Section 1 - Executive Summary

The Office of Health Strategy ("OHS") was created in 2017 as a bipartisan effort of the Connecticut General Assembly to advance high-quality, affordable, and accessible healthcare for all residents. The legislation re-organized existing state resources into one body, uniting health policymaking and advancing healthcare reform initiatives that will drive down healthcare costs, close Connecticut's deeply entrenched racial, economic, and gender health disparities, and undertake technology-driven modernization efforts throughout the system.

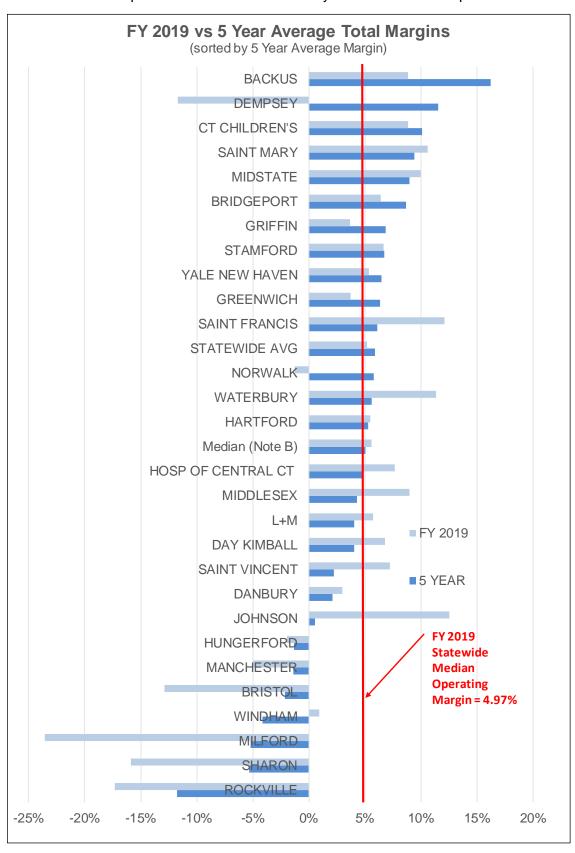

The mission of the Office of Health Strategy is to implement comprehensive, data driven strategies that promote equal access to high-quality health care, control costs, and ensure better health outcomes for all Connecticut residents. OHS is responsible for the collection, analysis, and dissemination of acute care hospital financial information. This report provides information related to the financial stability of Connecticut's acute care hospitals, as mandated by Connecticut General Statutes Section (CGS §) 19a-670. The report highlights Connecticut's statewide hospital trends and includes individual hospital profiles of financial performance. It is intended to provide information that will enhance knowledge of the financial status of Connecticut's hospitals.

The report identifies these key findings and trends:

- In Federal Fiscal Year ("FY") 2019, the statewide total gain from patient care and related sources (or operating revenue) for Connecticut ("CT") hospitals was \$611.9 million, an increase of 12% from the previous year.
- Hospitals statewide earned \$70.7 million from sources unrelated to patient care, (or non-operating revenue) such as revenue from investments, unrealized gains on investment holdings, and gains from affiliates or joint ventures. This was a 65% decrease from the \$202.6 million earned in FY 2018 which was due in part to fluctuations in the financial markets.
- Seventy-one percent of hospitals (20 of 28) achieved a positive total margin which includes gains from patient care, and non-operating revenues.
- The statewide total margin was 5.15% in FY 2019, a drop from 5.92% in the previous year. The five-year average total margin was 5.89%.
- Seven hospitals had negative five-year average total margins in the FY 2015 to FY 2019 period;
 the same number of hospitals as the FY 2014 to FY 2018 period.
- Total hospital net assets / stockholder equity decreased by \$53 million to \$7.3 billion in FY 2019.
- Statewide hospital uncompensated care charges totaled \$806 million in FY 2019, a \$41 million or 5.3% increase from the prior year.
- Bad debts accounted for 52% of uncompensated care charges in FY 2019 while charity care accounted for 48%; a change from FY 2018 when bad debt accounted for 49% and charity care accounted for 51%.

Executive Summary

Noted below is a chart depicting both the FY 2019 total margin and five-year total margin for all the hospitals. The chart is also provided in the Financial Analysis section of this report.

Section 2 - Financial Analysis

Introduction

Connecticut state statutes and regulations¹ require each short-term acute care general or children's hospital, whether structured as for-profit, not-for-profit, or state-owned, to submit financial and statistical information to OHS annually based on the previous federal fiscal year (October 1st through September 30th). Hospital audited financial statements, which include balance sheet and statement of operations information, are a primary verifying source of information in this report. OHS also uses data and information filed each year by hospitals in their Annual Report and Twelve-Month Actual submissions, such as utilization statistics, uncompensated care data, and legal charts of corporate structure. Many of the filings noted here are available in the Hospital-Reporting-System Portal which can be accessed from the OHS website.

The report highlights Connecticut's statewide hospital trends, includes individual hospital profiles and hospital system profiles of financial performance, and is intended to provide information that will enhance knowledge of the financial status of Connecticut's hospitals. While there are numerous financial and operating indicators that provide a means to measure hospital performance, this report focuses primarily on measures involving profitability, cost data, liquidity, solvency, net assets, discharges by payer, and uncompensated care, which are considered strong indicators of the hospitals' financial and operating strength.²

Readers should note that when filing the FY 2019 data,³ some FY 2018 financial and statistical data elements reported in a previous filing year may have been revised or restated by the hospitals during the FY 2019 filing process. This updated information is included in this publication to improve reporting accuracy and comparability between FY 2018 and FY 2019 data. Additionally, beginning this year, OHS calculated and provided the Average Age of Plant for hospitals for all years in this report.

OHS presents key findings related to the hospital and hospital system financial performance for FY 2019 by the following categories:

- Individual Hospital Financial Performance
- Five-Year Financial Performance
- Uncompensated Care
- Health System Financial Performance

¹ Sections 19a-644 and 19a-676, C.G.S., and Section 19a-643-206 of the Regulations of Connecticut state agencies.

² OHS used OPTUM's *Almanac of Hospital Financial & Operating Indicators, A Comprehensive Benchmark of the Nation's Hospitals*, as a source for calculating most financial ratios.

³ For the purpose of filing fiscal year end results with OHS, Connecticut's acute care hospitals' FY 2019 began on October 1, 2018 and ended on September 30, 2019.

Individual Hospital Financial Performance

Table 1 shows a summary of statewide hospital revenues and expenses over the last four fiscal years. Details by hospital can be found in Appendix H. Key findings are listed below.

Revenues & Expenses

- Statewide Net Patient Revenue ("NPR") was approximately \$12.4 billion and accounted for 94% of operating revenues.
- NPR increased by 6.3% (\$734 million) over the previous year due to increased hospital payments (**Figure 4**).
- Operating expenses rose 5.8% to \$12.6 billion from the previous year due to increases in salaries and wages (3%), supplies and drugs (11%), and other operating expenses (9%).
- Nearly half (49%) of statewide hospital net revenue continued to be generated from the governmental payers: Medicare, Medicaid, CHAMPUS/TRICARE, and Medical Assistance though the percentage of governmental payments vary by institution.
- Non-operating revenue decreased 65% due to fluctuations in the financial markets.

Table 1

STATEWIDE HOSPITALS				
STATEMENT OF OPERATIONS DATA	2016	2017	2018	2019
Net Patient Revenue	\$10,666,761,080	\$10,881,006,478	\$11,691,395,084	\$12,425,821,610
Other Operating Revenue	\$617,316,728	\$653,745,437	\$721,173,652	\$746,676,576
Total Operating Revenue	\$11,284,077,808	\$11,534,751,915	\$12,412,568,736	\$13,172,498,186
Total Operating Expenses	\$10,935,989,500	\$11,148,783,536	\$11,867,696,569	\$12,560,614,613
Income/(Loss) from Operations	\$348,088,308	\$385,968,379	\$544,872,167	\$611,883,573
Non-Operating Revenue	\$515,712,373	\$459,624,212	\$202,563,812	\$70,720,228
Excess/(Deficiency) of Revenue over Expenses	\$863,800,681	\$845,592,591	\$747,435,979	\$682,603,801

Source: Hospital Audited Financial Statements

Figure 1 shows the growth in statewide hospital total operating revenues and expenses from FY 2016 to FY 2019. Since FY 2017, the growth in statewide revenues continued to slightly outpace that of expenses.

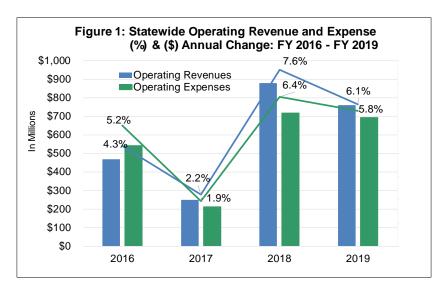

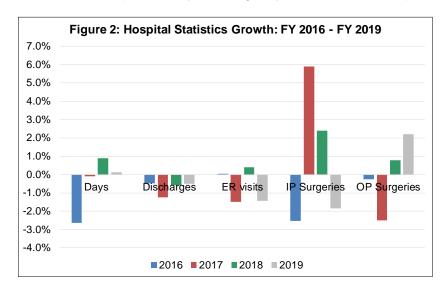

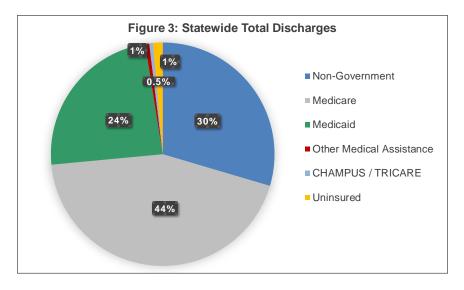

Figure 2 shows the growth trends for hospital patient days, discharges, emergency room (ER) visits, and surgeries for FY 2016 to FY 2019. Statewide discharges remained the same, outpatient surgeries increased while patient days, emergency room visits, and inpatient surgeries declined in FY 2019.

A summary of statewide discharges by payer type is presented in **Figure 3**. The majority of discharges (69%) were covered by government sponsored health plans (Medicare, Medicaid, Other Medical Assistance, and CHAMPUS/TRICARE).

Appendix Q of this report provides further hospital utilization statistics for FY 2019. For more detailed utilization data, refer to the publication entitled "<u>Facilities-and-Services-Plan-2018 Supplement</u>" released by OHS in April 2019, which contains a comprehensive look at the utilization of services in Connecticut's acute care hospitals.

Figure 4 shows the sources of the increase in statewide hospital revenues in FY 2019 by major payer categories.

- Non-government, Medicare, and Medicaid payments each increased by over \$100 million or more statewide with the largest increases in Non-Government (\$419 million) and Medicare (\$250 million).
- Medicaid payments increased by almost 9%, proportionally more than any of the other major payers. The increase was due to improved payments to most hospitals (see Appendix M).⁴

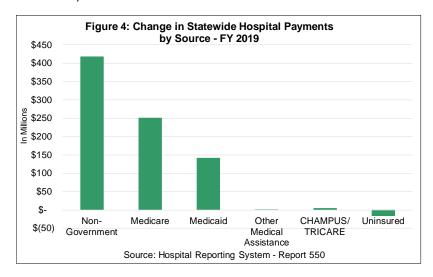

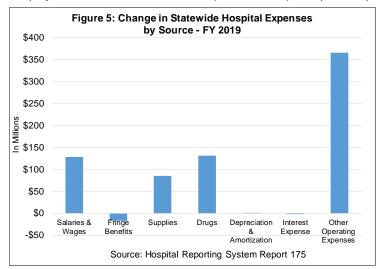

Figure 5 shows the sources of changes in hospital operating expenses in FY 2019.

- Total expenses increased by \$693 million.
- The majority of the \$693 million increase came from the categories other operating expenses (53%), supplies (12%), and drugs (19%), and salaries and wages (19%).
- Other operating expenses totaled \$4.46 billion. The largest expense increases were for physician fee contract labor (\$71 million), corporate parent / system fees (\$52 million), other

medical personnel contract labor (\$25 million) and malpractice insurance (\$24 million).

• There are 40 categories of operating expenses. The largest categories are contract labor (\$1.4 billion), corporate parent/system fees (\$716 million), purchased services (\$610) million, and general miscellaneous expense (\$382 million) which together account for 70% of the \$4.46 billion other operating expense amount.

6

⁴ As part of Governor Lamont's 2019 settlement agreement with hospitals, beginning in fiscal year 2020, Medicaid rates for most hospital services will rise by at approximately 2% annually for seven years, supplemental payments will increase, hospital user fees will decrease and certain one-time Medicaid payments will be issued this fiscal year.

Detailed hospital statement of operations, margin data, and various liquidity and solvency ratios are provided in Appendices H, I, N, and O.

Operating Gain/Loss

- Statewide operating margin or gains from patient care and related sources rose to 4.7% from 4.4% in FY 2018.
- Gains from operations increased by 12.3% to \$611.9 million from \$544.9 million in FY 2018 due to increased hospital payments (**Figure 4**).
- Twenty-one hospitals reported positive operating margins; there were 22 in the previous year.
- Total operating margins ranged from a high of 12.4% at Johnson to a low of -26.3% at Milford.
- Yale New Haven earned the most (\$151.1 million) followed by St. Francis (\$114.8 million), while the biggest losses were experienced by Dempsey (-\$77.2) and Norwalk (-\$9.8 million).
- Hospitals that improved the most financially from FY 2018 were Johnson (1.1% to 12.4%) and Midstate (4.1% to 8.5%), while margins dropped the most at Milford (-3.6% to -26.3%) and Sharon (-.6% to -16%).

Non-Operating Revenue

- Non-operating revenue, or revenue from sources unrelated to patient care such as investment revenues and gains from affiliates or joint ventures, decreased by 65% to \$70.7 million from \$202.6 million in FY 2018 due in part to fluctuations in the financial markets.
- Dempsey reported the largest amount (\$22 million) of non-operating revenue followed by Yale New Haven (\$18.4 million).
- Nine hospitals (Bristol, Day Kimball, Griffin, Manchester, Rockville, St. Vincent's, Stamford, Waterbury, and Windham) had negative non-operating revenue ranging from -\$71,000 (St. Vincent's) to -\$20.2 million (Bristol⁵). Seven hospitals had negative non-operating revenue in FY 2018.
- Non-operating revenue for Dempsey primarily represents transfers from the University of Connecticut Health Center for personnel costs and operational support, while Bristol's was the result of an \$21.6 million adjustment to settle pension obligations.

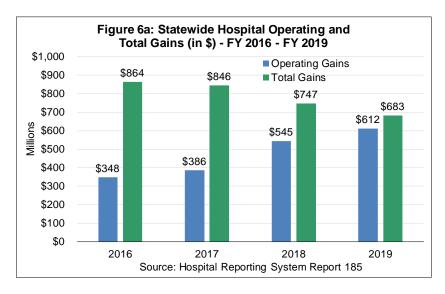

Total Gain/Loss

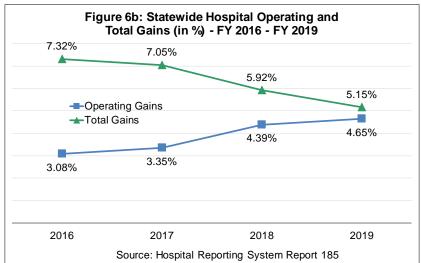

- Statewide total margin, that is operating gains/losses and non-operating revenue dropped to 5.2% from 5.9% in the previous year, due primarily to a statewide decrease in non-operating revenue (**Table 1**).
- Total revenue in excess of expenses statewide decreased 8.7% to \$682.6 million from \$747.4 million in FY 2018.
- Twenty hospitals reported positive total margins; there were 24 in the previous year.
- Total margins ranged from a high of 12.3% at Johnson to a low of -23.5% at Milford⁶.
- Yale New Haven had the highest gain (\$169.5 million) followed by St. Francis (\$116.1 million), while Dempsey (-\$55.2 million) and Bristol (-\$16.6 million) had the most significant losses.
- Hospitals that were most financially improved were Middlesex (-11.4% to 8.9%) and Johnson (1.2% to 12.5%), while margins dropped the most at Milford (-5.2% to -23.5%) and Bristol (3.6% to -12.9%).

⁵ Bristol hospital had a one-time charge for the settlement of pensions.

⁶ Milford Hospital data only represents eight months of activity.

Figures 6a and **6b** show trends in dollars (\$) and percentages (%) for statewide hospital operating and total gains for FY 2016 to FY 2019. Operating gains have been steadily increasing since FY 2016 due to increases in utilization, higher case mix indices, and improved payments to hospitals from private and Medicaid providers. Total gains (which includes non-operating revenue) have been steadily declining over the same time frame.

Five Year Financial Performance

Table 2 and **Figure 7** provide FY 2019 and five-year average total margins for Connecticut's acute care hospitals. Key findings are listed below.

Positive Margins

- Most (21) hospitals achieved positive five-year average total margins.
- Eleven hospitals sustained positive total margins in each of the five years, while eight additional hospitals had positive total margins in four of the five years. For the 11:
 - The majority (9) had a five-year average margin that exceeded the statewide average of 5.89%.
 - Most (8) had a government payer mix ratio below 51% and a case mix index above 1.45
 which means they treated more severely ill patients or improved how they document and
 code cases or both.
 - All were medium to large hospitals with each having over 150 licensed beds and over 6,000 discharges in FY 2019. Nine hospitals had over 10,000 discharges.

Negative Margins

- Seven hospitals (Bristol, Hungerford, Manchester, Milford, Rockville, Sharon, and Windham)
 had negative five-year average total margins over the period FY 2015 to FY 2019. All but Bristol
 also had a negative five-year total margin last year. Rockville had negative total margins in all
 five years while Sharon had a negative margin in four of the five years.
- In FY 2019, Bristol, Hungerford, Milford, Sharon, and Windham had lower private payment to cost ratios (below 1.49) and higher government payer mix ratios (above 56%) than most CT hospitals.
- With the exception of Manchester, the other six hospitals were small, based on bed size (below 154), and inherently had the fewest amounts of patient days (<30k), discharges (<9k), and ED visits (<36k) of all hospitals in FY 2019.

Improved Margins

- Middlesex Hospital experienced a negative total margin last year due to a one-time loss from the settlement of pensions, and subsequently improved to a positive total margin in FY 2019.
- Six hospitals (Danbury, Hospital of Central CT, Johnson, Midstate, St. Francis and Stamford) improved their operating and/or total margins by two-and one-quarter percentage points or more in FY 2019.
- In FY 2019, five hospitals (Danbury, Hospital of Central CT, Johnson, Midstate, and St. Francis) achieved the widest margins (<+3%) between their growth in revenues versus expenses compared with other hospitals.

Median (Note B)	5.0%	3.4%	5.3%	6.0%	4.7%	5.6%

Note A: Weighted average by dollar amounts. Revenue in excess of expenses/(revenue from operations+(revenue in excess of expenses - gain/loss from operations))

Note B: Middle margin in numerical order.

Note C: Sharon's FY 2015 & FY 2016 total margin is due to a one time accounting adjustment to their audited financial statements.

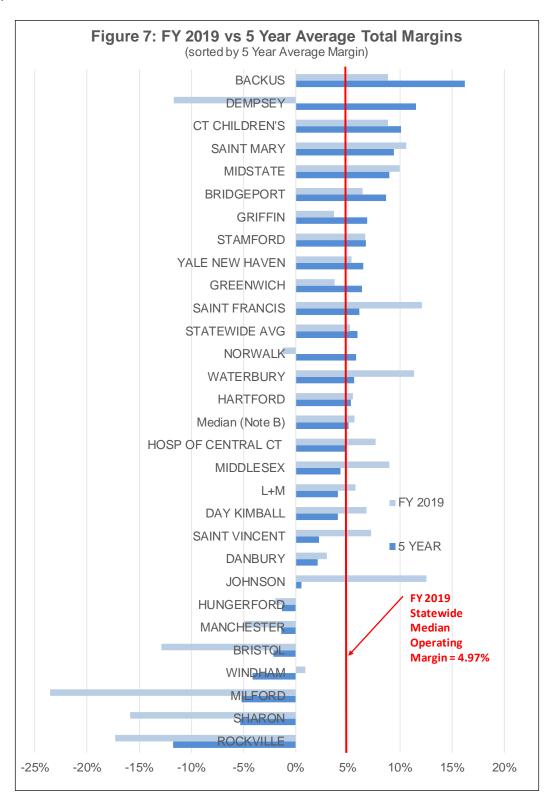

Note D: Dempsey FY 2016 total margin was due to state appropriations and transfers from UCONN Health.

Note E: Sharon's FY 2017 total margin was the result of a one time accounting adjustment for the affilation with HealthQuest.

Note F: Middlesex Hospital's FY 2018 total margin was the result of a one time adjustment for the settlement of pensions.

Note G: Bristol Hospital's FY 2019 total margin was the result of a one time adjustment for the settlement of pensions.

Figure 7 shows the five-year average total margins for hospitals along with the FY 2019 total margin for each hospital.

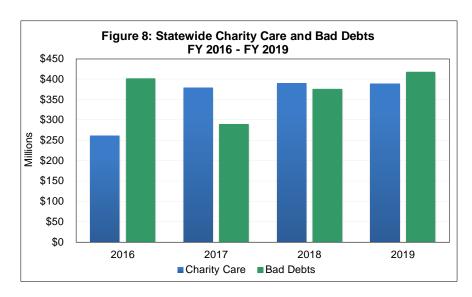

Uncompensated Care

Uncompensated Care (UC) is the sum of charity care (free care) and bad debt (unpaid charges). **Figure 8** shows the statewide trend for total charity care and bad debt charges over the last four years. Key findings are listed below.

- Statewide hospital UC charges increased by \$40.8 million or 5.3% to \$806 million in FY 2019.
 Almost two thirds (64%) of hospitals had increases in FY 2019
- Total statewide bad debt increased by \$41.5 million or 11% to \$417.2 million. Hospitals indicated some of the reasons for the increases were adjusting bad debt reserves and patients having high deductible plans⁷.
- Total statewide charity care remained somewhat stable, decreasing by \$700,000 or .20% to \$388.9 million⁸.
- Bad debt as a percentage of total hospital UC charges increased, from 49.1% last year to 51.8% in FY 2019.
- Conversely, charity care as a percentage of total UC charges decreased from 50.9% in the prior year to 48.2% in FY 2019.
- Just over half of the hospitals (15) increased the amount of charity care provided to patients.
- Bad debts increased at 21 hospitals (75%) in FY 2019⁹. Bristol (106%) and Manchester (110%) had the largest increases, while Hartford (-56%) and Milford (-54%) had the biggest decreases.
- Statewide UC costs were \$243.8 million, an increase of \$5.4 million or 2.3%, from FY 2018.
- Statewide UC costs continue to account for about 2.0% of total statewide hospital expenses.
- The majority of hospitals (17) experienced increases in UC costs, while 11 hospitals had decreases.

Appendix P of this report provides the trends for hospitals' uncompensated care data for FY 2016 to FY 2019.

⁷ Based on documents filed by hospitals as part of their Twelve-Month Filings.

⁸ Based on documents filed by hospitals as part of their Twelve-Month Filings.

⁹ Some hospitals had adjustments or changes in methodology charity care and bad debts between FY 2017 and FY 2018.

Health System Financial Performance

Hospital corporate systems include hospital parent corporations and all subsidiaries. Appendix Z provides information on the composition of all health systems¹⁰ in Connecticut. **Table 3** shows a summary of statewide health system revenues and expenses over the last four years. Detail by health system can be found in Appendix A. Key findings are listed below.

Revenues & Expenses

- Statewide net patient revenue (NPR) was approximately \$14.2 billion and accounted for 92% of operating revenues.
- NPR increased by 6.0% over the previous year.
- Operating expenses rose 5.1% to \$15.2 billion from the previous year.

Table 3

STATEWIDE HEALTH SYSTEM				
STATEMENT OF OPERATIONS DATA	2016	2017	2018	2019
Net Patient Revenue	\$12,237,407,611	\$12,399,668,156	\$13,357,943,369	\$14,162,269,812

Source: Hospital Parent Corporation Audited Financial Statements

Operating Gain/Loss

• Statewide operating margins became positive, improving to .82% from -.35% in FY 2018.

- Gains were \$126.4 million, a significant increase from the \$49.9 million loss in the previous year due mostly to large changes in Hartford HealthCare (\$77 million to \$172 million) and UCONN Health Center (-\$410 million to -\$333 million).
- Just six of 15 systems (40%) reported positive operating margins; there were ten in the previous year.
- Total operating margins ranged from a high of 6.4% at Trinity Health of New England to a low of -41.4% at UCONN Health Center.
- Yale New Haven Health Services had the largest operating gain (\$226.6 million), followed by Hartford HealthCare (\$171.8 million); while the biggest losses were at UCONN Health Center (-\$332.8 million¹¹) and Vassar Health CT (-\$13.1 million).
- Systems that improved the most financially were UCONN Health Center (-50.8% to -41.4%) and Trinity Health of New England (3.8% to 6.4%), while margins dropped the most at Vassar Health CT (-6.3% to -25.4%) and Milford Health and Medical (-13.3% to -27.8%).

¹⁰ There were 15 health systems active at the start of FY 2019. Most of the assets of Milford Health and Medical were purchased by Yale-New Haven Health Services Bridgeport Hospital in June 2019, resulting in 14 health systems at the end of FY 2019.

¹¹ Loss is due to the high costs associated with teaching and patient services.

Non-Operating Revenue

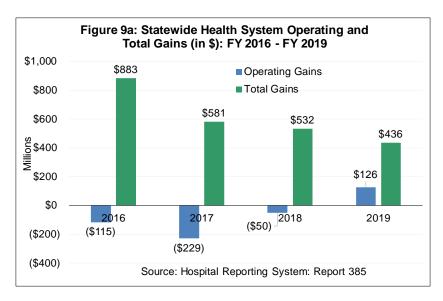

- Non-operating revenue decreased by 47% to \$309.9 million from \$582.2 million in FY 2018.
- Ten systems had positive non-operating revenue amounts in FY 2019; the same as in the previous year.
- UCONN Health Center (\$267.5 million) and Yale New Haven Health Services (\$27.7 million), had the largest non-operating revenue amounts.
- Some notable amounts that affected statewide totals were as follows: UCONN Health Center had \$263 million in state and capital appropriations and Bristol Hospital and Health Care Group had a \$22.5 million one-time charge for the settlement of pensions.

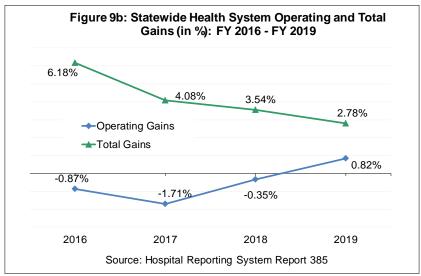

Total Gain/Loss

- Total margin statewide dropped to 2.8% from 3.5% in the previous year.
- Total revenues in excess of expenses decreased by 18.0% to \$436.2 million, from the previous year's \$532.3 million.
- Eight systems reported positive total margins; the same as in the previous year.
- Total margins ranged from a high of 6.6% at Trinity Health of New England to a low of -25.3% at Vassar Health CT.
- Yale New Haven Health Services earned the most (\$254.2 million) followed by Hartford HealthCare (\$181.4 million). The biggest system losses were at UCONN Health Center (-\$65.4 million) and Bristol Hospital and Health Care Group (-\$31.4 million).
- Systems that improved the most financially were Middlesex Health System (-13.5% to 5.5%) and Stamford (-2.4% to -.2%), while margins dropped the most at Bristol Hospital and Health Care Group (1.0% to -18.0%) and Vassar Health CT (-6.6% to -25.3%).

Detailed health system statement of operations, margin data, and various liquidity and solvency ratios are provided in Appendices A, B, F, and G.

Figures 9a and 9b show the trends for statewide health system operating and total gains and margins for FY 2016 to FY 2019. Health Systems operating gains continued to improve in FY 2019 while total gains, which includes gains from hospitals continued to decline. See **Figure 10** for the sources of gains and losses.

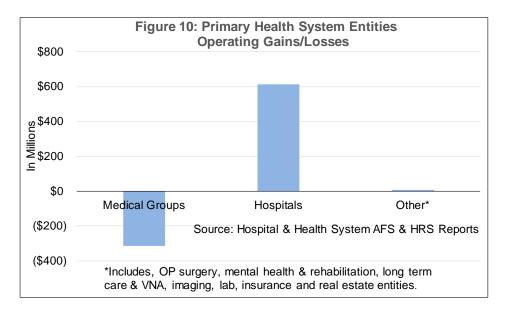

Health System Affiliates and Subsidiaries

Hospital systems include hospitals, hospital subsidiaries, and other related affiliates. **Figure 10** summarizes operating gains and losses for different types of health system entities. Additional revenue and expense data related to health systems, hospitals, and other related affiliates can be found in Appendix W. Key findings are listed below.

- Hospital operating revenues accounted for the majority (86%) of total health system operating revenues.
- System subsidiaries such as medical groups and physician practices, insurance companies, imaging and rehabilitation centers, visiting nurse associations, and real estate companies account for the remaining 14% of operating revenues.
- Medical groups and physician practice affiliates account for significant health system losses, but may also serve as a referral source for hospital-based services.
- Affiliates that had a minimal impact on operating gains include those that specialize in providing insurance, imaging, outpatient surgeries, mental health and rehabilitation, long term care and visiting nurse associations, real estate, and lab services.

New Hospital Affiliation Activity

In FY 2019 Milford Hospital joined Yale New Haven Health Services Corporation when Bridgeport Hospital purchased substantially all the assets of Milford Health and Medical.

Since the last publication of this report in September 2019, Hartford HealthCare Corporation acquired substantially all the assets of St. Vincent's Medical Center on October 1, 2019. All hospital activity in this report reflects financial reporting prior to the purchase.

A complete list of the Connecticut acute care hospitals that operate within larger systems and unaffiliated hospitals is provided in Appendix Y.

Section 3 - Hospital and Health System Data

The following sections provide an aggregate statewide profile of hospital parent corporations and hospital summary totals for financial and statistical indicators. In addition, profiles are presented for individual Connecticut acute care hospitals. The final section of this report contains detailed appendices by hospital and parent corporation as identified in the table of contents. Unless otherwise indicated, the sources of data used in these sections are the OHS Hospital Reporting System ("HRS") and the hospitals' annual filings to OHS.

In the following pages, financial measures noted in green are favorable compared to the statewide average while financial measures noted in red are unfavorable compared to the statewide average. In some cases, the 2019 amount and the statewide average show the same amount. The red and green formatting is based on additional decimal spaces that are not shown.

Statewide Health System Summary

Reported below is the total Statewide Health System statement of operations summary for FY 2016 - FY 2019, a summary of profitability margins, net assets, and selected liquidity and solvency measures.

William W. Backus Hospital

The William W. Backus Hospital is located in Norwich. In FY 2019, the Hospital generated \$20.5 million in income from operations and had \$12.6 million in non-operating revenue, resulting in an excess of revenues over expenses of \$33.1 million. Reported below is a list of various financial indicators and selected utilization measures for the Hospital. A chart indicating all of the affiliates of the Hospital's parent, Hartford HealthCare Corporation, based on OHS filings, can be found in Appendix Z.

Manchester Memorial Hospital

Cash Flow to Total Debt Ratio

Long-Term Debt to Capitalization Ratio

Manchester Memorial Hospital is located in Manchester. In FY 2019, the Hospital experienced a \$700,000 loss from operations and experienced an \$8.2 million non-operating loss, resulting in a deficiency of revenues over expenses of \$8.9 million. Reported below is a list of various financial indicators and selected utilization measures for the Hospital. A chart indicating all of the affiliates of the Hospital's parent, Prospect CT, Inc., based on OHS filings, can be found in Appendix Z.

Source: FY 2019 Audited Financial Statements data from Hospital Reporting System Reports 185 and 385.

Other Entities include amounts that are not part of the hospital financial amounts and include the financial results from medical groups and physician practices, insurance companies, imaging centers, rehabilitation entities, visiting nurse associations and real estate companies that are contained within the System umbrella.

Notes: 1. Hartford Healthcare amounts include William W. Backus Hospital, Hartford Hospital, The Hospital, Orentral CT, Midstate Memorial Hospital, Windham Community Memorial Hospital and Charlotte Hungerford.

2. Millord Health and Medical activity is from October 1, 2018 to June 8, 2019 when substantially all of the assets of Millord Healthy and Medical were acquired by Bridgeport Hospital.

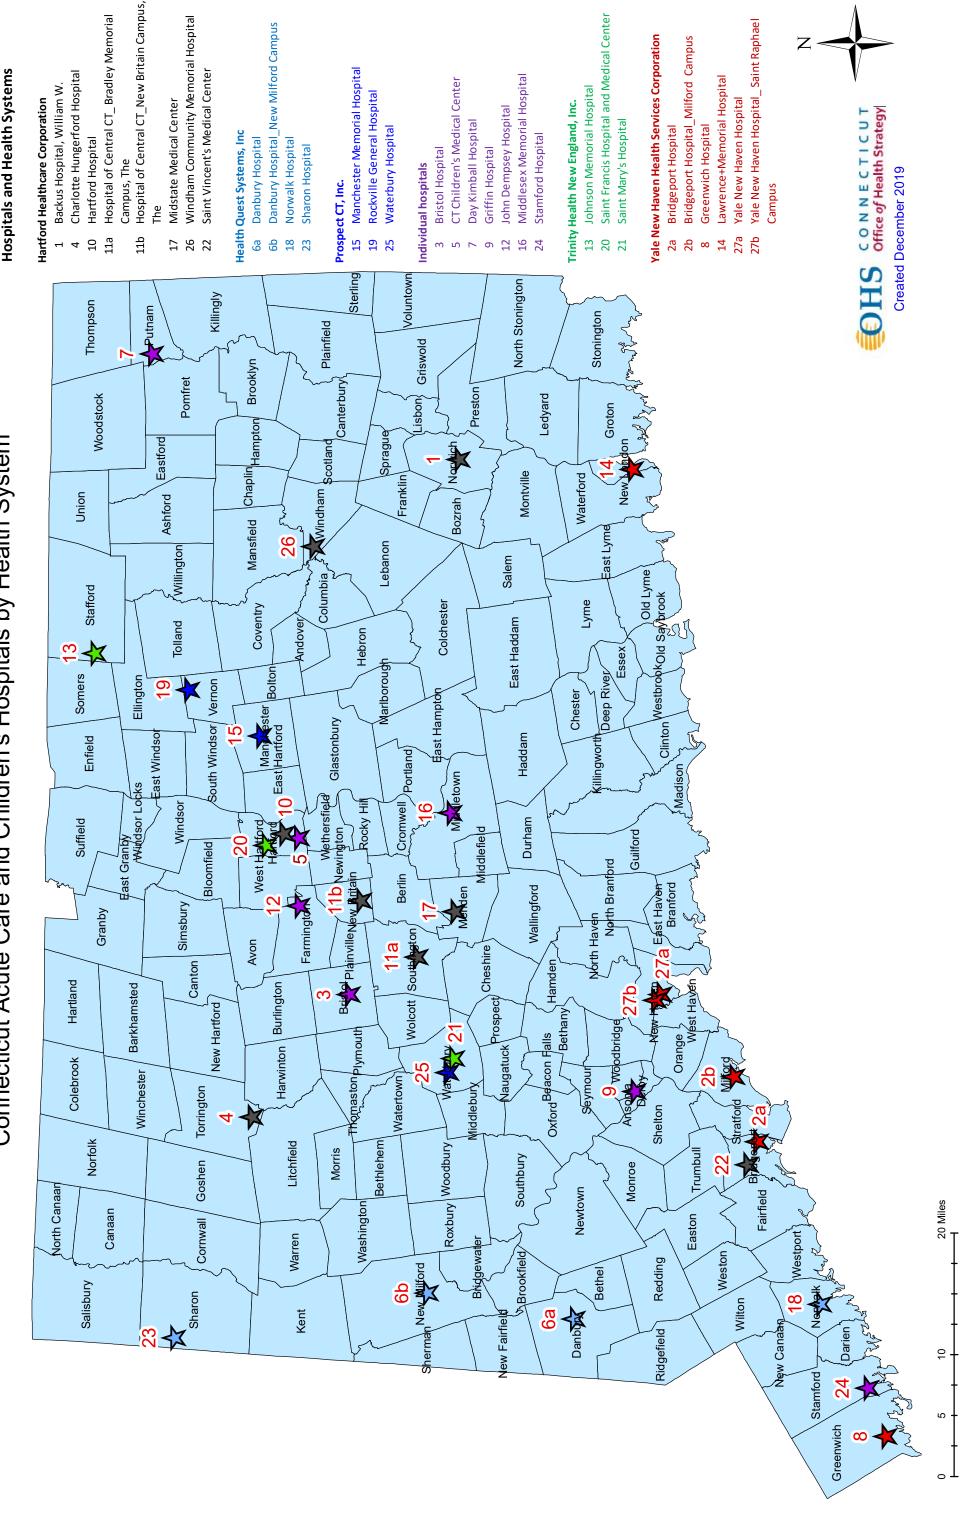

3. Prospect Health CT amounts include Manchester Memorial Hospital, Rockville General Hospital and Waterbury Hospital.

4. Trinity Health of New England amounts include Johnson Memorial Hospital. St. Francis and St. Mary's Hospital.

5. Vassar Health CT amounts are not auxilited.

6. Western CT Health Network amounts include Danbury Hospital and Nowalk Hospital. Cavenwich Hospital. As Yale New-Haven Health CS Strongard amounts include Bridgeport Hospital, Greenwich Hospital, Lawrence + Memorial Hospital and Yale-New Haven Hospital.

Appendix Z – Health System Charts of Organization

Appendix AA - Glossary of Terms

Average Payment Period: the average number of days that are required to meet current liabilities. A lower number of days is favorable, since it indicates a more favorable liquidity position.

Bad Debts: the income lost to the hospital because patients who were billed and from whom payment was expected did not pay amounts owed to the hospital for services provided. Bad debts net of recoveries will result in bad debt expense, if after reasonable collection efforts are made, the hospital determines that the accounts are uncollectible.

Case Mix Index: the arithmetic mean of the Medicare diagnosis related group case weights assigned to each inpatient discharge for a hospital during the fiscal year. The case mix index is calculated by dividing the hospital's total case mix adjusted discharges by the hospital's actual number of discharges for the fiscal year.

Cash Flow to Total Debt Ratio: an indicator of potential future debt repayment difficulty or insolvency. It is calculated by dividing excess of revenues over expenses plus depreciation by current liabilities plus long term debt. A decrease in the value of the ratio may indicate a future debt repayment problem.

Charity Care: the difference between the hospital's published charges and the amount of reimbursement received for services provided to patients from whom reimbursement was not expected. Charity care does not include bad debts, courtesy discounts, contractual allowances, self-pay discounts, and charges for health care services provided to employees.

Current Ratio: the measure of the number of dollars held in current assets per dollar of current liabilities. High values imply a good ability to pay short term obligations and low values imply a lesser ability.

Days Cash on Hand: the average number of days of cash available to pay for expenses that is maintained in cash accounts. A higher number is favorable, since it indicates a greater ability to meet outstanding obligations.

Days in Patients Accounts Receivable: the average number of days in collection that patient accounts receivables remain outstanding. A lower number is favorable, since it indicates good collection practices that result in sufficient cash flow and infrequent short-term financing.

Equity Financing Ratio: the ratio related to capital structure that indicates the percentage of net assets to total assets. A higher ratio is more favorable, since it indicates utilization of a higher level of equity and a lower level of debt financing in acquiring plant and equipment assets.

Excess / (Deficiency) of Revenue over Expenses: the difference between the sum of total operating revenue and non-operating revenue less total operating expenses that results in an excess or deficiency of total revenue.

Gross Patient Revenue – total gross patient charges for all patient services before deductions for allowances, charity care and other deductions.

Hospital Parent Corporation: the hospital's corporate holding company that controls through its governing body a hospital and the hospital's affiliates, as presented on the legal chart of corporate structure.

Income / (Loss) from Operations: the difference between total operating revenue and total operating expenses that results in a financial gain or loss from operating activities.

Long-Term Debt to Capitalization Ratio: the measure of the proportion of Long-Term Debt in a capital structure. A lower proportion or percentage is desirable because it allows for obtaining of more favorable terms (i.e., lower interest rates) when borrowing.

Medicaid: the federal and state health insurance program established under Title 19 of the Social Security Act to provide medical assistance on behalf of families with dependent children and for aged, blind or disabled whose income and resources are insufficient to meet the costs of necessary medical services and which is administered by the Department of Social Services.

Medical Assistance: the programs for medical assistance provided under the Medicaid program, including the HUSKY Plan A, or (B) any other state funded medical assistance program, including the Husky Plan, Part B.

Medicare: the federal health insurance program for the aged and disabled.

Appendix AA - Glossary of Terms

Net Assets: the residual amount of total assets after all current and long-term liabilities (including long-term debt) are deducted. Also referred to as ownership equity.

Net Patient Revenue: the total gross revenue from patient charges less contractual allowances, less the difference between government charges and government payments, less charity care and less any other allowances.

Non-Governmental: any commercial or private payer and includes but isn't limited to managed care organizations, health maintenance organizations, and preferred provider organizations.

Non-Operating Revenue: the unrestricted revenue not directly derived from providing patient services but obtained from either investment revenues or philanthropic and non-philanthropic sources.

Operating Expenses: the expenses necessary to maintain regular operating functions and to carry out ongoing activities.

Operating Margin: the ratio related to profitability indicating the percentage of gain or loss from operations to total revenue. A higher positive ratio indicates more favorable operating results.

Operating Revenue: the total of net patient revenue from reimbursement of patient services by government and non-government payers plus other operating revenue.

Other Medical Assistance: the difference between Medical Assistance and Medicaid.

Other Operating Revenue: the non-patient service operating revenue that is obtained from operating activities but is accounted for separately from patient service revenues. Other operating revenue includes revenues restricted by a donor or grantor for operating purposes, and also net assets released from restrictions.

Payer Mix: the proportion of each government or non-government payer's reimbursement to the hospital's total reimbursement for patient services. Payer mix is derived by determining the amount of total gross patient revenue or total net patient revenue that the hospital receives from each government and non-government payer.

Payment to Cost Ratio: the ratio that indicates the percentage above or below cost that a hospital is reimbursed by a government or non-government payer. A ratio that is higher than 1.00 is favorable, since it indicates reimbursement by a payer that is greater than the cost of providing patient services. A ratio that is less than 1.00 is unfavorable, since it indicates reimbursement by a payer that is less than the cost of providing patient services.

Ratio of Cost to Charges: the ratio that indicates the percentage of total operating expense to the total of gross patient charges plus other operating revenue. A lower ratio is more favorable, since it indicates a greater difference between the cost and charges billed for providing patient services.

Total Margin: the ratio related to profitability indicating the percentage of gain or loss from operations and non-operating revenue to total revenue. A higher positive ratio indicates more favorable results.

Uncompensated Care: the total amount of the hospital's charity care and bad debts resulting from unreimbursed patient services that are determined by using the hospital's published charges and consistent with the hospital's policies regarding charity care and bad debts.

Uncompensated Care Cost: the total amount of the hospital's charity care and bad debts at charges multiplied by the hospital's ratio of cost to charges.

Uninsured: individuals with no health insurance for the hospital services provided.

Unrestricted Net Assets: the amount of net assets that is not restricted by donors or by a board of directors as to their use.
