GENERAL OVERVIEW

Executive Summary

Connecticut continues to make tremendous gains in addressing the public health and negative economic impacts of the global COVID-19 pandemic and stands to emerge from the pandemic among the best-positioned states in the nation. Connecticut has not cut services or raised taxes to manage the State budget and is projected to close the most recent fiscal year with a wellfunded Budget Reserve Fund to ensure supplementary funds are available to support long-term sustainability and the fiscal health of the State. The State has used previously authorized federal and state resources to mount one of the most comprehensive and effective pandemic responses in the country, including rapidly standing up nationally recognized testing, contact tracing, vulnerable resident support, and vaccination programs. Connecticut established the model for safely re-opening schools and closing the digital divide by providing access to devices for every student in the state and has been nationally recognized for its robust testing program and leading vaccination rate for eligible populations. Connecticut continues to place a strong emphasis on responding to the ongoing risks of the pandemic, maintaining safe schools, and continued investments in addressing the digital divide. These are represented by investments in COVID-19 contact tracing, vaccination programs, and procurement of PPE, investments in various mental health initiatives for youths and adults, and investments to improve air quality in schools across the state. Connecticut is also leveraging funding from the Coronavirus Capital Projects Fund to expand access to free Wi-Fi to further address the digital divide and ensure access to high-speed internet for all.

While Connecticut has seen substantial recovery in the labor market, the state has still only recovered 86% of private sector jobs lost during the pandemic and public sector jobs continue to face downward pressure. This has resulted in a disparity in terms of which portions of the population are recovering more quickly from the negative impacts of the pandemic. To address these disparities, Connecticut is focused on investments that will provide education opportunities to individuals looking to upskill and increase their marketability for 21st century jobs, will provide food to struggling families, and will provide housing support services to ensure access to safe, affordable housing. Additional investments are being made to support safe, affordable childcare for working parents, and address educational losses and disparities that have impacted children in low-income households who have fallen behind during the move to remote learning. The small businesses, tourism sector, and non-profit sector that fuel the economy and provide critical community services struggled to keep their doors open and maintain payroll during the pandemic and are now facing considerable increases to the cost of doing business or providing services because of inflationary pressures. Connecticut is continuing to provide aid to these sectors to ensure jobs and services are protected.

In addition, COVID-19 exposed long-standing health disparities among racial and ethnic minorities who suffered disproportionately with higher infection and mortality rates. Consequently, the ARPA funds awarded to Connecticut represent an incredible opportunity for this state to make transformative investments in equity, and to emerge healthier and stronger from prenatal care to end of life, and to assist those in most need in this state. Investing in children and families early in life leads to better outcomes later in life, making our society even more prepared for the next pandemic or other crisis, and better positioning residents of all socio-economic status to access economic opportunity.

Pursuant to Special Act No. 21-1 passed by the Connecticut General Assembly and signed by the Governor on March 31, 2021, the Governor submitted a proposed plan for recommended allocations of the Coronavirus State and Local Fiscal Relief Fund (SLFRF) and worked collaboratively with the General Assembly to develop a plan to make transformative investments in equity and build Connecticut back better. The initial plan, Public Act 21-2 of the June Special Session, was expanded in May 2022 through passage of Public Act 22-118, as amended by Public Act 22-146, and details a list of more than 300 projects representing the entirety of Connecticut's \$2.8 billion award from the Coronavirus SLFRF. While many of the 109 original projects are in progress, many of the new projects are in the initial phases of implementation with the Office of Policy and Management (OPM), state agencies, the General Assembly, and grantees working in coordination to scope intended uses of the funds and to ensure compliance with federal guidance.

Governor Lamont has developed five key areas for these investments with a focus on equity:

- 1. The first of which is to *defeat COVID-19* by maintaining strong testing and vaccination programs, supporting a continued supply of PPE, maintaining our nationally leading support programs for our most vulnerable residents living in long-term care facilities, and supporting public health, because defeating this virus is the only way to ensure the other investments will pay dividends.
- 2. The second is *investing in the future* with 21st century upgrades and investments in our cities/towns, expanding access to high-speed internet, supporting families from the start with early interventions and services, supporting the recovery of non-profits through the pandemic, and addressing the criminal justice impacts of the pandemic.
- 3. The third key area is *creating a more affordable Connecticut* by supporting childcare opportunities for residents, assisting institutions of higher education, providing students at our colleges and universities with additional financial aid and scholarship opportunities, providing resources to better support those struggling with mental health issues, and targeting affordable internet and broadband access, as well as affordable housing, home remediation, energy efficiency and clean energy retrofits that will improve respiratory health and reduce burdensome energy costs for low-income residents.
- 4. The fourth area of investment is to make the state's *economic growth work for everyone* by restoring jobs, rebuilding our economy, and returning to growth by focusing on workforce development and small business supports.
- 5. The fifth key investment area is *the state itself*. These resources will enable Connecticut to continue state operations and provide resources necessary for state agencies to lead the state's recovery, to provide services to consumers and clients, and to mitigate and recover from the pandemic, and to evaluate and learn from those investments. These resources will also allow Connecticut to modernize and ease the delivery of services, particularly in health and human services, while improving the speed and quality with which we can monitor and analyze public health risks.

Uses of Funds

By defeating COVID-19, investing in our future, creating a more affordable Connecticut, prioritizing economic growth that works for all, and modernizing state government, we are addressing the pandemic and its negative economic consequences head on. Equity is at the core of our approach, factoring into each initiative designed to address the public health and negative economic impacts of the pandemic, serve disproportionately impacted communities, determine premium pay for essential workers, and supplement our state operations through revenue replacement.

Public Health (EC 1)

A primary focus of the state's uses of SLFRF has been addressing the substantial public health impact that COVID-19 has had on communities and families' health. To that end, the state is planning to invest approximately \$300 million to address the public health impacts of the pandemic. Funding for public health focuses on helping families recover from the pandemic, whether that negative impact was due to a gap in care, an additional need for support services such as substance abuse or mental health care, or general recovery from the life-altering effects of COVID-19. Addressing the public health impacts consists of maintaining adequate levels of personal protective equipment (PPE) and supplies for public health emergencies, while also creating transformative change for children and families across the state through programs that directly support the community. Programs range from smaller scale initiatives that seek to offer respite or provide support for health research studies, to larger scale efforts such as bolstering children's mental health supports. Some examples of priority investments include:

Statewide public health response. Connecticut has made significant investments in COVID-19 testing and PPE and is continuing to follow evidence-based policy recommendations to protect its residents from the continued impact of the pandemic. The state has created at \$75 million grant fund for school districts to upgrade and improve HVAC and indoor air quality systems. The state has also prioritized increased access to healthcare – particularly mental healthcare – through its planned expansion of pediatric mobile crisis intervention services (aka emergency mobile psychiatric services, or EMPS) to statewide 24/7 coverage and the creation of three additional urgent crisis centers, partnered with subacute crisis stabilization units, to provide diversionary services statewide. Additionally, the state is investing \$157 million to support ongoing COVID response measures including testing, PPE, and vaccination. As we have seen, COVID-19 is here to stay, and we must remain vigilant in our fight against the virus.

Respite Care for Family Caregivers. On an individual level, the funding allocation for Respite Care for Family Caregivers is providing short-term relief for family caregivers who are taking care of elderly family members or family members with a disability. This funding could be used to enhance existing respite care services by offering additional resources or expanding hours of operation. By providing respite care for families with the greatest need, funding can initiate more equitable outcomes and have the maximum impact on families who have been stretched thin with caregiver duties.

Community Health Worker Program. This program supports the families hardest hit by the pandemic by training community health workers (CHWs) across the state. Most CHWs are from the communities which they serve; because they know their community best, they can work closely with families and quickly build trust. Community health workers work

to improve patient experience, care coordination, and clinical outcomes with the public health and social services systems. Research has shown that more investment into early intervention leads to fewer hospital emergency department visits and better preventative care practices, leading to better health and economic outcomes for families and delivering care more effectively for the state. In the aftermath of COVID-19, many families have had their healthcare disrupted and/or have felt isolated from larger communities. CHWs can bridge this gap between families and needed services.

Children's Mental Health Initiatives. Children's mental health has been significantly affected due to the pandemic and disruptions in schooling, changes of lifestyle, and decreased social interaction with peers. Funding allocated for mental health initiatives for children supports various initiatives, including: establishing intensive transition care management services to expedite and facilitate the timely and safe transition of children from acute levels of care to the community; creation of an urgent crisis center to provide immediate care to children having a behavioral health episode who are in need of an urgent response to divert children from emergency departments; interventions to address trauma experienced by youth residing in urban communities; and expanded data analysis related to racial equity and justice in behavioral health to be utilized to improve provider specific program performance. Additional funding has been allocated to support an increase in mental health workers and services in schools. The Department of Children and Families will work closely with the State Department of Education to integrate urgent care centers with school-based programs for the most effective outcomes.

Negative Economic Impacts (EC 2)

A second focus of the state's SLFRF-funded efforts has been to support those negatively impacted economically by the pandemic. Broadly speaking, these efforts fall into three categories:

(1) Workforce development and job training programming.

Significant funding was approved for the creation of new workforce development and job training initiatives, as well as support and coordination for existing programs. The Office of Workforce Strategy is rolling out CareerConneCT, a comprehensive program leveraging \$70 million in ARPA funds that will focus on job training programs aimed at getting unemployed individuals or individuals significantly impacted by the pandemic back to work in high-demand industries, with a keen focus on advanced manufacturing, healthcare, information technology, clean energy, and construction. The intended outcome will be to train and place between 5,500 and 7,000 students and job seekers so they can enter employment in in-demand industries. Three target areas of this initiative include (1) a focus on reentry for formerly incarcerated individuals to successfully transition back to the workforce; (2) additional resources to support education and training to expand the state's healthcare workforce; and (3) the creation of multiple non-degree training programs with a pipeline into high-paying jobs in the bioscience industry. Twenty-six individual nonprofit organizations have been identified to support rolling out this job training program based on job creation program designs which implement industry best practices.

(2) Targeted aid to revitalize the travel, tourism, and hospitality industries.

The Connecticut General Assembly approved the Governor's request for statewide support of the travel, tourism, and hospitality industries, which have been particularly hard-

hit by COVID-19. Funds from various sources were authorized to support statewide marketing efforts; SLFRF funds will be targeted to new tourism branding as well as seasonal tourism promotions which will draw visitors and revitalize sales and employment within the sector. In addition, funding was approved to provide free access to 102 museums for children and one accompanying adult throughout the state during the summer of 2021 in an effort both to support museums which lost revenue and to provide to provide enrichment opportunities to support students' academic recovery. Upon receiving positive feedback from museums and families alike, the Governor and Legislature have continued this program into its second year during summer of 2022 and expanded the initiative to include 135 museums. Finally, several individual venues and attractions were authorized to receive direct grants to bridge the gap as these venues transition out of the pandemic and into the post-pandemic economy.

(3) Broad-based assistance for individuals and families who have felt particular economic harm. with special attention to families with young children and individuals facing housing insecurity.

The Connecticut General Assembly has authorized several programs intended to provide direct support for individuals and families who have suffered economically from the pandemic. A significant amount of funding was authorized to replenish the state's Unemployment Trust Fund, against which the state was forced to borrow significant sums from the federal government during the worst of the pandemic to cover the sudden and significant wave of unemployment claims. Additional funding was authorized for the Connecticut Department of Labor to administer and operate COVID related unemployment benefits, helping to maintain consumer access agency personnel. Finally, direct benefit programs include several food assistance initiatives administered by the state Department of Agriculture, ranging from vouchers for seniors and for use at farmers' markets, to support for food pantries and food banks. The state has also supported many nonprofits providing valuable services to their communities with direct financial aid to allow these organizations to meet increased demand for their programming.

The Governor and General Assembly have paid special attention to groups that have been disproportionately impacted by the negative effects of the pandemic, including families with young children and individuals facing housing insecurity.

Investments in Families with Young Children

The pandemic has been a particularly challenging experience for families with young children. Children have missed out on key early-learning opportunities and milestones, while parents have, in many cases, suffered income loss, constrained access to childcare and periods of remote learning. In response, Connecticut has made substantial investments in childcare and education through SLFRF funds.

In 2021, SLFRF funds were dedicated to covering parent fees for families receiving Care4Kids subsidies. To build on this success, the General Assembly allocated \$100 million of additional SLFRF funds to various childcare initiatives, including additional support for the Care4Kids program, emergency stabilization grants for school readiness and child day care providers to retain quality childcare workers during industry-wide shortages, and expanded access to training and supports for individuals in the early childcare workforce pipeline.

In addition, \$15 million in SLFRF funds have also been set aside for the construction and renovation of new childcare centers in "childcare deserts" across the state. These funds will prioritize centers, groups, and family childcare homes in communities of need as reflected by metrics such as the Social Vulnerability Index (SVI) and Childcare Accessibility Affordability and Transportation (CAATI). Currently, there are limited options for existing or aspiring childcare providers to seek funding to address facility needs, but this grant fund will allow providers to invest in one-time startup costs to significantly increase childcare availability across the state in the long-term. These childcare initiatives provide economic relief and educational opportunity to thousands of children and parents in low to moderate-income households, bolstering the provision of healthy early childhood environments in disproportionately low- to moderate-income communities, and supporting kindergarten readiness for our most impacted populations and communities. These programs also help parents address COVID-19 related income loss and to provide support to parents re-entering/remaining in the workforce.

In addition to supporting early education programs for the state's youngest children, the state is providing greater emphasis on maternal and newborn well-being which was greatly impacted by the pandemic, with a focus on upstream prevention efforts. Currently, more than one in three women have perinatal depression, compared to less than one in five (15-20%) prior to the pandemic. To support these women, Connecticut is introducing universal home visiting in certain areas of the state that suffered disproportionate impact, stress, and child trauma during the pandemic. The Universal Home Visiting Program will be piloted through Family Connects, an evidence-based home visiting model that pairs new mothers with registered nurses to provide up to 3 home visits for needs assessments and knowledge sharing. Nurses will also help families gain access to critical community programs and resources to support. Home visiting has been shown to improve mental and physical health outcomes and prevent child maltreatment, resulting in a 50% reduction of emergency medical care use (years 0-1) and a 28% reduction in mothers' clinical anxiety.

Investments in Individuals and Families Facing Housing Insecurity

To address housing insecurity as a result of the pandemic, the state is providing additional funding for legal representation for tenants facing eviction, thus supporting residents hit hardest by income disruption to help them better navigate the foreclosure process and help them stay in their homes. This represents just one aspect of a comprehensive approach to housing utilizing SLFRF dollars which includes reducing energy costs to homeowners facing hardship through remediation of barriers to weatherizing homes and funding energy efficiency upgrades for affordable housing. Energy affordability is one of the leading causes of homelessness in the United States and Connecticut residents spend the second highest amount on annual energy bills in the nation at an average of \$3,600. Layering these efforts on top of the UniteCT program— a program that provides up to \$15,000 in rental and up to \$1,500 electricity payment assistance on behalf of households financially impacted by the COVID-19 pandemic — Connecticut's rental housing market will be stabilized, and the state will have created a comprehensive set of supports for residents facing housing hardship.

Connecticut has also prioritized the creation of new affordable housing units with an investment of \$50 million to fund affordable housing initiatives across the state. With this investment, the state Department of Housing anticipates supporting the creation of 350

additional units of affordable housing targeted for households earning between 30% and 50% of the area median income and leveraging that investment to support the production of as many as 1,000 additional units of housing. Efforts are currently underway through the State Bond Commission to combine ARPA dollars with other funding sources for eight affordable housing development proposals in Newington, New Haven, and Hartford.

To date, the state is set to invest more than \$1 billion in projects and initiatives to address the negative economic impacts of the pandemic.

Public Sector Capacity (EC3)

Connecticut is investing almost \$217.3 million to restore and bolster its public sector capacity that has faced significant staffing pressures and increased demand for services.

The state's hospital system, UConn Health, experienced significant disruptions and impacts to revenues during the pandemic. As a result, the state has invested almost \$146 million to ensure operations are maintained and staffing levels are not reduced. Funds will be used to enable UConn Health's multispecialty physician practice to continue to operate with pre-pandemic staffing levels, avoid layoffs, and increase services. The practice includes primary care, cardiology, and other critical specialties for community health, and serves approximately 39% Medicare and 24% Medicaid patients, representing more at-risk populations.

The pandemic has also led to major disruptions in the court systems and increased demand on the unemployment system resulting in significant backlogs in court services and unemployment claim process. To resolve these backlogs and address other administrative needs, Connecticut is investing almost \$38.1 million for staffing support. To improve the efficacy of public health and economic programs throughout the state, Connecticut is investing \$33.4 million to support various effective service delivery initiatives. By expanding electronic health records, improving information system accessibility and functionality for citizens, and expanding GIS mapping and evaluation capacity, the state is positioning itself to provide better service to residents by creating resilient, accessible technology systems and to better inform policy decisions through data-driven policymaking.

The Statewide GIS Capacity for Broadband Mapping project will be of critical importance to various broadband initiatives being supported through the Coronavirus Capital Projects Fund as well as through the Infrastructure Investment and Jobs Act to address Connecticut's digital divide experienced by 'disconnected' individuals concentrated among the poor, minority, and elderly populations.

High quality geospatial data will enable the state to address disparities and inequities, and barriers to access work, healthcare or other services. Investments in broadband expansion will use up-to-date and accurate information to ensure those investments reach underserved areas and individuals. Aerial imagery, building footprints, and 3D base mapping will support progress on environmental justice and addressing the impacts of climate change. Property data will support equity in housing, economic development, and municipal finance. The ability to effectively visualize and present the high-quality geospatial data is vital to enabling more effective use of resources in addressing all the issues.

Premium Pay (EC 4)

The state has mounted one of the most comprehensive and effective pandemic responses in the country, including rapidly standing up nationally recognized testing, contact tracing, vulnerable

resident support, and vaccination programs. Connecticut's COVID-19 response has been nation-leading, in no small part due to the incredible work of front-line state employees and National Guard members who risked their wellbeing to serve their communities. In recognition of this essential service, Connecticut is investing \$35 million in premium pay for front line state employees and members of the National Guard. While this effort will require collective bargaining with the state's unionized workforce, this funding is expected to provide financial recognition of their exceptional service which saved lives and contributed to our nation-leading response and recovery from the COVID-19 pandemic. Separately, Connecticut is dedicating \$30 million of state funds to address pandemic premium pay for eligible private sector employees.

Infrastructure (EC 5)

The state is directing all but \$25 million of its Coronavirus Capital Projects Fund award to broadband initiatives to support access for low-income/multi-family curb-to-home and business broadband infrastructure buildout in underserved areas and provide public Wi-Fi connectivity in key community access points. Connecticut is also investing SLFRF in strategic broadband efforts to ensure residents can stay connected while on the move with an allocation of \$23 million to outfit the state's electric train fleet with 5G. This will help public transportation users stay connected for work, education, and civic engagement while doing their part to reduce emissions.

Revenue Replacement (EC 6)

The COVID-19 public health emergency has created a significant economic shock, impacting revenues for state and local governments. The American Rescue Plan Act of 2021 acknowledges that state and local governments have suffered deep revenue losses and enables use of funds to ensure that important government services can be maintained. The State of Connecticut has projected revenue loss to be almost \$2.2 billion from the end of Fiscal Year 2019 through the end of Calendar Year 2021 and has thus far allocated approximately \$843 million to support the provision of government services.

Remaining Use of Funds - To Be Determined

While the state is prioritizing the usage of funding in support of clearly eligible pathways and populations to address the public health and negative economic impacts of the pandemic, there are various needs and populations that have experienced a negative impact as a result of COVID-19, and other provisions of government services that have gone unaddressed due to various budgetary constraints. As a result, Connecticut's Office of Policy and Management, in conjunction with state agency partners and the General Assembly, is still in the process of scoping appropriate expenditure category pathways for approximately \$386.3 million in SLFRF allocations that were authorized under Public Act 22-118, as amended by Public Act 22-146. These allocations will support investments across the state for senior centers and programs, enhanced services to those with intellectual and developmental disability disorders, school health centers, lead abatement efforts, and services for victims of crime. These funds will ultimately be assigned to the foregoing categories, but as of this writing have not yet been assigned to an expenditure category. Future reports will indicate the pathway(s) to which these funds are assigned.

Promoting Equitable Outcomes

The COVID-19 pandemic has had a disproportionate impact on Connecticut's most vulnerable residents. Minorities and women of color, who are more likely to hold high-risk, essential positions, have been adversely impacted by COVID-19. It is our collective responsibility to address these challenges through an equity-focused lens.

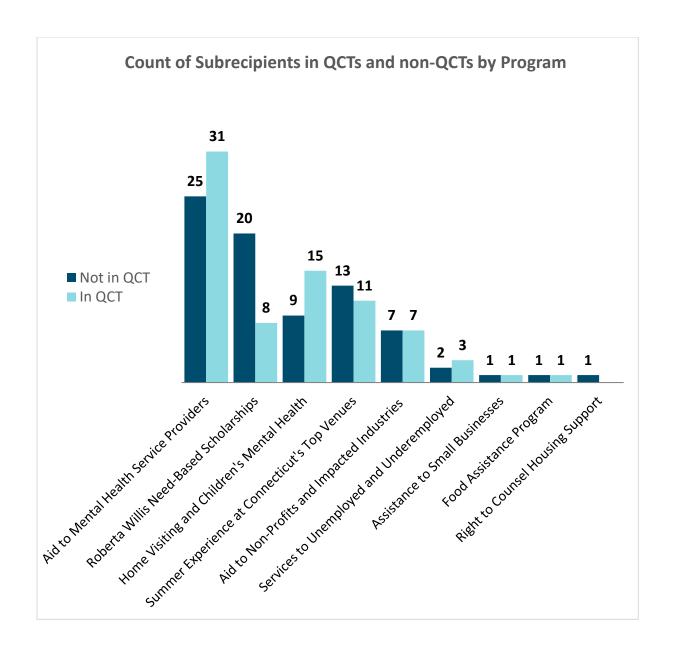

Across policy areas, access to transformative programming is focused on supporting our most vulnerable populations. More importantly, ease of access has been prioritized for rapid deployment and adoption. While different programs have been established to support their respective populations, which have been disproportionately impacted by the pandemic, qualifying households/individuals will receive equal levels of support, consistent with the state's ambitions to offer equitable services to all. Connecticut will, or already has, implemented various communication channels to inform residents of the planned programming and intends to provide wraparound administrative support wherever possible. Programs like Universal Home Visiting and Community Health Workers for Families will transform access to supports and services for families and their young children.

In the "Negative Economic Impacts (EC-2)" subsection under the "Use of Funds" section, readers will see a multitude of intended outcomes. Some programs target specific populations, whereas others aspire to become a universal service. However, even where universality is a primary goal, like universal home visiting, subject matter experts have identified higher uptake rates of those invaluable services by families and individuals most in need. In effect, the state's core desire is to support those residents who have been disproportionately impacted or suffered economic harm because of the pandemic, ranging from traditionally marginalized populations to postpartum mothers.

Data will be collected by each program's respective owner agency. All state agencies have robust data collection systems and processes and will prioritize data, which highlight (1) the effectiveness of the program and (2) the accuracy of the program in reaching its intended population. Data will be disaggregated at the demographic and socioeconomic levels, where feasible and to preserve individual privacy and confidentiality.

With these additional resources, the state can invest in people and projects simultaneously. In the near term, continued assistance to our residents who are struggling will be offered. The state will provide support for providers who have been on the front lines of combatting this pandemic and will maintain programs that are helping the food insecure. There will be aid for those struggling with housing costs and keeping the lights on. What Governor Lamont has proposed is a comprehensive investment program aimed at equity and lifting the communities in our state who were both adversely impacted by the COVID-19 pandemic and have historically faced inequities in the areas of health, opportunity, and education.

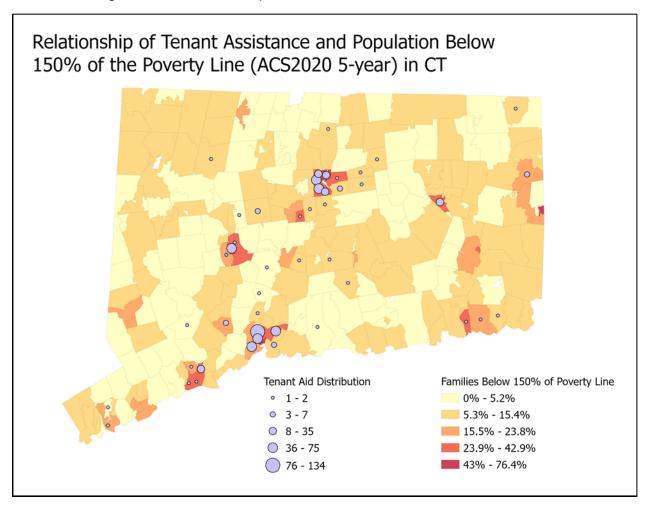

As of the April 30, 2022, Connecticut has made considerable investments to support business and non-profits in Qualified Census Tracts (QCTs), with almost 50% of subawards and beneficiary payments going to QCT-based organizations. These efforts have provided aid to mental health service providers, various non-profit organizations, and the tourism sector, and supported those communities hardest hit by the pandemic through home visiting and children's mental health services, services to the unemployed and underemployed, and food assistance programs.

While both the Roberta Willis Need-Based Scholarship Program and the Right to Counsel Program, as shown in the chart above, are not predominantly represented in QCT areas, both programs are directed at disproportionately impacted households. The Roberta Willis Scholarship Program is administered by the Connecticut Office of Higher Education through the state's public and non-profit private colleges. Need-based grants are awarded to Connecticut residents who apply and are attending a qualifying in-state institution and have an expected family contribution below \$11,500.

The state's Right to Counsel program, operated by the Connecticut Bar Association, is providing free legal representation to income eligible tenants facing eviction or loss of housing subsidies in eight municipalities. Four of these municipalities - Bridgeport, Hartford, New Haven, and Waterbury - are on the Princeton University Eviction Lab's list of the 100 large cities with the highest evictions rates across the country. The program seeks to address the discriminatory

housing practices and income disparities that put <u>communities of color and low-income women</u> <u>at disproportionate risk of eviction</u>, and reduce the likelihood of homelessness, housing instability, negative impacts on mental and physical health, and the long-term negative effects on children. Almost 900 households have been assisted through the Right to Counsel program, and we expect this number to grow with the recent expiration of the federal eviction moratorium.

While these programs have made gains in serving our disproportionately impacted communities, we must do more, and many of Connecticut's newly authorized SLFRF projects will continue making progress to support these communities of need. Many new investments through the State Department of Education are targeting school districts designated as an Alliance District. Alliance Districts are 36 of Connecticut's lowest-performing school districts as established by the state's Next Generation Accountability System, which is comprised of 12 indicators intended to quantify a district's or school's success in preparing its students for success in and outside of the classroom. While many of the programs are still in the planning phase, the initiatives will support:

- 1. A tiered system of interventions.
- 2. Foundational reading programs (Grades K-3).
- 3. Additional learning time, either extended days or an extended year.

- 4. A talent strategy designed to "attract, retain, promote and bolster the performance of staff," including allowable \$500 stipends for mentor teachers in the TEAM program.
- 5. Training for school leaders and staff on new teacher evaluation models.
- 6. Coordination with early childhood education providers, including funding for Head Start.
- 7. Coordination with governmental and community programs for student support and Wraparound Services.
- 8. Implementing and furthering statewide education standards and associated activities and initiatives.
- 9. Minority teacher/administrator recruiting.
- 10. Enhancement of bilingual education programs.

These programs will benefit more than 200,000 students in over 400 schools, many of which are in disproportionately impacted communities of color.

Community Engagement

To develop a strategy for State and Local Fiscal Recovery Funding, state leadership has gone through a robust, democratic process of debate, negotiation, and collaboration between the Governor and the General Assembly of Connecticut. In April 2021, Governor Lamont released Connecticut's Plan for the American Rescue Plan Act of 2021: A Roadmap for a Transformative, Equitable and Healthy Recovery for our State. This plan represented the work of a robust set of interagency processes to develop a transformative plan for a stronger, post-pandemic Connecticut and initiated months of democratic engagement over the final allocation of these ARPA dollars. This process of public, democratic debate culminated in the passage of Public Act 21-2 of the June Special Session, An Act Concerning Provisions Related to Revenue and Other Items to Implement the State Budget for the Biennium Ending June 30, 2023, detailing 109 initiatives designed to build Connecticut back better. These efforts were furthered through the passage of Public Act 22-118, as amended by Public Act 22-146, which has grown the number of SLFRF initiatives to more than 300 and demonstrates Connecticut's responsiveness to the public and the various needs they have brought to the forefront.

Connecticut's SLFRF strategy centers investments in programs with deep community ties and proven track records of success. State leadership understands that local nonprofit organizations are a valuable resource in combatting the negative health and economic impacts of COVID-19 on Connecticut residents because of their local knowledge and years of experience engaging with distinct populations. The state ARPA plan prioritizes projects that directly support existing work that is already being done well by community organizations in our state. State agencies such as the Departments of Children and Families, Economic and Community Development, Education, Housing, Public Health, Social Services, and Labor have led out on building these partnerships. A sample of our partnerships include:

Hands on Hartford. One of Connecticut's first ARPA projects invested in local nonprofit Hands on Hartford, which was founded in 1969 by members of eight congregations in the community and serves Hartford's most economically challenged residents in the areas of

food, housing, and health. Volunteer-driven, Hands on Hartford founded Connecticut's first supportive housing program for people living with AIDS, Hartford's only group home for adults with mental illness, its first soup kitchen and only weekend senior nutrition program, and a comprehensive after-school tutoring and arts education program for elementary school aged children. ARPA funds are supporting three key Hands on Hartford programs: the Meals Assistance Neighbors Nurturing and Advocacy (MANNA) Community Pantry and Neighborhood Services; the Backpack Nutrition Program providing healthy meals to food insecure children in Hartford area schools; and the Community Meals and Day Program which serves its homeless neighbors and others struggling with food insecurity providing hot meals and one-to-one assistance with resources and referrals.

Fair Haven Clinic. Connecticut is investing \$20 million in this community health center serving New Haven populations who face barriers to healthcare access. Fair Haven Clinic first started seeing patients in a local elementary school in 1971. In partnership with community advocacy agency Alliance for Latin American Progress, the clinic expanded to serve adults and children for high-quality primary care, mental health, and substance use treatment services. Fair Haven Clinic conducts regular Community Listening Sessions, both virtually and in-person, to ensure their programs and outreach strategy are responsive to the needs of their community. ARPA funding will increase Fair Haven Community Health Center's capacity to provide high-quality primary and behavioral health care to this predominantly low-income and Hispanic patient base.

Connecticut is also designing collaboration and community engagement into our initiatives. The flagship workforce development project, CareerConneCT, requires the state's five Regional Workforce Development Boards to collaborate with regional training providers and companies to inform the design of each application submitted. The statewide marketing campaign for industries negatively impacted by the pandemic is being developed by a series of community surveys and engagement with nonprofits and for-profit travel and tourism partners throughout the state.

One successful example of community engagement and outreach is the Summer Experience at Connecticut's Top Venues program. In the summer of 2021, this program debuted to allow Connecticut children and one accompanying adult to visit museums statewide free of charge during the summer months. This program benefits families dealing with a loss of learning opportunities from in-person classroom instruction and state private and nonprofit museums who faced reduced traffic during the pandemic. The Department of Economic and Community Development (DECD) regularly interfaces with participating museums in conjunction with Connecticut Humanities and the Connecticut League of History Organizations. DECD has communicated with members of the public via their its public website and has incorporated visitor feedback to improve the program going into its second summer. Public outreach for the program has been robust, with families statewide eager to take advantage of the program. Museums have shared a significant uptake in visits from both local families and families from across the state during the time period of the program.

Labor Practices

Connecticut adopted prevailing wage laws to ensure that the hourly wages commonly paid to construction workers in the state were maintained and prevented low bid requirements from reducing the market price for labor to levels that would disrupt the local economy. The law

(codified in Connecticut General Statutes Section 31-53 and 31-53a) applies to each contract for the construction, remodeling, refinishing, refurbishing, rehabilitation, alteration, or repair of any public works project by the State or its agents, or by any political subdivision of the State and is therefore applicable for state ARPA projects.

Connecticut's prevailing wage laws provide monetary thresholds which must first be met. The prevailing wage law does not apply where the total cost of all work to be performed by all contractors and subcontractors in connection with new construction of a public works project is \$1 million or more. The prevailing wages law applies where the total cost of all work to be performed by all contractors and subcontractors in connection with remodeling, refinishing, refurbishing, rehabilitation, alteration, or repair of any public works project \$100,000 or more.

In addition to the state's prevailing wage requirements, Connecticut recently adopted expansive reforms to state minimum wage requirements through the passage of Public Act 19-4 to address existing pay disparities and ensure hardworking families can obtain financial security. As of July 1, 2022, the minimum wage rate is \$14 per hour and will increase to \$15 per hour in June of 2023. Beginning on January 1, 2024, the minimum wage will become indexed to the employment cost index which will allow the rate to grow according to economic indicators as calculated by the U.S. Department of Labor.

Use of Evidence

The State of Connecticut has established the ARPA Evidence and Evaluation Unit as a dedicated team within the Office of Policy and Management (OPM) with responsibility for coordinating evaluation and evidence-building for investments through SLFRF. Nested within OPM's Data and Policy Analytics Unit, the team will work closely with agencies and third-party applied researchers and evaluators to develop evaluation plans and coordinate access to state data resources for evaluation and evidence-building purposes. The team will officially launch later this fall to provide 'hands-on' support and guidance to recipients of SLFRF funds.

The Evidence and Evaluation Unit provide leadership on the three components of the state's evidence-building strategy, which are:

(1) Prioritizing investments for evidence-building.

To identify core projects with the potential to generate high-quality evidence, the Evidence and Evaluation Unit will prioritize ARPA projects for evaluation based on the following factors: (1) alignment between the project and the five priority areas identified by Governor Lamont, to ensure that investments in evidence-building align with the priorities in the SLFRF investments as a whole; (2) the scale or magnitude of the project, anticipating that projects with greater reach are a higher priority; (3) the existing evidence base for the program; and (4) the potential for robust community engagement, to use those insights to inform the evidence-building strategy with both qualitative and quantitative data.

(2) Supporting the allocation of resources for evaluation and data analysis.

The Evidence and Evaluation Unit will support OPM Budget staff in incorporating resources for program evaluation into program budgets where appropriate. Evaluation support may come through internal hires (building state capacity for evidence-based policy

making), partnerships with third-party evaluators (leveraging expertise in specific policy and evaluation areas), and working with existing state resources described further below. Connecticut's ARPA plan includes \$12 million to support the creation or expansion of state data collection and evaluation resources and over \$15 million for innovative pilot programs that will be evaluated for effectiveness. In addition to these initiatives, many more programs currently in early stages of development will incorporate evidence-building and evaluation strategies as key components of their project development.

(3) Connecting projects with existing state efforts to coordinate and leverage capacity.

Individual ARPA projects are encouraged to make use of state resources and work already underway to enhance state data and analytical capacity. One key pillar of Connecticut's strategy to integrate data across agency systems is P20 WIN, the state longitudinal data system. The P20 WIN learning agenda focuses on areas of significant overlap with Connecticut's SLFRF Recovery Plan, including college and career readiness, student readiness, financial aid, identifying barriers to success, and workforce training programs. Another resource is the state open data portal (data.ct.gov) which posts data from agencies, such as program enrollment and project outcomes. This portal houses existing dashboards on the impact of the COVID-19 pandemic and economic recovery. In alignment with Connecticut's equity and inclusion strategy, the open data portal has posted maps, data, and documentation on Qualified Census Tracts (QCTs) to assist in the development of ARPA project plans and determination of eligibility with plans to post regular updates on ARPA investments. Connecticut's OPM has a history of supporting transparency, data analysis and performance monitoring through multiple avenues and anticipates leveraging those existing resources in the evidence-building process as the SLFRF strategic plan moves forward.

As projects develop, OPM will continue to communicate the focus on evidence-building to agencies and project implementation teams. OPM's Budget and Financial Management Division will raise awareness that evaluation and data analysis are allowable expenses and that recipients may use ARPA resources to "build their internal capacity to successfully implement economic relief programs, with investments in data analysis, targeted outreach, technology infrastructure, and impact evaluations." (SLFRP Fact Sheet, May 2021) In addition to technical assistance from the Evidence and Evaluation Unit, OPM is developing resources to help state agencies build their own capacity for evidence-based policy making. All programmatic ARPA projects are encouraged to develop project-specific logic models to help program administrators identify existing strengths and resources, connect program activities with specific measurable outputs, and clarify the final impact goals of project activities. Logic models help managers view programs as a tool to create positive changes for Connecticut households and communities, rather than an end in themselves, and help state agencies develop effective projects focused on impact. In addition to logic models, other evidence-building resources currently in development include a primer on evidence-based policy clearinghouses, implementation guides to help existing programs align with similar programs that have already undergone rigorous evaluation, and a checklist to help agencies identify programs that are prime candidates for a program evaluation. These resources will empower state agencies to regularly incorporate evidence-building and evaluation into policy development.

Ultimately, the Evidence and Evaluation Unit will enable Connecticut to communicate the impact of ARPA investments clearly and consistently. Residents need to know how funds are being used

and whether those investments are benefitting their community. Past approaches to federal stimulus funding have led to some frustration at an underutilized opportunity through a failure to systematically collect data and evaluate impact. To proactively work against these blind spots, evidence-building and evaluation activities will accompany ARPA projects and focus on outcomes for households and communities. The Evidence and Evaluation Unit will ensure regular reporting on the results of evaluations will be communicated clearly and publicly to provide transparency and accountability for funds. Connecticut residents deserve to know how these federal funds are used and whether residents are better off as a result of that usage.

Prioritization for an evidence-building strategy will closely follow priority areas identified by Governor Lamont and referenced in the Executive Summary. The following section highlights a sample of how evidence-based policies and rigorous program evaluation will be incorporated into ARPA projects:

Investing in the Future. Connecticut is investing in home visiting services for young children and their caregivers to ensure all children, regardless of income or access to private healthcare, have a strong start in life. Home visiting programs, where certified nurses visit with caregivers and their young children in their homes, have been rigorously evaluated across the country and demonstrate many benefits: a reduction in social-emotional and behavioral problems in young children; a decrease in developmental and learning problems; reduced incidents of abuse and neglect; and lower rates of maternal anxiety and depression. Connecticut's expansion of its Child First program and the pilot of a Universal Home Visiting program offers exciting opportunities to invest in Connecticut's future through this evidence-based policy.

More Affordable Connecticut. Connecticut helps make affordable higher education more accessible through its programs to enhance student retention at community colleges and expansion of need-based scholarships. For the college retention initiative, Connecticut's community college network is building on evidence-based strategies of Guided Pathways Advising (GPA) to provide individualized advising and long-term mentorship. Similar programs across the country have demonstrated this counseling model leads to higher graduation rates and shorter time to degree completion. The expansion of need-based scholarships in Connecticut to disproportionately impacted populations is an opportunity to generate new evidence about scholarship interventions and their impact on academic and career success.

Economic Growth. The CareerConneCT project consists of job training programs aimed at getting unemployed individuals or individuals significantly impacted by the pandemic back to work in high-quality career pathways, with target industries including advanced manufacturing, healthcare, information technology, clean energy, and construction. The initiative aims to train and place between 5,500 and 7,000 students and job seekers so they can enter employment in these careers categories. The agency's evaluation framework incorporates a quasi-experimental analysis that will focus on wage gains, educational attainment, and decreased reliance on state services.

Performance Report

Tracking program outcomes is an important component of Connecticut's SLFRF plan. While only some ARPA projects are undergoing formal program evaluations as described above, all projects are required to track and report on performance metrics. As part of OPM's ARPA procedures, all state agencies must propose output and outcome metrics to measure the success of their project. To the extent practicable, agencies are encouraged to set indicators that include both output and outcome measures, are disaggregated by demographic data, and reflect a focus on equity and inclusion. Additionally, agencies are required to discuss the incorporation of demographic characteristics in outcomes tracking, with recommended categories of race, ethnicity, gender, and income, as well as additional categories relevant to the specific program. OPM is also developing tools that will allow agencies to standardize their collection of demographic data over time, paving the way for a cohesive measurement of how well state programs are serving historically marginalized populations.

Many state agencies and their community partner organizations have a strong track record of measuring relevant performance indicators, which provides a baseline indicator for new and expanded programs. In line with ARPA's focus on generating meaningful impact while engaging with community organizations, Connecticut's approach to performance tracking gives subrecipients the flexibility to design and choose meaningful metrics that align with their own understanding of the complexities of the programs and populations they serve.

In addition to their technical support on evidence-building and program evaluation, OPM's Evidence and Evaluation Unit will support the OPM Budget and Financial Management division in collecting and aggregating performance metrics into categories that align with Governor Lamont's five priority areas. With consistent tracking and reporting, these metrics will provide concrete data to generate a cohesive narrative of Connecticut's strengths, areas that can be improved over time, and Connecticut's overall response to the CovidCOVID-19 crisis.

PROJECT INVENTORY

Project ID	Title F	Funding Amount	Project Expenditure Category	Description	Use of Evidence / Program Evaluation	Performance Report (Mandatory and Optional Indicators)
29691 Enhance Retention Communication Colleges	nity	19,500,000	2.37 - Economic Impact Assistance Other	In response to declining student achievement retention and a corresponding loss of tuition and fee revenue that has been exacerbated by the COVID-19 pandemic, the Connecticut community colleges are implementing Guided Pathways Advising, a wholistic case management advising model. With partial support from State Fiscal Relief funding, Guided Pathways Advising will be implemented at scale across all 12 Connecticut community colleges beginning in FY 2022. Under the program, Connecticut community colleges will hire 158 advisors and eight other supervisory and support staff over a 3-year period.	Research shows that individualized, intrusive advising and long-term mentorship experiences that involve goal setting, the learning of personal success strategies, intentional conversation, and positive connection can increase students' sense of belonging, engagement, achievement, persistence, retention and completion (Achieving the Dream, 2018; Bettinger & Baker, 2011; Karp & Stacey, 2013; Miller & Murray, 2005; Pierce, 2016). Many exemplar community colleges have implemented advising models similar to Connecticut's GPA program and observed significantly higher retention and graduation rates. At Lorain County Community College, for example, the graduation rate jumped from 8 percent to 25 percent within seven years (Dryden, 2018) and the equity gap in developmental course completion rates and first-term	Program implementation ongoing Metrics to be tracked include: Number of staff to be hired Number of students advised

29692	Higher Education – CSCU	\$ 15,000,000	6.1 - Provision of Government Services	Support is provided to Connecticut State Colleges and University (CSCU) for the provision of public services. This allocation from Connecticut's State Fiscal Recovery Fund award will be used to support adjunct faculty necessary to provide adequate course availability to students at CSCU institutions. Without these funds fiscal constraints would require these institutions to eliminate a large number of course sections across 16 institutions. Given CSCU's CDC- compliant social distancing protocols which limit class size based on room, the students served by adjunct faculty in these courses would have difficulty finding alternatives within the system resulting in deferred		
				revenue for the system, and diminished student success.		
29693	Senior Food Vouchers	\$ 200,000	2.1 - Household Assistance: Food Programs	The funds will be used to increase the value of the check booklets provided to seniors over the age of 60 and disabled individuals living in congregate housing where nutrition services are provided. Eligible program participants facing increased faced food insecurity due to the negative economic impacts of the COVID-19 pandemic will receive check booklets that were increased in value from \$15 to \$21 to purchase	Older adults who are less food secure are more likely to have adverse health consequence than food secure older adults. Chronic health conditions combined with food insecurity can negatively affect older adults' ability to remain in the community. Due to a rise in food prices during Covid-19 and the resulting economic downturns, nutritious food is less accessible to income-restricted	The program is in early development stages and will provide performance metrics in future reports.

				fresh fruits and vegetables at participating Connecticut farmers' markets and farm stands.	households. Research demonstrates the benefits of nutrition programs targeted specifically at seniors (Administration on Aging Research Brief Number 8, 2015; Lloyd JL and Wellman NS, "Older Americans Act Nutrition Programs" 2015). The expansion of existing benefits will provide stability and health benefits for Connecticut's aging population.	
29694	Farmer's Market Nutrition	\$ 200,000	2.1 - Household Assistance: Food Programs	The funds will be used to increase the value of the check booklets provided to WIC participants facing food insecurity due to the negative economic impacts of the COVID-19 pandemic. This year check booklets increased from \$15 to \$21 to purchase fresh fruits and vegetables at participating Connecticut farmers' markets and farm stands.	The WIC program is one of the most well-documented, costeffective programs that demonstrates real benefits to women and children. Researchers have found that: "Women who participate in WIC give birth to healthier babies who are more likely to survive infancy. WIC supports more nutritious diets and better infant feeding practices. WIC participants buy and eat more fruits, vegetables, whole grains, and low-fat dairy products, following the introduction of improved WIC food packages more closely aligned to current dietary guidance. Low-income children participating in WIC are just as likely to be immunized as more affluent children, and are more likely to receive preventive medical	The program is in early development stages and will provide performance metrics in future reports.

					care than other low-income children." (Center on Budget and Policy Priorities, WIC Works, 2021). Given the rise in food prices during Covid-19 and the resulting economic downturns, nutritious food is less accessible to incomerestricted households.	
29695	Farm-to-School Grant	\$ 750,000	6.1 - Provision of Government Services	Connecticut Grown for Connecticut Kids Grant is a grant program to support and establish farm to school programs in schools school districts childcare centers and homes. Farm to school enriches the connection communities have with fresh healthy food and local food producers by changing food purchasing and education practices at schools, and early care and education sites. Students gain access to healthy local foods as well as education opportunities such as school gardens, cooking lessons, and farm field trips.		 Number of students served: 8,053 Demographic data for students served: Age: Birth to preschool (4%); elementary school (35%); middle school (1%); high school (4%); mixed (56%) Three sub-programs collected data on race, representing 17% of total program participants: Hispanic/Latino (46%); White (40%); Black (11%); Asian(2%); Multi-racial or other (2%)

29729	Ball and Sockets – Cheshire	\$ 200,000	6.1 - Provision of Government Services	Provide funding to support alterations and improvements to the Ball and Socket project, an arts and entertainment center designed to promote economic development and a walkable downtown in the town of Cheshire.		
29730	Junta for Progressive Action	\$ 750,000	2.34 - Assistance to Impacted Nonprofit Organizations Impacted or Disproportionately Impacted	Funding will be provided to mitigate financial hardship as this entity experience negative economic impacts from the pandemic or support program engagement for disproportionately impacted families		Number of non-profits served: 1
29732	Right to Read	\$ 25,720,000	2.25 - Addressing Educational Disparities: Academic Social and Emotional Services	Funds will support the Center for Literacy Research and Success housed with the Department of Education. The Center will provide intensive supports for reading and literacy programs in Connecticut's Alliance Districts, the 33 lowest performing districts statewide, and	The program is in early development stages and will provide detail on its use of evidence and/or program evaluation plans in future reports.	The program is in early development stages and will provide performance metrics in future reports.

				general oversight to reading and literacy programs statewide. SDE will incorporate evidence-based standards into this work.	
29733	Faith Acts Priority School Districts	\$ 10,000,000	2.24 - Addressing Educational Disparities: Aid to High-Poverty Districts	Funds will be distributed to Connecticut's Priority Districts according to a needs-based formula in order to support activities related to improving student achievement enhanced educational opportunity and early reading intervention programs. Priority districts are a collection of 15 of the state's neediest districts as determined by measures enshrined in the state's education statutes.	The program is in early development stages and will provide performance metrics in future reports.
29734	CT Writing Project	\$ 159,500	6.1 - Provision of Government Services	The Connecticut State Department of Education is still in the preliminary phases of scoping out this project. The CT Writing Project is an affiliate of the National Writing Project dedicated to improving students' writing by strengthening the teaching of writing, providing professional development programs for classroom teachers, and expanding the professional roles of teachers.	

29735	Ascend Mentoring – Windsor	\$ 300,00	2.25 - Addressing Educational Disparities: Academic Social and Emotional Services	The Connecticut State Department of Education is still in the preliminary phases of scoping out this project. Ascend mentoring is an organization that serves children ages 12-18 in Windsor Public Schools with three areas of focus: employment services; mental health resources; and financial planning. Windsor is a high need district which serves 4,421 Free and Reduced Lunch Students.	The program is in early development stages and will provide detail on its use of evidence and/or program evaluation plans in future reports.	The program is in early development stages and will provide performance metrics in future reports.
29736	Women in Manufacturing - Platt Tech Regional Vocational Technical School	\$ 130,00	0 6.1 - Provision of Government Services	The State Department of Education is still in the preliminary phases of scoping out this project. Funds are anticipated to support manufacturing programming at Platt Tech in Milford Connecticut however exact uses are still being determined in order to comply with federal guidance.		
29737	Elevate Bridgeport	\$ 400,00	2.25 - Addressing Educational Disparities: Academic Social and Emotional Services	The State Department of Education is still in the preliminary stages of scoping out this project. The intended recipient, Elevate Bridgeport, is an organization that provides additional elective classes, mentoring, extra-curricular activities, and college and career preparation for students in Bridgeport, one of Connecticut's highest need districts.	The program is in early development stages and will provide detail on its use of evidence and/or program evaluation plans in future reports.	The program is in early development stages and has provided prospective performance indicators that it will track over the lifetime of the project, including: • Output Metrics: Curriculum Assessment tools; Student Assessment Tools; Number of mentors trained; Number of youths referred by teachers, guidance counselors, and community service agencies; The frequency, type, duration, and intensity of

	mentoring contacts; The number of mentoring sessions that occurred; Program participation rates; Pre/Post parent, teacher, and student survey assessing scope of services and program effectiveness; School-wide data,
	including: attendance, suspension rates, graduation rates, promotion, student matriculations, student GPA, high school credit acquisition
	Outcome Metrics o Decreased rates of Chronic Absenteeism; In-School and Out of School Suspensions; High School Drop Out Rate o Increased rates of Student Engagement; High-School Graduation; School Attendance; Parent Engagement; Self-
	confidence; Acquisition of graduation requirements o Improved functioning in family and community o Develop transferable skills that will prepare Elevate Bridgeport participants for postsecondary education, trade school, or the military.

						o Increased enrollment in post- secondary education, trade school, or military. o Increased skills as a results of cross-age mentoring between high school students and middle/elementary school students. Skills will focus on the following areas: Accountability, Responsibility, Public Speaking Skills, Role-Modeling, Time Management Skills, Leadership Skill Development
29738	Grant to RHAM Manufacturing Program	\$ 22	2,000 6.1 - Provision of Government Services	The State Department of Education is still in the preliminary phases of scoping out this project. Funds are anticipated to support manufacturing programming at Regional Hebron, Andover, and Marlborough High School, however exact uses are still being determined in order to comply with federal guidance.		
29739	East Hartford Youth Services	\$ 200	2.25 - Addressing Educational Disparities: Academic Social and Emotional Services	The State Department of Education is still in the preliminary stages of scoping out this project. The	The program is in early development stages and will provide detail on its use of evidence and/or program evaluation plans in future reports.	The program is in early development stages and will provide performance metrics in future reports.
29740	Student Achievement	\$ 100	0,000 6.1 - Provision of Government Services	The Connecticut State Department of Education is still in the preliminary phases of scoping out this project		

	Through Opportunity			working with the intended recipient to determine an eligible use of funds.	
29741	Summer Camp Scholarships for Families	\$ 3,500,000	To be determined	Funding provided to support summer camp scholarships for families. Project scoping and development currently underway.	
29742	New Haven Local Little League	\$ 500,000	6.1 - Provision of Government Services	The State Department of Education is still in the preliminary stages of scoping out this project. Funds will likely be operationalized to either provide economic support to the New Haven little league in proportion to its revenue loss or to provide enhanced programming for students in this high need local educational agency.	
29743	Hamden Before and After School Programming	\$ 400,000	2.24 - Addressing Educational Disparities: Aid to High-Poverty Districts	The State Department of Education is still in the preliminary stages of scoping out this project. Funds will support before and after school programming in Hamden Connecticut, a high need district that serves 4,371 Free and Reduced Price Lunch Students. Hamden is also an alliance district, one of the state's 33 lowest performing districts.	The program is in early development stages and will provide performance metrics in future reports.
29744	Hamden Pre-K Programming	\$ 100,000	2.24 - Addressing Educational Disparities: Aid to High-Poverty Districts	The State Department of Education is still in the preliminary stages of scoping out this project. Funds will support Pre-K Programming in Hamden Connecticut, a high need district that serves 4,371 Free and Reduced Price Lunch Students.	The program is in early development stages and will provide performance metrics in future reports.

				Hamden is also an alliance district, one of the State's 33 lowest performing districts.	
29746	Swimming Lessons to DEEP	\$ 1,500,000	6.1 - Provision of Government Services	The Department of Energy and Environmental Protection will utilize funds to provide free swim lessons for children of families with limited financial ability to improve access to outdoor recreation. Lessons will be provided by community organizations.	
29747	Health and Safety Barriers to Housing Remediation	\$ 7,000,000	6.1 - Provision of Government Services	The funds would be invested into retrofit programs making homes healthier for people working and learning from home. At least 30% of homes have health and safety barriers such as asbestos and mold that threaten health of residents, and prevent weatherization upgrades such as insulation and efficiency measures that provide critical energy savings. Weatherization services include core weatherstripping, sealing services, and add-on attic and wall insulation.	
29748	Efficient Energy Retrofit for Housing	\$ 7,000,000	6.1 - Provision of Government Services	The funds will provide energy efficiency retrofits and access to renewable energy resources as well as solar storage to reduce energy costs and pollution and promote equity and environmental justice for	

				people working and learning from	
				home.	
29749	Quinnipiac Avenue	\$ 25	0,000 2.22 - Strong	The funds will be used to improve the	
	Canoe Launch		Healthy	Quinnipiac Avenue Canoe Launch to	
			Communities:	provide improved recreation for a	
			Neighborhood	qualified census tract community.

29750	Downtown Evening	\$ 200,000	2.34 - Assistance	Downtown Evening Soup Kitchen	Number of non-profits served: 1
	Soup Kitchen		to Impacted	(DESK) serves people who are	·
	·		Nonprofit	experiencing homelessness or living	
			Organizations	in poverty by providing food	
			Impacted or	assistance and services including	
			Disproportionately	nightly dinners, a weekly food pantry,	
			Impacted	and a drop-in resource center in	
			'	downtown New Haven. Funding was	
				requested for an HVAC system and	
				an elevator that goes from the soup	
				kitchen to the health clinic upstairs.	
				Specifically, the elevator will allow for	
				ADA compliance and client access to	
				the second floor medical clinic	
				operated by Cornell Scott Hill Health	
				Center (CSHHC) from the first floor	
				Drop-in Center. This center was	
				opened in April 2021 in response to	
				increased utilization of DESK's	
				programs. The target population is	
				for unhoused persons of whom the	
				Greater New Haven Coordinated	
				Access Network has seen a marked	
				increase since the start of the	
				pandemic and for whom they expect	
				to see continual increase with the	
				end of the eviction moratorium as	
				well as those who are unstably	
				and/or recently housed and availing	
				themselves of Cornell Scotts	
				Homeless Healthcare Department	
				essentially as their primary care. The	
				purpose of the elevator is to facilitate	
				access to the second floor medical	

	facilities. The medical facilities will enable low-barrier onsite medical care for people experiencing unsheltered homelessness including COVID-19 testing and vaccination administration. Along with other basic needs provisions like food and immediate refuge the presence of the medical facility serves as a draw for the hundreds of individuals experiencing homelessness in New Haven who consider the CSHHC Homeless Healthcare team to be their primary care. As a result, the medical services offer an opportunity to connect these clients to housing services and get them off the street where they are at risk of a variety of adverse health conditions and infectious disease including COVID- 19.

29767	Customized Services for Mortgage Crisis Jobs Training Program	\$ 1,100,000	6.1 - Provision of Government Services	The Mortgage Crisis Job Training Partnership Program will respond to the negative economic impacts of the public health emergency on homeowners by providing the following assistance to homeowners as follows Assessments of eligibility; employment services; employment support services; job training; career coaching; Trainings to address economic hardship; financial literacy and credit counseling; COVID-safety training and job-specific training; Training scholarships for job training; support services including housing-	The program is in early development stages and will provide detail on its use of evidence and/or program evaluation plans in future reports.	
29768	Care4Kids Parent Fees	\$ 5,300,000	6.1 - Provision of Government Services	supports as needed. Funds supported parent fees in Care4Kids Connecticut's childcare subsidy program for low to moderate income families. To be eligible for Care4Kids a family most be at or below 60% of State Median Income. The Connecticut Office of Early Childhood (OEC) used these ARPA SLFRF funds along with other federal stimulus funds awarded directly to OEC to cover parent fees from April to November of 2021.		Performance metrics not yet available. Metrics will be provided in future reports.

29769	Parents Fees for 3-4 Year Old's at State Funded Childcare Centers	\$ 3,500,000	6.1 - Provision of Government Services	For the service months of July and August, funds were used to support parent fees at state funded Child Day Care Centers and School Readiness Programs. Funding was limited to families at or under 75% of State Median Income, to centers located in priority school districts, or to centers located in Qualified Census tracks.		Performance metrics not yet available. Metrics will be provided in future reports.
29770	Universal Home Visiting	\$ 10,300,000	6.1 - Provision of Government Services	\$7 million of the funding in this projected has been dedicated to a universal home visiting pilot program in the Bridgeport Connecticut region. The remaining \$1 million has been dedicated to support a home visiting contract in the New Haven Connecticut region. Both of these programs will connect families with behavioral and mental health resources responding to health disparities exacerbated by the pandemic. An additional \$2.3 million was allocated for FY23 to support ongoing universal home visiting efforts.	The Universal Home Visiting Program will be piloted through Family Connects, an evidence- based home visiting model that pairs new mothers with registered nurses to provide up to 3 home visits for needs assessments and knowledge sharing. Nurses will also help families gain access to critical community programs and resources to support. Home visiting has been shown to improve mental and physical health outcomes and prevent child maltreatment, resulting in a 50% reduction of emergency medical care use (years 0-1) and a 28% reduction in mothers' clinical anxiety. This project will also include a program evaluation.	Performance metrics not yet available. Metrics will be provided in future reports.

29772	Summer College Corps	\$ 1,500,000	2.37 - Economic Impact Assistance Other	During the summer of 2021 College Corps, based on the AmeriCorps model of addressing community challenges through civic engagement and service, recruited and deployed a corps of undergraduate college student interns to serve as academic enrichment summer counselors for K-12 students in various enrichment programs throughout Connecticut. The program's goals were to provide enriching summer experiences to K-12 students to prepare for the upcoming return to in-person schooling in Fall 2021.	AmeriCorps programs, the national-level model that serves as the basis for CT's College Corps program, has demonstrated success in helping K-12 students achieve positive educational outcomes. AmeriCorps educational programs have demonstrated success in the areas of improved reading and math achievement, reduced school dropout rate, improved standardized test scores, improved socioemotional skills, and other benefits. (Evidence Brief: Effective CNCS-Funded Education Programs, 2018). One specific study, looking at a summer early literacy program, found that students participating in the summer program demonstrated a 10% improvement in literacy skills relative to students who did not participate, showing that summer programs can still have an outsized impact on students.	Performance metrics not yet available. Metrics will be provided in future reports.
29773	Private Providers	\$ 60,000,000	2.34 - Assistance to Impacted Nonprofit Organizations Impacted or Disproportionately Impacted	Funding will support a minimum wage increase for employees in the Department of Developmental Services provider settings and support a 3% increase for those making over the minimum wage plus fund a health and retirement pool to enhance benefits for these important health care workers.		Number of non-profits served: To be determined

29774	PPE & Supplies State Employee	\$ 20,000,000 35,000,000	1.5 - Personal Protective Equipment 4.1 - Public Sector	This funding will support the purchase of personal protective equipment and supplies to combat COVID-19. Premium pay for state employee	
	Essential Workers and National Guard Premium Pay		Employees	essential workers and national guardsmen. This will require collective bargaining with the state's unionized workforce.	
29776	Higher Education – UConn	\$ 25,000,000	6.1 - Provision of Government Services	Support is provided to the University of Connecticut (UConn) for the provision of public services. In response to significant revenue losses experienced in UConn's housing and dining units UConn will utilize this allocation for Residential Life and Dining Services operating expenditures in order to keep these critical services functioning for students residing on campus. Those operating expenses include food purchase contractual staff facility operations and equipment	
29777	Revenue Impact	\$ 35,000,000	3.3 - Public Sector Workforce: Other	Support is provided to the University of Connecticut Health Center (UConn Health) for the provision of public services. 			Disproportionately Impacted	revenue loss, operating challenges, and increased costs.		
28030	R-Kids	\$ 100,000	2.34 - Assistance to Impacted Nonprofit Organizations Impacted or Disproportionately Impacted	Funding provided to mitigate financial hardship as this entity experienced negative economic impacts from the pandemic, including revenue loss, operating challenges, and increased costs.		The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28031	Enhance Community Engagement Opportunities	\$ 2,000,000	To be determined	The purpose of this funding is to improve the wellbeing of individuals with intellectual and developmental disabilities by facilitating additional opportunities for recreational community engagement and leisure activities that facilitate socialization and connection, as we come out of the pandemic. Individuals with intellectual and developmental disabilities were frequently subject to more restriction on community engagement throughout the pandemic, due to higher level health risks or higher risk residential settings that were subject to additional health and safety protocols. This was an area specifically identified by stakeholders as a priority for inclusion in the Dept. of Developmental Services' Five Year Plan covering 2022-2027.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.

28032	Improve Camps	\$ 2,000,000	To be determined	The purpose of this funding is to support capital improvements to the camps serving individuals with intellectual and developmental disabilities. Improvements may include basic maintenance and upgrades, as well as projects to increase accessibility and use of facilities for specialty care (e.g., medical, etc.). Camps are the agency's primary program for individuals and caregivers to access planned respite. Capital costs are not reimbursed by the agency.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28033	One Time Stabilization Grant	\$ 20,000,000	To be determined	The purpose of this funding is to support contracted providers delivering services to individuals with intellectual disability. The COVID-19 pandemic significantly destabilized the provider network, both in terms of service utilization and workforce stability. This funding will be used to offset economic hardship and stabilize the network for services moving forward.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28034	Vista	\$ 500,000	To be determined	The purpose of this funding is to support provision of enhanced inhome supports to individuals with intellectual disability and their families. The provider loses a significant amount of money every year on a more robust service package than the current rates support.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.

28035	International Festival of Arts and Ideas New Haven	\$ 200,000	2.34 - Assistance to Impacted Nonprofit Organizations Impacted or Disproportionately Impacted	Funding provided to mitigate financial hardship as this entity experienced negative economic impacts from the pandemic, including revenue loss, operating challenges, and increased costs.		The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28036	CT Summer at the Museum Program	\$ 15,000,000	2.35 - Aid to Tourism Travel or Hospitality	Provides for free museum access for children with one adult family member to promote the state's summer learning objectives as well as marketing of the free museum access program. This effort intends to offset the negative economic impacts to the tourism sector as a result of the pandemic.		The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28037	CT Next	\$ 2,000,000	2.30 - Technical Assistance Counseling or Business Planning	Funding for CT Next, a program that provides technical assistance to entrepreneurs in Connecticut. Program activities include direct assistance through capital, mentorship, networking, and skills development and facilitating a network of entrepreneurs that supports collective success.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28038	Hartford YMCA Family Programming	\$ 500,000	2.34 - Assistance to Impacted Nonprofit Organizations Impacted or Disproportionately Impacted	Funding provided to mitigate financial hardship as this entity experienced negative economic impacts from the pandemic, including revenue loss, operating challenges, and increased costs.		The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.

28039	Future, Inc.	\$	1,300,000	2.34 - Assistance to Impacted Nonprofit Organizations Impacted or Disproportionately Impacted	Funding provided to mitigate financial hardship as this entity experienced negative economic impacts from the pandemic, including revenue loss, operating challenges, and increased costs.		The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28040	Sons of Thunder	\$	100,000	2.34 - Assistance to Impacted Nonprofit Organizations Impacted or Disproportionately Impacted	Funding provided to mitigate financial hardship as this entity experienced negative economic impacts from the pandemic, including revenue loss, operating challenges, and increased costs.		The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28041	Youth Service Corp	φ	1,100,000	2.10 - Assistance to Unemployed or Underemployed Workers (e.g., job training subsidized employment supports or incentives)	The Youth Service grant will provide funding for certain municipalities to manage programs that include community-based service learning, academic support, and workforce development to youth and young adults. The programs will focus on youth or young adults who are involved with the justice system, involved with the Department of Children and Families, in foster care or experiencing homelessness. Each participant in a local Youth Service Corps program shall develop an individual success plan in which such participant shall identify goals relating to education, workforce or behavioral development.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.

				utilization resulting from capacity restrictions use and other public health guidelines or from periods of closure due to the pandemic.		
28118	Solar Youth	\$ 100,000	To be determined	Funding provided to mitigate financial hardship as this entity experience negative economic impacts from the pandemic, specifically revenue loss. This revenue loss was due to declines in utilization resulting from capacity restrictions use and other public health guidelines or from periods of closure due to the pandemic.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28119	Bullard-Havens Technical High School for Operating	\$ 50,000	6.1 - Provision of Government Services	Provide funding to support operating expenses for the Bullard-Havens Technical High School in Bridgeport.		The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.

28120	Provide Funding for	\$ 995,000	6.1 - Provision of	To improve forensic services in	The project was approved by
	a Mobile Crime		Government	support of the criminal justice	the Governor and Connecticut
	Laboratory		Services	system's goal to mitigate violent	General Assembly to begin in
				crimes within the state of	FY23. Performance metrics will
				Connecticut. Increases in gun	be provided in future reports.
				violence coupled with novel and	
				more dangerous drugs is inextricably	
				linked to the rise in violent crime in	
				the state. The use of forensic science	
				within crime laboratories plays a	
				critical role in the criminal justice	
				system. Studies have shown that	
				forensic laboratory collaboration	
				improves crime solvability and	
				accuracy of verdicts. Forensic science	
				can help identify a suspect (via DNA),	
				link crime scenes (via DNA and	
				firearms), identify dangerous drugs,	
				and extract probative information	
				from electronic media. Expeditious	
				work by crime laboratories using	
				state of the art analytical tools	
				provides investigative leads during	
				early stages of investigations, helps	
				focus law enforcement efforts in the	
				right direction, and ultimately results	
				in improved case clearance. The	
				agency's forensic laboratory has an	
				approach to greatly enhance its	
				capabilities to support Connecticut's	
				criminal justice system by	
				transporting forensic resources and	
				analytical support to the crime scene	
				and/or violent hot spots in order to	

	quickly disrupt criminal activities. This service will be provided using a mobile forensic laboratory vehicle equipped with the advanced technologies in DNA, firearms, and drug testing.	

28121	Provide Funding for	\$ 2,500,000	6.1 - Provision of	The mission of the Gun Tracing Task	The project was approved by
	the Gun Tracing		Government	Force is to combat illegal firearms	the Governor and Connecticut
	Task Force		Services	trafficking by tracing all illegally	General Assembly to begin in
				possessed firearms that are	FY23. Performance metrics will
				recovered. The purpose of the GTTF	be provided in future reports.
				is to trace all recovered firearms in	
				order to link them to other crimes	
				committed and determine how the	
				firearm was trafficked. The general	
				population is being served by taking	
				these illegal firearms, linking them to	
				other crimes, and identifying anyone	
				who may be illegally trafficking them.	
				The success of this project will be	
				measured by the number of firearms	
				that can be traced, the number of	
				other crimes solved by tracing these	
				recovered firearms, as well as the	
				successful arrests, prosecutions, and	
				reductions in violent crime offenses	
				we have reported from the start of	
				the project compared to preceding	
				years.	

28122	Provide Funding to	\$ 5,200,000	6.1 - Provision of	The purpose of these funds is to	The project was approved by
	State and Local		Government	reduce auto theft and other crimes	the Governor and Connecticut
	Police Departments		Services	related to auto theft in our	General Assembly to begin in
	to Address Auto			communities. The funds will be	FY23. Performance metrics will
	Theft and Violence			distributed to the cities and suburbs	be provided in future reports.
				as a "hub and spoke" approach to	
				reduce these types of crimes. They	
				will pay for increased police patrols	
				to help deter these criminal acts from	
				taking place. This funding will serve	
				the general population by reducing	
				auto thefts and auto theft related	
				crimes. This programs success will be	
				measured by the reduction of	
				reported crimes such as stolen motor	
				vehicles, thefts from vehicles, and	
				thefts of vehicle components, e.g.,	
				catalytic converters. These reported	
				crime statistics will be compared	
				from the start of the project to	
				preceding years.	

28123	Upgrade Forensic	\$ 2,843,000	6.1 - Provision of	The agency's forensic laboratory has	The project was approved by
	Technology at the		Government	developed the following approaches	the Governor and Connecticut
	State Crime Lab		Services	to greatly enhance its capabilities to	General Assembly to begin in
				support Connecticut's criminal justice	FY23. Performance metrics will
				system: 1. Backlog elimination and	be provided in future reports.
				improve laboratory turnaround time.	
				Eliminate the backlog of cases in the	
				DNA, Firearms, and Computer Crimes	
				and Electronic Evidence Forensic	
				Analysis units by providing additional	
				resources and technology. The	
				presence of backlogged cases within	
				the Division of Scientific Services	
				laboratory potentiates recidivism and	
				delays justice as probative evidence	
				remains unexamined. 2. Improve and	
				advance the laboratory by adding	
				and updating cutting edge	
				technology. The forensic field is	
				continuously improving analytical	
				instrumentation, techniques, and	
				information management tools so	
				that sensitivity is maximized,	
				scientific accuracy is maintained, and	
				that both the electronic flow of	
				forensic intelligence and the	
				electronic distribution of reports are	
				optimized to their full potential.	

28124	Rural Roads Speed	\$ 2,600,000	6.1 - Provision of	Since the onset of COVID-19, there	The project was approved by

				funding.		

28129	Poquetanuck Volunteer Fire Department	\$ 150,000	6.1 - Provision of Government Services	Funding to support the Poquetanuck Volunteer Fire Department for fire station infrastructure repairs and improvements to include a replacement roof, parking area pavement replacement and	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28130	Preston City Volunteer Fire Department	\$ 150,000	6.1 - Provision of Government Services	miscellaneous facility improvements. Funding to support the Preston City Volunteer Fire Department for fire station infrastructure repairs and improvements to include a replacement roof, exterior brick repair / repointing and miscellaneous facility improvements.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28131	Outdoor Recreation with \$1,000,000 for East Rock Park and \$1,000,000 for West Rock Park for maintenance, repair, and renovations	\$ 22,500,000	6.1 - Provision of Government Services	Provide funding for maintenance, repair, and renovations for state parks, including East Rock Park in New Haven and West Rock Ridge State Park.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28132	Engineering Study for Dam Removal on Papermill Pond	\$ 500,000	6.1 - Provision of Government Services	The Department of Energy and Environmental Protection will utilize funds to complete planning, engineering and obtain permits needed for the Paper Mill Pond Dam in the Town of Sprague. Paper Mill Pond Dam is a significant hazard dam on the Little River. The dam is owned by the Town of Sprague. Originally used by the paper companies that occupied the site for hydropower, that dam is in disrepair, covered with	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.

				woody vegetation, and has a large sink hole. Uncontrolled water is flowing through the dam and flooding the defunct powerhouse. Additional funding will be needed to construct the repair or removal of the dam.	
28133	Land Trust Boardwalk Installation	\$ 200,000	6.1 – Provision of Government Services	Provide funding to the town of West Haven to support the installation of the Land Trust Boardwalk.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28134	Clinton Town Beach	\$ 55,000	6.1 – Provision of Government Services	Funds will be used to renovate facilities at the Clinton Town Beach. Upgrades, renovations, repairs and improvements to the beach facilities, such as bathhouse house, concession stand, pavilions, splash pad and installation of a booster pump to increase the water supply to the splash pad and bathrooms.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28135	Crystal Lake & Bob Tedford Park Renovations	\$ 50,000	6.1 – Provision of Government Services	Provide funding to the town of Ellington to support renovations at public outdoor recreation areas at Crystal Lake and Bob Tedford Park.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28136	Ludlowe Park	\$ 75,000	6.1 – Provision of Government Services	Funds for the Town of Fairfield will be used to purchase a new athletic scoreboard.	The project was approved by the Governor and Connecticut General Assembly to begin in

						FY23. Performance metrics will be provided in future reports.
28137	Lighthouse Park	\$ 500,000	2.22 – Strong Healthy Communities: Neighborhood Features that Promote Health and Safety	Funds for park improvements in the disproportionately impacted community of New Haven. Funding for building improvements to the Lighthouse Park bathhouse structure, including program areas, bathrooms and storage.		The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28138	Park Commission Edgewood Park	\$ 800,000	2.22 – Strong Healthy Communities: Neighborhood Features that Promote Health and Safety	Funds for park improvements in the disproportionately impacted community of New Haven. Edgewood Park improvements include replacing a footbridge, improvements to athletic facilities, walking path and skate park.		The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28139	Angel of Edgewood	\$ 175,000	2.34 – Assistance to Impacted Nonprofit Organizations Impacted or Disproportionately Impacted	Funding provided to mitigate financial hardship as this entity experienced negative economic impacts from the pandemic, including revenue loss, operating challenges, and increased costs.		The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28140	Homeless Youth Transitional Housing	\$ 1,000,000	2.16 – Long-term Housing Security: Services for Unhoused Persons	Provide funding to support a statewide scattered-site transitional living program for young adults, similar to other federally funded transitional living programs for young adults in Connecticut.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.

28141	Homeless Services	\$ 5,000,000	2.16 – Long-term Housing Security: Services for Unhoused Persons	Provide funding to support homeless services in the state to combat the severe negative economic and public health impacts on unhoused individuals during the COVID-19 pandemic.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28142	Southside Institutions Neighborhood Alliance	\$ 500,000	2.34 – Assistance to Impacted Nonprofit Organizations Impacted or Disproportionately Impacted	Funding provided to mitigate financial hardship as this entity experienced negative economic impacts from the pandemic, including revenue loss, operating challenges, and increased costs.		The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28143	Support for Affordable Housing	\$ 50,000,000	2.15 – Long-term Housing Security: Affordable Housing	Provide funding of \$50 million to fund affordable housing initiatives across the state, with the intention to support the creation of 350 additional units of affordable housing targeted for households earning between 30% and 50% of the area median income and leveraging that investment to support the production of as many as 1,000 additional units of housing.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.

28144	Rental Assistance Program	\$ 1,000,000	2.2 – Household Assistance: Rent, Mortgage, and Utility Aid	Provide funding to support the Rental Assistance Program (RAP), Connecticut's state program to assisting very low income families to afford housing in the private rental market. A family that is issued a RAP certificate is responsible for finding a suitable housing unit of the family's choice where the owner agrees to rent under the program. The state pays the housing subsidy directly to the landlord on behalf of the participating family. The family pays the difference between the actual rent charged by the landlord and the amount subsidized by the program.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28145	Enhance Mobile Crisis Services- Case Management	\$ 3,200,000	1.12 – Mental Health Services	Provide funding to support case management services for individuals awaiting treatment post-crisis.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.

28147	Expand Availability of Privately- Provided Mobile Crisis Services	\$ 6,000,000	1.12 - Mental Health Services	This project will expand mobile crisis services at each of the 8 Department of Mental Health and Addiction Services-funded private non-profit mobile crisis teams with the ultimate outcome of providing in-person, mobile crisis response 24 hours a day, 7 days a week, 365 days a year. The agencies that will receive this funding are: Communicare (BHCare and Bridges), Community Mental Health Affiliates, Community Health Resources, InterCommunity, Danbury Hospital, Rushford, and United Services.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.

28148	Fund Supportive Services to Accompany New Housing Vouchers	2,812,500	2.18 - Housing Support: Other Housing Assistance	Fund supportive housing services for persons residing in Rapid Rehousing (RRH) programs in Connecticut. The Department of Mental Health and Addiction Services (DMHAS) funded providers will offer pre-tenancy support (gathering paperwork, assistance with housing applications, applying for benefits) and post tenancy housing sustaining services (budgeting, employment, tenancy mediation). DMHAS has a service slot rate of \$9,000/ person annually, which will allow 125 persons to receive these services. Aligning the services to RRH will assist persons in transitioning from the RRH program into mainstream housing, which is an overarching goal of RRH. Population served are persons experiencing homelessness or who are at risk of homelessness and who are also diagnosed with a behavioral health diagnosis.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	Desired outcomes include: housing sustainability, increased income, and connection to mainstream services. Services will be aligned throughout CT which will assist the State's continued pursuit in making homelessness rare, brief and one-time. Outcomes will be measured on the Homeless Management Information System and reported to various funders.
28149	Provide Mental Health Peer Supports in Hospital Emergency Departments	\$ 2,400,000	1.12 - Mental Health Services	This funding will implement certified peer specialists in 12 hospital emergency departments. This is similar to the Recovery Coaches that are responding to 22 hospital emergency departments for people with Substance Use Disorders.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.

28150	Implement Electronic Health Records	\$ 16,000,000	3.4 - Public Sector Capacity: Effective Service Delivery	This project will implement a new electronic health records system (EHRS) for the eight Department of Mental Health and Addiction Services-operated facilities. The facilities currently use a paper medical record in conjunction with various home-grown IT systems to form a complete client health record. The new EHRS will incorporate all components into one record through a selected vendor. The EHRS implementation will be funded through ARPA dollars as well as state IT bond funds.		The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28151	Public Awareness Grants	\$ 1,000,000	1.12 - Mental Health Services	Focused on mental health promotion and access to treatment resources as needed for the general public.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28152	Peer-to-Peer	\$ 500,000	1.12 - Mental Health Services	Provide funding to support peer-to- peer mental health services. Project scoping and development currently underway.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28153	United Services Pilot on Crisis Intervention	\$ 200,000	1.11 - Community Violence Interventions	This funding will extend the United Services Pilot of the CRISIS (Connection to Recovery through Intervention, Support & Initiating Services) program with the Connecticut State Police Troop D by providing a licensed clinical social	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. 28204	Provide Funding to Enhance Technology for Citations and Hearings in the Criminal Infractions Bureau	\$ 606,915	3.4 - Public Sector Capacity: Effective Service Delivery	The COVID-19 pandemic has emphasized the need for remote options to adjudication of high volume many case types that bring large amounts of people together in confined Judicial Branch facilities. This project will result in the development of an end-to-end remote solution for infractions and payable violations, equip law enforcement agencies with requisite hardware to deliver all infraction and payable violation enforcement actions issued electronically to the Centralized Infractions Bureau, and create remote hearing spaces for infractions and violations outside of traditional court facilities to ensure defendant access to justice, the ability for witnesses to participate remotely, and the infrastructure for a remote adjudicator.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28205	Provide Funding to Enhance the Department's Case Management and Scheduler Application	\$ 1,382,900	3.4 - Public Sector Capacity: Effective Service Delivery	Design and build a central case management and scheduler application to integrate all individual processes of the remote justice platform under one umbrella, promoting efficiency and increasing the ability to resolve cases that have accumulated during the pandemic.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28206	Provide Funding to Establish Video Conferencing for Municipal Stations	\$ 60,000	3.4 - Public Sector Capacity: Effective Service Delivery	This project looks to provide and expand videoconferencing capability to the identified Police Departments to assist clients who are in the	The project was approved by the Governor and Connecticut General Assembly to begin in

	for Bail and Support Services			custody of law enforcement agencies gain timely access to pre-trial services.		FY23. Performance metrics will be provided in future reports.
28207	Provide Funding to Expand Housing Opportunities for Individuals on Bail	\$ 5,831,228	To be determined	This project looks to expand partnerships with state agencies, such as Department of Housing (DOH) for Pre-Trial Rapid Rehousing, Department of Corrections (DOC) for Re-Entry Assisted Community Housing, and Department of Mental Health and Addiction Services (DMHAS) for Residential Treatment services to provide housing and treatment to clients charged with a crime who have mental health issues, substance use disorders, or suffer from housing instability or homelessness	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28208	Provide Funding to Hire Assistant Clerks and Family Relations Counselors to Reduce Family and Support Matter Case Backlogs	\$ 6,589,702	3.5 - Public Sector Capacity: Administrative Needs	The family and support dockets impact the lives of many Connecticut families and children. These families have been adversely impacted by the backlog created as a result of limited operations during the COVID-19 pandemic. While the ability to hear matters remotely has helped the courts move business, remote matters simply cannot be scheduled at the same levels that in-person court events allow. As a result, more and more court events are being conducted in-person, requiring additional staffing support and		The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.

				resources. This project will support the addition of 15 assistant clerks and will allow clerks' offices to meet the demands of increased court time and case processing while still providing a consistent level of service to the judges, public, bar, and our partner stakeholders.	
28209	Provide Funding to Support Application Development for Monitor Note- Taking and Recording	\$ 1,149,804	3.4 - Public Sector Capacity: Effective Service Delivery	Enhancements to Remote Court Monitor Log Notes and Backup Audio Recording Application that will enhance efficiency and help to resolve cases that accumulated during the pandemic.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.

28210	Provide Increased Funding for Victim Service Providers	\$ 14,865,300	To be determined	This funding will be used to offset a reduction in federal funding from the Dept. of Justice and will maintain existing services to victims of crime in Connecticut. Funds will be used to provide crisis counseling, case management, systems advocacy, behavioral health services, emergency financial assistance, safety planning and other services to crime victims. The population to be served includes victims, and their family members, of assault, child abuse, community violence, domestic violence, elder abuse, homicide, human trafficking, sexual abuse and other violent crimes.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The desired outcomes for the project include reducing the immediate and long-term social, emotional, psychological, behavioral, and financial consequences of victimization for victims and their families; promoting healing and safety for victims of crime; and receiving effective and equitable levels of assistance and resources to achieve justice, safety, and economic/emotional independence as they move from victim to survivor. Outcomes are measured by each contractor based on specific goals and objectives that are identified for each

			supports or incentives)			
28218	Bridgeport Workplace	\$ 750,000	2.10 - Assistance to Unemployed or Underemployed Workers (e.g., job training subsidized employment supports or incentives)	YouthBuild is a community-based pre-apprenticeship program that provides job training and educational opportunities for at-risk youth ages 16-24 who have previously dropped out of high school.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28219	YouthBuild	\$ 750,000	2.10 - Assistance to Unemployed or Underemployed Workers (e.g., job training subsidized employment supports or incentives)	YouthBuild is a community-based pre-apprenticeship program that provides job training and educational opportunities for at-risk youth ages 16-24 who have previously dropped out of high school.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28220	Cradle to Career - Bridgeport	\$ 150,000	To be determined	Bridgeport Prospers is a comprehensive, multi-year effort focused on uplifting the lives of Bridgeport's children, from "cradle to career" by co-designing solutions with community members.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28221	Review of Title 7	\$ 27,000	6.1 - Provision of Government Services	Provide funding to conduct a study reviewing Title 7 of the Connecticut General Statutes, which pertains to municipalities.		The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.

28222	Expand Access - Apprenticeship	\$ 5,000,000	2.10 - Assistance to Unemployed or Underemployed Workers (e.g. job training, subsidized employment, employment supports or incentives)	Provide funding to expand access to the childcare apprenticeship program which allows child care development specialist apprentices to combine paid employment with classroom education to work towards a training credential and improve career prospects.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28223	Care4Kids	\$ 10,000,000	2.11 - Healthy Childhood Environments: Child Care	Funding provided to support the Care4Kids childcare subsidy program, which helps low to moderate income families in Connecticut pay for child care costs. This grant program bolsters the provision of healthy early childhood environments in disproportionately low- to moderate-income communities and helps parents address COVID-19 related income loss and to provide support to parents re-entering/remaining in the workforce.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.

28224	Early Childhood - Facility Renovation and Construction	\$ 15,000,000	2.11 - Healthy Childhood Environments: Child Care	Funding provided for the construction and renovation of new childcare centers in "childcare deserts" across the state, prioritizing centers, groups, and family childcare homes in communities of need as reflected by metrics such as the Social Vulnerability Index (SVI) and Childcare Accessibility Affordability and Transportation (CAATI). This grant program bolsters the provision of healthy early childhood environments in disproportionately low- to moderate-income communities and helps parents address COVID-19 related income loss and to provide support to parents re-entering/remaining in the workforce.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28225	Capitol Child Day Care Center	\$ 75,000	2.11 - Healthy Childhood Environments: Child Care	Provide funding to support the Capitol Child Development Center, a daycare center serving children ages 8 weeks through 5 years of age in the greater Hartford region. Funding provided to mitigate financial hardship and adapt to changing COVID-19 mitigation requirements as the child care industry experienced negative economic impacts from the pandemic, including revenue loss, operating challenges, and increased costs.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.

28226	Childcare Apprenticeship Program	\$ 1,500,000	2.10 - Assistance to Unemployed or Underemployed Workers (e.g., job training subsidized employment supports or incentives)	Provide funding to support the childcare apprenticeship program which allows child care development specialist apprentices to combine paid employment with classroom education to work towards a training credential and improve career prospects.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28227	School Readiness	\$ 30,000,000	To be determined	Provide ARPA funding to support School Readiness programs through supplemental grant enhancements for child care providers who serve low- and moderate-income households in the state.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28228	Start Early - Early Childhood Development Initiatives	\$ 20,000,000	To be determined	Provide ARPA funding to support School Readiness programs through supplemental grant enhancements for child care providers who serve low- and moderate-income households in the state.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Details on its use of evidence and/or program evaluation plans will be provided in future reports.	The project was approved by the Governor and Connecticut General Assembly to begin in FY23. Performance metrics will be provided in future reports.
28229	Improve Data Collection and Integration with HIE	\$ 1,150,000	6.1 - Provision of Government Services	Provide funding to initiate electronic health information exchange systems changes that are needed to collect race and ethnicity language data.
