Total	806	167

Sources: Connecticut Department of Public Health, Office of Health Care Access (OHCA) Inpatient Discharge Database System and Connecticut Hospital Association (CHA)/CHIME Emergency Room Database System

Please take note of the following:

0 = data not available: emergency room data was not collected / inpatient discharge data is not available.

Entries that are less than six have been replaced with "<6" to ensure patient confidentiality.

Fireworks injury is defined by ICD-9-CM primary diagnosis code between 800 and 999.99 with ICD-9-CM code E923.0 as a secondary diagnosis.

ICD-9-CM E923.0 **has not** been replaced by an equivalent ICD-9-CM code for FYs 1991 through 2013.

Fiscal Year: October 1st through September 30th.

For reports relating to inpatient discharge data, OHCA collects data from acute care general hospitals only.
