connecticut. The affiliation with L&M will further expand Yale New Haven's market share along the Connecticut coastline. The evidence is clear, greater market concentration of health care providers and hospital facilities results in higher medical costs due to increased reimbursement rates.¹ The affiliation of Yale New Haven and L&M will result in greater bargaining power for Yale New Haven as a whole and L&M particularly.

To Whom It May Concern:

I write today to strongly support the proposed affiliation between L&M/Westerly Hospitals and Yale New Haven Health System. As a member of the local community, I have personally witnessed the extraordinary work performed at L&M for friends, coworkers, and family members. As president of a local community bank that serves the same market area as L&M and Westerly, I have personally witnessed the tremendous impact the hospitals have on our local community, both economically and socially. As a member and officer of the L&M Healthcare's Board of Directors, I have witnessed personally the impact of changes in the national and in-state healthcare environment at large on our hospitals, and believe strongly that the key to our success in the future is through this affiliation.

I cannot put into words how impressed I have been with everyone I have come into contact with at L&M and Westerly hospitals. They are professional, compassionate, and innovative. They are dedicated first and foremost to their patients. In spite of their extraordinary efforts, the forces of change in healthcare that they face every day are such that going it alone seems impossible. I believe that the combination of two well-managed, locally focused hospitals, with access to the talent and resources available to a world-class organization like Yale New Haven Health is a powerful combination and a role model for the future of healthcare.

I strongly urge you to approve this affiliation as soon as possible to help strengthen our local healthcare system and our community.

Sincerely yours,

B. Michael Rauh, Jr.
Resident of Mystic, CT
President & CEO, Chelsea Groton Bank
Secretary/Treasurer, L&M Healthcare

Yale New Haven and L&M have stated that the increase in bargaining power will be muted by component contracting in the Yale New Haven Health System, whereby each affiliated hospital facility negotiates reimbursement rates with payers independently. The extent to which separate contracting across facilities will reduce the otherwise clear increase in bargaining power for L&M as a member of Yale New Haven is unclear and may require additional oversight and guarantees.

Yale New Haven and L&M also state that the improved care integration and care management that would result from the affiliation will reduce overall health care costs by changing utilization patterns. Improving care coordination and care management has real potential for improving health outcomes and reducing overall health care costs, however, it is yet unknown if the integration of Yale New Haven and L&M will contribute to better care coordination and management for patients in the L&M service area.

Connecticut statute gives OHCA the ability to place contingent requirements on the approval of any CON application concerning hospital acquisitions or affiliations. An approval of the proposed affiliation should include conditions that ensure health care consumers in Southeastern Connecticut are protected from large health care cost increases driven by higher reimbursement rates at L&M and affiliated facilities.

Essential health care services in the L&M service area must also be protected through the CON process. Yale New Haven and L&M have indicated that no reduction in clinical services is planned as a part of the affiliation, and in fact there are plans to expand certain clinical services at existing L&M facilities. Recently, another major hospital system, Hartford Healthcare, drastically reduced services at Windham Hospital in Willimantic. The reduction in services at Windham Hospital has created significant concern and discontent in the community. Area residents and clinical staff at L&M have expressed concerns that the affiliation with Yale New Haven may eventually result in a similar outcome in the L&M service area. Yale New Haven has stated that their hospital affiliation structure differs from Hartford Health Care as evidence that a similar outcome is less likely. Nonetheless, OHCA can use its regulatory authority to place conditions on the approval of the CON that ensure the planned expansion in services occur and existing critical health care services are maintained.

The costs and access concerns the Yale New Haven and L&M affiliation raise should be directly addressed to the satisfaction of OHCA, the Commissioner of the Department of Public Health and the Attorney General in order for the affiliation to proceed. Separate negotiations by facility are not enough to control the increase in reimbursement rates that result from provider consolidation; OHCA will need to use other mechanisms to protect consumers from unreasonable cost increases. Similarly, OHCA should insist upon adequate protections that will ensure continued and expanded access to essential clinical services by residents in the L&M service area.

The proposed affiliation between Yale New Haven and L&M presents both potential benefits and potential risks for residents in the L&M service area. I am not advocating for the approval or denial of the CON application in front of OHCA, but -- should the application merit approval -- I am advocating any such approval be contingent upon necessary guarantees and protections to protect health care consumers from the risks of increased health care costs and ensure the retention and expansion of health care services for residents in the L&M service area.

I thank you for your consideration.

Sincerely,

I am writing concerning the proposed affiliation between Lawrence + Memorial Hospital and Yale Health Systems.

We have been affiliated with Yale Stroke Service for over eight years. When we began, there was no stroke service, and now we have one of the leading primary stroke centers in the State of Connecticut. Currently, I am the director of the stroke service.

Our relationship has been extremely positive. I note that people have concerns that we be losing patients and business to Yale. Our affiliation with Yale has had the opposite effect. We currently keep 90% of patients that have had strokes at L+M Hospital. The affiliation has increased the quality of medical care for strokes with enhanced laboratory services, x-ray services, interventional radiology and increased rehabilitation services.

I can only speak positively of our affiliation with Yale and encourage that we proceed.

Daniel Moalli, MD
Director, Stroke Service

15 HEARING OFFICER KEVIN HANSTED: Good
16 afternoon, everyone. Can everyone hear me? Is this
17 working? In the back, can you hear me okay? Good.

18 This public hearing before the Office of
19 Health Care Access, identified by Docket Nos. 15-32032-
20 CON and 15-32033-CON, is being held on July 11, 2016 to
21 consider two applications.

22 One is for Northeast Medical Group, Inc./L
23 & M Physician Association, Inc., the acquisition of L & M
24 Physician Association, Inc. by Northeast Medical Group,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 and the second application is Yale-New Haven Health
2 Services Corporation/L & M Corporation for the
3 acquisition of Lawrence & Memorial Corporation by Yale-
4 New Haven Health Services Corporation.

5 This public hearing is being held pursuant
6 to Connecticut General Statutes, Section 19a-639a, and
7 will be conducted as a contested case, in accordance with
8 the provisions of Chapter 54 of the Connecticut General
9 Statutes.

10 My name is Kevin Hansted, and I have been
11 designated as the Hearing Officer for both of these
12 matters.

13 The staff members assigned to this case
14 are Kaila Riggott, Steven Lazarus and Brian Carney to my
15 right. The hearing is being recorded by Post Reporting
16 Services.

17 In making its decision, OHCA will consider
18 and make written findings concerning the principles and
19 guidelines set forth in Section 19a-639 of the
20 Connecticut General Statutes.

21 Yale-New Haven Health Services Corporation
22 and Northeast Medical Group have been designated as
23 parties in this proceeding.

24 In addition, the Intervenors in this

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 matter, in both of these matters, with full rights are
2 AFT Connecticut, Connecticut Citizen Action Group, Unite
3 Here Connecticut, National Physicians Alliance in
4 Connecticut, Connecticut Health Policy Project, United
5 Action Connecticut and New England Health Care Employees,
6 District 1199, SEIU, and, again, they've all been
7 designated as Intervenors with full rights.

8 At this time, I will ask staff to read
9 into the record those documents already appearing in
10 OHCA's two Table of the Records.

11 All documents have been identified in the
12 Tables for reference purposes. Mr. Lazarus?

13 MR. STEVEN LAZARUS: Good afternoon.
14 Steven Lazarus. For the record, we're going to enter
15 Exhibits A through U for Docket No. 15-32032-CON and
16 Exhibits A through CC for Docket No. 15-32033-CON.

17 HEARING OFFICER HANSTED: Counsel, would
18 you identify yourselves for the record, and let me know
19 if you have any objections to either table?

20 MS. JOAN FELDMAN: Joan Feldman on behalf
21 of the Applicants. I have no objections.

22 HEARING OFFICER HANSTED: Thank you,
23 counsel.

24 MR. HENRY MURRAY: Henry Murray for the

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 Intervenor, and I have no objection.

2 HEARING OFFICER HANSTED: Thank you,
3 counsel.

4 MR. MURRAY: Mr. Hansted?

5 HEARING OFFICER HANSTED: Yes?

6 MR. MURRAY: May I be heard for one
7 minute?

8 HEARING OFFICER HANSTED: Yes.

9 MR. MURRAY: We filed this morning with
10 your office a pre-filed testimony, which was
11 inadvertently left out of our filing, and we would ask
12 that it be included in the record or as an after-filing
13 document.

14 HEARING OFFICER HANSTED: No, we will
15 include that in the record. Mr. Lazarus, was that one of
16 the ones you included?

17 MR. LAZARUS: No, it will be included.

18 MS. FELDMAN: Attorney Hansted, I would
19 like to make an objection. I received that pre-filed
20 testimony at 10:15 this morning, 11 days after it was
21 supposed to be filed, and I believe it's irrelevant, in
22 that, at the end of the pre-filed testimony, it was
23 stated it was for the purpose of the Governor's Health
24 Care Cabinet, so I don't really believe it's relevant to

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 this proceeding, and it doesn't comply with OHCA's rules.

2 HEARING OFFICER HANSTED: Okay, counsel,
3 I'll give it the weight it's due, therefore, your
4 objection is overruled, so we'll add it to the record.

5 MS. FELDMAN: Thank you.

6 HEARING OFFICER HANSTED: You're welcome.
7 And, this evening, we're doing things a little bit
8 different. We are going to, given the large amount of
9 public in the room, we are going to allow public comment
10 first.

11 We'll defer to any elected officials that
12 may be present. We'll let them speak first, and then
13 we'll go to the public comment sign-up sheets.

14 For those of you, who wish to speak,
15 please make sure that you've signed up on the sign-up
16 sheets that are outside of the room, because we will be
17 calling individuals up to speak in the order that you've
18 signed up.

19 After that, we will first hear the
20 Applicant's presentation under Docket No. 15-32033-CON,
21 followed by the Intervenor's presentation on that same
22 docket number.

23 Then, when those presentations are done,
24 I'll allow Cross-Examination by both parties. When that

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 is completed, we will hear from the Applicants on Docket
2 No. 15-32032-CON, followed by the Intervenors'
3 presentation on that docket number and Cross-Examination
4 to follow.

5 Upon completion of both of those docket
6 numbers, OHCA will have its questions. And, again, once
7 OHCA is completed with its questions, I'll allow another
8 public comment period.

9 Those folks that are giving comment in the
10 beginning of this hearing may not do so at the end of the
11 hearing.

12 At this time, I would ask any individuals,
13 who are going to testify here today, not including public
14 commenters, to please stand, raise your right hand, and
15 be sworn in by the court reporter.

16 (Whereupon, the parties were duly sworn
17 in.)

18 HEARING OFFICER HANSTED: Okay. Would all
19 those folks that were just sworn in please, one-by-one,
20 identify yourselves for the record?

21 MR. MURRAY: How would you like us to
22 start, Mr. Hansted? On this end?

23 HEARING OFFICER HANSTED: However you
24 wish. I'd like the Applicants to go first, though,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 please, Attorney Murray.

2 MR. BRUCE CUMMINGS: Bruce Cummings, the
3 CEO from Lawrence & Memorial Healthcare.

4 MS. MARNA BORGSTROM: Marna Borgstrom,
5 CEO, Yale-New Haven Health System.

6 DR. TOM BALCEZAK: Tom Balcezak, Chief
7 Medical Officer, Yale-New Haven Hospital.

8 DR. MONICA NOETHER: Monica Noether,
9 Economist with Charles River Associates.

10 MR. JOE CRESPO: Joe Crespo, Chairman of
11 the Board of Yale-New Haven Health System.

12 DR. ROSS SANFILIPPO: Ross Sanfilippo,
13 Lawrence & Memorial Healthcare Board.

14 HEARING OFFICER HANSTED: Do we have any
15 other folks on this side? I know there were some that
16 stood up. Just feel free to come up to the microphone
17 and just identify yourselves.

18 MS. FELDMAN: For this application?

19 HEARING OFFICER HANSTED: Yes, for both of
20 them.

21 MS. FELDMAN: Oh, for both.

22 HEARING OFFICER HANSTED: Do it all at
23 once.

24 MR. CHRIS LEHRACH: Chris Lehrach,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 President of the Lawrence & Memorial Medical Group.

2 DR. PRATHIBHA VARKEY: Prathibha Varkey,
3 CEO, Northeast Medical Group.

4 DR. ARNOLD DoROSARIO: Arnold DoRosario,
5 Chief Medical Officer, NEMG.

6 MR. KEITH TANDLER: Keith Tandler,
7 Executive Director Finance, Yale-New Haven Health System.

8 MR. SETH VAN ESSENDELFT: Seth Van
9 Essendelft. I'm the Chief Financial Officer for L & M.

10 MR. VINCENT TAMMARO: Vincent Tammaro,
11 Chief Financial Officer for Yale-New Haven Health System.

12 MS. GAYLE CAPOZZALO: Gayle Capozzalo,
13 Chief Strategy Officer, Yale-New Haven Health System.

14 MR. WILLIAM ASELTINE: William Aseltyne,
15 general counsel, Yale-New Haven Health System.

16 MS. NANCY LEVITT-ROSENTHAL: Nancy Levitt-
17 Rosenthal, Vice President, Yale-New Haven Health System.

18 DR. ALLEN HSIAO: Allen Hsiao, Chief
19 Medical Information Officer, Yale-New Haven Health
20 System.

21 MR. BRETT PERRONE: Brett Perrone,
22 Director of Financial Planning, Yale-New Haven Health
23 System.

24 MR. KEVIN MYATT: Kevin Myatt, Chief Human

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 Resource Officer, Yale-New Haven Health System.

2 MS. TINA DiCIOCCHIO: Tina DiCioccio, L & M
3 Hospital Corporate Controller.

4 MR. JIM PULLA: Jim Pulla, Deloitte
5 Transactions and Business Analytics.

6 MS. DONNA EPPS: Donna Epps, Vice
7 President, Human Resources, Lawrence & Memorial Hospital.

8 MR. MATTHEW TASSONI: Matthew Tassoni,
9 Deloitte Transactions and Business Analytics.

10 MS. SHRADDHA PATEL: Shraddha Patel,
11 Director of Planning, L & M Healthcare.

12 MS. AMY RICHARDS: Amy Richards, Director
13 of Planning, Yale-New Haven Health System.

14 MS. TARA ESTABROOKS: Tara Estabrooks,
15 Associate Director of Business Development for Yale-New
16 Haven Health System.

17 MS. AMANDA SKINNER: Amanda Skinner,
18 Executive Director of Clinical Integration and Population
19 Health, Yale-New Haven Health System.

20 DR. DANIEL RISSI: Daniel Rissi, Chief
21 Medical Officer, L & M Hospital.

22 MS. AUGUSTA MUELLER: Augusta Mueller,
23 Community Benefits Manager for Yale-New Haven Health.

24 MS. LYN SALSGIVER: Lyn Salsgiver, Vice

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 President for Strategic Planning and Community Health
2 Improvement for Yale-New Haven Health System.

3 MR. ART LINARES: Art Linares, State
4 Senator for the 33rd District.

5 MS. KATHLEEN McCARTY: Kathleen McCarty,
6 State Representative for the 38th District.

7 MR. ABE LOPMAN: Abe Lopman, Executive
8 Director of Smilow Cancer Hospital.

9 MR. STEPHEN GREENE: Stephen Greene, Board
10 Chair, Westerly Hospital.

11 MS. LISA KONICKI: Lisa Konicki,
12 President, Ocean Community Chamber of Commerce.

13 MR. JAMES MITCHELL: James Mitchell, L & M
14 Board Member.

15 MS. JANE LASSEN BOBRUFF: Jane Lassen
16 Bobruff, community member.

17 MR. TONY SHERIDAN: Tony Sheridan,
18 President of the Chamber of Commerce of Eastern
19 Connecticut.

20 MR. JACK CALLACI: Jack Callaci, United
21 Nurses and Allied Professionals.

22 HEARING OFFICER HANSTED: Okay, I think we
23 have everyone on this side. Attorney Murray, do you want
24 to do the same for your side?

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 Again, the folks that are here for public
2 comment, please do not identify yourself at this time.

3 DR. FRED HYDE: Fred Hyde for the American
4 Federation of Teachers.

5 MS. STEPHANIE JOHNSON: Stephanie Johnson,
6 President of the LPN Techs for AFT Connecticut
7 representing L & M Hospital employees and a sleep tech.

8 MS. ELLEN ANDREWS: Ellen Andrews for
9 Connecticut Health Policy Project.

10 MS. MARITZA BOND: Maritza Bond, Executive
11 Director for Eastern Area Health Education Center.

12 MR. JASON PELLETIER: Hi. I'm Jason
13 Pelletier. I am a shop steward for Local 217 Unite Here.

14 HEARING OFFICER HANSTED: Do you have
15 anyone else, Attorney Murray?

16 MR. MURRAY: Not on our list of witnesses,
17 Attorney Hansted.

18 HEARING OFFICER HANSTED: Okay, thank you.
19 At this point, we're going to go to -- actually, before
20 we get to the public comment section, Attorney Feldman,
21 did you want an opportunity -- I'm happy to give you an
22 opportunity to respond in writing to the pre-filed
23 testimony that was filed today with my office. Did you
24 want that opportunity?

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 MS. FELDMAN: No, thank you.

2 HEARING OFFICER HANSTED: Okay and, so, we
3 will go to the public comment section at this point, and
4 we'll start with the elected officials. I believe we
5 have a list up here.

6 And for those of you, who do not hear your
7 name called, just let us know once we get through the
8 sign-up sheet, and we can take you at that time.

9 MR. TOMAS REYES: Good afternoon. My name
10 is Tomas Reyes, and I'm representing Mayor Toni Harp from
11 New Haven. I serve as her Chief of Staff, and I'm going
12 to read a prepared statement, which I will then leave
13 with you.

14 I'm here on behalf of Mayor Toni Harp of
15 the City of New Haven to lend our strong support to the
16 proposed affiliation of Lawrence & Memorial Health with
17 the Yale-New Haven Health System.

18 As a city dedicated to building better
19 lives, we understand the value of developing and
20 sustaining strong working relationships with our
21 employers.

22 Over the years, we have cultivated a
23 healthy and productive working relationship with Yale-New
24 Haven Hospital and its more than 12,000 employees.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 We view this relationship as mutually
2 beneficial, acknowledging that a strong educational and
3 medical foundation has contributed to a stable economic
4 environment and has made New Haven a success story.

5 For its part, Yale-New Haven has stepped
6 up as a strong and consistent partner with the city and
7 the community. It has been a longstanding supporter of
8 important community-driven programs, such as New Haven
9 Promise, ConnCAT and New Haven Works.

10 Each of these initiatives provides
11 opportunity for residents of New Haven through access to
12 education and jobs for the future.

13 Additionally, Yale-New Haven has been an
14 advocate for the City of New Haven. It has sponsored
15 important programs that project the positive image of the
16 city to broader audiences, including their role as a
17 major sponsor of the Connecticut Open Tennis Tournament
18 and a founding partner of Market New Haven.

19 Yale-New Haven has been a member of our
20 community for nearly 200 years. It has grown with New
21 Haven and provided us with national recognition and local
22 access to exceptional health care.

23 It has been a catalyst for new development
24 and investment, such as the decision by Alexion to locate

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 their corporate headquarters in our city. We firmly
2 believe that a strong Yale-New Haven makes the City of
3 New Haven, itself, stronger.

4 Finally, we recognize that the current
5 environment has provided enormous challenges for health
6 care providers, like Yale-New Haven and Lawrence &
7 Memorial.

8 Uncertainty and complexity define the
9 future, and that is why affiliations, such as the one you
10 are considering today, are so important.

11 We are proud of our partnership, and we
12 are here today to support this affiliation. We ask the
13 Office of Health Care Access to approve this application,
14 and we urge you to do so in a timely manner. Thank you.

15 HEARING OFFICER HANSTED: Thank you.

16 MS. KAILA RIGGOTT: Bruce Flax.

17 MR. BRUCE FLAX: Thank you. Good
18 afternoon, members of the panel. My name is Bruce Flax.
19 I am the Mayor of the Town of Groton, the single largest
20 municipality in eastern Connecticut.

21 To say that ours is a diverse community
22 would be an understatement. We are proudly the Submarine
23 Capitol of the world, hosting a U.S. Navy Submarine Base,
24 the USS Nautilus Museum and the world's leading

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 manufacturer of nuclear submarines and the region's
2 largest employer, the Electric Boat Division of General
3 Dynamics, but there's much more.

4 The City of Groton is located within the
5 Town of Groton. So is the borough of Groton Long Point
6 and the well-to-do villages of Noank and Mystic.

7 The City has its own utility company and a
8 large division of Pfizer, the world's largest
9 pharmaceutical company, is also located here.

10 Different parts of our community are as
11 different as the busy mall line commercial strip in the
12 middle of our town is from the quaint little shops in
13 historic Downtown Mystic.

14 There are million-dollar homes along the
15 waterfront, and there is subsidized housing. We are a
16 community of marinas and a long-anticipated new water
17 taxi.

18 We have education at every level, from our
19 seven elementary and magnet schools to a technical
20 school, Fitch High School, home of the undefeated, number
21 one ranked Falcon's girls' softball team, to the Avery
22 Point branch of the University of Connecticut.

23 I could spend a lot of time going on about
24 so many of the other interesting and different qualities

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 of our community, but I'll stop there to talk a little
2 bit about what the vast majority of us, young and old,
3 middle age, black, white, Asian and Latino, wealthy and
4 those struggling to make ends meet, organized labor and
5 management at major industry and small business, have in
6 common.

7 We receive our health care at Lawrence &
8 Memorial. Whether it's L & M's Pequot Health Center just
9 off Interstate 95 here in Groton, one of L & M's primary
10 care practices also located in Groton, the main L & M
11 Hospital campus across the Thames River in New London,
12 where four of my children were born, Westerly Hospital
13 just across the border in Rhode Island, or from the
14 Visiting Nurses Association based in nearby Waterford,
15 most of our town's approximately 40,000 residents rely on
16 L & M for their care.

17 So, as the Mayor of this town, I get
18 concerned when I learn that our region's leading health
19 care provider and one of its leading employers is
20 experiencing financial difficulty.

21 As a town suffering through millions in
22 State funding cuts ourselves, we know the challenges
23 associated with this kind of urgent distress, especially
24 when it's something over which we have little or no

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 control.

2 We know that, in L & M's case, this
3 downward financial trend cannot continue, especially if
4 those, who have relied on L & M for health care for many
5 years, expect to find the same level of programs,
6 services and staffing available to them, as have been
7 available for generations.

8 L & M and Yale-New Haven are already
9 affiliated in six different clinical areas; cardiac,
10 cancer, stroke, pediatrics, pediatric emergency and
11 neonatal care.

12 Some of their physicians practice here,
13 and some of L & M's practice there. A full affiliation
14 would make great sense from every perspective; access to
15 and range of clinical offerings, financial stability,
16 logistical and strategic.

17 I hope you will concur that this
18 affiliation between two quality health care systems is in
19 the best interests of their employees and the patients
20 they treat from their respective service areas. Thank
21 you.

22 HEARING OFFICER HANSTED: Thank you.

23 (Whereupon, the public spoke.)

24 HEARING OFFICER HANSTED: At this point,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 we have an individual, who needs to testify on behalf of
2 the Applicants and needs to leave, so I'm going to allow
3 that. Attorney Feldman, if you want to give your opening
4 statement on the applications and then present your
5 witness?

6 MS. FELDMAN: Thank you, Attorney Hansted.

7 HEARING OFFICER HANSTED: You're welcome.

8 MS. FELDMAN: As OHCA is well aware,
9 during February, Governor Malloy issued Executive Order
10 No. 51, which directed OHCA to either delay a decision on
11 this application or to make three adverse findings with
12 respect to this application.

13 The Applicants believe that the Executive
14 Order 51 is void and unenforceable, as it relates to this
15 application, and we strongly believe that the application
16 should be considered and judged against the proper
17 legislatively-prescribed criteria, along with the
18 testimony that you will hear today.

19 We've heard now almost four hours of oral
20 testimony, and what is very clear is that much of the
21 public testimony and the position of the Intervenors is
22 very consistent with the position of the Applicants.

23 The Applicants are very invested in making
24 sure there is access in the L & M community, diversity of

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 providers in the L & M community, that there are
2 efficiencies, that there is a commitment to quality care.
3 None of that is divergent from what we heard today, so I
4 really do not think that there's much controversy with
5 respect to this application.

6 That having been said, there are multiple
7 agendas here that are completely unrelated to this
8 proceeding and the issues at hand.

9 It is my hope that this proceeding can
10 focus on the issues that OHCA is legislatively mandated
11 to consider in determining whether or not to grant this
12 application. Thank you.

13 HEARING OFFICER HANSTED: Thank you.

14 MS. FELDMAN: Mr. Crespo, who is Chairman
15 of the Board of Yale-New Haven Health, would like to give
16 his pre-filed testimony.

17 HEARING OFFICER HANSTED: Okay, thank you.

18 MR. CRESPO: Thank you. Good afternoon,
19 Attorney Hansted and members of the OHCA staff.

20 HEARING OFFICER HANSTED: Good afternoon.

21 MR. CRESPO: My name is Joe Crespo, and
22 I'm Chairman of the Board of Trustees of Yale-New Haven
23 Health System. I'm a volunteer and dedicate a lot of the
24 time to the governance of the Yale-New Haven Health.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 First of all, I would like to adopt my
2 pre-filed testimony, as you have it.

3 HEARING OFFICER HANSTED: Thank you.

4 MR. CRESPO: The Boards of our hospital
5 are composed of community, business and position leaders
6 from the communities that they serve. Our Boards are
7 diverse, active and engaged.

8 These Boards are critical to Yale-New
9 Haven Health's success, as their input helps frame our
10 strategies.

11 Yale-New Haven Health and L & M are
12 committed to maintaining a local Board that ensures the
13 needs of its community, that the needs of its communities
14 are represented, as well, and well-served when
15 considering both local and system strategies.

16 Now I want to clarify one point. I
17 understand that there may be some confusion about the
18 governance of L & M if this affiliation is approved, and
19 I would like to take this opportunity to explain our
20 governance philosophy.

21 As in the case with all the hospitals in
22 Yale-New Haven Health, one Board member will be appointed
23 by the system to the local Board, and that Board member
24 will have one vote, just like the rest of all of the

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 members on the L & M Boards.

2 While some decisions that affect the
3 entire system will be made by the Yale-New Haven Health
4 Board, most significant decisions, including regarding
5 clinical problems, will require L & M approval.

6 L & M has chosen to form a relationship
7 with Yale-New Haven Health that will allow us to address
8 community needs, ensure continued access to leader
9 services, and enhance the efficiency of healthcare
10 systems in the State.

11 Therefore, I urge you to approve this
12 application and to allow Yale-New Haven Health and L & M
13 to forge a partnership that will be truly beneficial for
14 all involved. Thank you.

15 HEARING OFFICER HANSTED: Thank you, Mr.
16 Crespo. And, at this point, I want to take a 15-minute
17 break, so please report back here promptly, so we can
18 continue the hearing in 15 minutes. Thank you, all.

19 (Off the record)

20 HEARING OFFICER HANSTED: Okay, we're
21 going to get going again here. Okay, Attorney Feldman,
22 if you would like to continue with your case in chief?

23 MS. FELDMAN: Thank you, Attorney Hansted.
24 Bruce Cummings would like to provide his pre-filed

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 testimony.

2 HEARING OFFICER HANSTED: Absolutely.

3 MR. CUMMINGS: Good evening.

4 HEARING OFFICER HANSTED: Good evening.

5 MR. CUMMINGS: Good evening, Attorney
6 Hansted and OHCA staff. I'd like to adopt my pre-filed
7 testimony as my own.

8 HEARING OFFICER HANSTED: Thank you.

9 MR. CUMMINGS: My name is Bruce Cummings,
10 and I am the President and CEO of Lawrence & Memorial
11 Corporation, which is the parent entity for Lawrence &
12 Memorial Hospital, the Westerly Hospital in Rhode Island,
13 the L & M Physician Association, and the Visiting Nurse
14 Association of Southeastern Connecticut, collectively
15 known as the L & M Health Care System.

16 On a personal note, I live in New London.
17 This has been my home for 11 years. L & M is my
18 hospital, and the L & M Medical Group is my physician and
19 that of my wife, and I'm happy to report that one of my
20 grandchildren was born at L & M two years ago, and number
21 two will be born this summer in August, so I'm grateful
22 to have this opportunity to speak with you and to convey
23 my reasons for recommending to you that it approve the
24 CON application now before you, allowing L & M Health

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 Care to affiliate with Yale-New Haven Health.

2 We've heard from a number of people in the
3 audience bandying about terms like merger, acquisition,
4 and, certainly, in particular, pejorative takeover, none
5 of which are applicable here in relation to L & M Health
6 Care and Yale-New Haven Health.

7 It is an affiliation. To be sure, you'll
8 hear later about a proposed merger between the L & M
9 Medical Group and the Northeast Medical Group. That is a
10 true merger, but, for L & M Health Care and Yale-New
11 Haven Health, it is an affiliation, not an acquisition.

12 The two entities have a long history of
13 clinical collaboration and support. We have
14 complimentary missions, visions, philosophies and values
15 around patient care and community service.

16 During the past 10 years, L & M has turned
17 to Yale-New Haven Health to provide a number of needed
18 services within the L & M primary service area to promote
19 access, a theme that you'll hear us articulate and
20 restate on a number of occasions about promoting access
21 in the areas of heart and vascular care, medical and
22 radiation oncology, pediatric and neonatal services and
23 neurosurgery and stroke.

24 You heard this afternoon from Dr. Brian

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 Cambi, who offered a case study around emergency and
2 elective angioplasty, a capability available in L & M by
3 virtue of our connection to the Yale-New Haven Heart and
4 Vascular Center, but I wanted to mention two others.

5 A Telestroke Program, we were actually the
6 first community hospital in Connecticut to develop and
7 implement such a program, and that, again, was made
8 possible, because of a relationship with Yale-New Haven
9 Hospital that has resulted in saving literally hundreds
10 of lives, and only late last year new pediatric
11 hospitalist service, at a time when most community
12 hospitals have abandoned completely offering pediatric
13 services, we moved in a different direction, thanks to a
14 relationship with Yale Children's Hospital, Yale-New
15 Haven Children's Hospital, that resulted in a team of
16 well-trained pediatric hospitalists coming to our
17 community and reestablishing hospital-based inpatient
18 pediatric care.

19 These clinical collaborations have not
20 been sufficient to address all of the challenges in
21 health care today.

22 Other market forces have created other
23 imperatives for L & M that make this proposal a necessity
24 rather than a luxury.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 As health systems undertake this
2 transition from a traditional fee-for-service or volume-
3 driven environment to a value-based or outcome-oriented
4 delivery system, they will need access to all the
5 components of a fully integrated health care delivery
6 model.

7 This shift that I'm describing requires
8 alternative care models and access to affordable capitol
9 to fund the new generation of technology and resource
10 development, along with data analytics, to improve the
11 health of the population served, a capability that simply
12 we do not have as a small community controlled health
13 system.

14 When you couple these imperatives with
15 aging infrastructure, a growing population of older and
16 sicker adults and demands for more effective medical
17 treatments and technologies, it becomes clear that the
18 challenges are daunting on many levels, not the least of
19 which is financial.

20 One significant driving force between L &
21 M's decision to affiliate with Yale-New Haven Health has
22 been our progressively declining financial performance
23 over the past three fiscal years.

24 During those past three fiscal years, L &

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 M has experienced a significant decline in its revenues.
2 This decline has been the result of many factors; the
3 State of Connecticut budgetary rescissions and the
4 Medicaid supplemental pool, along with hospital taxes
5 increasing.

6 This has gone in 2013 from a tax of \$1
7 million to \$18 million this past year, with about \$5
8 million restored late in the legislative session, so all
9 together an adverse impact of \$13 million on a one-year
10 basis.

11 There have been no updates, no payment
12 increases for Medicaid since 2008. Indeed, when I came
13 11 years ago to New London, L & M was paid about 65 to 70
14 cents on the dollar. Today, it's half that, and, at the
15 same time, the percentage of our patient population has
16 gone from around eight percent on Medicaid to more than
17 18 percent on Medicaid, a doubling of the population and
18 a halving of the payment levels.

19 We've seen the 75 percent reduction in
20 federal disproportionate share payments, payers
21 increasing the shift away from fee-for-service to value-
22 based payments, an unwillingness on the part of
23 commercial payers to bear the burden of insufficient
24 government funding, and, last, but not least, reductions

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 in inpatient hospital utilization. Put plainly, we've
2 seen a huge shift at virtually every hospital, especially
3 in community hospitals, on the part of Medicare moving
4 what used to be considered inpatient acute admissions to
5 observation status.

6 All of these factors have a cumulative and
7 detrimental impact on our financial status, and, in May
8 of this year, our bond rating was downgraded by Standard
9 & Poor from an A+ rating just three years ago to a triple
10 B+.

11 S & P's rating agency attributed three
12 factors to that downgrade; the Connecticut State Hospital
13 Tax, inpatient softness with a mix to these observation
14 patients, and a weakened balance sheet.

15 Unfortunately, our demand for capital to
16 meet our community needs to enhance access is the
17 greatest it has ever been.

18 Healthcare reform requires innovative
19 responses to meet the demands for higher quality care at
20 lower cost. L & M is without the capacity or the capital
21 to take on such challenges on its own, a conclusion that
22 our Board began to come to in January 2015 and completed
23 its independent internal assessment and ultimate decision
24 to affiliate with Yale-New Haven Health in June of 2015.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 Yale-New Haven Health and L & M have
2 agreed on a commitment of \$300 million to enhance and
3 support both clinical and operational initiatives,
4 consistent with the needs of the Eastern Connecticut
5 Region.

6 Without a capital infusion, a financial
7 downward spiral is very likely. Such financial downturn
8 for L & M would be counter-productive, hard to recover
9 from, and negatively impact access to care for the
10 financially disadvantaged and underserved and most
11 vulnerable members of the L & M community.

12 If approved, the Applicants together
13 intend to meet the needs of the region through a jointly-
14 developed strategic plan, with a focus on greater access
15 to primary care, cost-effective alignment of service
16 lines, such as oncology, cardiology, neurosurgery,
17 emergency medicine, surgery, orthopedics and behavioral
18 health, along with enhancements to operational
19 infrastructure.

20 Let me take a moment to clear up a
21 misconception that some may hold about this \$300 million
22 investment. It is not dependent on Yale-New Haven Health
23 making a profit, rather, 85 million of this 300 million
24 investment is already committed, and the remaining 215

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 million in investments will be made over five years,
2 based upon mutually agreed upon business plans and the
3 financial performance of L & M.

4 This is a rational and prudent approach to
5 ensuring the financial stability of L & M and its
6 continued presence in the community.

7 In the event this application is not
8 approved, it's my opinion and belief that many of the
9 programs discussed in our application will be in serious
10 jeopardy and will force us to make the type of difficult
11 decisions that will inevitably and negatively impact our
12 community benefit program clinical offerings and,
13 consequently, jobs.

14 For all the reasons discussed in our
15 application and the testimony provided today, I urge OHCA
16 to approve this application without delay.

17 Let me introduce Dr. Tom Balcezak, the
18 Chief Medical Officer. Are you going next, or Ron is
19 going to go next? Okay. Turn it back to you, Joan.

20 MS. FELDMAN: Dr. Ross Sanfilippo will
21 provide his pre-filed testimony. He's a member of the L
22 & M Corporation Board of Directors.

23 DR. SANFILIPPO: Good evening, Attorney
24 Hansted and the OHCA staff.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 HEARING OFFICER HANSTED: Good evening.

2 DR. SANFILIPPO: My name is Dr. Ross
3 Sanfilippo, and I am a member of the Board of Directors
4 of the Lawrence & Memorial Corporation. I adopt my pre-
5 filed testimony as my own.

6 I am very appreciative of this opportunity
7 to speak to you today on behalf of my fellow Board
8 members and recommend to OHCA that it allow L & M to
9 affiliate with Yale-New Haven Health.

10 I've been in private practice in New
11 London and on the staff of the Department of Surgery here
12 at L & M for over 20 years.

13 My family receives healthcare here from
14 both my L & M and Yale-New Haven colleagues, and, like
15 many others, my children were born here at L & M.

16 Since the passage of the Affordable Care
17 Act, it has become very clear to the Board that past
18 assumptions and approaches to the delivery of health care
19 would no longer serve us well.

20 We endeavored to reduce expenses, but that
21 was not enough. Given the associated costs with data
22 analytics, IT platforms, population health and
23 coordination of care, our Board knew that we needed
24 access to capital and a greater scale.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 L & M has historically enjoyed a very
2 positive working relationship with Yale-New Haven Health
3 Services. We are excited about the potential to be
4 associated with their brand, their quality, their
5 standards and recruit the best and brightest physicians
6 to our L & M community from Yale-New Haven Health System.

7 If OHCA does not approve this application,
8 I am here to say that there will be negative consequences
9 to our L & M community. Indeed, some of which may not be
10 reversible and may even result in less access to care,
11 less diversity of providers, and, even worse, a less
12 healthy community with programs that have to be cut.

13 OHCA should also know that the L & M Board
14 will remain in place and continue to govern locally. Our
15 Board is and will remain fully engaged in our community.
16 We live and work here.

17 I also want to remind everybody that this
18 -- we are very excited about this continuing role, and I
19 must point out that this is in stark contrast to how
20 other systems in the State govern and relate to their
21 community Boards. This is not going to be a
22 Hartford/Windham situation. Our Board made sure of that.

23 I must tell all of those in the room today
24 that my fellow Board members and I consider ourselves

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 fiduciary of the community, and we would not be here
2 recommending this proposal if we did not think it was in
3 the best interest of our community with respect to
4 providing not only high-quality, but, also, affordable
5 care.

6 For all these reasons, I urge OHCA to
7 consider our testimony today and allow us to form this
8 relationship with Yale-New Haven Health, as we are
9 committed to the future and to the success of L & M here
10 in our community. Thank you.

11 HEARING OFFICER HANSTED: Thank you.

12 DR. BALCEZAK: Good afternoon, Hearing
13 Officer Hansted and the entire OHCA staff. My name is
14 Tom Balczak. I'm the Chief Medical Officer at Yale-New
15 Haven.

16 On a personal note, I'm also a lifelong
17 resident in the State of Connecticut, trained here in
18 both medical school at the University of Connecticut and
19 my residency at Yale-New Haven Hospital and have lots of
20 colleagues at the hospitals across the State of
21 Connecticut.

22 I ask that you please adopt my pre-filed
23 testimony. As outlined in that pre-filed testimony and
24 as Bruce Cummings just noted, there's a long history of

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 clinical collaborations between L & M and Yale-New Haven
2 Hospital, but those relationships can only go so far, and
3 if this application is approved, I would look forward to
4 working with my colleagues at L & M to enhance the
5 clinical offerings available in the area, as we have done
6 with both Bridgeport and Greenwich Hospitals.

7 Yale-New Haven Hospital's interest here is
8 not in filling Yale-New Haven Hospital's beds, nor are we
9 interested in moving clinical programs or patients to
10 Yale-New Haven.

11 For one, we currently don't have the
12 space. We routinely operate at or above our capacity,
13 and, second, it's not the approach of Yale-New Haven
14 Health, rather, we seek to enhance the clinical offerings
15 in the community, so that we can ensure high-quality
16 patient care provided locally here with these local
17 physicians.

18 And, again, on a personal note, that's not
19 just our philosophy as an institution. It's also my
20 personal goal, since both my parents live in this
21 community, my brother and his family live in this
22 community and works at Electric Boat.

23 They get their local care here. They've
24 had procedures here, GI procedures, surgical procedures,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 and it is, I believe, in all of their best interests, as
2 well as this community, that we continue to provide that
3 care and continue to enhance it.

4 I understand that in another context it's
5 been suggested to OHCA that physicians associated with
6 the Yale Medical Group practicing at L & M have been
7 sending patients to Yale-New Haven Hospital for cardiac
8 procedures, rather than performing them at L & M.

9 We have looked at this, and I want to
10 assure OHCA that we have not seen an increase in cardiac
11 procedures from the New London area and that only those
12 cases that cannot be performed safely at L & M are
13 appropriate and have been transferred to Yale-New Haven
14 Hospital.

15 That's the principle we currently follow,
16 and it's a principle that we would continue to follow,
17 even if this affiliation is approved.

18 Transfers to Yale-New Haven would only be
19 appropriate for the most complex and high-risk patients,
20 and given the transition that we are seeing nationally
21 from payment systems that reward volume to those that
22 reward value is, in fact, in Yale-New Haven Health's and
23 Yale-New Haven Hospital's best interest to seek the
24 lowest cost care setting for patients whenever possible.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 This point is also demonstrated by our
2 track record in Bridgeport and Greenwich, where we have
3 increased the services available in those communities and
4 collaborated with physicians and executives from those
5 hospitals to improve care and reduce costs.

6 For this reason, I urge OHCA to approve
7 this application. I would now like to introduce Monica
8 Noether, who is an economist from Charles Rivers
9 Associates and has worked in the field of health care
10 economics for a number of years, and we asked her to
11 provide her expert testimony on this affiliation.

12 DR. NOETHER: Good evening, Attorney
13 Hansted and members of the OHCA panel. First of all, I
14 adopt my pre-filed testimony as my own, and while I can't
15 claim to be a resident of Connecticut currently, I did go
16 to high school and college here, and my parents actually
17 taught at the University of Connecticut for a couple of
18 decades, so I do have some connections here.

19 I've been asked to contribute to this
20 proceeding as both a resource to OHCA and to respond to
21 issues related to access, diversity of providers and
22 costs.

23 I can also explain how the antitrust
24 agencies that have jurisdiction over things like

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 monopolies and acquisitions or affiliations likely
2 determine that they should not challenge this
3 affiliation.

4 There are four main points that I'd like
5 OHCA to take from my pre-filed testimony. First, prices
6 will not increase as a result of this transaction.
7 Because Yale-New Haven Health and L & M largely serve
8 different customer bases, their affiliation does not
9 change the competitive landscape significantly.

10 As you know, they're 50 miles apart, and
11 we've heard how difficult it is to travel between the two
12 and the fact that there isn't that much travel really
13 between the two.

14 Second, Yale-New Haven is, at least the
15 hospital, is an academic medical center, focusing on high
16 end cases, whereas L & M has traditionally been a
17 community hospital serving the local community.

18 Second, diversity of health care providers
19 and patient choice will, therefore, not be negatively
20 impacted by the proposed affiliation.

21 Third, to the contrary, given the
22 increasing financial weakness of L & M, which we've heard
23 quite a bit of testimony about, without the affiliation,
24 residents of L & M service area will likely face reduced

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 choice and access as L & M is forced to cut services.

2 And, finally, the affiliation will allow L
3 & M to achieve greater efficiencies, enhanced services,
4 and position itself to meet the challenges of healthcare
5 reform that we've also heard several people talk about
6 this afternoon while maintaining jobs as services are
7 increased.

8 I also need to rebut three statements made
9 by Dr. Hyde in his response to my pre-filed testimony.
10 Perhaps most importantly, Dr. Hyde's assertions about
11 Yale-New Haven's current crisis and its ability to
12 increase prices through affiliations misplaced.

13 It's not clear on what basis Dr. Hyde
14 describes, quote, "New Haven as the epicenter of
15 extraordinarily high prices." Certainly, the information
16 presented in the Cooper Study that he references does not
17 support that conclusion.

18 In fact, New Haven average commercial
19 hospital price is, of 12,300 or so, is over six percent
20 below the national average, which is over 13,000,
21 according to data used by Dr. Cooper and reported in the
22 press, and, on the Medicare side, New Haven ranks 40th
23 for Medicare spend across different hospital referral
24 regions across the country, nor does Dr. Hyde's assertion

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 that Connecticut Medicaid rates are attributable to,
2 quote, "monopoly pricing by Yale-New Haven" have any
3 basis. Prices are set by the State and, as you well
4 know, do not cover costs.

5 Hyde also claims that I, quote, "appear to
6 take a position contrary to the majority of economists,
7 who have studied the merger of non-profit hospitals."

8 That's actually not the case, rather, the
9 literature to which he refers does not apply to the
10 proposed affiliation that OHCA must currently rule upon.
11 That literature is concerned with the effects of mergers
12 that actually enhance market power, and for all the
13 reasons that I outlined just now and in my pre-filed
14 testimony, the proposed affiliation does not create or
15 enhance market power.

16 The FTC and the DOJ have never challenged
17 affiliations of combinations of hospitals that are 50
18 miles apart, and, therefore, it's not necessarily
19 surprising that the FTC and the Connecticut Attorney
20 General both closed their investigation of this proposed
21 affiliation about a year ago.

22 Finally, on price information, Dr. Hyde
23 acknowledges that it's difficult to obtain reliable price
24 information, but then proceeds to disagree with himself

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 by citing several irrelevant sources. For example,
2 administered prices set by Medicare and Medicaid.

3 Applicants explain in their supplemental
4 pre-filed testimony why there are no readily available
5 price data that accurately distinguishes the complexity
6 of services provided by academic medical centers, such as
7 Yale-New Haven Hospital.

8 Dr. Hyde cites a study of mine, in which I
9 use charge data as evidence that price data can be used,
10 but I need to point out that that study was based on data
11 from 1977 and '78, i.e., nearly 40 years ago, when the
12 healthcare world was a bit of a different place.

13 It was a time when individuals and
14 insurers actually paid consisted multiples of charges, so
15 that charges, in fact, had some meaning to them. In
16 fact, DRGs or any other of the features of Medicare's
17 current payment system on which many private payment
18 systems are also based didn't exist, and managed care was
19 in its infancy everywhere, except perhaps California.

20 And I think that, with that, that's
21 probably enough, given the hour. I appreciate your time
22 today, and I'm obviously available to answer any
23 questions.

24 HEARING OFFICER HANSTED: Thank you.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 MS. BORGSTROM: Great. Thank you. My
2 notes say good afternoon, but I'll say good evening,
3 Attorney Hansted and the rest of the OHCA staff with
4 incredible stamina.

5 My name is Marna Borgstrom, and I'm the
6 President and Chief Executive Officer of Yale-New Haven
7 Health Services Corporation. I also adopt my pre-filed
8 testimony as my own and appreciate the opportunity to
9 share with you a couple of points of view, and some of it
10 will build on other testimony that you've had.

11 The application that we put together is
12 intended to support a value-driven affiliation designed,
13 as was said earlier, to improve access, to enhance the
14 quality of care, and reduce the costs through scale.

15 In fact, about two years ago, the Yale-New
16 Haven Health System Board adopted the following mission
17 statement. Yale-New Haven Health System seeks to enhance
18 the lives of people we serve by providing access to high
19 value, patient-centered care in collaboration with
20 others, who share our values, and that was a very big
21 move for us and very important, because it recognizes
22 that the world is changing, that volume is not going to
23 be the basis on which we're paid, that we really need to
24 be focusing on how to make our communities stronger and

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 healthier, and no one organization can do that, so
2 collaboration and partnership is going to be critical if
3 we're really going to start to change the way health care
4 is actually provided.

5 As a result, the culture and the evolution
6 of the Yale-New Haven Health System has not been and is
7 not to grow for the sake of growth.

8 When we look at our system, until the
9 acquisition of the hospital of St. Raphael, which was a
10 very different form of transaction, Yale-Haven's size has
11 not changed materially since the 1990s.

12 Yale-New Haven Hospital formed the Yale-
13 New Haven Health System in 1996. Bridgeport Hospital
14 joined. Bridgeport then and in the subsequent few years,
15 as we were getting the system together, was losing money.
16 They were losing patients. They were losing physicians.

17 If you fast forward to today, Bridgeport
18 is the lead player in the geography they serve. They
19 have among the highest patient satisfaction, physician
20 satisfaction, and the growth in their patient services
21 has been remarkable, and that is a very poor community.

22 And part of the way that they've grown is
23 they have brought specialists into the Bridgeport
24 community that they couldn't have brought in previously,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 and those specialists are providing care in Bridgeport
2 doing their procedures and their services at Bridgeport
3 Hospital.

4 Greenwich Hospital joined the Yale-New
5 Haven Health System about a year later in 1997, and,
6 similarly, in addition to cost position improvement, has
7 been home to the expansion of services, notably, the
8 Smilow Cancer Hospital and the Yale-New Haven Heart and
9 Vascular Center.

10 And I think, if you talk to Board members
11 at both of those organizations, they would say both
12 organizations have been enhanced as a result of their
13 affiliation with the Yale-New Haven Health System, which
14 is identical in form to the one that we're proposing for
15 Lawrence & Memorial.

16 A different form of transaction, almost
17 four years ago, because it was significantly distressed,
18 Yale-New Haven Hospital actually purchased the Hospital
19 of St. Raphael, and, at the time, and that was a much
20 more difficult transaction to work through with the
21 Federal Trade Commission, there were a number of
22 requirements put on that, and we have met, exceeded all
23 of those.

24 We were asked to save \$250 million in

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 costs. That has been exceeded. We've realized over \$400
2 million in capital cost avoidance, because Yale-New Haven
3 Hospital, which, as Dr. Balcezak said, has been running
4 full, did not have to build additional facilities.

5 As important, more important, we've made
6 \$100 million investment in infrastructure on the St.
7 Raphael's campus since the acquisition, and, as you heard
8 in public testimony earlier, all 3,000 jobs were
9 preserved on that campus.

10 Employees benefitted from pension plans
11 and wage increases that they had not enjoyed previously,
12 and, as you've also heard, we have enjoyed a very
13 positive and productive relationship with the Teamsters,
14 who represented a number of employees on that campus.

15 We can do the same, we believe, for
16 Lawrence & Memorial as we've done for Greenwich and for
17 Bridgeport and as a result of the St. Raphael's
18 transaction and the community served by Lawrence &
19 Memorial, but if we don't have this opportunity, I think
20 you've also heard that it's likely Lawrence & Memorial
21 will face some disruption, some instability and
22 potentially reduced access to care.

23 And I'd like to just take a minute to
24 address a few of the misconceptions about our system.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 Our corporate focus is not one of control, but it is of
2 creating a unified system, a unified strategy. We want
3 to enhance performance, we want to set standards for
4 quality and value, and we want to achieve cost reductions
5 through economies of scale and economies of skill.

6 Our corporate focus is on local
7 governance, with real authority, and Mr. Crespo spoke to
8 that earlier. The Yale-New Haven Health System has the
9 opportunity to name one member of the Lawrence & Memorial
10 Board, and that person has one vote, and, with the
11 exception of system-based decisions, decisions related to
12 any changes in services, additions, subtractions, changes
13 come from the Lawrence & Memorial Board, not from the
14 Yale-New Haven Health System Board.

15 It's in no one's interest to drive up cost
16 or increase prices to make healthcare less affordable to
17 consumers. We do not and we have never negotiated rates
18 as a system.

19 The rates negotiated for Greenwich
20 Hospital, for Bridgeport Hospital and for Yale-New Haven
21 Hospital are separate, independent, and they reflect the
22 cost of doing business at those organizations, and we
23 expect that that will continue with Lawrence & Memorial.

24 We will work with Lawrence & Memorial to

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 provide additional primary care and surgical specialists
2 in the area to enhance the medical services available and
3 to reduce the need for patients to travel to New Haven,
4 except for highly-specialized services.

5 As I mentioned, if you look at what's
6 happened in Greenwich and Bridgeport, in fact, both of
7 those organizations have seen a growth in local
8 healthcare volume, because there is more business being
9 done in those communities that appropriately can stay
10 there.

11 Finally, I understand that there is
12 concern, and we heard it in some of the public testimony,
13 that this affiliation will have the same effect as some
14 other system activities in this State.

15 Please remember that we do not negotiate a
16 single price for our system, that we operate in very
17 different local communities, and each one of those
18 communities has specific needs.

19 In addition, and you've already heard
20 this, it's very difficult to negotiate increased prices
21 anyplace, because the third party payers are finding
22 that, with employees and employers paying more and more
23 of the healthcare bill, they can't afford to do that
24 anymore.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 Our health system has worked very hard on
2 cost reduction. Over the last several years, we have
3 saved \$300 million on an annualized basis across the
4 health system. The original plan and strategy had been
5 to use that to lower some of the negotiated commercial
6 rates to make certain services more affordable as people
7 were paying more out of pocket.

8 In the last four years, however, between
9 taxes and payment reductions from the State of
10 Connecticut, we have lost almost \$300 million in revenue
11 from the State of Connecticut, and, so, effectively, as
12 we have reduced costs, those have gone to subsidize what
13 would have been provided by the State of Connecticut.

14 I believe that this application has
15 delayed or denied the opportunity for Yale-New Haven
16 Health to help make a positive difference, and the
17 Greater New London and Westerly communities will be
18 diminished or worse. It could be lost.

19 Put simply, the alternative to this
20 application may be the eventual closure, the reduction,
21 or termination of services, lost jobs and reduced access
22 to care, so I strongly support OHCA and the Deputy
23 Commissioner of the Department of Public Health approving
24 this application. Thank you.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 HEARING OFFICER HANSTED: Thank you.

2 MS. FELDMAN: That completes our pre-filed
3 testimony.

4 HEARING OFFICER HANSTED: Okay. Attorney
5 Murray, if you want to proceed with your case in chief?

6 MR. MURRAY: Thanks very much.

7 HEARING OFFICER HANSTED: You're welcome.

8 MR. MURRAY: Good evening, Hearing Officer
9 Hansted and staff of the Office of Health Care Access.

10 As you know, I represent a coalition of
11 Intervenors, who were granted Intervenor status in this
12 particular proceeding.

13 These specific applications involve the
14 acquisition of Lawrence & Memorial Hospital here in New
15 London and the acquisition by Yale-New Haven Hospital
16 Health Care System and the merger of L & M's physician
17 practices with Yale's Northeast Medical Group.

18 The Intervenors, as we will more
19 specifically detail in the testimony today and have
20 provided in our pre-filed documents, have raised some
21 serious reservations about the proposed acquisition and
22 merger and believe that they will put at risk Lawrence &
23 Memorial Hospital's patients in the Greater New London
24 area, both from escalating costs of medical care and

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 decrease in access to affordable and quality medical
2 services that we believe are a result of this acquisition
3 and merger.

4 In the interest of time, I will actually
5 ask permission. I have a written opening statement,
6 which kind of lays out the theory that the Intervenors
7 have, and I'd just like permission to supply it to you in
8 written format.

9 MS. FELDMAN: I object.

10 HEARING OFFICER HANSTED: Would you supply
11 a copy to the Applicants?

12 MR. MURRAY: Absolutely.

13 HEARING OFFICER HANSTED: Would you just
14 let them look at it right now before, and then I'll rule
15 on the objection.

16 MR. MURRAY: Well I can put it on the
17 record.

18 HEARING OFFICER HANSTED: Why don't you
19 just read it into the record?

20 MR. MURRAY: Okay. Nothing in the
21 application, in the applications, provide any assurance
22 at all that the interests of low-income, at-risk and
23 minority communities within the Lawrence & Memorial
24 service area will be adequately protected or that they

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 will be continuing community involvement and oversight of
2 L & M's provision of health and medical care in
3 Southeastern Connecticut.

4 The Connecticut General Statute 19a-639a-
5 12 requires the Applicants to satisfactorily demonstrate
6 that their resulting consolidation will not adversely
7 affect healthcare costs or accessibility to care in the
8 service areas.

9 We believe they have failed to do so, and,
10 as a result, OHCA must reject these applications, as
11 currently filed.

12 Our coalition witnesses today will focus
13 on the serious inadequacies of these applications in
14 addressing these major statutory areas of concern
15 regarding price of, access to and quality of medical care
16 after the proposed mergers and acquisitions, and I'll let
17 our witnesses, basically -- I'm not going to summarize
18 their testimony. I'll let them do it themselves.

19 In a minute, I want to introduce the
20 members of our coalition to provide evidence for the
21 Department today, as well as adopting their pre-filed
22 testimony.

23 Each of the witnesses and coalition
24 members will tell you that they share a deep skepticism

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 that the applications before you satisfy the statutory
2 criteria for approval with respect to both cost and
3 access.

4 Rather, these witnesses will tell you that
5 the two applications will lead to increases in the price
6 for health care in the L & M service areas, a decrease in
7 access of needed services, including specialty services,
8 and elimination of alternative service providers in Rhode
9 Island and Massachusetts, which are now available to the
10 L & M patient population.

11 Of particular importance in this process
12 is the unwillingness of the Applicants to provide
13 historic price information from previous acquisitions at
14 Bridgeport and Greenwich Hospitals.

15 This raises serious concerns that the
16 Applicants cannot meet their statutory burden of
17 demonstrating that the acquisitions and mergers will not
18 adversely affect the healthcare cost in the L & M service
19 areas post-acquisition by the Yale system.

20 These issues will be more substantially
21 addressed by our witnesses today. There is a document
22 that will be referenced by at least one of our witnesses,
23 which I will either put on the record now or supply to
24 the agency, and I'll represent to you it is a document

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 that we receive from the Office of the State Controller,
2 and it details for the period of time from May 1, 2014 to
3 April 30, 2015 the cost of certain inpatient and
4 outpatient cost for inpatient and outpatient services
5 provided by Yale-New Haven Hospital and L & M for State
6 employees, who are part of the State Employee Health Care
7 System.

8 And I know that Dr. Hyde is going to be
9 referring to this. I'm happy to provide this to the
10 Applicants now or do it as a late file exhibit.

11 HEARING OFFICER HANSTED: Do you have the
12 document with you?

13 MR. MURRAY: I have copies of it here for
14 both you and the Applicant.

15 HEARING OFFICER HANSTED: Why don't you
16 let the Applicants review it? Attorney Feldman, let me
17 know if you have any objection.

18 MS. FELDMAN: At this point, it's very
19 difficult to review a one-page document without knowing
20 the source or the context of the document, where the
21 information came from, or whether it's reliable
22 information, so I'm going to have to object to its entry
23 into the record at this point.

24 MR. MURRAY: We can certainly provide

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 testimony. I understand that we may be having another
2 hearing date. We can certainly provide testimony, as to
3 the source of the information and whether or not it's
4 reliable. It was provided by Kevin Lembo.

5 HEARING OFFICER HANSTED: Okay and you
6 said Dr. Hyde will refer to this document?

7 MR. MURRAY: He's going to refer to this,
8 but we can put an individual on the next time we have a
9 hearing, who can testify to how they acquired it and how
10 it was given to them by Comptroller Lembo.

11 HEARING OFFICER HANSTED: Yes, I'd like to
12 have that done. So we won't accept it at this point. As
13 you refer to the second hearing date, we'll take it at
14 that point if you properly introduce the document into
15 the record.

16 MS. FELDMAN: Yes. Attorney Hansted, I'd
17 also like to object on the basis that, as mentioned in
18 the Intervenor's opening comments, if you read our pre-
19 filed testimony, it becomes very clear that almost 80
20 percent of our payments are government payers, and I
21 really don't understand the relevance of this document
22 being introduced now at this late date, and I think this
23 whole issue of costs going up post-affiliation is a bit
24 of a guise, in that we made it very clear that we don't

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 have the ability to negotiate almost 80 percent of our
2 payments from governmental payers.

3 HEARING OFFICER HANSTED: I can appreciate
4 your position, but, at the same time, I'd like to receive
5 evidence from the Intervenors on what they feel their
6 position is.

7 Now, as I stated, we're not accepting this
8 document at this time, but if Attorney Murray properly
9 introduces it at the next hearing and we hear testimony
10 on it, I will accept it at that time, and you will be
11 given the opportunity to object at that point.

12 MS. FELDMAN: Thank you.

13 MR. MURRAY: Just for the record, also, we
14 are actually not talking about, even though this is the
15 State of Connecticut's Employee Healthcare Plan, which
16 I'm sure all the members up there participated, it's
17 hardly a government payer, as we understand that term in
18 this hearing.

19 HEARING OFFICER HANSTED: Correct.

20 MR. MURRAY: It's essentially a third
21 party payer. The State of Connecticut is self-insured
22 and provides those payments for those services that it
23 negotiates with hospitals throughout the State.

24 HEARING OFFICER HANSTED: Correct. Okay,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 so, be prepared to enter it at the next hearing date.

2 MR. MURRAY: I'll do that. At this time,
3 the Intervenors would like to turn the microphone over to
4 Dr. Fred Hyde.

5 HEARING OFFICER HANSTED: Okay.

6 DR. HYDE: Mr. Hansted, members of the
7 panel, ladies and gentlemen, my name is Fred Hyde, and I
8 adopt my pre-filed testimony.

9 HEARING OFFICER HANSTED: Thank you.

10 DR. HYDE: And would like, given the hour,
11 merely to underline parts of it that I think may be of
12 some help to you.

13 The essence of our presentation is that,
14 as Mr. Murray indicated, we have really two different
15 applications here. One application can be embraced or
16 endorsed by everyone or almost everyone in the room, and
17 that is that Yale-New Haven is a great hospital.
18 Lawrence & Memorial is a gem. People have gotten good
19 services from these hospitals.

20 All of the efforts that have been put
21 forward by the witnesses can be embraced happily, and the
22 real question is at what cost?

23 I'm here on behalf of the American
24 Federation of Teachers, whose President, Randi

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 Weingarten, has embraced the campaign, known as Patients
2 before Profits.

3 Part of that campaign is to highlight the
4 actions that we all need to take that will attempt to put
5 some brakes on what appears to be a runaway system, a
6 system, which is consolidating into more and more
7 expensive and less and less accessible corporate
8 headquarters.

9 We have tried to make a line of reasoning
10 or an argument in our pre-filed testimony that goes
11 something like this.

12 Yale-New Haven has a tremendous position
13 in the market and attachment for, I believe, which is a
14 study of the markets of the various hospitals in South
15 Central and Eastern Connecticut, shows what a tremendous
16 concentration would take place, notwithstanding testimony
17 from the Applicants.

18 The only recent study that shows
19 concentrated power within the same State concludes that
20 it really doesn't matter if they're overlapping markets.

21 It's the reason why we think, when Mr. Jon
22 Leibowitz was expressing his frustration as Chairman of
23 the Federal Trade Commission in March of 2012, he said,
24 if you want to get a handle on health costs, you have to

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 challenge anticompetitive hospital mergers.

2 Now the Applicants have pointed out that I
3 seem to put all the problems of the healthcare field at
4 the doorstep of this application. I apologize if that
5 appears to be what I did.

6 What I did was to say this is the
7 application in front of you. It's the one thing we can
8 do something about. It's not all of the problems in the
9 field, but it certainly is a powerful driver of problems
10 in the field, and we'll give you a late file exhibit
11 citing exactly where in-State competition, different
12 markets, exactly where Gaynor and Cooper and exactly
13 where Yale-New Haven's market historically, 75 percent of
14 which is essentially community hospital.

15 A big part of the way you prosper is to
16 charge academic medical center rates for community
17 hospital services, so we'll pullout from the morass of
18 information. We've given you those things that we think
19 will help.

20 So we have the two different applications,
21 and it's not up to the Intervenor, if I may say so, to
22 prove that the Applicant is wrong. To the contrary, it's
23 up to the Applicant to prove that there will be, under
24 number 12 of your statutory requirements, there will be

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 no adverse economic impact on hopefully the State, the
2 hospital, the patients.

3 Let's take a look at, if you would with
4 me, take administrative notice of the audited financial
5 statements, which are within your possession. Let's take
6 a look at 2015 and see what happened with Lawrence &
7 Memorial.

8 The hospital made money. It made almost
9 \$5 million, and, yet, if you use 19 million of that to
10 transfer to affiliates, the doctors in Westerly, you are
11 going to lose money.

12 The hospital made money, notwithstanding
13 the fact that it had a very unfortunate recent history.
14 People, who are in positions of authority and
15 responsibility in this field, know that the nurses and
16 clinical personnel are critical. The way you treat them
17 is the way they'll treat the patients, and, so, almost a
18 one, two, three blow.

19 And if you look at your annual report, you
20 can see that Lawrence and Memorial for the last four
21 years, before 2015, have profits from operations from I
22 believe nine to \$22 million.

23 The one, two, three blow is you tell your
24 nurses they're locked out and you're going to transfer

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 services. You acquire a bankrupt hospital in a
2 neighboring state, and you subsidize your doctors at the
3 tune of \$20 million, which is understandable. If you're
4 the doctors, it works very well.

5 I won't go into the prices problem, except
6 to acknowledge something, which has been said I think by
7 us, as well as by the Applicant.

8 Getting price information in this field is
9 astonishingly difficult. It's difficult, because those,
10 who have it, do not want to disclose it, not because
11 somehow it's abstruse.

12 We can look at the hospital as a whole.
13 If you look at Greenwich and at Bridgeport and at Yale-
14 New Haven and at Lawrence & Memorial, you'll see that the
15 current ratio, a key index of liquidity and, therefore,
16 of solvency, is easily two and a half to four, depending
17 on the year recently.

18 I do a lot of work in other states. There
19 are many states. New York is one of them, where 1.75 is
20 the statewide average. People would be astonished to
21 find what might be labeled crocodile tears going on with
22 regard to the under reimbursement of Medicaid for
23 hospitals that still have current ratios over two, or two
24 and a half, or three, or four, as was one year with L &

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 M.

2 So we're not unmindful of the distress
3 that Lawrence & Memorial has found itself in, but our
4 narrative entertains the theory that it's largely self-
5 inflicted.

6 Therefore, whatever the remedy might be is
7 within the power of Lawrence & Memorial. There is no
8 case that this acquisition, and that's what it is, when
9 you become the sole corporate member, you acquire
10 control, no matter how many members you have on the
11 Board, and to pretend otherwise is dissimulation.

12 When you become the sole corporate member
13 and are the controlling body, that's a different kind of
14 fix.

15 Now what we worry about with Bridgeport
16 and Greenwich is not that they haven't benefitted from
17 Yale-New Haven's participation, but that they've
18 benefitted too much.

19 If you look at the profitability of these
20 hospitals as far back as your records go and, therefore,
21 as far back as we can deduce, you'll see that they are
22 consistently pretty good performers. How good?

23 If you were the Applicant, if you were the
24 owner, if you were the system that had responsibility for

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 these, you could very well put together an adjusted cost
2 per patient day, an adjusted revenue figure that would
3 show very clearly here's the before and here's the after.

4 You know, I don't have to tell you, but
5 perhaps the audience doesn't know, that the legislature
6 has actually asked for this information to be made public
7 and plans to do so.

8 We can understand to some extent, if price
9 is a sensitive issue, why, therefore, this application is
10 being rushed along, why it has to get done now, before
11 January 1 of 2017, when all of this information, at least
12 in terms of how the legislature has set things up, will
13 be public.

14 How do we get expensive? How do we get to
15 be very, very expensive in this field? There's no simple
16 answer. Years ago, I was Vice President for Planning at
17 Yale-New Haven, a long time ago, so long ago we only had
18 five Vice Presidents, and subsequently was the organizing
19 first Director of the Faculty Practice Plan.

20 It's nobody's fault. These things are not
21 -- they don't happen, because of one particular decision,
22 but we focus on one area for a reason.

23 When I served as in-house counsel for the
24 Hospital Association, I was irritated at your agency

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 collecting information about the top 10 compensated
2 officials, because it was meant to be a source of
3 secrecy, privacy. Why would you invade my privacy?

4 Even one of the witnesses indicated this
5 is irrelevant. It's not irrelevant. Here's why it's not
6 irrelevant.

7 We need all of us. I don't believe
8 there's anybody in this room, who can say they're
9 thoroughly exposed to the calamity of medical cost. I'm
10 on Medicare. I'm not exposed, but there are people, and
11 you stand for them.

12 That happens to be your challenge. What
13 do you do with people, who are going to be out of luck
14 financially, avoiding medical care, not just avoiding
15 paying the bills, avoiding medical care, who are immobile
16 for socioeconomic reasons, who might like to go here
17 instead of there, but don't have a doctor, who is here,
18 who are not connected? That's really the audience that's
19 not in the room.

20 There's a second reason. It's a message.
21 If I tell you, as shown in our attachment eight, that the
22 top 10, and I know you know this, but the audience may
23 not know this, you publish every year the total
24 compensation of the top 10 individuals, whoever they are,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 and if I tell you that the compensation of the top 10
2 individuals at Yale-New Haven is \$15 million a year, you
3 can do the math.

4 If I tell you that it increases faster
5 than other hospitals, you can perhaps appreciate what
6 that looks like, in terms of a message.

7 One group that gets the message are the
8 doctors. When they discover that paper-pushers are
9 earning more than they are, it adjusts their relative
10 cupidity in some cases. Let's put it that way.

11 So here's what attachment eight comes down
12 to over a nine-year period. If you are with Bridgeport,
13 you've got a 7.3 percent increase not necessarily in
14 individual, but the top 10 people, most of whom are the
15 same.

16 If you were in, oh, let's say Greenwich,
17 you had 2.8 percent on average. If you were in Lawrence
18 & Memorial, you had .6 percent on average, .6. If you
19 were at Yale-New Haven, you had 11.2.

20 I feel like I'm channeling Rob Reiner's
21 mother in Harry Met Sally, when I say I'll take what
22 she's having. It's a motivation. It's not the only
23 motivation, but it's a motivation. It's the American
24 way. We earn as much as we possibly can.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 So for those three reasons, that more and
2 more Americans are not insulated, as hopefully all of us
3 in this room are, that it's a message to others, and that
4 if you are -- if your mentality with regard to strategic
5 planning, which is what I teach in Columbia business
6 school, if your mentality is service, let's do a better
7 job here, you're going to act in a certain way.

8 If your mentality is commercial banking,
9 the ship is not doing too well, let's find someone to
10 sell it to, you're going to act in a different way.

11 Let me conclude with just a couple of
12 items, in terms of these exhibits. My little variation
13 in Medicare exhibit was criticized and I think in some
14 ways legitimately so.

15 This is not a peer-reviewed research
16 paper. This is from the top 100 DRGs from the MEDPAR
17 file, some particularly outstanding examples, so that,
18 for example, on the first page, with septicemia, if you
19 were at Yale-New Haven in 2013, the average Medicare
20 payment was \$85,000, and, as the patient, you were on the
21 hook for 10,000.

22 At Lawrence & Memorial, you were on the
23 hook for \$721. I think that makes a difference. If the
24 Applicants don't think it makes a difference, that may be

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 revealing, but I think it makes a huge difference,
2 because the Medicare beneficiary with regard to out-of-
3 network, out-of-pocket deductibles, co-payments and so
4 forth is paying more than \$1,000 per hospital discharge,
5 and when we get to the Comptroller's information, you may
6 find that of interest, as well, but I don't pretend that
7 any of this can't be criticized.

8 I'll tell you, looking through the top
9 100, there was no place where the Applicants were at the
10 bottom.

11 Finally, I'd like to close by talking a
12 little about Massachusetts and this attachment, which is
13 --

14 MS. FELDMAN: I have to object, both on
15 the basis of time and the relevancy of talking about
16 Massachusetts.

17 HEARING OFFICER HANSTED: I'll overrule
18 the objection, in terms of time. Attorney Murray, do you
19 want to respond, in terms of the relevance of speaking
20 about Massachusetts?

21 MR. MURRAY: Attorney Hansted, this was
22 part of our pre-file, Dr. Hyde's pre-file. I can't
23 remember what exhibit it is. It's attachment six, which
24 he made reference to, and I think it's just he's just

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 going to make a brief point, in terms of a study that was
2 done in Massachusetts. It seems to me that the agency
3 needs to take information and lessons learned from as
4 many places as it can.

5 Dr. Hyde is simply going to point that
6 out, in terms of your staff looking at that particular
7 exhibit that was attached and the lessons that can be
8 learned from that. I think it is relevant.

9 MS. FELDMAN: In our supplemental pre-
10 file, we objected on the same basis, that it was
11 irrelevant information.

12 There's an enormous amount of irrelevant
13 and contradictory information being thrown around, and we
14 addressed all of that in our supplemental. I see no
15 relevancy to this hearing today.

16 HEARING OFFICER HANSTED: I'm going to
17 overrule the objection. We'll give it the weight it's
18 due, Attorney Feldman. Dr. Hyde, please keep this brief.

19 DR. HYDE: Thirty seconds, Mr. Chairman,
20 and thank you.

21 HEARING OFFICER HANSTED: I'm not a
22 Chairman, by the way.

23 DR. HYDE: This particular study shows how
24 the leverage acquired by the Massachusetts

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 general/partners group has destroyed community hospitals
2 in Massachusetts. Where did that leverage come from?

3 They've done us a great favor. Their
4 Attorney General found, and everyone should be armed with
5 subpoena power, that when you quiz hospitals, what makes
6 a difference is not how many poor people we have, not how
7 many residents, not how much research, but how much
8 leverage we have.

9 This application would give the Yale-New
10 Haven Health System more leverage by a very large
11 significant amount, as outlined in the study of monopoly
12 overlap here, and that's the entirety of our point of
13 view.

14 If you give them more leverage, they will
15 use it, and we will all be incrementally poorer, but some
16 people will be much poorer. Thank you.

17 HEARING OFFICER HANSTED: Thank you.

18 MR. MURRAY: The Intervenors would like to
19 now call Stephanie Johnson.

20 MS. JOHNSON: Good evening.

21 HEARING OFFICER HANSTED: Good evening.

22 MS. JOHNSON: My name is Stephanie
23 Johnson, and I'm the President of AFT Connecticut, Local
24 5051, which represents more than 270 LPN techs at the

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 Lawrence & Memorial Hospital. I am also a hospital
2 employee. I work as a polysomnography technologist,
3 which is just a very fancy way to say sleep tech, and I
4 am a resident of East Lyme, and I adopt my pre-filed
5 testimony.

6 HEARING OFFICER HANSTED: Thank you.

7 MS. JOHNSON: You know, it's been very
8 hard here that nobody really on the Union side is coming
9 out and saying I'm absolutely against this, or I'm
10 absolutely for this.

11 As the President of the Union, I've seen
12 change for good reasons, and I've seen change for the
13 sake of change, and, you know, our community relies
14 heavily on the bus route, and we have a lot of people,
15 who actually walk in on the main streets, which are Ocean
16 and Montauk and surround on Lawrence & Memorial Hospital.

17 I'm very concerned that these patients
18 will not be able to get the care that they need from
19 their community hospitals, should this acquisition take
20 our community hospital from us.

21 For years, the Unions at the hospitals
22 have been fighting to keep access to quality service.
23 It's the reason why we went on strike in 2013, but this
24 is not a Union versus management issue. This is about

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 allowing our community to receive the quality care that
2 we have been delivering for more than 100 years.

3 Decisions that are going to be made about
4 what care is going to be kept here are going to be made
5 by Yale. I've read the bylaws. I've seen what it says
6 about the member and the member substitution, and I can't
7 be convinced otherwise.

8 I'm very, very concerned that decisions
9 about what kind of care is going to be kept here at the
10 main campus or at any other affiliate that Lawrence &
11 Memorial has is going to be made from people 50 miles
12 away that don't know what this community is.

13 I'm concerned that duplicate services will
14 be phased out, since we both are hospitals, and that may
15 include necessary clinical services that have been
16 traditionally performed here by L & M.

17 I am very concerned that the profitable
18 services will be removed or assumed by Yale, which
19 charges a higher cost than L & M does.

20 There's been a lot of talk about L & M
21 being in financial distress. L & M Hospital has a
22 healthy margin and always has. It's the corporation, not
23 the hospital, that's not doing well.

24 It's because the corporation makes poor

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 business decisions, draining funds from our hospital; \$17
2 million for locking out the employees in 2013, \$35
3 million for buying Westerly Hospital, several million
4 dollars on a now defunct McKesson electronic medical
5 record system, and \$20 million per year to LMMG.

6 All of this money could have and should
7 have been spent on patient care services. A few years
8 ago, we were told that the purchase of Westerly Hospital
9 was so that we could stave off being taken over by a for-
10 profit.

11 Two years later, we were told that we were
12 going to affiliate with many hospitals in the area to get
13 this purchase buying power that was going to make it so
14 that Yale couldn't take us over, and here we are today.

15 So transparency is what we're looking for,
16 and these are the reasons that I can't support this CON
17 going forward, as it's currently written.

18 I ask you to take our concerns and get
19 truthful answers from Yale and L & M about their plans
20 for continuing care here in New London where the \$300
21 million is coming from, what it's going to, and what
22 they're going to do to our little community hospital.
23 Thank you.

24 HEARING OFFICER HANSTED: Thank you.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 MR. MURRAY: I'd like to now call Dr.
2 Ellen Andrews, who is the Executive Director of the
3 Connecticut Health Policy Project.

4 DR. ANDREWS: Good evening.

5 HEARING OFFICER HANSTED: Good evening.

6 DR. ANDREWS: I'm Ellen Andrews. I'm the
7 Executive Director of the Connecticut Health Policy
8 Project. We are a non-profit, non-partisan organization
9 advocating for consumers with non-partisan policy
10 analysis consumer education and assistance and capacity
11 building, so that I can retire, and I adopt my pre-filed
12 testimony.

13 HEARING OFFICER HANSTED: Thank you.

14 DR. ANDREWS: We have deep concerns about
15 this acquisition, this application, for a number of
16 reasons, both for the health of this community,
17 especially the underserved, which is a particular
18 emphasis for the Connecticut Health Policy Project.

19 Medicaid and uninsured and the growing
20 number of people between those two were underinsured.
21 The impact on State resources to support underserved
22 community needs. I've learned that being a consumer
23 advocate I've had to start to be an advocate for
24 taxpayers, because the supports that go for the people I

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 care about come from the general fund, and, if I don't
2 worry about that, then, the people I care about are not
3 going to get the resources they need.

4 Consumer choice and access to care, you
5 can't have patient-centered care when there's only one
6 option, and questions about the vague promise to invest
7 \$300 million in this community.

8 First, New London and L & M service area
9 include many fragile and underserved communities and
10 residents that would be placed at risk by this
11 acquisition.

12 Robert Wood Johnson Foundation estimates
13 that there are 20,598 uninsured residents this year.
14 That's after the Affordable Care Act and the Medicaid
15 expansion in New London County and a growing number of
16 even more people, who are underinsured, people with high
17 deductibles and cost sharing, who are baring the burden
18 of costs directly, at least up until thousands of
19 dollars, and, for many of my clients, it might as well be
20 a million, so that health care is becoming less and less
21 affordable.

22 You heard in public comment a little about
23 L & M's community health needs assessment, a requirement
24 of the Affordable Care Act, one of the best kept secrets

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 in the Affordable Care Act. It's required for non-profit
2 hospitals, and they did include a great deal of data
3 collection and engaged the community in identifying
4 priorities.

5 The report found that one in four families
6 with children in this county are living in poverty,
7 almost one in three in the city. Asthma, diabetes, rates
8 are high and even higher for people of color.

9 This was really especially important for
10 these proceedings, that between six and 14 percent,
11 depending on the survey, of residents in this area are
12 already delaying care, because of cost. That's before,
13 you know, we see higher deductibles and, also, higher
14 costs, because of an acquisition.

15 It does say that, quote, "The demographic
16 profile of the L & M service area correlates with a
17 higher incidence of negative health outcomes," and that's
18 before -- that's with the wonderful gem that you heard
19 about already in this community.

20 The community health needs assessment
21 outlines consensus priority areas for investment,
22 including asthma, diabetes, tobacco use and health status
23 and access, particularly around affordability.

24 The plan includes a roadmap for

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 priorities, including social determinants of health, core
2 investment issue areas, and access to care, and resources
3 from that \$300 million would go a long way toward making
4 a great deal of important contributions to fixing those
5 problems, but we're hearing that those resources are
6 going to be decided behind closed doors at a strategic
7 planning session after this acquisition is already -- the
8 ink is dry on it, and that's no way to make these
9 decisions.

10 There already exists a community health
11 needs assessment, and I think they should follow it. The
12 decision should be made by communities rather than behind
13 closed doors.

14 Let's see. New London area residents are
15 already strapped and cannot afford higher prices for
16 care, more out of pocket costs. If even more people are
17 forced to delay, care prices and taxes for all of us will
18 rise, and that brings me to my second point. We can't
19 afford it either.

20 The State budget is in very serious
21 deficit. I'm sure that hasn't escaped any State employee
22 lately. And, because of that, as a consequence, over
23 10,000 working parents are going to lose Husky coverage
24 at the end of this month, in just three weeks. That is

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 on top of provider cuts, the hospital cuts that you've
2 heard about.

3 Medicaid has done a lot in the last four
4 years. I have to say this is not a -- Medicaid has done
5 a lot in the last four years to improve access to high-
6 quality care for a rapidly-growing program that now
7 covers 760,000 people.

8 It has controlled costs, as well. Fewer
9 people are going to the emergency room for non-urgent
10 visits. In the first year, after the shift to a care
11 management system, 32 percent more physicians
12 participated in the program, which is kind of a miracle
13 in Medicaid, but costs went down at the same time, down,
14 not off of trend, but down. They've been trending down
15 every year for the last four years, but, last year, they
16 were down 5.9 percent per person. I can't say that
17 enough.

18 But the levers to do that will be severely
19 reduced if you allow this market concentration in this
20 application. There's substantial evidence, and I know
21 Dr. Hyde has talked about it at length in his testimony,
22 but that monopolies drive up prices. They do. They just
23 do. We can't afford 15 percent higher costs.
24 Individuals can't, businesses can't, and I know the State

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 can't.

2 Every time anybody brings up, you know,
3 we're going to have to pay more for this, we're going to
4 have to pay more for that at the Capitol, I try to
5 translate it into how many more Husky parents have to
6 lose coverage for us to afford whatever it is you want to
7 do?

8 I mean I think that's the sort of the
9 tradeoff we need to think about, is how many people are
10 going to lose coverage, and how many people aren't going
11 to be able to afford care and are going to delay it?

12 And the third piece, Yale-New Haven
13 mentioned in their media that they are going to invest
14 \$300 million, some of it in HIT, which sounds like it was
15 a bad business decision, but they're not going to say
16 what it's for.

17 If they want to invest in New London,
18 their community health needs assessment lays out a really
19 good roadmap. There are a lot of needs in this
20 community, and effective solutions are pretty easy to
21 find. They just need money.

22 Yale-New Haven must be very clear about
23 what investments they will be making, how they're going
24 to make them, who they're going to make them from, and

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 what they expect, and that should happen now, not later,
2 behind closed doors, without community input.

3 And taking it from L & M's cash flow is
4 not a net benefit to this community, and it needs to be
5 enforceable, and it needs to be accountable to the
6 community, and it's unfortunate that you're not going to
7 hear from Maritza Bond about what happened in Windham,
8 but a lot of promises were made, and they weren't kept,
9 and that would be a tragic shame, if that happens here.

10 Healthcare costs -- one other piece I
11 wanted to respond to, the Applicants saying that -- well,
12 first of all, we heard a lot about clinical
13 collaborations that are happening now already, before the
14 acquisition, so I think they need to make a case that
15 this is really necessary for clinical care.

16 They talked about how it's about value-
17 based purchasing, and I understand that. That's the
18 shiny new toy in healthcare right now. We've had a lot
19 of shiny new toys. It seems every 10 years we get a new
20 one, but this is the one, and it is driving acquisitions.

21 The problem with this is that it's going
22 to be extremely difficult to unravel. Unraveling managed
23 care was hard enough for Husky. Unraveling this I don't
24 know if we'll be able to, and it is driving -- there's a

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 lot of pressure to adopt alternative payment models, and
2 those are about risk sharing, risk going on to provider
3 networks, large health systems, and this is going to be a
4 much bigger one, with a lot more members. That's what
5 this is about.

6 On the other side, acquisition doesn't
7 guarantee clinical integration. There are plenty of
8 instances from Connecticut and elsewhere, where there
9 have been corporate mergers and acquisitions, but, in
10 fact, healthcare systems still don't talk to each other.
11 Physicians can't coordinate care any better than they
12 could before the corporate change. That isn't necessary,
13 nor is it sufficient, for integration.

14 So I just want you to take a lot of time
15 and think this through, and maybe this isn't the right
16 time for this application. Thank you.

17 HEARING OFFICER HANSTED: Thank you.

18 MR. MURRAY: Our last witness is Jason
19 Pelletier.

20 MR. PELLETIER: My name is Jason
21 Pelletier. I live in Groton, Connecticut. I'd like to
22 adopt my pre-filed testimony.

23 Healthcare coverage for me is very
24 important. I work as a steward. I'm also a cook at

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 Pfizer. I've been there for about 15 years.

2 Healthcare coverage for us is always about
3 recurring doctor visits and our prescriptions. We're all
4 very concerned about having adequate healthcare coverage.
5 The older people get, the more health issues you get, the
6 more often you have to go to the hospital, and the more
7 expensive things get.

8 Currently, we are in contract negotiations
9 in Local 217. There are also seven other corporate
10 cafeterias in Connecticut that are operated by Compass,
11 including our brothers and sisters at Electric Boat.

12 We pay currently 20 percent of our
13 premiums and are trying to reduce that percentage at the
14 bargaining table. The cost of employees' shares went up
15 by about 10 percent last October.

16 That means that everyone who had coverage
17 had a big bite taken out of the raises that they had
18 negotiated at the bargaining table.

19 We have a really good healthcare plan and
20 have fought really hard to keep the costs down, but I
21 have co-workers, who are uninsured, or they're on State
22 assistance, they also have children, because they can't
23 afford the premiums.

24 Before I talk about Yale taking over the

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 hospital at L & M, I want to tell you how hard our Union
2 works to keep the costs down of our healthcare plan.

3 Our Unite Here Health is run jointly by
4 our Union and by our employers in our industries.
5 Workers in our Union take leave from their jobs for
6 several weeks to educate our co-workers about keeping
7 costs down on their own; not going to the emergency room
8 for colds and things of that nature.

9 As a steward, I'm trained to help my co-
10 workers use their healthcare the right way and to help
11 them connect with our healthcare plan if they have any
12 problems. We have healthcare coordinators that are very,
13 very helpful in that regard, but that won't matter if
14 prices for hospitals and doctors go up, because Yale
15 takes over.

16 Even if we convince our employer to lower
17 the percentage of the premiums that we do pay, if the
18 care, itself, gets more expensive, the premiums will go
19 up, and we'll be paying what we paid before.

20 Please stop this takeover, or, if it is
21 approved, make Yale-New Haven guarantee in writing that
22 they won't raise prices.

23 We don't make a lot of money. I make
24 about \$16.44 an hour, and I'm one of the better paid

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 people where I work.

2 I'm fortunate to have a full-time hour job
3 and a steady paycheck, but none of us can afford to pay
4 more for healthcare. Affordable healthcare insurance has
5 always been important, but where I'm at in my life now I
6 can't afford to do without it. Thank you very much for
7 your time.

8 HEARING OFFICER HANSTED: Thank you.

9 MR. MURRAY: Attorney Hansted, that
10 concludes our testimony.

11 HEARING OFFICER HANSTED: Okay, thank you.
12 It's getting late, so, at this point, we are going to
13 stop the hearing. We'll continue it for a date to be
14 set, about two weeks out.

15 For those members of the public, we will
16 post a new date on OHCA's website, and we'll work with
17 the Applicants and the Intervenors on the new date.

18 Attorney Feldman, did you have something?

19 MS. FELDMAN: Yes. With respect to this
20 document that was --

21 HEARING OFFICER HANSTED: We're not
22 accepting it tonight.

23 MS. FELDMAN: Okay, so, if this is going
24 to be presented at the next hearing date, we'd like to

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 receive it at least a week before, so that we could
2 understand what this document is, where it came from,
3 unless Attorney Murray can tell us now whether you got
4 that from Comptroller Lembo directly.

5 MR. MURRAY: Well I didn't get it from
6 Comptroller Lembo, but members of the Intervenors did
7 receive it directly from --

8 MS. FELDMAN: Without a Freedom of
9 Information request?

10 MR. MURRAY: I don't know whether it was a
11 Freedom of Information request or not.

12 MS. FELDMAN: Okay, because my law office
13 has done several Freedom of Information requests, and we
14 have not received any documents, whatsoever, so I'm
15 curious to know how this was obtained.

16 MR. MURRAY: Well I just told you that it
17 was obtained directly from the Comptroller's office. I
18 don't know whether it would be responsive to the Freedom
19 of Information request that you made or not, because I
20 haven't seen what your Freedom of Information requests
21 are.

22 MS. FELDMAN: Can you tell me when you
23 received it, or how current this is?

24 MR. MURRAY: Well it's clearly after that

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 time period that's there. That particular document, I
2 don't have it in front of me, but, from memory, it takes
3 a look at the payments at Yale-New Haven Hospital and
4 Lawrence & Memorial for inpatient and outpatient
5 procedures for the one-year period from May 1, 2014 to
6 April 30, 2015, and then paid through July 31, 2015, so,
7 clearly, the information was compiled after July 31,
8 2015.

9 MS. FELDMAN: But we don't know whether
10 there's any subsequent modifications to the document,
11 whether the document is accurate or not.

12 HEARING OFFICER HANSTED: Well let's hold
13 the discussion on this document for the next hearing. At
14 the next hearing, will you have the individual, who
15 obtained the information?

16 MR. MURRAY: Yes, I will.

17 HEARING OFFICER HANSTED: Okay, so,
18 Attorney Feldman, you can examine the individual, who
19 obtained the document, at that time.

20 MS. FELDMAN: I need to receive this prior
21 to the hearing, so I can analyze the information and have
22 an opportunity --

23 HEARING OFFICER HANSTED: This particular
24 document that you have in your hand?

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 MS. FELDMAN: Right.

2 HEARING OFFICER HANSTED: Would you like
3 to keep that copy?

4 MS. FELDMAN: No, no, no, no. I need to
5 understand the context in which this document was
6 derived, what data they used, when they got the data. We
7 can't just look at one piece of paper, based on the
8 entire State employee population.

9 MR. MURRAY: But this is not the entire
10 State employee population. That is probably well over a
11 couple hundred thousand people. This is admittedly a
12 small sample. This is just --

13 MS. FELDMAN: Exactly.

14 MR. MURRAY: -- State employees. Let me
15 finish. These are State employees, who have received
16 those particular services at Yale-New Haven Hospital or
17 Lawrence & Memorial Hospital in that one year period of
18 time and for which payment was made by July 31st, so it's
19 clearly not a sample of every of the several hundred
20 thousand insured lives that the State of Connecticut
21 employees that the State pays for that coverage.

22 MS. FELDMAN: Is it a sample of every
23 State employee that received care at Yale-New Haven
24 Hospital and every State employee that received care at

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 Lawrence & Memorial Hospital?

2 Just like the DRGs were cherry picked, I'd
3 like to know whether these were cherry picked, also.

4 MR. MURRAY: My understanding is that it
5 is all of the State employees, who received those
6 particular services at those two hospitals during that
7 one-year period of time.

8 HEARING OFFICER HANSTED: But, again,
9 we're not going to know until the individual, who
10 obtained the information, is here to testify under oath
11 how he or she obtained the information.

12 MR. MURRAY: And that may not satisfy
13 Attorney Feldman, because --

14 MS. FELDMAN: Correct.

15 MR. MURRAY: -- it sounds like she wants
16 to ask the Comptroller to be part of these proceedings.

17 MS. FELDMAN: Well I'd rather not have
18 this information introduced at this late date anyway. I
19 mean there was plenty of time to submit pre-filed
20 testimony. There was rebuttal to our pre-filed
21 testimony, and it's being introduced now in the abstract,
22 plucked out of the air.

23 MR. MURRAY: And I provided it. I
24 received it this morning.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 MS. FELDMAN: Yeah, well, I also received
2 the pre-file.

3 HEARING OFFICER HANSTED: She has --

4 MR. MURRAY: I absolutely understand the
5 point.

6 HEARING OFFICER HANSTED: Of course,
7 Attorney Feldman, you understand the position I'm in.

8 MS. FELDMAN: Right.

9 HEARING OFFICER HANSTED: I don't have the
10 individual here to question, he or she.

11 MS. FELDMAN: Well I'm asking the
12 intervenors, if they plan on presenting this at the next
13 hearing, then, prior to that hearing, at least a couple
14 of days before, they should substantiate, you know, we
15 should have access to the person that provided the data,
16 so we could ask questions and appropriately comprehend
17 the context in which this document is derived.

18 HEARING OFFICER HANSTED: You want access
19 to the individual outside of the hearing before the next
20 hearing?

21 MS. FELDMAN: That would be fine. If it's
22 the Comptroller, yes. Is that what you're saying?

23 MR. MURRAY: No. I think we're saying two
24 different things. My understanding is that the Hearing

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 Officer would like the person, who received this document
2 from the Comptroller, to testify about how they got it
3 from the Office of the State Comptroller.

4 HEARING OFFICER HANSTED: If it's
5 admitted, I want it properly admitted.

6 MR. MURRAY: Right. Right. So if they --

7 MS. FELDMAN: But I --

8 MR. MURRAY: Let me finish. If they got a
9 business record from the Comptroller that was handed to
10 them and they, in turn, want to proffer it to the
11 hearing, that establishes the chain of custody and
12 authenticates that the document was provided to that
13 individual by the Comptroller.

14 I hear the Applicant saying something
15 quite different, which they simply want to inquire about
16 the underlying data. I don't represent the Comptroller.
17 I can't produce the Comptroller to talk about that.

18 MS. FELDMAN: Well it would also be
19 helpful if we could have attachment eight, which was not
20 included in the pre-filed testimony. It was just
21 referenced tonight by Dr. Hyde.

22 MR. MURRAY: That's actually not accurate.
23 If you take a look at the pre-filed testimony, the eight,
24 it was supplied.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 MS. FELDMAN: We don't have it.

2 MR. MURRAY: Oh. You do have a nine,
3 correct?

4 MS. FELDMAN: Yes.

5 MR. MURRAY: Right. Nine is eight.

6 MS. FELDMAN: Oh. Thank you.

7 HEARING OFFICER HANSTED: It's just mis-
8 numbered.

9 MS. FELDMAN: Okay.

10 HEARING OFFICER HANSTED: So the question
11 remains what do we do about this document?

12 MS. FELDMAN: Well we're objecting to it
13 being entered into the record.

14 HEARING OFFICER HANSTED: It hasn't been
15 entered into the record.

16 MS. FELDMAN: Potentially.

17 HEARING OFFICER HANSTED: Potentially.

18 MS. FELDMAN: So if the person that
19 received this document comes to the hearing, the next
20 scheduled hearing, presumably, you're going to admit it
21 into the record, if all you need to prove is a chain of
22 custody.

23 HEARING OFFICER HANSTED: If it can be
24 properly admitted.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 MR. MURRAY: I mean, essentially, they're
2 asking to authenticate the document, so it can be
3 properly admitted.

4 HEARING OFFICER HANSTED: Correct.

5 MR. MURRAY: If what Attorney Feldman
6 wishes us to do is to provide, for example, prior to the
7 hearing an affidavit to both the Hearing Officer and to
8 the Applicant's counsel from the individual, who got the
9 document from the Comptroller's office, laying out
10 exactly what happened, so that it's no mystery, I mean,
11 obviously, it's not at the hearing, but a sworn affidavit
12 about how that came, I don't know if that would satisfy
13 their objection.

14 MS. FELDMAN: We object to this exhibit,
15 whatever document this is. We don't know whether it
16 represents more than one payer, whether it represents a
17 mixture of governmental payers, plus commercial
18 insurance.

19 There are State employees that have
20 multiple types of insurance. It's very inaccurate
21 information.

22 HEARING OFFICER HANSTED: I understand
23 what you're saying. Where was this extrapolated from?

24 MS. FELDMAN: Right.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 HEARING OFFICER HANSTED: Now the
2 individual, who received this, would they know how this
3 was extrapolated?

4 MR. MURRAY: I think the only thing that
5 they can testify to is what they were told by Comptroller
6 Lembo.

7 MS. FELDMAN: Are you saying that the
8 Comptroller prepared this document?

9 MR. MURRAY: I don't know who prepared it.
10 They got it from the Office of the Comptroller.

11 HEARING OFFICER HANSTED: Well here's what
12 we're going to do. I won't rule on any objection at this
13 time. The objection will stand. I want the individual,
14 who received this document, to be present at the next
15 hearing, and then I'll rule on Attorney Feldman's
16 objection at that time.

17 MR. MURRAY: Okay.

18 MS. FELDMAN: I mean it would be very
19 helpful if the person that generated this information or
20 this document would be in attendance at the hearing,
21 otherwise, the person that received the document is not
22 going to be able to respond to any questions we may have
23 about the accuracy of the data.

24 HEARING OFFICER HANSTED: That's correct,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 and that's up to Attorney Murray to make sure he can get
2 this properly admitted and that it can be Cross-Examined
3 with respect to how the information was calculated,
4 because, to me, I agree with Attorney Feldman, that,
5 looking at this document, I don't know where it's derived
6 from.

7 MR. MURRAY: I understand that.

8 HEARING OFFICER HANSTED: Aside from you
9 saying that it came from the Comptroller's Office.
10 That's fine to know who generated it, but what
11 information was it generated from, and how was this
12 information calculated from the original database?

13 MS. FELDMAN: I mean, frankly, I don't
14 think this should be given any greater weight than public
15 testimony at this point.

16 HEARING OFFICER HANSTED: And it may not.
17 Again, I'm not accepting the document at this time. We
18 will discuss it further at the next hearing, when we
19 actually have an individual here to question.

20 MS. FELDMAN: Okay, thank you.

21 HEARING OFFICER HANSTED: I don't want to
22 further question Attorney Murray on this document when
23 he's not the one who produced it.

24 MS. FELDMAN: Thank you.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 HEARING OFFICER HANSTED: Okay. And
2 before we adjourn, is there anyone here from the members
3 of the public that would like to give comment on either
4 of the applications before us? Okay. Hearing and seeing
5 none, counsel, did you have another comment?

6 MS. FELDMAN: The question really pertains
7 to the second application. Are we going to be hearing
8 the second application at the next hearing date or
9 tonight?

10 HEARING OFFICER HANSTED: I think we
11 should hear the second application at the next hearing
12 date, just so we can keep the two separate.

13 MS. FELDMAN: Okay.

14 HEARING OFFICER HANSTED: For our
15 purposes, because I want to have the Cross-Examination,
16 whoever has Cross-Examination on this application we
17 heard tonight, we'll start with that.

18 MS. FELDMAN: Okay.

19 HEARING OFFICER HANSTED: Okay? Then we
20 will hear the second application, Cross-Examination, and
21 then OHCA will do its questions after that is completed.

22 MS. FELDMAN: Okay.

23 HEARING OFFICER HANSTED: Okay. Hearing
24 and seeing no one that wants to give additional public

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 11, 2016

1 comment, I will adjourn this hearing until the next
2 hearing date. Thank you, all.

3 MS. FELDMAN: Thank you.

4 (Whereupon, the hearing adjourned at 8:56
5 p.m.)

CERTIFICATE

I, Paul Landman, a Notary Public in and for the State of Connecticut, and President of Post Reporting Service, Inc., do hereby certify that, to the best of my knowledge, the foregoing record is a correct and verbatim transcription of the audio recording made of the proceeding hereinbefore set forth.

I further certify that neither the audio operator nor I are attorney or counsel for, nor directly related to or employed by any of the parties to the action and/or proceeding in which this action is taken; and further, that neither the audio operator nor I are a relative or employee of any attorney or counsel employed by the parties, thereto, or financially interested in any way in the outcome of this action or proceeding.

In witness whereof I have hereunto set my hand and do so attest to the above, this 18th day of July, 2016.

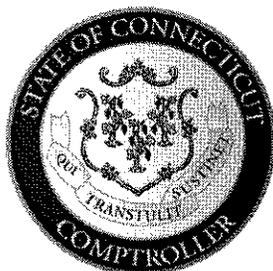

Paul Landman

July 21, 2016

Commissioner Raul Pino
Connecticut Department of Public Health
410 Capitol Avenue
P.O. Box 340308
Hartford, CT 06134

Dear Commissioner Pino,

I am writing in regard to the proposed affiliation between Yale New Haven Health Services Corporation (Yale New Haven) and Lawrence & Memorial Hospital (L&M) – Docket No. 15-32033-CON – now before the Office of Health Care Access (OHCA) in the Department of Public Health. The Comptroller's Office administers the state employee health care plan, providing health coverage to over 200,000 members. Any cost increases or service reductions associated with the proposed affiliation between Yale New Haven and L&M will directly impact the state health care plan and its members. I am calling on OHCA to use its authority under the Certificate of Need (CON) review process to ensure that the proposed affiliation between Yale New Haven and L&M results in the retention and expansion of medical services in the L&M service area and does not increase total health care costs.

As you know, Yale New Haven has the largest market share of health care services in the state and is the dominant health system along the Connecticut shoreline. Yale New Haven's significant market share is one factor that has enabled the system to command some of the highest reimbursement rates in Connecticut. The affiliation with L&M will further expand Yale New Haven's market share along the Connecticut coastline. The evidence is clear, greater market concentration of health care providers and hospital facilities results in higher medical costs due to increased reimbursement rates.¹ The affiliation of Yale New Haven and L&M will result in greater bargaining power for Yale New Haven as a whole and L&M particularly.

¹ Dafny, Leemore. Estimation and Identification of Merger Effects: An Application to Hospital Mergers. [Journal of Law and Economics, vol. 52 (August 2009)
http://www.kellogg.northwestern.edu/faculty/dafny/Personal/Documents/Publications/2_Dafny_Identification%20and%20Estimation%20of%20Merger%20Effects_2009.pdf; Vogt WB, Town R. How has hospital consolidation affected the price and quality of hospital care? Princeton (NJ): Robert Wood Johnson Foundation; 2009 Feb.
<http://www.rwjf.org/en/research-publications/find-rwif-research/2006/02/how-has-hospital-consolidation-affected-the-price-and-quality-of.html>

Yale New Haven and L&M have stated that the increase in bargaining power will be muted by component contracting in the Yale New Haven Health System, whereby each affiliated hospital facility negotiates reimbursement rates with payers independently. The extent to which separate contracting across facilities will reduce the otherwise clear increase in bargaining power for L&M as a member of Yale New Haven is unclear and may require additional oversight and guarantees.

Yale New Haven and L&M also state that the improved care integration and care management that would result from the affiliation will reduce overall health care costs by changing utilization patterns. Improving care coordination and care management has real potential for improving health outcomes and reducing overall health care costs, however, it is yet unknown if the integration of Yale New Haven and L&M will contribute to better care coordination and management for patients in the L&M service area.

Connecticut statute gives OHCA the ability to place contingent requirements on the approval of any CON application concerning hospital acquisitions or affiliations. An approval of the proposed affiliation should include conditions that ensure health care consumers in Southeastern Connecticut are protected from large health care cost increases driven by higher reimbursement rates at L&M and affiliated facilities.

Essential health care services in the L&M service area must also be protected through the CON process. Yale New Haven and L&M have indicated that no reduction in clinical services is planned as a part of the affiliation, and in fact there are plans to expand certain clinical services at existing L&M facilities. Recently, another major hospital system, Hartford Healthcare, drastically reduced services at Windham Hospital in Willimantic. The reduction in services at Windham Hospital has created significant concern and discontent in the community. Area residents and clinical staff at L&M have expressed concerns that the affiliation with Yale New Haven may eventually result in a similar outcome in the L&M service area. Yale New Haven has stated that their hospital affiliation structure differs from Hartford Health Care as evidence that a similar outcome is less likely. Nonetheless, OHCA can use its regulatory authority to place conditions on the approval of the CON that ensure the planned expansion in services occur and existing critical health care services are maintained.

The costs and access concerns the Yale New Haven and L&M affiliation raise should be directly addressed to the satisfaction of OHCA, the Commissioner of the Department of Public Health and the Attorney General in order for the affiliation to proceed. Separate negotiations by facility are not enough to control the increase in reimbursement rates that result from provider consolidation; OHCA will need to use other mechanisms to protect consumers from unreasonable cost increases. Similarly, OHCA should insist upon adequate protections that will ensure continued and expanded access to essential clinical services by residents in the L&M service area.

The proposed affiliation between Yale New Haven and L&M presents both potential benefits and potential risks for residents in the L&M service area. I am not advocating for the approval or denial of the CON application in front of OHCA, but -- should the application merit approval -- I am advocating any such approval be contingent upon necessary guarantees and protections to protect health care consumers from the risks of increased health care costs and ensure the retention and expansion of health care services for residents in the L&M service area.

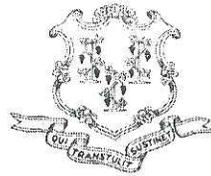

I thank you for your consideration.

Sincerely,

A handwritten signature in cursive script that reads "Kevin Lembo". The signature is written in dark ink and is positioned below the word "Sincerely,".

RULING ON OBJECTION TO ADMISSION OF EXHIBIT LL

On July 29, 2016 the Applicants, Lawrence + Memorial Corporation and Yale-New Haven Health Services Corporation (the "Applicants") filed an objection to the admission of Exhibit LL to the record in this matter. On August 5, 2016 the Intervenors filed a response to the Applicants' objection.

After careful consideration, the Applicants' objection is hereby **SUSTAINED**.

Exhibit LL is hereby stricken from the record in this matter.

Northwest Division of Survey & Certification

July 21, 2016

Mr. Bruce Cummings, President & CEO
Lawrence & Memorial Hospital
365 Montauk Avenue
New London, CT 06320

Re: **CMS Certification Number: 070007**
Survey ID: 7ZQQ11, 07/13/2016

Dear Mr. Cummings:

Section 1865 of the Social Security Act (the Act) and Centers for Medicare & Medicaid Services (CMS) regulations provide that a provider or supplier accredited by a CMS-approved Medicare accreditation program will be "deemed" to meet all of the Medicare Conditions of Participation (CoPs) for hospitals. In accordance with Section 1864 of the Act, State Survey Agencies may conduct at CMS's direction, surveys of deemed status providers on a selective sampling basis, in response to a substantial allegation of noncompliance, or when CMS determines a full survey is required after a substantial allegation survey identifies substantial noncompliance. CMS uses such surveys as a means of validating the accrediting organization's survey and accreditation process.

A survey conducted by the State of Connecticut Department of Public Health (State Survey Agency) at Lawrence & Memorial Hospital on July 13, 2016 found that the facility was not in substantial compliance with the following Conditions of Participation (CoPs) for hospitals:

- 42 C.F.R. §482.12 - Governing Body**
- 42 C.F.R. §482.13 - Patient's Rights**
- 42 C.F.R. §482.22 - Medical Staff**
- 42 C.F.R. §482.23 - Nursing Services**

As a result, effective July 13, 2016, your facility's deemed status is being removed and survey jurisdiction has been transferred to the State Survey Agency.

A listing of all deficiencies found is enclosed (Form CMS-2567, Statement of Deficiencies and Plan of Correction). You are not required to submit a plan of correction (PoC) for these deficiencies, but you may do so voluntarily. Copies of the Form CMS-2567, including copies containing a facility's PoC, are releasable to the

public in accordance with the provisions of Section 1864(a) of the Act and 42 C.F.R. §401.133(a). As such, if you choose to submit a PoC, it should not contain personal identifiers, such as patient names, and you may wish to avoid the use of staff names.

The State Survey Agency will conduct an unannounced full survey of your facility to assess compliance with all the applicable Medicare conditions. If that survey indicates your facility is in substantial compliance with all of the applicable conditions, CMS will restore your deemed status and notify you in writing of this. If that survey indicates your facility is not in substantial compliance with one or more of the applicable conditions, then CMS will initiate action to terminate your Medicare agreement and will notify you in writing of this, including your opportunity to make timely correction of deficiencies identified.

In accordance with 42 CFR §498.3(d), this notice of findings is an administrative action, not an initial determination, and therefore formal reconsideration and hearing procedures do not apply.

If you have any questions, please contact Kathy Mackin at (617) 565-1211.

Sincerely,

J. William Roberson
Associate Regional Administrator

A 049	Continued From page 2 disorder, depression, suicidal ideation (on a 10/25/15 previous ED admission), and usage of multiple narcotics, including Fentanyl 25 micrograms every 72 hours, Oxycontin 10 milligrams every 12 hours prior to admission to the hospital. Patient #1 was transferred to a medical floor pursuant to a CT scan 6/17/16 which identified a possible small bowel obstruction/ileus. Review of the nursing admission assessment dated 6/17/16 failed to identify that an assessment including the patient's risk for suicidal ideation was completed upon admission per the facility's protocol. Review of the nursing flowsheets dated 6/17/16-6/27/16 identified that Patient #1 had no bowel movement since 6/17/16 (10 days). On 6/27/16, Patient #1 was administered Lactulose 60 milligrams at 10 45 am, Miralax 17 grams at 10 45 am, and Senokol 17.2 milligrams at 10 45 am (laxative medications), in addition, Relistor for narcotic induced constipation was administered at 11.12 am. Although multiple medications were administered to promote bowel activity, an abdominal x-ray was not obtained until 2.47 pm on 6/27/16. The impression of the x-ray identified in part, a nonspecific bowel gas pattern with no obvious small bowel or colonic distension. Further review identified that Patient #1 also received Magnesium Citrate 300 milliliters at 3.52 pm and a soap suds enema at 6 02 pm. Nursing notes dated 6/27/16, 6:02 pm indicated that 1000 cubic centimeters of fluid was infused with the soap suds enema with yellow colored fluid returned. Abdominal assessments were being conducted in accordance with the policy and procedure.	A 049

A 049	Continued From page 3 Further review of the nursing flowsheets dated 6/27/16 at 12:10 pm identified that Patient #1's pain level was a 7/10 as acceptable and aching. Patient #1 received Roxycodone 10 mg at 12:04 pm. At 1:00 pm, Patient #1's pain level was a 7/10 as shooting and unbearable. MD #1 was notified at 1:00 pm regarding increased abdominal pain and Patient #1 was medicated for nausea and a new Fentanyl patch was applied. At 2:47 pm, pain level was 10/10 and "unbearable." MD #1 was notified and gave an order for Dilaudid IV 1.0 mg. Patient #1 received another dose of Dilaudid 1.0 mg IV at 6:02 pm with the understanding that Patient #1 would not be able to receive anymore Dilaudid IV until after he/she had a bowel movement per the physician. Patient #1 also received Roxycodone 10 mg at 7:20 pm with indications to reassess in one hour. At 7:22 pm, Patient #1's pain level was 8/10 as sharp and unbearable. At 9:00 pm, Patient #1 vomited 200 cc of undigested food and continued to have "unbearable pain." Although review of the clinical record identified a change in condition, further review failed to identify that the physician was notified regarding the patient's current status. Interview with Registered Nurse (RN) #1 on 7/6/16 identified that he/she had gone into Patient #1's room after 9:30 pm to obtain his/her blood sugar and noticed the patient was in the bathroom with the water running with the door shut. RN#1 indicated that he/she thought the enema had worked and the patient was in the bathroom having a bowel movement so he/she decided to come back in fifteen minutes. Further interview with RN #1 identified at 9:45 pm, he/she returned to Patient #1's room and the door was still shut so he/she knocked on the door with no answer. RN #1 indicated that he/she opened the	A 049

A 049	Continued From page 7 identified that Patient #1 was to receive Oxycontin 10 mg every twelve hours for pain to be renewed every seven days. On 6/25/16, Patient #1's medication was due to be renewed, however, the hospitalist never renewed the medication. Patient #1 had not received the scheduled Oxycontin for 36 hours. On 6/26/16, the 7-3 nurse noticed the pain medication was not renewed and called the physician for a new order. Review of hospital policy identified that all Schedule II narcotic ordered will automatically be removed for the Medication Administration Record at 12 midnight on the seventh day if not renewed. Interview with MD #6 on 7/13/16 identified that he/she was not aware and/or educated of an alert on the computer identifying that a patients narcotics were up for renewal. Interview with the Pharmacy Manager on 7/1/16 identified that pharmacy staff have no process in place to monitor when narcotics need to be renewed after seven days if the provider fails to renew the order. Further interview identified that the pharmacy relies on the provider to renew the narcotic when a purple tab in the computer that notifies the provider a narcotic needs to be renewed otherwise the narcotic order just drops off. Review of hospital documentation dated 7/13/16 (16 days later) identified that a memo went out to all providers to remind them of renewing Schedule II Controlled Substances every 7 days per state law. A 130	Continued From page 11 Interview with RN #7, the intravenous therapy (IV) nurse, on 07/06/16 at 2.45 PM identified that he/she was charting at the nursing station adjacent to the unit when he/she heard screaming and went to the patient's room to investigate. At the same time, RN #10, a nurse from the adjacent unit, was coming out of the room, heading towards the nursing station. RN #7 identified that he/she believed that RN #10 was going to call a Code 8. RN #7 entered the patient room and observed the clinical manager, RN #1, looking into the bathroom. RN #7 then entered the bathroom and observed Patient #1 suspended from the curtain rod. RN #7 checked the patient for movement, palpated the left and right carotid arteries for pulse, checked for respirations, assessed the pupils as fixed and dilated, and observed a dried substance consistent with blood at the right corner of the patient's mouth. RN #7 further identified that a staff member had reported that Patient #1 was a full code and RN #7 responded that the patient had expired and directed the staff not to touch Patient #1, but notify the Assistant Director of Nursing (ADNS), security, and the physician. RN #7 then left the room and observed many staff members coming down the hallway towards the room. RN #7 further identified that, based on his/her professional experience, the patient and his/her environment had become part of a crime scene. Interview with MD #2 on 07/06/16 identified that he/she had been in the ED when summoned by the Code 8 to Patient #1's room. Patient #1 presented with mottling his/her soles of feet were white and multiple abrasions were visible around his/her neck. The body was already cooled and	A 130

A 132	Continued From page 15 Interview with RN #7, the intravenous therapy (IV) nurse, on 07/06/16 at 2:45 PM identified that he/she was charting at the nursing station adjacent to the unit when he/she heard screaming and went to the patient's room to investigate. At the same time, RN #10, a nurse from the adjacent unit, was coming out of the room, heading towards the nursing station. RN #7 identified that he/she believed that RN #10 was going to call a Code 8. RN #7 entered the patient room and observed the clinical manager, RN #1, looking into the bathroom. RN #7 then entered the bathroom and observed Patient #1 suspended from the curtain rod. RN #7 checked the patient for movement, palpated the left and right carotid arteries for pulse, checked for respirations, assessed the pupils as fixed and dilated, and observed a dried substance consistent with blood at the right corner of the patient's mouth. RN #7 further identified that a staff member had reported that Patient #1 was a full code and RN #7 responded that the patient had expired and directed the staff not to touch Patient #1, but notify the Assistant Director of Nursing (ADNS), security, and the physician. RN #7 then left the room and observed many staff members coming down the hallway towards the room. RN #7 further identified that, based on his/her professional experience, the patient and his/her environment had become part of a crime scene. Interview with MD #2 on 07/06/16 identified that he/she had been in the ED when summoned by the Code 8 to Patient #1's room. Patient #1 presented with mottling. His/her soles were white and multiple abrasions were visible around his/her neck. The body was already cooled and the patient appeared to have expired some time	A 132

A 347	<p>Continued From page 25</p> <p>knocked on the door with no answer. RN #1 indicated that he/she opened the door and found Patient #1 hanging by a bed sheet around the shower rod. RN #1 indicated that he/she had called for help, checked for a pulse while a Code 8 was called at 9:50pm.</p> <p>1b. Review of the progress notes dated 6/27/16 identified that although an abdominal assessment was documented by MD #3 at 11:30 am, the clinical record failed to identify any additional assessment conducted by a physician and/or a licensed independent practitioner when the patient had a change in condition including an assessment when the patient coded and expired. Additionally, the medical record lacked documentation to reflect an assessment by MD #2 when the patient coded and expired.</p> <p>Interview with MD #2 on 7/5/16 identified that he/she was first called regarding Patient #1 by responding to the code from the Emergency Department and found Patient #1 hanging from the shower rod. MD #2 indicated that his/her assessment was that Patient #1 had expired "a while ago" so the decision was made based on his/her assessment not to resuscitate the patient and the patient was pronounced at 10:00 pm. Review of the clinical record with MD #2 failed to identify a progress note had been written indicating MD #2's assessment and reason not to proceed with resuscitative efforts, although the clinical record identified that the patient was a full code. Further interview with MD #2 identified that he/she did not document the assessment in the progress note as he/she was instructed by administration that this was a police matter.</p> <p>Interview with Pastoral Care Representative on</p>	A 347

A 347	Continued From page 28 1c. Review of the physician orders dated 6/18/16 identified that Patient #1 was to receive Oxycontin 10 mg every twelve hours for pain to be renewed every seven days. On 6/25/16, Patient #1's medication was due to be renewed, however, the hospitalist never renewed the medication. Patient #1 had not received the scheduled Oxycontin for 36 hours. On 6/26/16, the 7:00 AM-3:00 PM nurse noticed the pain medication was not renewed and called the physician for a new order. Review of hospital policy identified that all Schedule I narcotic ordered will automatically be removed for the medication administration record at 12 midnight on the seventh day if not renewed. Interview with MD #6 on 7/13/16 identified that he/she was not aware and/or educated of an alert on the computer identifying that a patient's narcotic was up for renewal. Interview with the Pharmacy Manager on 7/1/16 identified that pharmacy staff have no process in place to monitor when narcotics need to be renewed after seven days if the provider fails to renew the order. Further interview identified that the pharmacy relies on the provider to renew the narcotic when a purple tab in the computer that notifies the provider a narcotic needs to be renewed otherwise the narcotic order just drops off. Review of hospital documentation dated 7/13/16 (16 days later) identified that a memo went out to all providers to remind them of renewing Schedule I Controlled Substances every 7 days per state law. A 396	Continued From page 37 and the door was still shut so he/she knocked on the door with no answer. RN #1 indicated that he/she opened the door and found Patient #1 hanging with a bed sheet around a shower rod. RN #1 indicated that he/she had called for help, checked for a pulse while a Code 8 was called at 9 50pm. Interview with MD #2 on 7/5/16 identified that he/she was first called regarding Patient #1 by responding to the code and found Patient #1 hanging from the shower rod. MD #2 indicated that his/her assessment was that Patient #1 had expired "a while ago" so the decision was made based on his/her assessment not to resuscitate the patient and the patient was pronounced at 10 00 pm. Review of hospital policy identified that the patient plan of care serves as a rapid reference for the active problems, interventions and measurable goals the care team addresses. In addition, the plan of care is reviewed at least every 24 hours and revised as necessary. Interview with Nurse Manager #1 on 7/1/16 identified that the plan of care did not address the patient's history of suicidal ideation and pain management including narcotic usage concerns.	A 396		
A 494	482.25(a)(3) PHARMACY DRUG RECORDS Current and accurate records must be kept of the receipt and distribution of all scheduled drugs. This STANDARD is not met as evidenced by Based on a review of the clinical record, review of hospital policies and procedures and interviews with facility personnel for one of twelve sampled patients (Patient #1), the pharmacy failed to ensure that narcotic renewals were monitored	A 494

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION		(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER: 070007	(X2) MULTIPLE CONSTRUCTION A. BUILDING _____ B. WING _____		(X3) DATE SURVEY COMPLETED C 07/13/2016
NAME OF PROVIDER OR SUPPLIER LAWRENCE & MEMORIAL HOSPITAL			STREET ADDRESS, CITY, STATE, ZIP CODE 365 MONTAUK AVE NEW LONDON, CT 06320		
(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)	ID PREFIX TAG	PROVIDER'S PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE DEFICIENCY)	(X5) COMPLETION DATE	
A 494	Continued From page 38 and reordered if necessary. The findings include Patient #1 was admitted to the Emergency Department (ED) on 6/17/16 with abdominal pain. Patient #1's admitting diagnosis was a small bowel obstruction/ileus. Patient #1's history included abdominal surgeries (14 previous surgeries), congestive heart failure, diabetes, anxiety disorder, depression, suicidal ideation (on a 10/25/15 previous ED admission), and usage of multiple narcotics, including Fentanyl 25 micrograms every 72 hours, Oxytocin 10 milligrams every 12 hours prior to admission to the hospital. Review of the physician orders dated 6/18/16 identified that Patient #1 was to receive Fentanyl 25 micrograms every 72 hours and Oxycotin 10mg every 12 hours for pain to be renewed every seven days. On 6/25/16, Patient #1's medication was due to be renewed, however, the hospitalist never renewed the medication. Patient #1 had not received the scheduled Oxycotin for 36 hours. On 6/26/16, the 7:00 am - 3:00 pm nurse noticed the pain medication had not been renewed and called the physician for a new order. Review of hospital policy identified that all Schedule I narcotic ordered will automatically be removed for the Medication Administration Record at 12:00 am on the seventh day if not renewed. Interview with MD #6 on 7/13/16 identified that he/she was not aware and/or educated of an alert on the computer identifying that a patient's narcotic medications was up for renewal. Interview with the Pharmacy Manager on 7/1/16	A 494			

DEPARTMENT OF HEALTH AND HUMAN SERVICES
CENTERS FOR MEDICARE & MEDICAID SERVICES

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION		(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER: 070007	(X2) MULTIPLE CONSTRUCTION A. BUILDING _____ B. WING _____		(X3) DATE SURVEY COMPLETED C 07/13/2016

"CUT & PASTE" DESCRIPTION OF EVENT HERE FROM LIST

NQF 3C. Patient suicide, attempted suicide, or self-harm that results in serious injury, while being cared for in a healthcare setting.

Facts of Event and Status of Patient Condition:

Patient is a 64 year old male with extensive past medical history of chronic abdominal pain, chronic obstructive pulmonary disease, pulmonary embolism, congestive heart failure, coronary artery disease, anxiety, diabetes mellitus, irritable bowel syndrome, traumatic brain injury, pancreatitis, small bowel obstruction, recurrent ileus, appendectomy, cholecystectomy, splenectomy and multiple abdominal surgeries secondary to adhesions and obstruction, who presented to the ED on June 17, 2016 at 1627 with sudden onset diffuse abdominal pain, nausea, and vomiting requesting pain control. CT scan revealed some nondescript gaseous distention of the transverse colon with some gas and fluid in the ascending colon. Patient was admitted under hospitalist service on June 17, 2016 with a plan to keep patient NPO, IV fluids, and pain control. Surgical consult assessment and plan consist of treating conservatively with strict NPO, intravenous fluids, intravenous antibiotics via PICC and rule out ischemia. Patient refused NG tube. Over hospital stay, patient diet advanced to clear liquids and then to full liquids. Patient bowel sounds returned as well as flatus, but negative bowel movement since admission. Patient transitioned from IV pain medication to PO pain medication in anticipation of discharge. On June 26, 2016 patient cleared by surgery for discharge, pending bowel movement and hospitalist service. On June 27, 2016 patient had increased pain, nausea, and vomiting. IV pain medication given as well as soapy suds enema. Last documented assessment at 1902. Patient last visualized at 2115. Patient found asphyxiated at 2145.

Immediate Plan of Action

6/27 Immediate call for assistance from other 6.2 nursing staff. CODE 8 called. CODE 8 team responded.

No pulse palpated. MD pronounced. Director and Administrator on call notified. Security notified and contacted NLPD. Scene secured. NLPD responded. Medical Examiner contacted and responded.

6/30 Suicide Education with staff

Crisis debrief

Huddle with unit clinical coordinators regarding audit of patients on unit for nursing admission assessment saved in EMR, risk/safety assessment concerns incorporated into nursing care plan, documentation of last bowel movement, and nursing assessments documentation completed once a shift.

Hi Heidi:

We are working on finalizing our CAP and while reviewing the CMS report, there are a couple of items we need to add to our CAP. It is my understanding that our CAP is due 30 days from date of incident which would be tomorrow. I was wondering if it would be possible to give us until Friday to finalize and submit our CAP?

Hi Heidi:

I wanted to follow up on some of the things you requested yesterday afternoon.

You had requested to meet with Dr. Donovan, Kelley Luther, APRN and Dr. Debaets. Please be advised that they have opted to have legal counsel present and those interviews will need to be coordinated through their legal counsel. I will provide your contact information to their attorney. If you have any questions or concerns, please do not hesitate to call me.

Hi Heidi:

We were able to fax it over this morning. Can you please confirm that you received it?

Hi Heidi,

We have tried to fax over the documents several times but it keeps telling us no answer. Can you confirm the fax machine is working. It is a large document 62 pages total

Thanks

Jennie

Hi Heidi

I just wanted to let you know that I believe I have all the interviews you requested scheduled for tomorrow. See you in the morning.

TO: All Providers

FROM: Daniel Rissi, MD, VP/Chief Medical & Clinical Operations Officer
Kenneth Donovan, MD, Chair, Department of Medicine
Robert Lincer, MD, Chari, Department of Surgery

DATE: July 13, 2016

This memo is to serve as a reminder of the CT state law mandates Schedule II Controlled Substance orders for inpatients expire after 7 days, and to increase awareness of the fact that these orders must be renewed or they will fall off the patient's profile.

Please see the below screenshots which are found on the orders tab of Mckesson HEO CPOE system. Once in the orders screen, you will see the fourth tab from the left on the bottom screen called "Renew". In the event that there is an order that needs to be renewed, this tab will be colored bright pink. To renew the expiring order(s), simply click on the tab and renew the orders.

While renewing orders is primarily a provider responsibility, both nursing and pharmacy staff will take measures to remind providers of orders soon to expire. The following methods will be utilized:

1. Nursing will incorporate review of expiring Schedule II orders with notification to prescriber as part of nightly chart check.
2. Pharmacy will incorporate this review as part of interdisciplinary rounds on all units pharmacy currently rounds on, which has been expanded to include CDU.
3. Once the Epic system is implemented in October 2016, a custom report will be available and run daily that lists all expiring controlled substance orders. The pharmacy will plan on running this report daily and communicating with prescribers regarding expiring orders.

Please contact the pharmacy at extension 2513 if there are any questions.

Patient with 2 narcotics about to expire within the next 24 hrs (2:59 am 7/14 to be exact):

Hi Heidi:

I just wanted to follow up and let you know that IPC has retained counsel for Drs. Donovan, Debaets and APRN Luther. They have retained Joyce Lagnese who is Neil Danaher's partner, and she is great to work with.

Joyce has been provided with your contact information and will reach out to you directly to schedule the interviews. She is aware that you were trying to schedule them for Monday or Tuesday of next week, and thought that Tuesday might work but would need to coordinate that with the providers.

In the meantime, if you have any questions, concerns, or if you need anything else, please do not hesitate to call or email me.

Sincerely,

Hi Heidi:

I wanted to follow up on some of the things you requested yesterday afternoon.

You had requested to meet with Dr. Donovan, Kelley Luther, APRN and Dr. Debaets. Please be advised that they have opted to have legal counsel present and those interviews will need to be coordinated through their legal counsel. I will provide your contact information to their attorney. If you have any questions or concerns, please do not hesitate to call me.

Sincerely,

Importance: High

Hi Heidi:

I wanted to follow up on some of the things you requested yesterday afternoon.

You had requested to meet with Dr. Donovan, Kelley Luther, APRN and Dr. Debaets. Please be advised that they have opted to have legal counsel present and those interviews will need to be coordinated through their legal counsel. I will provide your contact information to their attorney. If you have any questions or concerns, please do not hesitate to call me.

Sincerely,

Jennie C. Henriques, CPHRM

Hi Heidi:

I just wanted to follow up and let you know that IPC has retained counsel for Drs. Donovan, Debaets and APRN Luther. They have retained Joyce Lagnese who is Neil Danaher's partner, and she is great to work with.

Joyce has been provided with your contact information and will reach out to you directly to schedule the interviews. She is aware that you were trying to schedule them for Monday or Tuesday of next week, and thought that Tuesday might work but would need to coordinate that with the providers.

In the meantime, if you have any questions, concerns, or if you need anything else, please do not hesitate to call or email me.

Sincerely,

Jennie C. Henriques, CPHRM

14

15 HEARING OFFICER KEVIN HANSTED: Good
16 afternoon, everyone. Welcome back. This is the second
17 half of a hearing that we started on July 11, 2016 to
18 consider two applications, one under Docket No. 15-32032-
19 CON and the other under 15-32033-CON.

20 I would remind everyone that took the oath
21 at the first hearing that you are still under oath, and I
22 believe we completed Cross-Examination last time. I'm
23 sorry. Direct Examination last time. If that's
24 incorrect, please let me know.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MR. HENRY MURRAY: I believe it -- is this
2 on? I think it is, isn't it? Okay. I believe it was,
3 Mr. Hansted, but we had two individuals, who had
4 submitted pre-filed testimony, Maritza Bond and Dr.
5 Steven Smith, who were unable to be here, because of the
6 length of the public testimony last time, and I just
7 thought we would like them to be able to testify on
8 Direct, also, to provide -- make them available,
9 obviously, for the Applicants to Cross-Examine them,
10 also.

11 HEARING OFFICER HANSTED: Okay, is this on
12 15-32033?

13 MR. MURRAY: Yes, it is.

14 HEARING OFFICER HANSTED: Okay. Okay.
15 I'm going to allow that.

16 MS. JOAN FELDMAN: I'm going to have to
17 object.

18 HEARING OFFICER HANSTED: Okay. Based
19 upon what?

20 MS. FELDMAN: Well there are rules that I
21 would expect to be adhered to. I understand that one of
22 the witnesses was here and chose to leave, so --

23 HEARING OFFICER HANSTED: Okay. I'm going
24 to allow them to testify. I'll also allow you to Cross-

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Examine those folks.

2 But just before we get started with the
3 hearing again, for those folks that weren't here last
4 time, we had an opportunity for the public and elected
5 officials to give comment on both applications at the
6 beginning of the hearing last time.

7 This time, I will allow for public comment
8 again. It will be at the end of today's hearing, so
9 after we finish Direct Examination, complete Cross-
10 Examination, any Redirect we might have, and after OHCA's
11 questions, then we will go to the public comment portion
12 of the hearing.

13 MS. FELDMAN: Attorney Hansted, before we
14 begin, we do have three additional folks that might be
15 able to provide some answers to any questions that we
16 would like to have sworn in.

17 HEARING OFFICER HANSTED: Okay, that's
18 fine. Attorney Murray, do you have any additional
19 individuals that need to be sworn in?

20 MR. MURRAY: No, not for the Intervenors.
21 Well, yes. I believe, Maritza, you took the oath last
22 time. Okay, so, Dr. Smith is the only one that hasn't
23 been sworn in.

24 HEARING OFFICER HANSTED: Okay. If I

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 could have those folks please stand and raise your right
2 hand and be sworn in by the court reporter?

3 (Whereupon, Dr. Steven Smith, Christopher
4 O'Connor, Lisa Stump, Laurel Holmes and Pat McCabe were
5 duly sworn in.)

6 HEARING OFFICER HANSTED: Okay, thank you,
7 all. And, just for the record, would you please identify
8 yourselves one at a time into a microphone, those, who
9 just took the oath?

10 DR. STEVEN SMITH: Dr. Steven Smith.

11 HEARING OFFICER HANSTED: Thank you.

12 MR. CHRISTOPHER O'CONNOR: Christopher
13 O'Connor.

14 MS. LISA STUMP: Lisa Stump.

15 HEARING OFFICER HANSTED: Okay, thank you,
16 all.

17 MS. LAUREL HOLMES: Laurel Holmes.

18 MR. PAT McCABE: Pat McCabe.

19 HEARING OFFICER HANSTED: Thank you. Did
20 you get that, court reporter? Thank you. Okay, Attorney
21 Murray, if you want to have the two individuals that you
22 referenced earlier provide their testimony, I'll take
23 that now.

24 MR. MURRAY: Okay, thank you very much,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Mr. Hansted.

2 HEARING OFFICER HANSTED: Hold on.

3 MS. FELDMAN: Hold on. During the
4 interval since the last hearing and today, there were
5 several documents that were given administrative notice.
6 I would like to know whether or not you're going to
7 discuss that before we begin the testimony, or are we
8 just going to plan on proceeding from this point?

9 HEARING OFFICER HANSTED: I won't
10 specifically be discussing it, but if you want to comment
11 on it, I'll take comment on it.

12 MS. FELDMAN: Before I comment, I would
13 like some clarification, in terms of the weight that the
14 e-mail from Comptroller Lembo and the Milliman Study,
15 which we objected to at the last hearing, will be given
16 with respect to the record.

17 HEARING OFFICER HANSTED: I really can't
18 make that determination at this point until I look at the
19 entire record as a whole. I can't tell you what
20 percentage I would give it, as to weight.

21 MS. FELDMAN: Okay, well, for the record,
22 just looking at Connecticut General Statute, Section 4-
23 178, which refers to evidence in contested cases, it lays
24 out the criteria for introducing these documents into

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 evidence and having greater weight than perhaps the
2 public testimony, and I point your attention to items one
3 and six.

4 Item one says that, if the information is
5 irrelevant, immaterial, or unduly repetitious evidence,
6 it should not be introduced, or item six, notice may be
7 taken of judicially cognizable facts and of generally
8 recognized technical or scientific facts within the
9 agency's specialized knowledge.

10 With respect to the Milliman report, I
11 believe at the last hearing I objected on the basis that
12 I thought that the document, itself, was completely
13 unreliable, irrelevant.

14 And if you look at the first two pages
15 that were not present on July 11th, but that were part of
16 the e-mail that Comptroller Lembo sent, even Milliman,
17 itself, states that on page two of three that any third
18 party recipient of Milliman's work product, who desires
19 professional guidance, should not rely upon Milliman's
20 work product, but should engage qualified professionals
21 for advice appropriate to specific needs.

22 There's also other disclaimers in the
23 first two pages of the document. In fact, I think
24 there's a typo, because they said they relied on

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Milliman's health cost guideline grouping mythologies.

2 In addition, we don't think the data is
3 relevant, in that it does not take into effect the acuity
4 of the patient or the other factors that they,
5 themselves, identified, in terms of various cost,
6 geographic areas, catastrophic claims, and quality of
7 care.

8 So we don't know whether this is complete
9 data, we don't think it's reliable data, and, for those
10 reasons, we object to it being introduced as evidence
11 that would have any weight, other than public testimony,
12 beyond that of public testimony.

13 HEARING OFFICER HANSTED: Okay. I would
14 ask that you put your objection in writing, and I'll rule
15 on it in writing.

16 MS. FELDMAN: Okay. Can I also object to
17 Comptroller Lembo's letter? I would have assumed that
18 this letter would have been similar to any other letters
19 that OHCA would receive, and that this, too, would not be
20 given any additional weight beyond that of public
21 testimony.

22 There is, interestingly, an e-mail that
23 accompanies the Milliman data, which seems to be at odds
24 with the position that the Comptroller took in this

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 letter.

2 He seems to be comfortable with the fact
3 that, in the e-mail, he states that he understands now
4 that this is not a merger that this application
5 describes, but that it is an affiliation, so I think a
6 lot of what he says in his letter is irrelevant.

7 HEARING OFFICER HANSTED: Okay, thank you.

8 MR. MURRAY: Mr. Hansted?

9 HEARING OFFICER HANSTED: Yes.

10 MR. MURRAY: If Attorney Feldman is going
11 to put her objection in writing, would we be given an
12 opportunity to weigh in on that, or would you like our
13 comments now?

14 HEARING OFFICER HANSTED: No, I'll allow
15 you an opportunity to weigh in in writing.

16 MR. MURRAY: Okay.

17 HEARING OFFICER HANSTED: So, Attorney
18 Feldman, I would ask that your objection be filed by --
19 let's see. Today is Tuesday. By Friday. Does that give
20 you enough time?

21 MS. FELDMAN: Sure.

22 HEARING OFFICER HANSTED: By Friday. And,
23 Attorney Murray, a response by you by the following
24 Friday.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MR. MURRAY: That's fine. Thank you.

2 HEARING OFFICER HANSTED: Okay.

3 MR. MURRAY: Mr. Hansted, just before we
4 move on, just for the record, when the comment that -- I
5 think, if one carefully reads the Milliman report, you'll
6 see that page two is often what we would refer to as risk
7 analysis of language, in the sense that I believe it's
8 probably for Milliman's protection, so that they're not
9 quoted.

10 It has nothing to do with the reliability
11 of the information, but I'll put that in writing.

12 HEARING OFFICER HANSTED: Thank you.
13 Counsel, anything further?

14 MS. FELDMAN: No.

15 HEARING OFFICER HANSTED: Okay. Attorney
16 Murray, if you want to have your two witnesses present
17 their evidence?

18 MR. MURRAY: Yeah. The Intervenors would
19 call Maritza Bond.

20 MS. MARITZA BOND: Good afternoon.

21 HEARING OFFICER HANSTED: Good afternoon.

22 MS. BOND: My name is Maritza Bond. I am
23 the Executive Director for Eastern Area Health Education
24 Center, and I adopt my pre-filed testimony.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 HEARING OFFICER HANSTED: Thank you.

2 MS. BOND: Our local non-profit
3 organization, which implements services within Windham
4 and New London County, our mission is to ensure that
5 access to quality healthcare services are delivered in a
6 culturally and linguistic manner. This includes
7 equitable distribution of the healthcare workforce. I am
8 also a coalition member of both Windham and New London.

9 Today, I am here in the interest of
10 underserved communities, whose voices are not able to be
11 heard, and to share what I am witnessing in the Windham
12 community upon the Hartford HealthCare merger.

13 In Windham, we are already experiencing
14 the impact of what can occur when hospital services are
15 reduced following a merger.

16 This past year, a woman in her early
17 fifties with limited English proficiency suffered a
18 stroke. When transported to Windham Hospital, the family
19 was told they could not provide the care she needed,
20 because they did not have a neurologist on site.

21 Instead, the woman was put in a Life Star
22 helicopter and transported to Hartford Hospital. This
23 was detrimental to both the patient and the family
24 members, who were left to drive over 30 minutes to be by

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 her side.

2 There were no language services provided
3 or offered, and there was no way to effectively
4 communicate with this patient. Thankfully, this woman's
5 story did not end tragically.

6 During the Hartford HealthCare merger,
7 promises were made that services were not going to be
8 reduced, nor eliminated.

9 Nonetheless, this is not the case. With
10 the CCU now being closed, patients are traveling long
11 distances by ambulance, private car, or even helicopter
12 for urgently-needed care that used to be available at
13 Windham. At the end, Hartford's original CON was filled
14 with broken promises.

15 If this acquisition is a necessity for
16 improving efficiency, then I would request that the CON
17 application have clear provisions in place that will
18 protect the community of New London and surrounding
19 areas.

20 We must ensure that access to healthcare
21 would not be reduced, outsourced, or eliminated, services
22 will be affordable to all patients from all social
23 economic backgrounds and cultural background, and to
24 ensure that local healthcare workforce are not eliminated

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 or replaced, due to this new regionalization of
2 healthcare phenomenon that is happening in the state and
3 across the country.

4 It is my hope that this acquisition truly
5 leads to improving health outcomes of this community and
6 not just the bottom line of improving the financial
7 status of an organization.

8 Thank you for the opportunity to provide
9 testimony before you today.

10 HEARING OFFICER HANSTED: Thank you.

11 MR. MURRAY: The Intervenors would like to
12 call for testimony of Dr. Steven Smith.

13 DR. SMITH: Thank you. Good afternoon,
14 Attorney Hansted and OHCA staff.

15 HEARING OFFICER HANSTED: Good afternoon.

16 DR. SMITH: I'd like to adopt my pre-filed
17 testimony as my own.

18 My name is Steven Smith. I'm a family
19 physician, and I practice at the Community Health Center
20 here in New London. I'm also Professor Emeritus of
21 family medicine at the Warren Alpert Medical School at
22 Brown University, and I served as Associate Dean of
23 Medicine at Brown University for 25 years.

24 I also taught an undergraduate health

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 policy course during that time, and after scouring and
2 critically reviewing the literature, one lesson is very
3 clear.

4 By and large, hospital mergers are not
5 good for the public. Most of the time, prices end up
6 rising. Most of the time, quality does not improve, and
7 safety does not improve.

8 The often mentioned efficiencies often
9 never materialize, and, worst of all, as Ms. Bond has
10 just testified, local access to vital services sometimes
11 are terminated. The other thing is that, when hospitals
12 acquire physician practices, productivity plummets.

13 This article, which is in our Exhibit 2,
14 just came out a few weeks ago, June 16th, in New England
15 Journal, by McWilliams, et al, and it's the first report
16 of early performance of Accountable Care Organizations in
17 Medicare.

18 And the article states that savings are
19 achieved only by independent physician primary care
20 practices, not by hospital-owned practices.

21 One wonders whether the dire call for more
22 capital by the Applicants might, in fact, just be used to
23 acquire more physician practices and increase the
24 hegemony over physician services here in Southeastern

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Connecticut.

2 In my opinion, hospital mergers can only
3 be justified if there are no other available options to
4 save a financially-distressed hospital, and we know from
5 publicly-available documents that L & M operates in the
6 black and is not financially-threatened.

7 If any other benefits are being suggested
8 as a justification for a merger or whatever you want to
9 call it, but these benefits can be achieved by some other
10 way, then a merger should not really be considered.

11 Just such a claim is being made by the
12 Applicants, in terms of close clinical coordination.
13 What I want to testify is that, in fact, close clinical
14 coordination can be achieved without legal acquisition,
15 merger affiliation, whatever you want to call it.

16 As a physician at the Community Health
17 Center in New London, I have instant access to the
18 records at L & M through a portal, so I can get x-ray
19 reports, I can get laboratory reports, I get hospital
20 admissions and discharge summaries only at the touch of a
21 key.

22 Emergency room physicians, if they're
23 seeing some of our patients in the hospital through a
24 procedure that we've established with the hospital, can

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 guarantee that those patients are seen within 24 hours,
2 and our Community Health Center and L & M are completely
3 separate, independent institutions.

4 In terms of ER, I mean my relationships
5 with physicians at Yale, they're excellent. In fact,
6 recently, with the patient with the severe pulmonary
7 disease, another patient with vascular problems, I'm on
8 the phone with the specialists in New Haven, and they can
9 ask me to see the patients, order tests in between,
10 without any need for formal merger between the two.

11 The neonatal intensive care unit at L & M
12 is, in fact, manned, staffed by neonatologists, who are
13 employees at Yale-New Haven, without the need for any
14 kind of merger.

15 Again, babies, who are discharged from the
16 NICU can be seen in my clinic within 24 hours with
17 arrangements we've made with them.

18 Community hospitals like L & M should
19 maintain close clinical coordination with a tertiary care
20 hospital like Yale, and they've managed to do so, without
21 the need for a formal affiliation.

22 I believe they should continue to do what
23 they've done for years and adopt those kinds of close
24 cooperations, without the need for formal merger. That

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 will benefit our patients here in Southeastern
2 Connecticut and maintain our independent community
3 hospital. Thank you very much.

4 HEARING OFFICER HANSTED: Thank you,
5 Doctor.

6 MR. MURRAY: Attorney Hansted, that
7 concludes the testimony for the Intervenors.

8 HEARING OFFICER HANSTED: Okay, thank you,
9 Attorney Murray. Attorney Feldman, do you have any
10 Cross-Examination?

11 MS. FELDMAN: I do.

12 HEARING OFFICER HANSTED: Okay.

13 MS. FELDMAN: I would like to Cross Mr.
14 Hyde. Mr. Hyde, are you referred to as Dr. Hyde, or
15 Attorney Hyde, or Mr. Hyde? I want to make sure I refer
16 to you properly.

17 DR. FRED HYDE: Dr. Hyde will do.

18 MS. FELDMAN: Dr. Hyde? And are you a
19 doctor of economics?

20 DR. HYDE: No, no. My degree in medicine
21 is an MD from Yale.

22 MS. FELDMAN: Okay, very good. Mr. Hyde,
23 is it true, is it not, that since 1981 you have been
24 engaged as a consultant with respect to the management of

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 healthcare facilities?

2 DR. HYDE: Yes.

3 MS. FELDMAN: Okay. As part of your
4 consultancy, you served as CEO of various hospitals,
5 including Windham and Winsted?

6 DR. HYDE: Two hospitals, Windham and, in
7 Western Pennsylvania, Aliquippa. When I was Chief
8 Executive of the Winsted Health Center Foundation, it had
9 closed as a hospital and reopened as a community health
10 center.

11 MS. FELDMAN: Okay, thank you. Is it also
12 true that, while you were serving as CEO of Windham
13 Hospital, that Attorney General Blumenthal initiated an
14 investigation of the misuse of endowment funds while you
15 were CEO, and, as a result of that investigation, there
16 was a settlement agreement, which was reached between the
17 AG's office and Windham Hospital, which required you to
18 refund or reinvest \$1.8 million back into the endowment?

19 DR. HYDE: Yes.

20 HEARING OFFICER HANSTED: And just for the
21 benefit of the public, the AG's office is the Attorney
22 General's office.

23 MS. FELDMAN: And, as part of your
24 consultancy, is it fair to say that you've been engaged

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 by and testified on behalf of community hospitals in
2 opposition to their acquisition by a larger hospital
3 system?

4 DR. HYDE: I believe that's true, but if
5 you ask me about a specific, I could be more accurate.

6 MS. FELDMAN: Okay, well, let me ask you
7 this question. Have you ever, at any time, testified in
8 favor of the acquisition of a small community hospital by
9 a larger health system or hospital?

10 DR. HYDE: I don't believe so.

11 MS. FELDMAN: Okay, so, to date, it seems
12 as if your position has been pretty much negative with
13 respect to such acquisitions, and, so, I want to bring
14 your attention to an article written in the Hartford
15 Courant, an editorial written by you on January 11, 2009,
16 where you criticize the -- the title of it is This Merger
17 is Malpractice, Bad Deal, In Perils, UConn Facilities
18 Mission. Did you write that editorial?

19 DR. HYDE: I'd have to take a look at it.
20 It's been seven years from the date you cite.

21 MR. MURRAY: I'd like an opportunity to
22 look at that.

23 HEARING OFFICER HANSTED: Sure.

24 DR. HYDE: Yes, that's correct.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MS. FELDMAN: Is it fair to say that the
2 list of horrors that you describe in that article
3 cannot be generalized to all affiliations?

4 DR. HYDE: Could you repeat your question,
5 please?

6 MS. FELDMAN: Well, in your testimony in
7 this proceeding and your pre-filed testimony and your
8 response to Dr. Noether's pre-filed testimony, you take a
9 rather negative stance with respect to this proposed
10 application, and you do the same in that editorial you
11 submitted to the Hartford Courant regarding Hartford
12 HealthCare and its affiliation with UConn Health Center.

13 Is it accurate to say that the horrors
14 that you describe cannot be generalized with respect to
15 every affiliation by a large system and a small community
16 hospital?

17 DR. HYDE: I think it would be accurate to
18 say at least three things from a review of this article.
19 First, that my views haven't changed. My clients find
20 me, because of my views. I don't alter them to fit my
21 clients.

22 Secondly, that the John Dempsey Hospital,
23 which continues today as an independent institution,
24 would, in all likelihood, not continue, not have

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 continued, but for the effort of the Unions that
2 represented employees and the faculty to oppose a
3 Hartford takeover.

4 Third, that fundamental in the examination
5 of the takeover were specifics concerning prices. I
6 recall, for example, members of the legislature asking
7 officials from the University of Connecticut Health
8 Center specific questions, as opposed to generalities,
9 about budgets and prices.

10 So those three things I think would be my
11 summary, quickly reviewing this. My views haven't
12 changed. I believe that the medical faculty and the
13 Unions, who opposed a takeover of Dempsey by Hartford at
14 the time, were correct, and that many of the issues
15 discussed by the executive leadership were discussions
16 that were taking place in the absence of close
17 examination of the facts.

18 MS. FELDMAN: Would it be fair to say that
19 you would object to any acquisition by a large healthcare
20 system of a small community hospital?

21 DR. HYDE: It would be fair to say that we
22 have, as a nation and what I attempted in 14 years of
23 teaching to pass along to students, extraordinary
24 problems with access, that we've gone from 60, 200

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 independent hospitals in modern times before the DRG
2 revolution to 4,900 hospitals, that, as a consequence and
3 with another 500 or so in periled and rural areas, that,
4 as a consequence, access to small hospital services,
5 which might be either guaranteed by their assumption by
6 large hospitals or by strengthening their independence,
7 I've always believed in the latter.

8 MS. FELDMAN: When you were CEO of Windham
9 Hospital, was Windham Hospital a sole community hospital
10 not affiliated with Hartford HealthCare?

11 DR. HYDE: No. At the time, it was not.

12 MS. FELDMAN: Okay and when you left
13 Windham Hospital, is it true that Windham Hospital was
14 financially \$6 million in the red?

15 DR. HYDE: Windham was actually in
16 reasonably good position in comparison to other
17 Connecticut hospitals. We had rebuilt the hospital
18 entirely.

19 My successor, Mr. Brvenik, did an even
20 better job in operations and used the new facilities to
21 restore complete financial health.

22 In fact, for the three years prior to
23 2008, when Hartford first became involved, Windham was
24 doing fine.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MS. FELDMAN: In your pre-filed testimony,
2 I believe this was attached as an exhibit. It's Hospital
3 Market Concentration in Connecticut, the Impact of Yale-
4 New Haven Health Systems Expansion. I just have a simple
5 question.

6 DR. HYDE: You're referring to Exhibit 4
7 or Attachment 4, and which page, if any, would you like
8 me to address?

9 MS. FELDMAN: Just generally, did you --
10 could you tell me who prepared this, who wrote this?

11 DR. HYDE: I had no role in writing this,
12 but I have relied on this document for a statement I made
13 in my testimony.

14 MS. FELDMAN: Okay, thank you.

15 DR. HYDE: If I may complete my answer,
16 Mr. Hansted?

17 HEARING OFFICER HANSTED: Go ahead.

18 DR. HYDE: I stated that Yale-New Haven
19 and Lawrence & Memorial were important competitors, a
20 statement contested by Dr. Noether.

21 In fact, a reference to a bond issue
22 footnote in this document confirms that 80 percent of
23 Yale-New Haven's work is as a community hospital from its
24 primary service area.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Fifteen percent is from its so-called
2 referral service area, which, of course, includes the
3 entirety of Lawrence & Memorial service area. Five
4 percent is beyond that.

5 I don't say that to diminish the role of
6 Yale-New Haven in providing primary and secondary care to
7 its community, but, rather, to emphasize that the markets
8 that are perceived by Yale-New Haven to be part of its
9 primary responsibility overlap with those of Lawrence &
10 Memorial.

11 MS. FELDMAN: No further questions for Mr.
12 Hyde.

13 HEARING OFFICER HANSTED: Attorney Murray,
14 do you have any Redirect?

15 MR. MURRAY: Just give me a second. No
16 Redirect.

17 HEARING OFFICER HANSTED: Okay. Attorney
18 Feldman, did you have Cross for any of his other
19 witnesses?

20 MS. FELDMAN: No, I don't.

21 HEARING OFFICER HANSTED: Okay. Attorney
22 Murray, do you have any --

23 MR. MURRAY: I just wanted to make a
24 comment on the last round of questioning that Attorney

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Feldman did, in terms of the report that she was
2 referring to.

3 If OHCA would like that, the Intervenors -
4 - that report was written by someone, an analyst. She
5 was an employee of one of the Intervenors. We can
6 certainly provide, if OHCA wants it, all of the data
7 files, in which that report was based.

8 HEARING OFFICER HANSTED: No. Thank you,
9 Attorney Murray. That will be fine.

10 MR. MURRAY: Okay.

11 HEARING OFFICER HANSTED: Do you have any
12 Cross-Examination?

13 MR. MURRAY: Yes, I do, of a couple of the
14 Applicant's witnesses. Let me just get my notes here.

15 Yes, I have questions for Dr. Sanfilippo.
16 Good afternoon, Doctor.

17 DR. LOUIS SANFILIPPO: Good afternoon.

18 MR. MURRAY: You're a member of the
19 Lawrence & Memorial Board of Directors, correct?

20 DR. SANFILIPPO: Yes.

21 MR. MURRAY: Okay and in both your pre-
22 filed testimony and the testimony here on July 11th you
23 stated that the L & M Board of Directors made sure that,
24 as a result of the acquisition by Yale-New Haven Health

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 System, L & M Board would remain in place and continue to
2 govern locally, is that correct?

3 DR. SANFILIPPO: That is correct.

4 MR. MURRAY: Okay. You even asserted that
5 the acquisition by Yale-New Haven Health System was in
6 stark contrast, and I'm quoting that, that was in your
7 testimony, to how other systems in the State govern
8 locally, is that correct?

9 DR. SANFILIPPO: That is correct.

10 MR. MURRAY: Okay and, in fact, you even
11 drew a distinction between this acquisition and Hartford
12 Hospital, Hartford HealthCare's acquisition of Windham
13 Hospital, correct?

14 DR. SANFILIPPO: Yes.

15 MR. MURRAY: Okay and, finally, I believe
16 in your testimony you asserted that the Board of L & M
17 made sure, and, again, that's in quotes, that's in your
18 testimony, that there wouldn't be a loss of local
19 control, is that correct?

20 DR. SANFILIPPO: That's correct.

21 MR. MURRAY: Okay, now, as part of the
22 application, you and the L & M Board have final proposed
23 amended corporate bylaws that will govern the future
24 operation of L & M, correct?

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 DR. SANFILIPPO: Yes.

2 MR. MURRAY: Okay and, as part of the due
3 diligence as a Board member and in your words from your
4 July 11th testimony as fiduciary to the community, when
5 you and the other Board members reviewed the changes in
6 the corporate governance, did you understand that Yale-
7 New Haven Health System would become the sole member of
8 the L & M Corporation?

9 DR. SANFILIPPO: Yes.

10 MR. MURRAY: Okay and under the proposed
11 new bylaws for the L & M Corporation, there are two
12 classes of trustees on the Board, correct, elected
13 trustees and ex officio trustees?

14 DR. SANFILIPPO: Yes.

15 MR. MURRAY: And the ex officio trustees
16 consist of the President/CEO of L & M and the Board
17 Chairs for each of its affiliates, correct? L & M
18 Hospital, Westerly Hospital and the VNA?

19 DR. SANFILIPPO: Yes.

20 MR. MURRAY: Okay and, also, the
21 President/CEO of the sole corporate member, Yale-New
22 Haven Health System, correct?

23 DR. SANFILIPPO: And I believe the
24 President of the medical staff, as well.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MR. MURRAY: Okay. I may have missed that
2 in reading. Okay and, as the sole corporate member of
3 the L & M Corporation, you're aware, aren't you, that,
4 under Section 3.2 of the proposed bylaws --

5 MS. FELDMAN: I think he's going to need
6 to look at the bylaws.

7 MR. MURRAY: I'll give you the citation.
8 It's page 186 of the Certificate of Need application.

9 DR. SANFILIPPO: Okay, go ahead with your
10 question.

11 MR. MURRAY: Okay. Let me repeat the
12 question. As the sole corporate member of the L & M
13 Corporation, you're aware, aren't you, that, under
14 Section 3.2 of the proposed bylaws, that Yale-New Haven
15 has the sole authority to select or elect, depending on
16 the word that's used in the bylaws, the elected trustees
17 to the L & M Corporation Board?

18 DR. SANFILIPPO: Yes.

19 MR. MURRAY: Okay and you're aware, aren't
20 you, that under the proposed post-acquisition bylaws,
21 that Yale-New Haven Health System, as the sole corporate
22 member, has the power to reject nominees proposed by the
23 trustees of the L & M Corporation Board? That's Section
24 3.4 of the proposed bylaws.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 DR. SANFILIPPO: Yes. We were also
2 advised by Bridgeport and Greenwich Hospitals on how the
3 operation would take place.

4 MR. MURRAY: Okay, so, if I understand it,
5 you were advised that this is the same corporate
6 governance model that both Bridgeport and Greenwich have,
7 is that correct?

8 DR. SANFILIPPO: It is comparable, yes.

9 MR. MURRAY: Okay, but my question was
10 simply that you were aware that if Yale-New Haven Health
11 System, as a sole corporate member, did not like the
12 candidates being proposed by the L & M Board, that it had
13 the sole power to reject those and elect whoever it chose
14 fit to be on the Board?

15 DR. SANFILIPPO: Yes.

16 MR. MURRAY: Okay, now --

17 DR. SANFILIPPO: We were also
18 parenthetically advised that both Bridgeport and
19 Greenwich had never had any of their Board selections
20 rejected.

21 MR. MURRAY: Okay, but we're talking about
22 L & M, aren't we?

23 DR. SANFILIPPO: Yes, we are.

24 MR. MURRAY: Okay and you're also aware,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 aren't you, that under the proposed post-acquisition
2 bylaws, that the L & M Board would no longer have the
3 power to appoint the President and CEO?

4 DR. SANFILIPPO: Yes.

5 MR. MURRAY: But that power would reside
6 solely in the sole corporate member?

7 DR. SANFILIPPO: Yes, we were aware of
8 that.

9 MR. MURRAY: Okay and it's true, isn't it,
10 that under that bylaw provision, the bylaws state
11 explicitly that the President and CEO of Lawrence &
12 Memorial Corporation serves at the pleasure of the member
13 and not at the pleasure of the L & M Board?

14 DR. SANFILIPPO: Yes.

15 MR. MURRAY: Okay, now, I want to ask you
16 a couple of questions. We just talked about the elected
17 Board members, and I just have a couple of questions to
18 ask you about the ex officio members of the Board.

19 Now the remaining three ex officio members
20 of the Board, which are the L & M Hospital, Westerly
21 Hospital and the VNA, those Boards are all selected by
22 the sole corporate member now of the L & M Corporation,
23 which is the L & M Board, correct?

24 DR. SANFILIPPO: Yes, and there's no plans

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 to change that.

2 MR. MURRAY: Okay, but, as the sole
3 corporate member, Yale-New Haven Hospital would be in a
4 position to change the composition of those particular
5 Boards if it chose to, couldn't it?

6 DR. SANFILIPPO: Yes.

7 MR. MURRAY: Okay, now, Dr. Sanfilippo, as
8 a Board member, did you read the proposed L & M post-
9 acquisition bylaws, including Exhibit A and Exhibit B to
10 those bylaws, which can be found on pages 197 to 198 of
11 the application?

12 MS. FELDMAN: Say those pages again?

13 MR. MURRAY: 195 to 198.

14 MS. FELDMAN: Just one second.

15 DR. SANFILIPPO: Yes, we reviewed this.

16 MR. MURRAY: Okay and you would agree with
17 me, wouldn't you, that, if you read Exhibit A, it sets
18 out, doesn't it, that virtually every management action
19 by the L & M Board can only be taken with the approval of
20 the sole corporate member?

21 DR. SANFILIPPO: We realize that this
22 would all be -- first of all, this document was mutually
23 agreed upon, and, second of all, we do agree that these
24 would be joint decisions.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MR. MURRAY: I'm sorry. I couldn't hear
2 what you said.

3 DR. SANFILIPPO: These would be joint
4 decisions.

5 MR. MURRAY: Well I understand that. That
6 may have been the assurances, and that may have been what
7 you said. I'm simply asking you isn't it true that
8 Exhibit A provides for the fact that every major decision
9 must have the approval of the sole corporate member?

10 DR. SANFILIPPO: Those decisions cannot be
11 made without the approval of the local Board.

12 MR. MURRAY: Okay and Exhibit B in the
13 bylaws gives the sole corporate member the --

14 MS. FELDMAN: Just one second.

15 MR. MURRAY: I'm sorry.

16 DR. SANFILIPPO: Go ahead with your
17 question.

18 MR. MURRAY: Yeah. Exhibit B gives the
19 sole corporate member, Yale-New Haven Health System, the
20 retained authority to set budget targets, incur debt on
21 behalf of L & M, and control the liquid assets, appoint
22 auditors, and, if it chooses, designate any activity a
23 major activity requiring its approval before L & M or any
24 of its affiliates can take action?

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 DR. SANFILIPPO: Yes.

2 MR. MURRAY: Okay.

3 DR. SANFILIPPO: This is what we
4 understand is how a system would work, since we already
5 are a system. We're just going by how we've done things,
6 and this is how the system would work.

7 MR. MURRAY: Right, so, in other words,
8 the way the system operates, in terms of Lawrence &
9 Memorial Corporation, the Lawrence & Memorial
10 Corporation, is that you have lots of retained authority
11 as the sole member for all the other affiliates, L & M
12 Hospital, the Physicians' Association and the VNA,
13 correct?

14 DR. SANFILIPPO: And Westerly Hospital.

15 MR. MURRAY: Excuse me. And Westerly
16 Hospital. And what would change under these bylaws is
17 that that power that the L & M Corporation currently has
18 would now be retained and exercised by the sole corporate
19 member, which is the Yale-New Haven Health System,
20 correct?

21 MS. FELDMAN: Can you restate the
22 question, please?

23 MR. MURRAY: Okay. It's a long question.
24 As it is right now, Lawrence & Memorial Corporation

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 retains certain authority with respect, as the sole
2 corporate member, retains authority with respect to your
3 other affiliates, L & M Hospital, Westerly Hospital and
4 the VNA, correct?

5 DR. SANFILIPPO: At a high level, yes.

6 MR. MURRAY: Okay and when Yale-New Haven
7 Health System becomes the sole corporate member of the L
8 & M Corporation, it will retain the authority that L & M
9 currently exercises now, correct?

10 DR. SANFILIPPO: Somewhat, yes.

11 MR. MURRAY: Well somewhat. The powers
12 retained by the sole corporate member in Exhibit A and
13 Exhibit B are pretty clear, aren't they, Dr. DeFilippo?
14 Sanfilippo. Pardon me.

15 DR. SANFILIPPO: No, I would disagree with
16 that. Exhibit A and B reflect joint governance.

17 MR. MURRAY: Joint governance. Joint
18 governance is a situation, where someone can make --
19 would you agree with me that situations of joint
20 governance is where one party can't take an action,
21 unless it has the approval of the other party?

22 DR. SANFILIPPO: Yes.

23 MR. MURRAY: Okay and nothing in the
24 proposed bylaws does it indicate that Lawrence & Memorial

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Board of Directors can take an action without the
2 approval of the sole corporate member or that the
3 Lawrence & Memorial Board can veto any of the actions
4 taken by the sole corporate member?

5 MS. FELDMAN: Can you restate the
6 question?

7 DR. SANFILIPPO: I don't understand the
8 question.

9 MR. MURRAY: Okay. I prefaced it by
10 saying that joint governance is a situation, and you
11 agreed with me, where one party can't act without the
12 approval of another party, correct?

13 DR. SANFILIPPO: With respect to the
14 specifics in Exhibit A, yes, I would agree.

15 MR. MURRAY: Okay, but, in Exhibit A and
16 Exhibit B and elsewhere in the proposed bylaws it's
17 pretty clear that Yale-New Haven Health System, as a sole
18 corporate member post-acquisition of the L & M Board,
19 retains the authority to take actions without the
20 approval of the L & M Board and, conversely, that the L &
21 M Board can't take any actions without Yale-New Haven
22 Health System's approval, isn't that true?

23 DR. SANFILIPPO: I would say no.

24 MR. MURRAY: Okay.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 DR. SANFILIPPO: That's incorrect.

2 MR. MURRAY: Okay. Can you point to where
3 in any of the proposed bylaws post-acquisition the
4 Lawrence & Memorial corporate trustees retain the power
5 to act against the expressed consent of the sole
6 corporate member?

7 DR. SANFILIPPO: We retain the power for
8 local day-to-day operations, clearly, in this.

9 MR. MURRAY: So local day-to-day
10 operations. Would you agree with me, then, that major
11 decisions, major financial, clinical, strategic decisions
12 are ones, which the sole corporate member retains the
13 authority on?

14 DR. SANFILIPPO: No.

15 MR. MURRAY: And, again, can you point
16 anywhere in the bylaws that it indicates that governance
17 is joint governance, as opposed to governance by a sole
18 member?

19 MS. FELDMAN: I'm going to object. These
20 questions are very broad in scope and confusing. With
21 respect to the last question regarding control over
22 clinical, I don't even know what that means, and I think
23 he's leading my witness.

24 HEARING OFFICER HANSTED: Counsel?

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MR. MURRAY: I'm simply -- you know, the
2 Applicants put in quite a thick number of volumes,
3 including the proposed bylaws of the corporation.

4 The bylaws are very clear on what a sole
5 corporate member's powers are. The literature, you know,
6 the law review literature about what it is to be apparent
7 as the sole corporate member is very voluminous, and
8 we're happy to submit them, but I don't think we need to.

9 All I'm simply saying is that these are
10 their documents. I think we have a right to ask
11 questions.

12 MS. FELDMAN: We don't need to look at law
13 review articles to understand corporate governance. And
14 I agree with Attorney Murray, that this document is
15 crystal clear. I'm afraid that he doesn't understand the
16 document and how it's intended to work, and he keeps
17 restating the same question in a way that's trying to put
18 words in my witness's mouth.

19 MR. MURRAY: I'm not going to take umbrage
20 with saying that I don't understand the document. That's
21 okay. I'm not the witness. I don't need to understand
22 the document.

23 MS. FELDMAN: Well you do if you're going
24 to ask questions that are meaningful.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MR. MURRAY: Well, Attorney Feldman, I
2 think you just betrayed the issue that we have here, and
3 I'm going to say something.

4 You said the intent of the documents. I'm
5 talking about the black and white words of the document,
6 and that's why I intended to ask the question of the
7 witness.

8 The documents are crystal clear about the
9 power and the retained power of the sole corporate
10 member. Whether the Lawrence & Memorial Board of
11 Trustees was told something different in a sotto voce
12 conversation, I don't know, but the documents are pretty
13 clear.

14 MS. FELDMAN: I think I would agree that
15 the documents are very clear, and I think that Exhibit A
16 articulates those types of decisions that need to be made
17 jointly by L & M Corporation and Yale-New Haven Health
18 System.

19 I don't think we need to belabor them.
20 They're very clear, and they're very limited, so I don't
21 understand the questioning.

22 HEARING OFFICER HANSTED: Attorney Murray,
23 I'm going to sustain the objection. I think the document
24 speaks for itself.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MR. MURRAY: I was about to end my
2 questioning of Dr. Sanfilippo.

3 HEARING OFFICER HANSTED: Thank you.
4 We'll move on from this line of questioning.

5 MR. MURRAY: Okay. I have no other
6 questions, Doctor. We have some questions for Marna
7 Borgstrom. Good afternoon.

8 MS. MARNA BORGSTROM: Good afternoon.

9 MR. MURRAY: Ms. Borgstrom, during the
10 application process, OHCA repeatedly asked for price
11 information related to Yale-New Haven's contracts with
12 commercial insurers for common diagnoses and procedures.

13 The Applicants have refused to provide
14 this information, citing both the confidential and
15 proprietary nature of the data sought.

16 On January 1st of 2017, all of this
17 information related to the actual prices received from
18 such commercial insurers or other third party payers will
19 become public.

20 In light of this development and the
21 inevitable disclosure of this information within the next
22 six months, the Applicant's arguments to prevent the
23 release of information now seems to be out of step with
24 this movement towards transparency.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Given these facts, why won't the
2 Applicants release the price information requested by
3 OHCA?

4 MS. FELDMAN: I have to object, because I
5 believe that he misstated the request of OHCA. OHCA
6 requested risk adjusted data, and the Applicants
7 responded by stating that that data is in the hands of
8 the payers and was not available to us, nor did we have
9 the capability, just like any other hospital system in
10 the state or presumably nationally, have the capability
11 of producing that data, and that is not the same data
12 that was produced in the Milliman exhibit that was
13 introduced by the Intervenors.

14 HEARING OFFICER HANSTED: Attorney Murray,
15 response?

16 MR. MURRAY: I guess I'm going to go to
17 the January 1, 2017 disclosures. Ms. Borgstrom, you
18 would agree with me that the data, in terms of the prices
19 actually paid by providers, will be available on January
20 1st, correct?

21 MS. FELDMAN: We're unaware. I'm not sure
22 what he's referring to.

23 MR. MURRAY: Through the Health Exchange.

24 MS. FELDMAN: The Health Exchange? Okay.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 I don't know if this is appropriate for me to say. I
2 think you mean the All-Payer Claims Database?

3 MR. MURRAY: That's correct.

4 MS. FELDMAN: I happen to be counsel for
5 the All-Payer Claims Database, and that is not
6 information that's available and will not be available as
7 of January 1, 2017.

8 MR. MURRAY: In objecting to my question
9 before, Attorney Feldman said that the Applicants claim
10 that this data, that data was in the hands of the payers.
11 Can you point to specifically where the Applicants make
12 that claim?

13 MS. FELDMAN: Well what data are we
14 talking about here, because it's unclear to me?

15 MR. MURRAY: The data that OHCA requested.

16 MS. FELDMAN: That's risk adjusted data?

17 MR. MURRAY: Yeah.

18 MS. FELDMAN: I would like to have our
19 expert, Dr. Noether, explain why that information cannot
20 be readily produced. Is that possible, for me to have
21 that done?

22 HEARING OFFICER HANSTED: Is that okay
23 with you, Attorney Murray.

24 MR. MURRAY: That would be fine.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 HEARING OFFICER HANSTED: It sounds like
2 he might be the best witness.

3 MR. MURRAY: She.

4 MS. FELDMAN: Dr. Noether, yes.

5 HEARING OFFICER HANSTED: I'm sorry, she.

6 DR. MONICA NOETHER: So there are data
7 available that insurers would have that include what they
8 pay for particular services inpatient or outpatient,
9 however, even those data do not completely reflect
10 variation in patient severity or complexity and,
11 therefore, the underlying cost of treating patients.

12 Therefore, it's not surprising that
13 different hospitals are paid different amounts for
14 patients, who are classified into the same DRG, or the
15 same CPT code, or the same APC code, or whatever
16 particular acronym you want to apply to a particular
17 claim.

18 In order to accurately adjust, in terms of
19 adjusting for risk, as it's often called, or patient
20 severity, would be another way of doing it, that's a
21 methodology that is still I don't want to say in its
22 infancy, but still in the process of being developed.

23 There are a lot of people doing research
24 on trying to figure out good ways to do severity

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 adjustment, but I don't think anybody has developed the
2 Gold Standard. There is no standard methodology for
3 doing that, so, for that reason, I think it's difficult
4 when you are comparing prices for anything, but really
5 routine commodity services to be able to know that you
6 are, in fact, comparing apples-to-apples, as opposed to
7 apples-to-watermelons.

8 MR. MURRAY: Just give me one minute.

9 HEARING OFFICER HANSTED: Sure.

10 MR. MURRAY: OHCA has put into the record
11 a document, which I know the Applicants are going to
12 object to, which is I'll call it the Milliman report.
13 Have you seen that report, Ms. Borgstrom?

14 MS. FELDMAN: Just a second.

15 MS. BORGSTROM: I have seen it, yes.

16 MR. MURRAY: Okay and, in that report, the
17 consultant compares a series of inpatient and outpatient
18 charges in a one-year period for a universe of patients
19 in the State Employee Healthcare System that were seen at
20 both L & M and at Yale-New Haven Hospital, isn't that
21 correct?

22 MS. FELDMAN: Just give her a second.

23 MS. BORGSTROM: I believe that's correct.

24 MR. MURRAY: Okay and the report.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 chronicles the fact that the payment for several
2 inpatient or outpatient settings, depending on what the
3 procedure was, was higher at Yale-New Haven Hospital than
4 at L & M, is that correct?

5 MS. FELDMAN: I'm going to have to object
6 again, because this is beyond the scope. She didn't
7 testify about this. We objected to its introduction into
8 evidence. We don't think it's relevant. We don't think
9 it's accurate. We don't even know the source of the
10 data. We don't know whether it's complete, so I don't
11 understand why she's being Crossed if she hasn't provided
12 Direct testimony on this.

13 MR. MURRAY: My question is not on
14 necessarily the report.

15 MS. FELDMAN: Oh, I thought it was.

16 MR. MURRAY: The report is a foundation.
17 My question is, and I'll ask the question, and, if you
18 want to object to it, go ahead, are the prices reported
19 in this report for procedures, inpatient and outpatient
20 procedures, at Yale-New Haven Hospital, and this report
21 represents that these are the actual prices paid by the
22 State Employee Health System, are these comparable to the
23 prices paid by commercial insurers for these services at
24 Yale-New Haven Hospital?

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MS. BORGSTROM: I would have no way of
2 knowing that.

3 MR. MURRAY: Okay. Ms. Borgstrom, in the
4 application and the responses provided to OHCA, the
5 Applicants have been reluctant to specify exactly where
6 the \$216 million of the alleged \$300 million investment
7 in L & M will come from.

8 In the application and the completeness
9 responses, the claim is that the amount will come from
10 synergies and efficiencies achieved at L & M post-
11 acquisition and from L & M's cash flow.

12 In response to OHCA, the Applicant said
13 that the \$300 million is not a cash commitment. Is that
14 correct?

15 MS. BORGSTROM: The \$300 million is a
16 commitment over a period of time to enhance services,
17 infrastructure operations at Lawrence & Memorial.

18 A portion of that will come in the future,
19 based on the improved operational performance at Lawrence
20 & Memorial Hospital, but a significant amount of this are
21 committed investments in things like a new information
22 technology service, investment in population health
23 infrastructure to better allow these communities to
24 prepare for and manage value-based payment, as well as

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 investments in recruiting and building out certain
2 clinical areas that were determined by the Lawrence &
3 Memorial and Westerly communities to be under-supported
4 right now, such as primary care, surgery, behavioral
5 health, women and children's services, emergency critical
6 care services, so the first \$85 million of this are hard
7 investments made by the Yale-New Haven Health System.

8 MR. MURRAY: Okay, but the subsequent -- I
9 was asking about the \$216 or \$215 million that is
10 supposed to happen after the initial investments.

11 In the completeness answers and
12 application, the Applicants say that --

13 MS. FELDMAN: Can we have a page
14 reference?

15 MR. MURRAY: -- the amount is dependent
16 upon the performance of both Yale-New Haven Health System
17 and L & M and business and strategic plans that achieve,
18 and this is the quote from the application, "A positive
19 return on investment."

20 So I guess my question is, based on these
21 representations, would you agree with me that \$216
22 million number isn't really a hard number?

23 HEARING OFFICER HANSTED: Attorney Murray,
24 just for purposes of the record, what pages are you

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 referencing?

2 MR. MURRAY: Well, on page 224, there's a
3 reference to the \$300 million commitment will come out of
4 L & M's base operating cash flow.

5 MS. FELDMAN: Just one second. We have to
6 find it. I'm sorry. Can you repeat the page?

7 HEARING OFFICER HANSTED: 224.

8 MR. MURRAY: 624.

9 HEARING OFFICER HANSTED: 624.

10 MS. FELDMAN: Oh, 624. Okay, hold on.
11 And just give us a second, so she could review it.

12 HEARING OFFICER HANSTED: Absolutely.

13 MS. BORGSTROM: Okay, thank you. I had a
14 chance to take a look at this.

15 MR. MURRAY: Okay. My question was a more
16 general question, which is that the total dollar amount
17 being talked about in the application of a \$300 million
18 investment is not a completely hard number, is it?

19 MS. BORGSTROM: Well it depends on the
20 definition of what a hard number is, but we have made a
21 hard commitment of the first \$85 million of this and have
22 identified funding sources.

23 The funding sources for the remaining \$215
24 million will come as a result of improved business

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 operations and business plans for identified needed
2 services that I couldn't define or articulate right now.

3 MR. MURRAY: All right and, for example,
4 in answer to some of OHCA's questions, and it was on that
5 page 624, the Applicants say that \$163 million of the
6 \$300 million commitment will come out of L & M's base
7 operating cash flow, isn't that correct?

8 MS. BORGSTROM: Yes.

9 MR. MURRAY: Okay and this amount, this is
10 in addition to the incremental cash flow from
11 efficiencies and synergies that the Applicants estimate
12 will be about \$68 million, is that correct?

13 MS. BORGSTROM: Yes.

14 MR. MURRAY: Okay, now, in answer to
15 another OHCA question, the Applicants detailed a five-
16 year table for what it called capital investments in
17 equipment and facilities, correct? That's on page 625?

18 MS. BORGSTROM: Pardon?

19 MR. MURRAY: On page 625, the Applicants
20 detailed and actually put a table out, talking about what
21 it called the capital investment in equipment and
22 facilities?

23 MS. BORGSTROM: Um-hum.

24 MR. MURRAY: Over a five-year period of

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 time? Isn't that correct?

2 MS. BORGSTROM: Yes.

3 MR. MURRAY: Okay and if you sum up that
4 five-year expenditure, as set forth in this table for
5 capital improvement, that comes to \$163 million, doesn't
6 it?

7 MS. BORGSTROM: You know, I will confess
8 I'm not intimately familiar with these numbers and
9 tables, and if we want to pursue this, I would like to
10 ask that our senior finance representative here come and
11 respond to those questions. I don't feel that I can do
12 that reliably.

13 MR. MURRAY: All right. I understand
14 you're obviously given the opportunity. I'm just really
15 asking a simple mathematical equivalent.

16 If that table, if you sum up the amount
17 put forth for capital improvement over five years, it
18 comes up to \$163 million, and, earlier on that page in
19 the response to OHCA, the Applicants say that \$163
20 million will come from the cash flow of L & M over the
21 five years.

22 I guess my question is does that mean that
23 L & M's cash flow is actually funding the capital
24 improvements over those five years?

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MS. FELDMAN: Do we want the truth, or, if
2 we want accurate and helpful information to explain it
3 and respond to your question, I think Ms. Borgstrom
4 indicated that she doesn't feel like she is the best
5 person to answer the question. We'd be happy to answer
6 it and elucidate on it and respond to your question.

7 HEARING OFFICER HANSTED: That's an
8 interesting way to put it, Attorney Feldman. Do we want
9 the truth? I've never heard an attorney say that.

10 (Laughter)

11 I will say, unequivocally, yes, we want
12 the truth.

13 MS. FELDMAN: Okay, great.

14 MR. MURRAY: It's in the job description.

15 HEARING OFFICER HANSTED: And I think,
16 also, to be fair, Ms. Borgstrom already stated that she's
17 not intimately familiar with that. It's a fair
18 statement.

19 If she didn't present or if she didn't
20 prepare the table, let's hear from the person, who
21 prepared the table, so we can get down to more specifics
22 about the table.

23 MR. MURRAY: That's fine with me.

24 HEARING OFFICER HANSTED: Okay.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MS. FELDMAN: Keith, you want to come here
2 and look at the -- do you have the application? Take a
3 second. Do you need to review it?

4 MR. KEITH TANDLER: Okay.

5 MS. FELDMAN: Can we restate the question?

6 MR. MURRAY: Okay. My question was,
7 taking a look at the capital investments in that table on
8 page 625, over a five-year period of time, the capital
9 infrastructure expenditures amount to \$163 million,
10 correct?

11 MR. TANDLER: Correct.

12 MR. MURRAY: And, earlier, in one of the
13 responses to OHCA in the previous page, the Applicants
14 indicated that \$163 million of the estimated \$215 million
15 investment was going to happen over a five-year period of
16 time from the operating cash flow of Lawrence & Memorial
17 Hospital, isn't that correct?

18 MR. TANDLER: That's correct.

19 MR. MURRAY: Okay and that amount, that
20 \$163 million from the operating cash flow at L & M is the
21 equivalent of what the Applicant's estimate is going to
22 be spent on capital improvements, correct?

23 MR. TANDLER: Yes, that appears correct.

24 MR. MURRAY: Okay. I guess my question

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 was does that mean that, as this is structured, the
2 operating cash flow at L & M is going to finance the
3 capital improvements, infrastructure improvements over
4 that five-year period of time?

5 MR. TANDLER: So what we described in the
6 application is the first \$85 million is a hard
7 commitment. Following the first \$85 million, there are
8 ongoing investments that will be based on the success of
9 those synergies, those operating improvements as the
10 business, as the organization is reorganized.

11 We'll be able to accomplish synergies and
12 back office operations. Like we described, population
13 health, bringing access to the community, physician
14 recruitment. All those investments we do anticipate will
15 bring a positive ROI.

16 Now we did use the term ROI broadly. It's
17 not strictly a financial return that we're looking at.
18 Yes, we do have to bring the business to financial
19 stability. That's one element of our entire portfolio of
20 strategic pillars that we manage at the health system,
21 but there are other forms of ROI.

22 Those include improvements in quality.
23 Those include improvements in patient satisfaction. And
24 as we continue to navigate the shift from volume to

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 value, we'll be measuring those metrics not only from a
2 financial standpoint, but, also, in our program service
3 accomplishments.

4 MR. MURRAY: Let me ask you about that, if
5 you're the correct person to ask this question to, about
6 that initial investment of \$85 million.

7 Forty-four million of that is targeted to
8 support clinical programs than physician recruitment, is
9 that correct?

10 MR. TANDLER: All of the details of the
11 \$85 million I don't have in front of me, but physician
12 recruitment is a substantial component of it, yes.

13 MR. MURRAY: Okay and, in fact, at some
14 point, in response to OHCA, the Applicants made a
15 statement that, of the \$44 million, half of that \$44
16 million was targeted for physician recruitment. Do you
17 recall that?

18 MR. TANDLER: I believe it was responded
19 30.

20 MS. FELDMAN: What page?

21 MR. TANDLER: On page 628.

22 MS. FELDMAN: I'd like to point out for
23 OHCA that there was another set of completeness
24 questions, as you know, that elaborated and clarified

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 some of the earlier similar questions, and those are on
2 page 871.

3 MR. MURRAY: Did you see that answer,
4 where it says launch funding for new position recruits,
5 50 percent. Others, such as staff augmentation and
6 clinical support, 50 percent, and it was in response to
7 the \$44 million?

8 MR. TANDLER: You're referring to page
9 628?

10 MR. MURRAY: 628, in response to question
11 30.

12 MR. TANDLER: I do see that, yes.

13 MR. MURRAY: Okay, so, the Applicant's
14 response said that half of the \$44 million is targeted
15 for new position recruit.

16 My question is a very simple one. Is the
17 money targeted for new physician recruit for actually
18 bringing new physicians to the New London area to work at
19 L & M or the L & M affiliates, or is this targeted for
20 the acquisition of community physician practices?

21 MS. BORGSTROM: That is to bring new
22 physicians to the Lawrence & Memorial and Westerly
23 communities.

24 MR. MURRAY: So just so it's clear, so

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 that money is not to be used for the acquisition of
2 community physician practices?

3 MS. BORGSTROM: I don't believe that
4 that's ever been the intention of those resources.

5 MR. MURRAY: Could those resources be
6 allocated, could be earmarked for that, if it needed to?

7 MS. BORGSTROM: You're asking a
8 hypothetical. I don't know the community. I don't know
9 the needs. I can tell you what the intent was, is that
10 there have been expressions of interest and concern in
11 getting more primary care physicians recruited to the New
12 London and Westerly communities, more support for
13 maternal and child health, and then there are some
14 surgical subspecialties, where the volume and the demand
15 in these communities would not allow an individual
16 hospital to recruit physicians and appropriate on-call
17 and backup.

18 It wouldn't be economically feasible, and,
19 so, this is to recruit physicians, who can meet those
20 needs in the community that are not being met now.
21 They're new providers.

22 MR. MURRAY: And the other part of the
23 initial \$85 million is \$41 million earmarked for the
24 support of, at least the Applicants indicate in its

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 filings, it's about 13 or 14 potential clinical programs
2 for support. Do you recall that?

3 MS. BORGSTROM: Yes.

4 MR. MURRAY: Okay. Is there any guarantee
5 given to L & M about which programs that that money will
6 be spent on, or is that something that's only going to be
7 decided on after the acquisition with a strategic
8 planning process?

9 MS. BORGSTROM: You know, I'll give you an
10 example of how this will be done, based on what we've
11 actually done in the past with Bridgeport and Greenwich
12 and continue to do to this day, is they are looking to
13 develop more clinical services in those communities, and
14 it's a very fluid process, because it's based on needs,
15 it's based on, in many cases, unanticipated retirements,
16 or the departure of certain physicians, but this is
17 something that's a collaborative process.

18 There's no way that we at the health
19 system would have the ability to go in and define what's
20 going to be most appropriate and the greatest need in the
21 Lawrence & Memorial and Westerly communities.

22 That is something that our planning and
23 clinical leaders will do in collaboration with their
24 colleagues in Lawrence & Memorial and Westerly.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MR. MURRAY: And why wasn't, as part of
2 the process of this acquisition, why wasn't that planning
3 process done prior to the actual completion of the
4 acquisition, so that the community could know where those
5 dollars were going to be spent by Yale?

6 MR. TANDLER: Like Marna just indicated,
7 we did not want to get too far ahead of the process.
8 This is a true collaboration. Many of the ideas have
9 been generated locally.

10 For us to come in and just run a script or
11 a playbook of all the answers to all the financial and
12 other operational issues would be, in our mind, gun
13 jumping, getting ahead of the process.

14 MR. MURRAY: Perhaps my question was
15 unclear, and I apologize for that. I wasn't suggesting
16 that you come in and prescribe which clinical programs
17 get the \$41 million and which don't.

18 The question I asked was why didn't the
19 joint collaborative planning take place prior to the
20 application process, so that the community and OHCA would
21 know exactly what clinical programs were going to receive
22 the infusion of cash and which weren't?

23 MS. BORGSTROM: You know, this is a fluid
24 dynamic process. We're trying to be in this for the long

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 term. This is not all based on data you can collect
2 right now and come up with the answer. This is going to
3 evolve, as it has over, you know, 18 and 20 years with
4 Greenwich and Bridgeport.

5 We are committed for the long term to the
6 success of these communities and the success of these
7 organizations, and, you know, frankly, you know, to get
8 in there and begin to engage people in a detailed
9 planning process for right now, when, you know, we've got
10 a lot of things in front of us to get this approval,
11 wouldn't have made sense and could have appeared to be
12 heavy-handed.

13 This is going to be an iterative process.
14 It's going to take time, but I think that you could talk
15 to the leaders, clinical and otherwise, and the other
16 communities in which our system operates, and they would
17 describe a process that's ongoing, that's collaborative,
18 and that's based on demonstrated need.

19 MR. TANDLER: I would just add that we are
20 honoring certain regulatory parameters that guide what we
21 can and cannot do.

22 MR. MURRAY: The regulatory parameters, is
23 that because you were concerned about the competitive
24 nature of the affiliation?

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MS. FELDMAN: Can you rephrase the
2 question? I don't know what the question is.

3 MR. MURRAY: Is one of the parameters that
4 you were concerned about was anti-trust concerns?

5 MS. FELDMAN: Correct. This is -- I don't
6 think it's fair to ask the witnesses legal questions.
7 They've been advised by counsel throughout the process.

8 MR. MURRAY: Just I guess one last
9 question, Ms. Borgstrom. You're aware, aren't you, that
10 there's a community health needs assessment going on in
11 New London right now?

12 MS. BORGSTROM: I'm aware that all of the
13 acute care hospitals perform community health needs
14 assessments.

15 MR. MURRAY: Okay and is there any reason
16 why the Applicants couldn't have waited for the
17 completion of the community health needs assessment to
18 have a better sense of what the actual needs were within
19 the community before going ahead with the acquisition?

20 MS. BORGSTROM: I'm a little confused by
21 the question and by the previous questions, because, on
22 one hand, we've been asked why it wasn't all specified
23 and determined, and, on the other hand, to wait.

24 These community needs assessments are done

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 regularly. They are updated. They cover a whole lot of
2 things, only a piece of which may be the direct clinical
3 services and human power, clinical planning in these
4 communities, so, you know, I don't think that, you know,
5 I think these are fruits and vegetables.

6 I think the community health needs
7 assessment is very relevant. It will be very helpful,
8 but it is not and would not be the sole determinant of
9 how investments are made.

10 MR. MURRAY: We have no other questions of
11 Ms. Borgstrom. We do have questions of Mr. Cummings.

12 HEARING OFFICER HANSTED: Okay.

13 MR. MURRAY: Good afternoon, sir.

14 MR. BRUCE CUMMINGS: Good afternoon.

15 MR. MURRAY: Mr. Cummings, there's nothing
16 in the application submitted to OHCA or in the agreement
17 between L & M and Yale-New Haven Health System that
18 prevents the elimination, consolidation, moving, or
19 closing of any current medical services at L & M, is
20 there?

21 MR. CUMMINGS: Well, as you've already
22 pointed out, there's a joint approval process, because
23 the local Board retains fiduciary responsibility, so any
24 major new service, or, the flip side, any termination or

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 substantial diminution of an existing service would
2 require approval by both Boards, and, for that matter,
3 the Office of Health Care Access has jurisdiction over
4 specific services that would require the Applicant to
5 seek permission.

6 MR. MURRAY: Okay.

7 MR. CUMMINGS: So, for example, under
8 regulation, any material change in inpatient psychiatry,
9 for example, requires that there be a filing with an
10 approval by OHCA, so there are governing body
11 responsibilities at both the local and parent level and
12 regulatory oversight.

13 MR. MURRAY: Okay. I appreciate that. My
14 question was a slightly different one, which was that
15 there's nothing in the agreement or the application that
16 guarantees the current level of services, correct?

17 MR. CUMMINGS: It's in the bylaws under
18 Exhibit A.

19 MS. FELDMAN: I think the bylaws are a
20 part of the agreement.

21 MR. MURRAY: Can you point out where in
22 Exhibit A that is?

23 MR. CUMMINGS: On page 196, Item I, as in
24 Irene, approval of major new programs and clinical

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 services of this corporation or any affiliate or
2 discontinuation or consolidation of such program.

3 MR. MURRAY: That deals with who makes the
4 decisions, correct?

5 MS. FELDMAN: Can you rephrase your
6 question?

7 MR. MURRAY: My question was that there's
8 nothing in the application or in the agreement between
9 Yale-New Haven Health Systems and L & M's current Board
10 that guarantees the current level of services.

11 MS. FELDMAN: I'm going to have to object,
12 because I think we already said that the affiliation
13 agreement is part of the application and that the bylaws
14 are a part of the affiliation agreement, which is also
15 part of the application.

16 MR. MURRAY: So is that yes or no to my --

17 HEARING OFFICER HANSTED: No, she's
18 objecting to your question.

19 MR. MURRAY: Okay.

20 HEARING OFFICER HANSTED: Do you have a
21 response to that?

22 MR. MURRAY: I think it's an appropriate
23 question. I want to know whether or not there's --
24 whether the current level of services are going to be

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 maintained post-affiliation.

2 HEARING OFFICER HANSTED: Well your
3 question was whether or not the documents reference the
4 current level of services and guarantee that they will be
5 maintained, and we said earlier in the hearing that the
6 document speaks for itself.

7 MR. MURRAY: Okay.

8 HEARING OFFICER HANSTED: So you may want
9 to ask, and I'm not telling you what to ask, but you may
10 want to ask if there's any understanding, besides what's
11 written, pertaining to any guarantee of services
12 continuing in the area.

13 MR. MURRAY: Other than what's in the
14 application and what's in the affiliation agreement and
15 the bylaws, is there any other agreement between the
16 parties with respect to the current level of services?

17 MR. CUMMINGS: I'm sorry. I missed part
18 of your question.

19 MR. MURRAY: Other than the application
20 and the affiliation agreement and the proposed new bylaws
21 for L & M, things that have already been submitted to
22 OHCA, are there any other agreements between Yale-New
23 Haven Health System and Lawrence & Memorial Corporation
24 with respect to the continuation of the current level of

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 services?

2 MR. CUMMINGS: Not to my knowledge, but,
3 for that matter, there's nothing today, irrespective of
4 Yale-New Haven or the proposed affiliation, that
5 guarantees the continuation of existing services.

6 A key reason for doing this affiliation is
7 precisely so we can maintain and even expand services.
8 The absence of this affiliation will put a number of
9 services in jeopardy.

10 MR. MURRAY: Okay. Following up on your
11 response just now, Mr. Cummings, what services,
12 specifically, are in jeopardy of not being continued if
13 the affiliation doesn't happen?

14 MR. CUMMINGS: I'm not going to speculate
15 on that. We are projected to lose \$22 million this year,
16 and it's fair to say we're having conversations with our
17 Board right now that are very difficult in nature about
18 services throughout the organization, but they're not
19 going to be discussed here.

20 MR. MURRAY: Okay. In the application, in
21 responses to various completeness questions, one of the
22 advantages of the acquisition, according to the
23 Applicants, is the prevention of out migration of
24 patients to distant, high-cost provides in Massachusetts,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Rhode Island and New York. That's what's claimed in the
2 application.

3 What are the specific mechanisms that the
4 Applicants believe will keep patients in Connecticut and
5 not go to those distant, high-cost providers?

6 MS. BORGSTROM: I can take a crack at that
7 question, because, again, I think that if you look at our
8 track record in Bridgeport and in Greenwich, you have to
9 start first by saying we acknowledge that Yale-New Haven
10 Hospital in New Haven is a higher-cost provider than many
11 other providers in the State.

12 There are a lot of reasons for that, but
13 given that we all need to move to a value equation, where
14 care is better, safer and better coordinated and
15 affordable to people, who are paying for some of that
16 care out of their pockets, to pull that business into New
17 Haven, when it can be provided locally, makes absolutely
18 no economic sense, and it doesn't make sense to the
19 patients and their families in these communities, so what
20 you would find, which is very similar in Greenwich and
21 Bridgeport, is that the depth and level of services
22 offered in those communities has been expanded
23 tremendously, and the practitioners, who have been
24 brought into those communities at their request to

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 support particularly specialty services, do the vast
2 majority of what they do for those patients at those
3 hospitals in their ambulatory centers, which is more
4 convenient for the patients and more cost-effective.

5 That is the same approach that we would
6 intend to work with Lawrence & Memorial and Westerly on.

7 MR. MURRAY: And, in answer to my
8 question, that's the mechanism that the Applicants are
9 going to use to prevent the outmigration to these high-
10 cost providers out of state?

11 MS. BORGSTROM: It has kept more care in
12 the local communities and we believe will continue to.

13 MR. MURRAY: Okay. Mr. Cummings, are
14 there any agreements or expectations in your provider
15 agreements with L & M employed physicians or affiliated
16 practices that the doctors will principally or primarily
17 refer patients to Yale-New Haven Health Systems
18 affiliates after the acquisition?

19 MR. CUMMINGS: There is no such language
20 in any of the agreements, and there is no such
21 restriction or limitation today.

22 MR. MURRAY: Okay. Why did L & M end its
23 affiliation with Dana-Farber?

24 MR. CUMMINGS: Well, in many respects, it

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 really grew out of a fundamental change, that Dana-Farber
2 informed us and other local affiliates throughout New
3 England.

4 The original Dana-Farber model provided
5 for an extremely high level of integration and
6 coordination with the L & M Cancer Center.

7 This was a signature of the Dana-Farber
8 model, and one of the elements of that, for example, was
9 that a facility had to be built to Dana-Farber standards.
10 There were particular re-staffing requirements around
11 pharmacy, for example, and lab services to meet the Dana-
12 Farber standard.

13 A key feature of this model and one of the
14 things that drew us to it is that the oncologists
15 providing services there have access to the Dana-Farber
16 intellectual property. Use of their clinical protocols
17 would be employed by Dana-Farber.

18 That's something we wanted. That's
19 something they insisted upon. There was a mutuality of
20 interest.

21 On or about April of last year, Dana-
22 Farber informed us and their other local affiliates that
23 they were fundamentally changing their model, that they
24 would no longer be employing the local oncologist, and

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 they were going to go to, these are my words, and I don't
2 mean this in any kind of derogatory way, because we had a
3 very good relationship with Farber, but they were going
4 to go to more of a franchise model, far less involvement,
5 far less control, pay a fee, be able to use the Dana-
6 Farber name, have access to their clinical protocols, but
7 they would be moving really much away to an arm's length
8 relationship.

9 That was very disturbing news to our local
10 medical oncologist, who had wanted the Dana-Farber
11 employment and the Harvard adjunct faculty appointments,
12 and, after consulting with them, they agreed that that
13 was highly problematic.

14 Fortuitously and independent of the Dana-
15 Farber matter, we had begun conversations with Yale-New
16 Haven in January of that year, and, so, over the course
17 of the summer, when it became apparent that there was
18 going to be a definitive affiliation agreement, we
19 informed Dana-Farber of those conversations, and they
20 agreed that, between the change in their model, and they
21 were going to go in a different direction, and our
22 Board's decision to seek an affiliation with Yale-New
23 Haven, that continuing the relationship did not make
24 sense, and, so, it was mutually agreed that we would take

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 it down at the end of calendar year.

2 MR. MURRAY: Now in response to one of the
3 questions posed by OHCA, the Applicants responded, and
4 this is in answer to question 27D on page 624, that if
5 Yale-New Haven Hospital sustained an operating loss, one
6 of the options for fulfilling its financial commitment to
7 L & M under the terms of this application would be an L &
8 M debt offering. Do you recall that response?

9 MS. FELDMAN: Just a second.

10 MR. CUMMINGS: I'm not the most
11 knowledgeable person about the intricacies of bond
12 offerings, and, so, I think having one of the financial
13 experts speak to that would be more appropriate.

14 MR. MURRAY: Okay. I guess my question,
15 and I'm not sure we need expert testimony, my question is
16 that it's true, correct, that one of the, in answer to
17 OHCA's question, about whether or not Yale would be able
18 to meet its financial commitment, one of the answers the
19 Applicants provided was one of the options would be an L
20 & M debt offering, is that correct?

21 MS. BORGSTROM: An L & M debt offering or
22 funding from existing Yale-New Haven Health System --

23 MR. MURRAY: I understand. What I'm
24 simply saying is that L & M debt offering is one of the

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 options that the Applicant said were open to them if
2 there was a shortfall in the funding, correct?

3 MR. CUMMINGS: It does say that, yes.

4 MR. MURRAY: Okay, so, my question, isn't
5 it true that, under Exhibit B of the proposed bylaws,
6 that one of the reserve powers to the sole corporate
7 member is the issuance and incurrence of indebtedness on
8 behalf of the L & M Corporation?

9 MR. CUMMINGS: Yes, that's true.

10 MR. MURRAY: Okay, so, it's possible,
11 isn't it, that, in order for Yale-New Haven Health System
12 to meet its financial commitment under this application,
13 it could saddle L & M with debt, for which the L & M
14 Board would not have a power to prevent?

15 MS. BORGSTROM: I have to come back to
16 it's a real hypothetical, and the Yale-New Haven Health
17 System, if we determined, for whatever reason, that a
18 debt issuance was going to allow us to support at a
19 particular time a particular need at Lawrence & Memorial,
20 we could do that through our obligated group at a rate
21 level that would be far superior to what L & M could get
22 independently, but, you know, debt is one of a mix of
23 resources that we pursued to try and support investments
24 that we are making throughout the system.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MR. MURRAY: I understand that. I
2 appreciate it. My question to Mr. Cummings is, given the
3 reserve power to the sole corporate member, it's possible
4 that, if there was an issuance of debt to L & M, the
5 current L & M Board would not be able to prevent that,
6 since that's the reserve power to the sole corporate
7 member?

8 MR. CUMMINGS: You're asking a highly-
9 speculative question. I can't say with any certainty
10 that one of us won't be struck by a car driving home
11 today.

12 MR. MURRAY: Well it's not written in your
13 corporate bylaws that you won't be struck by a car. I'm
14 simply saying, under the reserve power to the sole
15 corporate member, if the sole corporate member decided to
16 issue L & M debt, that's a reserved power to them,
17 correct?

18 MR. CUMMINGS: So you're asking me a
19 hypothetical question. Let me ask you a hypothetical
20 question.

21 MR. MURRAY: You don't get to ask
22 questions.

23 HEARING OFFICER HANSTED: No, no, no. Mr.
24 Cummings, stop.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MR. CUMMINGS: Let me ask a question. Let
2 me respond.

3 HEARING OFFICER HANSTED: No.

4 MR. CUMMINGS: Why would --

5 HEARING OFFICER HANSTED: I want you to
6 listen carefully to his question and respond to his
7 question. I understand he's asking a hypothetical, but
8 he needs to ask a hypothetical to get to the ultimate
9 question that he has.

10 MS. FELDMAN: Yes, and he will answer. I
11 really think he was making a rhetorical statement, rather
12 than asking the attorney the question.

13 MS. BORGSTROM: Let me ask or state
14 something. I think the reason that we're struggling with
15 this, at least I'm struggling with this, is because it's
16 hard for me to understand what incentive the Yale-New
17 Haven Health System would have to add debt
18 inappropriately to Lawrence & Memorial or any member of
19 the system if we are trying to support a thriving, viable
20 healthcare provider in each of our communities.

21 So I think, technically, the health system
22 has the authority, the ultimate authority, to approve new
23 debt issuances, but, you know, the inference, that that
24 would be done in a way that would be detrimental to

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Lawrence & Memorial, doesn't ring true to me.

2 MR. MURRAY: I think I'm still waiting for
3 the answer to my question, which is --

4 HEARING OFFICER HANSTED: Let me ask you
5 this. Assuming Yale decided to take this action, you
6 know, we don't know if they will or they won't, okay?
7 Let's put that aside for the moment. Would L & M have
8 any power to prevent it?

9 MS. BORGSTROM: Would L & M technically
10 have any power to prevent it? I think that, if they
11 said, you know, we can't make this work within the
12 context of our operating budget and plan, we would tend
13 to agree with them, because we're responsible for the
14 authenticity of their plan, as the sole member of this
15 organization, but we don't take on debt lightly, and,
16 when we've done it in the past, as with a recent
17 ambulatory project with Bridgeport Hospital, the decision
18 was a collaborative one and actually initiated by the
19 Bridgeport Hospital Board and subsequently endorsed by
20 the Yale-New Haven Health System Board.

21 HEARING OFFICER HANSTED: Does that
22 satisfy you, Attorney Murray?

23 MR. MURRAY: Well Ms. Borgstrom talked
24 about what might happen. I'm simply asking what the

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 language provides for, and I just want to clarify. Let
2 me ask my question.

3 HEARING OFFICER HANSTED: Well, to be fair
4 to Ms. Borgstrom, she was answering my question.

5 MR. MURRAY: Yeah, I'm sorry. She was
6 answering your question.

7 HEARING OFFICER HANSTED: I didn't
8 directly ask her about the documents.

9 MR. MURRAY: All I'm asking you, Mr.
10 Cummings, is that it's true, isn't it, that, under
11 Exhibit B, the incurrence of debt to L & M is a reserve
12 power of the sole corporate member?

13 MR. CUMMINGS: Yes, as is true with any
14 governance model.

15 MR. MURRAY: Okay, well, the governance
16 model now is that the L & M Board of Trustees, if it
17 wanted to encumber itself with debt, would make that
18 decision, correct?

19 MR. CUMMINGS: Yes.

20 MR. MURRAY: Okay, so, my question simply
21 is, post-acquisition, based on Exhibit B, the decision to
22 saddle L & M Corporation with debt is a reserved power to
23 the sole member, correct?

24 MR. CUMMINGS: L & M Healthcare in this

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 model has a seat on the Yale-New Haven Health Services
2 Board. It's inconceivable to me that the L & M Board
3 would be asked, or, for that matter, the Yale-New Haven
4 Board, asked to operate or make decisions that are
5 inimical to the investments that are guaranteed in that
6 \$85 million. Why would any organization do that?

7 MS. FELDMAN: I'm going to have to object
8 to the continuing line of questions. At this point, I
9 think we're trying to get a sound bite. I think that the
10 attorney for the Intervenors is trying to have Mr.
11 Cummings say, yes, it's true, but that is an answer in a
12 vacuum. It's completely, again, irrelevant to how
13 hospitals work, how healthcare systems work, and it's
14 going on and on. For what purpose, I do not understand.

15 I mean we said earlier that the bylaws
16 speak for themselves, and I don't see the point of
17 badgering the witnesses.

18 MR. MURRAY: Asking questions is not
19 badgering, but I'm not going to take umbrage with it. I
20 will simply move on. I just have one last question for
21 Mr. Cummings.

22 HEARING OFFICER HANSTED: Thank you.

23 MR. MURRAY: Mr. Cummings, you currently
24 serve as the President and CEO of the L & M Corporation,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 correct?

2 MR. CUMMINGS: That's correct.

3 MR. MURRAY: Okay and as the President and
4 CEO, you were selected to serve at the pleasure of the L
5 & M Board of Trustees, correct?

6 MR. CUMMINGS: Yes, that's correct.

7 MR. MURRAY: Okay. Following the
8 acquisition, based on the post-acquisition bylaws filed
9 by the L & M Corporation, the President and CEO of L & M
10 serves at the pleasure of the corporate member, correct?

11 MR. CUMMINGS: That's correct.

12 MR. MURRAY: I have no other questions for
13 Mr. Cummings.

14 HEARING OFFICER HANSTED: Do you have any
15 further Cross-Examination?

16 MR. MURRAY: Could you just give me one
17 second?

18 HEARING OFFICER HANSTED: Sure. Attorney
19 Feldman, do you have any Redirect?

20 MS. FELDMAN: I do. I do.

21 HEARING OFFICER HANSTED: Just wait one
22 moment for Attorney Murray.

23 MS. FELDMAN: Okay.

24 MR. MURRAY: I'm sorry.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 HEARING OFFICER HANSTED: Attorney

2 Feldman?

3 MS. FELDMAN: Sure.

4 HEARING OFFICER HANSTED: You may proceed.

5 MS. FELDMAN: Thank you very much. Ms.

6 Borgstrom, several individuals have provided testimony

7 referring to the proposed application as a, quote,

8 "takeover," or have implied that L & M would lose all

9 control over governance if the proposal is approved.

10 How do you react to these descriptions?

11 How would you describe the proposal from the standpoint

12 of local control and governance? And I'm not talking

13 about getting into the specifics of the bylaws, but just

14 conceptually.

15 MS. BORGSTROM: So this is an affiliation.

16 It is a sole member substitution. Our practice, our

17 history, our approach is very collaborative. We are one

18 of -- I serve on a couple of national organizations. We

19 are one of the few that I know of that has preserved

20 local governance.

21 We respect the members of the Lawrence &

22 Memorial Board, as we do the Bridgeport and Greenwich

23 Boards. We have limited participation on their Boards.

24 They participate on the Health System Board.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 What we have tried to do is work on behalf
2 of a healthier system and healthier communities,
3 respecting the role and the knowledge that local
4 individual Board members have about the communities they
5 represent.

6 MS. FELDMAN: Does the composition of the
7 L & M Board remain the same, other than the addition of a
8 representative from Yale-New Haven Health System?

9 MS. BORGSTROM: Yes.

10 MS. FELDMAN: Based upon your knowledge of
11 corporate governance at other national healthcare systems
12 and other systems within the State, is it your opinion
13 that the amount of control that L & M would continue to
14 have be unusual?

15 MS. BORGSTROM: Yes. It is not the
16 typical practice, and, you know, I will tell you that it
17 adds a little more to a number of people's workloads to
18 have these local fiduciary Boards, but I think the
19 benefits outweigh the additional work and time
20 commitments.

21 MS. FELDMAN: And how does it differ from
22 other systems, such as Windham, which has been repeatedly
23 referenced throughout this proceeding, in particular, as
24 it relates to decisions to terminate services?

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MS. BORGSTROM: You know, I can't comment,
2 specifically, on how Hartford HealthCare works, and we've
3 spent a lot of time going through Exhibits A and B to the
4 restated Lawrence & Memorial bylaws, but the opportunity,
5 the decision to close or significantly change a service
6 in either the New London or Westerly areas would have to
7 be done in collaboration with the local Board.

8 It is not a unilateral authority that we
9 have sought or that we think would serve the health
10 system in the communities well.

11 MS. FELDMAN: Thank you. Now we've heard
12 public testimony that questioned what's in it for Yale-
13 New Haven Health. Can you please answer that question?

14 MS. BORGSTROM: You know, I think Mr.
15 Cummings spoke to the fact that we've had a longstanding
16 relationship on a number of levels, and I think you have
17 to look at where healthcare, in general, is going.

18 There is no question that healthcare is
19 too expensive right now. It is very much a sick care
20 system, rather than focused on health and healthier
21 communities. I don't think that there's any one reason
22 for that.

23 I think that the current healthcare system
24 we have has evolved over a long period of time, with a

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 number of inputs, and, frankly, the way we've paid for
2 healthcare has not supported the concept of value, but I
3 think that's where we all believe, as healthcare leaders
4 and as citizens of our own communities, it needs to go,
5 so the value to Lawrence & Memorial and I think the Yale-
6 New Haven Health System is quite mutual, because it will
7 allow us to scale infrastructure to support population
8 health investments, to rationalize key services to make
9 care better and safer.

10 The investment in extending the Epic
11 system there will allow us to avoid unnecessary
12 duplication of services.

13 I know that, in some of the questions,
14 duplication was seen, as well. We don't want, you know,
15 the same service in New Haven or Old Saybrook as is in
16 Lawrence & Memorial. That was not the issue.

17 What we have found in integrating
18 information technology is that providers can act better
19 on more reliable patient information and avoid laboratory
20 testing, imaging services, things that both add cost and
21 can delay the treatment of patients.

22 So, you know, I think that, you know,
23 there are tremendous benefits to both organizations.

24 MS. FELDMAN: With respect to value-based

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 contracting, which you made clear is here and is real,
2 how will having L & M within your system benefit those
3 types of contracting arrangements?

4 MS. BORGSTROM: You know, I would say
5 value-based contracting is not here, particularly. It's
6 an aspiration that I think the commercial insurance
7 companies have.

8 I think Medicare is dabbling with it, and
9 there's certainly been discussion of this at the State,
10 but, you know, to say that it's become prevalent as a
11 payment mechanism I think is premature, but I think that
12 what we have to do is get ready for that, and no one
13 organization can make both the corporate infrastructure
14 investments and the kinds of financial and information
15 system services that are going to be necessary to support
16 value-based purchasing, and I think, you know, frankly,
17 you know, the clinical care can be enhanced, and, you
18 know, we don't have to rediscover the wheel in each
19 community.

20 What is an evidence-based best practice in
21 one community can more efficiently be scaled over all of
22 the Yale-New Haven Health System associated providers.

23 MS. FELDMAN: So it might be more cost-
24 effective, let's say, to have a patient receive their

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 care at L & M Hospital than perhaps Yale-New Haven
2 Hospital?

3 MS. BORGSTROM: It clearly may be, but
4 Yale-New Haven Hospital provides services that are not
5 available in many other hospitals, not only in
6 Connecticut, but in the region, and that remains a
7 resource and a backup.

8 MS. FELDMAN: Can you explain to me why
9 the costs are higher at Yale-New Haven Hospital than
10 let's say L & M Hospital or other hospitals within the
11 system?

12 MS. BORGSTROM: Well now you're into one
13 of my favorite discussions, which I won't belabor, but I
14 think we use cost and pricing very differently, or we use
15 them in the same way, but they mean very different
16 things.

17 If you look at what it truly costs to
18 provide care at a place like Yale-New Haven Hospital,
19 there are a lot of reasons for that.

20 Yale-New Hospital is a level one trauma
21 service that requires that you have a number of 24-by-7,
22 365-day services available all the time.

23 If you are mowing your lawn and cut off a
24 digit, Yale-New Haven Hospital is the only place that

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 you're going to find that has on-site people 24-by-7, who
2 are going to provide that care, and I could go on and on
3 with the clinical services.

4 That costs money, because they aren't used
5 every hour of every day 365 days a year. We have 1,300
6 post-graduate trainees at Yale-New Haven Hospital. That
7 is a huge program. According to the AAMC and other
8 sources, we're one of 40 providers nationally, who are
9 training about 50 percent of the nation's medical person
10 power, and then, if you add technologists and PAs and
11 nurses, a huge amount of training.

12 While it provides a certain amount of
13 human person power, it also is costly, because these
14 people are being educated, so there are a lot of things
15 at Yale-New Haven Hospital that are going to make an
16 organization like that more expensive, and, you know, and
17 I think that's a reality.

18 The price in question, why it costs people
19 more, I think you have to look at case mix. Yale-New
20 Haven Hospital alone and Yale-New Haven and Bridgeport
21 together in our health system are the largest providers
22 of care to patients, who are medically-indigent and
23 particularly insured by the State of Connecticut.

24 We are paid, on average, 30 cents on the

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 dollar of cost for nearly one-quarter of our patients.
2 That doesn't even cover our variable costs, so when we
3 are building pricing, we are in pricing negotiations with
4 third party payers, which, by the way, is about a third
5 of our business, two-thirds of it is governmental payers,
6 they don't negotiate with us, it's very clear they know
7 and we know that part of it is the cost, maybe the cost
8 of a place like Yale-New Haven Hospital, but a big part
9 of it is the underpayment for the significant services
10 that we are providing.

11 MS. FELDMAN: So, in Mr. Hyde's rebuttal
12 to Dr. Noether on page two, I think it was dated July 6,
13 2016, Mr. Hyde says that information from the Department
14 of Social Services will shortly be made available to a
15 task force, studying Certificate of Need in Connecticut.

16 This information will directly impact one
17 question, namely, to what extent does the State of
18 Connecticut pay Medicaid rates, which reflect monopoly
19 pricing by Yale-New Haven Health?

20 I believe you just stated that -- well let
21 me backup and ask you does Yale-New Haven Hospital, by
22 way of example, negotiate with the Department of Social
23 Services its Medicaid rates?

24 MS. BORGSTROM: No.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MS. FELDMAN: And what percentage of your
2 payer mix is actually Medicaid?

3 MS. BORGSTROM: It's about 22 percent, I
4 believe.

5 MS. FELDMAN: And for every dollar of
6 expense that you incur, can you tell me what you receive
7 approximately from the Medicaid program?

8 MS. BORGSTROM: I'm not sure I understand
9 the question.

10 MS. FELDMAN: So if you spent a dollar in
11 providing services to a patient, what is your
12 reimbursement from Medicaid?

13 MS. BORGSTROM: Thirty cents. Thirty
14 cents.

15 MS. FELDMAN: I have no more questions for
16 Ms. Borgstrom.

17 HEARING OFFICER HANSTED: Okay, thank you.

18 MS. FELDMAN: I do have one question for
19 Mr. Cummings.

20 HEARING OFFICER HANSTED: Go ahead.

21 MS. FELDMAN: Okay, thank you. Mr.
22 Cummings, there has been some testimony, wherein there
23 has been some questioning regarding how it was determined
24 what the specific needs were of L & M and what type of

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 resource commitment Yale-New Haven Health was making.

2 Can you tell me a little bit about the
3 process that you engaged in to determine what your actual
4 resource commitment needs were?

5 MR. CUMMINGS: Yes. The senior team at L
6 & M sat down over a period of days and were assisted by
7 an independent outside consulting firm, Chartis. Chartis
8 is a firm that works around the United States, has
9 independent advisors to hospital Boards that are
10 contemplating mergers, affiliations, or acquisitions.

11 Together, we mapped out, we took stock of
12 what we projected to be our capital needs over a five-
13 year period, and those totaled almost somewhere between
14 \$325 million and \$400 million, and those, broadly
15 speaking, those categories included the need to create
16 the wherewithal to engage in population health.

17 That includes the development of a data
18 warehouse, various predictive and analytical tools, none
19 of which we had available. We estimated that was
20 somewhere between \$5 and \$10 million to expand ambulatory
21 services, particularly primary care services in the
22 community that we serve that range from Old Lyme to the
23 west to Westerly in the east, about \$75 million for
24 additional capacity to provide ambulatory care services.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 We also estimated we'd need about between
2 \$30 and \$40 million to replace our McKesson IT system and
3 to migrate to Epic. We estimated between \$35 and \$45
4 million would be needed for routine replacement of lab
5 imaging and pharmacy technology, and then somewhere
6 between \$180 million and \$230 million to update our
7 inpatient units, to upgrade our cardiac cath labs, to
8 create additional procedural space, because more and more
9 care is now being provided on an outpatient rather than
10 an inpatient basis, including, specifically, to come up
11 with more appropriate space for behavioral health
12 services.

13 So when we added up all those buckets, it
14 was somewhere between \$325 and \$400 million. We
15 presented that finding to the Yale-New Haven Health
16 System staff, and, in relatively short order, we agreed
17 upon the \$300 million commitment over five years that
18 you've heard referenced throughout the hearing.

19 MS. FELDMAN: No further questions.

20 HEARING OFFICER HANSTED: Okay. Do you
21 have any further Direct at all?

22 MS. FELDMAN: None.

23 HEARING OFFICER HANSTED: Okay. Attorney
24 Murray, do you have any?

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MR. MURRAY: Just a follow-up question for
2 Ms. Borgstrom. Ms. Borgstrom, you indicated, in answer
3 to counsel's question, about the mix of patients at Yale-
4 New Haven Hospital, the percent that are government
5 payers, and government payers would include both Medicaid
6 and Medicare?

7 MS. BORGSTROM: Um-hum.

8 MR. MURRAY: Okay and --

9 MS. FELDMAN: I just want to clarify. I
10 believe her answer was in response to the percentage of
11 Medicaid patients, not all governmental payers.

12 MR. MURRAY: Okay, well, she agreed with
13 me, so I don't know.

14 MS. FELDMAN: I thought you said
15 governmental payers, and that includes -- governmental
16 payers would include Medicare.

17 MR. MURRAY: Yeah, that's what I just
18 said, Medicare and Medicaid.

19 MS. FELDMAN: Oh, I'm sorry, then.

20 MR. MURRAY: Yeah. I thought we
21 understood each other.

22 MS. FELDMAN: Okay.

23 MR. MURRAY: And it's true, isn't it, when
24 you talked about value-based contracting, it's true,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 isn't it, that Yale-New Haven Hospital and Yale Medical
2 Group have just submitted a proposal to DSS for value-
3 based procedures for Medicaid patients in the State of
4 Connecticut?

5 MS. BORGSTROM: I will embarrass myself,
6 but I don't know that we've submitted a proposal. We
7 have had discussions with DSS about using consulting
8 support that we've engaged to understand how other states
9 are looking at that, but we haven't made a proposal.

10 MR. MURRAY: Okay, so, as far as you know,
11 there's no proposal?

12 MS. BORGSTROM: Not that I'm aware of.

13 MR. MURRAY: Okay. I have no other
14 questions.

15 HEARING OFFICER HANSTED: Okay. Do you
16 have any further Cross-Examination, Attorney Murray?

17 MR. MURRAY: No, I don't.

18 HEARING OFFICER HANSTED: No, okay. At
19 this point, we will take a break. Please be back here by
20 5:10, so we can get started with the rest of the hearing.
21 Thank you.

22 (Off the record)

23 HEARING OFFICER HANSTED: Okay, we're back
24 on the record. Attorney Murray, you stated you were

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 completed with your Cross-Examination completely,
2 correct?

3 MR. MURRAY: Yes, I am.

4 HEARING OFFICER HANSTED: Okay. We are
5 going to move on to the next application involving this
6 hearing, and that is Docket No. 15-32032-CON. Attorney
7 Feldman, if you'd like to begin?

8 MS. FELDMAN: We're going to start with
9 some testimony from Dr. Lehrach.

10 DR. CHRISTOPHER LEHRACH: Good evening,
11 Attorney Hansted. Can you hear me?

12 HEARING OFFICER HANSTED: Yes, I can.

13 DR. LEHRACH: And to the rest of the OHCA
14 staff?

15 HEARING OFFICER HANSTED: Can everyone
16 hear him in the back? I think your mike is off.

17 DR. LEHRACH: How about that?

18 HEARING OFFICER HANSTED: No.

19 DR. LEHRACH: How about that?

20 HEARING OFFICER HANSTED: That's better.

21 DR. LEHRACH: So good evening.

22 HEARING OFFICER HANSTED: Good evening.

23 DR. LEHRACH: My name is Dr. Christopher
24 Lehrach. I'm a clinically-active, Board-certified family

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 physician. I'm also a Connecticut native, with advanced
2 degrees in business and medicine from Yale and the
3 University of Connecticut.

4 Currently, I serve as the President of the
5 Lawrence & Memorial Medical Group, and I have over 20
6 years of experience in medicine and medical practice
7 management. I adopt my pre-filed testimony as my own.

8 My primary goal is ensuring access to
9 quality-coordinated and cost-effective care close to
10 home. Our goals are your goals. Everyone in this room
11 has the same goal, quite frankly, but, right now, as we
12 stand here in 2016, those goals are threatened, and
13 they're threatened for three main reasons, as it relates
14 to the Lawrence & Memorial Medical Group, and this boils
15 down to issues of scale.

16 Number one, the L & M Medical Group has
17 historically and continues to have tremendous
18 difficulties around recruiting and retaining physicians
19 and non-physician providers, and that extends to both
20 specialists and primary care.

21 That has a lot to do with the fact that
22 our service area is relatively small. Our lack of
23 academic affiliation and our goal in considering a full
24 merger with the Northeast Medical Group is to bring in

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 new physicians and to bring new non-physician providers
2 to our local service area to provide care close to home.

3 Number two, our ability to be successful
4 in an accountable care or risk-based environment is
5 unlikely, without merging with a larger organization,
6 and, again, that has to do with scale.

7 The number of patients that we serve, the
8 sheer demographics of the area, what the insurance
9 companies would call covered lives, are not here.

10 We also need to invest heavily and to gain
11 expertise in data analytics and data warehousing. We
12 need to gain expertise in care management tools and
13 predictive analytics, and, as I said, we need to scale to
14 manage risk.

15 As anyone in the insurance industry would
16 tell you, without scale, you can't effectively manage
17 risk.

18 And, lastly, given our small size, the
19 fixed overhead associated with our small size, we cannot
20 be cost-effective with the various back office functions
21 that we engage in. These include revenue cycle,
22 scheduling, purchasing, communications and others.

23 So how does a merger with the Northeast
24 Medical Group help us? Well just like everyone else in

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 this room, I'm very concerned about access to care. You
2 cannot underestimate the power of the Yale brand. The
3 Yale brand will help us expand and enhance access to new
4 physicians and non-physician providers in the L & M
5 community, and this concept, which has primacy, is in
6 contradistinction to what Mr. Hyde argues in his pre-
7 filed testimony, where care will leave our community. We
8 aim to do just the opposite.

9 Secondly, as it relates to access to
10 subspecialists, we have an insufficient patient base to
11 support a full-service line of various subspecialties.
12 It becomes very difficult to offer such specialty care
13 when you only have enough need for one physician or half
14 a physician.

15 By merging completely with the Northeast
16 Medical Group and affiliating with Yale-New Haven
17 Healthcare, we can more appropriately match capacity to
18 demand. The academic and research interests of our
19 Applicants will also be met by the affiliation.

20 And very important to me and close to home
21 is primary care. Many of our local providers have
22 stopped accepting Medicaid, as you know, given the poor
23 reimbursement that's been documented recently.

24 This is critically-important for our

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 community, that we can continue to offer access to
2 Medicaid. Only through a merger with the Northeast
3 Medical Group can we continue to execute on our mission
4 of improving the health of this region for all
5 individuals, regardless of their ability to pay.

6 Just like everyone else in this room, I'm
7 very concerned about the value that we offer to our
8 patients. We have been doggedly focused on cost and
9 being efficient, so that we can reduce the total cost of
10 care, and we will continue to make this our chief focus.
11 We want to offer care in the lowest cost, highest quality
12 setting.

13 So why NEMG? Why a merger? Well they
14 have expertise in various functions that will help us
15 reduce the total cost of care. This includes care
16 coordination, so that we can reduce redundant care. They
17 have various clinical pathways and evidence-based
18 protocols.

19 They have operational efficiencies,
20 process innovation, and experience with so-called lean
21 technologies, which will help our operational
22 efficiencies, and, as I've previously stated, we seek
23 their scale to help us with our back office synergies.

24 Just like everyone else in this room, we

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 are interested in being successful around participating
2 in Accountable Care Organizations and taking on risk in
3 our new world of population health.

4 Right now, the likelihood of us being
5 successful alone is limited. Having a single electronic
6 health record in the form of Epic will get us partly
7 there, but, as I previously stated, we need the expertise
8 of the data analytics, the predictive analytics, the data
9 warehousing, the clinical decision support tools, the
10 patient engagement tools, the care coordination tools,
11 the telehealth tools, the homecare tools, all the things
12 that we can't possibly develop on our own, given our
13 small size.

14 All of this is designed, so that we can
15 intervene with our patients to keep them less sick. We
16 want to improve lives. We want to keep patients out of
17 the expensive emergency department. We want to keep
18 patients from being readmitted to our hospital, and we
19 need to be successful in population health for the
20 benefit of our patients.

21 Just like everyone else in this room, I'm
22 troubled by the costs associated with our medical group
23 and the financial losses that they incur on our L & M
24 healthcare system.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Now while this is largely an accounting
2 issue, given the fact that all of the work their
3 physicians do, the downstream revenue from that is
4 attributed to the hospital, leading to hospital margins,
5 while the medical group has a negative margin, we can do
6 better if we have scale.

7 To some degree, this is going to become
8 necessary, so that we can ensure continued Medicaid
9 access.

10 Lastly, I want to make a point about a
11 statement that Mr. Hyde made in his pre-filed testimony.
12 Unfortunately, he made the odious comment, by stating
13 that physicians under an employment arrangement have
14 been, quote, "bought off," unquote.

15 As an employed physician for over 20
16 years, I find this very offensive. Clearly, Mr. Hyde has
17 never directly managed physicians. Had he, he would know
18 that they are amongst the most intelligent, independent-
19 thinking and autonomous professionals with whom you can
20 deal.

21 They are strident advocates for their
22 patients, and that is where their value stems from. We
23 want to encourage autonomy. We want to encourage their
24 patient-centered focus, and we will continue to do that

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 under a model, where we work with NEMG.

2 Just like everyone else in this room, I'm
3 concerned about a loss of local control. Our governance
4 structure with the Lawrence & Memorial Medical Group
5 addresses this issue.

6 Members of our Board will sit on the NEMG
7 Board. We will have a local Physician Operating
8 Committee that advises the Board, as we have now.

9 NEMG and Yale-New Haven Healthcare has
10 made it crystal clear over the last 18 months that they
11 understand that all medicine is local.

12 So just like everyone else in this room, I
13 appreciate the work that OHCA does. By design, this is a
14 very thoughtful, contemplative, yet somewhat tedious
15 exercise, so that the needs of our patients are served.

16 Our challenges are related to scale. The
17 Northeast Medical Group merger allows us to improve
18 access to primary care and specialty care, to decrease
19 the total cost of care, to participate and succeed in
20 Accountable Care Organizations, where we take on risk,
21 and to maintain local control for our patients.

22 And one final point that I would make is
23 that the Governor's Executive Order does not specifically
24 address the NEMG LMMG merger. It is outside of the

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Certificate of Need presently under discussion.

2 For the aforementioned reasons, I would
3 strongly urge you to approve the application, as
4 submitted. Thank you very much.

5 MS. FELDMAN: Dr. Varkey will now provide
6 some testimony.

7 DR. PRATHIBHA VARKEY: Good evening,
8 Attorney Hansted and OHCA staff. My name is Prathibha
9 Varkey. I'm a Board Certified Internal Medicine and
10 Preventive Medicine physician and the newly-appointed
11 Chief Executive Officer of the Northeast Medical Group.
12 I would like to adopt my pre-filed testimony as my own.

13 I do appreciate the opportunity to speak
14 about the CON application before you for the L & M
15 Physician Association to merge into the Northeast Medical
16 Group.

17 Given my short tenure at NEMG, Mr.
18 Christopher O'Connor, who is the Chief Operating Officer
19 of Yale-New Haven Health, was also presented a -- will
20 also be available to answer questions.

21 Dr. Lehrach outlined specific reasons why
22 LMP desires this affiliation. I would like to focus my
23 testimony on what I consider are key community issues
24 related to, A, access, and, B, population health and

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 quality of care that the overall affiliation will assist
2 it.

3 I'd like to first address the topic of
4 access. New London and its surrounding towns have a
5 significant problem in access. In fact, the proportion
6 of emergency room visits per community member in New
7 London is, for example, higher than anywhere in the
8 nation.

9 Because of a variety of factors, including
10 low reimbursement for patients with government insurances
11 and the administrative burden related to healthcare
12 reform, more and more providers nationally are moving to
13 be part of large medical groups.

14 In fact, a recent national survey from
15 about three weeks back pointed that about 26 percent of
16 providers in independent practices nationally moved to
17 large medical groups for the very same reasons.

18 It has also become increasingly difficult
19 for small medical groups to hire providers. In fact,
20 recent surveys have suggested that most new graduates
21 want to work with large health systems.

22 LMP's affiliation with the Yale-New Haven
23 Health System will certainly increase the capability of
24 the L & M physician associates to hire more providers to

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 the community, because of our reach to a larger pool of
2 candidates and because of our affiliation to a larger
3 academic health system.

4 Our physicians in the Northeast Medical
5 Group live and work in the same communities that our
6 patients live and work in, and we take great pride in
7 providing high-quality care to our patients.

8 In fact, this is the very mission and
9 reason behind the creation of the Northeast Medical Group
10 six years back to provide high-value healthcare and
11 access to the communities we serve.

12 Being community providers, we at NEMG have
13 a strong mission also to provide care from a population
14 health perspective, which is also very important to us,
15 and we have been actively working on the same for several
16 years.

17 In 2015, NEMG was selected as one of 89
18 new Medicare shared savings programs, Accountable Care
19 Organizations nationally to provide Medicare
20 beneficiaries with access to high quality coordinated
21 care.

22 In fact, to be an ACO, one needs access to
23 at least 5,000 covered lives and integrated electronic
24 medical record, a significant infrastructure of care

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 coordinators that follow patients from hospital
2 discharges that manage chronic diseases, data analytics
3 and financial resources to support the same, most of
4 which typically cannot be met by small physician
5 organizations, such as LMP, as Dr. Lehrach alluded to.

6 Once the affiliation with NEMG occurs,
7 however, LMP physicians will be able to participate in
8 the NEMG Medicare ACO and avail of our population health
9 capabilities.

10 Additionally, shared clinical and
11 utilization data across locations allows for greater
12 clinical integration, information sharing between
13 physicians, and physician collaboration while minimizing
14 wasteful duplicative utilization of scarce resources.

15 Our physicians at the Northeast Medical
16 Group currently receive regular dashboards, sorry,
17 dashboard reports regarding their adherence to a number
18 of quality indicators, such as screenings, preventive
19 care, medications, as well as the frequency of the
20 emergency room visits of their patients, allowing for a
21 discussion and analysis and improvement between and among
22 providers, all of which are critical to work towards cost
23 effective care.

24 In affiliating with the Northeast Medical

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Group, LMP physicians will also gain access to much
2 needed expert clinical pathways and protocols to provide
3 evidence-based practice information to guide physicians
4 in selecting the most appropriate evidence-based tests
5 and clinical interventions for the patients.

6 The LMP physicians, in addition, will also
7 have access to our lean quality improvement methodology
8 tools, leadership development opportunities, and patient
9 experienced training. Again, none of these currently
10 exist at LMP.

11 The affiliation will also help LMP to be
12 better positioned to respond to MACRA, which is a
13 sweeping overhaul of the Medicare physician payment model
14 that significantly will influence Medicare physician
15 reimbursements to shift towards value-based metrics by
16 2018.

17 Finally, I would like to briefly address
18 some of the points made by Dr. Hyde in his pre-filed
19 testimony. Like Dr. Lehrach, I find it offensive and
20 inflammatory that he suggests that our physicians have
21 been paid off, and, so, no longer care about our
22 patients, or about the financial challenges that our
23 patients face.

24 I've run large system affiliated medical

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 practices in states across the country, including Texas
2 and Minnesota, and, like the physicians in the Northeast
3 Medical Groups, the physicians in these practices care
4 deeply about their patients.

5 In fact, most physicians have joined
6 medical foundations like Northeast Medical Group, because
7 they care, and because they're looking for the best and
8 most efficient way to deliver high-quality, high-value
9 healthcare services to a diverse set of populations.

10 In fact, at the Northeast Medical Group
11 I'm pleased to report that our outpatient satisfaction
12 scores are higher than national outpatient satisfaction
13 scores.

14 This is something we take very seriously,
15 and our Chief Patient Experience Officer spends
16 considerable time coaching and evaluating our providers
17 on patient-centered care, which is very important to us.

18 In summary, to address the critical needs
19 of access for patients to community providers and to
20 optimize efficiency by providing the infrastructure
21 resources necessary to take care of population health, I
22 believe it is critical and time sensitive to approve this
23 affiliation.

24 I thank you for your time and attention

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 and do urge you to consider and approve this CON
2 application.

3 HEARING OFFICER HANSTED: Thank you,
4 Doctor.

5 MS. FELDMAN: Mr. Cummings would like to
6 provide some testimony.

7 MR. CUMMINGS: Thank you, Joan, and good
8 evening, Attorney Hansted and OHCA staff. My name is
9 Bruce Cummings. I'm the President and CEO of L & M
10 Healthcare, which includes Lawrence & Memorial Hospital,
11 the Westerly Hospital, the Visiting Nurse Association of
12 Southeastern Connecticut, and, for purposes of the
13 application now before you, the L & M Physician
14 Association, doing business as the L & M Medical Group.

15 I hereby adopt my pre-filed testimony in
16 connection with the proposed merger of the medical groups
17 as my own.

18 I thought I would just step back briefly
19 to describe the genesis of the L & M Physician
20 Association, a non-profit affiliate of L & M Hospital.

21 This entity was established roughly six
22 years ago, because of the problem of access in our
23 community and the difficulty of recruiting physicians
24 into a private practice model.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 And, as you've heard from Dr. Lehrach,
2 increasingly in our community by the practitioners of all
3 stripes have stopped seeing Medicaid patients, and,
4 increasingly, they're no longer accepting new Medicare
5 patients, as well.

6 So against this backdrop, the L & M
7 Physician Association was created to recruit new
8 physicians and non-physician providers to the community.
9 At no point have we ever purchased a physician practice.

10 Some physicians previously in private
11 practice, for reasons that you've heard from my
12 colleagues here, decided they could no longer afford to
13 stay in business as a private practitioner and asked to
14 be employed. Their practice was not purchased.

15 We also recruited additional new
16 physicians to the community, but, as you've heard from
17 Dr. Lehrach, even with the advent of the medical group,
18 we've reached a turning point, where simply it's good,
19 but it's not good enough to meet the requirements of the
20 new environment in which we are operating.

21 And, particularly, I think, in the
22 Southeastern Connecticut, an additional challenge, in
23 addition to a high percentage of Medicaid patients, we
24 also see a lot of TRICARE patients, because of the

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 submarine base and active military personnel located in
2 this area and military retirees, so between the hospital
3 and the medical group, this is the two entities really
4 collaborate to provide access into the community.

5 So you've heard our case, as to why L & M
6 Healthcare should affiliate with Yale-New Haven, and it's
7 an affiliation, not a merger. By contrast, the medical
8 groups is a true merger, in order to provide the scale
9 required to recruit the next generation of physicians to
10 our community and to promote access here.

11 And just a reminder, that one of the
12 reasons why it is a merger and not an affiliation, it's a
13 State law that specifically stipulates that there can
14 only be one medical foundation within a given healthcare
15 system.

16 We understand people in the community are
17 worried about the fate of their local hospital and their
18 local medical group and what will happen to prices for
19 the future of healthcare in the future.

20 We share those concerns, as the future of
21 healthcare is very uncertain and change can be
22 frightening, but one thing is certain. Without bold
23 changes, without finding a partner, one for the medical
24 group and one for the balance of L & M Healthcare, our

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 local healthcare system will continue to deteriorate, and
2 both access and efficiency will suffer.

3 Just a reminder, we received approval from
4 the Federal Trade Commission, which is due to expire by
5 September 8th. Thus, if this affiliation of L & M
6 Healthcare and Yale-New Haven is not completed by
7 September 8th, then we will need to engage in a costly
8 and lengthy regulatory review process with the FTC again,
9 which only further delays the needs. I will stop there.
10 Thank you.

11 HEARING OFFICER HANSTED: Thank you.

12 MS. FELDMAN: That's all the testimony we
13 have.

14 HEARING OFFICER HANSTED: Attorney Murray,
15 do you have any presentation on this application?

16 MR. MURRAY: Yes, we do. We have two
17 individuals. We'll first call on Dr. Fred Hyde, and then
18 he'll be followed by Dr. Ellen Andrews.

19 DR. HYDE: Mr. Hansted, members of the
20 staff, ladies and gentlemen, I'm going to adopt my pre-
21 filed testimony, to the extent it's pertinent to this
22 application, and spend as few minutes as possible, given
23 the hour, on my testimony, but would like to preface my
24 testimony with a description of what I've seen, so that

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 you will perhaps understand whatever merits or demerits
2 my testimony might have.

3 I mentioned in the first hearing that I
4 had been the first Director of the Faculty Practice Plan
5 at Yale. I was chosen for that job by the Department
6 Chairman at Yale, and, while having nothing but respect
7 for their professional activities, it was the beginning
8 of my education in the financial relationships between
9 doctors and hospitals and doctors and doctors.

10 Subsequently, I spent time working with a
11 network of hospitals in Connecticut, who were attempting
12 to get their doctors signed up for a preferred provider
13 organization with Blue Cross, and we were successful in
14 creating the only such enterprise then or since, signing
15 up 1,200 new physicians, the largest number since the
16 merger of Blue Cross and Blue Shield in 1959 in
17 Connecticut, all about who gets paid what for doing what.

18 When the Connecticut State Medical Society
19 organized a physician-owned HMO, called MD Health Plan, I
20 was their person to arrange the strategy for
21 compensation, how to figure out how the doctors were
22 going to pay themselves, because we had men and women in
23 the Northeastern part of the state, who were not too many
24 years from taking produce, and we had the Gold Coast,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 where they had a very elevated sense of the worth of
2 their professional services, all about the business
3 aspect. Nothing about professional. All about the
4 business.

5 Since that time, I've run a surgery center
6 owned by physicians, 50 credentialed surgeons, and have
7 testified in more than 50 cases as an expert on
8 hospital/physician financial relationships. Who pays who
9 what and with what consequence?

10 So it's not economics. It's real life.
11 It's not disrespectful of doctors. It's respectful of
12 your job, which is to figure out how the public is going
13 to get its money's worth out of any transaction involving
14 large physician groups.

15 Let me begin by stating that I can see the
16 problem. If you look at the financial statements for
17 September 30, 2015 from the Lawrence & Memorial
18 Corporation and look at the supplementary material, which
19 has the revenues and expenses associated with different
20 divisions, you can quickly see the problem, also.

21 The 73 physicians have net revenue of less
22 than \$30 million, and they have a deficit of \$21 million,
23 so we're not going to have these physicians survive very
24 long losing as much money as they bring in, nor is the

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Lawrence & Memorial Corporation going to be happy about
2 that. I think it's not anybody's fault. It's what's
3 happened. What has happened?

4 Beginning in 1989, physicians found their
5 compensation regulated. The new resource-based relative
6 value scale became the basis for the CPT-based
7 reimbursement, which led physicians into the first wave
8 of, if you will, associating themselves financially with
9 hospitals.

10 We had physician hospital organizations,
11 we had physician practice management plans, actually
12 begun by a Connecticut resident, Mr. Abe Gosman. We had
13 a lot of scurrying in the early 1990s to try to find safe
14 harbors, because it was perfectly clear that
15 standardization of physician compensation was going to
16 lead to limitation. It already severely compromised
17 primary care physicians right out of the bat, right out
18 of the shoot.

19 The solution became a little more apparent
20 once hospitals under the outpatient perspective
21 reimbursement system that began in 1997, which limited,
22 just like DRGs did for the inpatient, limited outpatient
23 reimbursement. How were both physicians and hospitals
24 going to survive?

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Beginning in the year 2000, we had,
2 through Medicare, something called a site of service
3 differential. This is familiar to people, who are going
4 to a doctor, and, suddenly, the doctor is part of a
5 hospital-based system, and they get two bills; one bill
6 for the professional services, one bill to help keep the
7 hospital open.

8 It's taken us 15 years to get rid of this
9 site of service differential. It is going away with
10 rules being set now for execution January 1, 2017, which
11 may help explain some of the haste behind this
12 application. Some things have to be done, in order to be
13 reimbursable under the historical site of service
14 differential rules, and, if they are not done, based on
15 commitments entered into prior to that time or
16 implemented at that time, they may not be reimbursable at
17 the higher, that is dual reimbursement rate, which the
18 general accounting office in one of the publications
19 we've provided to you estimates for office visits at
20 about \$50 an office visit.

21 We know that there are some studies that
22 have been done, and I'm going to just draw your attention
23 to two or three of them. I realize we've given you a big
24 bibliography. There won't be any quiz at the end, but

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 two or three of these articles may help.

2 The GAO study, which we gave you December
3 2015, about hospital/physician consolidation, both the
4 vertical, if you will, and the horizontal, highlighting
5 the need for payment reform, we gave you an article,
6 which was Pritchett(phonetic), from 2010 from Health
7 Affairs about unchecked provider clout in California,
8 leading to higher than necessary payments, and we now
9 have, six years later, an article by Melnick in the
10 Journal of Health Care Organization Provision and
11 Financing in April of this year, which we also gave you,
12 that basically says because they had before and after
13 numbers. You don't have them, and we don't have them.
14 Nobody apparently has them.

15 They studied California Hospital and
16 physician utilization and found about \$4,000 per
17 discharge for the hospitals that had gotten bigger. They
18 found increased utilization and higher prices for the
19 doctors, who had been brought along for the ride.

20 There are other articles, again, quite
21 recent. We have the Baker Physician Practice prices paid
22 by private insurers for office visits. We have the
23 Association of Financial Integration between physicians
24 and hospitals with commercial healthcare prices higher

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 than necessary. We even have total expenditures for
2 patient in hospital-owned versus physician-owned
3 organizations, and, as Dr. Smith testified, even the new
4 Accountable Care Organizations have shown that the
5 independent physician directed Accountable Care
6 Organizations were the only ones to show any
7 efficiencies.

8 Now why is that? I can tell you why it
9 is. If I walked into a surgeon's lounge and confronted
10 the orthopods with the idea they shouldn't be paying
11 \$7,000 for an elbow titanium, because Medicare was paying
12 me \$5,000, they'd laugh me out of the room and, by the
13 way, did.

14 I can tell you, having been Chief
15 Executive of some physician practices, as well as the
16 surgery center, when the doctors confront one other about
17 why we're paying \$6,000 for a titanium elbow, it's a
18 different conversation.

19 Dr. Smith testified that, for better or
20 worse, productivity somehow gets compromised when these
21 large organizations become even larger. Mr. Gosman from
22 Connecticut was famously quoted, front page of Business
23 Week at the time, why he was getting out of this field.
24 He said I found, when I hired doctors, I got low

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 handicappers.

2 What he meant was that the doctors focus
3 on actually getting paid for what you do, which is very
4 tricky, somewhat disappeared.

5 The expenses somewhat increased. If it's
6 the trash being picked up three times a week instead of
7 twice, what do you care, because you're not paying for
8 it?

9 The entire nature of the organization
10 changed once there was the bureaucratization, the levels
11 of opacity, the loss of accountability to the patient.
12 The patient may have an unpaid bill. Not my fault. I
13 don't have any influence over the accounts receivable
14 management, even though that I know has a reputation for
15 abusive billing.

16 So, in summary, this application, unlike
17 the other, should not at a minimum be deferred. We know
18 the fault of the other application, which is you don't
19 have, nobody has, apparently, numbers on which they can
20 agree that show the progress before and after of the
21 acquisition of community hospitals.

22 We do know that a big part of the
23 prosperity of the price leader in this field is the
24 capacity to charge academic medical center rates for

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 community hospital services. Neither here, nor there.

2 This application is a very different, a
3 horse of a very different color. It is such a bad idea,
4 based on such literature as we have and common sense.
5 I'm testifying in front of you, hopefully, as an expert
6 on the financial relationships between doctors and
7 hospitals, but you don't need that expertise. You know
8 what will happen when we have these large organizations
9 of doctors, who are able to command prices that are
10 consistent with their financial aspirations, whether or
11 not that fits community needs.

12 I'm sorry if candid talk about money is
13 offensive, especially the younger practitioners. Nothing
14 I can do about that, but I think we all owe each other a
15 straight look in the eye about what the financial
16 consequences are of allowing this merger to take place.

17 Once it's done, you will have insurance
18 companies that must have these doctors, and it will be
19 very, very difficult to undo. Thank you.

20 MR. MURRAY: Dr. Andrews?

21 DR. ELLEN ANDREWS: Thank you. I'd like
22 to adopt my pre-filed testimony, as it relates to this
23 application.

24 I'd like to, just in a few minutes, talk

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 about the Medicaid, what's been suggested about Medicaid
2 underpayments and why that's such a driver here. The
3 last study -- I know I'm sworn under oath, and I didn't
4 memorize the study. It's been a little while since I saw
5 it, but the last study that I know of around Medicaid
6 rates found that Connecticut's were 99 percent average,
7 99 percent of Medicare, which may not sound great. It's
8 one percent below Medicare, but that's better than either
9 all or all, but one, other state.

10 Connecticut is very generous in its
11 Medicaid rates, and I know they don't like that. And we
12 heard that Yale-New Haven in Connecticut is a high-
13 priced, high-cost provider, so, while it may be a stretch
14 and it may not be as generous as, you know, people would
15 like, it's still very generous, given the, especially
16 given the State's finances right now.

17 The only cuts that have happened since
18 then have been in dental rates, I believe it's two or
19 three percent, and, also, home health medication
20 administration, which are serious cuts. They're not
21 unimportant, but I think, as a consumer advocate, I'm
22 deeply troubled by the eligibility cuts for Husky
23 parents, 10,000 losing coverage at the end of this month.
24 Those are really serious and severe cuts, and I think

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 that needs to be put in perspective.

2 Also, I believe it was four years ago, we
3 made some major changes to our Medicaid program.
4 Connecticut took it from an insurer capitated system to
5 one that is focused on patient-centered medical homes.

6 We have saved money per member per month.
7 It was down 5.9 percent last year. Not off of trend, but
8 down from zero. I mean it was actually down, which is
9 remarkable, and I can't say that enough.

10 We have improved quality, fewer people
11 going to the emergency room with non-urgent visits, but
12 we also increased the number of providers by 32 percent,
13 and it wasn't just about rates. We learned that. But it
14 was also about operational changes that needed to be
15 made, making life easier, paying on time, things like
16 that that made a huge difference in our Medicaid program,
17 so I think that that needs to be recognized, that our
18 Medicaid program has come a long way and should not be
19 used as a reason for requiring this merger.

20 Also, DSS right now is in the midst of
21 solicitation for value-based purchasing, a shared savings
22 program, MQISSP, which I can't remember what it stands
23 for, for our Medicaid program, and DSS reported to me in
24 an e-mail that I'm happy to share that Northeast Medical

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Group and the Yale Medical Group have both sent in
2 letters of intent.

3 The proposal is not due until August 2nd
4 by 2:00 in the afternoon, is my understanding, so there
5 is no proposal yet, but they have signed a letter of
6 intent. It's non-binding.

7 That and the fact that they are
8 participating in Medicare shared savings shows that there
9 is a sophistication there. There's a lot of
10 sophistication and risk profiling and analytics that are
11 required for those programs, and those are, the addition
12 of this section of the State, will add a great deal,
13 given that attribution will be through primary care
14 providers, will add a huge amount to their market share,
15 in terms of the power of them and how many lives are
16 attributed to them and how many are -- they will be under
17 their shared savings.

18 They will benefit from savings that are
19 achieved, based on those patients, so this is a huge
20 increase, and Yale-New Haven's market power, Northeast
21 Medical Group's medical power in the market, and, so I
22 would urge you strongly not to approve this until the
23 hospital decision is made and a larger decision can be
24 made. Thank you.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 HEARING OFFICER HANSTED: Thank you,
2 doctor.

3 MR. MURRAY: We have no further witnesses.

4 HEARING OFFICER HANSTED: Okay, thank you.
5 Attorney Feldman, do you have any Cross?

6 MS. FELDMAN: I do not.

7 HEARING OFFICER HANSTED: Attorney Murray,
8 do you have any Cross.

9 MR. MURRAY: I do not.

10 HEARING OFFICER HANSTED: Okay.

11 MS. FELDMAN: I have one Redirect.

12 HEARING OFFICER HANSTED: Sure.

13 MS. FELDMAN: For Dr. Lehrach. I believe
14 that Dr. Hyde commented that there is a site of service
15 differential that LMPA presumably takes advantage of with
16 respect to providing services to those in the community,
17 and I'm not sure he used the right terminology, but
18 perhaps he is thinking about a provider-based facility
19 fee that some hospitals have medical groups provide.

20 Does LMPA provide -- is it a provider-
21 based practice?

22 DR. LEHRACH: No.

23 MS. FELDMAN: So there's no associated
24 facility fee with LMPA services?

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 DR. LEHRACH: That is correct.

2 MS. FELDMAN: Thank you.

3 HEARING OFFICER HANSTED: Anything

4 further?

5 MS. FELDMAN: No.

6 HEARING OFFICER HANSTED: Okay.

7 MR. MURRAY: I just have a Redirect of Dr.

8 Hyde.

9 HEARING OFFICER HANSTED: Sure.

10 MR. MURRAY: Dr. Hyde, when you were

11 making that comment, were you referring to L & M?

12 DR. HYDE: No. As a matter of fact, I was
13 indicating the problem. The problem is that, on net
14 patient service revenue for \$29 million, they're losing
15 \$21 million.

16 The site of service differential, which
17 became part of the Medicare rules in 2000, is going away,
18 and one question worth asking is are there plans to, in
19 fact, incorporate a site of service differential through
20 the rearrangement of physician/hospital relations, or is
21 that so far from the Applicant's intent that, in fact,
22 they would agree not to do so?

23 MR. MURRAY: Thank you.

24 MS. FELDMAN: I have another Redirect in

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 response to Dr. Hyde's comment. Dr. Lehrach, are you
2 aware of the fact, in November of 2015, that Congress
3 passed a new law, eliminating provider-based locations
4 and site of service, as Dr. Hyde refers to it, so it no
5 longer can be an option for anyone, any hospital?

6 DR. LEHRACH: My understanding is that,
7 for applications already in process by the date of the
8 law, November of '15, those would go through, but no new
9 applications after November of '15 would be legal.

10 MS. FELDMAN: And do you have an
11 application in process?

12 DR. LEHRACH: We do not.

13 MS. FELDMAN: Thank you.

14 HEARING OFFICER HANSTED: Attorney Murray,
15 anything further?

16 MR. MURRAY: Doctor, I'm just going to ask
17 you, based on the last witness's response, do you have
18 any further information to add?

19 DR. HYDE: We know that the rules are
20 still in formation. We know that hospitals are unhappy.
21 It's a very simple question. If Yale-New Haven and
22 Lawrence & Memorial have no intention, whatsoever, of
23 essentially inflicting site of service differential
24 payments on the patients in this area, a mere statement

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 to that effect would suffice, as opposed to arguing about
2 where the regulations are now, what the meaning of the
3 statement in place by June 30th, the implementation by
4 January 1st, the legislation sign November 15th might be,
5 very simply addressed. That's my only point. Thank you.

6 HEARING OFFICER HANSTED: Okay, thank you.

7 MS. FELDMAN: We're done.

8 HEARING OFFICER HANSTED: Thank you.

9 MR. MURRAY: No other questions.

10 HEARING OFFICER HANSTED: Thank you, both.

11 And it's my understanding, before we get to OHCA's
12 questions, it's my understanding we have a couple of
13 elected officials here, who would like to give a
14 statement. I'm going to take them at this time.

15 MS. KAILA RIGGOTT: Ernest Hewett.

16 MR. ERNEST HEWETT: Good afternoon.

17 HEARING OFFICER HANSTED: Good afternoon.

18 MR. HEWETT: Can you hear me? It's almost
19 like I've been sitting in a judiciary meeting, waiting
20 for the last three hours.

21 Good afternoon, Attorney Hansted. My name
22 is Representative Ernie Hewett, and I'm a State Rep for
23 the 39th District representing the City of New London.

24 As you can imagine, I've been keenly

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 interested and concerned about the impact this
2 acquisition has on the individuals and families that live
3 and work in this city.

4 Several months ago, I expressed my support
5 for the Yale/Lawrence & Memorial affiliation, based upon
6 the facts and information that I had at the time. Most
7 importantly, I was concerned about the negative impact
8 this merger might have had on working families, those
9 employed at Lawrence & Memorial Hospital.

10 I've agreed to support the proposed deal
11 when I receive assurances from the Union and the
12 hospitals that job protections would be in place and
13 secure.

14 Since that time, I have received new
15 information that raises significant concerns about the
16 benefits of this acquisition to the community,
17 specifically related to local control, cost and price,
18 and sustained healthcare services to our community.

19 Local control. The initial statements by
20 Yale-New Haven and Lawrence & Memorial management were
21 assured that a local Board of Directors will control L &
22 M. I have recently learned that, in fact, according to
23 the proposed bylaws for Lawrence & Memorial Health
24 Corporation, Yale-New Haven is designated as the sole

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 corporate member of Lawrence & Memorial Health. In other
2 words, Yale-New Haven will have total control over
3 membership and will ultimately have control over
4 decisions made about our community hospital.

5 It is essential we have an honest, upfront
6 conversation about what this acquisition means to our
7 community. This newly-revealed information about the
8 power and authority held by Yale over the community
9 hospitals undermines our trust in the key players within
10 this proposed deal and calls into question Yale-New Haven
11 and Lawrence & Memorial's commitment to transparency and
12 authentic bylaws with this community.

13 Cost and pricing. According to a report
14 at the beginning of this year, if this acquisition is
15 approved, Yale will control 60 percent market share from
16 New York to Rhode Island and more than 80 percent in
17 Lawrence & Memorial primary service area.

18 Consolidation in such markets can lead to
19 price increases of 20 percent or more. This would be a
20 significant blow to our community and would further
21 accelerate challenges in accessing affordable healthcare
22 services.

23 I understand that OHCA has asked Yale-New
24 Haven Hospital to provide data on how previous Yale-New

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Haven mergers affected prices in the case of Bridgeport,
2 Greenwich and St. Raphael's acquisition, helping us to
3 potentially dispel some of these concerns.

4 To date, Yale has not provided this data.
5 It does not make sense for OHCA to move forward with this
6 acquisition without this crucial data.

7 Access to local services. My colleagues,
8 who represent constituents in the Windham area, recently
9 briefed me on changes made to critical healthcare service
10 at Windham Hospital.

11 Several years ago, Hartford Hospital
12 promised improvements and no cost to services within
13 their community. These promises were not kept, and
14 Windham Hospital closed its critical care unit,
15 necessitating patients to drive and fly on helicopters to
16 get normal healthcare.

17 What assurances do we have that this will
18 not be the fate, as well? Lawrence & Memorial Hospital
19 is a vital and crucial institution within this community,
20 and its continued service to the individual families
21 residing throughout the New London area must remain
22 secure.

23 In order for me to have confidence and
24 support in this proposal, these issues must be addressed.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 I strongly urge OHCA to require Yale-New Haven Hospital
2 and Lawrence & Memorial Hospital to enter into a signed,
3 legally-enforceable community benefits agreement,
4 negotiating with broader cross-section of the community
5 before we move forward with this, allowing any kind of
6 change to the community hospital.

7 I just want to end by saying this merger
8 almost sounds like a Bill coming down from the Senate at
9 the end of session.

10 The Bill comes down from the Senate, and
11 it's a good Bill, it comes to the House, and we're forced
12 to not change anything in that Bill to make it a better
13 Bill, because if it goes back to the House, the time is
14 going to run out, and we lose the Bill.

15 My opinion, I think we should just take a
16 couple of those mays out of this law or this merger and
17 put some shalls in there and put some teeth in it to make
18 this a better Bill. Thank you.

19 HEARING OFFICER HANSTED: Thank you. Are
20 there any other elected officials that want to give
21 public comment on this matter?

22 A FEMALE VOICE: (Indiscernible - too far
23 from microphone).

24 HEARING OFFICER HANSTED: Would you like

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 to make --

2 A FEMALE VOICE: I signed up.

3 HEARING OFFICER HANSTED: Okay, thank you.

4 I'll take public comment from the community after OHCA
5 has completed its question and answer session, which
6 we're going to get to right now at this point, okay?

7 So, as I just stated, OHCA has some
8 questions on both applications, primarily the 15-32033,
9 which is the Lawrence & Memorial Hospital and Yale-New
10 Haven Health Services, Health System, sorry.

11 So we're going to start. The first
12 question, and I believe it's the only question we have
13 pertaining to the physician group, we're going to ask
14 first, and then the rest will be to the affiliation.

15 MR. BRIAN CARNEY: Okay, good evening. My
16 name is Brian Carney. I'm an analyst with the Office of
17 Health Care Access.

18 I have a question relating to the merger
19 of physicians' group practices. How will the merger of L
20 & M Physician Group and Northeast Medical Group impact
21 the diversity of providers and patient choice in the
22 region?

23 DR. LEHRACH: So, in a nutshell, it will
24 expand access to both primary care and specialty care. I

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 don't know if that qualifies as diversity, but it will
2 expand access.

3 If your question specifically was asking
4 if there would be new services offered, then the answer
5 is also yes. Presently, given the size of the market, we
6 couldn't possibly recruit certain specialists and
7 subspecialists, because there just isn't enough demand in
8 the community to support that, however, as part of a
9 larger system, as I said in my comments, we can better
10 match capacity to demand by having specialists and
11 subspecialists present in our community seeing patients
12 in our community on a part-time basis.

13 MR. CARNEY: And do you have a list of
14 those services that you could provide us?

15 DR. LEHRACH: It's something we can
16 submit.

17 MS. FELDMAN: We could do it as a late
18 file.

19 MR. CARNEY: Okay. That would be great.

20 HEARING OFFICER HANSTED: That will be
21 Late File No. 1.

22 I just want to follow-up on that question.
23 When we talk about, when the statute talks about
24 diversity of providers in an area, what it's really

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 talking about is -- let me give you an example.

2 For whatever reason, there's a community
3 member that doesn't want to see a Yale physician. I
4 don't know why. If this proposal is approved, will there
5 be doctors in this area outside of Yale doctors, Yale
6 physicians, that that community member could see?

7 DR. LEHRACH: If I'm to understand you
8 correctly, Attorney, you're asking if there will be
9 physicians in our community, who are not under the employ
10 of NEMG?

11 HEARING OFFICER HANSTED: Correct.

12 DR. LEHRACH: Currently, I don't know the
13 actual breakdown, but there are many, many privately-
14 employed physicians. There are physicians in front of
15 you, who are employed by federally-qualified health
16 centers.

17 There are physicians, who are employed by
18 other large medical groups, including ProHealth. There
19 are physicians owned by the Hartford HealthCare system,
20 under Backus. I wouldn't expect any of that to change.

21 HEARING OFFICER HANSTED: Okay.

22 MR. CUMMINGS: If I could just add to
23 that? We have a number of private practice specialty
24 groups that have agreements with L & M, so the

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 anesthesiologists are a private practice group, not
2 affiliated with Yale. The hospitalists are a private
3 practice group. The emergency physicians are a private
4 practice group, and the radiologists are a private
5 practice group, so if you were to add up (papers on
6 microphone) largest groups in our community are the
7 emergency physicians and the hospitalists.

8 HEARING OFFICER HANSTED: Okay.

9 MR. CUMMINGS: Both in private practice.

10 HEARING OFFICER HANSTED: Thank you, both.

11 MS. FELDMAN: Attorney Hansted, I just --
12 perhaps, Dr. Lehrach, you can explain that we're not,
13 regarding our plans to recruit existing physicians in the
14 community versus recruiting physicians from out of the
15 community to join the practice.

16 DR. LEHRACH: So the intention is to bring
17 novel physicians and physician services to our community.
18 If they're primary care, they would be recruited de novo.
19 If they're specialty care, they may or may not be sourced
20 through the NEMG YMG network, or they might be recruited
21 independently from the outside.

22 Our goal is not to necessarily take on any
23 additional practices that are presently here. We love
24 the private practice model. I wish more doctors would

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 stay in private practice, but, unfortunately, the
2 economics are conspiring against many private
3 practitioners and they're knocking on our door.

4 HEARING OFFICER HANSTED: All right, thank
5 you.

6 MS. RIGGOTT: I actually have a question
7 for Dr. Hyde first. You talked about asking the simple
8 question about inquiring whether there would be
9 instituting a site of service differential.

10 DR. HYDE: Yes.

11 MS. RIGGOTT: If that's going away in
12 January, I guess I'm not, we're not entirely clear on why
13 we would want to inquire about that.

14 DR. HYDE: Right. We're in a transition
15 period. As you know, Congress finally responded to a
16 recommendation from MedPAC that the site of service
17 differential, that is the additional charge levied for
18 the so-called facility fee on top of the professional
19 fee, no longer be allowed, but there were exceptions for
20 commitments that were entered into by June 30th of this
21 year, which commitments would be implemented by January 1
22 of next year.

23 What were those exceptions? As you know,
24 there's a rule-making process underway, so we don't have

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 final resolution. My point was twofold. One is that all
2 of us need to be wary about hospitals subsidizing
3 doctors. Where does the money come from? We know where
4 it's coming from. From the year 2000 forward, by
5 capitalizing, if you will, a site of service
6 differential.

7 If, in fact, this particular practice has
8 no intention of entering into an arrangement, which would
9 allow such a levy, they have a simple solution to my
10 point, which is to say so. Very simple.

11 So I'm pointing to a problem, which is
12 that when hospitals acquire physician practices,
13 productivity plummets and expenses go up.

14 I'm pointing to a solution found in the
15 hospital physician industry, if you will, a business
16 solution, which is to charge more for the same services,
17 and I'm suggesting a resolution in this case, which is
18 commitment by the Applicants not to, in fact, levy
19 facility fees associated with professional services,
20 would make my point moot.

21 MS. RIGGOTT: Thank you. I guess my next
22 question is for the Applicant, then. Is there an intent
23 of instituting a site of service or facility fee?

24 MS. FELDMAN: I think the transcript will

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 reflect that that question was posed to Dr. Lehrach. I
2 can ask the question. He said no.

3 DR. LEHRACH: I'm willing to restate it.
4 Mr. Hyde's point is moot. There is none.

5 MS. FELDMAN: And I could also ask the
6 same question of Dr. Varkey, and the answer would be?

7 DR. VARKEY: No.

8 MS. FELDMAN: Thank you.

9 HEARING OFFICER HANSTED: That's all the
10 questions we have pertaining to the NEMG matter, so if
11 you want to switch chairs, just to make it easier at this
12 point for you?

13 DR. LEHRACH: Dr. Varkey and I appreciate
14 the comments about our youthful appearance, however.
15 (Laughter)

16 MR. CARNEY: Okay. There's been some
17 general concerns regarding Yale's market share post-L & M
18 acquisition. I took a look at some data, and, based on
19 FY-2015 inpatient discharge data, Yale and L & M combined
20 would capture more than 80 percent of inpatient
21 discharges in L & M's primary service area.

22 This is only the inpatient portion of the
23 market. Have you done a more comprehensive analysis of
24 the before and after market share of L & M's service area

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 in regard to this proposal? For example, an analysis
2 that includes outpatient care, including emergency care
3 and group practices.

4 MS. FELDMAN: Dr. Noether will respond.

5 MR. CARNEY: Okay, thank you.

6 DR. NOETHER: I guess, to answer your
7 question, first of all, unfortunately, there are no
8 comparable data to the inpatient discharge data that
9 enable us to calculate shares on the inpatient side, on
10 the outpatient side, or the physician side for that
11 matter, so one can't do the kind of comprehensive
12 analysis that you request.

13 I wouldn't have great reason to believe
14 that it's going to be hugely different on the outpatient
15 side, though there are more independent outpatient
16 producers generally than inpatient hospitals. We just
17 heard testimony about there being a lot of independent
18 physicians, so, again, they're probably lower there, but
19 I think the more relevant point is that the reason that
20 the share will be substantial post-affiliation is because
21 L & M already enjoys a substantial market share in its
22 own service area north of 70 percent, so the incremental
23 change resulting from this transaction is really pretty
24 minor, and that's certainly one of the reasons I suspect

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 that the Federal Trade Commission chose not to challenge
2 the transaction.

3 MR. CARNEY: Okay. Following up on a
4 similar question to before, then how would the market
5 share composition following the affiliation impact the
6 diversity of providers and patient choice in the region,
7 as far as hospitals?

8 DR. NOETHER: Again, I don't think it's
9 going to have much effect at all. As I noted in my pre-
10 filed testimony, there isn't a lot of direct competition
11 between Yale-New Haven Health or Yale-New Haven Hospital
12 and L & M Hospital or L & M Health currently.

13 Really, they are serving different patient
14 populations. They are 50 miles apart. There really
15 isn't a lot of direct competition now, so there's no
16 competition to be reduced and, therefore, no impact on
17 diversity of providers.

18 MR. CARNEY: Okay, thank you. The next
19 set of questions is sort of financial related. I'm not
20 sure your CFO would be the most appropriate person, but
21 I'll start off with a question, and you can determine.

22 How is pricing determined for hospital
23 services? What factors are included in the negotiation
24 with insurance companies regarding reimbursement amounts?

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MS. FELDMAN: We have multiple people that
2 can answer that.

3 MR. CARNEY: Okay, great.

4 MR. TANDLER: Sure. So when we look at
5 pricing, the first thing we have to understand is that
6 the preponderance of the payer mix is governmental.
7 We're talking about one of the highest governmental payer
8 mixes in the State at Lawrence & Memorial.

9 We do not dictate prices. We don't even
10 negotiate prices with our governmental payers. Those are
11 not negotiated.

12 For those that are, for those that are
13 negotiated, those are done at arm's length. We don't
14 reveal any rates, and I think we've covered during this
15 discussion our ability to share rates between the
16 parties. At this point, we are unable to do that, but,
17 going forward, as a result of this transaction, we have
18 committed to honoring the terms of the existing
19 agreements for their duration.

20 Following the term of those existing
21 contracts, we will negotiate those at arm's length with
22 the various managed care commercial payers, and those go
23 into a variety of factors.

24 Those are each, for all the Yale-New Haven

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Health System affiliates, are negotiated separately. In
2 fact, we are one of the only health systems that doesn't
3 have a single rate for all of our member hospitals.

4 Each hospital negotiates separate rates,
5 based on the economic circumstances of each affiliate.
6 Those go into matters, like the factors that fall into
7 that could be the cost index in that geographic region.
8 It includes the perceived quality at each hospital.

9 It includes the shortfall from
10 governmental payers. That is one of the independent
11 variables that goes into the pricing with managed care
12 payers, but, like I said before, we are honoring the
13 existing agreements for the duration, and, following
14 that, we would negotiate at arm's length, based on those
15 factors I just described.

16 COURT REPORTER: Can you identify yourself
17 for the record, please?

18 MR. TANDLER: Keith Tandler, Executive
19 Director.

20 MR. CARNEY: Is market share one of the
21 factors included in those discussions?

22 MR. TANDLER: No.

23 MR. CARNEY: Would that be a factor?

24 MR. TANDLER: No. Again, the economic

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 factors include perceived quality, the cost structure at
2 each organization, various cost indices in each
3 geographic region, and governmental payer shortfalls, as
4 well as the hospital tax factors into that.

5 MR. CARNEY: Okay, thank you.

6 HEARING OFFICER HANSTED: You mentioned
7 that you're unable to share the negotiated rates. What
8 is the basis for that?

9 MR. TANDLER: So, as part of this
10 transaction, we are not privy to the Lawrence & Memorial
11 rates. We're not able to estimate any price change as a
12 result of any negotiation.

13 If we were not honoring those existing
14 agreements, there would be no ability for us to even
15 gauge what that differential is.

16 MS. FELDMAN: I just want to make an
17 observation generally, that most managed care contracts,
18 if not, all, have confidentiality provisions, which
19 prohibit a provider from disclosing to a third party
20 their negotiated rates.

21 HEARING OFFICER HANSTED: And is that the
22 case here?

23 MS. FELDMAN: I assume so.

24 MR. TANDLER: Yes. Yes. I mean counsel

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 has advised us that, and we've been following that as
2 part of any business combination or affiliation that
3 we've ever worked with.

4 HEARING OFFICER HANSTED: Okay.

5 MR. SETH VanESSENDELFT: If I could just
6 add a comment? The two other things that would be
7 important to kind of add onto Keith's statement is one is
8 the expectation of pricing neutrality, so, as we go
9 forward with these commercial payers, there is absolutely
10 an expectation of pricing neutrality.

11 The second part is, in your prior
12 question, many times we're thinking about this in kind of
13 a same state for the same services that we would somehow
14 negotiate a higher price or charge more.

15 I think what we're missing in that is
16 really what's been tried -- we've tried to convey
17 throughout this, that, for all of those services that
18 have to leave the area and seek care at a higher level of
19 care in the tertiary setting, when it could be provided
20 in the community setting, and that's really what we're
21 advocating here, there is a pretty significant price
22 improvement in those cases.

23 So, for example, if we have lost a
24 thoracic surgeon and we can't replace that surgeon, we

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 can't recruit for them, and all of that care then gets
2 sent to Hartford, or to Yale, or to Providence, all of
3 those cases will be at a much higher level than if we
4 were able to continue to retain that in the existing
5 service area, and that's absolutely what we've been
6 advocating.

7 And probably the third point that's
8 critical to this thinking is that, as we negotiate
9 services going forward, there is an expectation that
10 greater and greater portions of that will be risk-based,
11 quality-adjusted, and, so, those are another thing that
12 we try to advocate.

13 COURT REPORTER: State your name for the
14 record.

15 MR. VanESSENDELFT: Seth VanEssendelft.
16 I'm the CFO at L & M.

17 MS. FELDMAN: Attorney Hansted, I would
18 also think it might be helpful if Dr. Noether explained
19 the reasons why, from a legal standpoint, anti-trust laws
20 would prohibit the sharing of that data.

21 HEARING OFFICER HANSTED: Okay.

22 DR. NOETHER: Let me first start by
23 caveating that I'm not an attorney, but I've spent a lot
24 of time with anti-trust attorneys and involved in

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 mergers, and it's certainly my understanding that it is
2 inappropriate and, in fact, illegal for parties prior to
3 having their merger ultimately approved or affiliation
4 approved and consummated to share competitive
5 information, which includes, certainly, pricing.

6 HEARING OFFICER HANSTED: I'd like to see
7 that law, where it prevents the disclosure. I'm not
8 familiar with it. I'm not saying it doesn't exist. I
9 would just like to see the cite for it, if you could
10 provide that as a late file.

11 MS. FELDMAN: I could tell you that you
12 could find that in Section 1 of the Sherman Act. If you
13 told us tonight that OHCA was going to approve the
14 proposed application, we'd be happy to share information,
15 but since we are not integrated, Section 1 of the Sherman
16 Act would prohibit that type of information not among
17 hospitals.

18 In addition, to the extent that they are
19 commercial contracts, we have contractual provisions that
20 would limit our disclosure to another hospital. As you
21 can imagine, the payers would not want that information
22 to be made public.

23 HEARING OFFICER HANSTED: Okay, thank you.

24 DR. NOETHER: Let me just add that there

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 have been a number of anti-trust cases brought precisely
2 as violations of the Sherman Act that involve essentially
3 allegations of price fixing among competitors.

4 HEARING OFFICER HANSTED: Okay, thank you.

5 MR. CARNEY: I just have another follow-up
6 for Dr. Noether about the whole risk adjust pricing. I
7 keep hammering away here.

8 You said, basically, that that information
9 there's no metric that's appropriate to use. What about
10 -- why is it not possible or appropriate to provide
11 hospital prices utilizing diagnostic related groups using
12 MSDRGs, which do categorize patients by treatment type
13 and severity of illness?

14 DR. NOETHER: That certainly is a first
15 step, and looking at case mix adjusted prices would be
16 essentially adjusting prices for the DRG weight by
17 essentially taking an unadjusted price and dividing it by
18 a DRG weight, which I will say, parenthetically, it
19 appeared, from when we looked at the Milliman Study, that
20 they, in fact, implemented any kind of case weight
21 adjustment incorrectly, because they multiplied instead
22 of dividing.

23 The point I was trying to make earlier was
24 that the DRG weight assumes that all patients within a

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 DRG are the same, and that's not the case.

2 MR. CARNEY: Don't they have --

3 DR. NOETHER: DRGs -- sorry.

4 MR. CARNEY: Don't they have several
5 categories, like without comorbidities? They do have
6 some separation, do they not? Three different
7 categories, I believe?

8 DR. NOETHER: Yes, sir, you're correct.
9 There are, at least for some DRGs, there's a with and
10 without complications and comorbidities, so that starts
11 to make some adjustments, but even within those two
12 categories you can have a broad spectrum of patients,
13 and, certainly, the Medicare program, for example,
14 recognizes that teaching hospitals have higher costs for
15 a number of different reasons and pays them more.

16 One of those reasons is it does recognize,
17 as has been discussed earlier, that teaching hospitals
18 have a higher range of services and tend to attract
19 sicker patients, so that's just one example.

20 MR. CARNEY: Okay, thank you. All that
21 being said, what evidence can you provide OHCA with that
22 will help us evaluate whether or not healthcare costs
23 will be adversely affected by this proposal?

24 DR. NOETHER: Is that a question for me?

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MR. CARNEY: That can be for anyone.

2 DR. NOETHER: I can start, but I suspect
3 others have some. I mean I think, you know, it gets back
4 to what we were saying before, which is there really, at
5 least from an economist perspective, there's no
6 diminution of competition, because there hasn't been much
7 competition between Yale-New Haven and L & M
8 historically.

9 If anything, there will be efficiencies
10 that will be generated through the transaction that
11 should enable costs to be reduced and/or quality to be
12 enhanced.

13 MR. TANDLER: So I can just add to that.
14 There's various elements of our strategy over the years
15 that has allowed us to reduce costs. Some of those areas
16 we've covered today.

17 Access to capital was an area we covered
18 regarding the ability to borrow. Scale has been part of
19 our ability to reduce the cost per unit, specifically
20 where we have increasing amounts of fixed costs. We're
21 increasingly a capital-intensive organization, and those
22 fixed costs get spread out over a greater number of
23 patient visits.

24 This is one piece of our overall strategy.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 We've actually been successful in that, as well, if you
2 look back at some of our own history with the Hospital of
3 St. Raphael. That's a recent example of where we've been
4 successful.

5 Insurance is another area. We've had
6 examples, where we're able, because of our size and
7 because of our ability to tolerate and manage risk, we've
8 been able to use our size and expertise around risk,
9 whether it's malpractice, property casualty, or any other
10 type of risk, to withstand that and reduce costs, and
11 these are three examples of areas that are compelling
12 that are part of our strategy.

13 MR. CARNEY: Okay and those, combined
14 with, say, the anticipated cost savings opportunities
15 that have been presented following the acquisition, how
16 will that translate to, you know, potentially lowering
17 prices for patients?

18 MS. BORGSTROM: Let me maybe take a crack
19 at that, because these are very complicated issues, as
20 you're well aware, and, to answer that factually, there's
21 a great deal of speculation.

22 One, as we said in the application, we
23 have stipulated price neutrality for Lawrence & Memorial
24 and Westerly, and, after their contracts expire, as Mr.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 VanEssendelft said, those will be negotiated, based on
2 Lawrence & Memorial's costs and what's happening in this
3 particular geography.

4 We also said earlier that the hope is that
5 we keep more patients in the local community here, rather
6 than having them treated, because the subspecialists are
7 not in this community. That will make it less expensive,
8 because this is a lower cost setting in some of those
9 patients, who may be being transferred to New Haven.

10 You know, in the past five years, the
11 Yale-New Haven Health system has reduced on an annualized
12 basis its operating costs by over \$200 million. That has
13 not translated into a price reduction or what people may
14 feel when they go to the hospital or physician for a
15 couple of reasons.

16 One, as we've taken the \$200 million out,
17 we are now the largest taxpayer in the State of
18 Connecticut, paying over \$185 million in taxes. That,
19 combined with reductions in payment rates for things like
20 laboratory services and outpatient services, has more
21 than eclipsed what we have saved.

22 Second, what people are feeling out of
23 their pockets is, to a certain extent, based on employer
24 designed insurance offerings, and we don't have any

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 control over that, and, as we move further in healthcare
2 reform and the present Health Care Act organizations
3 looking to avoid taxes, are going to put more
4 responsibility on employees and consumers whether or not
5 that has anything to do with the actual prices or
6 negotiated rates with payers.

7 So the issues are very complicated, but we
8 recognize that we've got to continue to try and take
9 costs out and manage care most effectively, so that it's
10 the right patient getting the right care in the right
11 setting at the right time.

12 MR. CARNEY: Thank you. I just have one
13 more follow-up on the contracts, saying that Yale-New
14 Haven will honor L & M Hospital's and Westerly Hospital's
15 existing contracts. Do we have time frames for those
16 individual contracts? Obviously, they're probably not
17 the same expiration dates, or do they have to be
18 renegotiated? That will give us a feeling for how long
19 those prices would stay the same.

20 MR. VanESSENDELFT: That is correct. I
21 would say our larger contracts extend at least for two
22 years and some of them up to three years, but you are
23 correct. There are different periods, different renewal
24 dates for each of the payers.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MR. CARNEY: And could we get a possible
2 listing of those contracts and the dates?

3 MR. VanESSENDELFT: You can.

4 MR. CARNEY: Okay, that would be great. I
5 appreciate that.

6 HEARING OFFICER HANSTED: That will be
7 Late File No. 2.

8 MS. FELDMAN: Attorney Hansted, these late
9 files relate to which application now?

10 HEARING OFFICER HANSTED: This is 32033.

11 MS. FELDMAN: And the first late file, is
12 that related to 32, which was a list of --

13 HEARING OFFICER HANSTED: Yes, that's 32.

14 MS. FELDMAN: Okay.

15 HEARING OFFICER HANSTED: 32032.

16 MR. MURRAY: Attorney Hansted, could you
17 remind me what Late File No. 1 was? My notes seem
18 unintelligible.

19 MR. CARNEY: It's a list of additional
20 services that will be offered.

21 MR. MURRAY: Okay, thank you very much.

22 MR. CARNEY: Okay. I think this is
23 getting close to the end of my list. We've touched upon
24 the capital commitment, bits and pieces in Cross-Exam.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 I'd sort of like to hear from the CFO in sort of layman's
2 terms for our benefit and the benefit of the public, so
3 let me just read my question.

4 Yale is committed is deploy \$300 million
5 in resources in the Eastern Connecticut and Western Rhode
6 Island region over a period of five years for the purpose
7 of enhancing L & M's clinical and operational
8 capabilities and services, is basically your language.

9 Please walk us through the funding sources
10 and planned allocation of the \$300 million commitment.

11 MR. TANDLER: As far as the funding
12 sources, there's a first tranche, which is comprised of
13 the \$85 million. That's cutup into two sections. I
14 think there's one tranche, which is \$41 million, where we
15 have been able to get preliminary recommendations on the
16 deployment and the use of those funds, and those are for
17 some of the outlined areas that we've covered.

18 There are some areas of physician
19 recruitment, including primary care, and infrastructure
20 for population health and IT.

21 There's a second \$45 million. That second
22 \$45 million would come, regardless of any outcome,
23 regardless of any return that we discussed earlier, which
24 would come at the onset as a follow-up investment, but

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 without any contingencies attached to it, and that would
2 come from some area of the health system.

3 It could include the Yale-New Haven Health
4 Services parent, and it could include Lawrence &
5 Memorial's funds, if it's part of the health system,
6 depending on the appeal of those, who follow on
7 investments.

8 The use of those investments could be
9 similar specialties, primary care in the surrounding L &
10 M area. So that's the first \$85 million.

11 We discussed, also, the 215 that follows,
12 or the balance of the total \$316 million, and that's made
13 on a -- that will be made we described as an iterative
14 process. It would be based on the ongoing measurement,
15 using various metrics of success, whether they're
16 quality, patient satisfaction.

17 They could include our ability to manage
18 population health, any of the program service
19 initiatives.

20 MR. CARNEY: So would that be out of L & M
21 operations?

22 MR. TANDLER: Yes. That would be --

23 MR. CARNEY: -- 215?

24 MR. TANDLER: The source of that funding

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 would also come from our ability to stabilize operations
2 and the operating income of Lawrence & Memorial. That
3 would come from ways of redeploying resources within
4 Lawrence & Memorial, bringing resources to the area,
5 growing the medical practice, creating new positions to
6 support those.

7 We do expect in our plan, and we've done
8 this in the past, to plan and execute a changed
9 management over the course of that period.

10 MR. CARNEY: And the source of the \$85
11 million again was from?

12 MR. TANDLER: So the \$85 million is coming
13 from -- \$41 million is coming from the initial cash
14 outlay and infrastructure, again, not based on L & M
15 performance.

16 MR. CARNEY: Cash outlay, okay.

17 MR. TANDLER: There's an additional \$44
18 million, and that is the anticipated margin from further
19 clinical expansion, so we do expect some of those
20 investments to pay for themselves.

21 There is a balance to these programs, and
22 our ability to plan and manage those programs will make
23 up the balance of that \$85 million.

24 MR. CARNEY: Okay. One final question I

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 have is, given the financial commitment is dependent on
2 operational performance, return on investment, and/or
3 potential synergies and efficiencies, how will this
4 commitment be met if these results fall short of
5 projections?

6 MR. TANDLER: Well --

7 MR. CARNEY: Tough question.

8 MS. FELDMAN: I think there's some
9 confusion, in terms of the financial commitment. I think
10 what's important here to understand from the application
11 is that there's a commitment to reinvesting money in the
12 Eastern Connecticut region. That's the \$215 million.

13 The \$85 million is not contingent on
14 anything, other than this application getting approved.
15 That is ready to go, if the application is approved, so I
16 think that is -- they're not the same. They're
17 different.

18 If L & M is able to get in a position,
19 where it is financially-stable, as you know, their bond
20 rating was just downgraded, if we can turn that, we
21 expect them to be, with this \$85 million infusion, we
22 expect them to be able to generate money, and that money
23 will be reinvested in the Eastern Connecticut region.

24 MR. CARNEY: So the \$85 million is sort of

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 a hard investment that you're hoping to stabilize L & M,
2 in order for them to do better and be able to reinvest
3 that \$215 million out of their success?

4 MS. FELDMAN: Correct.

5 MS. BORGSTROM: And I think Attorney
6 Feldman has made a very important distinction, because
7 there are health systems nationally, where improved
8 performance in an organization just brings in a crude
9 strength to the system balance sheet.

10 The difference here is, you know, we are a
11 mission-driven organization. Every one of our providers
12 has a commitment to serve the communities they do.

13 There's a woman, a religious woman, who
14 ran a big health system in the Midwest, who famously
15 coined the term "No Margin, No Mission." This is about
16 restoring Lawrence & Memorial Healthcare to clinical,
17 fiscal and community health, so that we can invest as a
18 health system in this geography.

19 MR. CARNEY: And did you see those kind of
20 positive results at Bridgeport and Greenwich Hospitals?

21 MS. BORGSTROM: We absolutely did, and,
22 you know, I think that, in testimony from Bridgeport and
23 I know that there's a member of their community here, who
24 is also on their Board, they can describe that very

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 tangibly to you.

2 The hospital of St. Raphael acquisition,
3 which was a different forum, we made a commitment on cost
4 savings and investments, and we have exceeded all of
5 those commitments we made to the Office of Health Care
6 Access.

7 MR. CUMMINGS: If I could just build on
8 Marna's comments, one of the -- let me just raise two
9 observations that I think will be helpful.

10 One is that, one of the things that gave
11 our Board great comfort about going forward into this
12 relationship was the opportunity to meet with and hear
13 directly from representatives from Bridgeport about their
14 experience and whether the commitments made to that
15 organization indeed were honored. Did things work out
16 the way it had planned?

17 Were the operational improvements
18 realized? Did the governance model work the way it had
19 been described? And our Board and management was very
20 impressed upon hearing directly, without any filter, what
21 the Bridgeport experience had been.

22 The other comment I wanted to make about
23 this \$85 million is really to prime the pump. It's
24 investments in not just physician recruitment and program

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 development, but in population health, information
2 technology and so forth.

3 In other words, to help us get ready for
4 the changes that are coming in the future to the
5 healthcare landscape.

6 You've heard references here about the
7 shift from volume to value, about the expected emergence
8 of accountable care arrangements in this state. It's
9 been slow to get here, but we believe it is coming, and
10 that was part of our Board's thinking about seeking an
11 affiliation, that we did not have the wherewithal to be a
12 survivor, much less even an effective participant, and
13 the new healthcare landscaping will be dominated by
14 accountable care, taking on risk and so forth, that what
15 made sense then to be effective, to continue to confer
16 value on our community was to partner with Yale-New
17 Haven, which has many of those capabilities already in
18 place.

19 We were convinced by the experience in
20 Greenwich and Bridgeport about being able to lower their
21 overall cost, about being able to increase the value
22 proposition in those communities, so, you know, I think
23 words matter, and it's appropriate that OHCA read
24 carefully the representations in the application, but,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 above and beyond that, we wanted to field test this, in
2 terms of talking to real people, Board members, employees
3 at the Yale-New Haven Health affiliates, to say has this
4 actually been your experience? And the answer was,
5 resoundingly, unequivocally, yes.

6 HEARING OFFICER HANSTED: I just want to
7 get some clarification on the \$215 million again. I'm
8 sorry to be so thick about this.

9 Is that the investment ceiling for a
10 specific period of time, or is that it, in terms of the
11 region?

12 MR. VanESSENDELFT: If I could just
13 comment? The 215 was really developed, if you go back to
14 Bruce's comment earlier, about the needs of the health
15 system and kind of coming up with the \$300-plus million,
16 and, as we thought about it, it was the investment that
17 Yale-New Haven was willing to make upfront that we've
18 been talking about, \$85 million, that gets the
19 infrastructure in place and almost 20 new physicians in
20 our market.

21 That, then, spawns additional stability,
22 as Marna went over, to generate returns. Those returns
23 coming out of the system would be we kind of looked at a
24 baseline of what we would generate through capital.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Normally, we would look at \$20 or \$25
2 million a year boding over time, and that's kind of that
3 150, 163 number that we've been talking about, and then
4 just between 63 or 68, depending on what number you're
5 referencing, of kind of new vitality and earnings being
6 generated by the combination and partnership of what
7 we're able to create through this new investment.

8 Those are kind of the way, at least in my
9 head, I keep it straight, is those three different
10 buckets and sources of funding and then how we're
11 deploying them.

12 HEARING OFFICER HANSTED: Right, right.
13 No, I understand.

14 MR. VanESSENDELFT: It's over five years.

15 HEARING OFFICER HANSTED: I understand
16 that. I guess my ultimate question is, once the \$215
17 million is reinvested into the community, it doesn't stop
18 there. It will, as L & M makes money, that money will
19 continue to be invested into the community beyond the 215
20 million.

21 MS. FELDMAN: So, you know, I think it's a
22 great question, and I think what you have to look at is
23 the history of this health system, so Bridgeport came in,
24 and I may be off a year, in 1996.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Bridgeport came in in 1996. Greenwich
2 followed about 18 months later. Yale-New Haven has
3 clearly been a founding member of this. The St.
4 Raphael's integration occurred almost four years ago.

5 We are responsible, as a mission-driven
6 health system, for the care in those communities through
7 what we directly provide through partnership with others,
8 and we can only be successful if we continue to invest in
9 those communities, and, so, we view this as a marriage
10 without possibility of divorce. We are responsible.

11 HEARING OFFICER HANSTED: Okay. All
12 right, thank you.

13 MR. CARNEY: Finally, I just want to touch
14 upon the clinical services, seeing that's very dear to
15 many people's hearts that live in the area, just sort of
16 one more time. I just wanted to double check.

17 Following the change of ownership, are
18 there currently any plans to reduce or consolidate any
19 existing programs offered at L & M?

20 The second part of the question is if any
21 new programs or services will be created as a result of
22 this proposal, and where will those services be located?

23 MR. CUMMINGS: To the first part of your
24 question, there are no plans to reduce or restrict

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 services as a byproduct of this affiliation.

2 With respect to the second part of your
3 question and in keeping -- that's why the first tranche
4 of \$41 million and the following tranche of the \$44
5 million, i.e., the \$85 million that is irretrievably
6 committed to this, regardless of financial performance, a
7 significant part of that is about physician recruitment,
8 expansion of clinical services.

9 This is a growth-oriented strategy.
10 Expand access, gross services, retain services in the
11 community. We've agreed broadly, and I'll come back to
12 why I'm using the qualifier broadly, about these
13 categories, and I think you've heard from both Ms.
14 Borgstrom and myself those are primary care, behavioral
15 health, maternal and child health services, emergency and
16 critical care services, and surgery.

17 We are limited, again, I'm not an
18 attorney, but in the same way that we can't share pricing
19 information, so, too, are there restrictions, limitations
20 on the amount of discussions that we can have about
21 specific services, how they'll be provided, by whom they
22 will be provided, in what setting they'll be provided, so
23 we've been cautioned by counsel to avoid what would be
24 tantamount to gun-jumping by getting too far ahead of the

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 process.

2 So we've agreed on broad categories.
3 There are a lot of things that fit under that broad
4 rubric, but, again, it's about promoting access and
5 growth.

6 MR. CARNEY: Thank you very much.

7 MR. STEVEN LAZARUS: Steven Lazarus. Just
8 going back to a couple of financial things, just to wrap
9 up that category, can we get two late files, please?

10 The first late file will be the financial
11 attachments that were part of the CON application. Some
12 of them, because of the time frame where we are in the
13 application process, it's been a while, so we'd like to
14 get those updated.

15 MS. FELDMAN: That's financial Attachment
16 A?

17 MR. CARNEY: Yes. Yes.

18 HEARING OFFICER HANSTED: That will be
19 Late File No. 3.

20 MS. JENNIFER WILLCOX: And that's for both
21 dockets?

22 MR. LAZARUS: Yes, for both dockets. And
23 we just want to clarify that we'd like those for -- at
24 least for the 32033. It should include the L & M System,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 L & M Hospital, the hospital only, as well as the
2 consolidated, and for the Yale-New Haven Health System.
3 You can use the same format as was used in the financial
4 Attachment A.

5 And, for the next late file, we would like
6 you to provide year-to-date financial measurement
7 indicators through June 2016. The ones in the
8 application I believe I think the last time we got them
9 were on page 863, I believe. That was resubmitted as
10 part of the completeness, so we would like those to be
11 updated for June 2016.

12 HEARING OFFICER HANSTED: That will be
13 Late File No. 4.

14 MR. LAZARUS: The next couple of questions
15 I have have to do with the Community Needs Health
16 Assessment, so, generally speaking, the current Community
17 Needs Health Assessment that's in place for L & M it had
18 talked about six priorities that were brought out in it.

19 Based on the implementation plan, can you
20 discuss what steps have been taken by L & M to make
21 improvements in those areas, and are there any type of
22 measurements or statistics that were collected for the
23 outcomes on those?

24 MR. CUMMINGS: Thank you for that

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 question. The plan that you alluded to was prepared in
2 2013.

3 MR. LAZARUS: Yes.

4 MR. CUMMINGS: And we're in the process of
5 completing a new Community Health Needs Assessment in
6 partnership with Ledge Light Health District, the public
7 health agency for this region.

8 Our content expert for the Community
9 Health Needs Assessment I think is here. Laurel Holmes.
10 Is she still here? I'm going to ask. Laurel is the
11 Director of Community Partnerships and Population Health,
12 and she is responsible not only for tabulating our
13 community benefit summary, but she personally oversees
14 many of these initiatives that I think are behind your
15 question.

16 MR. LAZARUS: Perfect.

17 MS. HOLMES: Good evening. I'm Laurel
18 Holmes --

19 COURT REPORTER: I don't know if that
20 microphone is on.

21 MR. LAZARUS: Hold on one second.

22 MS. HOLMES: Hi, again. I'm Laurel
23 Holmes, Director of Community Partnerships and Population
24 Health for Lawrence & Memorial Healthcare.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Your question referred to the Community
2 Health Implementation Plan of 2013, on which we have
3 implemented a number of initiatives to address the needs
4 found through our Community Health Needs Assessment. As
5 Mr. Cummings stated, we are in the process of completing
6 our 2016 Community Health Needs Assessment, and, so, our
7 attention is now turned to priorities identified there,
8 which will be in some ways similar and in some ways
9 somewhat different from the 2013 priorities.

10 The areas we will be addressing going
11 forward have to do with behavioral health, mental health
12 and substance abuse. In particular, opioid abuse and
13 anxiety and depression, particularly among minority
14 populations.

15 We will be working on supporting and
16 nurturing healthy lifestyles, in particular, related to
17 diabetes, and insuring access to care, and the issues
18 that emerge there are having to do with maternal and
19 child health and access to care for low income
20 populations.

21 That plan is in development with many
22 community partners presently, and, so, I can't speak to
23 anymore specifics on that.

24 MR. LAZARUS: Thanks for that. Could you

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 talk a little bit about some of the areas that did
2 improve in relation to those six priorities in 2013,
3 where L & M had concentrated, and what were the outcomes,
4 based on those?

5 MS. HOLMES: Yes, well, we, as you
6 mentioned, identified six priority areas, some of which
7 we deferred to community partners for intervention, due
8 to resource constraints, but we were successful in
9 implementing interventions to address a number of the
10 others, including pediatric obesity, which we implemented
11 a program that showed positive outcomes for all
12 participating children in that program.

13 For example, 60 percent of participants in
14 that program experienced an improvement in healthy living
15 and also experienced some weight loss.

16 As it relates to access to care, we
17 implemented a Dispensary of Hope Program, which is a
18 program, which provides free prescription medications to
19 individuals with limited access, and that has been we've
20 realized a \$20,000 community benefit investment through
21 our Dispensary of Hope Program since its inception, and
22 that program is ongoing.

23 As it relates to cancer, we implemented
24 the Connecticut Early Detection and Prevention Program,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 which delivers health screenings to women, mammogram and
2 pap smears. There was a colonoscopy component to that
3 program, which has since been discontinued, but, there
4 again, we have delivered essential care to many community
5 members, who would not otherwise have been able to access
6 those services through implementing this program.

7 As it relates to mental and behavioral
8 health, our focus has been on reconnecting the homeless
9 program, which involves our partnership with the Homeless
10 Hospitality Center here in New London.

11 We've been supportive of their respite bed
12 program, and, additionally, we have a social worker
13 dedicated to working with homeless individuals, who
14 ensures that they have access to the supports within the
15 community that they need to have more positive health
16 outcomes and more permanent housing, and that's been a
17 primary focus of that social worker's work, in addition
18 to the Homeless Hospitality Center's work. Our community
19 benefit investment in that program exceeds half a million
20 dollars.

21 And, finally, as it relates to asthma, we
22 have implemented a school-based program in two schools in
23 New London, working with 28 children and their families,
24 and additionally have a dedicated community health

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 worker, who is working in our Emergency Department to
2 intervene with individuals, who are not receiving or not
3 managing their asthma well and potentially not receiving
4 the community-based care or hadn't been receiving the
5 community-based care that they needed, in order to manage
6 their asthma.

7 She has been successful in reducing
8 Emergency Department utilization for individuals with
9 asthma in her work and finding them more appropriate care
10 in the community setting, so their asthma outcomes are
11 positive.

12 MR. LAZARUS: All right, thank you. You
13 mentioned the 2016 Community Needs Health Assessment.
14 Are you incorporating the CDC's 618 initiatives?

15 MS. HOLMES: We're looking for a number of
16 benchmarks in establishing our Community Health
17 Implementation Plan. That still is very much in process.

18 We are conducting that planning process in
19 a very collaborative manner with over 30 partner
20 organizations participating, so it's not solely our
21 decision, as to what the strategies will be going
22 forward, but, certainly, we will be looking to any
23 benchmarks, including Healthy People 2020 benchmarks that
24 we can utilize.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MR. LAZARUS: Now is that due out this
2 September?

3 MS. HOLMES: It will be approved by
4 September 30th.

5 MR. LAZARUS: Has Yale participated in the
6 2016 Community Needs Health Assessment for the L & M
7 area? Has it been part of this process, or is that
8 something you're waiting?

9 MS. BORGSTROM: We have system-wide robust
10 Community Health Needs Assessments. We have not done
11 anything with Lawrence & Memorial on theirs,
12 specifically.

13 MR. LAZARUS: Okay, but, moving forward,
14 obviously, Yale would have to be partners in all the
15 priorities that are going to be set as part of this?

16 MS. BORGSTROM: Yes.

17 MR. LAZARUS: So they would be in full
18 support?

19 MS. BORGSTROM: Yes, absolutely.

20 MR. LAZARUS: Okay. Turning to community
21 benefit, I was on your website for L & M, and you have a
22 very nice way of laying out the community benefits and
23 category-wise and stuff, so, looking at the past three to
24 four years, you have like a total community support

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 number up there. I'm not sure who I should address this
2 to. Okay.

3 MR. CUMMINGS: Laurel is actually
4 responsible for both the needs assessment and for the
5 community benefit summary, and it was she, who actually
6 came up with that very nifty summary that you saw online.

7 MR. LAZARUS: Kudos to you.

8 MS. HOLMES: Thank you.

9 MR. LAZARUS: For the total community
10 support, and then you go down to breakout the community
11 benefit, bad debt and Medicare shortfall, in 2012, you
12 actually had other subsidized services, and then I
13 noticed later on that category was dropped off. What was
14 included in that other subsidized services?

15 MS. HOLMES: I would have to look back at
16 our 2012 report to specifically address subsidized
17 services within that report.

18 MR. LAZARUS: Oh, okay.

19 MS. HOLMES: Typically, that category
20 includes support for behavioral health services in the
21 community, women's and children's health services, those
22 sorts of services that, for example, like cancer
23 screening grant program represents.

24 MR. LAZARUS: Oh, so, they're probably

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 still continuing. They're just categorized differently
2 I'm assuming?

3 MS. HOLMES: Yes.

4 MR. LAZARUS: All right. That's good.
5 Moving forward, do the Applicants plan to commit to
6 providing similar levels of funding toward the community
7 benefits, as reported on the website on those reports
8 and, also, on the 990s, in particular, with this Schedule
9 H for L & M community?

10 MS. BORGSTROM: Yes.

11 MR. LAZARUS: And that would include the
12 community benefits, as well as community buildings for
13 both?

14 MS. BORGSTROM: I'm not sure I understand
15 your question.

16 MR. LAZARUS: Well, on Schedule H,
17 there's, you know, there's two categories. There's
18 community benefits, as well as community building, and,
19 so, we just want to know the commitment would be for
20 similar levels on both those, because those combined are
21 generally known as community benefits, putting it simply.

22 MS. BORGSTROM: Yes.

23 MR. LAZARUS: Okay.

24 MS. AUGUSTA MUELLER: I didn't hear the

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 question. Augusta Mueller. I'm the Community Benefits
2 Manager for Yale-New Haven Health.

3 MR. LAZARUS: Okay. We were talking about
4 the community benefit and, in particular, Schedule H,
5 where you have the community building and the community
6 benefits, and, looking at the historical moving forward,
7 we were trying to see if the commitment is going to be
8 similar, at the similar levels for each of those
9 categories.

10 MS. MUELLER: It should be. I don't see
11 why it would change. As you know, or as you may be
12 aware, the IRS has been looking at various components of
13 the community building activities and have been shifting
14 those to community benefits, so areas, such as housing,
15 food access, now are community benefits, where, years
16 ago, they were community building activities, but, you
17 know, I don't see why they would change.

18 MR. LAZARUS: Okay. That helps. If this
19 proposal is approved, how will this affiliation with Yale
20 improve L & M's community benefit?

21 MS. BORGSTROM: That's very speculative,
22 because I think, what I know of L & M, they've been very
23 engaged. They've had a very robust Community Benefits
24 Assessment we have throughout the Yale-New Haven Health

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 System, as well, and I think, again, you know, sort of
2 strength in numbers, ideas, experiences, because we've
3 shared best practices across the health system, and, you
4 know, two of our hospitals, Bridgeport and Yale-New
5 Haven, are located in two of the top 24 mid-size cities
6 in the United States, so the needs have been great, the
7 work has been terrific, so I would just imagine that the
8 opportunities to collaborate will be even greater.

9 MR. LAZARUS: All right, thank you.

10 MR. CUMMINGS: If I can just add to that,
11 certainly, I've highlighted why we are approaching this
12 with a focus on access and growth, and to the extent that
13 L & M is in a more financially-secure position as a
14 result of this affiliation and the ensuing investments,
15 it will increase our capacity to confer greater community
16 benefit.

17 MR. LAZARUS: Thank you.

18 MS. FELDMAN: Mr. Lazarus, I would also
19 point you to page 95 of the CON application, which sets
20 forth the affiliation agreement and specifically
21 addresses ongoing community benefit support in Section
22 2.3.

23 MR. LAZARUS: Is that the \$11 million --

24 MS. FELDMAN: Yes. Yes, sir.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MR. LAZARUS: -- that was referenced in
2 there? Was that per year, or was that for a time period?

3 MS. FELDMAN: I believe it's five years.

4 MR. LAZARUS: Five years. Is that \$11
5 million total, or is it \$11 million --

6 MS. FELDMAN: It's a minimum amount.

7 MR. LAZARUS: Minimum.

8 MS. FELDMAN: Which is the current level.

9 MR. LAZARUS: The current level.

10 MS. FELDMAN: Yeah.

11 MR. LAZARUS: Okay.

12 MS. MUELLER: Can I add a comment? I
13 think that, in addition to what Marna mentioned and,
14 also, Mr. Cummings, that our corporate structure is very
15 supportive of community benefit activities, so, I mean,
16 Laurel and I have served together on the Community
17 Benefits Committee at the Connecticut Hospital
18 Association for years, so there's an opportunity for us
19 to continue that learning, but our corporate structure we
20 have corporate tax, corporate legal, you know, community
21 benefits that really are I just feel so supportive, you
22 know, organizationally, and no other hospital, you know,
23 to my knowledge has that in the state.

24 Even corporate finance, you know, the

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 things that we have in place are very different.

2 MR. LAZARUS: All right, thank you.

3 Moving on, regarding quality, if L & M can, probably
4 addressed to you, Mr. Cummings, what was the result of
5 the most recent DPH survey performed at L & M?

6 MR. CUMMINGS: Can you be more specific?

7 MR. LAZARUS: Yeah. This has to do with
8 the Licensing Division. They come and do the surveys, so
9 we want to know what was the most recent.

10 MR. CUMMINGS: Are you talking about our
11 licensure survey?

12 MR. LAZARUS: Yes.

13 MR. CUMMINGS: I think we'd have to get
14 you that information as a late filing.

15 MR. LAZARUS: A late file? Okay. In that
16 case, can you --

17 MS. FELDMAN: I can tell you they're still
18 licensed. (Laughter)

19 MR. LAZARUS: That's good. We'd like a
20 copy of the survey, as well as all communications between
21 the hospital and DPH.

22 HEARING OFFICER HANSTED: That will be
23 Late File No. 5.

24 MR. MURRAY: Mr. Lazarus, can I just

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 clarify? When you say all communications between DPH and
2 L & M, with respect to the licensure and the survey?

3 MR. LAZARUS: Yes.

4 MR. MURRAY: Okay.

5 MS. FELDMAN: Do you have a particular
6 survey date in mind?

7 MR. LAZARUS: If we give you a written
8 list, I can try to give you a date.

9 MR. CUMMINGS: We certainly want to make
10 sure you have the information.

11 MR. LAZARUS: Sure. We can be more
12 specific in our request, yes. We'll get you the date.

13 MS. FELDMAN: Thank you.

14 MR. LAZARUS: All right. Considering all
15 the testimony that we've heard, especially specifically
16 in the first day of the hearing, there were a lot of
17 public concern and comments that were raised regarding L
18 & M Hospital's community access to information related to
19 the hospital's future, transparency regarding the
20 process, if any of the changes were going to be made
21 regarding any of the services at L & M, the impact of
22 this proposal on the quality of care of L & M.

23 Can the Applicants address some of the
24 concerns that were brought up by the various individuals

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 and the organizations, and we can list them here, but if
2 you can just go down one-by-one?

3 First, we've talked a little about earlier
4 the costs and pricing to the consumer and the healthcare
5 system, L & M's community access to services and
6 physicians locally, quality of care at L & M, community
7 input and access to information related to L & M Hospital
8 after the closing.

9 MS. FELDMAN: Can you repeat the last one,
10 please?

11 MR. LAZARUS: Community input/access to
12 information related to L & M Hospital after the closing.

13 MS. FELDMAN: Before we answer the
14 question, I just want to clarify a statement made by Mr.
15 Cummings before with respect to plans to terminate any
16 services by virtue of the proposal, and I want to just be
17 clear that his answer was directed at that specific
18 question.

19 There may, in fact, be plans for L & M
20 right now, based on insufficient demand, to request
21 termination of a particular service that has nothing to
22 do with this proposal, so I just wanted to be clear about
23 that and not to mislead, in terms of our response.

24 MR. LAZARUS: Okay, thank you.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 MS. FELDMAN: I think there has been a lot
2 of testimony regarding the issue of pricing. If you
3 would like us to respond to that again, we can.

4 In terms of access, I think, you know, in
5 terms of deployment of the \$85 million and what the
6 purpose is behind that and the testimony from Dr.
7 Lehrach, I thought he was addressing the access issue,
8 but we're happy to restate it, if it would be helpful to
9 OHCA.

10 HEARING OFFICER HANSTED: Let's do this.
11 It's been a while since our last break, and, just to give
12 you some time to think about your answers, let's take a
13 10-minute break, and then we'll reconvene.

14 MS. FELDMAN: Okay, thank you.

15 (Off the record)

16 HEARING OFFICER HANSTED: Folks, we're
17 going to get started here again. The Applicants want to
18 address our last question at this point. We'd appreciate
19 it.

20 MR. LAZARUS: And before we actually go
21 back to that, Kaila has a follow-up.

22 MS. RIGGOTT: I have a follow-up kind of
23 in relation to that. As you know, OHCA is required to
24 evaluate whether or not an Applicant has met our

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 statutory criteria, and with respect to pricing data for
2 consumers we know that the Comptroller has some data on
3 State employee costs and prices, and I believe there may
4 be some Medicaid data from DSS that may be made available
5 to the task force.

6 We understand the limitations of the
7 Sherman Act, but I just want to ask the Applicants is
8 there any data, even if from multiple sources, that you
9 can provide to OHCA that will assist us in evaluating our
10 statutory criteria related to whether or not healthcare
11 costs to consumers will be adversely affected by this
12 proposal?

13 MS. FELDMAN: In all due respect, Kaila, I
14 think we tried to answer that, and it might be helpful to
15 restate some of what you heard.

16 A couple of things. One is there is no
17 plan to raise prices. I think the testimony included the
18 fact that there would be price neutrality for the
19 remainder of the contract terms, hence the late file.

20 There was also testimony, saying that, in
21 the future, negotiations with payers, to the extent that
22 there are negotiations with payers, because, as we've
23 provided in our application, over 70 percent of our payer
24 mix is governmental payers, we also have TRICARE, so we

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 not only have Medicare and Medicaid, but we have TRICARE,
2 so there's really very little room for negotiation, but,
3 again, it will be based on L & M's cost structure, not
4 Yale-New Haven Hospital's cost structure, and I think
5 that is the very reason that the Comptroller said in his
6 e-mail that, when that Milliman Study was done, it was
7 done thinking that the prices of Yale-New Haven Hospital
8 would become the prices of L & M Hospital, and we're here
9 to say that is not what will happen.

10 So we don't have access to the data that
11 you're requesting. I don't know whether the Milliman
12 data is, you know, where it came from, whether it
13 represents the entire universe of claims, so I'm not sure
14 how we can respond to the request, without giving the
15 appearance, as it's been stated by the Intervenors, that
16 we're trying to hide the ball.

17 That's simply not the truth. We've given
18 every representation we can to reassure OHCA that, by
19 virtue of the affiliation, should it be approved, that
20 this will not trigger price increases for L & M.

21 MS. RIGGOTT: Thank you.

22 MR. CUMMINGS: Returning to your question,
23 Mr. Lazarus, I think Attorney Feldman has already touched
24 upon the pricing and cost, but I'll come back to that,

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 just to add to my own comments a little bit later, but,
2 as I understand it, you wanted to hear about that, about
3 access, about quality and community input, is that
4 correct?

5 MR. LAZARUS: Yes.

6 MR. CUMMINGS: So let me start with the
7 access area. I hope we've demonstrated we pursued this
8 relationship, and I want to bring you back to the initial
9 hearing.

10 It was L & M, who initiated this
11 relationship, as we took stock of the changes that were
12 occurring in the landscape, and our concern, about
13 whether we would be able to continue to serve the
14 community with the highest level of quality and access in
15 the face of declining revenues, and we concluded we could
16 not.

17 Through this affiliation, as you've heard,
18 \$85 million will be made available over five years,
19 regardless of the financial reforms. No strings
20 attached. That's to invest in growth and access.

21 The parties are committed to recruiting at
22 least 20 physicians, who would be new to the community.
23 These are not, quote, "purchased practices." These are
24 new physicians, providing new capabilities in our

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 community.

2 You've also heard that we've agreed in
3 broad strokes to focus on behavioral health and expanding
4 access there, primary care, maternal and child health
5 services, emergency and critical care, and surgical
6 capabilities.

7 We want to make sure, and I think you've
8 heard this from Ms. Borgstrom, that patients do not have
9 to travel out of the area for routine care.

10 The model that we are talking about is to
11 maximize the potential for people in this area to receive
12 care locally for routine services, for what's called
13 primary and secondary level services.

14 We are not a teaching or research
15 institution today. We will not be one post-affiliation.
16 That role is really performed by Yale-New Haven Hospital,
17 and what we want to have happen is those services that
18 appropriately can be done in this community at this
19 hospital remain here and that we are actually able to add
20 to those capabilities.

21 Patients overwhelmingly prefer to receive
22 care locally when they possibly can, and the cost for
23 receiving that care is a lot lower in a community
24 hospital than it is in an academic medical center for all

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 the reasons that you heard from Ms. Borgstrom.

2 And, in the future, as I commented just
3 before we took the 10-minute break, part of our shared
4 view between Yale-New Haven Health and L & M is where
5 healthcare is going in the future, and a premium will be
6 placed on value or results at the lowest possible cost.

7 It would be inimical to the interests of
8 both parties to have, particularly in a risk-based
9 environment, which is where we're headed, for patients to
10 receive care in a higher cost setting when a lower cost
11 setting was available, so between the investments, the
12 \$85 million that you heard about, the minimum of 20 new
13 physicians in the area, the investments in these five
14 categories, program categories I alluded to, we are
15 confident we will be able to markedly increase access to
16 locally-available services in Southeastern Connecticut
17 and Southwestern Rhode Island.

18 The flip side of that equation is, if this
19 affiliation is not approved, access for patients and jobs
20 for staff will be in jeopardy.

21 In the area of quality, one of the things
22 that drew us to Yale-New Haven is not only their
23 excellent reputation, but the wherewithal that they have
24 around fostering evidence-based practices.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Yale-New Haven Hospital, in particular,
2 because it has three missions, clinical medicine,
3 teaching and research, makes available to its affiliates
4 the capabilities that would otherwise not be available,
5 in terms of best practices, and we're excited about the
6 fact that these evidence-based practices will be not only
7 immediately available to us upon affiliation, but will
8 continue to be updated, as the latest literature suggests
9 would be appropriate.

10 I don't recall whether it was specifically
11 mentioned at the original hearing, but Yale-New Haven
12 Health System has a quality council, in which there are
13 representatives from all of the affiliates, and we look
14 forward to being part of that, so that the Chief Medical
15 Officers and the Chief Nursing Officers and the Chief
16 Quality Officers are able to learn from one another and
17 further potentiate best practices.

18 On the area of community input, as you
19 heard from Laurel Holmes, my colleague, a few minutes
20 ago, we are committed to and the continuation of both the
21 Community Needs Assessment and the resulting community
22 benefits, that doesn't change under this affiliation,
23 that commitment.

24 L & M has a, as many hospitals do, a

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Patient and Family Advisory Council we established about
2 a year and a half ago that allows us to get direct input
3 from former patients and family members about their
4 experience, what went well, what didn't go well, how can
5 we approve upon it, are there additional needs that we
6 should be meeting in the community and in the lives of
7 our patients? We found that very resonant in our
8 thinking.

9 We routinely survey our patients, and from
10 that, again, get extraordinary insight into what we're
11 doing well and how we can improve.

12 We are, first and foremost, a community-
13 governed and community-oriented organization. Post-
14 affiliation, will still be local staff, local clinicians,
15 local physicians caring for their community. There
16 really will be no change in the people, who face forward
17 to those patients.

18 We're here today. We'll be there tomorrow
19 if the affiliation is approved. There may be fewer of
20 them if it is not approved.

21 And I think, finally, I wanted to comment
22 that, you know, both L & M and Yale-New Haven are non-
23 profit, mission-driven organizations. We share the same
24 values. We have a similar view of where healthcare is

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 heading. It was one of the reasons why, for our Board,
2 it was a relatively easy decision to say Yale-New Haven
3 Health is really the partner of choice for us.

4 We have not made the decision, we didn't
5 even consider making a decision that some hospitals have
6 made about seeking a for-profit partner, where community
7 input and community need would be a far lesser
8 consideration, and, indeed, that was one of the things
9 that motivated the L & M Healthcare Board a couple of
10 years ago to pursue the then bankrupt Westerly Hospital,
11 because we knew that there were three venture capital-
12 backed, for-profit actors, who were looking to acquire
13 it.

14 We thought that would be injurious not
15 only to the Westerly community, but for the approximately
16 one-third of Westerly's patients, who originate from
17 Connecticut.

18 We thought it would be bad for that
19 community, it would be bad for our community, it would be
20 bad for the staff, who are employed at L & M, if a
21 venture capital-backed, for-profit had acquired Westerly.

22 Those commitments to community input and
23 community governance that I think we've highlighted here,
24 a local Board, with true fiduciary responsibilities, to

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 approve budgets, to set priorities, to make
2 determinations whether a service should be added, or, the
3 flip side, discontinued, originate at that local level
4 that's there today and will be there post-affiliation.

5 MR. LAZARUS: Thank you very much. As you
6 may be aware, that with some of the other recent CON
7 decisions regarding changes of ownership, there have been
8 some conditions that were placed on the approvals.

9 If this was approved down the line, would
10 the Applicants have any issues or challenges for, say,
11 allowing for a community representative, either picked by
12 the local Mayor's office or by OHCA, on its local Board
13 holding informational public forums, say, twice a year
14 and possibly having an independent monitor ensuring
15 compliance with any of the conditions OHCA or DPH as a
16 whole would set forth?

17 MS. BORGSTROM: You know, there's a lot in
18 that, and I think that, you know, we need to discuss. We
19 feel we are community organizations right now. We do not
20 condone and we are not supporting representative Boards.

21 Board members should be elected, in my
22 opinion, based on their talent, their commitment, their
23 service. We have multiple forums through which we
24 currently account for what we do, and this is not to get

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 out of being accountable and responsible, but, you know,
2 I think that the way you have described this could be
3 problematic for us, and we would need to have discussion
4 about what's intended and what we're really looking for.

5 MS. FELDMAN: With respect to the
6 community forums, did you want to specifically respond to
7 that?

8 MR. LAZARUS: And just to clarify, we're
9 not looking for, I'm not looking for a commitment today.
10 I just wanted to see if there were any issues and
11 concerns that you have at this point.

12 MS. FELDMAN: I think that, if this is
13 what's between us and approval, in all honesty, I think,
14 from what Mr. Cummings just described, that this is an
15 organization that's very committed to its community and
16 getting feedback by way of its Community Needs
17 Assessment, its Board, which is made up of folks from the
18 community, who receive their services at L & M.

19 If you're talking about having forums,
20 where input is provided by the community, I don't think
21 that's a problem at all.

22 MR. LAZARUS: All right. Just to wrap up
23 my questions, this application has been in front of us
24 for a while now, so, just to sort of bring things a

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 little up-to-date, can you give us a little update, as
2 far as, if this was approved, what are you thinking, as
3 far as a closing date for this process?

4 MS. FELDMAN: As I believe it was
5 mentioned earlier, I can't remember who provided the
6 testimony, but according to our approval from the FTC, we
7 must be closed by September 8th of 2016, so we would need
8 to begin closing the week prior.

9 MR. LAZARUS: Are there any other State or
10 Federal approvals that are required, besides the CON
11 approval, for the Applicants to move forward towards the
12 closing?

13 MS. FELDMAN: I think it was mentioned
14 maybe at the last hearing, I don't recall, but we're in
15 the process of also going through a parallel proceeding
16 in Rhode Island, and that is moving along very
17 positively.

18 MR. LAZARUS: Is there a possibility for
19 the Applicants to request any kind of extension for that
20 September 8th date?

21 MS. FELDMAN: No, there is not.
22 Absolutely not. We've already vetted that with experts
23 in Hart-Scott-Rodino filings, folks that do nothing, but
24 that, and it cannot be extended.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 If the application is not approved in
2 time, we would have to start all over and incur a
3 significant expense, in terms of going through that
4 process again.

5 MR. LAZARUS: Thank you. If this proposal
6 is approved after the closing, what are the planning or
7 process priorities that the Applicants would have with L
8 & M for, say, for the first six months? What would be
9 the priority to get the process moving forward, in
10 general?

11 MS. BORGSTROM: I'll take a crack at this,
12 because I think, in other affiliations and integration
13 we've done, you know, these are complicated processes.

14 Believe it or not, sometimes the approvals
15 are the easy part. The hard part is actually making this
16 work and getting the integration, so job one is making
17 sure that people feel they are communicated with, they
18 understand what's happening.

19 Our commitments are to our patients,
20 seamless care, continuous care to our employees, toward
21 integrating business services in a way that is not
22 disruptive to operations, is basically, you know,
23 starting the integration and just getting the basic
24 functioning going, and then engage in, you know, broader

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 planning opportunities than we've been able to, because a
2 lot of what we've done up until now I think, as Mr.
3 Cummings and others have said, has been through third
4 party consultants, because we haven't really been able
5 to, you know, get into the details, so to speak, between
6 the Yale-New Haven Health System and Lawrence & Memorial,
7 but the goal would be to move very quickly on getting the
8 information systems upgrade completed, determining the
9 clinical priorities, beginning physician recruitments
10 that can support perceived needs in New London.

11 I'll walk back to my previous comment,
12 which, you know, we are community organizations. We're
13 in the community all the time. We have to be accountable
14 to the communities in which we operate.

15 A lot of what we need to do is be out
16 there and explaining what this is, what it isn't, what
17 people can expect from this.

18 Change is very difficult, but I think
19 that, when people start to see the same faces, the same
20 people working on their clinical care, on their accounts
21 receivable, on whatever it is, you realize that the
22 change is much more -- is longer horizon change than
23 dramatic short-term change.

24 It really is the process of beginning to

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 blend the families.

2 MR. LAZARUS: Thank you. Thank you. I'm
3 all set.

4 HEARING OFFICER HANSTED: That concludes
5 OHCA's questioning, so, at this point, we'd like to go
6 back to the public comment section of our hearing, and
7 those individuals, who wish to give public comment,
8 should have signed up on the sheet outside of this door.

9 If you don't wish to speak, keep in mind
10 that you can give comments in writing, and the address to
11 send those comments is on the information sheet, which is
12 also on the table outside the door, so we're going to
13 call individuals up in the order that you've signed up.

14 (Whereupon, the public spoke.)

15 HEARING OFFICER HANSTED: Just one bit of
16 housekeeping. The late files that were ordered are due
17 August 5th, and, at this time, I'll allow counsel to give
18 a brief closing statement, if they choose to.

19 MR. MURRAY: Mr. Hansted, before that, Mr.
20 Hansted, could we ask? There's a question we'd like to
21 ask, just to clarify something for the record of the
22 Applicants about the patient mix at Lawrence & Memorial
23 Hospital.

24 There seems to be some confusion, at least

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 on our end here on the record, about what was stated.

2 Would that be permitted?

3 HEARING OFFICER HANSTED: Do you have any
4 objection to that, Attorney Feldman?

5 MS. FELDMAN: It's past my bedtime, so,
6 yes, I do. No.

7 HEARING OFFICER HANSTED: Okay.

8 MR. MURRAY: I don't know, Joan, who
9 should answer. I just wanted to clarify, because we've
10 heard 70 percent, and I've heard two-thirds, in terms of
11 government payers, mostly Medicaid and Medicare, and I
12 just wanted to clarify what it is at Lawrence & Memorial
13 Hospital.

14 MS. FELDMAN: We'll have our CFO answer
15 the question.

16 MR. VanESSENDELFT: Is this mike on? So I
17 think you may have heard maybe two of those comments.
18 The medical group, which we spoke about in the second CON
19 request, was in that kind of two-thirds area, around 60
20 percent or so. At L & M Hospital, it's closer to that 75
21 percent or around that area, including TRICARE.

22 So when we were talking about that, we
23 were looking at Medicare, Medicaid and TRICARE.

24 MR. MURRAY: Okay. The reason I ask is

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 that, taking a look at, and maybe this is something you
2 could clarify for the Commission, looking at note two on
3 the consolidated fiscal year '14 and '15 statements for L
4 & M, it indicates that the combined patients for Medicare
5 and Medicaid in fiscal year '15 was 48 percent, and, in
6 fiscal year '14, it was 46 percent. That's why there was
7 some confusion we wanted to clarify.

8 MR. VanESSENDELFT: Can you show me what
9 you're looking at?

10 MR. MURRAY: It's in a document submitted
11 by -- oh, here it is. On page 746 of the submission for
12 the acquisition at L & M, it says revenues from services
13 to patients and charity care, and it goes over and says,
14 during 2015 and 2014, approximately 36 percent and 35
15 percent, respectively, have met patient service. Revenue
16 was received under the Medicare program, and 12 percent
17 and 11 percent, respectively, under the State Medicaid
18 Program. We needed some clarification, because --

19 HEARING OFFICER HANSTED: Absolutely.

20 MS. VanESSENDELFT: And thanks for
21 clarifying. That was helpful. What you're really
22 struggling with is what we're all struggling with, is the
23 payer mix I gave you was gross revenue. That's
24 essentially the portion of services provided. The 35 or

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 45 percent, the numbers you just referenced, was net
2 patient revenue. That's what we're actually being paid,
3 so there is a significant difference in the amount of
4 services being provided, which is based on charges, or
5 amount of services provided, versus the net revenue,
6 which is what we're getting paid to provide those
7 services, and that really highlights much of the
8 challenge that we're having.

9 MR. MURRAY: So does the, in terms of
10 fiscal year '15, does that mean that 42 percent of net
11 revenue is paid from other sources, other than government
12 payers?

13 MR. VanESSENDELFT: I'm sorry. Cite that
14 again?

15 MR. MURRAY: So if the net revenue is 48
16 percent in fiscal year '15 from government payers,
17 Medicare and Medicaid, does that mean that, in fiscal
18 year '15, the net revenues from commercial payers was 52
19 percent?

20 MR. VanESSENDELFT: It would mean that the
21 non-government payers, which would include commercial and
22 other means, would be the remainder of that.

23 MR. MURRAY: Okay, thanks very much.
24 Thank you. I wanted to clarify that. Thank you.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 HEARING OFFICER HANSTED: Okay. Attorney
2 Feldman, if you want to give a brief closing statement?

3 MS. FELDMAN: Yes. I'm going to keep this
4 very short.

5 HEARING OFFICER HANSTED: Thank you.

6 MS. FELDMAN: As a favor to OHCA. This
7 has very clearly been a very unusual proceeding, based on
8 my own experience, and despite everything we submitted in
9 four volumes of documents, reiterated several times and
10 made painfully clear, we said these things to reassure
11 those in the community that they would not be affected
12 adversely.

13 Unfortunately, the proposal has become the
14 currency by which various parties have bid their own
15 agendas, so I respectfully request that OHCA please
16 disregard some of the hyperbole, some of the self-serving
17 statements, some of the flawed testimony and mistruths.

18 By way of example, the continued reference
19 to this affiliation as leading to a monopoly situation,
20 and there are many other examples that I'm not going to
21 go through, but I do ask OHCA to please rely on the
22 statutory criteria and the documents before you, as you
23 know better than me.

24 There's 12 criteria. Even if three of

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 those criteria are not found in favor of this
2 application, we believe there's convincing evidence in
3 the record with respect to the hospital affiliation 32033
4 that it should be approved.

5 Regardless of your decision on that
6 application, the merger between LMPA and NEMG should be
7 viewed independently.

8 While I understand that the affiliation
9 agreement ties those two transactions integrally
10 together, I think it's up to the parties to decide how
11 they would handle any decision by OHCA.

12 That is all I have to say. I want to
13 thank you.

14 HEARING OFFICER HANSTED: Thank you.
15 Attorney Murray?

16 MR. MURRAY: Thank you, Attorney Hansted.
17 I wish I could say my remarks would be very brief, but I
18 think it's the statutory and I think the public policy
19 framework we're doing, within which you are considering
20 this, I think need to be considered.

21 Since 2003, the Connecticut General
22 Assembly has progressively strengthened the state's laws
23 governing healthcare providers.

24 In 2014, the legislature instituted the

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 first requirement for Certificate of Need, review of
2 physician practice acquisitions, expanded OHCA, and the
3 State Attorney General's power to review and modify the
4 conversion of non-profit hospitals to for-profit
5 hospitals, and dramatically raised the bar for approval
6 of hospital acquisitions by requiring OHCA to make
7 findings that an Applicant for such an acquisition has
8 affirmatively proven that a consolidation will not
9 adversely impact cost, access, or diversity of providers.

10 In 2015, the General Assembly passed
11 Public Act 15-146, a sweeping Consumer Protection law
12 that makes Connecticut a leader among states attempting
13 to cope with the dramatic changes in our healthcare
14 system.

15 Among the policy changes made by the law,
16 our first ever ban on some facility fees, restrictions on
17 other facility fees, caps on surprise bills for patients,
18 who unwittingly receive care from out-of-network
19 providers, and a ban on the use of electronic medical
20 records, like Epic, as a tool for market leverage.

21 Perhaps, most importantly, as of January
22 1, 2017, Connecticut's Healthcare Insurance Exchange will
23 publish the actual allowed amounts, paid by fully-insured
24 health plans, to each provider for the most common

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 diagnoses and procedures.

2 Public Act 15-146 demonstrated a
3 Connecticut bipartisan commitment to creating the most
4 transparent healthcare system in the nation.

5 While it's not a panacea, transparency on
6 price, quality and access is essential if the proposed,
7 the various proposed changes in reimbursement and
8 acquisitions are to benefit patients, rather than to
9 simply reshuffle money between the pockets of insurers
10 and providers.

11 The transparency provisions of Public Act
12 15-146 are relevant here, precisely because of the
13 dispute that's in these proceedings about whether or not
14 the Applicants or their insurance carriers have the data
15 that OHCA requested, and the Applicants claim that the
16 data do not exist that the insurance companies have, and,
17 even if it did exist, they couldn't produce it, because
18 it's arguably either protected by proprietary contracts
19 with the insurers, or because it's a proprietary trade
20 secret.

21 Whether or not the health industry, as a
22 whole, possess a perfect risk assessment tool to
23 interpret the data, the raw unadjusted prices will become
24 public in less than six months.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 The Applicant should produce the
2 information requested by OHCA as raw price data, and then
3 OHCA could have an expert analyze it, if necessary. In
4 addition, given the impending release of these data on
5 January 1, 2017, it's hard to understand the Applicant's
6 insistence that the release of the information implicates
7 any proprietary information or contracts that they may
8 have with the insurers.

9 The actual language of Public Act 146
10 reads, in relevant part, "On or after January 1, 2016, no
11 contract entered into or renewed between a healthcare
12 provider and a health carrier shall contain a provision
13 prohibiting disclosure of, one, billed or allowed
14 amounts, reimbursement rates, or out-of-pocket costs,
15 and, two, any data to the all-payer claims database,
16 program established under Section 38a-1091 of the General
17 Statutes, for purpose of assisting consumers and
18 institutional purchasers in making informed decisions
19 regarding their healthcare and informed choices among
20 healthcare providers."

21 Thus, any contracts renewed or entered
22 since the beginning of the year, OHCA could demand that
23 data, irrespective of any claims about trade secrets or
24 protections from contracts with the insurers.

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 Continued withholding of this data from
2 OSHA(sic), that OSHA(sic) requested, for the purposes of
3 evaluating these applications we think is simply
4 unwarranted, given the public policy environment under
5 which they're being considered.

6 Moreover, PA 15-146 requires that the
7 Health Insurance Exchange publish, as I mentioned, the
8 allowable amounts that fully-insured plans pay to each
9 provider for 50 of the most common inpatient diagnoses
10 and procedures in the state, the 50 most common
11 outpatient procedures, and the 25 most common surgical
12 and imaging procedures.

13 Thus, the claim, that the data is
14 protected from disclosure to the public, we think is a
15 bogus claim and should be disregarded by the agency.

16 There really is nothing that we see that
17 prohibits OSHA, excuse me, OHCA from requesting that data
18 in any respect. We think that, since this data is going
19 to be available, this pricing data is going to be
20 available to OHCA in less than six months, then OHCA
21 ought to simply keep the record open on this particular
22 issue until it has that pricing data within which to
23 evaluate whether or not this particular acquisition does
24 have a negative impact on the pricing and the costs in

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 the New London area.

2 Throughout these proceedings, the
3 Intervenor has raised the important issue of continuing
4 access to health care in New London following the
5 acquisition, and we've asked OHCA to draw lessons from
6 the Hartford HealthCare takeover of Windham Hospital.

7 Not surprisingly, the Applicants argue
8 that Windham Hospital, the events at Windham Hospital are
9 irrelevant. This isn't true, if you take a look at
10 OHCA's final order on the Windham case, which said, "The
11 Applicants also stated that, currently, they will not be
12 terminating any services, however, OHCA realizes that, in
13 the future, the reduction of duplicate services may be
14 necessary to further strengthen the financial viability
15 of the system."

16 The vague promises made by Hartford
17 HealthCare about the reduction in services at Windham
18 demonstrate that such representations are, at best,
19 untrustworthy.

20 The applications before you contain long
21 passages, promising unspecified expansion of clinical
22 programs and the devotion to the financial stability of L
23 & M.

24 These mirror in many respects the promises

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 made by Hartford HealthCare at a time it was proposed
2 acquiring Windham Hospital.

3 Given the subsequent cuts in critical
4 services at Windham Hospital, the public in Eastern
5 Connecticut may be given a healthy skepticism of such
6 promises.

7 The application should not be approved in
8 the absence of clear, binding, legally-enforceable
9 commitments to the Greater New London community regarding
10 the maintenance of services.

11 One of the most puzzling aspects of the
12 application is the Applicant's insistence that L & M will
13 remain locally-controlled.

14 As the testimony and documents submitted
15 to OHCA make clear, this simply isn't true. The plain
16 language of the proposed L & M bylaws demonstrate the
17 crucial decision-making authority will not reside in New
18 London.

19 As a sole corporate member, Yale will
20 elect all the trustees to the L & M Board and can remove
21 them. The President and CEO of L & M is appointed not by
22 the L & M Board, but by Yale-New Haven Health Services.

23 And, importantly, as I think we pointed
24 out in Cross-Examination, all the major financial and

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 strategic decisions reside with the sole corporate
2 member.

3 With respect to the alleged \$300 million
4 investment, we believe OHCA should be troubled by the
5 Applicant's unwillingness to specify the exact details
6 and nature of the investment and whether it truly is an
7 investment.

8 Surrendering control of its community
9 hospital should yield tangible benefits to Greater New
10 London, yet it has taken OHCA several sets of questions
11 to get specifics on the first \$41 million of that
12 investment, which consists of software installation,
13 training, branding, and other intangibles.

14 It took multiple rounds of questioning for
15 the Applicants to state that the second \$44 million would
16 be actual new money from Yale-New Haven Healthcare
17 assets, however, the details of these investments still
18 remain vague.

19 Their most recent responses indicated that
20 it will be split between clinical recruitment and support
21 staff, and, despite the assurances made by Ms. Borgstrom
22 here today, unless there's an actual assurance to OHCA
23 that the money geared towards physician recruitment is
24 going to go to actual recruitment of new physicians in

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 the New London area, rather than the acquisition of
2 physician practices, it is going to be very hard for OHCA
3 to evaluate the impact on the Greater New London area.

4 If one accepts the fact that the initial
5 \$85 million that Yale has committed to invest in OHCA is
6 I think one of the expressions used by one of the
7 Applicant's witnesses was hard money, the same can't be
8 said for the remaining \$215 million.

9 The Applicant's response is to this, of
10 where that \$215 million is going to come from, is vague,
11 at best. In fact, the language used tonight was that it
12 is a reinvestment of L & M's operating revenues into the
13 viability of the system.

14 Finally, we want to suggest to OHCA that
15 there's some precedent that it ought to look to in
16 situations like this, where control of a community
17 hospital is transferred to an out-of-market entity.

18 In the case of the transfer of non-profit
19 hospitals to for-profit status in both Eastern
20 Connecticut Health Network and the Waterbury Hospital
21 case, the Attorney General required a substantial amount
22 of money, \$105 million in the case of Eastern Connecticut
23 and \$55 million in the case of Waterbury, to be placed in
24 community trust for the exclusive use by the local

HEARING RE: YALE-NEW HAVEN & NORTHEAST MEDICAL GROUP
JULY 26, 2016

1 communities in furtherance of community health needs.

2 We're fully aware that those decisions
3 occurred under a different statutory context, and it
4 involved the change from non-profit to for-profit status,
5 which doesn't apply here, however, in both cases, as it
6 does here, one of the chief concerns expressed was the
7 loss of control of an essential community asset to an
8 out-of-market player.

9 We think the precedent set by the Attorney
10 General should also inform OHCA's decision regarding the
11 applications in this case.

12 Although the Intervenors' views vary on
13 whether or not there's a viable acquisition is ultimately
14 possible, we believe that the applications, as currently
15 submitted to OHCA, do not fulfill the community's needs
16 and respectfully request that OHCA deny them. Thank you.

17 HEARING OFFICER HANSTED: Thank you,
18 Attorney Murray. And, with that, I thank everyone for
19 attending this evening, and this hearing is adjourned.

20 (Whereupon, the hearing adjourned at 9:17
21 p.m.)

CERTIFICATE

I, Paul Landman, a Notary Public in and for the State of Connecticut, and President of Post Reporting Service, Inc., do hereby certify that, to the best of my knowledge, the foregoing record is a correct and verbatim transcription of the audio recording made of the proceeding hereinbefore set forth.

I further certify that neither the audio operator nor I are attorney or counsel for, nor directly related to or employed by any of the parties to the action and/or proceeding in which this action is taken; and further, that neither the audio operator nor I are a relative or employee of any attorney or counsel employed by the parties, thereto, or financially interested in any way in the outcome of this action or proceeding.

In witness whereof I have hereunto set my hand and do so attest to the above, this 3rd day of August, 2016.

Paul Landman
President

**STATE OF CONNECTICUT
DEPARTMENT OF PUBLIC HEALTH
OFFICE OF HEALTH CARE ACCESS**

**AFFILIATION OF LAWRENCE + MEMORIAL CORPORATION WITH YALE-NEW HAVEN HEALTH SERVICES CORPORATION : DOCKET NO. 15--32033-CON
: JULY 29, 2016**

APPLICANTS' OBJECTION TO ADMISSION OF MILLIMAN
ANALYSIS OF STATE OF CONNECTICUT, STATE EMPLOYEES
RELATIVE COST PER HOSPITAL DATED SEPTEMBER 15, 2015

Pursuant to the direction of the Hearing Officer at the Office of Healthcare Access (“OHCA”) hearing held in the above-referenced matter on July 26, 2016, the Applicants, Lawrence + Memorial Corporation (“L+M”) and Yale-New Haven Health Services Corporation (“YNHHSC”) (collectively the “Applicants”) hereby object (the “Objection”)¹ to admission into the hearing record of the document referred to as the “Milliman Document Of State of Connecticut, State Employees Relative Cost Per Hospital” dated September 15, 2015 (the “Milliman Document”; by Administrative Notice with accompanying e-mail referenced as Exhibit LL). As grounds for the Objection, the Applicants submit that: 1.) the request to admit the Milliman Document was untimely, violative of OHCA’s procedural requirements and its admission under the circumstances would be prejudicial to the rights of the Applicants; 2.) the Milliman Document is irrelevant and immaterial to the issues raised by the Application; and 3.) the Milliman Document is irrelevant because, by its terms, it is based on data and information which was not independently verified by Milliman and which is subject to variables so numerous and significant as to render the Milliman Document inherently unreliable. The Applicants more fully set forth the grounds of their Objection below.

¹ At the hearing held on July 26, 2016, the Applicants orally objected to admission of the Milliman Document. The Hearing Officer requested that the Applicants submit their objections in writing. The Applicants submit this Objection in compliance with that request.

A. The Request To Admit The Milliman Document Was Untimely, Violative Of OHCA's Procedural Requirements And Prejudicial.

The request to admit the Milliman Document as part of the hearing record was untimely and violative of OHCA's requirements regarding the pre-filing of written testimony and accompanying documents, especially as relates to the submission of technical and expert documents. Under the circumstances, admission of the Milliman Document into the hearing record would unfairly prejudice the Applicants' rights to fair notice and the opportunity to analyze, investigate and rebut the evidence sought to be admitted. As such, the Milliman Document should be excluded from the hearing record.

In this proceeding, OHCA ordered that all pre-filed testimony be filed by July 1, 2016, well before the commencement of the public hearing on July 11, 2016. Nonetheless, the Intervenor, despite the fact that this document has existed for some time by virtue of its date, did not submit or even mention the Milliman Document in their pre-filed testimony or accompanying exhibits. Thus, the Applicants had no notice of its existence or opportunity to reasonably analyze its contents and prepare rebuttal testimony.

For the first time at the OHCA hearing on July 11, 2016, the Intervenor sought to introduce an incomplete copy of the Milliman Document, consisting solely of the chart contained as page three of the document and completely omitting the descriptions of purpose, methodology, findings and limitations contained in the balance of the report. At that hearing, the Applicants vehemently objected to admission of the partial document for multiple reasons and, given the lack of information regarding the proposed submission, the Hearing Officer deferred his ruling pending further clarification as to the circumstances and methodology of its creation to be discussed at the July 26, 2016 continuation of the hearing.

Thereafter, apparently at the initiation of the Intervenors, the Comptroller of the State of Connecticut, Kevin Lembo, submitted a complete copy of the three page Milliman Document along with an explanatory e-mail explaining the circumstances of its preparation. While OHCA provided administrative notice of the filing to the parties², at no time was any written expert testimony submitted from Milliman or from any other witness purporting to explain or elaborate on the Milliman Document or the methodology and assumptions employed.

The failure to provide any pre-filed testimony regarding the highly technical Milliman Document is certainly violative of the spirit, if not the letter, of the Rules of Practice governing OHCA contested cases. Pursuant to Connecticut Department of Health Rule of Practice Section 19a-9-29(e) “[u]pon request of any party . . . or on his own motion, the presiding officer may require any party or other participant who proposes to offer technical or expert written testimony to provide such testimony to any or all other parties or intervenors, and to prefile such testimony with the presiding officer, prior to or during the course of the hearing.” Thereafter, the written testimony may be received in evidence “provided that each witness shall be present at the hearing at which the prefiled testimony is offered, shall adopt the written testimony under oath and shall be available for cross-examination.” *Id.* (emphasis added). Obviously, these provisions are intended to prevent administrative trial by ambush and to ensure fair notice and the opportunity to prepare rebuttal testimony and examination. In the instant case, the Intervenors’ attempt to admit the Milliman Document without any reasonable opportunity to investigate, analyze or rebut its factual bases and findings or to cross-examine its creator is both unfair and highly prejudicial.

² Pursuant to the rules of evidence applicable to OCHA hearings, ordinarily notice may only be taken “of judicially cognizable facts and of the generally recognized technical or scientific facts within the agency’s specialized knowledge.” Conn. Gen. Stat. § 4-178(6). Obviously, nothing about the Milliman Document suggests that it falls within the purview of this rule and is properly the subject of administrative notice in these proceedings.

In sum, the Milliman Document should be excluded from the hearing record. Submission of the report was untimely, proffered in contravention of OHCA's established pre-filing procedures especially as relates to expert witness reports, and its admission would unfairly prejudice the Applicants' rights to investigate, analyze and rebut such evidence.

B. The Milliman Document Should Be Excluded Because It Is Irrelevant And Immaterial To The Issues Raised by The Application.

The Milliman Document is patently irrelevant and immaterial to the issues raised by the Application and it should not be admitted to the hearing record.³ The admission of the Milliman Document would not serve to illuminate but rather to distort and confuse the issues to the prejudice of the Applicants.

The Milliman Document is a hypothetical analysis prepared in September of 2015 by the State's former healthcare plan consultant, Milliman, exclusively for use by the State of Connecticut Comptroller's Staff. Counsel for the Intervenor informed counsel for the Applicants that he believed that the document was prepared at the request of an AFT representative. Using unverified data, the hypothetical analysis purported to compare the average paid cost for outpatient and inpatient services incurred from 5/1/2014 - 4/30/2015 for a relatively small subset of active state employees utilizing hospital services at L+M and Yale New Haven Hospital. Based on the erroneous assumption that the entities would merge and that the Yale New Haven Hospital fee schedule would therefore be utilized at L+M, Milliman projected a significant increase in expense to state employees utilizing L+M's services.

However, as is now clear, the Milliman Document proceeded from hypothetical factual assumptions fundamentally different from the actual facts which underlie the Application and the

³ The rules of evidence applicable to OCHA hearings as set forth in the Uniform Administrative Procedures Act provide in relevant part that in contested cases that: "Any oral or documentary evidence may be received, but the agency, shall, as a matter of policy, provide for the exclusion of irrelevant, immaterial or unduly repetitious evidence." Conn. Gen. Stat. § 4-178(1); Cf. Department of Public Health, Rules of Practice Section 19a-9-24.

proposed affiliation. As set forth in the Application and as made abundantly clear in the testimony at the OHCA hearing, the proposed relationship between L+M and YNHHS is an affiliation and not a merger. Similarly, the fees to be charged by L+M after the affiliation will be separately negotiated with health insurers as is done now by each hospital member of the YNHHS system.⁴ In no event, will the fee schedule of Yale New Haven Hospital be applied at L+M as erroneously presumed by the Milliman Document. Moreover, the Applicants never denied that Yale New Haven Hospital, as an ACGME accredited teaching hospital, has more costs associated with its services and thus, is generally more expensive than a community hospital such as, Lawrence + Memorial Hospital which is not a teaching hospital. Therefore, there is no supportable relevance for the Milliman Document.

The irrelevant nature of the Milliman Document is underscored and effectively conceded in the e-mail from State Comptroller Kevin Lembo dated July 21, 2016 (the "Lembo E-mail") which accompanied his submission of the Milliman Document to the Department of Public Health. In the Lembo E-mail, Mr. Lembo explains the genesis of the Milliman Document and suggests the core reasons why it is irrelevant to the pending Application as follows:

The analysis was produced in response to the announcement of the Yale New Haven and L&M affiliation. Please note that the analysis is a hypothetical produced at a time when it was unclear whether the relationship between Yale New Haven and L&M would be a merger (similar to the Yale New Haven St. Raphael's merger) or an affiliation agreement, similar to the relationship Yale New Haven has with Bridgeport hospital and Greenwich hospital. Yale New Haven has since stated in their CON application that they are seeking an affiliation agreement with L&M hospital and therefore contracts and fees will be negotiated with health insurers separately for L&M from Yale New Haven hospital and other affiliated hospitals in the Yale New Haven health system.

See Lembo E-mail, Exhibit LL.

⁴ It should be noted that vast majority of the L+M patient population are covered by governmental plans and not by private health insurers and are, therefore, not the subject of negotiation.

Against the foregoing and given the clarifying viewpoint expressed by the Comptroller, it is difficult to fathom how admission of the Milliman Document would be probative of any relevant issue.⁵ On the contrary, it would only serve to distort and confuse the record and mislead the public as to the expected results of the affiliation. As the Milliman Document is irrelevant and immaterial to the issues raised by the Application, it should be excluded from the hearing record.

C. The Milliman Document Is So Speculative And Unreliable As To Be Irrelevant To Consideration Of The Application.

In addition to being based on erroneous factual assumptions which render its analysis and conclusions irrelevant, the Milliman Document should also be excluded from the hearing record on the grounds of irrelevance because, by its terms, it is based on unverified facts and is subject to unconsidered variables so numerous and material as to render the analysis and findings too speculative and unreliable to be useful as relates to the Application.

⁵ At the July 26, 2016 OCHA hearing, the Intervenor asked various questions regarding the purported “refusal” of the Applicants to disclose competitive price information in connection with the Application. By implication, the Intervenor advocates for admission of the Milliman Document in response to this purported “refusal”. As pointed out by the Applicants at the hearing and as reinforced here, the Applicants have not refused to disclose price information in connection with the Application but are prohibited from doing so by concerns that such disclosure of price information prior to the affiliation would be construed as a violation of Section 1 of the Sherman Act which prohibits a “contract, combination . . . or conspiracy” that unreasonably restrains trade. 15 U.S.C. § 1. The motivating concern is that the disclosure of pricing information among potential competitors might facilitate anticompetitive harm by advancing the ability to collude and may lead to illegal price coordination. Thus, the suggestion that the Applicants have simply “refused” to supply price information is spurious in the context of the proposed affiliation. Furthermore, the Intervenor requested that OHCA delay the decision until January 1, 2017 when allegedly price data would be available pursuant to Connecticut General Statutes Section 38a-1034a. Specifically, the Intervenor stated that the Applicants would be required to report such price information to the Connecticut Health Insurance Exchange. This is incorrect in that only carriers are required to report price information related to a limited number of DRGs, without acuity adjustment or any other risk adjustment. Moreover, the Intervenor failed to mention the impact that *Gobeille v. Liberty Mut. Ins. Co.*, 136 S. Ct. 936 (2016) may have with respect to ERISA preempting this very requirement under Connecticut law.

The Milliman Document expressly acknowledges that in preparing the analysis, Milliman relied on data and information provided by others⁶ but which it did not independently audit or verify. Thus, with respect to the Milliman Document, Milliman specifically cautioned that: “If the underlying data or information is inaccurate or incomplete the results of [its] analysis may likewise be inaccurate or incomplete.” Milliman Document at p.2. Similarly, Milliman expressly disavowed the utilization of the Milliman Document for any purpose beyond its specific and limited purpose. Id. Indeed, the Milliman Document states that: “Any third party recipient of Milliman’s work product who desires professional guidance should not rely upon Milliman’s work product but should engage qualified professionals for advice appropriate to its specific needs.” Id. Thus, Milliman itself acknowledges the limited utility of the Milliman Document and the strong potentiality for inaccuracy and misinterpretation in its use for unintended purposes such as the issues in this proceeding.

The reasons to exclude the Milliman Document from the hearing record and the grounds for its irrelevance to the Application are further underscored by the numerosity and materiality of the unconsidered variables which Milliman itself identifies and cautions could materially alter the conclusions reached. In this respect, the Milliman Document states:

The results [of the Milliman Document] should be used with caution. Additional sources of variance that may need to be considered include, but are not limited to: Comorbid conditions of the patients treated, the number of hospital admissions for each hospital, the efficiency of the hospital’s management of patient admissions, cost of living differences in geographic areas, catastrophic claims, differences in hospital errors and quality of care. Note that highly efficient hospital stays tend to have higher costs per day. We also note that different DRG Grouping methodologies may change the acuity adjustment shown in this summary.

⁶ The Milliman Document indicates that data and information were provided by the State of Connecticut, Anthem and Oxford. Milliman Document at p. 2.

See Milliman Document at p. 1. As impressive as it is, even this lengthy enumeration probably does not adequately reflect all relevant risk adjusted factors which might account for variance in utilization.

Obviously, the many significant variables which were not considered in the Milliman Document serves to undermine its reliability for any purpose. When combined with flaws in methodology, the unverified nature of the underlying data and information and the faulty factual assumptions utilized as it relates to the Application, it becomes clear that the Milliman Document is so speculative and unreliable as to be entirely irrelevant. Consequently, for this reason as well, the Applicants object to admission of the Milliman Document and request that it be excluded from the hearing record.

D. Conclusion.

For the reasons set forth at length herein, the Applicants submit that the Milliman Document must be excluded from the hearing record in this proceeding. In the alternative, the Milliman Document should be given no greater weight than any other letter or public testimony provided after July 1, 2016, the date upon which all prefiled testimony should have been submitted to OHCA.

**INTERVENORS' RESPONSE TO THE APPLICANTS'
OBJECTIONS TO THE MILLIMAN REPORT**

I. Introduction

During the CON hearing on July 11, 2016, Intervenor offered into evidence a one-page table that it represented had been part of a report commissioned by the Office of the State Comptroller ("OSC") and had been provided to an official of AFT Connecticut by that office. The Applicants objected to its introduction and the Hearing Officer directed the Intervenor to produce any witnesses at the next scheduled hearing on July 26, 2016, to provide testimony on the authenticity of the document prior to a ruling on its admissibility. (Tr. p. 89).¹ On July 15, 2016, the Intervenor provided counsel for the Applicants with the full three page report from which the one-page table had been excerpted. The document was a September 15, 2015, report prepared for the Comptroller by Milliman, a former consultant to the State Employee Health Plan. The report ("Milliman Report") analyzed the costs paid by the State Employee Health Plan for the same inpatient and outpatient services at both Lawrence & Memorial Hospital and Yale-New Haven Hospital over the one year period of April 1, 2014 to March 31, 2015. On July 21, 2016, Comptroller Kevin Lembo sent a copy of the Milliman Report to Department of Public Health Commissioner Raul Pino in an explanatory email. That document and email was subsequently forwarded to the Office of Health Care Access. On Friday July 22, 2016, Hearing

¹ Transcript of CON Hearing, July 11, 2016.

Officer Kevin Hansted issued an Order taking administrative notice of the Milliman Report and email from Comptroller Lembo and admitting them into the record for Docket 15-323033- CON as Exhibit LL. Subsequent to their admission in the record, the Applicants filed their objections on the grounds that (i) the request to admit was untimely and prejudiced the Applicants; (ii) the Milliman Report is both irrelevant and immaterial to the issues raised by the Application; and, (iii) the Milliman Report itself is unreliable because the data on which it was based was not independently verified. For the reasons set forth below, the Intervenors respectfully request that the Applicants' objections be overruled and denied and that Exhibit LL remain in the record.

II. Argument

A. OHCA's Administrative Notice of the Milliman Report Inflicts No Prejudice on the Applicants.

The Applicants argue that the Milliman Report must be excluded from the record because it unfairly prejudices their right to "fair notice and an opportunity to analyze, investigate and rebut the evidence." (Applicants' Objections, p. 2). It is absolutely essential in evaluating this complaint to understand precisely what the Milliman Report shows, why it was offered by the Intervenors prior to its disclosure by the Comptroller, and whether the data presented in the Report was available to the Applicants should they have been inclined to further analyze and rebut the conclusion reached in the Report.

At the outset, however, it is important to correct the record with respect to the provenance of the Milliman Report. Despite the statement of the Applicants, the Milliman Report was not "prepared at the request of AFT representatives." (Applicants' Objections, p. 4). The email from Comptroller Lembo, which is part of Exhibit LL, is quite clear that the report was prepared at the request of his office in response to the initial filing of the certificate of need with OHCA. It is clear that the impetus behind the commissioning of the report was the concern of both the

Comptroller and the Connecticut Health Cost Containment Committee that there could be increased costs for the state employee health plan as a result of the Application. The Intervenor obtained the Report from the Office of the State Comptroller. At the July 11, 2016, hearing the Intervenor offered as evidence an excerpted table from that Report. As soon as counsel for the Intervenor received the full three-page Milliman Report later that week it was promptly provided to the Applicants on July 15, 2016. The Report was therefore provided to the Applicants ten or eleven days prior to the next scheduled hearing on July 26, 2016.²

Applicants clearly had sufficient time following the receipt of the report to analyze their own records related to payments for services received from the state employee health plan during the one year period reviewed in the Milliman Report to determine whether they believed it accurately reflected those transactions set out in the Report or provide an alternative explanation or rebut the Report's conclusion that services billed over that one year period by Lawrence & Memorial Hospital would have cost over one million dollars more if they were based on YNHH's costs for the same services.

B. The Milliman Report Is Clearly Relevant to the Statutory Required Evaluation of Cost and Access Resulting from the Acquisition of Lawrence & Memorial Corporation

The statute requires that for any decision on Application, OHCA must make a clear finding as to whether the Applicants have "successfully demonstrated that any consolidation resulting from the proposal will not adversely affect health care costs or accessibility of care." Throughout these proceedings it has been nearly impossible for OHCA to get any pricing and cost information from the Applicants with respect to their own payments from insurance companies or historic pricing and cost data from the previous acquisitions of Bridgeport and

² Attached hereto as Exhibit A is an email chain between counsel for the Intervenor and counsel for the Applicants regarding the Milliman Report and representations made about that report and its origins with conversations between counsel following the July 11, 2016 hearing.

Greenwich Hospitals and the merger with the Hospital of St Raphael. Such information, OHCA correctly concluded, is clearly necessary to evaluate whether or not the acquisition by YNHHS will have an adverse impact on health care costs in the L & M service areas. Without the requested data, OHCA must either assume that it will receive no price data whatsoever or evaluate the application with the limited available information.

The Intervenor has produced what information they could find in the form of the DRG comparisons submitted as part of Dr. Hyde's testimony and pre-file documents. In addition, the Milliman Report, for which the agency has taken proper administrative notice, is the only other source of price and cost data related to the actual provision of medical services by the Applicants in a one year period of time approximating the time frame within which the Application was filed. To that extent it is relevant in suggesting the price and cost comparison between the two hospitals, permitting an inference that if this price differential exists for one payer (the state employee health plan) such a differential must also exist with respect to the contracts the Applicants maintain with other third party payers. The Milliman Report is, as admitted by the Intervenor at the July 11, 2016 hearing, an incomplete snapshot, since it only applies to active state employees who received services at the two hospitals between April 1, 2014 and March 31, 2015. But it is the only data that OHCA has on price and cost and so it should take proper administrative notice of the findings. If OHCA believes it needs more extensive price and cost data which the Applicants will not provide, for whatever reasons, the agency can clearly suspend consideration of the Application until after January 1, 2017, when such information for the 50 most common outpatient procedures, the 50 most common inpatient procedures and the 25 most common surgical and imaging procedures, paid by fully insured plans to each provider

(including the Applicants) will become public on the website of the state's Health Insurance Exchange.³

Intervenors have supplied OHCA with abundant evidence of the impact of consolidation on provider prices, including two studies that point directly to the sort of acquisition present in this case. *Dafny et al.* recently found strong evidence of post-acquisition price increases in hospitals acquired within the same state, even when those systems operate in distinct markets. As noted by the Intervenors in our pre-file testimony, *Dafny* correlates such increases with the existence of common insurers, common customers, adjacent markets and proximity of less than 90 miles apart. These are all present in the current Application. *Gowriskandaran et al.* found that separate negotiations do not mitigate post-acquisition price increases.

Consequently, price data are essential to understanding the potential impact of the application on cost and accessibility of care.

C. **The Data On Which the Milliman Report Was Based Is Within the Custody and Control of the Applicants Who Could Have Verified Its Accuracy and Reliability**

Applicants object to administrative notice by OHCA of the Milliman Report because it is based on "unverified facts" which render its analysis "speculative and unreliable." However, the universe of data on which the Report is based consists completely of payments made to each of the Applicants through July 31, 2015, for services rendered by the Applicants at their hospitals to active state employees participating in the State Employee Health Plan from April 1, 2014 to

³ In its Objections the Applicants chide the Intervenors for not discussing the impact of the Supreme Court's March 2016 decision in *Gobeille v. Liberty Mutual Insurance Co.*, 136 S. Ct. 936 (2016), which involved a collision between federal court ERISA preemption analysis and the legislative trend in many state toward transparency in healthcare costs and pricing. Although the Intervenors are unaware of question involving the applicability of *Gobeille* being raised at any time during this application process we are more than willing to weigh in. Unlike the Connecticut law, which clearly requires disclosure only from fully insured carriers subject to state insurance regulation, the Vermont statute also applied to self-insured employee health plans, thereby running afoul of the ERISA preemption applied to employee welfare plans. The Intervenors believe that *Gobeille* will have no impact on the pricing transparency required by PA15-146 and available to OHCA and the general public on January 1, 2017.

March 32, 2015. Surely the Applicants have records of payments made to them for the services they provided, billed for and which were paid to them by the State Employee Health Plan for the period of time covered by the Report. It would be difficult to imagine that they would not have such records. The Applicants clearly had access to data from which they could have analyzed, investigated and refuted, if required, the conclusions reached in the Report with respect to the difference in cost between L & M and YNHH for the provision of listed inpatient and outpatient procedures during the relevant period of time. They chose not to do so.

The disclaimers contained in the Milliman Report, on which the Applicants so heavily rely to demonstrate its speculative nature, are not unusual when a consultant is being asked to provide an analysis with data that it received from the client and did not independently verify or audit. But since the data are paid claims to the Applicants' hospitals, information they must certainly have in their custody and control, the Applicants could have tested the data to determine whether it was reliable or there were other variables that needed to be considered. If the Milliman Report is skewed, inaccurate or otherwise problematic, the Applicants could have produced data they believe is more accurate. Again, they chose not to do so.

D. Because the Milliman Report Is Probative of Relative Pricing and Costs At the Applicants' Hospitals and Was Produced At the Direction of The State Comptroller It Should be Accorded Appropriate Evidentiary Weight

In the absence of the pricing information requested of the Applicants by OHCA, the agency must of necessity rely on less comprehensive but available sources of information to carry out its statutory review and approval functions. The Milliman study was conducted at the specific request of the state Comptroller to determine the impact of the acquisition on the state employee health plan. The state Comptroller has verified its authenticity and the purpose for requesting the study. Milliman is a major industry consulting firm whose clients include large

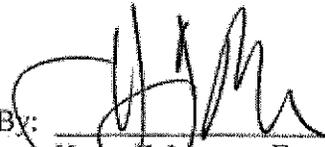

private sector corporations, universities, health care providers, and government entities. Intervenor do not claim and have never claimed that the Milliman Report conclusively proves a large price differential between the Applicants' two hospitals. However, even with all of the limitations and disclaimers enumerated by Milliman in the Report, these are the data available to the agency and they are probative of the relative pricing and costs at the Applicants' two hospitals and suggestive of a similar differential in costs at the two hospitals in their contracts with commercial insurers. It is the Applicants themselves who are the primary obstacles to obtaining the necessary data required to analyze the potential price impact of the transaction. Therefore the agency should rely, through administrative notice, on whatever record evidence exists in considering and deciding on the Application before it. This includes the data provided by the Milliman Report.

III. Conclusion

For all of the reasons set forth above, the Intervenor respectfully request that the Applicants' objection to the inclusion of the Milliman Report in the record be denied.

Subject: Objection to the Milliman Report

Joan,

Thank you for the copy of the Objection you filed today on behalf of the Applicants. I haven't had an opportunity to fully review it but we will file some response next week. However I wanted to bring to your attention a factual error in your narrative that I will correct in our response or you may wish to do so before hand. On page 4 you make the statement "Counsel for the Intervenor informed counsel for the Applicants that he believed that the document was prepared at the request of an AFT representative." This statement is inaccurate. When we spoke following the conference call with Kevin Hansted I told you that the one page table was apparently the third page of a report I did not yet have but would get to you when my client got the report to me. I subsequently did a few days later. I also told you that it was a report done for the Comptroller by a consultant and that the AFT's lobbyist had been given a copy of the report by someone in the Comptroller's office. I never said that the Comptroller had the consultant prepare the report *at the request of the AFT*. I think Kevin Lembo's email is pretty clear that the Office of the State Comptroller had Milliman prepare the report because of concerns (either his own or the Health Care Cost containment group) on the potential pricing impact of the transaction on the state employee health plan. You quote the entirety of the email text with that explanation on the next page. If you want to talk about this give me a call. Should be here rest of the day or again on Monday. Have a nice weekend.

Fitch Ratings

Fitch Downgrades Lawrence & Memorial Hospital (CT) Revs to 'A-'; Outlook Revised to Negative

Fitch Ratings-New York-10 August 2016: Fitch Ratings has downgraded to 'A-' from 'A' the rating on \$47.9 million State of Connecticut Health and Educational Facilities Authority revenue bonds, series F (2011) issued on behalf of Lawrence & Memorial Hospital (LMH).

The Rating Outlook is revised to Negative from Stable.

LMH also has outstanding approximately \$58 million in other long-term debt and leases, which are not rated by Fitch.

SECURITY

The bonds are secured by a pledge of gross revenues and a mortgage.

Fitch reports on the results of the consolidated Lawrence+Memorial Corporation (LMC), as defined in the Credit Profile section of the press release.

KEY RATING DRIVERS

CONTINUED OPERATING LOSSES: The downgrade to 'A-' is driven by continued trend of weakening profitability stemming from softer volumes, shift to outpatient utilization, less favorable reimbursement and the escalating Connecticut provider tax burden. The revision of the Outlook to Negative is based on Fitch's expectation that despite management's significant efforts at reversing the losses, a return to positive margin will only be achieved once the benefits from the anticipated joining of the Yale New Haven Health System (YNHHS; 'AA-', Stable Outlook) will be realized, which could take some time. Operating margin was a negative 4.1% in fiscal 2014 and 2.2% in fiscal 2015 (fiscal year-end [FYE] Sept. 30) and losses continued through the nine months ended June 30, 2016 with negative operating margin of 4.2%.

ANTICIPATED BENEFITS FROM JOINING YNHHS: LMC and YNHHS entered into an affiliation in July 2015 and the transaction has received FTC approval, but the Certificate of Need (CON) for the corporate member substitution has met regulatory delays at the state level. LMC and YNHHS already cooperate clinically in several areas, but the full integration with YNHHS would bring significant positive financial benefits to LMC, estimated at \$9 million-\$15 million annually, returning LMC to positive operating territory. Additionally, YNHHS has committed to directly contribute approximately \$85 million to LMC.

ADEQUATE LIQUIDITY: Despite the operational challenges, liquidity metrics have remained largely sound and the balance sheet provides the organization with a sufficient cushion to weather the delay in implementation of the full integration with YNHHS. Cash to debt of 167.6% and cushion ratio of 19.8x at June 30, 2016 are consistent with Fitch's respective 'A' medians of 144% and 18.5x, but days cash on hand (DCOH) of 147.4 lags the median of 205.3 days.

MANAGEABLE DEBT BURDEN: LMC's debt burden remains light for the rating category, as evidenced by maximum annual debt service (MADS) at 1.9% of revenue in 2015, which compares favorably against the median of 3.6%. However, weak cash flows resulted in MADS coverage by EBITDA declining to 1.8x through the interim period from 3.8x in fiscal 2015.

SOLID MARKET POSITION: LMC has a dominant market share of approximately 67% in the combined primary service area (PSA) of the two LMC hospitals. The ability to use YNHHS in physician recruitment and the planned investment in clinical programs, once the full affiliation is realized, should further secure market share.

RATING SENSITIVITIES

RETURN TO IMPROVED PROFITABILITY: The 'A-' rating is contingent upon Lawrence+Memorial Corporation executing the full YNHHS affiliation which is expected to generate improved financial performance through efficiencies and benefits of scale. The return to Stable Outlook would require Lawrence+Memorial Corporation to demonstrate the traction of the Yale New Haven Health System relationship, leading to material improvement in operating performance.

CREDIT PROFILE

Lawrence+Memorial Corporation operates Lawrence & Memorial Hospital, consisting of Lawrence & Memorial Hospital (LMH) in New London, Connecticut with 198 staffed beds, and Westerly Hospital in Washington County (Westerly), Rhode Island with 40 staffed beds, as well as a number of other subsidiaries, including the L&M Physician Association (LMPA). The obligated group includes LMH and the LMC Parent only. For fiscal year ended Sept. 30, 2015, LMC had total revenues of \$460 million.

BENEFITS OF JOINING YNHHS

LMC and YNHHS signed an affiliation agreement in July 2015 and the full merger would take the form of a member substitution, whereby YNHHS would become the sole corporate member of the LMC, but LMC would not be a member of the YNHHS obligated group, similar to the status of Greenwich Hospital ('AA-', Stable Outlook) in YNHHS. The merger with YNHHS is expected to bring significant benefits to LMC, estimated at \$300 million over the next five years. Of this amount, approximately \$85 million represents a direct commitment from YNHHS with half contributed fairly quickly once the formal corporate reorganization is completed for various initiatives, including population health management, rebranding, IT investment and physician recruitment focused on several specialty areas, in addition to primary care. The balance of the \$300 million benefit will be realized from further clinical investments and from LMC operations and efficiencies and synergies and gained scale from being part of the large, fully integrated YNHHS, with revenues of \$3.5 billion.

CONTINUED WEAK PROFITABILITY

LMC continues to be affected negatively by soft volumes, shift to observation patients and to outpatient utilization, and lower state and federal reimbursement rates. A significant contributor to the lower profitability is the escalating provider tax in Connecticut; the net impact of the provider tax offset by supplemental payments increased from a negative \$3.9 million in 2014 to negative \$9.1 million in 2015 and is expected to be as high as \$13 million in this fiscal year, even after the recent reinstating of some of the supplemental payments.

Operating losses were \$18.7 million in fiscal 2014 and \$10.3 million in 2015, equal to negative operating margins of 4.1% and 2.2%, and operating loss through the nine months ended June 30, 2016 was reported at \$14 million, a 4.2% negative operating margin. Management expects to end the 2016 fiscal year with an operating loss of \$22.3 million, with the most significant variances from the \$8.7 million budgeted loss stemming from the LMPA medical group and Westerly hospital. A number of initiatives from an earlier consulting engagement have already been operationalized, with over \$36 million of expenses taken out. Based on initiatives continuing to be implemented currently and additional expense management likely to be realized, the 2017 budget would be close to \$10 million-\$13 million loss. Management has been successful in negotiating a new union contract in the spring of 2016, ahead of the expiration of the prior contract. Any relief in the state provider tax would further help improve profitability.

ADEQUATE LIQUIDITY AND LOW DEBT BURDEN

LMC's liquidity in relation to its debt remains solid for the rating category, with cash of \$175.4 million at June 30, 2016 equal 167.6% of debt and cushion ratio of 19.8x at June 30, 2016, both above Fitch's category medians. Overall, Fitch considers LMC's liquidity position as a partial mitigant against its compressed profitability, providing a temporary cushion until such time as LMC can see the benefits of the integration into YNHHS.

LMC's debt burden is light with MADS equal to 2% of revenues through the nine-month interim period. MADS coverage by EBITDA of 1.8x and by operating EBITDA of 1.5x were both weak against Fitch's 'A' medians at 4.2x and 3.5x, respectively, somewhat offset by a relatively conservative debt structure with 80% of debt in fixed rate mode.

DISCLOSURE

LMH covenants to provide quarterly and annual financial disclosure to the Municipal Securities Rulemaking Board's EMMA system.

Agreed Settlement

Applicants: **Lawrence + Memorial Corporation**
365 Montauk Avenue
New London, CT 06320

Yale New Haven Health Services Corporation
789 Howard Avenue
New Haven, CT 06519

Docket Number: **15-32033-CON**

Project Title: **Transfer of ownership of Lawrence + Memorial Corporation to Yale New Haven Health Services Corporation**

Project Description: Lawrence + Memorial Corporation ("L+M") and Yale New Haven Health Services Corporation ("YNHHS"), herein collectively referred to as the ("Applicants") seek authorization to transfer ownership of L+M and its subsidiaries to YNHHS, with no associated capital expenditure.

Procedural History: The Applicants published notice of their intent to file a Certificate of Need ("CON") application in the New Haven Register and The Day (New London) on July 27, 28 and 29, 2015. On October 7, 2015, the Office of Health Care Access ("OHCA") received the CON application from the Applicants for the above-referenced project. On December 16, 2015, Commissioner Jewel Mullen designated Attorney Kevin T. Hansted as the hearing officer in this matter. The application was deemed complete on May 10, 2016. On June 17, 2016, OHCA received a petition from a coalition of organizations led by New England Health Care Employees Union, District 1199 SEIU ("District 1199") requesting intervenor status with full rights of cross-examination. The Hearing Officer granted the petition of District 1199 ("Intervenor") on June 24, 2016. On June 22, 2016, the Applicants were notified of the date, time, and place of the public hearing. On June 24, 2016, a notice to the public announcing the hearing was published in The Day. Thereafter, pursuant to Connecticut General Statutes ("Conn. Gen. Stat.") § 19a-639a (f)(2), a public hearing regarding the CON application was initially held on July 11, 2016 and

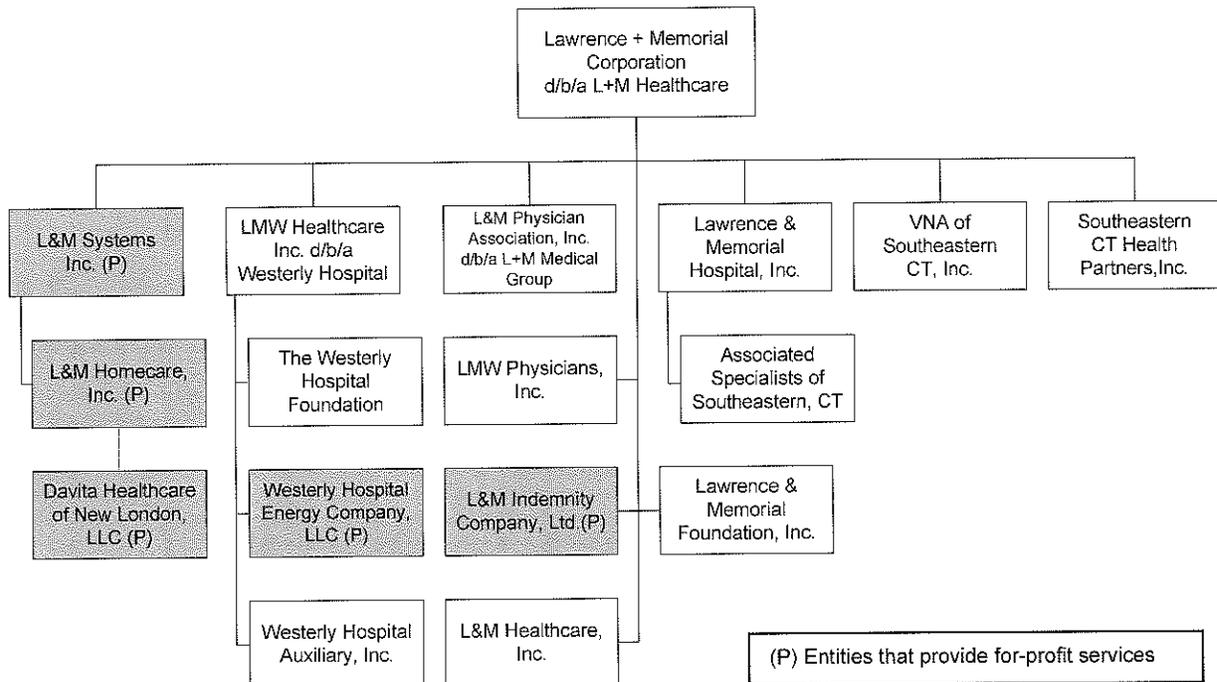

Phone: (860) 418-7001 • Fax: (860) 418-7053
410 Capitol Avenue, MS#13HCA
Hartford, Connecticut 06134-0308
www.ct.gov/dph

Affirmative Action/Equal Opportunity Employer

continued on July 26, 2016. The hearing was conducted in accordance with the provisions of the Uniform Administrative Procedure Act (Chapter 54 of the Conn. Gen. Stat.) and Conn. Gen. Stat. § 19a-639a (f)(2) and the Hearing Officer heard testimony from witnesses for the Applicant and the Intervenors. The public hearing record was closed on September 7, 2016. In rendering the decision, Deputy Commissioner Addo considered the entire record in this matter.

Findings of Fact and Conclusions of Law

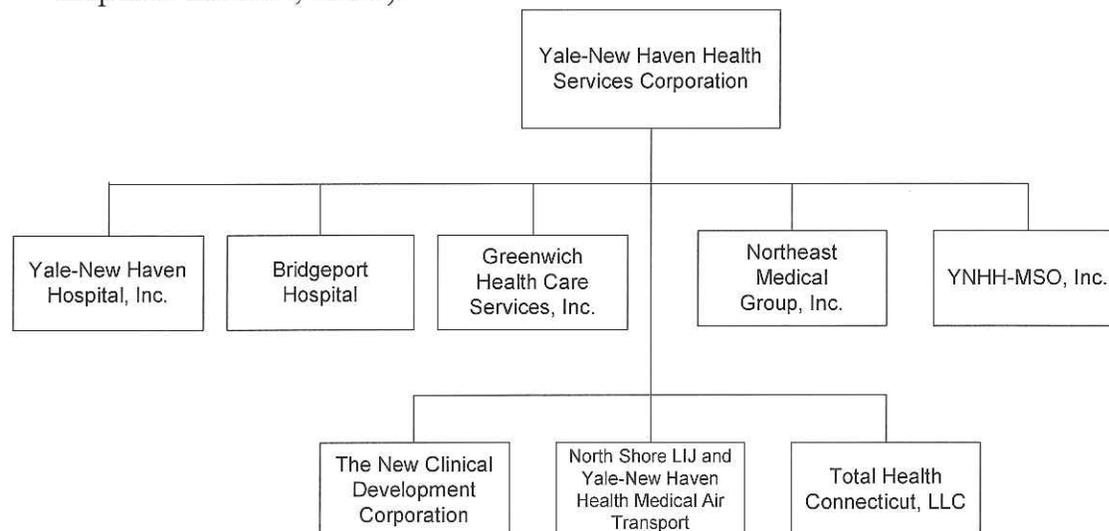

1. L+M is a non-stock, tax-exempt corporation that is the sole member of subsidiaries operating acute care hospitals and community-based services located throughout southeastern Connecticut and southwestern Rhode Island. Ex. A, p. 23
2. L+M is the parent company of Lawrence + Memorial Hospital (“L+MH”), its principal asset in Connecticut, and various other subsidiaries and affiliated entities (see legal chart of corporate structure, below).

Ex. A, p. 732

3. L+MH is an acute care community hospital located in New London, Connecticut. It is licensed for 280 general hospital beds (plus 28 bassinets) and provides a full range of inpatient, outpatient and ancillary services to residents of southeastern Connecticut. Ex. A, p. 23
4. YNHHS is a Connecticut non-stock, tax-exempt corporation that was organized in 1983 to provide support services to Yale New Haven Health System (“YNHHS”), a network of affiliated health care providers, the foremost being Yale-New Haven Hospital (“YNHH”). Ex. A, p. 22

5. In addition to YNHH, YNHHS is the parent company of Greenwich and Bridgeport Hospitals, along with various other subsidiaries and affiliated entities (see legal chart of corporate structure, below).

Ex. A, p. 591

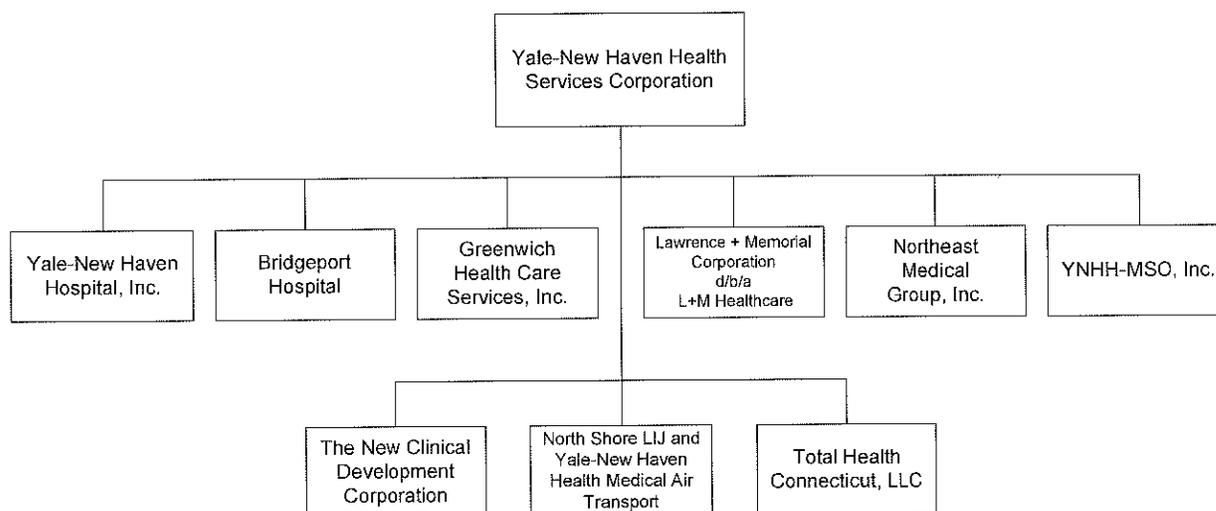

6. The L+M and YNHHS boards approved execution of the Affiliation Agreement and agreed to seek regulatory approval on July 9, 2015 and July 10, 2015, respectively. Ex. A, p. 29
7. The Applicants request authorization to transfer ownership of L+M and its subsidiaries to YNHHS, such that YNHHS shall become the sole corporate member of L+M. Ex. A, pp. 21, 92
8. A Hart-Scott-Rodino filing¹ was submitted to the Federal Trade Commission (“FTC”) on August 7, 2015 and on September 8, 2015, the FTC informed YNHHS and L+M that it would allow the waiting period to expire without further investigation. Ex. A, p. 29
9. Following the transfer of ownership, L+MH will continue to operate as an independently licensed hospital, with its own separate medical staff, bylaws, rules, regulations and elected officers. Ex. A, p. 21
10. L+M will continue to remain a separate entity with its own board responsible for overseeing and managing L+MH and Westerly Hospital, subject to certain reserved rights of YNHHS with respect to fundamental strategic, financial and governance matters. Ex. A, p. 26
11. The L+MH Board will continue as a fiduciary board and be responsible for the oversight and management of patient care, safety, licensure, accreditation, medical staff credentialing, election and removal of officers and approval of actions not otherwise reserved to L+M and/or YNHHS. A YNHHS appointee will serve on the L+MH Board as a result of the

¹ The Hart-Scott Rodino (“HSR”) Act requires that information about large mergers and acquisitions be submitted to the Federal Trade Commission and the Department of Justice prior to their occurrence. The parties may not close their deal prior to the waiting period outlined in the HSR Act without government approval. Source:

<https://www.ftc.gov/enforcement/premerger-notification-program>

proposal, however the L+MH Board's scope of responsibility and authority will be largely unchanged. Ex. A, p. 26

12. The following chart depicts the organizational structure following the proposed transaction:

Ex. A, p. 594

13. The proposal is expected to provide L+M and the community it serves the following benefits:

- enhanced access to health care services through clinical integration and collaboration with YNHHS-affiliated physicians;
- strengthened ability to retain, develop, and recruit physicians;
- access to capital needed to re-invest in L+M and the communities it serves, including advanced diagnostic capabilities and state-of-the-art facilities and technologies;
- access to population health infrastructure and expertise; and
- greater financial stability resulting from being part of a large health system.

Ex. A, p. 25

14. YNHHS offers specialized tertiary and quaternary services not available at smaller community hospitals. As a result, L+MH transfers approximately 1,000 patients each year to YNHHS, via the Y Access Line transfer service. These patients have historically been referred back to the L+M community to receive follow-up care following discharge. Ex. A, p. 26

15. L+MH's primary service area consists of five towns in southeastern Connecticut; nearly half of discharged inpatients reside in Groton or New London (see table below):

TABLE 1
L+MH PRIMARY SERVICE AREA*

Town	FY 2015	
	Discharges	%
Groton	3,797	27.0%
New London	2,929	20.8%
Waterford	1,715	12.2%
East Lyme	1,293	9.2%
Ledyard	828	5.9%
PSA Total	10,562	75.1%
All other	3,498	24.9%
Total	14,060	100.0%

*Primary service area based on top 75% of patient discharges by town

Source: CT DPH Office of Health Care Access, Acute Care Hospital Discharge Database

16. As determined in its most recent Community Health Needs Assessment ("CHNA"), L+MH's service area has a higher proportion of middle aged and older adults than Connecticut and the nation overall. The Applicants estimate that service area residents in the 65+ age cohort will increase 12.5% from 2015 to 2020. Ex. A, pp. 27, 32

17. L+MH's 2012 CHNA highlights the likelihood of a higher incidence of heart disease, cancer and certain lung diseases due to the service area demographics. Other key health issues identified are as follows:

- higher cancer incidence than state and national levels for all cancers, in particular, breast, colorectal and lung;
- higher cancer mortality than state and national levels for all cancers, particularly in breast, and lung cancer;
- high Chlamydia rates,
- obesity levels higher than the state average;
- increasing diabetes incidence; and
- high alcohol consumption as compared to national benchmarks.

Ex. A, pp. 32-33

18. L+MH is currently conducting the 2016 CHNA planning process in collaboration with over 30 partner organizations to help determine appropriate strategies and benchmarks, including the use of Healthy People 2020 benchmarks. Testimony of Laurel Holmes, Director of Community Partnerships and Population Health, L+M, Exhibit PP, p. 166

19. The Applicants plan to provide similar levels of funding for community benefits and community building following approval of the proposed transaction. Testimony of Ms. Borgstrom, President and Chief Executive Officer of YNHHS, Ex. PP, p. 169

20. The proposal is expected to provide L+M and the community it serves the following benefits:

- enhanced access to health care services through clinical integration and collaboration with YNHHSO-affiliated physicians;
- strengthened ability to retain, develop and recruit physicians;
- decreased clinical variation for L+M through standardized protocols as a result of adopting Epic, Lawson and other IT platforms used by YNHHSO;
- access to population health expertise and infrastructure;
- development of additional clinical programs identified as needed in the L+MH service area;
- access to capital on more favorable terms once L+M becomes a member of the YNHHSO Obligated Group²; needed to re-invest in L+M and the communities it serves, including advanced diagnostic capabilities and state-of-the-art facilities and technologies;
- supply chain-related cost savings as a result of volume discounts and efficiencies - economies of scale relating to IT, finance, insurance, equipment, supplies and other administrative services;
- more efficient clinical and business practices resulting from the proposed merger of L&M Physician Association, Inc. into Northeast Medical Group, Inc.;
- management expertise and efficiencies; and
- greater financial stability resulting from being part of a large health system.

Ex. A, pp. 25, 37

21. Overall patient volume (discharges and patient days) has declined slightly at L+MH over the past several years (see table below):

**TABLE 2
 L+MH HISTORICAL AND CURRENT DISCHARGES**

Service	Actual Volume (Last 3 Completed FYs)			
	FY 2012	FY 2013**	FY 2014**	FY 2015*
Medical/Surgical	10,319	10,139	9,525	9,609
Maternity (OB/GYN)	1,786	1,704	1,811	1,827
Psychiatric	866	822	812	819
Rehabilitation	331	334	310	309
Pediatric	89	98	41	40
Newborn/Neonates	1,546	1,562	1,652	1,666
Total	14,937	14,659	14,151	14,270

*FY 2015 annualized using 6 months of actual volume

**Inpatient demand declined due to the following factors: more stringent requirements for inpatient status (e.g., CMS two-midnight rule), advances in technology and non-surgical options shifting care to the outpatient setting and likely delays in seeking care due to high deductible health plans or lack of coverage. FY 2015

² An obligated group allows organizations to combine multiple business lines or assets to create a single entity that becomes jointly and severally liable for the organization's debt. An obligated group may be stronger financially than the sum of its individual members and generally leads to improved credit ratings, lower borrowing costs and enhanced capacity for future borrowing. Source: <http://www.lancasterpollard.com/NewsDetail/tci-fe-when-breaking-up-is-right-for-your-nonprofit>

volume is projected to increase slightly and may be the result of Westerly's maternity service closure and/or program development initiatives in cardiac, oncology and surgical services at L+MH.

**TABLE 3
 L+MH HISTORICAL AND CURRENT PATIENT DAYS**

Service	Actual Volume (Last 3 Completed FYs)			
	FY 2012	FY 2013	FY 2014	FY 2015*

Service	Projected Volume			
	FY 2016	FY 2017	FY 2018	FY 2019
Medical/Surgical	42,852	42,150	41,489	41,512
Maternity (OB/GYN)	5,059	4,975	4,900	4,895
Psychiatric	7,146	7,104	7,059	7,094
Rehabilitation	4,653	4,583	4,524	4,526
Pediatric	200	247	293	343
Newborn/Neonates	6,142	6,081	6,037	6,078
Total	66,052	65,140	64,302	64,448

Ex. A, pp. 41, 53-54

23. Following adoption of the proposal, L+MH's target patient population will remain the same. There are no planned closures or reductions to any clinical services currently offered. Further, the Applicants are planning service enhancements and expansions to minimize the need for area residents to travel outside the service area for specialty care. Ex. A, pp. 32, 34

24. Clinical needs in the service area will be prioritized through a comprehensive strategic planning process undertaken by L+M and YNHHS. Priority projects to be considered during the first three years following approval of the proposal include:

- behavioral health;
- emergency/urgent care;
- heart and vascular services;
- medicine services;
- oncology;
- pediatrics;
- primary care;
- surgery/ambulatory surgery; and
- women's health.

Exhibit E, p. 627; Late File 1, submitted August 2, 2016

25. Medicaid-covered patients account for 21.3% of L+MH's discharges. The Applicants do not anticipate any significant changes in payer mix as a result of the proposal.

TABLE 6
L + MH CURRENT & PROJECTED PAYER MIX

Payer	Current		Projected							
	FY 2015		FY 2016		FY 2017		FY 2018		FY 2019 ¹	
	Discharges	%	Discharges	%	Discharges	%	Discharges	%	Discharges	%
Medicare*	5,603	39.3%	5,650	39.3%	5,658	39.3%	5,661	39.3%	5,673	39.3%
Medicaid*	3,037	21.3%	3,062	21.3%	3,067	21.3%	3,068	21.3%	3,075	21.3%
CHAMPUS & TriCare	1,771	12.4%	1,785	12.4%	1,788	12.4%	1,789	12.4%	1,793	12.4%
Total Government	10,411	73.0%	10,498	73.0%	10,514	73.0%	10,518	73%	10,542	73%
Commercial Insurers*	3,698	25.9%	3,729	25.9%	3,734	25.9%	3,736	25.9%	3,744	25.9%
Uninsured	87	0.6%	88	0.6%	88	0.6%	88	0.6%	88	0.6%

*Includes managed care activity

¹ FY 2019 projections are imputed from FY 2015 percentages

Ex. A, pp. 47, 856

26. Following approval of the proposal, L+MH will adopt YNHHS financial assistance (charity and free care) policies. Ex. A, p. 34; Ex. E, p. 617

27. There are no planned changes to L+MH's charge-master or to its existing payer contracts as a result of the proposal. YNHHS plans to honor the terms of all existing L+M agreements for their duration. Ex. A, pp. 57-58; Testimony of Mr. Tandler, Executive Director Finance, YNHHS, Ex. PP, p. 136.

28. YNHHS has assured price neutrality for L+MH for the remainder of the contract terms. The financial terms and reimbursement rates for each provider are unique and based on individual provider's cost structure. Once the contracts expire, they will be renegotiated and the new terms will be based on L+MH's own individual cost structure and service area. Ex. E, p. 867; Testimony of Ms. Borgstrom, President and Chief Executive Officer of YNHHS, Ex. PP, pp. 145-146

29. The existing debt and pension obligations of L+M will remain unchanged as a result of this proposal. Ex. A, p. 57

30. L+M will become a member of the YNHHS Obligated Group (current members include: YNHHS, Yale New-Haven Hospital, Bridgeport Hospital, Bridgeport Hospital Foundation, Northeast Medical Group, and Yale New-Haven Care Continuum), which enables

participants to gain access to more favorable borrowing rates than otherwise would be available on their own. Ex. B. p. 640

31. L+M has experienced a loss from operations in each of the past four fiscal years (see table below):

TABLE 7
L+M INCOME/(LOSS) FROM OPERATIONS

	FY 2013	FY 2014	FY 2015	FY 2016 YTD
Operating Loss	(\$7,417,664)	(\$18,685,472)	(\$10,296,604)	(\$14,035,190)

Source: Audited Financial Statements submitted to OHCA; Late file #3

32. As of May 2016, the L+MH bond rating for its CHEFA Series F bonds was downgraded by Standard and Poor's ("S&P") to BBB+, from an A+ rating given three years earlier. S&P indicated, however, that there is upward rating potential if L+M's integration with YNHHS provides immediate improvement to financial performance and balance sheet stability. Prefiled testimony of Bruce D. Cummings, President & CEO of L+M, p. 888
33. As of August 2016, Fitch Ratings downgraded \$47.9M State of Connecticut Health and Educational Facilities Authority revenue bonds, Series F (2011), issued on behalf of L+MH from A (stable) to A- (negative) due to the "continued trend of weakening profitability stemming from softer volumes, shift to outpatient utilization, less favorable reimbursement and escalating Connecticut provider tax burden." Exhibit SS, Fitch Ratings Report
34. YNHHS has agreed to commit as much as \$300 million ("M") in resources in eastern Connecticut and western Rhode Island over the next five years to enhance L+M's clinical and operational capabilities and services. Ex. A, p. 39
35. The funding sources of YNHHS's \$300M capital commitment will be:
- operating cash flows from L+M;
 - operating cash flows from YNHHS; and
 - cash reserves from YNHHS.

Ex. E, p. 624

36. The table below provides a preliminary capital investment plan. At least \$163M of the \$300M total will be allocated for the following capital infrastructure projects at L+M:

TABLE 8
PRELIMINARY CAPITAL INVESTMENT PLAN FOR L+M (IN THOUSANDS)

Description	Five Year Total
Capital infrastructure to maintain and improve the equipment and facilities at L+M	\$163,000
Full implementation of EPIC and other clinical systems upgrades	34,000
Rebranding initiatives at L+M	2,000
Clinical program development and related capital expenditures	15,000
Avoidance of population health infrastructure costs at L+M	10,000
Unspecified; to be allocated after a more detailed assessment	76,000
Total estimated capital expenditures	\$300,000

Ex. E, p. 625-626

37. The most recent credit ratings for YNHHS are as follows:

- Moody's: Aa3/Stable Outlook
- S&P: A+/Positive Outlook
- Fitch: AA-/Stable Outlook

Ex. E, p. 641

38. The Applicants have stated that multiple options are available to fund the \$300M capital commitment in the event of a YNHHS operating loss, including the use of YNHHS cash on hand or an L+M debt offering. Ex. E, pp. 624-625

39. The \$300 million is a commitment over the next five years to enhance services, infrastructure and operations at L+MH. A portion of the money will come from operational improvements at L+MH, however \$85M will be a hard investment made by YNHHS. A significant amount of this investment will be used for new information technology and population health infrastructure, as well as physician recruitment. In addition, the proposal will help expand the clinical areas determined to be under-supported in the L+MH and Westerly communities, including primary care, surgery, behavioral health, women/children's services and emergency critical care services. Testimony of Ms. Borgstrom, President and Chief Executive Officer of YNHHS, Ex. PP, pp. 45-46

40. YNHHS's commitment to L+M is dependent upon the performance of YNHHS, L+M, community need, YNHHS's strategic plan and mutually agreed upon business plans that achieve a positive return on investment. YNHHS will provide \$41M based on the strategic plan and an additional \$44M for specific clinical and operational initiatives (years two through five of the affiliation). Ex. E, p.624

41. The \$85M commitment (\$41M + \$44M) will be used for the following capital expenditures at L+M:

- EPIC installation and other IT investments;
- rebranding and communication;
- population health infrastructure;
- clinical programs and services for eastern Connecticut and western Rhode Island;
- funding for new physicians; and
- other miscellaneous expenditures including staff augmentation and clinical support.

Ex. E, p. 626-628

42. YNHHSO plans to use the remaining \$215M capital commitment balance in southeastern Connecticut for the following services:

- expansion of primary care network including ambulatory surgery;
- access to pediatric specialty services;
- development of a musculoskeletal center;
- expansion of maternal fetal medicine and obstetric capabilities;
- enhancement of Smilow Cancer Hospital oncology services;
- expansion of bariatric and/or laparoscopic surgical programs;
- expansion of neuromuscular and stroke programs;
- development of a multidisciplinary vascular program and enhancement of cardiac services;
- enhancement of endocrinology/thyroid services;
- development of population health and risk contracting capabilities;
- continued access to SkyHealth;
- expanded emergency services; and
- physical plant and infrastructure renovations.

Ex. A, Affiliation Agreement p. 99 & 100

43. With the exception of an initial FY 2016 loss, the Applicants project incremental gains at L+M from FY 2017 through FY 2019. These projected gains are largely due to anticipated operating expense reductions resulting from YNHHSO ownership.

TABLE 9
L+M PROJECTED INCREMENTAL REVENUES AND EXPENSES (in thousands)

	FY 2016	FY 2017	FY 2018	FY 2019
Revenue from Operations	(\$13,647)	(\$24,943)	(\$19,073)	(\$14,036)
Total Operating Expenses	(\$13,575)	(\$32,219)	(\$31,337)	(\$29,548)
Gain/(Loss) from Operations	(\$72)	\$7,276	\$12,265	\$15,512

Ex. E, p. 857

44. Similarly, an overall loss is projected at L+M in FY 2016. However, operating gains of \$14.6M, \$19.1M and \$16.9M are projected in FY 2017, FY 2018 and FY 2019, respectively, if the proposal is approved.

TABLE 10
L+M PROJECTED REVENUES AND EXPENSES WITH CON (in thousands)

	FY 2016	FY 2017	FY 2018	FY 2019
Total Operating Revenue	\$455,074	\$446,783	\$455,808	\$461,104
Total Operating Expenses	\$463,843	\$432,214	\$436,748	\$444,229
Gain/(Loss) from Operations	(\$8,769)	\$14,569	\$19,060	\$16,875

Ex. E, p. 857

45. L+M's projected incremental cost savings are summarized in the table below:

TABLE 11
L+M'S PROJECTED INCREMENTAL OPERATING EXPENSE REDUCTIONS (in thousands)

	FY 2016	FY 2017	FY 2018	FY 2019
Total Reductions*	\$13,575	\$32,219	\$31,337	\$29,458

*Operating expense reductions are attributable to the following: salaries and wages, fringe benefits, physician fees, supplies and drugs, malpractice insurance, lease expense and miscellaneous operating expenses.

Ex. E, p. 857

46. YNHHSAC acquisitions of Bridgeport and Greenwich Hospitals have resulted in improved financial performance and cost savings for both hospitals. Additional system savings were realized with the integration of the former Hospital of St. Raphael into Yale New Haven Hospital.

- The affiliation of Bridgeport and Greenwich Hospitals, along with the merger of the Hospital of St. Raphael into YNHHSAC, has resulted in supply chain cost savings and capital avoidance of \$32.8M since FY 2010. These savings were the result of the standardization of supply and pharmaceutical purchases, the integration of service contracts, volume discounts and rebates and efficient utilization of information technology and medical equipment within the system.
- In 2011, the consolidation of property insurance policies under a single contract with YNHHSAC generated annual reoccurring savings of \$147,000; \$84,000 is attributable to cost reductions at Bridgeport and Greenwich Hospitals.
- The integration of the Hospital of St. Raphael into YNHHSAC has yielded cost savings of \$213M as of November 30, 2015 in the areas of supply chain management, insurance, back office functions and the standardization of clinical practices.

Ex. E, pp. 869-870

47. The financial performance of both Bridgeport and Greenwich Hospitals has improved since affiliating with YNHHS. In FY 2015, Bridgeport and Greenwich Hospitals reported operational gains of \$54.7M and \$32.5M, respectively. Ex. E. p. 874 and Audited Financial Statements submitted to OHCA.
48. A Department of Public Health (“DPH”) survey conducted on July 13, 2016 found that L+M was not in substantial compliance with certain Conditions of Participation required by the Centers for Medicare & Medicaid Services (“CMS”). As a result, L+M’s deemed status⁴ was removed by CMS. Subsequently, L+M submitted a Corrective Action Plan to DPH on July 29, 2016. Late file #5
49. OHCA is currently in the process of establishing its policies and standards as regulations. Therefore, OHCA has not made any findings as to this proposal’s relationship to any regulations not yet adopted by OHCA. (Conn. Gen. Stat. § 19a-639(a)(1))
50. This CON application is consistent with the Statewide Health Care Facilities and Service Plan. (Conn. Gen. Stat. § 19a-639(a)(2))
51. The Applicants have established that there is a clear public need for the proposal. (Conn. Gen. Stat. § 19a-639(a)(3))
52. The Applicants have demonstrated that the proposal is financially feasible. (Conn. Gen. Stat. § 19a-639(a)(4))
53. The Applicants have satisfactorily demonstrated that the proposal will maintain quality, accessibility and cost effectiveness of health care delivery in the region. (Conn. Gen. Stat. § 19a-639(a)(5))
54. The Applicants have shown that there would be no change in the provision of health care services to the relevant populations and payer mix, including access to services by Medicaid recipients and indigent persons. (Conn. Gen. Stat. § 19a-639(a)(6))
55. The Applicants have satisfactorily identified the population to be affected by this proposal. (Conn. Gen. Stat. § 19a-639(a)(7))
56. The Applicants’ historical provision of treatment in the service area supports this proposal. (Conn. Gen. Stat. § 19a-639(a)(8))
57. The Applicants have satisfactorily demonstrated that this proposal would not result in an unnecessary duplication of existing services in the area. (Conn. Gen. Stat. § 19a-639(a)(9))

⁴ Sections 1865 of the Social Security Act and CMS regulations state that a provider or supplier accredited by a CMS-approved Medicare accreditation program will be “deemed” to meet all of the Medicare Conditions of Participation for hospitals. In accordance with Section 1864 of that Act, State Survey Agencies may conduct, at CMS’s direction, surveys of deemed status providers in response to a substantial allegation of noncompliance or when CMS determines a full survey is required after a substantial allegation survey identifies substantial noncompliance.

58. The Applicants have demonstrated that there will be no reduction in access to services by Medicaid recipients or indigent persons. (Conn. Gen. Stat. § 19a-639(a)(10))
59. The Applicants have demonstrated that the proposal will not negatively impact the diversity of health care providers and patient choice in the region. (Conn. Gen. Stat. § 19a-639(a)(11))
60. The Applicants have satisfactorily demonstrated that the proposal will not result in any consolidation that would affect health care costs or access to care. (Conn. Gen. Stat. § 19a-639(a)(12))

Discussion

CON applications are decided on a case by case basis and do not lend themselves to general applicability due to the uniqueness of the facts in each case. In rendering its decision, OHCA considers the factors set forth in § 19a-639(a) of the Statutes. The Applicants bear the burden of proof in this matter by a preponderance of the evidence. *Jones v. Connecticut Medical Examining Board*, 309 Conn. 727 (2013).

L+M is a non-stock, tax-exempt corporation that is the sole member of subsidiaries operating acute care hospitals and community-based services throughout southeastern Connecticut and southwestern Rhode Island. L+M is the parent company of L+MH, an acute care community hospital located in New London, Connecticut. L+MH is licensed for 280 general hospital beds (plus 28 bassinets) and provides a full range of inpatient, outpatient and ancillary services to residents of southeastern Connecticut. *FF1-FF3* YNHHS is a Connecticut non-stock, tax-exempt corporation established in 1983 to provide support services to the Yale New Haven Health System (“YNHHS”), a network of affiliated health care providers, the foremost being Yale-New Haven Hospital (“YNHH”). YNHHS is also the parent company of Greenwich and Bridgeport Hospitals. *FF4-FF5*

Community hospitals like L+MH are increasingly seeking to integrate with larger health systems to gain resources and the expertise necessary to meet the demands of health care reform. As a result of some recent financial challenges and the long standing collaborative relationship between L+M and YNHHS, the respective boards agreed to execute an Affiliation Agreement and seek regulatory approval to unite the two health systems. *FF6* Accordingly, the Applicants submitted a Hart-Scott-Rodino filing to the FTC on August 7, 2015 and were informed on September 8, 2015 that the waiting period would be allowed to expire without further investigation. *FF8* Following this notification, the Applicants submitted their proposal to OHCA, requesting authorization to transfer ownership of L+M and its subsidiaries to YNHHS, such that YNHHS shall become the sole corporate member of L+M. *FF7*

Following the transfer of ownership, L+MH will continue to operate as an independently licensed hospital, with its own separate medical staff, bylaws, rules, regulations and elected officers. *FF9* The L+MH Board will include a YNHHS appointee, however, the scope of responsibility and authority will largely be unchanged. The L+MH Board will continue to be responsible for the oversight and management of patient care, safety, licensure, accreditation, medical staff credentialing, election and removal of officers and approval of actions not otherwise reserved to L+M and/or YNHHS. *FF11*

There are no planned closures or reductions to any clinical services currently offered at L+MH as a result of the proposal. The Applicants are currently planning service enhancements and expansions to help minimize the need for residents to travel outside the service area for specialty care. *FF23* Further, the proposal will expand under-supported clinical areas in the L+MH and Westerly communities, including primary care, surgery, behavioral health, women/children's services and emergency critical care services. *FF39*. The Applicants expect that clinical variation will decrease through the use of standardized protocols resulting from the adoption of Epic,

Lawson and other IT platforms used by YNHHS, thus improving the experience and quality of patient care. *FF20*

The Hospital will continue to serve Medicaid patients and the indigent. Medicaid is the primary payer for approximately one out of five patients served by L+MH. The Applicants do not anticipate any significant changes in payer mix over the next three years. *FF25* Following approval of the proposal, L+MH will adopt YNHHS's charity and free care financial assistance policies. *FF26*

There are no planned changes to L+MH's charge-master or to its existing payer contracts as a result of the proposal. YNHHS plans to honor the terms of all existing L+MH agreements for their duration. Once existing contracts expire, they will be renegotiated with new terms based on L+MH's own individual cost structure and service area demographics. *FF27-FF28*

As a core component of the proposal, YNHHS has agreed to a commit up to \$300M in resources over a five-year period to enhance L+M's clinical and operational capabilities in eastern Connecticut and western Rhode Island. *FF34* A significant amount of this investment will be used for new information technology and population health infrastructure, as well as physician recruitment and the development of new clinical programs. *FF39*

Through the infusion of capital, L+M will be better positioned to develop state-of-the-art facilities, technologies and diagnostic capabilities. In addition, L+M will benefit from efficiencies resulting from economies of scale relating to IT, finance, insurance, equipment, supplies and other administrative services and will be able to reduce costs through supply chain-related savings as a result of volume discounts. *FF20*

L+M is currently experiencing some financial challenges, posting operational losses in each of the past four fiscal years (FYs 2013-2016). *FF31* In addition, L+MH recently had its Series F bond rating downgraded by both Standard and Poor's and Fitch Ratings to BBB (investment lower medium grade) and A- (negative), respectively. Fitch stated the downgrading was due to the "continued trend of weakening profitability stemming from softer volumes, shift to outpatient utilization, less favorable reimbursement and the escalating Connecticut provider tax burden." *FF32-FF33* Approval of the proposal should help mitigate future operational losses at L+M and help stabilize its future credit ratings.

With the exception of an initial FY 2016 loss, the Applicants project incremental operating gains at L+M from FY 2017 through FY 2019. *FF44* These projected gains are largely due to the anticipated ability of L+M to reduce operating expenses as a result of YNHHS ownership. Operating expenses are projected to decrease in FYs 2016-2019 by \$13.6M, \$32.2M, \$31.3M and \$29.5M, respectively. These cost savings are attributable to salaries and wages, fringe benefits, physician fees, supplies and drugs, malpractice insurance, lease expense and miscellaneous operating expense reductions. *FF44* As a result of the potential for improved operational and financial performance, cost savings and capital improvements, the Applicants have demonstrated the proposal to be financially feasible and that the overall financial strength of the state's health care system will be improved.

L+M's future financial viability and its patient population's access to community health services can best be achieved by maintaining and building upon its existing relationship with YNHHS. Integration with YNHHS will afford L+M the opportunity to expand services, including its primary care network and ambulatory surgery offerings and to develop new local access points for vascular and musculoskeletal treatment. *FF42* The proposal will help provide needed capital and resources to improve L+M's financial strength and preserve L+M as an important source for health care in the local community. Thus, the Applicants have demonstrated a clear public need for the proposal.

The ownership change resulting from the proposal will improve the community's health by delivering high quality, cost effective, coordinated care across a broad continuum. Therefore, the Applicants have demonstrated that the proposal is consistent with the Statewide Health Care Facilities and Services Plan.

Order

Based upon the foregoing Findings of Fact and Discussion, the Applicants' request for the transfer of ownership of L+M Corporation to Yale New Haven Health Services Corporation, is hereby **Approved** under Conn. Gen. Stat. § 19a-639(a) subject to the enumerated conditions (the "Conditions") set forth below.

Unless expressly provided otherwise, all Conditions of this Order shall, to the extent applicable, be binding on the Applicants, their affiliates, successors and assigns, regardless of whether L+M Corporation remains the parent company and sole shareholder of L+MH. OHCA and any successor agency shall have the right to enforce the Conditions by all means and remedies available to it under law and equity, including but not limited to, the right to impose and collect a civil penalty under Conn. Gen. Stat. § 19a-653 against any person or health care facility or institution that fails to file required data or information within the prescribed time periods set forth in this Order. All references to days in these Conditions shall mean calendar days.

1. Within twenty (20) days following the Closing Date of the transfer of ownership authorized by this Order, YNHHS shall submit schedules to OHCA setting forth L+MH's inpatient bed allocation and the location and hours of operation for all outpatient services, by department, as of the Decision Date and publish this same information on the applicable website of L+MH. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Conn. Gen. Stat. §§19a-613(b), 19a-639(a)(8) & (11); FF 21-22.*
2. Within twenty (20) days following the Closing Date of the transfer of ownership authorized by this Order, YNHHS shall notify OHCA of the Closing, in writing, and shall supply final execution copies of all agreements related to same, including but not limited to:
 - a. the Affiliation Agreement, including any and all schedules and exhibits; and
 - b. Bylaws or similar governance documents for L+M as well as for L+MH.

YNHHS may redact from the Affiliation Agreement any information that is exempt from disclosure under Conn. Gen. Stat. § 1-210. If YNHHS redacts materials in accordance with the previous sentence, it shall provide a list to OHCA, which identifies in general terms the nature of the redacted material and why it is claimed to be exempt for public record purposes. OHCA is imposing this Condition to verify that the proposal will improve quality, accessibility and cost effectiveness of health care delivery in the region. *Legal and Factual Basis: Conn. Gen. Stat. §§19a-613(b), 19a-639(5); FF 6, 9*

3. Following the completion of L+MH's 2016 Community Health Needs Assessment (CHNA), YNHHS shall participate with L+MH, and the key community stakeholders and health organizations, in conducting future CHNAs and shall provide a copy of the 2016 CHNA and its Implementation Strategy to OHCA within thirty (30) days of completion. YNHHS and the participants shall utilize Healthy Connecticut State Health Improvement Plan data and priorities as the starting point for the new CHNA (available at http://www.ct.gov/dph/lib/dph/state_health_planning/sha-

[ship/hct2020/hct2020_state_hlth_impv_032514.pdf](#)), as well as any applicable community health improvement plan issued by any local health department in the Service Area.⁵ The Implementation Strategy shall also adopt the evidence-based interventions identified in the Centers for Disease Control 6/18 initiative (available at <http://www.cdc.gov/sixeighteen>) to the extent the health priorities identified in the CHNA correlate to the health conditions identified by the CDC and provide information on how any patient outcomes related to the Implementation Strategy will be measured and reported to the community. In the event that L+MH has already substantially completed its 2016 Implementation Strategy at the time of the signing of this Order, it may submit the information requested in the 6/18 initiative as an addendum within six (6) months of the Closing Date. The CHNA and the Implementation Strategy shall be published on the website of L+MH. Until such time as the CHNA and Implementation Strategy are submitted to OHCA, YNHHS shall continue to support and implement L+MH's current CHNA. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-613(b), 19a-639(a)(3) & (7); FF 3,16, 18*

4. Within one hundred and eighty (180) days following the Closing Date, YNHHS shall submit a plan demonstrating how health care services will be provided by L+MH for the first three years following the Transfer Agreement, including any consolidation, reduction, or elimination of existing services or introduction of new services (the "Services Plan"). The Services Plan will be provided in a format mutually agreed upon by OHCA and YNHHS. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Conn. Stat. §§ 19a-613(b), 19a-639(a)(5), (6) (7), (8), (9), (11) & (12); FF 23*
5. Until such time as the Services Plan is submitted, YNHHS shall provide OHCA with notice of any reallocation of inpatient beds and relocation of outpatient services for L+MH specific to those services that existed at L+MH as of the Decision Date. Such notice shall be provided within ten (10) days of any such reallocation or relocation and published on the website pages of L+MH. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-613(b), 19a-639(a)(5), (6) (7), (8), (9), (11) & (12); FF 23*
6. Within one hundred and eighty (180) days following the Closing Date, the Applicants shall file with OHCA the total price per "unit of service" for each of the top 25 most frequent MS-DRGs (inpatient) and top 25 most frequent CPT codes (outpatient) for L+MH services. The first filing shall be for the period September 1, 2015-August 30, 2016. The Applicants shall provide the same information for three (3) full fiscal years thereafter, within sixty (60) days following the end of a fiscal year. OHCA shall provide the format for the filing. OHCA is imposing this condition to ensure that the proposed transfer of ownership does not adversely affect health care costs. *Legal and Factual Basis: Stat. §§ 19a-613(b), (a)(5) (12); FF 27-28*

⁵ Other tools and resources which the Applicants are encouraged to consider include County Health Rankings and CDC Community Health Improvement Navigator in order to assist with the Study process in terms of an understanding of social, behavioral, and environmental conditions that affect health, identifying priorities, and the use of evidence-based interventions.

7. Within one hundred and eighty (180) days following the Closing Date and thereafter until the capital commitment is satisfied, YNHHC shall submit to OHCA a report on the capital investments ("Capital Investment Report") it has made in L+M and its affiliates from the \$300M Commitment Amount. The Capital Investment Report shall include the following in a format to be agreed upon:
 - a. A list of the capital expenditures that have been made in the prior one hundred and eighty (180) days with descriptions of each associated project; and
 - b. An explanation of why each expenditure was made and a timeframe for the roll out of the associated capital project (including estimated beginning, ending and startup/operation dates); and
 - c. The funding source of the capital investment indicating whether it was drawn from operating revenue, capital contributions from YNHHC or another source and, if funding was drawn from another source, indicating the source.

For purposes of this Order, semi-annual periods are October 1-March 31 and April 1 – September 30. The required information is due no later than two (2) months after the end of each semi-annual period. Due dates are May 31st and November 30th, beginning November 30, 2016. The reports shall be signed by L+M's or L+M's Chief Financial Officer. OHCA is imposing this Condition to ensure continued access to health care services for the patient population and to verify the continued financial feasibility of the project. *Legal and Factual Basis: Stat. §§ 19a-613(b), 19a-639(a)(3),(4) & (5); FF78, 35, 36, 38-42*

8. For three (3) years following the Closing Date, YNHHSC shall submit to OHCA a financial measurement report. This report shall be submitted on a semi-annual basis and show current month and year-to-date data and comparable prior year period data for L+MH and L+M. The required information is due no later than two (2) months after the end of each semi-annual period. Due dates are May 31st and November 30th, beginning November 30, 2016. The following financial measurements/indicators should be addressed in the report:

Financial Measurement/Indicators

A. <u>Operating Performance</u>
1. Operating Margin
2. Non-Operating Margin
3. Total Margin
B. <u>Liquidity</u>
1. Current Ratio
2. Days Cash on Hand
3. Days in Net Accounts Receivables
4. Average Payment Period
C. <u>Leverage and Capital Structure</u>
1. Long-term Debt to Equity
2. Long-term Debt to Capitalization
3. Unrestricted Cash to Debt
4. Times Interest Earned Ratio
5. Debt Service Coverage Ratio
6. Equity Financing Ratio
D. <u>Additional Statistics</u>
1. Income from Operations
2. Revenue Over/(Under) Expense
3. Cash from Operations
4. Cash and Cash Equivalents
5. Net Working Capital
6. Free Cash Flow (and the elements used in the calculation)
7. Unrestricted Net Assets/Retained Earnings

8. Bad Debt as % of Gross Revenue
9. Credit Ratings (S&P, FITCH or Moody's)

OHCA is imposing this Condition to ensure continued access to health care services for the patient population and to verify the continued financial feasibility of the project. *Legal and Factual Basis: Stat. §§ 19a-613(b), 19a-639(a)(4) & (5); FF 31-45*

9. Following the Closing Date, L+MH will adopt YNHHS's financial assistance (charity and free care) policies or adopt other policies that are at least as generous and benevolent to the community as L+MH's current policies, consistent with state and federal law. These policies shall be posted on the website pages of L+MH and as additionally required by applicable law. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-613(b), 19a-639(a)(5), (6) & (11); FF 26*
10. For three (3) years following the Closing Date, YNHHS shall provide written notice to OHCA of any modification, amendment or revision to the charity care, indigent care and community volunteer services policies of L+MH within thirty (30) days of such change. The notice of these changes shall be accompanied by copies of any revised policies and the notice and revised policies shall be posted on the website of L+MH simultaneously with their submission to OHCA. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-613(b), 19a-639(a)(5), (6) & (11); FF 26*
11. The Applicants shall maintain community benefit programs and community building activities for L+MH for three (3) years after the Closing Date consistent with L+MH's most recent Schedule H of IRS Form 990 or shall provide such other community benefit programs and community building activities that are at least as generous and benevolent to the community as L+MH's current programs, and the Applicants shall apply no less than a 1% increase per year for the next three (3) years toward the L+MH's community building activities in terms of dollars spent.

In determining L+MH's participation and investment in both community benefits and community building activities, the Applicants shall address the health needs identified by the applicable CHNA in effect at the time and the population health management objectives, including social determinants of health, contained in the related Implementation Strategy.

- a. On an annual basis, YNHHS shall identify the amounts and uses related to community benefits and community building and shall discuss how such investments and support are being applied toward the health needs identified in the CHNA and population health management objectives. Such reporting shall be filed within thirty (30) days of the anniversary date of the Closing for three years and shall be posted on L+MH's website. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-613(b), 19a-639(a)(5), (6) & (11); FF 19-20.*

12. The Applicants shall work toward making culturally and linguistically appropriate services available and integrated throughout L+MH's operations. Specifically, the Applicants shall ensure that L+MH shall take reasonable steps to provide meaningful access to each individual with limited English proficiency eligible to be served or likely to be encountered in its health programs and activities, in accordance with the implementing regulations of Section 1557 of the Patient Protection and Affordable Care Act. Additionally, the Applicants shall provide at L+MH, appropriate insurance navigator services for patients and, where appropriate, English as a second language and cultural competency training for employees. In complying with this Condition, the Applicants shall ensure that L+MH shall be guided by the National Standards for Culturally and Linguistically Appropriate Services in Health and Health Care published by the U.S. Department of Health and Human Services' Office of Minority Health. For three (3) years following the Closing Date, YNHHSO shall submit a written report on its activities directed at meeting this Condition. Such reporting shall be filed within thirty (30) days of the anniversary date of the Closing and shall be posted on L+MH's website. OHCA is imposing this Condition so as to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-613(b), 19a-639(a)(5),(6) & (11); FF 13-16*
13. The Applicants shall abide by all requirements of licensure that may be imposed by the Facility Licensing and Investigations Section ("FLIS") of the Department of Public Health ("DPH") in any Pre-Licensing Consent Order or similar agreement that FLIS may enter with these parties. OHCA is imposing this Condition to ensure that quality health care services are provided to the patient population. *Legal and Factual Basis: Stat. §§ 19a-490, 19a-493, 19a-639(a)(1),(2),(5) & (6); FF 48*
14. For three (3) years following the Closing Date, the Applicants shall allow for one (1) community representative to serve as voting members of L+MH's Board of Directors with rights and obligations consistent with other voting members under L+MH's Board of Director Bylaws. The Applicants shall select the community representative in a manner that ensures the appointment of an unbiased individual who will fairly represent the interests of the communities served by L+MH. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-613(b), 19a-639(a)(2),(3),(5),(7),(8),(11) & (12); FF 10-11*
15. Within sixty (60) days after the Closing Date, YNHHSO shall contract with an Independent Monitor who has experience in hospital administration and regulation. The Independent Monitor shall be retained at the sole expense of YNHHSO. Representatives of OHCA and FLIS will approve the Independent Monitor's appointment. The Independent Monitor shall be engaged for a minimum period of two (2) years following the Closing, which may be extended for another year at OHCA's and/or FLIS's discretion. The Independent Monitor will be responsible for monitoring the Applicants' compliance with the Conditions set forth in this Order. The Applicants shall provide the Independent Monitor with appropriate access to L+MH and its applicable records in order to enable the Independent Monitor to fulfill its functions hereunder. OHCA is imposing this Condition to ensure continued access to health care services for the patient

population and to verify and monitor compliance with the Conditions set forth herein.

Legal and Factual Basis: Conn. Gen. §§ Stat, 19a-613(b), 19a-639(a)(1),(2),(4),(5),(6),(7),(11) & (12); FF 48

16. The Independent Monitor will report to both OHCA and FLIS. The Independent Monitor shall conduct on-site visits of L+MH on no less than a semi-annual basis to assess adherence to DPH's Consent Order. The Independent Monitor shall furnish a written report of his or her assessment to OHCA and FLIS within thirty (30) days of the completion of each on-site review. YNHHSO will have the opportunity to review and provide written responses to the report. As OHCA deems necessary, the Independent Monitor shall meet with OHCA and FLIS personnel to discuss the written report and will perform additional periodic reviews. OHCA is imposing this Condition to ensure continued access to health care services for the patient population and to verify and monitor compliance with the Conditions set forth herein. *Legal and Factual Basis: Conn. Gen. §§ Stat. 19a-613(b), 19a-639(a)(1),(2),(4),(5),(6),(7),(11) & (12); FF 48*
17. For three (3) years following the Closing Date, the Applicants shall hold a meeting of the YNHHSO Board and L+M Board ("Joint Board Meetings") at least twice annually. Such Joint Board Meetings shall be followed by a meeting to which the public is invited in advance and at which the public is informed of L+MH's activities and afforded an opportunity to ask questions and make comments. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. 19a-613(b), 19a-639(a)(2),(3),(5),(7),(8),(11) & (12); FF 10-11*

Additional Conditions Agreed to by L+M and YNHHSO

Given the importance of this affiliation to Eastern Connecticut, both L+M and YNHHSO have voluntarily agreed to the following additional conditions for the purpose of representing its ongoing commitment to the provision of high quality affordable health care services in Eastern Connecticut. To the extent that any of these conditions are duplicative or vary from other conditions imposed herein, L+M and YNHHSO agree to consult with OHCA as needed for the purpose of ensuring that L+M and YNHHSO fulfill the spirit and intent of the entire order. The following are ways in which L+M and YNHHSO shall demonstrate these commitments for a period of not less than five years (except as otherwise noted) following the Closing of the affiliation of L+M with YNHHSO:

18. L+MH shall continue to maintain emergency room services, inpatient general medicine services, cardiology services (including emergency and elective PCI), inpatient obstetrics/gynecology services, inpatient behavioral health services, critical care unit services, and oncology services, which such services shall assure patient affordability and adhere to standards of care, quality, and accessibility and reflect local community need.
19. L+M and YNHHSO shall develop a strategic plan to focus on the retention and enhancement of healthcare services in the primary service area, i.e. towns served by L+M, which assures patient affordability and is consistent with appropriate standards of care, quality, and accessibility. Such plan shall seek to minimize travel for patients

requiring clinical services that can be provided appropriately at L+M service sites, and to support the return of patients back to L+M and its medical staff for care should patients be referred to other YNHHS affiliated facilities for specialized care not available locally. The strategic plan shall include but not be limited to the following components:

- a. L+M shall enhance access to primary care physician services in the Eastern Connecticut region by recruiting and retaining eight additional primary care providers and other providers required to respond to local community need, in accordance with the community needs assessment in paragraph 31 herein and shall accommodate improvements to delivery models including value based care during such period. L+M shall demonstrate annual progress toward achieving these goals.
- b. YNHHS and L+M shall abide by the resource commitments for clinical service programming as set forth in the Affiliation Agreement.

20. L+M and YNHHS shall maintain the current L+MH and Lawrence & Memorial Medical Group (LMMG) commercial health plan contracts in effect as of the Date of Closing for a period following the Date of Closing to December 31, 2017. Rates or scheduled increases in such previously negotiated rates that are in effect on the Date of Closing shall be maintained for a period ending December 31, 2017. Any L+M commercial health plan contracts that expire prior to December 31, 2017 shall be extended to December 31, 2017 and any contracts without expiration dates shall be continued under their current previously negotiated terms for a period from the Date of Closing to December 31, 2017. No increase in negotiated rate schedules shall be negotiated during the periods set forth in this paragraph.

Upon the expiration of any such L+M commercial health plan contracts after such period, L+M and YNHHS shall negotiate new rates based on L+M's post-Closing cost structure, taking into account any cost or price reductions, i.e. efficiencies, achieved as a result of the affiliation and in addition as set forth in paragraph 25 herein. YNHHS shall not impose a single System-wide rate and shall, for L+MH and LMMG, maintain a negotiated rate structure reflective of the market conditions applicable generally to hospitals and medical foundations in Eastern Connecticut.

For a period of five years from the Date of Closing in the case of L+MH, and twenty-eight months from the Date of Closing in the case of LMMG, any annual increase in the total price per unit of service (as defined below) for L+MH and LMMG shall be subject to a cap determined through the process set forth below. It is the intent of the parties that such cap shall serve as a cap for the purpose of assuring patient affordability for services delivered by L+MH and LMMG.

21. With respect to the proposed merger of LMMG and Northeast Medical Group (NEMG):

- a. LMMG and NEMG will integrate as of the Closing Date, and when NEMG is able to abide by the commitment set forth in paragraph 20 above, i.e. physicians providing services through NEMG to L + M patients, that were not providing services as of the Date of Closing, shall charge prices for services (site specific charges) based upon LMMG commercial health plan contracts and total price per unit of service, LMMG and NEMG shall implement the statutory merger contemplated in the Certificate of Need Application.
 - b. Physicians who are hired, recruited or contracted by a YNHHS affiliate to provide professional services (other than in a licensed hospital department) in the primary service area (which may from time to time change), currently the communities of East Lyme, Groton, Ledyard, Lyme, Montville, New London, North Stonington, Old Lyme, Preston, Salem, Stonington and Waterford, and in the following specialties shall be billed at the LMMG commercial health plan negotiated rates subject to the provisions of paragraph 20: family medicine; general medicine; internal medicine; obstetrics and gynecology; endocrinology; and psychiatry. Current LMMG physicians providing services in the primary service area as of the Date of Closing in any specialties shall be subject to the provisions of paragraph 20.
22. Within ninety days of the Date of Closing, YNHHS shall initiate a cost and market impact review which shall comply with Connecticut General Statute Section 19a-639f, which such analysis shall include and shall be utilized to establish the baseline cost structure set forth below:
- a. Establishing a baseline cost structure and total price per unit of service (the "baseline CMIR") and establishing a cap on annual increases in total price per unit of service (as defined below) for L+MH and LMMG (the "annual CMIR update"). YNHHS shall retain an independent consultant, subject to OHCA's approval, to conduct the baseline CMIR and the annual CMIR update and shall pay all costs associated with the cost and market review. To the extent that all data is not available to comply with the provisions of section 19a-639f the baseline CMIR shall be adjusted to reflect such information when it becomes available.
 - b. In conducting the baseline CMIR and annual CMIR update, the cost and market impact review shall analyze the factors relative to L+MH and LMMG in accordance with subsection (d) of section 19a-639f of the general statutes and the Eastern Connecticut market more specifically: (a) L+MH and LMMG's size and market share within their primary and secondary service areas; (b) L+MH's and LMMG's prices for units of service, including its relative price compared to other providers for the same services in Eastern Connecticut; (c) L+MH and LMMG cost and cost trends in comparison to total healthcare expenditures statewide; (d) the availability and accessibility of services similar to those provided by L+MH and LMMG in their primary and secondary service areas; (e) the role of L+MH and LMMG in serving at-risk, underserved and government payer populations, including those with behavioral, substance use disorder and mental health conditions, within their primary

and secondary service areas; (f) the role of L+MH and LMMG in providing low margin or negative margin services within their primary and secondary service areas; (g) general market conditions for hospitals and medical foundations in the state and in Eastern Connecticut in particular; and (h) and other conditions that the independent consultant determines to be relevant to ensuring that L+MH and LMMG prices do not exceed the market price for similar services in Eastern Connecticut.

- c. In recognition that the baseline CMIR pursuant to Connecticut General Statute Section 19a-639f shall be conducted after the Date of Closing, in the event that the baseline CMIR finds a likelihood of materially increased prices as a result of the L+M affiliation with YNHHS, notwithstanding these conditions, the Commissioner of Public Health (Commissioner) and YNHHS shall meet and confer for the purposes of determining further conditions as necessary to correct such condition and to create a performance improvement plan to address the conditions. The Commissioner shall determine whether YNHHS is in compliance with such performance improvement plan. Prior to the end of each fiscal year, the independent consultant shall conduct the annual CMIR update and use the results of such annual CMIR update to establish a cap on any increase in the price per unit of service for the upcoming fiscal year. Nothing herein shall prohibit the independent consultant from considering and recommending any recommendations of the Certificate of Need Task Force on cost containment measures or a cap on annual cost or price increases.
 - d. The independent consultant shall report to and take direction from the Commissioner. The independent consultant in establishing the cap shall take into consideration the cost reductions reflective of the efficiencies resulting from the affiliation and the annual cost of living of the primary service area or the Eastern Connecticut area.
 - e. The independent consultant shall provide the baseline CMIR and the annual CMIR update to OHCA within thirty days of completion. OHCA shall keep confidential all nonpublic information and documents obtained as part of the baseline CMIR and the annual CMIR update and shall not disclose the information or documents to any person without the consent of YNHHS and L+M, unless required to do by law. The confidential information and documents shall not be public records and shall be exempt from disclosure under Connecticut General Statute Section 1-210.
23. For purposes of determining the price per unit of service:
- a. A "unit of service" for inpatient hospital services shall be a case categorized by an ICD-9-DM/ICD-10-DM diagnosis code or a Diagnosis-Related Group (DRG) code and identified by the Connecticut Department of Insurance pursuant to P.A. 15-146 Section 2 as among the fifty most frequently occurring acute care hospital inpatient primary diagnoses, the fifty most frequently provided acute care hospital inpatient

- principal procedures, and the twenty-five most frequent inpatient surgical procedures.
- b. A “unit of service” for outpatient hospital services shall be a procedure or service categorized by a Current Procedural Terminology (CPT) or Healthcare Common Procedure Coding (HCPC) code and identified by the Connecticut Department of Insurance pursuant to P.A. 15-146 Section 2 as among the fifty most frequently provided outpatient procedures, the twenty-five most frequent outpatient surgical procedures and the twenty-five most frequent imaging procedures performed in the state.
 - c. A “unit of service” for physician services shall be a work Relative Value Unit (wRVU).
 - d. The baseline to be established as of the Date of Closing for L+M’s total price per unit of service for physician services and inpatient and outpatient hospital services is inclusive of all administrative overhead, other ancillary fees including, but not limited to facility fees and the total price per unit shall reflect the total price of such service.
 - e. All administrative costs for overhead, ancillary fees, facility fees or any other fees which are reflected in the total price per unit shall be determined by the independent consultant to be within any annual cap established.
24. L+M and YNHHS shall not convert any L+M physician offices (including those that will be merged into NEMG) to hospital-based status.
25. L+M shall attain cost savings as a result of the affiliation with YNHHS as described in the CON application.
26. As described in the Affiliation Agreement, YNHHS is committed to maintaining local governance at L+M. The L+M Board of Directors shall continue as a fiduciary board composed of a majority of members who reside in the communities served by L+M with the only change in composition being the addition of the President/CEO of YNHHS (or his or her designee) serving as an ex-officio member. Each director of the L+M Board of Directors shall have an equal vote. The L+M Board shall be empowered and supported to oversee local performance and to create and sustain connections with the community. Subject to certain reserved powers for YNHHS, the L+M Board of Directors will have the right to approve any major new programs and clinical services, or the discontinuation or consolidation of any such programs.
27. L+M shall continue to recognize all collective bargaining units currently organized at an L+M affiliate, and honor the collective bargaining agreements currently in place.
28. Employees of any L+M affiliate shall not be required to reapply for their positions as a result of the affiliation. To the extent that any L+M employees leave their employment at

L+M service sites within ninety days following the Closing Date and obtain employment with a YNHHS affiliate, such employees' seniority shall be preserved (e.g., eligibility for benefits consistent with total years of service).

29. L+MH shall maintain its current wage and salary structures for its non-bargaining or non-represented employees based on hospitals of similar scope, size and market conditions in Connecticut.
30. L+M and YNHHS shall use their best efforts to achieve efficiencies through the management of vacancies and attrition and to minimize the elimination of individuals' jobs.
31. L+M and YNHHS have agreed to maintain at least the same level of community benefit consistent with L+M's most recent Schedule H of IRS Form 990 and its Community Health Needs Assessment (CHNA). L+M and YNHHS agree to conduct an updated Community Health Needs Assessment by no later than December 31, 2016, and provide services in accordance with implementation plan adopted as part of the updated CHNA process and provide OHCA with its updated CHNA within thirty days of its approval.
32. Every six months (the "six month reports") until December 1, 2018 and each year thereafter (each an "annual report"), YNHHS shall submit notarized reports to OHCA for the periods of January to June (due July 31st) and July through December (due January 31st) certifying the achievement of each and every commitment described herein, including without limiting the foregoing the following specific detail:
 - a. Affirmation of the continuation of all L+MH services as described herein.
 - b. A narrative description of the achievement of the strategic plan components to retain and enhance healthcare services in the communities served by L+M, including with respect to physician recruitment and resource commitments for clinical service programming, whether the commitments described in the Affiliation Agreement were achieved, as well as the purposes, dates and amounts for which expenditures were made.
 - c. Affirmation that L+MH and LMMG commercial health plan contracts in place as of the Date of Closing are/were maintained through the remainder of their terms, and that any new contracts are consistent with the commitments of paragraphs (20), (21) and (22) above.
 - d. Affirmation that no L+M physician office has been converted to hospital-based status.

- e. Affirmation that L+M has adopted the YNHHC Financial Assistance Program Policies currently in effect as of the date hereof, and that such Policies, if amended, provide assistance to patients that is at least as generous as the YNHHC Financial Assistance Program Policies currently in effect as of the date hereof.
- f. A detailed and comprehensive document showing a five-year plan (the “plan”) to generate and achieve efficiencies for L+M resulting from non-clinical shared services opportunities, L+M’s integration with and adoption of YNHHC information technology systems and platforms, YNHHC’s supply chain management services, integration of clinical and business practices across LMMG and NEMG, L+M’s reduced cost of capital, and L+M’s participation in YNHHC population health initiatives. Subsequent to submission of the plan in its six month report, YNHHC shall include the following additional information in its annual report.
 - i. Narrative updates on the progress of implementation of the plan. These updates shall include the status of integration activities and adoption by L+MH and L+M of YNHHC non-clinical shared services opportunities;
 - ii. A report identifying L+M and L+MH cost saving totals since the Closing Date for the following Operating Expense Categories: Salaries and Wages, Fringe Benefits, Contractual Labor Fees, Medical Supplies and Pharmaceutical Costs, Depreciation and Amortization, Bad Debts, Interest Expense, Malpractice Expense, Utilities, Business Expenses and Other Operating Expenses. The categories shall be consistent with the major operating expense categories (Categories A,B,C,D,E,F,G,H,I,J, and K) that are in use at the time of reporting in the OHCA Hospital Reporting System (“HRS”) Report 175 or successor report. YNHHC shall also file a narrative describing the specifics of the cost savings for each of these major expense categories;
 - iii. A completed Balance Sheet, Statement of Operations, Statement of Cash Flow for L+MH, L+M and LMMG (or of NEMG in the event of an NEMG-LMMG merger). For L+MH, the format shall be consistent with that which is in use at the time of reporting in OHCA’s HRS Report 100 and Report 150 or successor reports; and
 - iv. For L+MH, a completed Hospital Operating Expenses by Expense Category and Department report. The format shall be consistent with that which is in use at the time of reporting in OHCA’s HRS Report 175 or successor report.
- g. Affirmation of the labor and employment commitments described herein, including but not limited to L+M’s service sites continued honoring of collective bargaining agreements in place as of the date hereof.

- h. A narrative description of L+M's community benefit commitments described herein, including without limitation the amounts spent and a description of such spending to support and invest in the communities that L+M serves.

33. In addition to the above, L+M and YNHHSO make the following commitment for a period of five years post-Closing:

- a. L+M and YNHHSO shall appoint an independent monitor at their own cost (selected by YNHHSO and L+M and approved by OHCA) to serve as a post-transfer compliance monitor.
- b. Such monitor shall, at a minimum meet with representatives of the L+M community at six months after the Date of Closing and annually and shall report to OHCA in accordance with Section 19a-639(e) of the general statutes and specifically address: (i) L+M's compliance with the Certificate of Need Order; and (ii) the level of community benefits and uncompensated care provided by L+M during the prior period.
- c. L+M shall provide the monitor with reasonable access to its public filings and facilities and all other financial information necessary for the purposes of carrying out the monitor's duties.
- d. L+M shall hold a public forum in New London at six months after the Date of Closing and not less than annually thereafter during the monitoring period to provide for public review and comment on the monitor's reports and findings.
- e. If the Independent Monitor determines that YNHHSO and L+M are substantially out of compliance with the conditions to the CON, the monitor shall notify YNHHSO and L+M in writing regarding the deficiency. Within two weeks of such notice, the monitor shall convene a meeting with representatives from YNHHSO and L+M for the purpose of determining compliance and any appropriate corrective action plan. If YNHHSO and L+M fail to implement a plan of correction satisfactory to the monitor within thirty days of such meeting, the monitor shall report such substantial noncompliance and its impact on health care costs and accessibility to OHCA. OHCA shall determine whether such non-compliance has had a material negative impact and what remedy is reasonably necessary to bring YNHHSO and L + M into compliance and shall have the right to enforce these conditions by all means and remedies available to it under law and equity, including but not limited to Conn. Gen. Stat. 19a-642 and the right to impose and collect a civil penalty under Conn. Gen. Stat. 19a-653. In addition, in the event OHCA determines YNHHSO and L+M are in material non-compliance, OHCA may order YNHHSO and L+M to provide

additional community benefits as necessary to mitigate the impact of such non-compliance.

Dear Ms. Martone,

Pursuant to the Order contained within the Agreed Settlement of Docket Number 15-32033-CON, "Transfer of ownership of Lawrence + Memorial Corporation to Yale New Haven Health Services Corporation", Condition 1 and Condition 2 are required to be submitted within twenty (20) days following the Closing Date of this transaction. The Closing Date was September 8th.

Attached please find documents responsive to Conditions as 1 and 2. Condition 1 is being posted on L+MH's website immediately.

A copy of these documents will be sent via U.S. postal service.

Regards,

Nancy Levitt Rosenthal
Vice President, Strategy and Regulatory Planning

Re: **Limited Disclosures Pursuant to Affiliation Agreement by and between Yale-New Haven Health Services Corporation and Lawrence + Memorial Corporation**

Ladies and Gentlemen:

Reference is made to the Affiliation Agreement, dated as of July 17, 2015 (the “Effective Date”), by and between Yale-New Haven Health Services Corporation (“YNHHSC”) and Lawrence + Memorial Corporation (“L+M”), as amended to the date hereof (the “Affiliation Agreement”). All capitalized terms used, but not defined, herein shall have the meaning ascribed to such terms in the Affiliation Agreement.

YNHHSC and L+M agree and confirm that YNHHSC has made certain limited disclosures for purposes of Article 4 of the Affiliation Agreement. More specifically, although Section 4.1.1 of the Affiliation Agreement indicates that YNHHSC has provided or made available to L+M the governing documents of all YNHHSC Affiliates, governing documents have been provided only for certain key YNHHSC Affiliates. In addition, Section 4.9.1 of the Affiliation Agreement indicates that to the Knowledge of YNHHSC, the YNHHSC Affiliates have not had any breach of information security that would constitute (i) a “security incident” (as defined in 45 CFR § 164.304) that resulted in material and actual unauthorized access, use, disclosure, modification or destruction of Protected Health Information or (ii) a “breach” under Section 13402 of the American Recovery and Reinvestment Act of 2009 and any regulations promulgated thereunder or state information security laws or regulations that require notification to or of government officials, or to individuals whose information may have been breached, the YNHHSC Affiliates have only disclosed (i) such breaches that are not routine and (ii) such breaches in connection with which no YNHHSC Affiliate could reasonably expect to have material liability. Finally, although Section 4.10.7 of the Affiliation Agreement indicates that YNHHSC has provided or made available to L+M copies of the letters and/or rulings from the IRS which recognize that the YNHHSC Obligated Group Members are Tax-Exempt Organizations exempt from United States federal income taxes under Section 501(a) of the Code as organizations described in Section 501(c)(3) of the Code and not as “private foundations” as such term is defined in Section 509 of the Code, such determinations have not been provided.

YNHHSC and L+M agree that the disclosures made under Sections 4.1.1, 4.9.1 and 4.10.7 of the Affiliation Agreement are sufficient and L+M waives any closing condition or other requirement for YNHHSC to make any additional disclosure under such sections. To the best Knowledge of YNHHSC, the effect of the information not disclosed, provided or made available to L+M as described above, would not, individually or in the aggregate, be reasonably expected to have a YNHHSC Material Adverse Effect.

Re: Schedule Supplement Pursuant to Affiliation Agreement by and between Yale-New Haven Health Services Corporation and Lawrence + Memorial Corporation

Ladies and Gentlemen:

Reference is made to the Affiliation Agreement, dated as of July 17, 2015 (the “Effective Date”), by and between Yale-New Haven Health Services Corporation (“YNHHSC”) and Lawrence + Memorial Corporation (“L+M”), as amended to the date hereof (the “Affiliation Agreement”). All capitalized terms used, but not defined, herein shall have the meaning ascribed to such terms in the Affiliation Agreement.

Pursuant to Section 5.3 of the Affiliation Agreement, YNHHSC hereby delivers to L+M this update to the YNHHSC Disclosure Schedule delivered as of the Effective Date. This Schedule Supplement includes (x) information that has first arisen or of which YNHHSC has first obtained Knowledge after the Effective Date and that if it existed on the Effective Date would have been required to be reflected on the Disclosure Schedules and (y) information that is necessary to correct any disclosure schedule or representation or warranty and that has first arisen or of which YNHHSC has first obtained Knowledge after the Effective Date. This Schedule Supplement shall be deemed to be incorporated into and to supplement and amend the YNHHSC Disclosure Schedule as of the Closing.

Section and sub-section numbers and letters used in the schedules to this letter correspond to the section and sub-section numbers and letters in the Affiliation Agreement, unless otherwise noted. The captions of each section in the schedules to this letter are included for convenience only and are not intended to limit the scope of the information required to be specifically disclosed.

No disclosure made herein or in the schedules to this letter constitutes an admission of any liability or obligation of any YNHHSC Affiliate, an admission against any interest of any YNHHSC Affiliate or a concession as to any defense available to any YNHHSC Affiliate. Unless the Affiliation Agreement specifically provides otherwise, the disclosure of specific item herein, shall not be deemed to constitute an admission that such item is not in the ordinary course of business. To the extent that any representation or warranty contained in the Affiliation Agreement is limited or qualified by the materiality of the matters to which the representation or warranty is given, the inclusion of any matter in any Schedule does not constitute an admission that such matters are material or will have a YNHHSC Material Adverse Effect. Certain information set forth herein is included solely for informational purposes and may not be required to be disclosed pursuant to the Affiliation Agreement.

If there is any inconsistency between any provision or statement in the Affiliation Agreement and any provision or statement in the schedules (other than an exception in any section or subsection to a specific representation or warranty), then the provision or statement in the Affiliation Agreement shall control.

Sincerely,

Yale-New Haven Health Services Corporation

Updated Schedule 4.1.1 – YNHHS Subsidaries

Yale New Haven Health System

Last Updated: 01/22/16

- NOTES:**
1. Yale University is an equal member (with Yale-New Haven Health Services Corporation) in the New Clinical Program Development Corporation.
 2. Yale-New Haven Medical Center, Inc. is a non-membership corporation.
 3. Non-membership corporation with 50/50 board representation between Yale-New Haven Hospital and Yale University School of Medicine.
 4. Partnership between YNH (95%) and Saint Francis Hospital and Medical Center (SFHMC)(5%) related to the joint operation of SFHMC's outpatient medical oncology and hematology program located at SFHMC's main campus.
 5. Joint Venture between Yale-New Haven Ambulatory Services Corporation (91%) and CCC Endoscopy, LLC (40%), (Endoscopy Surgery Center, LLC (91%) and Shoreline Physician Holding Company, LLC (91%) (SSC I, LLC).
 6. Joint Venture between Yale-New Haven Ambulatory Services Corporation (49.9%) and Century Physical Services, Inc. Another 47.6% is owned by Bridgeport Hospital. The remaining stock is held by other hospitals.
 7. 47.6% of the stock of Century Physical Services, Inc. is owned by York Enterprises, Inc. under IRC Section 807(a)(2).
 8. A call option for the stock of Century Physical Services, Inc. is held by Bridgeport Hospital.
 9. Joint Venture between Northshore - LU (98%) and Yale New Haven Health Services Corporation (10%).
 10. Joint Venture between St. Francis Healthcare Partners, Inc. (SFHP) and Yale-New Haven Health Services Corporation (YNH) (HS) – 60% YNH (HS) and 40% SFHP.
 11. Joint Venture between CVM Body Design Center – Stamford, LLC (65%) and Greenwich Hospital (15%).
 12. Joint Venture between Bridgeport Hospital (40%) with the remainder (60%) held by physicians and a management company.
 13. Yale-New Haven Community Medical Group, Inc. is also a member of YNH-Physicians Corp.
 14. Joint Venture between Yale-New Haven Ambulatory Services Corporation (49.9%) and Renal Research Institute, LLC (99.1%).

Update to Schedule 4.8

Subsequent Events

The following language is added to the end of Paragraph 1 of Schedule 4.8:

The budgets for fiscal years 2016 and 2017 have been finalized, and under the final budgets we estimate that YNHHSC will incur a net tax of \$149.2M, or 38.1% of the total tax liability for the State, in 2016, and a net tax of \$158.7M, or 36.2% of the total tax liability for the State, in 2017.

Updates to Schedule 4.27

Consents and Approvals

The following paragraph is added as Paragraph 10 to Schedule 4.27:

The Parties were required to and did submit a Notice of Hospital Affiliation to the Connecticut Attorney General pursuant to Conn. Gen. Stat. § 19a-486i(e).

The following paragraph is added as Paragraph 11 to Schedule 4.27:

As part of the Hospital Conversion Act approval in Rhode Island, YNHHSC and L+M must pursue a separate *cy pres* action relating to the charitable assets of the Westerly Hospital Foundation, but *cy pres* relief need not be obtained prior to Closing.

Re: Limited Disclosures and Certain Waivers Pursuant to Affiliation Agreement By and Between Yale-New Haven Health Services Corporation and Lawrence + Memorial Corporation

Ladies and Gentlemen:

Reference is made to the Affiliation Agreement, dated as of July 17, 2015 (the "Effective Date"), by and between Yale-New Haven Health Services Corporation ("YNHHSC") and Lawrence + Memorial Corporation ("L+M"), as amended to the date hereof (the "Affiliation Agreement"). All capitalized terms used, but not defined, herein shall have the meaning ascribed to such terms in the Affiliation Agreement.

Article 3

L+M and YNHHSC agree and confirm that L+M has made certain limited representations and disclosures for purposes of Article 3 of the Affiliation Agreement. More specifically, although:

1. Section 3.5.1 of the Affiliation Agreement indicates that L+M has provided to YNHHSC a copy of current title reports relating to the Principal Properties, such title reports have been provided only as of the Effective Date,
2. Section 3.9.1 of the Affiliation Agreement indicates that to the Knowledge of L+M, the L+M Affiliates have not had any breach of information security that would constitute (i) a "security incident" (as defined in 45 CFR § 164.304) that resulted in material and actual unauthorized access, use, disclosure, modification or destruction of Protected Health Information or (ii) a "breach" under Section 13402 of the American Recovery and Reinvestment Act of 2009 and any regulations promulgated thereunder or state information security laws or regulations that require notification to or of government officials, or to individuals whose information may have been breached, the L+M Affiliates have only disclosed (i) such breaches that are not routine and (2) such breaches in connection with which no L+M Affiliate could reasonably expect to have material liability,
3. Section 3.9.1 of the Affiliation indicates that L+M has provided to YNHHSC copies of any voluntary self-disclosure filing made with CMS or any other Governmental Authority and a description of the status of each such self-disclosure filing, L+M has only provided a description of the status of each such self-disclosure filing and offered to YNHHSC a copy of each such self-disclosure filing,
4. Section 3.9.6 of the Affiliation Agreement indicates that L+M has provided to YNHHSC copies of certain Contracts as of the Closing Date, copies of such Contracts have been provided only as of the Effective Date,
5. Section 3.19 of the Affiliation Agreement indicates that L+M has provided or made available to YNHHSC a correct and complete copy of (a) the minute books of the L+M Affiliates and (b) the minutes maintained by the L+M Affiliates quality assurance committees since October 1, 2011,

each subject to the qualifications set forth in Section 3.19 of the Affiliation Agreement, L+M has only provided such minutes through the Effective Date, and

6. Schedule 3.27 L+M previously disclosed to YNHHSC on Schedule 3.27 to the Affiliation Agreement that the appointment of YNHHSC as the ultimate parent of LMI may require approval of the Cayman Island Monetary Authority under Section 12 of the Cayman Island Insurance Law. The approval process with the Cayman Island Monetary Authority is currently underway, but such approval may not be received prior to the Closing. YNHHSC hereby acknowledges and confirms that it is aware that the approval of the Cayman Island Monetary has not yet been received. If approval is not received prior to the Closing, L+M will use commercially reasonable efforts to obtain the required approval as soon as practicable after the Closing.
7. Section 3.34 of the Affiliation Agreement indicates that, except as specifically disclosed to YNHHSC, none of the L+M Affiliates has material Liabilities or material obligations of any nature, as more specifically set forth in Section 3.34 of the Affiliation Agreement, arising out of, or relating to, the business operations of L+M Affiliates and which are required to be reflected on a balance sheet prepared in accordance with GAAP, except: (a) liabilities or obligations as and to the extent reflected on or accrued or reserved against as set forth in the L+M 2014 Audited Financial Statements; and (ii) liabilities incurred since the date of the L+M 2014 Audited Financial Statements in the ordinary course of business, L+M is making this representation based upon its 2015 audited financial statements, which have previously been provided by L+M to YNHHSC, rather than the L+M 2014 Audited Financial Statements.

L+M and YNHHSC agree that the disclosures and representations and warranties made under Sections 3.5.1, 3.9.1, 3.9.6, 3.19 and 3.34 of the Affiliation Agreement are sufficient and YNHHSC waives any closing condition or other requirement for L+M to make any additional representations or disclosures under such sections.

Article 5

Pursuant to Section 5.1.9(a) of the Affiliation Agreement, L+M is required to engage a qualified environmental consultant and to conduct an operational compliance self-audit of the operations of LMH, LMW, LMMG and VNA of Southeastern Connecticut with respect to Environmental, Health and Safety Requirements (an “Environmental Self-Audit”) and to complete a written report of such self-audit prior to the Closing Date. As of the Closing Date, L+M has completed an Environmental Self-Audit of and delivered the corresponding written report to YNHHSC with respect to the Owned Real Property, but has not completed an Environmental Self-Audit of any leased real properties of LMH, LMW, LMMG or VNA of Southeastern Connecticut that are leased by LMH, LMW, LMMG or VNA of Southeastern Connecticut as of the Effective Date (collectively, the “Leased Properties”). L+M hereby agrees to complete an Environmental Self-Audit of the Leased Properties and to deliver the corresponding written report to YNHHSC with respect thereto within a reasonable time period following the Closing Date.

YNHHSC hereby agrees to waive the requirement that L+M complete an Environmental Self-Audit under Section 5.1.9(a) of the Affiliation Agreement with respect to the Leased Properties prior to the Closing Date; provided, that, L+M complete such Environmental Self-Audit of each Leased Property and deliver the corresponding written report to YNHHSC with respect thereto within a reasonable time period following the Closing Date.

To the best Knowledge of L+M, the effect of the information not disclosed, provided or made available to YNHHSC as described above, would not, individually or in the aggregate, be reasonably expected to have an L+M Material Adverse Effect.

Sincerely,

Lawrence + Memorial Corporation

**Re: Schedule Supplement Pursuant to Affiliation Agreement By and Between
Yale-New Haven Health Services Corporation and Lawrence + Memorial
Corporation**

Ladies and Gentlemen:

Reference is made to the Affiliation Agreement (the "Affiliation Agreement"), dated as July 17, 2015, by and between Yale-New Haven Health Services Corporation ("YNHHSC") and Lawrence + Memorial Corporation ("L+M"). All capitalized terms used, but not defined, herein shall have the meaning ascribed to such terms in the Affiliation Agreement.

Pursuant to Section 5.3 of the Affiliation Agreement, L+M hereby delivers to YNHHSC this update to the L+M Schedules to the Affiliation Agreement (the "L+M Disclosure Schedule") delivered as of the Effective Date. This letter (the "Schedule Supplement") includes (x) information that has first arisen or of which L+M has first obtained Knowledge after the Effective Date and that if it existed on the Effective Date would have been required to be reflected on the Disclosure Schedules and (y) information that is necessary to correct any disclosure schedule or representation or warranty and that has first arisen or of which L+M has first obtained Knowledge after the Effective Date. This Schedule Supplement shall be deemed to be incorporated into and to supplement and amend the L+M Disclosure Schedule as of the Closing.

Section and sub-section numbers and letters used in the attached Schedule Supplement correspond to the section and sub-section numbers and letters in the Affiliation Agreement, unless otherwise noted, and any information disclosed in in the attached Schedule Supplement shall be deemed to be disclosed to YNHHSC for all purposes of the Affiliation Agreement so long as such disclosure's relevance to the applicable section(s) of the Affiliation Agreement is reasonably apparent on its face. The captions of each section in the Schedule Supplement are included for convenience only and are not intended to limit the scope of such part, paragraph or section of the Schedule Supplement as set forth in the Affiliation Agreement.

No disclosure made herein or in the Schedule Supplement constitutes an admission of any liability or obligation of any L+M Affiliate, an admission against any interest of any L+M

Affiliate or a concession as to any defense available to any L+M Affiliate. Unless the Affiliation Agreement specifically provides otherwise, the disclosure of specific item herein, shall not be deemed to constitute an admission that such item is not in the ordinary course of business. To the extent that any representation or warranty contained in the Affiliation Agreement is limited or qualified by the materiality of the matters to which the representation or warranty is given, the inclusion of any matter in the Schedule Supplement does not constitute an admission that such matters are material or will have a L+M Material Adverse Effect. Certain information set forth herein is included solely for informational purposes and may not be required to be disclosed pursuant to the Affiliation Agreement.

If there is any inconsistency between any provision or statement in the Affiliation Agreement and any provision or statement in the Schedule Supplement (other than an exception in any section or subsection to a specific representation or warranty), then the provision or statement in the Affiliation Agreement shall control.

L+M	230 Waterford Parkway South (land)	Waterford	CT
LMH	230 Waterford Parkway South (building)	Waterford	CT

*The fee interest in the land on which the Pequot Property is situated is not owned by an L+M Affiliate, but is leased by LMH from the City of Groton, CT, pursuant to a Ground Lease, dated May 1, 1991.

^LMH owns a 7/8 interest in the Beach Property (a beach located in New London, CT for the use of L+M employees and their families). The remaining 1/8 interest in the Beach Property is held by Bank of America, in trust, on behalf of the Elizabeth Stamm Estate.

The following properties are currently on the market: 11 Wells Street Unit 6, Westerly, RI and One Huntley Road, Old Lyme, CT (offer to purchase has been received).

Update to Schedule 3.8

Subsequent Events

Schedule 3.8 is hereby amended as follows:

(b)

The description of the Integrated Leave Program is hereby amended and restated in its entirety as follows:

“Integrated Leave Program - Effective April 1, 2015, LMH adopted a new integrated leave program for Directors and Managers and Vice Presidents that are paid biweekly (impacting 120 employees), which includes LMH paid short term disability (self-insured) and long term disability (fully insured) insurance through Unum (Policy No. 468882 001). The plan also moves affected employees to an “All Time” bank for days off rather than Separate Paid Time Off (“PTO”) and Sick banks and provides for a 2015 PTO cash out of up to 5 days (with 15 days permitted to be kept in the PTO bank) and eliminates Sick day cash out for new employees (current employees may maintain up to 100 days in frozen Sick bank until used for short term disability paid at 75% and L+M has promised to pay each applicable employee for any hours in excess of 800 in their respective Sick banks at such employee’s current base rate (up to \$10,000). No PTO cash out will be permitted in 2016 and employees will be permitted to roll over 10 PTO days per year on a going forward basis.”

The following is hereby added to subsection (b):

The L+M Affiliates have agreed to pay retention bonuses to certain select individuals in connection with the consummation of the transactions contemplated by the Affiliation Agreement and/or the go-live of Epic Connect.

(d)

The following items are hereby added to subsection (d):

(1) LMH has purchased an HVAC for the 600 Building for a purchase price of \$1,135,743.

(2) LMW has purchased an HVAC for its operating room for a purchase price of \$1,840,000.

(l)

The following item is hereby added to subsection (l):

(1) In 2015 the primary layer of insurance maintained by or for LMI was exhausted, but no excess layers of such insurance were exhausted.

Update to Schedule 3.10.6

Real Property Certiorari Proceedings

Schedule 3.10.6 is hereby amended and restated in its entirety as follows:

Along with Yale-New Haven Hospital, Bridgeport Hospital, Greenwich Hospital, the Connecticut Hospital Association and a number of other Connecticut hospitals, L+M have challenged the constitutionality of the Hospitals Tax with the State of Connecticut Department of Social Services and Department of Revenue Services.

Update to Schedule 3.13

Transactions with Affiliates

Schedule 3.13 is hereby amended as follows:

(1) Number (5) is hereby deleted in its entirety and replaced with the following:

(5) Medical Office Lease, effective August 1, 2015, by and between The New London Medical Arts Group, LLC and L+M. The New London Medical Arts Group, LLC is partially owned by Ross J. Sanfilippo, D.M.D., a member of the L+M Board of Directors.

(2) Number (9) is hereby deleted in its entirety.

(3) Number (13) is hereby deleted in its entirety and replaced with the following:

(13) Letter Agreement, dated January 1, 2016, between David F. Reisfeld, MD and LMH (for Dr. Reisfeld's services of LMH Medical Staff Immediate Past President).

(4) The following items are hereby added to Schedule 3.13:

(1) Intensivist Medical Director Agreement, dated as of January 1, 2009, by and between LMH, Southeastern Pulmonary Associates, P.C., Gold Coast Pulmonary and Sleep and Shoreline Pulmonary Associates (owned all, or in part, by Niall J. Duhig, MD, a member of the LMH Board of Directors), as amended by First Amendment to the Intensivist Medical Director Agreement, dated as of January 1, 2014, by and between LMH, Southeastern Pulmonary Associates, P.C., Gold Coast Pulmonary and Sleep, Shoreline Pulmonary Associates and IPC Hospitalists of New England, P.C. d/b/a IPC of Connecticut.

(2) Exclusive Services Agreement, dated as of May 2, 2008, by and between LMH and Anesthesia Associates of New London, P.C. (owned in part by Dr. Joseph Cecere, a member of the LMH Board of Directors), as amended by Amendment to Exclusive Services Agreement, dated as of December 28, 2009, Amendment to Exclusive Services Agreement, dated as of February 1, 2014, and Amendment to Exclusive Services Agreement, dated as of August 1, 2016, and as supplemented by the Letter of Understanding, dated as of December 10, 2010.

Update to Schedule 3.16.1

Collective Bargaining Matters

Schedule 3.16.1 is hereby amended and restated in its entirety as follows:

(1) Agreement by and between LMH and AFT-CT, AFT Healthcare, AFL-CIO Local 5049 (“Local 5049”), entered into as of March 9, 2016, including that certain Memorandum of Understanding between LMH and Local 5049, dated as of July 15, 2015, and including that certain Memorandum of Agreement by and among LMH, Local 5051, Local 5049 and Local 5123, dated as of June 20, 2016.

(2) Agreement by and between LMH and AFT-CT, AFT Healthcare, AFL-CIO Local 5051 (“Local 5051”), entered into as of March 9, 2016, including certain Memorandum of Understanding by and between LMH and Local 5051, dated as of September 15, 2015, and that certain Memorandum of Agreement between LMH and Local 5051, dated as of April 6, 2016, and also including that certain Memorandum of Agreement by and among LMH, Local 5051, Local 5049 and Local 5123, dated as of June 20, 2016.

(3) Agreement by and between LMH and Lawrence & Memorial Healthcare Workers Union, Local 5123 (“Local 5123”), AFT-CT, AFT, AFL-CIO, entered into as of March 9, 2016, including certain Memorandum of Agreement by and between LMH and Local 5123, dated as of November 19, 2015, March 24, 2016 and July 22, 2016, and also including that certain Memorandum of Agreement by and among LMH, Local 5051, Local 5049 and Local 5123, dated as of June 20, 2016.

(4) Agreement by and between LMH and International Union, Security, Police and Fire Professionals of America, dated as of February 4, 2015, including that certain Memorandum of Understanding between LMH and International Union, Security, Police and Fire Professionals of America, dated as of April 1, 2016.

(5) Agreement by and between LMW and The Westerly United Nurses and Allied Professionals, Local 5104 (“Local 5104”), dated as of July 1, 2014, including that certain Memorandum of Agreement by and between LMW and Local 5104, dated as of June 28, 2016, and also including certain Memorandum of Agreement by and between LMH and Local 5075 and 5104, undated and dated as of June 28, 2016, June 28, 2016, July 27, 2016, August 27, 2016.

(6) Agreement by and between LMW and the Westerly United Nurses and Allied Professionals, Local 5075 (“Local 5075”), dated as of July 1, 2014, including certain Memoranda of Understanding by and between LMW and Local 5075, undated and dated as of January 15, 1991, May 8, 1992, April 27, 1994, February 15, 2001, October 1, 2015, November 17, 2015, February 12, 2016, February 15, 2016, May 12, 2016, June 3, 2016 and August 1, 2016, and also including certain Memorandum of Agreement by and between LMW and Locals 5075 and 5104, undated and dated as of June 28, 2016, June 28, 2016, July 27, 2016, August 27, 2016.

(7) Collective Bargaining Agreement by and between Visiting Nurse Association of Southeastern Connecticut, Inc. and the Visiting Nurses Association of Southeastern Connecticut Federation of Registered Nurses and Home Health Aides, Local 5119 (“Local 5119”), AFT-CT, AFT, AFL-CIO, dated as of October 1, 2014, including that certain Memorandum of Understanding by and between Local 5119 and Visiting Nurse Association of Southeastern Connecticut, Inc., dated as of August 2, 2016 (RNs).

(8) Collective Bargaining Agreement by and between Visiting Nurse Association of Southeastern Connecticut, Inc. and the Visiting Nurse Association of Southeastern Connecticut Federation of

Registered Nurses and Home Health Aides, Local 5119, AFT-CT, AFT, AFL-CIO, dated as of October 1, 2014, including that certain Memorandum of Understanding by and between Local 5119 and Visiting Nurse Association of Southeastern Connecticut, Inc., dated as of August 2, 2016 (Home Health Aides).

(9) The National Labor Relations Board scheduled a union election at the Medical Office Building location of LMMG on November 25, 2014. The union, AFT-Connecticut, was seeking to represent LPNs, medical assistants, patient coordinators, patient care navigators and surgical schedulers. The election resulted in a no vote for AFT-Connecticut representation.

Update to Schedule 3.17.1

**FIRST AMENDMENT TO THE
AFFILIATION AGREEMENT BY AND BETWEEN
YALE-NEW HAVEN HEALTH SERVICES CORPORATION
AND
LAWRENCE + MEMORIAL CORPORATION**

This First Amendment to the Affiliation Agreement by and between Yale-New Haven Health Services Corporation and Lawrence & Memorial Corporation (this “First Amendment”) is made and entered into as of September 8, 2016, by and between Yale-New Haven Health Services Corporation (“YNHHSC”) and Lawrence + Memorial Corporation (“L+M”).

RECITALS

WHEREAS, YNHHSC and L+M entered into an Affiliation Agreement dated as of July 17, 2015 (the “Affiliation Agreement”);

WHEREAS, initially capitalized terms that are used in this First Amendment without other definition have the respective meanings ascribed thereto in the Affiliation Agreement;

WHEREAS, at the time the Parties entered into the Affiliation Agreement, the Parties set forth certain intentions with respect to the merger (the “Merger”) of L+M Physician Association, Inc., a Connecticut non-stock medical foundation doing business as L+M Medical Group (“LMMG”) and Northeast Medical Group Inc., a Connecticut non-stock medical foundation (“NEMG”), which Merger was contemplated to take place as of the Closing Date and as a condition of Closing pursuant to the Affiliation Agreement;

WHEREAS, the Parties wish to proceed to the Closing without effecting the Merger, but instead to effect the Merger at a date subsequent to the Closing to be agreed upon by YNHHSC and L+M (the “Post Closing Merger Effective Date”); and

WHEREAS, to facilitate the Closing, the Parties wish to amend the Affiliation Agreement;

NOW, THEREFORE, in consideration of the foregoing, of mutual promises of the Parties hereto and of other good and valuable consideration, the receipt and sufficiency of which hereby are acknowledged, the Parties hereby agree, and the Affiliation Agreement is hereby amended as follows.

ARTICLE 1

AMENDMENTS TO AFFILIATION AGREEMENT

1.1 Section 2.1.4 of the Affiliation Agreement is hereby amended as follows (deletions shown in ~~strike through~~; additions shown in **bold**):

“2.1.4 Medical Foundation Matters. As of the Closing Date, L+M shall remain the sole member of LMMG and YNHSC shall remain the sole member of NEMG. Following the Closing, YNHSC and NEMG shall cooperate to maximize the efficiency of operations of LMMG and NEMG. As of the Closing Date, (i) ~~LMMG shall be merged with and into NEMG with NEMG surviving pursuant to an Agreement and Plan of Merger (the “LMMG-NEMG Agreement and Plan of Merger”)~~ in the form attached as Exhibit 2.1.4(A); (ii) two physician employees of ~~NEMG~~ **LMMG who are members of the medical staff of LMH and/or LMW, nominated in accordance with the bylaws of NEMG, shall be elected to the board of trustees of NEMG; ~~(iii)~~ **(ii)** the president of L+M or his or her designee shall be elected to the board of trustees of NEMG; **(iii)** ~~(iv)~~ the bylaws of NEMG shall be amended and restated in the form of the Amended and Restated Bylaws of NEMG (the “Amended and Restated Bylaws of NEMG”) attached hereto as Exhibit 2.1.4(B); **(iv)** the certificate of incorporation of NEMG shall be amended and restated in the form of the Amended and Restated Certificate of Incorporation of NEMG (the “Amended and Restated Certificate of Incorporation of NEMG”) attached hereto as Exhibit 2.1.4(C); **(v) the bylaws of LMMG shall be amended and restated in the form of the Amended and Restated Bylaws of LMMG (the “Amended and Restated Bylaws of LMMG”) attached hereto as Exhibit 2.1.4(D); and (vi) the certificate of incorporation of LMMG shall be amended and restated in the form of the Amended and Restated Certificate of Incorporation of LMMG (the “Amended and Restated Certificate of Incorporation of LMMG”) attached hereto as Exhibit 2.1.4(E). In addition, as soon as reasonably practicable following the Closing Date, and ~~(vi)~~ the contracts held by Sound Medical Associates, P.C. will be assigned to NEMG PLLC. In addition, as of the Post Closing Merger Effective Date, LMMG shall be merged with and into NEMG with NEMG surviving pursuant to an Agreement and Plan of Merger (the “LMMG-NEMG Agreement and Plan of Merger”) in the form attached as Exhibit 2.1.4(A).”****

1.2 The final paragraph of Section 2.1.5 of the Affiliation Agreement is hereby amended as follows (deletions show in ~~strikethrough~~; additions shown in **bold**):

“The LMH Amended Certificate of Incorporation, the LMW Amended Certificate of Incorporation, **the Amended and Restated Certificate of Incorporation of LMMG** and the VNA of Southeastern Connecticut Amended Certificate of Incorporation shall be referred to herein as the “*L+M Subsidiaries Amended Certificates of Incorporation*,” the LMH Amended Bylaws, the LMW Amended Bylaws, ~~and~~ the VNA of Southeastern Connecticut Amended Bylaws, **and the Amended and Restated Bylaws of LMMG** shall be referred to herein as the “*L+M Subsidiaries Amended Bylaws*.” From and after the Closing Date, any other L+M Subsidiaries shall be operated in conformity with the principles reflected in the L+M Subsidiaries Amended Certificates of Incorporation and the L+M Subsidiaries Amended Bylaws.”

1.3 Section 2.2 of the Affiliation Agreement is hereby amended as follows (deletions shown in ~~strikethrough~~; additions shown in **bold**):

“2.2 Maintenance of Separate Corporate Existence. After giving effect to the Closing, the corporate existence, names, rights, privileges, immunities, powers,

franchises, facilities and other licenses, duties and liabilities of L+M and each L+M Subsidiary, ~~other than LMMG~~, shall be governed by the Board of Trustees of L+M or such L+M Subsidiary, as applicable, subject to the L+M Amended Certificate of Incorporation and the L+M Amended Bylaws or the L+M Subsidiaries Amended Certificates of Incorporation and L+M Subsidiaries Amended Bylaws, as applicable, **except as otherwise provided in the LMMG-NEMG Agreement and Plan of Merger as of the Post Closing Merger Effective Date**. Except as otherwise contemplated by this Agreement, the Affiliation shall not result in a transfer or conveyance as of the Closing Date of any asset or the assumption of any liability of either Party or any Affiliate of either Party.”

1.4 Section 2.10 of the Affiliation Agreement is hereby amended as follows (deletions shown in ~~strike through~~; additions shown in **bold**):

“2.10 Obligated Group. On the earliest date following the Closing Date that is reasonably determined by YNHHSC and in accordance with the requirements of the L+M Master Trust Indenture, YNHHSC shall have the authority to cause L+M and LMH, **LMMG**, LMW and/or such other L+M Subsidiaries as YNHHSC shall determine to become YNHHSC Obligated Group Members, and effective upon becoming a YNHHSC Obligated Group Member the applicable L+M Affiliate shall execute a joinder to become a party to the YNHHSC Obligated Group Agreement and shall take such other steps as YNHHSC may require in connection with such status.”

1.5 Section 3.2 of the Affiliation Agreement is hereby amended as follows (deletions shown in ~~strike through~~; additions shown in **bold**):

“3.2 Authorization of Transaction. L+M has full corporate power and authority to execute and deliver this Affiliation Agreement and to perform its obligations hereunder. This Agreement has been duly authorized by all requisite corporate action of L+M. This Agreement has been duly executed and delivered by L+M and, assuming due authorization, execution and delivery by YNHHSC, and receipt of the consents and approvals listed in Schedule 3.27, constitutes a valid and binding obligation of L+M, enforceable against L+M in accordance with its terms (except as may be limited by bankruptcy, insolvency, fraudulent transfer, moratorium, reorganization, preference or similar Applicable Laws of general applicability relating to or affecting the rights of creditors generally and subject to general principles of equity (regardless of whether enforcement is sought in equity or at law)). The amendment of the certificate of incorporation of L+M in the form of the L+M Amended Certificate of Incorporation and the amendment of the bylaws of L+M in the form of the L+M Amended Bylaws, in each case effective as of and subject to the Closing, has been duly authorized by all requisite corporate action of L+M. The LMMG-NEMG Agreement and Plan of Merger to become effective as of **the Post Closing Merger Effective Date** and subject to the Closing: (a) have been duly authorized by all requisite corporate action of L+M; and (b) in the case of LMMG, have been (or upon Closing will be) duly authorized by all requisite corporate action of LMMG. The amendment of the certificate of incorporation of each applicable L+M Subsidiary in the form of: (i) the LMH Amended Certificate of Incorporation; (ii) the LMW Amended Certificate of Incorporation; ~~and~~ (iii) the VNA of Southeastern

Connecticut Amended Certificate of Incorporation; **and (iv) the Amended and Restated Certificate of Incorporation of LMMG**, and the amendment of the bylaws of each applicable L+M Subsidiary in the form of: (x) the LMH Amended Bylaws; (y) the LMW Amended Bylaws; ~~and (z) the VNA of Southeastern Connecticut Amended Bylaws;~~ **and (zz) the Amended and Restated Bylaws of LMMG**, in each case effective as of and subject to the Closing: (a) has been duly authorized by all requisite corporate action of L+M; and (b) in the case of each applicable L+M Subsidiary, has been (or upon Closing will be) duly authorized by all requisite corporate action of such L+M Subsidiary.”

1.6 Section 4.2 of the Affiliation Agreement is hereby amended as follows (deletions shown in ~~striketrough~~; additions shown in **bold**):

“4.2 Authorization of Transaction. YNHHSC has full corporate power and authority to execute and deliver this Affiliation Agreement and to perform its obligations hereunder. This Agreement has been duly authorized by all requisite corporate action of YNHHSC. This Agreement has been duly executed and delivered by YNHHSC and, assuming due authorization, execution and delivery by L+M, and receipt of the consents and approvals listed in Schedule 4.27, constitutes a valid and binding obligation of YNHHSC, enforceable against YNHHSC in accordance with its terms (except as may be limited by bankruptcy, insolvency, fraudulent transfer, moratorium, reorganization, preference or similar Applicable Laws of general applicability relating to or affecting the rights of creditors generally and subject to general principles of equity (regardless of whether enforcement is sought in equity or at law)). The LMMG-NEMG Agreement and Plan of Merger to become effective as of **the Post Closing Merger Effective Date** and subject to the Closing have been duly authorized by all requisite corporate action of **NEMG and YNHHSC.**”

1.7 Section 9.2(b) of the Affiliation Agreement is hereby amended as follows (deletions shown in ~~striketrough~~; additions shown in **bold**):

“A copy of the L+M Amended Bylaws, and of the L+M Subsidiaries Amended Bylaws for each of the applicable L+M Subsidiaries ~~other than LMMG~~, certified to be in full force and effect and to be true and correct by the secretary or assistant secretary of L+M;”

1.8 Section 9.2(c) of the Affiliation Agreement is hereby amended as follows (deletions shown in ~~striketrough~~; additions shown in **bold**):

“An executed copy of the LMMG-NEMG Agreement and Plan of Merger in proper form for filing with the Secretary of State **as of the Post Closing Merger Effective Date;**”.

1.9 Section 9.3(e) of the Affiliation Agreement is hereby amended as follows (deletions shown in ~~striketrough~~; additions shown in **bold**):

“An executed copy of the LMMG-NEMG Agreement and Plan of Merger in proper form for filing with the Secretary of State **as of the Post Closing Merger Effective Date;**”.

1.10 Exhibit 2.1.4(B) of the Affiliation Agreement is hereby amended and restated in the form attached to this First Amendment as Exhibit 2.1.4(B) (deletions shown in ~~striketrough~~;

additions shown in **bold**) [the Amended and Restated Bylaws of NEMG].

1.11 A new Exhibit 2.1.4(D) is hereby added to the Affiliation Agreement in the form attached to this First Amendment as Exhibit 2.1.4(D) [the Amended and Restated Bylaws of LMMG].

1.12 A new Exhibit 2.1.4(E) is hereby added to the Affiliation Agreement in the form attached to this First Amendment as Exhibit 2.1.4(E) [the Amended and Restated Certificate of Incorporation of LMMG].

1.13 Schedule 6.5 of the Affiliation Agreement is hereby amended and restated in the form attached to this First Amendment as Schedule 6.5 (deletions shown in ~~striketrough~~; additions shown in **bold**).

1.14 Schedule 7.5 of the Affiliation Agreement is hereby amended and restated in the form attached to this First Amendment as Schedule 7.5 (deletions shown in ~~striketrough~~; additions shown in **bold**).

ARTICLE 2

CLOSING

The Parties agree that the Closing Date and Effective Time are: 4:00 p.m. September 8, 2016.

ARTICLE 3

MISCELLANEOUS

3.1 Except as expressly modified hereby, all other terms and provisions of the Affiliation Agreement shall remain in full force and effect; except that any references to the merger of NEMG and LMMG that are inconsistent with the Parties' intent as reflected in the Recitals above shall be deemed amended by this First Amendment to be consistent with the Parties' intent as set forth in this First Amendment. All other terms and provisions of the Affiliation Agreement are incorporated herein by this reference, and shall govern the conduct of the Parties hereto; *provided, however*, to the extent of any inconsistency between the provisions of the Affiliation Agreement and the provisions of this First Amendment, the provisions of this First Amendment shall control.

3.2 This First Amendment may be executed in multiple counterparts, each of which shall be deemed an original First Amendment, but all of which, taken together, shall constitute one and the same First Amendment, binding on the Parties hereto. The delivery of an executed signature page hereof by facsimile or portable document format (.pdf) shall have the same effect as the delivery of a manually executed counterpart hereof.

3.3 This First Amendment and the Affiliation Agreement (as hereby amended) together contain and constitute the entire agreement between the Parties hereto with respect to the subject matter hereof, and this First Amendment and the Affiliation Agreement (as hereby

amended) may not be modified, amended, or otherwise changed in any manner, except as provided in the Affiliation Agreement (as hereby amended).

3.4 Every provision of this First Amendment is intended to be severable. If any term or provision hereof is declared by a court of competent jurisdiction to be illegal or invalid, such illegal or invalid terms or provisions shall not affect the other terms and provisions hereof, which terms and provisions shall remain binding and enforceable.

3.5 The headings used in this First Amendment are for reference purposes only, and are not intended to be used in construing this First Amendment. As used in this First Amendment, the masculine gender shall include the feminine and neuter, and the singular number shall include the plural, and vice versa.

3.6 The provisions of this First Amendment shall be interpreted and construed in accordance with the laws of the State of Connecticut, without regard to conflict of laws principles.

NORTHEAST MEDICAL GROUP, INC.
AMENDED AND RESTATED BYLAWS

ARTICLE I. NAME AND GENERAL PURPOSES

Section 1.1 Name. The name of the corporation is Northeast Medical Group, Inc. (the "Corporation").

Section 1.2 General Purposes. The purposes of the Corporation shall be as set forth in the Corporation's Certificate of Incorporation as in effect from time to time. These Bylaws, the powers of the Corporation, its member, trustees and officers, and all matters concerning the conduct and regulation of the affairs of the Corporation shall be subject to the Certificate of Incorporation.

ARTICLE II. MEMBERSHIP

Section 2.1 Member. The Corporation shall have a single member, Yale-New Haven Health Services Corporation (the "Member"), a "Health System" as defined in Section 33-182aa of the Connecticut General Statutes.

Section 2.2 Rights, Powers and Privileges. The Member shall have all the rights, powers and privileges usually or by law accorded to the member of a medical foundation under the Chapter 594b of the Connecticut General Statutes (as it may be amended from time to time, the "Foundation Act") and of a Connecticut nonstock, nonprofit corporation under the Connecticut Revised Nonstock Corporation Act (as it may be amended from time to time, the "Nonstock Act") and not conferred thereby or by the Certificate of Incorporation or these Bylaws upon the Board of Trustees of the Corporation (the "Board"), including the right to elect the members of the Board in accordance with these Bylaws.

Notwithstanding anything in these Bylaws to the contrary:

(a) Neither the Board, nor any officer or employee of the Corporation, may take any of the actions set forth in Exhibit A of these Bylaws, nor may the Board or any officer or employee of the Corporation approve the taking of any such action by an Affiliate (as hereafter defined), without the prior approval of the Member. For purposes hereof, an "Affiliate" of the Corporation shall mean, unless otherwise determined by the Member, any entity which at the time Affiliate status is being determined is directly or indirectly controlling or controlled by or under the direct or indirect common control with the Corporation. "Control" shall mean the legal power to (a) elect or cause the election of a majority of the governing body of the subject entity, or (b) direct or cause the direction of the subject entity's operations or management, whether the foregoing power(s)

exist(s) through voting securities, other voting rights, reserved powers, contract rights, or other legally enforceable means.

(b) In addition to the approval rights reserved to the Member set forth in Exhibit A, the Member expressly retains the rights to take the actions set forth in Exhibit B on behalf of and in the name of the Corporation, directly and without the approval of the Board of this Corporation.

(c) The Board shall have the authority, from time to time, to delegate to the Member any rights, powers and privileges that would otherwise be exercised by the Board to the fullest extent permitted by applicable law.

Section 2.3 Liability and Reimbursement of Expenses. Unless the Member expressly agrees otherwise in writing, the Member shall not be liable for the debts or obligations of the Corporation. The Member may be reimbursed for expenses reasonably incurred on behalf of the Corporation.

ARTICLE III. BOARD OF TRUSTEES

Section 3.1 Powers and Duties. Subject to the powers retained by, conferred upon, or reserved to the Member by law or under these Bylaws, the Board shall have charge, control and management of the affairs, property and funds of the Corporation in the manner and subject to the limitations set forth in these Bylaws. Each Trustee shall discharge his or her duties in good faith with the care an ordinarily prudent person in like position would exercise under similar circumstances, and in a manner he or she reasonably believes to be in the best interests of the Corporation.

Section 3.2 Composition. The Board shall consist of two classes of voting Trustees, the Elected Trustees and the Ex Officio Trustees (collectively, the “Trustees”).

(a) Elected Trustees. Elected Trustees shall be the persons elected by the Member for terms as set forth in these Bylaws, following nomination and approval pursuant to Section 3.4 of this Article III. Elected Trustees will represent a cross section of major segments of the community served by the Corporation and shall be selected, on the basis of demonstrated skill and ability, for their potential contribution to the governance of the affairs of the Corporation.

(b) Ex Officio Trustees. In addition to the Elected Trustees, there shall be the following Ex Officio Trustees, each of whom shall serve automatically by virtue of and while holding the designated office:

- (i) the President of the Corporation; and
- (ii) the President of each Affiliated Delivery Network, or his or her

designee.

For purposes hereof, “Affiliated Delivery Network” shall mean Bridgeport Hospital, Greenwich Hospital, Lawrence + Memorial Corporation, Yale-New Haven Hospital and such other providers that may affiliate with the Yale New Haven System in the future, as designated by the Member.

Section 3.3 Number. The Board shall consist of no fewer than thirteen (13) nor more than twenty-four (24) Trustees, inclusive of Ex Officio Trustees. The number of Trustees within the range set forth in the preceding sentence shall be determined from time to time by the Member.

Section 3.4 Election of Trustees. At the annual meeting of the Member, the Member shall elect successors to the Elected Trustees whose terms are then expiring. The Member shall elect such successors consistent with the following Board composition:

(a) two (2) representatives of senior management of the Member (each, a “YNHHSC Board Member”);

(b) one (1) representative from each Affiliated Delivery Network other than Lawrence + Memorial Corporation (in addition to the President, or his or her designee, who shall serve Ex Officio as set forth in Section 3.2(b));

(c) two (2) physicians employed by LMMG, each of whom is a member in good standing on the medical staff of Lawrence + Memorial Hospital or Westerly Hospital;

(d) up to eight (8) individuals, each of whom is either (1) nominated by a majority vote of the Board and approved by the Member; or (2) self-nominated and appointed by the Member; provided, however, that each such individual, whether nominated by a majority vote of the Board or self-nominated, shall be a Provider (as defined in the Foundation Act) employed or engaged by the Corporation and a member in good standing on the medical staff of one or more Affiliated Delivery Network;

(e) two (2) representatives of Yale School of Medicine;

(f) such other individuals nominated Yale School of Medicine and approved by the Member; provided, however, that each such other individual shall be a Provider employed or engaged by the Corporation and a member in good standing on the medical staff of one or more Affiliated Deliver Network.

Notwithstanding anything herein to the contrary: (x) in accordance with the Foundation Act, the number of Trustees on the Board who are Providers shall equal or exceed the number of Trustees on the Board who are nonprovider employees of the Member; and (y) the number of Trustees appointed to the Board as representatives of, or on the nomination of, Yale School of

Medicine shall constitute twenty-five percent (25%) of the total number of Trustees on the Board.

Section 3.5 Term and Term Limits. There shall be three (3) classes of Elected Trustees, with approximately one-third of the Elected Trustees in each class, and the terms of all Trustees in the same class shall expire at the adjournment of the same annual meeting of the Member at which Trustees are elected. Elected Trustees shall take office at the close of the meeting of the Member at which they were elected or at such later date as may be established by the Member and, subject to Section 3.6 of this Article III, shall hold office for a term of three (3) years and until a successor is duly elected and qualified.

Notwithstanding anything herein to the contrary:

(a) No person shall be elected a Trustee for a term beginning after the date of his or her seventy-sixth birthday, provided that an Elected Trustee who is seventy-six (76) years of age or older may be re-elected for another term if (i) the Trustee is also elected as an officer of the Corporation or appointed chair of a standing committee at the beginning of such term; or (ii) the Member determines that additional service is appropriate due to the Trustee's unique expertise and commitment to the Board. In the instance of re-election as a Trustee for an additional term as provided in clause (i) of the foregoing sentence, Board membership shall be coterminous with said Trustee's service as an officer or committee chair.

(b) An Elected Trustee who has served three (3) consecutive full terms (provided that for the purposes of this Section 3.5 a term of service of more than one-half of a full term shall be considered a full term) shall not be eligible for re-election for a period of one year, provided that a Trustee may be re-elected for an additional consecutive term if (i) the Trustee is also elected as an officer of the Corporation or appointed chair of a standing committee at the beginning of such additional term; or (ii) the Member determines that additional service is appropriate due to the Trustee's unique expertise and commitment to the Board, which such determination shall be made only in limited circumstances and shall be made prior to each proposed re-election after the Trustee's completion of three (3) consecutive full terms. In the instance of re-election as a Trustee for an additional term as provided in clause (i) of the foregoing sentence, Board membership shall be coterminous with said Trustee's service as an officer or committee chair.

(c) The provisions of paragraphs (a) and (b) of this Section shall not apply to an Elected Trustee in the event such Trustee also serves as a trustee of Yale-New Haven Health Services Corporation at the time such person is elected to serve as an Elected Trustee for a term otherwise prohibited by such paragraphs (a) and (b). In the instance of re-election as a Trustee for an additional term as provided in this paragraph (c), Board membership shall be coterminous with said Trustee's service as a trustee of Yale-New Haven Health Services Corporation.

Section 3.6 Resignation. Any Elected Trustee may resign at any time by giving written notice of such resignation to the Secretary of this Corporation. Such resignation shall be effective

at the time specified in the notice, or if no time is specified, upon receipt by the Secretary. The acceptance of such resignation shall not be necessary to make it effective. Any Ex Officio Trustee who for any reason ceases to hold the office or position from which his or status as an Ex Officio Trustee derives shall automatically be deemed to have resigned as a Trustee of the Corporation and from any position held by virtue of such office with any Affiliate.

Section 3.7 Removal. One or more Elected Trustees may be removed from the Board with cause by action of the Member, which action may be taken upon its own initiative or upon the recommendation of the Board.

Section 3.8 Vacancies. In the event of the death, resignation or removal of an Elected Trustee, the vacancy resulting therefrom may be filled only by the Member in accordance with Section 3.4 of these Bylaws. An individual elected to fill a vacancy shall serve the remainder of the term of the Trustee replaced.

Section 3.9 Meetings.

(a) **Annual Meetings.** The annual meeting of the Board shall be held on such date and time as the Board or the President shall designate.

(b) **Regular Meetings.** Regular meetings of the Board shall be held on such dates and at such times and places as the Board or President shall designate.

(c) **Special Meetings.** Special meetings of the Board may be called at any time by the President and shall be called by the President upon the written request of the Member or any Trustee.

Section 3.10 Notice of Meetings. Notice of the date, time and place of any meeting of the Board shall be given to each Trustee and to the Member at least five (5) days in advance of the meeting, except that no notice need be given of a regular meeting held in accordance with a schedule established at the beginning of the fiscal year and provided to the Board and the Member in writing. Any notice of a meeting required under these Bylaws may be communicated to a Trustee in person, by mail or other delivery service, or by telephone, facsimile or other electronic means, including electronic mail directed to an electronic email address at which a Trustee has consented to receive notice. Notice to the Member shall be directed to the President/Chief Executive Officer of the Member and may be provided in person, by mail, or by telephone, facsimile or other electronic means, including electronic mail directed to an electronic mail address at which the President/Chief Executive Officer of the Member has consented to receive notice.

Section 3.11 Waiver of Notice. Notice of any meeting of the Board may be waived in writing by all the Trustees and, if any Trustee present at a meeting of the Board does not protest prior to or at the commencement of the meeting the lack of proper notice, he or she shall be deemed to have waived notice of such meeting.

Section 3.12 Action by Unanimous Written Consent. Any action required or permitted to be taken by the Board may be taken without a meeting if all the Trustees unanimously consent to such action in writing. Such written consent(s) shall be filed with the minutes of the Corporation and shall have the same force and effect as a vote of Trustees at a duly convened meeting. For purposes of this section, a Trustee may evidence his or her consent with any manual, facsimile, conformed or electronic signature, including an email communication from the Trustee to the Corporation from an email address provided by the Trustee to the Corporation.

Section 3.13 Participation by Conference Call. The members of the Board may participate in a meeting of the Board by means of conference telephone or similar communications equipment (including, without limitation, video conferencing equipment) affording all persons participating in the meeting the ability to hear one another, and such participation in the meeting by means of such equipment shall constitute presence in person at such meeting.

Section 3.14 Quorum and Voting. A majority of the number of Trustees in office at the time shall constitute a quorum for the transaction of business at all meetings of the Board, provided that if less than a majority of the Trustees is present at said meeting, a majority of the Trustees present may adjourn the meeting from time to time without further notice. The act of a majority of the Trustees present at a meeting at which a quorum is present at the time of the act shall be the act of the Board, unless the act of a greater number is required by these Bylaws, by the Certificate of Incorporation or by law. Notwithstanding the foregoing, in the event that any Trustee has a conflict of interest with respect to any transaction to be undertaken by the Corporation, such transaction shall require the approval of the Board or the Member consistent with Article VII.

ARTICLE IV. OFFICERS

Section 4.1 Officers. The officers of the Corporation shall consist of a Chair, a President, a Secretary, a Treasurer and such other officers, including Vice Chairs, as may be appointed from time to time consistent with Section 4.6. The Chair and any Vice Chair shall be members of the Board.

Section 4.2 Election and Term of Office. The President shall be appointed in accordance with Section 4.3(a) of this Article IV. The Chair, any Vice Chairs, the Secretary and the Treasurer shall be nominated by the Nominating and Governance Committee and elected annually by the Board for a term of one year and until their successors are duly elected and qualified. The Board may create and fill such other offices as it deems necessary consistent with Section 4.6.

Section 4.3 Powers. The officers shall have the powers and perform the duties commonly incident to their respective offices, including the powers and duties listed below.

(a) **President.** The President of the Corporation shall be appointed by the Member, following consultation with the Board. The appointed President shall serve at the pleasure of the Member.

The President shall be a person who in the judgment of the Member has the combination of education, experience, professional standards and demonstrated leadership ability to fulfill successfully the responsibilities of the position and to command the confidence and respect of the Board, employees and the community.

The President shall be delegated the responsibility for overall management of the Corporation and shall have all authority necessary to carry out this responsibility, subject only to such policies as may be adopted by the Board. The President shall act as the duly authorized representative of the Board in all matters in which the Board has not formally delegated some other person to so act. The duties, responsibilities and authority of the President shall be defined in a written statement adopted by the Member in consultation with the Board.

The President shall be a voting member of all standing committees except as otherwise specified in these Bylaws.

(b) **Chair.** The Chair of the Board shall preside at meetings of the Board. The Chair shall perform such other duties as the Board may from time to time prescribe.

(c) **Vice Chair.** The Board may designate one or more Vice Chairs, who shall exercise the powers and duties of the Chair during absence or disability. The Vice Chair(s), if any, shall perform such other duties as the Board or the Chair may from time to time prescribe.

(d) **Secretary.** The Secretary shall have the custody of the records of the Corporation pertaining to the Secretary's office, shall keep minutes of the meetings of the Board, and shall cause notice of such meetings to be given as required by law or these Bylaws. The Secretary shall perform such other duties as the Board or the Chair may from time to time prescribe.

(e) **Treasurer.** The Treasurer of the Corporation shall be responsible for the safekeeping of all funds and securities of the Corporation, shall see that proper records showing all financial transactions of the Corporation are maintained, and shall present financial reports to the Board.

Section 4.4 Resignation and Removal.

(a) An officer of the Corporation may resign at any time by giving written notice of such resignation to the Secretary. Such resignation shall be effective at the time specified in the notice, or if no time is specified, upon receipt by the Secretary. The acceptance of such resignation shall not be necessary to make it effective.

(b) The Board may remove from office any officer with or without cause; provided, however, that the President may be removed from office by the Member following consultation with the Board. Removal of an officer shall be without prejudice to the officer's contract rights, if any.

Section 4.5 Vacancies. In the case of the death, resignation or removal of any officer, except the President, the vacancy may be filled by the Board for the unexpired term. A vacancy in the office of President shall be filled in accordance with Section 4.3(a).

Section 4.6 Other Officers. The Corporation may have such other officer or officers, including assistant officers, as the Board may from time to time determine. Any such officer or assistant officer shall be appointed or elected in the manner and for the term determined by the Board, and the officer shall have the duties assigned by the Board.

ARTICLE V. COMMITTEES

Section 5.1 Classification. There shall be such standing committees as may be provided for, from time to time, in this Article V and such other committees as shall be established by Board resolution from time to time. Standing committees shall have the powers and duties set forth in this Article V and in a charter approved by the Board. Other committees shall have the powers and duties set forth in the resolution establishing them and in a charter approved by the Board. Each committee shall periodically review its charter and revise it as necessary; provided, however, that no amendment shall become effective until approved by the Board.

Section 5.2 Appointment of Committee Members. Except as otherwise provided in these Bylaws, members and chairs of all standing committees shall be appointed by the Board on nomination of the Nominating and Governance Committee. All such committee members and chairs shall serve at the pleasure of the Board until the next annual meeting of the Board and until their successors shall be chosen. All committees shall have the power to choose their own secretaries. Unless otherwise provided, individuals who are not Trustees may be appointed to committees and each such person so appointed shall have a vote and be included for purposes of determining a quorum; provided, however, that if a committee is authorized to act on behalf of the Board, any such action must be approved by a majority of the committee members who are Trustees.

Section 5.3 Committee Governance.

(a) **Quorum and Voting.** A majority of the committee members shall constitute a quorum at committee meetings except as otherwise provided in these Bylaws. The act of a majority of the committee members present at a meeting at which a quorum is present at the time of the act shall be the act of such committee, unless the act of a greater number is required by these Bylaws, by resolution of the Board or by law.

(b) Meetings. Except as otherwise provided in these Bylaws or by resolution of the Board, each committee shall establish its own rules and procedures and shall fix the time and place of its meetings. Each committee shall keep minutes of its meetings which shall be made available to the Board upon request.

Section 5.4 Standing Committees.

(a) Executive Committee. The Executive Committee shall consist of the Chair, who shall act as chair of the committee, the President, the Treasurer, and any other member of the Board that the Board may choose to appoint. The Executive Committee shall possess and may exercise in the intervals between meetings of the Board all such powers of the Board, except as may otherwise be provided by law, these Bylaws or resolution of the Board.

(b) Nominating and Governance Committee. The Nominating and Governance Committee shall consist of Trustees elected by the Board. The Nominating and Governance Committee shall, after consultation with the President and other Trustees, nominate candidates to be voted upon in electing officers and members of the Board and nominate for appointment by the Board the chairs and members of all standing committees. The Nominating and Governance Committee shall also review Board governance matters and recommend enhancements to strengthen the Board and ensure the comprehensiveness and efficiency of its governance process.

(c) Finance Committee. The Finance Committee shall have such duties as are established by the Member and set forth in the Finance Committee charter. These duties shall include, but not be limited to, approval of local operating and capital budgets and examination and monitoring of other operating and capital budgets involving the Corporation.

Section 5.6 Other Committees. The Board may establish and appoint from among the Trustees or others, such other committees with such powers and authority as the Board shall designate, except that no such committee may exercise the authority of the Board.

Section 5.7 Powers of Committees. No committee established by the Board shall have power to fill vacancies on the Board or on any of its committees, to amend the Certificate of Incorporation of the Corporation or these Bylaws, to approve a plan of merger, to approve a sale, lease, exchange or other disposition of all, or substantially all, of the property of the Corporation other than in the usual and regular course of affairs of the Corporation, to approve a proposal to dissolve, or to authorize any other action inconsistent with the Certificate of Incorporation or these Bylaws.

ARTICLE VI. INDEMNIFICATION

The Corporation shall indemnify and defend the Corporation's Member, Trustees, officers and employees as set forth in the Certificate of Incorporation.

ARTICLE VII. CONFLICTS OF INTEREST

The Trustees and officers of the Corporation shall comply with any Conflicts of Interest policy adopted by the Corporation, as any such policy may be amended from time to time, and with the provisions of the Nonstock Act related to disclosure and approval of "Director's conflicting interest transactions" (as such term is defined in the Nonstock Act). Consistent with the requirements of the Nonstock Act, any "Director's conflicting interest transaction" shall, when possible, be approved and authorized by either (i) the Member or (i) a majority of the disinterested Trustees voting on the transaction at a meeting at which a majority (but no fewer than two (2)) of all disinterested Trustees on the Board shall constitute a quorum, in each case following any required disclosure of the facts of the conflicting interest transaction.

ARTICLE VIII. MISCELLANEOUS PROVISIONS

Section 8.1 Fiscal Year. The fiscal year of the Corporation shall begin on the first day of October and end on the last day of September in each year unless the Board of Trustees shall otherwise determine.

Section 8.2 Execution of Deeds and Contracts. Except as otherwise directed by the Board, all deeds and mortgages made by the Corporation and all other written contracts, agreements and undertakings to which the Corporation shall be a party shall be executed in its name by the President or such other officers or officers as may be specified by the Board or authorized by the President.

Section 8.3 Execution of Negotiable Instruments. All checks, drafts, notes, bonds, bills of exchange and orders for the payment of money shall be signed by the President or such officer or officers of the Corporation as the Board may specify from time to time.

ARTICLE IX. AMENDMENTS

Subject to approval by the Member, these Bylaws may be amended, altered, or repealed at any meeting of the Board by a majority vote of the Trustees present and voting, a quorum being present. The general nature and purpose of such proposed amendment(s) shall be set forth in the notice of the meeting, and the actual language of the proposed amendments need not be included in the notice. No amendment, alteration or repeal shall take effect until it shall have been approved by the Member.

EXHIBIT A

Actions Requiring Approval of the Member

Notwithstanding anything in these Bylaws to the contrary, neither the Board nor any officer or employee of the Corporation may take any of the following actions, or approve an Affiliate taking any of the following actions, without the prior approval of the Member:

- A. Merger, consolidation, reorganization or dissolution of this Corporation or any Affiliate and the creation or acquisition of an interest in any corporate entity, including joint ventures;
- B. Amendment or restatement of the Mission, Certificate of Incorporation or the Bylaws of this Corporation or any Affiliate, or any new or revised "doing business as" name;
- C. Adoption of operating and cash flow budgets of the Corporation or any Affiliate, including consolidated or combined budgets of this Corporation and all subsidiary organizations of the Corporation (pursuant to the authority delegated to this Corporation by the Member to adopt such budgets within parameters established by the Member);
- D. Adoption of capital budgets and capital allocations of this Corporation or any Affiliate (pursuant to the authority delegated to this Corporation by the Member to adopt such budgets within parameters established by the Member);
- E. Incurring aggregate operating or capital expenditures on an annual basis that exceed operating or capital budgets of the Corporation adopted by the Member by a specified dollar amount to be determined from time to time by the Member;
- F. Long-term or material agreements including, but not limited to, equity financings, capitalized leases, operating leases and installment contracts; and purchase, sale, lease, disposition, hypothecation, exchange, gift, pledge or encumbrance of any asset, real or personal, with a fair market value in excess of a dollar amount to be determined from time to time by the Member, which shall not be less than 10% of the total annual capital budget of this Corporation;
- G. Approval of any new relationships or agreements for undergraduate or graduate medical education programs or any material amendments to or terminations of existing agreements for undergraduate or graduate medical education programs;

- H. Contracting with an unrelated third party for all or substantially all of the management of the assets or operations of this Corporation or any Affiliate;
- I. Approval of major new programs and clinical services of this Corporation or any Affiliate or discontinuation or consolidation of any such program. The Member shall from time to time define the term "major" in this context;
- J. Approval of strategic plans of this Corporation or any Affiliate;
- K. Adoption of safety and quality assurance policies not in conformity with policies established by the Member; and
- L. Adoption of any policies relating to compensation of employed physicians or the taking of any other action to establish or adjust compensation of employed physicians. For purposes hereof, compensation shall include salary, fringe benefits and deferred compensation.

Other Major Activities

- A. In addition, the Member shall have the authority, except as otherwise provided by the Member and after consultation with this Corporation, to require the prior review and approval of those activities of this Corporation or any subsidiary or affiliate entity that the Member determines to be "major activities."
- B. "Major activities" shall be those which the Member by a vote of not less than two-thirds (2/3) of its Board of Trustees has declared major, by written notice to this Corporation, delivered personally or transmitted by registered or certified mail return receipt requested. Such notice shall specifically identify the matter or matters requiring approval of the Member, and shall refer to this Bylaw provision granting such approval rights to the Member. Notices received pursuant to this section shall be recorded in the minutes of this Corporation and shall be filed with the minutes of this Corporation.

Nothing in these Bylaws shall be construed in a manner that is inconsistent with the authorities with respect to the Corporation that are reserved or retained by the Member pursuant to these Bylaws and the Bylaws of the Member.

EXHIBIT B

Actions Direct Authority Retained by the Member

Notwithstanding anything in these Bylaws to the contrary, the Member retains authority to take the following actions on behalf of and in the name of this Corporation, directly and without the approval of the Board of this Corporation:

- A. Adoption of targets for the annual operating and cash flow budgets of this Corporation and its Affiliates, including consolidated or combined budgets of this Corporation and all subsidiary organizations of the Corporation;
- B. Adoption of targets for the annual capital budgets and capital allocations of this Corporation and any Affiliate;
- C. Adoption of annual operating, cash flow and annual capital budgets for the Corporation and any Affiliate within the targets established by the Member in the event of any failure of the Corporation to do so;
- D. Issuance and incurrence of indebtedness on behalf of this Corporation;
- E. Management and control of the liquid assets of this Corporation, including the authority to cause such assets to be funded to the Member or as otherwise directed by the Member;
- F. Appointment of the independent auditor for this Corporation and each Affiliate and the management of the audit process and compliance process and procedures for this Corporation and each Affiliate; and
- G. Appointment of the President consistent with Section 4.3(a).

Exhibit 2.1.4(D)

Amended and Restated Bylaws of LMMG

AMENDED AND RESTATED BYLAWS
OF
L+M PHYSICIAN ASSOCIATION, INC.

ARTICLE I

Name

Section 1.01 Name of Corporation. The name of this Corporation is **L+M Physician Association, Inc.**, and it shall be referred to throughout these Bylaws as the “Corporation.”

ARTICLE II

Role and Purpose of the Corporation; Sole Member

Section 2.01 Role and Purpose of the Corporation. The Corporation is organized and shall be operated exclusively for charitable purposes within the meaning of Section 501(c)(3) of the Internal Revenue Code of 1986, as now in effect or as may hereafter be amended (the “**Code**”), which purposes are set forth in the Corporation’s Certificate of Incorporation, as the same may be amended from time to time. The Corporation’s primary role and purpose is to practice medicine and provide health care services to the public as a medical foundation, pursuant to Chapter 594b of the Connecticut General Statutes, within the health care delivery system (the “**System**”) administered by Yale New Haven Health Services Corporation (“**YNHHSC**” or the “**System Parent**”).

Section 2.02 Sole Member; Lawrence + Memorial Corporation. The Corporation shall have but one (1) member, Lawrence + Memorial Corporation (the “**Member**”), which shall appoint the Board of Trustees of the Corporation (also referred to in these Bylaws as the “**Board**” or “**Board of Trustees**”), adopt, amend and repeal these Bylaws, and have all of the other rights, powers and privileges usually or by law accorded to the members of a nonstock federally tax-exempt corporation and not conferred by these Bylaws on the Board of Trustees of the Corporation. In addition to such other rights, powers and privileges as it may have by law, and subject to the System Parent’s rights, powers and privileges set forth in these Bylaws, the Member shall have the right and power to:

- (a) Approve the philosophy, mission and values of the Corporation and any change thereto;
- (b) Adopt strategic plans for the Corporation;
- (c) Recommend to the System Parent targets for the annual operating and cash flow budgets of the Corporation and targets for the annual capital budgets and budget allocations of the Corporation;

- (d) Approve the Corporation's annual operating and cash flow budgets, capital budgets, capital allocations, major clinical and/or financial initiatives, and financial plans (including capital and operating budgets);
- (e) Approve the formation or acquisition by the Corporation of any new direct or indirect subsidiaries, joint ventures or affiliations;
- (f) Approve the Certificate of Incorporation, Bylaws and other governance documents of the Corporation, and any amendments thereto or restatements thereof;
- (g) Approve all core competencies and qualifications required for selection of the Corporation's Trustees;
- (h) In consultation with and upon recommendation of the Board, appoint all Trustees of the Corporation, and remove, with or without cause, all Trustees or board officers of the Corporation;
- (i) In consultation with and upon recommendation of the Board, appoint and remove, determine the compensation for, and conduct the evaluation of, the Executive Director of the Corporation;
- (j) Recommend to the System Parent the selection of any auditor of the annual audited financial statements for the Corporation;
- (k) Recommend to the System Parent any accounting or debt management programs, establish any debt limits under such programs, approve any variances from such programs or limits for the Corporation, and incur or assume any debt on behalf of the Corporation;
- (l) Recommend to the System Parent the incurrence of debt or financing by the Corporation, other than credit purchases of goods or services in the ordinary course of business, except as included in approved capital or operating budgets;
- (m) Oversee the Corporation's use, management and investment of its permanent and temporarily restricted endowment funds;
- (n) Approve any voluntary change to the federal income tax exemption granted by the IRS to the Corporation under Section 501(c)(3) of the Code;
- (o) Initiate or consent to any form of insolvency proceeding undertaken by the Corporation or any direct or indirect subsidiary of the Corporation;
- (p) Approve all projects, agreements or transactions undertaken by the Corporation involving the expenditure of funds or divestiture of assets in excess of \$250,000 and not otherwise included in an approved budget;

(q) Approve the services offered by the Corporation, new service lines or termination of existing service lines not otherwise included in an approved budget or a strategic or financial plan;

(r) Approve any sale, lease, transfer, or substantial change in the use of all or substantially all of the assets of the Corporation or any direct or indirect subsidiary of the Corporation;

(s) Approve any merger, consolidation, restructuring, change in corporate ownership, dissolution, or liquidation of the Corporation or any direct or indirect subsidiary or the Corporation;

(t) Approve the acquisition of any real estate or any significant lease arrangement by the Corporation, except as otherwise included in a strategic or financial plan or approved budget;

(u) Approve any management contract or outsourcing arrangement for the Corporation which would substantially impact or alter its operations, or any settlement agreement or consent decree with any local, state or government authorities; and

(v) Approve any change in the primary business name or logo of the Corporation.

Section 2.03 Manner of Action by Member. Any action permitted or required of the Member by law, the Certificate of Incorporation or these Bylaws may be taken by vote of its board of trustees, or by or through any person or persons designated by either its bylaws or its board of trustees to act on its behalf. Any such action may also be taken without a meeting by written communication of a duly authorized representative of the Member acting within the limits of his/her authority. Any such action by the Member or its duly authorized representative shall be filed with the Secretary of the Corporation. Whenever approval by the Member is required by law, the Certificate of Incorporation or these Bylaws, the Member shall attempt to act on a request for approval within the timeframe set forth in any schedule that may be developed from time to time, or if no such schedule exists, in a timely manner.

ARTICLE III

System Authority

Section 3.01 System Parent. YNHHS serves as the parent company of the Member and oversees the System and its affiliated entities, including the Corporation.

Section 3.02 Rights and Powers of the System Parent. (a) YNHHS shall, as the parent company of the Corporation's Member, have the ultimate authority to approve any decisions made by the Member by virtue of its rights and powers under state law. Such ultimate authority granted to YNHHS shall include the right and power to approve the following:

- (i) Merger, consolidation, reorganization or dissolution of this Corporation and the creation or acquisition of an interest in any corporate entity, including joint ventures;
- (ii) Amendment or restatement of the mission, Certificate of Incorporation or the Bylaws of this Corporation, or any new or revised “doing business as” name;
- (iii) Adoption of operating and cash flow budgets of the Corporation, including consolidated or combined budgets of this Corporation and all subsidiary organizations of the Corporation within parameters established by the System Parent;
- (iv) Adoption of capital budgets and capital allocations of this Corporation (pursuant to the authority delegated to this Corporation by the Member to adopt such budgets within parameters established by the System Parent);
- (v) Incurring aggregate operating or capital expenditures on an annual basis that exceed operating or capital budgets of the Corporation adopted by the Member by a specified dollar amount to be determined from time to time by the System Parent;
- (vi) Long-term or material agreements including, but not limited to, equity financings, capitalized leases, operating leases and installment contracts; and purchase, sale, lease, disposition, hypothecation, exchange, gift, pledge or encumbrance of any asset, real or personal, with a fair market value in excess of a dollar amount to be determined from time to time by the Member, which shall not be less than 10% of the total annual capital budget of this Corporation;
- (vii) Approval of any new relationships or agreements for undergraduate or graduate medical education programs or any material amendments to or terminations of existing agreements for undergraduate or graduate medical education programs;
- (viii) Contracting with an unrelated third party for all or substantially all of the management of the assets or operations of this Corporation;
- (ix) Approval of major new programs and clinical services of this Corporation or discontinuation or consolidation of any such program. YNHHSC shall from time to time define the term “major” in this context;
- (xi) Approval of strategic plans of this Corporation;
- (xii) Adoption of safety and quality assurance policies not in conformity with policies established by YNHHSC;
- (xiii) Adoption of any polices relating to compensation of employed physicians or the taking of any other action to establish or adjust compensation of employed physicians. For purposes hereof, compensation shall include salary, fringe benefits and deferred compensation;

(xiv) Appointment of the President of Corporation;

(xiv) Any major activities of the Corporation. “Major activities” shall be those which YNHHS, by a vote of not less than two-thirds (2/3) of its Board of Trustees, has declared major, by written notice to this Corporation, delivered personally or transmitted by registered or certified mail return receipt requested. Such notice shall specifically identify the matter or matters requiring approval of YNHHS, and shall refer to this Bylaw provision granting such approval rights to YNHHS. Notices received pursuant to this section shall be recorded in the minutes of this Corporation and shall be filed with the minutes of this Corporation. Nothing in these Bylaws shall be construed in a manner that is inconsistent with the authorities with respect to the Corporation that are reserved or retained by YNHHS pursuant to these Bylaws and the Bylaws of YNHHS.

(b) The System Parent retains authority to take the following actions on behalf of and in the name of this Corporation, directly and without the approval of the Member or Board of this Corporation:

(i) Adoption of targets for the annual operating and cash flow budgets of the Corporation, including consolidated or combined budgets of the Corporation and all subsidiary organizations of the Corporation;

(ii). Adoption of targets for the annual capital budgets and capital allocations of the Corporation;

(iii) Adoption of annual operating, cash flow and annual capital budgets for the Corporation within the targets established by YNHHS in the event of any failure of the Corporation to do so;

(iv) Issuance and incurrence of indebtedness on behalf of the Corporation;

(v) Management and control of the liquid assets of the Corporation, including the authority to cause such assets to be funded to YNHHS or as otherwise directed by YNHHS; and

(vi) Appointment of the independent auditor for the Corporation and the management of the audit process and compliance process and procedures for the Corporation.

ARTICLE IV

Board of Trustees

Section 4.01 Composition. The Board of Trustees shall consist of not fewer than five (5) nor more than eleven (11) Trustees, including *ex officio* Trustees, such number within the variable range to be determined by the Member at its annual meeting. The Member’s President and Chief Executive Officer and the Corporation’s Executive Director shall serve *ex officio* on

the Board and shall each have a vote and be counted for quorum purposes. The Member's Governance Committee shall ensure that: (i) in the event that there are employees of the Member serving as Trustees on the Board at any time who are not physicians, there shall be at least an equal number of physicians serving as Trustees on the Board.

Section 4.02 Election and Terms. Except individuals serving *ex officio* on the Board or as provided otherwise in this Article III, Trustees shall serve a term of three (3) years, or until their resignation, removal or death. Trustees shall be divided into three (3) classes of approximately equal size with approximately equal representation from each Director category. One class of Trustees shall be elected by the Member at each annual meeting from a slate of nominees prepared by the Member's Governance Committee, subject to approval by the System Parent; provided however that in the event the System Parent does not approve any such nominee Director, the Member shall elect a different Director for approval by the System Parent; and provided further that in the event any such successor nominee Director is not approved by the System Parent within thirty (30) days following the System Parent's annual meeting, the System Parent may direct the Member to elect the System Parent's nominee.

Section 4.03 Resignation. A Director may resign at any time by delivering written notice to the Secretary of the Corporation. The resignation shall be effective when the notice is delivered, unless the notice specifies a later effective date.

Section 4.04 Removal. A Director may be removed by the Member at any time, with or without cause. The Member shall remove a Director at the direction of the System Parent.

Section 4.05 Vacancies. A vacancy of a Director shall be filled for the balance of the vacated term by the Member, with the approval of the System Parent.

Section 4.06 Duties and Responsibilities. Subject to the rights, powers and privileges accorded to the Member and System Parent in the Certificate of Incorporation, these Bylaws, or by law, the Board of Trustees shall manage and direct the business, property, and affairs of the Corporation. The Board shall exercise all of the powers of the Corporation in accordance with these Bylaws. Without limiting the foregoing and to the extent applicable to the Corporation's operations, the Board shall have the power to:

(a) Develop and recommend to the Member and System Parent the philosophy, mission and values of the Corporation and any changes thereto;

(b) Develop and recommend to the Member and the System Parent the Corporation's strategic plans;

(c) Develop and recommend to the Member and System Parent the Corporation's annual operating and financial targets, major clinical and/or financial initiatives, and financial plans (including capital and operating budgets);

(d) Annually assess the Corporation's performance against approved budgets, initiatives and strategic plans adopted by the Member and System Parent;

(e) Recommend to the Member and System Parent the sale, transfer or substantial change in use of all or substantially all of the assets, the divestiture, dissolution and/or disposition of assets, closure, merger, consolidation, change in corporate membership or ownership or corporate reorganization of the Corporation or any direct or indirect subsidiary of the Corporation;

(f) Recommend to the Member and System Parent the formation or acquisition by the Corporation of any new direct or indirect subsidiaries, joint ventures or affiliations;

(g) Recommend to the Member and System Parent the introduction or termination of any services to be offered by the Corporation not otherwise included in an approved budget or a strategic or financial plan;

(h) Approve any consent decree or settlements from state and federal authorities, following consultation with the Member;

(i) Recommend to the Member and System Parent changes to the Corporation's Certificate of Incorporation and Bylaws;

(j) Recommend to the Member and System Parent nominations for and removal of Trustees of the Corporation;

(k) Elect officers of the Board, and recommend to the Member the removal of any officer of the Board;

(l) Approve business transactions or material contracts, subject to the rights of the Member set forth in Section 2.02 and System Parent in Section 3.02, not otherwise included in an approved budget or a strategic or financial plan;

(m) Recommend to the System Parent any incurrence or assumption of debt by the Corporation in accordance with the guidelines for accounting and debt management programs established by the Member and System Parent;

(n) Periodically assess the Corporation's Quality Initiatives, including tracking and reporting on the Corporation's performance under quality measures, quality and patient safety programs and initiatives, patient satisfaction and cultural competence initiatives;

(o) Periodically assess the Corporation's policies and programs to assure corporate and regulatory compliance, including all required state and federal license and generally recommended accreditations and certifications;

(p) Periodically assess the Corporation's policies and programs relating to human relations and labor relations;

(q) Periodically assess the Corporation's Development Plans and its Planned Giving Plans;

(r) Periodically assess the Corporation's Community Relations Initiatives and Community Outreach Programs;

(s) Plan and implement policies and programs relating to the Corporation's use, management and investment of its permanent and temporarily restricted endowment funds, annual appeal funds, and net proceeds from special fundraising events; and

(t) Evaluate the Board's performance.

Section 4.07 Compensation. The Trustees shall serve without compensation for their services as Trustees but may be reimbursed by the Corporation for their reasonable expenses and disbursements in that capacity on behalf of the Corporation.

ARTICLE V

Meetings of the Board of Trustees

Section 5.01 Annual and Regular Meetings. The annual meeting of the Board shall be held in the month of December on a date to be fixed by the Chair from year to year, unless the Chair shall designate a different date for the annual meeting. The transaction of business at the annual meeting shall be unlimited except as otherwise specified in these Bylaws. There shall be up to twelve (12) regular meetings of the Board per fiscal year, with a schedule of such meetings to be adopted by resolution of the Board.

Section 5.02 Notice of Annual and Regular Meetings. The Secretary shall give notice of the date, time and place of the annual meeting and each regular meeting of the Board by mail, electronic mail, telecommunications, telephone, facsimile or in person to each member of the Board at least five (5) days in advance of the meeting, except that no notice need be given of a regular meeting held in accordance with a schedule approved by the Board.

Section 5.03 Special Meetings. Special meetings may be called at any time by the Chair, and shall be called by the Chair within seven (7) days of receipt of the written request of any three (3) Trustees. Notice of the date, time, place and purpose of a special meeting shall be given to each member by mail, electronic mail, telecommunications, telephone, facsimile or in person at least twenty-four (24) hours before the scheduled date of the meeting and no business shall be transacted at such meeting other than that specifically set forth in the notice.

Section 5.04 Quorum; Vote Required for Action. A majority of all Trustees shall constitute a quorum at all meetings of the Board. The affirmative vote of a majority of the Trustees present at a meeting at which time a vote is taken shall be the act of the Board, unless the vote of a greater number is required by the Certificate of Incorporation, these Bylaws, or by law. *Ex officio* Trustees shall be counted in determining a quorum and shall be entitled to vote.

Section 5.05 Action Without Meeting. If all members of the Board consent in writing to any action taken or to be taken, the action shall be the same as if authorized at a meeting of the

Board; all written consent(s) shall be included in the corporate minutes or filed with the corporate records.

Section 5.06 Participation by Conference Telephone. Any member of the Board may participate in a meeting by means of a conference telephone or similar communications equipment enabling all members of the Board participating in the meeting to hear one another, and such participation shall constitute presence in person at such meeting.

Section 5.07 Agenda and Records of Meetings. There shall be a written agenda for each meeting of the Board, and minutes of each meeting shall be prepared and submitted to the Board for approval by the Secretary or a delegate. Minutes shall reflect attendance at the meeting, and shall be dated, signed and maintained in the corporate records following approval.

ARTICLE VI

Officers

Section 6.01 Officers. The officers shall be the Chair, an Executive Director, a Secretary, a Treasurer and such other officers as may from time to time be designated by the Board. The Chair, Secretary and Treasurer shall be chosen from the members of the Board.

Section 6.02 Election. The officers, except for the Executive Director, shall be chosen by the Board at its annual meeting, and shall hold office until the next annual meeting.

Section 6.03 Vacancies. Any vacancy occurring in any office shall be filled promptly by the Board at any Board meeting.

Section 6.04 Removal. Any officer may be removed with or without cause by the Member at any meeting of the board of trustees of the Member, provided that the notice of the meeting specifically states that the purpose or one of the purposes of the meeting is removal of the officer.

Section 6.05 Duties. The duties of the officers shall be as follows:

(a) Chair. The Chair shall preside at all meetings of the Board, shall be an *ex officio* member of all committees, and shall perform other duties incident to the office or delegated by the Board or these Bylaws. In the event of the Chair's absence or disability, a Director who is the Chair's delegate or who is appointed by the Board shall perform the duties of the Chair.

(b) Executive Director. The Executive Director shall be the chief executive officer of the Corporation. The Member shall appoint the Executive Director, who shall serve until his or her death, resignation, disability or removal in accordance with these Bylaws. Subject to the powers expressly reserved to the Board or the Member, the Executive Director shall, in general, supervise and control all the business and affairs of the Corporation, and shall see that the objectives, policies and orders of the Board are properly executed. The Executive Director shall have the power to sign, acknowledge and deliver on behalf of the Corporation all deeds, agreements and other formal instruments. If no Chair has been appointed or in the absence of the Chair, the Executive Director shall preside at each meeting of the Board. In general, he or she

shall perform such other duties incident to the office of Executive Director and such other duties as may from time to time be assigned to the Executive Director by these Bylaws, by the Board, or by the Member.

(c) Secretary. The Secretary shall: maintain the minutes of the meetings of the Board in the corporate records; give or cause to be given all notices required by these Bylaws or by law; serve as custodian of the Corporation's records; make such records available to the Board upon its request; and perform all other duties incident to the office or delegated by the Board or these Bylaws.

(d) Treasurer. The Treasurer shall: supervise the receipt and custody of the Corporation's funds and investments; render a full account and statement of the condition of the Corporation's finances at each annual meeting and at such other times as requested by the Board; and perform other duties incident to the office or as may be delegated by the Board or these Bylaws.

ARTICLE VII

Committees

Section 7.01 Committees. The Board may create such ad hoc committees from time to time as the Board may deem necessary to carry out special fund raising events or other initiatives of the Board. Committees may not exercise the authority of the Board, and any acts taken by them shall be solely advisory in nature. The members and chairs of each committee shall be appointed by the Board, and each such committee shall consist of at least one (1) Director and two (2) other individuals who may or may not be Trustees. Each committee established by the Board shall be chaired by a Director of the Board. Committee members shall serve at the pleasure of the Board and until their successors are elected.

Section 7.02 Committee Procedures; Action by Committee. Each committee may fix rules of procedure for its business. A majority of the members of a committee shall constitute a quorum for the transaction of business and the act of a majority of those present at a meeting at which a quorum is present shall be the act of the committee. Any action required or permitted to be taken at a meeting of a committee may be taken without a meeting, if a unanimous written consent which sets forth the action is signed by each member of the committee and filed with the minutes of the committee. The members of a committee may conduct any meeting thereof by conference telephone in accordance with the provisions of Section 4.06.

Section 7.03 "Medical Review Committees." Any committee or subcommittee referred to in or otherwise established in accordance with the provisions of these Bylaws, as well as the Board itself, when engaged in any peer review activity, is intended to be a "medical review committee" within the meaning of that term as set forth in Chapter 368a of the Connecticut General Statutes, as amended from time to time.

ARTICLE VIII

Conflict of Interest; Confidentiality

Section 8.01 “Conflict of Interest” Defined; Conflict of Interest and Confidentiality Policies. The Board expects its members to exercise good judgment and follow high ethical standards. Individuals serving the Corporation should never permit private interests to conflict in any way with their obligations to the Corporation and to any entities affiliated with the Corporation. In addition, all members of the Board must honor the confidential nature of Corporation information and strive to maintain its confidentiality. To this end, from time to time the Board shall adopt a Conflict of Interest Policy and a Confidentiality Policy; such policies shall be deemed by this reference to be a part of these Bylaws. These policies shall be consistent with requirements of state law and the law of tax-exempt organizations, and shall address, among other things: the definition of “confidential materials” and “related persons”; disclosure by Board members; the purchase of goods and services; compensation decisions; and procedures to implement and enforce these policies.

ARTICLE IX

Miscellaneous

Section 9.01 Principal Office. The principal office of the Corporation shall be located in New London, Connecticut.

Section 9.02 Waivers of Notice. Whenever any notice of time, place, purpose or any other matter, including any special notice or form of notice, is required or permitted to be given to any person by law or under the provisions of the Certificate of Incorporation or these Bylaws, or of a resolution of the Member or the Board of Trustees, a written waiver of notice signed by the person or persons entitled to such notice, whether before or after the time stated therein, shall be equivalent to the giving of such notice. The Secretary of the Corporation shall cause any such waiver to be filed with or entered upon the records of the Corporation or, in the case of a waiver of notice of a meeting, the records of the meeting. The attendance of any person at or participation in a meeting waives any required notice to that person of the meeting unless at the beginning of the meeting, or promptly upon the person’s arrival, the person objects to the holding of the meeting or the transacting of business at the meeting and does not thereafter vote for or assent to action taken at the meeting.

ARTICLE X

Amendments

Section 10.01 Amendments. Except as otherwise provided by the Certificate of Incorporation, or by law, the Member and the System Parent may adopt, amend or repeal these Bylaws.

**Adopted by the Board of Trustees of
Lawrence + Memorial Corporation on August 29, 2016**

Exhibit 2.1.4(E)

Amended and Restated Certificate of Incorporation of LMMG

**AMENDED AND RESTATED
CERTIFICATE OF INCORPORATION**

L&M PHYSICIAN ASSOCIATION, INC.

L&M PHYSICIAN ASSOCIATION, INC. hereby amends and restates its Certificate of Incorporation so that the same shall read in its entirety as follows:

1. Name. The name of the Corporation is L&M PHYSICIAN ASSOCIATION, INC. (the “Corporation”).

2. Purposes. The nature of the activities to be conducted and the purposes to be promoted or carried out by the Corporation shall be exclusively charitable, scientific and educational within the meaning of Section 501(c)(3) of the Internal Revenue Code of 1986, as amended (the “Code”), and shall include the following:

(a) to operate and maintain one or more offices or facilities for the study, diagnosis and treatment of human ailments and injuries by licensed persons;

(b) to render medical and surgical treatment, consultation or advice by duly licensed employees or agents of the Corporation to patients without regard to race, color, creed, sex, age or ability to pay for such care and services;

(c) to promote, enhance, improve, and develop medical, surgical and scientific research at providers affiliated with Yale-New Haven Health Services Corporation, including, for so long as such providers are affiliated with the Yale New Haven Health System (the “System”) administered by Yale-New Haven Health Services Corporation (“YNHHSC”), which System shall include Lawrence + Memorial Corporation, Lawrence + Memorial Hospital, Westerly Hospital, Bridgeport Hospital, Greenwich Hospital, Yale-New Haven Hospital, and such other providers that may affiliate with the System in the future (the “Affiliated Delivery Networks”) and throughout the communities they serve;

(d) to promote, enhance, improve and augment the quality of medical and clinical education and patient care at the Affiliated Delivery Networks and at any other sites determined by the Corporation;

(e) to promote and enhance a high quality of medical care and other human services for the benefit of all persons in the communities it serves;

(f) to augment the planning process for the promotion of the general well-being and human health needs of the communities it serves;

(g) to solicit, accept, hold, invest, reinvest, and administer any contributions, grants, donations, gifts, bequests, devises, benefits of trusts (but not to act as trustee of any trust), and property of any sort, without limitation as to amount or value, and to use, disperse or donate the income or principal thereof for exclusively charitable and educational purposes in such

manner as, in the judgment of the Board of Trustees and the Member of the Corporation, will best promote the purposes of the Corporation;

(h) to contract for, purchase, receive, own, manage, operate or lease property, real, personal and mixed, wheresoever situated, as may be necessary to promote and further the purposes and objectives of the Corporation; and

(i) to engage in any lawful act or activity for which a medical foundation may be organized under Chapter 594b of the Connecticut General Statutes or for which a nonstock corporation may be organized under Chapter 602 of the Connecticut General Statutes, the Connecticut Revised Nonstock Corporation Act (the "Act").

In furtherance of the purposes set forth herein, the Corporation shall (i) participate as an integral part of the System, which System provides, through the Corporation and its affiliates, comprehensive, cost effective, advanced patient care characterized by safety and clinical and service quality; and (ii) fund and promote activities and programs of the System, including activities and programs of its affiliates, consistent with and in furtherance of the Corporation's charitable purposes and the charitable purposes of all System affiliates.

3. Nonprofit. The Corporation is nonprofit and shall not have or issue shares of stock or make distributions.

4. Member. The Corporation shall have one member, Lawrence + Memorial Corporation (the "Member"). The Member is an affiliate of a "Health System," as defined in Section 33-182aa of the Connecticut General Statutes, overseen by the Member's parent company, Yale New Haven Health Services Corporation (sometimes referred to as the "System Parent"). The Member shall have the rights, powers and privileges provided in the Corporation's Bylaws and by Connecticut law, including certain expressly reserved powers and retained rights described in the Corporation's Bylaws (the "Bylaws"). The Bylaws may provide that certain rights, powers and privileges of the Member shall be reserved exclusively to, or may be subject to the prior approval of, the System Parent.

5. Board of Trustees. Subject to the rights, powers and privileges of the Member or the System Parent, the Corporation shall operate under the management of its Board of Trustees. The Bylaws may provide that certain persons occupying certain positions within or without the Corporation shall be ex-officio trustees, who may be counted in determining a quorum and may have the right to vote as may be provided in the Bylaws. As may be further provided in the Bylaws, the terms of elected trustees may be staggered by dividing the elected trustees into up to three groups so that approximately an equal number of such trustees have terms that expire each year. Trustees may be removed by the Member or at the direction of the System Parent as provided in the Bylaws.

6. Restrictions. No part of the net earnings of the Corporation shall inure to the benefit of, or be distributable to, the Corporation's trustees, officers or other private persons, except that the Corporation shall be authorized and empowered to pay reasonable compensation for services rendered and to make payments and distributions in furtherance of the purposes set forth in Section 2 hereof. No substantial part of the activities of the Corporation shall be the carrying on of propaganda, or otherwise attempting to influence legislation, and the Corporation shall not participate in, or intervene in (including the publishing or distribution of "statements") any political campaign on behalf of any candidate for public office. Notwithstanding any other provision of this Certificate of Incorporation, the Corporation shall not carry on any other activities not permitted to be carried on (a) by a corporation exempt from federal income tax under Section 501(c)(3) of the Code, or (b) by a corporation, contributions to which are deductible under Section 170(c)(2) of the Code.

7. Dissolution. Upon the dissolution or termination of the existence of the Corporation, all of its property and assets, after payment of the lawful debts of the Corporation and the expenses of its dissolution or termination, shall be delivered, conveyed and paid over (subject to any restrictions imposed by any applicable will, deed, grant, conveyance, agreement, memorandum, writing or other governing document) to YNHHS, or, if at the time of the dissolution or termination of the existence of the Corporation, YNHHS is not in existence or does not qualify as exempt under Section 501(c)(3) of the Code, to any organization (or organizations) that qualifies as an organization exempt under Section 501(c)(3) of the Code, in such proportions and for such exclusively charitable, scientific or educational purposes as the Board of Trustees may determine.

8. Limitation of Liability of Trustees. In addition to and not in derogation of any other rights conferred by law, a trustee shall not be personally liable for monetary damages for breach of duty as a trustee in an amount greater than the amount of compensation received by the trustee for serving the Corporation during the year of the violation, provided that such breach did not (a) involve a knowing and culpable violation of law by the trustee, (b) enable the trustee or an associate, as defined in Section 33-840 of the Connecticut General Statutes, to receive an improper personal economic gain, (c) show a lack of good faith and a conscious disregard for the duty of the trustee to the Corporation under circumstances in which the trustee was aware that his or her conduct or omission created an unjustifiable risk of serious injury to the Corporation, or (d) constitute a sustained and unexcused pattern of inattention that amounted to an abdication of the trustee's duty to the Corporation. Any lawful repeal or modification of this Section 8 or the adoption of any provision inconsistent herewith by the Board of Trustees or the Member of the Corporation shall not, with respect to a person who is or was a trustee, adversely affect any limitation of liability, right or protection of such person existing at or prior to the effective date of such repeal, modification or adoption of a provision inconsistent herewith. The limitation of liability of any person who is or was a trustee provided for in this Section 8 shall not be exclusive of any other limitation or elimination of liability contained in, or which may be provided to any person under, Connecticut law.

9. Indemnification. The Corporation shall provide its trustees with the full amount of indemnification that the Corporation is permitted to provide pursuant to the Act. In furtherance of the foregoing, the Corporation shall indemnify its trustees against liability as defined in Section 33-1116(4) of the Act to any person for any action taken, or any failure to take any action, as a trustee, except liability that (1) involved a knowing and culpable violation of law by the trustee, (2) enabled the trustee or an associate to receive an improper personal economic gain, (3) showed a lack of good faith and a conscious disregard for the duty of the trustee to the Corporation under circumstances in which the trustee was aware that his or her conduct or omission created an unjustifiable risk of serious injury to the Corporation, or (4) constituted a sustained and unexcused pattern of inattention that amounted to an abdication of the trustee's duty to the Corporation.

The Corporation may indemnify and advance expenses to each officer, employee or agent of the Corporation who is not a trustee, or who is a trustee but is made a party to a proceeding in his or her capacity solely as an officer, employee or agent, to the same extent as the Corporation is permitted to provide the same to a trustee, and may indemnify and advance expenses to such persons to the extent permitted by Section 33-1122 of the Act.

Notwithstanding any provision hereof to the contrary, the Corporation shall not indemnify any trustee, officer, employee or agent against any penalty excise taxes assessed against such person under Section 4958 of the Code.

10. Amendment of Certificate of Incorporation and Bylaws. This Certificate of Incorporation and the Bylaws of the Corporation may be amended or repealed, and new Bylaws may be adopted, only with the approval of the Member and the System Parent.

11. References. References in this Certificate of Incorporation to a Section of the Code shall be construed to refer both to such Section and to the regulations promulgated thereunder, as they now exist or may hereafter be amended. References in this Certificate of Incorporation to a provision of the Connecticut General Statutes or any provision of Connecticut law set forth in such Statutes is to such provision of the General Statutes of Connecticut or the corresponding provision(s) of any subsequent Connecticut law. Reference in this Certificate of Incorporation to a provision of the Act is to such provision of the Connecticut Revised Nonstock Corporation Act, as amended, or the corresponding provisions(s) of any subsequent Connecticut law.

Schedule 6.5

YNHHSC Third Party Approvals

1. The Federal Trade Commission must be given notice of the appointment of YNHHSC as the sole member of L+M through the premerger notification program under the HSR Act, and the transaction may not close until the HSR-required waiting period has passed.

2. **Certificate of Need approval from OHCA for the appointment of YNHHSC as the sole corporate member of L+M pursuant to the YNHHSC-L+M Affiliation Agreement, as amended by this First Amendment will require Certificate of Need approval from OHCA.**

3. The merger of LMMG with and into NEMG will require notice to OHCA of LMMG Board approval of the merger and Certificate of Need approval from OHCA, and **at least** thirty (30) days prior to consummating the merger and closing the aforementioned transaction, notice must be filed with the Connecticut Attorney General.

4. The appointment of YNHHSC as the ultimate corporate parent of LMW must be approved by both RIDOH and the Rhode Island Attorney General through a Hospital Conversion Act application. The change in control effected by the appointment of YNHHSC as the ultimate parent of LMW must also be approved by the RIDOH Office of Health Systems Development through a Change in Effective Control application.

5. Notice of the Affiliation must be given to the Connecticut Attorney General at the same time that premerger notification under the HSR Act is given to the Federal Trade Commission.

~~6. A Transaction Test certificate is required to be delivered as a condition to the merger of LMMG with and into NEMG in satisfaction of the requirements of Section 408 of the YNHHSC Master Trust Indenture; Section 6.27 of that certain Reimbursement Agreement by and between YNHHSC and Bank of America, N.A., dated as of June 1, 2014; and each of the three International Swap Dealers Association, Inc. Master Agreements, each dated as of June 23, 2014, by and between YNHHSC and the following counterparties respectively: (i) Barclays Bank PLC; (ii) JPMorgan Chase Bank, N.A. (“JPMC”); and (iii) Goldman Sachs Bank USA.~~

~~7. The written consent of Wells Fargo Bank, National Association (“Wells Fargo”) is required to be obtained as a condition of the merger of LMMG with and into NEMG, pursuant to Section 7.6(b) of that certain Amended and Restated Letter of Credit and Reimbursement Agreement by and among Wells Fargo, Yale New Haven Hospital, Inc. and YNHHSC, dated as of June 23, 2014.~~

~~8. The written consent of JPMC is required to be obtained as a condition of the merger of LMMG with and into NEMG, pursuant to Section 15(d) of that certain Letter of Credit and Reimbursement Agreement by and between YNHHSC and JPMC, dated as of June 1, 2014.~~

96. The 1999 Affiliation Agreement between Yale University and YNHHSC, as amended (the “1999 Affiliation Agreement”) requires that if a health care provider becomes a member of

Yale New Haven Health System, YNHHC must promptly notify the Yale School of Medicine (“YSM”) and, if such new system member has medical education affiliation agreements with medical schools other than YSM, YNHHC must give notice of the expiration date and material program terms of such medical education affiliation agreements.

Schedule 7.5

L+M Third Party Approvals

1. The Federal Trade Commission must be given notice of the appointment of YNHHS as the sole member of L+M through the premerger notification program under the HSR Act, and the transaction may not close until the HSR-required waiting period has passed.

2. **Certificate of Need approval from OHCA for the appointment of YNHHS as the sole corporate member of L+M pursuant to the YNHHS-L+M Affiliation Agreement, as amended by this First Amendment** will require Certificate of Need approval from OHCA.

3. The merger of LMMG with and into NEMG will require notice to OHCA of LMMG Board approval of the merger and Certificate of Need approval from OHCA, and **at least** thirty (30) days prior to consummating the merger and closing the aforementioned transaction, notice must be filed with the Connecticut Attorney General.

4. The appointment of YNHHS as the ultimate corporate parent of LMW must be approved by both RIDOH and the Rhode Island Attorney General through a Hospital Conversion Act application. The change in control effected by the appointment of YNHHS as the ultimate parent of LMW must also be approved by the RIDOH Office of Health Systems Development through a Change in Effective Control application.

5. Notice of the Affiliation must be given to the Connecticut Attorney General at the same time that premerger notification under the HSR Act is given to the Federal Trade Commission.

6. ~~(7)~~ Consent of Bank of America, N.A. to the consummation of the transactions contemplated by the Affiliation Agreement under Section 7(p), and confirmation of Bank of America, N.A. that the transactions contemplated by the Affiliation Agreement will not contravene Section 7(g), of that certain Continuing Covenants Agreement, dated as of October 13, 2013, by and among L+M and LMH on the one hand and Bank of America, N.A. on the other hand.

~~6~~7. Consent of the Connecticut Health and Education Facilities Authority to the consummation of the transactions contemplated by the Affiliation Agreement under Section 6.11 of the Master Trust Indenture, dated as of February 1, 1990, by and among L+M and LMH on the one hand and the Master Trustee named therein on the other hand, as the same has been amended or supplemented from time to time in accordance with its terms.

~~7~~8. Notification to TD Bank, National Association pursuant to Section 5.30 of that certain Letter of Credit and Reimbursement Agreement, dated as of November 5, 2013, by and among L+M and LMH on the one hand and TD Bank, National Association, on the other hand.

AGENDA

October 11, 2016

- I. Purpose of Meeting: To review conflicting conditions and clarify one set of coordinated conditions.
 - Strategic Plan
 - Financial Reporting
 - Cost and Market Impact Review
 - Independent Monitor
 - Community Benefit
 - Charity Care
 - Employment
 - Governance
 - Licensing, Physician Office Conversion and Cost Savings Attainment

- II. Timing and Format of Reporting

Scheduled Meeting
Lawrence + Memorial and Yale-New Haven Health System
Certificate of Need Transfer of Ownership
Docket Numbers 15-32033-CON and 15-32032-CON

Date of Meeting: 10/11/2016

Name (Please Print)	Affiliation
Gayle Cappuzzo	YNHHS
May Rosenthal	YNHHS

Present from OHCA were:

Kimberly Martone	Carmen Cotto
Karen Roberts	

Meeting Start Time: 2:00 pm
 Meeting End Time: 3:30 pm
 KR

September 28, 2016

Ms. Kimberly Martone
State of Connecticut
Office of Healthcare Access
410 Capitol Avenue, MS#13HCA
Hartford, Connecticut 06134-0308

Dear Ms. Martone,

Pursuant to the Order contained within the Agreed Settlement of Docket Number 15-32033-CON, "Transfer of ownership of Lawrence + Memorial Corporation to Yale New Haven Health Services Corporation", Condition 1 and Condition 2 are required to be submitted within twenty (20) days following the Closing Date of this transaction. The Closing Date was September 8th.

Attached please find documents responsive to Conditions as 1 and 2. Condition 1 is being posted on L+MH's website immediately.

A copy of these documents will be sent via U.S. postal service.

Regards,

Nancy Levitt Rosenthal
Vice President, Strategy and Regulatory Planning

Re: **Limited Disclosures Pursuant to Affiliation Agreement by and between
Yale-New Haven Health Services Corporation and Lawrence + Memorial
Corporation**

Ladies and Gentlemen:

Reference is made to the Affiliation Agreement, dated as of July 17, 2015 (the "Effective Date"), by and between Yale-New Haven Health Services Corporation ("YNHHSC") and Lawrence + Memorial Corporation ("L+M"), as amended to the date hereof (the "Affiliation Agreement"). All capitalized terms used, but not defined, herein shall have the meaning ascribed to such terms in the Affiliation Agreement.

YNHHSC and L+M agree and confirm that YNHHSC has made certain limited disclosures for purposes of Article 4 of the Affiliation Agreement. More specifically, although Section 4.1.1 of the Affiliation Agreement indicates that YNHHSC has provided or made available to L+M the governing documents of all YNHHSC Affiliates, governing documents have been provided only for certain key YNHHSC Affiliates. In addition, Section 4.9.1 of the Affiliation Agreement indicates that to the Knowledge of YNHHSC, the YNHHSC Affiliates have not had any breach of information security that would constitute (i) a "security incident" (as defined in 45 CFR § 164.304) that resulted in material and actual unauthorized access, use, disclosure, modification or destruction of Protected Health Information or (ii) a "breach" under Section 13402 of the American Recovery and Reinvestment Act of 2009 and any regulations promulgated thereunder or state information security laws or regulations that require notification to or of government officials, or to individuals whose information may have been breached, the YNHHSC Affiliates have only disclosed (i) such breaches that are not routine and (ii) such breaches in connection with which no YNHHSC Affiliate could reasonably expect to have material liability. Finally, although Section 4.10.7 of the Affiliation Agreement indicates that YNHHSC has provided or made available to L+M copies of the letters and/or rulings from the IRS which recognize that the YNHHSC Obligated Group Members are Tax-Exempt Organizations exempt from United States federal income taxes under Section 501(a) of the Code as organizations described in Section 501(c)(3) of the Code and not as "private foundations" as such term is defined in Section 509 of the Code, such determinations have not been provided.

YNHHSC and L+M agree that the disclosures made under Sections 4.1.1, 4.9.1 and 4.10.7 of the Affiliation Agreement are sufficient and L+M waives any closing condition or other requirement for YNHHSC to make any additional disclosure under such sections. To the best Knowledge of YNHHSC, the effect of the information not disclosed, provided or made available to L+M as described above, would not, individually or in the aggregate, be reasonably expected to have a YNHHSC Material Adverse Effect.

Re: Schedule Supplement Pursuant to Affiliation Agreement by and between Yale-New Haven Health Services Corporation and Lawrence + Memorial Corporation

Ladies and Gentlemen:

Reference is made to the Affiliation Agreement, dated as of July 17, 2015 (the "Effective Date"), by and between Yale-New Haven Health Services Corporation ("YNHHSC") and Lawrence + Memorial Corporation ("L+M"), as amended to the date hereof (the "Affiliation Agreement"). All capitalized terms used, but not defined, herein shall have the meaning ascribed to such terms in the Affiliation Agreement.

Pursuant to Section 5.3 of the Affiliation Agreement, YNHHSC hereby delivers to L+M this update to the YNHHSC Disclosure Schedule delivered as of the Effective Date. This Schedule Supplement includes (x) information that has first arisen or of which YNHHSC has first obtained Knowledge after the Effective Date and that if it existed on the Effective Date would have been required to be reflected on the Disclosure Schedules and (y) information that is necessary to correct any disclosure schedule or representation or warranty and that has first arisen or of which YNHHSC has first obtained Knowledge after the Effective Date. This Schedule Supplement shall be deemed to be incorporated into and to supplement and amend the YNHHSC Disclosure Schedule as of the Closing.

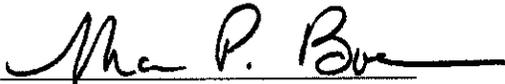

Section and sub-section numbers and letters used in the schedules to this letter correspond to the section and sub-section numbers and letters in the Affiliation Agreement, unless otherwise noted. The captions of each section in the schedules to this letter are included for convenience only and are not intended to limit the scope of the information required to be specifically disclosed.

No disclosure made herein or in the schedules to this letter constitutes an admission of any liability or obligation of any YNHHSC Affiliate, an admission against any interest of any YNHHSC Affiliate or a concession as to any defense available to any YNHHSC Affiliate. Unless the Affiliation Agreement specifically provides otherwise, the disclosure of specific item herein, shall not be deemed to constitute an admission that such item is not in the ordinary course of business. To the extent that any representation or warranty contained in the Affiliation Agreement is limited or qualified by the materiality of the matters to which the representation or warranty is given, the inclusion of any matter in any Schedule does not constitute an admission that such matters are material or will have a YNHHSC Material Adverse Effect. Certain information set forth herein is included solely for informational purposes and may not be required to be disclosed pursuant to the Affiliation Agreement.

If there is any inconsistency between any provision or statement in the Affiliation Agreement and any provision or statement in the schedules (other than an exception in any section or subsection to a specific representation or warranty), then the provision or statement in the Affiliation Agreement shall control.

Sincerely,

Yale-New Haven Health Services Corporation

 13. Yale-New Haven Community Medical Group, Inc. is also a member of YNH-Physicians Group.
 14. Joint venture between Yale-New Haven Ambulatory Services Corporation (80%) and Rural Research Institute, LLC (20%).

Update to Schedule 4.8

Subsequent Events

The following language is added to the end of Paragraph 1 of Schedule 4.8:

The budgets for fiscal years 2016 and 2017 have been finalized, and under the final budgets we estimate that YNHHSC will incur a net tax of \$149.2M, or 38.1% of the total tax liability for the State, in 2016, and a net tax of \$158.7M, or 36.2% of the total tax liability for the State, in 2017.

Updates to Schedule 4.27

Consents and Approvals

The following paragraph is added as Paragraph 10 to Schedule 4.27:

The Parties were required to and did submit a Notice of Hospital Affiliation to the Connecticut Attorney General pursuant to Conn. Gen. Stat. § 19a-486i(e).

The following paragraph is added as Paragraph 11 to Schedule 4.27:

As part of the Hospital Conversion Act approval in Rhode Island, YNHHS and L+M must pursue a separate *cy pres* action relating to the charitable assets of the Westerly Hospital Foundation, but *cy pres* relief need not be obtained prior to Closing.

Re: **Limited Disclosures and Certain Waivers Pursuant to Affiliation Agreement By and Between Yale-New Haven Health Services Corporation and Lawrence + Memorial Corporation**

Ladies and Gentlemen:

Reference is made to the Affiliation Agreement, dated as of July 17, 2015 (the "Effective Date"), by and between Yale-New Haven Health Services Corporation ("YNHHSC") and Lawrence + Memorial Corporation ("L+M"), as amended to the date hereof (the "Affiliation Agreement"). All capitalized terms used, but not defined, herein shall have the meaning ascribed to such terms in the Affiliation Agreement.

Article 3

L+M and YNHHSC agree and confirm that L+M has made certain limited representations and disclosures for purposes of Article 3 of the Affiliation Agreement. More specifically, although:

1. Section 3.5.1 of the Affiliation Agreement indicates that L+M has provided to YNHHSC a copy of current title reports relating to the Principal Properties, such title reports have been provided only as of the Effective Date,
2. Section 3.9.1 of the Affiliation Agreement indicates that to the Knowledge of L+M, the L+M Affiliates have not had any breach of information security that would constitute (i) a "security incident" (as defined in 45 CFR § 164.304) that resulted in material and actual unauthorized access, use, disclosure, modification or destruction of Protected Health Information or (ii) a "breach" under Section 13402 of the American Recovery and Reinvestment Act of 2009 and any regulations promulgated thereunder or state information security laws or regulations that require notification to or of government officials, or to individuals whose information may have been breached, the L+M Affiliates have only disclosed (i) such breaches that are not routine and (2) such breaches in connection with which no L+M Affiliate could reasonably expect to have material liability,
3. Section 3.9.1 of the Affiliation indicates that L+M has provided to YNHHSC copies of any voluntary self-disclosure filing made with CMS or any other Governmental Authority and a description of the status of each such self-disclosure filing, L+M has only provided a description of the status of each such self-disclosure filing and offered to YNHHSC a copy of each such self-disclosure filing,
4. Section 3.9.6 of the Affiliation Agreement indicates that L+M has provided to YNHHSC copies of certain Contracts as of the Closing Date, copies of such Contracts have been provided only as of the Effective Date,
5. Section 3.19 of the Affiliation Agreement indicates that L+M has provided or made available to YNHHSC a correct and complete copy of (a) the minute books of the L+M Affiliates and (b) the minutes maintained by the L+M Affiliates quality assurance committees since October 1, 2011,

each subject to the qualifications set forth in Section 3.19 of the Affiliation Agreement, L+M has only provided such minutes through the Effective Date, and

6. Schedule 3.27 L+M previously disclosed to YNHHSK on Schedule 3.27 to the Affiliation Agreement that the appointment of YNHHSK as the ultimate parent of LMI may require approval of the Cayman Island Monetary Authority under Section 12 of the Cayman Island Insurance Law. The approval process with the Cayman Island Monetary Authority is currently underway, but such approval may not be received prior to the Closing. YNHHSK hereby acknowledges and confirms that it is aware that the approval of the Cayman Island Monetary has not yet been received. If approval is not received prior to the Closing, L+M will use commercially reasonable efforts to obtain the required approval as soon as practicable after the Closing.
7. Section 3.34 of the Affiliation Agreement indicates that, except as specifically disclosed to YNHHSK, none of the L+M Affiliates has material Liabilities or material obligations of any nature, as more specifically set forth in Section 3.34 of the Affiliation Agreement, arising out of, or relating to, the business operations of L+M Affiliates and which are required to be reflected on a balance sheet prepared in accordance with GAAP, except: (a) liabilities or obligations as and to the extent reflected on or accrued or reserved against as set forth in the L+M 2014 Audited Financial Statements; and (ii) liabilities incurred since the date of the L+M 2014 Audited Financial Statements in the ordinary course of business, L+M is making this representation based upon its 2015 audited financial statements, which have previously been provided by L+M to YNHHSK, rather than the L+M 2014 Audited Financial Statements.

L+M and YNHHSK agree that the disclosures and representations and warranties made under Sections 3.5.1, 3.9.1, 3.9.6, 3.19 and 3.34 of the Affiliation Agreement are sufficient and YNHHSK waives any closing condition or other requirement for L+M to make any additional representations or disclosures under such sections.

Article 5

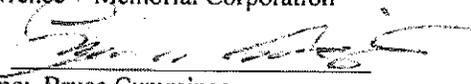

Pursuant to Section 5.1.9(a) of the Affiliation Agreement, L+M is required to engage a qualified environmental consultant and to conduct an operational compliance self-audit of the operations of LMH, LMW, LMMG and VNA of Southeastern Connecticut with respect to Environmental, Health and Safety Requirements (an “Environmental Self-Audit”) and to complete a written report of such self-audit prior to the Closing Date. As of the Closing Date, L+M has completed an Environmental Self-Audit of and delivered the corresponding written report to YNHHSK with respect to the Owned Real Property, but has not completed an Environmental Self-Audit of any leased real properties of LMH, LMW, LMMG or VNA of Southeastern Connecticut that are leased by LMH, LMW, LMMG or VNA of Southeastern Connecticut as of the Effective Date (collectively, the “Leased Properties”). L+M hereby agrees to complete an Environmental Self-Audit of the Leased Properties and to deliver the corresponding written report to YNHHSK with respect thereto within a reasonable time period following the Closing Date.

YNHHSK hereby agrees to waive the requirement that L+M complete an Environmental Self-Audit under Section 5.1.9(a) of the Affiliation Agreement with respect to the Leased Properties prior to the Closing Date; provided, that, L+M complete such Environmental Self-Audit of each Leased Property and deliver the corresponding written report to YNHHSK with respect thereto within a reasonable time period following the Closing Date.

To the best Knowledge of L+M, the effect of the information not disclosed, provided or made available to YNHHSK as described above, would not, individually or in the aggregate, be reasonably expected to have an L+M Material Adverse Effect.

Sincerely,

Lawrence + Memorial Corporation

**Re: Schedule Supplement Pursuant to Affiliation Agreement By and Between
Yale-New Haven Health Services Corporation and Lawrence + Memorial
Corporation**

Ladies and Gentlemen:

Reference is made to the Affiliation Agreement (the "Affiliation Agreement"), dated as July 17, 2015, by and between Yale-New Haven Health Services Corporation ("YNHHSC") and Lawrence + Memorial Corporation ("L+M"). All capitalized terms used, but not defined, herein shall have the meaning ascribed to such terms in the Affiliation Agreement.

Pursuant to Section 5.3 of the Affiliation Agreement, L+M hereby delivers to YNHHSC this update to the L+M Schedules to the Affiliation Agreement (the "L+M Disclosure Schedule") delivered as of the Effective Date. This letter (the "Schedule Supplement") includes (x) information that has first arisen or of which L+M has first obtained Knowledge after the Effective Date and that if it existed on the Effective Date would have been required to be reflected on the Disclosure Schedules and (y) information that is necessary to correct any disclosure schedule or representation or warranty and that has first arisen or of which L+M has first obtained Knowledge after the Effective Date. This Schedule Supplement shall be deemed to be incorporated into and to supplement and amend the L+M Disclosure Schedule as of the Closing.

Section and sub-section numbers and letters used in the attached Schedule Supplement correspond to the section and sub-section numbers and letters in the Affiliation Agreement, unless otherwise noted, and any information disclosed in in the attached Schedule Supplement shall be deemed to be disclosed to YNHHSC for all purposes of the Affiliation Agreement so long as such disclosure's relevance to the applicable section(s) of the Affiliation Agreement is reasonably apparent on its face. The captions of each section in the Schedule Supplement are included for convenience only and are not intended to limit the scope of such part, paragraph or section of the Schedule Supplement as set forth in the Affiliation Agreement.

No disclosure made herein or in the Schedule Supplement constitutes an admission of any liability or obligation of any L+M Affiliate, an admission against any interest of any L+M

Affiliate or a concession as to any defense available to any L+M Affiliate. Unless the Affiliation Agreement specifically provides otherwise, the disclosure of specific item herein, shall not be deemed to constitute an admission that such item is not in the ordinary course of business. To the extent that any representation or warranty contained in the Affiliation Agreement is limited or qualified by the materiality of the matters to which the representation or warranty is given, the inclusion of any matter in the Schedule Supplement does not constitute an admission that such matters are material or will have a L+M Material Adverse Effect. Certain information set forth herein is included solely for informational purposes and may not be required to be disclosed pursuant to the Affiliation Agreement.

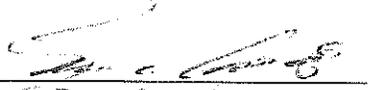

If there is any inconsistency between any provision or statement in the Affiliation Agreement and any provision or statement in the Schedule Supplement (other than an exception in any section or subsection to a specific representation or warranty), then the provision or statement in the Affiliation Agreement shall control.

*The fee interest in the land on which the Pequot Property is situated is not owned by an L+M Affiliate, but is leased by LMH from the City of Groton, CT, pursuant to a Ground Lease, dated May 1, 1991.

^LMH owns a 7/8 interest in the Beach Property (a beach located in New London, CT for the use of L+M employees and their families). The remaining 1/8 interest in the Beach Property is held by Bank of America, in trust, on behalf of the Elizabeth Stamm Estate.

The following properties are currently on the market: 11 Wells Street Unit 6, Westerly, RI and One Huntley Road, Old Lyme, CT (offer to purchase has been received).

Update to Schedule 3.8

Subsequent Events

Schedule 3.8 is hereby amended as follows:

(b)

The description of the Integrated Leave Program is hereby amended and restated in its entirety as follows:

“Integrated Leave Program - Effective April 1, 2015, LMH adopted a new integrated leave program for Directors and Managers and Vice Presidents that are paid biweekly (impacting 120 employees), which includes LMH paid short term disability (self-insured) and long term disability (fully insured) insurance through Unum (Policy No. 468882 001). The plan also moves affected employees to an “All Time” bank for days off rather than Separate Paid Time Off (“PTO”) and Sick banks and provides for a 2015 PTO cash out of up to 5 days (with 15 days permitted to be kept in the PTO bank) and eliminates Sick day cash out for new employees (current employees may maintain up to 100 days in frozen Sick bank until used for short term disability paid at 75% and L+M has promised to pay each applicable employee for any hours in excess of 800 in their respective Sick banks at such employee’s current base rate (up to \$10,000). No PTO cash out will be permitted in 2016 and employees will be permitted to roll over 10 PTO days per year on a going forward basis.”

The following is hereby added to subsection (b):

The L+M Affiliates have agreed to pay retention bonuses to certain select individuals in connection with the consummation of the transactions contemplated by the Affiliation Agreement and/or the go-live of Epic Connect.

(d)

The following items are hereby added to subsection (d):

- (1) LMH has purchased an HVAC for the 600 Building for a purchase price of \$1,135,743.
- (2) LMW has purchased an HVAC for its operating room for a purchase price of \$1,840,000.

(l)

The following item is hereby added to subsection (l):

- (1) In 2015 the primary layer of insurance maintained by or for LMI was exhausted, but no excess layers of such insurance were exhausted.

Update to Schedule 3.10.6

Real Property Certiorari Proceedings

Schedule 3.10.6 is hereby amended and restated in its entirety as follows:

Along with Yale-New Haven Hospital, Bridgeport Hospital, Greenwich Hospital, the Connecticut Hospital Association and a number of other Connecticut hospitals, L+M have challenged the constitutionality of the Hospitals Tax with the State of Connecticut Department of Social Services and Department of Revenue Services.

Update to Schedule 3.13

Transactions with Affiliates

Schedule 3.13 is hereby amended as follows:

(1) Number (5) is hereby deleted in its entirety and replaced with the following:

(5) Medical Office Lease, effective August 1, 2015, by and between The New London Medical Arts Group, LLC and L+M. The New London Medical Arts Group, LLC is partially owned by Ross J. Sanfilippo, D.M.D., a member of the L+M Board of Directors.

(2) Number (9) is hereby deleted in its entirety.

(3) Number (13) is hereby deleted in its entirety and replaced with the following:

(13) Letter Agreement, dated January 1, 2016, between David F. Reisfeld, MD and LMH (for Dr. Reisfeld's services of LMH Medical Staff Immediate Past President).

(4) The following items are hereby added to Schedule 3.13:

(1) Intensivist Medical Director Agreement, dated as of January 1, 2009, by and between LMH, Southeastern Pulmonary Associates, P.C., Gold Coast Pulmonary and Sleep and Shoreline Pulmonary Associates (owned all, or in part, by Niall J. Duhig, MD, a member of the LMH Board of Directors), as amended by First Amendment to the Intensivist Medical Director Agreement, dated as of January 1, 2014, by and between LMH, Southeastern Pulmonary Associates, P.C., Gold Coast Pulmonary and Sleep, Shoreline Pulmonary Associates and IPC Hospitalists of New England, P.C. d/b/a IPC of Connecticut.

(2) Exclusive Services Agreement, dated as of May 2, 2008, by and between LMH and Anesthesia Associates of New London, P.C. (owned in part by Dr. Joseph Cecere, a member of the LMH Board of Directors), as amended by Amendment to Exclusive Services Agreement, dated as of December 28, 2009, Amendment to Exclusive Services Agreement, dated as of February 1, 2014, and Amendment to Exclusive Services Agreement, dated as of August 1, 2016, and as supplemented by the Letter of Understanding, dated as of December 10, 2010.

Update to Schedule 3.16.1

**FIRST AMENDMENT TO THE
AFFILIATION AGREEMENT BY AND BETWEEN
YALE-NEW HAVEN HEALTH SERVICES CORPORATION
AND
LAWRENCE + MEMORIAL CORPORATION**

This First Amendment to the Affiliation Agreement by and between Yale-New Haven Health Services Corporation and Lawrence & Memorial Corporation (this "First Amendment") is made and entered into as of September 8, 2016, by and between Yale-New Haven Health Services Corporation ("YNHHSC") and Lawrence + Memorial Corporation ("L+M").

RECITALS

WHEREAS, YNHHSC and L+M entered into an Affiliation Agreement dated as of July 17, 2015 (the "Affiliation Agreement");

WHEREAS, initially capitalized terms that are used in this First Amendment without other definition have the respective meanings ascribed thereto in the Affiliation Agreement;

WHEREAS, at the time the Parties entered into the Affiliation Agreement, the Parties set forth certain intentions with respect to the merger (the "Merger") of L+M Physician Association, Inc., a Connecticut non-stock medical foundation doing business as L+M Medical Group ("LMMG") and Northeast Medical Group Inc., a Connecticut non-stock medical foundation ("NEMG"), which Merger was contemplated to take place as of the Closing Date and as a condition of Closing pursuant to the Affiliation Agreement;

WHEREAS, the Parties wish to proceed to the Closing without effecting the Merger, but instead to effect the Merger at a date subsequent to the Closing to be agreed upon by YNHHSC and L+M (the "Post Closing Merger Effective Date"); and

WHEREAS, to facilitate the Closing, the Parties wish to amend the Affiliation Agreement;

NOW, THEREFORE, in consideration of the foregoing, of mutual promises of the Parties hereto and of other good and valuable consideration, the receipt and sufficiency of which hereby are acknowledged, the Parties hereby agree, and the Affiliation Agreement is hereby amended as follows.

ARTICLE 1

AMENDMENTS TO AFFILIATION AGREEMENT

1.1 Section 2.1.4 of the Affiliation Agreement is hereby amended as follows (deletions shown in ~~strike through~~; additions shown in **bold**):

“2.1.4 Medical Foundation Matters. As of the Closing Date, L+M shall remain the sole member of LMMG and YNHHS shall remain the sole member of NEMG. Following the Closing, YNHHS and NEMG shall cooperate to maximize the efficiency of operations of LMMG and NEMG. As of the Closing Date, (i) LMMG shall be merged with and into NEMG with NEMG surviving pursuant to an Agreement and Plan of Merger (the “LMMG-NEMG Agreement and Plan of Merger”) in the form attached as Exhibit 2.1.4(A); (ii) two physician employees of NEMG LMMG who are members of the medical staff of LMH and/or LMW, nominated in accordance with the bylaws of NEMG, shall be elected to the board of trustees of NEMG; ~~(iii)~~ (ii) the president of L+M or his or her designee shall be elected to the board of trustees of NEMG; (iii) ~~(iv)~~ the bylaws of NEMG shall be amended and restated in the form of the Amended and Restated Bylaws of NEMG (the “Amended and Restated Bylaws of NEMG”) attached hereto as Exhibit 2.1.4(B); (iv) the certificate of incorporation of NEMG shall be amended and restated in the form of the Amended and Restated Certificate of Incorporation of NEMG (the “Amended and Restated Certificate of Incorporation of NEMG”) attached hereto as Exhibit 2.1.4(C); (v) the bylaws of LMMG shall be amended and restated in the form of the Amended and Restated Bylaws of LMMG (the “Amended and Restated Bylaws of LMMG”) attached hereto as Exhibit 2.1.4(D); and (vi) the certificate of incorporation of LMMG shall be amended and restated in the form of the Amended and Restated Certificate of Incorporation of LMMG (the “Amended and Restated Certificate of Incorporation of LMMG”) attached hereto as Exhibit 2.1.4(E). In addition, as soon as reasonably practicable following the Closing Date, and ~~(vi)~~ the contracts held by Sound Medical Associates, P.C. will be assigned to NEMG PLLC. In addition, as of the Post Closing Merger Effective Date, LMMG shall be merged with and into NEMG with NEMG surviving pursuant to an Agreement and Plan of Merger (the “LMMG-NEMG Agreement and Plan of Merger”) in the form attached as Exhibit 2.1.4(A).”

1.2 The final paragraph of Section 2.1.5 of the Affiliation Agreement is hereby amended as follows (deletions show in ~~strikethrough~~; additions shown in **bold**):

“The LMH Amended Certificate of Incorporation, the LMW Amended Certificate of Incorporation, **the Amended and Restated Certificate of Incorporation of LMMG** and the VNA of Southeastern Connecticut Amended Certificate of Incorporation shall be referred to herein as the “*L+M Subsidiaries Amended Certificates of Incorporation*,” the LMH Amended Bylaws, the LMW Amended Bylaws, ~~and~~ the VNA of Southeastern Connecticut Amended Bylaws, **and the Amended and Restated Bylaws of LMMG** shall be referred to herein as the “*L+M Subsidiaries Amended Bylaws*.” From and after the Closing Date, any other L+M Subsidiaries shall be operated in conformity with the principles reflected in the L+M Subsidiaries Amended Certificates of Incorporation and the L+M Subsidiaries Amended Bylaws.”

1.3 Section 2.2 of the Affiliation Agreement is hereby amended as follows (deletions shown in ~~strikethrough~~; additions shown in **bold**):

“2.2 Maintenance of Separate Corporate Existence. After giving effect to the Closing, the corporate existence, names, rights, privileges, immunities, powers,

franchises, facilities and other licenses, duties and liabilities of L+M and each L+M Subsidiary, ~~other than LMMG~~, shall be governed by the Board of Trustees of L+M or such L+M Subsidiary, as applicable, subject to the L+M Amended Certificate of Incorporation and the L+M Amended Bylaws or the L+M Subsidiaries Amended Certificates of Incorporation and L+M Subsidiaries Amended Bylaws, as applicable, **except as otherwise provided in the LMMG-NEMG Agreement and Plan of Merger as of the Post Closing Merger Effective Date**. Except as otherwise contemplated by this Agreement, the Affiliation shall not result in a transfer or conveyance as of the Closing Date of any asset or the assumption of any liability of either Party or any Affiliate of either Party.”

1.4 Section 2.10 of the Affiliation Agreement is hereby amended as follows (deletions shown in ~~strike~~through; additions shown in **bold**):

“2.10 Obligated Group. On the earliest date following the Closing Date that is reasonably determined by YNHHSC and in accordance with the requirements of the L+M Master Trust Indenture, YNHHSC shall have the authority to cause L+M and LMH, **LMMG**, LMW and/or such other L+M Subsidiaries as YNHHSC shall determine to become YNHHSC Obligated Group Members, and effective upon becoming a YNHHSC Obligated Group Member the applicable L+M Affiliate shall execute a joinder to become a party to the YNHHSC Obligated Group Agreement and shall take such other steps as YNHHSC may require in connection with such status.”

1.5 Section 3.2 of the Affiliation Agreement is hereby amended as follows (deletions shown in ~~strike~~through; additions shown in **bold**):

“3.2 Authorization of Transaction. L+M has full corporate power and authority to execute and deliver this Affiliation Agreement and to perform its obligations hereunder. This Agreement has been duly authorized by all requisite corporate action of L+M. This Agreement has been duly executed and delivered by L+M and, assuming due authorization, execution and delivery by YNHHSC, and receipt of the consents and approvals listed in Schedule 3.27, constitutes a valid and binding obligation of L+M, enforceable against L+M in accordance with its terms (except as may be limited by bankruptcy, insolvency, fraudulent transfer, moratorium, reorganization, preference or similar Applicable Laws of general applicability relating to or affecting the rights of creditors generally and subject to general principles of equity (regardless of whether enforcement is sought in equity or at law)). The amendment of the certificate of incorporation of L+M in the form of the L+M Amended Certificate of Incorporation and the amendment of the bylaws of L+M in the form of the L+M Amended Bylaws, in each case effective as of and subject to the Closing, has been duly authorized by all requisite corporate action of L+M. The LMMG-NEMG Agreement and Plan of Merger to become effective as of **the Post Closing Merger Effective Date** and subject to the Closing: (a) have been duly authorized by all requisite corporate action of L+M; and (b) in the case of LMMG, have been (or upon Closing will be) duly authorized by all requisite corporate action of LMMG. The amendment of the certificate of incorporation of each applicable L+M Subsidiary in the form of: (i) the LMH Amended Certificate of Incorporation; (ii) the LMW Amended Certificate of Incorporation; ~~and~~ (iii) the VNA of Southeastern

Connecticut Amended Certificate of Incorporation; and (iv) the Amended and Restated Certificate of Incorporation of LMMG, and the amendment of the bylaws of each applicable L+M Subsidiary in the form of: (x) the LMH Amended Bylaws; (y) the LMW Amended Bylaws; and (z) the VNA of Southeastern Connecticut Amended Bylaws; and (zz) the Amended and Restated Bylaws of LMMG, in each case effective as of and subject to the Closing: (a) has been duly authorized by all requisite corporate action of L+M; and (b) in the case of each applicable L+M Subsidiary, has been (or upon Closing will be) duly authorized by all requisite corporate action of such L+M Subsidiary.”

1.6 Section 4.2 of the Affiliation Agreement is hereby amended as follows (deletions shown in ~~strikethrough~~; additions shown in **bold**):

“4.2 Authorization of Transaction. YNHHS has full corporate power and authority to execute and deliver this Affiliation Agreement and to perform its obligations hereunder. This Agreement has been duly authorized by all requisite corporate action of YNHHS. This Agreement has been duly executed and delivered by YNHHS and, assuming due authorization, execution and delivery by L+M, and receipt of the consents and approvals listed in Schedule 4.27, constitutes a valid and binding obligation of YNHHS, enforceable against YNHHS in accordance with its terms (except as may be limited by bankruptcy, insolvency, fraudulent transfer, moratorium, reorganization, preference or similar Applicable Laws of general applicability relating to or affecting the rights of creditors generally and subject to general principles of equity (regardless of whether enforcement is sought in equity or at law)). The LMMG-NEMG Agreement and Plan of Merger to become effective as of **the Post Closing Merger Effective Date** and subject to the Closing have been duly authorized by all requisite corporate action of NEMG and YNHHS.”

1.7 Section 9.2(b) of the Affiliation Agreement is hereby amended as follows (deletions shown in ~~strikethrough~~; additions shown in **bold**):

“A copy of the L+M Amended Bylaws, and of the L+M Subsidiaries Amended Bylaws for each of the applicable L+M Subsidiaries ~~other than LMMG~~, certified to be in full force and effect and to be true and correct by the secretary or assistant secretary of L+M;”

1.8 Section 9.2(c) of the Affiliation Agreement is hereby amended as follows (deletions shown in ~~strikethrough~~; additions shown in **bold**):

“An executed copy of the LMMG-NEMG Agreement and Plan of Merger in proper form for filing with the Secretary of State **as of the Post Closing Merger Effective Date**;”

1.9 Section 9.3(e) of the Affiliation Agreement is hereby amended as follows (deletions shown in ~~strikethrough~~; additions shown in **bold**):

“An executed copy of the LMMG-NEMG Agreement and Plan of Merger in proper form for filing with the Secretary of State **as of the Post Closing Merger Effective Date**;”

1.10 Exhibit 2.1.4(B) of the Affiliation Agreement is hereby amended and restated in the form attached to this First Amendment as Exhibit 2.1.4(B) (deletions shown in ~~strikethrough~~;

additions shown in **bold**) [the Amended and Restated Bylaws of NEMG].

1.11 A new Exhibit 2.1.4(D) is hereby added to the Affiliation Agreement in the form attached to this First Amendment as Exhibit 2.1.4(D) [the Amended and Restated Bylaws of LMMG].

1.12 A new Exhibit 2.1.4(E) is hereby added to the Affiliation Agreement in the form attached to this First Amendment as Exhibit 2.1.4(E) [the Amended and Restated Certificate of Incorporation of LMMG].

1.13 Schedule 6.5 of the Affiliation Agreement is hereby amended and restated in the form attached to this First Amendment as Schedule 6.5 (deletions shown in ~~strikethrough~~; additions shown in **bold**).

1.14 Schedule 7.5 of the Affiliation Agreement is hereby amended and restated in the form attached to this First Amendment as Schedule 7.5 (deletions shown in ~~strikethrough~~; additions shown in **bold**).

ARTICLE 2

CLOSING

The Parties agree that the Closing Date and Effective Time are: 4:00 p.m. September 8, 2016.

ARTICLE 3

MISCELLANEOUS

3.1 Except as expressly modified hereby, all other terms and provisions of the Affiliation Agreement shall remain in full force and effect; except that any references to the merger of NEMG and LMMG that are inconsistent with the Parties' intent as reflected in the Recitals above shall be deemed amended by this First Amendment to be consistent with the Parties' intent as set forth in this First Amendment. All other terms and provisions of the Affiliation Agreement are incorporated herein by this reference, and shall govern the conduct of the Parties hereto; *provided, however*, to the extent of any inconsistency between the provisions of the Affiliation Agreement and the provisions of this First Amendment, the provisions of this First Amendment shall control.

3.2 This First Amendment may be executed in multiple counterparts, each of which shall be deemed an original First Amendment, but all of which, taken together, shall constitute one and the same First Amendment, binding on the Parties hereto. The delivery of an executed signature page hereof by facsimile or portable document format (.pdf) shall have the same effect as the delivery of a manually executed counterpart hereof.

3.3 This First Amendment and the Affiliation Agreement (as hereby amended) together contain and constitute the entire agreement between the Parties hereto with respect to the subject matter hereof, and this First Amendment and the Affiliation Agreement (as hereby

Execution Version

amended) may not be modified, amended, or otherwise changed in any manner, except as provided in the Affiliation Agreement (as hereby amended).

3.4 Every provision of this First Amendment is intended to be severable. If any term or provision hereof is declared by a court of competent jurisdiction to be illegal or invalid, such illegal or invalid terms or provisions shall not affect the other terms and provisions hereof, which terms and provisions shall remain binding and enforceable.

3.5 The headings used in this First Amendment are for reference purposes only, and are not intended to be used in construing this First Amendment. As used in this First Amendment, the masculine gender shall include the feminine and neuter, and the singular number shall include the plural, and vice versa.

3.6 The provisions of this First Amendment shall be interpreted and construed in accordance with the laws of the State of Connecticut, without regard to conflict of laws principles.

A. <u>EXHIBIT A</u>	13
B. <u>EXHIBIT B</u>	15

NORTHEAST MEDICAL GROUP, INC.
AMENDED AND RESTATED BYLAWS

ARTICLE I. NAME AND GENERAL PURPOSES

Section 1.1 Name. The name of the corporation is Northeast Medical Group, Inc. (the "Corporation").

Section 1.2 General Purposes. The purposes of the Corporation shall be as set forth in the Corporation's Certificate of Incorporation as in effect from time to time. These Bylaws, the powers of the Corporation, its member, trustees and officers, and all matters concerning the conduct and regulation of the affairs of the Corporation shall be subject to the Certificate of Incorporation.

ARTICLE II. MEMBERSHIP

Section 2.1 Member. The Corporation shall have a single member, Yale-New Haven Health Services Corporation (the "Member"), a "Health System" as defined in Section 33-182aa of the Connecticut General Statutes.

Section 2.2 Rights, Powers and Privileges. The Member shall have all the rights, powers and privileges usually or by law accorded to the member of a medical foundation under the Chapter 594b of the Connecticut General Statutes (as it may be amended from time to time, the "Foundation Act") and of a Connecticut nonstock, nonprofit corporation under the Connecticut Revised Nonstock Corporation Act (as it may be amended from time to time, the "Nonstock Act") and not conferred thereby or by the Certificate of Incorporation or these Bylaws upon the Board of Trustees of the Corporation (the "Board"), including the right to elect the members of the Board in accordance with these Bylaws.

Notwithstanding anything in these Bylaws to the contrary:

(a) Neither the Board, nor any officer or employee of the Corporation, may take any of the actions set forth in Exhibit A of these Bylaws, nor may the Board or any officer or employee of the Corporation approve the taking of any such action by an Affiliate (as hereafter defined), without the prior approval of the Member. For purposes hereof, an "Affiliate" of the Corporation shall mean, unless otherwise determined by the Member, any entity which at the time Affiliate status is being determined is directly or indirectly controlling or controlled by or under the direct or indirect common control with the Corporation. "Control" shall mean the legal power to (a) elect or cause the election of a majority of the governing body of the subject entity, or (b) direct or cause the direction of the subject entity's operations or management, whether the foregoing power(s)

exist(s) through voting securities, other voting rights, reserved powers, contract rights, or other legally enforceable means.

(b) In addition to the approval rights reserved to the Member set forth in Exhibit A, the Member expressly retains the rights to take the actions set forth in Exhibit B on behalf of and in the name of the Corporation, directly and without the approval of the Board of this Corporation.

(c) The Board shall have the authority, from time to time, to delegate to the Member any rights, powers and privileges that would otherwise be exercised by the Board to the fullest extent permitted by applicable law.

Section 2.3 Liability and Reimbursement of Expenses. Unless the Member expressly agrees otherwise in writing, the Member shall not be liable for the debts or obligations of the Corporation. The Member may be reimbursed for expenses reasonably incurred on behalf of the Corporation.

ARTICLE III. BOARD OF TRUSTEES

Section 3.1 Powers and Duties. Subject to the powers retained by, conferred upon, or reserved to the Member by law or under these Bylaws, the Board shall have charge, control and management of the affairs, property and funds of the Corporation in the manner and subject to the limitations set forth in these Bylaws. Each Trustee shall discharge his or her duties in good faith with the care an ordinarily prudent person in like position would exercise under similar circumstances, and in a manner he or she reasonably believes to be in the best interests of the Corporation.

Section 3.2 Composition. The Board shall consist of two classes of voting Trustees, the Elected Trustees and the Ex Officio Trustees (collectively, the “Trustees”).

(a) **Elected Trustees.** Elected Trustees shall be the persons elected by the Member for terms as set forth in these Bylaws, following nomination and approval pursuant to Section 3.4 of this Article III. Elected Trustees will represent a cross section of major segments of the community served by the Corporation and shall be selected, on the basis of demonstrated skill and ability, for their potential contribution to the governance of the affairs of the Corporation.

(b) **Ex Officio Trustees.** In addition to the Elected Trustees, there shall be the following Ex Officio Trustees, each of whom shall serve automatically by virtue of and while holding the designated office:

- (i) the President of the Corporation; and
- (ii) the President of each Affiliated Delivery Network, or his or her

designee.

For purposes hereof, "Affiliated Delivery Network" shall mean Bridgeport Hospital, Greenwich Hospital, Lawrence + Memorial Corporation, Yale-New Haven Hospital and such other providers that may affiliate with the Yale New Haven System in the future, as designated by the Member.

Section 3.3 Number. The Board shall consist of no fewer than thirteen (13) nor more than twenty-four (24) Trustees, inclusive of Ex Officio Trustees. The number of Trustees within the range set forth in the preceding sentence shall be determined from time to time by the Member.

Section 3.4 Election of Trustees. At the annual meeting of the Member, the Member shall elect successors to the Elected Trustees whose terms are then expiring. The Member shall elect such successors consistent with the following Board composition:

(a) two (2) representatives of senior management of the Member (each, a "YNHHSC Board Member");

(b) one (1) representative from each Affiliated Delivery Network other than Lawrence + Memorial Corporation (in addition to the President, or his or her designee, who shall serve Ex Officio as set forth in Section 3.2(b));

(c) two (2) physicians employed by LMMG, each of whom is a member in good standing on the medical staff of Lawrence + Memorial Hospital or Westerly Hospital;

(d) up to eight (8) individuals, each of whom is either (1) nominated by a majority vote of the Board and approved by the Member; or (2) self-nominated and appointed by the Member; provided, however, that each such individual, whether nominated by a majority vote of the Board or self-nominated, shall be a Provider (as defined in the Foundation Act) employed or engaged by the Corporation and a member in good standing on the medical staff of one or more Affiliated Delivery Network;

(e) two (2) representatives of Yale School of Medicine;

(f) such other individuals nominated Yale School of Medicine and approved by the Member; provided, however, that each such other individual shall be a Provider employed or engaged by the Corporation and a member in good standing on the medical staff of one or more Affiliated Deliver Network.

Notwithstanding anything herein to the contrary: (x) in accordance with the Foundation Act, the number of Trustees on the Board who are Providers shall equal or exceed the number of Trustees on the Board who are nonprovider employees of the Member; and (y) the number of Trustees appointed to the Board as representatives of, or on the nomination of, Yale School of

Medicine shall constitute twenty-five percent (25%) of the total number of Trustees on the Board.

Section 3.5 Term and Term Limits. There shall be three (3) classes of Elected Trustees, with approximately one-third of the Elected Trustees in each class, and the terms of all Trustees in the same class shall expire at the adjournment of the same annual meeting of the Member at which Trustees are elected. Elected Trustees shall take office at the close of the meeting of the Member at which they were elected or at such later date as may be established by the Member and, subject to Section 3.6 of this Article III, shall hold office for a term of three (3) years and until a successor is duly elected and qualified.

Notwithstanding anything herein to the contrary:

(a) No person shall be elected a Trustee for a term beginning after the date of his or her seventy-sixth birthday, provided that an Elected Trustee who is seventy-six (76) years of age or older may be re-elected for another term if (i) the Trustee is also elected as an officer of the Corporation or appointed chair of a standing committee at the beginning of such term; or (ii) the Member determines that additional service is appropriate due to the Trustee's unique expertise and commitment to the Board. In the instance of re-election as a Trustee for an additional term as provided in clause (i) of the foregoing sentence, Board membership shall be coterminous with said Trustee's service as an officer or committee chair.

(b) An Elected Trustee who has served three (3) consecutive full terms (provided that for the purposes of this Section 3.5 a term of service of more than one-half of a full term shall be considered a full term) shall not be eligible for re-election for a period of one year, provided that a Trustee may be re-elected for an additional consecutive term if (i) the Trustee is also elected as an officer of the Corporation or appointed chair of a standing committee at the beginning of such additional term; or (ii) the Member determines that additional service is appropriate due to the Trustee's unique expertise and commitment to the Board, which such determination shall be made only in limited circumstances and shall be made prior to each proposed re-election after the Trustee's completion of three (3) consecutive full terms. In the instance of re-election as a Trustee for an additional term as provided in clause (i) of the foregoing sentence, Board membership shall be coterminous with said Trustee's service as an officer or committee chair.

(c) The provisions of paragraphs (a) and (b) of this Section shall not apply to an Elected Trustee in the event such Trustee also serves as a trustee of Yale-New Haven Health Services Corporation at the time such person is elected to serve as an Elected Trustee for a term otherwise prohibited by such paragraphs (a) and (b). In the instance of re-election as a Trustee for an additional term as provided in this paragraph (c), Board membership shall be coterminous with said Trustee's service as a trustee of Yale-New Haven Health Services Corporation.

Section 3.6 Resignation. Any Elected Trustee may resign at any time by giving written notice of such resignation to the Secretary of this Corporation. Such resignation shall be effective

at the time specified in the notice, or if no time is specified, upon receipt by the Secretary. The acceptance of such resignation shall not be necessary to make it effective. Any Ex Officio Trustee who for any reason ceases to hold the office or position from which his or status as an Ex Officio Trustee derives shall automatically be deemed to have resigned as a Trustee of the Corporation and from any position held by virtue of such office with any Affiliate.

Section 3.7 Removal. One or more Elected Trustees may be removed from the Board with cause by action of the Member, which action may be taken upon its own initiative or upon the recommendation of the Board.

Section 3.8 Vacancies. In the event of the death, resignation or removal of an Elected Trustee, the vacancy resulting therefrom may be filled only by the Member in accordance with Section 3.4 of these Bylaws. An individual elected to fill a vacancy shall serve the remainder of the term of the Trustee replaced.

Section 3.9 Meetings.

(a) **Annual Meetings.** The annual meeting of the Board shall be held on such date and time as the Board or the President shall designate.

(b) **Regular Meetings.** Regular meetings of the Board shall be held on such dates and at such times and places as the Board or President shall designate.

(c) **Special Meetings.** Special meetings of the Board may be called at any time by the President and shall be called by the President upon the written request of the Member or any Trustee.

Section 3.10 Notice of Meetings. Notice of the date, time and place of any meeting of the Board shall be given to each Trustee and to the Member at least five (5) days in advance of the meeting, except that no notice need be given of a regular meeting held in accordance with a schedule established at the beginning of the fiscal year and provided to the Board and the Member in writing. Any notice of a meeting required under these Bylaws may be communicated to a Trustee in person, by mail or other delivery service, or by telephone, facsimile or other electronic means, including electronic mail directed to an electronic email address at which a Trustee has consented to receive notice. Notice to the Member shall be directed to the President/Chief Executive Officer of the Member and may be provided in person, by mail, or by telephone, facsimile or other electronic means, including electronic mail directed to an electronic mail address at which the President/Chief Executive Officer of the Member has consented to receive notice.

Section 3.11 Waiver of Notice. Notice of any meeting of the Board may be waived in writing by all the Trustees and, if any Trustee present at a meeting of the Board does not protest prior to or at the commencement of the meeting the lack of proper notice, he or she shall be deemed to have waived notice of such meeting.

Section 3.12 Action by Unanimous Written Consent. Any action required or permitted to be taken by the Board may be taken without a meeting if all the Trustees unanimously consent to such action in writing. Such written consent(s) shall be filed with the minutes of the Corporation and shall have the same force and effect as a vote of Trustees at a duly convened meeting. For purposes of this section, a Trustee may evidence his or her consent with any manual, facsimile, conformed or electronic signature, including an email communication from the Trustee to the Corporation from an email address provided by the Trustee to the Corporation.

Section 3.13 Participation by Conference Call. The members of the Board may participate in a meeting of the Board by means of conference telephone or similar communications equipment (including, without limitation, video conferencing equipment) affording all persons participating in the meeting the ability to hear one another, and such participation in the meeting by means of such equipment shall constitute presence in person at such meeting.

Section 3.14 Quorum and Voting. A majority of the number of Trustees in office at the time shall constitute a quorum for the transaction of business at all meetings of the Board, provided that if less than a majority of the Trustees is present at said meeting, a majority of the Trustees present may adjourn the meeting from time to time without further notice. The act of a majority of the Trustees present at a meeting at which a quorum is present at the time of the act shall be the act of the Board, unless the act of a greater number is required by these Bylaws, by the Certificate of Incorporation or by law. Notwithstanding the foregoing, in the event that any Trustee has a conflict of interest with respect to any transaction to be undertaken by the Corporation, such transaction shall require the approval of the Board or the Member consistent with Article VII.

ARTICLE IV. OFFICERS

Section 4.1 Officers. The officers of the Corporation shall consist of a Chair, a President, a Secretary, a Treasurer and such other officers, including Vice Chairs, as may be appointed from time to time consistent with Section 4.6. The Chair and any Vice Chair shall be members of the Board.

Section 4.2 Election and Term of Office. The President shall be appointed in accordance with Section 4.3(a) of this Article IV. The Chair, any Vice Chairs, the Secretary and the Treasurer shall be nominated by the Nominating and Governance Committee and elected annually by the Board for a term of one year and until their successors are duly elected and qualified. The Board may create and fill such other offices as it deems necessary consistent with Section 4.6.

Section 4.3 Powers. The officers shall have the powers and perform the duties commonly incident to their respective offices, including the powers and duties listed below.

(a) **President.** The President of the Corporation shall be appointed by the Member, following consultation with the Board. The appointed President shall serve at the pleasure of the Member.

The President shall be a person who in the judgment of the Member has the combination of education, experience, professional standards and demonstrated leadership ability to fulfill successfully the responsibilities of the position and to command the confidence and respect of the Board, employees and the community.

The President shall be delegated the responsibility for overall management of the Corporation and shall have all authority necessary to carry out this responsibility, subject only to such policies as may be adopted by the Board. The President shall act as the duly authorized representative of the Board in all matters in which the Board has not formally delegated some other person to so act. The duties, responsibilities and authority of the President shall be defined in a written statement adopted by the Member in consultation with the Board.

The President shall be a voting member of all standing committees except as otherwise specified in these Bylaws.

(b) **Chair.** The Chair of the Board shall preside at meetings of the Board. The Chair shall perform such other duties as the Board may from time to time prescribe.

(c) **Vice Chair.** The Board may designate one or more Vice Chairs, who shall exercise the powers and duties of the Chair during absence or disability. The Vice Chair(s), if any, shall perform such other duties as the Board or the Chair may from time to time prescribe.

(d) **Secretary.** The Secretary shall have the custody of the records of the Corporation pertaining to the Secretary's office, shall keep minutes of the meetings of the Board, and shall cause notice of such meetings to be given as required by law or these Bylaws. The Secretary shall perform such other duties as the Board or the Chair may from time to time prescribe.

(e) **Treasurer.** The Treasurer of the Corporation shall be responsible for the safekeeping of all funds and securities of the Corporation, shall see that proper records showing all financial transactions of the Corporation are maintained, and shall present financial reports to the Board.

Section 4.4 **Resignation and Removal.**

(a) An officer of the Corporation may resign at any time by giving written notice of such resignation to the Secretary. Such resignation shall be effective at the time specified in the notice, or if no time is specified, upon receipt by the Secretary. The acceptance of such resignation shall not be necessary to make it effective.

(b) The Board may remove from office any officer with or without cause; provided, however, that the President may be removed from office by the Member following consultation with the Board. Removal of an officer shall be without prejudice to the officer's contract rights, if any.

Section 4.5 Vacancies. In the case of the death, resignation or removal of any officer, except the President, the vacancy may be filled by the Board for the unexpired term. A vacancy in the office of President shall be filled in accordance with Section 4.3(a).

Section 4.6 Other Officers. The Corporation may have such other officer or officers, including assistant officers, as the Board may from time to time determine. Any such officer or assistant officer shall be appointed or elected in the manner and for the term determined by the Board, and the officer shall have the duties assigned by the Board.

ARTICLE V. COMMITTEES

Section 5.1 Classification. There shall be such standing committees as may be provided for, from time to time, in this Article V and such other committees as shall be established by Board resolution from time to time. Standing committees shall have the powers and duties set forth in this Article V and in a charter approved by the Board. Other committees shall have the powers and duties set forth in the resolution establishing them and in a charter approved by the Board. Each committee shall periodically review its charter and revise it as necessary; provided, however, that no amendment shall become effective until approved by the Board.

Section 5.2 Appointment of Committee Members. Except as otherwise provided in these Bylaws, members and chairs of all standing committees shall be appointed by the Board on nomination of the Nominating and Governance Committee. All such committee members and chairs shall serve at the pleasure of the Board until the next annual meeting of the Board and until their successors shall be chosen. All committees shall have the power to choose their own secretaries. Unless otherwise provided, individuals who are not Trustees may be appointed to committees and each such person so appointed shall have a vote and be included for purposes of determining a quorum; provided, however, that if a committee is authorized to act on behalf of the Board, any such action must be approved by a majority of the committee members who are Trustees.

Section 5.3 Committee Governance.

(a) **Quorum and Voting.** A majority of the committee members shall constitute a quorum at committee meetings except as otherwise provided in these Bylaws. The act of a majority of the committee members present at a meeting at which a quorum is present at the time of the act shall be the act of such committee, unless the act of a greater number is required by these Bylaws, by resolution of the Board or by law.

(b) Meetings. Except as otherwise provided in these Bylaws or by resolution of the Board, each committee shall establish its own rules and procedures and shall fix the time and place of its meetings. Each committee shall keep minutes of its meetings which shall be made available to the Board upon request.

Section 5.4 Standing Committees.

(a) Executive Committee. The Executive Committee shall consist of the Chair, who shall act as chair of the committee, the President, the Treasurer, and any other member of the Board that the Board may choose to appoint. The Executive Committee shall possess and may exercise in the intervals between meetings of the Board all such powers of the Board, except as may otherwise be provided by law, these Bylaws or resolution of the Board.

(b) Nominating and Governance Committee. The Nominating and Governance Committee shall consist of Trustees elected by the Board. The Nominating and Governance Committee shall, after consultation with the President and other Trustees, nominate candidates to be voted upon in electing officers and members of the Board and nominate for appointment by the Board the chairs and members of all standing committees. The Nominating and Governance Committee shall also review Board governance matters and recommend enhancements to strengthen the Board and ensure the comprehensiveness and efficiency of its governance process.

(c) Finance Committee. The Finance Committee shall have such duties as are established by the Member and set forth in the Finance Committee charter. These duties shall include, but not be limited to, approval of local operating and capital budgets and examination and monitoring of other operating and capital budgets involving the Corporation.

Section 5.6 Other Committees. The Board may establish and appoint from among the Trustees or others, such other committees with such powers and authority as the Board shall designate, except that no such committee may exercise the authority of the Board.

Section 5.7 Powers of Committees. No committee established by the Board shall have power to fill vacancies on the Board or on any of its committees, to amend the Certificate of Incorporation of the Corporation or these Bylaws, to approve a plan of merger, to approve a sale, lease, exchange or other disposition of all, or substantially all, of the property of the Corporation other than in the usual and regular course of affairs of the Corporation, to approve a proposal to dissolve, or to authorize any other action inconsistent with the Certificate of Incorporation or these Bylaws.

ARTICLE VI. INDEMNIFICATION

The Corporation shall indemnify and defend the Corporation's Member, Trustees, officers and employees as set forth in the Certificate of Incorporation.

ARTICLE VII. CONFLICTS OF INTEREST

The Trustees and officers of the Corporation shall comply with any Conflicts of Interest policy adopted by the Corporation, as any such policy may be amended from time to time, and with the provisions of the Nonstock Act related to disclosure and approval of "Director's conflicting interest transactions" (as such term is defined in the Nonstock Act). Consistent with the requirements of the Nonstock Act, any "Director's conflicting interest transaction" shall, when possible, be approved and authorized by either (i) the Member or (i) a majority of the disinterested Trustees voting on the transaction at a meeting at which a majority (but no fewer than two (2)) of all disinterested Trustees on the Board shall constitute a quorum, in each case following any required disclosure of the facts of the conflicting interest transaction.

ARTICLE VIII. MISCELLANEOUS PROVISIONS

Section 8.1 Fiscal Year. The fiscal year of the Corporation shall begin on the first day of October and end on the last day of September in each year unless the Board of Trustees shall otherwise determine.

Section 8.2 Execution of Deeds and Contracts. Except as otherwise directed by the Board, all deeds and mortgages made by the Corporation and all other written contracts, agreements and undertakings to which the Corporation shall be a party shall be executed in its name by the President or such other officers or officers as may be specified by the Board or authorized by the President.

Section 8.3 Execution of Negotiable Instruments. All checks, drafts, notes, bonds, bills of exchange and orders for the payment of money shall be signed by the President or such officer or officers of the Corporation as the Board may specify from time to time.

ARTICLE IX. AMENDMENTS

Subject to approval by the Member, these Bylaws may be amended, altered, or repealed at any meeting of the Board by a majority vote of the Trustees present and voting, a quorum being present. The general nature and purpose of such proposed amendment(s) shall be set forth in the notice of the meeting, and the actual language of the proposed amendments need not be included in the notice. No amendment, alteration or repeal shall take effect until it shall have been approved by the Member.

EXHIBIT A

Actions Requiring Approval of the Member

Notwithstanding anything in these Bylaws to the contrary, neither the Board nor any officer or employee of the Corporation may take any of the following actions, or approve an Affiliate taking any of the following actions, without the prior approval of the Member:

- A. Merger, consolidation, reorganization or dissolution of this Corporation or any Affiliate and the creation or acquisition of an interest in any corporate entity, including joint ventures;
- B. Amendment or restatement of the Mission, Certificate of Incorporation or the Bylaws of this Corporation or any Affiliate, or any new or revised "doing business as" name;
- C. Adoption of operating and cash flow budgets of the Corporation or any Affiliate, including consolidated or combined budgets of this Corporation and all subsidiary organizations of the Corporation (pursuant to the authority delegated to this Corporation by the Member to adopt such budgets within parameters established by the Member);
- D. Adoption of capital budgets and capital allocations of this Corporation or any Affiliate (pursuant to the authority delegated to this Corporation by the Member to adopt such budgets within parameters established by the Member);
- E. Incurring aggregate operating or capital expenditures on an annual basis that exceed operating or capital budgets of the Corporation adopted by the Member by a specified dollar amount to be determined from time to time by the Member;
- F. Long-term or material agreements including, but not limited to, equity financings, capitalized leases, operating leases and installment contracts; and purchase, sale, lease, disposition, hypothecation, exchange, gift, pledge or encumbrance of any asset, real or personal, with a fair market value in excess of a dollar amount to be determined from time to time by the Member, which shall not be less than 10% of the total annual capital budget of this Corporation;
- G. Approval of any new relationships or agreements for undergraduate or graduate medical education programs or any material amendments to or terminations of existing agreements for undergraduate or graduate medical education programs;

- H. Contracting with an unrelated third party for all or substantially all of the management of the assets or operations of this Corporation or any Affiliate;
- I. Approval of major new programs and clinical services of this Corporation or any Affiliate or discontinuation or consolidation of any such program. The Member shall from time to time define the term "major" in this context;
- J. Approval of strategic plans of this Corporation or any Affiliate;
- K. Adoption of safety and quality assurance policies not in conformity with policies established by the Member; and
- L. Adoption of any polices relating to compensation of employed physicians or the taking of any other action to establish or adjust compensation of employed physicians. For purposes hereof, compensation shall include salary, fringe benefits and deferred compensation.

Other Major Activities

- A. In addition, the Member shall have the authority, except as otherwise provided by the Member and after consultation with this Corporation, to require the prior review and approval of those activities of this Corporation or any subsidiary or affiliate entity that the Member determines to be "major activities."
- B. "Major activities" shall be those which the Member by a vote of not less than two-thirds (2/3) of its Board of Trustees has declared major, by written notice to this Corporation, delivered personally or transmitted by registered or certified mail return receipt requested. Such notice shall specifically identify the matter or matters requiring approval of the Member, and shall refer to this Bylaw provision granting such approval rights to the Member. Notices received pursuant to this section shall be recorded in the minutes of this Corporation and shall be filed with the minutes of this Corporation.

Nothing in these Bylaws shall be construed in a manner that is inconsistent with the authorities with respect to the Corporation that are reserved or retained by the Member pursuant to these Bylaws and the Bylaws of the Member.

EXHIBIT B

Actions Direct Authority Retained by the Member

Notwithstanding anything in these Bylaws to the contrary, the Member retains authority to take the following actions on behalf of and in the name of this Corporation, directly and without the approval of the Board of this Corporation:

- A. Adoption of targets for the annual operating and cash flow budgets of this Corporation and its Affiliates, including consolidated or combined budgets of this Corporation and all subsidiary organizations of the Corporation;
- B. Adoption of targets for the annual capital budgets and capital allocations of this Corporation and any Affiliate;
- C. Adoption of annual operating, cash flow and annual capital budgets for the Corporation and any Affiliate within the targets established by the Member in the event of any failure of the Corporation to do so;
- D. Issuance and incurrence of indebtedness on behalf of this Corporation;
- E. Management and control of the liquid assets of this Corporation, including the authority to cause such assets to be funded to the Member or as otherwise directed by the Member;
- F. Appointment of the independent auditor for this Corporation and each Affiliate and the management of the audit process and compliance process and procedures for this Corporation and each Affiliate; and
- G. Appointment of the President consistent with Section 4.3(a).

Exhibit 2.1.4(D)

Amended and Restated Bylaws of LMMG

AMENDED AND RESTATED BYLAWS
OF
L+M PHYSICIAN ASSOCIATION, INC.

ARTICLE I

Name

Section 1.01 Name of Corporation. The name of this Corporation is **L+M Physician Association, Inc.**, and it shall be referred to throughout these Bylaws as the “Corporation.”

ARTICLE II

Role and Purpose of the Corporation; Sole Member

Section 2.01 Role and Purpose of the Corporation. The Corporation is organized and shall be operated exclusively for charitable purposes within the meaning of Section 501(c)(3) of the Internal Revenue Code of 1986, as now in effect or as may hereafter be amended (the “Code”), which purposes are set forth in the Corporation’s Certificate of Incorporation, as the same may be amended from time to time. The Corporation’s primary role and purpose is to practice medicine and provide health care services to the public as a medical foundation, pursuant to Chapter 594b of the Connecticut General Statutes, within the health care delivery system (the “System”) administered by Yale New Haven Health Services Corporation (“YNHHSC” or the “System Parent”).

Section 2.02 Sole Member; Lawrence + Memorial Corporation. The Corporation shall have but one (1) member, Lawrence + Memorial Corporation (the “Member”), which shall appoint the Board of Trustees of the Corporation (also referred to in these Bylaws as the “Board” or “Board of Trustees”), adopt, amend and repeal these Bylaws, and have all of the other rights, powers and privileges usually or by law accorded to the members of a nonstock federally tax-exempt corporation and not conferred by these Bylaws on the Board of Trustees of the Corporation. In addition to such other rights, powers and privileges as it may have by law, and subject to the System Parent’s rights, powers and privileges set forth in these Bylaws, the Member shall have the right and power to:

- (a) Approve the philosophy, mission and values of the Corporation and any change thereto;
- (b) Adopt strategic plans for the Corporation;
- (c) Recommend to the System Parent targets for the annual operating and cash flow budgets of the Corporation and targets for the annual capital budgets and budget allocations of the Corporation;

(d) Approve the Corporation's annual operating and cash flow budgets, capital budgets, capital allocations, major clinical and/or financial initiatives, and financial plans (including capital and operating budgets);

(e) Approve the formation or acquisition by the Corporation of any new direct or indirect subsidiaries, joint ventures or affiliations;

(f) Approve the Certificate of Incorporation, Bylaws and other governance documents of the Corporation, and any amendments thereto or restatements thereof;

(g) Approve all core competencies and qualifications required for selection of the Corporation's Trustees;

(h) In consultation with and upon recommendation of the Board, appoint all Trustees of the Corporation, and remove, with or without cause, all Trustees or board officers of the Corporation;

(i) In consultation with and upon recommendation of the Board, appoint and remove, determine the compensation for, and conduct the evaluation of, the Executive Director of the Corporation;

(j) Recommend to the System Parent the selection of any auditor of the annual audited financial statements for the Corporation;

(k) Recommend to the System Parent any accounting or debt management programs, establish any debt limits under such programs, approve any variances from such programs or limits for the Corporation, and incur or assume any debt on behalf of the Corporation;

(l) Recommend to the System Parent the incurrence of debt or financing by the Corporation, other than credit purchases of goods or services in the ordinary course of business, except as included in approved capital or operating budgets;

(m) Oversee the Corporation's use, management and investment of its permanent and temporarily restricted endowment funds;

(n) Approve any voluntary change to the federal income tax exemption granted by the IRS to the Corporation under Section 501(c)(3) of the Code;

(o) Initiate or consent to any form of insolvency proceeding undertaken by the Corporation or any direct or indirect subsidiary of the Corporation;

(p) Approve all projects, agreements or transactions undertaken by the Corporation involving the expenditure of funds or divestiture of assets in excess of \$250,000 and not otherwise included in an approved budget;

(q) Approve the services offered by the Corporation, new service lines or termination of existing service lines not otherwise included in an approved budget or a strategic or financial plan;

(r) Approve any sale, lease, transfer, or substantial change in the use of all or substantially all of the assets of the Corporation or any direct or indirect subsidiary of the Corporation;

(s) Approve any merger, consolidation, restructuring, change in corporate ownership, dissolution, or liquidation of the Corporation or any direct or indirect subsidiary or the Corporation;

(t) Approve the acquisition of any real estate or any significant lease arrangement by the Corporation, except as otherwise included in a strategic or financial plan or approved budget;

(u) Approve any management contract or outsourcing arrangement for the Corporation which would substantially impact or alter its operations, or any settlement agreement or consent decree with any local, state or government authorities; and

(v) Approve any change in the primary business name or logo of the Corporation.

Section 2.03 Manner of Action by Member. Any action permitted or required of the Member by law, the Certificate of Incorporation or these Bylaws may be taken by vote of its board of trustees, or by or through any person or persons designated by either its bylaws or its board of trustees to act on its behalf. Any such action may also be taken without a meeting by written communication of a duly authorized representative of the Member acting within the limits of his/her authority. Any such action by the Member or its duly authorized representative shall be filed with the Secretary of the Corporation. Whenever approval by the Member is required by law, the Certificate of Incorporation or these Bylaws, the Member shall attempt to act on a request for approval within the timeframe set forth in any schedule that may be developed from time to time, or if no such schedule exists, in a timely manner.

ARTICLE III

System Authority

Section 3.01 System Parent. YNHHSC serves as the parent company of the Member and oversees the System and its affiliated entities, including the Corporation.

Section 3.02 Rights and Powers of the System Parent. (a) YNHHSC shall, as the parent company of the Corporation's Member, have the ultimate authority to approve any decisions made by the Member by virtue of its rights and powers under state law. Such ultimate authority granted to YNHHSC shall include the right and power to approve the following:

(i) Merger, consolidation, reorganization or dissolution of this Corporation and the creation or acquisition of an interest in any corporate entity, including joint ventures;

(ii) Amendment or restatement of the mission, Certificate of Incorporation or the Bylaws of this Corporation, or any new or revised “doing business as” name;

(iii) Adoption of operating and cash flow budgets of the Corporation, including consolidated or combined budgets of this Corporation and all subsidiary organizations of the Corporation within parameters established by the System Parent;

(iv) Adoption of capital budgets and capital allocations of this Corporation (pursuant to the authority delegated to this Corporation by the Member to adopt such budgets within parameters established by the System Parent);

(v) Incurring aggregate operating or capital expenditures on an annual basis that exceed operating or capital budgets of the Corporation adopted by the Member by a specified dollar amount to be determined from time to time by the System Parent;

(vi) Long-term or material agreements including, but not limited to, equity financings, capitalized leases, operating leases and installment contracts; and purchase, sale, lease, disposition, hypothecation, exchange, gift, pledge or encumbrance of any asset, real or personal, with a fair market value in excess of a dollar amount to be determined from time to time by the Member, which shall not be less than 10% of the total annual capital budget of this Corporation;

(vii) Approval of any new relationships or agreements for undergraduate or graduate medical education programs or any material amendments to or terminations of existing agreements for undergraduate or graduate medical education programs;

(viii) Contracting with an unrelated third party for all or substantially all of the management of the assets or operations of this Corporation;

(ix) Approval of major new programs and clinical services of this Corporation or discontinuation or consolidation of any such program. YNHHS shall from time to time define the term “major” in this context;

(xi) Approval of strategic plans of this Corporation;

(xii) Adoption of safety and quality assurance policies not in conformity with policies established by YNHHS;

(xiii) Adoption of any policies relating to compensation of employed physicians or the taking of any other action to establish or adjust compensation of employed physicians. For purposes hereof, compensation shall include salary, fringe benefits and deferred compensation;

(xiv) Appointment of the President of Corporation;

(xiv) Any major activities of the Corporation. "Major activities" shall be those which YNHHSC, by a vote of not less than two-thirds (2/3) of its Board of Trustees, has declared major, by written notice to this Corporation, delivered personally or transmitted by registered or certified mail return receipt requested. Such notice shall specifically identify the matter or matters requiring approval of YNHHSC, and shall refer to this Bylaw provision granting such approval rights to YNHHSC. Notices received pursuant to this section shall be recorded in the minutes of this Corporation and shall be filed with the minutes of this Corporation. Nothing in these Bylaws shall be construed in a manner that is inconsistent with the authorities with respect to the Corporation that are reserved or retained by YNHHSC pursuant to these Bylaws and the Bylaws of YNHHSC.

(b) The System Parent retains authority to take the following actions on behalf of and in the name of this Corporation, directly and without the approval of the Member or Board of this Corporation:

(i) Adoption of targets for the annual operating and cash flow budgets of the Corporation, including consolidated or combined budgets of the Corporation and all subsidiary organizations of the Corporation;

(ii). Adoption of targets for the annual capital budgets and capital allocations of the Corporation;

(iii) Adoption of annual operating, cash flow and annual capital budgets for the Corporation within the targets established by YNHHSC in the event of any failure of the Corporation to do so;

(iv) Issuance and incurrence of indebtedness on behalf of the Corporation;

(v) Management and control of the liquid assets of the Corporation, including the authority to cause such assets to be funded to YNHHSC or as otherwise directed by YNHHSC; and

(vi) Appointment of the independent auditor for the Corporation and the management of the audit process and compliance process and procedures for the Corporation.

ARTICLE IV

Board of Trustees

Section 4.01 Composition. The Board of Trustees shall consist of not fewer than five (5) nor more than eleven (11) Trustees, including *ex officio* Trustees, such number within the variable range to be determined by the Member at its annual meeting. The Member's President and Chief Executive Officer and the Corporation's Executive Director shall serve *ex officio* on

the Board and shall each have a vote and be counted for quorum purposes. The Member's Governance Committee shall ensure that: (i) in the event that there are employees of the Member serving as Trustees on the Board at any time who are not physicians, there shall be at least an equal number of physicians serving as Trustees on the Board.

Section 4.02 Election and Terms. Except individuals serving *ex officio* on the Board or as provided otherwise in this Article III, Trustees shall serve a term of three (3) years, or until their resignation, removal or death. Trustees shall be divided into three (3) classes of approximately equal size with approximately equal representation from each Director category. One class of Trustees shall be elected by the Member at each annual meeting from a slate of nominees prepared by the Member's Governance Committee, subject to approval by the System Parent; provided however that in the event the System Parent does not approve any such nominee Director, the Member shall elect a different Director for approval by the System Parent; and provided further that in the event any such successor nominee Director is not approved by the System Parent within thirty (30) days following the System Parent's annual meeting, the System Parent may direct the Member to elect the System Parent's nominee.

Section 4.03 Resignation. A Director may resign at any time by delivering written notice to the Secretary of the Corporation. The resignation shall be effective when the notice is delivered, unless the notice specifies a later effective date.

Section 4.04 Removal. A Director may be removed by the Member at any time, with or without cause. The Member shall remove a Director at the direction of the System Parent.

Section 4.05 Vacancies. A vacancy of a Director shall be filled for the balance of the vacated term by the Member, with the approval of the System Parent.

Section 4.06 Duties and Responsibilities. Subject to the rights, powers and privileges accorded to the Member and System Parent in the Certificate of Incorporation, these Bylaws, or by law, the Board of Trustees shall manage and direct the business, property, and affairs of the Corporation. The Board shall exercise all of the powers of the Corporation in accordance with these Bylaws. Without limiting the foregoing and to the extent applicable to the Corporation's operations, the Board shall have the power to:

(a) Develop and recommend to the Member and System Parent the philosophy, mission and values of the Corporation and any changes thereto;

(b) Develop and recommend to the Member and the System Parent the Corporation's strategic plans;

(c) Develop and recommend to the Member and System Parent the Corporation's annual operating and financial targets, major clinical and/or financial initiatives, and financial plans (including capital and operating budgets);

(d) Annually assess the Corporation's performance against approved budgets, initiatives and strategic plans adopted by the Member and System Parent;

(e) Recommend to the Member and System Parent the sale, transfer or substantial change in use of all or substantially all of the assets, the divestiture, dissolution and/or disposition of assets, closure, merger, consolidation, change in corporate membership or ownership or corporate reorganization of the Corporation or any direct or indirect subsidiary of the Corporation;

(f) Recommend to the Member and System Parent the formation or acquisition by the Corporation of any new direct or indirect subsidiaries, joint ventures or affiliations;

(g) Recommend to the Member and System Parent the introduction or termination of any services to be offered by the Corporation not otherwise included in an approved budget or a strategic or financial plan;

(h) Approve any consent decree or settlements from state and federal authorities, following consultation with the Member;

(i) Recommend to the Member and System Parent changes to the Corporation's Certificate of Incorporation and Bylaws;

(j) Recommend to the Member and System Parent nominations for and removal of Trustees of the Corporation;

(k) Elect officers of the Board, and recommend to the Member the removal of any officer of the Board;

(l) Approve business transactions or material contracts, subject to the rights of the Member set forth in Section 2.02 and System Parent in Section 3.02, not otherwise included in an approved budget or a strategic or financial plan;

(m) Recommend to the System Parent any incurrence or assumption of debt by the Corporation in accordance with the guidelines for accounting and debt management programs established by the Member and System Parent;

(n) Periodically assess the Corporation's Quality Initiatives, including tracking and reporting on the Corporation's performance under quality measures, quality and patient safety programs and initiatives, patient satisfaction and cultural competence initiatives;

(o) Periodically assess the Corporation's policies and programs to assure corporate and regulatory compliance, including all required state and federal license and generally recommended accreditations and certifications;

(p) Periodically assess the Corporation's policies and programs relating to human relations and labor relations;

(q) Periodically assess the Corporation's Development Plans and its Planned Giving Plans;

(r) Periodically assess the Corporation's Community Relations Initiatives and Community Outreach Programs;

(s) Plan and implement policies and programs relating to the Corporation's use, management and investment of its permanent and temporarily restricted endowment funds, annual appeal funds, and net proceeds from special fundraising events; and

(t) Evaluate the Board's performance.

Section 4.07 Compensation. The Trustees shall serve without compensation for their services as Trustees but may be reimbursed by the Corporation for their reasonable expenses and disbursements in that capacity on behalf of the Corporation.

ARTICLE V

Meetings of the Board of Trustees

Section 5.01 Annual and Regular Meetings. The annual meeting of the Board shall be held in the month of December on a date to be fixed by the Chair from year to year, unless the Chair shall designate a different date for the annual meeting. The transaction of business at the annual meeting shall be unlimited except as otherwise specified in these Bylaws. There shall be up to twelve (12) regular meetings of the Board per fiscal year, with a schedule of such meetings to be adopted by resolution of the Board.

Section 5.02 Notice of Annual and Regular Meetings. The Secretary shall give notice of the date, time and place of the annual meeting and each regular meeting of the Board by mail, electronic mail, telecommunications, telephone, facsimile or in person to each member of the Board at least five (5) days in advance of the meeting, except that no notice need be given of a regular meeting held in accordance with a schedule approved by the Board.

Section 5.03 Special Meetings. Special meetings may be called at any time by the Chair, and shall be called by the Chair within seven (7) days of receipt of the written request of any three (3) Trustees. Notice of the date, time, place and purpose of a special meeting shall be given to each member by mail, electronic mail, telecommunications, telephone, facsimile or in person at least twenty-four (24) hours before the scheduled date of the meeting and no business shall be transacted at such meeting other than that specifically set forth in the notice.

Section 5.04 Quorum; Vote Required for Action. A majority of all Trustees shall constitute a quorum at all meetings of the Board. The affirmative vote of a majority of the Trustees present at a meeting at which time a vote is taken shall be the act of the Board, unless the vote of a greater number is required by the Certificate of Incorporation, these Bylaws, or by law. *Ex officio* Trustees shall be counted in determining a quorum and shall be entitled to vote.

Section 5.05 Action Without Meeting. If all members of the Board consent in writing to any action taken or to be taken, the action shall be the same as if authorized at a meeting of the

Board; all written consent(s) shall be included in the corporate minutes or filed with the corporate records.

Section 5.06 Participation by Conference Telephone. Any member of the Board may participate in a meeting by means of a conference telephone or similar communications equipment enabling all members of the Board participating in the meeting to hear one another, and such participation shall constitute presence in person at such meeting.

Section 5.07 Agenda and Records of Meetings. There shall be a written agenda for each meeting of the Board, and minutes of each meeting shall be prepared and submitted to the Board for approval by the Secretary or a delegate. Minutes shall reflect attendance at the meeting, and shall be dated, signed and maintained in the corporate records following approval.

ARTICLE VI

Officers

Section 6.01 Officers. The officers shall be the Chair, an Executive Director, a Secretary, a Treasurer and such other officers as may from time to time be designated by the Board. The Chair, Secretary and Treasurer shall be chosen from the members of the Board.

Section 6.02 Election. The officers, except for the Executive Director, shall be chosen by the Board at its annual meeting, and shall hold office until the next annual meeting.

Section 6.03 Vacancies. Any vacancy occurring in any office shall be filled promptly by the Board at any Board meeting.

Section 6.04 Removal. Any officer may be removed with or without cause by the Member at any meeting of the board of trustees of the Member, provided that the notice of the meeting specifically states that the purpose or one of the purposes of the meeting is removal of the officer.

Section 6.05 Duties. The duties of the officers shall be as follows:

(a) Chair. The Chair shall preside at all meetings of the Board, shall be an *ex officio* member of all committees, and shall perform other duties incident to the office or delegated by the Board or these Bylaws. In the event of the Chair's absence or disability, a Director who is the Chair's delegate or who is appointed by the Board shall perform the duties of the Chair.

(b) Executive Director. The Executive Director shall be the chief executive officer of the Corporation. The Member shall appoint the Executive Director, who shall serve until his or her death, resignation, disability or removal in accordance with these Bylaws. Subject to the powers expressly reserved to the Board or the Member, the Executive Director shall, in general, supervise and control all the business and affairs of the Corporation, and shall see that the objectives, policies and orders of the Board are properly executed. The Executive Director shall have the power to sign, acknowledge and deliver on behalf of the Corporation all deeds, agreements and other formal instruments. If no Chair has been appointed or in the absence of the Chair, the Executive Director shall preside at each meeting of the Board. In general, he or she

shall perform such other duties incident to the office of Executive Director and such other duties as may from time to time be assigned to the Executive Director by these Bylaws, by the Board, or by the Member.

(c) Secretary. The Secretary shall: maintain the minutes of the meetings of the Board in the corporate records; give or cause to be given all notices required by these Bylaws or by law; serve as custodian of the Corporation's records; make such records available to the Board upon its request; and perform all other duties incident to the office or delegated by the Board or these Bylaws.

(d) Treasurer. The Treasurer shall: supervise the receipt and custody of the Corporation's funds and investments; render a full account and statement of the condition of the Corporation's finances at each annual meeting and at such other times as requested by the Board; and perform other duties incident to the office or as may be delegated by the Board or these Bylaws.

ARTICLE VII

Committees

Section 7.01 Committees. The Board may create such ad hoc committees from time to time as the Board may deem necessary to carry out special fund raising events or other initiatives of the Board. Committees may not exercise the authority of the Board, and any acts taken by them shall be solely advisory in nature. The members and chairs of each committee shall be appointed by the Board, and each such committee shall consist of at least one (1) Director and two (2) other individuals who may or may not be Trustees. Each committee established by the Board shall be chaired by a Director of the Board. Committee members shall serve at the pleasure of the Board and until their successors are elected.

Section 7.02 Committee Procedures; Action by Committee. Each committee may fix rules of procedure for its business. A majority of the members of a committee shall constitute a quorum for the transaction of business and the act of a majority of those present at a meeting at which a quorum is present shall be the act of the committee. Any action required or permitted to be taken at a meeting of a committee may be taken without a meeting, if a unanimous written consent which sets forth the action is signed by each member of the committee and filed with the minutes of the committee. The members of a committee may conduct any meeting thereof by conference telephone in accordance with the provisions of Section 4.06.

Section 7.03 "Medical Review Committees." Any committee or subcommittee referred to in or otherwise established in accordance with the provisions of these Bylaws, as well as the Board itself, when engaged in any peer review activity, is intended to be a "medical review committee" within the meaning of that term as set forth in Chapter 368a of the Connecticut General Statutes, as amended from time to time.

ARTICLE VIII

Conflict of Interest; Confidentiality

Section 8.01 “Conflict of Interest” Defined; Conflict of Interest and Confidentiality Policies. The Board expects its members to exercise good judgment and follow high ethical standards. Individuals serving the Corporation should never permit private interests to conflict in any way with their obligations to the Corporation and to any entities affiliated with the Corporation. In addition, all members of the Board must honor the confidential nature of Corporation information and strive to maintain its confidentiality. To this end, from time to time the Board shall adopt a Conflict of Interest Policy and a Confidentiality Policy; such policies shall be deemed by this reference to be a part of these Bylaws. These policies shall be consistent with requirements of state law and the law of tax-exempt organizations, and shall address, among other things: the definition of “confidential materials” and “related persons”; disclosure by Board members; the purchase of goods and services; compensation decisions; and procedures to implement and enforce these policies.

ARTICLE IX

Miscellaneous

Section 9.01 Principal Office. The principal office of the Corporation shall be located in New London, Connecticut.

Section 9.02 Waivers of Notice. Whenever any notice of time, place, purpose or any other matter, including any special notice or form of notice, is required or permitted to be given to any person by law or under the provisions of the Certificate of Incorporation or these Bylaws, or of a resolution of the Member or the Board of Trustees, a written waiver of notice signed by the person or persons entitled to such notice, whether before or after the time stated therein, shall be equivalent to the giving of such notice. The Secretary of the Corporation shall cause any such waiver to be filed with or entered upon the records of the Corporation or, in the case of a waiver of notice of a meeting, the records of the meeting. The attendance of any person at or participation in a meeting waives any required notice to that person of the meeting unless at the beginning of the meeting, or promptly upon the person’s arrival, the person objects to the holding of the meeting or the transacting of business at the meeting and does not thereafter vote for or assent to action taken at the meeting.

ARTICLE X

Amendments

Section 10.01 Amendments. Except as otherwise provided by the Certificate of Incorporation, or by law, the Member and the System Parent may adopt, amend or repeal these Bylaws.

**Adopted by the Board of Trustees of
Lawrence + Memorial Corporation on August 29, 2016**

Exhibit 2.1.4(E)

Amended and Restated Certificate of Incorporation of LMMG

**AMENDED AND RESTATED
CERTIFICATE OF INCORPORATION**

L&M PHYSICIAN ASSOCIATION, INC.

L&M PHYSICIAN ASSOCIATION, INC. hereby amends and restates its Certificate of Incorporation so that the same shall read in its entirety as follows:

1. Name. The name of the Corporation is L&M PHYSICIAN ASSOCIATION, INC. (the "Corporation").

2. Purposes. The nature of the activities to be conducted and the purposes to be promoted or carried out by the Corporation shall be exclusively charitable, scientific and educational within the meaning of Section 501(c)(3) of the Internal Revenue Code of 1986, as amended (the "Code"), and shall include the following:

(a) to operate and maintain one or more offices or facilities for the study, diagnosis and treatment of human ailments and injuries by licensed persons;

(b) to render medical and surgical treatment, consultation or advice by duly licensed employees or agents of the Corporation to patients without regard to race, color, creed, sex, age or ability to pay for such care and services;

(c) to promote, enhance, improve, and develop medical, surgical and scientific research at providers affiliated with Yale-New Haven Health Services Corporation, including, for so long as such providers are affiliated with the Yale New Haven Health System (the "System") administered by Yale-New Haven Health Services Corporation ("YNHHSC"), which System shall include Lawrence + Memorial Corporation, Lawrence + Memorial Hospital, Westerly Hospital, Bridgeport Hospital, Greenwich Hospital, Yale-New Haven Hospital, and such other providers that may affiliate with the System in the future (the "Affiliated Delivery Networks") and throughout the communities they serve;

(d) to promote, enhance, improve and augment the quality of medical and clinical education and patient care at the Affiliated Delivery Networks and at any other sites determined by the Corporation;

(e) to promote and enhance a high quality of medical care and other human services for the benefit of all persons in the communities it serves;

(f) to augment the planning process for the promotion of the general well-being and human health needs of the communities it serves;

(g) to solicit, accept, hold, invest, reinvest, and administer any contributions, grants, donations, gifts, bequests, devises, benefits of trusts (but not to act as trustee of any trust), and property of any sort, without limitation as to amount or value, and to use, disperse or donate the income or principal thereof for exclusively charitable and educational purposes in such

manner as, in the judgment of the Board of Trustees and the Member of the Corporation, will best promote the purposes of the Corporation;

(h) to contract for, purchase, receive, own, manage, operate or lease property, real, personal and mixed, wheresoever situated, as may be necessary to promote and further the purposes and objectives of the Corporation; and

(i) to engage in any lawful act or activity for which a medical foundation may be organized under Chapter 594b of the Connecticut General Statutes or for which a nonstock corporation may be organized under Chapter 602 of the Connecticut General Statutes, the Connecticut Revised Nonstock Corporation Act (the "Act").

In furtherance of the purposes set forth herein, the Corporation shall (i) participate as an integral part of the System, which System provides, through the Corporation and its affiliates, comprehensive, cost effective, advanced patient care characterized by safety and clinical and service quality; and (ii) fund and promote activities and programs of the System, including activities and programs of its affiliates, consistent with and in furtherance of the Corporation's charitable purposes and the charitable purposes of all System affiliates.

3. Nonprofit. The Corporation is nonprofit and shall not have or issue shares of stock or make distributions.

4. Member. The Corporation shall have one member, Lawrence + Memorial Corporation (the "Member"). The Member is an affiliate of a "Health System," as defined in Section 33-182aa of the Connecticut General Statutes, overseen by the Member's parent company, Yale New Haven Health Services Corporation (sometimes referred to as the "System Parent"). The Member shall have the rights, powers and privileges provided in the Corporation's Bylaws and by Connecticut law, including certain expressly reserved powers and retained rights described in the Corporation's Bylaws (the "Bylaws"). The Bylaws may provide that certain rights, powers and privileges of the Member shall be reserved exclusively to, or may be subject to the prior approval of, the System Parent.

5. Board of Trustees. Subject to the rights, powers and privileges of the Member or the System Parent, the Corporation shall operate under the management of its Board of Trustees. The Bylaws may provide that certain persons occupying certain positions within or without the Corporation shall be ex-officio trustees, who may be counted in determining a quorum and may have the right to vote as may be provided in the Bylaws. As may be further provided in the Bylaws, the terms of elected trustees may be staggered by dividing the elected trustees into up to three groups so that approximately an equal number of such trustees have terms that expire each year. Trustees may be removed by the Member or at the direction of the System Parent as provided in the Bylaws.

6. Restrictions. No part of the net earnings of the Corporation shall inure to the benefit of, or be distributable to, the Corporation's trustees, officers or other private persons, except that the Corporation shall be authorized and empowered to pay reasonable compensation for services rendered and to make payments and distributions in furtherance of the purposes set forth in Section 2 hereof. No substantial part of the activities of the Corporation shall be the carrying on of propaganda, or otherwise attempting to influence legislation, and the Corporation shall not participate in, or intervene in (including the publishing or distribution of "statements") any political campaign on behalf of any candidate for public office. Notwithstanding any other provision of this Certificate of Incorporation, the Corporation shall not carry on any other activities not permitted to be carried on (a) by a corporation exempt from federal income tax under Section 501(c)(3) of the Code, or (b) by a corporation, contributions to which are deductible under Section 170(c)(2) of the Code.

7. Dissolution. Upon the dissolution or termination of the existence of the Corporation, all of its property and assets, after payment of the lawful debts of the Corporation and the expenses of its dissolution or termination, shall be delivered, conveyed and paid over (subject to any restrictions imposed by any applicable will, deed, grant, conveyance, agreement, memorandum, writing or other governing document) to YNHHS, or, if at the time of the dissolution or termination of the existence of the Corporation, YNHHS is not in existence or does not qualify as exempt under Section 501(c)(3) of the Code, to any organization (or organizations) that qualifies as an organization exempt under Section 501(c)(3) of the Code, in such proportions and for such exclusively charitable, scientific or educational purposes as the Board of Trustees may determine.

8. Limitation of Liability of Trustees. In addition to and not in derogation of any other rights conferred by law, a trustee shall not be personally liable for monetary damages for breach of duty as a trustee in an amount greater than the amount of compensation received by the trustee for serving the Corporation during the year of the violation, provided that such breach did not (a) involve a knowing and culpable violation of law by the trustee, (b) enable the trustee or an associate, as defined in Section 33-840 of the Connecticut General Statutes, to receive an improper personal economic gain, (c) show a lack of good faith and a conscious disregard for the duty of the trustee to the Corporation under circumstances in which the trustee was aware that his or her conduct or omission created an unjustifiable risk of serious injury to the Corporation, or (d) constitute a sustained and unexcused pattern of inattention that amounted to an abdication of the trustee's duty to the Corporation. Any lawful repeal or modification of this Section 8 or the adoption of any provision inconsistent herewith by the Board of Trustees or the Member of the Corporation shall not, with respect to a person who is or was a trustee, adversely affect any limitation of liability, right or protection of such person existing at or prior to the effective date of such repeal, modification or adoption of a provision inconsistent herewith. The limitation of liability of any person who is or was a trustee provided for in this Section 8 shall not be exclusive of any other limitation or elimination of liability contained in, or which may be provided to any person under, Connecticut law.

9. Indemnification. The Corporation shall provide its trustees with the full amount of indemnification that the Corporation is permitted to provide pursuant to the Act. In furtherance of the foregoing, the Corporation shall indemnify its trustees against liability as defined in Section 33-1116(4) of the Act to any person for any action taken, or any failure to take any action, as a trustee, except liability that (1) involved a knowing and culpable violation of law by the trustee, (2) enabled the trustee or an associate to receive an improper personal economic gain, (3) showed a lack of good faith and a conscious disregard for the duty of the trustee to the Corporation under circumstances in which the trustee was aware that his or her conduct or omission created an unjustifiable risk of serious injury to the Corporation, or (4) constituted a sustained and unexcused pattern of inattention that amounted to an abdication of the trustee's duty to the Corporation.

The Corporation may indemnify and advance expenses to each officer, employee or agent of the Corporation who is not a trustee, or who is a trustee but is made a party to a proceeding in his or her capacity solely as an officer, employee or agent, to the same extent as the Corporation is permitted to provide the same to a trustee, and may indemnify and advance expenses to such persons to the extent permitted by Section 33-1122 of the Act.

Notwithstanding any provision hereof to the contrary, the Corporation shall not indemnify any trustee, officer, employee or agent against any penalty excise taxes assessed against such person under Section 4958 of the Code.

10. Amendment of Certificate of Incorporation and Bylaws. This Certificate of Incorporation and the Bylaws of the Corporation may be amended or repealed, and new Bylaws may be adopted, only with the approval of the Member and the System Parent.

11. References. References in this Certificate of Incorporation to a Section of the Code shall be construed to refer both to such Section and to the regulations promulgated thereunder, as they now exist or may hereafter be amended. References in this Certificate of Incorporation to a provision of the Connecticut General Statutes or any provision of Connecticut law set forth in such Statutes is to such provision of the General Statutes of Connecticut or the corresponding provision(s) of any subsequent Connecticut law. Reference in this Certificate of Incorporation to a provision of the Act is to such provision of the Connecticut Revised Nonstock Corporation Act, as amended, or the corresponding provisions(s) of any subsequent Connecticut law.

Schedule 6.5

YNHHSC Third Party Approvals

1. The Federal Trade Commission must be given notice of the appointment of YNHHSC as the sole member of L+M through the premerger notification program under the HSR Act, and the transaction may not close until the HSR-required waiting period has passed.

2. **Certificate of Need approval from OHCA for the appointment of YNHHSC as the sole corporate member of L+M pursuant to the YNHHSC-L+M Affiliation Agreement, as amended by this First Amendment will require Certificate of Need approval from OHCA.**

3. The merger of LMMG with and into NEMG will require notice to OHCA of LMMG Board approval of the merger and Certificate of Need approval from OHCA, and **at least** thirty (30) days prior to consummating the merger and closing the aforementioned transaction, notice must be filed with the Connecticut Attorney General.

4. The appointment of YNHHSC as the ultimate corporate parent of LMW must be approved by both RIDOH and the Rhode Island Attorney General through a Hospital Conversion Act application. The change in control effected by the appointment of YNHHSC as the ultimate parent of LMW must also be approved by the RIDOH Office of Health Systems Development through a Change in Effective Control application.

5. Notice of the Affiliation must be given to the Connecticut Attorney General at the same time that premerger notification under the HSR Act is given to the Federal Trade Commission.

~~6. A Transaction Test certificate is required to be delivered as a condition to the merger of LMMG with and into NEMG in satisfaction of the requirements of Section 408 of the YNHHSC Master Trust Indenture; Section 6.27 of that certain Reimbursement Agreement by and between YNHHSC and Bank of America, N.A., dated as of June 1, 2014; and each of the three International Swap Dealers Association, Inc. Master Agreements, each dated as of June 23, 2014, by and between YNHHSC and the following counterparties respectively: (i) Barclays Bank PLC; (ii) JPMorgan Chase Bank, N.A. ("JPMC"); and (iii) Goldman Sachs Bank USA.~~

~~7. The written consent of Wells Fargo Bank, National Association ("Wells Fargo") is required to be obtained as a condition of the merger of LMMG with and into NEMG, pursuant to Section 7.6(b) of that certain Amended and Restated Letter of Credit and Reimbursement Agreement by and among Wells Fargo, Yale New Haven Hospital, Inc. and YNHHSC, dated as of June 23, 2014.~~

~~8. The written consent of JPMC is required to be obtained as a condition of the merger of LMMG with and into NEMG, pursuant to Section 15(d) of that certain Letter of Credit and Reimbursement Agreement by and between YNHHSC and JPMC, dated as of June 1, 2014.~~

96. The 1999 Affiliation Agreement between Yale University and YNHHSC, as amended (the "1999 Affiliation Agreement") requires that if a health care provider becomes a member of

Yale New Haven Health System, YNHHS must promptly notify the Yale School of Medicine ("YSM") and, if such new system member has medical education affiliation agreements with medical schools other than YSM, YNHHS must give notice of the expiration date and material program terms of such medical education affiliation agreements.

Schedule 7.5

L+M Third Party Approvals

1. The Federal Trade Commission must be given notice of the appointment of YNHHS as the sole member of L+M through the premerger notification program under the HSR Act, and the transaction may not close until the HSR-required waiting period has passed.

2. **Certificate of Need approval from OHCA for the appointment of YNHHS as the sole corporate member of L+M pursuant to the YNHHS-L+M Affiliation Agreement, as amended by this First Amendment will require Certificate of Need approval from OHCA.**

3. The merger of LMMG with and into NEMG will require notice to OHCA of LMMG Board approval of the merger and Certificate of Need approval from OHCA, and **at least** thirty (30) days prior to consummating the merger and closing the aforementioned transaction, notice must be filed with the Connecticut Attorney General.

4. The appointment of YNHHS as the ultimate corporate parent of LMW must be approved by both RIDOH and the Rhode Island Attorney General through a Hospital Conversion Act application. The change in control effected by the appointment of YNHHS as the ultimate parent of LMW must also be approved by the RIDOH Office of Health Systems Development through a Change in Effective Control application.

5. Notice of the Affiliation must be given to the Connecticut Attorney General at the same time that premerger notification under the HSR Act is given to the Federal Trade Commission.

6. ~~(7)~~ Consent of Bank of America, N.A. to the consummation of the transactions contemplated by the Affiliation Agreement under Section 7(p), and confirmation of Bank of America, N.A. that the transactions contemplated by the Affiliation Agreement will not contravene Section 7(g), of that certain Continuing Covenants Agreement, dated as of October 13, 2013, by and among L+M and LMH on the one hand and Bank of America, N.A. on the other hand.

~~6~~7. Consent of the Connecticut Health and Education Facilities Authority to the consummation of the transactions contemplated by the Affiliation Agreement under Section 6.11 of the Master Trust Indenture, dated as of February 1, 1990, by and among L+M and LMH on the one hand and the Master Trustee named therein on the other hand, as the same has been amended or supplemented from time to time in accordance with its terms.

~~7~~8. Notification to TD Bank, National Association pursuant to Section 5.30 of that certain Letter of Credit and Reimbursement Agreement, dated as of November 5, 2013, by and among L+M and LMH on the one hand and TD Bank, National Association, on the other hand.

L+M Hospital Inpatient Bed Allocation			
<i>As of 9/8/16</i>			
	Licensed	Available	
	Beds	Beds	
Med/Surg		142	
Critical Care (ICU/CCU)		20	
Psychiatric		18	
Rehabilitation		16	
Maternity		24	
NICU/Newborn Nursery		27	
Total	308*	247	

*note: total includes 280 general hospital beds and 28 bassinets

L+M Hospital Outpatient Services by Service, Location and Hours of Operation

October 4, 2016

Ms. Kimberly Martone
State of Connecticut
Office of Healthcare Access
410 Capitol Avenue, MS#13HCA
Hartford, Connecticut 06134-0308

Dear Ms. Martone,

Pursuant to the Order contained within the Agreed Settlement of Docket Number 15-32033-CON, "Transfer of ownership of Lawrence + Memorial Corporation (L+MH) to Yale New Haven Health Services Corporation (YNHHS)", Condition 3 and Condition 31 are required to be submitted to OHCA within thirty (30) days following the completion and Board approval of L+MH's 2016 Community Health Needs Assessment (CHNA) and its Implementation Strategy. The CHNA and Implementation Plan was approved by L+MH's Board on August 29, 2016.

Attached please find documents responsive to Conditions 3 and 31. The CHNA and Implementation Plan are being posted on L+MH's website immediately under "About Us".

A copy of these documents will be sent via U.S. postal service.

Regards,

Nancy Levitt Rosenthal
Vice President, Strategy and Regulatory Planning

Funding Support

Partial funding for this project was generously provided by the Community Foundation of Eastern Connecticut and the U.S. Preventative Health and Health Services Block Grant

Guided by the Southeastern CT Health Improvement Collaborative, a coalition of health care providers, local public health, federally qualified health centers, tribal representatives, higher education, and numerous non-profit organizations serving the region, L+M Hospital (L+M) and Ledge Light Health District (LLHD) considered data from primary and secondary sources to identify and elucidate the leading health indicators for the region included in this report. Accompanying this assessment is a Community Health Improvement Plan (CHIP) to address the Community Health Assessment findings.

The data sources in this assessment provided a rich array of information and moved the process toward a more holistic understanding of health status, perceptions, barriers, and strategies for improvement. Community member input revealed consistent themes around communication, connections and bias, disparities, access to care, safety concerns, mental health, and chronic disease.

Recognizing the significant contribution of social determinants to overall health and wellness, particular attention has been paid in this assessment to the interaction between socioeconomic and environmental conditions as well as to health disparities. One such social determinant, economic security—or the ability to regularly and comfortably pay for one’s basic needs such as food, housing, transportation, and other goods and services, is closely associated with health outcomes. Although fewer residents of New London County experienced poverty in the past 12 months compared to the state, there still exist disparities around family construct and geography. Residents in lower income categories reported higher anxiety and depression, and lower incomes are correlated with higher suicides and self-inflicted injuries. There are also significant disparities related to employment in Greater New London; the real unemployment rate among Blacks is more than twice that of Whites.

Housing stock in the region is older in general and more likely to harbor health hazards such as defective lead paint, failing plumbing, and asbestos insulation, contributing to poorer health among lower income residents who are more likely to live in poor quality housing. Further, transportation emerged as a key issue impacting health; when asked about their vision of a healthy community, focus group and web survey participants and community partners repeatedly cited the need for more and better public transportation, bike lanes and pedestrian-friendly roads .

As it relates to chronic disease, there are repeated associations between poor health and social determinants in the assessment data. When sedentary lifestyle is examined by income, those with incomes less than \$50,000 are more likely to be sedentary than the state and Greater New London overall. Smoking, diabetes and heart disease also have higher prevalence among those within lower income categories and those with lower levels of education. Lower income and education is also correlated with higher emergency department use, the delaying of healthcare, not getting necessary care, and not getting necessary medications due to cost.

Mental and emotional wellbeing is an area of concern, with disparities by race and also by income. Mental health concerns and substance use are often co-occurring—in 2015, depression was the fourth most prevalent condition among hospitalizations and alcohol/substance use was the fifth. Although the data reflect a time period before the most recent dramatic spike in opioid overdoses and related deaths, there nonetheless is an upward trend seen in recent years.

Racial and ethnic health disparities were evident on several indicators including asthma (higher among Hispanics and African Americans), oral health (less preventive care among African Americans), hypertension (higher among African Americans) and the experience of violence (higher among Hispanics). African Americans and Hispanics are more likely to use the hospital emergency department (ED) for care, considered a proxy for access to care in the community.

Understanding the connections between wide-ranging factors and their relative contributions to overall health is one goal of the community health assessment process. Only through this understanding can the community effectively impact policies, systems and practices toward a healthier community.

With a shared vision for a healthy community, and continuing a long-term partnership on many community health improvement activities, Lawrence + Memorial Hospital (L+M) and Ledge Light Health District (LLHD) joined together in 2015-16 to lead a Community Health Assessment (CHA) process for Greater New London (see map page 7). Guided by the Southeastern CT Health Improvement Collaborative, a coalition of health care providers, local public health, federally qualified health centers, tribal representatives, higher education, and numerous non-profit organizations serving the region, L+M and LLHD considered data from primary and secondary sources to identify and elucidate the leading health indicators for the region included in this report. Accompanying this assessment will be a Community Health Improvement Plan (CHIP) to address the CHA findings, developed by the Southeastern CT Health Improvement Collaborative. Through the prioritization and planning process, the Collaborative will identify initiatives that include addressing social determinants in order to achieve improved health outcomes. While the CHA and CHIP are designed to meet the requirements for L+M to maintain their non-for-profit status as a community hospital and for LLHD to earn accreditation through the Public Health Accreditation Board, both organizations intend for the reports to serve as guides for planning future programs and policies for these agencies and for the community overall.

Among public health and human service advocates in Greater New London, there is a recognition that social determinants, such as poverty, educational attainment, food security, housing, and transportation, contribute to overall wellbeing and health more than clinical care, behaviors or family history. Otherwise stated, zip code is more important than genetic code as a contributor to health. Developing the best strategies to improve health requires an understanding of how social

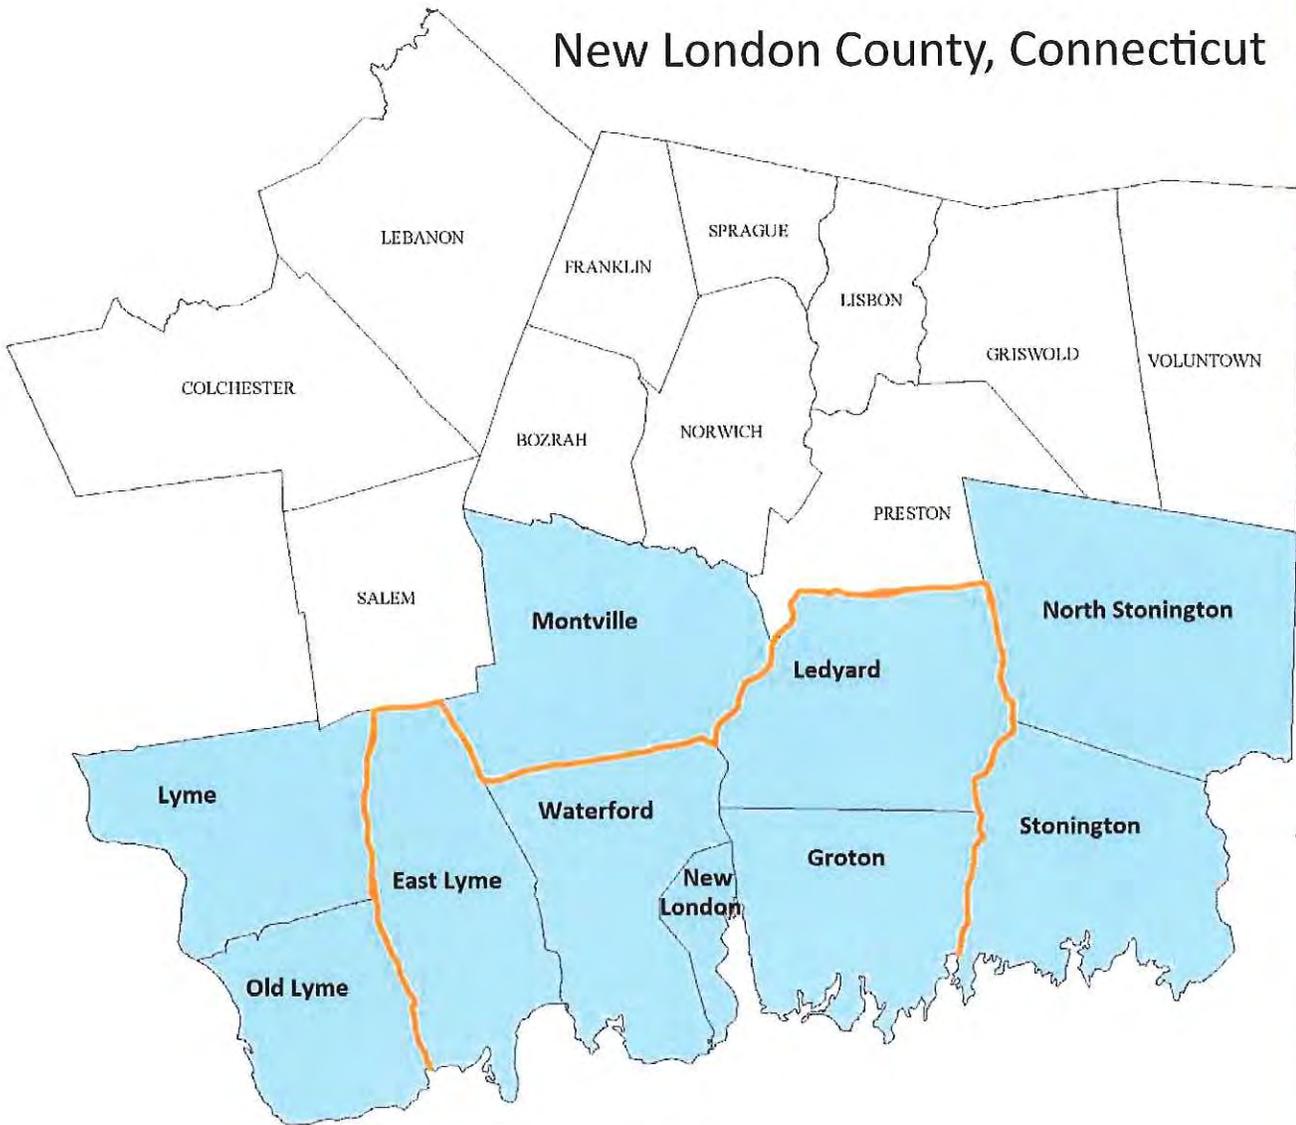

determinants influence health. It is especially important when considering health inequities; that some groups within our communities bear disproportionate rates of disease and/or experience disparate quality of care is related to many intersecting factors. Achieving a “healthy community” where everyone has the same opportunities to make healthy choices and access quality, culturally and linguistically sensitive, timely and affordable health care requires us to examine inequities in socioeconomic conditions, and the policies and practices that create them.

WHAT Know What Affects Health

This Community Health Assessment Report focuses on the leading health indicators of Greater New London, which is the Lawrence and Memorial Hospital primary service area (highlighted in blue on this map) and includes the member municipalities of Ledge Light Health District (outlined in orange).

New London County, Connecticut

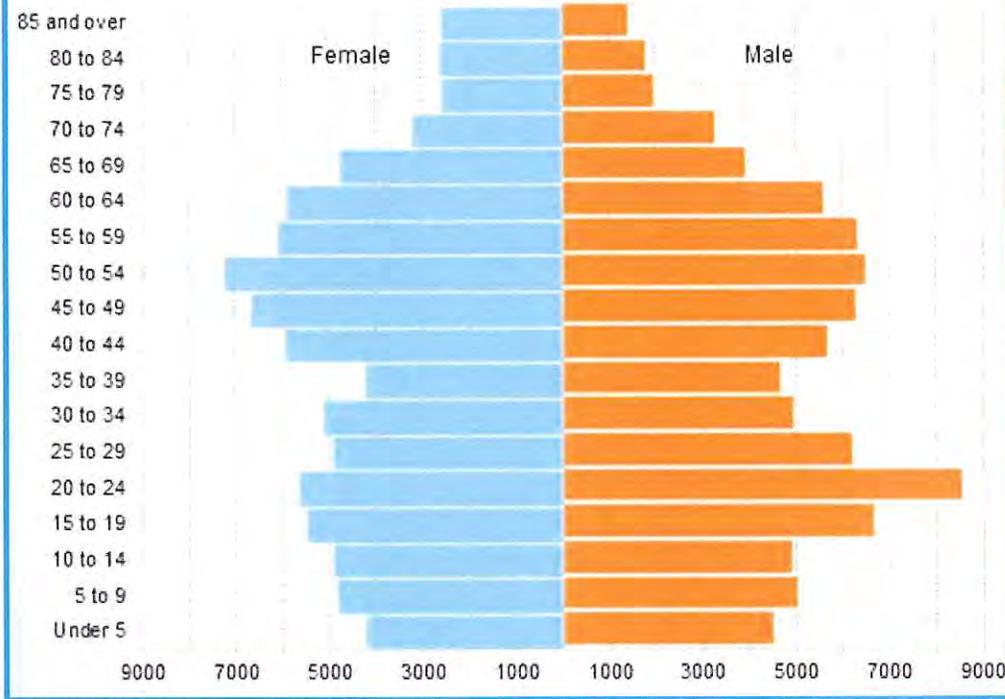

The Lawrence + Memorial Hospital service area covers 17 U.S. Census zip code tabulation areas. The information presented in this section reflects the total population of those areas from the American Community Survey.

Total Population	174,814
Gender	
Male	50.5%
Female	49.5%
Race/Ethnicity	
White, Non-Hispanic	76.0%
Hispanic or Latino of Any Race	10.4%

Russian:	10	0.3%	38.6%

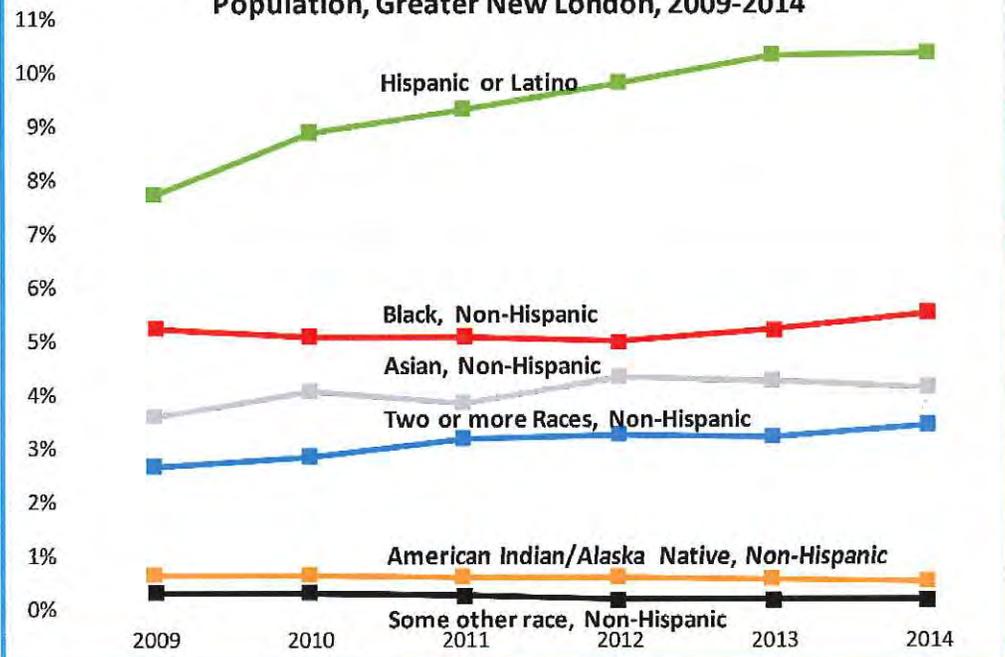

Population of Greater New London by Age and Sex

According to the 2014 American Community Survey, the population of Greater New London is 174,814, having grown by about 2,500 people in the past 5 years. The population is nearly evenly divided by sex, with 50.5% being male, though the population 65 years and older is made up of more females

(55.8%). Of particular importance is the large wave of those in and around the baby boom generation (ages 50-70). As this group continues to age, it will place increasing health, social and economic pressures on families, social service and governmental agencies. Both in absolute terms and as a percentage of the population (24%), the population of non-White minorities has grown in

Change in Minority Population as a Percentage of the Total Population, Greater New London, 2009-2014

Greater New London over the past 5 years (up from 20% in 2009). This growth has been driven primarily by those identifying as Hispanic or Latino, whose population has grown from 7.7% of the population in 2009 to 10.4% in 2014.

On May 26, 2015, L+M and LLHD organized the first meeting of what would become the Southeastern CT Health Improvement Collaborative (Collaborative). Representatives from a number of community agencies were invited to serve as a steering/advisory committee for L+M and LLHD's assessment. The Collaborative met bimonthly and provided insight and guidance in the design of data collection efforts. In November, Collaborative members joined other community agencies for a facilitated conversation considering the assets and challenges to health in the region. At subsequent Collaborative meetings, members organized focus groups and reviewed preliminary data. LLHD and L+M hosted a preliminary data release in March 2016 and a prioritization event in May 2016.

This assessment includes review and analysis of data from primary and secondary data sources:

The statewide Wellbeing Survey of adults, conducted by DataHaven in the late summer and fall of 2015. A statewide telephone survey of area residents with oversampling conducted in select communities, the survey included 1,200 residents from Greater New London. The survey was delivered in English and Spanish and included both landline and cell phones. The sampling methodology and survey tool are included as Appendix A.

A supplemental survey tool developed in English and Spanish and deployed in community settings including clinic waiting rooms and sporting events. The goal of the supplemental survey was to obtain information from individuals who may not have been represented in the initial telephone survey.

The November key informant/community partner forum with over 30 participants (see distribution list Appendix B). At the forum participants shared their insights on the most important health and wellbeing issues in our region and how to address them.

Qualitative data from 12 focus groups held in early 2016 in order to explore issues of concern revealed in the household survey. These groups included conversations among African Americans, Hispanics, Native Americans, youth, seniors, LGBTQ people, and people living in poverty (see focus group reports in Appendix C).

Secondary data from a wide range of sources, including Centers for Disease Control, the CT Department of Public Health, the U.S. Census, Healthy People 2020, and the CT Hospital Association. A complete list of data sources for this report are listed on page 15.

Community engagement was a key component of the CHA. The CHA included participation of not only public health experts and health care providers but also representatives, ranging in age from 12 to 87, of medically underserved, low income, minority, and youth populations and an array of community organizations from throughout the region. Their voices were heard through a community partner forum, twelve focus groups including diverse representation, the CHA steering committee, and a web-based survey. Throughout the various engagement activities, several themes emerged.

Connections, Communication, Bias

In general, there is a feeling that there has been a loss of sense of community locally. Community members and

partners said that there is a lack of communication, coordination, and understanding of differences, between people and with organizations and systems. Examples of widespread bias along many lines—racial/ethnic, mental health, gender, age, ability, sexual orientation, resulting in discrimination, disparities, and stigma and ultimately negatively impacting access to care and quality of services, were described. Within organizations, there is a need for greater cultural competence to bridge differences. The “we know best” culture, particularly in healthcare, needs to be addressed. Some feel that although there is division within the community overall, communication may be better within a single culture.

“A lot of people in this area are invisible.”
—faith community focus group participant

The complexity and fragmentation of the healthcare system impacts access; it’s difficult to navigate, with many barriers including finances, health insurance status,

Access

literacy, time constraints, and “how it is organized.” As a region, there is a need to start thinking collectively and to examine the infrastructure, education and training deficits. It is generally understood that the area doesn’t benefit from as many state resources as do the urban centers elsewhere in the state; this calls for standing together and demanding attention and support. Some challenges include an inadequate public and safety net transportation system which has a major influence on access to services including health and social services, lack of access to safe affordable housing, place-based issues including neighborhood challenges, and economic disparities. The region’s population is aging and experiencing increased isolation. Focus group participants and community partners expressed concern that technology may create new barriers to access, particularly among older residents.

“The high cost of health care is making individuals skimp in ways like splitting pills, deferring care, and foregoing dental care and on necessities like food.”
—access to care focus group participant

Safety

Many focus group participants cited safety concerns including neighborhood issues, family violence, bullying, and sexual abuse. Factors contributing to a decreased sense of safety include drug and alcohol use, poverty, and mental health. Residents expressed concern that children are witnessing drug use and extreme violence. Older residents feel that increased law enforcement in a neighborhood leads to a safer environment, but younger residents noted an overall decrease in feeling safe. Youth expressed worries about early death or injury from violence.

*“A gun is easier to get than an apple.”
—youth focus group participant*

Mental Health

As it relates to mental health, stress and anxiety are cited as having a dramatic impact on the overall health of residents and these concerns are increasing. Community members indicate that greater awareness, education, de-stigmatization, understanding, and coordination of care, to include integration of behavioral health services with medical care. There are excellent resources available in this region but it is felt that they aren't as networked or as culturally competent as they should be. Young people cited the stress of helping their parents provide for their families.

*“There are so many people in this building who have mental health issues and need services, but they don't know where to go or how to pay for the services. I have friends who are survivors of traumatic domestic violence who need support services, but they don't know who to go to or how to get started. These are parents—with heavy baggage—raising kids in a place no one else in the community cares about. We love each other but know we're a bunch of throwaways, like those misfit toys in that Christmas special.”
—public housing focus group participant*

Residents have many ideas about contributing factors to chronic disease. They cited lack of access to healthy foods, too many processed foods that are easily obtained, cost of

Chronic Disease

fresh foods, and limited nutritional education, including information on appropriate portion sizes. There are cultural practices that contribute to poor nutrition and which could potentially be improved with education. It is also believed that greater information about available recreational opportunities for all residents would have a positive influence on overall health.

*“Kids are not moving as much, there isn't as much recess, and all of the technology is keeping them inside.”
—community member*

Smoking, air quality, built environment, and lack of trust in the healthcare system were also raised as influences on health.

Focus group and web survey participants were asked about their vision for a healthy community. Ideas cited included integrated community development, readily accessible healthy foods, recreational opportunities available for all regardless of age or ability, and a transportation system that truly meets the community's needs. Despite the challenges acknowledged, there is a sense of optimism that Greater New London has a healthy future.

Thinking ahead about the future of your community, what is your vision related to people's health? What do you think needs to happen to make this vision a reality?

"Full Service Community Center with a state of the art gym, pool, fitness guidance classes all at affordable rates."

"There needs to be innovation in how services are provided and made available to support holistic health."

"Better/more information regarding services available to the underserved."

"Improvement in the diet of the community- e.g. less processed food and more fresh, healthy options."

"Provide low cost care not only with primary doctors, but also for specialists."

"Sustainable public spaces that promote health and wellness."

"Elder care is an increasing issue, both health services and living spaces."

"Better services for people with disabilities."

"Middle class benefits - most people making a middle class income are just getting by or not and makes it impossible to qualify for services."

"More public transportation."

"More inclusion in politics."

"Bicycle paths and sidewalks to walk safely on would be wonderful!"

"More community leaders stepping up and folks buying into the notion of taking care of one another instead of looking out solely for themselves."

"A greater focus on walkability."

"Early intervention with children's needs."

"Less racism."

"Improving mental health and domestic violence prevention are very important to me."

"Better availability of paid maternity leave, preschool, neighborhood childcare."

"Safer and better maintained housing for low income families."

"More and better employment opportunities that pay a living wage."

"More public health, safety out reach groups. There needs to be more youth activities for the children."

The graphs and information included on the following pages reflect data from several sources:

- The 2015 DataHaven Wellbeing Survey (2015 Wellbeing Survey)
- The American Community Survey (ACS)
- Centers for Disease Control and Prevention (CDC)
- Connecticut Department of Public Health (CT DPH)
- Connecticut Health Foundation
- Connecticut Hospital Association
- Environmental Protection Agency (EPA)
- FBI Uniform Crime Reporting
- Harvard School of Public Health
- Institute for Future Studies
- Lawrence + Memorial Hospital (L+M)
- Ledge Light Health District (LLHD)
- Locally Conducted Focus Groups
- Robert Wood Johnson Foundation
- Southeastern Regional Action Council (SERAC)
- United Way of Southeastern Connecticut (ALICE Report)
- University of Massachusetts
- World Health Organization

The applicable data source is noted on each graph.

As much as possible, where valid data were available from the 2015 Wellbeing Survey, these graphs reflect the primary service area of L+M Hospital, as shown on the map on page 7 and as reflected in the demographics highlighted on pages 8 and 9 and referred to as “Greater New London.” In some cases, the graphs reflect data only for the LLHD member municipalities (see map on page 7), while in other cases the graphs reflect New London County or the state of Connecticut. In these instances, the geographic scope of the graph is noted.

L+M and LLHD identified leading health indicators in eight domains. The indicators selected are limited to those for which there are local data. This report will be updated if additional sources of local incidence or prevalence of disease, illness or injury are identified. It should be noted that there is a significant lack of local population health data on children. Data about childhood asthma, vaccinations and substance use are included; there may be other leading childhood health indicators for which local data are not currently available.

The domains and sub-categories include:

Social Determinants of Health

Educational attainment is strongly associated with health and wellbeing. People with higher levels of education tend to live longer, healthier lives than those with lower levels of education. Existing research has documented that this association is not due to differences in health literacy or behavior alone, but also influenced by differences in income, housing, social support and childhood poverty and trauma.

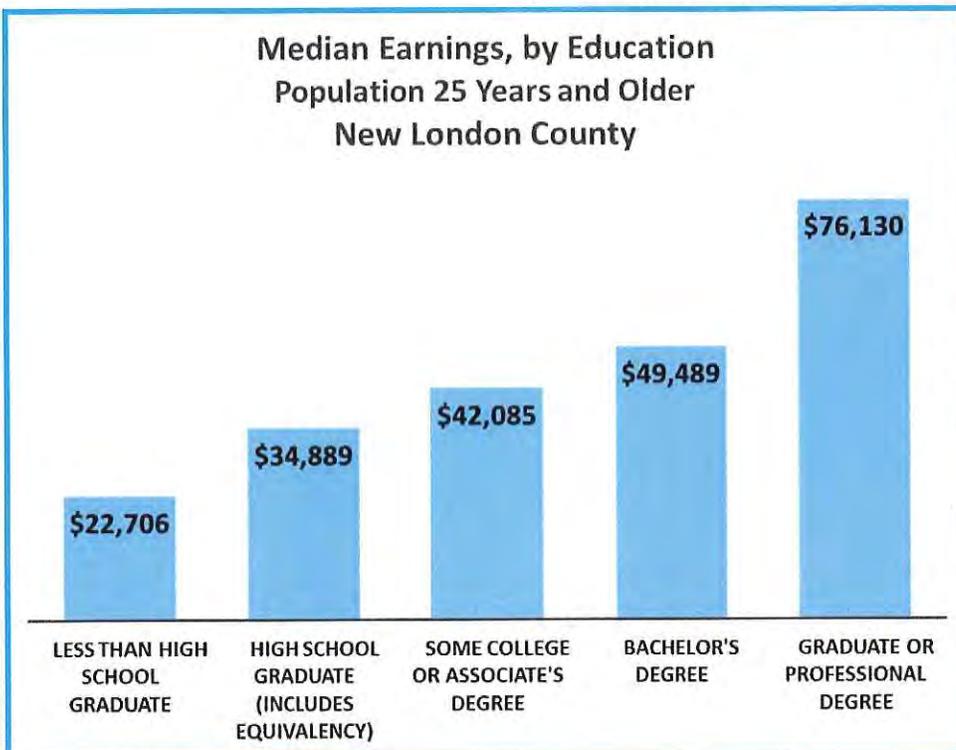

Residents of New London County enjoy high levels of educational attainment overall, though rates of adults with bachelor's or graduate degrees lag slightly behind the state (20.6% and 16.4% respectively).

Source: ACS, 2014 5-Year Estimates

Education

Educational attainment is closely linked with the ability to earn a living, often trapping those with less education in jobs that pay very little. 1 in 4 adults in New London

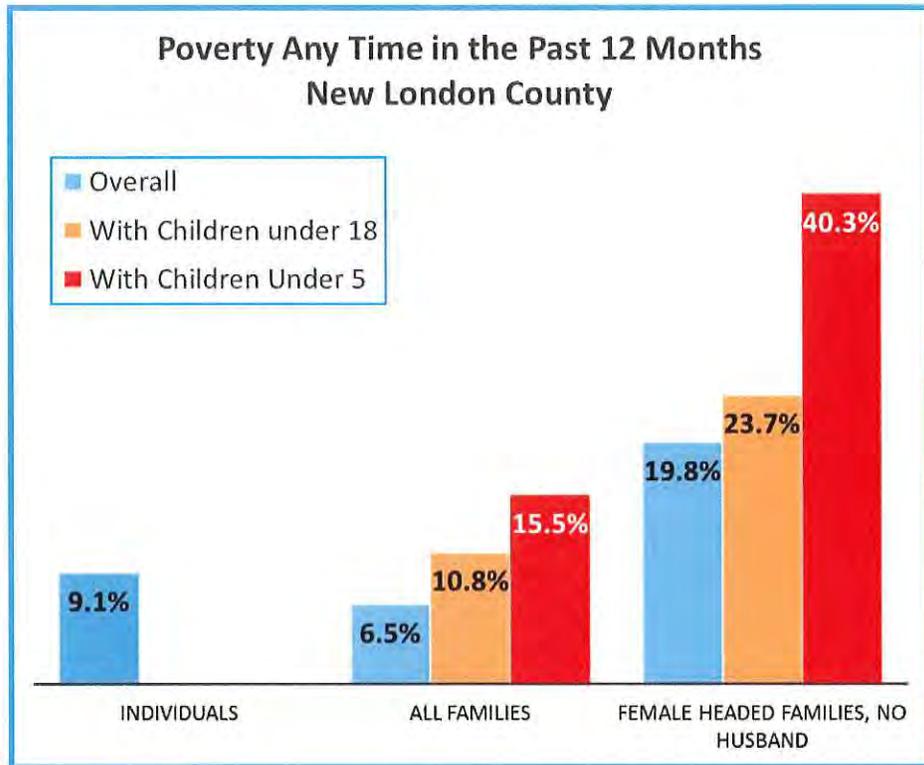

County without a high school diploma live in poverty.

Those with the highest levels of education on average earn more than three times as much as those with the least education.

Source: ACS, 2014 5-Year Estimates

Economic security, or the ability to regularly and comfortably pay for one’s basic needs such as food, housing, transportation, and other goods and services, is closely associated with health outcomes. Overall, residents of New London County appear to enjoy high levels of income, with median household earnings of \$66,693 (ACS 2014 5-Year Estimates). In

Source: ACS, 2014 5-Year Estimates

addition, fewer residents of New London County experienced

Economic Security

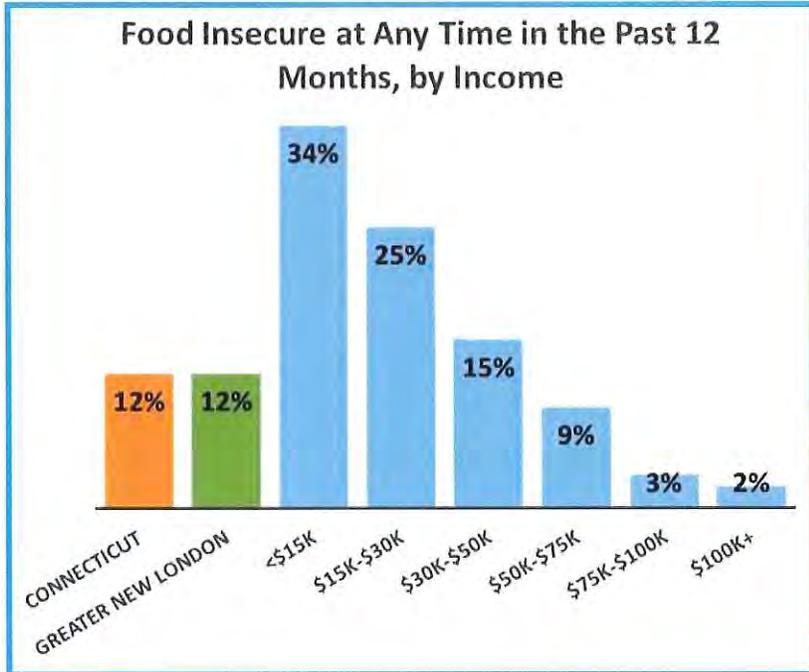

poverty in the past 12 months compared to the state (10.5%). Sadly, however, disparities still exist. Families with children, and in particular single-parent families with young children, had much higher rates of poverty.

While the median household income for the county appears high, according to the United Way of Southeastern CT (UWSECT), the basic survival budget for a household with young children is approximately \$63,000, only slightly below the county’s median income level.

According to the United Way of Southeastern CT, 26% of households in New London County are considered asset limited, income constrained, employed (ALICE).

Part of being economically “secure” is achieving a comfortable degree of financial stability and predictability. Many residents of the Greater New London area (46%) reported that if they lost their source of income, they could continue to live as they currently are for at least six months. About 1 in 5 residents, however, are less than one month away from having to make major life changes if their current source of income were to end, suggesting a tenuous or non-existent degree of economic security for a large portion of the population of the region.

One of the direst consequences of poverty is the inability to afford to buy food. Though comparable to the state overall, food insecurity in the past 12 months still rose to levels that should be considered unacceptable, especially among those earning less than \$30,000 per year. That there appear to be co-occurring epidemics of food insecurity and obesity, especially among low income populations, speaks to the nutritional density of affordable food, and suggests the very real need to address the food system in the region.

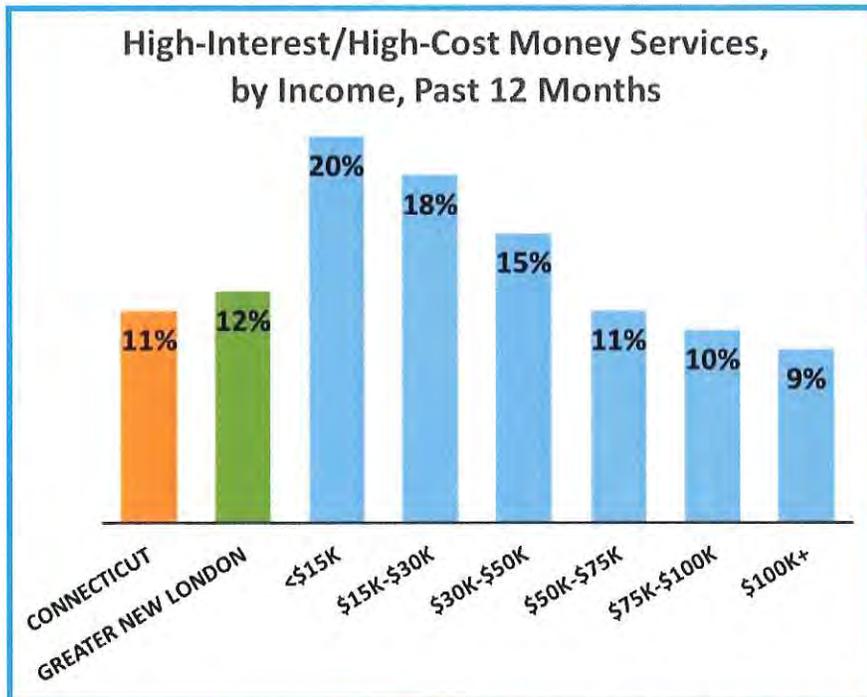

Source: 2015 Wellbeing Survey

Economic Security

Though only about 1 in 8 adults overall used them in the past 12 months, high interest, high cost money

services such as check cashing, money orders, and refund anticipation loans exact an economic cost on people of low income far more frequently. Contributing to what is often referred to as the "poverty tax" because they are used by those who can least afford them, these services are needed more often by people of low income in order to pay regular bills, service debt, and purchase basic necessities like food. While 92% of adults

Source: 2015 Wellbeing Survey

overall in the Greater New London region held a bank account in the past 12 months, only 68% of those earning less than \$15K held one, increasing the need among this group to access alternative services. Though filling a need, these high-cost money services also exacerbate the economic struggles of those living in poverty.

According to the Robert Wood Johnson Foundation May 2011 brief on housing and health, good health depends on having safe, clean, affordable homes. Housing stability contributes to healthy neighborhoods and a sense of community. "Poor quality and inadequate housing contributes

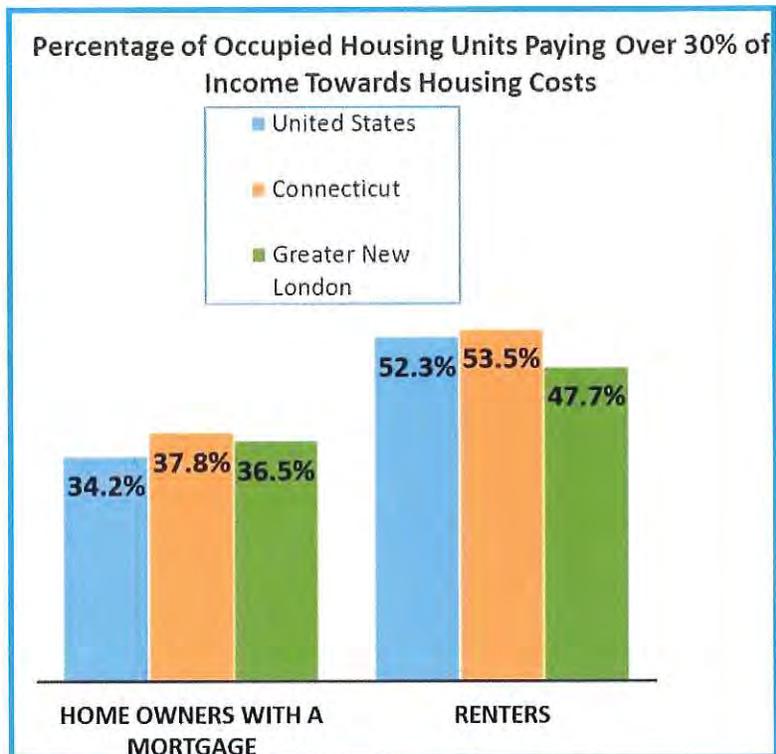

Source: Robert Wood Johnson Foundation

to health problems such as infectious and chronic diseases, injuries and poor childhood development." Substandard housing typically presents many triggers to asthma including mold, rodents, cockroaches, dust, and poor air quality in general, and is often located near major roadways with associated increased air pollution.

Housing

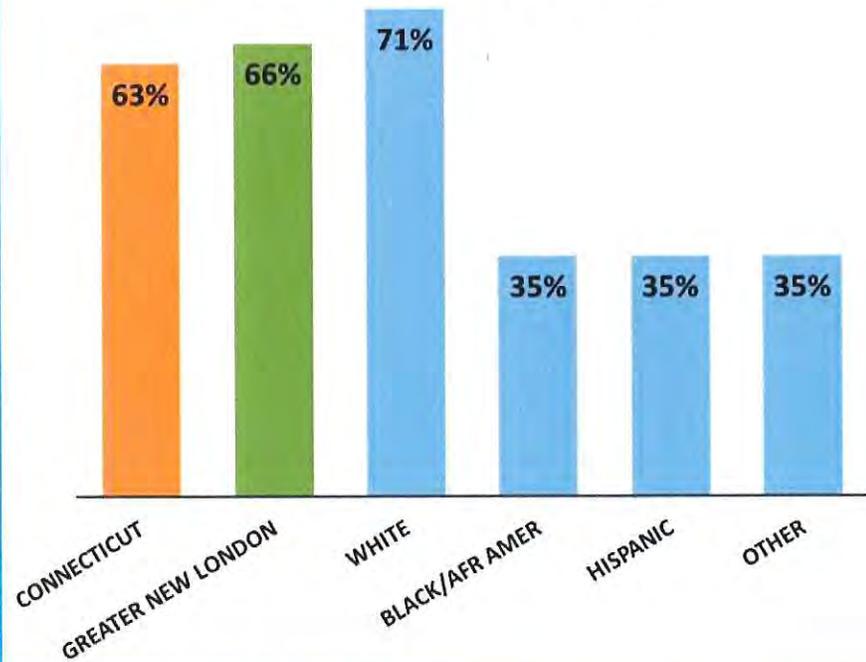

Particular health problems associated with poor housing conditions include respiratory infections, asthma and other chronic diseases, lead poisoning, injuries, impaired child development, and poor mental health. Though on par with or slightly better than the country and the state, home ownership and rental costs as a percentage of income are still unacceptably high in the Greater New London area. When residents spend over 30% of their income on housing alone, some struggle to pay for other necessities such as food, transportation, healthcare, and child care. This burden is felt most acutely by low income residents.

Nearly 60% of all housing units in Greater New London were built before 1960 (ACS 5-Year Estimates). Older housing stock is more likely to harbor health hazards such as defective lead paint, failing plumbing, and asbestos insulation.

Source: ACS, 2014 5-Year Estimates

Home Ownership, by Race

66% of residents in Greater New London own their home, slightly better than the state overall. Significant racial disparities exist, with the frequency of home ownership twice as high among Whites in the area compared to all other races. While much of this disparity can be attributed to the concentration of wealth among Whites, it remains possible that discrimination in the real estate and financing markets exist that make it more difficult for

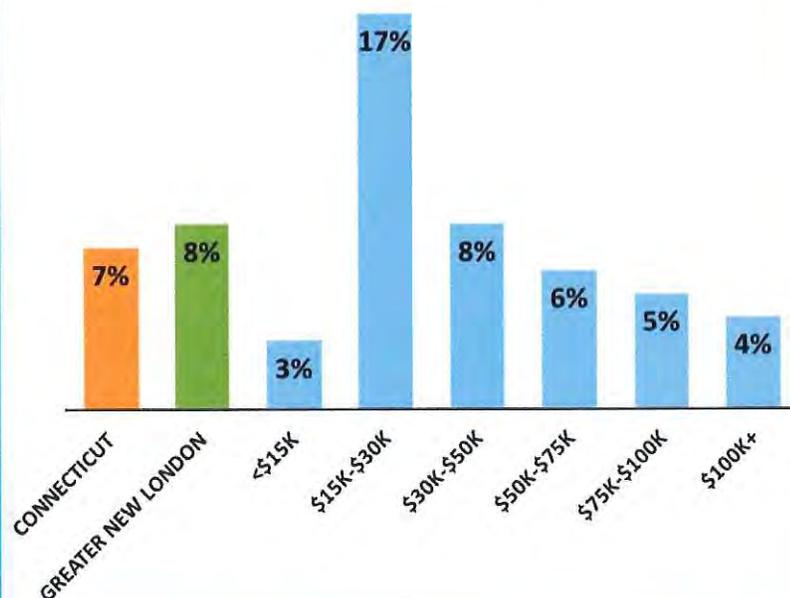

Source: 2015 Wellbeing Survey

racial minorities to purchase a home.

Housing

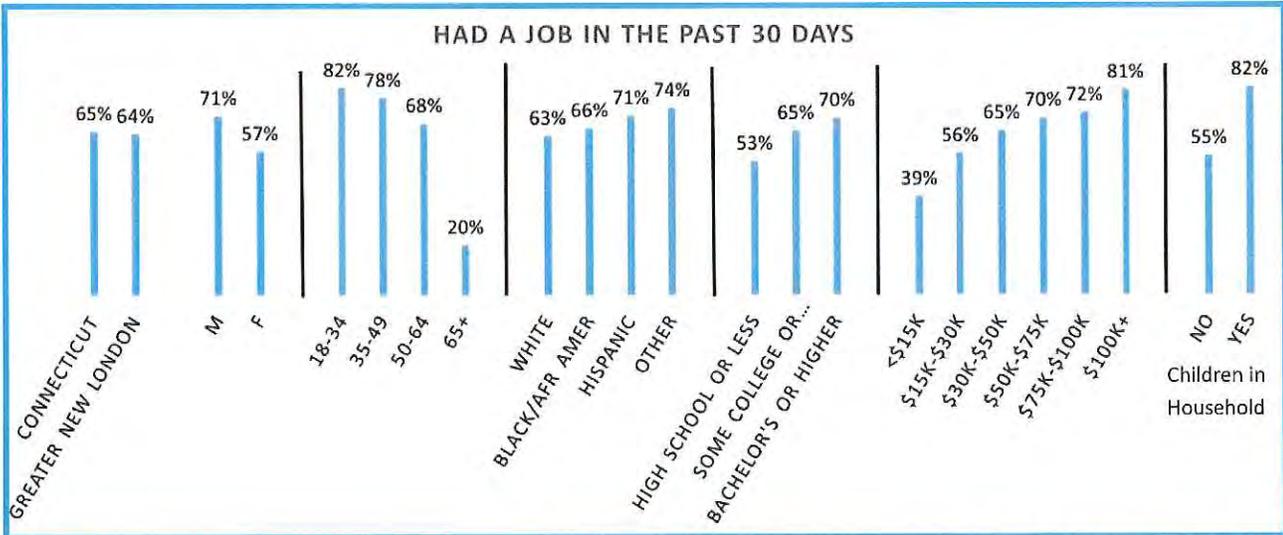

Housing stability is fairly strong in the region, with only 1 in 12 residents in the Greater New London area having lived in their home for less than one year (about the same as the state overall). With the exception of those earning less than \$15,000 per year—who enjoy the highest level of housing stability (likely due to high levels of occupancy in subsidized housing), as income decreases, so does housing stability. About 1 in 6 people earning between \$15,000 - \$30,000 have lived in their current home less than one year—twice the overall rate.

Lived at the Same Address for Less than 1 Year, by Income

Source: 2015 Wellbeing Survey

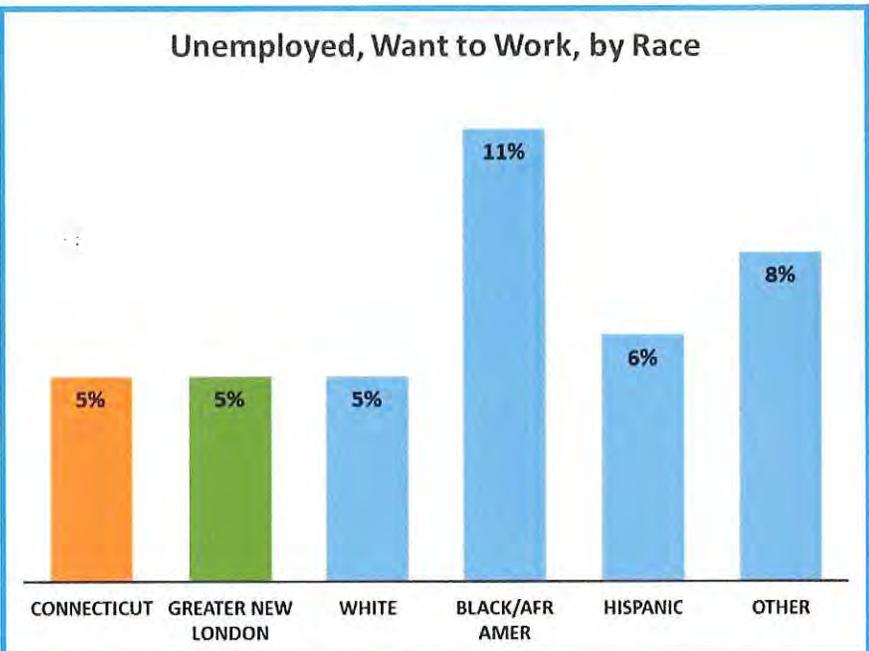

Having a steady job with good wages impacts health in a number of ways and provides more than just income. Employment often comes with benefits such as healthcare, retirement benefits, and support and paid time off to accommodate family needs. On the opposite end, losing a job or being unable to find work is associated with a number of negative health consequences including stroke, heart attack, heart disease, and arthritis (Robert Wood Johnson Foundation). While the overall employment rate for Greater New London is on par with the state's, the picture is much different for certain segments of the population.

Source: 2015 Wellbeing Survey

Employment

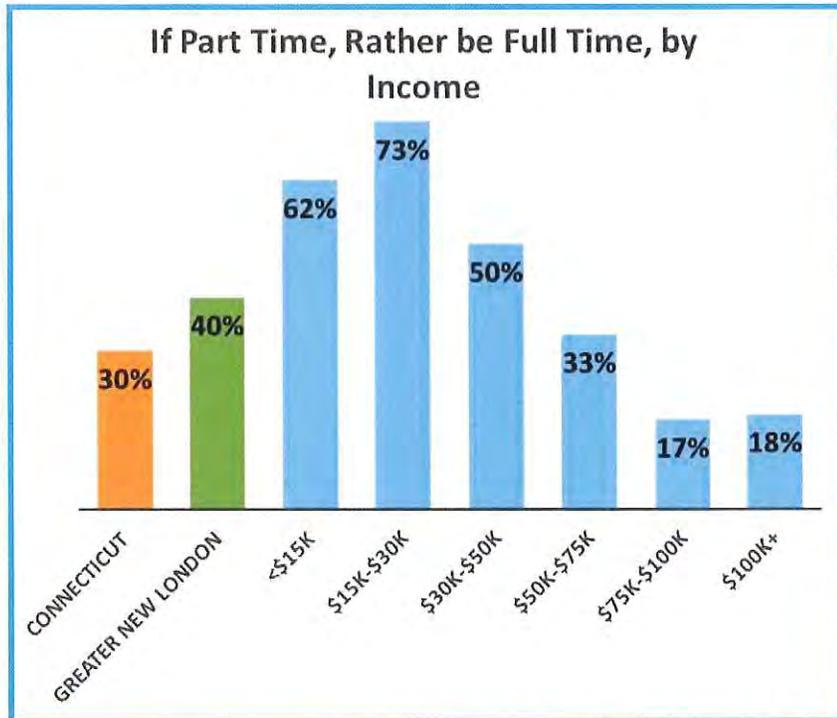

“Real unemployment” is the term used to reference the portion of the population who are unemployed but would like to be working. The real unemployment rate in Greater New London is the same as the state overall (5%) but racial disparities exist in our community.

Source: 2015 Wellbeing Survey

The real unemployment rate among Blacks is more than twice that of Whites. (Wellbeing Survey)

Overall, 69% of residents of the Greater New London area who are employed are full time, compared to 77% in the state. Of those who are part time, 40% would rather be full time, compared to 30% in the state. Both are troubling statistics that suggest the availability of full time jobs in the area is far from being robust enough to meet the needs of residents.

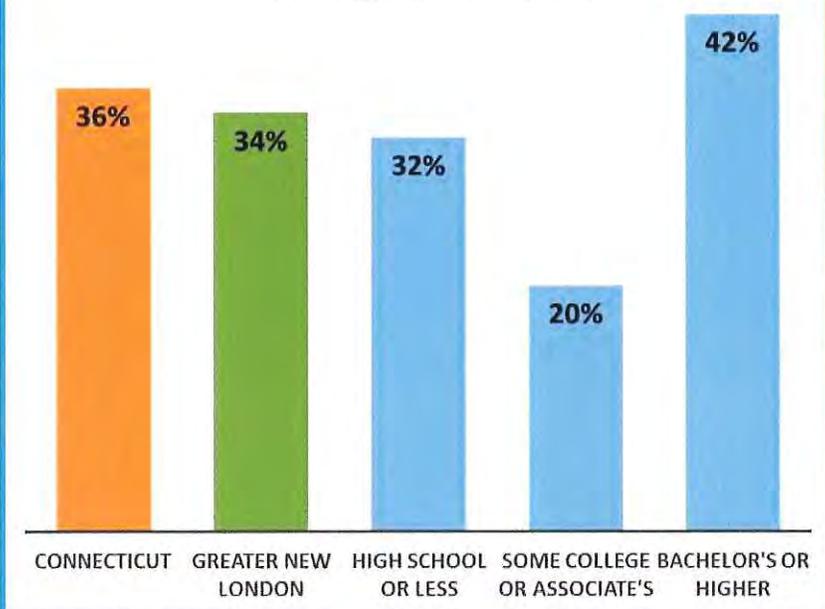

Source: 2015 Wellbeing Survey

Employment

In the Greater New London area, only 1 in 3 residents rated the ability of people to get suitable employment as good or excellent, highlighting the perception among residents, even among some who are employed, that good jobs in the area are hard to come by. (Wellbeing Survey)

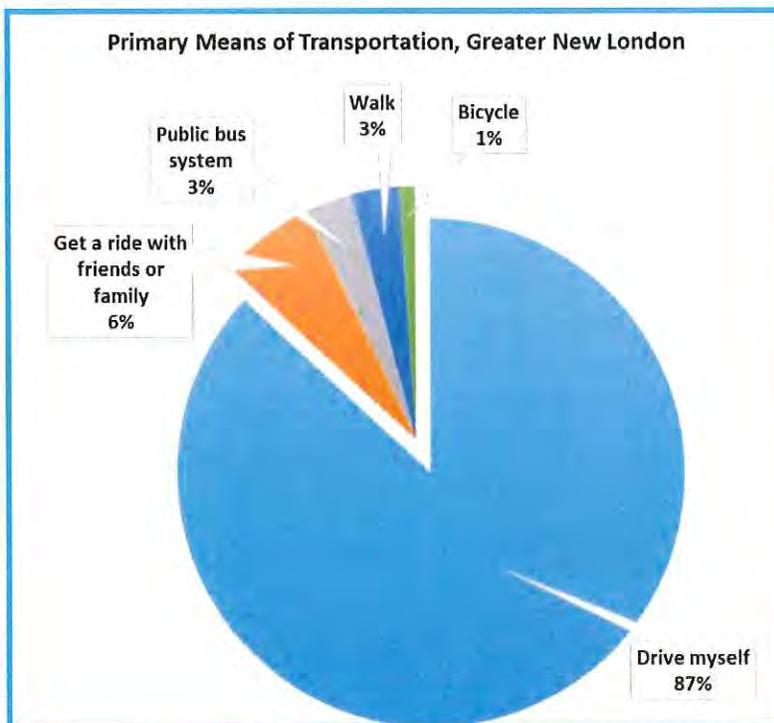

Unemployed Needing More Education or Training, by Education

For those who are unemployed, 1 in 3 say they need additional education or training, about the same as the state overall. Interestingly, the group that more frequently said they required more education or training to get a job were those who already had a bachelor's degree or higher.

Source: 2015 Wellbeing Survey

Transportation impacts health both directly and indirectly. Injuries and fatalities from traffic accidents affect the health of a community, and pollution from the burning of petroleum products for fuel exacerbates chronic lung diseases. Additionally, transportation infrastructure often cuts off low income neighborhoods from the rest of their communities, isolating groups of people and making it difficult to access the goods and services necessary to live healthy lives.

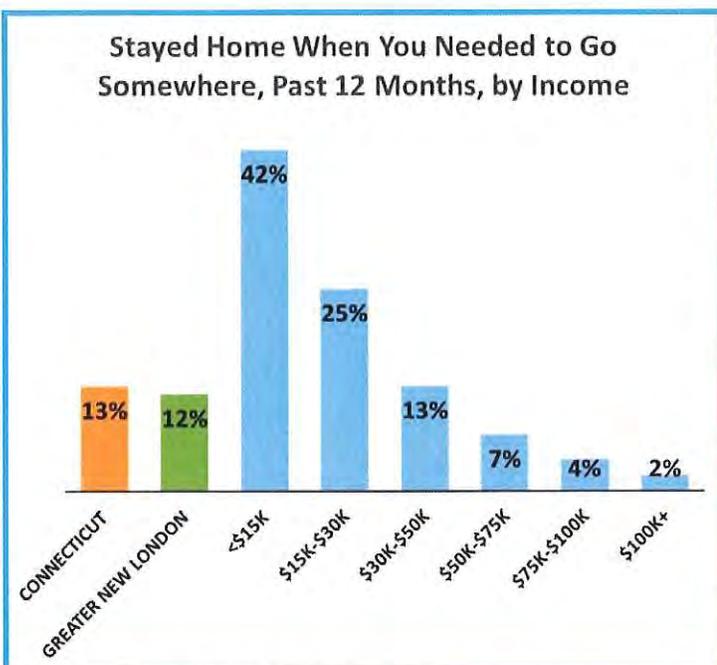

Source: 2015 Wellbeing Survey

Transportation

The vast majority of residents, almost 9 in 10, drive themselves as their primary means of

Focus group and web survey participants repeatedly cited the need for more and better public transportation, bike lanes and pedestrian-friendly roads when asked about their vision of a healthy community.

transportation. But only about half of those earning the least, under \$15,000 per year, drive themselves, with 1 in 5 reporting never or almost never having access to a car. 1 in 4 people of low income report using buses as their primary means of transportation. 2 in 5 residents earning less than \$15,000 per year reported having to stay home when they needed to go somewhere in the past 12 months, nearly 4 times the rate of the Greater New London area and the state overall. Even those earning slightly more, between \$15K-\$30K per year, reported having to stay home at nearly twice the rate compared to the region and state.

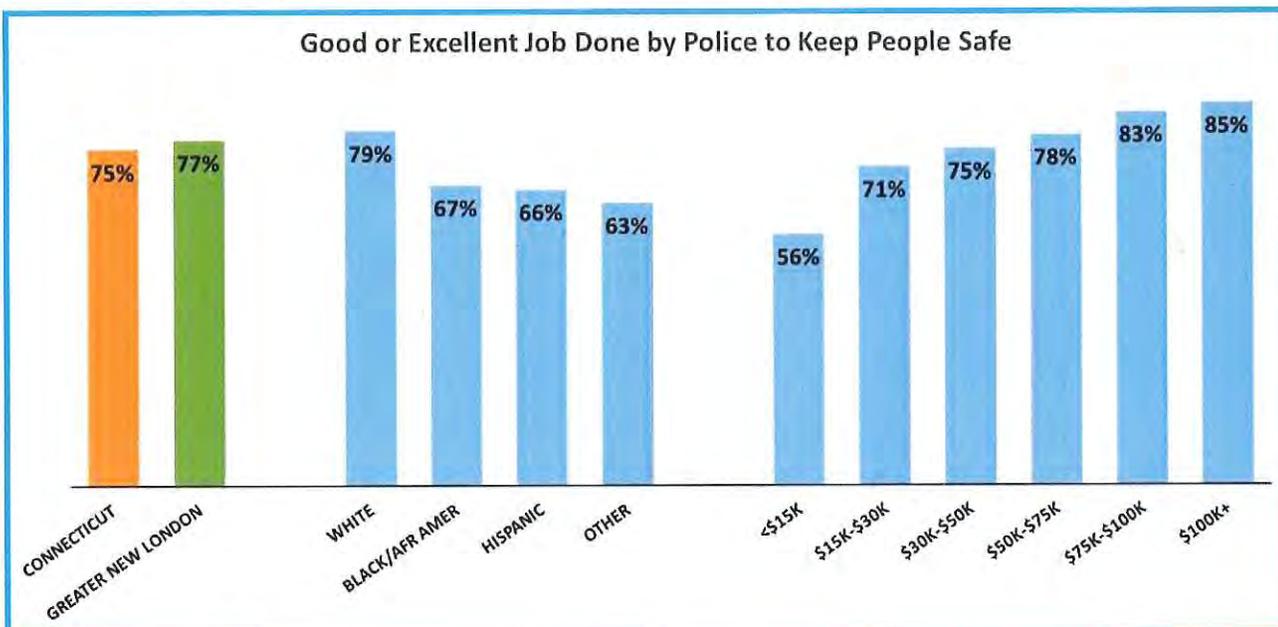

Source: 2015 Wellbeing Survey

Having safe neighborhoods encourages residents to participate in a number of healthy activities, including socializing with neighbors, engaging in outdoor physical activity, and frequenting local businesses. On the flip side, when public safety is poor, residents are less likely to be outdoors in general or participate in other healthy activities. In addition, living in an unsafe neighborhood can contribute to the development of stress-related health conditions.

The total index crime rate for New London County in 2014 was 1,833.6 per 100,000 persons, slightly lower than the state rate overall. The leading crime reported, accounting for about 68% of all offenses, was larceny, or the theft of personal property. While the index crime rate has declined over the last 5 years in the county, the rate of larcenies has remained stable. Some in local law enforcement suggest that this could be related to the actions of residents struggling with addiction to heroin and other opiates who engage in theft, often from friends or family, in order to pay for drugs to feed their addictions.

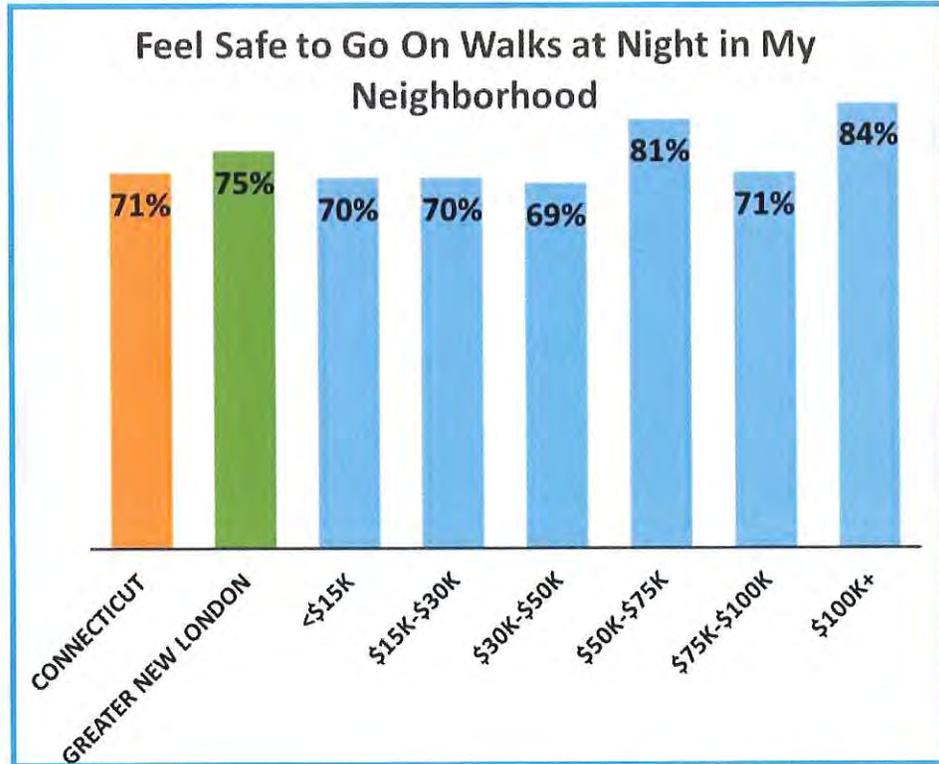

Public Safety

In general, people in the Greater New London area feel that the police are doing a good or excellent job keeping residents safe. However, that perception is less favorable among racial minorities and people with lower incomes.

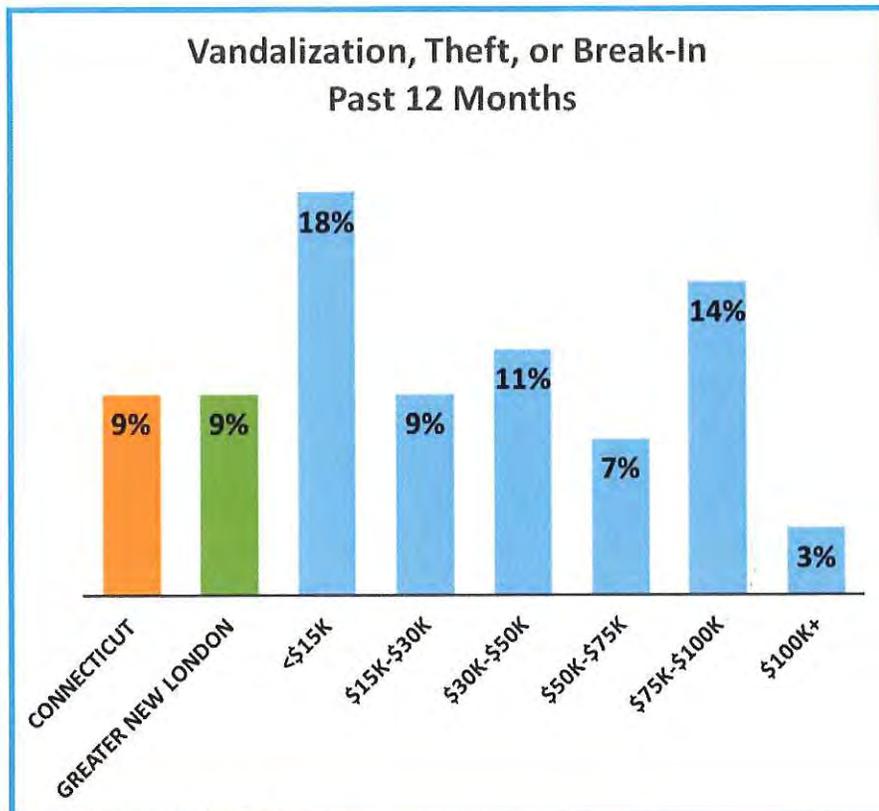

Source: 2015 Wellbeing Survey

75% of all residents in Greater New London reported feeling safe to go on walks in their neighborhood at night, slightly better than the state overall. Hispanics, however, were far less likely to report feeling safe. Disparities also exist between income groups.

Source: 2015 Wellbeing Survey

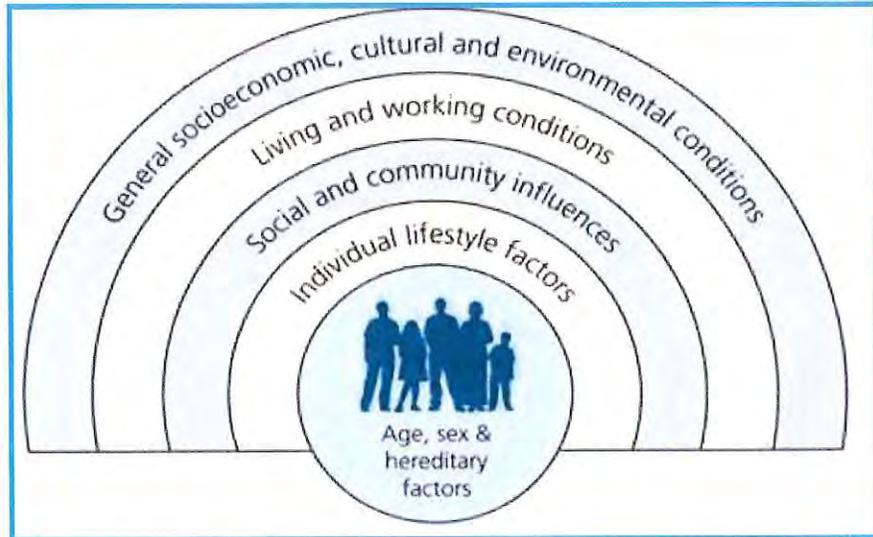

Public Safety

While the overall rate of experiencing vandalism, theft or break-in in the past 12 months for Greater New London is equal to the state, significant disparities exist between income groups.

Source: 2015 Wellbeing Survey

Having a strong social support system and feeling connected to a community can be a protective factor for both physical and mental health. Dahlgren and Whitehead's Social Model of Health and others hold social and community influences above individual lifestyle factors and genetics. Overall, most residents of Greater New London report they have friends or relatives they can count on for help, although the rates among Hispanics (89%) and those making less than \$15k per year (77%) were lower than among other groups.

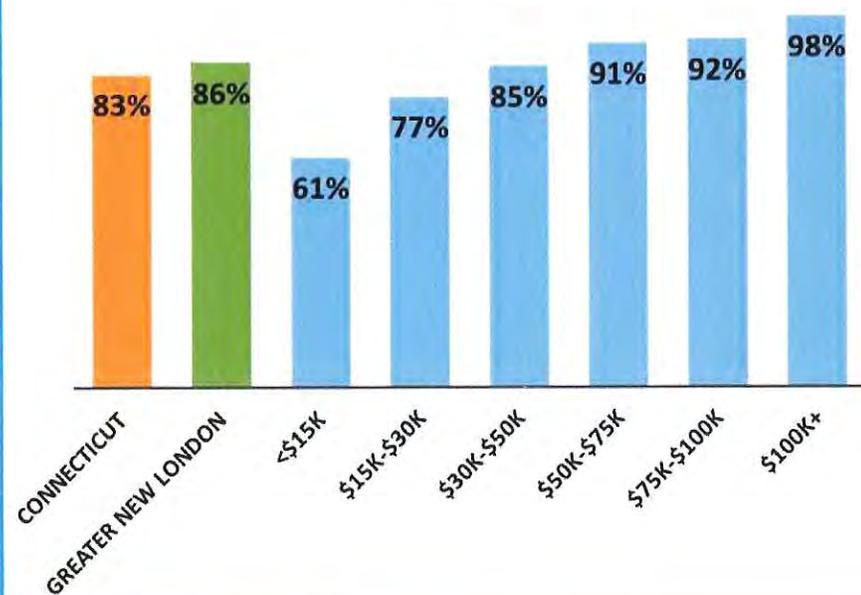

Source: Dahlgren G, Whitehead M. 1991. Institute for Futures Studies.

Among survey respondents, there was a direct relationship between income and identifying positive role models for children in town, with only 63% of those in the lowest income bracket responding that there are role models compared with 84% of those in the highest bracket. (Wellbeing Survey)

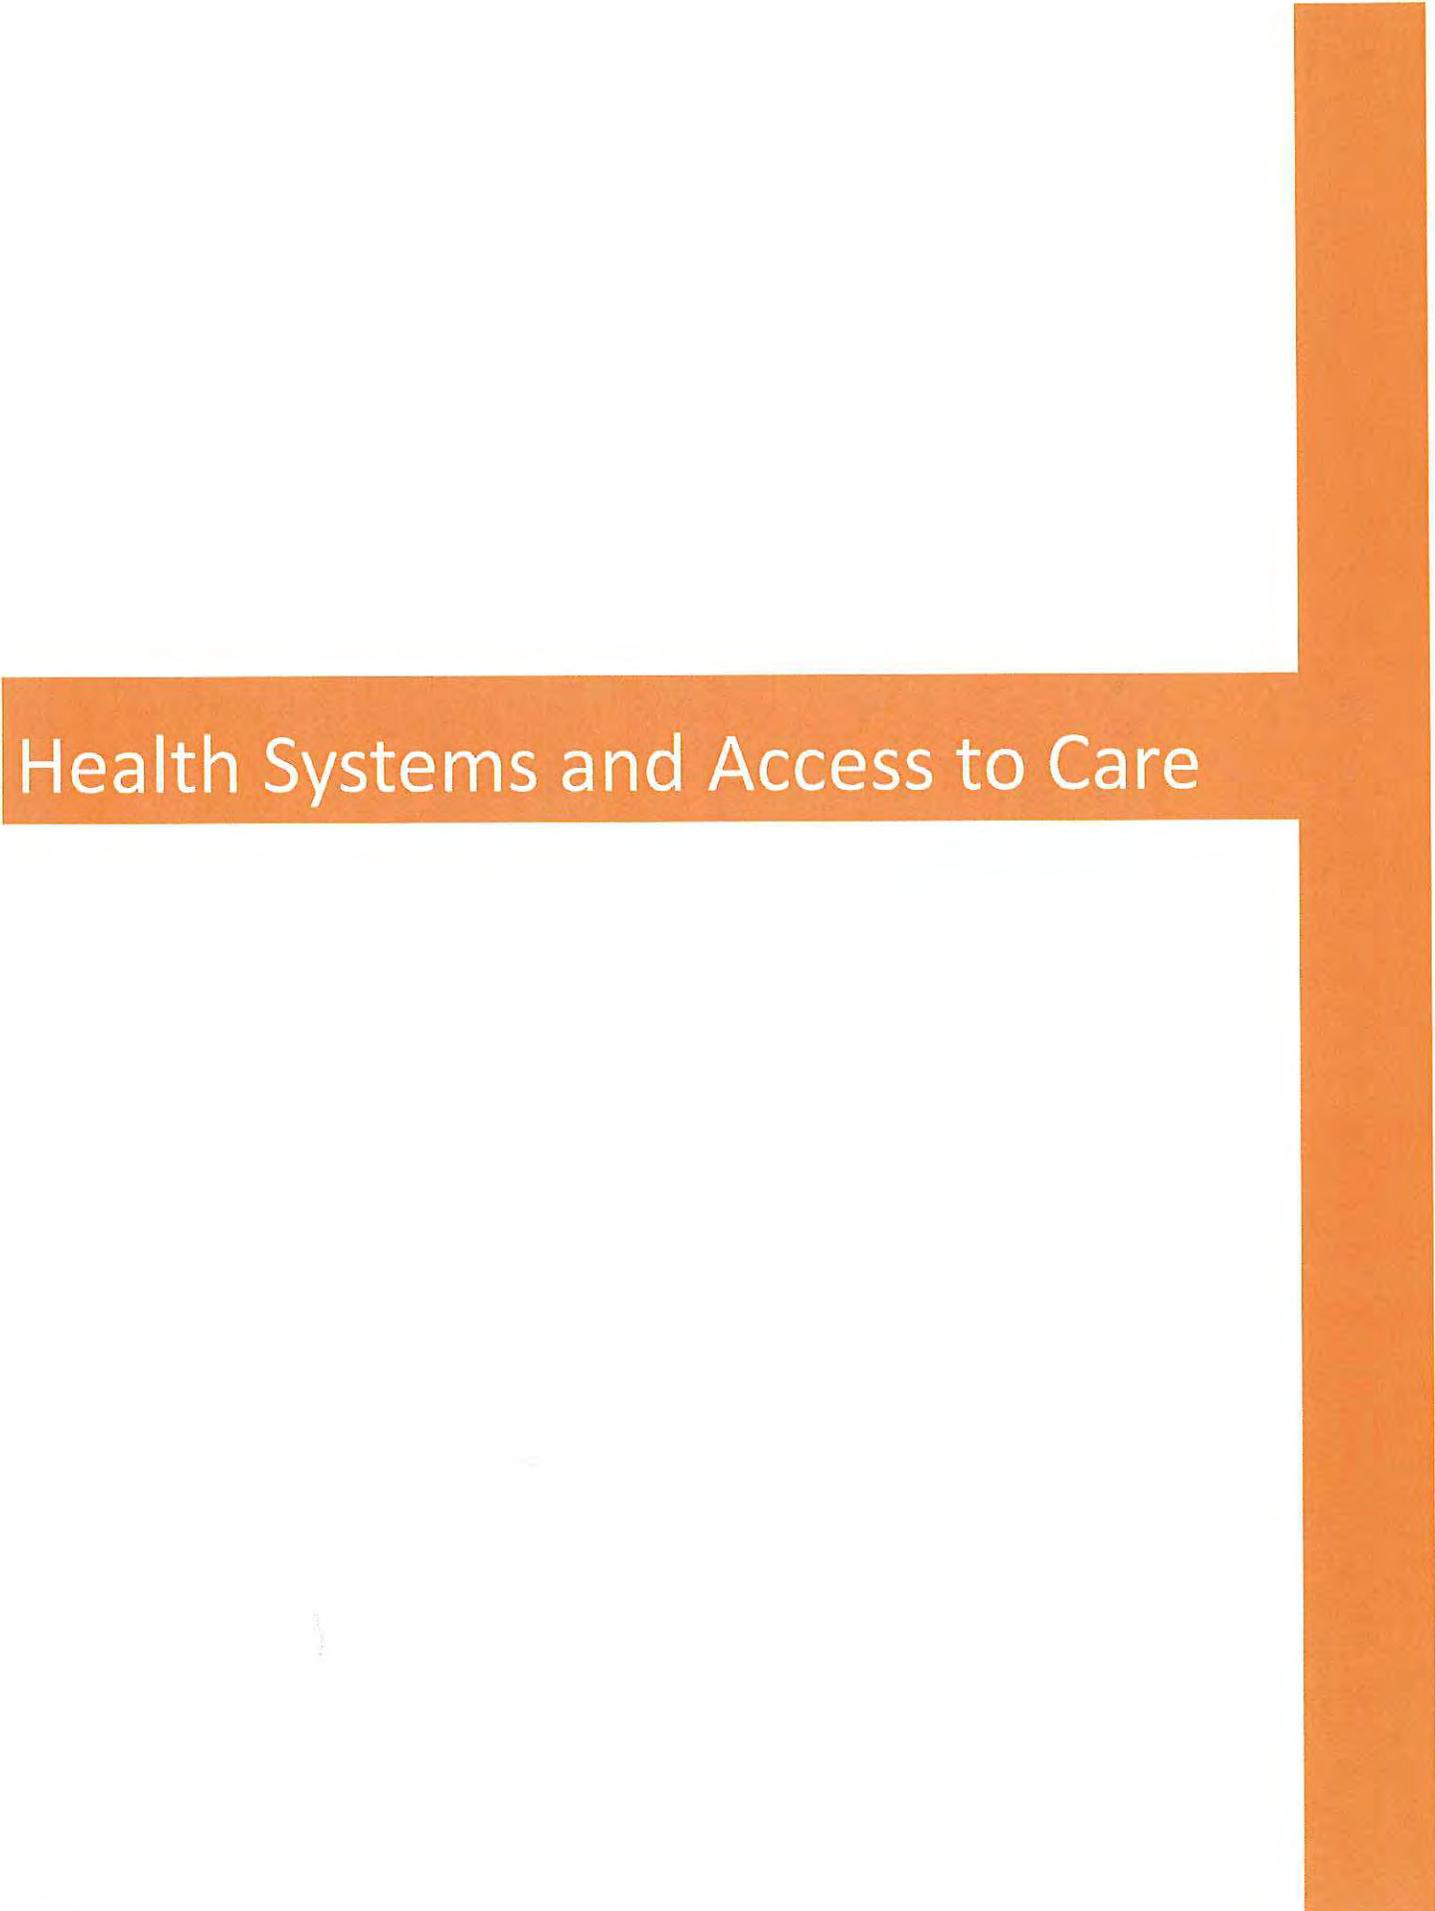

Social Cohesion

People in This Neighborhood Can Be Trusted

Substantially fewer people in the lowest income bracket reported that they trusted people in their neighborhood; this may be related to the higher rate of experiencing vandalism, theft or break-in in the past 12 months among this same group.

Source: 2015 Wellbeing Survey

Health Systems and Access to Care

In CT, local public health departments differ significantly in size and structure. LLHD is a health district as defined in Connecticut General Statutes; the organization has a full time Director of Health and serves as the health department for the Town of East Lyme, the Town and City of Groton, the Town of Ledyard, the City of New London and the Town of Waterford. LLHD’s counterpart to the north is Uncas Health District, which counts Montville—part of the L+M primary service area and thus this report, as one of its 9 member municipalities. The other towns included in this report—Lyme, North Stonington, Old Lyme, and Stonington, have what is referred to as “part time” health departments. These stand alone health departments are incorporated into the municipal structure and, while they may have one or more full-time employees, have a part time Director of Health. In addition, the Mashuntucket Pequot and Mohegan Tribal Nations, which border the towns in the L+M service area, have their own health departments.

L+M Hospital, founded in 1912, is a 280 bed not-for-profit community hospital located in the city of New London, CT. The hospital served a total of 464,834 people in fiscal year 2015. 66.4% had government-sponsored insurance such as Medicaid, Medicare or Tricare while another 5,578 of

Public Health and Healthcare Infrastructure

those patients treated reported to be

self-pay/uninsured. The hospital currently offers a wide range of inpatient, outpatient, and clinical services onsite, and gives back millions of dollars worth of community benefits services each year. In addition to providing outpatient and acute care services through L+M Hospital, the L+M Healthcare system includes primary and specialty care services delivered through the L+M Medical Group, the L+M Cancer Center, the Visiting Nurse Association of Southeastern Connecticut, and Westerly Hospital in southwestern Rhode Island.

A community’s public health infrastructure or system includes “all public, private, and voluntary entities that contribute to the delivery of essential public health services within a jurisdiction” (CDC). As the community hospital and one of the local health departments, L+M and LLHD constitute significant parts of the public health infrastructure in Greater New London, but the list of organizations and individuals who make up the whole is endless.

The area is served by three Federally Qualified Health Center locations—United Community and Family Services and the Groton and New London sites of Community Health Center, Inc. Both organizations provide primary and specialty care, including oral and mental health care, on a sliding fee scale to those without insurance. Together, they serve as the primary source of medical care for many of the area’s Medicaid beneficiaries.

Child and Family Agency of Southeastern Connecticut joins United Community and Family Services and Community Health Center, Inc. in providing both primary and mental healthcare to children at area schools through School Based Health Centers. These clinicians work hand in hand with school nurses and primary care providers to support the health and wellbeing of area school children.

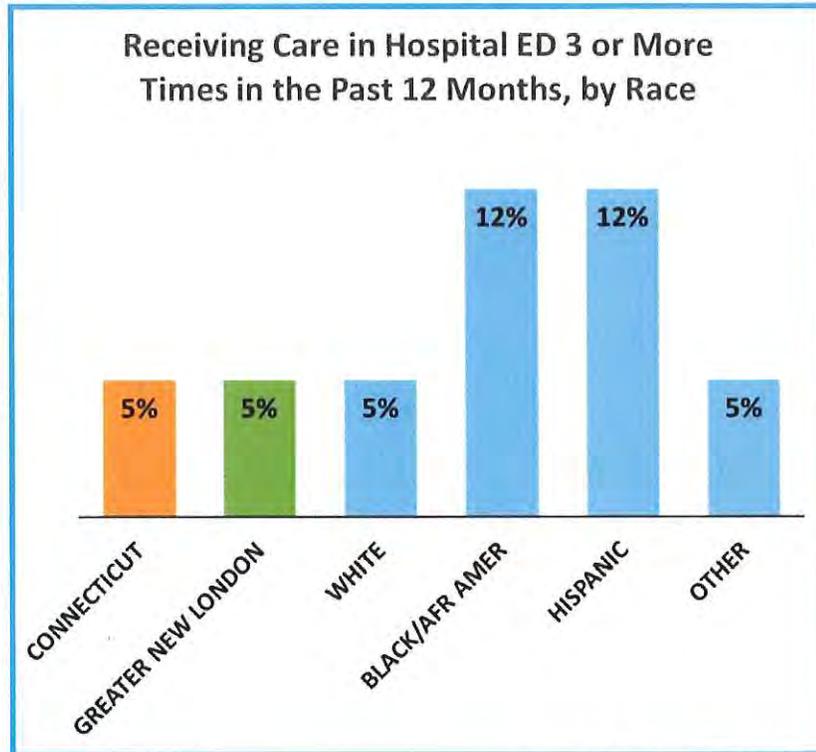

These public health and medical professionals are joined by countless social service agencies, schools, municipal departments, economic development organizations and advocacy and support groups who deliver services and support that impact health.

Public Health and Healthcare Infrastructure

Stakeholders in the Local Public Health and Healthcare Infrastructure

Emergency Department (ED) utilization has increased dramatically in the last decade, resulting in longer wait times and a higher cost of care. Frequently these visits are for routine healthcare that would be better addressed within a community, primary care setting. Insurance status is associated with patterns of ED use and the most often cited reason for the ED visit is seriousness of medical issue, according to the National Health Statistics Report (Feb 2016). National studies have demonstrated that people living

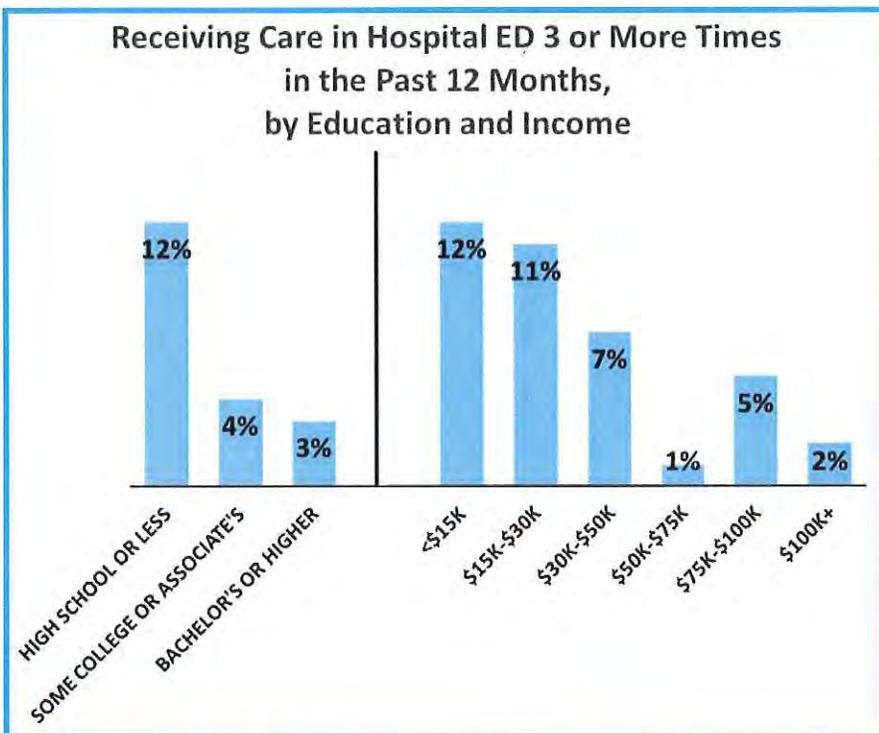

Source: 2015 Wellbeing Survey

in poverty and non-Hispanic Black and Hispanics are more likely to visit an ED more than once during a year. That disparity is evident locally, where Black and Hispanic

residents are more than twice as likely as Whites to have received care in the ED 3 or more times in the past 12 months.

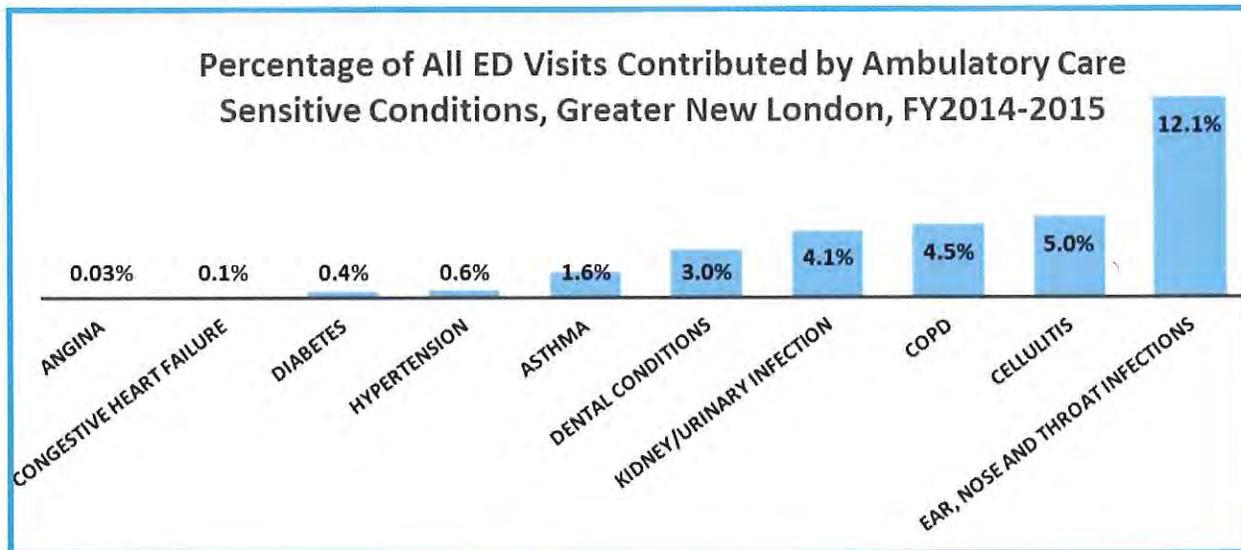

Emergency Department Use

ED utilization is also closely linked to insurance status with Medicaid beneficiaries the most likely to have multiple ED visits. In Greater New London, frequent use of the ED decreases as education and income increase.

Source: 2015 Wellbeing Survey

At times residents access care through the emergency department for conditions that would be better addressed in another setting. In 2015, 31.5% of all ED visits by residents of Greater New London were for ambulatory care sensitive conditions—health concerns that require care but are typically not emergency situations.

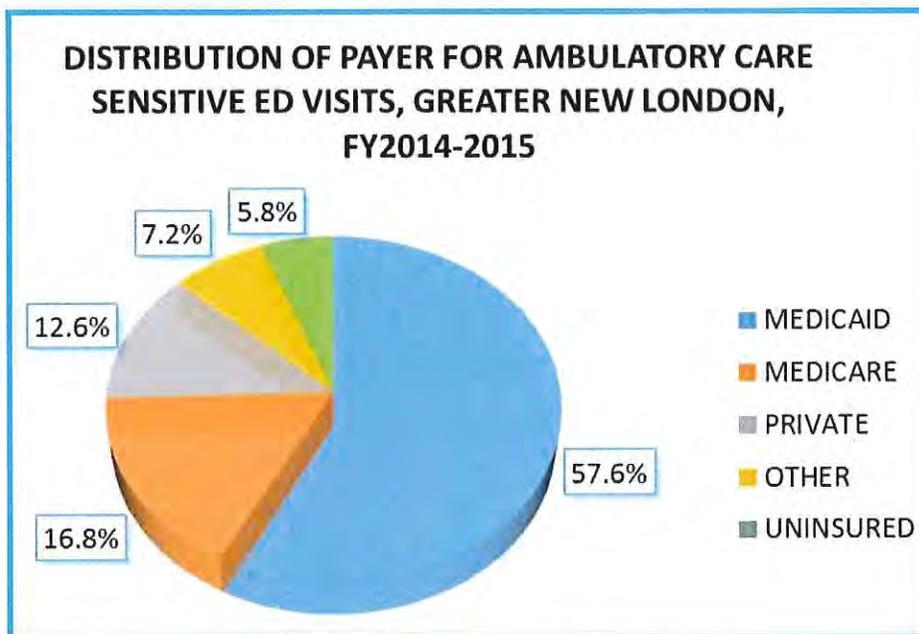

Source: Connecticut Hospital Association

Emergency Department Use

Ear, nose and throat infections ranked as the most frequent ambulatory care sensitive condition, followed by cellulitis, COPD and kidney/urinary infection.

While some of these visits occurred during the overnight and early morning hours, 55.7% of them were between 8am and 5pm, when care is typically available in a provider’s office. The association between

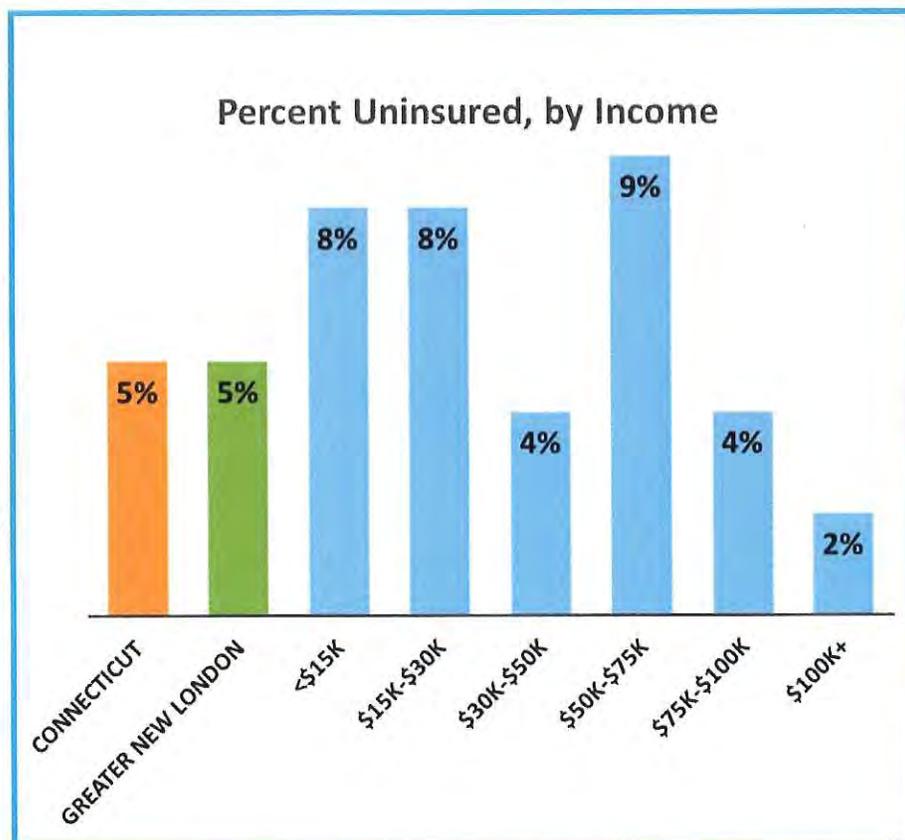

insurance status and ED use is evident in the data regarding ambulatory care sensitive conditions as well; 57.6% of these visits were among Medicaid beneficiaries. The fact that so many visits occur during daytime hours and are among this group could be indicative of local Medicaid beneficiaries having difficulties accessing primary care services.

Source: Connecticut Hospital Association

Having health insurance is one important part of accessing quality healthcare. In the fall of 2015, following the implementation of the Affordable Care Act but before the first tax penalties for lack of insurance were assessed, 5% of residents in Greater New London reported being uninsured.

That rate was higher among those making

Source: 2015 Wellbeing Survey

Health Insurance

under \$30,000 per year and among those making \$50,000-\$75,000. Residents in lower income brackets are less likely to have access to employer-sponsored plans but may make too much to qualify for Medicaid coverage.

In 2016, approximately 8,700 parents across the state will lose Medicaid eligibility; a University of Massachusetts study estimated that out-of-pocket costs for these residents, who make 138-155% of the federal poverty level, will increase by \$1,200 a year (Connecticut Health Foundation).

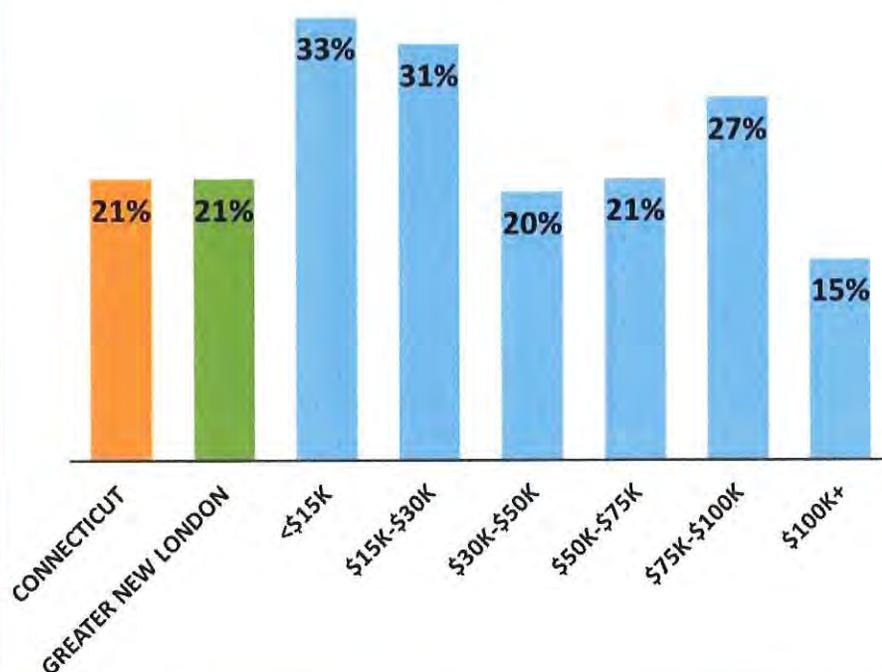

This disparity may, unfortunately, increase in coming years as recent changes to the income caps for Medicaid qualification in Connecticut are rolled out. In 2015, one group of parents lost Medicaid eligibility and in 2016, a second, larger group will lose Medicaid when their transitional benefits expire. The CT Department of Social

Services has reported that of those who did not continue to be eligible for Medicaid, only 27% enrolled in a qualified health plan through Access Health CT; 44% of those who did enroll experienced a gap in coverage (Connecticut Health Foundation).

Possessing health insurance does not guarantee access to healthcare. There remain numerous barriers to care which result in individuals not getting the healthcare that they need, postponing necessary care, or needing to sacrifice other basic needs in order to get care. Barriers to care are more pronounced among those in the lower income categories, are associated with insurance status, cost of care, and availability of care at convenient times, and can be insurmountable. Access to medical specialists (orthopedics, gastroenterology, dermatology and others) for lower income and publicly insured individuals is particularly limited locally. Medical provider cultural competence also impacts access to care for people for whom language, literacy, sexual orientation, gender identity, and/or personal history (past trauma, domestic violence, previous negative experiences with medical providers, etc.) are factors. Impaired access often results in delayed care leading to an exacerbation of chronic conditions, increased ED use and hospitalizations, and premature mortality.

Barriers to Care

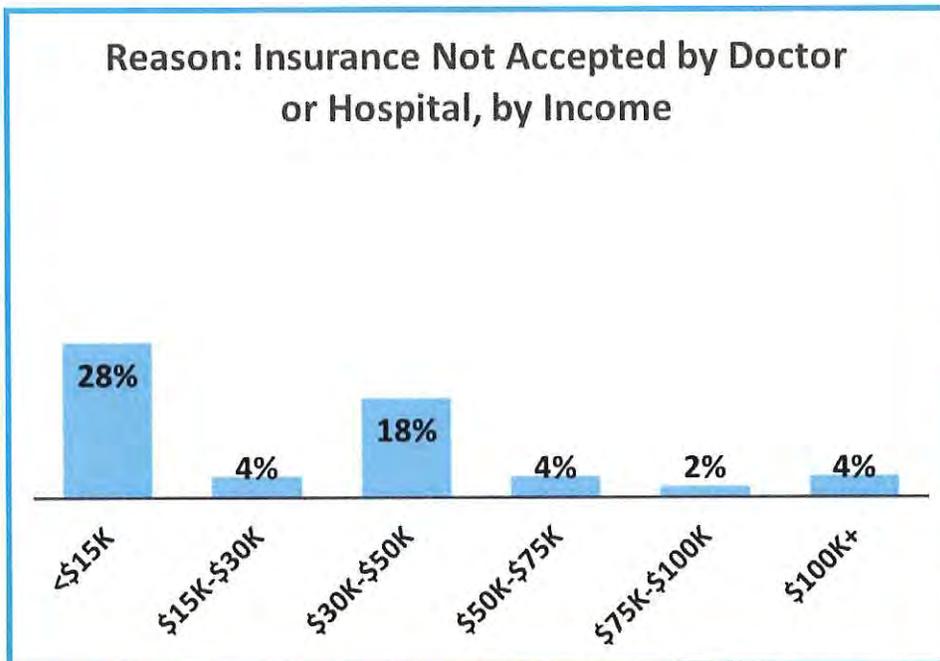

Percent Delaying Necessary Care, Past 12 Months, by Income

According to the 2015 Wellbeing Survey, one-third of respondents with incomes below \$15,000 indicated that in the last 12 months they delayed receiving necessary care.

Source: 2015 Wellbeing Survey

Respondents who indicated they delayed care where asked if they did so because their insurance was not accepted by a doctor or hospital. More than a quarter of the <\$15,000 income group responded that they had. Availability of medical providers, particularly

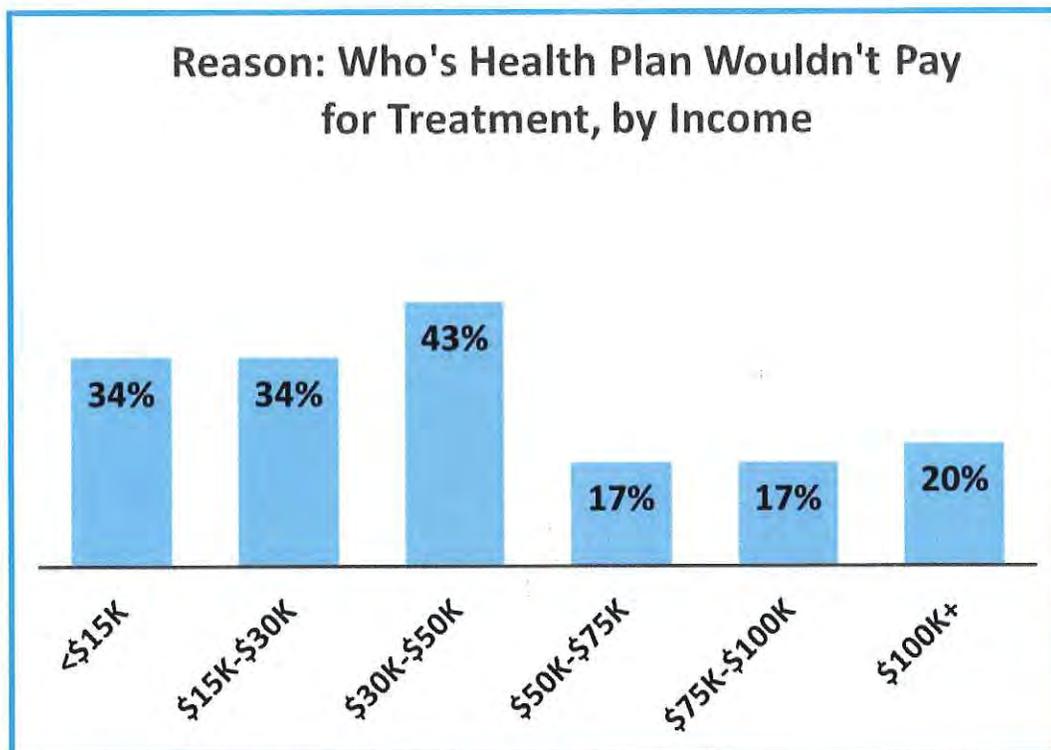

Source: 2015 Wellbeing Survey

providers of specialized care, that will accept uninsured or publicly insured patients is limited in the region. Individuals with public insurance report long wait times for appointments with the providers that do accept their coverage.

Barriers to Care

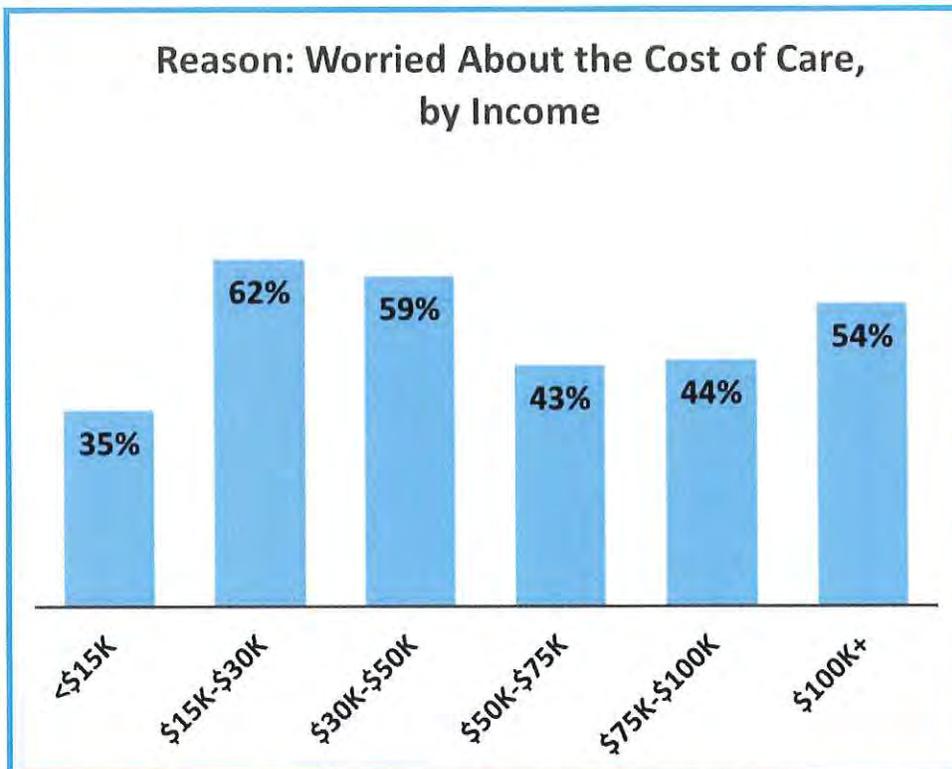

Yet another barrier to care has to do with insurance plan coverage, or lack thereof, of certain

Source: 2015 Wellbeing Survey

treatments. More than 1 in 3 residents in the lowest income groups reported that they did not receive treatment because their insurance would not cover it.

Among those who said they delayed necessary care, concern about cost of care was a evident among all income categories with a slightly higher percentage among the \$15,000 to \$50,000 income categories and slightly lower concern cited in the lowest income category. This may be associated with people transitioning

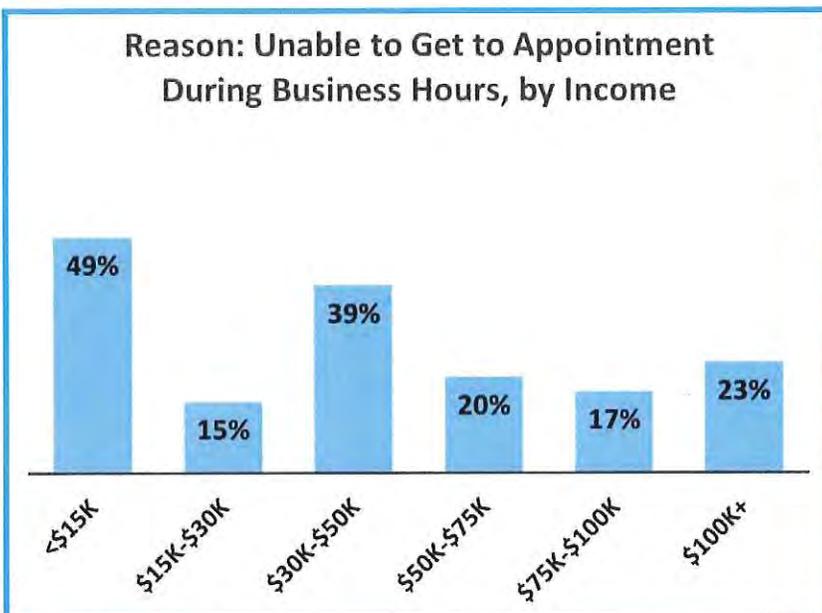

Source: 2015 Wellbeing Survey

Barriers to Care

from Medicaid to high-deductible health insurance plans (and related increases in out-of-pocket costs) as their income increases above the Medicaid eligibility cap.

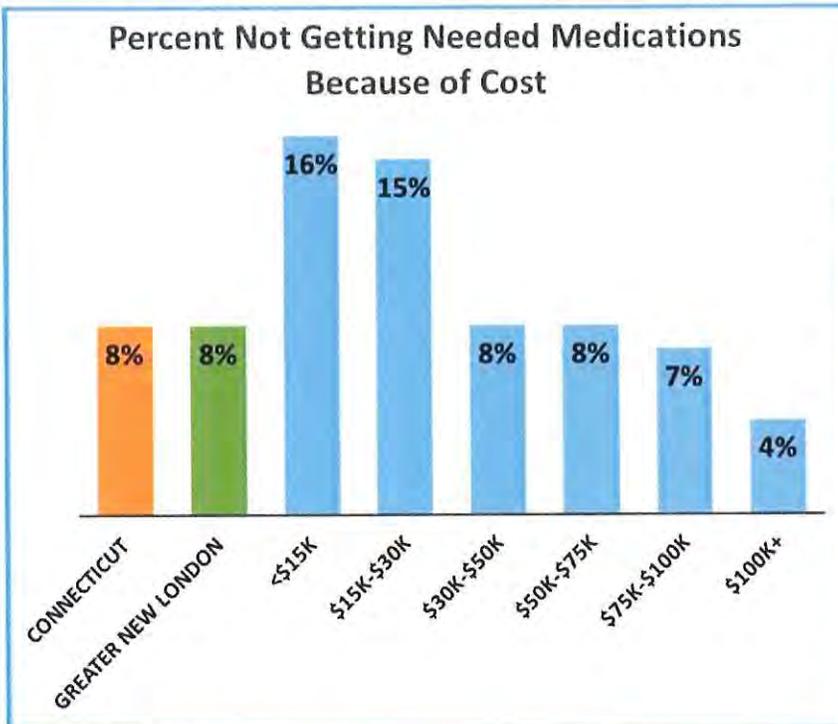

Modern economic realities require many to work multiple jobs in order to provide for their families. In addition, lower wage workers typically have jobs that allow less flexibility in schedules and don't provide paid time off for medical appointments. Both of these factors make scheduling

healthcare appointments challenging even as providers have begun to make evening and weekend appointment times available.

Source: 2015 Wellbeing Survey

Half of Wellbeing Survey respondents in the <\$15,000 income group who said they delayed necessary care indicated that they did so due to an inability to attend an appointment during business hours.

Even those who don't delay care may face barriers to complying with medical directives. The cost of prescriptions was cited by 1 in 6 respondents to the Wellbeing Survey in the <\$15,000 and \$15-\$30k income categories as a reason for not getting necessary medications. Deductibles, co-payments, and limited health insurance formularies often dictate whether individuals can or will obtain prescribed medications. These can pose

Source: 2015 Wellbeing Survey

Barriers to Care

considerable economic strain and, as cited in focus groups, result in people making choices between other basic needs such as food, rent, electricity and their medications.

Patient nonadherence to a medical provider's care plan can have a significant impact on the individual's health as well as ultimately resulting in higher costs of care. It is important for healthcare systems and providers to understand the many intersecting barriers their patients experience in order to appreciate reasons for missed appointments and inconsistent adherence to care plans. Contributing factors include misunderstanding instructions, forgetting, or ignoring healthcare advice in addition to costs, beliefs, attitudes, subjective norms, cultural context, social supports, and emotional health challenges.

Patients must be given the opportunity to tell the story of their unique illness experiences and their financial, housing, transportation and social support situations. Knowing the patient as a person allows the health professional to understand elements that are crucial to the patient's adherence. Provider-patient partnerships are essential in designing care plans; mutual collaboration fosters greater patient satisfaction, reduces the risks of nonadherence, and improves patients' healthcare outcomes.

With a significant coastline and several potential targets for terrorism, southeastern Connecticut faces both manmade and naturally occurring public health threats. An emergency or act of terrorism at one of the local military installations, the Millstone Nuclear Power Plant in Waterford or one of the local Casinos could mean the emergency treatment and/or sheltering of thousands. The potential for significant destruction and widespread evacuation caused by a hurricane or other storm increases with each year as climate change results in shifting weather patterns and rising sea levels.

L+M Hospital, LLHD and Uncas Health District have deep staff capacity in emergency preparedness and regularly participate in regional planning meetings and drills with other partners. LLHD and Uncas Health District each have a Medical Reserve Corps (MRC) - a group of volunteers, some of whom are medical professionals, who train and prepare to respond to public health emergencies.

In 2015, the LLHD MRC organized an Epi-Strike Team, which went door-to-door in select

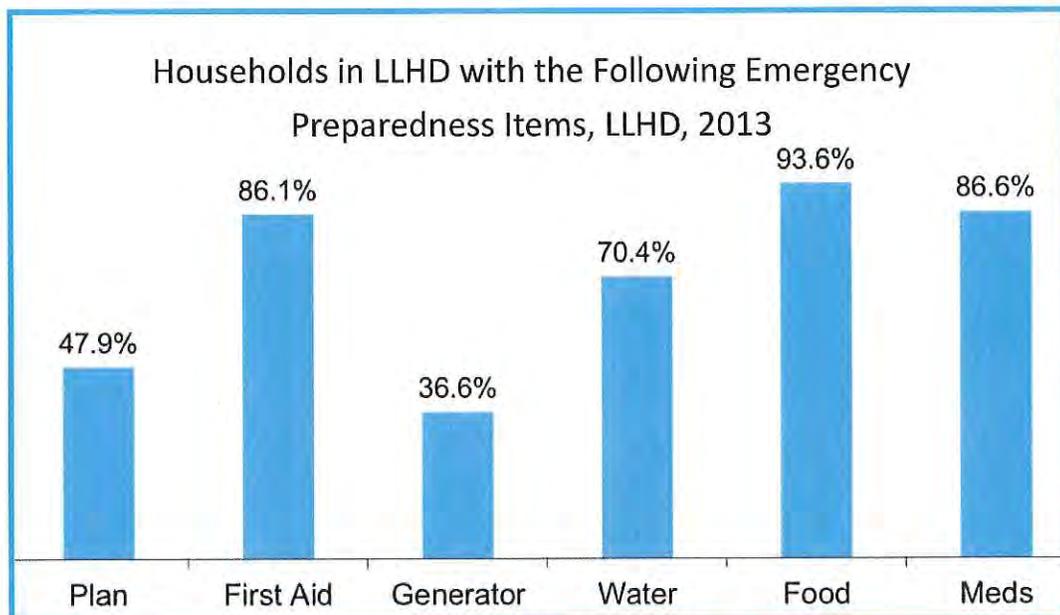

neighborhoods in the region surveying residents about their households' level of preparedness.

Emergency Preparedness

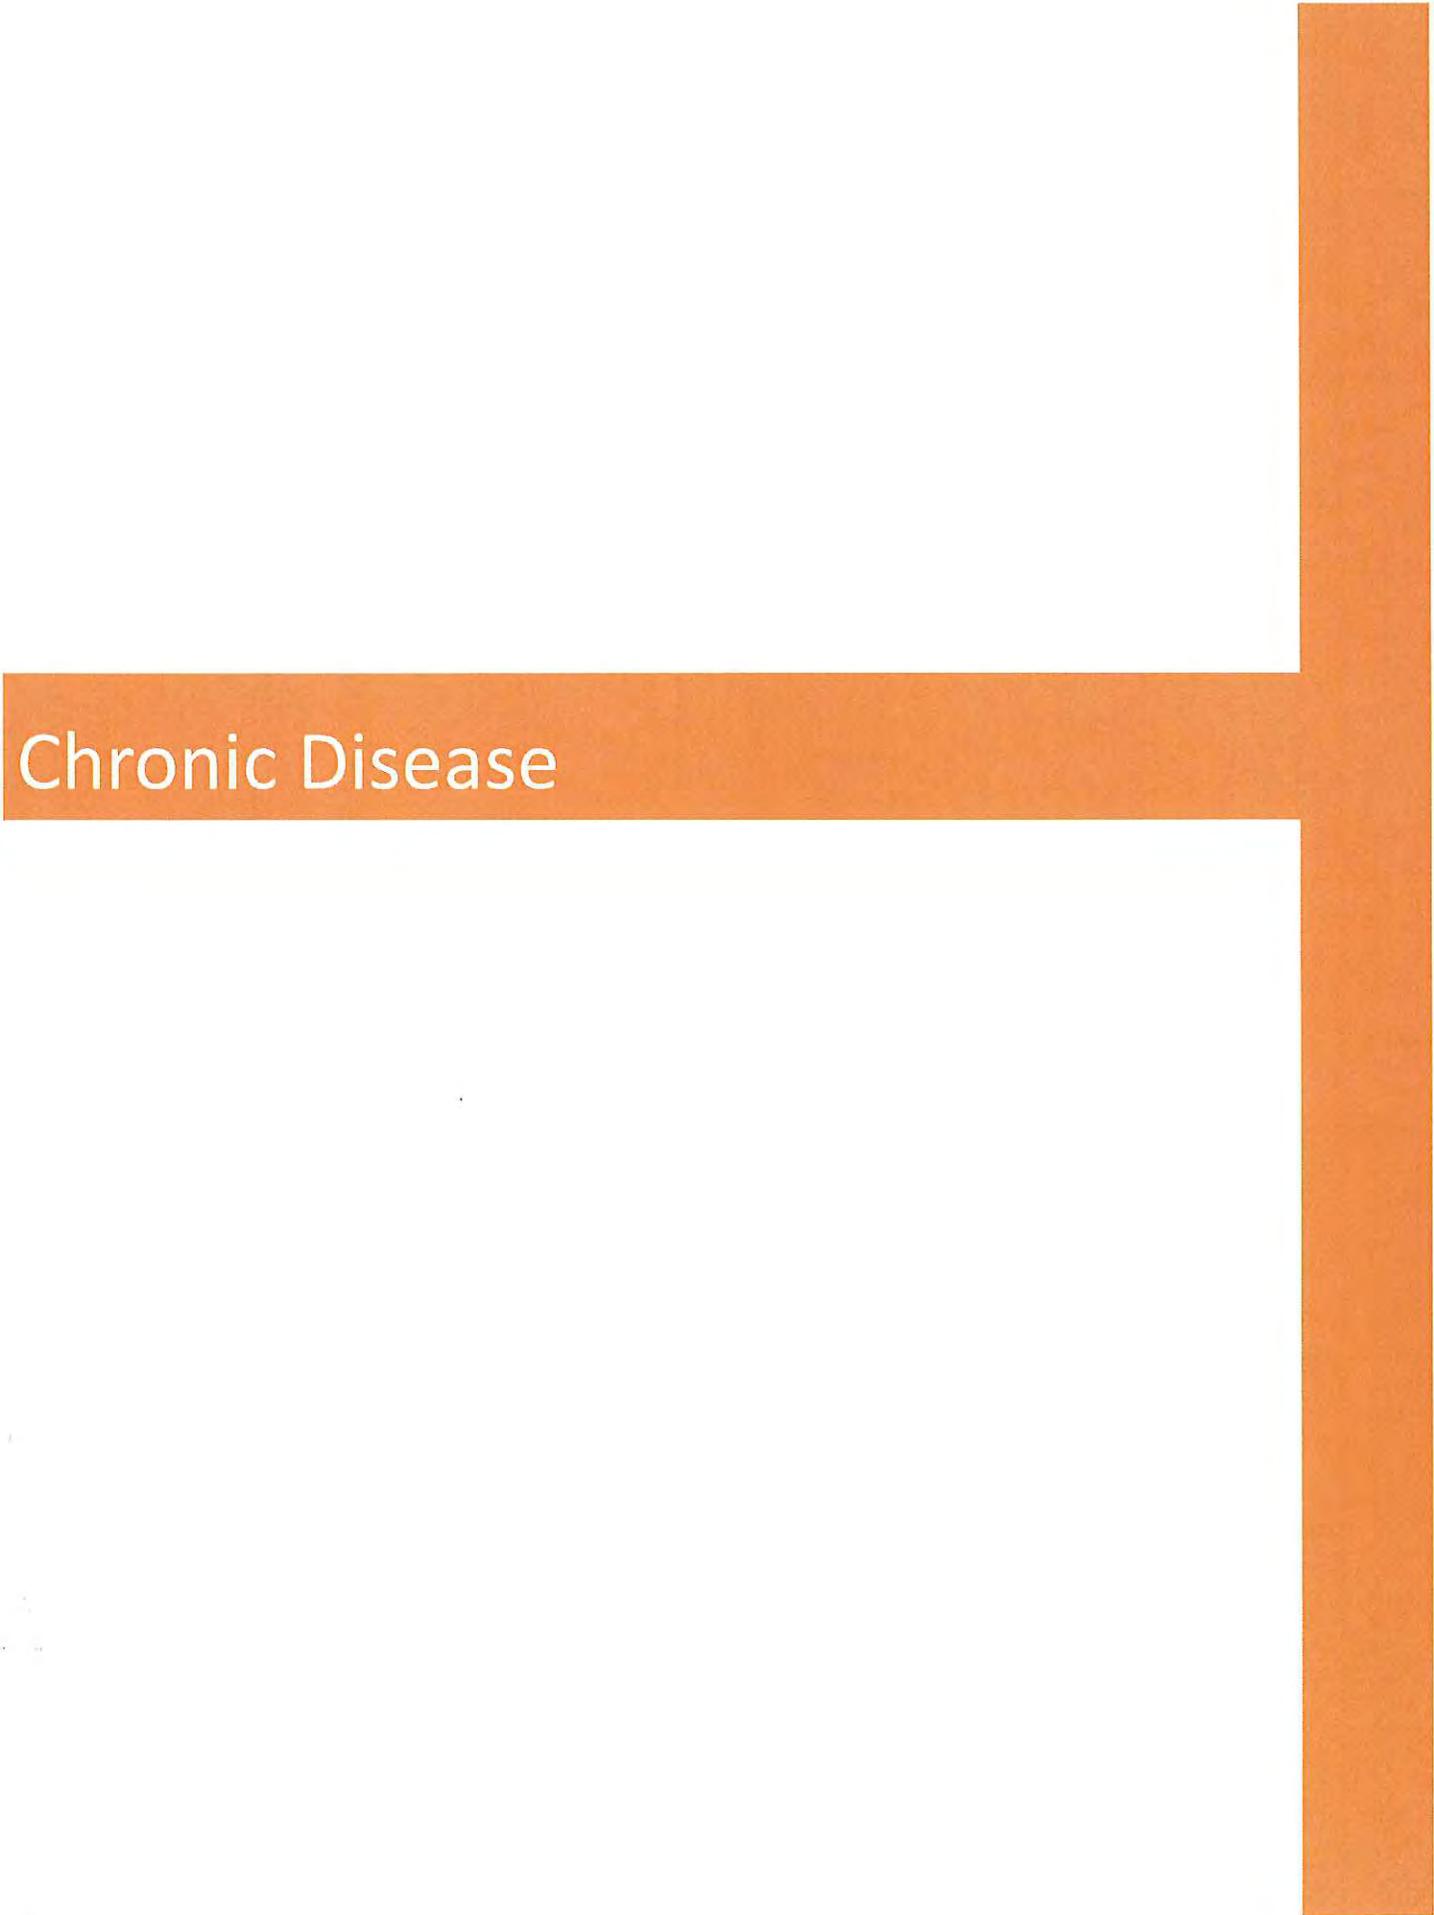

The neighborhoods were selected to provide a statistical representation of the region using the CASPER Model from CDC.

85.7% of households in LLHD consider themselves "somewhat" or "well prepared" for an emergency. Only 47.9% report having an emergency plan and only 70% report having water for

everyone in the household for 3 days.

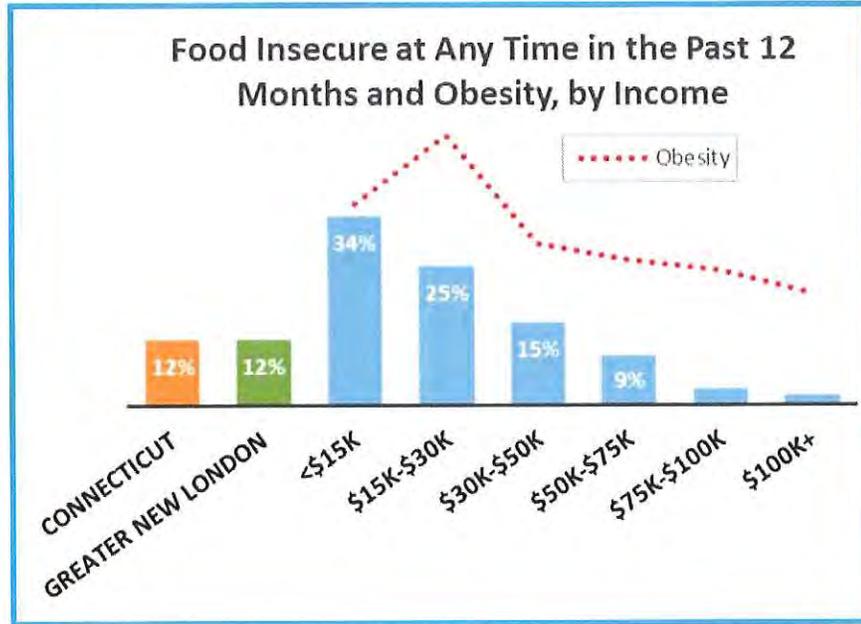

Source: 2015 Wellbeing Survey

Chronic Disease

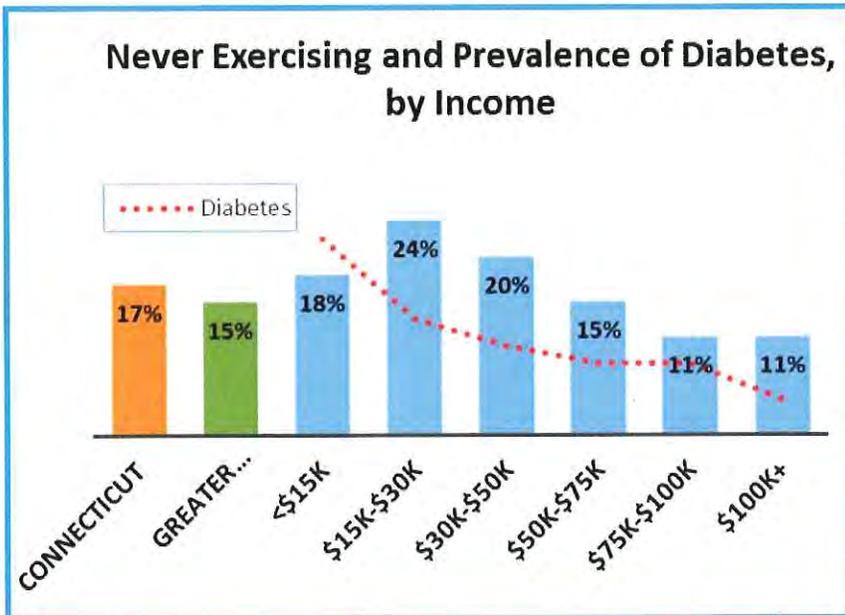

Having inadequate food resources is a risk factor for obesity that disproportionately affects low income residents. The apparent correlation between food insecurity and obesity as seen in Greater New London does not imply causality; they may be instead independent consequences of low income and the resulting lack of access to enough affordable nutritious food or stresses of poverty.

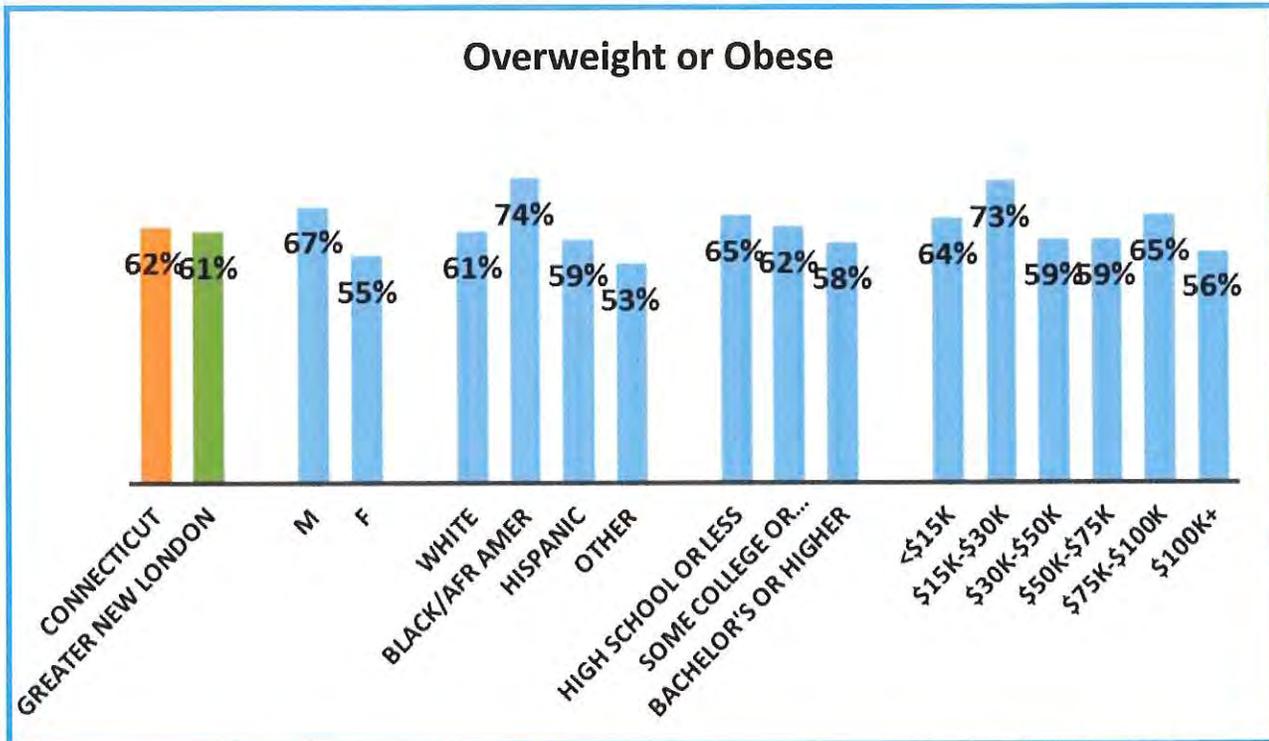

Source: 2015 Wellbeing Survey

Risk Factors: Sedentary Lifestyle, Nutrition and Obesity

According to the Harvard School of Public Health, about 90% of type 2 diabetes diagnoses could be prevented if just a few risk factors were eliminated. These risk factors include being overweight, poor diet, smoking, and not exercising. In Greater New London, there is an apparent correlation between never exercising and the prevalence of diabetes. Again, this correlation does not imply causality—they may also be independent consequences of low income and the resulting lack of access to enough nutritious food, safe recreational opportunities, or stresses of poverty.

Source: 2015 Wellbeing Survey

Source: 2015 Wellbeing Survey

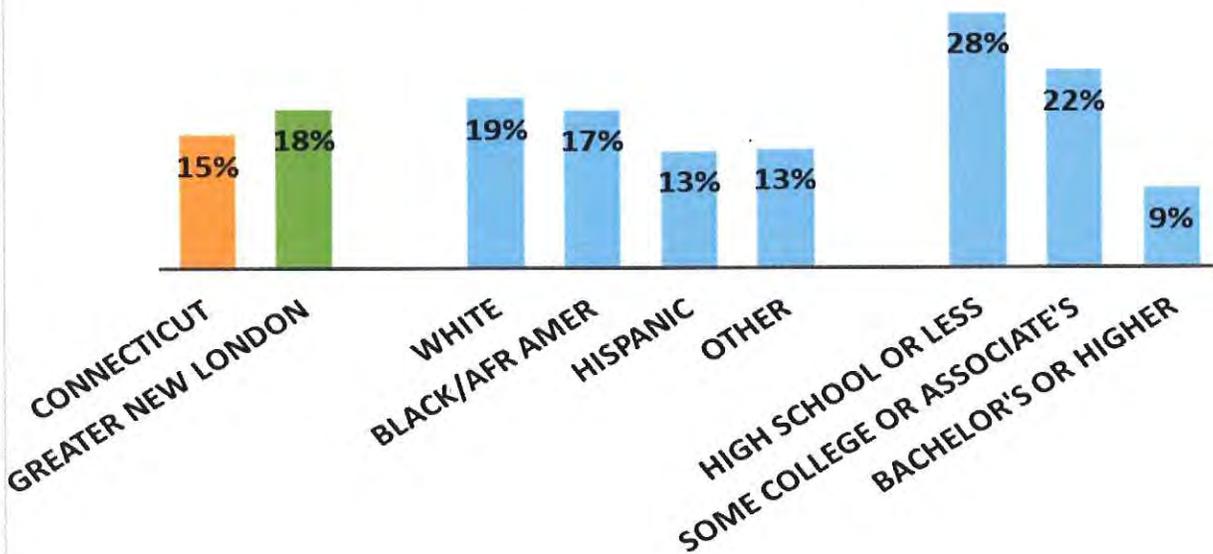

Risk Factors: Sedentary Lifestyle, Nutrition and Obesity

CDC states that “people who are obese, compared to those with a normal or healthy weight, are at increased risk for many serious diseases and health conditions, including...all causes of death”. Obesity impacts health outcomes from cardiovascular disease

and diabetes to mental health. It carries a heavy economic strain through direct costs related to increased use of the healthcare system to indirect costs like lower productivity in the workplace. Obesity has even been cited as a potential national security issue, with increasing numbers of potential military recruits failing to meet the military’s standards for weight and body fat. In the 2013 Youth Risk Behavior Survey, 13.9% of respondents in CT were overweight and 12.5% obese. There may be several intersecting factors contributing to obesity in the community—including individual genetics and behavior but also inequitable access to affordable healthy food and safe opportunities for physical activity.

In Greater New London, reported obesity is on par with the state with certain sub-populations experiencing higher percentages. Well over half of the population is overweight or obese; higher obesity among the lower income categories may be correlated with limited access to affordable healthy foods. (Wellbeing Survey)

Smoking Prevalence by Race and Education

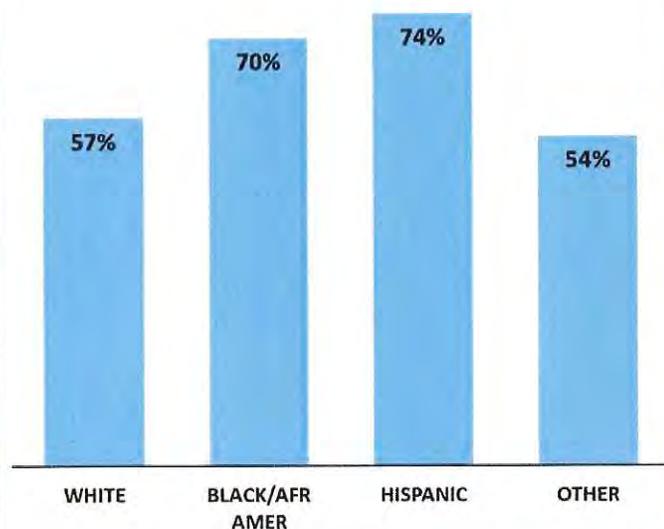

Source: 2015 Wellbeing Survey

Risk Factor: Tobacco Use

According to CDC, tobacco use remains the single largest preventable cause of death and disease in the United States. Cigarette smoking kills more than 480,000 Americans each year, with more than 41,000 of these deaths occurring from

The smoking rate in Greater New London is higher than in the state overall. There are disparities related to race, education and income. (Wellbeing Survey)

Quit Attempts by Race

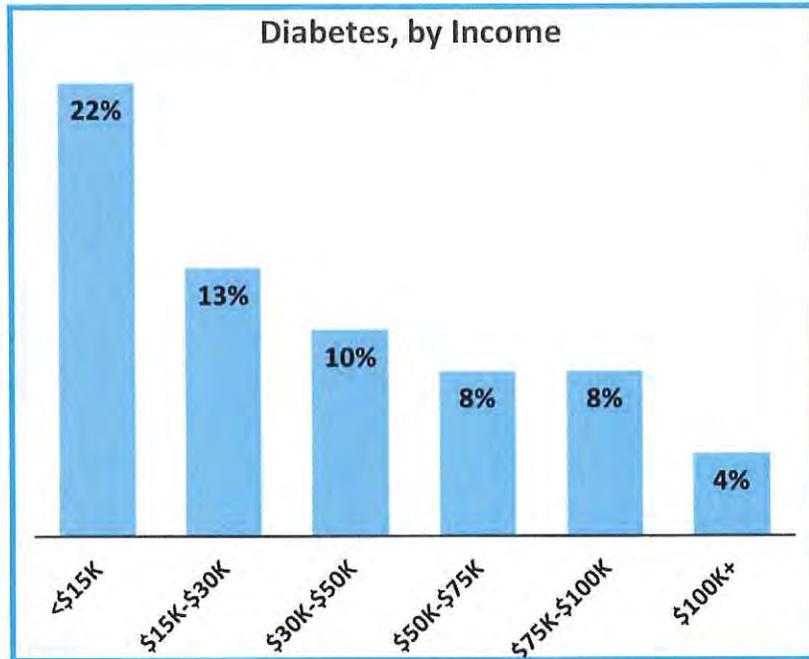

Source: 2015 Wellbeing Survey

exposure to secondhand smoke. In CT, tobacco use is the top cause of heart disease.

Quitting tobacco use has benefits at any age but more if tobacco use is stopped before age 35. On average, smokers make 8-11 quit attempts before success. In Greater New London, there is an apparent association between quit attempts and smoking prevalence with disparities between racial groups; Hispanics have the highest rate of quit attempts and the lowest rate of smoking.

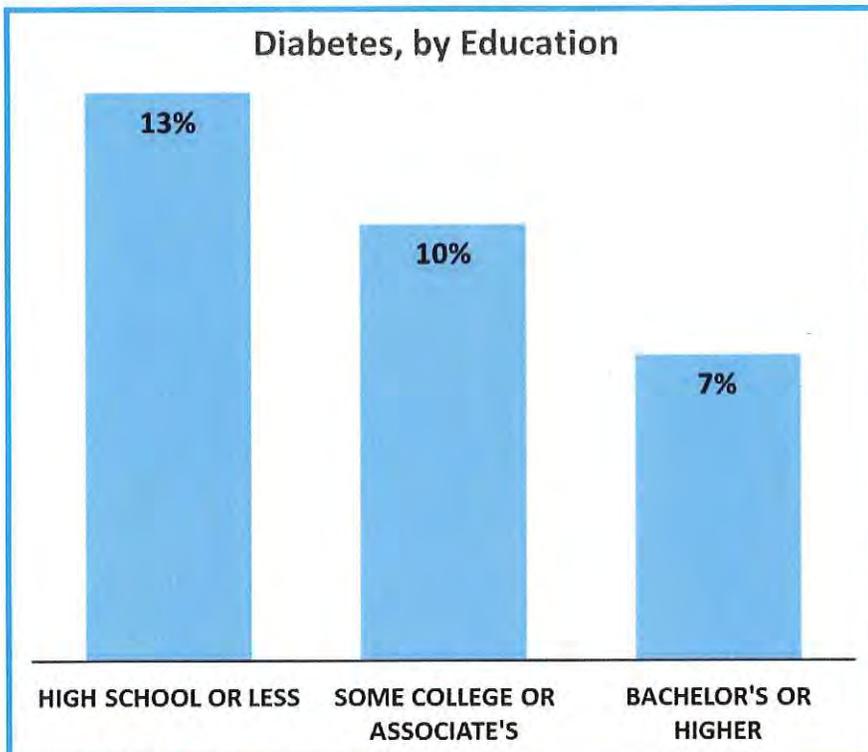

Diabetes affects an estimated 23.6 million people in the United States and is the seventh leading cause of death (CDC). Diabetes can be preventable. Often type 2 diabetes is preceded by pre-diabetes, a condition in which blood glucose is elevated but not yet to the level of diabetes. Regular exercise and modest (5-7% of total body weight) weight loss can dramatically reduce the risk of pre-diabetes progressing to diabetes.

Source: 2015 Wellbeing Survey

Diabetes

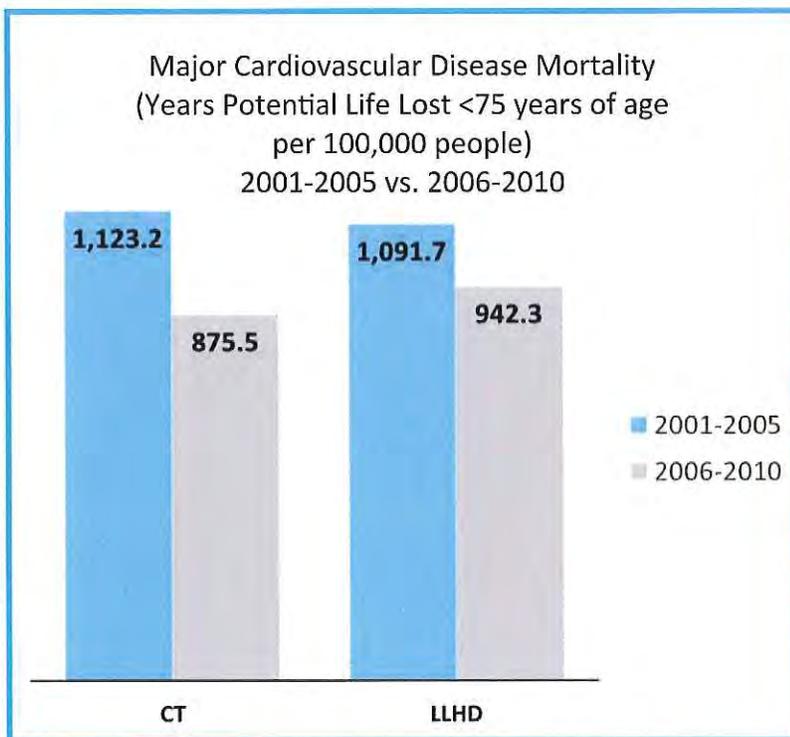

Overall, diabetes prevalence in Greater New London is on par with the state's. However, significant disparities exist by income, race and education. Those in the lowest income

Source: 2015 Wellbeing Survey

categories have experienced the greatest increase in diabetes incidence as well as the most significant impact of the disease. With higher rates of risk factors such as sedentary lifestyle and limited access to healthy foods for lower income individuals, the Wellbeing Survey results are not surprising. National studies have documented correlations with the risk factors to diabetes among those with less formal education.

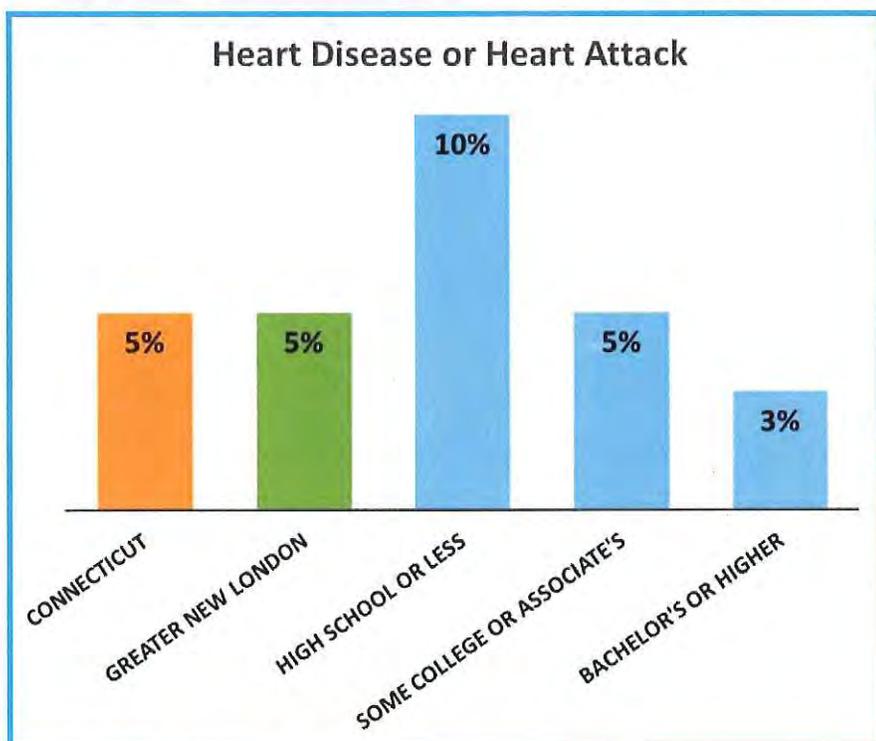

Cardiovascular disease is the leading cause of death for both women and men in the United States. Cardiovascular disease includes several conditions that affect the heart and blood vessels including heart failure, stroke, coronary artery disease, heart attack, and other conditions. Having high blood pressure, high cholesterol, diabetes, or obesity presents high risk for cardiovascular disease. Most cardiovascular

Source: CT DPH

Cardiovascular Disease

diseases can be prevented by addressing behavioral risk factors such as lack of exercise, poor diet including high consumption of salt, smoking, and excessive alcohol consumption. In the last five years death from major cardiovascular disease decreased in CT; LLHD towns have not kept pace and now rates locally exceed those in CT.

In Greater New London, residents with a high school education or less have experienced heart attack or heart disease at double the rate of the general population. (Wellbeing Survey)

Source: 2015 Wellbeing Survey

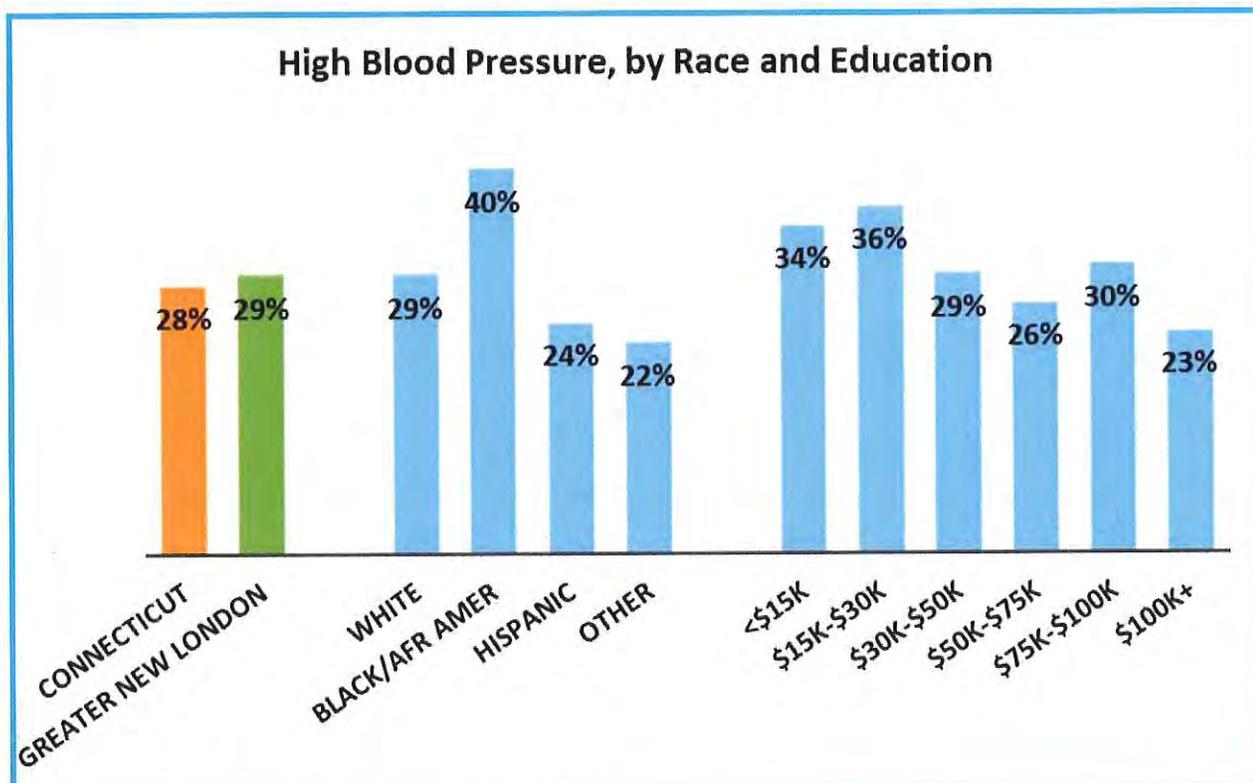

Hypertension, or high blood pressure, is a leading cause of cardiovascular disease and affects nearly one third of U.S. adults. Causes of high blood pressure include behavioral factors as well as environmental and social determinants.

According to CDC, 1 out of every 3 adults in the U.S. have high blood pressure and only about half have their condition under control. Another 1 in 3 American adults have pre-hypertension, defined as blood pressure that is elevated above normal but not yet in the high blood pressure range.

Racial and ethnic disparities exist in blood pressure, awareness, treatment, and control. Locally, disparities are evident by age and income as well.

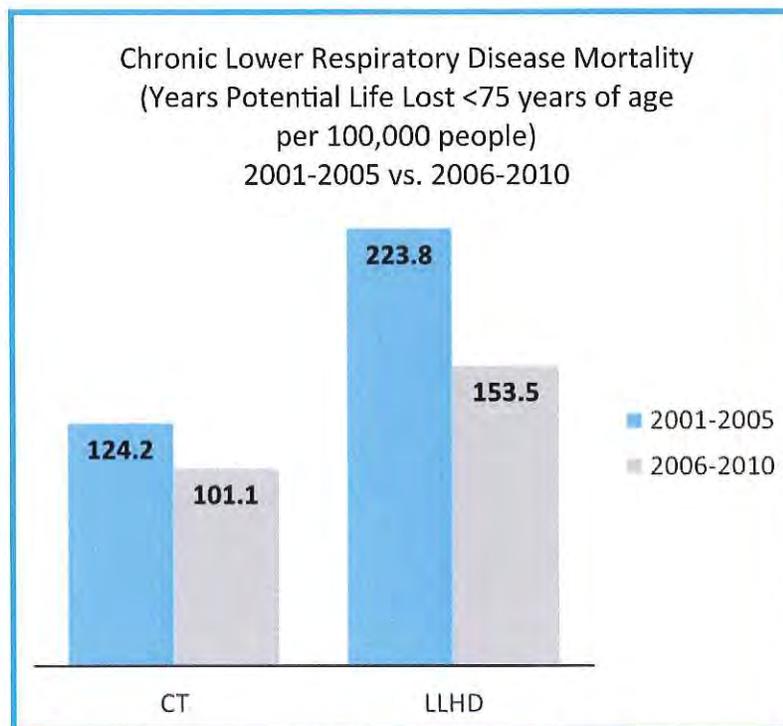

In Greater New London, 40% of Black respondents to the Wellbeing Survey report having been told by a doctor that they have high blood pressure.

Cardiovascular Disease

Source: 2015 Wellbeing Survey

Chronic Lower Respiratory Disease (CLRD) includes three diseases: chronic bronchitis, emphysema and asthma, all of which cause airflow blockage and breathing problems. According to CDC, CLPD is the third leading cause of death in the U.S. In LLHD, from 2001-2010, CLRD mortality rates were 1.5 times the state rate.

Source: 2015 Wellbeing Survey

Chronic Lower Respiratory Disease

Chronic Obstructive Pulmonary Disease (COPD) is used to refer to a subset of the diseases encompassed in the CLPD grouping—chronic bronchitis and emphysema. These disease are often co-occurring. The primary cause of COPD is cigarette smoking however air pollution, chemical fumes, dust, and genetic factors may also contribute. According to the CT Behavioral Risk Factor Surveillance Survey, the risk of COPD is significantly greater for adults over 55 years old, adults in low-income households earning less than \$35,000 annually, adults with disabilities, and adults with no more than a high school education.

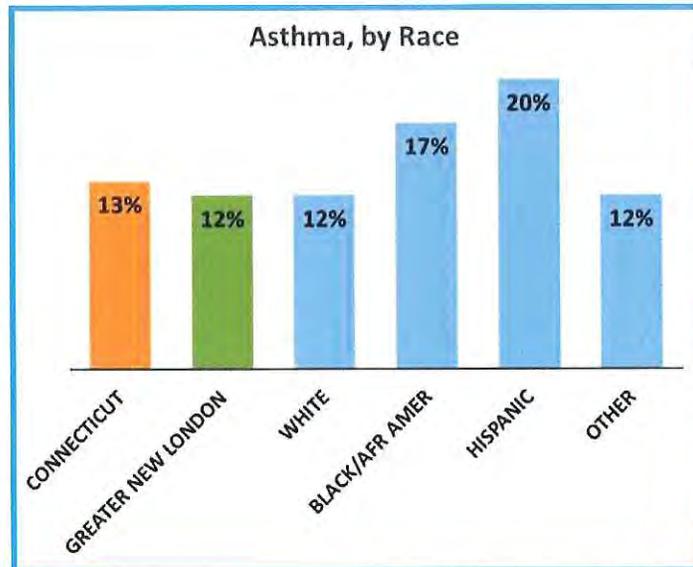

Calendar Year	Total Cases	Total Deaths	Mortality Observed
2012	521	9	1.73%
2013	526	13	2.48%
2014	588	14	2.40%
2015	643	16	2.50%

L+M Hospital
Inpatients with a Discharge Diagnosis of COPD

Both the total number of cases and the mortality rate from COPD among patients at L+M Hospital have been increasing in recent years.

Source: L+M Hospital

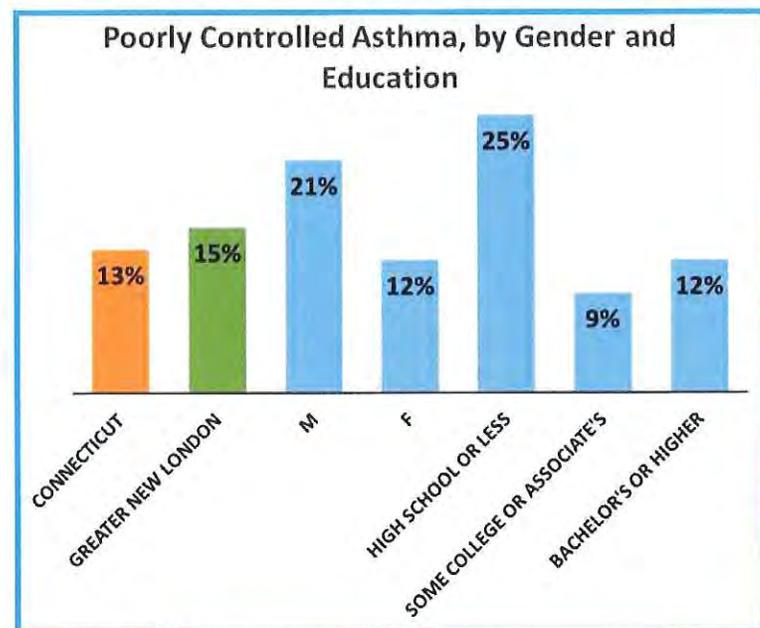

The third disease included in the CLPD grouping is asthma. Far too many area children and adults have poorly managed asthma resulting in missed days of school and work, high use of acute healthcare services for treatment, and a generally degraded quality of life. Both pediatric and adult asthmatics and their caregivers possess gaps in knowledge and comprehension around recognizing environmental triggers, asthma signs and symptoms, and medication and inhaler/spacer use. A persistent health concern, rates in Greater New London and across the nation are significantly higher among Blacks and Hispanics. Socioeconomic status is a critical

Source: 2015 Wellbeing Survey

Asthma determinant of differences in asthma prevalence and severity and race and ethnicity are strongly correlated with socioeconomic status.

Males were more likely to report poorly controlled asthma in Greater New London than females. There is not

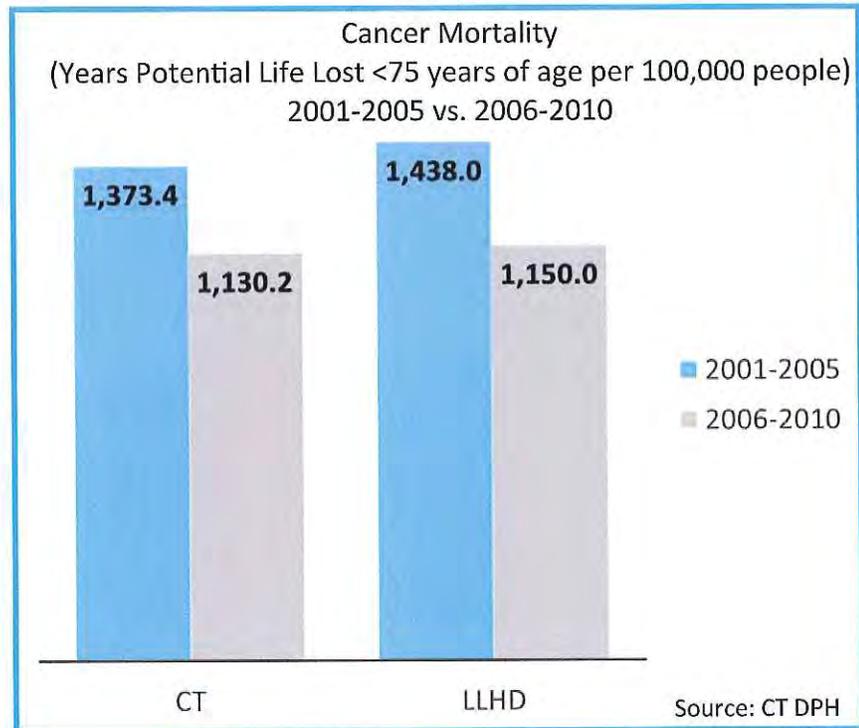

Source: 2015 Wellbeing Survey

Asthma is a particular concern in area schools, where children with uncontrolled asthma miss classroom and recreational time. In the New London School District, 21% of enrolled students have a diagnosis of asthma. Asthma Management Plans, important asthma control tools, are dramatically under-utilized; only 1% of students in New London School District have one on file. (CT DPH)

conclusive evidence to support a connection between gender and asthma control but there is for education, as a social determinant, and as correlated with risk factors such as smoking and poor quality housing . 25% of residents with less education report poorly controlled asthma.

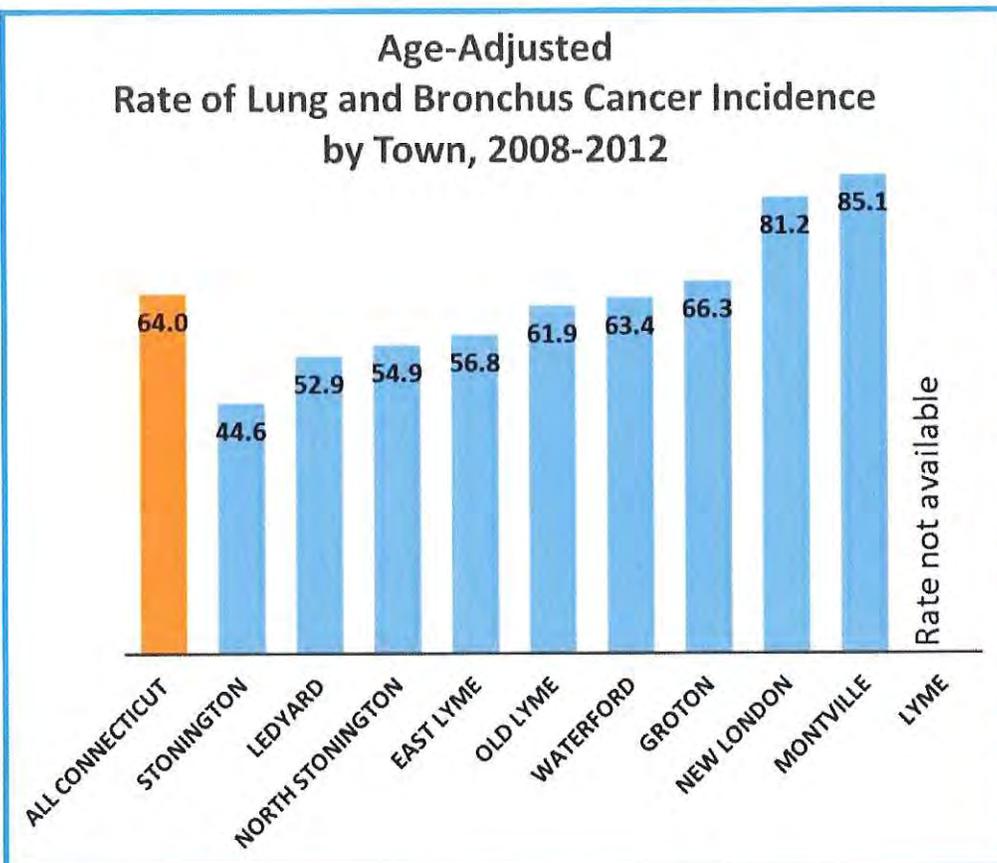

Cancer is the second leading cause of death in CT; despite decreases in incidence and mortality rates and improvements in survival from the most common cancers, concerning disparities persist for some CT residents. Cancer related deaths in LLHD are roughly on par with the state but have decreased slightly in last 5 years.

Cancer

In CT and in Greater New London, lung and bronchus cancer is the second most frequently diagnosed cancer.

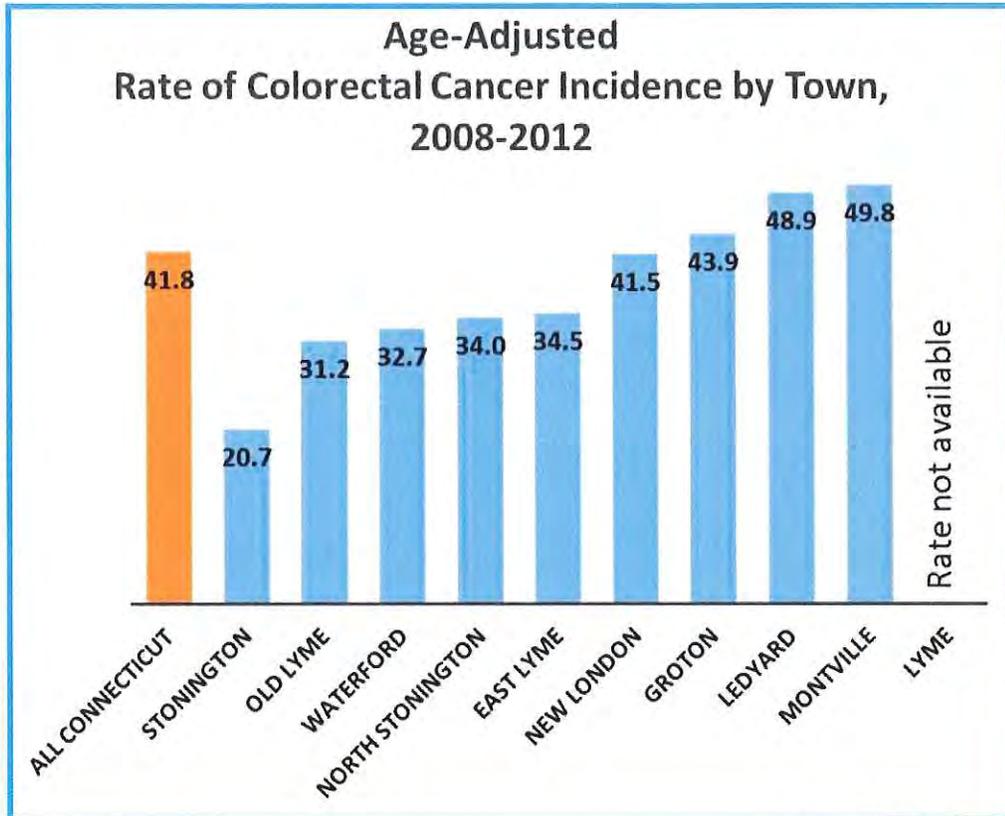

Age-Adjusted Rate of Lung and Bronchus Cancer Incidence by Town, 2008-2012

The top two risk factors for lung and bronchus cancer are smoking and radon. In Greater New London, where tobacco use exceeds the CT rate and the risk of radon exposure is high, the rate of lung cancer exceeds the CT rate in three communities.

Source: CT DPH

Colorectal cancer incidence rates in CT and in Greater New London are on par with national rates, however there are racial and gender related differences in mortality. Women more than men and Blacks more than other racial groups are more likely to die from colorectal cancer, possibly due to differences in access to screening services and in quality of care.

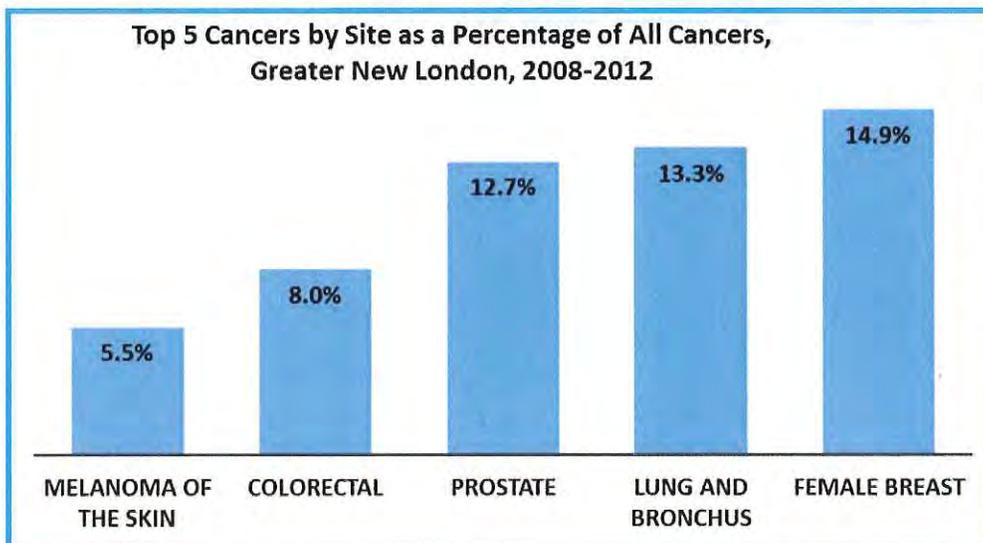

Source: CT DPH

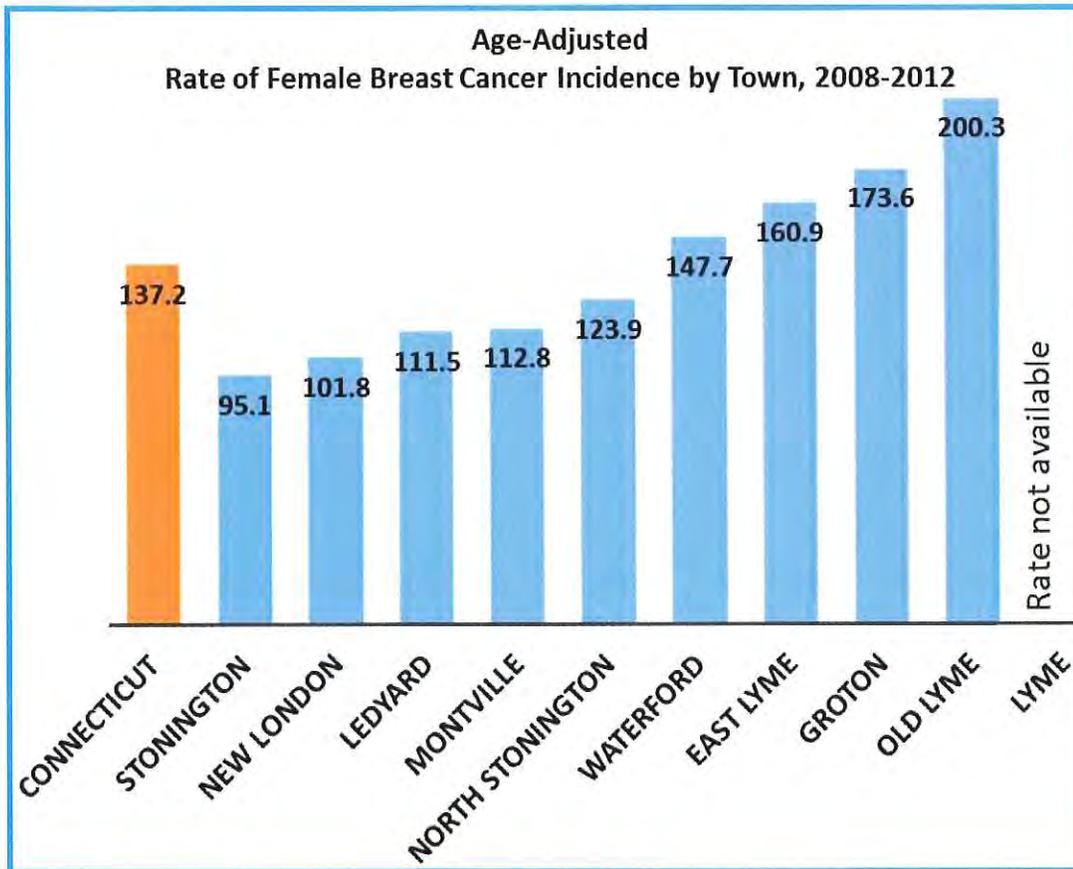

Cancer

The top five cancers diagnosed in Greater New London between 2008 and 2012 were female breast, lung and bronchus, prostate, colorectal, and melanoma of the skin, together accounting for over

half of all cancer diagnoses. Both the order and proportions are similar to the state overall, though bladder cancer is more frequently diagnosed than melanoma across the state.

Source: CT DPH

Source: CT DPH

Cancer

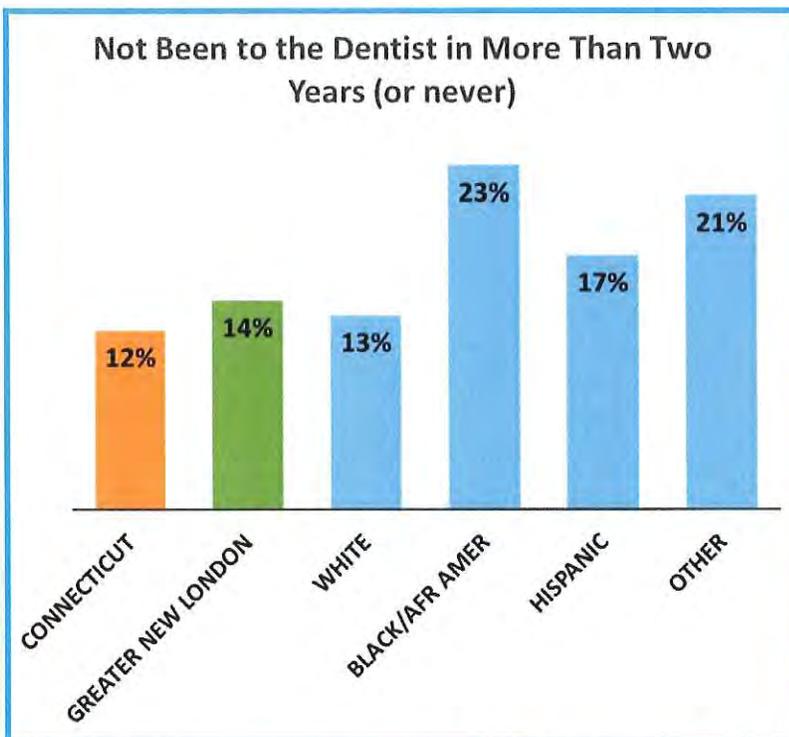

The National Cancer Institute estimates that 1 in 8 women will develop breast cancer in their lifetime. Breast cancer incidence rates in CT are higher than in the U.S. but mortality rates are lower. Higher rates of breast cancer are correlated with higher socioeconomic status. Several risk factors for breast cancer are more common among women with higher income including delayed child bearing and bearing fewer children, using birth control pills and/or menopausal hormone therapy, and drinking alcohol. Racial disparities are evident in breast cancer mortality, particularly among Black women who are more frequently diagnosed at a later stage of cancer.

Except for skin cancer, prostate cancer is the most common cancer among American men. Most prostate cancers grow slowly and don't cause any health problems in men who have them. The rate of prostate cancer in CT is higher than in the U.S., with a higher incidence and rate of mortality among Black men.

The higher rates of diagnosed breast cancer and prostate cancer in some towns in the region may reflect a number of factors, including increased access to screening.

In Southeastern CT, rates of female breast cancer in East Lyme, Groton, Old Lyme and Waterford exceed the state rate. In East Lyme, Ledyard and Old Lyme rates of prostate cancer exceed the state rate.
(CT DPH)

Oral health is an essential component of overall good health and well-being. There is growing evidence that oral infections may increase the risk of heart disease, may put pregnant women at greater risk of premature delivery, and can complicate control of blood sugar for people with diabetes.

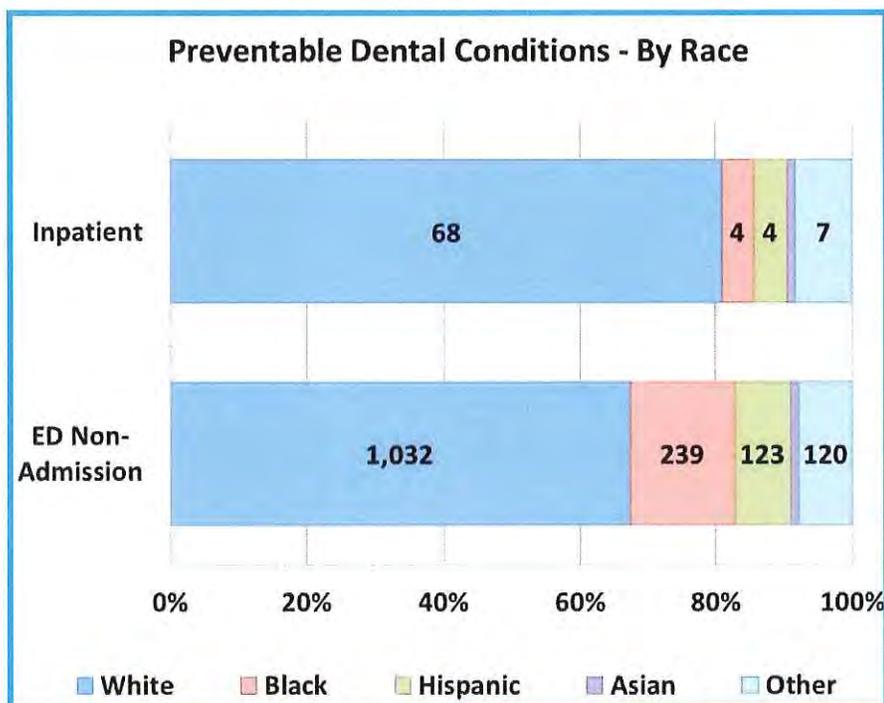

Source: 2015 Wellbeing Survey

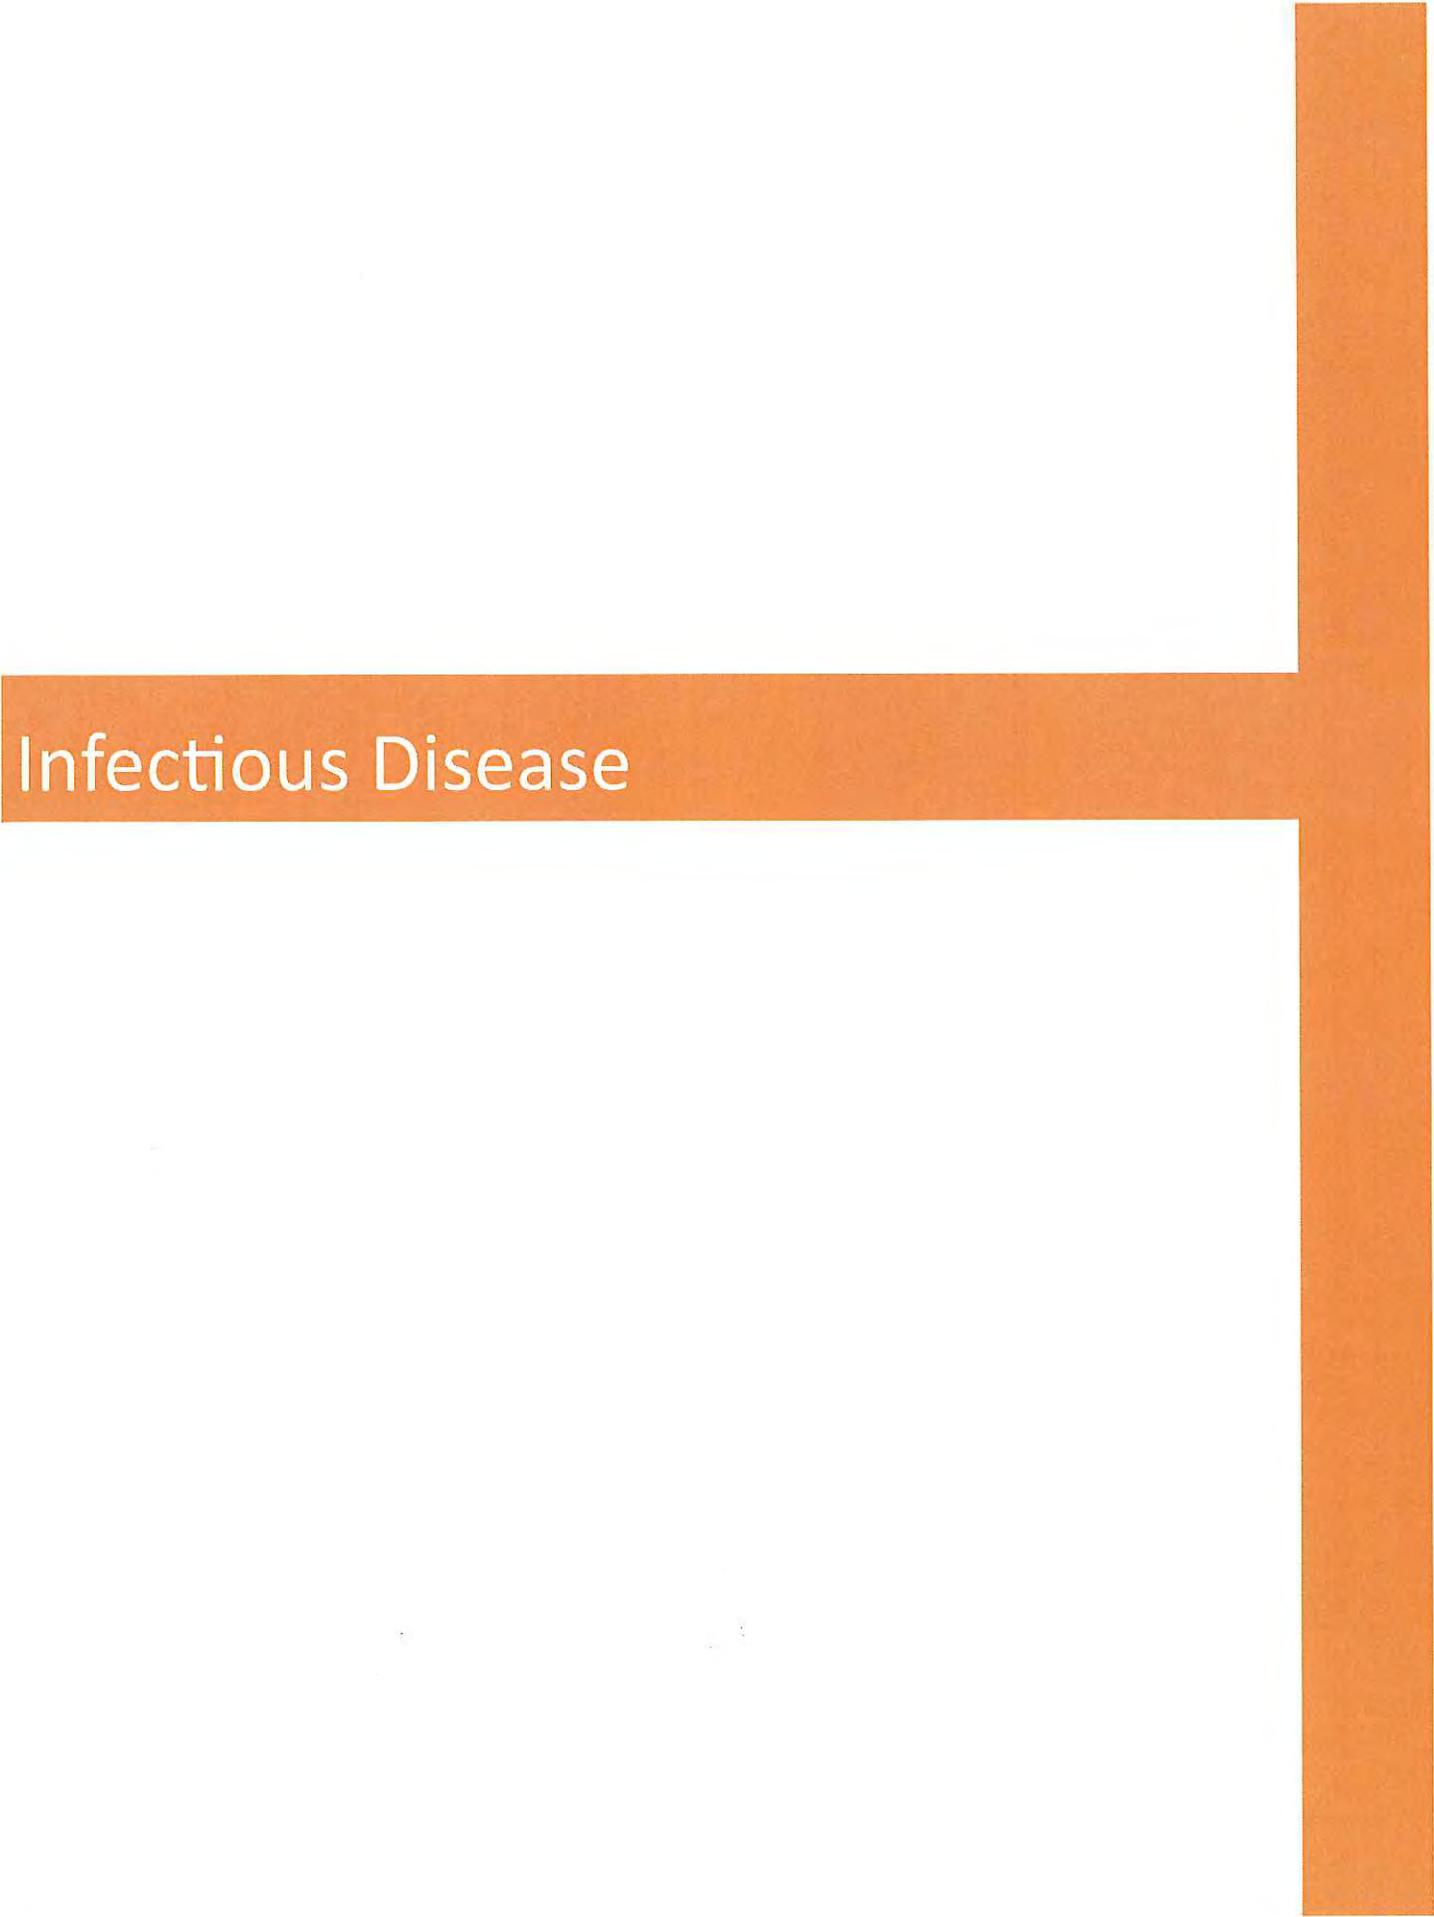

Oral Health

In the Wellbeing Survey, 1 in 4 Blacks reported not having been to a dentist in more than 2 years or never having been.

The American Dental Association reports that most dental ED visits are for non-traumatic dental conditions which would be more appropriately treated in a community dental setting. ED visits for

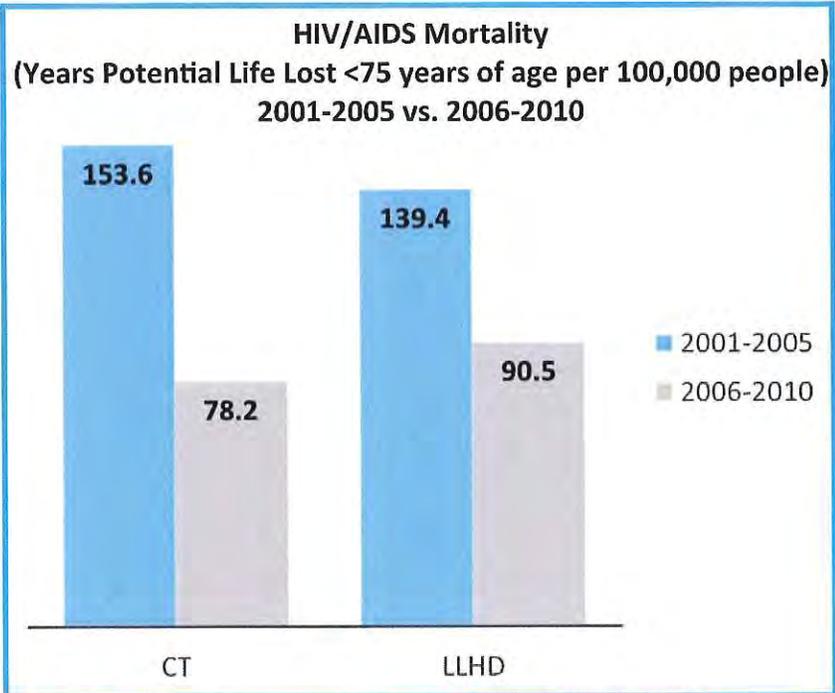

dental conditions are increasing, driven primarily by decreases in private dental insurance coverage among young adults combined with significant reductions in adult dental Medicaid programs, making accessing dental offices financially difficult for some. In Greater New London, ED visits for dental conditions disproportionately affects Hispanics, Blacks, and those of "other" races.

Infectious Disease

Identification, prevention, and reduction of mortality from HIV infections is a national goal, with several related Healthy People 2020 objectives. Between the five year periods from 2001-05, and 2006-10, mortality from HIV/AIDS dropped in LLHD and the state of CT overall. While mortality from HIV/AIDS in LLHD used to be lower than the state, that has since reversed, with mortality now being higher in LLHD compared to the state. Still,

Source: CT DPH

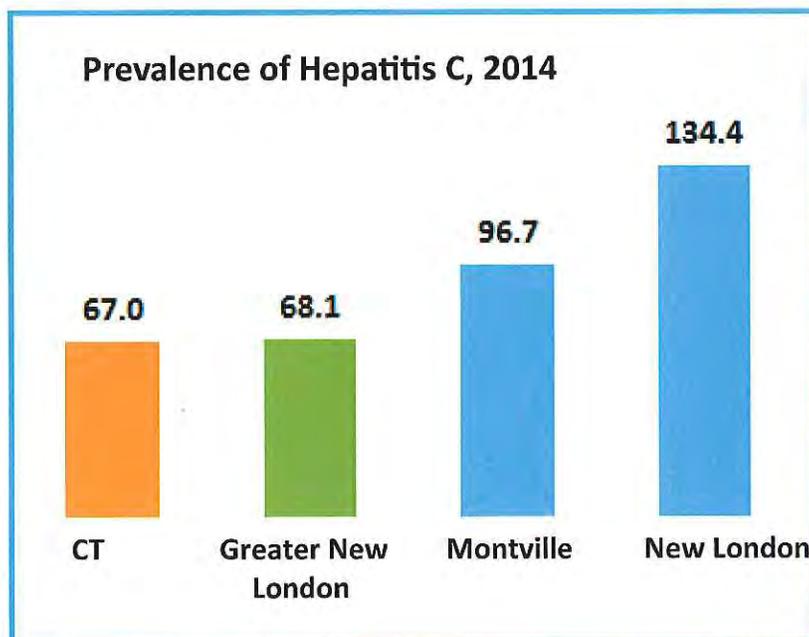

the trend towards lower mortality is clear, and efforts should be made to

continue that trend.

HIV/AIDS and Hepatitis

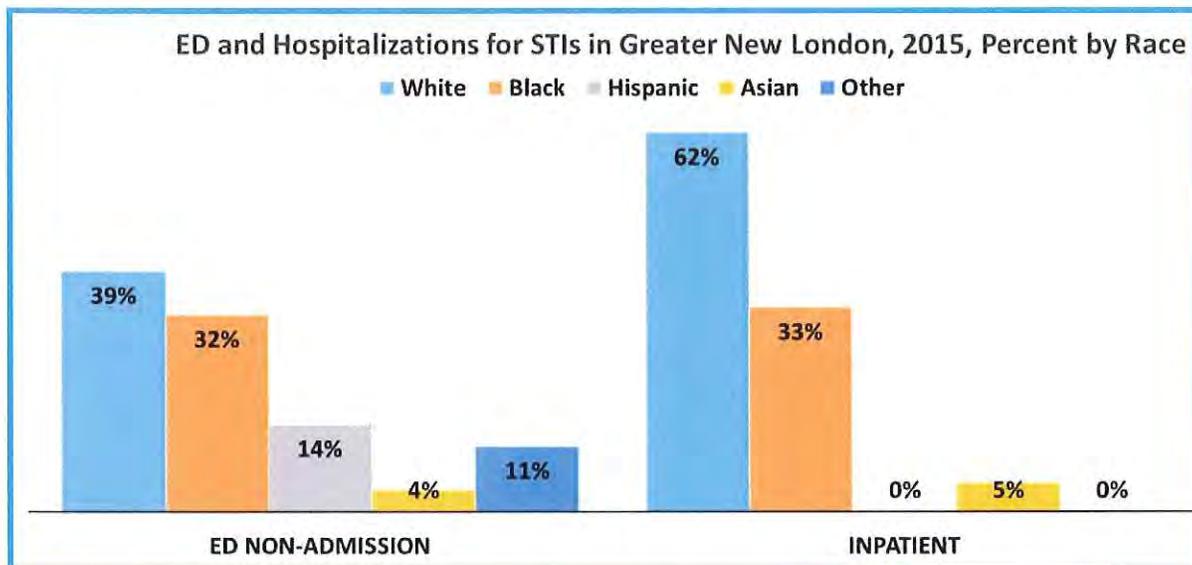

Hepatitis C is a viral infection that can result in serious health outcomes such as liver disease and even death. It is now most often transmitted through the sharing of needles during drug use, but was historically transmitted during routine medical procedures using donated blood and blood

products before screening of the blood supply was implemented in 1992. Hepatitis C and HIV/AIDS share some of the same risk factors for infection and there is a high co-infection rate.

In 2014, New London and Montville had higher rates of Hepatitis C infections than the state overall. (CT DPH)

Source: CT DPH

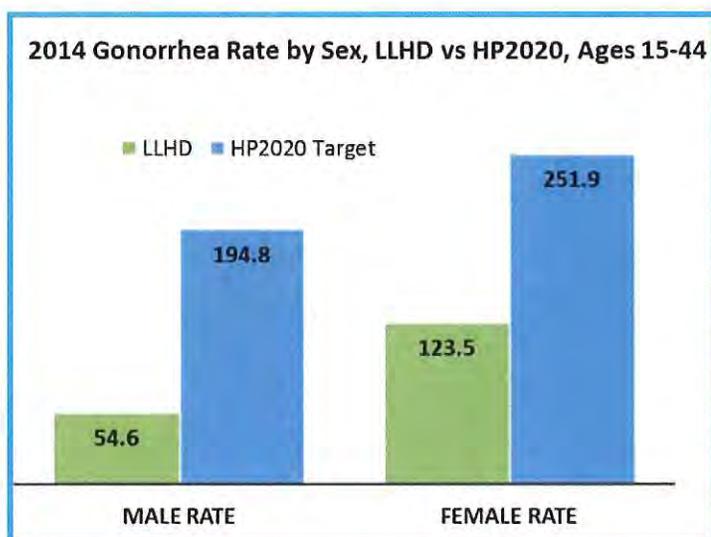

Source: CT Hospital Association

Because all sexually transmitted infections (STIs) are preventable, and most are curable with appropriate treatment, hospital utilization for these infections should be entirely avoidable. In the Greater New London area, that is approaching the truth, with fewer than 50 hospital encounters in 2015. Still, racial disparities exist. Though Blacks make up 5.5% of the population of the Greater New London area, they accounted for 32% of emergency department visits and 33% of hospitalizations for STIs.

Sexually Transmitted Infections

Gonorrhea is a very common sexually transmitted infection. Anyone who is sexually active can get gonorrhea, but it is most often found in people between 15-24 years old. In LLHD, the rate of gonorrhea infections is already below the Healthy People 2020 target for both men and women. Sometimes men, and often women, will not show any symptoms from the infection. Occasionally,

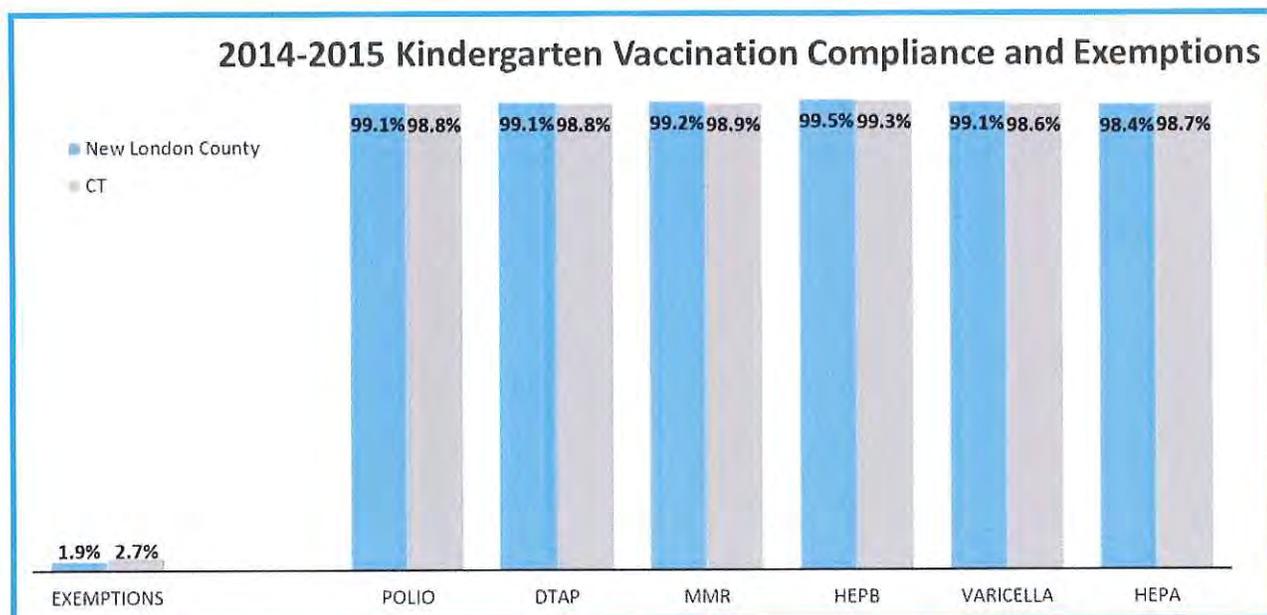

Source: LLHD

however, gonorrhea infection can result in serious outcomes, such as sterility/infertility, ectopic pregnancy, and pelvic inflammatory disease. Gonorrhea is increasingly being recognized as antibiotic resistant. It is important to maintain vigilance in prevention efforts to reduce the spread of the infection, and educate those who are infected about the importance of completing the prescribed course of antibiotics when being treated.

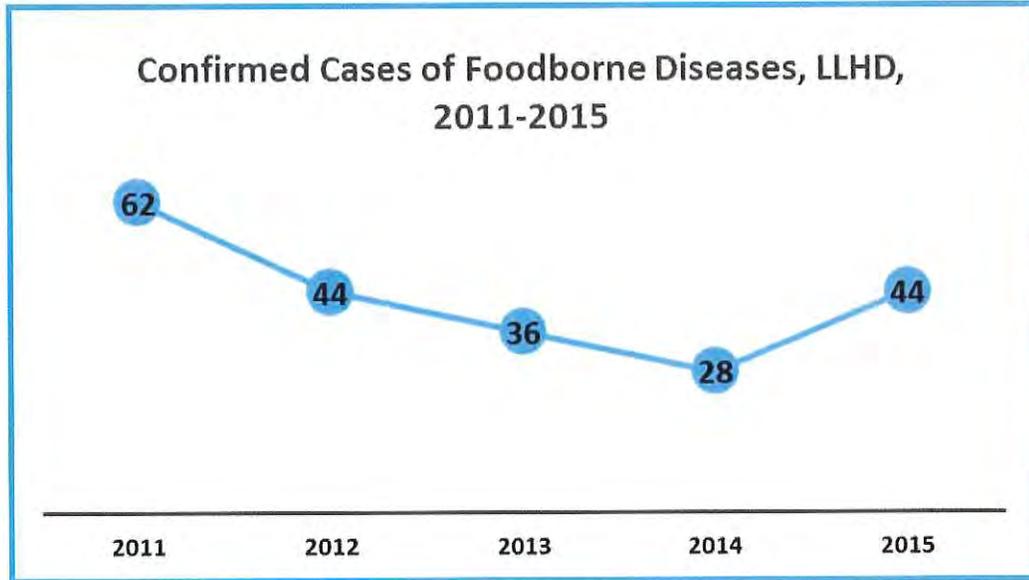

The development and use of vaccines as primary prevention of infectious diseases is one of the greatest public health accomplishments of the last 100 years, nearly eliminating morbidity and mortality from vaccine-preventable infections in CT over that time. Though localized outbreaks of some vaccine-preventable infections such as measles, mumps, and whooping cough do happen in CT from time to time, sustained community transmission of these infections no longer occurs. The Healthy People 2020 targets for kindergarten vaccination compliance for polio, DTaP, MMR, HepB, and varicella is 95%. Kindergarten children in New London County already far surpass these goals, with nearly 99% coverage for each vaccine in the 2014-2015 school year. It is necessary to continue emphasizing the importance of following the recommended vaccination schedule for children and adults in order to maintain the gains made in the county and state in preventing these infections from taking hold in our communities.

Vaccine Preventable Diseases

Source: CT DPH

CDC reports that about 1 in 6 Americans get sick, 128,000 are hospitalized, and 3,000 die of foodborne diseases yearly. These illnesses cost the economy over

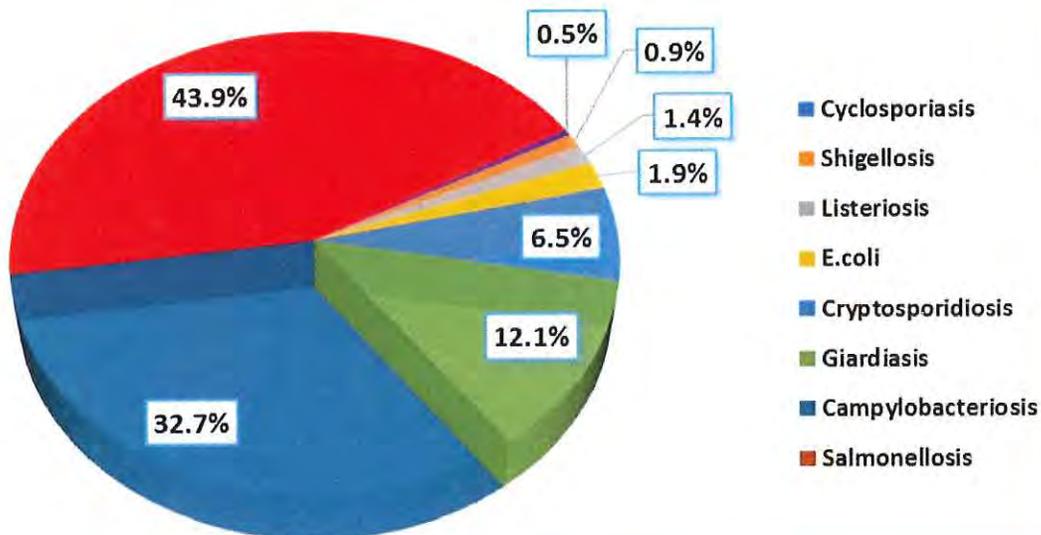

\$15 billion each year, according to the U.S. Department of Agriculture Economic Research Service. Source: LLHD

Severity of symptoms from foodborne illness range from mild or even non-existent, to severe and life threatening. The number of laboratory confirmed foodborne diseases in LLHD declined steadily between 2011 and 2014, but then rose slightly in 2015. The two most commonly diagnosed foodborne illnesses in LLHD are Salmonellosis and Campylobacteriosis, together accounting for more than 75% of all reported cases of foodborne disease in the area.

Foodborne Illness

DISTRIBUTION OF TYPES OF FOODBORNE DISEASES, LLHD, 2011-2015

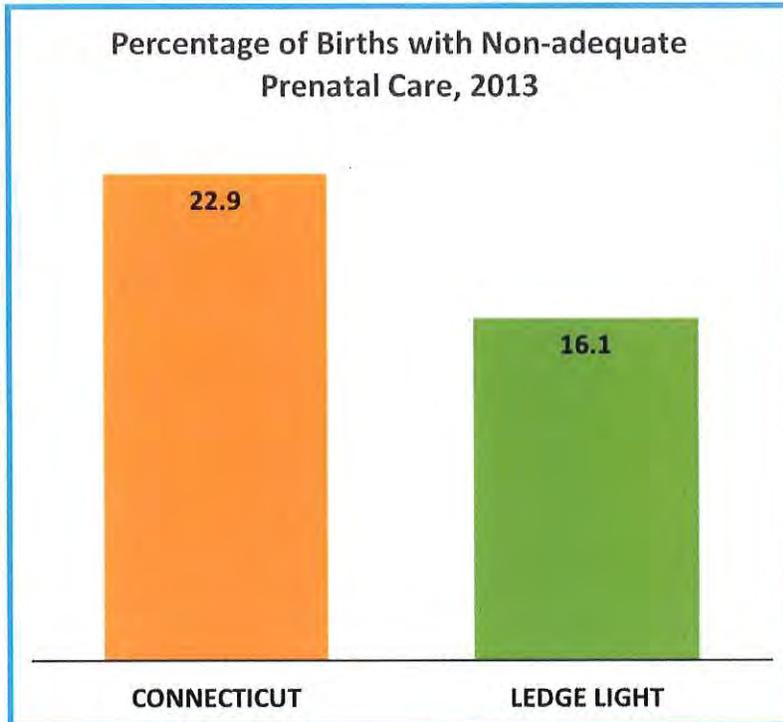

Source: LLHD

Maternal and Infant Health

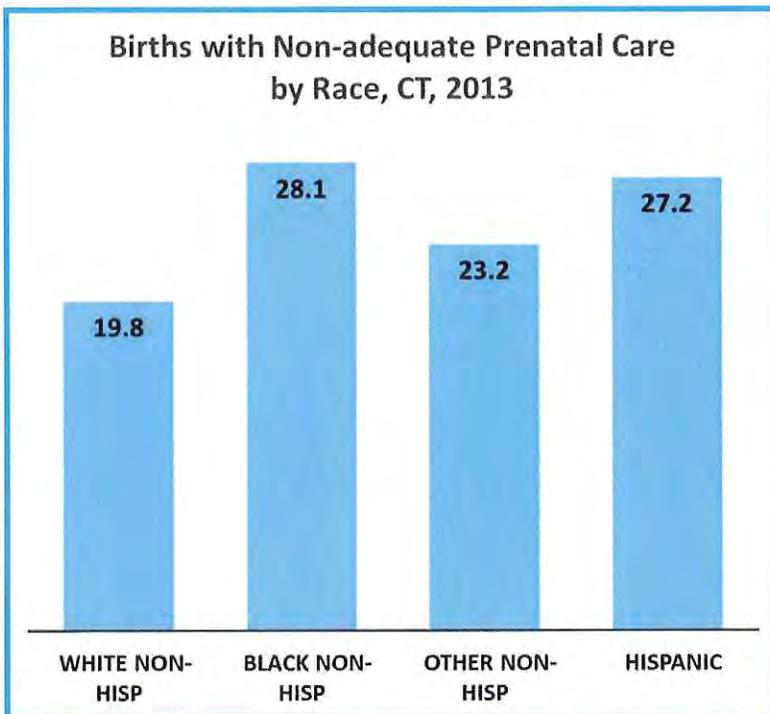

Prenatal care has the potential to reduce the incidence of poor birth outcomes by treating medical conditions, identifying and reducing potential risks, and helping women to address behavioral factors that that impact their pregnancy. It is more likely to be effective if women begin receiving care in the first trimester of pregnancy and continue to receive care throughout pregnancy, according to accepted standards of care.

Source: CT DPH

Prenatal Care

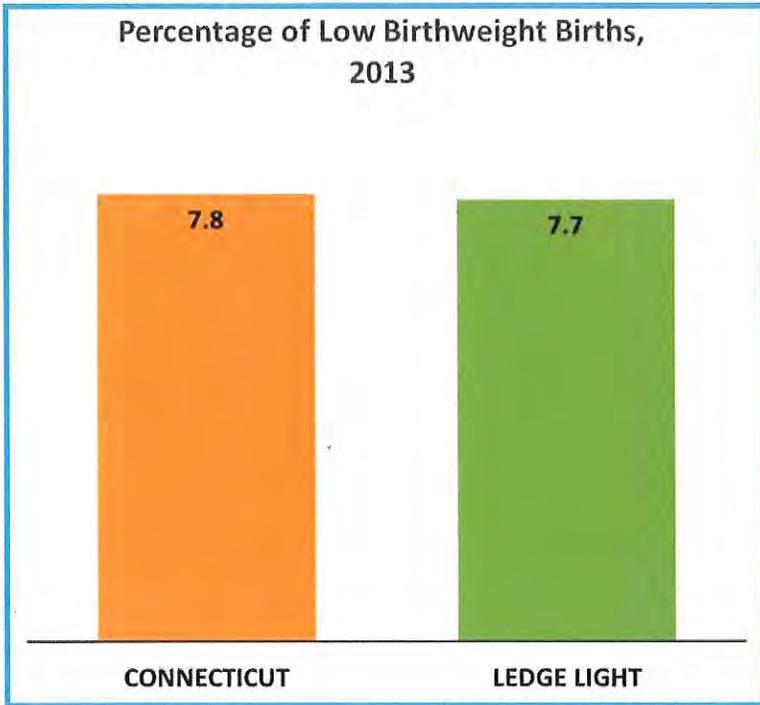

Statewide, fewer women have been accessing early and adequate prenatal care over the last decade. (CT DPH)

Source: CT DPH

Inadequate prenatal care, defined by a combination of the month of first prenatal care visit and the total number of visits during pregnancy, is associated with an increased risk of preterm delivery. Overall in LLHD adequacy of prenatal care compares favorably with the state. At the state level, there are persistent racial and ethnic disparities as well as disparities related to insurance coverage which are most likely present locally as well.

Low birthweight, defined as a birth weight of less than 2,500 grams (or about 5.5 pounds), has been a persistent public health problem in Connecticut for many years. Low birthweight may result from pre-term birth or growth restriction in the uterus. Significant risks associated with low birthweight include infant death, developmental disabilities, cerebral palsy, hearing and vision impairments, cognitive deficiencies and poor neuropsychological outcomes, learning disabilities and

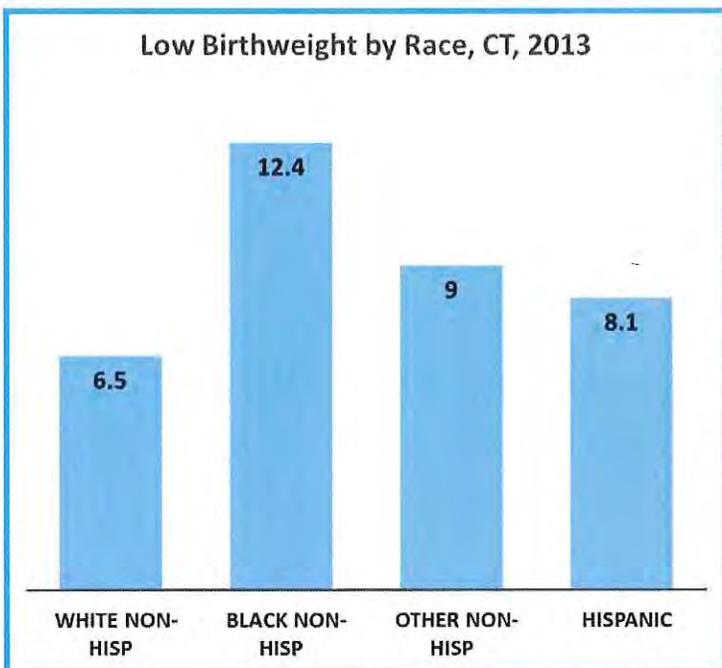

Source: CT DPH

Low Birthweight Babies

poor educational performance, and behavioral problems.

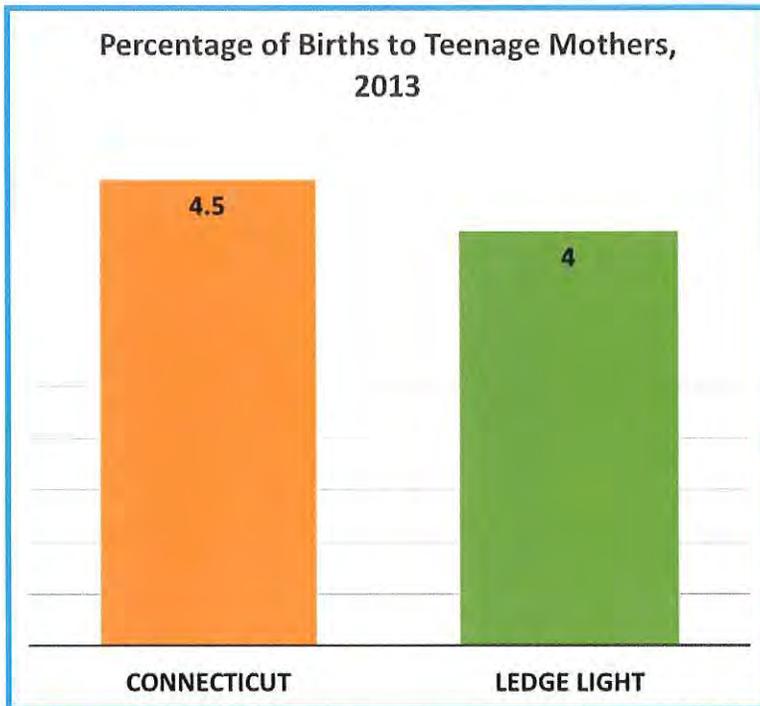

Participation in the WIC program, having strong social support during pregnancy, eliminating tobacco exposure and adequate prenatal care can all significantly reduce the risk of low birthweight.

Source: CT DPH

The percentage of low birthweight babies in LLHD is the same as in CT overall, however, here too racial and ethnic disparities are evident across the state, particularly among non-Hispanic Black women. This could be correlated with the racial and ethnic disparities in prenatal care. Further investigation is needed to determine if these disparities exist locally and, if so, why they are occurring.

The impact of teen pregnancy and birth is significant and multigenerational. Extensive evidence reveals that pregnant teens are at increased risk for premature birth, delivering low birthweight infants, other serious health problems, and death. Pregnant teens are more likely to interrupt or discontinue their education and their children are more likely to drop out of high school. Children born to mothers under age 20 are at greater risk of being in foster care or being a victim of abuse and

Source: CT DPH

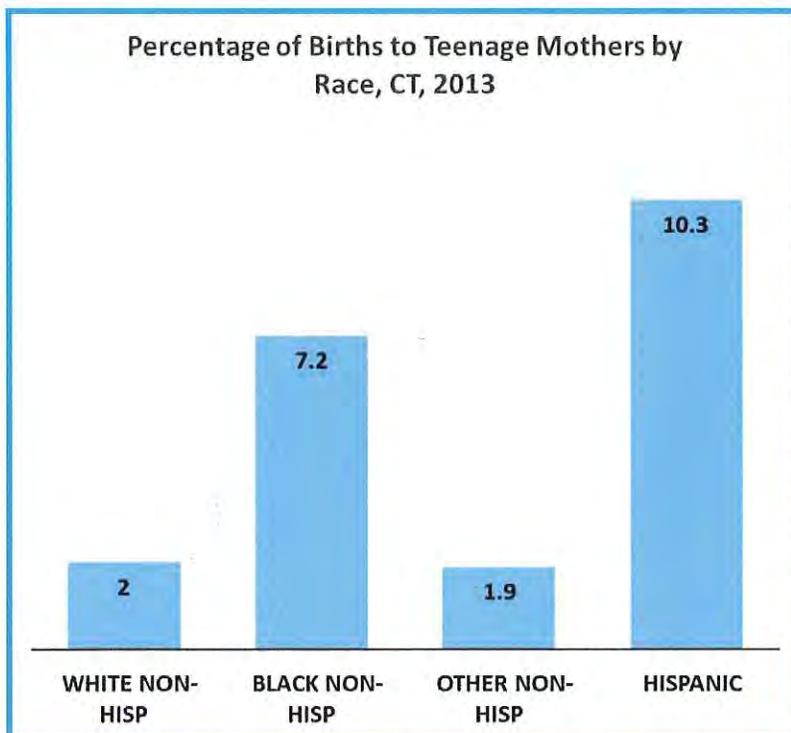

neglect. According to the CT Department of Public Health “64% of children born to

Births to Teens

an unmarried, teenage high-school dropout live in poverty, compared to 7% of children born to women over age 20, who are married and are high school graduates.” The children of teens are more likely to themselves become teen parents as well as to have higher incarceration

rates and lower earnings. It is very positive then that in CT there has been a significant decrease in births to teens in the last decade and that the rate in LLHD is slightly lower than the state rate.

However, despite the downward trend overall and decreases among all racial and ethnic groups, disparities remain at the state level. The high birth rates among Hispanic teens may be consistent with high birth rates among Hispanics overall.

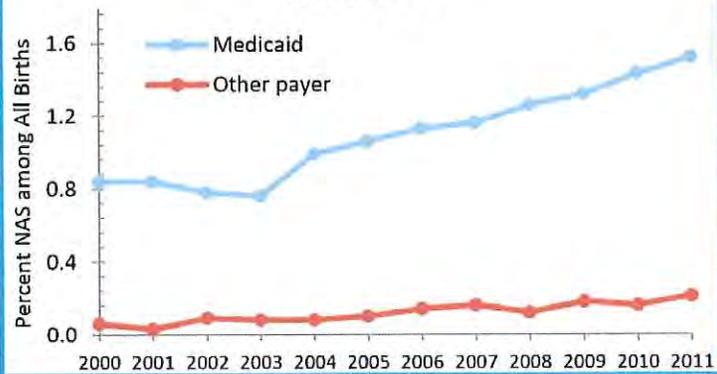

Source: CT DPH

Neonatal abstinence syndrome (NAS) is defined as a group of problems that occur in a newborn who was exposed to addictive opiate drugs while in the mother’s womb. Those drugs may have been prescribed by a medical provider for pain management or may be “street drugs”; in-utero exposure to either can cause serious and long-term health problems for the newborn.

Opioid-dependent babies experience significant withdrawal symptoms after birth and often require a stay in the neonatal intensive care unit.

Percent of Children Born with Neonatal Abstinence Syndrome, By Payer, Connecticut, 2000-2011

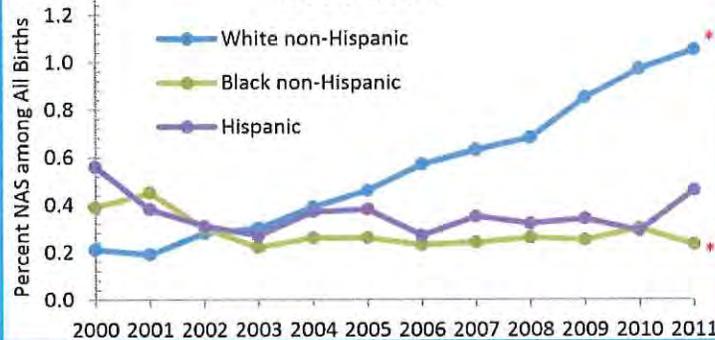

Source: CT DPH

Neonatal Abstinence Syndrome

According to the CT Department of Public Health, NAS has increased in the state in the last decade and is

most prevalent among White non-Hispanics and persons with Medicaid insurance coverage.

Source: CT DPH

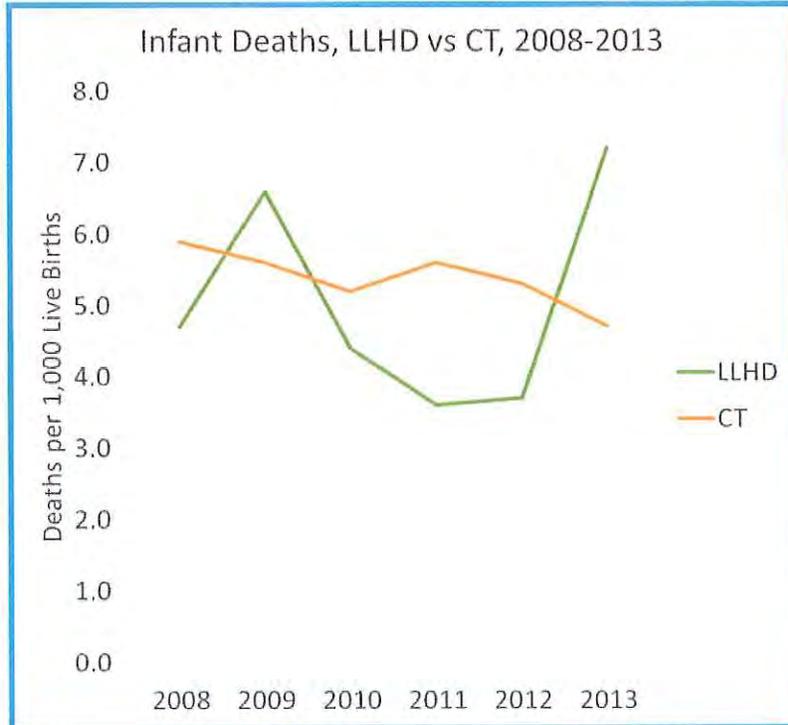

Note: * indicates significant increasing trend for White non-Hispanics and decreasing trend for Black non-Hispanics (p<0.05).

Babies born at L+M Hospital

Year	Number of Opioid-dependent babies
2013	20
2014	20
2015	32

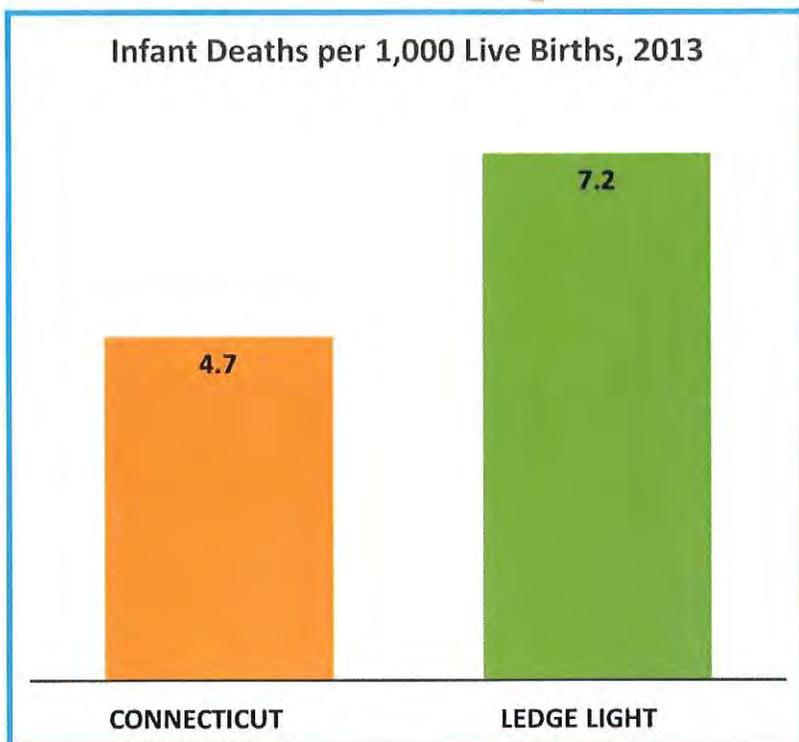

The statewide trend of increasing numbers of opioid-dependent babies is evident locally as well.

Infant mortality is defined as the death of a baby before his or her first birthday. Infant mortality can be an indicator of factors that impact the health of a community as a whole. CDC cites the top five leading causes of infant mortality nationally as birth defects, preterm birth and low birth weight, maternal complications of pregnancy, Sudden Infant Death Syndrome, and injuries. In CT, infant mortality has declined in the last decade and is below the Healthy People 2020 target of 6 per 1,000 live births but there has been a troubling uptick in the local rate.

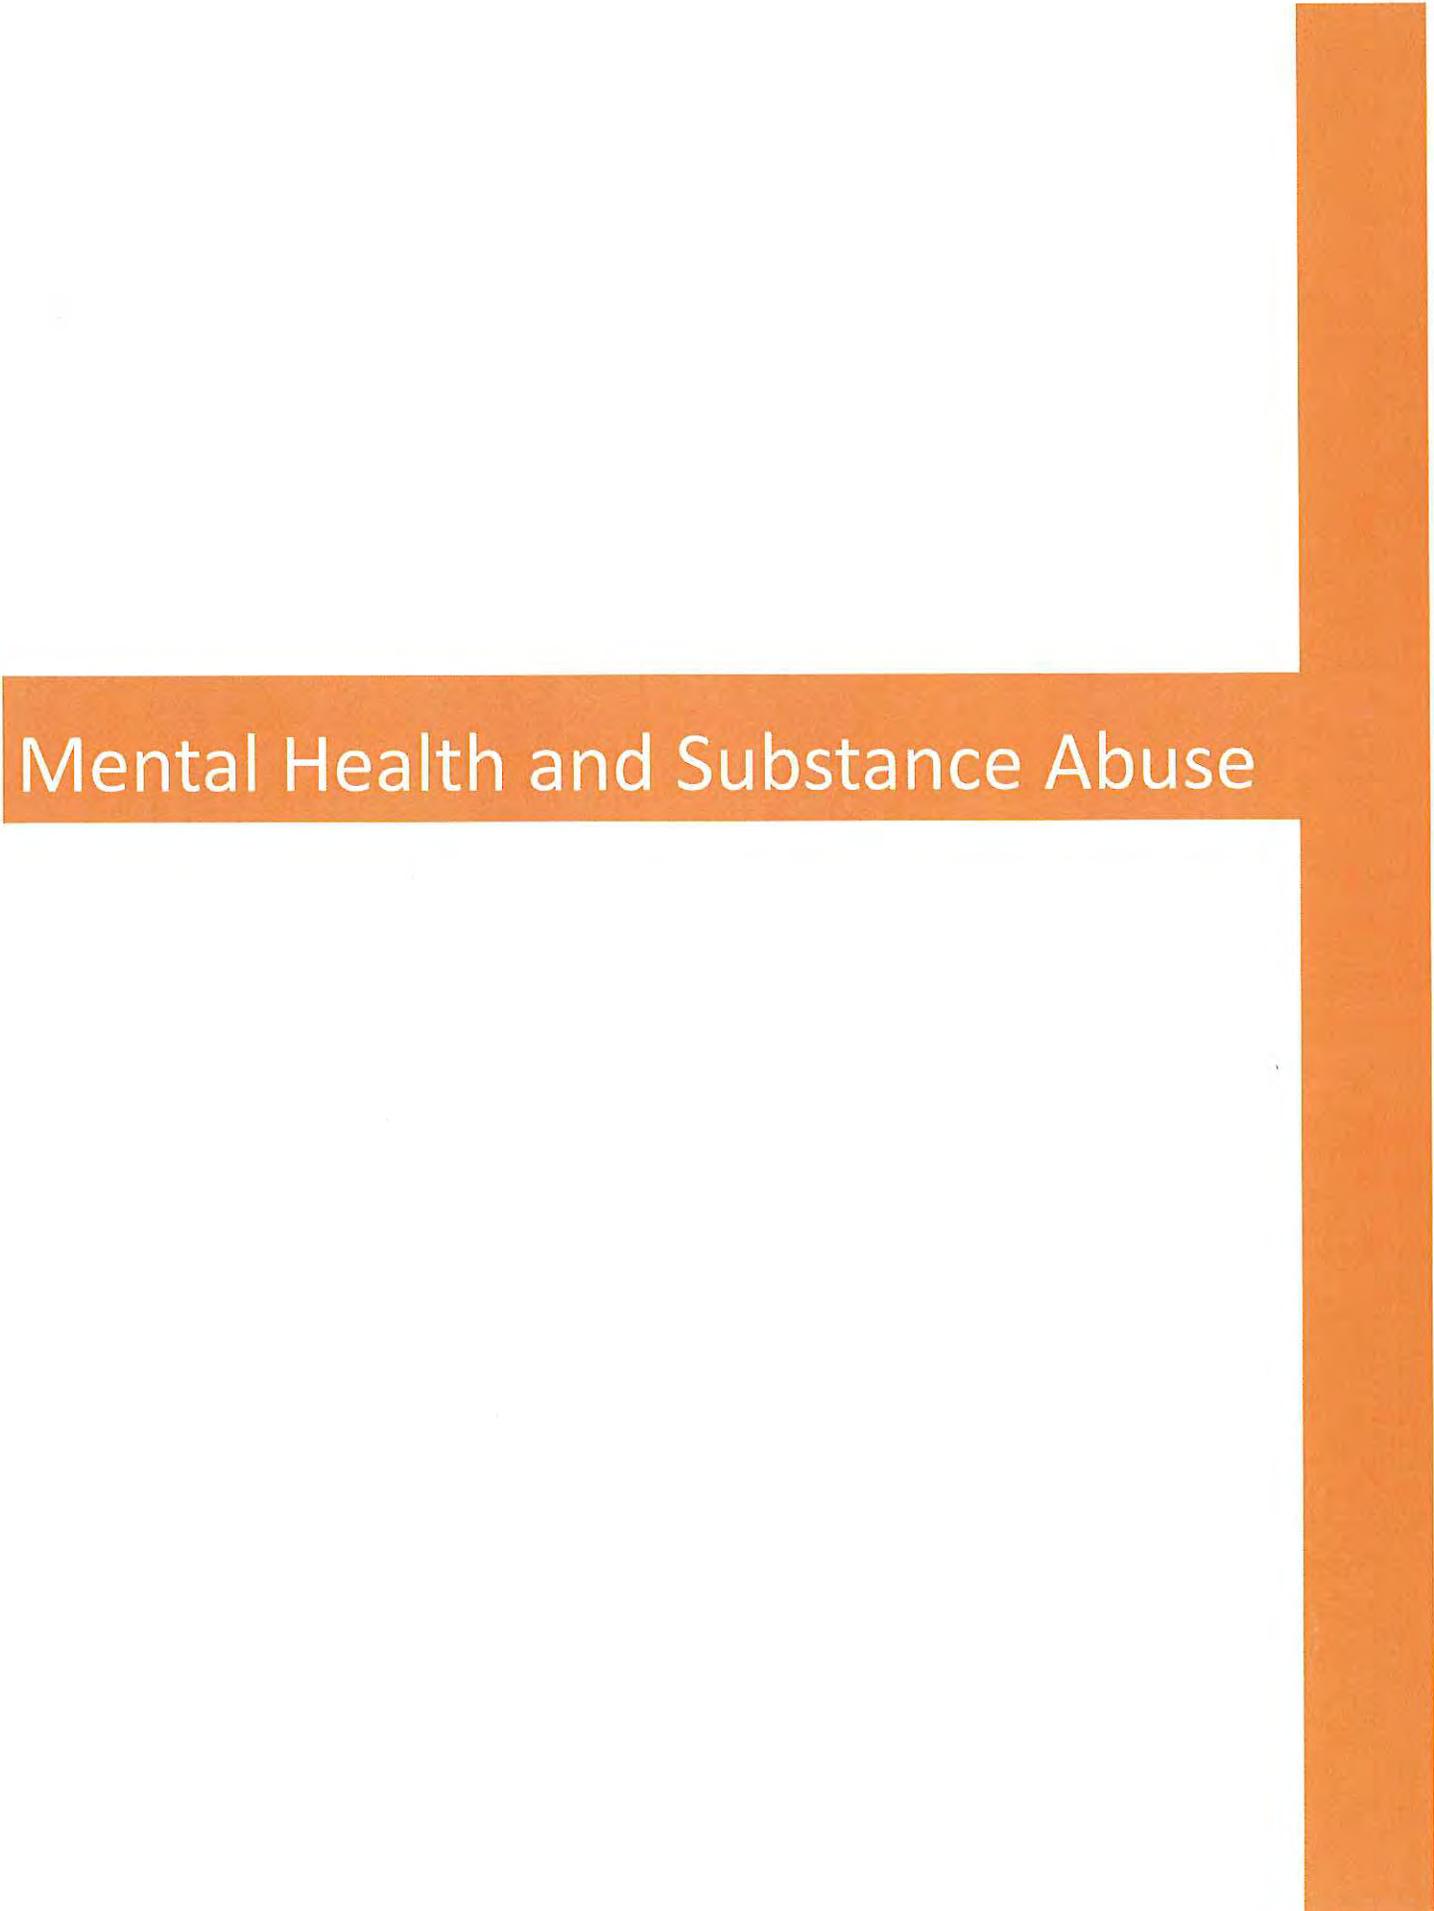

Infant Mortality

For 2013, LLHD is on par with Lebanon, Malaysia, Kuwait and Chile. This may be a one year statistical anomaly with local trends being highly variable, but it bears monitoring. (World Health Organization)

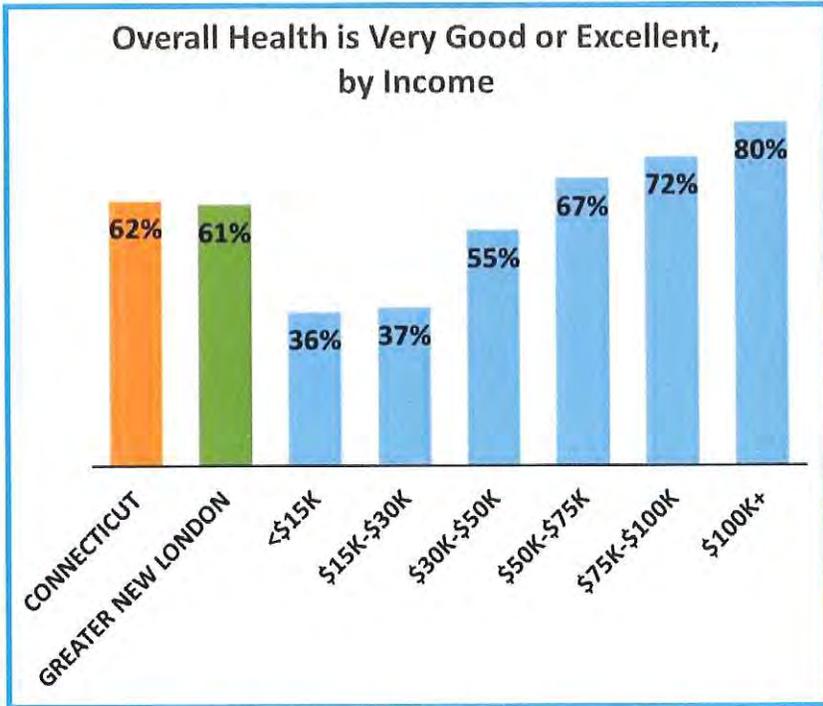

In 2013, the latest year for which data are available, the infant mortality rate in LLHD far exceeded the state rate as well as the rates in the cities of Bridgeport and Hartford. State data indicate that significant racial disparities exist.

Source: CT DPH

Mental Health and Substance Abuse

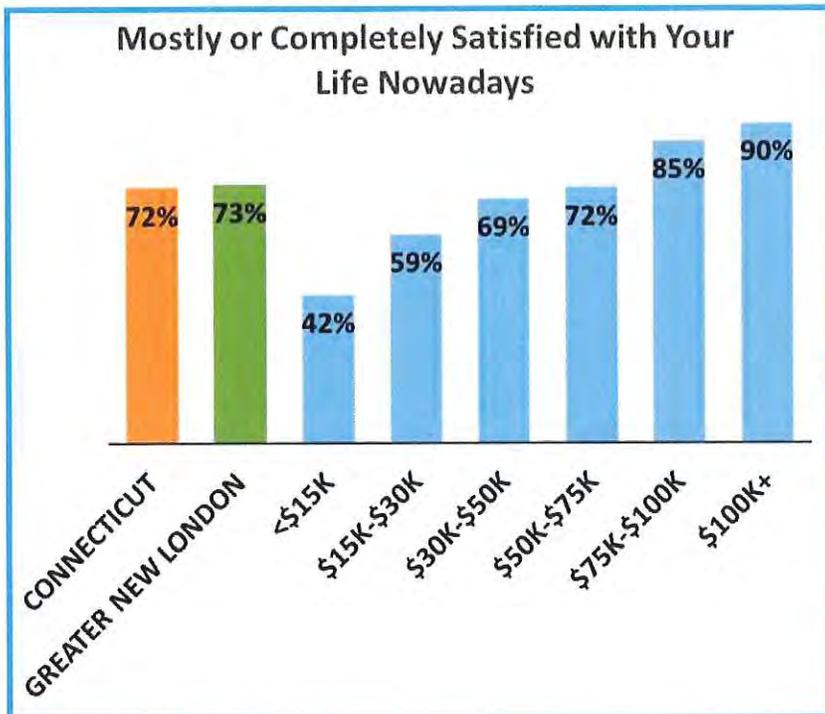

Feeling physically unwell can have significant impact on a person’s mental and emotional wellbeing. People with chronic pain or illness may become depressed or have anxiety about their futures, financial situations or families. In Greater New London, there is a direct relationship between reporting that one’s overall health is “very good” or “excellent” and income. Those making less than \$30,000 per year were half as likely to report general good health than those making \$75,000-\$100,000. This association is troubling but not surprising; as national studies

Source: 2015 Wellbeing Survey

Mental and Emotional Wellbeing

and other local data presented in this report have shown, income is a significant determinant of health status.

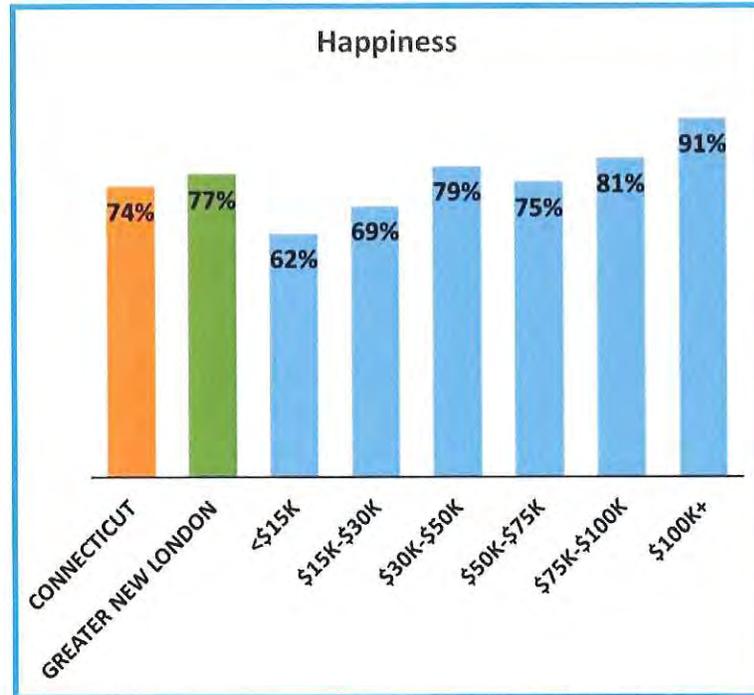

Source: 2015 Wellbeing Survey

Only 45% of Greater New London residents overall say they have the time to do the things they really enjoy. The percentage is much lower among Hispanics, those who make under \$15,000 and those in the \$30,000-\$50,000 income bracket. (Wellbeing Survey)

Again, there is a direct relationship between general satisfaction with one’s life and income; those in the highest income bracket were twice as likely as those in the lowest to say they are “mostly” or “completely satisfied with life nowadays”.

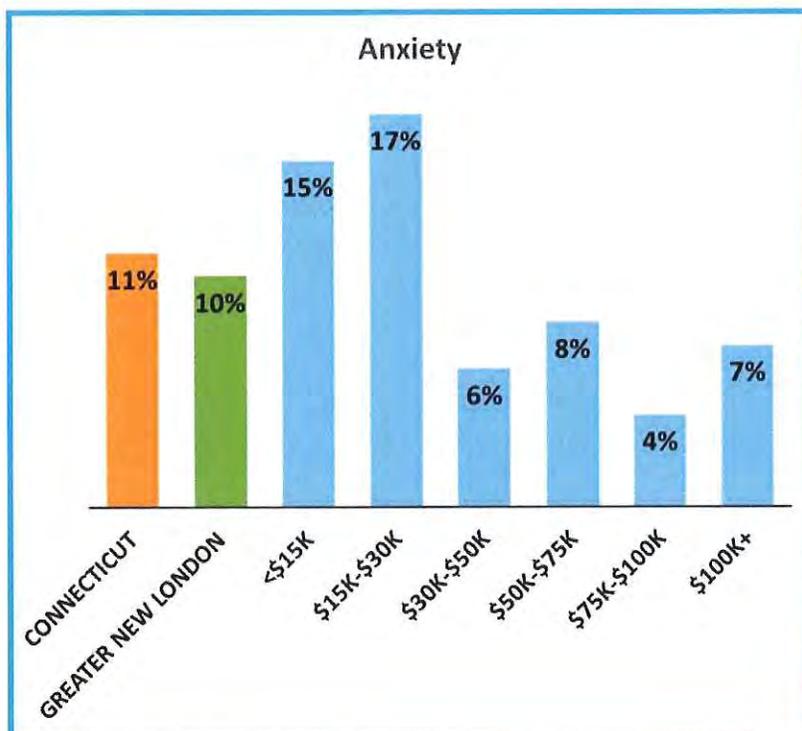

The Wellbeing Survey asked respondents about their overall happiness, anxiety and depression. These are not clinical diagnoses, but provide the best data currently available about how many of our local residents face barriers to good mental and emotional health, and where disparities exist.

Source: 2015 Wellbeing Survey

Mental and Emotional Wellbeing

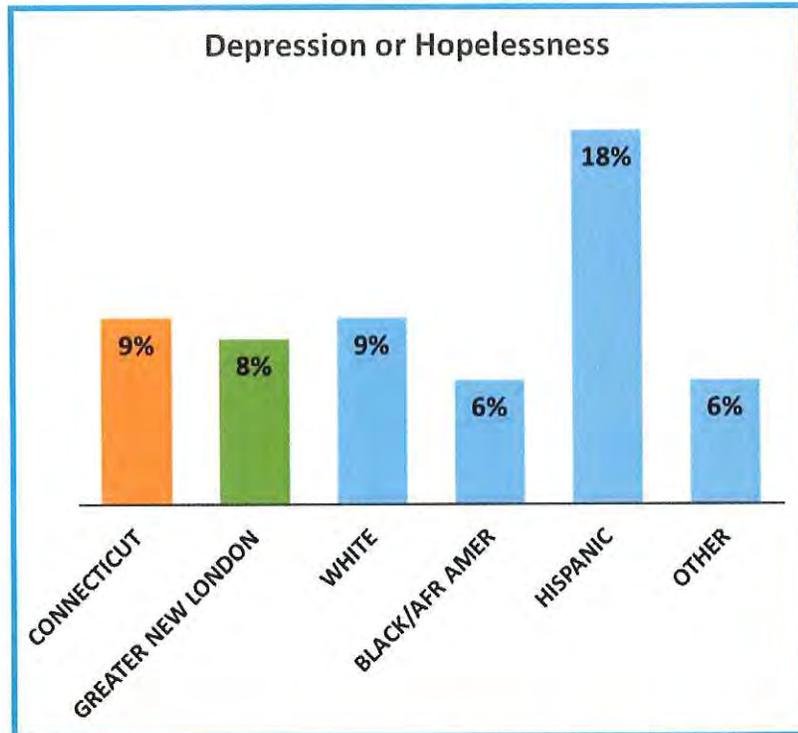

Despite the saying that "money can't buy happiness" it is perhaps not surprising that Wellbeing Survey respondents in the higher income brackets reported better overall emotional wellbeing.

Source: 2015 Wellbeing Survey

The long-term activation of the body's stress-response system, and the subsequent chronic overexposure to the hormones associated with that response, increases the risk of numerous health problems, including anxiety, depression, digestive problems, headaches, heart disease, sleep problems, weight gain, and memory and concentration impairment.

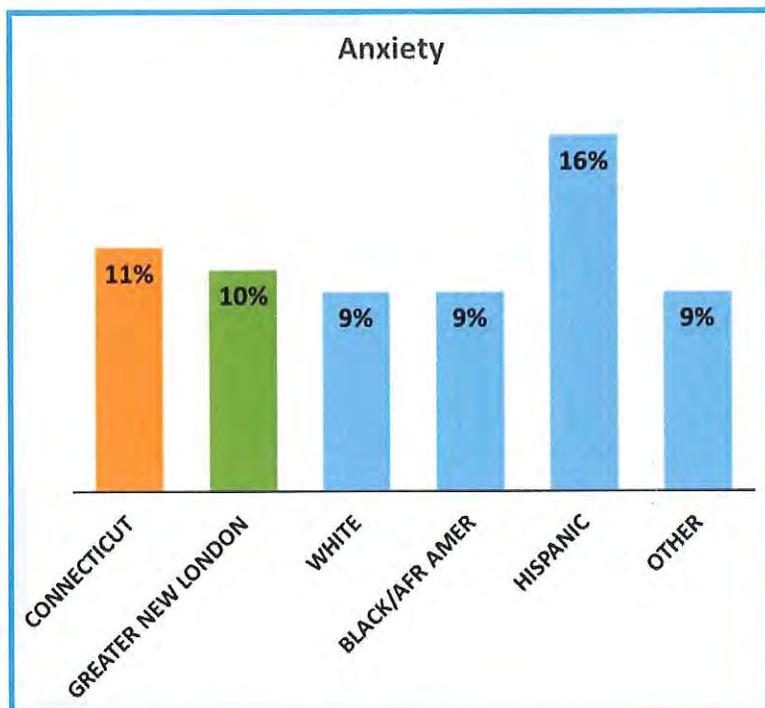

Hispanics were much more likely than the population overall to depression and anxiety in the Wellbeing Survey. Community key informants have theorized that this could be a combination of multiple factors, including, for immigrants, feeling loss associated with leaving their country of origin or concern over their or a family member's immigration status.

Source: 2015 Wellbeing Survey

Mental and Emotional Wellbeing

For 2015, Depression was the 4th most prevalent condition among hospitalizations in the Inpatient and ED Non-Admission settings for area residents. (CT Hospital Association)

Source: 2015 Wellbeing Survey

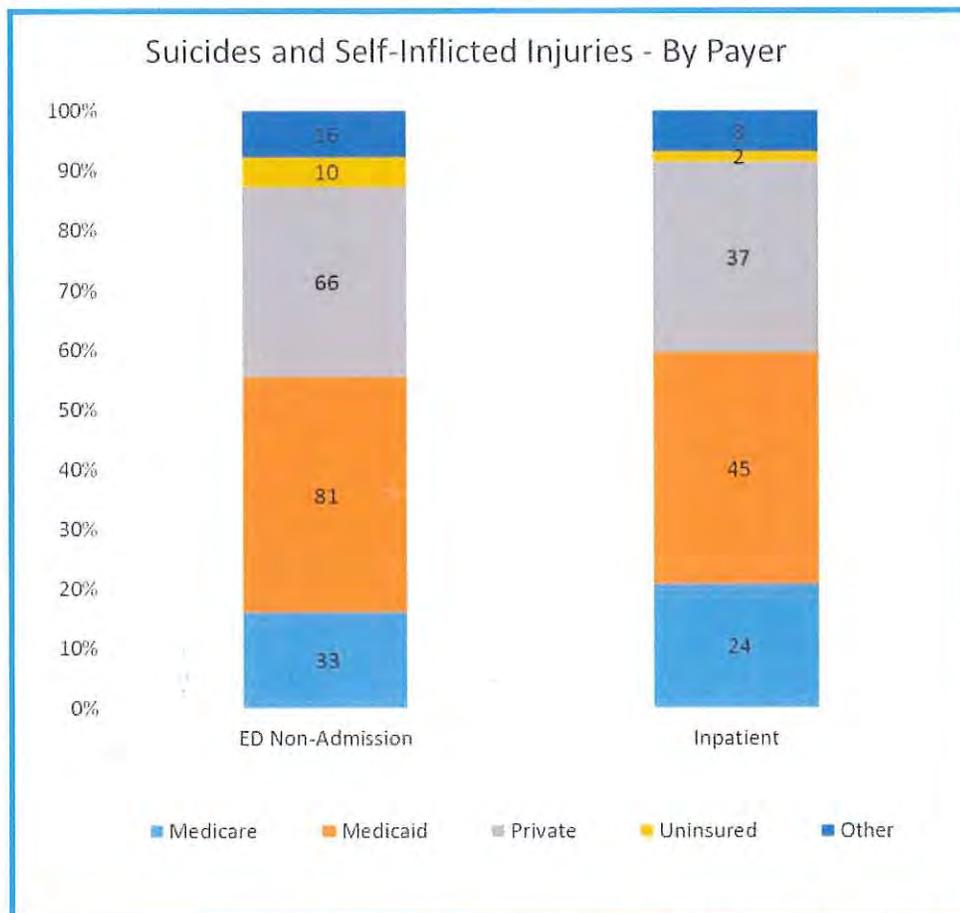

These responses indicate the need for culturally and linguistically sensitive mental health care in Greater New London. In addition to ensuring care is available and accessible, work should be done at the community level to decrease any stigma associated with seeking mental health care.

Suicide and self-inflicted injuries result from multiple intersecting factors. Causes are individualized and may include multiple intersecting health and environmental factors. Common warning signs of suicide include individuals talking about suicide or wanting to hurt themselves, increasing substance abuse, and having changes to their mood, diet or sleeping patterns. Research shows that suicide can be prevented—on-going support as well as crisis intervention can stop someone who is considering suicide from taking their life. In addition to increasing awareness and understanding of suicide and suicide prevention through community education, environmental interventions can be effective in preventing people from taking their lives or hurting themselves. Environmental interventions include suicide prevention hotlines, suicide prevention signage and safety nets on bridges and measure that reduce access to guns and medications.

20% of residents in Greater New London have Medicaid but Medicaid beneficiaries account for 40% of all hospital encounters for suicides and self-inflicted injuries.

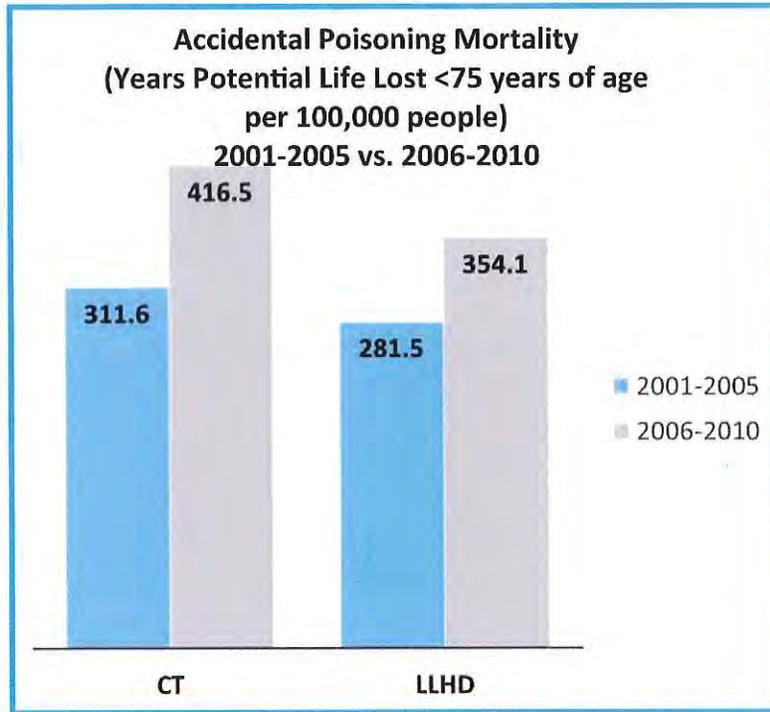

(CT Hospital Association)

Suicide and Self-Inflicted Injuries

Source: CT Hospital Association

A report from the Association for Healthcare Research and Quality states that, nationally, between 2006 and 2011, the rate of ED visits for substance-related disorders (not including alcohol) increased 48%. Over the same time period, ED visits for alcohol-related disorders increased 34%. Accidental poisoning as a cause of death includes overdoses from alcohol or drugs. While not all these cases are related to an overdose, the increase at both the state and local levels between these two five-year periods could indicate a growing problem with use

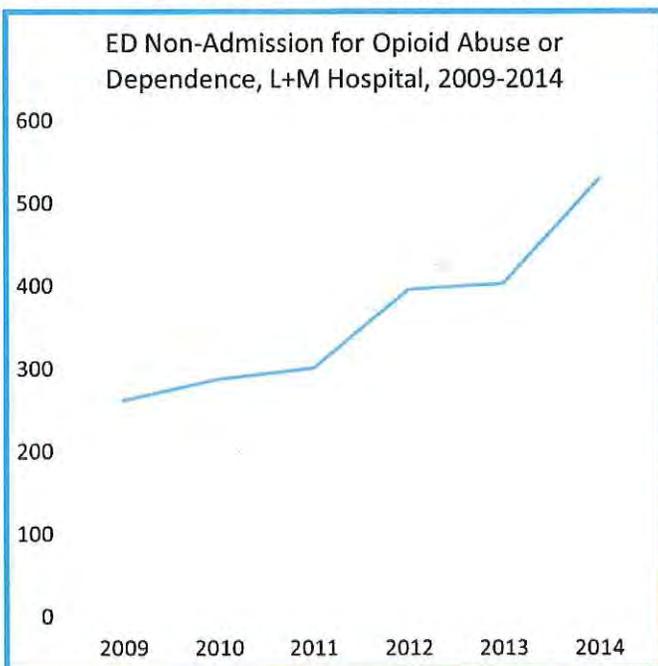

Source: CT DPH

Substance Abuse and Overdoses

of substances.

For 2015, Alcohol and Substance Abuse was the 5th most prevalent condition among hospitalizations in the Inpatient and ED Non-Admission settings for area residents. (CT Hospital Association)

In 2015, local, state and national news began to focus on a “heroin epidemic”. Even before this, ED encounters at L+M for opioid abuse were rising—more than doubling between 2009 and 2014. Opioid

Source: CT Hospital Association

abuse includes both the misuse of prescription drugs and use of “street” heroin. Much attention has been paid to the abundance and availability of prescribed opioids. While these medications can be effective in controlling pain, they are also highly addictive. In some cases, the person who is prescribed the medication becomes addicted and in other cases, someone else accesses unused pills. Prescribing practices and disposal of unused medications can both impact access to opioids.

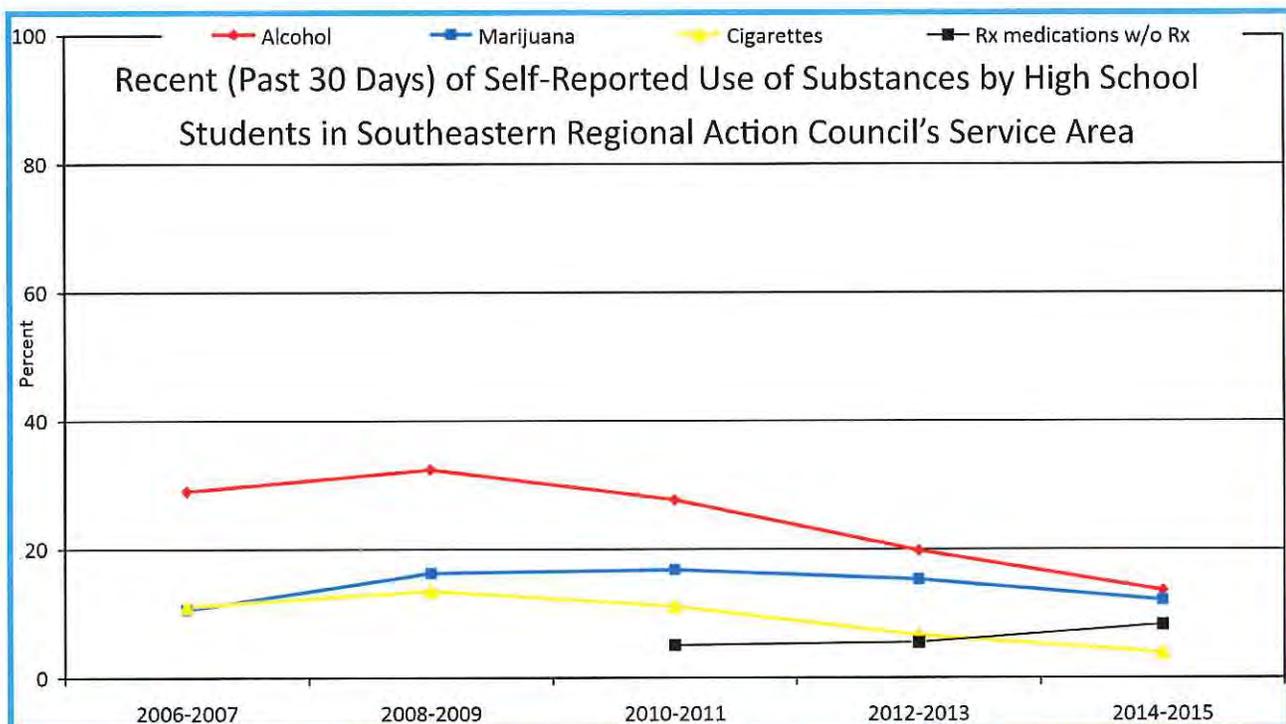

Preventing substance use among youth is seen as particularly important, both in order to prevent illness and injury among teens and to develop healthy habits that will decrease the likelihood of misusing alcohol or drugs as an adult. Across the region, lifetime and recent use of drugs is on par with or lower than U.S. rates. Evidence shows that when youth perceive substances to be harmful, they are less likely to use them. Use of alcohol and tobacco has decreased since 2008, which is associated with a simultaneous increase in the perception of harm of those substances.

Marijuana use by teens has been somewhat steady following an increase between 2006 and 2008. The reported perception of harm of marijuana has been decreasing, possibly a reflection of the growing number of places across the country that have legalized either medical or recreational use.

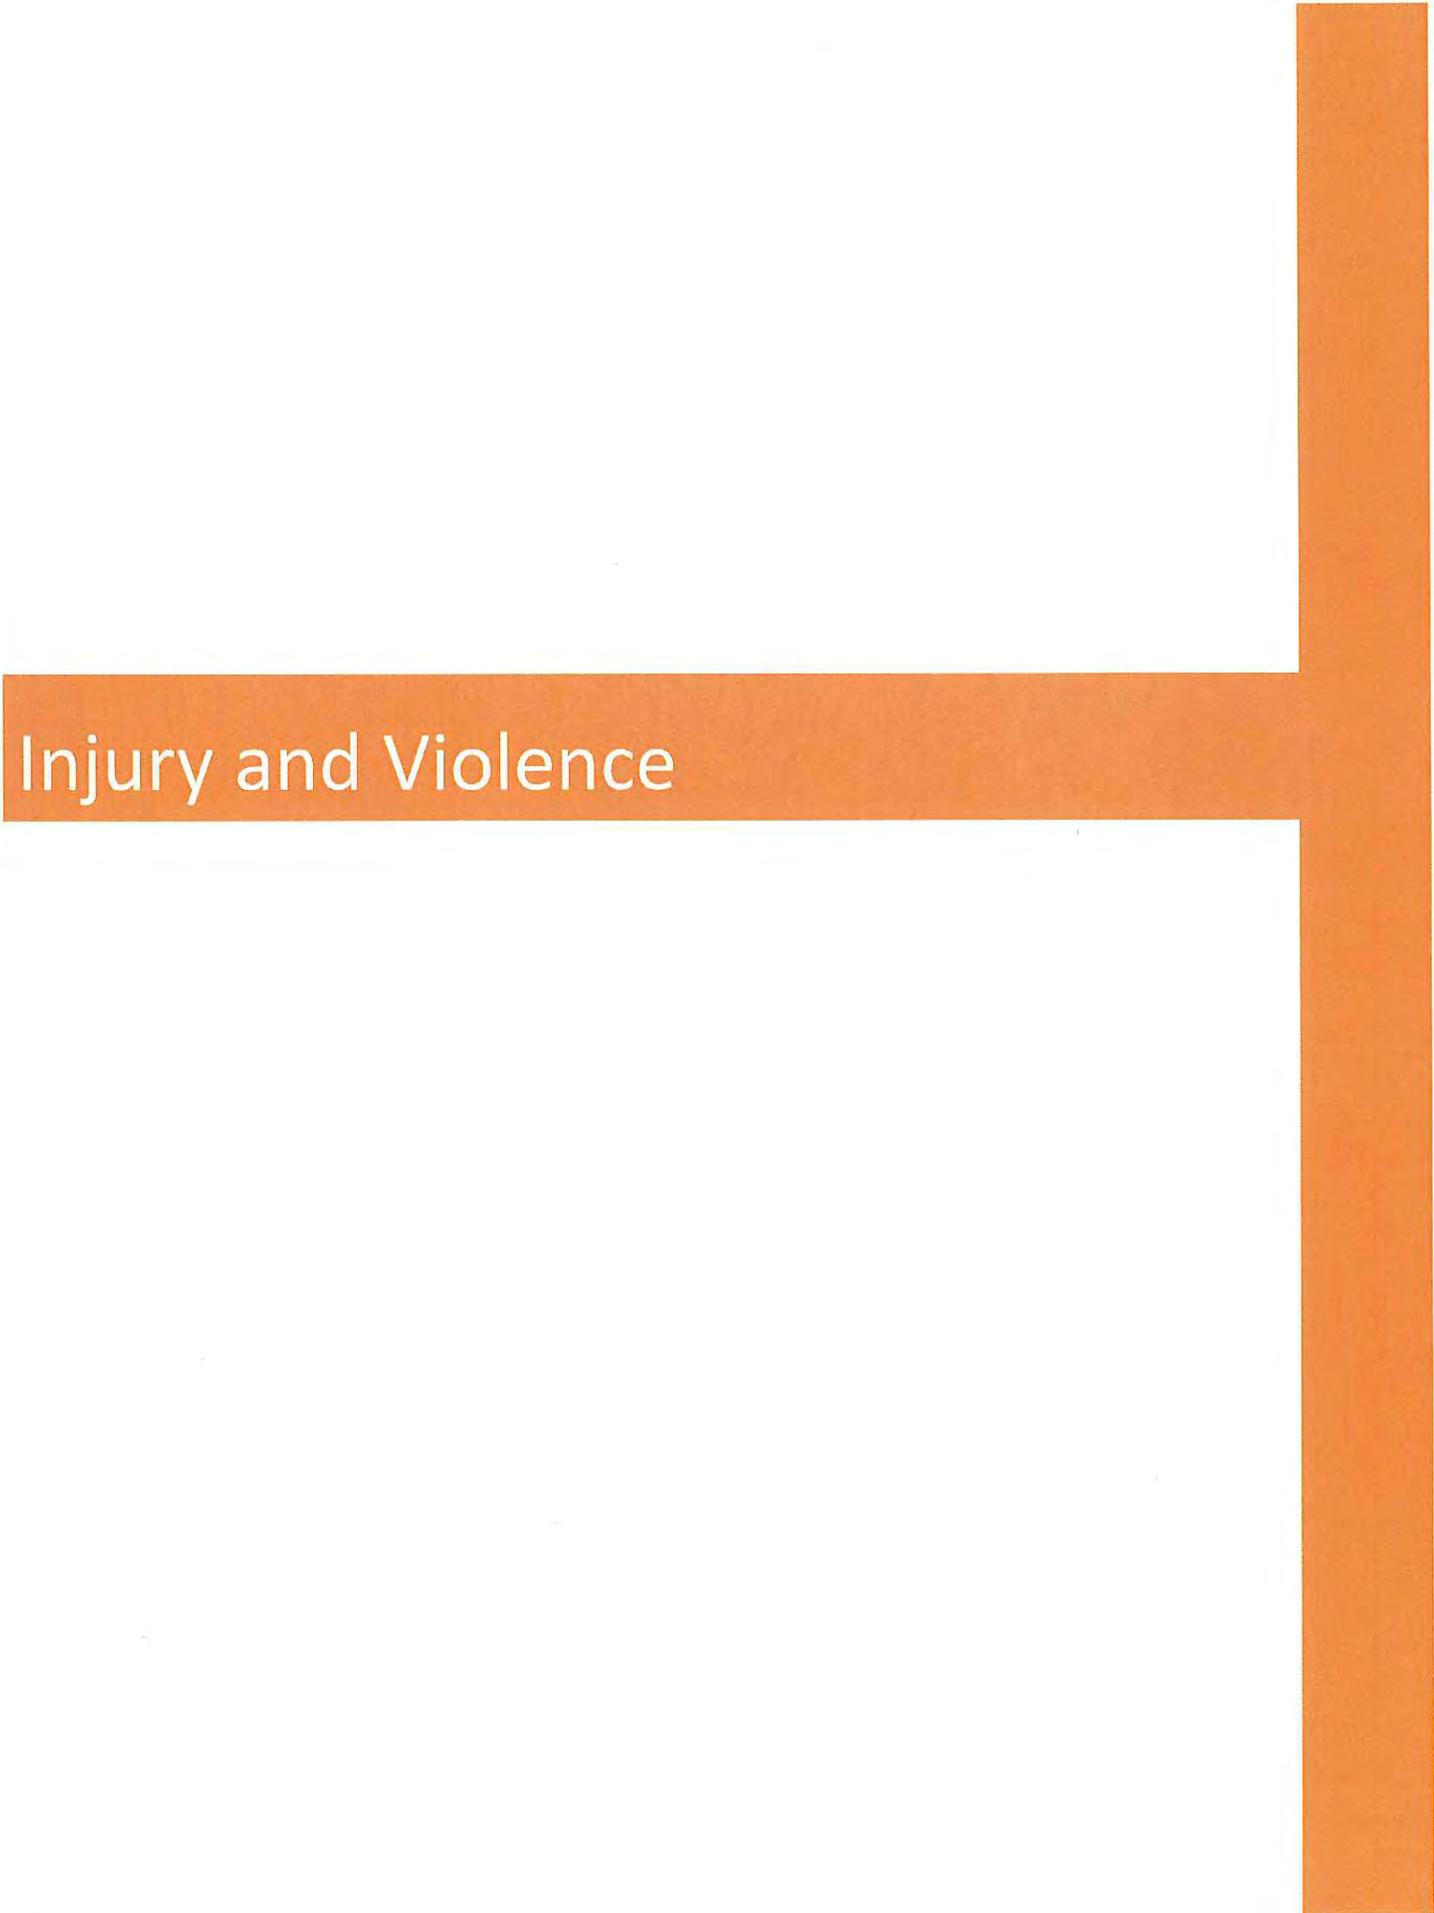

There is a troubling increase in the reported misuse of prescription drugs by teens in the region. This trend is worrisome as the most commonly misused prescription drugs are opioid pain

Substance Abuse Among Youth

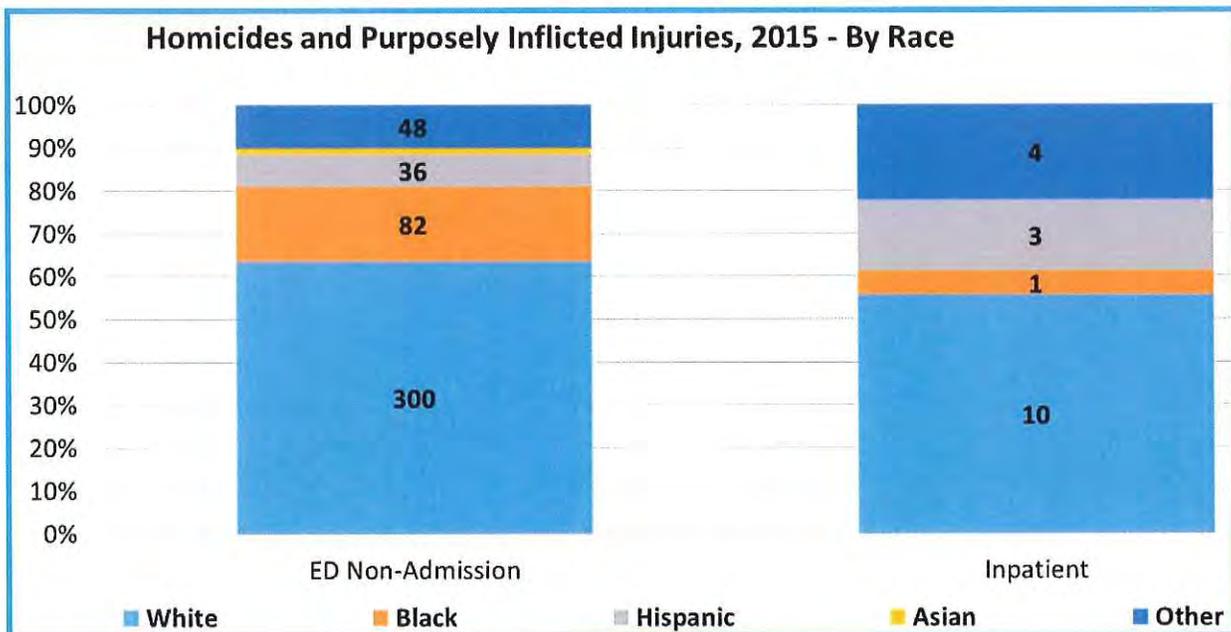

relievers, which are highly addictive. Studies show that addiction to opioid prescription drugs can lead to heroin use, another opioid which can be less expensive than illegally purchased prescription drugs.

Source: SERAC

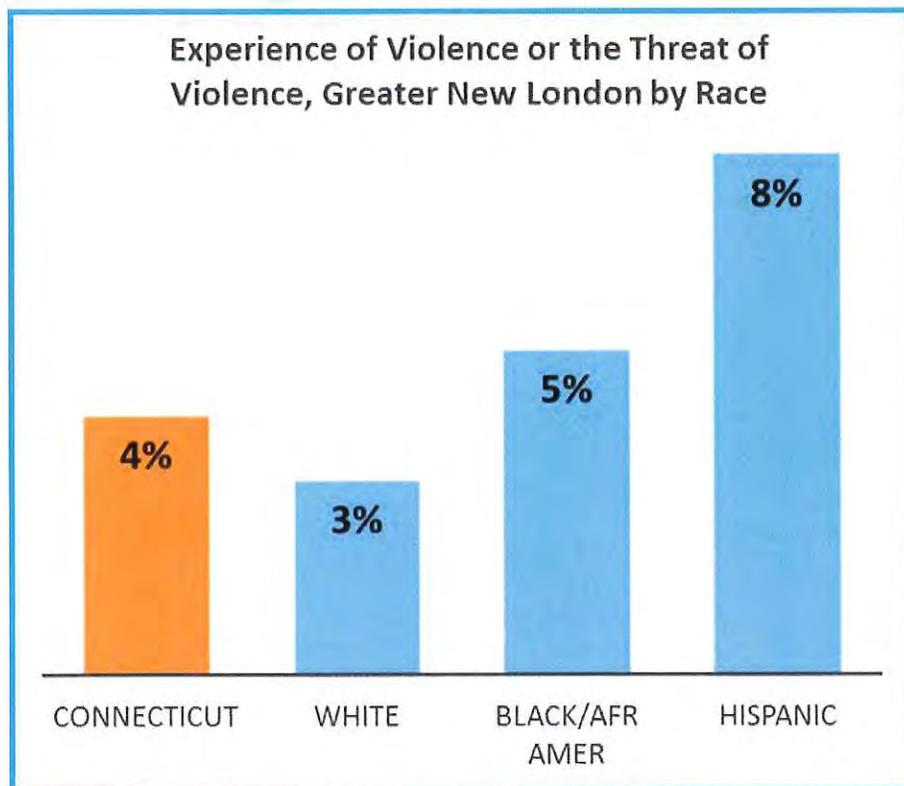

Injury and Violence

Source: CT Hospital Association

Racial disparities are evident in both the hospital encounters for violence and the reported experience of respondents to the Wellbeing Survey. While Blacks account for 6% of the Greater New London population, they made up 17% of the ED encounters and 22% of

Violence

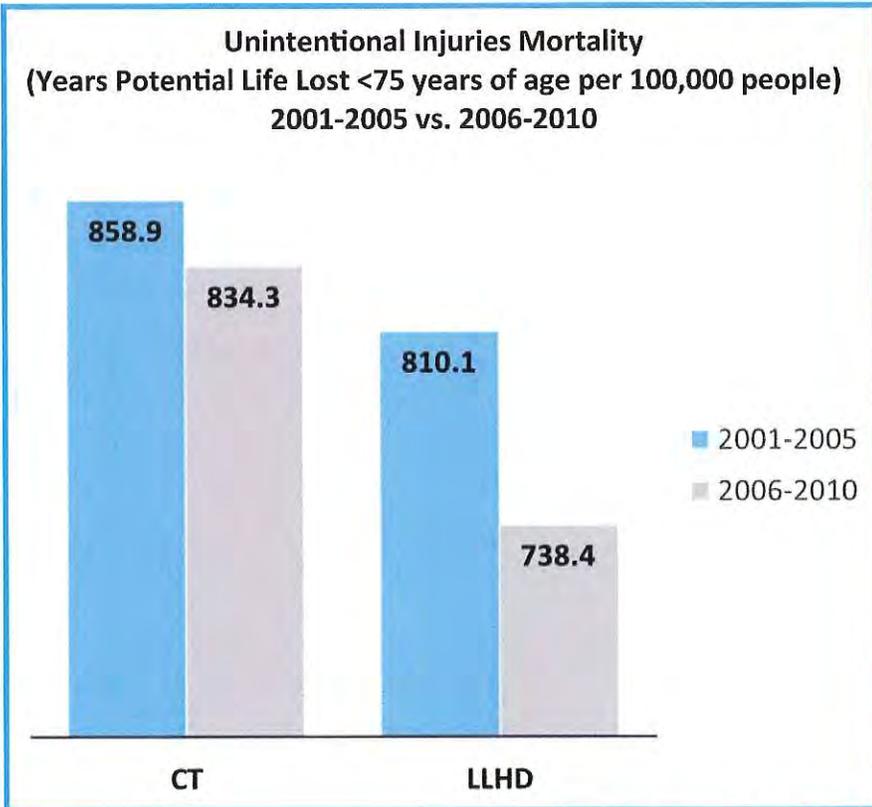

hospital admissions for homicides and purposely inflicted injuries. Hispanics reported the experience or threat of violence at double the overall rate.

Teen focus group participants report feeling less safe in their neighborhoods due to increased drug activity, people being shot at, and "strange people walking around."

Source: 2015 Wellbeing Survey

While mortality from unintentional injuries overall decreased between the two five year periods 2001-2005 and 2006-2010 at both the state and local levels, mortality in Greater New London related to falls increased.

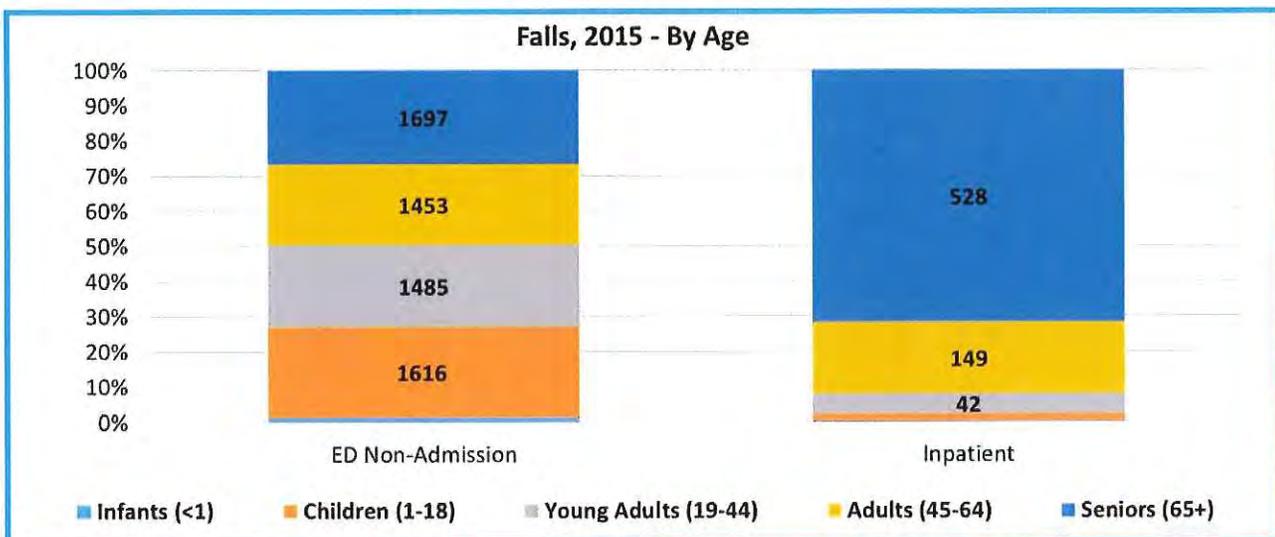

For 2015, ED non-admissions for falls for residents of Greater New London were almost evenly divided among the age groups 1-18, 19-44, 45-64 and 65+. Inpatient admissions however were

Source: CT DPH

Unintentional Injuries

heavily skewed toward the 65+ age group, demonstrating the increased likelihood of more severe complications from a fall for the elderly.

Source: CT Hospital Association

Environmental Risk Factors and Health

Before 1978, lead was used as an additive to paint used in houses. The age of the housing stock in Greater New London means that numerous homes may have layers of leaded paint on doors, windows, porches or walls. When this paint chips or peels lead dust can be ingested or inhaled. Lead can also be found in soil outside of older homes and in ceramic dishes, crystal and other items.

Children in Connecticut are required to be tested for lead at about ages one and two. In New London County, less than 20% of children receive both tests as mandated. (CT DPH)

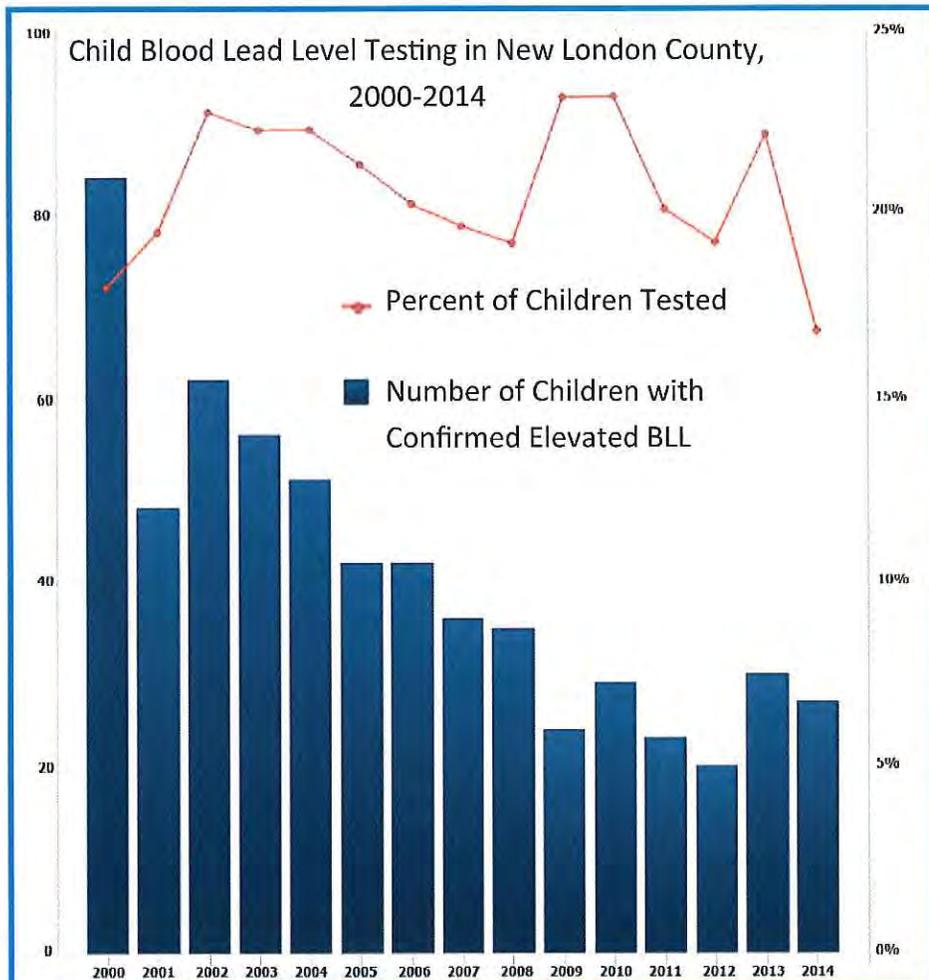

Local health departments including LLHD and Uncas Health District are charged with taking action when a child with elevated blood lead levels is identified. While the numbers of children with elevated blood lead levels in New London County have been under 40 per year for the last 10 years, lead poisoning remains a substantial public health concern as there is potential for severe and life-long health and developmental repercussions. While the Connecticut General Statutes designates certain

Lead

blood lead levels as actionable by health departments, no level of lead is safe. Lead poisoning can cause growth

problems, hearing loss, learning problems, brain and neurological damage and even death.

Extensive research has noted correlations between elevated blood lead levels and poverty and renter-occupied housing.

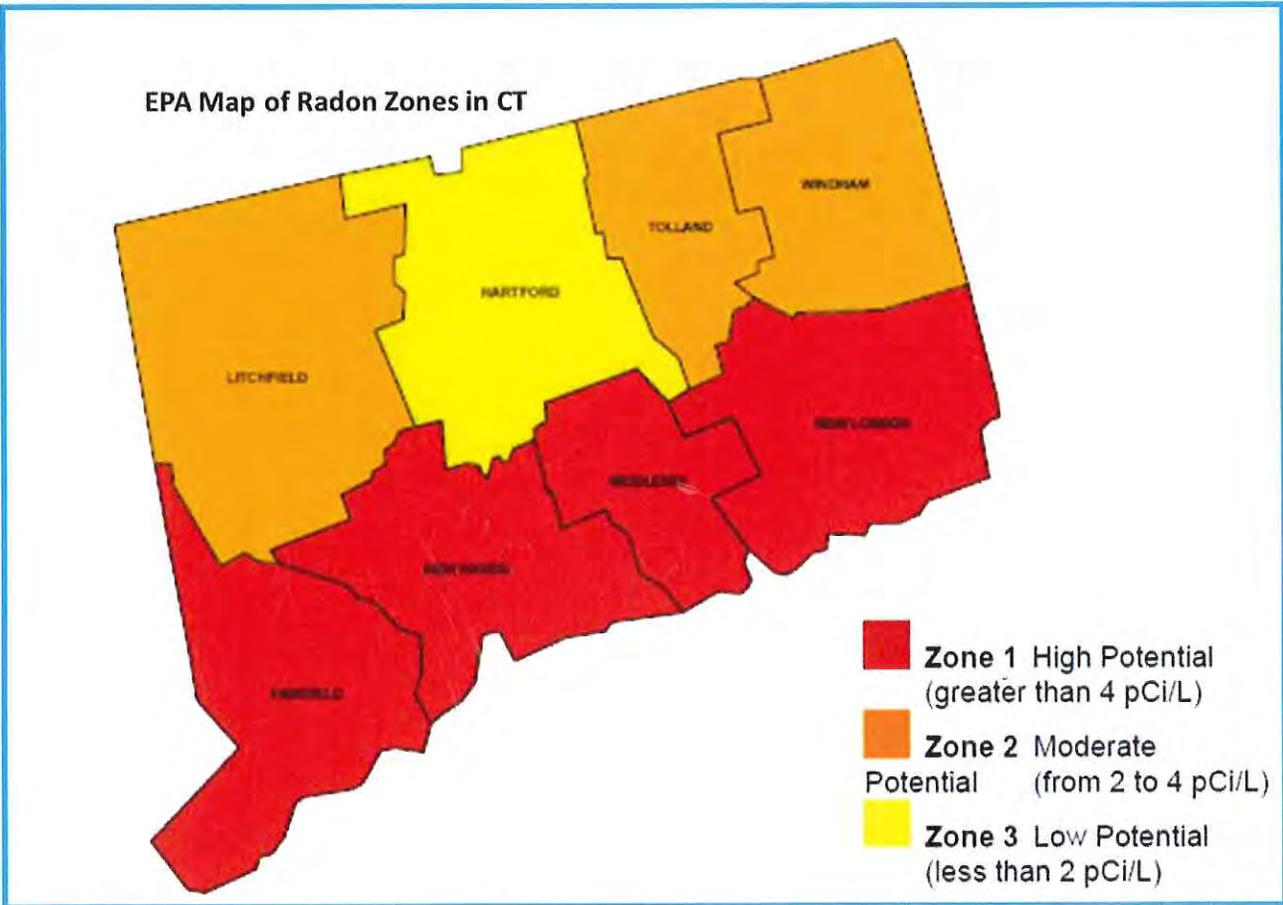

Source: CT DPH

Radon is a gas that forms when radioactive elements break down in rocks, soil and groundwater. Radon occurs naturally in some areas more than others. The EPA designates Greater New London, along with the entire southern coast of Connecticut, as a Zone 1, having high potential for radon exposure.

Radon is the second leading cause of lung cancer after cigarette smoking (CDC); the high potential for exposure in the area may be contributing to the locally high rates of lung cancer.

On the map below, each zone designation reflects the average short-term radon measurement that can be expected to be measured in a building without the implementation of radon control methods. The radon zone designation of the highest priority is Zone 1, which is the designation of New London County.

Radon

Next Steps

Understanding health and wellbeing and their contributing factors for the southeastern CT region is critical; addressing the question of how to impact identified issues is equally, if not more, important. Following the analysis of data collected through this Community Health Assessment, the Southeastern CT Health Improvement Collaborative (Collaborative) engaged in a process to prioritize issues and develop strategies to improve health and well-being in the region. The Community Health Improvement Plan developed by the Collaborative is a dynamic

document that serves as a roadmap for interventions going forward.

This work follows a collective impact model, one which is effective when addressing entrenched social and community issues. Collective impact begins with the idea that large-scale social change requires broad cross-sector coordination and occurs when organizations from different sectors agree to solve a specific problem. The key elements of collective impact include creating a common agenda, aligning and coordinating efforts, using common measures of success, maintaining excellent communication among partners, and facilitating through a “backbone organization.”

Collective Impact

HOW Use a Balanced Portfolio of Interventions for Greatest Impact

- Action in one area may produce positive outcomes in another.
- Start by using interventions that work across all four action areas.
- Over time, increase investment in socioeconomic factors for the greatest impact on health and well-being for all.

Future work should focus on continuing to untangle the complex interactions among socioeconomic status, physical environment, individual health behaviors and clinical care—all factors that impact health and wellbeing.

Community Health Improvement Plan

Collective Action to Create a Healthier Community

Over the course of one year, L+M Hospital (L+M) and Ledge Light Health District (LLHD) worked with the community partners on the SECT Health Improvement Collaborative (Collaborative) to collect and analyze the local health data presented in the Community Health Assessment (CHA) which accompanies this Community Health Improvement Plan (CHIP). The CHA examined leading health indicators in eight domains: social determinants of health; health systems and access to care, chronic disease, infectious disease, maternal and infant health, mental health and substance abuse, injury and violence, and environmental risk factors and health. The indicators explored were limited to those for which there were local data available. As a result of very limited local population health data on children, the CHA is predominately focused on the health status of adults in the community. The CHA brought to light certain areas of concern, where statistical analysis documented a disparate burden of disease, illness, injury, social or economic condition or limitation in healthcare access. While the work to produce the CHA and understand health and well-being and their contributing factors was crucial, addressing the question of how to impact identified issues is equally, if not more, important. This document identifies the health issues selected by the Collaborative for immediate action and objectives and strategies for each.

It is important to note that this Community Health Improvement plan is a dynamic “living document”. In the absence of unlimited funding, people resources and influence in social and economic systems, it was necessary to “start some where” and the prioritization process identified in this document helped the Collaborative identify the starting point. Future work will focus on continuing to untangle the complex interactions among the socioeconomic status, physical environment, individual health behaviors and clinical care factors that impact health and well-being as we seek to better understand the priority issues. The CHIP will continue to evolve and reflect that changing understanding as well as new partners and strategies that join the effort.

For questions about this plan or to find out more about the Southeastern Connecticut Health Improvement Collaborative, please contact the leadership team:

Laurel Holmes, MSW, Director of Community Partnerships + Population Health, L+M Healthcare
lholmes@lmhosp.org/860.271.4698

Russell Melmed, MPH, Supervisor Health Education and Community Outreach and Epidemiologist, Ledge Light Health District
rmelmed@llhd.org/860.448.4882, ext. 311

Jennifer Muggeo, MPH, Supervisor Finance and Administration and Special Projects in Population Health, Ledge Light Health District
jmuggeo@llhd.org/860.448.4882, ext. 300

Following the completion of the CHA, the Collaborative engaged in a process to prioritize issues and develop strategies to improve health and well-being in the region. The prioritization process included several rounds of review, discussion and group prioritization exercises:

- As the CHA was being edited and finalized, the leadership team from L+M and LLHD identified 31 indicators from the eight domains on which the region or a group within the region was an outlier. Efforts were taken to define the indicators as specifically as possible and to identify where certain groups were experiencing disparate health outcomes in the community. The 31 indicators are listed as Appendix A.
- In May 2016, 35 community partners (listed in Appendix B) participated in a data review and prioritization process using an objective scoring tool (attached as Appendix C), focused on these 31 indicators. The tool provided a frame for each participant to independently score each indicator on relevance (“how important is the issue?”), impact (“what do we get out of addressing it?”), and feasibility (“can we do it?”). The indicators were ranked according to their overall score—both within their domains and within the complete list.
- The leadership team then took effort to group the eight domains into four categories: social determinants/health systems; chronic disease; maternal-child health/infectious disease/environmental risk; and mental health/substance abuse/injuries and violence. At the June meeting of the Collaborative, members voted by selecting their top three indicators in each category. Following the meeting, members were given another opportunity to vote for their top twelve indicators, this time not categorized.

In addition to these group exercises by the Collaborative, input was solicited from the residents who had participated in the CHA focus groups, the community at large through the LLHD website, the Directors of Health for LLHD and Uncas Health District, and the ACHIEVE New London Collaborative (a group focused on chronic disease prevention). All told, over 65 individuals, presenting a broad range of perspectives, participated in the prioritization work.

Throughout all these prioritization exercises and discussions, five indicators consistently rose to the top of the list. The leadership team grouped them under three areas of focus and presented them to the Collaborative for input and approval:

- Improve the conditions that support mental wellbeing and reduce substance use. Indicators:
 - ⇒ opioid use
 - ⇒ anxiety/depression among minorities
- Support and nurture healthy lifestyles. Indicator:
 - ⇒ contributing factors to diabetes
- Ensure access to care. Indicators:
 - ⇒ prenatal care and related birth outcomes
 - ⇒ access to care for the low-income population

Subsequent meetings of the Collaborative included analysis of strengths, weaknesses, opportunities and threats in the region for each area of focus followed by the definition of goals and objectives, the creation of strategies, and the development of other plan elements. The resulting CHIP is a dynamic document that serves as a roadmap for interventions going forward.

This work follows a collective impact model, one which is effective when addressing entrenched social and community issues. Collective impact begins with the idea that large-scale social change requires broad cross-sector coordination and occurs when organizations from different sectors agree to solve a specific social problem. The key elements of collective impact include creating and following a common agenda, aligning and coordinating efforts to ensure that they are mutually reinforcing, using common measures of success, maintaining excellent communication among partners, and facilitating through a “backbone organization.” The Collaborative shares the responsibility to ensure that the strategies identified are implemented and that impact is measured. It can work to build capacity of existing efforts on a particular issue or take leadership on issues not being addressed. A tracking tool will be developed in order to enable the Collaborative to monitor progress on prioritized issues. The Collaborative leadership team will maintain transparency in all activities, communicate regularly with the Collaborative, and facilitate the ongoing efforts of the group.

Throughout the work of the Collaborative to date and going forward, the group has operated within values that include:

- Intentional creation of a culture of trust
- Authenticity in seeking community involvement
- Inclusiveness
- Respectfulness of cultural considerations and differences
- Social justice

At the June meeting of the Collaborative, members began discussing a vision statement that would reflect these values as well as some of the common themes that emerged from the CHA when residents were asked about their visions of a healthy community. As the work continues, the resulting draft vision statement will be refined and have an accompanying mission statement:

Southeastern Connecticut is a community healthy in body and mind that promotes access, healthy equity, social justice, inclusiveness and opportunities for all!

Priority Area: Mental Well-being and Substance Abuse

Priority Area and Indicators

Improve the conditions that support mental wellbeing and reduce substance use.

Indicators: Opioid Use and Anxiety/Depression among Minorities

Goals

Objectives

Ensure systems are in place to support mental and emotional wellbeing in our community

By January 2018, better understand the characteristics of people living with opioid addiction in order to inform prevention activities.

By January 2018 identify and understand local disparities related to anxiety and depression and take concrete action to improve local mental health systems of care.

Objective 1

By January 2018, better understand the characteristics of people living with opioid addiction in order to inform prevention activities.

Community Needs	Populations at Risk/ Disparities	Root Causes
<p>In 2015, alcohol and substance abuse was the 5th most prevalent condition among hospitalization (inpatient and ED) among area residents.</p>	<p>All residents</p>	<p>trauma, frontal lobe development, experimentation, family stressors, mental health issues, ready access to Rx opioids, vulnerable subpopulations (to be identified)</p>
<p>ED encounters at L+M for opioid abuse more than doubled between 2009 and 2014.</p>		
Existing Community Assets		People to Bring to the Table
<p>various community coalitions including community prevention coalitions, first responders, municipal leaders, social service agencies, healthcare/treatment providers, SERAC, LLHD</p>		<p>entities coordinating the various community efforts, MPH students to contribute to research, first line providers for research collaboration</p>

Objective 2

By January 2018 identify and understand local disparities related to anxiety and depression and take concrete action to improve local mental health systems of care.

Community Needs	Populations at Risk/ Disparities	Root Causes
Substantially fewer people earning less than \$30K report trusting people in their neighborhood	Low income residents	poverty, lack of culturally sensitive services, transportation, social isolation, immigration/newcomer issues, emotional stressors, stigma, trauma
Hispanics were much more likely than Whites or Blacks to report depression, hopelessness, and/or anxiety	Hispanics	
Medicaid participants are disproportionately represented-at twice the rate-among residents with ED Non-Admissions for suicides and self-inflicted injuries	Medicaid beneficiaries	
Existing Community Assets	People to Bring to the Table	
FQHCs, private providers, L+M/LMMG, Southeastern Mental Health Authority, Sound Community Services	Hispanic provider group through Hispanic Alliance	

Priority Area: Healthy Lifestyles

Priority Area and Indicators

Support and nurture healthy lifestyles

Indicators: Contributing factors to diabetes

Goals

Objectives

Increase healthy food consumption and physical activity—both contributing factors to diabetes, to reduce incidence, particularly among minority populations

By January 2018, identify policy/systems change opportunities and take concrete action in support of healthy food consumption and increased physical activity.

By January 2018, develop a plan and implement a campaign to raise awareness of healthy lifestyles.

By January 2018, identify gaps in the system of care for people with pre-diabetes and create strategies to address those gaps.

Objective 1

By January 2018, identify policy/systems change opportunities and take concrete action in support of healthy food consumption and increased physical activity.

Objective 2

By January 2018, develop a plan and implement a campaign to raise awareness of healthy lifestyles.

Objective 3

By January 2018, identify gaps in the system of care for people with pre-diabetes and create strategies to address those gaps.

Community Needs	Populations at Risk/Disparities
59% of residents with incomes below \$30K report being food insecure	Low income residents
Higher rates of obesity among lower income populations	
42% of residents with incomes below \$30K report never exercising	
34% of residents with incomes below \$30K report having diabetes	Black/African Americans
Higher rates of obesity among Black/African American population	
13% of residents with a high school education or less report having diabetes	Residents with less than HS education

Objective 1

By January 2018, identify policy/systems change opportunities and take concrete action in support of healthy food consumption and increased physical activity.

Objective 2

By January 2018, develop a plan and implement a campaign to raise awareness of healthy lifestyles.

Objective 3

By January 2018, identify gaps in the system of care for people with pre-diabetes and create strategies to address those gaps.

Root Causes	Existing Community Assets	People to Bring to the Table
Food insecurity, inadequate nutrition education, access to safe spaces to recreate, built environment deficits, food deserts, excessive screen time	Mobile market, community gardens, farm to school programs, school food programs, summer feeding program, produce at food banks, parks and rec programs/scholarships, organized sports, public parks, NLC Food Policy Council, Gemma Moran Food Center, WIC program, Youth centers, Diabetes Prevention Programs, Joslin Diabetes Center, LLHD, L+M Hospital/LMMG, SECT Health Improvement Collaborative,	schools

Priority Area: Access to Care

Priority Area and Indicators

Ensure Access to Care

Indicators: Prenatal Care and Access to Care for Low-Income Populations

Goals	Objectives
<p>Increase access to equitable and quality health care for low income residents.</p>	<p>By January 2018, increase understanding of community needs and misalignments between local systems of care, transportation systems and other factors impacting access, and take concrete action to increase access to equitable and quality health care.</p>
<p>Ensure systems are in place to support healthy pregnancies and positive birth outcomes for all SECT residents.</p>	<p>By January 2018, identify and understand local disparities with regard to prenatal care, low birthweight, neonatal abstinence syndrome and infant mortality, and take concrete action to improve local systems that improve these birth outcomes.</p>

Objective 1

By January 2018, increase understanding of community needs and misalignments between local systems of care, transportation systems and other factors impacting access, and take concrete action to increase access to equitable and quality health care.

Community Needs	Populations at Risk/Disparities	Root Causes
31.5% of all ED visits by residents of Greater New London were for Ambulatory Care Sensitive Conditions	Medicaid beneficiaries/Blacks	Insurance status, cost, hours of available appointments, transportation, cultural and linguistic competence of providers
At-risk groups are more than twice as likely to receive care in the ED 3 or more times in the past 12 months compared to the overall population	HS or less education/<\$30k income group/Black/Hispanic	
1 in 5 residents of Greater New London delayed getting needed medical care in the past 12 months.	Low income residents	
Existing Community Assets		People to Bring to the Table
FQHCs, private providers, SECT Health Improvement Collaborative, SEAT and other transportation providers, SECOG, SECTER, SMHA		SEAT, SECOG

Objective 2

By January 2018, identify and understand local disparities with regard to prenatal care, low birthweight, neonatal abstinence syndrome and infant mortality, and take concrete action to improve local systems that improve these birth outcomes.

Community Needs	Populations at Risk/ Disparities	Root Causes
Infant mortality rate in LLHD was 7.2 per 1,000 live births in 2013.	State data suggest Blacks and Hispanics	Insurance status, lack of awareness of importance of prenatal care, lack of transportation, maternal mental health, tobacco use, nutrition, food insecurity, maternal chronic illness, pattern of avoidance of Ob/Gyn care, hiding pregnancy, chronic maternal stress
16.1% of births in LLHD did not receive adequate prenatal care in 2013.		
7.7% of births in LLHD resulted in infants of low birth weight in 2013		
There was an increase of 60% in the number of babies born at L+M Hospital with neonatal abstinence syndrome.	State data suggest Whites and Medicaid	Overprescribing/availability/affordability of opiates, limited access to alternative pain management
Existing Community Assets		People to Bring to the Table
L+M, SCADD, Sound Community Services, Private providers, FQHCs		SCADD, Private providers

Rating and Ranking Worksheet

Step 1: Rate Key Findings using Criteria

Instructions: Rate each Key Finding based on how well it meets each of the criteria provided.

Rate 1 – 10, with 1=very low and 10=very high

Add your four ratings for each key finding

Step 2:

Rank key findings

DOMAIN:	Selection Criteria			Total Score	
	Relevance <i>How important is it?</i>	Impact <i>What will we get out of it?</i>	Feasibility <i>Can We do it?</i>		
Key Findings	-Burden (magnitude, severity, economic cost, urgency) of the issue	-Effectiveness	-Community capacity		Referring to your total score numbers, rank order each of the key findings with a 1 being the key finding with the highest total score, 2 being the key finding with the second highest score, etc.
	-community concern	-Coverage	-Technical capacity		
	-focus on equity and accessibility	-Builds on or enhances current work	-Economic capacity		
		-Can move the needle and demonstrate measureable outcomes	-Political capacity/will		
			-Socio-cultural aspects		
			-Ethical aspects		
			-Can identify easy short-term wins		
				Rank order of key findings

Yale New Haven Health System and Lawrence + Memorial Corporation Independent Monitor Qualifications

October 22, 2016

Qualifications

Related experience

Independent Review Organization (IRO) and Monitor Qualifications

- Deloitte is currently serving as an IRO for a large health care system that entered into a 5 year CIA that requires the IRO to perform claim reviews at various facilities that provide hospital services. Deloitte's specialists are working with key stakeholders, including the OIG, to design a risk-based approach to the facility selection and claims review that will bring value above and beyond that of a simple random review selection.
- Deloitte served as the IRO for a stand-alone hospital in California that entered into a 3 year CIA that required the IRO to perform Claims Reviews, Cost Report Reviews and an Unallowable Cost Review. Deloitte specialists with deep experience in coding and billing were utilized to perform the claims reviews, while specialists with cost reporting and reimbursement experience were utilized to perform the cost report and unallowable cost reviews. The Claims Review included a sample of claims from the population of claims that had been submitted and reimbursed by the Medicare Program during the Reporting Period.
- Deloitte served as the IRO for a hospital that was part of a larger health system that had entered into a 3 year CIA that required the IRO to perform Claims Reviews and an Unallowable Cost Review. Specialists with certifications in inpatient medical record coding performed reviews of inpatient claims that had been billed to and paid by the Medicare Program that were included in the Discovery Samples as required by the CIA. Our work involved also included an Unallowable Cost Review performed by reimbursement and cost reporting specialists.

Related experience

Independent Review Organization (IRO) and Monitor Qualifications (continued)

- Deloitte is currently working with outside legal counsel for a physician-owned hospital in the southern United States and pursuant to a non-prosecution agreement after an investigation by the United States Department of Justice (DOJ) related to alleged violations of the Physician Self-Referral Law (Stark Law), federal and State anti-kickback laws and other anti-bribery anti-corruption (ABAC) laws and regulations. Deloitte was selected to be the ethics and compliance monitor to assess the operation of the compliance program, to conduct proactive monitoring of risk areas, and to make recommendations for improvement. To initiate the project, the Deloitte team conducted a comprehensive assessment of the existing compliance program, including the review of policies and procedures, hotline operations, training programs, and organizational structure. A detailed report was prepared and presented to the executive leadership, the governing board, and the Department of Justice. This report compared the existing compliance program to best practices for hospital compliance programs, and provided a roadmap on where the program met standards or required improvements.
- Deloitte has acted as the Independent Consultant for a Top 5 Bank as required by Consent Orders from both the Federal Reserve Board and the Office of the Comptroller of the Currency in multiple complex areas of mortgage servicing and foreclosure related activities. Activities for this engagement included: performed detailed review of loans with a foreclosure action taken over a five-year period, including reviewing millions of individual mortgage loan files; maintained high quality of work across multiple work streams with diverse U.S. and U.S. India teams; stood up a quality assurance process for the project in line with the expectations and practices required by the regulatory bodies; established a strong PMO for status reporting, metrics, and analysis as part of oversight by the regulatory bodies as well as the Bank; and, developed electronic tools/accelerators for capturing and documenting the results of the individual file reviews.

Related experience

Independent Review Organization (IRO) and Monitor Qualifications (continued)

- Deloitte has acted as the Independent Consultant for a Top 5 Student Loan Servicer as required by Consent Orders from both the Federal Deposit Insurance Corporation and the United States Department of Justice(DOJ). Engagement activities included the following: Performed predictive analytics as part of a multiple year lookback to estimate remediation related to multiple sections within the Servicemembers Civil Relief Act (SCRA); Performed detailed reviews of loans and related documents as well as court documents over multiple years related to multiple SCRA sections; stood up a quality assurance process; established a strong PMO; provided a detailed report as required within the consent order with the results of both the estimated remediation as well as the results of the detailed loan review based on regulatory criteria and direction.
- Deloitte Acted as the Independent Consultant for a Top 5 Bank as required by Consent Order and Judgement from the US Department of Justice (DOJ). Engagement activities included the following: Executed a retrospective review on qualifying military personnel in accordance with § 3937 of the federal SCRA; developed tools which utilized financial data at the transactional level to assess loan attributes, including payment and fees data, to calculate preliminary remediation amounts resulting from misapplied or missing benefits payable to borrowers under the SCRA; performed manual document assessment for select sub-set of loans identified through a data driven waterfall approach to reduce the number of manual touches; designed and executed quality assurance procedures; facilitated monthly meetings between Bank and US DOJ; provided a detailed report as required by the consent order along with full loan information used in the assessment using custom built databases; trained Bank and DOJ on how to utilize the custom built databases.
