**Economic Release at glance: Unemployment Rate**

The unemployment rate represents the number of unemployed as a percentage of the labor force. Labor force data are restricted to people 16 years of age and older, who currently reside in 1 of the 50 states. An unemployed person is someone who is actively looking for work but does not have a job. The unemployment rate is a measure of the number of people who are both jobless and looking for a job. This measurement is considered a lagging indicator, confirming but not foreshadowing long-term market trends.

In particularly tough economic times, the unemployment rate may be lower than the number of people out of work because the official rate only includes those individuals that are actively looking for work. Those workers who have become discouraged and dropped out of the labor force are not counted in unemployment statistics, instead they are captured in the "underemployment" figures which tend to be higher.

The Fund Management monitors and evaluates the portfolio to ensure compliance with its Investment Policy and adherence to rating agency guidelines. Below table summarizes some of the key metrics.

**Rating Requirements**

Weighted Average Maturity (WAM) - maximum 60 days

Weighted Average Life (WAL) - maximum 120 days

Weekly S&P reporting
