| TOTAL | 18266 | 427 |

Sources: Connecticut Department of Public Health, Office of Health Care Access (OHCA) Inpatient Discharge Database System and Connecticut Hospital Association (CHA)/CHIME Emergency Room Database System

Please take note of the following:

0 = data not available: emergency room data was not collected / inpatient discharge data is not available.

Fiscal Year: October 1st through September 30th.

For reports relating to inpatient discharge data, OHCA collects data from acute care general hospitals only.

From 1999 to current FY, ICD-9-CM diagnosis codes: 800 through 999.99 (defines the nature of the injury) are used as primary diagnosis codes. The following are secondary diagnosis codes: E849.1, E919.0, and E906.8.

From 1998 and prior years, Farming/Forestry injury codes were used as primary or secondary diagnosis codes.

Farming/Forestry related injury codes listed in this report have not been replaced by an equivalent ICD-9-CM code since 1991.
