---

Dear Trusted Members of The Board of Education,

This email regards to the fact that I am saddened by the lack of attention payed to the parents of scholars in the community of Stamford Excellence. I myself believe that the Stamford Charter School of Excellence is by far one the best elementary schools I have come across. They're exemplary teach methods have proven time by time that they can mold kids into becoming outstanding students. I have two kids going to the school and I have first hand noticed they're improvement and benefits from going to the school. Considering that I also have a son going into 9th grade, I can say that I am familiar with the teaching principals of several schools, of which none compare to those of SCSE. Therefore I stand by the movement for extending SCSE to a middle school so that kids of even older ages get the opportunity of going to such a great school. Though the timing and condition of this situation isn't optimal, I have no intention of further exacerbating it. I do however hope to get my word out and foresee such a change.

Stay home stay safe
