Economic Release at Glance: GDP annualized QoQ

Gross domestic product (GDP) is a monetary measure of the market value of all final goods and services produced in a period (quarterly or yearly). GDP estimates are commonly used to determine the economic performance of a whole country or region, and to make international comparisons. GDP attempts to measure the "use" economy, i.e., the value of finished goods and services ready to be used by consumers, business and government.

The Fund Management monitors and evaluates the portfolio to ensure compliance with its Investment Policy and adherence to rating agency guidelines. Below table summarizes some of the key metrics.

Rating Requirements

Weighted Average Maturity (WAM) - maximum 60 days

Weighted Average Life (WAL) - maximum 120 days

Weekly S&P reporting

Portfolio Credit Quality and Diversification*

At least 75% of the overall portfolio's assets shall be invested in securities rated A-1+ or in overnight repurchase agreements rated A-1

No more than 5% of the portfolio may be invested in individual security and no more than 10% may be invested in individual issuer

Floating / Variable rate securities with maturity up to 730 days should not exceed 25% of the overall portfolio

* at the time of purchase
