The Barkhamsted School District’s Educator Evaluation Process and Guidelines shall be based on Connecticut’s System for Educator Evaluation and Development (SEED) as revised for the 2015-16 school year and as modified via future revisions. The document to be used for 2015-16 teacher evaluation is titled, “2014 SEED State Model Updates.”

The following outline follows the SEED process for the Barkhamsted School District.

Teacher Evaluation Overview

Teacher Evaluation and Support Framework

The evaluation and support system consists of multiple measures to paint an accurate and comprehensive picture of teacher performance. All teachers will be evaluated in four components, grouped into two types of major categories: Teacher Practice and Student Outcomes.

1. Teacher Practice Related Indicators: An evaluation of the core instructional practices and skills that positively affect student learning. This category is comprised of two components:
   - (a) Observation of Teacher Performance and Practice (40%) as defined within the CCT Rubric for Effective Teaching 2014, which articulates four domains and twelve indicators of teacher practice
   - (b) Parent Feedback (10%) on teacher practice through surveys

2. Student Outcomes Related Indicators: An evaluation of teachers’ contributions to student academic progress at the school and classroom level. There is also an option in this category to include student feedback. This area is comprised of two components:
   - (a) Student Growth and Development (45%) as determined by the teacher’s Student Learning Objectives (SLOs) and associated Indicators of Academic Growth and Development (IAGDs)
   - (b) Whole-School Measures of Student Learning as determined by aggregate student learning indicators or Student Feedback (5%)

Scores from each of the four components will be combined to produce a summative performance rating designation of Exemplary, Proficient, Developing or Below Standard. The performance levels are defined as:

- Exemplary – Substantially exceeding indicators of performance
- Proficient – Meeting indicators of performance
- Developing – Meeting some indicators of performance but not others
- Below Standard – Not meeting indicators of performance
Process and Timeline

The annual evaluation process between a teacher and an evaluator (principal or designee) is anchored by three conferences, which guide the process at the beginning, middle and end of the year. The purpose of these conversations is to clarify expectations for the evaluation process, provide comprehensive feedback to each teacher on his/her performance, set development goals and identify development opportunities. These conversations are collaborative and require reflection and preparation by both the evaluator and the teacher in order to be productive and meaningful.

Goal Setting & Planning
- Orientation on process
- Teacher reflection and goal-setting
- Goal-setting and plan development by November 15

Mid-Year Check-in
- Review goals and performance to date
- Mid-year conference January/February

End-of-Year Review
- Teacher self-assessment
- Scoring
- End-of-year conference by June 30th
GOAL-SETTING AND PLANNING:
Timeframe: Target is October 15,
must be completed by November 15

1. **Orientation on Process** – To begin the evaluation process, evaluators meet with teachers, in a group or individually, to discuss the evaluation process and their roles and responsibilities within it. In this meeting, they will discuss any school or district priorities that should be reflected in teacher practice focus areas and Student Learning Objectives (SLOs), and they will commit to set time aside for the types of collaboration required by the evaluation and support process.

2. **Teacher Reflection and Goal-Setting** – The teacher examines student data, prior year evaluation and survey results, and the *CCT Rubric for Effective Teaching 2014* to draft a proposed performance and practice focus area, a parent feedback goal, two SLOs and a student feedback goal (if required) for the school year. The teacher may collaborate in grade-level or subject-matter teams to support the goal-setting process.

3. **Goal-Setting Conference** – The evaluator and teacher meet to discuss the teacher’s proposed focus area, goals and objectives in order to arrive at mutual agreement about them. The teacher collects evidence about his/her practice and the evaluator collects evidence about the teacher’s practice to support the review. The evaluator may request revisions to the proposed focus area(s), goals and objectives if they do not meet approval criteria.

MID-YEAR CHECK-IN:
Timeframe: January and February

1. **Reflection and Preparation** – The teacher and evaluator collect and reflect on evidence to date about the teacher’s practice and student learning in preparation for the check-in.

2. **Mid-Year Conference** – The evaluator and teacher complete at least one mid-year check-in conference during which they review evidence related to the teacher practice focus area and progress towards SLOs and other goals. The mid-year conference is an important point in the year for addressing concerns and reviewing results for the first half of the year. Evaluators may deliver mid-year formative information on indicators of the evaluation framework for which evidence has been gathered and analyzed. If needed, teachers and evaluators can mutually agree to revisions on the strategies or approaches used and/or mid-year adjustment of SLOs to accommodate changes (e.g., student populations, assignment). They also discuss actions that the teacher can take and supports the evaluator can provide to promote teacher growth in his/her focus area.
END-OF-YEAR SUMMATIVE REVIEW:

Timeframe: May and June; must be completed by June 30

1. **Teacher Self-Assessment** – The teacher reviews all information and data collected during the year and completes a self-assessment for review by the evaluator. This self-assessment may focus specifically on the areas for development established in the Goal-Setting Conference.

2. **Scoring** – The evaluator reviews submitted evidence, self-assessments and observation data and uses them to generate component ratings. The component ratings are combined to calculate scores for Teacher Practice Related Indicators and Student Outcomes Related Indicators. These scores generate the final, summative rating. After all data, including state test data, are available, the evaluator may adjust the summative rating if the state test data would significantly change the Student-Related Indicators final rating. Such revisions should take place as soon as state test data are available and before September 15.

3. **End-of-Year Conference** – The evaluator and the teacher meet to discuss all evidence collected to date and to discuss component ratings. Following the conference, the evaluator assigns a summative rating and generates a summary report of the evaluation before the end of the school year and before June 30th.

Ensuring Fairness and Accuracy: Evaluator Training, Monitoring and Auditing

All evaluators, including complementary observers, are required to complete extensive training on the SEED evaluation and support model. The purpose of training is to provide educators who evaluate instruction with the tools that will result in evidence-based classroom observations; professional learning opportunities tied to evaluation feedback and improved student performance.

The CSDE will provide districts with training opportunities to support district administrators, evaluators and teachers in implementing the model across their schools. Districts can adapt and build on these tools to provide comprehensive training and support to their schools and to ensure that evaluators are proficient in conducting teacher evaluations.

The Barkhamsted School District will engage in the CSDE sponsored multi-day training or RESC training. This comprehensive training will give evaluators the opportunity to:

- Understand the nature of learning for students and educators and its relation to the priorities of the *CCT Rubric for Effective Teaching 2014*;
- Establish a common language that promotes professionalism and a culture for learning through the lens of the *CCT Rubric for Effective Teaching 2014*;
- Understand how coaching conversations support growth-producing feedback;
- Establish inter-rater reliability through calibrations of observer interpretations of evidence and judgments of teaching practice; and
- Collaborate with colleagues to deepen understanding of the content.

**Participants in the training will have opportunities to interact with colleagues and engage in practice and proficiency exercises to:**
- Deepen understanding of the evaluation criteria;
- Define proficient teaching;
- Collect, sort and analyze evidence across a continuum of performance;
- Engage in professional conversations and coaching scenarios; and
- Determine a final summative rating across multiple indicators.

Completion of the multi-day training and demonstration of proficiency using established criteria enables evaluators to begin to engage in the evaluation and support process.

At the request of a district or employee, the CSDE or a third-party entity approved by the CSDE will audit the evaluation components that are combined to determine an individual’s summative rating in the event that such components are significantly dissimilar (i.e., include both **exemplary** and **below standard** ratings) ratings in different components. In these cases, the CSDE or a third-party entity will determine a final summative rating.

Additionally, there is an annual audit of evaluations. “The CSDE or a third-party designated by the CSDE will audit ratings of **exemplary** and **below standard** to validate such **exemplary** or **below standard** ratings by selecting ten districts at random annually and reviewing evaluation evidence files for a minimum of two educators rated **exemplary** and two educators rated **below standard** in those districts selected at random, including at least one classroom teacher rated **exemplary** and at least one teacher rated below standard per district selected.” [Connecticut Guidelines for Educator Evaluation 2.8 (3)]

**Support and Development**

Evaluation alone cannot hope to improve teacher practice and student learning. However, when paired with effective, relevant, and timely support, the evaluation process has the potential to help move teachers along the path to exemplary practice.

**Evaluation-Informed Professional Learning**

Throughout the process of implementing the Barkhamsted School District teacher evaluation model, in mutual agreement with their evaluators all teachers will identify professional learning needs that support their goal and objectives. The identified needs
will serve as the foundation for ongoing conversations about the teacher’s practice and impact on student outcomes. The professional learning opportunities identified for each teacher should be based on the individual strengths and needs that are identified through the evaluation process. The process may also reveal areas of common need among teachers, which can then be targeted with school-wide or district-wide professional learning opportunities.

**Improvement and Remediation Plans**

If a teacher’s performance is rated as *developing or below standard*, it signals the need for focused support and development. Districts must develop a system to support teachers not meeting the proficiency standard. Improvement and remediation plans should be developed in consultation with the teacher and his/her exclusive bargaining representative and be differentiated by the level of identified need and/or stage of development.

**Structured Support:** An educator would receive structured support when an area(s) of concern is identified during the school year. This support is intended to provide short term assistance to address a concern in its early stage.

**Special Assistance:** An educator would receive special assistance when he/she earns an overall performance rating of *developing or below standard* and/or has received structured support. An educator may also receive special assistance if he/she does not meet the goal(s) of the structured support plan. This support is intended to assist an educator who is having difficulty consistently demonstrating proficiency.

**Intensive Assistance:** An educator would receive intensive assistance when he/she does not meet the goal(s) of the special assistance plan. This support is intended to build the staff member’s competency.

**Career Development and Growth**

Rewarding exemplary performance identified through the evaluation process with opportunities for career development and professional growth is a critical step in both building confidence in the evaluation and support system itself and in building the capacity and skills of all teachers.

Examples of such opportunities include, but are not limited to: observation of peers; mentoring early-career teachers; participating in development of teacher improvement and remediation plans for peers whose performance is *developing or below standard*; leading Professional Learning Communities; differentiated career pathways; and focused professional learning based on goals for continuous growth and development.
Teacher Practice Related Indicators

The Teacher Practice Related Indicators evaluate the teacher’s knowledge of a complex set of skills and competencies and how these are applied in a teacher’s practice. Two components comprise this category:

- Teacher Performance and Practice, which counts for 40%; and
- Parent Feedback, which counts for 10%.

These two components will be described in detail below:

Component #1: Teacher Performance and Practice (40%)

The Teacher Performance and Practice component is a comprehensive review of teaching practice conducted through multiple observations, which are evaluated against a standards-based rubric. It comprises 40% of the summative rating. Following observations, evaluators provide teachers with specific feedback to identify strong practice, to identify teacher development needs and to tailor support to meet those needs.

Teacher Practice Framework- CCT Rubric for Effective Teaching 2014

The CCT Rubric for Effective Teaching 2014, as revised in 2014, is available on the SEED website and represents the most important skills and knowledge that teachers need to demonstrate in order to prepare students to be career, college and civic ready. The rubric was revised through the collaborative efforts of the CSDE, representatives from the regional educational service centers (RESCs), the Connecticut Association of Schools (CAS), the two statewide teachers’ unions and teachers and school leaders with experience in using the observation instrument. The CCT Rubric for Effective Teaching 2014 is aligned with the CCT and includes references to Connecticut Core Standards and other content standards. The CCT Rubric for Effective Teaching 2014 is organized into four domains, each with three indicators. Forty per cent of a teacher’s final annual summative rating is based on his/her performance across all four domains. The domains represent essential practice and knowledge and receive equal weight when calculating the summative Performance and Practice rating.
Evidence Generally Collected Through In-Class Observations

### Domain 1: Classroom Environment, Student Engagement and Commitment to Learning

- **1a.** Creating a positive learning environment that is responsive to and respectful of the learning needs of all students;
- **1b.** Promoting developmentally appropriate standards of behavior that support a productive learning environment for all students;
- **1c.** Maximizing instructional time by effectively managing routines and transitions.

### Domain 2: Planning for Active Learning

- **2a.** Planning instruction in order to engage students in rigorous and relevant learning and to promote their curiosity about the world at large;
- **2b.** Planning instruction to cognitively engage students in the content;
- **2c.** Selecting appropriate assessment strategies to monitor student progress.

### Domain 3: Instruction for Active Learning

- **3a.** Implementing instructional content for learning;
- **3b.** Leading students to construct meaning and apply new learning through the use of a variety of differentiated and evidence-based learning strategies and providing feedback to students and adjusting instruction.

### Domain 4: Professional Responsibilities and Teacher Leadership

- **4a.** Engaging in continuous professional learning to impact instruction and student learning;
- **4b.** Collaborating with colleagues to examine student learning data and to develop instructional and professional learning environment to support student learning; and
- **4c.** Working with colleagues, students, and families to develop and sustain a positive school climate that supports student learning.
Observation Process

Observations in and of themselves are not useful to teachers – it is the feedback, based on observations, that helps teachers reach their full potential. All teachers deserve the opportunity to grow and develop through observations and timely feedback. In fact, teacher surveys conducted nationally demonstrate that most teachers are eager for more observations and feedback to inform their practice throughout the year.

Therefore, in the Barkhamsted Elementary School District teacher evaluation and support model:

Each teacher should be observed between three and six times per year through both formal and informal observations as defined below.

- **Formal:** Observations that last at least 30 minutes and are followed by a post-observation conference, which includes timely written and verbal feedback.

- **Informal:** Observations that last at least ten minutes and are followed by written and/ or verbal feedback.

- **Non-classroom observations/reviews of practice include but are not limited to:** Observations of data team meetings, observations of coaching/mentoring other teachers, student work, PPTs, parent meetings or other teaching artifacts.

- All observations must be followed by feedback, either verbal (e.g., a post-conference, conversation in the hallway) or written (e.g., via email, comprehensive write-up, quick note in mailbox) or both, within a timely manner. It is recommended that feedback be provided within five business days, but districts are encouraged to consult with evaluators and teachers to establish a mutually agreed upon timeframe.

- Providing both verbal and written feedback after an informal observation or a review of practice is ideal, but school leaders are encouraged to discuss feedback preferences and norms with their staff.

- In order to capture an authentic view of practice and to promote a culture of openness and comfort with frequent observations and feedback, it is recommended that evaluators use a combination of announced and unannounced observations.

- Districts and evaluators can use their discretion to establish a mutually agreed upon number of observations based on school and staff needs and in accordance with the Guidelines for Educator Evaluation. The table on the next page summarizes the recommendations within the Barkhamsted School District model as compared with requirements established in the Guidelines.
<table>
<thead>
<tr>
<th>Teacher Categories</th>
<th>Barkhamsted Plan</th>
</tr>
</thead>
<tbody>
<tr>
<td>First and Second Year non-tenured Teachers</td>
<td>3 formal in-class observations; 2 of which include a pre-conference and all of which include a post-conference; and 3 informal observations</td>
</tr>
<tr>
<td>Below Standard and Developing</td>
<td>At least 3 in-class formal observations; 2 of which include a pre-conference and all of which must include a post-conference; and 3 informal observations</td>
</tr>
<tr>
<td>Proficient and Exemplary</td>
<td>Proficient and Exemplary teachers will receive at least one in-class formal observation and a review of practice every three years; and Proficient and Exemplary teachers who are not on cycle to be observed will have three in-class informal observations and a review of practice in the other two years.</td>
</tr>
</tbody>
</table>

**Note:** for 2015-16 a three year observation cycle has been developed for all tenured teachers in the Exemplary and Proficient performance levels.

**Teacher Performance and Practice Focus Area**

As described in the Evaluation Process and Timeline section, teachers develop one performance and practice focus area that is aligned to the *CCT Rubric for Effective Teaching 2014*. The focus area will guide observations and feedback conversations throughout the year.

Each teacher will work with his/her evaluator to develop a practice and performance focus area through mutual agreement. All focus areas should have a clear link to student achievement and should move the teacher towards proficient or exemplary on the *CCT Rubric for Effective Teaching 2014*. Schools may decide to create school-wide or grade-specific focus areas aligned to a particular indicator (e.g., 3b: Leading students to construct meaning and apply new learning through the use of a variety of differentiated and evidence-based learning strategies.)

Growth related to the focus area should be referenced in feedback conversations throughout the year. The focus area and action steps should be formally discussed during the Mid-Year Conference and the End-of-Year Conference. Although performance and practice focus areas are not explicitly rated as part of the Teacher Performance and Practice component, growth related to the focus area will be reflected in the scoring of Teacher Performance and Practice evidence.
Teacher Performance and Practice Scoring

During observations, evaluators should take evidence-based, scripted notes, capturing specific instances of what the teacher and students said and did in the classroom. Once the evidence has been recorded, the evaluator can align the evidence with the appropriate indicator(s) on the CCT Rubric for Effective Teaching 2014 and then make a determination about which performance level the evidence supports. Evaluators are not required to provide an overall rating for each observation, but they should be prepared to discuss evidence for the rubric indicators at the performance level that was observed.

Summative Observation of Teacher Performance and Practice Rating

Primary evaluators must determine a final teacher performance and practice rating and discuss this rating with teachers during the End-of-Year Conference. Within the SEED model, each domain of the CCT Rubric for Effective Teaching 2014 carries equal weight in the final rating. The final teacher performance and practice rating will be calculated by the evaluator in a three-step process:

1. Evaluator holistically reviews evidence collected through observations, interactions and reviews of practice (e.g., team meetings, conferences) and uses professional judgment to determine indicator ratings for each of the 12 indicators.

2. Evaluator averages indicators within each domain to a tenth of a decimal to calculate domain-level scores of 1.0-4.0.

3. Evaluator averages domain scores to calculate an overall Observation of Teacher Performance and Practice rating of 1.0-4.0.

Component #2: Parent Feedback (10%)

Feedback from parents will be used to help determine the remaining 10% of the Teacher Practice Indicators category of SEED.

The process for determining the parent feedback rating includes the following steps:
1. The school conducts a whole-school parent survey (meaning data is aggregated at the school level);
2. Administrators and teachers determine several school-level parent goals based on the survey feedback;
3. The teacher and evaluator identify one related parent engagement goal and set improvement targets;
4. Evaluator and teacher measure progress on growth targets; and
5. Evaluator determines a teacher’s summative rating, based on four performance levels.
Administration of a Whole-School Parent Survey

Parent surveys should be conducted at the whole-school level as opposed to the teacher-level, meaning parent feedback will be aggregated at the school level. This is to ensure adequate response rates from parents.

Parent surveys must be administered in a way that allows parents to feel comfortable providing feedback without fear of retribution. Surveys should be confidential, and survey responses should not be tied to parents’ names. The parent survey should be administered every spring and trends analyzed from year to year. The school district will work closely with teachers to select the survey and interpret results. Parent representatives may be included in the process.

Parent surveys will be conducted at the whole school level and demonstrate properties of fairness, reliability and usefulness. The surveys being used in the Barkhamsted School District were developed by the CT SDE and compiled by Survey Monkey.

Determining School-Level Parent Goals

Evaluators and teachers should review the parent survey results at the beginning of the school year to identify areas of need and set general parent engagement goals. Ideally, this goal-setting process would occur between the principal and teachers (possibly during faculty meetings) in August or September so agreement can be reached on two to three improvement goals for the entire school.

Selecting a Parent Engagement Goal and Improvement Targets

After the school-level goals have been set, teachers will determine through consultation and mutual agreement with their evaluators one related parent goal they would like to pursue as part of their evaluation. Possible goals include improving communication with parents, helping parents become more effective in support of homework, improving parent-teacher conferences, etc. See the sample state model survey for additional questions that can be used to inspire goals.

The goal should be written in SMART language format and must include specific improvement targets. For instance, if the goal is to improve parent communication, an improvement target could be specific to sending more regular correspondence to parents such as sending bi-weekly updates to parents or developing a new website for their class. Part of the evaluator’s job is to ensure (1) the goal is related to the overall school improvement parent goals, and (2) that the improvement targets are aligned, ambitious and attainable.

Measuring Progress on Growth Targets

Teachers and their evaluators should use their judgment in setting growth/improvement targets for the parent feedback component. There are two ways
teachers can measure and demonstrate progress on their growth targets. Teachers can:

4. Measure how successfully they implement a strategy to address an area of need (like the examples in the previous section); and/or

5. They can collect evidence directly from parents to measure parent-level indicators they generate.

For example, teachers can conduct interviews with parents or a brief parent survey to see if they improved on their growth target.

Arriving at a Parent Feedback Rating

The Parent Feedback rating should reflect the degree to which a teacher successfully reaches his/her parent goal and improvement targets. This is accomplished through a review of evidence provided by the teacher and application of the following scale:

<table>
<thead>
<tr>
<th>Exemplary (4)</th>
<th>Proficient (3)</th>
<th>Developing (2)</th>
<th>Below Standard (1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exceeded the goal</td>
<td>Met the goal</td>
<td>Partially met the goal</td>
<td>Did not meet the goal</td>
</tr>
</tbody>
</table>

Student Outcomes Related Indicators

Student Outcomes Related Indicators capture a teacher’s impact on student learning and comprise half of the teacher’s final summative rating. The inclusion of student outcomes indicators acknowledges that teachers are committed to the learning and growth of their students and carefully consider what knowledge, skills and talents they are responsible for developing in their students each year. As a part of the evaluation and support process, teachers document their goals of student learning and anchor them in data.

Two components comprise this category:

- Student Growth and Development, which counts for 45%,
- Either Whole-School Student Learning or Student Feedback or a combination of the two, which counts for 5% of the total evaluation rating.
- These components will be described in detail below.

Component #3: Student Growth and Development (45%)

Overview of Student Learning Objectives (SLOs)

Each teacher’s students, individually and as a group, are different from other teachers’ students, even in the same grade level or subject at the same school. For student growth and development to be measured for teacher evaluation and support purposes, it is imperative to use a method that takes each teacher’s assignment, students and context into account. Connecticut, like many other states and localities around the nation,
has selected a goal-setting process grounded in Student Learning Objectives (SLOs) as the approach for measuring student growth during the school year.

SLOs are carefully planned, long-term academic objectives. SLOs should reflect high expectations for learning or improvement and aim for mastery of content or skill development. SLOs are measured by Indicators of Academic Growth and Development (IAGDs) which include specific assessments/measures of progress and targets for student mastery or progress. Research has found that educators who set high-quality SLOs often realize greater improvement in student performance.

The SLO process, as outlined within the SEED model, will support teachers in using a planning cycle that will be familiar to most educators:

Developing SLOs is a process rather than a single event. The purpose is to craft SLOs that serve as a reference point throughout the year as teachers document their students’ progress toward achieving the IAGD targets. While this process should feel generally familiar, the SEED model asks teachers to set more specific and measureable targets than they may have done in the past. Teachers may develop them through consultation with colleagues in the same grade level or teaching the same subject. The final determination of SLOs and IAGDs is made through mutual agreement between the teacher and his/her evaluator.

The four phases of the SLO process are described in detail below: Developing SLOs is a process rather than a single event. The purpose is to craft SLOs that serve as a reference point throughout the year as teachers document their students’ progress toward achieving the IAGD targets. While this process should feel generally familiar, the SEED model asks teachers to set more specific and measureable targets than they may have done in the past. Teachers may develop them through consultation with colleagues in the same grade level or teaching the same subject. The final determination of SLOs and IAGDs is made through mutual agreement between the teacher and his/her evaluator. The four phases of the SLO process are described in detail below:
PHASE 1: Review the Data

This first phase is the discovery phase which begins with reviewing district initiatives and key priorities, school/district improvement plans, and the building administrator’s goals. Once teachers know their class rosters, they should examine multiple sources of data about their students’ performance to identify an area(s) of need. Documenting the “baseline” data, or where students are at the beginning of the year, is a key aspect of this step. It allows the teacher to identify where students are with respect to the grade level or content area the teacher is teaching.

Examples of Data Review

A teacher may use but is not limited to the following data in developing an SLO:

a) Initial performance for current interval of instruction (writing samples, student interest surveys, pre-assessments etc.)

b) Student scores on previous state standardized assessments

c) Results from other standardized and non-standardized assessments

d) Report cards from previous years

e) Results from diagnostic assessments

f) Artifacts from previous learning

g) Discussions with other teachers (across grade levels and content areas) who have previously taught the same students

h) Conferences with Students’ families

i) Individual Educational Plans (IEPs) and 504 plans for students with identified special education needs

j) Data related to English Language Learner (EL) students and gifted students

k) Attendance records

l) Information about families, community and other local contexts

It is important that the teacher understands both the individual student and group strengths and challenges. This information serves as the foundation for setting the ambitious yet realistic goals in the next phase.
PHASE 2: Set Two SLOs

Based on a review of district and building data, teachers will develop two SLOs that address identified needs. A form for the development of SLOs can be found on the SEED website. To create their SLOs, teachers will follow these four steps:

**Step 1: Decide on the Student Learning Objectives**

The SLOs are broad goal statements for student learning and expected student improvement. These goal statements identify core ideas, domains, knowledge and/or skills students are expected to acquire for which baseline data indicate a need. Each SLO should address a central purpose of the teacher’s assignment and should pertain to a large proportion of his/her students, including specific target groups where appropriate. Each SLO statement should reflect high expectations for student learning at least a year’s worth of growth (or a semester’s worth for shorter courses) and should be aligned to relevant state, national (e.g., Common Core State Standards) or district standards for the grade level or course. Depending on the teacher’s assignment, an SLO statement might aim for content mastery or else it might aim for skill development.

SLO broad goal statements can unify teachers within a grade level or department while encouraging collaborative work across multiple disciplines. Teachers with similar assignments may have identical SLOs although they will be individually accountable for their own students’ results.

**NOTE:** Connecticut is awaiting USED approval for a request for flexibility regarding the use of state test data in teacher evaluation for the 2015-2016 academic year.

**Step 2: Select Indicators of Academic Growth and Development (IAGDs)**

An Indicator of Academic Growth and Development (IAGD) is an assessment/measure of progress to include a quantitative target that will demonstrate whether the SLO was met. Each SLO must include at least one IAGD but may include multiple, differentiated IAGDs where appropriate. For the Barkhamsted school District plan each teacher will set two SLOs and corresponding IAGDs. One SLO will be based on a standardized assessment where available (22.5%) and the other SLO based on non-standard assessments (22.5%). In calculation to determine the summative student growth and development rating, the SLOs are weighted equally, each representing 22.5% of the final summative rating.

IAGDs should be written in SMART goal language:

- **S** = Specific and Strategic
- **M** = Measurable
- **A** = Aligned and Attainable
- **R** = Results-Oriented
- **T** = Time-Bound
IAGDs should be rigorous, attainable and meet or exceed district expectations (rigorous targets reflect both greater depth of knowledge and complexity of thinking required for success). Each indicator should make clear:

1. What evidence/measure of progress will be examined;
2. What level of performance is targeted; and
3. What proportion of students is projected to achieve the targeted performance level.

IAGDs can also address student subgroups, such as high or low-performing students or EL students. It is through the Phase 1 examination of student data that teachers will determine what level of performance to target for which population(s) of students.

IAGDs are unique to the teacher’s particular students; teachers with similar assignments may use the same assessment(s)/measure of progress for their SLOs, but it is unlikely they would have identical targets established for student performance.

Taken together, an SLO and its IAGD(s) provide the evidence that the objective was met. The following are some examples of IAGDs that might be applied to the previous SLO examples:

**Step 3: Provide Additional Information**

During the goal-setting process, teachers and evaluators will document the following:

- Baseline data used to determine SLOs and set IAGDs;
- Selected student population supported by data;
- Learning content aligned to specific, relevant standards;
- Interval of instruction for the SLO;
- Assessments/measures of progress teacher plans to use to gauge students’ progress;
- Instructional strategies;
- Any important technical information about the indicator evidence (like timing or scoring plans); and
- Professional learning/supports needed to achieve the SLOs.

**Step 4: Submit SLOs to Evaluator for Review**

SLOs are proposals until the teacher and the evaluator mutually agree upon them. Prior to the Goal-Setting Conference, the evaluator will review each SLO relative to the following criteria to ensure that SLOs across subjects, grade levels and schools are both rigorous and comparable:

- Baseline—Trend Data
- Student Population
- Standards and Learning Content
• Interval of Instruction
• Assessments/Measures of Progress
• Indicators of Academic Growth and Development (IAGDs)/Growth Targets
• Instructional Strategies and Supports

An SLO Development Guide is provided for districts to use in this process. The evaluator may provide written comments and discuss the feedback with the teacher during the Goal-Setting Conference.

**PHASE 3: Monitor Students Progress**

Once SLOs are finalized, teachers should monitor students’ progress towards the objectives. Teachers can, for example, examine student work; administer interim assessments and track students’ accomplishments and struggles. Teachers can share their interim findings with colleagues during collaborative time, and they can keep their evaluator apprised of progress. Progress towards SLOs/IAGDs and action steps for achieving progress should be referenced in feedback conversations throughout the year.

If a teacher’s assignment changes, or if his/her student population shifts significantly, the SLOs can be adjusted during the Mid-Year Conference between the evaluator and the teacher.

**PHASE 4: Assess Student Outcomes Relative to SLOs**

At the end of the school year, the teacher should collect the evidence required by their IAGDs, upload artifacts to the data management software system, where available and appropriate, and submit it to their evaluator. Along with the evidence, teachers will complete and submit a self-assessment, which asks teachers to reflect on the SLO outcomes by responding to the following four statements:

1. Describe the results and provide evidence for each IAGD.
2. Provide your overall assessment of whether this objective was met.
3. Describe what you did that produced these results.
4. Describe what you learned and how you will use that learning going forward.

Evaluators will review the evidence and the teacher’s self-assessment and assign one of four ratings to each SLO: Exceeded (4 points), Met (3 points), Partially Met (2 points) or Did Not Meet (1 point). These ratings are defined as follows:

<table>
<thead>
<tr>
<th>Rating</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exceeded (4)</td>
<td>All or most students met or substantially exceeded the target(s) contained in the indicator(s).</td>
</tr>
<tr>
<td>Met (3)</td>
<td>Most students met the target(s) contained in the indicators within a few points on either side of the target(s).</td>
</tr>
</tbody>
</table>
Partially Met (2) | Many students met the target(s), but a notable percentage missed the target by more than a few points. However, taken as a whole, significant progress towards the goal was made.

Did Not Meet (1) | A few students met the target(s) but a substantial percentage of students did not. Little progress toward the goal was made.

For SLOs with more than one IAGD, the evaluator may score each indicator separately, and then average those scores for the SLO score, or he/she can look at the results as a body of evidence regarding the accomplishment of the objective and score the SLO holistically.

The final student growth and development rating for a teacher is the average of their two SLO scores.

**Component #4: Whole-School Student Learning Indicator and/or Student Feedback (5%)**

Districts can decide to use a whole-school student learning indicator (option 1), student feedback (option 2) or a combination of the two (option 3) to determine this fourth component of the Barkhamsted plan.

**Option 1: Whole-School Student Learning Indicator**

For districts that include the whole-school student learning indicator in teacher evaluations, a teacher’s indicator rating shall be equal to the aggregate rating for multiple student learning indicators established for his/her administrator’s evaluation rating. This will be based on the administrator’s progress on SLO targets, which correlates to the Student Learning rating on an administrator’s evaluation (equal to the 45% component of the administrator’s final rating).

**Survey Instruments**

The Barkhamsted plan uses the CSDE adopted recommended survey instruments as part of the SEED state model for teacher evaluation. The surveys for use in the State of Connecticut and the main components of the survey are calculated using Survey Monkey.
**Survey Administration**
Student surveys are administered in a way that allows participants to feel comfortable providing feedback without fear of retribution. Surveys should be confidential, and survey responses must not be tied to students’ names.

**Establishing Goals**
Teachers and their evaluators should use their judgment in setting goals for the student feedback components. In setting a goal, a teacher must decide what he/she wants the goal to focus on. A goal will usually refer to a specific survey question (e.g., “My teacher makes lessons interesting”). However, some survey instruments group questions into components or topics, such as “Classroom Control” or “Communicating Course Content,” and a goal may also refer to a component rather than an individual question.

Additionally, a teacher (or the district) must decide how to measure results for the selected question or topic. The CSDE recommends that teachers measure performance in terms of the percentage of students who responded favorably to the question. (Virtually all student survey instruments have two favorable answer choices for each question.) For example, if the survey instrument asks students to respond to questions with “Strongly Disagree,” “Disagree,” “Neutral,” “Agree,” and “Strongly Agree,” performance on a goal would be measured as the percentage of students who responded “Agree” or “Strongly Agree” to the corresponding question. Next, a teacher must set a numeric performance target. As described above, this target should be based on growth or on maintaining performance that is already high. Teachers are encouraged to bear in mind that growth may become harder as performance increases. For this reason, we recommend that teachers set maintenance of high performance targets (rather than growth targets) when current performance exceeds 70% of students responding favorably to a question.

Finally, where feasible, a teacher may optionally decide to focus a goal on a particular subgroup of students. (Surveys may ask students for demographic information, such as grade level, gender and race.) For example, if a teacher’s fall survey shows that boys give much lower scores than girls in response to the survey question “My teacher cares about me,” the teacher might set a growth goal for how the teacher’s male students respond to that question.
The following are examples of effective SMART goals:

- The percentage of students who “Agree” or “Strongly Agree” with “My teacher believes I can do well” will increase from 50% to 60% by May 15;
- The percentage of students who “Agree” or “Strongly Agree” with “My teacher makes what we’re learning interesting” will remain at 75% by May 15.

Student feedback goals should be written in SMART language:

- **S** = Specific and Strategic
- **M** = Measurable
- **A** = Aligned and Attainable
- **R** = Results-Oriented
- **T** = Time-Bound
See the example surveys on the SEED website for additional questions that can be used to develop goals.

**Arriving at a Student Feedback Summative Rating:**

In most cases, summative ratings should reflect the degree to which a teacher makes growth on feedback measures, using data from the prior school year or the fall of the current year as a baseline for setting growth targets. For teachers with high ratings already, summative ratings should reflect the degree to which ratings remain high. This is accomplished in the following steps, undertaken by the teacher being evaluated through mutual agreement with the evaluator:

1. Review survey results from prior period (previous school year or fall survey).
2. Set one measurable goal for growth or performance (see above).
3. Discuss parameters for exceeding or partially meeting goals.
4. Later in the school year, administer surveys to students.
5. Aggregate data and determine whether the goal was achieved.
6. Assign a summative rating, using the following scale to be discussed and finalized during the End-of-Year Conference.

<table>
<thead>
<tr>
<th>Exemplary</th>
<th>Proficient</th>
<th>Developing</th>
<th>Below Standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exceeded the goal</td>
<td>Met the goal</td>
<td>Partially met the goal</td>
<td>Did not meet the goal</td>
</tr>
</tbody>
</table>

**Summative Teacher Evaluation Scoring**

**Summative Scoring**

The individual summative teacher evaluation rating will be based on the four components, grouped in two major categories: Student Outcomes Related Indicators and Teacher Practice Related Indicators.
Every educator will receive one of four performance* ratings:

**Exemplary** – Substantially exceeding indicators of performance

**Proficient** – Meeting indicators of performance

**Developing** – Meeting some indicators of performance but not others

**Below Standard** – Not meeting indicators of performance

* The term “performance” in the above shall mean “progress as defined by specified indicators.” Such indicators shall be mutually agreed upon, as applicable.

The rating will be determined using the following steps:

1. Calculate a Teacher Practice Related Indicators score by combining the observation of teacher performance and practice score (40%) and the parent feedback score (10%).

2. Calculate a Student Outcomes Related Indicators score by combining the student growth and development score (45%) and whole-school student learning indicator or student feedback (5%).

3. Use the Summative Matrix to determine the Summative Rating

**Rating Table**

<table>
<thead>
<tr>
<th>Student Outcomes Related Indicators Points</th>
<th>Student Outcomes Related Indicators Rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>50-80</td>
<td>Below Standard</td>
</tr>
<tr>
<td>81-126</td>
<td>Developing</td>
</tr>
<tr>
<td>127-174</td>
<td>Proficient</td>
</tr>
<tr>
<td>175-200</td>
<td>Exemplary</td>
</tr>
</tbody>
</table>
2. Use the Summative Matrix to determine the Summative Rating

Using the ratings determined for each major category: Student Outcomes Related Indicators and Teacher Practice-Related Indicators, follow the respective column and row to the center of the matrix. The point of intersection indicates the summative rating. For the example provided, the Teacher Practice Related Indicators rating is proficient and the Student Outcomes Related Indicators rating is proficient. The summative rating is therefore proficient. If the two major categories are highly discrepant (e.g., a rating of exemplary for Teacher Practice and a rating of below standard for Student Outcomes), then the evaluator should examine the data and gather additional information in order to determine a summative rating.

### Adjustment of Summative Rating

Summative ratings must be provided for all teachers by June 30, of a given school year and reported to the CSDE per state guidelines. Should state standardized test data not yet be available at the time of calculating a summative rating, a rating must be completed based on evidence that is available. When the summative rating for a teacher may be significantly impacted by state standardized test data, the evaluator should recalculate the teacher’s summative rating when the data is available and submit the adjusted rating no later than September 15. These adjustments should inform goal setting in the new school year.
Definition of Effectiveness and Ineffectiveness

Each district shall define effectiveness and ineffectiveness utilizing a pattern of summative ratings derived from the new evaluation and support system. A pattern may consist of a pattern of one rating. The state model recommends the following patterns:

Novice teachers shall generally be deemed effective if said educator receives at least two sequential proficient ratings, one of which must be earned in the fourth year of a novice teacher’s career. A below standard rating shall only be permitted in the first year of a novice teacher’s career. There should be a trajectory of growth and development as evidenced by a subsequent rating of developing or higher in year two and sequential proficient ratings in years three and four.

A post-tenure educator shall generally be deemed ineffective if said educator receives at least two sequential developing ratings or one below standard rating at any time.

Dispute-Resolution Process

The local or regional board of education shall include a process for resolving disputes in cases where the evaluator and teacher cannot agree on goals/objectives, the evaluation period, feedback or the professional development plan. When such agreement cannot be reached, the issue in dispute will be referred for resolution to a subcommittee of the professional development and evaluation committee (PDEC). The superintendent and the respective collective bargaining unit for the district will each select one representative from the PDEC to constitute this subcommittee, as well as a neutral party, as mutually agreed upon between the superintendent and the collective bargaining unit. In the event that the designated committee does not reach a unanimous decision, the issue shall be considered by the superintendent whose decision shall be binding.
CORE REQUIREMENTS for the Evaluation of Student and Educator Support Specialists

The evaluation of the following staff will be done by Shared Services staff who contract and evaluate the following staff:

- School Psychologists;
- Speech and Language Pathologists;
- School Social Workers;
- Special Education Teachers;
- OT/PT staff
Administrator Evaluation and Support

The Connecticut State Department of Education (CDSE) designed model for the evaluation and support of administrators in Connecticut is based on the Connecticut Guidelines for Educator Evaluation (Core Requirements), developed by a diverse group of educators in June 2012 and based upon best practice research from around the country. The contents of this document are meant to guide districts in the implementation of Connecticut’s System for Educator Evaluation and Development (SEED) Administrator Evaluation and Support model. The CDSE, in consultation with PEAC and the SBE, may continue to refine the tools provided in this document for clarity and ease of use.

The SEED Model for administrator evaluation and support includes specific guidance for the four components of administrator evaluation:

- Observation of Leadership Performance and Practice (40%)
- Stakeholder Feedback (10%)
- Student Learning (45%)
- Teacher Effectiveness Outcomes (5%)

Leader Practice Related Indicators

Student Outcomes Related
Administrator Evaluation and Development

Purpose and Rationale

This section of the 2014 SEED Handbook outlines the state model for the evaluation of school and school district administrators in Connecticut. A robust administrator evaluation system is a powerful means to develop a shared understanding of leader effectiveness for the state of Connecticut. The Connecticut administrator evaluation and support model defines administrator effectiveness in terms of (1) administrator practice (the actions taken by administrators that have been shown to impact key aspects of school life); (2) the results that come from this leadership (teacher effectiveness and student achievement); and (3) the perceptions of the administrator’s leadership among key stakeholders in his/her community.

The model describes four levels of performance for administrators and focuses on the practices and outcomes of Proficient administrators. These administrators can be characterized as:

- Meeting expectations as an instructional leader;
- Meeting expectations in at least 3 other areas of practice;
- Meeting 1 target related to stakeholder feedback;
- Meeting state accountability growth targets on tests of core academic subjects;
- Meeting and making progress on 2 Student Learning Objectives aligned to school and district priorities; and
- Having more than 60% of teachers proficient on the student growth portion of their evaluation.

The model includes an exemplary performance level for those who exceed these characteristics, but exemplary ratings are reserved for those who could serve as a model for leaders across their district or even statewide. A proficient rating represents fully satisfactory performance, and it is the rigorous standard expected of most experienced administrators.

This model for administrator evaluation has several benefits for participants and for the broader community. It provides a structure for the ongoing development of principals and other administrators to establish a basis for assessing their strengths and growth areas so they have the feedback they need to get better. It also serves as a means for districts to hold themselves accountable for ensuring that every child in their district attends a school with effective leaders.
As noted, the model applies to all administrators holding an 092 endorsement. Because of the fundamental role that principals play in building strong schools for communities and students, and because their leadership has a significant impact on outcomes for students, the descriptions and examples focus on principals. However, where there are design differences for assistant principals and central office administrators, the differences are noted.

System Overview

Administrator Evaluation and Support Framework

The evaluation and support system consists of multiple measures to paint an accurate and comprehensive picture of administrator performance. All administrators will be evaluated in four components, grouped into two major categories: Leadership Practice and Student Outcomes.

6. Leadership Practice Related Indicators: An evaluation of the core leadership practices and skills that positively affect student learning. This category is comprised of two components:
   a) Observation of Leadership Performance and Practice (40\%) as defined in the Common Core of Leading (CCL): Connecticut School Leadership Standards.
   b) Stakeholder Feedback (10\%) on leadership practice through surveys.

7. Student Outcomes Related Indicators: An evaluation of an administrator’s contribution to student academic progress, at the school and classroom level. This category is comprised of two components:
   a) Student Learning (45\%) assessed in equal weight by: (a) progress on the academic learning measures in the state’s accountability system for schools and (b) performance and growth on locally-determined measures.
   b) Teacher Effectiveness Outcomes (5\%) as determined by an aggregation of teachers’ success with respect to Student Learning Objectives (SLOs)

Scores from each of the four components will be combined to produce a summative performance rating of Exemplary, Proficient, Developing or Below Standard. The performance levels are defined as:

- **Exemplary** – Substantially exceeding indicators of performance
- **Proficient** – Meeting indicators of performance
- **Developing** – Meeting some indicators of performance but not others
- **Below Standard** – Not meeting indicators of performance
Process and Timeline

Each administrator participates in the evaluation process as a cycle of continuous improvement. The cycle is the centerpiece of state guidelines designed to have all educators play a more active, engaged role in their professional growth and development. For every administrator, evaluation begins with goal-setting for the school year, setting the stage for implementation of a goal-driven plan. The cycle continues with a Mid-Year Formative Review, followed by continued implementation. The latter part of the process offers administrators a chance to self-assess and reflect on progress to date, a step that informs the summative evaluation. Evidence from the summative evaluation and self-assessment become important sources of information for the administrator’s subsequent goal setting, as the cycle continues into the subsequent year.

Figure 1: This is a typical timeframe:

* Summative assessment to be finalized in August.
Step 1: Orientation and Context-Setting

To begin the process, the administrator needs five things to be in place:

1. Student learning data are available for review by the administrator and the state has assigned the school a School Performance Index (SPI) rating7.

2. Stakeholder survey data are available for review by the administrator.

3. The superintendent has communicated his/her student learning priorities for the year.

4. The administrator has developed a school improvement plan that includes student learning goals.

5. The evaluator has provided the administrator with this document in order to orient her/him to the evaluation process. Only #5 is required by the approved Guidelines for Educator Evaluation, but the data from #1-4 are essential to a robust goal-setting process.

Step 2: Goal-Setting and Plan Development

Before a school year starts, administrators identify two Student Learning Objectives (SLOs) and one survey target, drawing on available data, the superintendent’s priorities, their school improvement plan and prior evaluation results (where applicable). They also determine two areas of focus for their practice. This is referred to as “3-2-1 goal-setting.”
Administrators should start with the outcomes they want to achieve. This includes setting three SLOs and one target related to stakeholder feedback.

Then administrators identify the areas of focus for their practice that will help them accomplish their SLOs and survey targets, choosing from among the elements of the ConnecticutSchoolLeadershipStandards. While administrators are rated on all six Performance Expectations, administrators are not expected to focus on improving their practice in all areas in a given year. Rather, they should identify two specific focus areas of growth to facilitate professional conversation about their leadership practice with their evaluator. It is likely that at least one and perhaps both, of the practice focus areas will be in instructional leadership, given its central role in driving student achievement. What is critical is that the administrator can connect improvement in the practice focus areas to the outcome goals and survey targets, creating a logical through-line from practice to outcomes.

Next, the administrator and the evaluator meet to discuss and agree on the selected outcome goals and practice focus areas.

The evaluator and administrator also discuss the appropriate resources and professional learning needs to support the administrator in accomplishing his/her goals. Together, these components – the goals, the practice areas and the resources and supports – comprise an individual’s evaluation and support plan. In the event of any disagreement, the evaluator has the authority and responsibility to finalize the goals, supports and sources of evidence to be used. The following completed form represents a sample evaluation and support plan.

The focus areas, goals, activities, outcomes and timeline will be reviewed by the administrator’s evaluator prior to beginning work on the goals. The evaluator may suggest additional goals as appropriate.
Step 3: Plan Implementation and Evidence Collection

As the administrator implements the plan, he/she and the evaluator both collect evidence about the administrator’s practice. For the evaluator, this must include at least two and preferably more, school site visits. Periodic, purposeful school visits offer critical opportunities for evaluators to observe, collect evidence, and analyze the work of school leaders. At a minimum, fall, winter and spring visits to the school leader’s work site will provide invaluable insight into the school leader’s performance and offer opportunities for ongoing feedback and dialogue.

Unlike visiting a classroom to observe a teacher, school site visits to observe administrator practice can vary significantly in length and setting. It is recommended that evaluators plan visits carefully to maximize the opportunity to gather evidence relevant to an administrator’s practice focus areas. Further, central to this process is providing meaningful feedback based on observed practice: see the SEED website for forms that evaluators may use in recording observations and providing feedback. Evaluators should provide timely feedback after each visit.

Besides the school site visit requirement, there are no prescribed evidence requirements. The model relies on the professional judgment of the administrator and evaluator to determine appropriate sources of evidence and ways to collect evidence.

The administrator’s evaluator may want to consult the following sources of evidence to collect information about the administrator in relation to his or her focus areas and goals:

- Data systems and reports for student information
- Artifacts of data analysis and plans for response
- Observations of teacher team meetings
- Observations of administrative/leadership team meetings
- Observations of classrooms where the administrator is present
- Communications to parents and community
- Conversations with staff
- Conversations with students
- Conversations with families
- Presentations at Board of Education meetings, community resource centers, parent groups etc.
A note on the frequency of school site observations:

State guidelines call for an administrator's evaluation to include:

- 2 observations for each administrator.
- 4 observations for any administrator new to their district, school, the profession or who has received ratings of developing or below standard.

School visits should be frequent, purposeful and adequate for sustaining a professional conversation about an administrator's practice.

**Step 4: Mid-Year Formative Review**

The administrator and evaluator hold a Mid-Year Formative Conference, with explicit discussion of progress toward student learning targets, as well as any areas of performance related to standards of performance and practice. The meeting is also an opportunity to surface any changes in the context (e.g., a large influx of new students) that could influence accomplishment of outcome goals; goals may be changed at this point.

**Step 5: Self-Assessment**

In the spring, the administrator takes an opportunity to assess his/her practice on all 18 elements of the CCL: Connecticut School Leadership Standards. For each element, the administrator determines whether he/she:

- Needs to grow and improve practice on this element;
- Has some strengths on this element but needs to continue to grow and improve;
- Is consistently effective on this element; or
- Can empower others to be effective on this element.

The administrator should also review his/her focus areas and determine if he/she considers him/herself on track or not.

In this model the administrator submits a self-assessment prior to the End-of-Year Summative Review as an opportunity for the self-reflection to inform the summative rating.
Step 6: Summative Review and Rating

The administrator and evaluator meet in the late spring to discuss the administrator’s self-assessment and all evidence collected over the course of the year. While a formal rating follows this meeting, it is recommended that evaluators use the meeting as an opportunity to convey strengths, growth areas and their probable rating. After the meeting, the evaluator assigns a rating based on all available evidence.

Ensuring Fairness and Accuracy: Evaluator Training, Monitoring and Auditing

All evaluators are required to complete training on the SEED evaluation and support model. The purpose of training is to provide evaluators of administrators with the tools that will result in evidence-based school site observations; professional learning opportunities tied to evaluation feedback, improved teacher effectiveness and student performance.

The CSDE will provide districts with training opportunities to support district evaluators of administrators in implementation of the model across their schools. Districts can adapt and build on these tools to provide comprehensive training and support to ensure that evaluators are proficient in conducting administrator evaluations.

School districts who have adopted the SEED model will be expected to engage in the CSDE sponsored multi-day training. This comprehensive training will give evaluators the opportunity to:

- Understand the various components of the SEED administrator evaluation and support system;
- Understand sources of evidence that demonstrate proficiency on the CCL Leader Evaluation Rubric;
- Establish a common language that promotes professionalism and a culture for learning through the lens of the CCL Leader Evaluation Rubric;
- Establish inter-rater reliability through calibrations of observer interpretations of evidence and judgments of leadership practice; and
- Collaborate with colleagues to deepen understanding of the content.

Participants in the training will have opportunities to interact with colleagues and engage in practice and optional proficiency exercises to:

- Deepen understanding of the evaluation criteria;
- Define proficient leadership;
- Collect, sort and analyze evidence across a continuum of performance; and
- Determine a final summative rating across multiple indicators.
The evaluator completes the summative evaluation report, shares it with the administrator and adds it to the administrator’s personnel file with any written comments attached that the administrator requests to be added within two weeks of receipt of the report.

Summative ratings must be completed for all administrators by June 30 of a given school year. Should state standardized test data not yet be available at the time of a final rating, a rating must be completed based on evidence that is available. When the summative rating for an administrator may be significantly impacted by state standardized test data or teacher effectiveness ratings, the evaluator should recalculate the administrator’s summative rating when the data is available and submit the adjusted rating no later than September 15. This adjustment should take place before the start of the new school year so that prior year results can inform goal setting in the new school year.

**Initial ratings** are based on all available data and are made in the spring so that they can be used for any employment decisions as needed. Since some components may not be completed at this point, here are rules of thumb to use in arriving at a rating:

- If stakeholder survey results are not yet available, then the observation of practice rating should count for 50% of the preliminary rating.
- If the teacher effectiveness outcomes ratings are not yet available, then the student learning measures should count for 50% of the preliminary rating.
- If the state accountability measures are not yet available, then the Student Learning Objectives should count for the full assessment of student learning.
- If none of the summative student learning indicators can yet be assessed, then the evaluator should examine the most recent interim assessment data to assess progress and arrive at an assessment of the administrator’s performance on this component.
Support and Development

Evaluation alone cannot hope to improve leadership practice, teacher effectiveness and student learning. However, when paired with effective, relevant and timely support, the evaluation process has the potential to help move administrators along the path to exemplary practice.

Evaluation-Informed Professional Learning

Student success depends on effective teaching, learning and leadership. The CSDE vision for professional learning is that each and every Connecticut educator engages in continuous learning every day to increase professional effectiveness, resulting in positive outcomes for all students. For Connecticut’s students to graduate college and career ready, educators must engage in strategically planned, well supported, standards-based, continuous professional learning focused on improving student outcomes.

All administrators will identify professional learning needs that support their goal and objectives. The identified needs will serve as the foundation for ongoing conversations about the administrator’s practice and impact on student outcomes. The professional learning opportunities identified for each administrator should be based on the individual strengths and needs that are identified through the evaluation process.

Improvement and Remediation Plans

If an administrator’s performance is rated as developing or below standard, it signals the need for focused support and development. Barkhamsted must develop a system to support administrators not meeting the proficiency standard. Improvement and remediation plans should be developed in consultation with the administrator and his/her exclusive bargaining representative, when applicable, and be differentiated by the level of identified need and/or stage of development.

Districts may develop a system of stages or levels of support. For example:

1. Structured Support: An administrator would receive structured support when an area(s) of concern is identified during the school year. This support is intended to provide short-term assistance to address a concern in its early stage.

2. Special Assistance: An administrator would receive special assistance when he/she earns an overall performance rating of developing or below standard and/or has received structured support. An educator may also receive special assistance if he/she does not meet the goal(s) of the structured support plan. This support is intended to assist an educator who is having difficulty consistently demonstrating proficiency.

3. Intensive Assistance: An administrator would receive intensive assistance when he/she does not meet the goal(s) of the special assistance plan. This support is intended to build the staff member’s competency.
Career Development and Growth

Rewarding exemplary performance identified through the evaluation process with opportunities for career development and professional growth is a critical step in both building confidence in the evaluation and support system itself and in building the capacity and skills of all leaders.

Examples of such opportunities include, but are not limited to: observation of peers; mentoring aspiring and early-career administrators; participating in development of administrator improvement and remediation plans for peers whose performance is developing or below standard; leading Professional Learning Communities; differentiated career pathways; and focused professional learning based on goals for continuous growth and development.

Leadership Practice Related Indicators

The Leadership Practice Related Indicators evaluate the administrator’s knowledge of a complex set of skills and competencies and how these are applied in leadership practice. It is comprised of two components:

- Observation of Leadership Practice, which counts for 40%; and
- Stakeholder Feedback, which counts for 10%.

Component #1: Observation of Leadership Practice (40%)”}

An assessment of an administrator’s leadership practice – by direct observation of practice and the collection of other evidence – is 40% of an administrator’s summative rating.

Leadership practice is described in the Common Core of Leading (CCL) Connecticut School Leadership Standards adopted by the Connecticut State Board of Education in June of 2012, which use the national Interstate School Leaders Licensure Consortium (ISLLC) standards as their foundation and define effective administrative practice through six performance expectations.

- **Vision, Mission and Goals:** Education leaders ensure the success and achievement of all students by guiding the development and implementation of a shared vision of learning, a strong organizational mission and high expectations for student performance.
- **Teaching and Learning:** Education leaders ensure the success and achievement of all students by monitoring and continuously improving teaching and learning.
- **Organizational Systems and Safety:** Education leaders ensure the success and
achievement of all students by managing organizational systems and resources for a safe, high-performing learning environment.

- **Families and Stakeholders**: Education leaders ensure the success and achievement of all students by collaborating with families and stakeholders to respond to diverse community interests and needs and to mobilize community resources.

- **Ethics and Integrity**: Education leaders ensure the success and achievement of all students by being ethical and acting with integrity.

- **The Education System**: Education leaders ensure the success and achievement of all students and advocate for their students, faculty and staff needs by influencing systems of political, social, economic, legal and cultural contexts affecting education.

All six of these performance expectations contribute to successful schools, but research shows that some have a bigger impact than others. In particular, improving teaching and learning is at the core of what effective educational leaders do. As such, **Performance Expectation 2 (Teaching and Learning)** comprises approximately half of the leadership practice rating and the other five performance expectations are equally weighted.
In order to arrive at these ratings, administrators are measured against the CCL Leader Evaluation Rubric which describes leadership actions across four performance levels for each of the six performance expectations and associated elements. The four performance levels are:

- **Exemplary**: The Exemplary Level focuses on the concepts of developing capacity for action and leadership beyond the individual leader. Collaboration and involvement from a wide range of staff, students and stakeholders is prioritized as appropriate in distinguishing Exemplary performance from Proficient performance.

- **Proficient**: The rubric is anchored at the Proficient Level using the indicator language from the Connecticut School Leadership Standards. The specific indicator language is highlighted in bold at the Proficient level.

- **Developing**: The Developing Level focuses on leaders with a general knowledge of leadership practices but most of those practices do not necessarily lead to positive results.

- **Below Standard**: The Below Standard Level focuses on a limited understanding of leadership practices and general inaction on the part of the leader.

Two key concepts, indicated by bullets, are often included as indicators. Each concept demonstrates a continuum of performance across the row, from below standard to exemplary.

Examples of Evidence are provided for each element of the rubric. While these Examples of Evidence can be a guide for evaluator training and discussion, they are only examples and should not be used as a checklist. As evaluators learn and use the rubric, they should review these Examples of Evidence and generate additional examples from their own experience that could also serve as evidence of Proficient practice.
Arriving at a Leadership Practice Summative Rating

Summative ratings are based on the evidence for each performance expectation in the CCL Leader Evaluation Rubric. Evaluators collect written evidence about and observe the administrator’s leadership practice across the six performance expectations described in the rubric. Specific attention is paid to leadership performance areas identified as needing development.

This is accomplished through the following steps, undertaken by the administrator being evaluated and by the evaluator completing the evaluation:

The administrator and evaluator meet for a Goal-Setting Conference to identify focus areas for development of the administrator’s leadership practice.

8. The administrator collects evidence about his/her practice and the evaluator collects evidence about administrator practice with a particular emphasis on the identified focus areas for development. Evaluators of administrators must conduct at least two school site observations for any administrator and should conduct at least four school site observations for administrators who are new to their district, school, the profession or who have received ratings of developing or below standard.

9. The administrator and evaluator hold a Mid-Year Formative Conference with a focused discussion of progress toward proficiency in the focus areas identified as needing development.

10. Near the end of the school year, the administrator reviews all information and data collected during the year and completes a summative self-assessment for review by the evaluator, identifying areas of strength and continued growth, as well as progress on the focus areas.

11. The evaluator and the administrator meet to discuss all evidence collected to date. Following the conference, the evaluator uses the preponderance of evidence to assign a summative rating of exemplary, proficient, developing or below standard for each performance expectation. Then the evaluator assigns a total practice rating based on the criteria in the chart below and generates a summary report of the evaluation before the end of the school year.

</tr>
</tbody>
</table>

### Component #2: Stakeholder Feedback (10%)

Feedback from stakeholders – assessed by administration of a survey with measures that align to the CCL: Connecticut School Leadership Standards – is 10% of an administrator’s summative rating.

For each administrative role, the stakeholders surveyed should be those in the best position to provide meaningful feedback. For school-based administrators, stakeholders solicited for feedback must include teachers and parents, but may include other stakeholders (e.g., other staff, community members, students, etc.). If surveyed populations include students, they can provide valuable input on school practices and climate for inclusion in evaluation of school-based administrative roles.
Applicable Survey Types

There are several types of surveys – some with broader application for schools and districts – that align generally with the areas of feedback that are relevant for administrator evaluation. These include:

**Leadership practice surveys** focus directly on feedback related to a leader’s performance and the impact on stakeholders. Leadership Practice Surveys for principals and other administrators are available and there are also a number of instruments that are not specific to the education sector, but rather probe for information aligned with broader leadership competencies that are also relevant to Connecticut administrators’ practice. Typically, leadership practice surveys for use in principal evaluations collect feedback from teachers and other staff members.

**School practice surveys** capture feedback related to the key strategies, actions and events at a school. They tend to focus on measuring awareness and impact from stakeholders, which can include faculty and staff, students, and parents.

**School climate surveys** cover many of the same subjects as school practice surveys but are also designed to probe for perceptions from stakeholders on the school’s prevailing attitudes, standards and conditions. They are typically administered to all staff as well as to students and their family members.

To ensure that districts use effective survey instruments in the administrator evaluation process, and to allow educators to share results across district boundaries, the CSDE has adopted recommended survey instruments as part of the SEED state model for administrator evaluation and support. Panorama Education developed the surveys for use in the State of Connecticut, and districts are strongly encouraged to use these state model surveys.

See the SEED website for examples of each type of survey as well as sample questions that align to the CCL: Connecticut School Leadership Standards. See the SEED website for **Panorama Education surveys**.

The survey(s) selected by a district for gathering feedback must be valid (that is, the instrument measures what it is intended to measure) and reliable (that is, the use of the instrument is consistent among those using it and is consistent over time). In order to minimize the burden on schools and stakeholders, the surveys chosen need not be implemented exclusively for purposes of administrator evaluation, but may have broader application as part of teacher evaluation systems, school- or district-wide feedback and planning or other purposes. Adequate participation and representation of school stakeholder population is important; there are several strategies districts may choose to use to ensure success in this area, including careful timing of the survey during the year, incentivizing participation and pursuing multiple means of soliciting responses.

Any survey selected must align to some or all of the CCL: Connecticut School
Leadership Standards, so that feedback is applicable to measuring performance against those standards. In most cases, only a subset of survey measures will align explicitly to the Leadership Standards, so administrators and their evaluators are encouraged to select relevant portions of the survey’s results to incorporate into the evaluation and support model.

For each administrative role, stakeholders providing feedback might include:

**SCHOOL-BASED ADMINISTRATORS**

**Principals:**
- All family members
- All teachers and staff members
- All students

**Stakeholder Feedback Summative Rating**

Ratings should reflect the degree to which an administrator makes growth on feedback measures, using data from the prior year or beginning of the year as a baseline for setting a growth target.

**Exceptions to this include:**

- Administrators with high ratings already, in which case, the rating should reflect the degree to which measures remain high.
- Administrators new to the role, in which case, the rating should be based on a reasonable target, using district averages or averages of schools in similar situations.

This is accomplished in the following steps, undertaken by the administrator being evaluated and reviewed by the evaluator:

1. Select appropriate survey measures aligned to the CCL: Connecticut School Leadership Standards.
2. Review baseline data on selected measures, which may require a fall administration of the survey in year one.
3. Set a target for growth on selected measures (or performance on selected measures when growth is not feasible to assess or performance is already high).
4. Later in the school year, administer surveys to relevant stakeholders.
5. Aggregate data and determine whether the administrator achieved the established target.
6. Assign a rating, using this scale:
Establishing what results in having “substantially exceeded” the target or what constitutes “substantial progress” is left to the discretion of the evaluator and the administrator being evaluated in the context of the target being set. However, more than half of the rating of an administrator on stakeholder feedback must be based on an assessment of improvement over time.

**Student Outcomes Related Indicators includes two components:**

- Student Learning, which counts for 45%; and
- Teacher Effectiveness Outcomes, which counts for 5%.

**Component #3: Student Learning (45%)**

Student learning is assessed in equal weight by: (a) performance and progress on the academic learning measures in the state’s accountability system for schools and (b) performance and growth on locally-determined measures. Each of these measures will have a weight of 22.5% and together they will account for 45% of the administrator’s evaluation.

**State Measures of Academic Learning**

With the state's new school accountability system, a school’s SPI—an average of student performance in all tested grades and subjects for a given school—allows for the evaluation of school performance across all tested grades, subjects and performance levels on state tests. The goal for all Connecticut schools is to achieve an SPI rating of 88, which indicates that on average all students are at the ‘target’ level.

**Currently, the state’s accountability system² includes two measures of student academic learning:**

1. **School Performance Index (SPI) progress** – changes from baseline in student achievement on Connecticut’s standardized assessments.

   **PLEASE NOTE:** SPI calculations will not be available for the 2015-65 school year due to the transition from state legacy tests to the Smarter Balanced Assessment. Therefore, 45% of an administrator’s rating for Student Learning will be based on student growth and performance on locally determined measures.

2. **SPI progress for student subgroups** – changes from baseline in student achievement for subgroups on Connecticut’s standardized assessments.

³ All of the current academic learning measures in the state accountability system assess status achievement of students or changes in status achievement from year to year. There are no true growth measures. If the state adds a growth measure to the accountability model, it is recommended that it count as 50% of a principal’s state academic learning rating in Excelling schools, 60% in Progressing and Transition schools, and 70% in Review and Turnaround schools.

For a complete definition of Connecticut’s measures of student academic learning, including a definition of the SPI see the SEED website.
Yearly goals for student achievement should be based on approximately 1/12 of the growth needed to reach 88, capped at 3 points per year. See below for a sample calculation to determine the SPI growth target for a school with an SPI rating of 52.

\[ \frac{88 - 52}{12} = 3 \]

**Evaluation ratings for administrators on these state test measures are generated as follows:**

**Step 1:** Ratings of SPI Progress are applied to give the administrator a score between 1 and 4, using the table below:

<table>
<thead>
<tr>
<th>SPI Progress (all students and subgroups)</th>
<th>Did not Maintain</th>
<th>Maintain</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPI≥88</td>
<td>1</td>
<td>4</td>
</tr>
<tr>
<td>SPI&lt;88</td>
<td>1</td>
<td>2</td>
</tr>
</tbody>
</table>

**PLEASE NOTE:** Administrators who work in schools with two SPIs will use the average of the two SPI ratings to apply for their score.

**Step 2:** Scores are weighted to emphasize improvement in schools below the State’s SPI target of 88 and to emphasize subgroup progress and performance in schools above the target. While districts may weigh the two measures according to local priorities for administrator evaluation, the following weights are recommended:

<table>
<thead>
<tr>
<th>SPI Progress</th>
<th>100% minus subgroup %</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPI Subgroup Progress*</td>
<td>10% per subgroup; up to 50%</td>
</tr>
</tbody>
</table>

*Subgroup(s) must exist in year prior and in year of evaluation
Below is a sample calculation for a school with two subgroups:

<table>
<thead>
<tr>
<th>Measure</th>
<th>Score</th>
<th>Weight</th>
<th>Summary Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPI Progress</td>
<td>3</td>
<td>.8</td>
<td>2.4</td>
</tr>
<tr>
<td>SPI Subgroup 1 Progress</td>
<td>2</td>
<td>.1</td>
<td>.2</td>
</tr>
<tr>
<td>SPI Subgroup 2 Progress</td>
<td>2</td>
<td>.1</td>
<td>.2</td>
</tr>
<tr>
<td><strong>TOTAL</strong></td>
<td></td>
<td></td>
<td><strong>2.8</strong></td>
</tr>
</tbody>
</table>

**Step 3:** The weighted scores in each category are summed, resulting in an overall state test rating that is scored on the following scale:

<table>
<thead>
<tr>
<th>Exemplary</th>
<th>Proficient</th>
<th>Developing</th>
<th>Below Standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>At or above 3.5</td>
<td>2.5 to 3.4</td>
<td>1.5 to 2.4</td>
<td>Less than 1.5</td>
</tr>
</tbody>
</table>

All protections related to the assignment of school accountability ratings (e.g., the minimum number of days a student must be enrolled in order for that student’s scores to be included in an accountability measure) shall apply to the use of state test data for administrator evaluation.

For any school that does not have tested grades (such as a K-2 school), the entire 45% of an administrator’s rating on student learning indicators is based on the locally-determined indicators described below.

### Locally-Determined Measures (Student Learning Objectives)

Administrators establish **two Student Learning Objectives (SLOs)** on measures they select. In selecting measures, certain parameters apply:

- All measures must align to Common Core State Standards and Connecticut Content Standards. In instances where there are no such standards that apply to a subject/grade level, districts must provide evidence of alignment to research-based learning standards.

- At least one of the measures must focus on student outcomes from subjects and/or grades not assessed on state-administered assessments.

<table>
<thead>
<tr>
<th>SLO 1</th>
<th>SLO 2</th>
<th>SLO 3</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Elementary or Middle School Principal</strong></td>
<td>Non-tested subjects or grades</td>
<td>Broad discretion</td>
</tr>
<tr>
<td><strong>Elementary or Middle School AP</strong></td>
<td>Non-tested subjects or grades</td>
<td>Broad discretion: Indicators may focus on student results from a subset of teachers, grade levels or subjects, consistent with the job responsibilities of the assistant principal being evaluated.</td>
</tr>
</tbody>
</table>
Beyond these parameters, administrators have broad discretion in selecting indicators, including, but not limited to:

- Student performance or growth on state-administered assessments and/or district-administered assessments not included in the state accountability measures (e.g., commercial content area assessments, Advanced Placement examinations, International Baccalaureate examinations).

The process for selecting measures and creating SLOs should strike a balance between alignment to district student learning priorities and a focus on the most significant school-level student learning needs. To do so, it is critical that the process follow a pre-determined timeline.

- First, the district establishes student learning priorities for a given school year based on available data. These may be a continuation for multi-year improvement strategies or a new priority that emerges from achievement data.

- The administrator uses available data to craft an improvement plan for the school/area. This is done in collaboration with other stakeholders and includes a manageable set of clear student learning targets.

- The administrator chooses student learning priorities for her/his own evaluation that are (a) aligned to district priorities (unless the school is already doing well against those priorities) and (b) aligned with the school improvement plan.

- The administrator chooses measures that best assess the priorities and develops clear and measurable SLOs for the chosen assessments/indicators (see the Administrator’s SLO Handbook, SLO Form and SLO Quality Test).

- The administrator shares the SLOs with her/his evaluator, informing a conversation designed to ensure that:
  - The objectives are adequately ambitious.
  - There is adequate data that can be collected to make a fair judgment about whether the administrator met the established objectives.
  - The objectives are based on a review of student characteristics (e.g., mobility, attendance, demographic and learning characteristics) relevant to the assessment of the administrator against the objective.
  - The professional resources are appropriate to supporting the administrator in meeting the performance targets.

- The administrator and evaluator collect interim data on the SLOs to inform a mid-year conversation (which is an opportunity to assess progress and, as needed, adjust targets) and summative data to inform summative ratings.

Based on this process, administrators receive a rating for this portion, as follows
### Arriving at Student Learning Summative Rating

To arrive at an overall student learning rating, the ratings for the state assessment and the locally-determined ratings in the two components are plotted on this matrix:

<table>
<thead>
<tr>
<th>Exemplary</th>
<th>Proficient</th>
<th>Developing</th>
<th>Below Standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>Met all <strong>2 objectives</strong> and substantially exceeded the 2 targets</td>
<td>Met 1 objective and made at least substantial progress on the second</td>
<td>Met 0 objectives and made substantial progress on the 2 objectives</td>
<td>Met 0 objectives and did not make substantial progress on either objective</td>
</tr>
</tbody>
</table>

#### State Measures of Academic Learning

<table>
<thead>
<tr>
<th>Locally Determined Measures of Academic Learning</th>
<th>4</th>
<th>3</th>
<th>2</th>
<th>1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rate Exemplary</td>
<td>Rate Exemplary</td>
<td>Rate Proficient</td>
<td><strong>Gather further information</strong></td>
<td></td>
</tr>
<tr>
<td>Rate Exemplary</td>
<td>Rate Proficient</td>
<td>Rate Proficient</td>
<td>Rate Developing</td>
<td></td>
</tr>
<tr>
<td>Rate Proficient</td>
<td>Rate Proficient</td>
<td>Rate Developing</td>
<td>Rate Developing</td>
<td></td>
</tr>
<tr>
<td><strong>Gather further information</strong></td>
<td>Rate Developing</td>
<td>Rate Developing</td>
<td>Rate Below Standard</td>
<td></td>
</tr>
</tbody>
</table>
Component #4: Teacher Effectiveness Outcomes (5%) 

Teacher effectiveness outcomes – as measured by an aggregation of teachers’ student learning objectives (SLOs) – make up 5% of an administrator’s evaluation.

Improving teacher effectiveness outcomes is central to an administrator’s role in driving improved student learning. That is why, in addition to measuring the actions that administrators take to increase teacher effectiveness – from hiring and placement to ongoing professional learning to feedback on performance – the administrator evaluation and support model also assesses the outcomes of all of that work.

As part of Connecticut’s teacher evaluation state model, teachers are assessed in part on their accomplishment of SLOs. This is the basis for assessing administrators’ contribution to teacher effectiveness outcomes. In order to maintain a strong focus on teachers setting ambitious SLOs for their evaluation, it is imperative that evaluators of administrators discuss with the administrator their strategies in working with teachers to set SLOs. Without attention to this issue, there is a substantial risk of administrators not encouraging teachers to set ambitious SLOs.

### Exemplary vs. Proficient vs. Developing vs. Below Standard

<table>
<thead>
<tr>
<th>Exemplary</th>
<th>Proficient</th>
<th>Developing</th>
<th>Below Standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>&gt; 80% of teachers are rated proficient or exemplary on the student learning objectives portion of their evaluation</td>
<td>&gt; 60% of teachers are rated proficient or exemplary on the student learning objectives portion of their evaluation</td>
<td>&gt; 40% of teachers are rated proficient or exemplary on the student learning objectives portion of their evaluation</td>
<td>&lt; 40% of teachers are rated proficient or exemplary on the student learning objectives portion of their evaluation</td>
</tr>
</tbody>
</table>

### Summative Administrator Evaluation Rating

**Summative Scoring**

Every educator will receive one of four performance ratings:

1. **Exemplary**: Substantially exceeding indicators of performance
2. **Proficient**: Meeting indicators of performance
3. **Developing**: Meeting some indicators of performance but not others
4. **Below standard**: Not meeting indicators of performance

*The term “performance” in the above shall mean “progress as defined by specified indicators.” Such indicators shall be mutually agreed upon, as applicable. Such progress shall be demonstrated by evidence (see Appendix 2).*
Proficient represents fully satisfactory performance. It is the rigorous standard expected for most experienced administrators. Specifically, proficient administrators can be characterized as:

- Meeting expectations as an instructional leader;
- Meeting expectations in at least 3 other areas of practice;
- Meeting and making progress on 1 target related to stakeholder feedback;
- Meeting state accountability growth targets on tests of core academic subjects;
- Meeting and making progress on 3 student learning objectives aligned to school and district priorities; and
- Having more than 60% of teachers proficient on the student growth portion of their evaluation.

**Supporting administrators to reach proficiency is at the very heart of this evaluation model.**

Exemplary ratings are reserved for performance that significantly exceeds proficiency and could serve as a model for leaders district-wide or even statewide. Few administrators are expected to demonstrate exemplary performance on more than a small number of practice elements.

A rating of developing means that performance is meeting proficiency in some components but not others. Improvement is necessary and expected and two consecutive years at the developing level is, for an experienced administrator, a cause for concern. On the other hand, for administrators in their first year, performance rating of developing is expected. If, by the end of three years, performance is still rated developing, there is cause for concern.

A rating of below standard indicates performance that is below proficient on all components or unacceptably low on one or more components.

**Determining Summative Ratings**

**The rating will be determined using the following steps:**

1. Determining a Leader Practice Rating;
2. Determining an Student Outcomes Rating; and
3. Combining the two into an overall rating using the Summative Matrix.
Each step is illustrated below:

A. PRACTICE: Leadership Practice (40%) + Stakeholder Feedback (10%) = 50%

The practice rating derives from an administrator's performance on the six performance expectations of the Common Core of Leading Evaluation Rubric (CCL) and the one stakeholder feedback target. The observation of administrator performance and practice counts for 40% of the total rating and stakeholder feedback counts for 10% of the total rating. Simply multiply these weights by the component scores to get the category points. The points are then translated to a rating using the rating table below.

<table>
<thead>
<tr>
<th>Component</th>
<th>Score (1-4)</th>
<th>Weight</th>
<th>Summary Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Observation of Leadership Practice</td>
<td>2</td>
<td>40</td>
<td>80</td>
</tr>
<tr>
<td>Stakeholder Feedback</td>
<td>3</td>
<td>10</td>
<td>30</td>
</tr>
<tr>
<td><strong>TOTAL LEADER PRACTICE-RELATED POINTS</strong></td>
<td></td>
<td></td>
<td><strong>110</strong></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Leader Practice-Related Points</th>
<th>Leader Practice-Related Rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>50-80</td>
<td>Below Standard</td>
</tr>
<tr>
<td>81-126</td>
<td>Developing</td>
</tr>
<tr>
<td>127-174</td>
<td>Proficient</td>
</tr>
<tr>
<td>175-200</td>
<td>Exemplary</td>
</tr>
</tbody>
</table>

B. OUTCOMES: Student Learning (45%) + Teacher Effectiveness Outcomes (5%) = 50%

The outcomes rating is derived from student learning – student performance and progress on academic learning measures in the state’s accountability system (SPI) and student learning objectives – and teacher effectiveness outcomes. As shown in the Summative Rating Form, state reports provide an assessment rating and evaluators record a rating for the student learning objectives agreed to in the beginning of the year. Simply multiply these weights by the component scores to get the category points. The points are then translated to a rating using the rating table page 82.
### Component Score (1-4) Weight Points (score x weight)

<table>
<thead>
<tr>
<th>Component</th>
<th>Score (1-4)</th>
<th>Weight</th>
<th>Points (score x weight)</th>
</tr>
</thead>
<tbody>

<tr>
<td>127-174</td>
<td>Proficient</td>
</tr>
<tr>
<td>175-200</td>
<td>Exemplary</td>
</tr>
</tbody>
</table>

### C. OVERALL: Leader Practice + Student Outcomes

The overall rating combines the practice and outcomes ratings using the matrix below. Using the ratings determined for each major category: Student Outcomes-Related Indicators and Leader Practice-Related Indicators, follow the respective column and row to the center of the matrix. The point of intersection indicates the summative rating. For the example provided, the Leader Practice-Related rating is developing and the Student Outcomes-Related rating is proficient. The summative rating is therefore proficient.

If the two major categories are highly discrepant (e.g., a rating of exemplary for Leader Practice and a rating of below standard for Student Outcomes), then the evaluator should examine the data and gather additional information in order to determine a summative rating.
## Adjustment of Summative Rating:

Summative ratings must be completed for all administrators by June 30 of a given school year. Should state standardized test data not yet be available at the time of a summative rating, a rating must be completed based on evidence that is available. When the summative rating for an administrator may be significantly affected by state standardized test data, the evaluator should recalculate the administrator’s final summative rating when the data is available and submit the adjusted rating not later than September 15. These adjustments should inform goal setting in the new school year.

## Definition of Effectiveness and Ineffectiveness

Each district shall define effectiveness and ineffectiveness utilizing a pattern of summative ratings derived from the new evaluation system. A pattern may consist of a pattern of one rating. The state model recommends the following patterns:

Novice administrators shall generally be deemed effective if said administrator receives at least two sequential proficient ratings, one of which must be earned in the fourth year of a novice administrator’s career. A below standard rating shall only be permitted in the first year of a novice administrator’s career, assuming a pattern of growth of developing in year two and two sequential proficient ratings in years three and four.

An experienced administrator shall generally be deemed ineffective if said administrator receives at least two sequential developing ratings or one below standard rating at any time.
Dispute-Resolution Process

The local or regional board of education shall include a process for resolving disputes in cases where the evaluator and administrator cannot agree on goals/objectives, the evaluation period, feedback or the professional development plan. When such agreement cannot be reached, the issue in dispute will be referred for resolution to a subcommittee of the professional development and evaluation committee (PDEC). The superintendent and the respective collective bargaining unit for the district will each select one representative from the PDEC to constitute this subcommittee, as well as a neutral party, as mutually agreed upon between the superintendent and the collective bargaining unit. In the event that the designated committee does not reach a unanimous decision, the issue shall be considered by the superintendent whose decision shall be binding.
