Economic Release at glance: Personal Consumption Expenditure (PCE)

The "core" PCE price index is defined as personal consumption expenditures (PCE) prices excluding food and energy prices. The core PCE price index measures the prices paid by consumers for goods and services without the volatility caused by movements in food and energy prices to reveal underlying inflation trends. **Personal consumption expenditure (PCE)** is a measure of price changes in consumer durable and non-durable goods and services. It is essentially a measure of goods and services targeted towards individuals and consumed by individuals. The **PCE price index** is also referred to as the **PCE deflator, PCE price deflator**.

The Fund Management monitors and evaluates the portfolio to ensure compliance with its Investment Policy and adherence to rating agency guidelines. Below table summarizes some of the key metrics.

Rating Requirements

Weighted Average Maturity (WAM) - maximum 60 days

Weighted Average Life (WAL) - maximum 120 days
