GOALS FOR THIS SESSION

- Connect the concepts of equity and school climate/culture
- Explore how culture shapes environment and the effect an inequitable culture has on students, teachers, families
- Provoke interest in the Climate/Equity Tool as a way to develop a plan to achieve equity
- Explore the concepts of “equity” and “educational equity” and their importance
WHY ARE WE HERE?

To address a fundamental disconnect in our educational systems...

School systems are created to serve students with “mainstream” identities.
THE OPPORTUNITY IN MANCHESTER

- Using the existing climate survey as an entry point to assess equity
- District readiness
  - Executive Leadership at the helm
  - Prior focus on race, racism and adaptive change...stay tuned
- Partnership with The Discovery Center, MPS and national expert Dr. Paul Gorski from EdChange
- Generous grant funding from The Graustein Memorial Fund
OUR APPROACH

Deficit Focus
“there is something wrong with students and families”

Systems Focus
“there is something wrong with the educational system”

THIS IS A CRITICAL SHIFT!!
Our Assertions:

- By assessing school climate, we can better understand how equitable our schools are.
- To do this, we must change the way we assess climate to hone in on the experiences of students with marginalized identities.
- This type of change can only happen when there is commitment to EQUITY from the TOP!!
What is Equity?
Notice, Feel, Question, Think… Act
Equity is achieved when student outcomes are not predicated by gender, race, ethnicity, class, or special needs and where all students reach a level of efficacy and competence that supports a rewarding and productive life. This requires elimination of the inequities that contribute to disproportionate learning and achievement by students of certain social groups while ensuring students are prepared for a productive and meaningful life.

*Taken from the Connecticut Center for School Change Presentation on Equity*
“I believe that education is the civil rights issue of our generation. And if you care about promoting opportunity and reducing inequality, the classroom is the place to start. Great teaching is about so much more than education; it is a daily fight for social justice.”

Arne Duncan
former Secretary of Education
“Rather than give in to the helplessness we feel to stop racism and our collective, civic hemorrhage, every institution must examine its own role in perpetuating (inadvertently and advertently) racist thinking and policies. We can't truly create equal opportunities for all until our institutions take specific actions to end that thinking and those policies. And ground zero for an equitable, non-racist society is the K–12 classroom.”

Let's Talk about Racism in Schools
Rick Wormeli
The major challenge is to meet the need to generate new leadership. The paucity of courageous leaders ... requires that we look beyond the same elites and voices that recycle older frameworks. We need leaders - neither saints nor sparkling television personalities - who can situate themselves within a larger historical narrative of this country and our world, who can grasp the complex dynamics of our peoplehood and imagine a future grounded in the best of our past, yet who are attuned to the frightening obstacles that now perplex us. Our ideals of freedom, democracy, and equality must be invoked to invigorate all of us, especially the landless, propertyless, and luckless. Only a visionary leadership that can motivate the better angels of our nature as Lincoln said and activate the possibilities for a freer more efficient and stable America - only that leadership deserves cultivation and support.

Cornel West, Author
The most transformative and resilient leaders that I’ve worked with over the course of my career have three things in common: First, they recognize the central role that relationships and story play in culture and strategy, and they stay curious about their own emotions, thoughts, and behaviors. Second, they understand and stay curious about how emotions, thoughts, and behaviors are connected in the people they lead, and how those factors affect relationships and perception. And, third, they have the ability and willingness to lean in to discomfort and vulnerability.”

TECHNICAL PROBLEMS VS. ADAPTIVE CHALLENGES

Technical
● Easy to identify
● Quick solutions
● Solved by Authority

Adaptive
● Difficult to identify
● Require changes in values, approaches, relationships
● People with the problem do the work of solving it

Dr. Ronald Heifetz, Harvard University
ADAPTIVE CHANGE

Exercise Regularly
Eat Healthy
Reduce Stress
Drink Plenty of Water

Healthy Life
ADAPTIVE CHALLENGES
WORK IN MANCHESTER

Technical vs Adaptive

Problem: Opportunity gap between students of color and their white counterparts

Technical
Instead of doing solely this...

Adaptive
Do this.

A connected web of supports designed to result in systems becoming more equitable

We work with schools and organizations that serve youth

- Manchester Public Schools project to assess inequity in the school system and implement a plan of action
- Workshops/PD with administrators and teachers helping them to see inequity and be inspired to change it
- Youth programming centered on facilitating spaces where youth can understand and challenge systemic racism and oppression and think critically about their role in changing their communities
  - Residential Program

Equity Audit Statements

The Discovery Center is working with some local and national partners to develop an Equity Audit Assessment and Implementation Plan. Below are some sample statements that can be used to identify areas of strength and opportunities for growth within your school and district. Please read each statement, answer with the suggested scale, and then we will discuss meaning and evidence to support each statement rating.

1. -- Strongly Agree
2. -- Agree
3. -- Disagree
4. -- Strongly Disagree

Statements are adapted from:

Community and Parent Factors
